Registration Gain for Summer

Registration Shows Increase over Figures for Last Year

REGISTRATION at Cornell for the Summer Session increased about five per cent over last year, according to figures released this week from Morrill Hall. A total registration in all departments of 1644 shows an increase of 77 over the figure of 1567 which represents those who attended Cornell in the summer of 1933. Peak figures for summer school enrollment are in the neighborhood of 3,000 in 1916. Registration reached 1951 in 1932, but fell off heavily last year. The increase for this summer, while small, is regarded as indicative of future increases until the registration once more approximates that of the peak years.

This year is the last time that Cornell will conduct a number of separate schools, however. Under the present system, there are five different summer schools on the campus, all going at the same time, and all running independently of one another. This not only makes it difficult to arrange schedules for students taking work in more than one school, but also increases registration difficulties.

Next summer all the five summer schools will be combined as the Cornell University Summer Session. This will include the regular summer session of the University, and the summer schools in

Home Economics, Hotel, Agriculture, and Biology.

This year is the forty-third in which Cornell has offered instruction during the summer months. The summer term will end August 17. The final issue of the CORNELL ALUMNI NEWS for 1933-34, will appear on August 16.

Especially active interest was shown during advance inquiries in the lectures to be given in chemistry and physics, by Professor Gilbert N. Lewis, and Dr. Paul S. Epstein. Professor Lewis, dean of the college of chemistry of the University of California, is non-resident lecturer on the George Fisher Baker Foundation. His subject for the summer lectures is *Isotopes*.

Dr. Epstein is professor of physics in the California Institute of Technology, and will offer several courses and a series of lectures. A large group of students has signed up for work with Dr. Epstein and Dr. Lewis.

No reduction has been made in the number of courses offered in the summer session this year. Prominent teachers in several fields from other institutions will be members of the faculty, in addition to the corps of Cornell professors.

Owing to continued demand from students all over the country, Cornell's

unique Summer School of Biology is being held again this summer. Sixteen members of the Cornell faculty, nearly all of professorial rank, provide instruction in this school. This is, as reported in the CORNELL ALUMNI NEWS of an earlier date, the only biology session in any regular university where only the regular courses of the academic year are offered instead of short summer courses, and where the summer staff consists only of regular members of the biology faculty.

Courses in the regular summer session which have attracted heavy enrollment include: Professor John R. Banks' course in Business and Industrial Management; Professor Jacob Papish's work in spectroscopy; Professor Howard S. Liddell's courses on the Conditioned Reflex; Professor Harold L. Reed's Money and Banking; the offerings in the Department of Physical Education involving playground activities and their supervision, adult recreation, and interpretive dancing. Training in dramatics through the University continues under Professor Alexander M. Drummond. In the Department of Music, individual instruction in organ and piano is available to students.

Beside the Cornell professors from the regular session, the *[Continued on page 406]*

EIGHTY-FOUR CELEBRATES FIFTIETH REUNION

Front row, left to right: James F. Tuthill '82, Mrs. Marcia Russell, Mrs. Lucretia Kellogg, Lewis H. Tuthill, Henry P. DeForest, Mrs. Emily M. Stevenson, George B. Davidson, Henry D. Sibley. Welles, Wilbur S. Knowles. Back row: Franklin A. Coles, George F. Ditmars, Samuel E. Hillger, Oscar D. Weed, Frederick W. Carpenter.

About Athletics

Trackmen in England

Cornell trackmen, with representatives from Princeton, who invaded England recently to engage in a meet with track stars from Oxford and Cambridge Universities, are reported to have withstood the rigors of the ocean trip, and to have mastered the sand-clay tracks on which they will have to run.

Coach Moakley took twelve of the Cornell track athletes abroad the Ile de France on July 7, to combine with Princeton's best runners. The team is regarded as one of the strongest ever assembled, and Cornell and Princeton are heavy favorites to take the meet from their English rivals on July 21 in the White City stadium in London.

Only first places count in this international race meeting, and a first place earns only one point for the winning team, except in case of a tie at the end of the meet, in which event second places are also counted. Last year on this side of the water, the Americans defeated the English 8-4.

Outstanding event of the meet will undoubtedly be the race between Jack Lovelock of Oxford and Bill Bonthron of Princeton, despite the fact that Lovelock had a bone removed from his knee this year and has not been at his best since, although a year ago he set a new world's record while running against Bonthron with the fast time of 4:07.6. Glenn Cunningham, Kansas runner, this year was forced into an even faster pace to win from Bonthron in 4:06.7. But Bonthron, who trailed in both these record-breaking events, defeated Cunningham only recently in the 1,000 meter run at the A.A.U. national championship meet recently in Milwaukee in the new world record time of 3:48.9, so that he is expected to have plenty of stuff to show against Lovelock.

Dick Hardy, Cornell captain, is favored to win the 100 yard dash, having defeated Captain Davis of the Oxford team last year in :09.8. Bob Linders, of Cornell, is also to run in this race. The English meet will be Hardy's last appearance as a Cornell runner. Although he attained his greatest heights as a runner last year, he was a constant point winner for Cornell during the past season. Linders, who is a sophomore, is also a strong entry in the century dash. As a prep school runner he covered the distance in 10 flat.

Bob Kane, one of the three "local" boys to make the trip this year, will double up and run two events. Only one other American runner, Bonthron, will compete in more than one event. Kane will be the chief American contender in the 440 and 220 yard runs. Last year he set a meet record for the 440 by covering the distance in :48.5. He did not run the 220 last year.

Steve Sampson, another "local," will run the half mile along with Bonthron. Another duel is expected in this event, for Pen Hallowell, former Harvard runner, will compete in this race for Cambridge. Sampson also will run for Cornell for the last time in this meet, as will Kane and Hardy. Although Sampson has still two more years, they are the last two in Law which makes him ineligible for further competition.

Bruce Kerr, Cornell two-miler, and third Ithacan to go, is favored in the two mile run in this meet. He has come along nicely and can be called one of Coach Moakley's developments. When Kerr first came out to run there wasn't much ability apparent. But this year, his junior year, he began to show some real promise, and won both dual meets. He also was elected captain of the cross country team for next year.

Paul Vipond, another senior, retiring president of the Student Council, and leader of all sorts of senior and under-class activities, also winds up his career on the track under Cornell colors. Vipond is a good miler, and should give an exceptionally good account of himself in that race.

Walt Merwin, Cornell captain-elect, and star high hurdler, should have little difficulty in winning his event. He was indoor intercollegiate high hurdle champion this year, and one of Cornell's stars.

Ham Hucker, the only freshman to make the trip, will run the low hurdles. This boy is a dark horse. Although he showed some speed in the few freshman meets this year, little is actually known of what he can do when pressed. He has given fair promise, however, under a stop watch on Schoellkopf Field, of being one of the best runners to enter Cornell in years. In a time trial on the Cornell cinders, Hucker was clocked at 48.9 for the quarter, one of the fastest times ever recorded here.

Two jumpers from Cornell, Scott and Godley, will compete in the English meet. Both are sophomores, and both tied for fifth place in the intercollegiate this spring with high jumps of 6 feet 1½ inches. It was not decided until a few weeks ago, when Scott beat Wenzell of Princeton in the New Jersey State track meet, which jumper should make the trip.

Duke Wood, another sophomore, will toss the shot. In his first year out, Wood has been one of the outstanding surprises of all time with the weights. He is already credited with bettering the 46 ft. mark, and is regarded by Coach Moakley as one of the best prospects he has ever had.

Hank Godshall, Cornell sophomore, will compete in the broad-jump. Godley is one of the best all-round athletes at Cornell, and is practically assured of winning himself a berth on the varsity football squad next fall.

To Join American Team

After the English Meet in London on July 21, Bob Kane, with Bill Bonthron of Princeton, will take a plane from London to Stockholm to join the American team of the A.A.U. in charge of Dan Ferris, secretary of the A.A.U. This team of eight will tour European countries, competing in Scandinavia and central Europe. The team includes in addition to Kane and Bonthron: Percy Beard, high hurdle star; Glen Hardin, who recently set a new record for the 400-meter low hurdles; Ben Eastman, recent record breaker in the 880; Jack Torrence, star shot putter, who tossed the bullet 55 feet 5 inches; and Cornelius Johnson, high jumper.

Kane will run the dashes, and will switch off with Hardin in running the quarter-mile. He earned his place on the team by virtue of his speed in recent meets, in which he competed just prior to sailing with the Cornell-Princeton outfit. As a member of the New York Athletic Club, Kane entered the A.A.U. championship in Milwaukee, and did very well.

Sails for Poland

Edward G. Ratkoski, Cornell high jumper, whose home is in Dunkirk, N. Y., sailed recently for Poland, where, with other American athletes of Polish extraction, he will represent the United States in the Polish Olympics at Warsaw during the first week in August.

Ratkoski, a junior, has been a strong competitor in the high jump for the last two seasons, but bowed to his teammates, George and Charles Scott, for places on the Cornell-Princeton team. The American team which will compete at Warsaw consists of twenty athletes.

Baseball

By only a half game margin, the Cornell baseball team retained second place in the Eastern Intercollegiate Baseball League race in which six other eastern institutions take part each year.

Cornell was assured second place, after losing out to Columbia for the first at the end of the season, when Harvard went down to defeat at the hands of Yale in the very last game of the series. The day previous the Crimson had trimmed the Yale team which gave them a good chance for second place half a game ahead of Cornell. As it was they finished half a game behind. The half game was caused by a tie in an early season game.

The final standings of the clubs:

	W.	L.	Pct.
Columbia	8	4	.667
Cornell	7	5	.583
Harvard*	6	5	.545
Dartmouth	6	6	.500
Pennsylvania	6	6	.500
Yale	6	6	.500
Princeton*	3	8	.273

*—played tie game.

New Track League

A new track league has been formed on the same basis and with the same collegiate personnel as the baseball and basketball leagues. It consists of Harvard, Dartmouth, Yale, Columbia, Princeton, Pennsylvania, and Cornell. This organization will continue to support the I.C.A.A.A. just as it has always done, but will also conduct among its own membership a one-day meet on the Saturday midway between the Pennsylvania relays and the Intercollegiates. The meet will be held at Princeton in 1935, and will circulate among the various colleges thereafter. These colleges are now members of three playing leagues and meet each other in an increasing number of sports besides. The new organization is in no sense a "conference" in the western meaning of the word but supplies some of the features thereof.

Golf

Cornell's representatives in the national intercollegiate golf championships at the Country Club of Cleveland, Ohio, failed to qualify in the first day's play. With 160 necessary to enter the play-off, the five Cornell linksmen dropped to one side as rain sent all scores soaring.

J. DeWitt Wilcox and John Haskell, Cornell's best two threats, came closest with 162's. Henry Lowe scored 169, and Captain Charlie Newman trailed with 173. Robert Williams withdrew.

Tennis

Steve Hamilton of Cornell was eliminated in the third round of the national intercollegiate tennis championships at the Merion Cricket Club courts, Haverford, Pa., when he lost an extra set match to Edward Sutter of Tulane University, 3-6, 7-5, 6-2. Sutter is a brother of Clifford Sutter, one of the country's ranking players.

Season Tickets

The Athletic Association has announced a new policy for season tickets for the coming fall. There will be sold a book to include all fall sports for \$7, a winter book for \$5, and a spring book for \$3. These books will admit to all events in Ithaca in those periods. The committee of senior societies will undertake their sale and it is hoped that there will be a large response, both on the basis of patriotic support and because they are an excellent purchase for the customer.

FRANK E. GANNETT '98, head of the Gannett newspapers and trustee of the University, presided at a round-table discussion of the state's half million dollar milk advertising campaign, following a luncheon at Albany, N. Y., on July 12. Invitations were issued by Governor Lehman to some 500 leaders in various businesses and industries, to attend the luncheon.

TWO NEW SCHOLARSHIPS

A scholarship of \$500 a year has been established at Cornell University by the National Hotel Management Co., Inc. The new scholarship is open to employees and sons and daughters of employees of the company who wish to pursue the four-year course in hotel administration at Cornell University. The selection is to be made by the University's scholarship committee on the basis of need and merit. With satisfactory grades and behavior the student selected may hold the scholarship throughout the four years necessary to complete the course.

The University also announces the establishment of a scholarship to be known as the Harris, Kerr, Forster and Company Scholarship, to the amount of \$200, to be awarded annually to a worthy sophomore or junior in the department of hotel administration who shows promise in the field of accounting. The award will be made later in the summer by the University's Scholarship Committee.

800 ATTEND 4-H Congress

Nearly eight hundred boys and girls from the farms of New York gathered at Cornell June 27, 28 and 29 for the thirteenth annual 4-H Club Congress, eclipsing previous attendance records. From thirty-six counties of New York they came, to visit Cornell and the New York State Agricultural College.

The youthful delegates of the 4-H clubs were welcomed to Cornell on Wednesday night, June 27, at a huge rally in Bailey Hall by L. R. Simons, director of extension of the New York State College of Agriculture, who told them that the real purpose of the 4-H Club Congress is to observe and study, and to give the delegates a chance to carry back to their clubs new methods, better ideals, and renewed inspiration.

The work of the 4-H clubs aims to encourage boys and girls to help themselves. Although attention is focussed on agricultural and homemaking projects, particularly important in New York State, the chief interest of the boy or girl is always considered first.

The program for the Congress included short courses in livestock, crops, forestry, farm shop, poultry, foods, clothing, and room improvement. In addition to these courses of study, there were a large number of contests in which the delegates competed.

The final awards in contests were made by W. J. Wright, state leader of the 4-H clubs, on Friday night, again in Bailey Hall. At this gathering sixty-six contest winners received commendation for their proficiency in livestock judging, milking, tree identification, egg candling, poultry judging, food judging, meat identification, clothing judging, and clothing appreciation.

About

The Clubs

Chicago

Members of the Cornell Club of Chicago will hold informal luncheons every week throughout the summer and cordially invite alumni visiting the "Century of Progress" to attend. Regular luncheons with programs and speakers will be resumed in September. The Club meets Thursday at Mandels at 12:15 p.m. Buel McNeil '27 was recently elected secretary of the Club.

New York

Officers of the Cornell Club of New York for 1934-35 include the following: President, Charles H. Blair '97; vice-presidents, J. DuPratt White '90, John T. McGovern '97, Walter S. Wing '07, Jansen Noyes '10, Wallace B. Quail '19; secretary, Andrew E. Tuck '98; treasurer, Alec C. Clougher '04.

The Board of Governors of the Club are as follows: Blair, Clougher, Roger W. Hooker '21, Tuck, Christopher W. Wilson '00, Bertel W. Antel, '28, Fred W. Hackstaff '05, John S. Parke '32, James J. Clarke '03, Walter R. Kuhn '12, Norman G. Scott '27, Wing, Willard I. Emerson '19, Harold E. Irish '16, Noyes, and Quail.

Librarian of the Club is Dr. Henry P. DeForest '84. Thomas R. Ludlam '11 is manager.

Newark

Officers elected at a meeting of the Cornell Club of Newark on June 22, 1934, were: President, Eric Ruckelshaus '27; vice-president, Clarence Pope '10; and secretary-treasurer, Lowry T. Mead, Jr. '23. Newark alumni meet on the second Friday of each month for luncheon in the Downtown Club, National Newark and Essex Building, Newark, N. J. The next meeting will be held September 14.

SUMMER CONCERTS

The first of five concerts at Cornell, to be held on successive Thursday evenings under the sponsorship of the Department of Music, was given by Professor Andrew C. Haigh on July 12, in the Memorial Hall of Willard Straight. This concert series is free to the public.

Professor Haigh's program included:

Sonata in B major (Op 14. No. 2)
 Beethoven

Greig selections

"Butterfly" "Folk Song"
 "Nocturne" "Puck"
 "Homeward"

Prelude, aria and finale . . . Cesar Franck

Organ recitals by Professor Harold Smith, University organist, are to be given every Sunday evening. The first of these was played by Professor Smith on Sunday, July 15.

Obituaries

PROFESSOR HARRIS J. RYAN '87, former head of the Department of Electrical Engineering at Cornell University, died July 5 at Palo Alto, California, at the age of 68. He was an emeritus professor of Stanford University. Professor Ryan was prominent in many branches of electrical engineering, but was best known as a pioneer and world authority in the study of high voltages. Born in Powell Valley, Pa., he received his early education in Baltimore City College and Lebanon Valley College. He entered Cornell in 1883, the year of the establishment of the course in electrical engineering, and graduated four years later in 1887. For the two years following, he was associated with J. G. White, '85 Ph.D., and D. C. Jackson, '86 G., whom he had known as graduate students at Cornell, in general engineering practice in the Middle West under the firm name of the Western Engineering Company. In 1889 he returned to Cornell as an instructor in physics. The following year he was made assistant professor of electrical engineering, and in 1895 at the age of twenty-nine he was made full professor with complete charge of the Electrical Engineering Department. He remained at Cornell in that capacity until he was placed in charge of the electrical engineering branch at Stanford University. Professor Ryan devoted his time largely to the study of problems that have proved to be of great practical and economic value to the electrical industry. The first of his many contributions to attract widespread attention was an experimental study of the alternating transformer, carried on during his first year as instructor at Cornell. This paper, written when he was only twenty-three years old, has become a classic in its field. While at Cornell he also took up the intensive investigation of high voltages, which he continued throughout his career. The transformer, the porcelain insulator, present-day solutions of the corona problem in high-voltage transmission, all owe much to him and he has had great influence on recent theories of air breakdown at high potentials.

ROBERT H. WILSON '89, president of the Brooklyn Bar Association, and former vice-president of the New York State Bar Association, died July 3, at his summer home in Sea Cliff, L. I., of a heart attack. Shortly after his graduation from Cornell, Wilson took a clerkship with the firm of Jackson and Burr. He was admitted to the bar in 1891, and in 1905 became a member of the firm which became known as Burr, Coombs, and Wilson. Later, after the elevation of Joseph Burr to the Supreme Court bench, the firm was changed to Coombs and Wilson. Coombs, Wilson's partner, died four years ago. Associated with Wilson in the firm at the time of his death were his brother, Christopher W.

Wilson, and his son, Robert H. Wilson, Jr. '16. Wilson is also survived by his wife; a sister, Mrs. Charles E. Scofield; and another brother, George D. Wilson.

WILLARD AUSTEN '91, librarian emeritus of Cornell University, died at the Memorial Hospital, Ithaca, on Sunday morning, July 8, from shock following an operation. Austen was connected continuously with the University Library since his undergraduate days, having been made assistant in the Library in 1889, assistant librarian in 1892, librarian and lecturer on bibliography in 1915, and librarian emeritus in 1929. In 1896 and 1901 he took leaves of absence to travel and study in Europe. He was born December 21, 1860, in Jackson, Michigan, the son of Hiram H. and Elizabeth Reed Austen. He entered Cornell in 1887, after having been a printer for ten years. He took the optional course, and became editor of the *Cornell Era*. He was a member of Beta Theta Pi fraternity. At the time of his death, Austen was Life Secretary of the class of 1891. In 1898 Austen married Jessica Tyler, daughter of Professor Moses Coit Tyler. Mrs. Austen was distinguished for her work for the blind, having translated many works into Braille. Her husband continued this work after her death in 1933. A son, Alan Austen, survives them. Austen was a past master of Hobasco Lodge, F. & A. M., a fellow of the American Library Institute, and a member of the Bibliographical Society of America, the American Library Association, the State Library Council, and the New York State Library Association, of which he was president in 1908-1909. He was a member and treasurer of the Unitarian Church of Ithaca. Politically he was an independent Democrat. The funeral was held Tuesday, July 10, at Sage Chapel, with the Rev. Frank S. Gredler, former pastor of the Ithaca Unitarian Church officiating. Interment was in Pleasant Grove Cemetery. Active bearers were: Dr. A. T. Kerr '95, R. W. Sailor '07, E. R. B. Willis '14, Professor Ralph S. Hosmer, Prof. Floyd K. Richtmyer '04, and Professor A. B. Recknagel. Honorary bearers included: Professor George L. Burr '81, Professor H. C. Elmer '83, Charles D. Bostwick '92, Professor G. W. Cavanaugh '96, Edward A. Ott, Willard W. Ellis '01, Professor Paul R. Pope, Professor Otto Kinkeldey, and Louis F. Wing '93.

WILLIAM H. KENNEDY '10, LL.B., of Buffalo, died at his home March 26, after an illness of eight weeks. Born in Buffalo, Kennedy was educated in the Buffalo public schools, Canisius College, where he received his A.B. degree, and at Cornell Law School. In the fall of 1910, after Kennedy had graduated from Cornell, his father was elected state treasurer, and resigned his position as resident vice-

president of the United States Fidelity and Guaranty Company. Kennedy was brought into the company immediately to occupy the office of resident secretary. Although admitted to the Bar the following spring, he never engaged in active practice of law, but continued through the years as an official of the insurance company. In 1927 he was promoted to be resident vice-president and manager. Throughout his career, Kennedy took an active part in charitable and civic enterprises. During the war he was one of the leaders in the Liberty Loan drives and each year was an active worker in the Catholic Charities, the Joint Charities and the Community Fund drives in Buffalo. Kennedy was also a member of the Chamber of Commerce, and served as director of this body for several years. During his lifetime he travelled extensively. He was a member of the Cornell Club of Buffalo, of which he was a former president, and chairman of the scholarship committee. He belonged to Phi Delta Theta fraternity, and Phi Delta Phi legal society. He is survived by his wife, Agnes Heintz Kennedy; two sons, John H. Kennedy '22, and Kevin Kennedy; and a sister, Miss Jane Kennedy.

STANLEY GEORGE GORDON '14, LL.B., died at LaCrosse, Wisconsin, on June 16, following an emergency operation for appendicitis. Gordon was born at LaCrosse in 1890 and attended the University of Wisconsin for two years before entering Cornell. Since graduation he has practised law in LaCrosse, where he was held in high esteem by other members of his profession. He had been active in the Republican party, and was twice elected to the office of county prosecuting attorney. During the World War, Gordon took part in five major engagements in France with the 76th Field Artillery. At the close of hostilities, he became a member of the Army of Occupation, and was editor of *Watch on the Rhine*, from February to June, 1919. Gordon married Helen Sheridan of Chicago in 1917. They have one daughter, Edith. In addition to his wife and daughter, Gordon is survived by two brothers, both Cornellians, Robert Gordon '11, and Donald A. Gordon '25. Gordon was a member of Chi Phi fraternity.

GOLDIE DOES WELL

Valor's Goldie, of Cornell, who is only three and a half years old, has just completed a new official record which puts her in a class with the Blue Bloods.

Goldie, it might be added, is one of Cornell's prize Guernseys, and she has set a record of milk production for the year of 9,169.5 pounds of milk, and 433.1 pounds of butter fat. Her name has been engraved upon the rolls known as the Advanced Register of the American Guernsey Cattle Club.

Burdick Given State Appointment

Cornell Dean Named Chairman of Law Division Group

ANNOUNCEMENT was made recently that Governor Lehman had appointed Professor Charles K. Burdick, dean of the Cornell Law School, to be chairman of the new State Law Revision Commission. Dean Burdick had resigned a week previously from his position on the Governor's Judicial Council, in order to accept chairmanship of the new commission.

The group will be called upon to make a study which will bring state laws into accord with modern economic trends. In making the announcement, Governor Lehman termed it one of the most important agencies of government to be established in recent years and "the first of its kind in the nation."

Members, in addition to Dean Burdick, are: Warnick J. Kernan '04, of Utica, N. Y.; Walter H. Pollak, of New York; and Young B. Smith, dean of the Columbia University Law School.

The chairmen of the Senate and Assembly judiciary committees—Senator William T. Byrnes, and Assemblyman Horace M. Stone—are ex-officio members of the new commission.

More than ten years ago, Justice Benjamin N. Cardozo, then judge of the state Court of Appeals, proposed what was then termed a ministry of justice, the purpose of which was to undertake an orderly revision of the laws of the state, and at the same time to maintain supervision of the operation of the courts.

The Commission on the Administration of Justice, appointed in 1931 by

Governor Franklin D. Roosevelt, after careful study proposed the creation of two new state organs, a Judicial Council and a permanent Law Revision Commission, both of which were provided for by the last session of the Legislature.

The Judicial Council, the purpose of which is to direct and advise in administrative work of the courts, has Chief Judge Cuthbert W. Pound '87, of the Court of Appeals, as its chairman.

Dean Burdick was a member of the Commission on the Administration of Justice, and sponsored in that body the proposal for the creation of the Law Revision Commission.

In announcing the appointment of the Law Revision Commission, Governor Lehman said:

"I consider the Law Revision Commission one of the most important agencies of government created in recent years in this state. It marks a progressive development in the administration of justice not only within this state but throughout the country. It is the first of its kind in the Nation.

"The Commission is charged with the duty to examine the common law, the statutes and judicial decisions of this state, and to recommend to the Legislature the changes that should be made. It will receive and consider suggestions from members of the Bench and Bar, public officials, business men, and laymen generally. In short, it will be a vehicle to assist the Legislature and bring the

law of this state into conformity with modern economic needs and conditions and to maintain the law in consonance with changing economic and social facts.

"I wish to take this opportunity to point out that the establishment of the Law Revision Commission was one of the principal recommendations of the Commission on the Administration of Justice in the State of New York. The chairman of that commission, Senator John L. Buckley, and all of its members deserve much credit in achieving this step forward."

RELIGIOUS SCHOOL

A practice school for teachers of beginners, primary, and junior departments of Sunday schools is the chief feature of the Central New York Summer School of Christian Education, which opened at Cornell this week.

For three hours each day, teachers and prospective teachers of the lower grades of Sunday schools will be under the supervision of experienced church school teachers. The first hour will be devoted to lectures and explanations, but during the second and third hours, they will do actual teaching, applying what they have just been taught.

The Central New York Summer School of Christian Education is an interdenominational training school for Sunday school workers in all departments. It is sponsored by the New York State Council of Churches and Religious Education, and the Cornell United Religious Work. It serves twelve up-state counties. Members of the C.U.R.W. religious staff are on the faculty.

1924, THE TEN YEAR CLASS

CORNELL ALUMNI NEWS

ITHACA, NEW YORK

FOUNDED 1899

INCORPORATED 1926

Published for the Cornell Alumni Corporation by the Cornell Alumni News Publishing Corporation.

Published weekly during the college year and monthly in July and August: thirty-five issues annually. Issue No. 1 is published in September. Weekly publication ends the last week in June. Issue No. 35 is published in August.

Subscription price \$4.00 a year, payable in advance. Canadian postage 35 cents a year extra; foreign 50 cents extra. Single copies fifteen cents each. Subscriptions are payable in advance and are renewed annually unless cancelled.

JULY, 1934

DATES FIXED For Next Five Years

At the recommendation of President Farrand that they adopt the dates set by the University Faculty, the Board of Trustees, at their June meeting, fixed for five years the dates of the beginning of instruction, and all University holidays and recesses.

Instruction will begin on Thursday, September 26, 1935; October 1, 1936; September 30, 1937; September 29, 1938; and September 28, 1939.

Thanksgiving recess will be Thanksgiving Day and the Friday and Saturday next following it in each year.

Christmas recess: Two weeks, including Christmas Day and New Year's Day as follows: In 1935-36, 1936-37 and 1937-38, from Saturday 1 p.m. until Monday at 8 a.m.; in 1938-39 and 1939-40 from Wednesday at 6 p.m. until Thursday at 8 a.m.

First day of instruction for the second term: Monday, February 10, 1936; February 15, 1937; February 14, 1938; February 13, 1939, and Feb. 12, 1940.

Spring recess: From Saturday at 1 p.m. until the second following Monday at 8 a.m. as follows: March 28-April 6, 1936; April 3-April 12, 1937; April 2-April 11, 1938; April 1-April 10, 1939; and March 30-April 8, 1940.

Spring Day holiday: That Saturday in May which shall be chosen annually by the Faculty Committee on Student Activities in consultation with the Athletic Association, provided that the day appointed shall precede the beginning of final examinations by more than a week.

Commencement Day: Monday, June 15, 1936; June 21, 1937; June 20, 1938; June 19, 1939; and June 18, 1940.

BABY'S PRANKS Are Experiments

What is, in an ordinary home, disburbing mischief of a very young child, is experimentation on the part of the child in an effort to understand how life about him moves, according to Marie B. Fowler, of the Home Economics College, who has been making a special study of babies and their behaviour for many years.

In the Nursery School at Cornell, where Miss Fowler does her observations, many objects are left about so that the children can pick them up, examine them, throw them, push them over, or do whatever they please. While this sort of activity in a home would undoubtedly drive mother crazy, and keep father in the poor house, it is expected in the Nursery School. Grown-ups are present only in sufficient numbers to keep a careful watch over the children so that they will not injure themselves or one another, and all other adults are kept in small observation booths, where they can see and hear the children and not be seen themselves.

From these booths comes the startling news that when a child upsets a table, he does it for the purpose of learning what happens to a table when upset, and not merely to drive his mother frantic. Nothing has yet been discovered at the Nursery School about the mischief of children from ten years to fifty.

GUISE VISITS EUROPE

Professor Cedric H. Guise '14, professor of forestry management at Cornell, has been appointed a member of the commission organized by the Overlander Trust, a branch of the Carl Schurz Foundation, to study the results of long time, sustained yield forest management in Germany, Austria, and Czechoslovakia. The commission consists of ten prominent timberland owners and operators in the United States, appointed regionally. Its members will sail July 25 for a five weeks trip through the forests of these three countries.

Professor Guise, who understands American conditions, will point out the features of European forestry methods which can be applied to American forests. Under the guidance of Professor Franz Heske, professor of forestry management at the Saxon School of Forestry at Tarandt, the party will study the general problem of forest administration, with particular references to the financial elements involved.

They will investigate methods of taxation applied to privately owned forest properties, as well as the problem of forest protection, and methods of cutting and regenerating old forests. The report of the commission will be published in the fall.

Upset political conditions will not affect the trip, Professor Guise says, and no difficulties are anticipated.

'78 REUNION STORY

Eugene Baker, 110 West Seneca Street, Ithaca, N. Y.

Mrs. Willard Beahan, 2213 Bellfield Road, Cleveland, Ohio.

Frank Bruen, 22 High Street, Bristol, Conn.

George K. Detwiler, 300 Richardson Bldg., Toledo, Ohio.

Frederick A. Halsey, 356 W. 420th Street, New York, N. Y.

Albert W. Smith, 13 East Avenue, Ithaca, N. Y.

Robert H. Treman, 411 University Avenue, Ithaca, N. Y.

Edward N. Trump, 1912 West Genesee Street, Syracuse, N. Y.

At our dinner on June 15, in Sage College, there were also present Mrs. Eugene Baker, Mrs. George Detwiler, and Miss Halsey (a sister of Fred Halsey) and some members of the '77 and '76 classes. At other meetings there were Mrs. A. W. Smith, Mrs. R. H. Treman and Edward Trump's daughter and his son who is a member of the class of '34.

Mrs. Fred A. Hale, Jr., of Salt Lake City, Utah, was also in Ithaca. Fred Hale, Jr., '78, had expected to accompany her but was unable to come. Mrs. Hale came to see her granddaughter graduate from Cornell.

The members present were all housed in Sage College. We attended many University functions, motored to Taughannock Falls and Watkins Glen, toured the campus, visited the new buildings, heard the Senior Singing, saw the class pipe, originally given by '78, handed down from '34 to '35, attended the Glee Club concert, and the play at Willard Straight, and were all present at the dinner given by Mr. Van Cleef on Saturday night, at which President Farrand congratulated us on having been able to feel a thrill for so many years as we watched the University growing.

The Reunion was a success. All will be back next year.

B. D. BEAHAN,
Class Secretary

ON TO WASHINGTON

Another Cornell faculty man has succumbed to the lure of the New Deal. He is Dr. Orlo H. Maughan, extension assistant in farm management, who took up his duties in Washington at the beginning of the month as a statistical assistant for the Farm Credit Administration.

Maughan, a former resident of Etna, N. Y., near Ithaca, graduated from Cornell in 1931, and received his Ph.D. this spring. His graduate work in merchant credit led to his selection to make an analysis of both long and short term credit loans by the Farm Credit Administration. He will probably be called on to do extensive travelling in this work. Maughan is the son of Dr. G. H. Maughan, of the Cornell Medical College faculty.

Mid-Summer on the Campus

SUMMER SCHOOL opened on July 9th. The students registered in the Drill Hall. I am not able to state how many customers appeared—it takes the administration a much longer time to balance their figures for summer school than for the regular session—but the campus cops, who have an eye for such things, agree that the number is much larger than last year. The cars parked around the Drill Hall were in number about what you'd expect for a basketball game attended by 2,500 people.

THE PERSONNEL TURNS TRUE to type with perhaps more school teachers and fewer busted students making up credits. There is a surprisingly large number of apparently middle aged folk pursuing some intellectual curiosity—bugs, art or history—with a gleam in their eyes.

OMER JONES, 56, died suddenly at his home on July 4th. For the 20 years last past Mr. Jones has been chief cook at Sage College and, for 12 years, owner and operator of the XYZ Club, an organization designed to provide social amusements for Ithaca's colored population. For a number of years he presided over the training table of the Cornell crews.

THE DEATH of Omer Jones recalls an occasion when he was the cause of no little embarrassment to the University administration.

IN 1921 THE LATE Mr. Thomas Tree was not only Superintendent of Dining Halls and Dormitories on the campus but also the executive officer of a secret civic committee organized to promote virtue and encourage law enforcement in Ithaca. In the first capacity Omer Jones was his indispensable assistant. In the second Mr. Tree was the means of bringing to Ithaca a group of Federal prohibition agents to enforce the law and arrest malefactors over Spring Day.

ALL THE FEDERAL AGENTS accomplished for Mr. Tree was to arrest his indispensable colored cook as the illegal possessor of four crocks of alleged homemade wine. It took an awful lot of work with the United States attorney to get Omer's hearing postponed so he could go to Poughkeepsie and cook for the crews. I don't know what the ultimate outcome was—except that Mr. Tree never sent for any more Federal raiders.

THE JOINT Princeton-Cornell track team sailed on July 7th by the Ile de France to compete with the combined outfits of Oxford and Cambridge. The eight days of training in England preceding the meet

will be divided between Exeter College, Oxford, and Cambridge, where the boys will be housed at Emmanuel. From Cambridge they'll all go up together (or is it down?) to London for the games on July 21st.

ONE CAN imagine no more valuable experience for an American undergraduate than to take part in one of these quadrennial invasions of England. One of our fondest memories involves coming quietly upon a Cornell runner lying on his back in a quiet alcove of the Bodleian Library and gazing up at the noteworthy ceiling of that place. We knew he'd never before been 300 miles from the up-state village where he was born and that his recumbent position was due to the fact that he'd been instructed to keep off his winged feet in the interests of racing efficiency. So he lay on his back in the Bodleian and sucked up the centuries in the presence of great beauty. And he wist not that his face shone.

MISS KATHERINE BARTON (Katie), daughter of the late Colonel Barton and Mr. Erling B. Brauner (Vitty), son of Professor Olaf Brauner were married on June 30th. The wedding was small and quiet—to the extent that any wedding can be small and quiet which is attended by all the Bartons and all the Bruners.

CORNELL STUDENTS, past and present, will tell you that lake trout, although abundant, in Cayuga, cannot be taken there by angling. On the other hand, the same fish take the hook freely in Seneca Lake. It is the general impression, created by generations of students, that the brains of Cornell University have pondered this phenomenon for time immemorial without being able to arrive at a satisfactory explanation. The true fact, is, of course, that Cornell students, past and present, are too credulous and get too much of their education in the barber shops.

THERE ARE LOTS and lots of lake trout in Cayuga. The great difficulty in catching them arises from the fact that they feed in deep water and in very definite locations. For some years no one has been able to locate any of these feeding grounds but in the last month the Marion brothers, local sportsmen, have discovered one of them in the deep water off Willets Station this side of Aurora. Scores of trout, running from ten to fifteen pounds, have been taken there by trolling with spinners on copper wire in deep water.

THE MARION brothers state that years ago many lake trout were taken off Lake Ridge but that they suddenly disappeared from that place. It is the theory that

freshets and the resulting debris ruined the Lake Ridge feeding ground and that the trout then moved up to Willets where they have only now been discovered after years of search.

THE POULTRY DEPARTMENT has announced the discovery of a method whereby it is possible to determine the sex of a chicken within a few days after it is hatched. I hear you murmur that this sex business is being overdone and that the ordinary person ought to be content to wait a reasonable time in order to find out by natural processes whether any particular chicken will ultimately crow or cackle. That is all right for you and me but it is of vital importance to a commercial chicken-raiser to learn the facts at the earliest possible moment. These people want pullets and nothing else. At the present price of broilers every little rooster who survives a week represents a loss of money.

THE POULTRY DEPARTMENT merely announces that they can determine sex in chickens almost at once. They do not tell you how they do it. This seems to be carrying delicacy almost too far. On the other hand, just see what is happening to Hollywood.

PROFESSOR Arthur A. Allen has returned from Churchill in the arctic zone where he has been studying the habits and customs of the northern ptarmigan, which is a first cousin of our own ruffed grouse. Professor Allen brought back with him several settings of ptarmigan eggs which he is now attempting to hatch with the invaluable assistance of some bantam hens. A good many people will tell you this can't be done but doing things that couldn't be done is Professor Allen's specialty. Here is an experiment that appeals to the imagination of the layman. Here are birds shortly to be hatched in Tompkins County, all of whose ancestors have adapted themselves to the aurora borealis and the conditions of the extreme north. To what extent will they adapt themselves to their new environment and how long will it take for them to mingle freely (if at all) with the ruffed grouse? The experiment ought to supply some very useful data as to the relative importance of heredity and environment

PRESIDENT FARRAND is still up in Canada catching salmon. Gilmour Dobie has taken a cottage down at Shelldrake. Professor Cedric Guise is conducting a party of lumbermen to Germany to study forestry methods in that afflicted country, and the Editor of this department is stepping out for two weeks' dirt roading by Ford in Vermont. R.B.

PTRICKING

Pthe Ptarmigan

Bantam hens out at the poultry department are doing their best to bring into being some forty ptarmigans from eggs which Dr. Arthur A. Allen '16 collected on his recent trip into northern Canada to study these game birds. If the hens can do it, it will be the first time that ptarmigans have been hatched in captivity.

Dr. Allen's trip was described as more successful than expected. He spent a month at Churchill, a trading post about 1,000 miles north of Winnipeg. Three graduate students accompanied Dr. Allen, and remained at Churchill to finish the project. They are Fred M. Baumgartner, Margaret Heydweiller, and Theodora Cope. The primary object of the expedition was to make comparative studies of the life history of the ptarmigan with that of our ruffed grouse, in order if possible to discover a preventive for the disease which regularly depletes the ranks of this bird. In addition to this work, the expedition took numerous photographs and motion pictures of several little known birds, among them the golden plover and the arctic tern. These birds make the longest migrations of any known birds, wintering in southern South America, and in the antarctic. Pictures were also obtained of the Hudsonian curlew, and the Harris sparrow, the eggs of which were discovered for the first time by Dr. George Sutton, curator of birds at Cornell, who spent fifteen months in northern Canada several years ago.

When Professor Allen left for home spring had just arrived. The ice was breaking up on the Hudson Bay, and great numbers of white whales and seals had put in their appearance. A snowstorm occurred a week before Dr. Allen started back, and drifts of snow eight feet deep still are to be found.

HOTEL JOBS

One hundred per cent employment among all graduates was achieved by Cornell's hotel course last week, when the last unattached graduate reported that he had made a connection.

This is the second time in recent years when this record was reached. Early in September, 1933, every one of the 171 graduates was working, but with the close of the resort season a few men became available. Although many new jobs were found during the following months, always a few men have been left open for one reason or another, and the percentage of employment has hovered around 98 and 99. On the fifth of July it reached 100 again, this time with 231 graduates, including those who came into the field in February and in June.

Professor Meek, in charge of the placement service, doubts that the record will hold up for long because changes are always occurring.

Weddings

RUTH ABEL '31 and William A. Southworth '32 were married at the home of the bride's aunt, Mrs. Clara B. Smith, at Olean, N. Y., on June 30. For the past three years, Mrs. Southworth has been teaching at the Trumansburg Central High School. She is a member of Delta Gamma sorority. Southworth, who graduated from the Cornell Law School this spring, was active in campus affairs. He was editor of the *Cornell Widow*, leader of the Musical Clubs and of the University Band, and a member of Lambda Chi Alpha, Phi Kappa Phi, Sphinx Head, Red Key, and the Savage Club. He was elected to the board of the *Cornell Law Quarterly*. After a short wedding trip the couple will reside in Cleveland, Ohio, where Southworth is associated with the law firm of Squire, Sanders, and Dempsey.

ELIZABETH PAINE '34, daughter of Professor and Mrs. E. T. Paine, of Ithaca, was married July 6 at the summer home of her parents, Prospect Harbor, Me., to Carl Shabtac '32, of Schenectady. Shabtac is at present employed by the General Electric Company. After a short motor trip along the New England coast, the couple will be at home at 25 Wallace Street, Scotia, N. Y., near Schenectady.

EDWARD T. HORN, 3D, '31, son of the late William M. Horn, pastor of the Ithaca Lutheran Church, who succeeded his father in the University Lutheran pulpit last month, was married on June 30, at Hilton, N. Y., to Miss Sophie W. Oldach. The ceremony was performed by the Rev. W. H. Oldach, the bride's father, and the Rev. C. W. Oldach, a brother. Mrs. Horn is a graduate of the Brockport Normal School and a teacher in the Ithaca Public Schools. Horn was graduated from Cornell in 1931, and later attended the Lutheran Theological Seminary, at Mount Airy, Philadelphia, from which institution he graduated this spring. He was ordained in May at Albany, and took over his father's pulpit at Ithaca.

VIRGINIA S. MERRITT, daughter of Professor and Mrs. Ernest Merritt, was married June 25 to John Thompson Emlen, of Germantown, Pa., at St. John's Episcopal Church, Ithaca. Mrs. Emlen attended Swarthmore College for two years before coming to Cornell, where she graduated in 1933. She is a member of Kappa Alpha Theta. Emlen graduated in 1931 from Haverford College, and received his doctorate from Cornell in ornithology this year. He is a member of Sigma Xi, honorary scientific society.

MISS CAROLINE C. BEDELL, daughter of Professor and Mrs. Frederick Bedell, of Cornell, was married June 23, at Sage Chapel to Dr. Henry M. Thomas, Jr., of Baltimore, Md.

MARION A. ANDERSON was married on June 30, to Miss Frances R. Weed, of Ithaca, at the First Methodist Episcopal Church, Ithaca, by the Rev. A. P. Coman. Anderson, who has been attending Cornell during the past year, is employed by the General Ice Cream Corporation in Utica.

DOCTOR EDGAR MAYER, member of the faculty of the Cornell Medical College at New York, and Mrs. Rheta Guggenheim Jaffee were married July 11 at the bride's summer home on Loon Lake, according to a press dispatch received here. Dr. Mayer is also a medical director of the National Variety Artists Sanatorium at Saranac Lake.

ASA D. RUMSEY '34 and Miss Kathryn Grace Dickens, both of Ithaca, were married June 27 in the Laurence Memorial Chapel on Kayutah Lake. A reception for the wedding party and members of the families was held after the ceremony at the home of the bride's family.

HOW TO EAT CHICKEN

When you sit down to the table and have a chicken placed before you, you need no longer wrestle politely with it, hoping all the time that it will not fly into the lap of your host (or guest), provided the chicken is served the new way developed at Cornell by the poultry department.

This new method is alleged to offer market possibilities where live broilers are hard to sell, and where the price is low. It consists of skinning the broiler by pulling on its legs, twisting them from its body, and tearing the chicken apart. This removes the skin, feathers and all, so that you needn't worry about how well it's been cleaned, either. The final result of the method is a chicken in small pieces, nearly all joints dislocated so that it should succumb easily to the knife and fork.

Mark Twain once described something similar, which he called the German method of carving a chicken. His method for doing this was to "use a club and avoid the joints."

PFANN VS. SWINDLERS

George R. Pfann '24, who made football history at Cornell, now assistant federal attorney, appeared recently in Federal Court in New York City as the prosecutor of five men charged with using the mails to defraud.

The five are alleged to have been connected with what has been called the largest and most systematic swindling ring ever uncovered. There are eighteen other defendants in the case, but only five are available for trial.

Pfann, who studied at Oxford as a Rhodes scholar after completing his law studies at Cornell in 1926, lives at Forest Hills, L. I., with Mrs. Pfann, who was Betty T. Wyckoff '27.

SUMMER THEATRE

The Cornell Summer Theatre, now entering upon its eleventh season, presented its first production on Friday and Saturday, July 13 and 14, in Willard Straight Theatre, before a capacity house.

Original campus plays, always a drawing card, proved up to expectations, and the audience which witnessed the performances of Charles Moss's *This is What Happened*, and Avery Cohan's *Dollar Deliriums*, winners, as you will remember in last year's Heermans Prize Play contest, were pleased beyond measure, or at least they seemed to be. In addition to the prize works, there were also presented two other competent bits of Cornell writing, *Our Good Brother Joseph* by Philip Freund, and *An Affair of Honor*, which Hyman Yudewitz wrote.

This is What Happened, by Moss, is an amusing farce-satire on an incident in the life of a columnist, and *Dollar Deliriums* is in that modern form of dramatic expression sometimes referred to as "expressionism." Freund's play tells a story of Villon, the French poet, and Yudewitz throws discretion to the winds, and produces laughs in a satiric vein with straight high comedy.

It is interesting to note that the Willard Straight Theatre people, which is the Dramatic Club, have finally succumbed to the times. In a handbill explaining the Summer Theatre to summer session students, they have put in this line, apparently inspired by the signs on every movie palace in the country, "Patrons will find that it (the Willard Straight Theatre) is comfortable and cool on the hottest summer nights."

CONTROL OF DISEASE

Bang's disease, a scourge of cattle herds, has succumbed to treatment under new methods developed after seven years of research and experimentation by three members of the staff of the New York State Veterinary College at Ithaca. They are R. B. Birch, professor of veterinary medicine at the experiment station; Dr. C. H. Milks, former assistant to Dr. Birch, and now in practice at Newark Valley, N. Y.; and H. L. Gilman, assistant professor of veterinary medicine.

The program of research which led to a method of control of the disease was undertaken in 1928, with the aid of a grant from the United States Bureau of Animal Industry. The results have lately been published in the *Journal of the American Veterinary Medical Association*.

Control of the disease was achieved through giving blood tests to the cows in the herds; and by keeping exhaustive records and making repeated check-ups, sufficient data were acquired to evolve effective measures. Sale of affected cows, or their segregation from the healthy members of the herds, proved successful in eliminating the disease.

TOMPKINS COUNTY Model for U. S.

Tompkins County, of which Ithaca is the county seat in case you don't know, has been chosen by the rural advisory committee of the TERA as the area in which a general program of rural improvement and beautification will be started later in the summer, to make the county the model for all other counties in the United States.

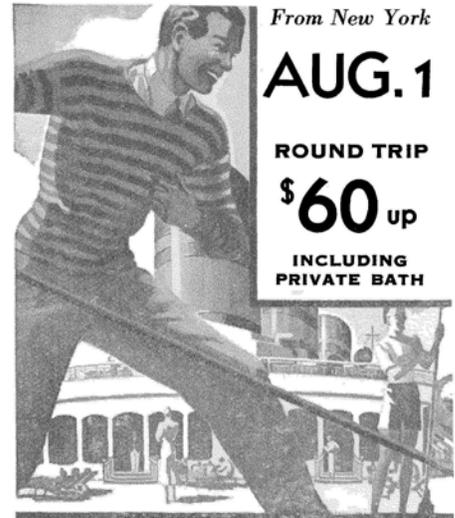

The decision was made at a meeting at Syracuse of the committee of which Dean Carl E. Ladd '12, of the New York State Colleges of Agriculture and Home Economics, is head. As recommended by the committee this demonstration would consist of the purchase of all sub-marginal lands and their transfer to the State Conservation Department, for reforestation and game refuges; moving of families to subsistence homesteads, either grouped or singly; enlisting the co-operation of the State Department of Education in replanning school districts; improvement of roads with federal funds plus county funds, carried out in conjunction with true needs as revealed in land use surveys; extension of electric power lines in co-operation with local people; and through the co-operation of local agricultural extension groups, the development of community educational, recreational, and social groups which will absorb the transplanted marginal farmers and will also serve the best interests of the community as a whole.

Tompkins county was chosen after a survey of the entire state, because this county has already made such a success in civic improvements, such as roads, parks, drainage, bridges, and playgrounds, and is recognized as one of the most successful in its use of state and federal relief funds. Tompkins county has shown competence in using such money, and is also far enough advanced so that a foundation is laid for further improvements, and less money will be necessary to carry out the aims of the committee.

Dean Ladd stated that the Tompkins county project is intended to serve as a model for similar programs in other parts of the state. Work in the model area will continue as long as there is need for work relief or until the plan is completely carried out. The farm-to-market improvement is regarded by Dean Ladd as the most important single item in the plan.

PROFESSOR Otto F. Hunzicker '00, former faculty member at Cornell and Purdue Universities, who is now connected with a commercial dairy enterprise, was honored by the American Dairy Science Association during its convention in Ithaca recently, with a scroll paying tribute to his contributions to dairy science.

AUG. 1

ROUND TRIP

\$60 up

INCLUDING PRIVATE BATH

A Jolly Reunion on the Pleasure Planned
"QUEEN of BERMUDA"

(22,575 Gross Tons)

THE best reunions are the informal, happy-go-lucky ones—like this sea going college alumni party on the famous "Queen of Bermuda"! No speeches, no parades. Just good times in the best of company... with the alumni of Cornell and other colleges on the sports deck, the dance deck with its adjoining night clubs, in the great swimming pool, in the magnificent lounges. Get up your own party—or come along and meet friends, classmates and other college men in "pleasure-planned" Furness surroundings. Ship returns within five days, allowing one day in Bermuda, or you may stop over for a later return sailing.

For reservations apply local agent or Furness Bermuda Line, 31 Whitehall Street (where Broadway begins), New York. Offices in principal cities.

FURNESSES

HUTT CHOSEN Poultry Head

Dr. Frederick Bruce Hutt, professor of animal genetics and poultry husbandry at the University of Minnesota, has been named to succeed Professor James E. Rice as head of the department of poultry husbandry at Cornell. Dr. Hutt's appointment became effective July 1, one day after the retirement of Jimmy Rice, who for thirty-one years had headed poultry work at Ithaca.

Trained in this country and abroad, Dr. Hutt brings to his new position wide experience in the practice of poultry breeding, in both research and teaching. He was born in Guelph, Ontario, in 1897, and received the degree of bachelor of science from the University of Toronto in 1923, master of science at the University of Wisconsin in 1925, and Ph.D. at the University of Edinburgh in 1929, where he specialized in animal genetics and poultry breeding.

While an undergraduate, Hutt was chosen from a class of 154 students for the scholarship to the best all around man of his year. In 1929 he was awarded the research prize of the Poultry Science Association for the most significant research of the year.

Since the age of 12, Hutt has owned and managed poultry farms, working later as a poultryman at the Ontario Agricultural College, at Guelph, and paying his way through college by raising poultry on his father's farm from 1919 to 1923.

Positions held by him in the past have been numerous. He was lecturer in

poultry husbandry at the University of Manitoba and was extension poultryman at the same university from 1923 to 1927. Later he was assistant professor of poultry husbandry at the University of Minnesota, associate professor from 1929 to 1931, and since that time full professor. In addition he served as extension poultryman in his first year at Minnesota.

Hutt is a member of the American Association for the Advancement of Science, the American Genetic Association, the Poultry Science Association, of which he served as president during 1933, and other scientific societies. He has travelled widely, visiting experiment stations in the United States and Canada, and agricultural colleges, universities, and research institutes in England, Scotland, Sweden, Denmark, and Germany. He has produced over thirty publications.

STRAW VOTE

Cornell students, through the medium of a straw poll conducted by the *Literary Digest*, with the aid of the *Cornell Daily Sun*, revealed that they were for the large part in favor of President Roosevelt's administration and the resultant New Deal. The vote was 1408 in favor, and 938 against, the administration.

Cornell was one of seventeen colleges voting 16,293 in favor of the President's acts and policies and 9,025 against. In the city of Ithaca, according to the *Literary Digest*, feeler of national pulses, the vote so far shows almost an even division, with 492 in favor, and 480 against the policies.

Summer Session

Continued from page 397] teaching staff of the summer term has been augmented with the following men: Frank H. Finch, director of Guidance, University High School, University of Minnesota; Leo Gershoy, associate professor of History, Long Island University; Horace Kidger, head of the department of Social Studies, Newton, Mass., High School; D. E. Murray, director of physical education, Madison Junior High School, Rochester, N. Y.; William H. Pillsbury, superintendent of Schools, Schenectady, N. Y.; Russell M. Story, professor of Political Science, Pomona College; Harold W. Thompson, professor of English, New York State College for Teachers; Arthur L. Woehl, assistant professor of Speech, Hunter College, of the City of New York.

In the graduate school of Education, teachers from other institutions are: Arthur K. Getman, chief, Agricultural Education Bureau, New York State Department of Education; Margaret Hutchins, supervisor of Home Economics Education, New York State Department of Education; Claude L. Kulp, superintendent of Schools, Ithaca, N. Y.; Ellwood LaFortune, director of guidance, and vice-president of the Senior High School, Ithaca, N. Y.; Cayce Morrison, assistant commissioner for Elementary Education, New York State Department of Education; Marion S. Van Liew, chief, Home Economics Bureau, New York State.

1912 IN REUNION REGALIA

Front row, left to right: Kellogg, Boocheever, Ladd, Betty Ladd, Mrs. Boocheever, Virginia Kerr, Mrs. John F. Coffin, John Coffin, Jack Warner, Priscilla Coffin, Dick Coffin, Foster Coffin, Jean Warner, Mrs. Harry B. VanDeventer (Marianna McCaulley), Nina Smith, Cuccia, Mrs. E. A. Filmer, Lee Tschirky. SUTTON CALLED HOME

Dr. George Miksch Sutton, Curator of Birds at Cornell, who left just after Easter on an expedition to the far north and Alaska in search of the nesting grounds of the Ross Goose, has been called back by the severe illness of his mother. He is now at her home in Bethany, W. Va., and will not return to Ithaca until September.

**Concerning
The Alumni**

'84—Henry J. Patten, of 80 East Jackson Boulevard, Chicago, Ill., is retired. Mr. Patten attended the fiftieth reunion of his class this June.

'88 ME—Henry W. Fisher and Mrs. Fisher are spending the summer at their home, 230 6th Avenue West, Hendersonville, N. C.

'97—Announcement has been received of the marriage of Miss Dorothy Affeld, daughter of Francis O. Affeld, Jr. '97 LL.B., to Warren Franklin Simrell, Jr., on Saturday, July 14, at Great Neck, N. Y.

'00—Ernest L. Quackenbush is a practicing lawyer at 744 Broad Street, Newark, N. J. His residence is at 5 Oliver Street, Chatham. He has a son, Ernest L. Quackenbush, Jr., in the class of 1937.

'05—Charles D. Nitchie is industrial sales engineer for the Bausch and Lomb

Optical Company of Rochester, N. Y. He writes that his son, Charles D. Nitchie '32, was married June 19 to Miss Barbara Wiles, of Syracuse. The wedding was at the bride's summer home on Skaneateles Lake. Young Nitchie is with Pierce, Butler, and Pierce Company. A second son, Chester M. Nitchie, will enter Cornell this fall in Arts, and aims to take Law after graduation.

'05 AB—William P. Allen has retired from the firm of Burlingham, Veeder, Fearey, Clark & Hupper, and, along with Morton L. Fearey and Samuel L. Coleman, announces the formation of a firm for the practice of law with the title of Fearey, Allen & Coleman. The address of the new firm is 70 Pine Street, New York, N. Y.

'08 AB, '11 PhD—Professor O. D. von Engeln, head of the department of Geology at Cornell, is collaborating with C. R. Rosenberry '25, of the staff of *The Ithaca Journal*, on a series of articles entitled "Before Ithaca," dealing with the geologic development of the Finger Lakes District.

'11 LLB—Lawrence M. Mintz, secretary of the Republican city-county Committee in Ithaca for the past three years, resigned that post at a party meeting recently. Mintz said that he surrendered his official connection with the party because his private business no longer allowed him time.

Ithaca, New York

Your Boy:

- Is his college preparatory program going badly or complicated in any way?
- Does he need a period of freedom and responsibility under suitable supervision before entering college?
- Should he get away from the distractions of home friends and school activities and do some work?
- Does he need to gain in maturity and scholarship prior to college work?

Cascadilla has been meeting these needs. How, and how successfully, is told in a little folder just printed for us. May we send you a copy?

Fall term begins September 17

CASCADILLA SCHOOL

ITHACA, N. Y.

C. M. DOYLE, Headmaster

'13 AB—Granville A. Perkins is research director of the Carbide and Carbon Chemical Corporation, Charleston, West Virginia.

'13 BS—Rebekah M. Gibbons, associate professor of home economics at the University of Nebraska, has an article in the current issue of that university's *Alumnus* on "Pruning the Food Budget." She recommends that a low cost diet "will contain a very high proportion of cereal products . . . half unmilled or unrefined . . . with these cereal foods will be low cost sources of vitamins A and C together with a generous amount of milk or cheese . . . Other foods will be chosen with an eye to convenience, cost, and personal preference."

'13 CE—Wallace D. DuPre is engaged in the wholesale distribution of automotive supplies and shop equipment at Spartanburg, South Carolina.

'14 AB—Dr. Hu Shin, or Hu Suh, as he was known while an undergraduate, has just published a book on the cultural trends in China today, which he has entitled, "The Chinese Renaissance." Dr. Hu is professor of philosophy and dean of the department of English literature, at the government school at Peiping, China.

'16 AB—A son, Hamilton Vose, III, was born June 15, 1934, to Mr. and Mrs. Hamilton Vose, Jr. Vose is president of Berkshire Papers, Inc., 450 West Superior Street, Chicago, dealers in printing papers.

'19—William D. Cummings continues with the woodlands department of the West Virginia Pulp and Paper Co., in New York City.

'19—B. A. Eger received his appointment as Junior Forester on June 1 and was transferred from the Ozark to the Cumberland National Forest.

'20—William E. F. Wright is doing work on the Forest Survey in Florida. James W. Cruickshank '30 F.E., is in charge of this work.

'21—H. S. Bosworth is chief of a timber survey party working on the Unaka National Forest. He has been at the Los Alamos Ranch School in New Mexico until recently.

'21—Walter W. Simonds is superintendent of the Swallow Falls forestry camp at Oakland, Md.

'22—Albert P. Taliaferro, Jr., nationally known aeronautical expert, who was for seven years in charge of airport construction work with the United States Department of Commerce, is supervising

the construction of a new airport at Providence, R. I. Taliaferro resigned from his post with the federal government last year to form his own firm, A. P. Taliaferro, Jr., & Co., of New York City.

'24 ME—Silas W. Pickering, II, is on the engineering staff of the Carbide and Carbon Chemicals Corporation, Charleston, West Virginia.

'26—Kenneth B. Spear is Scout Executive for Ithaca and vicinity.

'26 BS—Peter Ham, of 25 Mulberry Street, Springfield, Mass., was recently placed in charge of the publicity and information service for the Farm Credit Administration of Springfield, which serves six New England States, New York, and New Jersey, and includes the Federal Land Bank, the Federal Intermediate Credit Bank, the Production Credit Bank, and the Springfield Bank for Cooperatives. He went to the Land Bank on June 1, 1933 as an assistant in the secretary's department, and was assigned to his new duties about March 1, 1934.

'27—John G. Weir spent the past winter supervising C.C.C. work at Northfield, Vt., and is now back at his job as Extension Forester of the State of Vermont.

'27—I. Harris Taylor and Miss Helen W. Garrison were married at Briarcliff, N. Y. early in May. Taylor is employed with the New York Central Railroad.

'27 CE—Arthur Bruckert was married Saturday July 7 in New York City to Miss Mildred Thelma Furman. The couple will live in Moravia, N. Y.

'28—A daughter, Ruth Elizabeth, was born March 14 to Mr. and Mrs. John H. Caldwell. Caldwell is stationed at Letchworth Park in charge of C.C.C. work there.

'28—L. H. Hall is with the Rock-Wool Insulation Co. at White Plains, N. Y. He was formerly with the Collett Construction Company of Scarsdale, N. Y.

'29—George L. Bidwell is living at Riegelsville, Pa.

'30—William E. Aherne, Jr., is vice-president of J. Condon, Inc., wholesale and retail florists in Brooklyn, N. Y. He was married on December 30, 1933 to Mary A. Reihm, of Glenside, Pa.

'30 AB—Three members of the Class of 1930 received M.D. degrees in June from the University of Rochester, Rochester, N. Y. They are: Harold Cohn, George Dachs, and Lawrence J. Radice. Cohn will interne at St. Luke's Hospital, Chicago, Ill.; Radice at the Buffalo City Hospital; and Dachs at the Strong Memorial Hospital, Rochester.

'30 AB, '31 MS—Benjamin T. Freure, research chemist for the Carbide and Carbon Chemicals Corporation, resides at 240 Third Avenue, South Charleston, West Virginia. Through his commission in the Reserve Corps, acquired at Cornell in the R.O.T.C., he acted as aide to the

party of General Hugh S. Johnson when he was in Charleston for the N.R.A. anniversary celebration on June 16th.

'31—George Parsons is recuperating in Saranac Lake, and has recovered sufficiently to drive his car about the Adirondacks this summer.

'31 BChem—Birny Mason, Jr., and William Persbacker '32 B.Chem., are working at the plant of the Carbide and Carbon Chemicals Corporation, at Charleston, West Virginia. Mason is a drafting engineer, and Persbacker an analytical chemist.

'31 BS—W. Gifford Hoag has removed from 3724 13th Street, N.W., to 2714 Woodley Place, Washington, D. C. He writes that recent additions to the staff of the Farm Credit Administration include: Stanley W. Warren '27, and Edward A. Lutz '31 in the division of finance and research, and D. A. Russell '32 in production credit division.

Sunshine-

makes everyone feel better
makes everything taste better
— *does something good for
tobaccos too . . .*

There is Sunshine in your Chesterfield — plenty of it — the Sunshine Chesterfield tobaccos get from our own Southland.

Even the bright golden color tells you they're milder and taste better — *blend them* with the right kinds of Turkish and you have Chesterfield. They Satisfy.

*May we ask you
to try them —*
