A Cognitive Science undergraduate laboratory and computer facility (201 Uris Hall) is available for all students in a Cognitive Science concentration. This facility will help link resources from different laboratories across the Cornell campus as well as providing a central location for developing and conducting experimental research in Cognitive Science.

Students who complete the concentration requirements will have their concentration in Cognitive Science officially represented on their transcript. In addition, students who have made substantial progress toward completing the requirements for the concentration will be eligible for enrollment in the graduate courses in Cognitive Science during their senior year.

Concentration Application Procedures.

Initial inquiries concerning the undergraduate concentration should be made to the Cognitive Science Program coordinator, Julie Simmons-Lynch, cogst@cornell.edu, 255-6431, who will provide application materials.

To formally initiate the concentration in Cognitive Science, a student must gain approval for a selection of courses from a concentration advisor (one of the program faculty). The courses selected must form a coherent cluster that makes sense to both the advisor and the student. To be admitted to the concentration, the student must submit this plan of study to the Cognitive Science undergraduate faculty committee for final approval.

In addition to assisting in and approving the student's selection of courses, the concentration advisor serves as a general source of information about the field of Cognitive Science, relevant resources around the university, and job and graduate school opportunities. Often, the advisor can help the student develop independent research experience.

Independent Research. The concentration encourages each student to be involved in independent research that bears on research issues in Cognitive Science, if possible. COGST 470 is available for this purpose. It is recommended that students report on their research activities in an annual undergraduate forum. The Undergraduate Concentration Committee is committed to helping students find an appropriate research placement when needed.

The Committee for Undergraduate Concentration in Cognitive Science consists of: Bart Selman, Computer Science, 255-5643, 4144 Upson Hall, selman@cs.cornell.edu; Draga Zec, linguistics, 255-0728, 217 Morrill Hall, DZ17@cornell.edu; Michael Spivey, psychology, 255-9365, 238 Uris Hall, spivey@cornell.edu. The current director of undergraduate studies is Draga Zec.

Graduate Minor

Entering graduate students, as well as advanced undergraduates, who are interested in cognition and in the cognitive sciences are advised to take the proseminar course COGST 501 Introduction to Cognitive Science in the

fall semester. Enrolling in this 4-credit version of COGST 101 involves a weekly section meeting with the instructor and will satisfy the introductory course requirement.

Graduate students minoring in Cognitive Science will take additional courses recommended by their graduate committee to complete their course requirements.

For more information, consult the program office (278G Uris Hall, 255-6431, cogst@cornell.edu) or the director of graduate studies, Michael Spivey (255-9365, spivey@cornell.edu).

Courses

Cognitive Science

COGST 101(1101) Introduction to Cognitive Science (also CS 170[1710], LING 170[1170], PHIL 191[1910], PSYCH 102[1200]) (KCM-AS)

Fall. 3 or 4 credits; 4-credit option involves writing section instead of exams.

M. Spivey.

Surveys the study of how the mind/brain works. Examines how intelligent information processing can arise from biological and artificial systems. Draws primarily from five disciplines that make major contributions to cognitive science: philosophy, psychology, neuroscience, linguistics, and computer science. The first part of the course introduces the roles played by these disciplines in cognitive science. The second part focuses on how each of these disciplines contributes to the study of five topics in cognitive science: language, vision, learning and memory, action, and artificial intelligence.

COGST 111(1110) Brain, Mind, and Behavior (also BIONB/PSYCH 111[1110]) (PBS)

Spring. 3 credits. Intended for freshmen and sophomores in humanities and social sciences; seniors not allowed. Not recommended for psychology majors; biology majors may not use course for credit toward major. Letter grades only.

R. Hoy and E. Adkins Regan.

Understanding how the brain creates complex human behavior and mental life is a great scientific frontier of the next century. This course enables students with little scientific background from any college or major to appreciate the excitement. What are the interesting and important questions? How are researchers trying to answer them? What are they discovering? Why did the brain evolve this remarkable capacity?

COGST 150(1500) Intro to Human Environment Relations (also DEA 150[1500])

Spring. 3 credits. G. Evans.

For description, see DEA 150.

[COGST 172(1720) Computation, Information, and Intelligence (also CS/ENGRI/INFO 172[1700]) (MQR)]

Fall. 3 credits. Prerequisite: some knowledge of calculus. Next offered 2008-2009. Staff.

Introduction to computer science using methods and examples from the field of artificial intelligence. Topics include game playing, search techniques, learning theory, computer-intensive methods, data mining, information retrieval, the web, natural language processing, machine translation, and the Turing

test. This is not a programming course; rather, "pencil and paper" problem sets are assigned. Not open to students who have completed the equivalent of CS 100.]

COGST 214(2140) Cognitive Psychology (also PSYCH 214/614[2140/6140]) (KCM-AS)

Fall. 4 credits. Limited to 175 students. Prerequisite: sophomore standing. Note: Undergraduates who want 5 credits also should enroll in COGST 501. S. Edelman.

Introduces the idea of cognition as information processing, or computation, using examples from perception, attention and consciousness, memory, language, and thinking. Participants acquire conceptual tools that are essential for following the current thought on the nature of mind and its relationship to the brain.

COGST 215(2150) Psychology of Language (also LING/PSYCH 215[2150]) (KCM-AS)

Spring. 3 credits. Prerequisite: sophomore, junior, or senior standing; any one course in psychology or human development. M. Christiansen.

Provides an introduction to the psychology of language. The purpose of the course is to introduce students to the scientific study of psycholinguistic phenomena. It covers a broad range of topics from psycholinguistics, including the origin of language, the different components of language (phonology, morphology, syntax, and semantics), processes involved in reading, computational modeling of language processes, the acquisition of language (both under normal and special circumstances), and the brain bases of language.

COGST 220(2200) The Human Brain and Mind: Biological Issues in Human Development (also HD 220[2200]) (PBS Supplementary list)

Fall. 3 credits. Prerequisite: HD 115 or permission of instructor. E. Temple.

This course explores the biology that underlies cognitive processes like language, decision making, and emotion. What do we know about the biology of the mind? As long ago as the 1600s, when the philosopher Descartes speculated on how the mind and body interact, humans have been fascinated by how the chunk of tissue we call the brain can give rise to all the complexity that is human behavior. This course is designed as an introduction to the biology underlying human behavior. After studying basic concepts in neurobiology and neuroanatomy, the course will explore a variety of topics, such as how our brain underlies our perception, thought, language, emotions, memories, and desires. In addition, we will discuss relevant human clinical disorders throughout the course. This course will give background necessary for other courses in HD that focus on biological mechanisms of human development and serves as a prerequisite for many of them.

COGST 230(2300) Cognitive Development (also HD 230[2300])

Spring. 3 credits. Prerequisite: HD 115 or PSYCH 101. Q. Wang.

Designed to help students develop a broad understanding of the mechanisms, processes, and current issues in cognitive development and learn to do critical, in-depth analyses of developmental research. Discusses how children's thinking changes over the course of development and evaluate psychological

theories and research on various aspects of cognitive development. Topics include perception, representation and concepts, reasoning and problem solving, social cognition, memory, metacognition, language and thought, and academic skills. Students also have hands-on research experiences with "real" kids.

COGST 231(2310) Borges and I: A Quest for Self-Knowledge (also PSYCH/BIONB 231[2310])

Spring. 4 credits. Limited to 15 students. S. Edelman.

This seminar will survey the state of the art in theoretical neuroscience, a discipline whose ultimate goal is finding the mind in the brain. Our journey through the scientific literature on minds and brains, covering topics such as memory and identity, love, solitude and society, language, creativity, religion, and morality, will be accompanied by a choice of short stories by Jorge Luis Borges.

This seminar is sponsored by the John S. Knight Institute's Sophomore Seminars Program and is not restricted to sophomores.

COGST 238(2380) Thinking and Reasoning (also HD 238[2380])

Fall. 3 credits. Prerequisite: HD 115 or PSYCH 101. B. Koslowski.

Examines problem solving and transfer, precausal thinking, logical thinking, practical syllogisms, causal reasoning, scientific reasoning, theories of evidence, expert vs. novice differences, and nonrational reasoning. Two general issues run through the course: the extent to which children and adults approximate the sorts of reasoning that are described by various types of models, and the extent to which various models accurately describe the kind of thinking that is required by the types of problems and issues that arise and must be dealt with in the real world.

COGST 330(3300) Introduction to Computational Neuroscience (also BIONB/PSYCH 330[3300]) (PBS)

Fall. 3-4 credits; 4-credit option includes lab providing additional computer simulation exercises. Limited to 25 students. Prerequisite: BIONB 222 or permission of instructor. Offered alternate years. C. Linster.

Covers the basic ideas and techniques involved in computational neuroscience. Surveys diverse topics including: neural dynamics of small networks of cells, neural coding, learning in neural networks and in brain structures, memory models of the hippocampus, sensory coding, and others.

[COGST 333(3330) Problems in Semantics—Quantification in Natural Language (also LING 333[3333], PHIL 333[3330]) (KCM-AS)

Spring. 4 credits. Prerequisites: course in logic or semantics or permission of instructor. Next offered 2008-2009. M. Rooth.

Looks at problems in the semantic analysis of natural languages, critically examining work in linguistics and philosophy on particular topics of current interest.]

COGST 334(2340) The Growth of the Mind (also HD 334[3340])

Spring. 4 credits. Prerequisite: course in human experimental psychology, cognitive psychology, statistics, HD 115, or equivalent, or permission of instructor. Primarily intended for sophomores through seniors. B. Lust.

The fundamental issues of cognition are introduced in this course. What is the nature of human intelligence? Of logical and scientific reasoning? How are knowledge and understanding acquired and represented in the human mind? What is the nature of mental representation? What are the cognitive characteristics of the mind at birth? What is the relation of the acquisition of knowledge and understanding to their final representation? What are the relations between language and thought? In the study of those issues, how can epistemology and experimental psychology be related through the experimental method? Basic debates within the study of cognition are introduced and discussed throughout. The course will analyze Piaget's comprehensive theory of cognitive development and experimental results. Current research in cognitive development will be contrasted.

COGST 337(3370) Language Development (also HD 337[3370], LING 436[4436], PSYCH 436[4360]) (KCM-AS)

Spring. 4 credits. Open to undergraduate and graduate students. Graduate students should also enroll in HD 633, LING 700, or PSYCH 600, a supplemental graduate seminar. Prerequisite: at least one course in developmental psychology, cognitive psychology, cognitive development, or linguistics. S-U or letter grades. B. Lust.

Surveys basic issues, methods, and research in the study of first-language acquisition. Major theoretical positions in the field are considered in the light of experimental studies in first-language acquisition of phonology, syntax, and semantics from infancy on. The fundamental linguistic issues of "Universal Grammar" and the biological foundations for acquisition are discussed, as are the issues of relations between language and thought. The acquisition of communication systems in nonhuman species such as chimpanzees is addressed, but major emphasis is on the child. An optional lab course supplement is available (see COGST 450/HD 437/LING 450/PSYCH 437).

COGST 342(3420) Human Perception: Applications to Computer Graphics, Art, and Visual Display (also PSYCH 342/642[3420/6420], VISST 342[3342])

Fall. 3 or 4 credits; 4-credit option involves term paper. Prerequisite: PSYCH 101 or permission of instructor. Highly recommended: PSYCH 205. D. Field.

Our present technology allows us to transmit and display information through a variety of media. To make the most of these media channels, it is important to consider the limitations and abilities of the human observer. The course considers a number of applied aspects of human perception with an emphasis on the display of visual information. Topics include "three-dimensional" display systems, color theory, spatial and temporal limitations of the visual systems, attempts at subliminal communication, and "visual" effects in film and television.

COGST 412(4120) Laboratory in Cognition and Perception (III) (also PSYCH 412[4120])

Spring. 4 credits. Limited to 15 students. Prerequisite: statistics and one course in cognition or perception recommended. Graduate students, see PSYCH 612. M. W. D. J. Field.

Laboratory course designed to introduce students to experimental methods in perception and cognitive psychology. Students take part in a number of classic experiments and develop at least one independent project. Computers are available and used in many of the experiments although computer literacy is not required. Projects are selected from the areas of visual perception, pattern recognition, memory, and concept learning.

[COGST 414(4140) Comparative Cognition (also PSYCH 414/714[4140/7140]) (KCM-AS)

Spring. 3 or 4 credits; 4-credit option involves annotated bibliography or creating relevant web site. Prerequisites: PSYCH 205, 209, 214, 223, 292, or permission of instructor. Next offered 2008–2009. Staff.

Examines some of the conceptual and empirical work resulting from and fueling the recent surge of interest in animals' thinking. Specific topics may include whether nonhumans behave intentionally; whether they show concept and category learning, memory, and abstract thinking similar to that of humans; the role of social cognition in the evolution of intelligence; and whether animals are conscious or self-aware. Evidence from communication studies in which animal signals provide a "window on the mind" plays a strong role in the deliberations, including studies of naturally occurring signaling in various species and experiments in which nonhumans are trained in human-like language behavior. Cognition in nonhuman primates is a specific focus throughout. The course is a mix of lecture and discussion, emphasizing the latter as much as possible.]

COGST 416(4160) Modeling Perception and Cognition (also PSYCH 416/616[4160/6160])

Spring. 4 credits. Prerequisites: PSYCH 205, 209, 214, or 215, or permission of instructor. M. Spivey.

Offers a survey of several computational approaches to understanding perception and cognition. Explore linear systems analysis, connectionist models, dynamical systems, and production systems, to name a few. Emphasis is placed on how complex sensory information gets represented in these models, as well as how it gets processed. This course covers computational accounts of language processing, language acquisition, visual perception, and visual development, among other topics.

COGST 424(4240) Computational Linguistics (also CS 324[3470], LING 424[4424]) (MQR)

Fall. 4 credits. Prerequisite: LING 203. Recommended: CS 114. Labs involve work in Unix environment. M. Rooth.

For description, see LING 424.

COGST 425(4250) Cerebral Seductions (also S HUM 425)

Spring. 4 credits. W. Jones.

For description, see S HUM 425.

[COGST 426(4260) Learning Language (also PSYCH 426/726[4260/7260])

Spring. 4 credits. Limited to 20 students. Prerequisite: PSYCH 214 or by permission of the instructor. Next offered 2008–2009. S. Edelman.

In this seminar, we shall survey a promising new approach to the understanding of the cognitive function that is at the core of the

human nature: language. Thematically, the material to be covered focuses on two aspects of the study of language: (1) psycholinguistic data and their interpretation, and (2) algorithmic studies and computational modeling. In psycholinguistics, we shall read key papers that shed light on the nature of linguistic knowledge ("grammar") possessed by normal adult speakers, and on the acquisition of this knowledge by children. In computation, the focus is on acquisition of grammar from raw data.]

COGST 427(4270) Evolution of Language (also PSYCH 427/627[4270/6270])

Fall. 3 credits. Limited to 20 students. Prerequisite: senior standing or permission of instructor. Offered alternate years. M. Christiansen.

Fueled by theoretical constraints derived from recent advances in the brain and cognitive sciences, the last decade of the 20th century saw a resurgence of scientific interest in the evolution of language. This seminar surveys a cross section of modern theories, methods, and research pertaining to the origin and evolution of language. Considers evidence from psychology, the cognitive neurosciences, comparative psychology, and computational modeling of evolutionary processes. Topics for discussion may include: What does the fossil record tell us about language evolution? What can we learn from comparative perspectives on neurobiology and behavior? Can apes really learn language? Did language come about through natural selection? What were the potential preadaptations for language? What is the relationship between phylogeny and ontogeny?

[COGST 428(4280) Connectionist Psycholinguistics (also LING/PSYCH 428/628[4280/6280])

Fall. 3 credits. Prerequisite: senior standing or permission of instructor. Offered alternate years; next offered 2008–2009. M. Christiansen.

Connectionist psycholinguistics involves using (artificial) "neural" networks, which are inspired by brain architecture, to model empirical data on the acquisition and processing of language. As such, connectionist psycholinguistics has had a far-reaching impact on language research. This course surveys the state of the art of connectionist psycholinguistics, ranging from speech processing and word recognition, to inflectional morphology, sentence processing, language production, and reading. An important focus of discussion is the methodological and theoretical issues related to computational modeling of psychological data. The broader implications of connectionist models of language are discussed, not only for psycholinguistics, but also for computational and linguistic perspectives on language.]

COGST 432(4320) Cognitive, Social, and Developmental Aspects of Scientific Reasoning (also HD 432[4320])

Fall. 3 credits. Prerequisites: HD 115 or PSYCH 101. Offered alternate years. B. Koslowski.

The first section of the course will examine case studies of examples of scientific reasoning, such as identifying the causes of "childbed fever," whether a prehistoric population engaged in cannibalism, whether T. Rex was a fierce hunter or a wimpy scavenger, whether a primitive nomadic tribe might have included warrior women, etc. The

case studies will be examined to try to identify the sorts of principles that an adequate description of scientific reasoning would need to include.

We will then consider various models of scientific reasoning with an eye towards identifying the extent to which the models can account for the sort of thinking that is exemplified in the case studies. Along the way, we will consider such questions as the role of theory in scientific reasoning, strategies for responding to anomalous or disconfirming data, when disconfirming data ought to (and do) prompt rejection rather than modification of a theory, confirmation bias, magical thinking in children, other developmental differences, sociocultural influences on scientific reasoning, etc. In discussing all of these questions, we will also consider developmental aspects of scientific reasoning, such as whether "magical thinking" in children is qualitatively different than what adults do.

COGST 433(4330) Developmental Cognitive Neuroscience (also HD 433[4330])

Spring. 3 credits. Limited to 25 students. Prerequisite: HD 115 or PSYCH 101 and one semester of biology; permission of instructor. E. Temple.

What are the brain mechanisms underlying human behavior and cognition? How do those underlying brain mechanisms develop? These are the questions that we explore in this course through both lecture and reading and discussion of primary literature. The first weeks of class cover basics of developmental neurobiology and neuroanatomy and methods used in the field of cognitive neuroscience (especially neuroimaging techniques). After the introductory and methods information is covered the format changes to a weekly one including lecture and discussion of current research papers. Each week students focus on a particular cognitive ability such as language, memory, attention, or inhibitory control. For each topic students explore what is known about the brain mechanisms that underlie that particular function, how those brain mechanisms develop over the life span, and where possible, the brain mechanisms underlying disorders of that particular cognitive function.

COGST 434(4340) Current Topics in Cognitive Development (also HD 434[4240]) (KCM-AS)

Spring. 3 credits. Prerequisites: Course HD 234/COGST 234 (simultaneously); permission of instructor. Offered alternate years.

The course will supplement survey course HD 234/COGST 234 with additional discussion of current research in the area of cognitive development. Selected current papers will be read and discussed in parallel with the HD 234/COGST 234 survey course. Modern interpretations and challenges to Piaget's theory will be evaluated in light of current literature in the field. A small group format will be adopted to encourage discussion.

COGST 435(4350) Mind, Self, and Emotion: Research Seminar (also HD 431[4310])

Fall. 3 credits. Limited to 20 students. Prerequisite: upperclass undergraduate or graduate standing. Letter grades only. Q. Wang.

Examines current data and theory concerning memory, self, and emotion from a variety of

perspectives and at multiple levels of analysis, particularly focusing on the interconnections among these fields of inquiry. A special emphasis is given to cross-cultural studies on memory development, self-construal, and conception of emotion.

COGST 450(4500) Lab Course: Language Development (also HD/PSYCH 437[4370], LING 450[4500])

Fall. 2 credits. In conjunction with COGST/HD 337, LING/PSYCH 436. B. Lust.
Optional supplement to the survey course Language Development (COGST/HD/LING/PSYCH 436). The lab course provides students with a hands-on introduction to scientific research, including design and methods, in the area of first-language acquisition.

COGST 452(4520) Culture and Human Development (also HD 452[4520]) (CA-AS)

Fall. 3 credits. Limited to 30 students.
Prerequisite: HD 115 or PSYCH 101.
Q. Wang.
Takes an interdisciplinary approach to address the central role of culture in human development. Draws on diverse theoretical perspectives, including psychology, anthropology, education, ethnography, and linguistics, to understand human difference, experience, and complexity. Empirical reflections are taken upon major developmental topics such as cultural aspects of physical growth and development; culture and cognition; culture and language; culture, self, and personality; cultural construction of emotion; culture issues of sex and gender; and cultural differences in pathology.

COGST 470(4700) Undergraduate Research in Cognitive Science

Fall or spring. 1-4 credits. Prerequisite: permission of major advisor; written permission of Cognitive Science faculty member who supervises research and assigns grade. S-U or letter grades.
Cognitive Science faculty.
Experience in planning, conducting, and reporting independent laboratory, field, and/or library research in an interdisciplinary area relevant to Cognitive Science.

COGST 471(4710) Cognitive Science Research Workshop

Fall or spring. Variable credit. Prerequisites: enrollment in an independent research course either in Cognitive Science (e.g., COGST 470) or in a related department or in honors thesis research in one of the departments relevant to Cognitive Science. Staff (interdisciplinary faculty from Cognitive Science Program).

Provides a research workshop in which undergraduate students who are engaged in research in a particular area relevant to cognitive science can meet across disciplines to learn and practice the essentials of research using interdisciplinary approaches. In this workshop, students critique and discuss the existing literature in a field of inquiry, individual students present their research designs, methods, and results from their independent research studies, debate the interpretation of their research results, and participate in the generation of new research hypotheses and designs, in a peer group of other undergraduate students involved in related research.

[COGST 474(4740) Introduction to Natural Language Processing (also CS 474[4740], LING 474[4474])

Fall. 4 credits. Next offered 2008-2009.
C. Cardie.
For description, see CS 474.]

[COGST 476-477(4760-4770) Decision Theory I and II (also COGST/ECON 676-677[6760-6770], ECON 476-477[4760-4770]) (MQR)

Fall and spring. 4 credits each semester. In fall, course is lecture based. Students are required to complete several problem sets and there is a final exam. In spring, there are additional lectures as well as visiting speakers. Students are required to read speakers' papers, participate in discussions, and complete a research project. L. Blume, D. Easley, and J. Halpern.

Research on decision theory resides in a variety of disciplines including computer science, economics, game theory, philosophy, and psychology. This new course attempts to integrate these various approaches. The course is taught jointly by two economists/game theorists and a computer scientist. The course covers several areas: (1) basic decision theory. This theory, sometimes known as "rational choice theory," is part of the foundation for the disciplines listed above. It applies to decisions made by individuals or by machines. (2) the limitations of and problems with this theory. Issues discussed here include decision theory paradoxes revealed by experiments, cognitive and knowledge limitations, and computational issues. (3) new research designed in response to these difficulties. Issues covered include alternative approaches to the foundations of decision theory, adaptive behavior, and shaping the individual decisions by aggregate/evolutionary forces.]

COGST 491(4910) Research Methods in Psychology (also COGST 691[6910], PSYCH 491/691[4910/6910])

Spring. 4 credits. Limited to 15 students.
Recommended: permission of instructor, PSYCH 350, experience in upper-division psychology courses, or graduate standing.
Graduate students, see COGST 691.
V. Zayas.

Intensive examination of the basic research methods used in social, personality, cognitive, and developmental psychology. The course focuses on designing and conducting experiments, i.e., how to turn vague theories into concrete and testable notions, evaluate studies, avoid common pitfalls, and, finally, remain ethical. Beyond learning methods of "correct" and rigorous experimentation, we also discuss what makes a research study actually interesting. The course, in addition, covers test construction, survey methods, and "quasi experiments." Students concentrate on completing a small research project in which they conduct an experiment, interpret its data, and write up the results.

Fall. 3 credits. Offered alternate years. Next offered 2008–2009. M. Christiansen.]
- LING 436(4436) Language Development (also COGST/HD/PSYCH 436[4360])**
Fall. 4 credits. B. Lust.
- LING 450(4450) Lab Course: Language Development (also COGST 450[4500], HD/PSYCH 437[4370])**
Fall. 2 credits. In conjunction with COGST/HD/LING/PSYCH 436. B. Lust.
- [LING 474(4474) Introduction to Natural Language Processing (also COGST 474[4740], CS 474[4740])**
Fall. 4 credits. Next offered 2008–2009. C. Cardie.]

Mathematics

- [MATH 281(2810) Deductive Logic (also PHIL 331[3310])]**
- MATH 481(4810) Mathematical Logic (also PHIL 431[4310])**
Spring. 4 credits. Offered alternate years.
- MATH 486(4860) Applied Logic (also CS 486[4860])**
Spring. 4 credits.

Neurobiology and Behavior

- BIONB 111(1110) Brain, Mind, and Behavior (also COGST/PSYCH 111[1110])**
Spring. 3 credits. R. Hoy and E. Adkins Regan.
- BIONB 221(2210) Neurobiology and Behavior I: Introduction to Behavior**
Fall. 3 or 4 credits.
- BIONB 222(2220) Neurobiology and Behavior II: Introduction to Neurobiology**
Spring. 3 or 4 credits.
- BIONB 326(3260) The Visual System**
Spring. 4 credits. H. Howland.
- BIONB 328(3280) Biopsychology of Learning and Memory (also PSYCH 332[3320])**
Spring. 3 credits. T. DeVoogd.
- BIONB 330(3330) Introduction to Computational Neuroscience (also COGST/PSYCH 330[3300])**
Fall. 3–4 credits. C. Linster.
- BIONB 392(3920) Drugs and the Brain**
Spring. 4 credits. R. Harris-Warrick and L. M. Nowak.
- BIONB 396(3960) Introduction to Sensory Systems (also PSYCH 396[3960])**
Spring. 3 or 4 credits. B. Halpern.
- BIONB 421(4210) Effects of Aging on Sensory and Perceptual Systems (also PSYCH 431/631[4310/6310])**
Fall. 3 or 4 credits. B. Halpern.
- BIONB 424(4240) Neuroethology (also PSYCH 424[4240])**
Spring. 4 credits.
- BIONB 426(4260) Animal Communication**
Spring. 4 credits.
- BIONB 492(4920) Sensory Function (also PSYCH 492/692[4920/6920], VISST 492)**
Spring. 3 or 4 credits. H. Howland.
- BIONB 496(4960) Bioacoustic Signals in Animals and Man**
Fall. 3 credits. C. Clark and R. Hoy.

Philosophy

- PHIL 262(2620) Introduction to Philosophy of Mind**
Fall. 4 credits.
- PHIL 431(4310) Mathematical Logic (also MATH 481[4810])**

Psychology

- PSYCH 102(1200) Introduction to Cognitive Science (also COGST/CS 101[1101], LING 170[1170], PHIL 191[1910])**
Fall. 3 or 4 credits. M. Spivey.
- PSYCH 111(1110) Brain, Mind, and Behavior (also BIONB 111[1111], COGST 111[1110])**
Spring. 3 credits. R. Hoy and E. Adkins Regan.

Fall. 3 credits. S. Edelman.
- PSYCH 215(2150) Psychology of Language (also COGST 215, LING 215/715[2215/7715], PSYCH 715[7150])**
Spring. 3 credits. M. Christiansen.
- PSYCH 223(2230) Introduction to Biopsychology**
Fall. 3 credits. Staff.
- PSYCH 305(3050) Visual Perception (also VISST 305)**
Fall. 4 credits. J. Cutting.
- [PSYCH 316(3160) Auditory Perception (also PSYCH 716[7160])**
Fall. 3 or 4 credits. Next offered 2008–2009. C. Krumhansl.]
- PSYCH 326(3260) Evolution of Human Behavior (also PSYCH 626[6260])**
Spring. 4 credits. R. Johnston.
- PSYCH 330(3300) Introduction to Computational Neuroscience (also BIONB/COGST 330[3300])**
Fall. 3–4 credits. C. Linster.
- PSYCH 332(3320) Biopsychology of Learning and Memory (also BIONB 328[3280], PSYCH 632[6320])**
Spring. 3 credits. T. DeVoogd.
- PSYCH 342(3420) Human Perception: Applications to Computer Graphics, Art, and Visual Display (also COGST 342[3420], VISST 342[3342], PSYCH 642[6420])**
Fall. 3 or 4 credits. D. Field.

PSYCH 361(3610) Biopsychology of Normal and Abnormal Behavior (also NS 361[3610])

Fall. 3 credits. B. J. Strupp.

[PSYCH 396(3960) Introduction to Sensory Systems (also BIONB 396[3960], PSYCH 696[6960])

Spring. 3 or 4 credits. Next offered 2009-2010. B. Halpern.]

PSYCH 412(4120) Laboratory in Cognition and Perception (also PSYCH 612[6121])

Spring. 4 credits. D. Field.

PSYCH 413(4130) Information Processing: Conscious and Nonconscious

Spring. 4 credits.

[PSYCH 414(4140) Comparative Cognition (also COGST 414[4140], PSYCH 714[7140])

Spring. 3 or 4 credits. Next offered 2008-2009.]

PSYCH 415(4150) Concepts, Categories, and Word Meanings (also PSYCH 615[6150])

Fall. 4 credits.

PSYCH 416(4160) Modeling Perception and Cognition (also COGST 416[4160], PSYCH 616[6160])

Spring. 4 credits. M. Spivey.

PSYCH 417(4170) The Origins of Thought and Knowledge (also PSYCH 717[7170])

Fall. 4 credits.

PSYCH 418(4180) Psychology of Music (also PSYCH 618[6180])

Fall. 3 or 4 credits. C. Krumhansl.

PSYCH 424(4240) Neuroethology (also BIONB 424[4240])

Spring. 4 credits.

PSYCH 425(4250) Cognitive Neuroscience (also PSYCH 625[6250])

Fall. 4 credits. B. Finlay.

PSYCH 427(4270) Evolution of Language (also COGST 427[4270], PSYCH 627[6270])

Fall. 3 credits. Offered alternate years. M. Christiansen.

[PSYCH 428(4280) Connectionist Psycholinguistics (also COGST 428, LING 428/628[4428/6628], PSYCH 628[6280])

Fall. 3 credits. Offered alternate years; next offered 2008-2009. M. Christiansen.]

PSYCH 431(4310) Effects of Aging on Sensory and Perceptual Systems (also BIONB 421[4210], PSYCH 631[6310])

Fall. 3 or 4 credits. B. Halpern.

[PSYCH 436(4360) Language Development (also COGST 436, HD 436[4360], LING 436[4436])

Spring. 4 credits. Next offered 2008-2009. B. Lust.]

PSYCH 437(4370) Lab Course: Language Development (also COGST/LING 450[4500], HD 437[4370])

Fall. 2 credits. In conjunction with COGST/HD/LING/PSYCH 436. B. Lust.

PSYCH 465(4650) Topics in High-Level Vision (also COGST 465[4650], CS 392, PSYCH 665[6655])

Spring. 4 credits. Offered alternate years. S. Edelman.

PSYCH 491(4910) Research Methods in Psychology (also COGST 491/691[4910/6910], PSYCH 691[6910])

Spring. 4 credits. V. Zayas.

[PSYCH 492(4920) Sensory Function (also BIONB/VISST 492[4920], PSYCH 692[6920])

Spring. 4 credits. Next offered 2009-2010. B. Halpern and H. Howland.]

Graduate Courses and Seminars

The following courses and seminars are generally for graduate students only. However, some may be appropriate for advanced undergraduates. The director of the concentration must approve an undergraduate's use of any of these for satisfying the concentration requirements.

COGST 501(6150) Introduction to Cognitive Science, Proseminar

Fall. 4 credits. M. Spivey.

COGST 501 surveys the study of how the mind/brain works and draws primarily from five disciplines that make major contributions to cognitive science: philosophy, psychology, neuroscience, linguistics, and computer science. The first part of the course introduces the roles played by these disciplines in cognitive science. The second part focuses on how each of these disciplines contributes to the study of five topics of cognitive science: language, vision, learning and memory, action, and artificial intelligence. Graduate students enrolled in this course will observe the Tuesday/Thursday lectures for COGST 101 and also attend a weekly discussion section with Professor Spivey.

[COGST 530(6300) Representation of Structure in Vision and Language (also LING 530[5530], PSYCH 530[6300])

Spring. 4 credits. Limited to 20 students. Graduate seminar. Prerequisites: graduate standing or undergraduates by permission of instructor; or course each in cognitive psychology, linguistics, and computer science, or permission of instructor. Offered alternate years; next offered 2008-2009. S. Edelman.

Concentrates on the nature of the representation of visual objects and scenes in the brain and compares it with the structural framework that serves as the main explanatory tool in current theories of language processing. Data and ideas are drawn from visual psychophysics, neurophysiology, psycholinguistics, computational vision and linguistics, and philosophy. Students present published research papers and preprints, which are then discussed and critiqued.]

COGST 550(5500) Special Topics in Cognitive Science: Language and Thought

Fall. 4 credits. G. Lupyan.

In recent years there has been a revival of interest in the Whorf hypothesis. This seminar will present students with the most recent experimental evidence examining how language and thought interact. Do people who speak different languages think differently? Are there cognitive functions that

depend on acquiring a language? ...on acquiring a specific language? We will start by discussing the classic works in the field and then dive into recent empirical and theoretical work that has been examining the effects of language on category-learning, visual processing, and representations of time, space, and number. Students will also be introduced to methodologies used to study language-learning in children and adults, effects of bilingualism on neural organization, and effects of language impairments (aphasia) on cognition.

COGST 614(6140) Cognitive Psychology (also PSYCH 614[6140])

Fall. 5 credits. Includes (M W F) lec of COGST/PSYCH 214 and a sec. S. Edelman.

Introduces the idea of cognition as information processing, or computation, using examples from perception, attention and consciousness, memory, language, and thinking. Participants acquire conceptual tools that are essential for following the current thought on the nature of mind and its relationship to the brain.

COGST 633(6330) Language Acquisition Seminar (also HD 633[6633], LING 633[6633])

Fall or spring. 1-4 credits. Prerequisite: COGST/HD/LING/PSYCH 436 or equivalent, or permission of instructor. B. Lust.

Reviews and critiques current theoretical and experimental studies of first-language acquisition, with a concentration on insights gained by cross-linguistic study of this area. Attention is also given to the development of research proposals.

[COGST 671(6710) Introduction to Automated Reasoning (also CS 671[6762])

Fall. 4 credits. Prerequisite: (CS 611 and graduate standing) or permission of instructor. Next offered 2008-2009.

Topics in modern logic needed to understand and use automated reasoning systems such as HOL, Nuprl, and PVS. Special emphasis is on type theory and logic and on tactic-oriented theorem proving.]

[COGST 676-677(6760-6770) Decision Theory (also COGST 476/477[4760/4770], CS 576/577[5760/5770], ECON 476-477/676-677[4460-4470/6760-6770])

Fall and spring. 4 credits each semester. Fall: lecture-based; students must complete several problem sets and a final exam.

Spring: additional lectures as well as visiting speakers; students must read speakers' papers, participate in discussions, and complete a research project. Next offered 2008-2009. L. Blume, D. Easley, and J. Halpern.

Research on decision theory resides in a variety of disciplines including computer science, economics, game theory, philosophy, and psychology. This new course attempts to integrate these various approaches. The course covers several areas: (1) basic decision theory. This theory, sometimes known as "rational choice theory," is part of the foundation for the disciplines listed above. It applies to decisions made by individuals or by machines; (2) the limitations of and problems with this theory. Issues discussed here include decision theory paradoxes revealed by experiments, cognitive and knowledge limitations, and computational issues; (3) new research designed in response to these difficulties. Issues covered here include

alternative approaches to the foundations of decision theory, adaptive behavior, and shaping the individual decisions by aggregate/evolutionary forces.]

COGST 691(6910) Research Methods in Psychology (also COGST 491[4910], PSYCH 491/691[4910/6910])

Spring. 4 credits. Limited to 15 students. D. Dunning.

Intensive examination of the basic research methods used in social, personality, cognitive, and developmental psychology. Focuses on designing and conducting experiments, i.e., how to turn vague theories into concrete and testable notions, evaluate studies, avoid common pitfalls, and, finally, remain ethical. The course, in addition, covers test construction, survey methods, and "quasi experiments." Students concentrate on completing a small research project in which they conduct an experiment, interpret its data, and write up the results.

COGST 710(7100) Research in Human Experimental Psychology (also PSYCH 710[7100])

Fall or spring. Credit TBA. Prerequisite: permission of instructor.

CS 664(6670) Machine Vision

Spring. 4 credits. R. Zabih.

[CS 671(6762) Introduction to Automated Reasoning (also COGST 671[6710])

Fall. 4 credits. Next offered 2008–2009.]

CS 672(6700) Advanced Artificial Intelligence

Spring. 4 credits. Prerequisite: CS 472.

CS 674(6740) Natural Language Processing

Fall. 4 credits. Prerequisite: CS 472. Not offered every year.

CS 676(6764) Reasoning about Knowledge

Fall. 4 credits. Prerequisites: mathematical maturity and acquaintance with propositional logic.

[CS 677(6766) Reasoning about Uncertainty

Fall. 4 credits. Prerequisites: mathematical maturity and acquaintance with propositional logic. Next offered 2008–2009.]

CS 772(7970) Seminar in Artificial Intelligence

Fall and spring. 2 credits.

CS 775(7794) Seminar in Natural Language Understanding

Fall and spring. 2 credits. C. Cardie.

EDUC 614(6140) Gender, Context, and Epistemological Development (also FGSS 624[6240])

Fall. 3 credits. D. Schrader.

HD 633(6330) Language Acquisition Seminar (also COGST/LING 633[6333])

Fall. 1–4 credits. Prerequisite: COGST/HD/LING/PSYCH 436 or equivalent. B. Lust.

HD 600/700 Graduate Seminars

[LING 530(5530) Representation of Structure in Vision and Language (also COGST/PSYCH 530[6150])

Spring. 4 credits. Offered alternate years; next offered 2008–2009. S. Edelman.]

[LING 609(6609) Second Language Acquisition and the Asian Languages (also ASIAN 610[6610])

Fall. 4 credits. Prerequisite: LING 414–415. Next offered 2008–2009. Y. Shirai.]

[LING 628 Connectionist Psycholinguistics (also COGST/LING 428, PSYCH 428/628[4280/6280])

Fall. 3 credits. Offered alternate years; next offered 2008–2009. M. Christiansen.]

LING 633(6633) Language Acquisition Seminar (also COGST/HD 633[6330])

Fall. 1–4 credits. Prerequisite: COGST/HD/LING/PSYCH 436 or equivalent. B. Lust.

LING 700(7700) Graduate Seminars

MATH 681(6810) Logic

Spring. 4 credits.

MATH 781-782(7810-7820) Seminar in Logic

Fall and spring. 4 credits each.

MATH 788(7880) Topics in Applied Logic

Fall. 4 credits.

NBA 663(6630) Managerial Decision Making

Fall. 3 credits. J. Russo.

PHIL 700(7000) Graduate Seminars

PSYCH 519(6830) Affects and Cognition (also NRE 507)

Fall. 4 credits. A. M. Isen.

PSYCH 521(6210) Behavioral and Brain Sciences

Fall and spring. 4 credits each semester.

[PSYCH 530(6300) Representation of Structure in Vision and Language (also COGST 530[6300], LING 530[5530])

Spring. 4 credits. Offered alternate years; next offered 2008–2009. S. Edelman.]

PSYCH 550(5500) Special Topics in Cognitive Science (also COGST 550[5500])

Spring. 4 credits. M. Spivey.

[PSYCH 614(6140) Cognitive Psychology (also COGST 614[6140])

Fall. 5 credits. S. Edelman.

PSYCH 616(6160) Modeling Perception and Cognition (also COGST/PSYCH 416[4160])

Spring. 4 credits. M. Spivey.

PSYCH 618(6180) Psychology of Music (also PSYCH 418[4180])

Fall. 4 credits. C. Krumhansl.

[PSYCH 628(6280) Connectionist Psycholinguistics (also COGST/PSYCH 428[4280], LING 428/628[4428/6628])

Fall. 3 credits. Next offered 2008–2009. M. Christiansen.]

PSYCH 631(6310) Effects of Aging on Sensory and Perceptual Systems (also BIONB 421[4210], PSYCH 431[4310])

Fall. 3 or 4 credits. B. Halpern.

PSYCH 665(6650) Topics in High-Level Vision (also CS 392[3920], COGST 465[4650], PSYCH 465[4650])

Spring. 4 credits. Offered alternate years. S. Edelman.

PSYCH 691(6910) Research Methods in Psychology (also COGST 491/691[4910/6910], PSYCH 491[4910])

Spring. 4 credits. D. Dunning.

[PSYCH 714(7140) Comparative Cognition (also COGST/PSYCH 414[4140])

Spring. 3 or 4 credits. Next offered 2008–2009.]

[PSYCH 716(7160) Auditory Perception (also PSYCH 316[3160])

Fall. 4 credits. Next offered 2008–2009. C. Krumhansl.]

COLLEGE SCHOLAR PROGRAM

K. Gabard, director (55 Goldwin Smith Hall, 255-5792)

The College Scholar Program is described in the introductory section of Arts and Sciences.

COLLS 397(3970) Independent Study—Senior Project

Fall or spring. 1–4 credits. Prerequisite: permission of program office.

COLLS 499(4990) Honors Research

Fall or spring. 1–8 credits; max. 8 credits may be earned for honors research.

Prerequisite: permission of program director. Each participant must submit brief proposal approved by honors committee.

COMPARATIVE LITERATURE

W. J. Kennedy, acting chair (247 Goldwin Smith Hall), TBA, director of undergraduate studies (247 Goldwin Smith Hall); N. Melas, director of graduate studies (fall) (247 Goldwin Smith Hall); T. Murray, director of graduate studies (spring) (247 Goldwin Smith Hall); F. Ahl, A. Banerjee, C. Carmichael, D. Castillo, C. Chase, J. Culler, C. Dean, B. deBary, A. François, E. Hanson, P. Hohendahl, G. Holst-Warhaft, W. J. Kennedy, D. LaCapra, P. Liu, B. Maxwell, T. McNulty, J. Monroe, N. Saccamano, N. Sakai, Emeritus: A. Caputi, D. Grossvogel, W. Holdheim, E. Rosenberg, L. Waugh. Also cooperating: R. Brann, C. Caruth, H. Emmett, S. Fathy, A. Galloway, A. Garces, P. Gilgen, M. Greenberg, S. Haenni, K. Hirone, W. Jones, R. Klein, P. Lorenz, K. Long, C. Nealon, S. Pinet, D. Reese, D. Riley, D. Rubenstein, D. Schwarz, D. Starr, G. Waite

The Department of Comparative Literature provides a broad range of courses in European and non-European literature as well as visual and media studies. Courses stress significant authors, themes, problems, styles, genres, historical periods, and theoretical perspectives. In cooperation with related departments in the humanities, the departmental offerings reflect current interdisciplinary approaches to literary study: hermeneutics, semiotics, deconstruction, cultural criticism, Marxism, reception aesthetics, feminism, and psychoanalysis.

The Major

The Department of Comparative Literature provides a broad range of courses in European as well as non-European literatures. Courses devoted to literary studies variously stress significant authors, themes, problems, genres, historical periods, and theoretical perspectives.

The Department also offers an array of courses in visual and media studies and enables the study of literature in relation to the history and theory of film, video, and other arts, as well as media. In cooperation with related departments in the humanities, the department encourages the interdisciplinary study of literature—in conjunction with anthropology, history, philosophy, sexuality studies, psychology, sociology, and so forth. The course offerings reflect current theoretical approaches to literature, media, and the arts—hermeneutics, semiotics, deconstruction, cultural criticism, Marxism, postcolonialism, reception aesthetics, feminism, and psychoanalysis.

Requirements for the Major

All majors in Comparative Literature are expected to have completed 10 courses, half of which must be devoted to the study of works in cultures other than English in their original languages.

Five of these courses must be taken in the Department of Comparative Literature. One of these must be a Core Course, to be taken in the junior or the senior year. The designated core courses change each semester (for 2007–2008, COM L 423 [fall], COM L 422 [spring]. If elected, an honors essay will also count as one of these required five courses.

An honors essay (COM L 493) of roughly 50 pages is optional. It is to be written during the senior year under the direction of a faculty member, preferably from within the department, who has agreed to work in close cooperation with the student. Students are urged to begin research on their thesis topic during the summer preceding their senior year.

Students who elect to do a double major with another literature department may count up to three courses from that major toward their requirements in Comparative Literature.

The department encourages students to study abroad in pursuit of their cultural and linguistic interests, and the number of courses that may be counted toward the major will be determined in consultation with the faculty advisor and with the approval of the director of undergraduate studies.

The major enables students to pursue this commitment to a comparative study that includes a substantial non-English component by offering two tracks.

A. Comparative Literary Studies. This track is designed for students who wish to place greater emphasis on literary study in their course work. Students who select this track are required to complete:

- Five courses in Comparative Literature at the 200 level and above.
- Five courses in literature or other areas of the humanities at the 200 or higher level, to be taken in one or more foreign literature departments. Texts must be read in the original language. A student may offer one advanced-level foreign language course (conversation, composition, etc.) toward fulfilling this requirement.

B. Literary, Visual, and Media Studies. This track is designed for students who wish to pursue their comparative study of literature and theory by integrating rigorous work on film, video, or other arts

and media. Students who select this track are required to complete:

- Four courses in literary study at the 200 or higher level offered by the Department of Comparative Literature or other humanities departments or programs.
- Six courses in visual arts or media studies at the 200 or higher level offered by the Department of Comparative Literature or other humanities departments or programs.

The following guidelines might be used to determine whether a course in Literary, Visual, and Media Studies may be counted toward the five courses in non-English cultural study required of all majors. Where the media involve a large component of speech or writing (such as film, video, or hypertext), the student would need to work with this material in the original foreign language. Where text or speech in a foreign language is peripheral in a course that focuses on visual material (such as art or architecture) from non-English cultures, the student would need to draw on primary and secondary materials in a foreign language for oral reports, papers, and so forth. Because of the flexibility and interdisciplinary range of this track, students who select it should work closely with their faculty advisor to organize a coherent plan of study and to determine, with the approval of the Director of Undergraduate Studies, which courses satisfy the foreign language requirement of the major.

Honors

A student who completes the requirements for the major is eligible for the degree of bachelor of arts with honors in Comparative Literature. The department bases its decision on the students achieving grades of at least B+ on the senior essay, in course work for the major, and in their overall academic performance at Cornell.

First-Year Writing Seminars

Most 100-level courses may be used toward satisfying the first-year writing seminar requirements. See "John S. Knight Institute for Writing in the Disciplines" for a full description of the first-year seminar program.

Courses

COM L 200(2000) Introduction to Visual Studies (also VISST 200[2000], ENGL 292[2920]) (LA-AS)

Spring. 4 credits. Staff.

For description, see VISST 200.

COM L 201(2010) Great Books # (LA-AS)

Fall. 4 credits. COM L 201 and 202 may be taken independently of each other. H. Emmett.

A reading of seminal texts that represent and have shaped Western culture and hence form an essential part of the student's intellectual equipment. By evaluating and interpreting selections from the Bible, Homer, Sophocles, Seneca, Dante, Castiglione, and Shakespeare, students gain practice in critical reading, thinking, and writing.

COM L 202(2020) Great Books (LA-AS)

Spring. 4 credits. A. Banerjee.

The course traces the evolution of the story of the road as theme, trope, and organizing principle of seminal books from the Renaissance to the postmodern. Through

readings of Rabelais, Cervantes, Swift, Sterne, Twain, Gogol, Conrad, Hemingway, Nabokov, and Kerouac, we will explore how literary adventures structure our experience of the world.

COM L 203(2030) Introduction to Comparative Literature (LA-AS)

Fall. 4 credits. P. Liu.

The course is intended to answer the question persistently asked by undergraduates: "What is Comparative Literature, anyway?" We will read texts from a wide range of national cultures, genres, and historical periods (from Roman comedy to postmodern Japanese fiction) to develop some tentative answers. In the first section of the course, "Text and Language," we will read literature as a product of linguistically specific cultures in order to understand why we Comparatists work in multiple languages. In "Comparing Cultures," we will learn different models for studying cultures in a comparative or transnational framework. Finally, we will explore "the Question of World Literature" with the help of literary and philosophical works, and we will think about how the discipline of Comparative Literature might contribute to these debates.

COM L 204(2040) Global Fictions (CA-AS)

Spring. 4 credits. N. Melas.

This course will be an introduction and an inquiry into global perspectives on fiction. Can the reading of fiction point us towards becoming citizens of the world? How might we know this world? How might we imagine it? We will consider the condition of the stranger in this global era as well as construct a geography of reading. Readings will be drawn mainly but not only from the contemporary period and outside Europe. Readings will change depending on instructor, but may include works of Rushdie, Marquez, Conde, Munif, Castellanos, Oe, Ngugi, Wolf, Kincaid, and Homer.

[COM L 205(2050) Introduction to Poetry (LA-AS)]

Fall. 4 credits. Next offered 2008–2009.

B. Maxwell.]

COM L 231(2310) Holy War, Jihad, Crusade (also HIST 269[2691], JWST 251[2651], NES 251[2651]) @ # (HA-AS)]

Fall. 4 credits. R. Brann.

For description, see NES 251.

COM L 248(2480) Literatures of Exile and Return

Spring. 4 credits. H. Emmett.

This course examines Classical texts from Greece and Rome in comparison with contemporary works in English in order to track both the shifts and the continuities of the theme of exile and its associated concepts:

otherness, dehumanization and dispossession, recognition, refuge and belonging. We will focus on the historical circumstances of each text's production, but at the same time investigate the ways in which these diverse texts raise common questions about what it means to be human. Readings will include *The Odyssey of Homer*, Ovid's *Metamorphoses* and Euripides' *Medea* alongside selected modern texts that may include Margaret Atwood's *Penelopiad*, Derek Walcott's *Omeros*, David Malouf's *An Imaginary Life*, and Toni Morrison's *Beloved*.

COM L 276(2760) Desire (also ENGL 276[2760], THETR 278[2780], FGSS 276[2760]) (LA-AS)

Spring. 4 credits. E. Hanson.
For description, see ENGL 276.

COM L 293(2930) Middle Eastern Cinema (also NES 293[2793], FILM 293[2930], VISST 293[2193], JWST 291[2793]) @ (LA-AS)

Spring. 4 credits. C. Carmichael.
Study of the New Testament as a product of the first-century Palestinian and Hellenistic Judaism. Other text (also in translation): *The Passover Haggadah*.

[COM L 328(3280) Literature of the Old Testament (also RELST 328[3280]) @ # (LA-AS)

Fall. 4 credits. Next offered 2008–2009.
C. M. Carmichael.]

COM L 329(3290) The History and Theory of Sexuality in Europe since Freud

Fall. 4 credits. C. Dean.
This course will provide an introduction to the various lines of inquiry informing "the history of sexuality." The course asks how historians and others constitute sexuality as an object of inquiry, and addresses different theoretical currents upon which historians draw.

COM L 330(3300) Political Theory and Cinema (also GERST 355[3550], GOVT 370[3700], FILM 329[3290]) (CA-AS)

Spring. 4 credits. G. Waite.
For description, see GERST 355.

[COM L 344(3440) Tragic Theatre (also CLASS 345[3646], THETR 345[3450]) # (LA-AS)

Fall. 4 credits. Next offered 2009–2010.
F. Ahl.]

COM L 348(3480) Shakespeare and Europe (also ENGL 349[3490]) (LA-AS)

Fall. 4 credits. W. J. Kennedy.
In their own times, Shakespeare's plays registered a strong interest in the culture and society of Renaissance Europe beyond England. In later times, they cast a powerful spell over culture and society in 19th- and 20th-century Europe. This course will examine their debts to and influences upon continental drama. Readings will focus upon Shakespeare's plays in relation to Italian comedy, early French tragedy, and plays by Anton Chekhov, Bertolt Brecht, and Yasmina Reza.

COM L 353(3530) Monsters A–X-files (also FREN 353/FGSS 353[3530]) # (CA-AS)

Fall. 4 credits. K. Long.
For description, see FREN 353.

COM L 356(3560) Renaissance Literature: "Blood Politics" (also ENGL 320[3200]) # (LA-CA)

Fall. 4 credits. P. Lorenz.
The course examines the problem of "blood" not only as a marker of racial, religious, and sexual difference, but also as a dramatic player in the (early?) modern historical imagination. How does a politics of blood appear on stage at a time when populations are being simultaneously expelled and colonized for reasons related to blood? How does drama (dis)figure an ideology of blood? In the course of trying to answer these questions, we will read plays by Shakespeare, Marlowe, Webster, Kyd, Cervantes, Lope de Vega, and Calderón. Topics include Honor, Revenge, Purity, the Body, Sexuality, Conversion and Death.

[COM L 362(3620) The Culture of the Renaissance II (also ENGL 325[3250], HIST 364[3640], MUSIC 390[3242], ART H 351[3420], FREN 362[3620]) # (CA-AS)

Fall. 4 credits. Required F sec. Next offered 2008–2009. W. J. Kennedy.]

[COM L 363(3630) The European Novel # (LA-AS)

Fall. 4 credits. Next offered 2008–2009.
N. Saccamano.]

COM L 364(3640) The European Novel # (LA-AS)

Spring. 4 credits. A. François.
From Lafayette to Proust. Topics will include: the interplay between fiction, desire and forms of identity; the intersection between novelistic form and European social and intellectual history; realism, romance, and the novel's political unconscious; the privileging of plots of adultery, surveillance, and policing; the role of gender in defining the genre and, in particular, the concept of "character"; the representation of first-person experience through third-person narration. Authors may include: Madame de Lafayette, Austen, Balzac,

Stendhal, Flaubert, Tolstoy, Kafka, Woolf, and Proust. All texts in English translation, but may of course be read in the original by students with command of the pertinent language.

COM L 365(3650) Contemporary Fiction @ (LA-AS)

Fall. 4 credits. D. Castillo.
The course is designed to give you a snapshot of the rich development of fiction and drama from the second half of the twentieth century. One thematic thread will be the development of literary characterizations under the pressure of world historical events (war, terrorism, revolution); we will be equally interested in exploring structural and technical aspects of the works. Texts will be read in translation and will include works chosen from: Brecht, *Mother Courage*; Gambaro, *Information for Foreigners*; Beckett, *Endgame*; Grass, *Tin Drum*; Spiegelman, *Maus*; Azuela, *Underdogs*; Ha Jin, *Waiting*; O'Brien, *The Things They Carried*; Danticat, *Dew Breaker*; Acker, *Empire of the Senseless*; Farah, *Maps*; Hemingway, *Farewell to Arms*; Valenzuela, *Other Weapons*; Lessing, *Briefing for a Descent into Hell*; Pynchon, *Gravity's Rainbow*.

COM L 373(3730) Literature of the Outlaw (also ENGL 371[3710]) @ # (LA-AS)

Fall. 4 credits. B. Maxwell.
The course draws on the world's storehouse of writing, song, and film about bandits, pirates, malingers, revolutionary appropriators, and other defectors from the sacred order of property. Loyalty and betrayal will concern us, as will the melancholy relationship of outlawry and the passing of historical eras. Aesthetics, ethics, and political economy will guide our enquiries. We'll study several tellings of the legend of Robin Hood, as well as Kleist, Michael Kohlhaas; Kemal, Memed, *My Hawk*; Genet, *The Thief's Journal*; Akutagawa, "Rashomon" and "In a Grove"; Kurosawa, *Seven Samurai*; material by and about Phoolan Devi, India's "Bandit Queen"; the Jamaican film *The Harder They Come*; excerpts from the immense Chinese novel *Outlaws of the Marsh*, and Jim Jarmusch's film *Ghost Dog: The Way of the Samurai*.

COM L 383(3830) Subversive Readings, Intertexts in Feminist Theory (also FGSS 379[3790], S HUM 421[4210])

Spring. 4 credits. D. Reese.
For description, see S HUM 421.

COM L 398(3980) Theorizing Gender and Race in Asian Histories and Literatures (also COM L 668[6680], ASIAN 388[3880]/688[6880], FGSS 658[6580]) @ (CA-AS)

Spring. 4 credits. N. Sakai.
For description, see ASIAN 388.

- COM L 399(3990) Canonical States, Canonical Stages (also FREN 389[3890])**
Spring. 4 credits. M. Greenberg.
The course will be a comparative reading of several 17th-century tragedies. The authors we will read will be Shakespeare, Lope de Vega, Calderon, Corneille, and Racine. The course will attempt to delimit the origins of the modern state in the exclusionary practices that 17th-century tragedy stages for both contemporary (to the plays) audiences and to 21st-century audience. Our critical apparatus will borrow from different theories of ideology and subjectivity, as they pertain to the theatrical experience.
- [COM L 400(4000) Forms of the Novel (LA-AS)]**
Fall. 4 credits. Next offered 2008-2009. P. Liu.]

- COM L 408(4080) Martial Arts Film and Literature: Globalization from the East (also ASIAN 452[4452])**
Fall. 4 credits. P. Liu.
Mandatory weekly film viewings to be held on Wednesdays.

With recent blockbusters such as *Kill Bill*, *Kung Fu Hustle*, *Hero*, and *The Matrix*, a cultural practice from the East called "martial arts" has transformed itself from a spiritual and bodily discipline in medieval China into a popular visual spectacle housed in transnational cinema and arcade games. This course studies the Asianization of global postmodern culture by comparing the historical routes, institutional bases, and ideologies of representations of martial arts in film and literature. Our questions will include the historical origins of martial arts and martial arts cinema; differences between "wuxia" and "kung fu"; contemporary Hong Kong, Taiwan, and Hollywood popular culture; Orientalism, race, and masculinity in transnational cinema; kinship, rites, honor, and duty in Chinese societies; kung fu as philosophy; and the relation of martial arts to women, ethics, nation, work and pleasure.
- [COM L 410(4100) Science, Technology, and Culture (also S&T 412[4101]) (CA-AS)]**

419, fall; 420, spring. Variable credit. COM L 419 and 420 may be taken independently of each other. Applications available in 247 Goldwin Smith Hall.
- COM L 422(4220) Literature and Oblivion (LA-AS)**
Spring. 4 credits. Core course for COM L majors. Limited to 15 students. N. Melas.
The monumental aspirations of literature to immortality date back as far as the earliest epics. This course will attempt a critical study of the powers of art against oblivion. We will start with the paradox whereby all language and especially poetic language necessarily destroys that which it seeks to preserve, just as a monument substitutes and thus overwhelms the very loss it commemorates. Since Arts monumentality sets it against the contingencies of history, a central concern will be the relation of art to history, particularly when art's negations encounter powerful worldly negations, such as those surrounding gender difference and colonial domination. Framed by Homer's *Iliad* and Derek Walcott's "postcolonial" Caribbean epic *Omeros*, the readings will also be a comparative exercise in reading across time and space and will include theoretical texts (Plato, Hegel, Nietzsche, Blanchot, Benjamin, Patterson) alongside literature. Particular attention in course time and writing assignments will be directed to improving critical writing skills.
- COM L 423(4230) Borders (also SPAN 490[4900], LSP 423[4230])**
Fall. 4 credits. Core course for COM L majors. Limited to 15 students. D. Castillo.
This course will focus on literary works that thematize geographical, cultural, and linguistic borders between cultures, languages, and sexual orientations. Topics will include discussion of immigration/exile/diaspora; representations of indigenous cultures and languages; transgender, transborder, transamerican voices. Texts may include films like *Transamerica*, *Todo sobre mi madre*, *Happy Together*, *Shabnam Mousi*, *Espaldas mojadas*; narratives like Carson's *Autobiography of Red*, Schneebaum's *Keep the River on your Right*, Coetzee's *Waiting for the Barbarians*, Garcia's *Monkey Hunting*, Warner-Vieyra's *As the Sorcerer Said*. Theorists like Donna Haraway, Rey Chow, Walter Mignolo will provide context and background readings.

- COM L 424(4240) The Animal (also ENGL 426[4260], GERST 426[4260]) (CA-AS)]**

- COM L 426(4260) New Testament Seminar (also RELST 426[4260]) # (HA-AS)]**
Spring. 4 credits. Limited to 15 students. C. Carmichael.
Topic: Sex and religion in the Bible. Identification and discussion of problems in the New Testament. Discussing attitudes to sexuality in the Bible, we will examine in Old and New Testament texts the clash between ancestral behavior and subsequent laws, as well as the contrast between legal and religious ideas. Topics will include: marriage and divorce, incest, intermarriage, gender discrimination, guilt and shame, homosexuality, women and purity, sexual language and symbols. It should be possible to say something new about the topics and also, because of the perennial nature of the issues, to say something that is relevant to contemporary life.
- COM L 428(4280) Biblical Seminar (also RELST 427[4280]) # @ (HA-AS)]**
Fall. 4 credits. Limited to 15 students. C. Carmichael.
A study of how biblical ethical and legal rules (in Exodus, Leviticus, and Deuteronomy) comment on incidents in the biblical narratives (Genesis-2 Kings). The link between law and narrative enables us to observe in detail how ancient thinkers evaluate ethical and legal problems of perennial interest.
- [COM L 432(4320) Time and the Other]**
Spring. 4 credits. Next offered 2008-2009. N. Melas.]

A reading and discussion of key texts by Renaissance humanists in Italian, French, English, and other European literatures from the 14th to the 17th centuries.
- COM L 454(4540) Modernity and Critique (also S HUM 426[4260])**
Spring. 4 credits. B. Maxwell.
For description, see S HUM 426.

COM L 455(4550) Memory, Past-memory, and the Construction of Victims
Fall. 4 credits. Limited to 15 students.
C. Dean.

How have writers, historians, memoirists, and others approached the representation of victims in their work? How has the rhetoric of victimization, suffering, and atrocities in various narratives changed, particularly since the Second World War? This seminar will explore these questions primarily but not exclusively in the context of the genocide of European Jewry.

COM L 456(4560) Michel Foucault and His Legacy
Spring. 4 credits. Limited to 15 students.
C. Dean.

This course will focus on the concept of "critique" as it unfolds in the work of Michael Foucault, and in relation to the history of philosophy. We will explore the relationship between Foucault and historiography and Foucault and psychoanalysts.

COM L 492(4920) India: Nation and Narration, History and Literature (also HIST 492[4920], ASIAN 494[4940])

Spring. 4 credits. Limited to 15 students.
D. Ghosh and A. Banerjee.

This course emerges from the history and literature of India in the 20th century. Taught by two scholars, one based in the history department and one based in comparative

literature, the readings and the films critically analyze some of the major cultural currents and political events of India by reading novels, political manifestoes, and viewing documentaries, films, visual images and architectural sites. This seminar begins with the premises of nationalism, how it is constructed, disseminated, challenged, and reassembled in the service of creating the idea of "India"; It then turns to partition, the traumatic division of the Indian nation in 1947, and how this critical event has been represented in fiction, film, and history. The latter half of the course challenges ideas of Indian nationalism by using studies of space and the production of epics and history to imagine how Indian communities might be constituted in the extended postcolonial moment we are in.

COM L 493(4930) Senior Essay

Fall and spring. 8 credits.

Times TBA individually in consultation with director of Senior Essay Colloquium. Approximately 50 pages to be written over the course of two semesters in the student's senior year under the direction of the student's advisor. An R grade is assigned on the basis of research and a preliminary draft completed in the first semester. A letter grade is awarded on completion of the second semester.

COM L 496(4960) Imagining the Mediterranean (also NES 438[4738], JWST 438[4738]) @ (LA-AS)]

Fall. 4 credits. G. Holst-Warhaft.

For description, see NES 438.

Fall. 4 credits. Next offered 2008–2009.
N. Melas.]

COM L 614(6140) Ut pictura poesis: Keats and the Aesthetic Tradition

Spring. 4 credits. Limited to 15 students.
A. Francois.

Offers a close study of Keats's poetry and letters in dialogue with European aesthetic theory and aestheticism as well as with his Victorian and modernist successors. Focus will be on: the analogy of visual to aural experience; poetry's jealousy of its sister-art (painting)'s capacity for silent presentation; the problem of Romantic Hellenism, "modernity" and lyric temporality; the relationship between aestheticism, colonialism, consumerism, and the rise of museum-culture; questions of pleasure, bearing witness to suffering, and asceticism. Writers will include: Lessing, Kant, Hegel, Keats, Tennyson, Swinburne, Rossetti, Pater, Ruskin, Hugo, Baudelaire, Valéry, Rilke, Stevens and Adorno.

COM L 615(6150) Trauma, Time, and History

Fall. 4 credits. Limited to 15 students.
C. Caruth.

This course will examine new notions of time and history as they emerge from the confrontation of psychoanalysis with war and other catastrophic events. We will pay particular attention to traumatic temporality as it informs the conceptualization of political history in the 20th and 21st centuries. Psychoanalytic and political texts will be placed in conversation with literature and literary theory to consider problems of repetition, erasure, witness, and event. Theoretical authors will include Freud, Davoine and Gaudillière, Felman, Lifton, Arendt, Pandey, De Man and Derrida, among others.

COM L 616(6160) Translation, In Theory (also ASIAN 619[6190], VISST 619[6190])

COM L 619–620(6190–6200) Independent Study

619, fall; 620, spring. Variable credit. COM L 619 and 620 may be taken independently of each other. Applications available in 247 Goldwin Smith Hall.

COM L 624(6240) Arendt, Morisaki, Weil (also COM L 438[4380], ASIAN 468/668[4468/6668])

Fall. 4 credits. B. deBary.
For description, see ASIAN 468.

[COM L 630(6300) Aesthetics in the 18th Century (also ENGL 630[6300])]

Fall. 4 credits. Next offered 2008–2009.
N. Saccamano.]

COM L 634(6340) Deleuze and Lyotard: Aesthetics (also ENGL 629[6290], FREN 672[6720], VISST 634[6340])

Spring. 4 credits. T. Murray.

The course will discuss the aesthetic, political, and cultural implications of the writings of French philosophers, Gilles Deleuze and Jean-François Lyotard. Their differing approaches to the excess of aesthetics and artistic practice helped shape influential theories of space, figuration, and time that continue to influence discussions of postmodernism, minority writing, terrorism, social justice, and global memory. Crucial to their work is the value of artistic practice and analysis to the overall project of understanding an aesthetics of engagement. Particularly important to both is the importance of technological and electronic innovations in cinema, painting, video, and new media to the theorization of social subjectivity in a global age, particularly on the edge of abstraction.

[COM L 636(6360) Comparative Modernisms/Alternative Modernities]

Fall. 4 credits. Limited to 15 students. Next offered 2008–2009. N. Melas.]

[COM L 638(6380) Comparative Literacy: The 18th C and Literary Modernity (also ASIAN 626[6626])]

Spring. 4 credits. Next offered 2009–2010.
N. Sakai.]

[COM L 641(6410) Derrida, Writing, and the Institution of Literature (also ENGL 441/642[4410/6420])]

Spring. 4 credits. Next offered 2008–2009.
J. Culler.]

[COM L 650(6500) Renaissance Poetry (also COM L 450[4500], ENGL 622[6220])]

Spring. 4 credits. Next offered 2008–2009.
W. J. Kennedy.]

COM L 652(6520) Renaissance Humanism (also COM L 452[4520])

Spring. 4 credits. Limited to 15 students.
W. J. Kennedy.

A reading and discussion of key texts by Renaissance humanists in Italian, French, English and other European literatures from the fourteenth to seventeenth centuries.

COM L 663(6630) Nietzsche and Heidegger (also GERST 663[6630])

Fall. 4 credits. G. Waite.
For description, see GERST 663.

COM L 667(6670) Rethinking the Symbolic (also FREN 667[6670])

Spring. 4 credits. Limited to 15 students.
T. McNulty.
For description, see FREN 667.

COM L 668(6680) Theorizing Gender and Race in Asian Histories and Literatures with a Particular Focus on Japanese Cases (also COM L 398[3980], ASIAN 388/688[3388/6688])

Spring. 4 credits. N. Sakai.
For description, see ASIAN 388.

COM L 671(6710) Transnational Imaginaries: Globalization and Culture

Fall. 4 credits. Limited to 15 students.
N. Melas.

This course will provide an introduction to recent writings surrounding globalization in that shifting borderland between the humanities and the social sciences, focusing on some theoretical implications rather than attempting a comprehensive survey. We will dwell specifically on (1) theoretical articulations of capitalism's global spread (principally in Marx, Wallerstein, Hardt and Negri); (2) theoretical and cultural articulations and responses to commoditization and privatization as the primary material manifestation of globalization in everyday life; and (3) re-articulations of the pairing global/local in theoretical and cultural texts. Readings will be divided between critical expository texts and fictional texts (including both literature and visual arts). Knowledge of a language other than English recommended but not required.

COM L 673(6730) Topics in Modern European Intellectual and Cultural History (also HIST 673[6730], JWST 674[6674])

Fall. 4 credits. D. LaCapra.
For description, see HIST 673.

[COM L 675(6750) Critical Passions (also ENGL 675[6750])

Spring. 4 credits. Next offered 2008–2009.
A. Francois.]

COM L 676(6760) Being Historical in Literary Studies

Spring. 4 credits. Limited to 15 students.
C. Dean.

This seminar will inquire into the increased importance of "history" in literary studies: "history" as it is conceived in Derridean terms but also in the works of those who sought to move beyond the perceived limits of deconstruction and post-structuralism more generally. It will explore the vexed relationship between literary theorists' conceptions of history and how historians define the conventions of their discipline.

[COM L 680(6800) Baudelaire in the Lyric

Spring. 4 credits. Next offered 2008–2009.
J. Culler.]

COM L 682(6820) Cultural Materialism and Geopolitics

Spring. 4 credits. Limited to 15 students.
P. Liu.

This course examines the foundational texts in "cultural materialism" (Marx, Lukacs, Gramsci, Althusser, Spivak, Williams, Hall) and the implications of a dualistic construction of material vs. cultural life for contemporary geopolitical thinking. We will be interested in the different ways in which tropes of "matter" and "world" have been appropriated to delineate new temporal and spatial relations in postcolonial conversations (Said, Lye, Mbembe, Gilroy). By paying special attention to debates about uneven development, the materiality of race and the body, and alternative modernities, we will seek to understand "materialism" itself as a geopolitically shifting and multiply constituted notion.

[COM L 688(6880) Wordsworth and Rousseau (also ENGL 741[7410])

Spring. 4 credits. Next offered 2008–2009.
C. Chase.]

[COM L 689(6890) Adorno's Aesthetic Theory (also GERST 689[6890])

Fall. 4 credits. Next offered 2008–2009.
P. Hohendahl.]

[COM L 692(6920) Digital Bodies, Virtual Identities (also ENGL 696[6960], THETR 633[6330])

Fall. 4 credits. Next offered 2008–2009.
T. Murray.]

[COM L 697(6970) Cosmopolitanism (also ENGL 697[6970])

Spring. 4 credits. Next offered 2008–2009.
N. Saccamano.]

COMPUTER SCIENCE

E. Tardos, chair; G. Bailey, K. Bala, K. Birman, C. Cardie, R. Caruana, R. L. Constable, D. Fan, P. Francis, J. Gehrke, D. Greenberg, D. Gries, J. Halpern, J. E. Hopcroft, D. Huttenlocher, D. James, T. Joachims, U. Keich, J. Kleinberg, R. Kleinberg, D. Kozen, L. Lee, S. Marschner, A. Myers, R. Pass, R. Regina, F. B. Schneider, D. Schwartz, B. Selman, D. Shmoys, E. G. Sifer, E. Tardos, R. Teitelbaum, C. Van Loan, R. Zabih

The Department of Computer Science is affiliated with both the College of Arts and Sciences and the College of Engineering. Students in either college may major in Computer Science. For details, visit our web site at www.cs.cornell.edu/ugrad.

The Major

CS majors take courses in algorithms, data structures, logic, programming languages, scientific computing, systems, and theory. Electives in artificial intelligence, computer graphics, computer vision, databases, multimedia, and networks are also possible. Requirements include:

- three semesters of calculus (MATH 111–122 (or 112)–221 or 191–192–294)
- two semesters of introductory computer programming (CS 100 and 211)
- a 1-credit project (CS 212)
- a seven-course Computer Science core (CS 280, 312, 314 or 316; one of 321, 322, 421, 422, or 428; 381, 414, and 482)

- two 400+ Computer Science electives, 3+ credits each, totaling at least 6 credits (CS 490 not allowed)
- a Computer Science project course (CS 413, 415, 419, 433, 466, 473, 501, 514, or 664)
- a mathematical elective course (e.g., ENGRD 270, MATH 222 or 293, MATH 300+, T&AM 310)
- two 300+ courses that are technical in nature and total at least 6 credits
- a three-course specialization in a topic area other than Computer Science. These courses must be numbered 300 level or greater.

Note: All of the field electives described above must be courses of 3 or more credit hours with the exception of the CS project course, which is 2 credits or more.

The program is broad and rigorous, but it is structured in a way that supports in-depth study of outside areas. Intelligent course selection can set the stage for graduate study and employment in any technical area and any professional area such as business, law, or medicine. With the advisor, the Computer Science major is expected to put together a coherent program of study that supports career objectives and is true to the aims of liberal education.

Admission

All potential affiliates are reviewed on a case-by-case basis relative to the following criteria:

- a grade of C or better in all CS courses and MATH courses
- a GPA of 2.5 or better in CS 211, 212, and 280.
- a GPA of 2.5 or better in MATH 112, 122, or 192 and CS 280.

Courses used in the affiliation GPA computations may be repeated if the original course grade was below a C. The most recent grade will be used for all repeated courses. Qualifying courses must be taken at Cornell.

Departmental honors in Computer Science is granted to students who have maintained a cumulative GPA greater than or equal to 3.5 and completed a set of coherent courses and research activities that satisfy the following requirements:

- at least one CS course (at least 3 credit hours) at or above the 500 level with a grade of A- or better; no seminars.
- at least two 3-credit semesters of CS 490 (Independent Research) with a CS faculty member, with grades of A- or better each semester.

Latin Designations (appended to the degree), awarded by the field of Computer Science for all who qualify as stated above, are based on the final cumulative GPA, as follows:

- *cum laude*, 3.50 or above
- *magna cum laude*, 3.75 or above
- *summa cum laude*, 4.00 or above

Note: Honors courses may not be used to satisfy the CS 400+ elective requirement, the CS project requirement, the math elective, the technical electives, or the specialization. See the CS undergraduate web site for more information on eligibility: www.cs.cornell.edu/ugrad.

Computing in the Arts Undergraduate Concentration

A concentration in Computing in the Arts with an emphasis on computer science is available both to Computer Science majors and to students majoring in other subjects. For more information, see p. 513.

Courses

For complete course descriptions, see "Computer Science" under "Computing and Information Science (CIS)."

CS 099(1109) Fundamental Programming Concepts

Summer. 2 credits. Freshmen only. Prerequisites: none. S-U grades only.

CS 100(1110, 1112) Introduction to Computer Programming (MQR)

Fall, spring, summer. 4 credits. *Students may not receive credit for both CS 100 and BEE 151.*

Four versions of CS 100 are offered. CS 100H, CS 100J, CS 100M, and CS 100R. All versions are described in the "Computing and Information Science (CIS)" section.

CS 101J(1130) Transition to Object-oriented Programming

Fall, spring, summer. 1 credit. Prerequisite: one course in programming. S-U grades only.

CS 101M(1132) Transition to Matlab

Fall, spring, summer. 1 credit. Prerequisites: One course in programming. S-U grades only.

CS 113(2000) Introduction to C

Fall, spring, usually weeks 1-4. 1 credit. Prerequisite: CS 100 or equivalent programming experience. Credit granted for both CS 113 and 213 only if 113 taken first. S-U grades only.

CS 114(2006) Unix Tools

Fall, usually weeks 5-8. 1 credit. Prerequisite: CS 100 or equivalent programming experience. Recommended: knowledge of at least one programming language. S-U grades only.

CS 130(1300) Introductory Design and Programming for the Web (also INFO 130[1300])

Fall. 3 credits. Prerequisites: none. No computer background necessary.

CS 165(1610) Computing in the Arts (also ART 175, CIS 165[1610], ENGR 165[1610], MUSIC 165[1465], PSYCH 165[1650])

Spring. 3 credits. Recommended: good comfort level with computers and some of the arts.

CS 167(1620) Visual Imaging in the Electronic Age (also ARCH 459[4509], ART 170[1700], CIS 167[1620], ENGR 167[1670])

Fall. 3 credits.

For description, see ART 170.

CS 170(1710) Introduction to Cognitive Science (also COGST 101[1101], LING 170[1170], PHIL 191[1910], PSYCH 102[1200]) (KCM-AS) (formerly CS 101)

Fall, summer. 3 credits.

For description, see COGST 101.

[CS 172(1700) Computation, Information, and Intelligence (also COGST 172, ENGR 172[1700], INFO 172[1700]) (MQR)

Fall or spring. 3 credits. Prerequisite: some knowledge of differentiation; freshman standing or permission of instructor. Next offered 2008-2009.]

CS 211(2110) Object-Oriented Programming and Data Structures (also ENGRD 211[2110]) (MQR)

Fall, spring, summer. 3 credits. Prerequisite: CS 100J, CS 101J, or CS 100H or CS 100M if completed before fall 2007 or equivalent course in Java or C++.

CS 212(2111) Programming Practicum

Fall, spring. 1 credit. Pre- or corequisite: CS/ENGRD 211. Letter grades only.

CS 213(2002) C++ Programming

Fall. 2 credits. Prerequisite: CS 100 or equivalent programming experience. Students who plan to take CS 113 and 213 must take 113 first. S-U grades only.

CS 214(2008) Advanced UNIX Programming and Tools

Spring, usually weeks 5-8. 1 credit. Prerequisite: CS 114 or equivalent. S-U grades only.

CS 215(2004) Introduction to C

Spring, usually weeks 5-8. 1 credit. Prerequisite: CS/ENGRD 211 or equivalent experience. S-U grades only.

CS 230(2300) Intermediate Design and Programming for the Web (also INFO 230[2300])

Spring. 3 credits. Prerequisite: CS 130 or equivalent knowledge.

CS 280(2800) Discrete Structures (MQR)

Fall, spring. 3 credits. Pre- or corequisite: CS 100 or permission of instructor.

CS 285(2850) Networks (also ECON 204[2040], INFO 204[2040], SOC 209[2090]) (SBA-AS)

Spring. 4 credits. Prerequisites: none.

CS 312(3110) Data Structures and Functional Programming (MQR)

Fall, spring. 4 credits. Prerequisite: CS 211 and 212 or equivalent programming experience. Should not be taken concurrently with CS 314 or 316.

CS 314(3420) Computer Organization (also ECE 314[3140])

Spring. 4 credits. Prerequisite: CS 211 or ENGRD 230. Should not be taken concurrently with CS 312.

CS 316(3410) Systems Programming

Fall. 4 credits. Prerequisites: CS 211 or equivalent programming experience. Should not be taken concurrently with CS 312.

[CS 321(3510) Numerical Methods in Computational Molecular Biology (also BIOBM 321[3210], ENGRD 321[3510]) (MQR)

Fall. 3 credits. Prerequisites: at least one course in calculus (e.g., MATH 106, 111, or 191) and course in linear algebra (e.g., MATH 221 or 294 or BTRY 417); CS 100 or equivalent and some familiarity with iteration, arrays, and procedures; knowledge of discrete probability and random variables at the level of CS 280.]

CS 322(3220) Introduction to Scientific Computation (also ENGRD 322[3220])

Spring, summer. 3 credits. Prerequisites: CS 100 and MATH 221 or 294; knowledge of discrete probability and random variables at the level of CS 280.

CS 324(3470) Computational Linguistics (also COGST 424[4240], LING 424[4424]) (MQR-AS)

Fall or spring. 4 credits. Prerequisites: LING 203. Labs involve work in UNIX environment; CS 114 recommended.

For description, see LING 424.

CS 330(3300) Data-Driven Web Applications (also INFO 330[3300])

Fall. 3 credits. Prerequisite: CS/ENGRD 211. CS majors may use only one of the following toward their degree: CS/INFO 330 or CS 433.

CS 372(3700) Explorations in Artificial Intelligence (also INFO 372[3720])

Spring. 3 credits. Prerequisites: MATH 111 or equivalent, a statistics course, and CS/ENGRD 211 or permission of instructor.

CS 381(3810) Introduction to Theory of Computing

Fall, summer. 3 credits. Prerequisite: CS 280 or permission of instructor.

[CS 400(4150) The Science of Programming

Fall. 3 credits. Prerequisite: CS 211.]

[CS 411(4110) Programming Languages and Logics

Fall. 4 credits. Prerequisite: CS 312 or permission of instructor.]

CS 412(4120) Introduction to Compilers

Spring. 3 credits. Prerequisites: CS 312 (or permission of instructor) and CS 314 or 316. Corequisite: CS 413.

CS 413(4121) Practicum in Compilers

Spring. 2 credits. Corequisite: CS 412.

CS 414(4410) Operating Systems

Fall, spring, summer. 3 credits. Prerequisite: CS 314 or 316. Corequisite: CS 415 in spring only.

CS 415(4411) Practicum in Operating Systems

Fall, spring. 2 credits. Corequisite: CS 414.

CS 416(4420) Computer Architecture (also ECE 475)

Fall. 4 credits. Prerequisites: ENGRD 230 and CS/ECE 314.

For description, see ECE 475.

CS 419(4450) Computer Networks

Spring. 4 credits. Pre- or corequisites: CS 414 or permission of instructor.

CS 421(4210) Numerical Analysis and Differential Equations (also MATH 425[4250]) (MQR)

Fall. 4 credits. Prerequisites: MATH 221 or 294 or equivalent, one additional mathematics course numbered 300 or above, and knowledge of programming.

CS 422(4220) Numerical Analysis: Linear and Nonlinear Problems (also MATH 426[4260])

Spring. 4 credits. Prerequisites: MATH 221 or 294 or equivalent, one additional mathematics course numbered 300 or above, and knowledge of programming.

CS 426(4520) Introduction to Bioinformatics

Spring. 4 credits. Prerequisites: CS/ENGRD 211, CS 280.

[CS 428(4510) Introduction to Computational Biophysics

Fall. 3 credits. Prerequisites: CS 100, CHEM 211 or equivalent, MATH 221, 293, or 294, PHYS 112 or 213, or permission of instructor. Recommended: BIOBM 330.]

CS 430(4300) Information Retrieval (also INFO 430[4300])

Fall. 3 credits. Prerequisite: CS 211 or equivalent.

CS 431(4302) Web Information Systems (also INFO 431[4302])

Spring. 3 credits. Prerequisites: CS 211 and some familiarity with web site technology.

[CS 432(4320) Introduction to Database Systems

Fall. 3 credits. Prerequisites: CS 312 (or 211, 212, and permission of instructor). Next offered 2008-2009.]

[CS 433(4321) Practicum in Database Systems

Fall. 2 credits. Pre- or corequisite: CS 432. CS majors may use only one of the following toward their degree: CS/INFO 330 or CS 433. Next offered 2008-2009.]

CS 465(4620) Introduction to Computer Graphics (also ARCH 374[3740])

Fall. 3 credits. Prerequisite: CS/ENGRD 211.

CS 466(4621) Computer Graphics Practicum

Spring. 2 credits. Pre- or corequisite: CS 465.

CS 472(4700) Foundations of Artificial Intelligence

Fall. 3 credits. Prerequisites: CS 211 and 280 (or equivalent).

CS 473(4701) Practicum in Artificial Intelligence: Robotics and Embodied AI (also M&AE 473[4730])

Fall. 2 credits. Pre- or corequisite: CS 472.

[CS 474(4740) Introduction to Natural Language Processing (also COGST 474[4740], LING 474[4474])

Fall or spring. 4 credits. Prerequisite: CS 211.]

[CS 475(4702) Artificial Intelligence: Uncertainty and Multi-Agent Systems

Spring. 4 credits. Prerequisites: CS/ENGRD 211 and CS 280 or equivalent.]

CS 478(4780) Machine Learning

Spring. 4 credits. Prerequisites: CS 280, 312, and basic knowledge of linear algebra and probability theory.

CS 482(4820) Introduction to Analysis of Algorithms

Spring, summer. 4 credits. Prerequisites: CS 280 and 312.

[CS 483(4812) Quantum Computation (also PHYS 481/881[4481/7681])

Spring. 2 credits. Prerequisite: familiarity with theory of vector spaces over complex numbers. Not offered every year; next offered 2008-2009.

For description, see PHYS 481.]

[CS 485(4850) Mathematical Foundations for the Information Age

Spring. 4 credits. Prerequisite: CS 381.]

CS 486(4860) Applied Logic (also MATH 486[4860]) (MQR)

Fall or spring. 4 credits. Prerequisites: MATH 222 or 294, CS 280 or equivalent (e.g., MATH 332, 432, 434, 481), and some additional course in mathematics or theoretical computer science.

For description, see MATH 486.

CS 487(4830) Introduction to Cryptography

Fall. 4 credits. Prerequisites: CS 280 (or equivalent), CS 381 (or mathematical maturity), or permission of instructor.

CS 490(4999) Independent Reading and Research

Fall, spring. 1-4 credits.

CS 501(5150) Software Engineering

Spring. 4 credits. Prerequisite: CS 211 or equivalent experience programming in Java or C++.

CS 513(5430) System Security

Fall. 4 credits. Prerequisites: CS 414 or 419 and familiarity with JAVA, C, or C* programming languages.

CS 514(5410) Intermediate Computer Systems

Spring. 4 credits. Prerequisite: CS 414 or permission of instructor.

CS 516(5420) Parallel Computer Architecture (also ECE 572[5720])

Fall. 4 credits. Prerequisite: ECE 475.

For description, see ECE 572.

[CS 519(5450) Advanced Computer Networks (also CS 619[6450])

Fall or spring. 4 credits. Prerequisites: CS 419 or permission of instructor. Next offered 2008-2009.]

CS 530(5300) The Architecture of Large-Scale Information Systems (also INFO 530[5300])

Spring. 4 credits. Prerequisite: CS/INFO 330 or CS 432.

CS 565(5640) Computer Animation (also ART 273, CIS 565[5640])

Fall. 4 credits. Prerequisite: none.

For description, see ART 273.

CS 566(5642) Advanced Animation (also ART 372/CIS 566[5642])

Spring. 4 credits. Prerequisite: none.

For description, see ART 372.

[CS 567(5643) Physically Based Animation for Computer Graphics

Spring. 4 credits. Prerequisites: CS/ENGRD 322 and/or CS 465 or permission of instructor. Offered alternate years; next offered 2008-2009.]

CS 569(5620) Interactive Computer Graphics

Spring. 4 credits. Prerequisite: CS 465.

CS 572(5722) Heuristic Methods for Optimization (also CEE 509[5090], OR&IE 533[5340])

Fall. 3 or 4 credits. Prerequisites: CS/ENGRD 211 or 322 or CEE/ENGRD 241, or graduate standing, or permission of instructor.

For description, see CEE 509.

CS 578(5780) Empirical Methods in Machine Learning and Data Mining

Fall. 4 credits. Prerequisites: CS 280 and 312 or equivalent.

CS 611(6110) Advanced Programming Languages

Fall. 4 credits. Prerequisite: graduate standing or permission of instructor.

CS 612(6120) Advanced Compilers and Program Analyzers

Spring. 4 credits. Prerequisites: CS 412 or permission of instructor.

CS 614(6410) Advanced Systems

Fall or spring. 4 credits. Prerequisite: CS 414 or permission of instructor.

[CS 615(6460) Peer-to-Peer Systems

Spring. 4 credits. Recommended: CS 614.]

[CS 619(6450) Research in Computer Networks

Fall or spring. 4 credits. Prerequisites: CS 419 or permission of instructor. Next offered 2008-2009.]

CS 621(6210) Matrix Computations

Fall. 4 credits. Prerequisites: MATH 411 and 431 or permission of instructor.

[CS 622(6220) Numerical Optimization and Nonlinear Algebraic Equations

Spring. 4 credits. Prerequisite: CS 621.]

[CS 624(6240) Numerical Solution of Differential Equations

Spring. 4 credits. Prerequisites: exposure to numerical analysis (e.g., CS 421 or 621), differential equations, and knowledge of MATLAB.]

[CS 626(6510) Computational Molecular Biology

Spring. 4 credits. Prerequisites: familiarity with linear programming, numerical solutions of ordinary differential equations, and nonlinear optimization methods.]

CS 628(6522) Biological Sequence Analysis

Fall. 4 credits. Prerequisites: none.

[CS 632(6320) Database Systems

Spring. 4 credits. Prerequisite: CS 432/433 or permission of instructor. Next offered 2008-2009.]

[CS 633(6322) Advanced Database Systems

Spring. 4 credits.]

CS 664(6670) Machine Vision

Fall or spring. 4 credits. Prerequisites: undergraduate-level understanding of algorithms and MATH 221 or equivalent. Offered spring 2008.

CS 665(6620) Advanced Interactive Graphics

Fall or spring. 4 credits. Prerequisites: CS 465 or equivalent and undergraduate-level understanding of algorithms, probability and statistics, vector calculus, and programming.

CS 667(6630) Physically Based Rendering

Fall or spring. 4 credits. Prerequisites: CS 465 and 467 or equivalent and undergraduate-level understanding of algorithms, programming, and vector calculus.

[CS 671(6762) Introduction to Automated Reasoning

Fall or spring. 4 credits. Prerequisite: CS 611 and graduate standing or permission of instructor.]

- CS 672(6700) Advanced Artificial Intelligence**
Spring. 4 credits. Prerequisite: CS 472 or permission of instructor.
- [CS 673(6724) Integration of Artificial Intelligence and Operations Research**
Spring. 3 credits.]
- CS 674(6740) Advanced Language Technologies (also INFO 630[6300])**
Fall or spring. 3 credits. Prerequisite: permission of instructor. Neither CS 430 nor CS 474 are prerequisites. Offered fall 2007.
- CS 676(6764) Reasoning about Knowledge**
Fall. 4 credits. Prerequisites: mathematical maturity and acquaintance with propositional logic.
- [CS 677(6766) Reasoning about Uncertainty**
Fall. 4 credits. Prerequisites: mathematical maturity and acquaintance with propositional logic. Next offered 2008–2009.]
- CS 678(6780) Advanced Topics in Machine Learning**
Fall or spring. 4 credits. Prerequisites: CS 478 or equivalent, or CS 578 or equivalent, or permission of instructor.
- CS 681(6820) Analysis of Algorithms**
Fall. 4 credits. Prerequisite: CS 482 or graduate standing.
- CS 682(6810) Theory of Computing**
Spring. 4 credits. Prerequisite: CS 381 or 481 and CS 482 or 681 or permission of instructor.
- CS 683(6822) Advanced Design and Analysis of Algorithms**
Spring. 4 credits. Prerequisite: CS 681 or permission of instructor.
- CS 684(6840) Algorithmic Game Theory**
Fall or spring. 4 credits. Prerequisite: background in algorithms and graphs at level of CS 482. No prior knowledge of game theory or economics assumed.
- CS 685(6850) The Structure of Information Networks (also INFO 685[6850])**
Fall or spring. 4 credits. Prerequisite: CS 482.
- [CS 686(6860) Logics of Programs**
Fall or spring. 4 credits. Prerequisites: CS 481, 682, and MATH 481 or MATH/CS 486. Next offered 2008–2009.]
- CS 687(6830) Cryptography**
Fall. 4 credits. Prerequisites: General ease with algorithms and elementary probability theory, maturity with mathematical proofs (ability to read and write mathematical proofs).
- CS 709(7090) Computer Science Colloquium**
Fall, spring. 1 credit. For staff, visitors, and graduate students interested in computer science. S-U grades only.
- CS 714(7410) Topics in Systems**
Fall or spring. 3 credits. Prerequisite: permission of instructor.

- CS 715(7192) Seminar in Programming Refinement Logics**
Fall, spring. 4 credits. Prerequisite: permission of instructor.
- [CS 717(7430) Topics in Parallel Architectures**
Fall. 4 credits. Prerequisite: CS 612 or permission of instructor.]
- CS 718(7690) Computer Graphics Seminar**
Fall, spring. 3 credits.
- CS 719(7190) Seminar in Programming Languages**
Fall, spring. 4 credits. Prerequisite: CS 611 or permission of instructor. S-U grades only.
- CS 726(7590) Problems and Perspectives in Computational Molecular Biology**
Fall or spring. 1 credit. Open to all from life sciences, computational sciences, and physical sciences. S-U grades only.
- CS 732(7320) Topics in Database Systems**
Fall, spring. 4 credits. S-U grades only.
- CS 733(7390) Database Seminar**
Spring. 1 credit. Prerequisite: CS 633 or permission of instructor. S-U grades only.
- [CS 750(7726) Evolutionary Computation and Design Automation (also M&E 650[6500])**
Fall. 4 credits. Prerequisite: programming experience or permission of instructor. Next offered 2008–2009.]
- CS 754(7490) Systems Research Seminar**
Fall, spring. 1 credit. S-U grades only.
- [CS 764(7670) Visual Object Recognition**
Spring. 3 credits. Prerequisite: none.]
- CS 772(7790) Seminar in Artificial Intelligence**
Fall, spring. 4 credits. Prerequisite: permission of instructor. S-U grades only.
- CS 775(7794) Seminar in Natural Language Understanding**
Fall, spring. 2 credits.
- [CS 785(7850) Seminar on Information Networks (also INFO 785[7850])**
Fall. 4 credits. Prerequisites: CS 485 or 685 or permission of instructor.]
- [CS 786(7860) Introduction to Kleene Algebra**
Spring. 4 credits. Prerequisites: CS 381. Recommended: CS 482 or 681, CS 682, elementary logic (MATH 481 or 681), algebra (MATH 432).]
- CS 789(7890) Seminar in Theory of Algorithms and Computing**
Fall, spring. 4 credits. Prerequisite: permission of instructor. S-U grades only.
- CS 790(7999) Independent Research**
Fall, spring. Prerequisite: permission of a Computer Science advisor. Independent research for master of engineering project.
- CS 990(9999) Thesis Research**
Fall, spring. Prerequisite: permission of a Computer Science advisor. S-U grades only. Doctoral research.

COMPUTING IN THE ARTS UNDERGRADUATE CONCENTRATION

The computer plays a role in almost every aspect of human life, and its influence and potential now extend routinely not only to technical and commercial pursuits but also into the realms of the imaginative and the aesthetic. The Computing in the Arts concentration offers students opportunities to use computers to realize works of art, to study the perception of artistic phenomena, and to think about new, computer-influenced paradigms and metaphors for the experiences of making and appreciating art. Faculty from several departments in the college offer courses toward the concentration, drawing on disciplines in the arts, the social sciences, the humanities, and the physical sciences. Currently, the concentration is offered in five tracks: computer science, dance, film, music, and psychology, each described in more detail below. Students may concentrate in the same area as their major, or in a different area.

It is likely that additional tracks in other disciplines will be added to the concentration, indeed possible that this will have occurred after the publication deadline for this year's Courses of Study but in time to take effect in the 2007–2008 academic year. The director and area representatives listed below will always have the latest information.

Director

Graeme Bailey

Applying for the Concentration and Choosing Courses

Students should meet with the track representative in their chosen discipline for initial advising about the concentration. For 2007–2008, these representatives are Graeme Bailey (computer science track), Kevin Ernste (music track), Allen Fogelsanger (dance track), Marilyn Rivchin (film track), and Carol Krumhansl (psychology track).

Regardless of which track they choose, all students in the concentration are required to take the core course, Computing in the Arts (CS 165, cross-listed as ART 175, CIS 165, DANCE 165, ENGRI 165, FILM 165, MUSIC 165, and PSYCH 165). This course combines fundamental background in cognitive modeling, statistics, programming, and algorithmic thinking, as preparation for more specialized work; hence, though it is not a formal prerequisite to other courses, it should be taken as early as possible in the student's program. For students who have already gained an equivalent background through other courses, however, it may be waived by permission of the director.

In addition to the core course, each student chooses another five courses satisfying the following requirements:

1. At least one must entail a significant computing component, regardless of its home department (marked * in the lists below).
2. At least two must entail a significant artistic component (marked † in the lists below).
3. For students majoring in a field offering a track, none of the courses from that track may be double-counted as also satisfying major requirements.

The goal is to encourage the development of reasonable depth within one area, without neglecting the interdisciplinary nature of the field. Hence, rather than choosing courses at random from the lists below or focusing too narrowly on one particular corner of the field, each student should work actively with an advisor from his or her concentration in building an appropriate program.

Course Lists

Computer Science track. In addition to the core course, CS 165, any five of the following. Note that some of these courses have CS prerequisites.

- †ART 170, Visual Imaging in the Electronic Age (also CIS 167, CS 167, ENGRI 167)
 - *†CIS 300, Introduction to Computer Game Design
 - CIS 372, Studio in Space and Time
 - *CS 211, Object-Oriented Programming and Data Structures + 212, Programming Practicum (together these count as one course)
 - *CS 465, Introduction to Computer Graphics
 - *CS 472, Foundations of Artificial Intelligence
 - *CS 474, Introduction to Natural Language Processing
 - *CS 478, Machine Learning
 - *CS 565, Computer Animation
 - *CS 566, Advanced Computer Animation
 - *CS 578, Empirical Methods in Machine Learning and Data Mining
 - *INFO 345, Human-Computer Interaction Design
 - *INFO 440, Advanced Human-Computer Interaction Design
 - INFO 450, Language and Technology
- Up to two courses from another track.

Dance track. In addition to the core course, DANCE 165 (for description, see CS 165), any five of the following. Note that some of these courses have DANCE pre- and/or co-requisites. Note also that for this track, two courses marked * should be taken, and they should not be I and II of any one series for the purposes of satisfying the * requirement.

- †DANCE 210/VISST 211 Beginning Dance Composition
- †DANCE 235/VISST 235 Hip-Hop, Hollywood, and Home Movies
- †DANCE 258/VISST 258 Techno Soma Kinesics I
- †DANCE 310 Intermediate Dance Composition I
- †DANCE 311 Intermediate Dance Composition II
- †DANCE 358/VISST 358 Techno Soma Kinesics II
- †DANCE 362/THETR 362/VISST 362 Lighting Design Studio I
- *DANCE 368/MUSIC 355/THETR 368 Sound Design and Digital Audio
- *DANCE 369/MUSIC 356/THETR 369 Digital Performance
- †DANCE 391/MUSIC 391 Media Arts Studio
- †DANCE 410 Advanced Dance Composition I
- †DANCE 411 Advanced Dance Composition II
- †DANCE 462/THETR 462/VISST 462 Lighting Design Studio II
- †MUSIC 320 Scoring the Moving Image

- †PSYCH 305/VISST 305 Visual Perception
- *THETR 365 Automated Lighting and Control Systems

Up to two courses from another track

Film track. In addition to the core course, CIS 165, any five of the following. Note that some of these courses have FILM pre- and/or co-requisites.

- †ART 170 Visual Imaging in the Electronic Age
 - †ART 272 Digital Video and Sound
 - †FILM 377 Introduction to 16mm and Digital Filmmaking
 - FILM 325 Animation: History and Practice
 - †FILM 391 Media Arts Studio
 - *THETR 368 Sound Design and Digital Audio
 - *THETR 369 Digital Performance
 - *ART 273/CS 565 Computer Animation
 - *CS 566 Advanced Computer Animation
 - †FILM 422 Cinematography
 - †FILM 477 Intermediate Film and Video Projects: Documentary and Experimental Workshop
 - †FILM 493 Advanced Film and Video Projects
- Up to two courses from another track

Music track. In addition to the core course, MUSIC 165, any five of the following. Note that some of these courses have MUSIC prerequisites.

- *†CIS 300 Introduction to Computer Game Design
 - †MUSIC 120 Introduction to Digital Music
 - †MUSIC 220 Computers in Music Performance
 - †MUSIC 320 Scoring the Moving Image
 - *MUSIC 355/THETR 368 Sound Design and Digital Audio
 - *†MUSIC 356/THETR 369 Digital Performance
 - †MUSIC 361/362/363 Jazz Improvisation (any two of these 2-credit courses)
 - †MUSIC 451 Counterpoint
 - †MUSIC 453 Composition in Recent Styles
 - †MUSIC 454 Composition
 - †MUSIC 457 20th-Century Musical Languages
 - PHYS/MUSIC 204 Physics of Musical Sound
- Up to two courses from another track.

Psychology track. In addition to the core course, PSYCH 165, any five of the following. Note that some of these courses have PSYCH prerequisites.

- †ART 170, Visual Imaging in the Electronic Age (also CIS/CS/ENGRI 167)
 - *CS 465 Computer Graphics I
 - *CS 467 Computer Graphics II + 468, Computer Graphics Practicum (together these count as one course)
 - *INFO 214/PSYCH 214 Cognitive Psychology
 - †MUSIC 120 Introduction to Digital Music
 - PSYCH 205 Perception
 - †PSYCH 305 Visual Perception
 - PSYCH 316 Auditory Perception
 - *PSYCH 342 Human Perception: Applications to Computer Graphics, Art, and Visual Display
 - †PSYCH 418/MUSIC 418 Psychology of Music
- Up to two courses from another track.

EARTH AND ATMOSPHERIC SCIENCES

T. E. Jordan, chair; S. J. Colucci, co-chair (CAL); director of undergraduate studies, B. L. Isacks; R. W. Allmendinger, W. D. Allmon, C. Andronicos, M. Barazangi, L. D. Brown, L. M. Cathles, J. L. Cisne, K. H. Cook, A. T. DeGaetano, L. A. Derry, P. J. Gierasch, M. Goman, C. H. Greene, D. L. Hysell, R. W. Kay, S. Mahlburg Kay, M. C. Kelley, R. Lohman, N. Mahowald, B. Monger, A. Moore, J. Phipps Morgan, M. Pritchard, S. J. Riha, W. M. White, D. S. Wilks, M. W. Wysocki

The Department of Earth and Atmospheric Sciences covers the breadth of modern earth sciences. We live on a planet with finite resources and a finite capacity to recover quickly from human-induced environmental stresses. It is a naturally powerful planet, with geologic hazards such as earthquakes and volcanic eruptions that alter the course of history with little prior warning. As the human population grows, understanding the earth and its resources becomes progressively more important to both future policymakers and ordinary citizens, who must find new energy sources and sustain the quality of our environment.

During the past several decades, with the increasing concern about air and water pollution, nuclear waste disposal, the destruction of the ozone layer, and global climate change, the scientific community has gained considerable insight into how the biosphere, hydrosphere, atmosphere, and lithosphere systems interact. It has become evident that we cannot understand and solve environmental problems by studying these individual systems in isolation. The interconnectedness of these systems is a fundamental attribute of the Earth system, and understanding their various interactions is crucial for understanding our environment.

The department has been the home of two majors in the College of Arts and Sciences: geological sciences and science of earth systems (SES). The geological sciences major emphasized the solid earth and its history, while the science of earth systems major emphasized study of the interactions among rock, water, air, and life in our planet's operation. The SES major grew out of recognition of the fundamental interconnectedness of the components of the earth system, and the importance of understanding both the system's operation at present and in the geological past. The SES major reflects the new strategy of modern earth science. Thus, starting in Fall 2006, the geological sciences major became a specialization within the SES major. The geology specialization within SES provides an equivalent

to the geological sciences major, but with an increased breadth. Other concentrations include atmospheric sciences, ocean sciences, and biogeochemistry.

The SES major prepares students for a number of career paths in basic or applied sciences of our planet. The major can lead to graduate study and research in geology, geophysics, geochemistry, biogeochemistry, atmospheric sciences, ocean sciences, hydrology, or environmental engineering. Career opportunities in university research groups, governmental agencies, or the private sector deal with energy, mineral and water resources; natural hazards; weather and climate forecasting; ocean resources; and a host of environmental issues. The major can also prepare students for careers in environmental management and policy, law or medicine, science journalism, and K-12 science teaching.

Requirements for the Science of Earth Systems major

- The science of earth systems curriculum includes strong preparation in mathematics, physics, chemistry and biology, including the following:
MATH 111-112 (or MATH 191-192);
Two semesters of chemistry: CHEM 207-208 or CHEM 207-257;
PHYS 207-208 or 112-213;
BIO G 109-110, 101/103-102/104 or 105-106 (a second semester of biology can be replaced by CHEM 257 if CHEM 207-208 is selected; or replaced by a third semester of mathematics).
- The required introductory course in earth science, EAS 220, The Earth System.
- The core courses emphasize the interconnectedness of the earth system, and are founded on the most modern views of the planet as an interactive and ever-changing system. Each crosses the traditional boundaries of disciplinary science. Three courses selected from the following four core courses are required for the major.
EAS 301 Evolution of the Earth System
EAS 303 Biogeochemistry
EAS 304 Interior of the Earth
EAS 305 Climate Dynamics
- The specialization requirement is achieved by four intermediate to advanced-level courses (300 level and up) that build on the core courses and have prerequisites in the required basic sciences and/or mathematics courses. Note that additional basic math and science course may be required to complete the specialization courses, depending upon the student's choice of specialization. The specialization courses build depth and provide the student with a specific expertise in some facet of Earth system science. Four specializations are defined for the major: geology, biogeochemistry, atmospheric sciences, and ocean sciences. Other specializations can be tailored to a student's interests in concert with the student's advisor and approval of the curriculum committee. The specialization should be chosen during the junior year or before in consultation with the student's advisor and the approval of the Director of Undergraduate Studies.

- Exposure to the basic observations of earth science, whether directly in the field, or indirectly by various techniques of remote sensing or in the laboratory, is necessary to understand fully the chosen area of specialization. Means of satisfying this requirement generally include 3 credits of course work. Possibilities for fulfilling the field/observation requirement include the following:

Courses in the Hawaii Environmental Semester program;

Courses given by the Shoals Marine Laboratory;

EAS 250 Meteorological Observations and Instruments;

EAS 352 Synoptic Meteorology I;

EAS 417 Field Mapping in Argentina;

EAS 491 and/or 492 Undergraduate Research, with appropriate choice of project;

Field courses taught by another college or university (3-credit minimum).

For more information contact Bryan Isacks, Department of Earth and Atmospheric Sciences, bli1@cornell.edu, and visit the web site: www.eas.cornell.edu.

Honors. An honors program is offered by the Department of Earth and Atmospheric Sciences for superior students. Candidates for honors must maintain an overall 3.0 GPA, a cumulative average of 3.5 in the major, and complete an honors thesis (usually through EAS 491 and/or 492). Students interested in applying should contact the director of undergraduate studies during the second semester of the junior year or early in the first semester of the senior year.

Courses

EAS 101(1101) Introductory Geological Sciences (To Know Earth) (PBS)

Fall. 3 credits. C. Andronicos.

Designed to enhance an appreciation of the physical world. Emphasizes natural environments, surface temperatures, and dynamic processes such as mountain belts, volcanoes, earthquakes, glaciers, and river systems. Interactions of the atmosphere, hydrosphere, biosphere, and lithosphere (earth system science). Water, mineral, and fuel resources; environmental concerns. Field trips in the Ithaca region.

EAS 108(1108) Earth in the News (PBS)

Summer. 3 credits. S. L. Losh.

Provides an introduction to physical geology and earth systems science and explores the scientific basis for informed decision making regarding many timely environmental issues, including global warming, water pollution and use; geologic hazards such as floods, earthquakes, and volcanoes; fossil fuel distribution and use; and land use. A field trip is taken in the Ithaca area.

EAS 109(1109) Dinosaurs

Fall. 1 credit. J. L. Cisne.

An introductory survey course for anyone interested in dinosaurs. Lectures examine the fossil evidence and illustrate how various geological and biological disciplines contribute to understanding dinosaurs and their world.

EAS 119(1190) Fossil Preparation

Fall. 1 credit. Prerequisite: EAS 109 or related EAS course. W. Allmon and J. Cisne.

Hands on experience in the preparation and curation of fossils in laboratories at the Paleontological Research Institution (PRI). Students provide own transportation to the Museum of the Earth via public transit or other means. Activities include preparation and study of vertebrate, invertebrate, and plant specimens; sorting of bulk material such as field collections and mastodon dung, and curation of prepared specimens.

EAS 121(1121) Introduction to MATLAB (also CIS 121[1121])

Fall, spring, 8-week course. 2 credits. Prerequisites: MATH 111, 191, or equivalent. D. Fan.

For description, see CIS 121.

EAS 122(1220) Earthquake! (also ENGR1 122[1120]) (PBS)

Spring. 3 credits. L. Brown.

Explores the science of natural hazards and strategic resources. Techniques for locating and characterizing earthquakes and assessing the damage they cause; methods of using sound waves to image the earth's interior to search for strategic minerals; the historical importance of such resources. Seismic experiments on campus to probe for groundwater, the new critical environmental resource.

EAS 131(1310) Basic Principles of Meteorology (PBS)

Fall. 3 credits. M. W. Wysocki.

Simplified treatment of the structure of the atmosphere: heat balance of the Earth; general and secondary circulations; air masses, fronts, and cyclones; and hurricanes, thunderstorms, tornadoes, and atmospheric condensation. The optional 1-credit laboratory for this course is offered as EAS 133.

EAS 133(1330) Basic Meteorology Lab

Fall. 1 credit. Corequisite: EAS 131. M. W. Wysocki.

This course is required for atmospheric science majors, but is optional for other students taking EAS 131.

EAS 150(1500) Fortran Applications in Earth Science (also CIS 122[1122])

Spring, seven-week course. 2 credits.

Prerequisite: CIS/EAS 121 or equivalent. Letter grades only. M. Wysocki.

Emphasizes the application of scientific computing in the Earth sciences, including data processing and modeling of the Earth, its atmosphere, and oceans. Extends the procedural programming concepts developed in CIS/EAS 121 and considers their implementation in high-performance, compiled languages. Topics include the structure and syntax of a FORTRAN program, data input/output, compilation, and debugging.

EAS 154(1540) Introductory Oceanography, Lecture (also BIOEE 154[1540]) (PBS)

Fall, summer. 3 credits. Fall: B. C. Monger and C. H. Greene; summer: B. C. Monger.

Intended for both science and nonscience majors. Covers the basic workings of the ocean including its physics, chemistry, and biology. Following this basic description, the course examines threats to the health of the ocean and the important role the ocean plays in global climate change. Non-science majors

should pay particular attention to this course to fulfill a science requirement, because they learn broadly how the earth works (physically, chemically and biologically) in just a single class.

EAS 155(1550) Introductory Oceanography, Laboratory (also BIOEE 155[1550])

Fall. 1 credit. Corequisite: EAS 154.
B. C. Monger and C. H. Greene.

Laboratory course covering topics presented in EAS/BIOEE 154.

EAS 170(1700) Evolution of the Earth and Life (also BIO G 170[1700]) (PBS)

Spring. 3 credits. J. L. Cisne.

Earth systems and their evolution; Earth history's astronomical context; plate tectonics, continental drift, and their implications for climate and life; co-evolution of life and the atmosphere; precedents for ongoing global change; dinosaurs, mass extinctions, and human ancestry. Includes laboratories on reconstructing geological history and mapping ancient geography. Fossil collecting on field trips.

EAS 213(2130) Marine and Coastal Geology (PBS)

Summer. 4 credits. Prerequisite: introductory geology or ecology or permission of instructor. Staff.

A special two-week course offered at Cornell's Shoals Marine Laboratory (SML), located on an island near Portsmouth, N.H. For more details and an application, contact SML office, G14 Stimson Hall. Estimated cost for 2005 (including tuition, room, board, and ferry transportation): \$2,120.

EAS 220(2200) The Earth System (PBS)

Fall, spring. 4 credits. Letter grades only. Staff.

Integrated introduction to the earth system stressing the biological, chemical, geological, and physical interactions among the atmosphere, ocean, and solid earth. Topics include biogeochemical cycles, climate dynamics, and the evolution of the atmosphere, biosphere, cryosphere (ice), hydrosphere (oceans and inland waters), and lithosphere (solid earth).

EAS 222(2220) Seminar—Hawaii's Environment

Fall. 1 credit. S-U grades only. A. Moore. For students interested in the unique environmental systems of the Hawaiian Islands. Designed to bring together students returning from field studies in Hawaii with students interested in going there to study. Through reading and discussion students explore the geology, biology, ocean, atmosphere, and culture of the Hawaiian environment.

EAS 240(2400) Field Study of the Earth System (PBS)

Spring. 5 credits. Prerequisites: enrollment in Earth and Environmental Sciences Semester in Hawaii; one semester of calculus (MATH 191/192/193 or 111/112), and two semesters of any of the following: PHYS 207/208 or 112/213; CHEM 207/208; BIO 101/103–102/104 or 105/106 or 109/110; or equivalent course work. A. Moore.

Interdisciplinary field course covering fundamental concepts of the Earth system. Topics include global circulation patterns in

the solid Earth, atmosphere, and ocean; energy and mass transfer; change and variability of Earth, atmosphere, and ocean systems; the temporal record of change preserved in the geologic record; and Earth, oceanic, and atmospheric controls on ecosystem processes. The course is project-based with students engaged in hands-on, active learning that takes advantage of local resources.

EAS 250(2500) Meteorological Observations and Instruments

Fall. 4 credits. Prerequisite: EAS 131.

M. W. Wysocki and B. Monger.

Covers methods and principles of meteorological measurements and observations including surface, free-air, and remote systems. Also covers instrument siting, mounting, and protection; instrument response characteristics, calibration, and standardization; and recorders and data logging systems. Laboratory exercises are in observation and data analysis. The course is intended to serve as preparation for Observers Examination.

EAS 268(2680) Climate and Global Warming (PBS)

Spring. 3 credits. Prerequisite: basic college math. S-U or letter grades. A. T. DeGaetano.

Familiarizes students from a range of disciplines with such contemporary issues in climatology as global warming and El Niño. Introduces the natural greenhouse effect, past climates, observed and projected climate changes and impacts. Also covers natural climate variations (e.g., El Niño) and their consequences and predictability. Readings focus on recent scientific findings to climate change.

EAS 296(2960) Forecast Competition

Fall and spring. 1 credit; students enroll for two consecutive semesters; credit awarded after second semester; may be repeated for credit. Prerequisite: sophomore standing in atmospheric science or permission of instructor. S-U grades only. D. S. Wilks.

Two-semester course providing daily exercise in probabilistic weather forecasting, in which students compete to forecast local weather most skillfully.

EAS 301(3010) Evolution of the Earth System (PBS)

Fall. 4 credits. Prerequisites: MATH 112 or 192 and CHEM 207 or equivalent. T. Jordan, S. Riha, and W. Allmon.

Life activities alter the physical and chemical environment, and are altered by that environment. This interaction over very long times constitutes a co-evolution of earth and life. Course uses modern systems, tens of thousand year old systems, and hundreds of million year old systems to illustrate principles, methods of reconstructing deep history, and the context of natural change inherent to life and earth.

EAS 303(3030) Introduction to Biogeochemistry (also NTRES 303[3030]) (PBS)

Fall. 4 credits. Prerequisites: CHEM 207, MATH 112, plus a course in biology and/or geology. L. A. Derry and J. Yavitt.

Control and function of the Earth's global biogeochemical cycles. Begins with a review of the basic inorganic and organic chemistry of biologically significant elements, and then considers the biogeochemical cycling of carbon, nutrients, and metals that take place in soil, sediments, rivers, and the oceans.

Topics include weathering, acid-base chemistry, biological redox processes, nutrient cycling, trace gas fluxes, bio-active metals, the use of isotopic tracers, controls on atmospheric carbon dioxide, and mathematical models. Interactions between global biogeochemical cycles and other components of the Earth system are discussed.

EAS 304(3040) Interior of the Earth (PBS)

Spring. 3 credits. Prerequisite: EAS 220 or permission of instructor. C. Andronicos.

This class will investigate the geology of the solid earth with emphasis on igneous and metamorphic petrology, structure of the continents and ocean basins, and large scale tectonics. Interaction between deformation, melt generation and metamorphism will be examined as mechanisms by which the crust is differentiated from the underlying mantle. Geophysical and geochemical techniques for probing the deep interior of the earth will be investigated. Plate tectonics will be used as a unifying theme to understand processes operating in the solid earth.

EAS 305(3050) Climate Dynamics (PBS)

Fall. 3 credits. Prerequisites: two semesters of calculus and one of physics. K. H. Cook.

Processes that determine climate and contribute to its change are discussed, including atmospheric radiation, ocean circulation, and atmospheric dynamics. Contemporary climate change issues are investigated and discussed in the context of natural variability of the system.

EAS 322(3220) Biogeochemistry of the Hawaiian Islands (PBS)

Spring. 4 credits. Prerequisites: enrollment in Earth and Environmental Sciences Semester in Hawaii; EAS 220, EAS 303, or permission of instructor. L. Derry.

Field-oriented study of biogeochemical processes and ecosystem interactions across the Hawaiian islands. Field, class, and laboratory work focus on how landscape age and climate strongly control biogeochemical cycling and ecosystem development in Hawaii. Other topics include succession of ecosystems, evolution of nutrient cycles, and impacts of invasive species. The class is structured around field projects, carried out both in groups and individually.

EAS 334(3340) Microclimatology (PBS)

Spring. 3 credits. Prerequisite: a course in physics. D. S. Wilks.

The relationship of radiant energy, temperature, wind, and moisture in the atmosphere near the ground. The interplay between physical processes of the atmosphere, plant canopies, and soil is examined with emphasis on the energy balance.

EAS 341(3410) Atmospheric Thermodynamics and Hydrostatics (PBS)

Fall. 3 credits. Prerequisites: one year of calculus and one semester of physics. M. W. Wysocki.

Introduction to the thermodynamics and hydrostatics of the atmosphere and to the methods of description and quantitative analysis used in meteorology. Topics include thermodynamic processes of dry air, water vapor, and moist air and concepts of hydrostatics and stability.

EAS 342(3420) Atmospheric Dynamics (PBS)

Spring. 3 credits. Prerequisites: MATH 192, 213, or equivalent; one year of physics.
K. H. Cook.

Introduction to the basic equations and techniques used to understand motion in the atmosphere, with an emphasis on the space and time scales typical of storm systems (the synoptic scale). The governing equations of atmospheric flow are derived from first principles and applied to middle latitude and tropical meteorology. Topics include balanced flow, atmospheric waves, circulation, and vorticity. Text used is *An Introduction to Dynamic Meteorology* by Holton.

EAS 350(3500) Dynamics of Marine Ecosystems (also BIOEE 350[3500]) (PBS)

Fall. 3 credits. Prerequisites: one year of calculus and a semester of oceanography (i.e., EAS 154), or permission of instructor. Offered alternate years. C. H. Greene and R. W. Howarth.

Lecture course covering the interactions of physical and biological processes in marine ecosystems. Begins by looking at these processes on a global scale and works down to the scales relevant to individual organisms. Topics include global patterns of ocean circulation; global patterns of ocean production; climate variability and the role of the ocean in global climate change; the El Niño/Southern Oscillation; ecosystem dynamics of the open ocean and coastal environments.

EAS 351(3510) Marine Ecosystems Field Course (also BIOEE 351[3510]) (PBS)

Spring. 4 credits. Prerequisites: EAS 240; enrollment in Earth and Environmental Sciences Semester in Hawaii.

Recommended: oceanography course.

C. H. Greene, B. Monger, and C. D. Harvell.

Covers the interactions of physical and biological processes in marine ecosystems. Starts by looking at these processes on ocean-basin to regional scales and works down to the smaller scales relevant to individual organisms. Students are introduced to modern techniques of marine-ecosystems research, including remote sensing, oceanographic-survey methods, and experimental marine ecology. This course is field and laboratory intensive with students engaged in hands-on, active learning that takes advantage of local resources.

EAS 352(3520) Synoptic Meteorology (PBS)

Spring. 3 credits. Prerequisite: EAS 341.
Corequisite: EAS 342. M. W. Wysocki.

Study of weather map analysis and forecasting techniques by applying the principles of fluid and heat flow. Strengthens previously introduced meteorological concepts which are applied to forecasting midlatitude synoptic scale weather systems, such as cyclones, anticyclones, jet streams, fronts, and waves.

[EAS 353(3530) Physical Oceanography (PBS)]

Fall. 3 credits. Prerequisites: MATH 112 or 192, or one year of physics, or permission of instructor. Offered alternate years; next offered 2008–2009. B. C. Monger.]

EAS 401(4010) Fundamentals of Energy and Mineral Resources (PBS)

Fall. 3 credits. L. Cathles.

The earth's energy and mineral resources reflect some of the most important changes and dramatic events that have punctuated

earth history. Course provides an overview of resource types in the context of the earth's atmospheric evolution, rifting, mantle convection, and hydrologic cycle. The processes of resource accumulation are described in terms of simple, fundamental chemical and physical principles.

[EAS 404(4040) Geodynamics (PBS)]

Spring. 3 credits. Prerequisite: calculus and calculus-based physics or permission of instructor. Offered alternate years; next offered 2008–2009. J. Phipps Morgan.]

EAS 405(4050) Active Tectonics (PBS)

Spring. 3 credits. Recommended: mechanical background equivalent to EAS 426/488. S-U or letter grades. Offered alternate years. R. Lohman.

The class develops the ideas and methods necessary to understand how the Earth deforms—from individual earthquakes to the construction of mountain ranges. We discuss the driving forces of deformation, and how these forces interact with different geologic materials to cause deformation.

EAS 415(4150) Geomorphology (PBS)

Fall. 3 credits. B. L. Isacks.

A study of terrestrial landscapes as constructed by Earth's internal tectonic processes and modified by climate. Laboratory exercises include computer analyses of satellite images and digital elevation models and student reviews of papers from the rapidly growing literature on a key focus of modern geomorphology, the interactions of tectonics and climate.

EAS 417(4170) Field Mapping in Argentina (PBS)

Summer. 3 credits. Prerequisite: introductory EAS course and EAS 326. S. Mahlburg Kay.

Field mapping course in Argentina that fulfills field requirement for majors with interests in Geological Sciences and provides a field geological experience for others. Course consists of lectures in Buenos Aires followed by field exercises in the Sierras Pampeanas, Precordillera, and Main Cordillera Ranges of the Argentine Andes in the provinces of San Juan and Mendoza. A variety of exercises use modern techniques in the field mapping of a broad range of variably deformed sedimentary, metamorphic and igneous rocks. The course further provides an introduction to the tectonics and magmatic processes of the central Andes with emphasis on comparable processes in the U.S. Exercises are done in combination with students and faculty of the University of Buenos Aires.

[EAS 425(4250) European Discovery of Impacts and Explosive Volcanism]

Spring. 2 credits. Prerequisite: junior, senior, or graduate students with background in geology and permission of instructor. Letter grades only. Meets one day per week plus field trip during spring break. Fee probably charged for required weeklong field trip. Offered alternate years; next offered 2008–2009. J. Phipps Morgan.]

EAS 426(4260) Structural Geology (PBS)

Spring. 4 credits. Prerequisite: one semester of calculus, plus introductory geology course or permission of instructor. One weekend field trip. Offered alternate years. R. W. Allmendinger.

The nature and origin of deformed rocks at submicroscopic to global scales. The course begins with review of elementary principles of continuum mechanics and continues with a

discussion of deformation mechanisms commonly observed in earth materials. The geometry, kinematics, and mechanics of faults, folds, are then addressed and the class ends with a description of the tectonic setting of structural families such as thrust belts, rift provinces, and zones of strike slip deformation. A weekend field trip to a region of spectacular folding and thrusting provides and opportunity to apply the concepts learned in lecture.

[EAS 434(4340) Exploration Geophysics (PBS)]

Fall. 3 credits. Prerequisites: MATH 192 and PHYS 208, 213, or equivalent. Offered alternate years; next offered 2008–2009. L. D. Brown.]

EAS 435(4350) Statistical Methods in Meteorology and Climatology (MQR)

Fall. 3 credits. Prerequisites: introductory statistics course (e.g., AEM 210) and calculus. D. S. Wilks.

Statistical methods used in climatology, operational weather forecasting, and selected meteorological research applications. Includes statistical characteristics of meteorological data, including probability distributions and correlation structures. Covers operational forecasts derived from multiple regression models, including the MOS system; and forecast evaluation techniques.

EAS 437(4370) Geophysical Field Methods (also ARKEO 437[4370]) (PBS)

Fall. 3 credits. Prerequisite: PHYS 213 or 208, or permission of instructor. Offered alternate years. L. D. Brown.

Introduction to field methods of geophysical exploration, especially as applied to environmental issues. Emphasizes seismic, ground penetrating radar, gravity, and magnetic techniques. Analyzes and interprets field surveys carried out at the beginning of the semester.

EAS 440(4400) Seminar on the Intergovernmental Panel on Climate Change Report

Fall. 2 credits. Prerequisites: senior or higher standing. Offered alternate years. N. Mahowald.

The IPCC report has already received substantial public attention, and it will impact environmental and economic decisions for years to come. The course will focus on reading, understanding, and evaluating the IPCC report (2007 version). Students will lead a discussion, write a term paper on one or more chapters of the report, and participate in discussions led by other students.

EAS 447(4470) Physical Meteorology (PBS)

Fall. 3 credits. Prerequisites: one year each of calculus and physics. Offered alternate years. A. T. DeGaetano.

Primarily a survey of natural phenomena of the atmosphere, with emphasis on their underlying physical principles. Topics include an introduction to atmospheric radiation processes; atmospheric optics and electricity; microphysical cloud processes; and principles of radar probing of the atmosphere.

EAS 451(4510) Synoptic Meteorology II (PBS)

Fall. 3 credits. Prerequisites: EAS 341 and 342. E. K. Vizi.

Structure and dynamics of large-scale, mid-latitude weather systems, such as cyclones, anticyclones, and waves, with consideration of

processes that contribute to temperature changes and precipitation. Lab sessions involve real-time weather forecasting and the computer application of a numerical model of the atmosphere to study selected large-scale, mid-latitude weather events.

EAS 453(4530) Mineralogy (PBS)

Fall. 4 credits. Prerequisites: EAS 101, 220 and CHEM 207 or 211 or permission of instructor. S. Mahlburg Kay.

Covers chemical and physical properties and identification of minerals with emphasis on the rock-forming minerals that are the principal constituents of the Earth and nearby planets. Topics include internal and external crystallography, crystal chemistry, introductions to x-ray crystallography and optical mineralogy, and a systematic examination of the structures, chemistry, and occurrence of the rock-forming minerals. Independent project includes use of electron microprobe (EPMA) and x-ray facilities.

[EAS 454(4540) Petrology and Geochemistry (PBS)]

Spring. 4 credits. Prerequisite: EAS 453. Offered alternate years; next offered 2008-2009. R. W. Kay.]

EAS 455(4550) Geochemistry (PBS)

Fall. 4 credits. Prerequisites: CHEM 207 and MATH 192 or equivalent. Recommended: EAS 304. Offered alternate years. W. M. White.

The Earth from a chemical perspective. Covers the formation of the elements; cosmochemistry; chemical evidence regarding the formation of the Earth and solar system; trace-element geochemistry; isotope geochemistry; geochemical thermodynamics and kinetics; chemical evolution of the crust, mantle, and core; weathering and the chemistry of natural waters; chemistry of rivers and the oceans; hydrothermal systems; and ore deposition.

EAS 456(4560) Mesoscale Meteorology (PBS)

Spring. 3 credits. Prerequisites: EAS 341 and 342 or permission of instructor. S. J. Colucci.

Structure and dynamics of mid-latitude mesoscale weather systems such as fronts, jets, squall lines, convective complexes, precipitation bands, downslope windstorms, mountain breezes, sea breeze circulations, and lake effect snowstorms. The course also considers tropical weather systems and mesoscale modeling.

[EAS 457(4570) Atmospheric Air Pollution (PBS)]

Fall. 3 credits. Prerequisites: EAS 341 or thermodynamics course, and one semester of chemistry, or permission of instructor. Next offered 2008-2009. M. W. Wysocki.]

[EAS 458(4580) Volcanology (PBS)]

Fall. 3 credits. Prerequisite: EAS 304 or equivalent. Offered alternate years; next offered 2008-2009. R. W. Kay and W. White.]

[EAS 460(4600) Late Quaternary Paleoeology (PBS)]

Fall. 4 credits. Offered alternate years; next offered 2008-2009. M. Goman.]

EAS 461(4610) Paleoclimate: Since the Last Ice Age

Fall. 3 credits. Prerequisites: EAS 220 or permission of instructor. Offered alternate years. M. Goman.

Climate change is becoming increasingly important in the 21st century. In order to understand modern climate change it is helpful to understand past climate changes and variability. This course examines changes and variability in climate for the last 21,000 years. It will focus on the causes, extent, and evidence for climate change. Material covered will include evidence for orbital scale climate change, millennial and decadal scale changes, as well as extreme climate events and historic scale changes recorded in the terrestrial, ice, and oceanic records.

[EAS 462(4620) Marine Ecology (also BIOEE 462[4620]) (PBS)]

Fall. 3 credits. Limited to 75 students. Prerequisite: BIOEE 261. Offered alternate years; next offered 2008-2009. C. D. Harvell and C. H. Greene.]

EAS 470(4700) Weather Forecasting and Analysis (PBS)

Spring. 3 credits. Prerequisites: EAS 352 and 451. TBA. M. W. Wysocki.

Applied course with an opportunity to focus on weather forecasting and analysis techniques for various regions around the world. Lectures emphasize the application of student's knowledge of atmospheric dynamics, thermodynamics, and computer-data analysis to forecast the development and movement of multiscale weather systems. Students participate in weekly forecast discussions, write daily forecasts that include a synoptic discussion, quantitative precipitation forecasts, and severe-weather outlook for the forecast region, and lead class discussion on assigned readings.

EAS 471(4710) Intro Ground Water Hydrology (also BEE 471[4710]) (PBS)

Spring. 3 credits. Prerequisite: MATH 294 and ENGRD 202. Offered alternate years. L. Cathles and T. Steenhuis.

Intermediate-level study of aquifer geology, groundwater flow, and contamination of aquifers and clean-up methods. Includes description of transport of pesticides, nutrients and toxics through the unsaturated zone and aquifers. Discusses theoretical and practical applications. Includes short field trips.

EAS 475(4750) Special Topics in Oceanography

Fall, spring, summer. 2-6 credits, variable. Prerequisites: one semester of oceanography and permission of instructor. Fall, spring: C. H. Greene; summer: B. C. Monger.

Undergraduate instruction and participation in advanced areas of oceanographic research. Topics change from semester to semester. Contact instructor for further information.

EAS 476(4760) Sedimentary Basins (PBS)

Spring. 3 credits. Prerequisite: EAS 301 or permission of instructor. Offered alternate years. T. E. Jordan.

The focus is on the physical characteristics of sedimentary basins, which host fossil fuels and groundwater, and can potentially store CO₂. Topics include lithosphere mechanics and plate tectonic activity that cause subsidence, environments of deposition, and the textures, composition, and architecture of sedimentary rocks. Course objective is to learn to predict properties of rock where they cannot be directly sampled.

[EAS 478(4780) Advanced Stratigraphy (PBS)]

Fall. 3 credits. Prerequisite: EAS 301 or permission of instructor. Offered alternate years; next offered 2008-2009. T. E. Jordan.]

EAS 479(4790) Paleobiology (also BIOEE 479[4790]) (PBS)

Spring. 4 credits. Prerequisites: one year of introductory biology and either BIOEE 274, 373, EAS 301, or permission of instructor. Offered alternate years. W. Allmon.

Surveys the major groups of organisms and their evolutionary histories. Intended to fill out the biological backgrounds of Earth and atmospheric science students concerning the nature and significance of the fossil record for their respective studies.

EAS 481(4810) Senior Survey of Earth Systems

Fall, spring. 2 credits each semester. Fall, J. Cisne; spring, R. Kay.

Weekly seminar for seniors in the Science of Earth Systems major on current topics in Earth System Science. Readings, presentations and discussions will focus results from the recent literature, including how to analyze a scientific paper, and exploration of connections across the sub-disciplines in the field. The course will serve as both a review of key concepts, and a vehicle to explore developing concepts in the field.

EAS 483(4830) Environmental Biophysics (also CSS 483[4830]) (PBS)

Spring. 3 credits. Prerequisite: CSS 260 or equivalent or permission of instructor. Offered alternate years. S. J. Riha.

Introduction to basic principles of energy and mass transfer and storage in soil-plant systems. Covers energy budgets; solid heat flow; water movement in saturated and unsaturated soils; evapotranspiration; and water, gas, and nutrient dynamics in the soil-plant-atmosphere continuum. Considers applications to agronomic and environmental problems and instrument design and use through discussion and problem sets.

EAS 484(4840) Inverse Methods in the Natural Sciences (PBS)

Spring. 3 credits. Prerequisite: MATH 294. D. Hysell.

An exploration of solution methods for inverse problems with examples taken from geophysics and related fields, with particular attention to making inferences from inaccurate, incomplete, or inconsistent physical data. Applications include medical and seismic tomography, earthquake location, image processing, and radio/radar imaging. Linear algebra (including condition numbers) and probability and statistics (including error analysis, Bayes theorem, Gibbs distribution, and Markov chains) will be reviewed. Methods to be covered include nonlinear least-squares, maximum likelihood methods, and local and global optimization methods, including simulated annealing and genetic algorithms.

EAS 487(4870) Introduction to Radar Remote Sensing (also ECE 487[4870]) (PBS)

Fall. 3 credits. Prerequisite: PHYS 208 or 213 or equivalent. D. L. Hysell.

Covers the fundamentals of radar, antennas, and remote sensing. Students are exposed to the principles underlying the analysis and design of antennas used for communication and for radar-related applications. They also encounter both a mathematical and a practical

description of how radars function, how their performance can be optimized for different applications, and how signals acquired by them can be processed. The objective is to familiarize students with a wide variety of radars rather than turn them into practicing radar engineers. Each topic is developed from basic principles so students with a wide variety of backgrounds are able to take the course. Emphasis is placed on radar applications in geophysics, meteorology and atmospheric sciences, astronomy and space sciences. Radar remote sensing of the Earth from spacecraft receives special attention.

EAS 488(4880) Geophysics and Geotectonics (PBS)

Spring. 3 credits. Prerequisites: MATH 192 (or 112) and PHYS 208 or 213. Offered alternate years. M. Pritchard.

Covers global tectonics and the deep structure of the solid Earth as revealed by investigations of earthquakes, earthquake waves, the Earth's gravitational and magnetic fields, and heat flow.

EAS 491-492(4910-4920) Undergraduate Research

Fall, spring. 1-4 credits. Students should fill out form at 2124 Snee Hall. Staff (B. L. Isacks, coordinator).

Introduction to the techniques and philosophy of research in the earth sciences and an opportunity for undergraduates to participate in current staff research projects. Topics chosen in consultation with, and guided by, a staff member. A short written report is required, and outstanding projects are prepared for publication.

EAS 494(4940) Special Topics in Atmospheric Science

Fall, spring. 8 credits max. Undergraduate level. S-U or letter grades. Staff.

The department teaches "trial" courses under this number. Offerings vary by semester and are advertised by the department before the beginning of the semester. The same course is not offered more than twice.

EAS 496(4960) Internship Experience

Fall, spring. 2 credits. Prerequisites: EAS 240; enrollment in Earth and Environmental Sciences Semester in Hawaii. S-U grades only. A. Moore.

During the last three and a half weeks of the semester students carry out a service learning project with a local NGO, environmental business, government agency, research lab, or educational facility. Projects are carefully designed with the student, sponsoring agency, and faculty member. A final report is required.

EAS 497(4790) Individual Study in Atmospheric Science

Fall or spring. 1-6 credits. S-U grades only. Students must register using independent study form. Staff.

Topics are arranged at the beginning of the semester for individual study or for group discussions.

EAS 498(4980) Teaching Experience in Earth and Atmospheric Sciences

Fall, spring. 1-4 credits. S-U grades only. Staff.

The student assists in teaching an EAS course appropriate to his or her previous training. The student meets with a discussion or laboratory section, prepares course materials, grades assignments, and regularly discusses course objectives and teaching techniques with the faculty member in charge of the course.

EAS 499(4990) Undergraduate Research in Atmospheric Science

Fall or spring. Credit TBA. S-U grades only. Students must register using independent study form. Staff.

Independent research on current problems in atmospheric science.

[EAS 500(5000) Design Project in Geohydrology

Fall, spring; may continue over two or more semesters. 3-12 credits. Alternative to industrial project for M.Eng. students choosing geohydrology option. Next offered 2008-2009. L. M. Cathles.]

[EAS 502(5020) Case Histories in Groundwater Analysis

Spring. 4 credits. Next offered 2008-2009. L. M. Cathles.]

EAS 505(5050) Fluid Dynamics in the Earth Sciences

Spring. 3 credits. Prerequisites: MATH through 294, PHYS through 208/214 or permission of instructor. L. Cathles and M. Wysocki.

The Earth System provides fascinating examples of fluid dynamic phenomena such as turbulent convection in the outer core; convection in the viscous mantle, which drives crustal plates and causes volcanism and earthquakes; rapid flows in the atmosphere and oceans, which impact climate; and electromagnetic effects in the solar wind and magnetosphere. This course investigates the Earth using fluid dynamics. Students in Earth Sciences will gain insights provided by fluid dynamics. Students from other fields will see spectacular applications and learn about the Earth System in a different and fundamental way.

[EAS 522(5220) Advanced Structural Geology I

Fall. 3 credits. Prerequisites: EAS 426 and permission of instructor. Offered alternate years; next offered 2008-2009. R. W. Allmendinger and C. Andronicos.]

EAS 524(5240) Advanced Structural Geology II

Fall. 3 credits. Prerequisites: EAS 426 and permission of instructor. Offered alternate years. R. W. Allmendinger.

Geometry, kinematics, and mechanics of structural provinces. Concentrates on thrust belts, rift provinces, or strike-slip provinces. Covers techniques of balanced cross sections.

EAS 542(5420) Numerical Methods in Atmospheric Modeling

Spring. 3 credits. Prerequisite: PDEs and introductory numerical methods or permission of instructor. N. Mahowald.

Climate and numerical weather prediction models are important tools for policy and science. This course describes the basic principals of the numerics in these models, including finite difference, spectral methods, and subgrid parameterizations. Included will be a discussion of numerical stability and verification of models.

EAS 553(5530) Advanced Petrology

Fall. 3 credits. Prerequisite: EAS 454. Offered alternate years. R. W. Kay.

Topics include magmas and metamorphism in the context of plate tectonics; major and trace element chemistry and phase petrology as monitors of the creation and modification of igneous rocks; and temperature and stress in the crust and mantle and their influence on reaction rates and textures of metamorphic

rocks. Application of experimental studies to natural systems.

[EAS 575(5750) Planetary Atmospheres (also ASTRO 575[6575])

Fall. 4 credits. Offered alternate years; next offered 2008-2009. P. Gierasch. For description, see ASTRO 575.]

[EAS 577(5770) Planetary Surface Processes (also ASTRO 577[6577])

Spring. 3 or 4 credits. Offered alternate years; next offered 2008-2009. J. Bell. For description, see ASTRO 577.]

[EAS 578(5780) Planet Formation and Evolution (also ASTRO 578[6578])

Fall. 4 credits. Offered alternate years; next offered 2008-2009. J. L. Margot and M. Pritchard.

For description, see ASTRO 578.]

EAS 584(5840) Inverse Methods in the Natural Sciences

Spring. 3 credits. Prerequisite: MATH 294. D. Hysell.

An exploration of solution methods for inverse problems with examples taken from geophysics and related fields, with particular attention to making inferences from inaccurate, incomplete, or inconsistent physical data. Applications include medical and seismic tomography, earthquake location, image processing, and radio/radar imaging. Linear algebra (including condition numbers) and probability and statistics (including error analysis, Bayes theorem, Gibbs distribution, and Markov chains) will be reviewed. Methods to be covered include nonlinear least-squares, maximum likelihood methods, and local and global optimization methods, including simulated annealing and genetic algorithms. Students taking the course for advanced (500-level) credit will be expected to complete and present a substantial class project to be negotiated with the instructor.

[EAS 628(6280) Geology of Orogenic Belts

Spring. 3 credits. Prerequisite: permission of instructor. Next offered 2008-2009. Staff.]

[EAS 641(6410) Analysis of Biogeochemical Systems

Spring. 3 credits. Prerequisite: MATH 293 or permission of instructor. Offered alternate years; next offered 2008-2009. L. A. Derry.]

EAS 648(6480) Air Quality and Atmospheric Chemistry (also M&AE 648[6480])

Fall. 3 credits. Prerequisites: first-year chemistry and thermodynamics (or equivalent) and fluid mechanics (or equivalent); graduate standing or permission of instructor.

Factors determining air quality and effects of air pollutants on public health, ecological systems, and global climate change. Students will examine the source-to-receptor relationship of major air pollutants with an emphasis on the physical and chemical fundamentals of atmospheric transport and transformation. Topics include photochemical smog, atmospheric aerosols, atmospheric transport and deposition, emissions from energy systems, introduction to air quality monitoring and modeling, and air quality management.

EAS 652(6520) Advanced Atmospheric Dynamics (also ASTRO 652[7652])

Spring. 3 credits. Prerequisites: EAS 341 and 342 or equivalent. Next offered 2008-2009. S. J. Colucci.]

EAS 656(6560) Isotope Geochemistry

Spring. 3 credits. Open to undergraduates. Offered alternate years; next offered 2008-2009. W. M. White.]

EAS 666(6660) Applied Multivariate Statistics

Spring. 3 credits. Prerequisites: multivariate calculus, matrix algebra, and two statistics courses. Offered alternate years; next offered 2008-2009. D. S. Wilks.]

EAS 675(6750) Modeling the Soil-Plant-Atmosphere System (also CSS 675[6750])

Spring. 3 credits. Prerequisite: EAS/CSS 483 or equivalent. Next offered 2008-2009. S. J. Riha.]

EAS 692(6920) Special Topics in Atmospheric Science

Fall or spring. 1-6 credits. S-U or letter grades. Staff.

Study of topics in atmospheric science that are more specialized or different from other courses. Special topics covered depend on staff and student interests.

EAS 693(6930) Special Topics in Geological Sciences

Fall or spring. 1-3 credits, variable. S-U or letter grades. Staff.

Study of specialized advanced topics in the Earth sciences through readings from the scientific literature, seminars, and discussions.

EAS 700-799(7000-7990) Seminars and Special Work

Fall, spring. 1-3 credits. Prerequisite: permission of instructor. Staff.

Advanced work on original investigations in earth and atmospheric sciences. Topics change from semester to semester. Students should contact appropriate professor for more information.

EAS 701-702(7010-7020) Thesis Research

701, fall; 702, spring. 1-15 credits, variable. Staff.

EAS 711(7110) Upper Atmospheric and Space Physics

Fall or spring. 1-6 credits. Seminar course. TBA. D. L. Hysell.

EAS 722(7220) Advanced Topics in Structural Geology

R. W. Allmendinger.

EAS 731(7310) Advanced Topics in Remote Sensing and Geophysics

M. Pritchard.

EAS 733(7330) Advanced Topics in Geodynamics

Spring. J. Phipps Morgan.

EAS 750(7500) Satellite Remote Sensing in Biological Oceanography

Summer. 3 credits. B. C. Monger.

The intensive summer course meets from 9 a. m. to 5:00 p.m. for a two-week period. The goal of the course is to teach participants the skills needed to work independently to acquire data sets derived from a variety of satellite sensors (SeaWiFS, MODIS, AVHRR, SeaWinds and Topex-Poseidon) and to merge these data sets to examine biological response to changes in the physical environment.

Course time is split equally between lectures and computer lab work. Lectures cover the fundamentals of bio-optics, pigment algorithms, primary production algorithms and the underlying physical principals leading to the measurement of sea surface temperature, ocean wind speed and ocean topography. Computer labs focus on developing the IDL (Research Systems, Inc.) programming skills needed to process, analyze and visualize satellite image data. See the course syllabus for more details on the topics covered in this course.

EAS 751(7510) Petrology and Geochemistry

R. W. Kay.

EAS 755(7550) Advanced Topics in Geodynamics

Fall. 3 credits. J. Phipps Morgan.

EAS 757(7570) Current Research in Petrology and Geochemistry

S. Mahlburg Kay.

EAS 762(7620) Advanced Topics in Paleobiology

W. D. Allmon.

EAS 771(7710) Advanced Topics in Sedimentology and Stratigraphy

T. E. Jordan.

EAS 773(7730) Paleobiology

J. L. Cisne.

EAS 775(7750) Advanced Topics in Oceanography

C. H. Greene.

EAS 780(7800) Earthquake Record Reading

Fall. M. Barazangi.

EAS 781(7810) Exploration Geophysics

L. D. Brown.

EAS 793(7930) Andes-Himalayas Seminar

S. Mahlburg Kay, R. W. Allmendinger, B. L. Isacks, and T. E. Jordan.

EAS 795(7950) Low Temperature Geochemistry

1-3 credits. S-U letter grades. L. A. Derry.

EAS 796(7960) Geochemistry of the Solid Earth

W. M. White.

EAS 797(7970) Fluid-Rock Interactions

L. M. Cathles.

EAS 799(7990) Soil, Water, and Geology Seminar

Spring. L. M. Cathles and T. S. Steenhuis.

EAS 850(8500) Master's-Level Thesis Research in Atmospheric Science

Fall or spring. Credit by arrangement. S-U grades only. Hours by arrangement. Graduate faculty.

Limited to students specifically in the master's program in atmospheric science.

EAS 950(9500) Graduate-Level Dissertation Research in Atmospheric Science

Fall or spring. Credit by arrangement. S-U or letter grades. Hours by arrangement. Graduate faculty.

Limited to students in the atmospheric science Ph.D. program *only before* "A" exam has been passed.

EAS 951(9510) Doctoral-Level Dissertation Research in Atmospheric Science

Fall or spring. Credit by arrangement. S-U or letter grades. Hours by arrangement. Graduate faculty.

Limited to students admitted to candidacy in the atmospheric science Ph.D. program *after* "A" exam has been passed.

EAST ASIA PROGRAM

140 Uris Hall

The East Asia Program draws together faculty from departments and fields throughout the university who participate in a program of research and teaching on the civilizations and cultures of East Asia. Courses are offered through departments in the humanities and social sciences, as well as in the fields of business, city and regional planning, international and comparative labor relations, and developmental sociology. The Department of Asian Studies offers language courses in Mandarin, Cantonese, Korean, and Japanese, in addition to the Full-year Asian Language Concentration (FALCON) in Japanese and Mandarin. Undergraduates major in the Department of Asian Studies and concentrate on the language and culture of one East Asian country, while graduate students may work toward an M.A. in East Asian Studies, a dual M.B.A./M.A., or an M.A./Ph.D. in a discipline such as agricultural economics, anthropology, city and regional planning, government, history, history of art, linguistics, literature, rural sociology, or sociology. Graduate students concentrating on East Asia may apply for a variety of fellowships and travel grants offered by the East Asia Program. The formal program of study is enriched by numerous events and extracurricular activities, including films, workshops, art exhibits, lectures, symposia, and cultural and artistic performances on East Asia. With over 600,000 holdings in Chinese, Japanese, Korean, and western languages, the Wason Collection in Kroch Library is a major national resource for research on East Asia. A 5,000-piece collection representing the full range of Chinese, Japanese, and Korean art may be seen at the George and Mary Rockwell Galleries in the Herbert F. Johnson Museum of Art.

ECONOMICS

U. Possen, chair; T. Mitra, director of graduate studies; T. Lyons, director of undergraduate studies; T. Bar, L. Barseghyan, K. Basu, D. Benjamin, L. Blume, R. Burkhauser, S. Coate, D. Easley, R. Ehrenberg, G. Fields, A. Guerdjikova, G. Hay, Y. Hong, R. Kanbur, N. Kiefer, S. Klonner, T. Lyons, M. Majumdar, K. Mertens, T. Mitra, F. Molinari, M. Nielsen, T. O'Donoghue, A. Razin, D. Sahn, R. E. Schuler, K. Shell, H. Y. Wan, Jr., J. Wissink, T. Zhu, A. Zussman. Emeritus: T. E. Davis, W. Isard, A. Kahn, P. D. McClelland, G. Staller, E. Thorbecke, V. Tsyrennikov, J. Vanek

The study of economics provides an understanding of the way economies operate and an insight into public issues. The department offers a broad range of undergraduate courses in such fields as money and banking; international and comparative economics; econometrics; theory; history; growth and development; and the organization, performance, and control of industry.

The Major

Prerequisites

ECON 101 and 102 and MATH 111 (or equivalents) are required, all with grades of C or better; MATH 112 (or equivalent) is recommended. For further information, see "Math for Economics 313–314" at the department's web site: www.arts.cornell.edu/econ/major.html.

ECON 301 with a grade of C or better substitutes for 101; ECON 302 with a grade of C or better substitutes for 102.

Requirements

Eight courses listed by the Department of Economics at the 300 level or above, or approved by the student's major advisor, all with grades of C- or better. (S-U grade option is not allowed.)

These eight courses must include:

1. ECON 313 and 314
2. ECON 321, or ECON 319 and 320 (ECON 313, 314, 321 or 319, 320 should be completed before senior year.)
3. at least three courses from the following: ECON 318, 320, 322–399

ECON 301 with a grade of B or better substitutes for both 101 and 313; ECON 302 with a grade of B or better substitutes for both 102 and 314.

If ECON 321 is applied toward the major, neither 319 nor 320 can be applied.

ECON 498 and 499 *cannot* be counted toward the eight-course requirement.

If ECON 313 is applied to the major, ECON 301 cannot be.

If ECON 314 is applied to the major, ECON 302 cannot be.

If both ECON 367 and ECON 368 are taken, only one can be applied to the major.

Honors Program

An honors program is currently being offered. Students should consult the director of undergraduate studies before May of their junior year for more information.

Recommended Courses

Students planning graduate work in economics should select ECON 319–320 rather than 321 and should consider including some of the following courses in their majors:

ECON 325 (Cross Section and Panel Econometrics) or ECON 327 (Time Series Econometrics)

ECON 337 (Equilibrium and Welfare Economics)

ECON 405 (Auction Seminar)

ECON 367 (Game Theoretic Methods) or ECON 368 (Game Theory)

ECON 416 (Intertemporal Economics)

ECON 419 (Economic Decisions under Uncertainty)

ECON 446 (Topics in Macroeconomic Analysis)

Students planning careers in business management should consider including some of the following courses in their majors:

ECON 333 (Financial Economics)

ECON 351 or 352 (Industrial Organization)

ECON 358 (Behavioral Economics)

ECON 361–362 (International Trade and Finance)

ECON 440–441 (Analysis of Agricultural Markets and Commodity Futures Markets)

ECON 443 (Compensation, Incentives, and Productivity)

In addition to completing the economics major, such students should also consider courses in accounting and subjects such as finance, marketing, entrepreneurship, business administration, and business law. Courses in these subjects are offered by the Department of Applied Economics and Management, the School of Hotel Administration, and the Johnson Graduate School of Management.

Students planning to attend law school should consider including some of the following courses in their majors:

ECON 351 or 352 (Industrial Organization)

ECON 354 (Economics of Regulation)

ECON 361–362 (International Trade and Finance)

ECON 404 (Economics and the Law)

In addition to completing the economics major, such students should inquire at Career Services, College of Arts and Sciences, concerning recommended courses offered by other departments.

Courses

ECON 101(1110) Introductory Microeconomics (SBA-AS)

Fall, spring, winter, and summer. 3 credits.

ECON 101 is not a prerequisite for 102.

Students may not receive credit for both ECON 101 and H ADM 141. Students who take ECON 101 and ECON 313 may not receive credit for ECON 301 or PAM 200.

Explanation and evaluation of how the price system operates in determining what goods are produced, how goods are produced, who receives income, and how the price system is modified and influenced by private organizations and government policy.

ECON 102(1120) Introductory Macroeconomics (SBA-AS)

Fall, spring, winter, and summer. 3 credits.

ECON 101 is not a prerequisite for 102.

Students who take ECON 102 and 314 may not receive credit for ECON 302.

Analysis of aggregate economic activity in relation to the level, stability, and growth of national income. Topics may include the determination and effects of unemployment, inflation, balance of payments, deficits, and economic development, and how these may be influenced by monetary, fiscal, and other policies.

ECON 204(2040) Networks (also SOC 209[2090]) (SBA-AS)

Spring. 4 credits. Cannot be applied to ECON major.

This interdisciplinary course examines network structures and how they matter in everyday life. The course examines how each of the computing, economic, sociological and natural worlds are connected and how the structure of these connections affects each of these worlds. Tools of graph theory and game theory are taught and then used to analyze networks. Topics covered include the web, the small world phenomenon, markets, neural networks, contagion, search and the evolution of networks.

ECON 230(2300) International Trade and Finance (SBA-AS)

Cannot be applied to ECON major.

For description, see AEM 230.

ECON 301(3010) Microeconomics (SBA-AS)

Fall. 4 credits. Prerequisite: calculus.

Students who take ECON 101 and ECON 313 may not receive credit for Econ 301 or PAM 200.

Intended for students with strong analytical skills who have not taken ECON 101, 102. May be used to replace both ECON 101 and 313 (may replace 313 only with grade of B or better). Covers the topics taught in ECON 101 and 313. An introduction to the theory of consumer and producer behavior and to the functioning of the price system.

ECON 302(3020) Macroeconomics (SBA-AS)

Spring. 4 credits. May be used to replace both ECON 102 and 314 (may replace 314 only with grade of B or better). *Students who take ECON 102 and 314 may not receive credit for ECON 302.* Prerequisite: calculus.

Intended for students with strong analytical skills who have not taken ECON 101, 102. Covers the topics taught in ECON 102 and 314. An introduction to the theory of national income determination, unemployment, growth, and inflation.

ECON 307(3070) Introduction to Peace Science (also CRP 495.18[3850]) (SBA-AS)

Winter session. 3 credits. Prerequisites:

ECON 101–102 or permission of instructor.

Introduction to the theories of and research on conflict resolution. Topics include conflict, its role and impact on society; theories of aggression and altruism; causes of war; game theory; conflict management procedures and other analytical tools and methods of peace science; and alternatives to war.

ECON 313(3130) Intermediate Microeconomic Theory (SBA-AS)

Fall, spring, and summer. 4 credits.

Students who take ECON 101 and ECON 313 may not receive credit for ECON 301 or PAM 200. Prerequisites: ECON 101-102 and calculus.

The pricing processes in a private enterprise economy are analyzed under varying competitive conditions, and their role in the allocation of resources and the functional distribution of national income is considered.

ECON 314(3140) Intermediate Macroeconomic Theory (SBA-AS)

Fall, spring, and summer. 4 credits.

Students who take ECON 102 and 314 may not receive credit for ECON 302.

Prerequisites: ECON 101-102 and calculus.

Introduces the theory of national income and determination and economic growth in alternative models of the national economy. Examines the interaction and relation of these models to empirical aggregate economic data.

ECON 319(3190) Introduction to Statistics and Probability (MQR)

Fall and spring. 4 credits. *Students who take ECON 319 may not receive credit for MATH 471 or BTRY 408. Students who take ECON 319 may not receive credit for MATH 472 or BTRY 409.* Prerequisites: ECON 101-102 and MATH 111-112.

Provides an introduction to statistical inference and to principles of probability. It includes descriptive statistics, principles of probability, discrete and continuous distributions, and hypothesis testing (of sample means, proportions, variance). Regression analysis and correlation are introduced.

ECON 320(3200) Introduction to Econometrics (MQR)

Fall and spring. 4 credits. *Students may not receive credit for both ECON 320 and ECON 321.* Prerequisites: ECON 101-102, 319, or equivalent.

Introduction to the theory and application of econometric techniques. How econometric models are formulated, estimated, used to test hypotheses, and used to forecast; understanding economists' results in studies using regression model, multiple regression model, and introduction to simultaneous equation models.

ECON 321(3210) Applied Econometrics (MQR)

Fall and spring. 4 credits. *Students may not receive credit for both ECON 320 and ECON 321.* Prerequisites: ECON 101-102 and calculus.

Provides an introduction to statistical methods and principles of probability. Topics include analysis of data, probability concepts and distributions, estimation and hypothesis testing, regression, correlation and time series analysis. Applications from economics are used to illustrate the methods covered in the course.

ECON 322(3220) World Economic History # (HA-AS)

Spring. 4 credits. Prerequisites: ECON 101 and 102 or equivalent.

An economist's perspective on the comparative evolution of selected economic and social institutions, with emphasis on trade, finance, population growth and technological change.

ECON 323(3230) American Economic History # (SBA-AS)

Fall. 4 credits. Prerequisite: ECON 101-102 or equivalent.

Surveys problems in American economic history from the first settlements to early industrialization.

ECON 324(3240) American Economic History # (SBA-AS)

Spring. 4 credits. Prerequisites: ECON 101-102 or equivalent.

Surveys problems in American economic history from the Civil War to World War I.

ECON 325(3250) Cross Section and Panel Econometrics (MQR)

Spring. 4 credits. Prerequisite: ECON 320.

Introduction to cross-section and panel econometrics. Topics include multiple-regression analysis with qualitative information to models, simple and advanced panel data methods, informal variable, estimation, simultaneous equation models.

ECON 327(3270) Time Series Econometrics (MQR)

Spring. 4 credits. Prerequisite: ECON 320.

Introduction to time-series econometrics. Topics include stationary time series, ARMA models, multivariate models, non-stationary models and unit roots, and co-integration.

ECON 331(3310) Money and Credit (SBA-AS)

Spring. 4 credits. Prerequisites: ECON 101-102 and 314.

A systematic treatment of the determinants of the money supply and the volume of credit. Economic analysis of credit markets and financial institutions in the United States.

ECON 333(3330) Financial Economics (SBA-AS)

Fall. 4 credits. Prerequisites: ECON 313 and 314.

Examines the theory and decision making in the presence of uncertainty and the practical aspects of particular asset markets.

ECON 335(3350) Public Finance: The Microeconomics of Government (SBA-AS)

Fall. 4 credits. Prerequisites: ECON 101-102 and 313, or equivalent, and one semester of calculus.

Analyzes the role of government in a free market economy. Topics include public goods, market failures, allocation mechanisms, optimal taxation, effects of taxation, and benefit-cost analysis. Current topics of an applied nature vary from semester to semester.

ECON 336(3360) Public Finance: Resource Allocation and Fiscal Policy (SBA-AS)

Spring. 4 credits. Prerequisites: ECON 101-102, 313 or equivalent and one semester of calculus.

Covers the revenue side of public finance and special topics. Subjects include the federal debt, the budget, and government regulation and transfers, as well as problems like local public goods, health care, education, the hierarchy of governmental structure, plus a variety of applied problems.

ECON 337(3370) Equilibrium and Welfare Economics (SBA-AS)

Fall. 4 credits. Prerequisites: ECON 313, 314, 319.

Introduction to the theory of competitive equilibrium and economic efficiency. Begins with a review of the Walrasian model and identify conditions under which a price-guided decentralized competitive economy achieves an optimal allocation of resources.

Presents a number of celebrated examples and applications: the standard 2x2 model of international trade, Leontief's input-output model, Morishima's interpretation of labor theory of value, Arrow's analysis of uncertainty and Amartya Sen's analysis of famines. Finally, problems of market failure are reviewed.

[ECON 339(3390) State and Local Public Finance (SBA-AS)]

Spring. 4 credits. Prerequisite: ECON 313. Next offered 2009-2010.

Examines the role of subnational governments and jurisdictions in the economy. Among the broad questions addressed are: what tasks are optimally assigned to local governments? What impact can such assignment have on efficiency and equity? How do inter-government financial relations affect these outcomes? The theory and evidence on these issues are analyzed, with frequent application to current issues, like debates surrounding local, school district-based provision of education.]

ECON 341(3410) Economics of Wages and Employment II (SBA-AS)

For description, see ILRLE 440.

ECON 342(3420) Economic Analysis of the University

For description, see ILRLE 648.

ECON 344(3440) Development of Economic Thought and Institutions

For description, see ILRLE 344.

ECON 347(3470) Economics of Education

For description, see ILRLE 647.

ECON 351(3510) Industrial Organization I (SBA-AS)

Fall. 4 credits. *Students may not receive credit for both ECON 351 and AEM 432.*

Prerequisite: ECON 313 or equivalent.

Examines markets with only a few firms (i.e., oligopolies), and the primary focus is the strategic interactions between firms. Topics include static competition in oligopolies, cartels and other forms of collusive behavior, competition between firms producing differentiated products, entry behavior, RD behavior, and government interventions in oligopoly industries (e.g., antitrust laws).

ECON 352(3520) Industrial Organization II (SBA-AS)

Spring. 4 credits. Prerequisite: ECON 313 or equivalent.

Focuses primarily on the pricing decisions of firms. The course does not consider the strategic response of other firms to these pricing decisions. The pricing decisions include price discrimination, commodity bundling, pricing a product line and pricing a durable good. In addition to pricing decisions, the course considers topics associated with private information such as adverse selection, signaling, and moral hazard. Numerous theoretical models are presented and empirical results are discussed.

ECON 354(3540) The Economics of Regulation (SBA-AS)

Fall. 4 credits. Prerequisite: ECON 313 or equivalent.

Regulation constrains individual and institutional behavior. These interfaces between the private and public sectors are explored in terms of their rationale, efficacy, and economic consequences. Regulation is examined as a system of incentives that guides the

development and efficient functioning of markets, that moulds the behavior of regulated industries like utilities and that elicits socially desirable levels of pollution, congestion, risk and benefits from externality-generating activities. How the various professions (law, accounting and engineering) view and address these challenges are examined in light of their economic effects.

ECON 358(3580) Behavioral Economics (SBA-AS)

Spring. 4 credits. Prerequisite: ECON 313. Introduces students to behavioral economics, an emerging subfield of economics that incorporates insights from psychology and other social sciences into economics. Examines evidence on how human behavior systematically departs from the standard assumptions of economics, and also investigates attempts by behavioral economists to improve economic analyses.

ECON 361(3610) International Trade Theory and Policy (SBA-AS)

Fall. 4 credits. Prerequisites: ECON 101–102 and 313. Surveys the sources of comparative advantage. Studies commercial policy and analyzes the welfare economics of trade between countries. Some attention is paid to the institutional aspects of the world trading system.

ECON 362(3620) International Monetary Theory and Policy (SBA-AS)

Spring and summer. 4 credits. Prerequisites: ECON 101–102 and 314. Surveys the determination of exchange rates and theories of balance of payments adjustments. Also explores open economy macroeconomics and analyzes some of the institutional details of foreign exchange markets, balance of payments accounting, and the international monetary system.

ECON 367(3670) Game Theoretic Methods (SBA-AS)

Fall. 4 credits. Prerequisites: ECON 101 or equivalent. ECON 367 is *not* a prerequisite for ECON 368. Introduces students to the use of game-theoretic methods for the social sciences. This leads to an analysis of the social and political foundations of economics that prepares students to think strategically on social and economic matters and thus serves as a background for more advanced courses in economics, game theory, and related social sciences.

ECON 368(3680) Game Theory (MQR)

Spring. 4 credits. Prerequisites: ECON 313 and 319. ECON 367 is *not* a prerequisite for ECON 368. Studies mathematical models of conflict and cooperation in situations of uncertainty (about nature and about decision makers).

ECON 371(3710) Economic Development (SBA-AS)

Fall. 4 credits. Prerequisite: ECON 313 or equivalent. Studies the problem of sustaining accelerated economic growth in less-developed countries. Emphasizes trade-offs between growth, welfare, and equity; the legacy of colonialism; relevance of history and economic theory; problems of capital formation, economic planning and international specialization; and the interaction of industrialization, agricultural development, and population change.

ECON 372(3720) Applied Economic Development (SBA-AS)

Spring. 4 credits. Prerequisite: ECON 101–102. Examines several special topics in the economics of developing countries. Recent topics are the concepts of development and underdevelopment, the debate over development economics, the peasant household and its place in the world economy, the debt crisis, the state vs. market debate and the role of the state in economic development, and the question of sustainable development.

ECON 404(4040) Economics and the Law (SBA-AS)

Fall. 4 credits. Prerequisite: ECON 101. Examines, through the lens of economic analysis, of legal principles drawn from various branches of law, including contracts, torts, and property. Cases are assigned for class discussion; in addition, there are several writing assignments.

ECON 405(4050) Auction Seminar (MQR)

Spring. 4 credits. Prerequisites: ECON 314, 319, 320, and 368. Uses theoretical and empirical methods to analyze bidding behavior in auctions. The first part of the course studies theoretical models of auctions. The role of private information is discussed in the context of two empirically important auction formats: the first-price-sealed-bid and the open-ascending-bid auction. Bid-shading and the winner's curse are explained in these models. Optimal selling strategies as well as the issue of bidder collusion are analyzed. In the second part, empirical evidence on these topics is discussed in the context of outer continental-shelf oil auctions, Internet auctions, and treasury bill and spectrum auctions. One session is devoted to an auction experiment in class. In the final part of the course, students present and debate the issues of their semester papers. Readings are assigned weekly from the reading packet.

ECON 408(4080) Production Economics and Policy (SBA-AS)

For description, see AEM 608.

ECON 409(4090) Environmental Economics (SBA-AS)

For description, see AEM 451.

[ECON 416(4160) Intertemporal Economics (SBA-AS)]

Fall. 4 credits. Prerequisite: ECON 313. Next offered 2009–2010. Intended for advanced economics majors who are especially interested in economic theory. Topics include (1) review of the one good Ramsey model of optimal savings and accumulation; conditions for intertemporal efficiency in production; comparative dynamics and sensitivity analysis; (2) some earlier models of capital accumulation; the roles of present value and internal rate of return in guiding investment decisions; (3) growth, exhaustible resources; pollution and conservation: discussion of the trade-offs facing a society.]

ECON 417(4170) History of Economic Analysis # (HA-AS)

Spring. 4 credits. Prerequisites: ECON 101–102 or permission of instructor. Covers early writings in economics and their relationship to current economic analysis and policy issues. Examples include: ancient and medieval philosophers on justice in exchange;

mercantilist arguments for trade protection; early theories about the effect of monetary expansion (D. Hume); the role of the entrepreneur (Cantillon); and general competitive equilibrium (the Physiocrats). The most recent reading assignment in this course is Adam Smith's *Wealth of Nations* but the emphasis is on the relationship between the precursors of Adam Smith and his *Wealth of Nations* to modern economics analysis and current efforts to answer some of the questions raised in the early writing on economics.

[ECON 419(4190) Economic Decisions under Uncertainty]

Fall. 4 credits. Prerequisites: ECON 313 and 319. Next offered 2009–2010. Provides an introduction to the theory of decision making under uncertainty with emphasis on economic applications of the theory.]

ECON 430(4300) Policy Analysis: Welfare Theory, Agriculture, and Trade (SBA-AS)

For description, see AEM 630.

[ECON 431(4310) Monetary Economics (MQR)]

Spring. 4 credits. Prerequisites: ECON 313 and 314. Next offered 2008–2010. Covers monetary theory, history, and policy. Topics include transaction costs, centralized and bilateral trading, media of exchange, international exchange and monetary arrangements, and central bank and its policy.]

ECON 434(4340) Financial Economics, Derivatives, and Risk Management (SBA-AS)

Summer only. 4 credits. Prerequisite: ECON 313. Helps students understand, design, and price derivative contracts. Topics include pricing of forwards, options, and swaps; developing trading strategies with derivatives; using derivatives for financial risk management; and the importance of flexibility in various economic settings.

ECON 443(4430) Compensation, Incentives, and Productivity

For description, see ILRLE 443.

ECON 444(4440) Evolution of Social Policy in Britain and America

For description, see ILRLE 444.

ECON 445(4450) Industrial Policy (SBA-AS)

Spring. 4 credits. Prerequisite: ECON 313. Highlights of the course include (1) the role of the state in an industrial society; the drive for industrialization; the prevention of de-industrialization; the views of the Nobelists—Friedman, the Libertarian vs. North, the institutionist; the original intent of *laissez-faire*; (2) the major debates—the pros and cons of the Washington Consensus (“liberalization”); IMF and “conditionality”; market failure vs. government failure as roots for crises; (3) the East Asian episodes; Komiya on the Japanese MITI—early successes/recent problems; Linsu Kim about Korean policy—are subsequent difficulties the necessary price for the early triumphs?; industrial policy without protectionism (the cases of Singapore and Penang, Malaysia)—viable approaches under the WTO rules; (4) present developments and implications; trade frictions (the export expansion of the PRC); environmental concerns.

ECON 447(4470) Economics of Social Security (SBA-AS)

For description, see PAM 346.

ECON 450(4500) Resource Economics (SBA-AS)

For description, see AEM 450.

ECON 451(4510) Economic Security (SBA-AS)

For description, see ILRLE 340.

ECON 455(4550) Income Distribution (SBA-AS)

For description, see ILRLE 441.

ECON 456(4560) The Economics of Employee Benefits (SBA-AS)

For description, see ILRLE 442.

ECON 457(4570) Women in the Economy (also FGSS 446[4460]) (SBA-AS)

For description, see ILRLE 445.

ECON 458(4580) Topics in 20th-Century Economic History (SBA-AS)

For description, see ILRLE 448.

ECON 459(4590) Economic History of British Labor 1750 to 1940 (SBA-AS)

For description, see ILRLE 446.

ECON 460(4600) Economic Analysis of the Welfare State (SBA-AS)

For description, see ILRLE 642.

ECON 461(4610) The Economics of Occupational Safety and Health (SBA-AS)

For description, see ILRLE 644.

ECON 469(4690) China's Economy under Mao and Deng (also CAPS 469[4690]) @ (SBA-AS)

Spring, 4 credits. Prerequisite: ECON 101-102 or permission of instructor.

Examines the development of the Chinese economy and the evolution of China's economic system between the early 1990s and late 1990s.

ECON 473(4730) Economics of Export-Led Development @ (SBA-AS)

Fall, 4 credits. Prerequisites: ECON 313, 314, or equivalent.

Examines the phenomenon of export-led development from both the theoretical and empirical points of view. Concentration is on experiences within the West Pacific Rim.

ECON 474(4740) Economics of Hunger and Malnutrition

For description, see NS 457.

[ECON 475(4750) The Economy of India @ (SBA-AS)]

Fall, 4 credits. Prerequisite: ECON 101-102 or equivalent background. Next offered 2009-2010.

Presents the major economics and development problems of contemporary India and examines the country's future economic prospects. The aim is, however, to discuss these problems in their proper historical perspectives. Hence, the course starts with a brief outline of the social and political history of India. It then turns to a more detailed account of the economic history of India in two stages.]

ECON 476(4760) Decision Theory I (also ECON 676[6760], CIS 576[5846]) (MQR)

Fall, 4 credits.

Research on decision theory resides in a variety of disciplines including computer

science, economics, game theory, philosophy, and psychology. This course attempts to integrate these various approaches. The course is taught jointly by faculty from Game Theory and Computer Science. The course covers several areas: (1) basic decision theory. This theory, sometimes known as "rational choice theory," is part of the foundation for the disciplines listed above. It applies to decisions made by individuals or by machines; (2) the limitations of and problems with this theory. Issues discussed here include decision theory paradoxes revealed by experiments, cognitive and knowledge limitations, and computational issues; (3) new research designed in response to these difficulties. Issues covered include alternative approaches to the foundations of decision theory, adaptive behavior and shaping the individual decisions by aggregate/evolutionary forces and more computationally based approaches.

ECON 477(4770) Decision Theory II (also ECON 677[6770], CIS 577[5847]) (MQR)

Spring, 4 credits. Prerequisite: ECON 476 or 676 or CIS 576.

A continuation of ECON 476.

ECON 480(4800) The Family in Asia

For description, see D SOC 480.

ECON 494(4940) Economic Methods for Engineering and Management

For description, see CEE 594.

ECON 498(4980) Independent Study in Economics

Fall or spring. Variable credit. Independent study.

ECON 499(4990) Honors Program

Fall and spring, 8 credits. Prerequisites: ECON 313, 314, 321 (or 319-320).

Students should consult the director of undergraduate studies for details. Admission is competitive. Interested students should apply to the program in the spring semester of their junior year.

Graduate Courses and Seminars**ECON 609(6090) Microeconomic Theory I**

Fall, 4 credits.

Topics in consumer and producer theory.

ECON 610(6100) Microeconomic Theory II

Spring, 4 credits.

Topics in consumer and producer theory, equilibrium models and their application, externalities and public goods, intertemporal choice, simple dynamic models and resource depletion, choice under uncertainty.

ECON 611(6110) Microeconomic Theory III

Fall, 4 credits. Prerequisites: ECON 609 and 610.

This class is part of a three-semester sequence in microeconomic theory. It provides a rigorous underpinning of partial equilibrium competitive analysis and reviews theories of non-competitive markets, including Bertrand, Cournot, and monopolistic competition. It covers the classical sources of market failure (public goods, externalities, and natural monopoly) and discusses market failures stemming from informational asymmetries. It also provides an introduction to contract theory, bargaining theory, social choice theory, and theory of mechanism design.

ECON 613(6130) Macroeconomic Theory I

Fall, 4 credits.

Covers the following topics: static general equilibrium; intertemporal general equilibrium; infinitely lived agents models and overlapping generations models; welfare theorems; equivalence between sequential markets and Arrow-Debreu Markets; Ricardian proposition; Modigliani-Miller theorem; asset pricing; recursive competitive equilibrium; the Neoclassical Growth Model; calibration; and introduction to dynamic programming.

ECON 614(6140) Macroeconomic Theory II

Spring, 4 credits.

Covers the following topics: dynamic programming; stochastic growth; search models; cash-in-advance models; real business-cycle models; labor indivisibilities and lotteries; heterogeneous agents models; optimal fiscal and monetary policy; sustainable plans; and endogenous growth.

ECON 617(6170) Intermediate Mathematical Economics I

Fall, 4 credits. Prerequisites: calculus II and intermediate linear algebra.

Covers selected topics in Matrix algebra (vector spaces, matrices, simultaneous linear equations, characteristic value problem), calculus of several variables (elementary real analysis, partial differentiation, convex analysis), classical optimization theory (unconstrained maximization, constrained maximization).

[ECON 618(6180) Intermediate Mathematical Economics II

Spring, 4 credits. Next offered 2009-2010.

Continuation of ECON 617. Develops additional mathematical techniques for applications in economics. Topics may include study of dynamic systems (linear and nonlinear difference equations, differential equation, chaotic behavior), dynamic optimization methods (optimal control theory, nonstochastic and stochastic dynamic programming), and game theory (repeated dynamic and evolutionary games).]

ECON 619(6190) Econometrics I

Fall, 4 credits. Prerequisite: ECON 319-320 or permission of instructor.

Gives the probabilistic and statistical background for meaningful application of econometric techniques. Topics include probability theory probability spaces, random variables, distributions, moments, transformations, conditional distributions, distribution theory and the multivariate normal distribution, convergence concepts, laws of large numbers, central limit theorems, Monte Carlo simulation; statistics: sample statistics, sufficiency, exponential families of distributions. Further topics in statistics are considered in ECON 620.

ECON 620(6200) Econometrics II

Spring, 4 credits. Prerequisite: ECON 619.

A continuation of ECON 619 (Econometrics I) covering statistics: estimation theory, least squares methods, method of maximum likelihood, generalized method of moments, theory of hypothesis testing, asymptotic test theory, and nonnested hypothesis testing; and econometrics: the general linear model, generalized least squares, specification tests, instrumental variables, dynamic regression models, linear simultaneous equation models, nonlinear models, and applications.

ECON 676(6760) Decision Theory I (also ECON 476[4760], CIS 576[5846])

For description, see ECON 476.

ECON 677(6770) Decision Theory II (also ECON 477[4770], CIS 577[5847])

For description, see ECON 477.

ECON 691(6910) Health Economics I

For description, see PAM 691.

ECON 692(6920) Health Economics II

For description, see PAM 692.

ECON 699(6990) Readings in Economics

Fall or spring. Variable credit. Independent study.

ECON 703(7030) Seminar in Peace Science

Fall. 4 credits.

Topics covered at an advanced level are: game theory, coalition theory, bargaining and negotiation processes, cooperative procedures, microbehavior models, macrosocial processes, and general systems analysis.

ECON 710(7100) Stochastic Economics: Concepts and Techniques

Spring. 4 credits. Prerequisites: ECON 609, 610, 613, 614, 619, and 620.

Reviews a number of techniques that have been useful in developing stochastic models of economic behavior. These include discrete-time Markov processes, dynamic programming under uncertainty, and continuous-time diffusion processes. Examples of economic models are drawn from recent literature on optimal capital accumulation and optimal savings and portfolio selection problems; permanent income hypothesis; and dynamic models of price adjustment. Advanced graduate students contemplating work in economic theory and econometric theory gain exposure to current research.

ECON 712(7120) Advanced Macroeconomics

4 credits. Prerequisites: ECON 613, 614.

Introduces students to some of the topics and analytic techniques of current macroeconomic research. The course has three parts: dynamic programming, new Keynesian economics, and recent theories of economic growth. The dynamic programming section includes models of consumption, investment, and real business cycles. The new Keynesian section covers models of wage and price rigidity, coordination failure, and credit markets. The section on endogenous growth looks at recent efforts to add nonconvexities to models of optimal growth. These topics are intended to complement the material on overlapping generations covered elsewhere.

ECON 713(7130) Advanced Macroeconomics II

Spring. 4 credits. Prerequisites: ECON 613, 614.

Reviews the most recent research in endogenous growth theory. This theory is little more than a decade old, but it has produced a large number of both empirical and theoretical results that have substantially reshaped the general field of macroeconomics. It is perhaps no exaggeration to say that most of the work at the frontier of today's macroeconomics belongs to this field. An increasing number of papers have been touching important issues such as learning by doing, RD investment, market structure, private and public organization of RD, education financing, human capital accumulation, technological unemployment, growth and business cycles,

inequality and growth, political equilibrium, democracy and growth, instability, social conflict, capital accumulation, intergenerational and vested interests and barriers to technology adoption, international transfers of technologies, and sustainable development. This course aims to orient the student in this large and variegated literature consisting of recently published articles and working papers. Understanding this literature is a sound training in the analytical methods used at the frontier of theoretical research, but it also provides a number of empirical results at the center of the economic debate.

ECON 714(7140) Empirical Macroeconomics

Spring. 4 credits. Prerequisites: ECON 613 and 614.

Advanced graduate-level course emphasizing empirical applications. Students learn how to deal with data and how to estimate and test macroeconomic theories, and can develop research topics in applied macroeconomics for their dissertations.

ECON 717(7170) Mathematical Economics

4 credits. Prerequisites: ECON 609–610 (or equivalent training in micro theory) and MATH 413–414 (or equivalent training in analysis).

The primary theme of this course is to explore the role of prices in achieving an efficient allocation of resources in dynamic economies. Some of the classical results on static equilibrium theory and welfare economics on attaining optimal allocation through decentralized organizations are examined through an axiomatic approach. Some basic issues on capital theory are also analyzed.

[ECON 718(7180) Topics in Mathematical Economics

Spring. 4 credits. Next offered 2009–2010.]

ECON 719(7190) Advanced Topics in Econometrics I

Fall. 4 credits. Prerequisite: ECON 619–620 or permission of instructor.

Covers advanced topics in econometrics, such as asymptotic estimation and test theory, robust estimation, Bayesian inference, advanced topics in time-series analysis, errors in variable and latent variable models, qualitative and limited dependent variables, aggregation, panel data, and duration models.

ECON 720(7200) Advanced Topics in Econometrics II

Spring. 4 credits. Prerequisite: ECON 619–620 or permission of instructor.

For description see ECON 719.

ECON 721(7210) Time Series Econometrics

Fall. 4 credits. Prerequisite: ECON 619–620 or permission of instructor.

Covers traditional and current time series techniques that are widely used in econometrics. Topics include the theory of stationary stochastic processes including univariate ARMA(p,q) models, spectral density analysis, and vector autoregressive models; parametric and semi-parametric estimation; current developments in distributional theory; and estimation and testing in models with integrated regressors including, unit root tests, cointegration, and permanent vs. transitory components.

ECON 722(7210) Topics in Time Series Econometrics

Spring. 4 credits. Prerequisite: ECON 721.

Covers topics not treated by ECON 721. These include co-integration, fractional integration, long memory, and ARCH/GARCH models. Other topics may also be considered based on the interests of the students.

ECON 723(7230) Semi/Non Parametric Econometrics

Fall. 4 credits. Prerequisite: ECON 619–620 or permission of instructor.

Analyzes the ways identification problems limit the conclusions that may be drawn in empirical economic research and studies how identified and partially identified parameters can be estimated. In the first part of the course, the focus is on nonparametric models. Ways data can be combined with weak assumptions to yield partial identification of population parameters are discussed.

ECON 731(7310) Monetary Economics

Spring. 4 credits. Prerequisites: ECON 614 or permission of instructor.

Covers advanced topics in monetary economics, macroeconomics, and economic growth—such as overlapping-generations, taxes and transfers denominated in money, transactions demand for money, multi-asset accumulation, exchange rates, and financial intermediation.

ECON 732(7320) Monetary Economics

Fall. 4 credits. Prerequisites: ECON 731 or permission of instructor.

Covers advanced topics in monetary economics, macroeconomics, and economic growth—such as economic volatility, the “burden” of government debt, restrictions on government borrowing, dynamic optimization, endogenous growth theory, technological evolution, financial market frictions, and cyclical fluctuations.

ECON 735(7350) Public Finance: Resource Allocation and Fiscal Policy (also AEM 735[7350])

Fall. 4 credits.

Develops a mathematical and highly analytical understanding of the role of government in market economies and the fundamentals of public economics and related issues. Topics include generalizations and extensions of the fundamental theorems of welfare economics, in-depth analysis of social choice theory and the theory on implementation in economic environments, public goods and externalities and other forms of market failure associated with asymmetric information. The theoretical foundation for optimal direct and indirect taxation is also introduced along with the development of various consumer surplus measures and an application to benefit cost analysis. Topics of an applied nature vary from semester to semester depending on faculty research interests.

ECON 736(7360) Public Finance: Resource Allocation and Fiscal Policy

Spring. 4 credits.

Spends a large part of the semester covering the revenue side of public finance. Topics include the impact of various types of taxes as well as the determination of optimal taxation. The impact of taxation on labor supply, savings, company finance and investment behavior, risk bearing, and portfolio choice are explored. Other topics include the interaction of taxation and inflation, tax evasion, tax incidence, social security,

unemployment insurance, deficits, and interactions between different levels of government.

[ECON 737(7370) Location Theory and Regional Analysis

Fall. 4 credits. Prerequisites: ECON 609, 617, and econometrics course. Next offered 2009-2010.

Covers economic principles influencing the location of economic activity, its spatial equilibrium structure, and dynamic forces. Topics include spatial pricing policies, price competition, and relocation by firms; residential location patterns; patterns of regional growth and decline; and patterns of urbanization.]

ECON 738(7380) Public Choice

Spring. 4 credits. Prerequisites: ECON 609, 610.

This course has two parts. It begins with an introduction to economic theories of political decision making. Reviews the theory of voting, theories of political parties and party competition, theories of legislative decision making and interest group influence. Also discusses empirical evidence concerning the validity of these theories. The second part uses these theories to address a number of issues in public economics. Develops the theory of political failure, analyzes the performance of alternative political systems and discusses the problem of doing policy analysis, which takes into account political constraints.

ECON 739(7390) Advanced Topics in State and Local Public Finance

Spring. 4 credits. Prerequisites: ECON 609, 620.

Provides an in-depth examination of microeconomic theory surrounding the role of subnational governments and jurisdictions in the economy. Among the broad questions addressed are: What tasks are optimally assigned to local governments? What impact can such assignment have on efficiency and equity? In addition to the theoretical foundations on these issues, the course explores recent empirical evidence in this area, with particular attention to the research designs and data used in relevant papers.

ECON 740(7400) Social and Economic Data

Spring. 4 credits.

For description, see ILRLE 740.

ECON 741(7410) Seminar in Labor Economics

For description, see ILRLE 744.

ECON 742(7420) Seminar in Labor Economics

For description, see ILRLE 745.

ECON 743(7430) Seminar in Labor Economics

For description, see ILRLE 746.

ECON 746(7460) Economics of Higher Education

For description, see ILRLE 746.

ECON 747(7470) Economics of Higher Education

For description, see ILRLE 747.

ECON 748(7480) Applied Econometrics I

For description, see ILRLE 741.

ECON 749(7490) Applied Econometrics II

For description, see ILRLE 742.

ECON 751(7510) Industrial Organization and Regulation

Fall. 4 credits. Prerequisites: ECON 609, 610.

Focuses primarily on recent theoretical advances in the study of industrial organization. Topics include market structure, nonlinear pricing, quality, durability, location selection, repeated games, collusion, entry deterrence, managerial incentives, switching costs, government intervention, and R&D/patents. These topics are discussed in a game-theoretic context.

ECON 752(7520) Industrial Organization and Regulation

Spring. 4 credits. Prerequisites: ECON 609, 610, 751.

Rounds out some topics in the theory of industrial organization with the specific intent of addressing the empirical implications of the theory. Reviews empirical literature in the SCP paradigm and in the NEIO paradigm.

ECON 756(7560) Noncooperative Game Theory

Fall. 4 credits. Prerequisites: ECON 609-610 and 619.

Surveys equilibrium concepts for noncooperative games. Covers Nash equilibrium and a variety of equilibrium, refinements, including perfect equilibrium, proper equilibrium, sequential equilibrium and more. Pays attention to important special classes of games, including bargaining games, signalling games, and games of incomplete information. Most of the analysis is from the strict decision-theoretic point of view, but also surveys some models of bounded rationality in games, including games played by automata.

ECON 757(7570) Economics of Imperfect Information

Spring. 4 credits. Prerequisites: ECON 609-610 and 619.

Considers some major topics in the economics of uncertain information. Although the precise topics considered vary from year to year, subjects such as markets with asymmetric information, signalling theory, sequential choice theory, and record theory are discussed.

ECON 758(7580) Psychology and Economic Theory

Fall, spring. 4 credits. Prerequisites: economics graduate core or permission of instructor.

Explores the ways in which insights from psychology can be integrated into economic theory. Presents evidence on how human behavior systematically departs from the standard assumptions of Economics and how this can be incorporated into modeling techniques.

ECON 760(7600) Topics in Political Economy

Fall. 4 credits. Prerequisite: economics graduate core or permission of instructor.

Develops critiques and extensions of economic theory, taking into account the political and social moorings of economic activity and equilibria. The formation and persistence of social norms; the meaning and emergence of property rights; the role of policy advice in influencing economic outcomes; and the effect of political power and ideology on economic variables are studied. While these topics were popular in the classic works of political economy, recent advances in game theory and, more generally,

game-theoretic thinking allows a new approach to these topics. Hence, the course begins by devoting some lectures to elementary ideas in game-theory and strategic analysis.

ECON 761(7610) International Economics: Trade Theory and Policy

Fall. 4 credits. Prerequisites: ECON 609, 610.

Surveys the sources of comparative advantage. Analyzes simple general equilibrium models to illustrate the direction, volume, and welfare effects of trade. Topics in game theory and econometrics as applied to international economics may be covered.

ECON 762(7620) International Economics: International Finance and Open Economy Macroeconomics

Spring. 4 credits. Prerequisite: ECON 761.

Surveys the determination of exchange rates and theories of balance of payment adjustments. Explores open economy macroeconomics by analyzing models of monetary economies. Topics in monetary economics and econometrics as applied to international economics are covered.

ECON 763(7630) Topics in International Economic History

Spring. 4 credits. Prerequisite: solid understanding of international trade and finance.

Covers selected topics in modern economic history. Focuses on the process of international economic integration, or globalization. Traces the roots of globalization and its evolution in the last several centuries. Special attention is paid to the relationship between international market integration and economic growth.

ECON 770(7700) Topics in Economic Development

For description, see AEM 667.

ECON 771(7711) Empirical Methods for the Analysis of Household Survey Data: Applications to Nutrition, Health, and Poverty

Spring. 4 credits. Prerequisites: economics graduate core.

Focuses on empirical methods for the analysis of household survey data. Explores the hands-on use of such data to address policies issues related to welfare outcomes, particularly nutrition, health, education, and poverty. Covers empirical methods as they apply to a series of measurement and modeling issues, as well as the valuation of interventions. While underlying theory is reviewed briefly, the course attempts to bridge the gap between theory and practice, addressing issues such as model identification, functional form, estimation techniques to control for endogeneity and heterogeneity, and so forth. The course grade is based primarily on two empirical exercises, and related write-up, as well as class participation. Students are given actual household data sets and software with which to conduct exercises. These data enable students to apply analytical techniques discussed. Data sets are provided from African, Asian, and Latin American countries.

ECON 772(7720) Economics of Development (also ILRLE 749[7490])

Spring. 4 credits. Prerequisites: first-year graduate economic theory and econometrics.

Analytical approaches to the economic problems of developing nations. Topics include old and new directions in development economics thinking, the welfare economics of poverty and inequality, empirical evidence on who benefits from economic development, labor market models, project analysis with application to the economics of education, and development policy.

ECON 773(7730) Economic Development

Fall. 4 credits. Prerequisites: ECON 609, 610, and 611.

Concerned with theoretical and applied works that seek to explain economic development, or lack thereof, in countries at low-income levels. Specific topics vary each semester.

ECON 774(7740) Economic Systems

Spring. 4 credits.

Deals with economic systems, formerly centrally planned economies, and economies in transition.

ECON 775(7750) Development Microeconomics

Spring. 4 credits. Prerequisites: economics graduate core.

Explores the application of microeconomic analysis to economic issues in developing countries. Focuses on household behavior and the analysis of rural institutions. Covers the neoclassical agricultural household model and recent developments in the theory of the household, topics in rural economies, financial arrangements, program evaluation and the interaction of social norms and economic organization. Designed to prepare students for applied research in micro development economics by giving an overview over the current state of research in that discipline.

ECON 784(7840) Seminars in Advanced Economics

Fall and spring. 4 credits.

ECON 785(7850) Third-Year Research Seminar

Fall. 4 credits.

The Department of English offers a wide range of courses in English, American, and Anglophone literature as well as in creative writing, expository writing, and film analysis. Literature courses focus variously on close reading of texts, study of particular authors and genres, questions of critical theory and method, and the relationship of literary works to their historical contexts and to other disciplines. Writing courses typically employ the workshop method in which students develop their skills by responding to criticism of their work by their classmates as well as their instructors. Many students supplement their formal course work in English by attending public lectures and poetry readings sponsored by the department or by writing for campus literary magazines. The department seeks not only to foster critical analysis and lucid writing but also to teach students to think about the nature of language and to be alert to both the rigors and the pleasures of reading texts of diverse inspiration.

First-Year Writing Seminars

As part of the university-wide First-Year Writing Seminars program administered by the John S. Knight Institute for Writing in the Disciplines, the department offers many one-semester courses dealing with various forms of writing (e.g., narrative, autobiographical, and expository), with the study of specific areas in English and American literature, and with the relation of literature to culture. Students may apply any of these courses to their first-year writing seminar requirement. Detailed course descriptions may be found in the first-year writing seminars program listings, available from college registrars in August for the fall semester and in November for the spring semester.

Freshmen interested in majoring in English are encouraged to take at least one of the department's 200-level first-year writing seminars: ENGL 270 *The Reading of Fiction*, ENGL 271 *The Reading of Poetry*, and ENGL 272 *Introduction to Drama*. These courses are open to all second-semester freshmen. They are also open, as space permits, to first-semester freshmen with scores of 700 or above on the CEEB College Placement Tests

in English composition or literature, or 4 or 5 on the CEEB Advanced Placement Examination in English, as well as to students who have completed another first-year writing seminar.

Courses for Nonmajors

For students majoring in fields other than English, the department provides a variety of courses at all levels. A number of courses at the 200 level are open to qualified freshmen, and all are open to sophomores. Courses at the 300 level are open to all sophomores, juniors, and seniors; they are also open to freshmen who have received the instructor's prior permission. The suitability of courses at the 400 level for nonmajors depends in part on the course topics, which are subject to change from year to year. Permission of the instructor is sometimes required; prior consultation is always strongly advised.

The Major in English

Students who major in English develop their own programs of study in consultation with their major advisors. Some choose to focus on a particular historical period or literary genre or to combine sustained work in creative writing with the study of literature. Others pursue interests in such areas as women's literature, African-American literature, literature and the visual arts, or critical theory.

The department recommends that students prepare themselves for the English major by taking one or more of its preparatory courses, such as ENGL 270 *The Reading of Fiction*, ENGL 271 *The Reading of Poetry*, or ENGL 272 *Introduction to Drama*. (The "ENGL" prefix identifies courses sponsored by the Department of English, all of which appear in the English section of *Courses of Study* or the department's supplementary lists of courses; it also identifies courses sponsored and taught by other academic units and cross-listed with English.) These courses concentrate on the skills basic to the English major and to much other academic work—responsive, sensitive reading and lucid, strong writing. As first-year writing seminars, any one of them will satisfy one half of the College of Arts and Science's first-year writing requirement. ENGL 280, 281, 288, and 289 are also suitable preparations for the major and are open to students who have completed their first-year writing seminar requirement. ENGL 201 and 202, which together constitute a two-semester survey of major British writers, though not required, are strongly recommended for majors and prospective majors. ENGL 201 and 202 (unlike ENGL 280, 281, 288, and 289) are also "approved for the major" in the special sense of that phrase explained below.

To graduate with a major in English, a student must complete with passing letter grades 10 courses (40 credit hours) approved for the English major. All ENGL courses numbered 300 and above are approved for the major. In addition, with the exception of first-year writing seminars (ENGL 270, 271, and 272), 200-level courses in creative and expository writing (ENGL 280, 281, 288, and 289), and courses designated for nonmajors, all 200-level ENGL courses are also approved for the major. Courses used to meet requirements for the English major may also be used to meet the distribution requirements in the College of Arts and Sciences. Many of these courses may be used to meet the college's "historical breadth" requirement as well.

Of the 40 credits required to complete the major, 8 credits (two courses) must be at the 400 level or above; 12 credits (three courses) must be from courses in which 50 percent or more of the material consists of literature originally written in English before 1800; and another 12 credits (three courses) must form an intellectually coherent "concentration." The 400-level and pre-1800 requirements may be satisfied only with ENGL courses, and ENGL 493-494, the Honors Essay Tutorial, may not be used to satisfy either one. Courses that satisfy the pre-1800 requirement are so designated in *Courses of Study*. Many English majors use ENGL 201 to begin meeting this requirement since it provides an overview of earlier periods of British literature and so enables them to make more informed choices of additional pre-1800 courses. ENGL 202 does not qualify as a pre-1800 course. Neither do courses offered by other departments unless they are cross-listed with English. Advanced courses in foreign literature may not be used to fulfill the pre-1800 requirement, but they may be used for English major credit provided they are included within the 12-credit limit described below. The three-course concentration requirement may be satisfied with any courses approved for the major. The department's "Guide to the English Major" suggests areas of concentration and offers examples of courses that fall within those areas, but majors define their own concentrations in consultation with their advisors.

As many as 12 credits in appropriate courses offered by departments and programs other than English may be used to satisfy English major requirements. Courses in literature and creative writing offered by academic units representing neighboring or allied disciplines (German Studies, Romance Studies, Russian, Asian Studies, Classics, Comparative Literature, Africana Studies, the Society for the Humanities, American Studies, Feminist, Gender and Sexuality Studies, Religious Studies, Asian American Studies, American Indian Studies, Latino Studies, and Theatre, Film, and Dance) are routinely counted toward the 40 hours of major credit provided they are appropriate for juniors or seniors, as are most courses at the 300 level and above. English majors who are double majors may exercise this option even if all 12 credits are applied to their second major. All English majors are urged to take courses in which they read foreign works of literature in the original language, and for that reason 200-level literature courses for which qualification is a prerequisite (as well as more advanced foreign literature courses) may be counted toward the English major. Credit from other non-ENGL courses may be included within the 12 credits of nondepartmental courses approved for the major only when the student is able to demonstrate to the advisor's satisfaction their relevance to his or her individual program of study.

Planning a Program of Study

Few students know from the moment they decide to pursue a major in English exactly what they wish to study. Moreover, it is natural for interests to change in the course of time. The effort of creating or discovering a coherent pattern in the courses selected is itself a valuable part of a literary (as well as a liberal) education, and English majors are expected to discuss their overall program of

study when seeking their advisors' approval of courses each semester. While the Department leaves a great deal to the discretion of its individual majors and their academic advisers, it expects them to choose courses with an eye to breadth and variety on the one hand and focus and coherence on the other.

Students with a special interest in developing their skills as writers of verse or prose will find a variety of workshop courses in expository and creative writing. As a rule a student may not enroll in more than one such course in any given semester, although exceptions are sometimes allowed where one of these is ENGL 288 or 289.

A number of English majors do part of their course work at a foreign institution, usually during their junior year; some spend a single semester away from campus, others an entire year. The Cornell Abroad office has information on a variety of programs at universities around the world. Many English majors study abroad in the United Kingdom and other English speaking countries, but some choose other locations. As long as they continue to meet all College and Department requirements or can complete them upon returning to Cornell, studying abroad poses no serious problems. Students spending their entire junior year abroad will be challenged to complete the Department's Honors program since they will be unable to take the required Honors seminar in the junior year and will have to take it when they return as seniors. They must make arrangements with the chair of the Honors Committee before leaving campus.

Credit for literature courses taken abroad can in most instances be applied to the 40-hour minimum for the English major, and to requirements like the concentration and pre-1800 requirements. Approval of requests to apply credit for study abroad to the English major is granted by the DUS rather than the academic advisor, however, and students must confer with the DUS in advance of going abroad as well as on their return. The first conference includes a review of catalogue descriptions of courses the student expects to take while abroad (along with a few alternatives), the second a presentation of transcripts or equivalent documentation of successful completion of the work proposed, together with papers and exams.

No more than 16 credits per year, or 8 credits per semester, of non-Cornell credit may be applied to the English major. This restriction applies to study abroad even when that study is conducted under Cornell auspices.

The Major in English with Honors

Second-semester sophomores who have done superior work in English and related subjects are encouraged to seek admission to the departmental program leading to the degree of bachelor of arts with honors in English. Following an interview with the chair of the Honors Committee, qualified students will be admitted provisionally to the program. During their junior year these students complete at least one honors seminar (ENGL 491 or 492) and are encouraged to take an additional 400-level English course in the area of their thesis topic. On the basis of work in these and other English courses, a provisional honors candidate must select a thesis topic and secure a thesis advisor by the end of the junior year. A student who has been accepted

by a thesis advisor becomes a candidate for honors rather than a provisional candidate.

During the senior year, each candidate for honors in English enrolls in a yearlong tutorial (ENGL 493-494) with the faculty member chosen as thesis advisor. The year's work culminates in the submission of a substantial scholarly or critical essay to be judged by at least two members of the faculty. More information about the Honors Program may be found in a leaflet available in the English offices.

First-Year Writing Seminars Recommended for Prospective Majors

ENGL 270(2700) The Reading of Fiction

Fall, spring, summer. 3 credits. Each section limited to 17 students.

Recommended for prospective majors in English. *This course does not satisfy requirements for the English major.*

This course examines modern fiction, with an emphasis on the short story and novella. Students write critical essays on authors who flourished between 1870 and the present, such as James, Joyce, Woolf, Hurston, Lawrence, Fitzgerald, Hemingway, Faulkner, Rhys, Welty, Salinger, and Morrison. Reading lists vary from section to section, and some may include a novel, but close, attentive, and imaginative reading and writing are central to all.

ENGL 271(2710) The Reading of Poetry

Fall, spring. 3 credits. Each section limited to 17 students. Recommended for

prospective English majors. *This course does not satisfy requirements for the English major.*

How can we become more appreciative, alert readers of poetry, and at the same time better writers of prose? This course attends to the rich variety of poems written in English, drawing on the works of poets from William Shakespeare to Sylvia Plath, John Keats to Li-Young Lee, Emily Dickinson to A. R. Ammons. We may read songs, sonnets, odes, villanelles, even limericks. By engaging in thorough discussions and varied writing assignments, we explore some of the major periods, modes, and genres of English poetry, and in the process expand the possibilities of our own writing.

ENGL 272(2720) The Reading of Drama

Fall, spring. 3 credits. Each sec limited to 17 students. Recommended for prospective

English majors. *This course does not satisfy requirements for the English major.*

In this course, we will study and write critically about plays, older and newer, in a variety of dramatic idioms and cultural traditions. We will practice close, interpretive reading of texts and pay attention to their possibilities for live and filmed performance. Readings will include works by such playwrights as Sophocles and Shakespeare, Arthur Miller and Caryl Churchill, Ntosake Shange and Tony Kushner, and some drama criticism and performance theory. Attendance at screenings and at live productions by the Theatre Department may be required.

Expository Writing

ENGL 288-289(2880-2890) Expository Writing (LA-AS)

Fall, spring, summer, and winter. 4 credits. Each section limited to 16 students. Students must have completed their colleges' first-year writing requirements or have the permission of the instructor. S. Davis and staff. Web site: <http://instruct1.cit.cornell.edu/Courses/engl288-289/> *This course does not satisfy requirements for the English major.*

ENGL 288-89 offers guidance and an audience for students who wish to gain skill in expository writing. Each section provides a context for writing defined by a form of exposition, a disciplinary area, a practice, or a topic intimately related to the written medium. Course members will read in relevant published material and write and revise their own work regularly, while reviewing and responding to one another's essays. Since these seminar-sized courses depend on members' full participation, regular attendance and submission of written work are required. Students and instructors will confer individually throughout the semester. ENGL 288-89 does not satisfy requirements for the English major.

Fall 2007 listing: Section 1. Choosing Sides: Horror and Drama in Cinema, M. Garrett; Section 2. Endsight: Apocalyptic Fictions, T. Kearns; Section 3. The University, Society and the Law, A. Miller; Section 4. Controversies in Criminal Justice, W. Schurmann; Section 5. Issues, Audiences, and Ourselves, B. LeGendre; Section 6. Global Romances: Crossing Boundaries, K. Shandilya; Section 7. The Reflective Essay, K. Gottschalk.

See English department course offerings for full fall and spring section descriptions.

ENGL 381(3810) Reading as Writing, Writing as Reading (LA-AS)

Fall. 4 credits. Limited to 15 students. Prerequisite: permission of instructor based on a writing sample. S. Davis.

Every reading is a rewriting; every original imaginative work reads and rewrites itself and its predecessors as it goes along. We'll read 19th- and 20th-century works that illustrate this process while attending to one another's critical writing as collaborators and commentators. This is a course for English majors and non-majors who wish to extend their mastery of critical and interpretive prose and their understanding of what they do when they write it. Tentatively for 2008: fiction by Vladimir Nabokov, Emily Brontë, Jean Rhys, Doris Lessing, J. M. Coetzee, and Virginia Woolf. See <http://instruct1.cit.cornell.edu/~sad4/rw/>.

ENGL 386(3860) Philosophic Fictions (LA-AS)

Spring. 4 credits. Limited to 15 students. Prerequisite: permission of instructor based on a writing sample. S. Davis.

"Fictions" of thought and language abound in works that deliberately test and play with ideas: dialogues, satires, parables, philosophic tales, and "thought-experiments." Students will write critically about such works and will experiment with writing in similar forms in order to argue flexibly, ridicule vice and folly, or involve readers in pleasingly or disturbingly insoluble problems. Readings may include Plato's *Phaedrus* or *Gorgias*, Swift's *Gulliver's Travels*, parables by Jesus and Kafka,

dystopias by Ursula Le Guin and Caryl Churchill, science fiction by Philip K. Dick and Octavia Butler, short stories by Jorge Luis Borges and Flannery O'Connor, and essays by Richard Rorty and Jacques Derrida. See <http://instruct1.cit.cornell.edu/~sad4/fpf/>.

[ENGL 387(3870) Autobiography: Theory and Practice (LA-AS)]

Fall. 4 credits. Limited to 15 students. By permission of instructor on the basis of writing samples. Next offered 2008-2009. K. Gottschalk.]

ENGL 388(3880) The Art of the Essay (LA-AS)

Spring. 4 credits. Limited to 15 students. By permission of instructor on the basis of writing samples. Interested students should submit one or more pieces of recent writing (prose) to the instructor before the beginning of the semester, preferably at pre-enrollment. J. Carlacio.

The term "essay" means "an attempt." Thus, essays are short "attempts" to explore features of one's own experience, to pass onto the reader a very personal and often digressive reflection on some aspect of one's own personality or reflections about people that arise from that exercise, and whose subject matter provides a springboard for more self-reflection. For both English majors and non-majors who have done distinguished work in first-year writing seminars and in 200-level courses, and who desire intensive practice in creative nonfiction, the course assumes a high degree of self-motivation and a critical interest in the work of other writers. Students will submit a final portfolio of conceptually rich and stylistically polished writing. Writing sample required before the first day of class.

Creative Writing

Students usually begin their work in Creative Writing with ENGL 280 or 281, and only after completion of the First-Year Writing Seminar requirement. Please note that either ENGL 280 or ENGL 281 is the recommended prerequisite for 300-level creative writing courses. ENGL 280 and 281 may satisfy a distribution requirement in your college (please check with your college advisor). ENGL 382-383, 384-385, and 480-481 are approved for the English major.

ENGL 280-281(2800-2810) Creative Writing (LA-AS)

Fall, spring, summer, winter. 3 credits. Limited to 18 students. Prerequisite: completion of the First-Year Writing Seminar requirement. **Majors and prospective majors, please note:** Although recommended for prospective English majors, ENGL 280-281 cannot be counted toward the 40 credits required for completion of the English major. It is a prerequisite for 300-level courses in creative writing, which count toward the major. ENGL 280 is not a prerequisite for ENGL 281.)

An introductory course in the theory, practice, and reading of prose, poetry, and allied forms. Students are given the opportunity to try both prose and verse writing and may specialize in one or the other. Many of the class meetings are conducted as workshops.

ENGL 382-383(3820-3830) Narrative Writing (LA-AS)

Fall, 382; spring, 383. 4 credits each semester. Each section limited to 15 students. Prerequisite: ENGL 280 or 281 and permission of instructor based on submission of a manuscript (bring manuscript to first day of class). Fall: sec 1, M. McCoy; sec 2, H. Viramontes; sec 3, J. Lennon; Spring: sec 1, S. Vaughn; sec 2, E. Quinonez; sec 3, M. McCoy; sec 4, M. Koch.

The writing of fiction; study of models; analysis of students' work.

ENGL 384-385(3840-3850) Verse Writing (LA-AS)

Fall or summer, 384; spring, 385. 4 credits. Each section limited to 15 students. Prerequisite: ENGL 280 or 281 and permission of instructor based on submission of manuscript (bring manuscript on first day of class). Fall: sec 1, P. Janowitz; sec 2, L. Van Clief-Stefanon. Spring: sec 1, P. Janowitz; sec 2, M. Doty.

The writing of poetry; study of models; analysis of students' poems; personal conferences.

ENGL 480-481(4800-4810) Seminar in Writing (LA-AS)

Fall, 480; spring, 481. 4 credits each semester. Each section limited to 15 students. Prerequisite: permission of instructor, normally on the basis of a manuscript. The manuscript should be submitted to the instructor no later than the first day of class. Previous enrollment in ENGL 280 or 281 and at least one 300-level writing course recommended. Successful completion of one half of the 480-481 sequence does not guarantee enrollment in the other half; students must receive permission of the instructor to enroll in the second course. Fall: sec 1, H. Viramontes; sec 2, M. McCoy; spring: D. Johnson and P. Janowitz.

Intended for those writers who have already gained a basic mastery of technique. Although ENGL 480 is not a prerequisite for ENGL 481, students normally enroll for both semesters and should be capable of a major project—a collection of stories or poems, a group of personal essays, or perhaps a novel—to be completed by the end of the second semester. Seminars are used for discussion of the students' manuscripts and published works that individual members have found of exceptional value.

Courses for Freshmen and Sophomores

These courses have no prerequisites and are open to freshmen and nonmajors as well as majors and prospective majors.

Introductions to Literary Studies

ENGL 200(2000) Introduction to Criticism and Theory (LA-AS)

Spring. 4 credits. S. Mohanty.

This is an introductory course that explores some of the key concepts and methods used in literary studies. Focusing on a few literary texts and some drawn from popular culture, we will try to answer such basic questions as: what does it mean to read and analyze texts well? What roles do history and social ideology play in our readings? What, after all, is "art"?

We will also focus on literary and cultural theory, examining both contemporary questions and historical ones. Readings on aesthetics and critical theory from a variety of cultural traditions will be analyzed—from classical writings on beauty and the nature of art to contemporary works that focus on such issues as gender, race, and sexuality.

ENGL 201-202(2010-2020) The English Literary Tradition # (LA-AS)

201, fall; 202 spring. 4 credits each semester. ENGL 201, not a prerequisite for 202, may be used as one of the three pre-1800 courses required of English majors. 201 (fall). M. Raskolnikov. An introduction to the study of English literature, examining its historical development and achievements from its "beginnings" to the middle of the 17th century. Focus will be on the close reading of major works from a range of genres and modes, including heroic poem, romance, drama, fabliau, sonnet sequence, love lyric, court masque, pastoral, and epic. Readings will include *Beowulf*, *Sir Gawain and the Green Knight*, selections from Chaucer's *Canterbury Tales*, Elizabethan sonnets, a Shakespeare play, poems by Donne, Marvell, and Herbert, and a selection from Milton's *Paradise Lost*. Students will do some short creative exercises designed to highlight features of language and style, as well as write two 4- to 6-page papers in critical analysis.

202 (spring). P. Sawyer. A survey of major genres, movements, and authors of British literature from the Restoration to international modernism. By focusing on the language, meaning, and structure of individual works read in historical sequence, the course will be both a guide to close reading and a study of intertextual connections. Students will respond in discussion sections with a variety of writing, including short response essays and parodies. Readings will include the poetry of Dryden, Pope, the major Romantics, Browning, Tennyson, Cristina Rossetti, Hardy, Yeats, and Walcott; two plays, *The Way of the World* and *The Importance of Being Earnest*; and such prose works as *Pilgrim's Progress*, *Gulliver's Travels*, and *A Room of One's Own*.

ENGL 203(2030) Introduction to American Literatures (also AM ST 206[2030]) # (LA-AS)

Fall. 4 credits. *This course may be used as one of the three pre-1800 courses required of English majors.* E. Cheyfitz. Through readings of early modern travel journals, slave and captivity narratives, imaginative literature, and polemical prose, this course will encourage critical thinking about some of the central issues that have generated and continue to generate the national ethos of the United States, including Indian resistance to European invasion, the African American struggle against slavery and for civil rights, the development of global capital, and the struggle for women's rights. Readings will be taken from a list that includes American Indian oral narratives, Spanish and English accounts of the invasion of the Americas, Shakespeare's *The Tempest*, the Federalist, Emerson's anti-slavery speeches, the frontier novels of Lydia Maria Child and James Fenimore Cooper, and the anti-slavery narratives of Frederick Douglass and Harriet Jacobs.

ENGL 204(2040) Introduction to American Literatures: The Making of America: Reconstruction to the Present (also AM ST 207[2040]) (LA-AS)

Spring. 4 credits. D. Woubshet. This course will introduce students to American literature from the end of the Civil War to the present Iraq War. We will consider a great range of authors and literary movements while paying close attention to radical shifts in American life and culture in the past century and a half. We will ask: What traditions do American authors inherit and what new ones do they issue? What literary conventions do they expedite, revise, and recreate in order to articulate individual, national and global selves? We will explore these questions through a variety of genres, including poems, novels, manifestos, autobiographies, legal tracts, and homiletics. We will also give particular emphasis to the politics of (racial, gender, sexual, and class) difference in the making of modern America.

[ENGL 205(2050) Introduction to World Literatures in English (LA-AS)]

Spring. 4 credits. Next offered 2008-2009. E. DeLoughrey.]

ENGL 206(2060) The Great American Cornell Novel (also AM ST 219[2060]) (LA-AS)

Spring. 4 credits. J. Carlacio. Some of the best novels of the last 50 years were written by people who were students or professors at Cornell. In this class we will read and discuss some of these novels—along with some shorter fiction—by some, but regrettably not all, of the following: Manette Ansay, Paul Cody, Susan Choi, Richard Farina, Lamar Herrin, Alison Lurie, Dan McCall, Maureen McCoy, Lorrie Moore, Robert Morgan, J. Robert Lennon, Toni Morrison, Vladimir Nabokov, Stewart O'Nan, Thomas Pynchon, Stephanie Vaughn, Helena Maria Viramontes, and Kurt Vonnegut. Lecture-discussion format with sections, some guest appearances. Students will also be required to attend some readings outside of class periods.

[ENGL 207(2070) Introduction to Modern Poetry (LA-AS)]

Spring. 4 credits. Next offered 2008-2009. R. Gilbert.]

ENGL 208(2080) Shakespeare and the 20th Century (LA-AS)

Spring. 4 credits. *May be used as one of the three pre-1800 courses required of English majors.* S. Davis. What can we learn about Shakespeare's plays from their reception in the 20th and 21st centuries? What can we learn about modern cultures from their appropriations of these texts and of the Shakespeare mystique? We will study four or five plays and their adaptations in film and theater and explore the uses made of Shakespeare in education, advertising, and public culture and by the "Shakespeare industry" itself. For spring 2008, tentatively: *Romeo and Juliet*, *Richard III*, *As You Like It*, *Othello*, and *King Lear*, together with plays by Wendy Wasserstein and Bertold Brecht, a live performance of *As You Like It*, and films or filmed performances directed by Baz Luhrmann, Richard Loncraine, Trevor Nunn, Janet Suzman, Akira Kurosawa, and Peter Brook. See <http://instruct1.cit.cornell.edu/~sad4/208/>.

[ENGL 209(2090) Introduction to Cultural Studies (CA-AS)]

4 credits. Next offered 2008-2009.]

ENGL 227(2270) Shakespeare (also THETR 277[2770]) # (LA-AS)

Fall. 4 credits. *May be used as one of the three pre-1800 courses required of English majors.* B. Correll. A lecture and discussion course that offers students a survey of representative Shakespearean comedies, tragedies, and history plays. Our study will include attention to forms, themes, and historical contexts, including history of the early modern English theater. We read 10 plays, including *The Merchant of Venice*, *Twelfth Night*, *The Tempest*, *Othello*, *King Lear*, *Richard II*, *Henry IV Part One*, and *Henry V*.

Major Genres and Areas

[ENGL 251(2510) 20th-Century Women Writers (also AM ST 252[2510], FGSS 251[2510]) (LA-AS)]

Fall. 4 credits. Next offered 2008-2009. E. DeLoughrey.]

[ENGL 252(2520) Late 20th-Century Women Writers and Visual Culture (also AM ST 253[2520]) (LA-AS)]

Spring. 4 credits. Limited to 15 students. Next offered 2008-2009. S. Samuels.]

[ENGL 255(2550) African Literature @ (LA-AS)]

Fall. 4 credits. Next offered 2008-2009. B. Jeyifo.]

[ENGL 260(2600) Introduction to American Indian Literatures in the United States (also AM ST 260[2600]) (LA-AS)]

Spring. 4 credits. Next offered 2008-2009. E. Cheyfitz.]

ENGL 262(2620) Asian American Literature (also AAS 262[2620], AM ST 262[2620]) (LA-AS)

Spring. 4 credits. S. Wong. This course will introduce both a variety of writings by Asian North American authors and some critical issues concerning the production and reception of Asian American texts. Working primarily with novels, we will be asking questions about the relation between literary forms and the sociohistorical context within which they take on their meanings, and about the historical formation of Asian American identities.

[ENGL 273(2730) Children's Literature (LA-AS)]

Spring. 4 credits. Next offered 2008-2009. J. Adams.]

ENGL 274(2740) Scottish Literature # (LA-AS)]

Fall. 4 credits; may be taken for 3 or 4 credits; those choosing 4 credits will complete an additional writing project. May be used as one of the three pre-1800 courses required of English majors. H. Shaw and T. Hill. Although Scotland, which was long a separate nation, is now politically united with England, it preserves its distinctiveness. This course provides an introduction to Scottish literature, with special emphasis on the medieval period and the 18th through the 20th centuries. The course should appeal to those who wish to learn about their Scottish heritage, and also those who simply wish to encounter a remarkable national culture and the literature

it has produced. Some of the texts will be read in Scots, but no familiarity with Scots or earlier English is presumed. We welcome readers of literature who are not English majors.

ENGL 276(2760) Desire (also COM L 276[2760], FGSS 276[2760], THETR 278[2780]) (LA-AS)

Spring. 4 credits. Letter grades only.
E. Hanson.

"Language is a skin," the critic Roland Barthes once wrote: "I rub my language against the other. It is as if I had words instead of fingers, or fingers at the tip of my words. My language trembles with desire." Sexual desire has a history, even a literary history, which we will examine through an introductory survey of European dramatic literature from Plato and Aristophanes to Jean Genet and Caryl Churchill, as well as a survey of classic readings in Western sexual theory from the Ancient Greeks through Freud and Foucault to contemporary feminism and queer theory. Topics for discussion will include Greek pederasty, Christian mysticism, hysteria, sadomasochism, pornography, cybersex, and other performative pleasures.

[ENGL 277(2770) Literatures of the Black Atlantic: Reading the Contemporary (LA-AS)]

Spring. 4 credits. Next offered 2008–2009.
D. Woubshet.]

Special Topics

[ENGL 210(2100) Medieval Romance: Voyage to the Otherworld # (LA-AS)]

Spring. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. Next offered 2009–2010. T. Hill.]

ENGL 213(2130) Cultures of the Middle Ages # (CA-AS)

Spring. 4 credits. *This course may be used as one of the three pre-1800 courses required of English majors.* A. Galloway. This course introduces a wide range of literature written before 1500 and the cultures it was written in, especially in the region that became known as England. No previous knowledge of this material is required. We will read, in translation and with other help, a sample of works originally in Latin, French, Old English, Middle English, and Italian, beginning with the arrival of Christianity to England and ending with the splitting of the English church from Rome in the 16th century. Authors, works, and genres considered include Bede, Beowulf, Old English prose and poetry, saints' lives, women's writing, French and English romance, Piers Plowman, Chaucer, and late-medieval drama. Requirements include weekly informal writing and three formal, medium-sized papers, which may draw on your informal writing.

[ENGL 217(2170) History of the English Language (also LING 217[2170]) # (HA-AS)]

Fall. 4 credits. Next offered 2008–2009.
W. Harbert.]

[ENGL 263(2630) Studies in Film Analysis: Hitchcock (also FILM 265[2650]) (LA-AS)]

Fall. 4 credits. Limited to 20 students. Next offered 2008–2009. L. Bogel.]

ENGL 264(2640) The Private I and the Public Eye: Exploring Latino/a Identity in Poetry, Fiction, and Non-Fiction (CA-AS)

Fall. 4 credits. Next offered 2008–2009.
H. Viramontes.]

[ENGL 268(2680) Culture and Politics of the 1960s (also AM ST 268[2680]) (CA-AS)]

Fall. 4 credits. Next offered 2008–2009.
P. Sawyer.]

ENGL 292(2920) Introduction to Visual Studies (also COM L/VISST 200[2000]) (LA-AS)

Spring. 4 credits. Staff.
For description, see VISST 200.

ENGL 296(2960) Linguistic Theory and Poetic Structure (also ENGL 585[5850], LING 285/585[285/585]) (LA-AS)

Fall. 4 credits. J. Bowers.
For description, see LING 285.

Courses for Sophomores, Juniors, and Seniors

Courses at the 300 level are open to sophomores, juniors, and seniors and to others with the permission of the instructor.

[ENGL 302(3020) Literature and Theory (also ENGL 602[6020], COM L 302/622[3020/6220]) (LA-AS)]

Fall. 4 credits. Next offered 2008–2009.
J. Culler.]

ENGL 308(3080) Icelandic Family Sagas # @ (LA-AS)

Fall. 4 credits. *This course may be used as one of the three pre-1800 courses required of English majors.* T. Hill. An introduction to Old Norse-Icelandic mythology and the Icelandic family saga—the "native" heroic literary genre of Icelandic tradition. Texts will vary but will normally include the *Prose Edda*, the *Poetic Edda*, *Hrafnkels Saga*, *Njals Saga*, *Laxdaela Saga*, and *Grettirs Saga*. All readings will be in translation.

ENGL 311(3110) Old English (also ENGL 611[6110]) # (LA-AS)

Fall. 4 credits. *This course may be used as one of the three pre-1800 courses required of English majors.* S. Zacher. The course is intended as an introduction for graduate and undergraduate students to the Old English language. In this course, we will read and discuss some of the earliest surviving English poetry and prose. We will focus on (1) learning to read the language in which this literature is written; (2) evaluating the poetry as poetry: its form, structure, style, and varieties of meaning; (3) examining the culture of Anglo-Saxon England from the standpoint of Old English literary records. We will begin with simple prose texts and proceed to poetic texts such as *The Wanderer*, *The Seafarer*, *The Dream of the Rood*, and *The Wife's Lament*. There will be regular quizzes, translations, a mid-term, and a final exam.

ENGL 312(3120) Beowulf (also ENGL 612[6120]) # (LA-AS)

Spring. 4 credits. Recommended: one semester's study of Old English or equivalent. May be used as one of the three pre-1800 courses required of English majors. T. Hill.

A close reading of *Beowulf*. Attention is given to relevant archaeological, literary, cultural, and linguistic issues.

[ENGL 316(3160) Beasts, Bodies, and Boundaries # (LA-AS)]

Spring. 4 credits. Next offered 2008–2009.
S. Zacher.]

ENGL 319(3190) Chaucer # (LA-AS)

Fall. 4 credits. *This course may be used as one of the three pre-1800 courses required of English majors.* A. Galloway. This lecture and discussion course introduces Chaucer in his literary and cultural settings. No previous knowledge of Chaucer or medieval literature is required. The main focus will be on his major works, *Troilus and Criseyde* and selections from *The Canterbury Tales*; we will also read outside a little to see his literary background and some of his literary (and non-literary) contemporaries—and have a look at his literary influence and afterlife. There will be weekly informal writing and three formal, medium-sized papers, which may draw on your informal writing.

ENGL 320(3200) Renaissance Literatures: "Blood Politics" (also COM L 356[3560]) # (LA-AS)

Spring. 4 credits. P. Lorenz.
For description, see COM L 362.

ENGL 321(3210) Spenser and Malory # (LA-AS)

Fall. 4 credits. *This course may be used as one of the three pre-1800 courses required of English majors. Informal lecture and discussion.* C. Kaske. Paired selections covering about half of Malory's *Morte d'Arthur* and half of Spenser's *Faerie Queene*. The French Prose Arthurian Cycle, Chretien's romances, *Sir Gawain and the Green Knight*, and some of Spenser's minor poems are mentioned occasionally as background. Comparisons assess possible literary influence, the distinctive vision, style, and narrative technique of each author as a writer of romance, and the development of Arthurian romance from the Middle Ages to the Renaissance.

ENGL 322(3220) Studies in Renaissance Literature: Literature and the Scientific Revolution in England # (LA-AS)

Spring. 4 credits. *This course may be used as one of the three pre-1800 courses required of English majors.* J. Mann. Francis Bacon, the first philosopher of English science, vowed "to trust nothing but on the faith of my eyes." Bacon's declaration became a central tenet of philosophical inquiry during the 17th century, as gentlemen and artisans began to collect specimens, dissect bodies, and survey the physical universe. This course will explore how the methods of the new experimental "science" reverberated in—and were challenged by—imaginative productions in the age of Shakespeare and Milton. We will also consider the representation of figures subject to the developing scientific gaze: curiosities such as the human cadaver, the hermaphrodite, and the New World Indian.

ENGL 323(3230) Renaissance Poetry # (LA-AS)

Spring. 4 credits. *This course may be used as one of the three pre-1800 courses required of English majors.* B. Correll. The Renaissance was a time of great innovation in poetry, and the influence of early modern poets continues to the present.

At the heart of this course are Shakespeare, Sidney, Spenser, Donne, and their sonnets and elegies. But Isabella Whitney, Anne Lok, Mary Sidney, and other women writers' contributions to early modern poetry also belong to this course. We will read a range of poetic forms and discuss historical context and cultural politics. If Renaissance poetry is just not about hearts, flowers, and Cupid, what is at stake for poets and readers in reading early modern poetry? What cultural work does this poetry perform? What is the relationship between Renaissance lyric and early modern subject formation? Between seemingly private sentiments and historical forces?

[ENGL 327(3270) Shakespeare # (LA-AS)]
Fall. 4 credits. Next offered 2008-2009.]

[ENGL 328(3280) The Bible as Literature # (LA-AS)]
Fall. 4 credits. Next offered 2008-2009.
L. Donaldson.]

[ENGL 329(3290) Milton # (LA-AS)]
Fall. 4 credits. *This course may be used as one of the three pre-1800 courses required of English majors.* Next offered 2008-2009. R. Kalas.]

[ENGL 330(3300) Restoration and 18th-Century Literature # (LA-AS)]
Spring. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. F. Bogel.

Close reading of texts in a variety of genres (poetry, fiction, drama, autobiography) will be guided by such topics as: the nature of satire, irony, and mock-forms; the languages of the ridiculous and the sublime; the politics of gender and sexuality; the authority and fallibility of human knowledge; connections among melancholy, madness, and imagination. Works by such writers as Rochester, Behn, Finch, Dryden, Swift, Gay, Defoe, Johnson, Boswell, Sterne, and Cowper.

[ENGL 333(3330) The 18th-Century English Novel # (LA-AS)]
Spring. 4 credits. *This course may be used as one of the three pre-1800 courses required of English majors.* Next offered 2008-2009. F. Bogel.]

[ENGL 335(3350) Modern Western Drama, Modern Western Theater: Theory and Practice (also THEATR 335/VISST 335(3350)) (LA-AS)]
Fall. 4 credits. Next offered 2008-2009.
N. Salvato.]

[ENGL 340(3400) Studies in Romantic Literature: Green Romanticism: Literature and Ecology # (LA-AS)]
Fall. 4 credits. A.-L. François.

What does Romanticism have to teach us about contemporary debates on species extinction, genetic engineering, food politics, global warming, globalization, and the "death of the planet"? This course examines the relation between ecological politics and the literary movement known as Romanticism, a movement once defined as a turn toward "nature" in response to the urbanization and industrialization marking Britain's transition to modern capitalism in the early 19th century. Topics include: the gendering of "nature"; agriculture as a border-space between "culture" and "nature"; writing about place and the loss of place; weather-reporting and other practices of attention; fantasies about ecological disaster and science's ability to save

or destroy humankind. Writers include William Wordsworth, Dorothy Wordsworth, Mary Shelley, John Clare, Thoreau, Sarah Orne Jewett, Rachel Carson, and Michael Pollan.

[ENGL 344(3440) American Film Melodrama (also AM ST 338(3440), VISST 345(3645), FILM 344(3440)) (LA-AS)]

Spring. 4 credits. S. Haenni.
For description, see FILM 344.

[ENGL 345(3450) Victorian Controversies # (LA-AS)]
Fall. 4 credits. Next offered 2008-2009.
S. Siegel.]

[ENGL 348(3480) Studies in Women's Literature: The Feminist Literary Tradition (also FGSS 348(3480)) (LA-AS)]
Spring. 4 credits. Next offered 2008-2009.
K. McCullough.]

[ENGL 349(3490) Shakespeare and Europe (also COM L 348(3480)) (LA-AS)]
Fall. 4 credits. *This course may be used as one of the three pre-1800 courses required of English majors.* W. Kennedy.
For description, see COM L 348.

[ENGL 350(3500) The Modern Tradition (LA-AS)]
Spring. 4 credits. D. Schwarz.
Critical study of major works by Hardy, Conrad, Lawrence, Joyce, Woolf, Eliot, Yeats, Hopkins, Wilde, Wallace Stevens, and others. While the emphasis will be on close reading of individual texts, we shall place the authors and works within the context of literary, political, cultural, and intellectual history. The course will seek to define the development of literary modernism (mostly but not exclusively in England), and relate literary modernism in England to that in Europe and America as well as to other intellectual developments. We shall be especially interested in the relationship between modern literature and modern painting and sculpture; on occasion, we shall look at slides. Within the course material, students will be able to select the topics on which they write essays.

[ENGL 352(3520) Americans Abroad (also AM ST 305(3050))]
Spring. 4 credits. S. Haenni.
For description, see AM ST 305.

[ENGL 353(3530) The Modern Indian Novel @ (LA-AS)]
4 credits. Next offered 2008-2009.]

[ENGL 354(3540) The British Modernist Novel (LA-AS)]
Fall. 4 credits. Next offered 2008-2009.
D. Mao.]

[ENGL 355(3550) Decadence (also FGSS 355(3550)) (LA-AS)]
Fall. 4 credits. Next offered 2008-2009.
E. Hanson.]

[ENGL 360(3600) Another World Is Possible: The American Left Since the 1960s (also AM ST 359(3590)) (LA-AS)]
Fall. 4 credits. P. Sawyer.
Since the collapse of world communism and the rise of a conservative hegemony at home, the American left has changed profoundly since the turbulent decade of the 1960s. Yet progressive writers and artists and intellectuals have continued to expose oppressive forms of power while envisaging genuine alternatives,

including new ways of affirming previously marginalized identities. Moving in time from the election of Ronald Reagan to second Iraq War, the course will cover the topics of race, gender, poverty, sexual identity, the media, globalization, war, and the university. Works will include drama, fiction, paintings of Basquiat, films of Spike Lee, rap music, and the literature of ideas. Writing will include an option of working in the online archive on the History of Activism at Cornell.

[ENGL 361(3610) Studies in the Formation of U.S. Literature (also AM ST 361(3610)) # (LA-AS)]

Spring. 4 credits. D. Fried.
An introduction to literary culture in the U.S. between the mid-1830s and the 1880s. Focus will be on how to read a range of extraordinary, stylistically idiosyncratic writing and their bold scrutiny of the unexamined pieties of their day and ours. Some consideration of historical and cultural contexts: the reform movements of the 1840s, New England Transcendentalism, the rise of feminism, the politics of the Abolition movement, Southern slavery and Northern collaboration and resistance, the emergent culture of celebrity, religious revivals and the challenges to belief posed by advances in natural science, and the Civil War. Readings from Emerson, Thoreau, Margaret Fuller, Dickinson, Whitman, Frederick Douglass, Melville, and others.

[ENGL 362(3620) Studies in U.S. Literature after 1850: Reconstructing America (also AM ST 364(3640)) (LA-AS)]
Fall. 4 credits. Next offered 2008-2009.
N. Waligora-Davis.]

[ENGL 363(3630) Studies in U.S. Literature: The Age of Realism and Naturalism (also AM ST/FGSS 363(3630)) (LA-AS)]
Spring. 4 credits. K. McCullough.
Literary history tells us that various literary genres—regionalism, realism and naturalism, among others—jockeyed for place in American fiction at the turn of the 19th century. Cultural histories of the era tell us that social ideals about what constituted the "real" as well as the "American" were debated in this period, a period that witnessed such sweeping changes as, for instance, Jim Crow, Manifest Destiny, and women's movements. This course puts these two accounts—the literary and the historical—into conversation in order both to examine the varied styles and issues that comprised the American literature in the period and to query the larger question of the fiction's impact on society. Authors under consideration may include: Chesnut, Crane, James, Jewett, Ruiz de Burton, Sui, Twain, Wharton, Winnemucca, and Zitkala-Sa.

[ENGL 364(3640) Studies in U.S. Literature After 1950: Native Daughters Speak (also AM ST 373(3730)) (LA-AS)]

Spring. 4 credits. L. Donaldson.
American Indian and First Nations women have made important contributions to North American literature and culture. This course will explore the distinct voices that Native women have expressed within fiction, poetry, storytelling, theater and song. We will examine the urgent concerns of Native women such as community, sovereignty, sexuality, family and the environment. We will read and listen to the writing and song making of both US and

Canadian Native women. Possible authors/performers include Joy Harjo, Walela and Ulali (music cds), Winona LaDuke, Eden Robinson, Jeanette Armstrong and Nora Marks Dauenhauer. The class will have a discussion format with occasional lectures by the instructor.

[ENGL 365(3650) American Literature Since 1945 (also AM ST 365(3650)) (LA-AS)]

Fall. 4 credits. Next offered 2008–2009. B. Maxwell.]

[ENGL 366(3660) Studies in U.S. Fiction Before 1900: The 19th-Century American Novel (also AM ST 366(3660)) # (LA-AS)]

Spring. 4 credits. Next offered 2008–2009.]

ENGL 367(3670) Studies in U.S. Fiction After 1900: Major Writers and Movements (also AM ST 367(3670)) (LA-AS)]

Fall. 4 credits. M. P. Brady.

This course will survey some of the significant themes and movements preoccupying 20th-century fiction as well as some of the major U.S. writers such as Henry James, Zora Neale Hurston, Thomas Pynchon, and Willa Cather.

[ENGL 368(3680) Faulkner (LA-AS)]

4 credits. Next offered 2008–2009.]

ENGL 369(3690) Fast-Talking Dames and Sad Ladies: 1940s and Now (also FILM 369[3690], FGSS 369[3690]) (LA-AS)]

Fall. 4 credits. Limited to 15 students. Students must be able to attend Mon. and/or Tues. late-afternoon screenings. Film fee: \$20. L. Bogel.

Focusing on sassy or subdued heroines of Hollywood's 1940s films and current films, this seminar works to define romantic comedy and melodrama as genres; as vehicles for female stars; as ways of viewing the world. Psychoanalytic and feminist analyses of these films will help us pose questions about gender and culture, about gendered spectatorship, about Hollywood's changing constructions of "woman," the "maternal," and the "feminine," and about representations of desire, pleasure, fantasy, and ideology. Required twice-weekly screenings of such films as *Gilda*, *The Lady Eve*, *Notorious*, *The Women*, *The Philadelphia Story*, *His Girl Friday*, *Mrs. Dalloway*, *The Hours*, *First Wives' Club*, *All About My Mother*, *Silence of the Lambs*, and *Far from Heaven*.

[ENGL 370(3700) The 19th-Century Novel # (LA-AS)]

Spring. 4 credits. Next offered 2008–2009. J. Adams.]

ENGL 371(3710) The Literature of the Outlaw (also COM L 373(3730)) @ # (LA-AS)]

Fall. 4 credits. B. Maxwell. For description, see COM L 373.

ENGL 372(3720) Medieval and Renaissance Drama (also THETR 372(3720)) # (LA-AS)]

Spring. 4 credits. *This course may be used as one of the three courses pre-1800 required of English majors.* M. Raskolnikov.

The first part of this course asks: what does it mean to invent theatre (again)? If, as some critics believe, the Middle Ages had forgotten ancient dramatic traditions (how do you forget Sophocles?), medieval drama was a new

invention. This drama poses an interpretive challenge: it lacks authors. Most of the "mystery plays" discussed were staged at annual festivals over decades, accumulating a collective authorship. In the Renaissance, theatre became one of the most polished and complex forms of English literary art (and one of the sleaziest). We will read some comedies and some extraordinarily bloody tragedies by Shakespeare, Marlowe, Jonson, Webster, Dekker, and Beaumont. This class considers drama's origins and changing cultural meanings, interrogating the popular culture of another time, and thereby, our own.

ENGL 373(3730) Weird Science, Hard Poems (LA-AS)]

Spring. 4 credits. L. Van-Clief Stefanon. Science and poetry seem to some strange bedfellows. Are they and should they be? In the introduction to an anthology of poems written about science and math, Kurt Brown writes, "If science and art have anything in common it exists in the resources of the human brain and our ability to create something unforeseen and revolutionary out of our dreaming." What are the implications, philosophical, cultural, and otherwise in tearing down the walls between science and poetry? Is there revolutionary potential in a marriage between them? For whom? What are the historical arguments for and against such separation? Where can cross-pollination between science or math and creative arts lead us?

ENGL 374(3740) Slavery in 20th-Century Film and Fiction (also AM ST 374(3681)) (LA-AS)]

Spring. 4 credits. N. Waligora-Davis.

This course explores 20th-century preoccupations and reconstructions of slavery, examining the ways slavery continues to define and impact sexuality, racial identities and their popular representations, our sense of public and private spaces, legal discourse, and our national identity. What does it mean to be a black or white man or woman in America? Who does law, history, and society concede as legitimate witness? How should we craft our histories? Who is a subject of, and who is subjected to law? How are privacy interests diffused against social interests? Our readings will place in close proximity not only historical writings on slavery (slave history and slave narratives) and these 20th-century revisionist slave stories, but slave law and contemporary immigration, property, reproduction, criminal, and privacy legislation.

ENGL 375(3750) Studies in Drama and Theatre: 20th-Century Drama: Theatres of Selfhood (also THETR 375(3750)) (LA-AS)]

Spring. 4 credits. P. Lorenz.

There is a long tradition of "discovering" what it means to be a human being in theater. From the tragedies of Sophocles and Shakespeare that were so important to Freud, through Schiller's understanding of "the stage as a moral institution," to the alienation effect discovered and deployed there by Brecht, theater has long been a test-site of theory. In this course we will follow this tradition, asking, in particular, how the modern stage has responded to the historical, political, philosophical and aesthetic challenges of the 20th century. We will read plays and other texts by Chekhov, Pirandello, Lorca, Brecht, Artaud, Pinter, Soyinka, Müller, and Parks.

ENGL 376(3760) Special Topics in Drama and Performance (also THETR 313(3130))

Fall. 4 credits. S. Warner. For description, see THETR 313.

ENGL 379(3790) Reading Nabokov (also RUSSL 385(3385)) (LA-AS)]

Fall. 4 credits. G. Shapiro. For description, see RUSSL 385.

ENGL 380(3800) Time Sensitive: Poets of the Last Ten Minutes (LA-AS)]

Fall. 4 credits. A. Fulton. We'll read an eclectic assortment of books by contemporary poets with an eye toward matters of content and form. Depending on the poet, we might note inclusions of an autobiographical, historical, or linguistic past; the presence of heirloom, souvenir, or frontier emotions—such as nostalgia, regret, or hope; depictions of timelessness (immortality, the Now) and mortality; and time-dependent cognitive sensations, such as déjà vu, premonition, or amnesia. We'll also consider the poems' relation to tradition and genre; its meter or rhythm; metaphors and tropes; rhetoric and tone; surface and texture; erasures and ellipses. The "ten minutes" of the subtitle alludes to geologic time; in mortal terms, the poets will be of the last ten years. Students will write brief essays on the assigned books.

ENGL 381(3810) Reading as Writing (LA-AS)]

See complete course description in section headed "Expository Writing."

ENGL 382–383(3820–3830) Narrative Writing (LA-AS)]

See complete course description in section headed "Creative Writing."

ENGL 384–385(3840–3850) Verse Writing (LA-AS)]

See complete course description in section headed "Creative Writing."

ENGL 386(3860) Philosophic Fictions (LA-AS)]

See complete course description in section headed "Expository Writing."

ENGL 387(3870) Autobiography: Theory and Practice (LA-AS)]

See complete course description in section headed "Expository Writing."

ENGL 388(3880) The Art of the Essay (LA-AS)]

See complete course description in section headed "Expository Writing."

ENGL 390(3090) Autobiography: The Politics of History, Memory, and Identity (LA-AS)]

Spring. 4 credits. J. Carlacio. Autobiographical writing reveals a person's life not only to him- or herself but also to his or her readers. Constructed from memory and experience, life narratives complicate the seemingly transparent relationship between memory, history, and the "I" who recounts it. The course will investigate this relationship and seek to understand how experience and memory shape each other and how these in turn shape the texts that "story" our lives. We will read both books and essays that exemplify key historical moments from the 19th through the 21st centuries from writers such as Reinaldo Arenas, James Baldwin, Harriet Jacobs, Rigoberta Menchú, Benjamin Wilkomirsky, and others. Students will write

several short responses and two longer papers.

[ENGL 397(3970) Policing and Prisons in American Culture (also AM ST 395[3970]) (CA-AS)]

Spring. 4 credits. Next offered 2008-2009. B. Maxwell.]

[ENGL 398(3980) Latino/a Popular Culture (also AM ST 396[3981], LSP 398[3980]) (CA-AS)]

Spring. 4 credits. U.S. Latino/a history is strongly recommended as a prerequisite, but not required. Next offered 2008-2009. M. P. Brady.]

Courses for Advanced Undergraduates

Courses at the 400 level are open to juniors and seniors and to others by permission of instructor unless other prerequisites are noted.

[ENGL 402(4020) Literature as Moral Inquiry (KCM-AS)]

Spring. 4 credits. Next offered 2008-2009. S. Mohanty.]

[ENGL 403(4030) Advanced Seminar in Poetry: Studies in American Poetry, 1955-1980 (also AM ST 403[4030]) (LA-AS)]

Fall. 4 credits. Next offered 2008-2009. R. Gilbert.]

[ENGL 404(4040) Paleography, Bibliography, and Reception History (also ENGL 604[6040]) # (LA-AS)]

Spring. 4 credits. Next offered 2008-2009. A. Galloway.]

[ENGL 405(4050) The Politics of Contemporary Criticism (LA-AS)]

Fall. 4 credits. Next offered 2008-2009. S. Mohanty.]

ENGL 407-408(4070-4080) Society for the Humanities

407, Fall; 408, Spring. 4 credits.

407 (fall)

Sec. 1: Poetry and Totality

C. Nealon.

For description, see S HUM 416.

Sec. 2: Imagining Contemporary Asia

W-L. Wee.

For description, see S HUM 419.

Sec. 3: On the Inner Voice

D. Riley.

For description, see S HUM 418.

408 (spring)

Sec. 1: Futures of American Poetry

M. Cavitch.

For description, see S HUM 423.

Sec. 2: Cerebral Seductions

W. Jones.

For description, see S HUM 425.

Sec. 3: Modernity and Critique

B. Maxwell.

For description, see S HUM 426.

Sec. 4: Sensing Thinking

Fall. 4 credits. Next offered 2009-2010. P. Hyams and T. Hill.]

ENGL 420(4200) Renaissance Humanism (also ENGL 624[6240], COM L 452[652][4520/6520]) # (LA-AS)]

Spring. 4 credits. W. Kennedy. For description, see COM L 452.

[ENGL 421(4210) Advanced Seminar in the Renaissance: Literature, Science, and Renaissance Curiosities # (LA-AS)]

Fall. 4 credits. *This course may be used as one of the three pre-1800 courses required of English majors.* Next offered 2008-2009. J. Mann.]

[ENGL 422(4220) Renaissance "Traffick" # (LA-AS)]

Spring. 4 credits. *This course may be used as one of the three pre-1800 courses required of English majors.* Next offered 2008-2009. R. Kalas.]

[ENGL 423(4230) Renaissance Lyric # (LA-AS)]

Spring. 4 credits. *This course may be used as one of the three pre-1800 courses required of English majors.* Next offered 2008-2009. B. Correll.]

ENGL 426(4260) The Animal (also COM L 424[4240], GERST 426[4260]) (LA-AS)]

Spring. 4 credits. P. Gilgen. For description, see GERST 426.

ENGL 427(4270) Advanced Seminar in Shakespeare: The Greek and Roman Plays # (LA-AS)]

Spring. 4 credits. B. Correll. Some of Shakespeare's most important dramas are about ancient figures and events: Julius Caesar, Antony and Cleopatra, Troilus and Cressida, Coriolanus, Timon of Athens, Cymbeline, and others. But while Shakespeare transports a classical cultural heritage to his early modern audience, he also actively and critically adapts it in thought-provoking and innovative ways. These plays come with big questions. Why are so many of Shakespeare's characters representatives of classical authority and in conflict with it? How do Shakespeare's adaptive practices compare to playwrights such as Christopher Marlowe (Dido) or Ben Jonson (Sejanus)? What do Shakespeare's Greek and Roman plays tell us about the contexts in which they are written and performed? We will include some film in the course.

[ENGL 428(4280) Problem Poems: Close Reading and Critical Debate # (LA-AS)]

Spring. 4 credits. *This course may be used as one of the three pre-1800 courses required of English majors.* Next offered 2008-2009. F. Bogel.]

[ENGL 429(4290) Adam's Rib and Other Divine Signs (also RELST 429[4290]) # (LA-AS)]

Spring. 4 credits. Next offered 2009-2010. L. Donaldson.]

ENGL 430(4300) Topics in American Studies (also AM ST 430[4303])

Spring. 4 credits. S. Samuels. The Rabinor Seminar. For description, see AM ST 430.

[ENGL 440(4440) Romantic Drama (also ENGL 644[6440], THETR 440/644[4400/6440]) (LA-AS)]

Fall. 4 credits. Next offered 2008-2009. R. Parker.]

ENGL 444(4441) Text Analysis for Production: How to Get from the Text onto the Stage (also THETR 445[4450])

Fall. 4 credits. B. Levitt. For description, see THETR 445.

[ENGL 446(4660) Comedy and Satire: The 19th Century # (LA-AS)]

Spring. 4 credits. Next offered 2009-2010. P. Sawyer.]

ENGL 452(4520) Wilde and Woolf (LA-AS)]

Fall. 4 credits. S. Siegel. This seminar considers the question of style: what does the word mean; why has it claimed attention; how has it behaved in the work of two authors whose writings among their contemporaries marked distinctive departures? We explore Oscar Wilde and Virginia Woolf as readers of literary and social texts. Along the way, we direct our attention to the implicit expectations brought to the understanding of "Victorians" and "Modernists." Selections are drawn from the full range of Wilde's and Woolf's work. Our principal texts, however, are limited to a few essays by each author.

ENGL 453(4530) 20th-Century Women Writers of Color (also AAS 453[4530]) (LA-AS)]

Spring. 4 credits. S. Wong. In this course, we'll be reading literature—primarily novels—produced by hemispheric American women writers of the mid- to late 20th century. We will look at how these writings articulate concerns with language, home, mobility, and memory, and at how the work is informed by the specificities of gender, race, region and class. Readings may include work by Leslie Marmon Silko, Sandra Cisneros, Theresa Hak Kyung Cha, Jamaica Kincaid, Gwendolyn Brooks, Ann Petry, Fae Myenne Ng, Carolivia Herron, Helena Maria Viramontes, and Shani Mootoo. Course requirements will include class presentations, short responses to the readings, and a longer research essay.

ENGL 456(4560) Constructing the Book, Reconstructing the Text (also ENGL 650[6500]) # (LA-AS)]

Fall. 4 credits. *This course may be used as one of the three pre-1800 courses required of English majors.* C. Ruff. The fortunes of texts depend on the physical media that carry them. This course will trace two twisted strands of bibliostalgia: the

search for the fugitive text, and longing for lost arts of book production. Beginning with a hands-on introduction to how books were made in the early centuries of printing, we'll consider to what extent printing was or was not capable of fixing texts in easily-reproducible form. We'll then look at the motivations and methodologies of those who have sought to stabilize protean texts and reconstruct lost ones. Our focus will be on the period from the 15th to the 19th centuries, but we'll be glancing backwards at the scribal culture of the Middle Ages and forwards at the world of the electronic text.

ENGL 458(4580) Imagining the Holocaust (also COM L 483[4830], GERST 457[4570]) (LA-AS)

Spring. 4 credits. D. Schwarz.

What is the role of the literary imagination in keeping the memory of the Holocaust alive for our culture? We shall examine major and widely read Holocaust narratives that have shaped the way we understand and respond to the Holocaust. We shall begin with first person reminiscences—Wiesel's *Night*, Levi's *Survival at Auschwitz*, and *The Diary of Anne Frank*—before turning to realistic fictions such as Kineally's *Schindler's List* (and Spielberg's film), Kertesz's *Fateless*, Kosinski's *The Painted Bird*, and Ozick's "The Shawl." We shall also read the mythopoetic vision of Schwarz-Bart's *The Last of the Just*, the illuminating distortions of Epstein's *King of the Jews*, the Kafkaesque parable of Appelfeld's *Badenheim 1939*, and the fantastic cartoons of Spiegelman's *Maus* books.

[ENGL 460(4601) Riddles of Rhythm (LA-AS)]

Spring. 4 credits. Next offered 2008–2009. D. Fried.]

[ENGL 462(4620) Senior Seminar in Latina/o Studies: Chicana Feminisms in a Globalizing World (LA-AS)]

Spring. 4 credits. Next offered 2008–2009. M. Brady.]

[ENGL 465(4650) American Violence (LA-AS)]

Fall. 4 credits. Next offered 2008–2009. S. Samuels.]

ENGL 467(4670) Black Manhattan: 1919–1940 (also AM ST 467[4670]) (LA-AS)]

Fall. 4 credits. N. Waligora-Davis.

This course examines the key figures, political movements, literary, cinematic, and musical traditions that are remembered as the Harlem Renaissance. Reading Locke, Hughes, Larsen, Hurston, Toomer, Johnson, and Garvey alongside black cinematic and musical (jazz and blues) productions, we take up the political and social implications of the "new Negro" and a distinctly African American modernist aesthetic. We trace the effects of WWI and segregation on black cultural expression. This course studies the relationship among these artistic productions and emerging black nationalisms, black revolutionary tendencies, and radical black political philosophies. We will also critique figurations of "Harlem," a place imagined as a site of black possibility at the very moment it was being transformed into a "ghetto."

ENGL 469(4690) The Paranoid Style in Contemporary American Fiction and Film (LA-AS)]

Spring. 4 credits. K. Attell.

This course examines the paranoid style in contemporary American fiction and film. The paranoid plots we will encounter vary considerably (personal paranoia, political conspiracies, governments turned enemy, surveillance technology run amok, apocalyptic-millennial paranoia), and yet when viewed together they seem to cohere as a distinct style within post-WWII American narrative. Throughout the course, we will be asking how the paranoid style responds to the contemporary American context and how the paranoid content of these narratives shapes their aesthetic form. What is the paranoid afraid of, and does he or she have a point? Why is it that paranoia has arisen as such a distinctively American attitude? Novels by Nabokov, Pynchon, Reed, Dick, DeLillo, Didion, Roth; films by Coppola, Romero, Bigelow, Baldwin.

[ENGL 470(4700) Senior Seminar in the Novel: Austen and the Psychological Novel (LA-AS)]

Spring. 4 credits. Next offered 2008–2009. A.-L. François.]

[ENGL 472(4720) Islands of Globalization (also ENGL 672[6720]) (LA-AS)]

Spring. 4 credits. Next offered 2008–2009. E. DeLoughrey.]

ENGL 473(4730) Parody (also ENGL 673[6730], THETR 420/620[4200/6200] (LA-AS)]

Spring. 4 credits. N. Salvato. For description, see THETR 420.

[ENGL 474(4740) Senior Seminar on Major Authors: Hemingway, Fitzgerald, and Faulkner (LA-AS)]

Spring. 4 credits. Next offered 2008–2009.]

[ENGL 475(4750) Senior Seminar in the 20th Century: Narratives of Loss—AIDS]

Fall. 4 credits. Next offered 2009–2010. D. Woubshet.]

[ENGL 476(4760) Global Women's Literature (LA-AS)]

Spring. 4 credits. Next offered 2008–2009. E. DeLoughrey.]

ENGL 477(4600) Melville (also AM ST 477[4601]) # (LA-AS)]

Fall. 4 credits. Next offered 2008–2009. B. Maxwell.]

[ENGL 478(4780) Intersections in Lesbian Fiction (also AM ST 468[4780], FGSS 477[4770]) (LA-AS)]

Spring. 4 credits. Next offered 2009–2010. K. McCullough.]

ENGL 479(4790) Advanced Seminar in American Literature: Reading Walden (LA-AS)]

Spring. 4 credits. D. Fried.

An intensive study of Thoreau's *Walden*. Focus will be on how to read this extravagantly strange, luminously perceptive, and searchingly critical account of an experiment in standing just beyond the usual course of life in mid-19th-century New England. We will also read other writings by Thoreau, including his poetry, essays, translations, and selections from his journals. Some attention to the history of nature writing, the writing of Thoreau's contemporaries, and American landscape painting. Assignments will include writing imitations and parodies of Thoreau, journal-keeping, two papers, and a take-home final exam.

ENGL 480–481(4800–4810) Seminar in Writing (LA-AS)]

480; fall; 481, spring. 4 credits.

For description, see section "Creative Writing."

ENGL 482(4820) Hamlet, The Seminar (also THETR 447[4470]) # (LA-AS)]

Fall. 4 credits. B. Levitt.

For description, see THETR 447.

[ENGL 483(4601) Seminar in Comparative 20th-Century Anglophone Drama (also THETR 483[4830]) (LA-AS)]

Fall. 4 credits. Some knowledge of classical and avantgarde theories of drama and theatre would be useful, but is not a prerequisite for this course. Next offered 2008–2009.]

[ENGL 486(4860) American Indian Women's Literature (also AIS 486[4860]) (LA-AS)]

Spring. 4 credits. Next offered 2009–2010. L. Donaldson.]

ENGL 490(4900) Literature of the Fin de Siècle (LA-AS)]

Spring. 4 credits. K. Biers.

This course will explore the British and American literature of the late 19th and early 20th centuries in the context of cultural history, philosophy, and aesthetics. We will emphasize the diverse cross-currents and antagonisms of the era, including "art for art's sake" vs. social realism; racial passing; the cults of the European dandy and the American engineer; dystopian vs. utopian fiction; pessimism vs. pragmatism; the vampire vs. the feminist or "new woman." What fears and fantasies haunted the fin de siècle literary imagination? How were they connected to the social, political, and philosophical debates that characterized the period? Authors may include Willa Cather, W.E.B. du Bois, Thomas Alva Edison, Charlotte Perkins Gilman, William James, Pauline Hopkins, Friedrich Nietzsche, Christina Rossetti, Bram Stoker, and Oscar Wilde.

ENGL 491(4910) Honors Seminar I

Fall. 4 credits. Open to students in the Honors Program in English or related fields, or by permission of instructor.

Sec. 1: James Baldwin and Toni Morrison

D. Woubshet. James Baldwin and Toni Morrison are two of the most discerning interpreters of the English language and among the shrewdest interlocutors of American life. This course will examine their writings (essays, novels, plays, poems, libretti) against a variegated historical backdrop. We will take an in-depth look at their oeuvre, paying careful attention to style and form, and how their work pries open America's literary, cultural and political imagination. Among the themes for consideration are: familial and broader kinship ties; the politics of (racial, gender, sexual and class) difference; individual and collective death; and love. Readings will include: *The Price of the Ticket; The Amen Corner; Another Country; Just Above My Head; Song of Solomon; Beloved; Playing in the Dark; and Honey and Rue.*

Sec. 2: Literature and National Identity—Imagining England in the Age of Shakespeare

J. Mann.

This course may be used as one of the three pre-1800 courses required of English majors.

This course explores the relationship between literature and national identity in the English Renaissance. How do early modern writers imagine what Shakespeare called "this blessed plot, this earth, this realm, this England"? How does the process of national self-fashioning respond to a period of unprecedented overseas exploration and imperial adventure? Throughout the course we will attend to the ways in which writers attempt to shape an English literary tradition while also studying critical texts that query the very concept of a "national" literature. Beginning with Thomas More, and reading works by Sidney, Spenser, Bacon, Herbert, and Jonson, we will conclude with an act of poetic resistance to the project of national self-fashioning, when John Milton writes a religious epic instead of a nationalist romance.

ENGL 492(4920) Honors Seminar II

Spring. 4 credits. Open to students in the Honors Program in English or related fields, or by permission of instructor.

Sec. 1: Authentic Romantics

C. Chase.

Looking for an author's authentic voice when we read dates back to the Romantics. In this seminar we shall examine how the idea of authenticity appears in works by William Wordsworth, Percy Bysshe Shelley, and a "pre-Romantic," Jean-Jacques Rousseau. Rousseau's Confessions subordinate the concept of truth versus falsehood to the concept of truth as authenticity. Wordsworth's autobiography, too, *The Prelude*, aims at authentically representing a self. Wordsworth's and Shelley's poetry also pursues other conceptions of an authentic language. The questions their works raise, one might say, make these writers authentic Romantics. Three papers, developing skills necessary for writing an Honors thesis.

Sec. 2: Roots of Tolkien

S. Zacher.

This seminar will mainly explore medieval texts that influenced Tolkien's fiction. Though the focus will not be on Tolkien's fiction per se, a few of his shorter works will be considered. Since Tolkien was a renowned philologist, we'll read selections from his critical essays, in addition to several medieval texts he edited and translated. Other readings will derive from Old English, Norse, and Celtic (in translation), spanning the genres of heroic literature, sagas, elegies, charms, runes, and Germanic mythology. Texts will include: *Beowulf*, *The Prose Edda*, the *Saga of Hrolf Kraki*, and mythologies of "the ring," such as *The Saga of the Volsungs*, the *Nibelungenlied*, the *Mabinogion*, and Wagner's Ring-cycle. Required work will include in-class presentations and research papers. Prerequisite: *The Lord of the Rings*.

ENGL 493(4930) Honors Essay Tutorial I

Fall or spring. 4 credits. Prerequisites: senior standing and permission of director of the Honors Program.

ENGL 494(4940) Honors Essay Tutorial II

Fall or spring. 4 credits. Prerequisites: ENGL 493 and permission of director of the Honors Program.

ENGL 495(4950) Independent Study

Fall or spring. 2-4 credits. Prerequisites: permission of departmental advisor and director of undergraduate studies.

Courses Primarily for Graduate Students

Permission of the instructor is a prerequisite for admission to courses numbered in the 600s. These are intended primarily for graduate students, although qualified undergraduates are sometimes admitted. Undergraduates seeking admission to a 600-level course should consult the instructor. The list of courses given below is illustrative only; a definitive list, together with course descriptions and class meeting times, is published in a separate department brochure before course enrollment each semester.

Graduate Courses in English 2007-2008

Fall

ENGL 585(5850) Linguistic Theory and Poetic Structure (also LING 585[5585])

J. Bowers.

ENGL 600(6000) Colloquium for Entering Students

J. Adams.

ENGL 611(6110) Old English (also ENGL 311[3110])

S. Zacher.

ENGL 617(6170) Linguistic Structure of Old English (also LING 649[6649])

W. Harbert.

ENGL 619(6190) Chaucer and Gower

A. Galloway.

ENGL 625(6250) Love, Loss, and Lament in the Renaissance (also FGSS 628[6280])

B. Correll.

ENGL 633(6330) Satire, Sensibility, Imitation, and Mechanism in 18th-Century Literature

F. Bogel.

ENGL 639(6390) Studies in Romantic Literature: Writers of the Revolution

R. Parker.

J. Adams.

ENGL 647(6470) Jefferson's America: From the Underside

L. Donaldson.

ENGL 650(6500) Constructing the Book, Reconstructing the Text (also ENGL 456[4560])

C. Ruff.

ENGL 651(6510) Camp, Kitsch, and Trash (also THETR 605[6050])

N. Salvato.

ENGL 652(6520) Passionate Politics: Affect, Protest Performance (also THETR 606[6060])

S. Warner.

ENGL 653(6530) The Modern British Novel: Conrad, Joyce, Lawrence, Woolf, and Forster

D. Schwarz.

ENGL 681(6810) Trauma, Time, and History (also COM L 615[6150])

C. Caruth.

ENGL 699(6990) Studies in African American Literature: The Question of Rights: African American Literature, 1940-1980

N. Waligora-Davis

ENGL 780.01(7800) MFA Seminar: Fiction

S. Vaughn.

ENGL 780.02(7800) MFA Seminar: Poetry

L. Van-Cleaf Stefanon.

ENGL 785(7850) Reading for Writers: Contemporary Poetry and Poetics

A. Fulton.

Spring

ENGL 612(6120) Beowulf (also ENGL 412[4120])

T. Hill.

ENGL 624(6240) Renaissance Humanism (also ENGL 420[4200], COM L 452/652[4520/6520])

W. Kennedy.

ENGL 626(6260) Forms of Life in the 16th and 17th Centuries

P. Lorenz.

ENGL 629(6290) Deleuze and Lyotard: Aesthetics and Technology (also COM L 634[6340])

T. Murray.

ENGL 640(6400) Keats and His Successors

A.-L. François.

ENGL 655(6550) Modernist Fiction and the Erotics of Style

E. Hanson.

ENGL 665(6650) Race, Gender, and Crossing Water: Narratives of Mobility and Escape in the 19th-Century United States

S. Samuels.

ENGL 671(6710) Law and Literature

E. Cheyfitz.

ENGL 702(7020) Decolonization and Culture: Key Issues in Contemporary Theory

S. Mohanty.

ENGL 710(7100) Advanced Old English

S. Zacher.

ENGL 781.01(7810) MFA Seminar: Poetry

K. McClane.

ENGL 781.02(7810) MFA Seminar: Fiction

E. Quinonez.

ENGL 785(7850) Reading for Writers

J. Lennon.

ENGLISH AS A SECOND LANGUAGE

See "English for Academic Purposes."

ENGLISH FOR ACADEMIC PURPOSES

D. Campbell, director; S. Schaffzin, I. Arnesen, K. (Priscilla) Kershaw

Note: Courses and credits do not count toward the A.B. degree.

ENGLF 205(1005) English as a Second Language

Fall. 4 credits. Prerequisite: placement by exam. S. Schaffzin.

All-skills course emphasizing listening and speaking, with some writing practice. Students also meet individually with the instructor.

ENGLF 206(1006) English as a Second Language

Spring. 3 credits. Prerequisite: ENGLF 205 or placement by exam. S. Schaffzin.

Writing course for those who have completed ENGLF 205 and need further practice, or for those who place into the course. Individual conferences are also included.

ENGLF 209(1009) English as a Second Language

Fall or spring. 1 credit. Prerequisite: permission of instructor. S. Schaffzin.

Practice in classroom speaking and in informal conversational English techniques for gaining information. Students also practice giving informal presentations. Individual conferences with the instructor supplement class work.

ENGLF 210(1010) English as a Second Language

Spring. 1 credit. Prerequisite: permission of instructor. S. Schaffzin.

Practice in academic speaking. Formal classroom discussion techniques and presentation of information to a group. Presentations are videotaped and reviewed with the instructor. Individual conferences supplement class work.

ENGLF 211(1011) English as a Second Language

Fall, spring, or summer. 3 credits. Prerequisite: placement by exam. D. Campbell.

Academic writing with emphasis on improving organization, grammar, vocabulary, and style through the writing and revision of short papers relevant to students' fields. Frequent individual conferences supplement class work.

ENGLF 212(1012) English as a Second Language

Spring. 3 credits. Limited to 12 students on first-come, first-served basis. Prerequisite: permission of instructor. D. Campbell.

Research paper writing. For the major writing assignment of this course, students must have a real project that is required for their graduate work. This can be a thesis proposal; a pre-thesis; part of a thesis, such as the literature review or discussion section; a paper for another course or a series of shorter papers (by permission of the other instructor); or a paper for publication. Time limitations make it difficult to deal with work over 20 pages in length. Course work involves practice in paraphrase, summary, the production of cohesive, coherent prose, vocabulary use, and grammatical structure. Frequent individual conferences are a necessary part of the course. Separate sections for social sciences/humanities and for science/technology.

ENGLF 213(1013) Written English for Non-Native Speakers

Spring. 3 credits. Prerequisite: permission of instructor. S. Schaffzin.

Designed for those whose writing fluency is sufficient for them to carry on regular academic work but who want to refine and develop their ability to express themselves clearly and effectively. Individual conferences supplement class work.

First-Year Writing Seminar**ENGLB 115-116(1050-1060) English for Later Bilinguals**

For description, see First-Year Writing Program brochure.

FALCON PROGRAM (INDONESIAN)

See "Department of Asian Studies."

FEMINIST, GENDER & SEXUALITY STUDIES

Core faculty: A. Basu, S. Bem, L. Beneria, L. Bogel, D. Castillo, S. Correll, E. DeLoughrey, I. DeVault, S. Feldman, M. Fernandez, J. Fortune, J. E. Gainor, D. Ghosh, E. Hanson, M. Hite, C. Howie, M. Katzenstein, P. Liu, K. Long, K. March, C. A. Martin, S. Martin, K. McCullough, M. B. Norton, J. Peraino, M. Raskolnikov, D. Reese, S. Samuels, D. Schrader, S. Seth, A. Villarejo, S. Warner, R. Weil, D. Woubshet

Cross-listing faculty: E. Baptist, J. Bernstock, F. Blau, D. Chang, K. Cohen, B. Correll, M. Evangelista, K. Graubart, S. Haenni, K. Haines-Eitzen, P. Hyams, P. Janowitz, C. Lazzaro, T. Loos, M. Migiel, A. Parot, Q. Roberson, M. Rossiter, N. Russell, N. Salvato, S. Sangren, R. Savin-Williams, N. Sethi, A. M. Smith, P. Tolbert, M. C. Vallois, M. Warner, M. Washington, L. Williams, S. Wong

Introduction to the Program

The Feminist, Gender & Sexuality Studies Program (FGSS) is an interdisciplinary program in the College of Arts and Sciences that seeks to deepen our understanding of gender and sexuality. Since its founding in 1972 as Women's Studies, the Program has integrated the study of gender with complex structures of power and inequality including race, sexuality, class, and nation. Over the past several decades, the curriculum has also increasingly broadened its scope theoretically and methodologically to encompass cultural, historical, literary, scientific, and quantitative analysis. Students find that these innovative methods and theories enhance their lifelong personal and intellectual growth, as well as their professional development insofar as they prepare students for future study or work in a wide variety of fields: law, medicine, social policy, art, psychology, literature, and so on.

The Program is built around several assumptions about the study of gender and sexuality. First, understandings of sex, sexuality, and gender are neither universal nor immutable; to study them is to gain a fuller understanding of human behavior, culture and society across times and places as well as to gain a sense of how these social constructions shape us as individuals. Second, gender and sexuality are best understood when examined in relation to one another by learning about women and men of different economic

classes, sexual orientations, and cultural and racial backgrounds. Third, even the most current knowledge derived from the humanities, social sciences and natural sciences is not as impartial, objective, or neutral but instead emerges out of particular historical and political contexts. Students, as a consequence, transfer the critical and analytical skills they acquire in FGSS courses to other courses and activities beyond Cornell.

Program Offerings

Feminist, Gender & Sexuality Studies offers an undergraduate major, an undergraduate concentration, and a graduate minor.

Undergraduate students in the College of Arts and Sciences who wish to major in FGSS may apply directly to the program. Undergraduate students in other colleges at Cornell will need to work out special arrangements and should speak to FGSS's director of undergraduate studies (DUS).

The Undergraduate Major: FGSS

1. Prerequisite courses: Before applying to the major, the student must complete any two FGSS courses with a grade of B- or better. For FGSS courses that are cross-listed with another department, students may register through FGSS or the cross-listing department. Suggested entry-level courses include any FGSS course at the 200 level, especially 201 and 202, both of which are required for completion of the major. FGSS courses at the 200 level or above may count as both prerequisites and as part of the FGSS major. First-year writing seminars may count as prerequisites but not as part of the major.

2. Required course work:

- a. A minimum of 36 credits in FGSS courses with a grade of C- or higher is required for the major. For FGSS courses that are cross-listed, students may register through FGSS or the cross-listing department.
- b. These 36 credits must include the following three courses:
 - FGSS 201 Introduction to FGSS Studies
 - FGSS 202 Introduction to FGSS Theories
 - FGSS 400 Senior Seminar in FGSS Studies
- c. The 36 credits must also include at least one FGSS course with a significant focus on each of the following three categories: (Note: Although a given course may satisfy one, two, or even three of these categories, a given student must take at least two courses to fulfill this requirement):

- LBG studies
- Intersecting structures of oppression: race, ethnicity, and/or class
- Global perspectives: Africa, Asia, Latin America, or Middle East, by itself or in a comparative or transnational framework. Students may choose from the list in the course catalog or at the FGSS office.

A student with a double major may count up to three FGSS courses toward the FGSS major that she/he is simultaneously counting toward a second major.

The Honors Program: To graduate with honors, a student majoring in FGSS must complete a senior thesis under the supervision of an FGSS faculty member and defend that thesis orally before an honors committee. To be eligible, a student must have at least a cumulative 3.0 GPA in all course work and a 3.3 GPA in all courses applying to their FGSS major. Students interested in the honors program should consult the DUS late in the spring semester of their junior year, or very early in the fall semester of their senior year.

The FGSS Concentration

Undergraduate students in any college at Cornell may concentrate in Feminist, Gender, & Sexuality Studies in conjunction with a major defined elsewhere in the university. The concentration consists of five FGSS courses with a grade of C- or higher, through FGSS or the cross-listing department that are completed with a grade of C- or above, none of which may be counted toward the student's non-FGSS major. An exception to this rule may be made for students in the contract colleges, who may petition the FGSS DUS to count one course from their major toward the FGSS concentration. First-year writing seminars may not be included within the five required courses. Students wishing to concentrate in FGSS should see the DUS. The five courses required for the FGSS Undergraduate Concentration must include:

FGSS 201 Introduction to FGSS Studies

FGSS 202 Introduction to FGSS Theories

Any FGSS course that satisfies at least one of the three categories required for a major as defined above.

Any two additional FGSS courses of the student's choice.

The LBG Concentration

FGSS serves as home to the Lesbian, Bisexual & Gay Studies (LBG) Program, which offers an undergraduate concentration as well as a graduate minor. The LBG undergraduate concentration consists of four courses. For a complete listing of all courses that will fulfill this concentration please see the LBG Studies portion of this catalog.

1. First-Year Writing Seminars

FGSS 106(1060) FWS: Women and Writing (also ENGL 105[1060])
Fall and spring. 3 credits. Staff.

2. Courses

FGSS 201(2010) Introduction to Feminist, Gender, and Sexuality Studies (CA-AS)

Fall and spring. 4 credits. Staff.

Feminist, Gender & Sexuality Studies is an interdisciplinary program focused on understanding the impact of gender and sexuality on the world around us and on the power hierarchies that structure it. This course focuses mainly on the experiences, historical conditions, and concerns of women as they are shaped by gender and sexuality both in the present and the past. Students read a variety of texts, personal narratives, historical documents, and cultural criticism across a range of disciplines. In doing so students consider how larger structural systems of both privilege and oppression affect individuals' identities, experiences, and options, and simultaneously examine forms of agency and

action taken by women in the face of these larger systems.

FGSS 202(2020) Introduction to Feminist, Gender, and Sexuality Theories (also VISST 203[2020]) (CA-AS)

Fall. 4 credits. D. Reese.

Introduces students to critical approaches in feminist scholarship to the cultural, socioeconomic, and political situation(s) of women. Particular attention is paid to the conceptual challenges and dangers posed by attempts to study women without taking account of relations between race, class, and gender in ideological and social formations. Readings draw on work in various disciplines and include literary texts and visual images.

[FGSS 209(2090) Seminar in Early American History (also HIST 209[2090], AM ST 209[2090])

[FGSS 475/675(4750/6750) Advanced Undergraduate Seminar in Global Feminisms: Naming "Women" in Globalization]

Spring. 3 credits. D. Reese.
Recent international treaties have designated "trade barrier" as a primary term in legislative negotiations between nation-states. In this course, we will explore the implications of this particular economic form of valuation for larger questions of social justice. How do certain values appear as values, how are they

coded, and how are they read? What of values that are unable to appear under the lens of the term "trade barrier" such as communal property, domestic labor or historical injustice? Can projects for social equality appear within the calculations of global capital? If so, how and under what auspices? How and when are human rights and/or women's rights articulated within this context?

[FGSS 476(4760) Global Women's Literature: (En) Gendering Space (also ENGL 476[4760])]

4 credits. Next offered 2009–2010.
E. DeLoughrey.]

4 credits. Next offered 2008–2009.]

[FGSS 499(4990) Senior Honors Thesis]

Fall and spring. 1–8 credits. Prerequisite: FGSS seniors only. Staff.
To graduate with honors, FGSS majors must complete a senior thesis under the supervision of a FGSS faculty member and defend that thesis orally before an honors committee. To be eligible for honors, students must have at least a cumulative GPA of 3.0 in all course work and a 3.3 average in all courses applying to their FGSS major. Students interested in the honors program should consult the DUS late in the spring semester of their junior year or very early in the fall semester of their senior year.

[FGSS 603(6030) The Question of Feminist and Queer Criticism in Premodern Studies (also ENGL 603[6030])]

Spring. 4 credits. M. Raskolnikov.
For description, see ENGL 603.

[FGSS 604(6040) Passionate Politics: Affect, Protest, Performance (also THETR 606[6060])]

Spring. 4 credits. S. Warner.

GERMAN STUDIES

L. Adelson; D. Bathrick, acting chair (fall); M. Briggs (Dutch); B. Buettner, associate language program director; P. Gilgen, director of graduate studies; A. Groos; P. U. Hohendahl, acting chair (spring); G. Lischke, language program director and director of undergraduate studies; B. Martin; U. Maschke, associate language program director; P. McBride, D. Reese, A. Schwarz; L. Trancik (Swedish); G. Waite, Emeritus; H. Deinert.

The Department of German Studies offers students a wide range of opportunities to explore the literature and culture of German-speaking countries, whether as part of their general education, a major in German Studies, or a double major involving another discipline, or as preparation for graduate school or an international professional career. Courses are offered in German as well as in English; subjects range from medieval to contemporary literature and from film and visual culture to intellectual history, music, history of psychology, and feminist, gender, and sexuality studies.

The course offerings in German begin with GERST 121-122, 123 (introductory language level). Students then continue with intermediate-level courses, which provide further grounding in the language and in German literature and cultural studies. GERST 206 provides instruction for German in the culture of business, leading to certification. On the advanced level (300 level or above), we offer thematically oriented courses that include intensive language work (301, 302, 306, 310); literature and culture study courses in German, including the senior seminar; and seminars of interdisciplinary interest taught in

English. Addressing a broad spectrum of topics in German culture, our courses appeal to German majors and other qualified students alike.

The department's offerings in English begin with a series of first-year writing seminars introducing various aspects of German literature (e.g., the fairy tale and Romantic consciousness or 20th-century writers such as Kafka, Hesse, Mann, Brecht), theorists such as Marx, Nietzsche and Freud, issues in mass culture and modernity, problems of German national identity/ies, and cinema and society. Courses in German and English at the 300 and 400 levels explore such topics as the Faust legend, aesthetics from Kant to Heidegger, city topographies, Freud and his legacy, opera from Mozart to Strauss, the German novel, literature and philosophy, political theory and cinema, the Frankfurt School, migration and globalization, and feminist theory. It may be possible to arrange a German section for courses taught in English, either informally or formally (for credit). Students are encouraged to discuss this possibility with instructors.

Sequence of Courses

Courses in German:

Introductory level: GERST 121-122, after completion, placement into GERST 123 or 200

Intermediate level: GERST 200, 202, 204, and 206

Advanced level: GERST 301, 302, 306, 307, 310, and 410

Courses taught in German that are numbered 300 through 320 focus on intensive language study; courses taught in German that are numbered 321 through 350 focus on studying literature and other forms of cultural expression.

Courses in German or English: further 300- and 400-level literature and culture courses (see course descriptions)

Advanced Standing

Students with an AP score of 4 or better are automatically granted 3 credits in German. Students with an AP score of 4 or better, an LPG score of 65 or higher, or an SAT II score of 690 or higher must take the CASE exam for placement in courses above GERST 200. Students coming to Cornell with advanced standing in German and/or another subject are encouraged to consider a double major and to discuss the options with the director of undergraduate studies as early as possible.

Certificate in German Language Study

The Certificate in German Language Study is issued to recognize substantial language study beyond the GERST 200 level in the Department of German Studies. Students are awarded the certificate after passing three German Studies courses held in German with a grade of B or above. Two of these courses must be at the 300 level or above. No more than two of the three courses can be taken with the S-U option. Applications for the language certificate may be picked up in the Department of German Studies (183 Goldwin Smith Hall) in February.

Internships

The department works with the USA-Interns program to provide summer internships to qualified students with German companies and agencies. Interested students should contact the language program director, Gunhild Lischke (gl15@cornell.edu, G75 Goldwin Smith Hall, 255-0725), early in the fall semester.

The Majors

The department offers two options for the major: German literature and culture, and German area studies. The latter is a more broadly defined sequence that includes work in related disciplines. The course of study in either major is designed to give students proficiency in reading, speaking, and writing in German, to acquaint them with German culture, and to help them develop skills in reading, analyzing, and discussing German texts in relevant disciplines with those goals in mind. The department also encourages study abroad. For both majors, there is a wide variety of courses co-sponsored with other departments (Comparative Literature; Government; History; Music; Theatre, Film, and Dance; Feminist, Gender, and Sexuality Studies).

The department encourages double majors and makes every effort to accommodate prospective majors with a late start in German. Students interested in a major should consult the director of undergraduate studies, Gunhild Lischke, G75 Goldwin Smith Hall.

German (Literature and Culture)

Students in this major select courses from the Department of German Studies and may use them to pursue individual interests in literature, film and visual culture, theater and performing arts, music, intellectual and political history, and gender studies, for example. Please consult with the director of undergraduate studies.

Admission: By the end of their sophomore year, prospective majors should have successfully completed GERST 202, 204, or 206.

To complete the major, a student must:

1. Demonstrate competence in the German language by successful completion of two 300-level courses with intensive language work (GERST 301, 302, 306, 310) or the equivalent.
2. Complete six courses in the Department of German Studies at the 300 level or above. One of these must be GERST 410 Senior Seminar.
3. Select a faculty advisor from the department.

German Area Studies

Students select courses from the Department of German Studies as well as courses with a substantial German component from other departments, such as Comparative Literature; Government; History; Music; Theatre, Film, and Dance; and Feminist, Gender, and Sexuality Studies.

Admission: By the end of their sophomore year, prospective majors should have successfully completed GERST 202, 204, or 206.

To complete the major, a student must:

1. Demonstrate competence in the German language by successful completion of two 300-level courses with intensive language work (GERST 301, 302, 306, 310) or the equivalent.
2. Complete six courses with a substantial German component at the 300 level or above. Three of these must be in the Department of German Studies, including GERST 410 Senior Seminar.
3. Select a committee of one or more faculty advisors to help formulate a coherent program of study. One of the advisors must be from the Department of German Studies.

Honors

Honors in German Studies are awarded for excellence in the major, which includes overall grade point average and completion of the honors thesis. Students are awarded either honors (*cum laude*), high honors (*magna cum laude*), or the highest honors (*summa cum laude*) in the program based on the honors advisors' evaluation of the level and the quality of the work completed toward the honors degree. The honors distinction will be noted on the student's official transcript and will also be indicated on the student's diploma.

Prerequisites for admission. Students must have upperclass standing, an overall GPA of a B or higher, and a GPA of 3.5 or higher in the major. Students must first consult with the director of undergraduate studies in German Studies regarding eligibility for the honors program.

Procedure. Students who wish to be considered for honors ideally should apply to the director of undergraduate studies no later than the second term of the junior year. Students who are off campus in their junior year must apply by the third week of classes in the first semester of their senior year. Students should secure the consent of a faculty member to serve as the director of both the reading course (GERST 453) and the writing of a thesis (GERST 454). With the help of their thesis advisor, students choose an area of special interest and identify at least one other faculty member who is willing to serve on the honors committee. An oral thesis defense concludes the process.

Study Abroad in a German-Speaking Country

The Department of German Studies strongly supports study abroad as an opportunity for students to live and study in the German cultural context. The experience of living abroad promotes enduring personal growth, provides new intellectual perspectives through cultural immersion, and opens up academic and professional opportunities.

Students interested in studying abroad are encouraged to consider the Berlin Consortium, of which Cornell is a member. The program is run in conjunction with the Free University of Berlin and is of very high caliber. Six weeks of an intensive language practicum held at the Berlin Consortium center are followed by one or two semesters of study at the university. Participants enroll in regular courses at the university. Assistance in finding internships between semesters may be available to

students staying for an entire academic year. Four semesters of German language study are prerequisite for participating in the program; ideally the last of these courses should be at the 300 level.

Students interested in this or other study abroad options in Germany, Austria, or Switzerland should consult the language program director, Gunhild Lischke (G75 Goldwin Smith Hall, 255-0725, gl15@cornell.edu).

First-Year Writing Seminars

Consult the John S. Knight Institute brochure for course times, instructors, and descriptions.

Courses Offered in German

GERST 121(1210) Exploring German Contexts I

Fall or spring, 4 credits. Intended for students with no prior experience in German or language placement test (LPG) below 37, or SAT II below 370. G. Lischke, U. Maschke, and staff.

Students develop basic abilities in listening, reading, writing, and speaking German in meaningful contexts through interaction in small group activities. Course materials including videos, short articles, poems, and songs provide students with varied perspectives on German language, culture, and society.

GERST 122(1220) Exploring German Contexts II

Fall or spring, 4 credits. Prerequisite: GERST 121, LPG 37-44, or SAT II 370-450. U. Maschke, G. Lischke, and staff.

Students build on their basic knowledge of German by engaging in intense and more sustained interaction in the language. Students learn more advanced language structures allowing them to express more complex ideas in German. Discussions, videos, and group activities address topics of relevance to the contemporary German-speaking world.

GERST 123(1230) Expanding the German Dossier

Fall or spring, 4 credits. *Successful completion of GERST 121, 122, and 123 satisfies Option 2.* Prerequisite: study of German and LPG 45-55 or SAT II 460-580. Staff.

Students continue to develop their language skills by discussing a variety of cultural topics and themes in the German-speaking world. The focus of the course is on expanding vocabulary, reviewing major grammar topics, developing effective reading strategies, improving listening comprehension, and working on writing skills. Work in small groups increases each student's opportunity to speak in German and provides for greater feedback and individual help.

GERST 200(2000) Germany: Intercultural Context (CA-AS)

Fall or spring, 3 credits. *Satisfies Option 1.* Prerequisite: GERST 123 or LPG 56-64 or SAT II 590-680, or placement by exam. Staff.

Content-based language course on the intermediate level. Students examine important aspects of present-day German culture while expanding and strengthening their reading, writing, and speaking skills in German. Materials for each topic are selected from a variety of sources (fiction, newspapers, magazines, and the Internet). Units address a

variety of topics including studying at a German university, modern literature, Germany online, and Germany at the turn of the century. Oral and written work and individual and group presentations emphasize accurate and idiomatic expression in German. Successful completion of the course enables students to continue with more advanced courses in language, literature, and culture.

GERST 202(2020) Literary Texts and Contexts (LA-AS)

Fall. 3 credits. *Satisfies Option 1.*

Prerequisite: GERST 200 or equivalent or placement exam. Conducted in German. U. Maschke and staff.

Students in this intermediate course read and discuss a number of works belonging to different literary genres by major German-speaking authors such as Kafka, Walser, Brecht, Mann, Frisch, Dürrenmatt, Bachmann, and others. They explore questions of subjectivity and identity in modern society, of human existence as existence in language, and of the representation of history in literary texts. Activities and assignments focus on the development of reading competency in different literary genres, the improvement of writing skills including the accurate use of idiomatic expressions, the expansion of students' German vocabulary, and the systematic review of select topics in German grammar.

GERST 204(2040) Working with Texts (CA-AS)

Fall or spring. 3 credits. *Satisfies Option 1.*

Prerequisite: GERST 200 or placement by exam (placement score and CASE). Staff.

Emphasis is on improving oral and written expression of idiomatic German. Enrichment of vocabulary and appropriate use of language in different conversational contexts and written genres. Material consists of readings in contemporary prose, articles on current events, videos, and group projects. Topics include awareness of culture, dependence of meaning on perspective, interviews with native German speakers, German news broadcasts, reading German newspapers on the Internet.

GERST 206(2060) German in Business Culture (CA-AS)

Spring. 3 credits. *Satisfies Option 1.*

Prerequisite: GERST 200 or placement by examination placement score and CASE.

Students without previous knowledge of business German are welcome. G. Lischke.

Students learn German and understand German business culture at the same time. This German language course examines the German economic structure and its major components: industry, trade unions, the banking system, and the government. Participants learn about the business culture in Germany and how to be effective in a work environment, Germany's role within the European Union, the role of the Bundesbank, the importance of trade and globalization, and current economic issues in Germany. The materials consist of authentic documents from the German business world, TV footage, and a business German textbook. At the end of the course, the external Goethe Institut exam "Deutsch für den Beruf" is offered.

[GERST 301(3010) Scenes of the Crime: German Mystery and Detective Fiction (LA-AS)

Fall. 4 credits. Taught in German. Next offered 2008-2009. P. Gilgen.]

GERST 302(3020) Youth Culture: Adolescence in German Fiction (LA-AS)

Spring. 4 credits. *Satisfies Option 1.*

Prerequisite: GERST 202, 204 or 206 or equivalent or placement exam, permission of instructor. Taught in German. Next offered 2008-2009. B. Buettner.]

GERST 303(3030) Angels and Demons in German Literature (LA-AS)

Spring. 4 credits. Prerequisites: GERST 202, 204, 206 or placement exam. Maximum of 20 students. *Satisfies Option 1.* K. Otto.

This advanced language course focuses, in both the readings and the discussions, on the supposedly contradictory concepts of angels and demons. We will see how they are not only different but also similar. We will have the opportunity to investigate our belief in angels and demons from a variety of perspectives, and to investigate how the terms are used in everyday parlance as opposed to, or in accord with, their original meanings. Taught in German.

GERST 306(3060) German Media (CA-AS)

Fall. 4 credits. Taught in German. *Satisfies Option 1.* Prerequisites: GERST 202, 204 or 206 or equivalent or permission of instructor. U. Maschke.

The course explores the German media landscape through analysis of print, film, and digital media. We will investigate different styles of writing and presentation to unravel culturally specific discourses of communication. Intensive language study will enable the students to develop their own projects in the media of choice.

GERST 321(3210) After the Fires: Divided Germany 1945-1989 (formerly GERST 307) (CA-AS)

Fall. 4 credits. *Satisfies Option 1.*

Prerequisite: GERST 202 or GERST 204 or GERST 220; otherwise, equivalent or permission of instructor. Taught in German. L. Adelson.

Introduction to the history and culture of postwar Germany, the development and unification of the two Germanys, and their societies. The emphasis is on cultural and social institutions as well as political and intellectual debates. Focal topics include responses to the Nazi past, Germany and Europe, protest movements, migration patterns, women, mass media, and popular culture. We will consider the changes taking place in Germany today in light of the recent past. Some films will also be shown.

[GERST 325(3250) The Age of Goethe # (LA-AS)

Fall. 4 credits. *Satisfies Option 1.* Next offered 2008-2009. A. Groos.]

GERST 410(4100) Senior Seminar

Fall. 4 credits. *Satisfies Option 1.* Limited to 15 students. Prerequisites: adequate command of German; any 300-level course taught in German, or equivalent, or permission of instructor. Readings and discussions in German. P. Gilgen.

Topic: Melancholy Writing. Taking its departure from Freud's seminal distinction between mourning and melancholia, this seminar examines whether melancholy writing may be an ethical desideratum. Close readings of literary, philosophical, and psychological texts will guide us in our attempt at defining a melancholy style of writing and its textual effects. Readings may include Freud, Kristeva,

Abraham and Torok, Derrida, Kant, Hegel, Hölderlin, Heine, Conrad, Trakl, Benjamin, Kafka, Wittgenstein, Celan, Grass, and Sebald.

GERST 418(4180) New German Literature: After the Wall (LA-AS)

Spring. 4 credits. *Satisfies Option 1.*

Prerequisite: Any 300-level course taught in German, or equivalent, or permission of instructor. Required readings and discussion in German. L. Adelson.

Since the Berlin Wall came crumbling down in 1989, contemporary trends in German literature have often been celebrated as new or even unprecedented. This writing is at times associated with a turn away from weighty preoccupations with historical responsibility that had characterized much German literature in the wake of World War II and the Holocaust. At other times the contemporary preoccupation with "newness" is seen as a marketing phenomenon in the competitive world of international publishing, especially after the collapse of communism in Europe. Given that literary developments in German over the last sixty years have repeatedly been hailed as marking some type of "new beginning," this course explores the interplay of innovation and continuity in German literature written since the end of the cold war. Paradoxically, national unification and transnational phenomena have all loomed large on the cultural horizons of a changing readership in this time. Introducing students to representative texts of this new period in German literary history, the course also invites students to consider how stylistic features of contemporary literature engage the problematics of innovation. Rather than merely relying on journalists' categories for describing the literature at hand (for example, "Wenderoman," "Fräuleinwunder," "neues Erzählen," or even "pop"), this course brings renewed curiosity to literary trends most often celebrated for being "new." The course emphasizes prose writing, but some poetry, theater, and other media will also be considered. Focal readings include selected works by authors such as Christa Wolf, Thomas Brussig, Botho Strauß, Ingo Schulze, W.G. Sebald, Christian Kracht, Karen Duve, Judith Hermann, Anne Duden, Hans-Ulrich Treichel, Marcel Beyer, Bernhard Schlink, Doron Rabinovici, Irene Dische, Elfriede Jelinek, E. S. Ozdamar, Zafer Senocak, Feridun Zaimoglu, Berkan Karpat, José Oliver, Herta Müller, Terézia Mora, Yoko Tawada, Günter Grass, Uwe Timm, Christoph Hein, and others.

GERST 419(4190) Vienna 1900 and the Challenge of Modernity

Spring. 4 credits. *Satisfies Option 1.*

Prerequisite: any GERST 300-350 course or equivalent advanced intermediate knowledge of German. Taught in German. P. McBride.

This course focuses on the culture of turn-of-the-century Vienna as a laboratory for ideas and practices formulated in response to the challenges of modernization in Western and Central Europe. In particular, we will explore the innovative experiments that transformed literature and the visual arts between 1880 and 1914; the impact that Freudian psychoanalysis and pre-Freudian psychological theories had on 19th-century notions of subjectivity, language, and morality (as well as their contribution in spurring innovative modes of writing and representation); and the ways in which Vienna's public and private spaces became the site of conflicting views of

modernity in the visions of contemporary architects, urban planners, and interior designers. Possible texts include works by Musil, Loos, Canetti, Salomé, Mayreder, Weininger, Hofmannsthal, Kraus, Kafka, Rilke, Schnitzler, Andrian, Otto Wagner, Freud, Mauthner, Mach, Kokoschka, Klimt, Wittgenstein.

[GERST 442(4420) Changing Worlds: Migration, Minorities, and German Literature (LA-AS)]
4 credits. *Satisfies Option 1.* Next offered 2008–2009. L. Adelson.]

[GERST 443(4430) Love as Fiction. German Novellas from Three Centuries]
Spring. 4 credits. *Satisfies Option 1.* Conducted in German. Prerequisite: any course at 300 level taught in German or equivalent or permission of instructor. Readings and discussions in German. Next offered 2009–2010. A. Schwarz.]

Courses conducted in English

It may be possible to arrange a German section for courses conducted in English, either informally or formally (for credit). Students are encouraged to discuss this possibility with instructors.

[GERST 353(3530) 19th- and 20th-century European Philosophy (also PHIL 217[2170]) (KCM-AS)]
Spring. 4 credits. M. Kosch.

Survey of philosophy on the continent after Kant. Figures covered include Hegel, Marx, Nietzsche, Weber, Freud, Husserl, Heidegger, Lukacs, Horkheimer, Adorno, Habermas, and Foucault.

[GERST 355(3550) Political Theory and Cinema (formerly GERST 330) (also COM L 330[3300], FILM 329[3290], GOVT 370[3705]) (CA-AS)]
Spring. 4 credits. G. Waite.

This is an introduction to fundamental problems of contemporary political and cultural theory, filmmaking, and film analysis, along with their interrelationships. A particular focus is on comparing European and alternative cinema to Hollywood in terms of Marxist, feminist, psychoanalytic, postmodernist, and postcolonial types of interpretation. Explicitly political cinema is compared to more subtle, subliminal types of ideological transmission. Filmmakers/theorists may include: D. Cronenberg, T. Conley, M. Curtiz, K. Bigelow, G. Deleuze, R. Fassbinder, J. Ford, J.-L. Godard, M. Gorris, W. Herzog, A. Hitchcock, A. & A. Hughes, S. Kubrick, F. Jameson, P.-P. Pasolini, G. Pontecorvo, R. Ray, M. Scorsese, R. Scott, O. Stone, G. Romero, S. Shaviro, K. Tahimik, M. Viano, S. Zizek. This is a lecture course but there will be plenty of time for discussion. There are no prerequisites.

[GERST 360(3600) Words and Music (also MUSIC 272[2245]) # (LA-AS)]
Formerly GERST 342. Next offered 2008–2009. A. Groos.]

[GERST 374(3740) Opera and Culture (also MUSIC 374[3222]) # (LA-AS)]
Next offered 2008–2009. A. Groos.]

[GERST 377(3770) The Art of the Historical Avant-Garde (also ART H 372[3672], VISST 372[3672], ROM S 377[3770], COM L 384[3840]) (LA-AS)]
Fall. 4 credits. P. McBride.

At the height of modernism (1910–1930), avant-garde artists and intellectuals began arguing that art could be employed to “reconstruct the universe,” as one Futurist manifesto put it. They joined forces with the most radical political movements of their day and created innovative artistic practices—ranging from collage, montage, and the found object to the installation and the happening—that continue to shape our perception of art and popular culture. This course will focus on strategies for politicizing art as well as formulating a new relation between high and popular culture in Germany, Italy, and France in the first half of the 20th century. Our investigation of avant-garde art will include original documents of Italian Futurism, Expressionism, Dada, and Surrealism.

Advanced Undergraduate and Graduate Courses

[GERST 405(4050) Introduction to Medieval German Literature I # (LA-AS)]
Fall. 4 credits. Prerequisite: reading knowledge of German. Next offered 2009–2010. A. Groos.]

[GERST 406(4060) Introduction to Medieval German Literature II # (LA-AS)]
Spring. 4 credits. Prerequisite: GERST 405 or equivalent or permission of instructor. Anchor course for the medieval period. Next offered 2009–2010. A. Groos.]

[GERST 407(4070) Teaching German as a Foreign Language]
Fall. 4 credits. G. Lischke.

Designed to familiarize students with current ways of thinking in the field of applied linguistics and language pedagogy. Introduces different concepts of foreign language methodology as well as presents and discusses various techniques as they can be implemented in the foreign language classroom. Special consideration is given to topics such as planning syllabi, writing classroom tests, and evaluating students' performance. Participants conduct an action research project.

[GERST 415(4150) Marx, Freud, Nietzsche (also COM L 425[4250]) # (CA-AS)]
Fall. 4 credits. There are no prerequisites. G. Waite.

This is an introduction to the three “master thinkers” who have helped determine the discourses of modernity and post-modernity. We consider basic aspects of their work: (a) specific critical and historical analyses; (b) theoretical and methodological writings; (c) programs and manifestos; and (d) styles of argumentation, documentation, and persuasion. This also entails an introduction, for non-specialists, to essential problems of political economy, continental philosophy, psychology, and literary and cultural criticism. Second, we compare the underlying assumptions and the interpretive yields of the various disciplines and practices founded by Marx, Nietzsche, and Freud: historical materialism and communism, existentialism and power-knowledge analysis, and psychoanalysis, respectively. We also consider how these three writers have been fused into a single constellation, “Marx-Nietzsche-Freud,” and how they have been interpreted by

others, including L. Althusser, A. Badiou, A. Camus, H. Cixous, G. Deleuze, J. Derrida, M. Foucault, H.-G. Gadamer, M. Heidegger, L. Irigaray, K. Karatani, J. Lacan, P. Ricoeur, L. Strauss, S. Zizek. This is a lecture course but there will be plenty of time for discussion.

[GERST 417(4170) Topics In German Philosophy (also PHIL 417[4170])]
Fall. 4 credits. M. Kosch.
Topic: German Idealism—Fichte, Schelling, Hegel.

[GERST 420(4200) Faust: Close Reading (LA-AS)]
Fall. 4 credits. Conducted in English. Next offered 2009–2010. G. Waite.]

[GERST 424(4240) The Totalitarian Order: Vision and Critique (also GOVT 425[4255]) (CA-AS)]
Fall. 4 credits. Next offered 2008–2009. P. U. Hohendahl.]

[GERST 426(4260) The Animal (also COM L 424[4240], ENGL 426[4260]) (CA-AS)]
Spring. 4 credits. P. Gilgen.

In recent years literary representations and philosophical discussions of the status of the animal vis-à-vis the human have abounded. In this course, we will track the literary phenomenology of animality. In addition we will read philosophical texts that deal with the questions of animal rights and of the metaphysical implications of the “animal.” Readings may include, among others, Agamben, Aristotle, Berger, the Bible, Calvino, Coetzee, Darwin, Derrida, Descartes, Donhauser, Gorey, Haraway, Hegel, Heidegger, Herzog, Kafka, Kant, La Mettrie, de Mandeville, Montaigne, Nietzsche, Ozeki, Rilke, Schopenhauer, Singer, Sorabji, Sterchi, Stevens, de Waal, Wittgenstein, Wolfe. A reading knowledge of German and French would be helpful.

[GERST 428(4280) Genius and Madness In German Literature (LA-AS)]
Next offered 2009–2010. Offered as GERST 225 in Summer 2007 and 2008 to introduce students to German literature in a course surveying several centuries. Summer course will not count toward the German major requirements. A. Schwarz.]

[GERST 433(4330) History of Modern Jewry (also HIST 433[4330]) (HA-AS)]
Fall. 4 credits. Limited to 15 students. Next offered 2009–2010. V. Caron.]

[GERST 441(4410) Introduction to Germanic Linguistics (also LING 441[4441]) (HA-AS)]
Next offered 2008–2009. W. Harbert.
For description, see LING 441.]

[GERST 451–452(4510–4520) Independent Study]
451, fall; 452, spring. 1–4 credits each semester. Prerequisite: permission of instructor.

[GERST 453(4530) Honors Research]
Fall. Staff.

[GERST 454(4540) Honors Thesis]
Spring. 8 credits. Prerequisite: GERST 453. Staff.

[GERST 457(4570) Imagining the Holocaust (also COM L 483[4830], ENGL 458[4580], JWST 458[4580]) (LA-AS)]
Spring. 4 credits. D. Schwartz.
For description, see ENGL 458.

[GERST 496(4960) Theorizing the Public Sphere

Next offered 2008–2009. P. U. Hohendahl.]

Graduate Courses

Note: For complete descriptions of courses numbered 600 or above consult the appropriate instructor.

[GERST 615(6150) Jews in German Culture Since 1945

Next offered 2008–2009. L. Adelson.]

[GERST 616(6160) Spaces of Literature

Next offered 2008–2009. A. Schwarz.]

GERST 618(6180) The Science of the Experience of Consciousness: Hegel's Phenomenology of Spirit (and Beyond) (also COM L 618[6180])

Fall. 4 credits. P. Gilgen.

Centered on a close reading of the *Phenomenology of Spirit*, this course examines its problematic position vis-à-vis Hegel's subsequent system of philosophy. Intended as a ladder that would lead up to philosophical knowledge, the *Phenomenology* is and, at the same time, is not (yet) philosophy. This undecided position of the text is reflected in the text, and it poses the question of the possibility, the status, and the options of philosophy after the *Phenomenology* (which then leads to the question whether such philosophy would or would not coincide with philosophy after Hegel). The examination of three prominent constellations in the reception history of the *Phenomenology* will, on the one hand, address contemporary theory's vast debt to Hegel (primarily to the *Phenomenology*) and will, on the other hand, lead us back to the primary text by forcing repeated re-examination of its philosophical arguments as well as its textual structure. We will begin this examination by tracing the aftermath of the *Phenomenology* in post-Hegelian German thought (especially in the works of "Left-Hegelians" such as Feuerbach and Marx, among others). In a second stage, we will focus on the intense reception of Hegel—for the most part the Hegel of the *Phenomenology*—in France during the years immediately preceding and following World War II, especially Jean Hyppolite's seminal commentary and Alexandre Kojève's influential lectures, published as *Introduction to the Reading of Hegel*. Finally, the presence of the *Phenomenology* in contemporary theory will be addressed in readings that may include Francis Fukuyama, Jacques Derrida, Judith Butler, John Sallis, and Donald Phillip Verene.

[GERST 620(6200) Faust: Close Reading (also GERST 420[4200])

Fall. 4 credits. Limited to 15 students. Next offered 2009–2010. G. Waite.]

GERST 622(6220) Cultural Pessimism and the Fin-de-Siècle

Fall. 4 credits. P. McBride.

In the final decades of the 19th century, the aesthetic experiments of naturalism, impressionism, and symbolism all flourished amidst narratives of sickness, decline, and doom. Thinkers like Nietzsche, Simmel, and Weber pointed to the realm of culture as both the product of and a possible antidote to this quintessentially modern crisis. The discourse of cultural pessimism seized on this diagnosis to invest art and culture with a twofold function. On the one hand, they display most graphically the corruption and decay of modern societies; on the other, they promise a

final site of salvation from the illnesses of the social body: materialism, rationalization, mechanization, depersonalization, secularization. This course will focus on the discourses of cultural decline and redemption articulated in German-speaking culture between the 1870s and the 1920s within a variety of domains (literature, philosophy, sociology, and psychology, among others). Topics we will examine include the chauvinistic discourse of *völkisch* nationalism since the 1880s; the relation between scientific and philosophical knowledge; the collapse of the notion of the "self" and its impact on the enterprise of literature; conceptualizations of modernity, society, and rationality; and the heated debates on gender as the primary battle ground for cultural conflict at the turn of the century. In the final part of the course we will examine the ways in which cultural-pessimistic themes have resurfaced in contemporary debates on the clash of civilizations that will presumably shape a post-Cold War era destabilized by economic globalization and a new geo-political order.

[GERST 627(6270) Baroque

Fall. 4 credits. Anchor course. Conducted in English. Next offered 2008–2009. G. Waite.]

GERST 630(6300) Classicism and Idealism

Spring. 4 credits. D. Reese. Texts in German. Anchor course.

An introduction to some of the major poetic and philosophical texts generally considered to be part of the period of German Classicism (1785–1805), while at the same time giving reasons to call into question notions of periodization and the canon, particularly as they have excluded women and lower social classes. In addition to the basic problem of the appropriation of classic antiquity at a time marked by the transition to bourgeois modernity, special consideration will be given to the emergence of modern aesthetic theory. Attention will also be given to the gender of *Bildung* and the workings of emergent notions of "culture" in the texts. Readings will be taken from the works of Goethe, Herder, Humboldt, Kant, Moritz, and Schiller among others. While the main focus of the seminar will be on primary texts, we will also consider contemporary criticism of the concept of Classicism and its problems.

GERST 631–632(6310–6320) Reading Academic German I and II

631, fall; 632, spring. 3 credits each semester. Prerequisites: graduate standing; for GERST 632, GERST 631 or equivalent. Staff.

Intended primarily for beginners with little or no previous German knowledge. Emphasis in 631 on acquiring basic German reading skills. Emphasis in 632 on development of the specialized vocabulary of student's field of study.

GERST 634(6340) German Romanticism

Spring. 4 credits. Most readings in German (though some translations exist); discussion and papers in English. This is a German Department anchor course, but students from other disciplines are welcome. G. Waite.

This graduate seminar introduces some major topics and texts in German literature, art, criticism, political thought, and philosophy from c. 1789 to ca. 1830 in two basic contexts: Europe between two revolutions and in

subsequent critical theory. The latter may include Marxists (on "the German ideology" and "flight from reality"), Freudians (on "the uncanny"), Balibar (on "the internal border" in Fichte), Heidegger (on "the other beginning" in Hölderlin), Adorno (on "parataxis" also in Hölderlin), de Man (on "the rhetoric of romanticism"), Lacoue-Labarthe & Nancy (on "the literary absolute," following Walter Benjamin), and Deleuze & Guattari (on "the war machine" in Kleist). But the primary focus will be on the close reading of texts, especially literary.

[GERST 636(6360) Kleist and Kafka: Prose Works

Spring. 4 credits. Next offered 2008–2009. D. Reese.]

[GERST 637(6370) 19th-Century Fiction: The Realist Project

Next offered 2008–2009. A. Schwarz.]

[GERST 638(6380) Readings of Recollection (also COM L 601[6010])

Fall. 4 credits. P. Gilgen. Next offered 2009–2010.]

[GERST 639(6390) Walter Benjamin: Constellations of Thought

Spring. 4 credits. Texts in English and German. Discussions in English. Next offered 2009–2010. A. Schwarz.]

[GERST 647(6470) German Literature from 1949 to 1989

Fall. 4 credits. Prerequisite: reading knowledge of German. Next offered 2009–2010. D. Bathrick.]

GERST 650(6500) Culture in the Weimar Period

Fall. 4 credits. D. Bathrick. Prerequisite: reading knowledge of German. Anchor course.

This survey course will treat major developments in the area of German culture (literature, cinema, painting) between 1900 and 1933. Individual representative texts will be studied and discussed in their relation to the cultural, political and social contexts out of which they emerge. Lectures and discussions will focus both on detailed interpretation of individual works as well as on the general historical background and developments of the period.

[GERST 653(6530) Opera

Next offered 2008–2009. A. Groos.]

GERST 655(6550) German 20th-Century Poetry

Fall. 4 credits. Not a full semester course. Course will run October 1 to November 30. W. Emmerich.

This course will focus on three major modern poets of the 20th century (Bertolt Brecht, Gottfried Benn and Paul Celan) in light of the following concerns: A contextualization of each poet within the cultural and aesthetic landscape of 20th-century literary movements in Germany and Europe; a concentrated focus on developing a close reading of individual poem in order to help students develop an interpretive methodology.

[GERST 658(6580) Old High German, Old Saxon (also LING 646[646])

Spring. 4 credits. Next offered 2009–2010. W. Harbert.]

GERST 662(6620) Reassembling Culture: Montage and Collage in Weimar Germany

Spring. 4 credits. P. McBride.

This course will explore montage practices that gained currency in literature and the arts in Weimar Germany and signaled a shift from a literary culture predicated on the predominance of writing and the print media to a visual culture made possible by new technologies. The course will pursue two interlocking objectives. On the one hand, we will examine montage and collage as labels encompassing disparate practices of combining, layering, and juxtaposing that destabilized the boundaries of traditional art forms. On the other hand, we will probe the hypothesis that montage at this historical juncture also denoted a principle for forging individual identity in a post-humanist culture, a principle that facilitated the negotiation of irreconcilable political, ethical, and artistic demands. In scrutinizing the media contamination that montage and collage enact, we will interrogate modernist theories of (aesthetic) signification, representation, and performance in view of the challenges they posed for established relations between the visual and the verbal, realism and abstraction, "high" art and mass culture. Possible texts include works by Döbblin, Schwitters, Höch, Hausmann, Mann, Brecht, Benjamin, Heartfield, Eisenstein, Vertov, Lissitzky, Tzara, Serner, Keun, Adorno, Duchamp, and Hans Richter.

GERST 663(6630) Nietzsche and Heidegger (also COM L 663[6630])

Fall. 4 credits. G. Waite.

This graduate seminar provides a basic introduction to the thinking of Nietzsche and Heidegger, and to the latter's interpretation and appropriation of the former. A major concern is the articulation of philosophy and politics, particularly in the case of Heidegger. We are also interested in the types of argumentation and styles of writing of both thinkers, including in light of the hypothesis that they were working in the ancient tradition of prudent exotericism, viz. that they never wrote exactly what they thought and that they intended their influence to come slightly beneath the level of conscious apprehension. We also consider their impact on the long list of intellectuals across the "Left-Center-Right" spectrum, including (depending on seminar-participant interest): Adorno, Agamben, Bataille, Badiou, Bourdieu, Butler, Derrida, Deleuze, Foucault, Gadamer, Irigaray, Klossowski, Löwith, Marcuse, Rorty, Leo Strauss, Vattimo, Zupancic. The readings are provided in German (and French or Italian in some cases) and in English translations, when these exist. Discussion and papers in English. Students from all disciplines are welcome.

GERST 668(6680) Literature and the Uncanny

Next offered 2008–2009. A. Schwarz.]

[GERST 671(6710) Postcolonial Theory and German Studies

Next offered 2008–2009. L. Adelson.]

[GERST 689(6890) The Aesthetic Theory of Adorno (also COM L 689[6890])

Fall. 4 credits. Next offered 2008–2009. P. U. Hohendahl.]

[GERST 696(6960) Conceptualizing Cultural Contact

Next offered 2009–2010. L. Adelson.]

GERST 753–754(7530–7540) Tutorial in German Literature

Fall and spring. 1–4 credits each semester. Prerequisite: permission of instructor.

Dutch**DUTCH 121–122(1210–1220) Elementary Dutch**

121, fall; 122, spring. 4 credits each semester. Prerequisite: permission of instructor. M. Briggs.

Intensive practice in listening, speaking, reading, and writing basic Dutch in meaningful contexts. The course also offers insight into Dutch language, culture, and society.

DUTCH 203(2030) Intermediate Composition and Conversation

Fall. 3 credits. *Satisfies Option 1.*

Prerequisite: DUTCH 122 or permission of instructor. Offered in Dutch. M. Briggs.

Improved control of Dutch grammatical structures and vocabulary through guided conversation, discussions, compositions, reading, and film, drawing on all Dutch-speaking cultures.

DUTCH 300(3000) Directed Studies

Spring. 1–4 credits, variable. Prerequisite: permission of instructor. Conducted in Dutch. M. Briggs.

Individualized advanced Dutch studies. Provides students with individualized programs which can be anything from advanced mastery in any or all skills to the mastery of Dutch for research, literature, and history in support of all disciplines.

Swedish**SWED 121–122(1210–1220) Elementary Swedish**

121, fall; 122, spring. 4 credits each semester. Prerequisite: for SWED 122, SWED 121 or equivalent. L. Trancik.

Students develop abilities in listening, speaking, reading, and writing within Sweden's cultural context. Work on the Internet, interactive computer programs, and a virtual textbook are used in these courses.

SWED 203(2030) Intermediate Swedish

Fall. 3 credits. *Satisfies Option 1.*

Prerequisite: SWED 122 or permission of instructor. L. Trancik.

Intermediate to advanced-level instruction using audiovisual material and text to enhance language comprehension.

SWED 300(3000) Directed Studies

Fall. 1–4 credits, variable. Prerequisite: permission of instructor. Times TBA with instructor. L. Trancik.

Taught on a specialized basis to address particular student needs.

GOVERNMENT

V. Bunce, chair; C. Way, director of graduate studies; A. Carlson, director of undergraduate studies; C. Anderson, R. Bense, S. Buck-Morss, P. Enns, M. Evangelista, J. Frank, L. Frasure, M. Gallagher, B. Hendrix, R. Herring, M. Jones-Correa, M. Katzenstein, P. Katzenstein, J. Kirshner, I. Kramnick, T. J. Lowi, S. Martin, L. Maxwell, D. Moehler, D. Patel, K. Roberts, D. Rubenstein, E. Sanders, M. Sheffer, A. M. Smith, S. G. Tarrow, N. T. Uphoff, N. van de Walle, H. Zimmermann.

Web site: falcon.arts.cornell.edu/GOvt

"Government" is what Cornell calls a department that elsewhere might be termed political science. The focus of this discipline is power applied to public purposes. Some faculty concentrate on purposes, some on applications. Some engage in the close reading of great texts of political philosophy, while others analyze the behavior of power-wielders and publics in this and other societies. Government is divided into four subfields: U.S. politics, comparative politics (other nations), political theory (philosophy), and international relations (transactions between nations).

The Major

To be admitted to the major. a student must pass two Cornell government courses.

To complete the major, a student must:

1. pass two of the introductory government courses (GOVT 111, 131, 161, 181);
2. pass an additional course in one of the remaining subfields (American government, comparative government, political theory, or international relations). This course may be any course offered in the government department, including introductory courses, upper-level courses or seminars but must be a minimum of 3 credits. Students are strongly advised to take at least one course in each of the four subfields;
3. accumulate an additional 28 credits of government course work at the 300 level or above;
4. complete at least one seminar-style course in government that may be applied toward the 28 credits. These courses include those numbered 400.XX to which students are admitted by application only; or other 400-level GOVT courses in which no more than 15 students are enrolled.
5. accumulate 11 credits in upper-level courses in related fields (e.g., anthropology, economics, history, science and technology studies, psychology, and sociology). Upper-level courses are usually courses numbered at the 300 level or above (200-level courses are not considered upper-level). Students should consult with their major advisor to choose appropriate courses. All choices of related courses must be approved by the major advisor or the director of undergraduate studies;
6. all courses used to fulfill a government major must be passed with a letter grade. No S-U grades accepted.

To summarize, a total of 10 government courses and three additional courses (11 credits) of upper-level related courses are required to complete the major. For more information about the government major, please visit our web site: <http://falcon.arts.cornell.edu/Govt>.

Cornell in Washington Program.

Government majors may apply to the Cornell in Washington program to take courses and undertake a closely supervised externship during a fall or spring semester.

European Studies Concentration.

Government majors may elect to group some of their required and optional courses in the area of European studies, drawing from a wide variety of courses in relevant departments. Students are invited to consult Professors P. Katzenstein and S. G. Tarrow for advice on course selection and foreign study programs.

Model European Community Simulation.

Undergraduates with an interest in the European Union, public affairs, or debating may participate in an annual European Union simulation held, on an alternating basis, in April at SUNY Brockport or in January in Brussels. The simulation provides an opportunity for participants, representing politicians from the members states, to discuss issues and resolutions of current concern to the European Union.

To prepare for the simulation, a 2-credit course is offered by the Department of Government each year (GOVT 431 or 432). Participation in the simulation is open only to those who register for this course. Anyone interested in participating or finding out more information should contact the Institute for European Studies at 120 Uris Hall, 255-7592.

International Relations Concentration. See the description under "Special Programs and Interdisciplinary Studies."

Honors. Application to the honors program is made in the early spring of the second semester of a student's junior year. For more information about the honors program and an application form, please visit falcon.arts.cornell.edu/Govt.

First-Year Writing Seminars. Consult the John S. Knight Institute brochure for times, instructors, and descriptions.

Major Seminars. Fall or spring. 4 credits. These seminars, emphasizing important controversies in the discipline, cap the majors' experience. Thus preference in admission is given to majors over nonmajors and seniors over juniors. Topics and instructors change each semester. For more information, please visit "Guide to the Undergraduate Major in Government" on falcon.arts.cornell.edu/GOV/ugrad_brochure.html#seminars.

Course Subfields. Courses in the Department of Government are broken down into four subfields: American government, political theory, international relations, and comparative government. To determine in which category (or subfield) the following courses fall, please note the two-letter reference at the end of the descriptions. The key is as follows: AM = American, PT = theory, IR = international relations, and CO = comparative.

GOVT 111(1111) Introduction to American Government and Politics (SBA-AS)

Fall and summer. 3 credits. T. Lowi.

Introduction to government through the American experience. Concentrates on analysis of the institutions of government and politics as mechanisms of social control. (AM)

GOVT 131(1313) Introduction to Comparative Government and Politics (SBA-AS)

Spring and summer. 3 credits. K. Roberts. Provides a survey of the institutions, political processes, and policies of contemporary states. Focuses on the conditions for and workings of democracy. Looking at Western Europe, students analyze institutional variations among liberal democracies, and their political implications. Then they probe the origins of democracy in Western societies and the reasons why communism and other forms of authoritarian rule have prevailed elsewhere. Finally, they explore the impetus behind and the obstacles to democratization in the Third World and the erstwhile Communist Bloc. Throughout this survey, problems of democracy are related to problems of economic development, efficiency, and equality. (CO)

GOVT 161(1615) Introduction to Political Philosophy # (HA-AS)

Spring. 3 credits. I. Kramnick. Survey of the development of Western political theory from Plato to the present. Readings from the works of the major theorists. Examination of the relevance of their ideas to contemporary politics. (PT)

GOVT 181(1817) Introduction to International Relations (SBA-AS)

Fall and summer. 3 credits. J. Kirshner. Introduction to the basic concepts and practice of international politics. (IR)

GOVT 182(1827) WIM Section: Introduction to International Relations

Fall. 1 credit. Prerequisite: permission of instructor; GOVT 181. Staff. Special, writing-intensive section of GOVT 181, designed to provide a small number of students the opportunity to practice and improve their writing skills as they learn about world politics. Students complete a series of papers and are expected to take an active part in class discussion. (IR)

GOVT 222(2225) Controversies About Equality (also SOC 222[2220], D SOC/PAM/ILROB 222[2220], PHIL 195[1905]) (SBA-AS)

Fall. 4 credits. S. Morgan. For description, see SOC 222.

GOVT 248(2485) Ethics and International Relations (also PHIL 248[2480]) (KCM-AS)

Spring. 4 credits. R. Miller. For description, see PHIL 248. (PT)

GOVT 274(2747) History of Modern Middle East in 19-20th Cent. # @ (HA-AS)

For description, see NES 274.

GOVT 282(2827) China and the World (also CAPS 282[2827]) @ (CA-AS)

Spring. 3 credits. A. Carlson. Study of the dramatic rise of China through reviewing major developments in contemporary Chinese foreign policy since the establishment of the People's Republic of China (PRC), and concentrating more specifically on major developments in Chinese foreign policy during the 1980s and 1990s. Such a wide-ranging survey of Chinese foreign policy involves not

only a consideration of the evolution of China's relations with its major bilateral partners but also an investigation of how China has defined its broader relationship with the international system. In addition, students are asked to consider which causal factors have been of primary importance in motivating Chinese behavior. (IR)

GOVT 294(2947) Global Thinking @ (KCM-AS)

Fall. 4 credits. H. Shue. Existing nation-states face many challenges that cross their borders, including environmental degradation, international terrorism, and global market forces. This course considers the possibility and desirability of a world government. Students evaluate the practical achievability of different world-level political structures, paying particular attention to contemporary theories of international relations, and to related questions of social-scientific evidence. Students also evaluate the ethical status of potential world-level political structures, evaluating the normative value of existing states compared to the likely dangers and benefits of several visions of world government. (IR)

[GOVT 302(3021) Social Movements in American Politics (also AM ST 302[3021]) (HA-AS)]

Fall. 4 credits. Next offered 2008-2009. E. Sanders.

Analyzing a variety of movements from the late 19th century to the present, this course seeks answers to the following questions: What social and political conditions gave rise to these movements? What determined success or failure (and how should those terms be defined)? How do social movements affect political processes and institutions (and vice versa)? What is their legacy in politics and in patterns of social interaction? The major movements analyzed are populism; progressivism; labor; socialism; women's suffrage, the contemporary gender equality movement; protest movements of the 1930s; civil rights; SDS and antiwar movements of the 1960s; environmentalism; the 1980s anti-nuclear (weapons) movement; gay rights; and the new religious right. Some theoretical works are used, but most of the theoretical explorations are derived inductively, from studies of actual movements and the difficulties they faced. (AM)

[GOVT 303(3031) Imagining America (also AM ST 326[3031], COM L 341[3410], FRLIT 324[3240]) (CA-AS)]

Fall. 4 credits. Next offered 2008-2009. D. Rubenstein.

For description, see AM ST 326.]

[GOVT 304(3043) Sex, Power, and Politics (also FGSS 304[3040]) (SBA-AS)]

Spring. 4 credits. Next offered 2008-2009. S. Martin.]

[GOVT 306(3063) Society and Party Politics (also SOC 307[3070]) (SBA-AS)]

Spring. 4 credits. Next offered 2008-2009. S. Van Morgan.

For description, see SOC 307.]

GOVT 307(3071) Introduction to Public Policy

Summer. 4 credits. S. Jackson. Public policy is shaped by many forces. This course will enhance your ability to understand

those forces and the policies that they produce. It will provide you with tools for thinking about, assessing, and evaluating those policies. And it will introduce you to the substantive core of several major issues in America today. The course will have three segments. In the first, we will examine the relevant institutions, interests, and ideologies which operate in the policy arena and the debates about the impact of these forces which engage students of the policy process. In the second, we will consider two different lenses through which we might peer to evaluate policies. In the third, we will discuss the main lines of debate in contemporary American politics concerning four substantive issues: crime and punishment, education, the economy and foreign trade, and foreign policy. The course will meet four days a week for one hour. Based on assigned readings, the class sessions will mix lectures, discussions, group activities, and guest speakers.

GOVT 309(3091) Science in the American Polity (also AM ST 389[3911], S&T 391[3911]) (SBA-AS)

Spring. 4 credits. Next offered 2008–2009. J. Reppy.
For description, see S&T 391.]

GOVT 311(3111) Urban Politics (also AM ST 311[3111]) (SBA-AS)

Fall. 4 credits. M. Shefter.
The major political actors, institutions, and political styles in large American cities: mayors, city councils, bureaucracies, ethnic and racial minorities, urban machine politics and the municipal reform movement. The implications of these political forces for policies pertaining to urban poverty, homelessness, and criminal justice.

GOVT 312(3128) America's Changing Faces (also AM ST 301[3121])

Summer. 2 credits. Offered in Cornell in Washington Summer Program. S. Jackson.
A new generation of leaders has emerged in America's political, economic, educational and cultural institutions. Those leaders employ and explore in their work modern communications technologies such as the Internet. Thereby, they are changing both what is done, and how things are done in the respective life spheres. This course explores the resulting changes in the nature of American life and asks questions about the interactions among the different realms of life. (AM)

GOVT 313(3131) The Nature, Functions, and Limits of Law (CA-AS)

Spring. 4 credits. Prerequisite: undergraduate standing. A. Riles.
General education course for students at the sophomore and higher levels. Law is presented not as a body of rules but as a set of varied techniques for resolving conflicts and dealing with social problems. The roles of courts, legislatures, and administrative agencies in the legal process is analyzed, considering also the constitutional limits on their power and practical limits of their effectiveness. Assigned readings consist mainly of judicial and administrative decisions, statutes and rules, and commentaries on the legal process. Students are expected to read assigned materials before each class and to be prepared for participation in class discussion. (AM)

GOVT 314(3141) Prisons (also AM ST 315[3141]) (SBA-AS)

Fall. 4 credits. M. Katzenstein.

This seminar will look at the politics of incarceration. Why is prison construction a growth industry? What is the role of public policy and of the law in this process of prison expansion? How does race and racism in American society figure in this? Are women's prisons designed to respond to the needs of a "generic-male" prisoner or are they organized around women's needs? Are there "spaces" within the prison (educational programs, libraries, chaplain's offices) that alleviate the grim realities of prison life? We will devote a section of the course to reading about and discussing different forms of political activism on behalf of prison reform. Seminar members should plan on an occasional extra class time, likely to be Wednesday or Thursday evenings, to hear guest speakers and see films. (AM)

[GOVT 316(3161) The American Presidency (SBA-AS)]

Spring. 4 credits. Next offered 2009–2010. E. Sanders.]

GOVT 318(3181) U.S. Congress (also AM ST 319[3181]) (SBA-AS)

Spring. 4 credits. M. Shefter.
The role of Congress in the American political system. Topics include: the political setting within which Congress operates, the structure of Congress, the salient features of the legislative process, and recent congressional behavior in a number of policy areas. (AM)

[GOVT 319(3191) Racial and Ethnic Politics (also AM ST 313[3191], LSP 319[3191]) (SBA-AS)]

Spring. 4 credits. Next offered 2009–2010. M. Jones-Correa.
In 1965 the landscape of American politics changed dramatically with the passage of the Voting Rights Act. That same year, Congress passed the Immigration Reform Act, which though little heralded at the time, arguably has had equally profound effects. This course provides a general survey of minority politics in the United States, focusing on the effects of these two key pieces of legislation. The course highlights the relationships between immigrants and minorities, electoral politics and protest politics, and between cooperation and competition within and among minority groups. The purpose of the course is not only to pinpoint the similarities and differences in the agendas and strategies adopted by minority groups, but to indicate the interaction between "minority" politics and American politics as a whole. (AM)]

GOVT 321(3212) Public Opinion and Representation

Fall. 4 credits. P. Enns.
This course will examine the nature of public opinion and analyze when and how it influences government. Specifically, the class will study various definitions of public opinion, theories of opinion formation and change, and how public opinion influences government policy. We will also analyze public attitudes toward specific issues, such as race and welfare, and we will discuss normative questions, such as the role opinion should play in American democracy.

[GOVT 329(3293) Comparative Politics of Latin America (also LAT A 329[3290]) @ (SBA-AS)]

Fall. 4 credits. Next offered 2008–2009. K. Roberts.]

[GOVT 330(3303) Politics of the Global North (also ILRIC 333[4330])]

Fall. 4 credits. Next offered 2008–2009. L. Turner.

For description, see ILRIC 333. (CO)]

GOVT 331(3313) Middle Eastern Politics

Spring. 4 credits. D. Patel.
This course provides an introduction to contemporary Middle Eastern politics. The goal is to provide students with historical background and theoretical tools to answer the following core questions: (1) Why do authoritarian political systems persist in the Middle East more than they do elsewhere? (2) Why have Islamist groups become prominent opposition forces in and across some countries? (3) Why do some Middle Eastern countries suffer from high levels of political violence while others are spared? (4) What accounts for the region's current economic underdevelopment? (5) Would the adoption of Western-style political institutions improve governance and stability in the region? The course explicitly compares outcomes and explanations within the region, between the region and other world areas, and over time.

GOVT 332(3323) Modern European Politics (SBA-AS)

Fall. 4 credits. H. Zimmermann.
This course offers an introduction into politics and political systems in Western Europe. It starts with a brief history of the consolidation of West European democracies before and after World War II. We then discuss core theoretical concepts guiding the comparative analysis of political systems. The main part of the course will consist of a discussion of the political cultures, parties, electoral systems, and current problems confronting the political systems of Britain, France, Germany, and Italy. Italy and Germany will be treated in-depth. Hotly debated issues in European politics will be presented by students in class and in a short research paper, before we conclude with an analysis of the European Union (EU) as political system. (CO)

GOVT 336(3363) Postcommunist Transitions (SBA-AS)

Spring. 4 credits. V. Bunce.
The focus of the course is on political and economic developments since the collapse of communism in the 28 states that make up Eastern Europe and Eurasia. Topics to be addressed include why democracy has developed in some countries, but not others in the region; differences in economic performance across the region; the role of the United States and the European Union in promoting democratic governance. The geographical focus will shift, depending upon the topic at hand.

GOVT 338(3383) Comparative Political Economy (SBA-AS)

Spring. 4 credits. C. Way.
Examines the juncture of politics and the economy in the advanced industrial democracies. Why do some countries have large, inclusive welfare states while others have minimal social programs? Is the welfare state in decline, and if so why? What difference does it make for the economy whether parties of the Left or Right govern? Are strong unions bad for the economy, or can they actually boost economic performance? What does increasing globalization of the world economy mean for the constraints and opportunities facing governments in managing the economy and

providing social welfare? Are all market economies pretty much the same, or are there varieties of capitalism that differ in important ways—and can they survive in the face of globalization? This course uses a variety of theoretical perspectives to investigate these and other questions, paying particular attention to evaluating the theoretical arguments with both systematic and historical evidence. (CO)

GOVT 339(3393) Political Economy of Development @ (SBA-AS)

Fall. 4 credits. D. Moehler.
For description, see <http://falcon.arts.cornell.edu/Govt>.

GOVT 341(3413) Modern European Society and Politics (also SOC 341[3410]) (SBA-AS)

Spring. 4 credits. S. Van Morgan.
This survey course provides an interdisciplinary overview of European affairs from the past to the present. Themes of the course will include, but will not be limited to, European political development from the 19th century forward, political and economic integration, developments in the welfare states of Europe, party systems and elections, immigration and demography, culture and identity, foreign policy, the shifting roles of women, and the special challenges faced by Eastern Europe and Russia. A series of background and contextual lectures will be complemented by presentations delivered by leading Europeanists. (CO)

[GOVT 342(3427) Germany and Europe (SBA-AS)]

Fall. 4 credits. Next offered 2009–2010.
P. Katzenstein.]

GOVT 343(3437) Politics of the European Union (SBA-AS)

Spring. 4 credits. H. Zimmermann.
Despite recent bad feelings, the countries constituting the European Union (EU) still remain the most important partners for the United States in the world. And despite the rise of China and other Asian countries, the EU, together with the United States, still calls the tune in the international economy. However, even citizens of the European Union generally know very little about how this complex structure works. This course explores the policies and policy-making of the European Union against the backdrop of the postwar history of European integration and the institutional framework of the EU. Also considers the external dimension of the EU and explore current debates about the emerging European polity, in particular the European constitution. Throughout the course students reflect on parallels with the American political system and on the state of current transatlantic relations. (IR)

[GOVT 351(3513) Politics of South Asia (also GOVT 735[7353]) (SBA-AS)]

Spring. 4 credits. Next offered 2009–2010.
R. Herring.]

[GOVT 354(3549) Capitalism, Competition, and Conflict in the Global Economy (SBA-AS)]

Fall. 4 credits. Next offered 2009–2010.
P. Katzenstein.

GOVT 360(3605) Ideology (CA-AS)

Spring. 4 credits. D. Rubenstein.
Focuses on critical approaches to the study of ideology in order to understand the role of ideology in political subject formation. After

an initial presentation of the classical Marxist texts on ideology, examines 20th-century reworkings of hegemony theorist Antonio Gramsci and the critical structuralist approaches of Roland Barthes, Jean Baudrillard and Dick Hebdige. Concentrates on the "lived relation" to ruling ideas in the form of ideologies of everyday life. The second part of the course is devoted to psychoanalytically oriented theories (Freud, Lacan) which address the internalization of belief, both in relation to the intrapsychic and in the interaction between psychic and state apparatuses. Concludes with Louis Althusser's notion of interpellation, which resumes the Marxist, structuralist and psychoanalytic objectives of the course material. The theorists in the second part of the course are contextualized within the experience of the historical traumas of fascism and French decolonization. Throughout the semester, students reflect on the continued relevance of historic ideologies, centered around notions of class interest, to late 20th-century ideologies' attachments to national, religious, gendered, ethnic, technological identity. (PT)

GOVT 361(3615) Liberalism and Its Critics # (KCM-AS)

Fall. 4 credits. B. Hendrix.
The term "Liberalism" refers to a broadly allied set of political theories and practices that focus on maximizing individual liberty, generally through the protection of personal rights. This course will consider both competing views within the liberal tradition, and challenges made by those outside it. The course begins with the historical origins of liberalism in European religious wars and changing coalitions of power, and moves forward through its major theorists (including Thomas Hobbes, John Locke, and John Stuart Mill) to the present day. We will then consider a variety of objections to liberalism, ranging from the very old (lodged by Plato) to the contemporary (by for example Michael Sandel and Michel Foucault). (PH)

GOVT 363(3633) Politics and Culture (also SOC 248[2480]) (HA-AS)

Spring. 4 credits. M. Berezin.
For description, see SOC 248. (CO)

GOVT 364(3645) Politics of "Nations Within" (also AIS 364[3640]) (SBA-AS)

Spring. 4 credits. B. Hendrix.
This political theory course will consider the political status of Native Americans in the United States, as well as the status of indigenous peoples in Canada, Australia, and New Zealand. We will begin with brief overviews of native peoples in the countries considered, with special attention to the history of their interactions with the states that now rule them, and their contemporary legal status. The course will consider the ideologies used to justify conquests and displacements by European colonists, particularly as illustrated in historical works of political theory and key court cases. The latter half of the course will consider the possible futures of these "nations within" by considering normative arguments about assimilation, cultural rights, treaty federalism, and full sovereign statehood. (PH)

GOVT 366(3665) American Political Thought from Madison to Malcolm X (also HIST 316[3160], AM ST 376[3665]) # (HA-AS)

Fall. 4 credits. Next offered 2009–2010.
I. Kramnick.
Survey of American political thought from the 18th century to the present. Particular attention is devoted to the persistence of liberal individualism in the American tradition. Politicians, pamphleteers, and poets provide the reading. Insightful historical and social context is offered.]

GOVT 368(3685) Global Justice (also PHIL 347[3470]) (KCM-AS)

Spring. 4 credits. R. Miller.
For description, see PHIL 347.

GOVT 370(3705) Political Theory and Cinema (also GERST 355[3550], COM L 330[3300], FILM 329[3390])

Spring. 4 credits. G. Waite.
For description, see GERST 355.

[GOVT 375(3755) Visual Culture and Social Theory (CA-AS)]

Fall. 4 credits. Next offered 2009–2010.
S. Buck-Morss.]

GOVT 383(3837) The Cold War (HA-AS)

Spring. 4 credits. M. Evangelista.
During more than four decades following the end of World War II international politics was dominated by a phenomenon known as the Cold War. This class examines the origins, course, and ultimate demise of this conflict that pitted the United States and NATO against the Soviet Union and its allies. It seeks to evaluate the competing explanations that political scientists and historians have put forward to explain the Cold War by drawing on the new evidence that has become available. The course considers political, economic, and strategic aspects of the Cold War, including the nuclear arms race, with particular focus on the link between domestic and foreign policy in the United States and the Soviet Union. The course emphasizes writing, and includes a final research paper for which students will use original archival materials.

GOVT 385(3857) American Foreign Policy (also CAPS 385[3857]) (SBA-AS)

Fall. 4 credits. P. Katzenstein.
Introduction to several aspects of U.S. foreign policy, emphasizing current concerns and organized in terms of several principal functions and regions of interest to U.S. foreign policy. Examines theories of foreign policy as well as specific historical/contemporary cases. This course has three basic goals: (1) to familiarize students with the importance of theory for describing, understanding, and explaining foreign policy decision making behavior; (2) to sensitize students to the complex constraints under which foreign policy is made, the margins of choice that statesmen have in shaping policy, and the intended and unintended consequences that a chosen-policy has on international as well as domestic life; and (3) to help students develop a critical, in-depth understanding of some of the foreign policy issues that face the United States today and to encourage them to think creatively about alternatives. (IR)

GOVT 386(3867) The Causes of War (SBA-AS)

Spring. 4 credits. C. Way.

Surveys leading theories of the causes of interstate war—that is, large-scale organized violence between the armed forces of states. Why is war a recurring feature of international politics? Are democracies more peaceful than other types of states, and if so what explains this “democratic peace”? Why do democratic publics seem to reward threats to use force by “rallying around the flag” in support of their governments? Does the inexorable pattern of the rise and fall of nations lead to cycles of great power wars throughout history? These and other questions are examined in this survey of theories of war at three levels of analysis: the individual and small groups, domestic politics, and the international system. Topics include: theoretical explanations for war; evaluation of the evidence for the various explanations; the impact of nuclear weapons on international politics; ethics and warfare; the uses and limitations of air power; international terrorism. (IR)

GOVT 389(3898) International Law (HA-AS)

Fall. 4 credits. Taught in Washington, D.C., and Ithaca Campus.

Is international law a pious delusion, helpless in the face of real power? Or is public policy becoming so entangled in international standards that international law is now eroding national sovereignty? This course surveys the theoretical foundations and general history of international law since the 17th century to highlight what is new in the doctrines and institutions by which it operates in the contemporary world. The course gives special attention to the relation between international and U.S. law and to the workings of international law in particular fields—including environmental and human rights protection, trade regulation, and control of terrorism. (IR)

GOVT 393(3937) Introduction to Peace Studies (SBA-AS)

Fall. 4 credits. M. Evangelista.

This course serves as an introduction to the study of war, peace, and peacemaking. We will study different theories of peace and war from a variety of disciplinary perspectives. The course will cover definitions of peace and war, causes of conflict, and modes of conflict prevention and resolution. The concepts will be applied to a range of historical and current conflicts. Students will prepare analyses of specific conflicts or instances of peacemaking for class presentation. (IR)

GOVT 404(4041) American Political Development in the 20th Century (also AM ST 404[4041], GOVT 612[6121]) (HA-AS)

Fall. 4 credits. E. Sanders.

This course examines the growth and change of the American national state from the early 20th century to the present. It is concerned with the responses of the national government to changes and pressures originating in society, economy and the international distribution of power, as well as the state's effect on society, market and world politics. We will explore pluralist, class-based, state-centered and other approaches in an effort to see which provides a better explanation for the rise (and contraction) of the national state in three main arenas: economic regulation, social welfare and rights; and national security.

GOVT 405(4051) The Postmodern Presidency: 2004 (CA-AS)

Spring. 4 credits. D. Rubenstein.

Examines the presidencies of Reagan, G. H. W. Bush, Clinton, and G. W. Bush in relation to what scholars have called “the postmodern presidency.” While this term has been used by institutionalist students of the presidency as a periodizing hypothesis, this course emphasizes the work of cultural critics and historians. Addresses the slippage between fact and fiction in cinematic and popular representations of the presidency (biography, novels, television). The construction of gender normativity (especially masculinity) is an attendant subtheme. The postmodern presidency is read as a site of political as well as cultural contestation. The larger question of this approach to the presidency concerns the relationship between everyday life practices and citizenship as well as the role of national fantasy in American political culture today. (AM)

[GOVT 406(4061) Politics of Slow-Moving Crisis (also GOVT 616[6161], AM ST 406/616[4061/6161]) (SBA-AS)

Fall. 4 credits. Next offered 2008–2009. M. Jones-Correa.]

GOVT 414(4142) Causes and Consequences of U.S. Foreign Policy (SBA-AS)

Spring. 4 credits. E. Sanders.

How can we characterize the 20th/21st-century legacy and continuing impact of U.S. foreign policy on the world? What forces—domestic, international, institutional, electoral, economic, cultural, or personal—drive U.S. foreign policy? These are the broad questions to be addressed this semester.

[GOVT 423(4231) The 1960s: Conceptualizing the Future from the Past (also AM ST 425[4231]) (CA-AS)

Fall. 4 credits. Next offered 2008–2009. J. Kirshner and T. Lowi.

The decade of the 1960s was a genuine sea change in American history. 1968 was its culmination and remains its symbol. Politically it was the end of the great Roosevelt Revolution and Democratic party hegemony, the end of consensus on rights, the end of liberalism, and the end of world bipolarity. It was also the end of American economic sovereignty. And it was the end of the arts as pure entertainment. Was it the end of everything? What was the response to “1968”? Cultural as well as political and economic phenomena must be explored. The seminar divides neatly and naturally between ends and beginnings. (AM)

GOVT 424(4241) Contemporary American Politics (also AM ST 424[4241], GOVT 629[6291]) (HA-AS)

Spring. 4 credits. M. Shefter.

Seminar analyzing some major changes in U.S. electoral and group politics in recent decades. Topics include: partisan realignment, the new conservatism, racial cleavages, “identity politics,” and democratic decline.

GOVT 426(4264) Social Movements in Latin America

Fall. 4 credits. K. Roberts.

This course analyzes different types of historical and contemporary social movements in Latin America. It begins with an overview of class-based labor and peasant movements; including their relationships with populist or leftist political parties. The class will then study revolutionary movements and the social actors that participate within them. The second half of the course will focus on various “new” social movements that have

altered the region's social and political landscape over the past twenty years, including movements organized around gender issues, human rights, environmental protection, shantytown communities, and indigenous rights. Special attention will be given to the construction and transformation of collective identities, and to new patterns of social protest in response to market globalization in the region.

GOVT 428(4281) Government and Public Policy: An Introduction to Analysis and Criticism (also AM ST 428/628 [4281/6281], GOVT 728[7281]) (SBA-AS)

Fall. 4 credits. T. J. Lowi.

Concentrates on history and criticism of U.S. policies and the politics associated with them. Particular attention is given to the origins and character of the regulatory state and the welfare system. (AM)

GOVT 431(4313) Model European Union I

Fall. 2 credits. Staff.

For description, see GOVT web site.

GOVT 432(4323) Model European Union II

Spring. 2 credits. Staff.

For description, see GOVT web site.

[GOVT 458(4585) American Political Thought (also GOVT 658[6585], AM ST 458[4585]) (HA-AS)

Spring. 4 credits. Next offered 2008–2009. J. Frank.

Seminar providing an advanced survey of the history of American political thought, with emphasis placed on four significant periods: Puritan New England, the Revolution and Founding, Abolition and Civil War, and the Progressive Era. Authors read may include: Winthrop, Hutchinson, Franklin, Paine, Jefferson, Madison, Warren, Tocqueville, Fitzhugh, Calhoun, Douglas, Garrison, Thoreau, Melville, Whitman, Lincoln, Adams, DuBois, Goldman, Dewey, Lippmann, Taylor, and Bourne. (PT)

GOVT 461(4616) Interpreting Race and Racism: DuBois (also AM ST 461[4616])

Spring. 4 credits. A. M. Smith.

This seminar is an advanced undergraduate course based on classic and contemporary social and political theory texts. We will explore the historically specific and antagonistic construction of race, and we will focus on the complex and contradictory ways in which racializing formations are defined in terms of class, gender and sexuality. For the spring 2008 version of the course, we will focus on the works of W.E.B. Du Bois. Seminar participants should have already completed GOVT 161 or GOVT 319 or equivalent courses in other departments before the course begins. Class size will be limited, and seniors who have satisfied the prerequisite course work will be given priority. To apply for admission, please contact the instructor.

GOVT 462(4625) Sexuality and the Law (also GOVT 762[7625], FGSS 461/762[4610/7620], AM ST 460/660[4625/6625]) (KCM-AS)

Spring. 4 credits. A. M. Smith.

Advanced feminist theory/political theory/queer theory/legal theory seminar for graduate students and law students. Deals first with theoretical approaches to sexuality that build on and interrogate the post-structuralist

approach that defines sexuality as a social construction, rather than an expression of a-historical instincts. Explores a series of major legal and political issues: the right to privacy with respect to contraception and abortion; the restriction of abortion rights; the exclusion of homosexual sodomy from the practices protected by the right to privacy; the racial regulation of marriage, same-sex marriage; Fineman's "sexual family" critique of family law; the moral regulation of poor women in early welfare law; the sexual regulation of poor single mothers in contemporary welfare law; the question of suspect class status for lesbians and gay men; and homosexuality and military service. Throughout the course, students examine the extent to which sexuality is constructed in articulation with gender, class and race differences. The reading list includes theoretical works (Foucault, Butler, Cohen and Martin), Supreme Court decisions; and critical commentaries by feminist legal theorists. (PT)

GOVT 463(4635) Feminist Theory/Law and Society (also AM ST 459[4365]) (CA-AS)

Spring. 4 credits. A. M. Smith. Feminist theory presents unique challenges to the student of politics interested in State structures, legal systems, and public policy. While liberal democratic state theory takes for granted the separation between the "private" and "public" spheres, feminist theory submits that distinction to a thorough interrogation. Feminists also insist that the "personal is political." An individual woman might decide to use contraception or to practice safer sex in a highly intimate context, but feminist theory brings to light the fact that social movements, cultural trends, changes in the health care field, governmental agencies, and legal doctrine have set the stage for that personal decision. Feminist theory is therefore situated in a privileged position to shed new light on some of the most interesting issues in contemporary politics, such as same-sex marriage, abortion, the HIV and AIDS epidemic, stem cell research, access to health care, discrimination in the workplace, and poverty policy. In this seminar we will explore feminist theory's interrogation of State theory. We will pay particularly close attention to the feminist theory that explores the intersection between racism and sexism in America today. (PT)

GOVT 464(4646) Theories of Empire (also GOVT 678[6786])

Spring. 4 credits. L. Maxwell. "Empire" has reemerged in recent years as a potent political concept, both in popular political life and debates in contemporary political theory. In this class, we will ask: what kind of domination or form of rule is empire and why is it a continuing trope in human political life? To answer these questions, we will examine the changing concept of empire in ancient Roman, modern, and contemporary political thought. What have theorists been trying to capture when they call something "empire" and how has it changed and shifted in each epoch? We will also consider the entanglement of enlightenment concepts of freedom, equality, and democracy with imperial practices. How have imperial concepts and practices shaped our democratic aspirations to freedom and equality? Did imperialism corrupt Enlightenment aspirations, or were these aspirations haunted by imperialism from within? Readings include

texts by ancient Roman historians such as Livy, Tacitus, and Sallust, by modern political thinkers such as Burke, Mill, and Montesquieu, and by 20th century and contemporary theorists such as Hardt & Negri, Hannah Arendt, Richard Tuck, and James Tully.

GOVT 466(4665) Islamism (also NES 453[4553]) @

Fall. 4 credits. Prerequisite: graduate students or juniors and seniors who have taken GOVT 161 or 300-level course in political theory. S. Buck-Morss.

In the past five years, there have been important contributions in critical theory by writers from a Muslim perspective, dealing with issues of globalization, the society of the spectacle, post-colonialism, feminism, and commodity culture. This course is intended to introduce students to the complexities of Islamism as a modern discourse of opposition that deals with issues of social justice, legitimate power, and ethical life. Because the literature is part of the partisan debates, attention is given to the political and theoretical presuppositions embedded in the very concepts of "Islamism" and the "West," and how the struggle to define them challenges the meanings of "modernity," "democracy," "universal rights," and "liberation." Emphasizing the wide diversity of Islamic discourse, we will read original sources by Reverend Louis Farrakhan, Ayatollah Ruhallah Khomeini, Muhammad Iqbal, Osama bin Laden, Ustadh Mahmoud Taha, Sayyid Quth, and Ali Shar'ati, and commentaries by academic scholars, including Talal Asad, Asma Barlas, Hamid Dabashi, Faisal Devji, Roxanne Euben, Saba Mahmood, Bobby Sayyid, and others. As the major experiment in founding an "Islamist Republic," Iran will be a focus. Themes will include Islamism and feminism, Islamism and cinema, Islamism and diaspora culture, American Islam, the Sunni-Shia divide.

[GOVT 470(4705) Contemporary Reading of the Ancients (also FREN 470[4700], COM L 475[4750]) (CA-AS)]

Fall. 4 credits. Graduate students welcome to enroll. Next offered 2009-2010. D. Rubenstein.

Focuses on Derrida's reading of Plato and St. Augustine. Begins with Derrida's close reading of Plato's Phaedrus and traces his conceptual adumbration of the pharmakon to other critical and philosophical scenes: addiction and terrorism. The next textual encounter is between St. Augustine's *Confessions* and Derrida's *Circonfession*. Considers the questions of national and religious identity in relation to other Derridean texts such as *Monolinguisism of the Other*. Returns to conclude with Plato's *Apology*, *Crito* and *Phaedo*, read in tension with Derrida's last extended interview, his writings on death and the death penalty. Throughout the seminar students explore Derrida's conceptual interrogation of globalization, citizenship, hospitality, friendship, pedagogy, eros and death. (PT)

[GOVT 471(4715) Critical Reason, The Basics: Kant, Hegel, Marx, Adorno (also GERST 471[4710]) (KCM-AS)]

Fall. 4 credits. Next offered 2009-2010. S. Buck-Morss.

This course deals with basic concepts and methods of Critical Theory from Kant to Adorno. Lectures will consider philosophy from the perspective of the political,

demonstrating how autonomy, freedom, democracy, and law are approached by the following: critical reason, dialectics, materialist epistemology, and the socio-logics of non-identity. Students will tackle difficult primary texts in this tradition, with the goal of enhancing their own critical capacities to analyze political, social and economic life. (PT)

GOVT 473(4735) Marx, Freud, Nietzsche (also GERST 415[4150], COM L 425[4250]) (CA-AS)

Fall. 4 credits. G. Waite. For description, see GERST 415.

GOVT 480(4809) Politics of '70s Films (SBA-AS)

Spring. 4 credits. J. Kirshner. The ten years from 1967 to 1976 were an extraordinary time both in the history of American politics and in the history of American film. In the same period that the country was rocked by the Vietnam War, the feminist and civil rights movements, Watergate and economic crisis, the end of Hollywood censorship along with demographic and economic change in the industry ushered in what many call "the last golden age" of American film. In this class we study both film theory and political history to examine these remarkable films and the political context in which they were forged. The goal of the course is to take seriously both the films and their politics. (AM or PT)

GOVT 482(4827) Unifying While Integrating: China and the World (also GOVT 682[6827]) @ (HA-AS)

Fall. 4 credits. A. Carlson. Seminar intended to examine the increasingly complex relationship that has evolved between China and the rest of the international system during the 1980s and 1990s. Emphasizes the interrelated, yet often contradictory, challenges facing Beijing in regard to the task of furthering the cause of national unity while promoting policies of integration with international society and interdependence with the global economy. Concentrates especially on ongoing controversies over the rise of Chinese nationalism and the persistence of "minority nationalism" in many regions within China. (IR)

[GOVT 483(4837) The Military and New Technology (also S&TS 483[4831]) (SBA-AS)]

Spring. 4 credits. Next offered 2008-2009. K. Vogel. For description, see S&TS 483.]

GOVT 487(4877) Asian Security (also CAPS 487[4870], GOVT 687[6877]) @ (SBA-AS)

Fall. 4 credits. A. Carlson. Throughout the 1990s it has been part of the conventional wisdom of international relations scholarship that Asia was, in the words of Aaron Friedberg, "ripe for rivalry." In this seminar we explore the accuracy of such an assessment through studying Asia's historical and contemporary security situation. Such an examination will be oriented toward introducing students to the main security issues confronting Asia, alongside an exploration of the extent to which competing explanations drawn from different strands of IR theory and the security field can explain such issues. In addition, we will ask students to challenge the limitations of traditional

security studies through considering the importance of new actors and issue areas within the region. In short, while the Seminar will have a regional focus on East Asia, it will be framed within the broader literature of the field.

GOVT 491(4917) Ethics in International Relations (KCM-AS)

Spring. 4 credits. M. Evangelista.
This course examines current and historical issues in international relations from the perspective of international law, norms, and ethics. We develop general principles and concepts, such as "just war," "national interest," and "human rights," and apply them to real-world situations. Most of the focus of the course is on particular cases that involve legal and ethical issues: violations of human rights and genocide; war crimes; military intervention; economic sanctions; environmental degradation; economic injustice. The first part of the course examines these issues using examples from 20th century international affairs, including recent events. The second part focuses on current issues that pose ethical problems for the foreign policy of the United States: internal violence and human rights abuses in the former Yugoslavia and former Soviet Union; indigenous uprisings in Mexico and their relation to U.S. foreign economic policy; the appropriate U.S. response to situations in countries such as Haiti, Nigeria, and China.

GOVT 494(4949) Honors Seminar: Thesis Clarification and Research

Fall. 4 credits. Prerequisite: acceptance into honors program. M. Katzenstein.
Designed to support thesis writers in the honors program during the early stages of their research projects.

GOVT 495(4959) Honors Thesis: Research and Writing

Spring. 4 credits. Prerequisite: successful completion of GOVT 494.

GOVT 499(4999) Undergraduate Independent Study

Fall or spring. 1-4 credits.
One-on-one tutorial arranged by the student with a faculty member of his or her choosing. Open to government majors doing superior work, and it is the responsibility of the student to establish the research proposal and to find a faculty sponsor. Applicants for independent study must present a well-defined program of study that cannot be satisfied by pursuing courses in the regularly scheduled curriculum. No more than four credits of independent study may count toward fulfillment of the major. Students who elect to continue taking this course for more than one semester must select a new theme or subject each semester. Credit can be given only for work that results in a satisfactory amount of writing. Emphasis is on the capacity to subject a body of related readings to analysis and criticism. Keep in mind that independent study cannot be used to fulfill the seminar requirement. The application form for independent study is available in 210 White Hall and must be completed at the beginning of the semester in which the course is being taken.

GOVT 500(4998) Politics and Policy: Theory, Research, and Practice (also AM ST 501[4998], CAPS 500[5000], PAM 406[4060], ALS 500[4998])

Fall, spring. Offered in Cornell in Washington Program.

This required course forms the core of the Cornell in Washington program for students in the public policy option. The central course objective is to provide students with the instruction and guidance necessary to analyze and evaluate their own chosen issue in public policy. Toward that end, the course has three components: (1) weekly lectures providing background on the structures and processes of national politics and policy as well as training in research methodology; (2) student externships; and (3) individual research papers or projects. All three components interrelate so as to provide students with a strategy and framework for integrating classroom based learning, field experience and individual research.

GOVT 601(6019) Methods of Political Analysis I

Fall. 4 credits. Staff.

The first half of this course examines how to frame, evaluate, and compare empirical explanations in political science. Introduces several theoretical approaches that have been widely applied in political science research, including rational choice, social mechanisms, and functionalism. Students discuss the differences between explanation and description, emphasizing the idea of experimental manipulation. Building on this general discussion, the second half explores the distinctive methodological issues involved in comparing macro-social units and surveys a range of different approaches to comparative analysis.

GOVT 602(6029) Methods of Political Analysis II

Spring. 4 credits. P. Enns.

This course will introduce students to some basic methods for conducting quantitative analyses in political science. After taking this course, students will be able to read and critique political science research that uses basic statistical analyses as well as be able to use basic statistical techniques, such as multiple regression analysis, in their own research. The course will begin with basic probability theory and proceed to statistical analysis of political data.

GOVT 603(6031) Field Seminar in American Politics

Spring. 4 credits. E. Sanders.

Introduces the major issues, approaches, and institutions of American government and the various subfields of American politics. Focuses on both substantive information and theoretical analysis. (AM)

[GOVT 605(6053) The Comparative Method in International and Comparative Politics

Spring. 4 credits. Next offered 2008-2009. K. Roberts.

An in-depth, graduate-level introduction to qualitative and comparative methods of political analysis, with special emphasis on the application of these methods in comparative and international politics. Through readings, discussions, and written assignments, students will explore strategies for concept formation, theory construction, and theory testing, using the craft and tools of comparative political analysis.]

GOVT 606(6067) Field Seminar in International Relations

Fall. 4 credits. M. Evangelista and J. Kirshner.

General survey of the literature and propositions of the international relations field. Criteria are developed for judging theoretical propositions and are applied to the major findings. Participants are expected to do extensive reading in the literature as well as research. (IR)

GOVT 607(6075) Field Seminar in Political Thought

Spring. 4 credits. I. Kramnick.

A survey of the early modern political theory canon, emphasizing texts and writers from the 17th and 18th centuries. (PT)

[GOVT 610(6101) Political Identity: Race, Ethnicity, and Nationalism

Fall. 4 credits. Next offered 2008-2009. M. Jones-Correa.

The social sciences generally treat ethnicity, nationalism, and race as descriptive categories or variables, while avoiding actually defining these categories or thinking about how they should be used. How should we go about describing ethnicity, nationalism, and race? Should we treat them as primordial or as social constructions? Much of the recent literature suggests the latter. If constructed, by whom are they constructed (or by what)? What constrains/structures these constructions? What purposes do these constructions serve? Whom do they serve? Are some constructions better representations of identity than others, and what does this mean? How should we go about applying these categories in political analysis? (AM)

GOVT 612(6121) American Political Development in the 20th Century (also AM ST/GOVT 404[4041])

Fall. 4 credits. E. Sanders.

For description, see GOVT 404.

GOVT 614(6142) Causes and Consequences of U.S. Foreign Policy

Spring. 4 credits. E. Sanders.

For description, see GOVT 414.

[GOVT 615(6151) State and Economy in Comparative Perspective

Spring. 4 credits. Next offered 2008-2009. R. Bensel.

Reviews the extensive literature on the political economy of comparative state formation, economic development, and institutional change. Topics include war-making and state expansion, regime evolution and modernization, and market processes and class transformation. The focus ranges from the micro-economic foundations of political choice through the grand historical forces that have shaped the contemporary world economy. Although much of the reading and discussion focuses on European cases, the limits of this experience as a theoretical model for the remainder of the world also are considered. (AM)]

GOVT 620(6202) Political Culture (also AM ST 620[6202])

Fall. 4 credits. R. Bensel.

This graduate course will explore the relationship between popular belief, political action, and the institutional deployment of social power. The class will be roughly divided in three parts, opening with a discussion of the material foundations of cultural ideation in socio-economic "practice." The middle section will connect ideation to

political ideology, including symbolism and group identity. The last portion of the course will consider the impact of both cultural ideation and political ideology on institutional structure and legitimation. This section will also trace how political regimes can influence, coming full circle, to the material foundations of cultural ideation.

GOVT 626(6264) Social Movements in Latin America

Fall. 4 credits. K. Roberts.
For description, see GOVT 426.

[GOVT 627(6274) People, Markets, and Democracy]

Spring. 4 credits. Next offered 2009-2010.
C. Anderson.

Examines the relationship between the economy and democracy. Focuses on behavioral political economy in democratic or democratizing countries. Major topics include inequality and democratic performance.]

GOVT 629(6291) Contemporary American Politics (also GOVT 424[4241])

Spring. 4 credits. M. Shefter.
For description, see GOVT 424. (AM)

GOVT 630(6301) Institutions (also AM ST 630[6301])

Fall. 4 credits. R. Bensel.
This graduate course will explore the ways in which institutional rules shape the conduct and outcome of politics as collective decision-making and deliberation. The focus will be primarily on the United States Congress where the literature on institutional design and structure is both comprehensive and deep. Subordinate sections of the course will cover the general literature on theories of institutional formation and influence over politics, as well as briefly addressing law and judiciaries in order to broaden the sampling of specific cases and applications.

[GOVT 634(6349) New Life Sciences: Emerging Technologies, Emerging Politics (also S&TS 645[6451])]

Fall. 4 credits. Next offered 2009-2010.
J. Reppy.
For description, see S&TS 645.]

GOVT 635(6353) Field Seminar in Comparative Politics

Spring. 4 credits. C. Anderson.
This course provides an introduction to comparative politics, introducing students to classic works as well as major recent contributions to the field. Topics to be covered include the comparative method, democratic institutions, political culture, modernization theory, ethnicity, economic development and contentious politics. The course will require extensive reading and assignments will include several review papers. (CO)

GOVT 639(6393) Comparative Political Participation

Spring. 4 credits. S. Martin and D. Moehler.
This course is concerned with understanding how and under what conditions citizens seek to influence political elites through use, expansion, circumvention or subversion of existing channels of political participation. Cases from a variety of institutional contexts over time will be used to examine how mediating institutions diminish and/or exacerbate social inequalities in the exercise of political voice. We will consider how observations from other cultural contexts challenge dominant paradigms within

American political science that shape how we think about political participation.

GOVT 641(6413) Revitalizing Labor: A Comparative Perspective (also ILRIC 632[6320])

Spring. 4 credits. L. Turner.
For description, see ILRIC 632.

[GOVT 642(6423) Feminist Methodology (also FGSS 617[6170])]

Spring. 4 credits. Next offered 2008-2009.
S. Martin.
For description, see FGSS 617.]

GOVT 652(6523) Political Culture

Spring. 4 credits. D. Patel.
This research seminar surveys the study of political culture. The course is designed to assess the strengths and weaknesses of various approaches that seek to account for the influence of culture on economic and political behavior and institutions, and to account for shifts in culture over time. A wide range of methodological approaches within political science are examined, as well as approaches from anthropology, sociology, and economics. Applications include ethnicity and identity, conflict, regime type, and economic growth. The focus is on how rationalist and institutionalist approaches ignore or incorporate political culture through choice, coordination, and common knowledge.

GOVT 657(6573) Comparative Democratization

Fall. 4 credits. D. Moehler.
This course compares recent democratization in Africa, the post-communist world, Latin America, Asia and southern Europe. We will focus on both transitional dynamics and the quality and sustainability of democracy and the relationship between nationalism and democracy, economic reform and democracy, and economic performance and democratic governance.

[GOVT 658(6585) American Political Thought (also GOVT/AM ST 458[4585])]

Spring. 4 credits. Next offered 2008-2009.
J. Frank.
For description, see GOVT 458.]

[GOVT 659(6595) Ethics and Cultural Difference]

Spring. 4 credits. Next offered 2008-2009.
B. Hendrix.]

[GOVT 660(6603) States and Social Movements (also SOC 660[6600])]

Spring. 4 credits. Next offered 2008-2009.
S. Tarrow.

Two traditions run parallel in political sociology and comparative politics: the study of statebuilding and state transformation and the study of social movements and contentious politics. In the 1960s and 1970s, they converged in the work of scholars like Charles Tilly, who advanced both fields of study, which then ran along parallel but largely independent tracks. This course seeks to synthesize the two traditions, drawing on both historical and contemporary materials from Europe and the Third World, and searching for the key mechanisms and processes that link forms of contention to processes of statebuilding and state transformation. (CO)]

[GOVT 661(6615) Secession, Intervention, and Just-War Theory]
Spring. 4 credits. Next offered 2009-2010.
B. Hendrix.

This course examines philosophical viewpoints on secession, military intervention, legitimate reasons to go to war, and justice in prosecuting wars. Roughly the first half of the course will focus on the discussion of secession, while the second half will investigate intervention and war. Central texts include Allen Buchanan, *Secession*; David Miller, *On Nationality*; and Michael Walzer, *Just and Unjust Wars*.]

[GOVT 662(6625) Field Seminar in Political Theory]

Fall. 4 credits. Next offered 2008-2009.
J. Frank.

Introduces students to several contemporary approaches to political theorizing, with an emphasis placed on different modes of interpretation. Authors read may include: Althusser, Arendt, Butler, Foucault, Habermas, Kristeva, MacIntyre, Skinner, Strauss, Taylor, Wolin, and Zizek. (PT)]

[GOVT 664(6645) Democratic Theory (also AM ST 664[6645])]

Fall. 4 credits. Next offered 2008-2009.
J. Frank.

In contemporary political contexts "democracy" is often invoked as the very ground of political legitimacy. There is very little agreement, however, on what democracy means or how it is best embodied in state institutions and law. This seminar will introduce students to select debates in contemporary democratic theory over the normative meaning of democracy and the limitations of contemporary democratic practice. Beginning with the work of Rousseau and ending with debates over "radical democracy," we will explore the following themes: How do democratic theorists and democratic actors negotiate the paradoxes of collective self-rule? What is the relationship between liberalism and democracy? Do rights suspend democracy or establish its preconditions? What are the best procedures for democratic decision-making? How does democracy deal with difference? Is democracy best understood as a form of government or a practice of resistance to domination? (PT)]

[GOVT 666(6665) Media Theory: Film and Photograph (also VISST 666[6666])]

Spring. 4 credits. Next offered 2009-2010.
D. Rubenstein.]

GOVT 668(6685) Normative Political Theory

Fall. 4 credits. B. Hendrix.
This course will focus on normative approaches to political theory, beginning with the questions of what morality consists in and why (or whether) it might be binding on us. Authors read in this part of the course include Plato, Hume, and Kant. The course will then consider specific topics within normative theory, such as the question of whether individuals have obligations to obey political authority and what the moral status of property ownership and economic inequality might be. Authors read in this portion of the course include John Simmons, Michael Walzer, and G.A. Cohen.

[GOVT 669(6695) Modern Social Theory I]

Spring. 4 credits. Next offered 2008-2009.
S. Buck-Morss.
Topics vary. (PT)]

GOVT 670(6705) Modern Social Theory II

Fall. 4 credits. S. Buck-Morss.

In fall 2007, we will read Walter Benjamin's Arcades Project. We will approach the text as a materialist philosophy of history with a political intent, paying special attention to the work of social theorists whom he cites in the project: Karl Marx (dreamworlds), Georg Simmel (urban life), Charles Fourier (communism), St-Simonians (industrial utopia) Bakunin (revolution) and Claire Démar (feminism). Advanced seminar, not recommended for undergraduates.

GOVT 677(6775) Language and Politics

Spring. 4 credits. Next offered 2008–2009.

J. Frank.

This course explores the "linguistic turn" of recent political theory alongside canonical debates over the political and epistemological consequences of different philosophies of language. Writers examined will include Locke, Rousseau, Nietzsche, Wittgenstein, Austin, Derrida, Butler, and Cavell.]

GOVT 678(6786) Theories of Empire (also GOVT 464[4646])

For description, see GOVT 464.

GOVT 681(6817) Politics of Transnationalism (also SOC 680[6800])

Spring. 4 credits. Next offered 2008–2009.

M. Evangelista and S. Tarrow.

Globalization and internationalization are giving rise to a new area of international studies that examines the interactions of civil society actors with one another, with states, and with international institutions. This course traces the development of this area of research from its origins in the "old" transnational politics; examines the contributions of constructivism, liberal internationalism, and state-centered realism, and focuses on four areas of transnational politics: norm formation, the construction of transnational coalitions, the effects of transnational advocacy networks, and whether there is a growing fusion between international and domestic contention. (IR)]

GOVT 682(6827) Unifying While Integrating: China and the World (also GOVT 482[4827])

Spring. 4 credits. A. Carlson.

For description, see GOVT 482.

GOVT 685(6857) International Political Economy

Fall. 4 credits. P. Katzenstein.

Exploration into a range of contemporary theories and research topics in the field of international political economy. The seminar covers different theoretical perspectives and a number of substantive problems. (IR)

GOVT 687(6877) Asian Security

For description, see GOVT 487.

GOVT 688(6887) Political Economy and National Security

Spring. 4 credits. Next offered 2009–2010.

J. Kirshner.

This seminar considers the relationship between economics and national security. Specific topics will change from year to year, but will typically include the following: the economic foundations of power, economic coercion, the economic roots of conflict, and the ways in which structural changes in the international economy shape and limit state authority. (IR)]

GOVT 689(6897) International Security Politics

Spring. 4 credits. Next offered 2008–2009.

C. Way.

Examines a variety of international relations theories in studying a broad range of security issues, including the causes of war, alliance formation, balance-of-power politics, security regimes, nuclear and conventional deterrence, the democratic peace, military strategy, international terrorism, and domestic constraints on the use of force. Uses a variety of theoretical perspective to investigate these and other issues, paying particular attention to evaluating the theoretical arguments with both historical and systematic evidence. (IR)]

GOVT 691(6917) Normative Issues in IR

Fall. H. Shue.

Examines selected normative elements of international affairs, divided into three interlocking clusters. First are issues about conflict, including both low-intensity military intervention and nuclear weapons. Second are questions about cooperation, especially between rich nations and poor nations. Third are debates about the authority and status of the major players in the international system: individual persons, nation-states, and international regimes. Questions considered include: is the retention by some nations of nuclear weapons morally justified? Is the world economy unjust? Should national governments be pressured to respect individual human rights? (IR)

GOVT 692(6927) Administration of Agriculture and Rural Development (also IARD 603[6060])

Spring. 4 credits. N. Uphoff and

T. W. Tucker.

For description, see IARD 603.

GOVT 699(6999) CPAs Weekly Colloquium

Fall, spring. 1 credit. S-U grades only. Staff. Colloquium is the weekly seminar series hosted by the Cornell Institute for Public Affairs (CIPA). It is also a required, 1-credit course for all CIPA Fellows and is graded S-U based on attendance. The colloquium series is a collaborative effort between the CIPA Colloquium Committee and the faculty and staff of CIPA.

GOVT 703(7035) Political Economy

Fall. 4 credits. Next offered 2008–2009.

J. Kirshner.

This course will undertake a general survey of the classical and modern theories of political economy. The works of Smith, Keynes, Shumpeter, and Hayek, among others, will be studied and placed within the context of the history and evolution of the thought, practice, and method of the field. Issues pertaining to the politics of macroeconomics and money will be of prominent (but not exclusive) interest in the course. (PT)]

GOVT 706(7063) Labor in Global Cities (also ILRCB 706[7060])

Fall. 4 credits. L. Turner.

For description, see ILRCB 706. (CO)

GOVT 728(7281) Government and Public Policy (also AM ST 628[6281])

Fall. 4 credits. T. J. Lowi.

For description, see GOVT 428. (AM)

GOVT 735(7353) Politics of South Asia (also GOVT 351[3513])

Spring. 4 credits. Next offered 2009–2010.

R. Herring.

For description, see GOVT 351. (CO)]

GOVT 760(7605) Theoretical Approaches to Ideology

Fall. 4 credits. Next offered 2008–2009.

A. M. Smith.

Investigation of what is casually referred to as the "politics of meaning" is of course central to political theory and political science as a whole. However, profound controversies revolve around the definition of "ideology," its relationship to the interests of dominant groups, the means by which it is circulated throughout diverse social sites, the ability of political agents to interrupt institutionalized ideologies, and the processes by which ideology penetrates and reconstructs the worldviews of the dominated. The groundwork for the seminar is laid by examining key texts on ideology by Marx. Students trace the multiple meanings of the term in his work and their various implications. Next they explore the ways in which the study of gendered and racial discourse has transformed our understanding of ideology. Students address the Freudian and Lacanian interventions in ideology studies with respect to the concepts of the unconscious and misidentification. They discuss the ways in which Adorno, Horkheimer, and Habermas have re-articulated Marx's formulations. The structuralist and post-structuralist schools are studied with reference to Saussure, Levi-Strauss, Barthes, and Althusser. Finally, students explore the problem of institutional analysis with reference to texts from the science and technology studies and state theory traditions. (PT)]

GOVT 762(7625) Sexuality and the Law (also GOVT 462[4625], FGSS 461/762[4610/7620])

Spring. 4 credits. A. M. Smith.

For description, see GOVT 462.

GOVT 799(7999) Independent Study

Fall or spring. 4 credits. *Not* open to undergraduates. Undergraduates wishing to conduct supervised study should register for GOVT 499.

Individualized readings and research for graduate students. Topics, readings, and writing requirements are designed through consultation between the student and the instructor. Graduate students in government who are looking to use this as an option to fulfill their course requirements should check with their chairs to be certain that the program of study is acceptable for this purpose. Applications must be completed and signed by the instructor and by the chairs of their special committees. They are available from, and must be returned to, the graduate assistant in 212 White Hall.

Washington, R. Weil, J. Weiss. Emeritus: D. Baugh, J. John, W. LaFeber, C. Peterson, W. Pinter, J. Silbey, F. Somkin, B. Tierney

The popularity of history among Cornell students is due to its usefulness as preparation for graduate, professional, or law school and for any career that requires critical thinking and good writing; the reputation of the faculty for scholarship, teaching, and advising; and most of all, the intrinsic interest of the discipline. A wide variety of introductory and advanced courses is offered. The department is particularly strong in ancient, medieval, and modern European history; in American, Latin American, and Asian history; and in the history of science.

Advanced Placement

Students who pass the AP American and/or European History exam with a score of 4 or 5 have two options: (1) use the AP credits to fulfill the Arts and Sciences course credit requirements for graduation, or (2) take introductory American and/or European history courses.

The Major

To complete the history major, a student must fulfill the requirements listed below:

Entry requirement: completion of *any* two history courses excluding first-year writing seminars.

1. Take nine history department courses (for either 3 or 4 credits each), completing all of them with a grade of C or better. (Courses taken for entry may count toward fulfilling the major.)
2. Of the total nine courses:
 - a. four must be in courses designated as outside U.S. history and
 - b. three must be in courses designated as history before 1800.

Courses used to fulfill requirement (1) above may also be used to fulfill requirement (2), in respect both to (a) and (b) if applicable. A course in American history before 1800 may be used to fulfill requirement (2b). A course before 1800 in a field other than American history can be used toward fulfillment of both requirements (2a) and (2b).

A list of those courses that fulfill the "outside U.S." and "pre-1800" requirements is maintained by the History Department.

Only courses from that list fulfill these requirements.

3. Two of the nine courses must be seminars, of which one must be a 400-level seminar. HIST 400 may be used to fulfill this requirement.

Honors

The history department offers an honors program for students who wish to research and write a thesis during their senior year. In addition to writing the thesis, honors students must maintain a 3.5 average in their history courses, take HIST 400 Honors Proseminar during their junior year plus an additional 400-level seminar, preferably during their junior year, and complete 10 courses in history (for 3 or 4 credits each). During the second semester of the sophomore year or early in the junior year, interested students should speak to a faculty member or faculty advisor about the honors program.

Before the beginning of the senior year, the candidate presents, in conversation or in writing, a thesis proposal to an appropriate member of the faculty. The faculty member who approves the proposal ordinarily becomes the thesis supervisor. If for any reason it is necessary to change supervisors, this arrangement should be confirmed no later than the fourth week after the beginning of the candidate's senior year.

Honors candidates should register in HIST 401, a seminar course in honors research. Any exceptions to this must be approved by the Honors Committee. HIST 401 is a 4-credit course that permits honors candidates to conduct research and to begin writing the honors essay in a seminar environment. At the end of the first semester of the senior year, as part of the requirements for HIST 401, the student submits to the supervisor a 10- to 15-page overview, or, alternatively, a preliminary draft of some part of the thesis along with an outline of the whole to the instructor of 401 and to the student's supervisor. HIST 402 is a 4-credit seminar course that permits honors candidates to complete the honors essay and to demonstrate their understanding of the ways in which the themes explored in the thesis fit into a larger historical context.

The completed thesis is evaluated by three readers, including the supervisor and a first reader selected by the student, in consultation with his or her supervisor.

The text of the honors essay may not exceed 60 pages except by permission of the chair of the Honors Committee and the student's supervisor. Three copies are due during the third or fourth week of April. In May, each honors candidate is given an oral exam administered by the supervisor; exam focuses on the essay as well as the specific subfield of history in which the student has conducted research (e.g., Periclean Athens, 17th-century science, 19th-century American politics).

To qualify for a bachelor of arts degree with honors in history, a student must (1) sustain at least a 3.5 cumulative average in all history courses and (2) earn at least a cum laude grade on the honors essay and on the oral exam.

Cornell in Washington Program. History majors may apply to the Cornell in Washington program to take courses and

undertake a closely supervised externship during a fall or spring semester.

Category Key: Courses in History are broken into different categories. To determine which category(s) a course falls in, please note the reference at the end of each course description. The key is as follows: AF = African History, AM = American History, AS = Asian History, CO = Comparative History, EA = Ancient European History, ER = Renaissance & Medieval History, EM = Modern European History, HS = History of Science, LA = Latin American History, NE = Near Eastern History, and HR = Honors, Reading, and Research.

First-Year Writing Seminars

HIST 101(1101) First-Year Writing Seminar: The Blues and American Culture

Fall. 3 credits. Please register for this course through the FWS Program.

R. Polenber.

Bessie Smith, Gertrude "Ma" Rainey, Billie Holiday, "Blind Lemon" Jefferson, Robert Johnson, and "Muddy" Waters—their names have become familiar as interest in the blues has increased. But what do their lives and their music—and that of other blues musicians—reveal about American culture in the first half of the 20th century? Topics include the origins of the blues; the social structure of the Mississippi Delta; religion and social protest; gender and sexuality; law, crime, and justice; migration and urbanization; the 1960s revival. Readings include works by Steven C. Tracy, Angela Y. Davis, and Paul Garon. Classic blues recordings will be made available, and videos of historical performances will be screened. (AM)

HIST 103(1103) First-Year Writing Seminar: Immigrant Experiences

Spring. 3 credits. Next offered 2008–2009. D. Chang.]

HIST 114(1141) First-Year Writing Seminar: Witchcraft in the Early Modern Atlantic World

Fall. 3 credits. Please register for this course through FWS Program. D. Corpis.

This seminar examines how European beliefs about witchcraft and magic were exported to Africa and the Americas in the period 1500–1800. We will explore how non-European concepts of the supernatural and magical intersected with European ideas during the initial stages of European colonial expansion. We will read a range of documents, including transcripts from witch trials, treatises about witchcraft, and books written by historians that interpret the historical meaning of witchcraft. Students will write a range of papers that aim to answer the following types of questions: Were witches figments of the European imagination? Why were the people accused of witchcraft more often women than men? Why did Europeans believe that Native Americans or Africans were likely to be involved in witchcraft? (EM)

HIST 119(1190) First-Year Writing Seminar: Gandhi and the Politics of Non-Violence

Fall. 3 credits. Students should register through First-Year Writing Seminar Program. Next offered 2009–2010.

D. Ghosh.]

[HIST 130(1300) First-Year Writing Seminar: History of the Writing of History

Fall. 3 credits. Next offered 2008–2009. A. Sachs.]

HIST 140(1400) First-Year Writing Seminar: Kipling's India: Literature, Culture, History

Fall. 3 credits. Please register for this course through the FWS Program. T. R. Travers.

This seminar uses the novels, stories, and poems of Rudyard Kipling to explore the history of the British Empire in India in the 19th century. We will ask what Kipling's fictional works can tell us about the British project of governing India, and also consider the broader question of the uses of fiction as a historical source. (EM)

Introductory Courses**HIST 151(1510) Introduction to Western Civilization # (HA-AS)**

Summer and fall. 4 credits. O. Falk. The West and its relations with the rest of the world are central topics today, but just what is the West and what is its history? This course surveys the history of the West from remote antiquity to the 16th century. We will consider developments in technology, economy, politics, religious institutions and faiths, cultural media and social ideals. Together, these themes add up to civilization in the west. We will acquaint ourselves with these dimensions of the past while seeking to acquire the basic skills professional historians use to learn about this past. (ER) (EM)

HIST 152(1520) Intro to Western Civilization Part II # (HA-AS)

Summer and spring. 4 credits. R. Weil. This course introduces students to the major social, intellectual, political, cultural, artistic, and literary events and movements that emerged in Europe since the Protestant Reformation. Readings will offer a variety of perspectives on topics such as: modernity and its meaning, revolution (industrial, social, political, cultural, artistic), imperialism, war, and the emergence of modern ideologies (capitalism, communism, liberalism, fascism). (ER) (EM)

HIST 153(1530) Introduction to American History (also AM ST 103[1530]) # (HA-AS)

Summer and fall. 4 credits. HIST 153 is not a prerequisite for HIST 154. J. Parmenter. A survey of American history from the beginnings through the Civil War. Topics include cultural encounters in the age of Columbus, European colonization, the American Revolution, the early republic, westward expansion, and the origins and outcome of the Civil War. (AM)

HIST 154(1531) Introduction to American History (also AM ST 104[1531]) (HA-AS)

Summer and spring. 4 credits. HIST 153 is not a prerequisite for HIST 154. D. Chang. An introductory survey of the development of the United States since the Civil War. (AM)

HIST 190(1900) Introduction to Asian Civilizations @ # (HA-AS)

Spring. 4 credits. T. J. Hinrichs and K. Hirano.

Survey of East Asian history from antiquity to around 1800. The primary purpose is to provide students with a basic literacy in East Asian history and cultures. Emphasis on comparison of phenomena between China and Japan, including state formation, barbarians and empire, roles of Confucianism and Buddhism, the emergence of new ruling classes, family and gender, peasant uprisings, urbanization and popular culture, and outlaws. (AS)

HIST 191(1910) Introduction to Modern Asian History (also ASIAN 191[1191]) @ (HA-AS)

Fall. 4 credits. J. V. Koschmann and T. Loos.

The history of Asia-Pacific from the 19th century to the present, focusing on relations of India and Southeast Asia with each other and with the west. (AS)

HIST 195(1950) Colonial Latin America (also LAT A/AIS 195[1950]) # @ (HA-AS)

Fall. 4 credits. Staff.

This course examines the colonial "encounter" of Iberia, Africa and the New World, which began in 1492. Topics include economic and social organization of the colonies; the cultural hybridity that preceded as well as developed within colonialism; the production of ethnicity and race; slavery, forced labor and economic stratification; intellectual currents and daily life; indigenous and slave resistance and rebellion; and independence. (LA)

[HIST 196(1960) Modern Latin America (also LAT A 196[1960]) @ (HA-AS)

Spring. 4 credits. Next offered 2008–2009. M. Roldan.]

HIST 201(2001) Supervised Reading

Fall or spring. 2 credits. Prerequisite: junior or senior standing. Permission of instructor required. Staff. (HR)

Sophomore Seminars**HIST 202(2020) The Court, Crime, and the Constitution (also AM ST 204[2022]) (HA-AS)**

Fall. 4 credits. Limited to 15 students. Designed for sophomores but open to others as space permits. Permission of instructor required. R. Polenberg.

A seminar designed for sophomores but open to others as space permits. An examination of 20th-century Supreme Court decisions on such issues as the "third degree," illegal search and seizure, the exclusionary rule, and the right against self-incrimination. Special attention will be given to events leading up to *Miranda v. Arizona* in 1966, and to the ways the Court has modified that holding. (AM)

[HIST 203(2030) Wilderness in North American History and Culture (also AM ST 203[2033]) # (HA-AS)

Fall. 4 credits. Limited to 15 students. Priority given to sophomores. Students must commit to a weekend-long field trip in Sept. Next offered 2008–2009. A. Sachs.]

[HIST 205(2050) The French Enlightenment: Methods, Ambitions, Contradictions # (HA-AS)

Fall. 4 credits. Limited to 15 students. Next offered 2008–2009. S. Kaplan.]

HIST 206(2061) Small Wars in Greece and Rome (also CLASS 216[2616]) # (HA-AS)

Fall. 4 credits. Limited to 15 students. B. Strauss.

A study of insurgencies, guerrillas, banditry, unconventional warfare, and low-intensity conflict in the ancient world. Topics include piracy; raiding and economic warfare; urban combat; peltasts and other light-armed troops; uprisings against Rome in Spain, Asia Minor, and North Africa; slave revolts and the Spartacus rebellion. Readings in ancient sources in translation and in modern scholarship. (EA)

[HIST 207(2070) The Occidental Tourist: Travel Writing and Orientalism in Southeast Asia (also HIST 507[5070], ASIAN 206[2660]) @ (CA-AS)

Spring. 4 credits. Limited to 15 students. Prefer (but not required) that students have taken HIST 191 or 396. Letter grades only. Next offered 2008–2009. T. Loos.]

[HIST 208(2081) Microhistory and the Margins of Early Modern European # (HA-AS)

Spring. 4 credits. Limited to 15 students. Next offered 2009–2010. D. Corpis.]

[HIST 209(2090) Seminar in Early American History (also AM ST/FGSS 209[2090]) # (HA-AS)

Fall. 4 credits. Limited to 20 students. Next offered 2008–2009. M. B. Norton.]

[HIST 210(2100) The Government of God # (HA-AS)

Spring. 4 credits. Limited to 15 students. Next offered 2008–2009. O. Falk.]

HIST 211(2110) Black Religious Traditions: Sacred and Secular (also AM ST 251[2110], RELST 211[2110]) (HA-AS)

Spring. 4 credits. Limited to 15 students. Letter grades only. M. Washington.

A survey on the black religious and spiritual traditions during bondage and the early years of freedom. This course will examine slave religion, the rise of black churches in the North, the formation of black churches after the Civil War, the independent church movement and the church's role in social protest. (AM)

This is a special seminar sponsored by the John S. Knight Institute's Sophomore Seminars Program. Seminars offer discipline-intensive study within an interdisciplinary context. While not restricted to sophomores, the seminars aim at initiating students into the discipline's outlook, discourse community, modes of knowledge, and ways of articulating that knowledge. Enrollment is limited to 15. Special emphasis is given to strong thinking and writing and to personalized instruction with top university professors.

[HIST 212(2120) African-American Women in the 20th Century (also AM ST/FGSS 212[2120]) (HA-AS)

Spring. 4 credits. Limited to 15 students. Next offered 2008–2009. M. Washington.]

[HIST 214(2141) Crusade, Heresy, and Inquisition in the Medieval Mediterranean (also RELST 215[2150]) # (HA-AS)

Spring. 4 credits. Limited to 15 students. Next offered 2009–2010. P. Hyams.]

[HIST 215(2150) Middle Ages on Film # (HA-AS)]

Spring. 4 credits. Limited to 15 students. Next offered 2008-2009. P. Hyams.]

[HIST 216(2160) Gender and Colonization in Latin America (also LAT A 216[2161], FGSS 216[2160]) @ (HA-AS)]

Spring. 4 credits. Limited to 15 students. Staff.

This sophomore seminar examines questions of gender and sexuality in the conquest and colonization of Latin America, 1492-1820. Topics will include: Iberian masculinity, men and women and the conquest; changes in indigenous gender roles as a result of colonization; gender in a society with slavery; honor and sexuality across classes and ethnic groups; nations, nationalism and gender in the 19th century. (LA)

[HIST 217(2171) Classic Works of American Cultural Criticism (also AM ST 217[2171]) (HA-AS)]

Fall. 4 credits. M. Kammen.

The purpose of this seminar is to read and reflect upon major works of American cultural criticism, from Mark Twain's *Innocents Abroad* (1869) and Thorstein Veblen's *Theory of the Leisure Class* (1899) to recent critiques of consumerism, multiculturalism, and the media. There will also be an opportunity to examine what important European critics have said about American culture. Many of the texts are rich in humorous satire yet serve as benchmarks of cultural change for more than a century in the U.S. Several short essays and one longer one required. No exams. (AM)

[HIST 218(2180) Seminar on Genocide (HA-AS)]

Fall. 4 credits. Limited to 15 students. Next offered 2008-2009. I. Hull.]

[HIST 219(2190) Women and Gender in South Asia: State and Society from Pre-colonial to Post-colonial (also ASIAN 219[2191], FGSS 219[2190]) @ (HA-AS)]

Fall. 4 credits. Limited to 15 students. Next offered 2008-2009. D. Ghosh.]

[HIST 220(2200) Travel in American History and Culture (also AM ST 218[2200]) (HA-AS)]

Spring. 4 credits. Limited to 15 students. A. Sachs.

Gertrude Stein, describing America, said, "Conceive a space that is filled with moving. . . ." This sophomore seminar journeys through U.S. history, from Puritan captivity narratives to the movie *Thelma and Louise*, to explore the many meanings of motion and mobility in American culture. Why is the road trip such an enduring trope in America? Do we live in a particularly unsettled nation? If mobility frees some people, does it trap others? What's the difference between trips taken at the speed of nature (by river power or leg power, for instance) and trips taken at the speed of machines (by planes, trains, or automobiles)? Have road trips ever changed American history? Has American history changed the nature of road trips? We'll read exploration narratives, novels of the high seas, tourist guides, histories of transportation, and theories of travel. (AM)

[HIST 221(2211) Seminar: The Blues and American Culture (also AM ST 205[2211]) (HA-AS)]

Fall. 4 credits. Limited to 15 students. Permission of instructor required. Next offered 2009-2010. R. Polenbergl.]

[HIST 223(2230) International Law (HA-AS)]

Spring. 4 credits. Limited to 15 students. Next offered 2009-2010. I. Hull.]

[HIST 224(2240) Art and Politics in 20th-Century Latin History @ (HA-AS)]

Spring. 4 credits. Limited to 15 students. Next offered 2009-2010. M. Roldan.]

[HIST 226(2261) Society and Religion in China (also ASIAN 226[2226]) @ # (HA-AS)]

Fall. 4 credits. Limited to 15 students. Next offered 2008-2009. T. J. Hinrichs.]

[HIST 227(2271) Family Life in Renaissance Italy (also ITAL 227[2270]) # (HA-AS)]

Spring. 4 credits. Limited to 15 students. Next offered 2008-2009. J. Najemy.]

[HIST 228(2280) Indian Ocean World (also ASIAN 228[2228]) @ # (HA-AS)]

Spring. 4 credits. Limited to 15 students. Next offered 2008-2009. E. Tagliacozzo.]

[HIST 229(2290) Jefferson and Lincoln: American Ideas about Freedom (also AM ST 229[2290]) (HA-AS)]

Spring. 4 credits. Limited to 15 students. Priority given to underclassmen. Next offered 2007-2008. E. Baptist.]

[HIST 230(2300) Seminar in History and Memory @ (HA-AS)]

Fall. 4 credits. Limited to 15 students. Next offered 2008-2009. J. V. Koschmann.]

[HIST 234(2340) Seminar: Gender in Early Modern Europe # (CA-AS)]

Fall. 4 credits. Limited to 15 students. Designed for underclassmen but open to all students. Permission of instructor required. Next offered 2008-2009. R. Weil.]

[HIST 235(2350) Antisemitism and the Crisis of Modernity (also JWST 254[2350]) (HA-AS)]

Fall. 4 credits. Limited to 15 students. V. Caron.

This course will examine the role of antisemitism in 19th- and 20th-century European ideological, political and socioeconomic developments. Attention will be paid to the way in which antisemitism illuminates the underside of European history, allowing us to see how anti-Jewish intolerance and prejudice becomes embedded in the world views of significant sectors of the European populations, culminating in the Holocaust. Topics will include: the Christian roots of antisemitism and the extent to which modern antisemitism marks a break with the medieval past; the politicization of antisemitism by both Left and Right; the role of antisemitism in socioeconomic conflicts linked to the rise of capitalism; Jewish responses to antisemitism; antisemitism in the Nazi and Fascist revolutions; and contemporary interpretations of antisemitism. (EM)

[HIST 236(2360) Native Peoples of the Northeast (also AM ST 236[2360]) # (HA-AS)]

Spring. 4 credits. Limited to 15 students. J. Parmenter.

This seminar examines the history and culture of the indigenous peoples of northeastern North America, from ancient times through the era of contact with Europeans to the present day. The course emphasizes the fascinating and dramatic series of transformations and adaptations (undertaken) by the Native peoples of the Northeast which have contributed to their survival in the 21st century. Readings and discussions will be drawn from a variety of sources, including historical documents, traditional narratives, archaeological reports, ethnography, literature, online resources, and museum exhibits of material culture. (AM)

[HIST 238(2431) Families in China since the 17th Century (also ASIAN 238[2238]) @ (HA-AS)]

Spring. 4 credits. Limited to 15 students. Next offered 2008-2009. S. Cochran.]

[HIST 239(2390) Seminar in Iroquois History (also AM ST 238[2390], AIS 239[2390]) # (HA-AS)]

Fall. 4 credits. Limited to 15 students. J. Parmenter.

This seminar explores the history and culture of Iroquois people from ancient times, through their initial contacts with European settlers, to their present-day struggles and achievements under colonial circumstances in North America. Adopting an interdisciplinary perspective, students will be exposed to a variety of methodologies and approaches to reconstructing the Iroquois past. Readings and discussions will be drawn from a range of sources, with special emphasis on historical documents. In addition to these texts, we will read traditional narratives, archaeological reports, ethnography, contemporary Iroquois literature, online resources, and museum exhibits of material culture. (AM)

[HIST 241(2410) Riot and Revolution in 19th-Century Africa: The Birth of the Modern @ # (HA-AS)]

Fall. 4 credits. Limited to 15 students. Next offered 2008-2009. S. Greene.]

[HIST 242(2420) Religion and Politics in American History: From J. Winthrop to R. Reed (also AM ST/RELST 242[2420]) (HA-AS)]

Spring. 4 credits. Limited to 15 students. Permission of instructor required. Next offered 2008-2009. R. L. Moore.]

[HIST 243(2430) History of Things (HA-AS)]

Fall. 4 credits. Limited to 15 students. Next offered 2008-2009. E. Tagliacozzo.]

[HIST 244(2440) The United States in Vietnam (HA-AS)]

Fall. 4 credits. Limited to 15 students. Next offered 2009-2010. F. Logevall.]

[HIST 245(2450) Drugs: People, Policies, Politics (also LAT A 245[2450]) @ (HA-AS)]

Spring. 4 credits. Limited to 15 students. Recommended: previous course in Latin American history. M. Roldan.

This seminar uses the narcotics trade to examine a variety of issues in historical perspective: migration, human rights, smuggling, international trade and foreign policy. The temporal focus is the period between the 1920s and the present. (LA)

[HIST 247(2470) The Age of Charlemagne (HA-AS)]

Spring. 4 credits. Limited to 15 students.
Next offered 2008–2009. P. Hyams.]

HIST 248(2480) Ghosts and Legacies: The Construction of Public Memory (HA-AS)

Fall. 4 credits. Limited to 15 students.
J. Weiss.

Focusing principally on instances of guilty and divisive pasts produced by genocide, civil war, or colonial struggles, this course will investigate how contemporary politics, in Europe and America, shaped the perception of past events; how strategies of forgetting succeeded in repressing the memory of guilty pasts and what happened when they failed; and how the public memory of traumatic events was shaped in films, literature, and other cultural locations. (EM)

[HIST 249(2491) French Social Thought from Rousseau to Foucault (HA-AS)]

Spring. 4 credits. Limited to 15 students.
Next offered 2008–2009. C. Rohcis.]

Lecture Courses**HIST 250(2500) Technology in Society (also ENGRG/ECE 250(2500), S&TS 250(2501)) (HA-AS)**

Fall. 3 credits. R. Kline.
For description, see ENGRG 250. (IIS)

HIST 251(2510) Race and Popular Culture (also AM ST 250(2501)) (HA-AS)

Spring. 4 credits. M. Washington.
This course examines the intersection of race and popular culture in America, historically and thematically, focusing primarily on the black-white experience. Genres of minstrelsy, radio, film, and music provided forms of entertainment that were also mediums through which the racial "other" (black in this case) was often ridiculed and denigrated in order to promote and sustain "whiteness." However some appropriation of the "other" might involve genuine regard/appreciation of diverse cultural forms. This course explores the intersection of racial imagery, racial stereotypes, cultural borrowing and the cultural diffusion in 19th- and 20th-century America. (AM)

[HIST 252(2520) Modern East-Central Europe (HA-AS)]

Fall. 4 credits. Next offered 2008–2009.
H. Case.]

[HIST 255(2550) The Past and Present of Pre-Colonial Africa (also AS&RC 256(2303)) @ (HA-AS)]

Spring. 4 credits. Next offered 2008–2009.

B. Strauss.]

HIST 257(2571) China Encounters the World (also ASIAN 257(2257), CAPS 257(2570)) @ (HA-AS)]

Spring. 4 credits. J. Chen.
This is a lecture and discussion course focusing on how China has encountered the world since the 17th century, with an emphasis on the late 19th and 20th centuries. In particular, it will analyze the age-old Chinese "Central Kingdom" conception and

how the conception was challenged during modern times as the result of Western and Japanese incursion and China's inability to deal with the consequences of the incursion. It will further analyze the impact of the Chinese "victim mentality" in order to pursue a deeper understanding of why radical revolutions have dominated China's modern history. While the emphasis of this course is China's external relations, foreign policy issues will be examined in the context of China's political, economic and social developments in broader terms. The course's purpose is not just to impart information but also to cultivate a basic understanding of the significance of the Chinese experience in the age of worldwide modernization. Grade in this class will be calculated on the basis of class participation, quizzes, midterm and final exams, and one essay assignment. (AS)

[HIST 259(2590) The Crusades # @ (HA-AS)]

Spring. 4 credits. Next offered 2008–2009.
P. Hyams.]

HIST 260(2600) Latinos in the United States: Colonial to 1898 (also LSP 260(2600), AM ST 259(2599)) # (HA-AS)]

Fall. 4 credits. M. C. Garcia.
This course examines the history of Latino populations in the United States from the Colonial period to 1898: how Mexican American, Puerto Ricans, Cubans, and other Latino populations emerged, and how they responded to and reshaped the societies in which they lived. Much of the course focuses on the "facts" of history (e.g. the Latino experience during key moments in American History such as the Texas revolution, the conquest of the West, the Spanish-American evidence and conflicting interpretations). Readings will draw from political, social and cultural history. (AM)

HIST 261(2610) Latinos in the United States: 1898 to the Present (also AM ST/LSP 261(2610)) # (HA-AS)]

Spring. 4 credits. M. C. Garcia.
This course examines the history of various Latino populations in the United States since 1898. Some of the topics we will discuss include: immigration as a product of U.S. hemispheric policies; the civil rights struggles of the 20th century and the evolution of a distinct "Latino" identity; the "new" migration from Latin America; the transnational influence of immigrant communities on their homelands. (AM)

HIST 262(2620) The Middle Ages: Introduction and Sampler # (CA-AS)]

Summer and fall. 4 credits. P. Hyams.
This single-semester alternative to HISTORY 263–4 targets the intelligent student seeking an accelerated entrance to the formative period of Western Civilization during the Middle Ages. It therefore aims to convey what was significant in that area of the "West" that became Europe, between the end of the Roman Empire in the West and the Renaissance, say 395–1450. Students may expect to gain a basic knowledge of the events and institutions of Medieval Christendom. The real and more ambitious goal is, however to introduce some of the choicer aspects of the medieval world, those judged most likely to intrigue, delight and satisfy. This Medieval Sampler is like a classic French hors d'oeuvre, in that it presents for the discriminating palate some of the very

best dishes known to the chef. Among these dishes figure Beliefs, Gender and Power Relations, Economics (Greed and Subsistence), Arts and Entertainments (Architecture, Literature, Music, Painting), even some Deviance and Protest. There are some interesting assignments, too. (ER)

HIST 264(2640) Introduction to Asian American History (also AAS 213(2130), AM ST 213(2610)) (HA-AS)]

Spring. 4 credits. D. Chang.
An introductory history of Chinese, Japanese, Asian Indians, Filipinos, and Koreans in the United States from the mid-19th century to the 1990s. Major themes include racism and resistance, labor migration, community formation, imperialism, and struggles for equality. (AS)

HIST 265(2650) Ancient Greece from Homer to Alexander the Great (also CLASS 265(2650)) # (HA-AS)]

Fall. 4 credits. Open to freshmen.
B. Strauss.
A survey of Greece from the earliest times to the end of the Classical period in the late fourth century B.C. The course focuses on the Greek genius: its causes, its greatness, its defects, and its legacy. The Heroic Age, the city-state, ancient democracy, and the intellectual ferment of the Greek Enlightenment are the main topics of study. Readings in translation from Homer, Aristophanes, Sophocles, Herodotus, Thucydides, Plato, Aristotle, and from the evidence of ancient inscriptions, coins, art, and architecture. (EA)

HIST 266(2660) Introduction to Native American History (also AM ST/AIS 266(2660)) (HA-AS)]

Spring. 4 credits. J. Parmenter.
With the abandonment of earlier perspectives grounded in romantic and evolutionary stereotypes, Native American history represents today one of the most exciting, dynamic, and contentious fields of inquiry into America's past. This course introduces students to the key themes and trends of the history of North America's indigenous peoples by taking an issues-oriented approach. We will cover material ranging from the debate over the Native American population at the time of first European contact to contemporary social and political struggles over casino gambling and land claims. The course stresses the ongoing complexity and change in Native American societies and will emphasize the theme of Native peoples' creative adaptations to historical change. (AM)

[HIST 267(2670) History of Rome I (also CLASS 267(2683)) # (HA-AS)]

Fall. 4 credits. Next offered 2009–2010.

HIST 273(2730) Women in American Society, Past and Present (also AM ST/FGSS 273[2730]) # (HA-AS)

Spring. 4 credits. M. B. Norton.

A survey of women's experiences in America from the 17th century to the present. Among the topics to be discussed are women's familial roles, the changing nature of household work, the women's rights movement, employment of women outside the home, racial and ethnic differences in women's experiences, and contemporary feminism. (AM)

[HIST 274(2740) Foodways: A Social History of Food and Eating # (HA-AS)

Summer and fall. 4 credits. Next offered 2008-2009. S. Kaplan.]

HIST 275(2750) History of Modern South Asia (also ASIAN 275[2275]) @ # (HA-AS)

Fall. 4 credits. D. Ghosh.

This introductory course is a broad survey of the history of the Indian subcontinent from the end of the Mughal empire around 1700 to the present. This course is framed by two major transitions: from a Mughal government to British colonial government, and from colonialism to several postcolonial states. Prominent themes in the course include the emergence of religious and regional identities, ethnic violence, social reform and the "woman question," deindustrialization, and nationalism. Using primary sources and scholarly articles by a varied group of scholars, this course questions whether there is such a thing as one history of South Asia. (AS)

HIST 276(2674) History of the Middle East in the 20th Century (also NES/JWST 274[2674], GOVT 274[2747]) @ # (HA-AS)

Fall. 4 credits. Z. Fahmy.

HIST 280(2800) Introduction to Korea (also ASIAN 218[2218]) @ (CA-AS)

Spring. 3 credits. M. Shin.

For description, see ASIAN 218. (AS)

HIST 281(2810) Science in Western Civilization: Medieval and Early Modern Europe up to Isaac Newton (also S&TS 281[2811]) # (HA-AS)

Fall. 4 credits. HIST 281 in not a prerequisite for HIST 282. P. Dear.

This course aims to make comprehensible both to science majors and to students of the humanities the historical structure and development of modern science and to show sciences as a cultural phenomenon. Changing perceptions of nature and human knowledge from Greek Antiquity to the 20th century form the framework for current Western views of the world, while the roots of the present-day dominance of "science" as a symbol of progress of modernity lie in an alliance between knowledge of nature and power over nature that took shape in the 19th century after a long period of emergence. HIST 281 runs chronologically up to the death of Isaac Newton and focuses on the cultural traditions of Christian Europe and its selective appropriation of a Greek heritage. (HS)

HIST 282(2820) Science in Western Civilization: Newton to Darwin; Darwin to Einstein (also S&TS 282[2821]) # (HA-AS)

Spring. 4 credits. HIST 281 in not a prerequisite for HIST 282. S. Seth.

This course aims to make comprehensible both to science majors and to students of the humanities the historical structure and development of modern science and to show sciences as cultural phenomena. Changing perceptions of nature and human knowledge from Greek Antiquity to the 20th century form the framework for current Western views of the world, while the roots of the present-day dominance of "science" as a symbol of progress and modernity lie in an alliance between knowledge of nature and power over nature that took shape in the 19th century after a long period of emergence. This course covers the 18th, 19th, and early 20th centuries. (HS)

[HIST 285(2850) From Medievalism to Modernity: The History of Jews in Early Modern Europe, 1492 to 1789 # (HA-AS)

Fall. 4 credits. Next offered 2008-2009.

V. Caron.]

HIST 286(2861) History of Zionism and the Birth of Israel @ (HA-AS)

Spring. 4 credits. Next offered 2008-2009.

V. Caron.]

HIST 287(2870) Evolution (also BIOEE 207[2070], S&TS 287[2871]) (PBS)

Fall. 3 credits. W. Provine.

For description, see BIOEE 207. (HS)

HIST 289(2890) The U.S.-Vietnam War (also ASIAN 298[2298]) @ (HA-AS)

Fall. 3 credits. K. Taylor.

For description, see ASIAN 298. (AS)

HIST 291(2910) Modern European Jewish History, 1789 to 1948 (HA-AS)

Fall. 4 credits. V. Caron.

Jewish life in Europe experienced a profound transformation as a result of the process of Jewish emancipation which began at the end of the 18th century. While emancipation offered Jews unprecedented social, economic and political opportunities, it also posed serious challenges to traditional Jewish life and values by making available new avenues of integration. This course will examine the ways in which Jewish and non-Jewish society

responded to these new developments from the 18th-century Enlightenment to the post-World War II era. Topics will include Jewish responses to emancipation, including assimilation and new varieties of religious accommodation; the development of modern antisemitism; the rise of Zionism and the creation of the state of Israel; the modernization of Eastern European Jewry; the impact of mass immigration; and the Nazi era. (EM)

[HIST 292(2920) Inventing an Information Society (also ENGRG/ECE 298[2980], S&TS 292[2921]) (HA-AS)

Spring. 3 credits. Next offered 2008-2009.

R. Kline.]

HIST 294(2940) History of China in Modern Times (also ASIAN 294[2294]) @ (HA-AS)

Fall. 4 credits. S. Cochran.

A survey that concentrates on the rise of the last imperial dynasty in the 17th and 18th centuries, the upheavals resulting from domestic rebellions and foreign imperialism in the 19th century, and the 20th-century efforts to achieve social mobilization, political unity, and commercial expansion. (AS)

[HIST 295(2950) Introduction to the History, Language, and Culture of the Balkans (HA-AS)

Spring. 4 credits. Next offered 2009-2010.

J. Weiss.]

HIST 297(2971) Politics, Culture, and Society in Early Modern Europe, 1450-1789 # (HA-AS)

Fall. 4 credits. D. Corpis.

This course offers an overview of the "early modern" period of European history (c. 1500-1800) by charting the shifts and changes in religion, culture, politics, and economics during the 16th, 17th, and 18th centuries. Specific topics explored in weekly lectures will include the Reformation and Counter Reformation, political centralization, intellectual fragmentation, the institutionalization of science, the Enlightenment, and political rebellion and revolution. In addition to focusing on some of the key developments in European history during this period, the design of the course recognizes the necessity of locating European history within a broader geographic world, so we will also explore the question of European contacts with other cultures, colonial expansion, and Atlantic slavery. (EM)

HIST 302(3002) Supervised Research

Fall and spring. 3 or 4 credits. Prerequisite: junior or senior standing. Permission of instructor required. Staff. (HIR)

HIST 303(3030) African-American Women in Slavery and Freedom (also FGSS 307[3070], AM ST 303[3030]) # (HA-AS)

Fall. 4 credits. Letter grades only.

M. Washington.

Historical exploration of African-American women from a sociopolitical perspective. Topics include women in Africa, slavery and freedom, labor, the family, gender cross-racially that begins with the African background and ends at 1900. (AM)

[HIST 305(3050) Britain, 1660 to 1815 # (HA-AS)

Fall. 4 credits. Next offered 2008-2009.

R. Weil.]

[HIST 306(3060) Modern Mexico: From Independence to the Zapatistas (also LAT A 306(3060)) @ (HA-AS)]

Spring. 4 credits. Next offered 2009–2010. R. Craib.]

[HIST 307(3070) British History, 1760–1870 # (HA-AS)]

Fall. 4 credits. T. R. Travers.

An introduction to British history from the accession of George III to Gladstone's first administration, with particular attention to political and social change. Major topics include: war and national identity, industrial development, gender and class-relations, and Britain's relationship with its colonies. Sources include writings by Burke, Paine, Wollstonecraft, Dickens, and Florence Nightingale. (EM)

[HIST 308(3080) History of Post-War Germany (1945 to Present) (HA-AS)]

Fall. 4 credits. I. Hull.

This course examines modern Germany in the aftermath of World War II. It compares the experiences of East and West Germany, their state forms and cultures. It explores the collapse of East Germany and the continuing effects of the hurried reunification. The course poses many questions, among them: How did the victorious allies try to administer the defeated land? How did Germans, East and West, try to come to grips with the Nazi past and its crimes? How does one reconstitute civil society after dictatorship and war? How did the communist regime function? Why did it fall? What are the main challenges Germany now faces in building a unified society and in regaining its place as a power in Europe? (EM)

[HIST 309(3090) History and Geographical Imagination @ # (HA-AS)]

Fall. 4 credits. Next offered 2008–2009. R. Craib.]

[HIST 310(3101) British History, 1870–Present (HA-AS)]

Spring. 4 credits. T. R. Travers.

An introduction to British history from Gladstone to Tony Blair, with particular attention to political and social change. Topics will include: the growth of mass politics, democracy and the welfare states; the impact of world wars, imperialism and decolonization; and Britain's changing relations with Europe and the U. S. (EM)

[HIST 311(3110) Andean History and Ethnohistory (also LAT A 311[3110]) @ # (HA-AS)]

Spring. 4 credits. Staff.

The Andean region of South America—comprising the modern nations of Peru, Ecuador and Bolivia—has a rich documentary history going back thousands of years, from major prehispanic civilizations (most famously the Incas) to its role as an important center in the Spanish colonial empire to modern revolutions and movements for indigenous rights. Through critical readings of historical texts as well as archaeological artefacts, we will examine key junctures in Andean history, especially from the perspectives of indigenous peoples. (LA)

[HIST 312(3120) Forging Nations: Experiments in Latin American Nation-Building and Reform (also LAT A 312[3211]) @ (CA-AS)]

Fall. 4 credits. Next offered 2008–2009. M. Roldan.]

[HIST 313(3130) U.S. Foreign Relations, 1750–1912 (also AM ST 318[3130]) # (HA-AS)]

Fall. 4 credits. F. Logevall.

Examines the development of the U.S. continental and global empires by analyzing policy and policy makers from Benjamin Franklin to Willard Straight. Emphasis is placed on domestic events that shaped foreign policy. In conjunction with HIST 313, a special 2-hour course, 201, for discussion and guided research will be offered. (AM)

[HIST 314(3140) History of American Foreign Policy, 1912 to the Present (also AM ST 312[3140], CAPS 314[3140]) (HA-AS)]

Spring. 4 credits. F. Logevall.

Students examine the emergence of the United States as a world power in the 20th century. The course focuses on the domestic sources of foreign policy and the assumptions of the major policy makers (Wilson through Clinton). Important themes include the American response to a revolutionary world since 1912, the role of American racial views in the making of foreign policy, and the increasingly dominant role of the president in the making of U.S. foreign policy. (AM)

[HIST 315(3150) Environmental History: The United States and Beyond (also AM ST 349[3510]) # (HA-AS)]

Spring. 4 credits. Next offered 2008–2009. A. Sachs.]

[HIST 316(3160) American Political Thought: From Madison to Malcolm X (also AM ST 376[3665], GOVT 366[3665]) # (HA-AS)]

Fall. 4 credits. Next offered 2009–2010. I. Kramnick.]

[HIST 318(3180) American Constitutional Development (also AM ST 317[3180]) (HA-AS)]

[HIST 319(3191) Martial Arts and Society and Religion (also ASIAN 391[3391]) @ (HA-AS)]

Fall. 4 credits. Next offered 2009–2010. T. J. Hinrichs.]

[HIST 320(3200) The Viking Age # (HA-AS)]

Spring. 4 credits. O. Falk.

This course aims to familiarize students with the history of Scandinavia, ca. 800–1100 AD. Although well-known as a dramatic chapter in medieval history, this period remains enigmatic and often misunderstood. Our goal will be to set Norse history within its European context, observing similarities with processes elsewhere in the medieval world, the better to perceive what makes the Norse unique. We will examine the social, economic and political activities of the Norsemen in continental Scandinavia, in Western and Eastern Europe, and in the North Atlantic. (ER)

[HIST 321(3210) Colonial North America to 1763 (AM ST 321[3210]) # (HA-AS)]

Fall. 4 credits. Next offered 2008–2009. M. B. Norton.]

[HIST 323(3231) Race and Politics in 20th-Century America (also AM ST 325[3231]) (HA-AS)]

Fall. 4 credits. J. Sokol.

This course picks up the tale after the Populist revolt of the 1890s, and moves through the

20th century. It focuses initially on the Jim Crow South, and later expands its geographic scope to cover the entire nation. The course acquaints students with characters as disparate as Huey Long, Fannie Lou Hamer, George Wallace, Martin Luther King, Jr., and Malcolm X, while it explores the New Deal, the Dixiecrat walkout, the civil rights movement, the "white backlash," and a variety of recent presidencies. Throughout, the American experience intimately bound politics with race relations. We will pursue many topics within this larger rubric—from national politicians and famous figures to local movements. This course places special emphasis on the years after World War II, the advent of the civil rights movement, and its lasting impact on liberalism, conservatism, and American society. (AM)

[HIST 324(3240) Varieties of American Dissent, 1880–1900 (also AM ST 324[3240]) (HA-AS)]

Fall. 4 credits. Next offered 2008–2009. N. Salvatore.]

[HIST 325(3250) Age of the American Revolution, 1754 to 1815 (also AM ST 322[3250]) # (HA-AS)]

[HIST 326(3260) History of the Modern British Empire (HA-AS)]

Fall. 4 credits. Next offered 2008–2009. T. R. Travers.]

[HIST 327(3270) The Old South # (HA-AS)]

Spring. 4 credits. Next offered 2008–2009. E. Baptist.]

[HIST 328(3280) Construction of Modern Japan (also ASIAN 328[3328]) @ # (HA-AS)]

Spring. 4 credits. Next offered 2008–2009. J. V. Koschmann.]

[HIST 329(3290) Making Modern Science (also S&TS 330[3301]) (HA-AS)]

Fall. 4 credits. Next offered 2008–2009. S. Seth.]

[HIST 330(3300) Japan from War to Prosperity (also ASIAN 335[3335]) @ (HA-AS)]

Spring. 4 credits. Next offered 2009–2010. J. V. Koschmann.]

[HIST 331(3310) Causes of the American Civil War, 1815 to 1860 (also AM ST 331[3310]) # (HA-AS)]

Fall. 4 credits. E. Baptist.

A study of the simultaneous growth and growing-apart of the United States in the years from the end of the War of 1812 to the beginning of the Civil War. We will examine the political, social, economic, and cultural history of this era in order to understand why the United States became a vast, successful, transcontinental republic. We will also try the same history to understand why it simultaneously split apart and plunged into a civil war that would ultimately cost over 600,000 lives. (AM)

[HIST 333(3331) Latin American Studies: Issues in Interdisciplinary Perspective (also LAT A 330[3300])]

Fall. 4 credits. M. Roldan and J. Henderson.

Introductory course recommended for those concentrating in Latin American Studies. Topics will vary by semester, but readings always focus on current research in various disciplines and regions of Latin America. The range of issues addressed include the

economic, social, cultural, and political trends and transitions in the area. In the weekly meetings, instructors and guest lecturers facilitate student discussions. Students taking the course are required to participate in all class discussions and write one research paper in their chosen focus area. (LA)

**[HIST 343(3430) American Civil War and
Reconstruction, 1860 to 1877 (also
AM ST 343[3430]) # (HA-AS)]**

Spring. 4 credits. E. Baptist.

A survey of the turning point of U.S. history: The Civil War (1861–1865) and its aftermath, Reconstruction (1865–1877). We will look at the causes, the coming, and the conduct, of the war, and the way in which it became a war for freedom. We will then follow the cause of freedom through the greatest slave rebellion in American history, and the attempts by formerly enslaved people to make freedom real in Reconstruction. And we will see how Reconstruction's tragic ending left questions open that are still not answered in U.S. society and politics. (AM)

1485 to 1660 # (HA-AS)]**

Fall. 4 credits. R. Weil.

This course will explore the crises of political, religious, and epistemological authority that plagued England in the 16th and 17th centuries. We will examine the political and cultural impact of the Protestant Reformation, the nature of Tudor despotism and Stuart absolutism, the construction of a rhetoric of political dissent around issues of sexuality and corruption, competing understandings of the social order and social control, the Puritan Revolution and the invention of liberalism. Emphasis on close reading of contemporary sources, from autobiography and drama to political theory. (EM)

**[HIST 361(3611) Bakumatsu-Ishin:
Conflicts and Transformations in
Early Modern Japan, 1700–1890 (also
ASIAN 361[3361]) @ (HA-AS)]**

Fall. 4 credits. K. Hirano.

This course explores Japan's tumultuous transformation from a samurai military government to a modern nation-state and its political and cultural implications for the present. It has been debated among both Japanese and American historians whether or not Japan's modern transformation is best understood as a "restoration (of imperial rule)" or as a "revolution." The choice of word as a descriptive category matters to the extent that it reveals one's perspective on this event. "Restoration" expresses the view that Japan's metamorphosis into a modern society was a relatively uneventful and smooth "transition" carried out by a handful of leaders whereas "revolution" recognizes Japan's experience as one of the great transformations in which people from different segments of society

participated for various reasons and motives. In this class, we will examine this event as a revolution, thus paying close attention to a wide range of ideas, activism, and practices such as samurai loyalism, peasant uprisings, popular culture, millenarianism, the exploration of western forms of knowledge and power, nation-state building and new ideologies of time (progress) and space (national identity). In other words, we seek to understand Japan's transformation as a fairly long, multifaceted and widely participated process of intense intellectual and cultural criticism as well as social and political activism. In addition to primary and secondary texts, we will read a few important theoretical works on revolution/social transformation for the purpose of critically examining the history of the fall of the Tokugawa samurai regime and creation of a modern social order, called bakumatsu-ishin in Japan. (AS)

**[HIST 363(3631) History of Battle (also
CLASS 362[3662]) (HA-AS)]**

Spring. 4 credits. B. Strauss and E. Baptist.
A study of battle and its changing character from the ancient world to the present day. Topics include the soldier's experience, command and control, tactics; technology, organization, and the nation; logistics and supply, battle and military strategy, battle and civilians, memory, historiography. (EA) (AM)

**[HIST 366(3661) History of Southern
Africa @ (HA-AS)]**

Fall. 4 credits. D. Magaziner.

This course traces the history of Southern Africa (South Africa and surrounding countries) from the early second millennium to the present day. Beginning with the geography and early history of farming and trade in the region, it moves quickly to explore the impact of the European colonialism in the 17th and 18th century, the often violent conflicts and conquest of the 19th century, and especially industrialization and social change at the turn of the 20th. The second half of the course focuses intently on the rise of segregation and apartheid during the 20th century and the slow process of decolonization after World War II. The final week looks at the present-day challenges facing the region, including AIDS, violence and continued poverty, within the context of global economies. (EM)

**[HIST 367(3671) Survey of German

knowledge of medieval European history.
Next offered 2008–2009. P. Hyams.]

HIST 369(3690) The History of Florence in the Time of the Republic, 1250 to 1530 # (HA-AS)

Spring. 4 credits. J. Najemy.
Florentine politics and society from the communal period through the age of Dante, the rise and decline of the guild republic, the age of civic humanism, and the rise of the Medici, to the crisis of the republic in the time of Machiavelli. Social classes and conflicts, the elite families, economic structures, the working classes, guilds, family history, women, and the political and historical ideas are considered in the context of the emergence and transformation of republican government. (ER)

HIST 370(3700) History of the Holocaust (also JWST 353(3700)) (HA-AS)

Spring. 4 credits. V. Caron.
This course will analyze the meaning of the Holocaust from three vantage points: that of European history; that of Jewish history; and that of those states and religious institutions that shared responsibility by having stood by in silence. Topics include: the evolution of modern anti-Semitism, the role of anti-Semitism in the Nazi ideology and program; the bureaucratization of death; Jewish life in ghettos and concentration camps; the fate of Jews in occupied Europe and the question of collaboration; Jewish political behavior under duress; the responses of the Western allies and the Churches; contemporary interpretations of the Holocaust and the meaning of evil. (EM)

HIST 371(3710) World War II in Europe (HA-AS)

Summer and fall. 4 credits. J. Weiss.
The Second World War remains the single most important set of events shaping the contemporary world. The course deals with both the events of World War II as they shaped European and world history and the way those events were remembered and commemorated in postwar years. Lectures, screenings, and readings will examine: the role of wartime political leaders and military commanders; the experience of war and occupation for soldiers and civilians, including Resistance movements and collaborators; Nazi genocide; intellectual and cultural changes during the war, including the impact on literature and philosophy; strategic questions about the origins and conduct of the war; the concluding phases involving the Nuremberg Trials, the Yalta and Potsdam conferences, and the launching of the Cold War; and the representation of the war in subsequent films, literature, and political culture. (EM)

[HIST 373(3730) Law, Crime, and Society in Early Modern Europe # (HA-AS)]

Spring. 4 credits. Next offered 2008–2009. D. Corpis.]

[HIST 375(3750) The African American Workers, 1865 to 1910: The Rural and Urban Experience (also ILRCB 385(3850)) # (HA-AS)]

Fall. 3 credits. Junior or senior standing or permission of instructor. Next offered 2008–2009. N. Salvatore.]

[HIST 376(3760) The African-American Workers, 1910 to the Present: Race, Work, and the City (also ILRCB 386(3860))]

[HIST 378(3780) Topics in U.S. Women's History (also AM ST 378(3780))]

Fall. 4 credits. Prerequisite: HIST/FGSS 273, 303, or 238 or permission of instructor. Next offered 2008–2009. M. B. Norton.]

HIST 379(3790) The First World War: Causes, Conduct, Consequences (HA-AS)

Spring. 4 credits. For freshmen, permission of instructor required. I. Hull.
This course examines the long-term and immediate political, social, and cultural causes of World War I, its catastrophic prosecution, and its revolutionary consequences. Recurring themes are: the building of nation-states, the diplomatic and military systems of the 19th and 20th centuries, mass mobilization, the development of mass violence, and the emergence of millenarian visions of the future. (EM)

[HIST 388(3880) History of Vietnam (also HIST 688(6880), ASIAN 385/685(3885/6885)) # (HA-AS)]

Fall. 3 credits. Next offered 2008–2009. K. Taylor.]

[HIST 395(3950) Premodern Southeast Asia (also HIST 695(6950), ASIAN 397(3970)) # (HA-AS)]

Fall. 4 credits. Open to undergraduates, and to graduate students, although with separate requirements. Next offered 2009–2010. E. Tagliacozzo.]

HIST 396(3960) Southeast Asian History from the 18th Century (also HIST 696(6960), ASIAN 396/696(3966/6966)) # (HA-AS)]

Spring. 4 credits. Graduate students must enroll in HIST 696. T. Loos.
Surveys the modern history of Southeast Asia with special attentions to colonialism, the Chinese diaspora, and socio-culture institutions. Considers global transformations that brought "the West" into people's lives in Southeast Asia. Focuses on the development of the modern nation-state, but also questions the narrative by incorporating groups that are typically excluded. Assigns primary texts in translation. (AS)

Honors Courses**HIST 400(4000) Honors Proseminar**

Fall and spring. 4 credits. Limited to 15 students. For prospective honors candidates in history. Permission of member of Honors Committee required. Fall, R. Weil; spring, F. Logevall.
An exploration of major contemporary approaches to historical inquiry, analysis, and presentation. Ways of thinking about history along with research methods and organization of the results will be considered by reading and discussing a variety of historical works. (HR)

HIST 401(4001) Honors Guidance

Fall. 4 credits. Prerequisite: HIST 400. Permission of instructor required. D. Ghosh. (HR)

HIST 402(4002) Honors Research

Spring. 4 credits. Prerequisite: HIST 400. Permission of instructor required. D. Ghosh. (HR)

Undergraduate Seminars**HIST 403(4030) History of the U.S. Senate in the 20th Century (also GOVT 400 (HA-AS))**

Fall and spring. 4 credits. Offered in Cornell in Washington Program. B. Koed.
This course will offer students an opportunity to view the process of shaping national debates from the perspective of the United States Senate. The modern Senate will serve as the point of reference for an inquiry into the development of the institution's powers under the Constitution during the past 200 years. Class readings, lectures and discussions will focus on the themes of continuity and change, the role of individual senators, and the institutional evolution of the Senate. In addition to general class reading and written examinations, each student will write a short paper and participate in an oral presentation. (AM)

[HIST 404(4041) Ethnicity, Race, and Indigeneity in Latin America (also HIST 607(6041), AIS 401) # (HA-AS)]

Fall. 4 credits. Limited to 15 students. Prerequisite: a previous course in Latin American history. Next offered 2008–2009. Staff.]

HIST 405(4050) U.S.–Cuba Relations (also HIST 605(6050), LAT A/LSP/AM ST 405/605(4050/6050)) (HA-AS)]

Spring. 4 credits. M. C. García.
The course examines the political, cultural, and economic relations between the United States and Cuba since the 18th century. Special attention is given to the transnational role of exiles and immigrants in shaping policy in both countries and across the region. (AM) (LA)

[HIST 406(4061) The New Cold War History (also HIST 606(6061)) # (HA-AS)]

Spring. 4 credits. Limited to 15 students. Next offered 2009–2010. J. Chen.]

HIST 408(4080) Feudalism and Chivalry: Secular Culture in Medieval France, 1000 to 1300 # (HA-AS)]

Fall. 4 credits. Recommended: HIST 262, 263, or 264. P. Hyams.

An upper-level seminar on the main currents of noble lay culture in France, which led European fashions in love, warfare, entertainment, and environment through most of the period. There will be heavy emphasis on contemporary sources (in English), including lively and complete readings from epic literature (the Song of Roland), lives, and chronicles. (EM)

HIST 409(4091) Contesting Identities in Modern Egypt (also NES 405(4605))]

Fall. 4 credits. Z. Fahmy.
This seminar examines the dynamics of modern collective identities which dominated the Egyptian public sphere in the long 20th century. We will explore the underpinnings and formation of territorial Egyptian nationalism, pan-Arabism and Islamism through close readings and class discussions of important theoretical, historiographical and primary texts. (NE)

[HIST 410(4100) Archipelago: Worlds of Indonesia (also HIST 617[6100], ASIAN 409/617[4409/6617]) @ (HA-AS)]

Spring. 4 credits. Open to undergraduates and graduate students, though with separate requirements. Limited to 15 students. Next offered 2008-2009. E. Tagliacozzo.]

[HIST 411(4111) Undergraduate Seminar: History of the American South (also AM ST 430[4302]) (HA-AS)]

Fall. 4 credits. E. Baptist.

This seminar will study the development of ideas about masculinity, femininity, blackness, and whiteness in the U.S. South from early settlement to the U.S. Civil War. We will discuss illicit sexuality, the origins of racism, interracial sex, violence, resistance, power, exploitation, and how the ideas and structures of power these phenomena helped generate shaped the everyday lives of African and European settlers and their descendants, even to the present day. (AM)

[HIST 415(4150) Seminar in the History of Biology (also BIOEE 467[4670], B&SOC/S&TS 447[4471]) (PBS)]

Summer or fall. 4 credits. Limited to 18 students. W. Provine.

For description, see BIOEE 467. (HS)

[HIST 416(4160) Undergraduate Seminar on Gender and Sexuality in Southeast Asia (also HIST 616[6160], FGSS 416/616[4160/6160], ASIAN 416/616[4416/6616]) @ (CA-AS)]

Fall. 4 credits. Letter grades only. T. Loos.

Students consider the relationships among colonialism and gender and sexual identity formation in Southeast Asia. Using material from a wide range of fields including anthropology and literature, the course complicates the simplistic East/West and male/female binary. (AS)

[HIST 417(4170) History of Jews in Modern France (also FREN 413[4130]) (HA-AS)]

Spring. 4 credits. Permission of instructor required. V. Caron.

This course will explore the integration of Jews into French society from the French Revolution to the present. Topics will include: the debate over Jewish emancipation during the Enlightenment, the French Revolution, and the Napoleonic era; the processes of religious and social assimilation; the rise of antisemitism and the Dreyfus Affair; Jewish responses to antisemitism; the immigrant challenge and refugee crisis of the 1930s; the Vichy era and Jewish resistance during World War II; and the reconstruction of the French Jewish community since 1945. (EM)

[HIST 419(4190) Seminar in American Social History (also AM ST 419[4190]) (HA-AS)]

Fall. 4 credits. Offered in Cornell in Washington Program. S. Blumin. (AM)

[HIST 420(4200) Asian American Communities (also AM ST 420[4200], AAS 424[4240]) (HA-AS)]

Spring. 4 credits. Limited to 15 students. D. Chang.

This seminar offers in-depth analysis of Asian American communities. Beginning in the mid-19th century and ending with the late 20th century, this course uses the community study as a lens to explore the development of Asian America. It focuses on themes of collective strategies of resistance to discrimination as

well as tensions within Asian American populations. Course materials include some of the most significant monographs recently published as well as primary documents. (AM)

[HIST 421(4210) Undergraduate Seminar in Cultural History (also AM ST 421[4210], ART H 421[4021])]

Fall. 4 credits. Limited to 15 students.

M. Kammen.

Topic for Fall 2007: Tocqueville's *Democracy in America*. This seminar will undertake a close reading of the most astute and influential inquiry ever made concerning politics and society in the United States, Alexis de Tocqueville's *Democracy in America* (2 vols. 1835-40). In addition, we will read Tocqueville's correspondence concerning the United States; some major secondary sources about Tocqueville and his companion Beaumont; two works by "moderns" who have done the "Tocqueville thing" (1982 and 2005); and assess the uses and abuses of Tocqueville's insights in recent American political discourse. How prophetic was this French political philosopher? (AM)

[HIST 422(4221) British in India, 1750-1830 @ # (HA-AS)]

Spring. 4 credits. Next offered 2008-2009.

T. R. Travers.]

[HIST 423(4230) Chronicles of the Conquest of Latin America (also LAT A 425[4250]) @ (HA-AS)]

Spring. 4 credits. Staff.

In this seminar we will examine the writings of participants in the conquest of colonization of Latin America. Readings include writings by European conquistadors, Amerindian elites, and non-alphabetic materials from the early colonial period. In particular we investigate how the history of the conquest itself and of the societies that existed prior to this contact were produced by its participants, with special attention to questions of ethnicity, gender, and class. (LA)

[HIST 424(4240) Art and Politics in 20th-Century Latin America @ (CA-AS)]

Fall. 4 credits. Limited to 15 students.

HIST 468(4680) Love and Sex in the Italian Renaissance (also ITAL 468(4680)) # (HA-AS)]

Spring. 4 credits. J. Najemy.

An exploration of the representation of love, sex, and eros in Italian Renaissance literature, and the attempts by secular governments and the Church to manage, discipline, and punish sexual transgression. Primary texts include Boccaccio's Decameron, 15th-century novella, plays by Machiavelli (Mandragola, Clizia) and Bibbiena (Calandria), and Aretino's Dialogues. Secondary readings include studies of sexual crime, love across social boundaries, prostitution, homosexuality, and lesbianism. (ER)

[HIST 469(4691) The Old English Laws and Their Politico-Cultural Context (also HIST 669(6691), ENGL 419(4190)) # (CA-AS)]

Fall. 4 credits. Next offered 2009–2010. P. Hyams and T. Hill.]

HIST 473(4731) Politics and Protest in America: From Civil Rights to the New Conservatism (also AM ST 473(4731)) (HA-AS)]

Spring. 4 credits. J. Sokol.

African-American struggles for civil rights in the mid-1950s and early 1960s defined an age of protest that culminated in the youthful radicalism of antiwar struggles, burgeoning gay rights and women's movements, and gave way to urban riots. Some Americans embraced struggles for civil rights; others perceived threats to their own welfare. Out of this, a white backlash emerged, and so did the roots of a new politics. In turn, politicians like George Wallace, Ronald Reagan, and Richard Nixon helped to inspire an ascendant conservative movement. From city streets to rural plantations and suburban living rooms, different visions of American freedom competed. (AM)

HIST 474(4740) Topics in Modern European Intellectual and Cultural History (also COM L/JWST 474(4740))

Spring. 4 credits. Limited to 15 students. D. LaCapra.

The Secular and the Sacred. The interaction between the secular and the sacred has often been analyzed in terms of the concept of secularization. The seminar will explore the various definitions, possibilities, and limitations of this concept in understanding the sacred, the secular, and their relations. Readings include Max Weber, Sigmund Freud, Soren Kierkegaard, Carl Schmitt, Georges Bataille, Mary Douglas, and René Girard. (EM)

HIST 476(4760) History and Story in the North Sagas (also HIST 676(6760), ENGL 412(4120)) (HA-AS)]

Spring. 4 credits. O. Falk and T. Hill.

This course examines a selection of Icelandic sagas and related pieces as both works of literature and records of history. Can these medieval texts serve both literary and historical purposes? Did medieval Norsemen regard them as fact or fiction, or both? Readings will include some of the classic sagas, such as Njals saga and Laxdoela saga, as well as less well-known texts. Students will conduct independent research projects on the theme of the course. Reading knowledge of Old Norse is required; for exceptions, see the instructors. (ER)

HIST 477(4771) Improvising Across the Disciplines (also COM L 477(4770), S HUM 477, HIST 677(6771))

Fall. 4 credits. D. LaCapra.

Improvising Across the Disciplines. How does one best understand the concept and practice of improvisation? How is it related to processes of repetition, displacement, conversion, trauma, and radical change? How does one situate the notion of creation ex nihilo, and does it refer to an improvisational form? Is cliché the opposite of improvisation or does a crucial form of improvisation involve the recycling and possible renewal of cliché? What is the differential role of improvisation in religion, philosophy, politics, literature, and historiography? Is improvisation a specifically human capacity, serving as

another criterion to divide the human from the animal? How should one understand the recent turn to the "postsecular" as well as the more or less "creative" return of political theology? Readings include Flaubert, Nietzsche, Beckett, Heidegger, Woolf, Kristeva, Derrida, Agamben, Badiou, and Zizek. Some attention will also be paid to the music of Art Tatum. (EM)

HIST 482(4821) Religious and Secular in American Culture (AM ST 482(4821)) (HA-AS)]

Fall. 4 credits. Permission of instructor required. R. L. Moore.

This course probes American intellectual and cultural history by discounting a sharp division between what is secular and what is religious. In the United States the categories secular and religious have always interacted, allowing non-Americans to see Americans as at once the most religious of all people and the most conscious of worldly, practical matters. The readings and the writing assignments are aimed at rethinking classic debates, for example the role of religion in politics, the conflict between science and religion, and the alleged difference between religious and humanistic morality. The effort is not to convince students that Americans are unique in blending secular and religious but that key aspects of American history (the early separation of church and state, the importance of immigration and of non-European populations, the elaborate attempt to define American democracy as a moral system) have kept religion, and not just white Protestant evangelicalism, at the center of American culture. (AM)

[HIST 483(4831) Christianization/Roman World (also CLASS 475(4625), RELST 475(4625)) # (HA-AS)]

Fall. 4 credits. Next offered 2009–2010. E. Rebillard.]

HIST 485(4850) Immigration: History, Theory, and Practice (also AM ST/ LSP 485(4850)) (HA-AS)]

Fall. 4 credits. Permission of instructor required. M. C. Garcia.

This seminar focuses on immigration to the United States since 1965. We will examine the various groups that have migrated to the United States; the immigration and refugee policy that has facilitated their entry; contemporary debates about immigration control; the transnational ties of immigrants to their homelands; guest workers programs; and the special needs of today's immigrant populations. Course requirements include participation in a service-learning project within the Ithaca/Tompkins County area that will be arranged in conjunction with the professor. Weekly sessions will feature presentations by different Cornell faculty and representatives from local social agencies and community organizations. (AM)

HIST 486(4861) Classics and Early America (also CLASS 486(4861)) # (HA-AS)]

Fall. 4 credits. H. Rawlings. For description, see CLASS 486. (EA)

HIST 487(4870) Seminar on Thailand (also HIST 687(6870), ASIAN 601(6601)) @ (HA-AS)]

Spring. 4 credits. T. Loos and T. Chaloeitjarana.

This seminar about modern Thailand tackles the issues that dominate the political,

sociocultural, economic and historic landscape of Thailand. It will ask, through critical readings about Thailand, where this non-colonized country "fits" in the scholarship on (post) coloniality, globalization, and development. We read both the classics and contemporary works on Thailand spanning the fields of the humanities and social sciences, including literature, politics, history, law, gender/sexuality studies, and anthropology. The seminar is created for upper level undergraduates and graduate students and will provide, through an in-depth look at Thailand, an important pivot point for comparativists and those in interdisciplinary studies examining countries in Asia and the developing world generally. (AS)

[HIST 488(4880) Seminar in the Late 19th-Century European Imperialism (HA-AS)]

Spring, 4 credits. Permission of instructor required. Next offered 2009-2010. I. Hull.]

[HIST 490(4900) New World Encounters, 1500 to 1800 (HA-AS)]

Spring, 4 credits. Limited to 15 students. Next offered 2008-2009. J. Parmenter.]

[HIST 491(4910) Approaches to Medieval Violence (also HIST 692[6920]) # (HA-AS)]

Fall, 4 credits. Limited to 15 students. Permission of instructor required. O. Falk. "Violence" has become an unavoidable—and urgently troubling—buzzword in contemporary Western culture. We worry about its manifestations and representations in our own civilization, we scan foreign societies with which we interact for any sign of it, we fantasize about consummating it or construct our utopias around its absence. This course is intended as an opportunity for students working on a variety of topics, periods and areas in medieval Europe to investigate its relevance to their own studies. Through an examination of readings on violence in particular historical contexts, from Late Antiquity to the Early Modern period, we will seek to elicit reflection on what is meant by the concept, to prompt consideration of distinctions among forms of violence, and to sample a variety of analytical approaches and tools. Graduate Students should sign up for HIST 691. (EM)

[HIST 492(4921) India: Nation and Narration, History, and Literature (ASIAN 494[4494]) @ (CA-AS)]

Spring, 4 credits. D. Ghosh and A. Banerjee.

This course emerges from the history and literature of India in the 20th century. Taught by two scholars, one based in the history department and one based in comparative literature, the readings and the films critically analyze some of the major cultural currents and political events of India by reading novels, political manifestoes, and viewing documentaries, films, visual images and architectural sites. This seminar begins with the premises of nationalism, how it is constructed, disseminated, challenged, and reassembled in the service of creating the idea of "India." It then turns to partition, the traumatic division of the Indian nation in 1947, and how this critical event has been represented in fiction, film, and history. The latter half of the course challenges ideas of Indian nationalism by using studies of space and the production of epics and history to imagine how Indian communities might be

constituted in the extended postcolonial moment we are in. (AS)

[HIST 493(4930) Problems in Modern Chinese History (also HIST 693[6930], ASIAN 493/693[4493/6693]) @ (HA-AS)]

Fall, 4 credits. Prerequisite: HIST 294 or permission of instructor. S. Cochran. Conflicting interpretations of Chinese history during the late imperial period and the first half of the 20th century. (AS)

[HIST 495(4950) Gender, Power, and Authority in England, 1600 to 1800 # (CA-AS)]

Spring, 4 credits. R. Weil. It is a truism that early modern society was a 'patriarchal' one in which men had authority—but how did that authority operate and what were its limits? How did the exercise of power between men and women intersect with religious, literary, legal and political institutions? We will approach these questions chronologically, examining the impact of the Reformation, the English Revolution, the Enlightenment, the rise of middle class and polite culture. We will also explore them methodologically and generically, with an eye to how different kinds of evidence and sources can produce different kinds of conclusions. Historians' hypotheses will be tested by analysis of primary sources. (EM)

[HIST 496(4961) History of Medicine and Healing in China (also ASIAN 469[4469], S&TS/B&SOC 496[4961]) @ # (HA-AS)]

Spring, 4 credits. T. J. Hinrichs. An exploration of processes of change in medicine in China. Focuses on key transitions, such as the emergence of canonical medicine, of Daoist approaches to healing and longevity, of "Scholar Physicians," and of Traditional Chinese Medicine in modern China. Inquires into the emergence of new healing practices in relation to both popular and specialist views of the body and disease, "cultivating vitality" practices, modes of transmission of medical knowledge, and healer-patient relations. Course readings include primary texts in translation as well as secondary materials. (AS)

[HIST 497(4970) Jim Crow and Exclusion-Era America (also HIST 697[6970], AM ST 497/697[4970/6970], AAS 497[4970]) (HA-AS)]

Spring, 4 credits. Limited to 15 students. D. Chang. This seminar examines America during the overlapping eras of segregation and immigration exclusion. Beginning with contests over the meaning of freedom during reconstruction and running through the institution of Jim Crow legislation and immigration exclusion, the course ends with an evaluation of mid-20th century movements for civil rights and equality. Themes include the links between racial and economic oppression, legal and defacto restriction, everyday resistance, and struggles for equality. (AM)

[HIST 499(4990) Problems in Modern Chinese History (also HIST 694[6940], ASIAN 499/694[4499/6694]) @ (HA-AS)]

Spring, 4 credits. Prerequisite: HIST 294 or permission of instructor. Next offered 2008-2009. S. Cochran.]

[HIST 500(4997) Undergraduate Research Seminar (also AM ST 500[4997])]

Fall and spring, 8 credits each semester. Offered in Cornell in Washington Program. S. Jackson.

Intensive research and writing experience using the extensive resources of Washington D.C. (AM)

Fall, 4 credits. Next offered 2009-2010. Staff.]

[HIST 614(6140) Readings in Cultural Materialism: Theory and Practice]

Spring, 4 credits. K. Hirano. The course is intended to be a forum where graduate students closely read and examine a set of scholarly works regarded collectively as the school of "Cultural Materialism." During the 1970s and 80s, a group of Marxism-inspired scholars began to suggest a way to overcome the old Marxist model of economic

determinism by taking "culture" seriously as an integral part of materialist studies. This intellectual movement laid a foundation for what we currently call "Cultural Studies." By revisiting their works, we will discuss what insights we can draw from them for our contemporary scholarly agendas and projects. The readings include *Lenin and Philosophy* (Althusser), *Prison Notebooks* (Gramsci), *Culture and Materialism* (Williams), *Marxism and Literature* (Williams), *Marxism and Philosophy of Language* (Volosinov), *Dialogic Imagination* (Bakhtin), *Postmodernism, or, The Cultural Logic of Late Capitalism* (Jameson), and others. (AS)

HIST 615(6150) The Past in the Present/ The Present in the Past: Histories of Tokugawa Japan (also ASIAN 615[6615])

Fall. 4 credits. Next offered 2008–2009. K. Hirano.]

[HIST 663(6630) Graduate Seminar in Renaissance History

Fall. 4 credits. Next offered 2008–2009. J. Najemy.]

HIST 664(6641) Medieval Poverty

Fall. 4 credits. P. Hyams.

Poverty is one of those topics that historians all too often neglect. Yet it, and its corollary, wealth, are in a sense everybody's concern, in the past as well as present. How people define it and what they make of it are among the most important measures of a culture. Modern approaches to the subject have advanced rapidly in the past generation, mostly due to changed attitudes toward matters like economic development, famine, and natural disaster. The conceptualization and study of poverty in the medieval past has not kept pace with these changes. The classic work on the subject dates from 1978 and reflects the thought of the immediate post-War period. This seminar will explore the ways in which we might redefine poverty to better comprehend its economic and other consequences. (ER)

HIST 665(6651) Historical Documents on Modern China (also CHIN 426[4425], HIST 465[4651])

Fall. 4 credits. Prerequisite: equivalent of three years Mandarin instruction.

Permission of instructor required. Z. Chen. For description, see CHIN 426. (AS)

HIST 667(6671) Spartacus (also CLASS 667[7667])

Spring. 4 credits. B. Strauss.

A seminar on the causes, nature, course, and results of the Spartacus War against Rome, 73–71 B.C. Readings in Latin and Greek as well as English. Open to grad students in History and Classics and to qualified seniors who receive permission of the instructor. (FA)

[HIST 669(6691) The Old English Laws and Their Politico-Cultural Context (also HIST 469[4691], ENGL 419[4190])

Fall. 4 credits. Next offered 2009–2010. P. Hyams and T. Hill.]

[HIST 672(6720) Seminar in European Intellectual History

Fall. 4 credits. Next offered 2008–2009. D. LaCapra.]

[HIST 804-807(8004-8007) Supervised Reading

4 credits each semester. Prerequisite: graduate standing. Permission of instructor required. Staff. (HR)

HISTORY OF ART

S. Samuels, chair; A. Alexandridis, J. E. Bernstock, M. I. Dadi, M. Fernandez, C. Finley, S. Hassan, C. Lazzaro, K. McGowan, L. L. Meixner, A. Pan, A. Ramage, J. Rickard, C. Robinson, T. Tu

The Department of the History of Art provides a broad range of introductory and advanced courses in Western art (European and North American) and non-Western art (East and Southeast Asian, African), from antiquity to the present.

The Major

Department majors acquire a broad understanding of the history of art in several chronological and geographical areas: ancient, medieval, Renaissance, modern (Europe and North America), Southeast Asia, China, Japan, and Africa. Additionally, majors practice a range of art historical methods and interpretive strategies, including connoisseurship, dendrochronology, feminism, iconography, semiotics, and social history. Majors are encouraged to locate the history of art within allied humanities fields and the applied arts by taking courses in history, literature, history of architecture, and fine arts. The study of foreign languages is strongly encouraged.

Requirements for the Major

Prospective majors should consult the director of undergraduate studies. Students wishing to declare a major in the history of art should have completed any two courses above the 100 level at Cornell in the department by the end of their sophomore year and have received a grade of B- or above in both. Courses must be taken for a letter grade. These courses count toward the total 44 credits. The major in the history of art requires 44 credits, 30 at the 300 level or above. The core requirements are: proseminar; another seminar at the 400 level or above; two courses on art from the following time periods: Ancient Europe, Medieval/Islamic, or Renaissance/Baroque (one course per time period); two courses on art from the three following geographical areas: Africa, Asia, or Latin America (one course per region); and two courses on modern/contemporary art in Europe and North America, including art from outside the Anglo-American tradition. In addition to the 44 credits, majors are required to take two courses, approved by their advisors, in areas related to the history of art.

Honors

To become a candidate for the degree of bachelor of arts with honors in the history of art, a student must have a cumulative average of A- for all courses taken in the department

and B+ in all arts and sciences courses.

Application to write an honors thesis should be made to the director of undergraduate studies during the second semester of the junior year. Students are advised to enroll in ART H 497 Honors Research at this time. The application must include a summary of the proposed project, an endorsement by a faculty sponsor, and a copy of the student's transcript. In the senior year the honors candidate will include ART H 498 and 499 in his or her course load. These courses address the research and writing of the senior thesis under the direction of the student's project advisor.

Course Numbering System

100-level courses are first-year writing seminars.

200-level courses are introductions to the major subdivisions of Western art and art outside the West.

300-level courses are intermediary courses addressing more specialized topics or epochs.

400-level courses are seminars primarily for advanced undergraduates and graduate students.

500-level courses are seminars primarily for professional level.

600-level courses are seminars primarily for graduate students.

First-Year Writing Seminars

For first-year writing seminar offerings in the history of art, consult the John S. Knight Institute brochure for times, instructors, and descriptions. These courses may not be used to satisfy the distribution requirement or the major.

Courses

[ART H 202(2100) Survey of European Art: Renaissance to Modern # (CA-AS)

Summer only. 3 credits. D. Royce-Roll.

The major traditions and movements in western European art from the Renaissance to the modern period. Painting, sculpture, and architecture with an emphasis on painting. Each Friday class meets at the Johnson Museum of Art with gallery talks and viewing of relevant works that supplement the previous four days of classroom lectures.

[ART H 209(2190) The Immigrant Imagination (also AM ST 227[2091]) (HA-AS)

4 credits. Limited to 15 students. Next offered 2008–2009. T. Tu.]

[ART H 219(2019) Thinking Surrealisms (also COM L 220[2200], VISST 219[2190]) (LA-AS)

Spring. 4 credits. Next offered 2008–2009. B. Maxwell.]

[ART H 220(2200) Introduction to Art History: The Classical World # (HA-AS)

Fall. 3 credits. Staff.

The course is an overview of the art and archaeology of the Greek and Roman world, covering the sculpture, vase painting, and architecture of the ancient Greeks from the Geometric period through the Hellenistic, and the art of the Romans from the early Republic to the time of Constantine the Great.

ART H 245(2400) Introduction to Art History: Renaissance and Baroque Art (also VISST 245[2645]) # (HA-AS)

Fall. 4 credits. Each student must enroll in a sec. C. Lazzaro.

Surveys major works of European artists from 1400 to 1700, including all arts, with an emphasis on painting and on analysis of the artworks. As a frame for interpreting these works, we will emphasize the social, religious, and political contexts in which artists worked and the role of patrons in the creative process. The course will also serve as an introduction to the art historical approaches through which we interpret these works today.

ART H 250(2350) Introduction to Art History: Islamic Art and Culture @ # (HA-AS)

Fall. 4 credits. C. Robinson.

Spanning the years between the advent of Islam as one of the world's great religions in the early 7th century A.D. and the end of the 14th century A.D., this course will place significant emphasis on, in addition to religious architecture and mobilier, the secular world, its built environments and its material culture (palaces, gardens, places of the imagination, Arts of the Book). Lectures and readings will attempt to situate these structures and objects in a framework or context which will enrich students' understanding of them and of the cultures which produced them. Two weekly slide lectures and occasional section meetings. Readings will include a textbook and limited selection of articles on e-reserve; assignments will include two in-class and two take-home exams plus two shorter writing assignments.

ART H 255(2355) Introduction to Art History: Medieval Art and Culture # (CA-AS)

Spring. 4 credits. C. Robinson.

Survey lecture course covering the creation, encoding, and reception of Medieval (roughly AD 500–1500) European architecture, ornament, manuscripts, liturgical and luxury objects. The approach is thematic but chronologically grounded; attention is also given to cultural interaction in the Mediterranean basin.

ART H 260(2600) Introduction to Art History: The Modern Era (CA-AS)

Spring. 4 credits. Not open to students who have taken ART H 261. Each student must enroll in a sec. J. Bemstock.

Considers modern art in a historical and cultural context, from painting associated with the French Revolution through American pop art. The emphasis is on major movements and artists: Neo-Classicism (David), Romanticism (Delacroix), Realism (Courbet), Impressionism (Monet), Post-Impressionism (Van Gogh), Cubism (Picasso), Fauvism (Matisse), Surrealism (Miro), Abstract Expressionism (Pollock), and Pop Art (Warhol). Different critical approaches are examined.

ART H 272(2672) Art, Politics, and Social Imagination: Art of the Avant-Gardes

Summer. 4 credits. J. Stojanovic.

The course focuses on development of modern art in the first third of the 20th century. It introduces the main themes of art in the period and summarizes the political context in which art developed: the First World War, the Russian Revolution, and the subsequent consolidation of the European dictatorships. A series of case studies that illuminate the important idea of "expression"

in art, related questions of Orientalism and the "primitive," aspects of Cubism, are examined along with the development of abstract art, and the radical avant-garde movements—Dada, Soviet Constructivism, Surrealism.

[ART H 306(3600) Introduction to Art History: Contemporary Art: 1960 to Present (CA-AS)

4 credits. Prerequisite: ART H 260 or equivalent. Next offered 2008–2009. I. Dadi.]

[ART H 307(3607) Orientalism and Representation @ (HA-AS)

4 credits. Next offered 2008–2009. I. Dadi.]

ART H 309(3250) Introduction to Dendrochronology (also CLASS 330[3750]) # (HA-AS)

Fall. 4 credits. S. Manning. For description, see CLASS 330.

ART H 320(3210) The Archaeology of the City of Rome (also CLASS 336[3736])

Spring. 4 credits. A. Alexandridis.

This lecture is a history of Rome and its Empire from 700 BC to 400 AD through the urban image of the capital itself. Beside a chronological and topographical overview of the city's development main emphasis will be on five aspects of the urban space: 1. The relationship of power, ritual and space (fora, the most important temples, the residences and funerary monuments of the emperors, finally the churches) 2. Entertainment and public spectacle (baths, the Colosseum, theatres). 3. Economy and trade (storehouses at the Tiber, Monte Testaccio, Rome's harbour Ostia). 4. Infrastructure (Cloaca maxima, aqueducts, city quarters). 5. The boundaries of the city (the question of the pomerium, the city walls, roads leading into the city).

ART H 322(3202) Arts of the Roman Empire (also CLASS 350[3740]) # (HA-AS)

Fall. 4 credits. Prerequisite: permission of instructor. Staff.

The visual arts in the service of the first world state. Starts with the architecture, painting, and sculpture of the Etruscan and Republican period but concentrates on monuments of the Imperial era in Italy and the provinces until the time of Constantine. Art made for private patrons is considered, along with the official presentations of the emperors.

ART H 324(3224) Hellenistic Culture (also CLASS 344[3744])

Fall. 4 credits. A. Alexandridis.

Full title: Hellenistic Culture: The Age of Alexander-Globalization in the Ancient World? With Alexander the Great's conquest of the Near and Middle East Greek language, education and material culture was disseminated at one fell swoop in a vast area, from the Mediterranean to India. It left a long lasting imprint even on areas that had formerly not been under primary Greek influence like the Persian Empire. On the other side, the encounter with so many different people and cultures deeply transformed Greek language, religion and material culture itself while at the same time engendering a canonical idea of "Greekness". And it created a manifold amount of mixed and specifically local cultures. The lecture will analyze this process and try to understand whether it can be understood as a pre-modern example of "globalization." The class will deal with the period from the advent of Alexander

the Great (336–323 BC) until the end of the last Hellenistic kingdom, the Egypt of Cleopatra VII. (51–30 BC). We will focus on phenomena such as urbanization and the formation of civic identities; assimilation and conflict, especially in a Jewish context; the advent of new Eastern religions; economy and trade routes as well as gender relations. The period as a whole, has only recently become a focus of combined historical, philological and archaeological research. Therefore, current scholarly debates will form an integral part of the course.

ART H 330(3230) Iconography of Greek Myth (also CLASS 337[3727])

Spring. 4 credits. A. Alexandridis. Myths are traditional tales. Their authority becomes apparent in that they were constantly adapted to changing social, political, cultural etc. conditions. Although this seems to be a widely accepted definition so far, it is deeply influenced by Greek tradition. Not only is the term *mythos* (word, tale) Greek, but the ubiquity of Greek gods, heroes and their deeds in ancient literature and material culture has given myths an importance they might not have had in other cultures. This class will give an overview of the most important Greek myths and mythological figures as depicted in Greek and Roman times. The chronological frame will range from the 7th century BC to the 3rd century AD. We will discuss the iconography of the Olympian gods and their escorts; of myths such as the loves of the gods; the battles between the Olympian Gods and the Giants, between Greeks and Amazons as well as between Lapiths and Centaurs; the Trojan War; the adventures of Odysseus; the heroic deeds of Heracles, Theseus and Perseus among others. By analyzing where and when mythological images were on display it will become clear how myths were adapted to their specific context as well as why certain myths were more often depicted or more popular than others.

[ART H 343(3443) Art and Society in Early Renaissance Italy # (HA-AS)

4 credits. Next offered 2008–2009. C. Lazzaro.]

ART H 344(3440) Leonardo, Michelangelo, and Raphael # (HA-AS)

Spring. 4 credits. C. Lazzaro. This course examines each of the three great artists of the 16th century, Leonardo, Michelangelo, and Raphael, as a thinker as well as an artist, through his own writings together with his works of painting, sculpture, and architecture. It also analyses the contemporary constructions of the artist as genius. Leonardo was an extraordinarily innovative painter partly because of the breadth of his thinking. This course examines his treatises on anatomy, natural science, and engineering as well as artistic practice. Michelangelo conceived of grandiose artistic projects for his equally ambitious patrons, and his novel visual language has parallels with the verbal language in his poetry. Raphael was the consummate court artist, and also antiquarian and archaeologist, who produced a new classicism in the 16th century.

ART H 349(3149) Artistic Identity through Time: From Anonymous to Magnanimous (HA-AS)

Fall. 4 credits. P. Morin. Surveys the variety of roles artists/architects have assumed, constructed, or negotiated over time. The social economic status of the artists

has ranged from priestly demigod to slave, manual laborer to intellectual, bohemian to member of the bourgeoisie, craftsman to visionary, activist to actor, spectator to hero. Constructions of genius and personal negotiation of identity are explored through a variety of sources, including philosophical texts, biography, treatises, popular press, and film. We consider artistic identity through gender, ethnicity, nationality, and social economic status. Artistic productions including architecture, painting, sculpture, installation, and performance are examined from the time of the Pharaohs to the present day, from Imhotep to Warhol.

ART H 350(3100) History of Photography (LA-AS)

Spring and summer. 4 credits. I. Dadi. Provides a survey of the history of photography over a course of two centuries. Starting with its invention in the 1830s, this course covers the subject both topically and chronologically. During the 19th century, it focuses on its technical development and on the complex relations that situate photography in relation to painting, portraiture, urban life, war, anthropology, exploration and travel, and science and industry. While these topics continue to be important during the 20th century, photography has been enriched by new developments that include its use as a modernist and experimental art form, in social documentary and photojournalism, in propaganda, in advertising and fashion, and its centrality in the practice of conceptual art, postmodernism, and in the digital age.

[ART H 355(3300) Romanesque and Early Gothic Art and Architecture: Europe and the Mediterranean, 900 to 1150 AD # (LA-AS)

Fall. 4 credits. Next offered 2008–2009. C. Robinson.]

[ART H 358(3301) Gothic and the Medieval World # (LA-AS)

Spring. 4 credits. Next offered 2008–2009. C. Robinson.]

[ART H 360(3740) Painting 19th-Century America (also AM ST 360(3740)) # (CA-AS)

4 credits. Recommended: ART H 245. Next offered 2008–2009. L. L. Meixner.]

ART H 362(3760) Impressionism in Society (also VISST 362(3660)) # (CA-AS)

Spring. 4 credits. Not open to freshmen. Recommended: ART H 245. L. L. Meixner. Discusses French Impressionist art as products of 19th-century public life. By relating Impressionism to state culture, including Universal Expositions, the course traces subversive themes such as criminality, café and brothel societies, clandestine prostitution, and class-regulated leisure. Students consider images of Parisian spectacle and commodity culture (Manet, Cassatt, Degas, Toulouse-Lautrec) as well as French landscapes (Monet, Van Gogh, Pissarro). Special topics include artists' relationships to novelists (Zola), poets, and the avant-garde theater as well as the construction of the artist and courtesan in Puccini's *La Bohème* and Verdi's *La Traviata*. Images include postcards, playbills, medical photographs, and posters. Organizing our historical units is the theme of power and vision with attention to the female gaze, voyeurism, surveillance, and scopophilia.

ART H 365(3605) U.S. Art from FDR to Reagan (also AM ST 355(3605)) (LA-AS)

Fall. 4 credits. Each student must enroll in a sec. J. E. Bernstock.

Considers the contextual features of American art from the 1930s through the late 1980s. Examines art in relation to contemporary politics, society and literature. A few of the developments on which the course focuses are: Abstract Expressionism, Pop Art, Earth Art, and Feminist Art. Examines various critical approaches.

ART H 366(3650) History and Theory of Digital Art (also VISST 366(3650)) (CA-AS)

Fall. 4 credits. M. Fernandez.

In this course students will examine the role of mechanical, electronic, and digital technologies in the arts of the late 20th and 21st centuries with emphasis on Europe and North America. Beginning with kinetic art and the cybernetically inspired work of the late sixties, we will explore early uses of computer technology, including early work in synthetic video in the 1970s. An overview of pre-Internet telematic experiments will lead to an investigation of net art. The ongoing development of behavioral art forms including interactive art and interactive installation will be a central theme. Critical evaluation of various attitudes concerning technology will be encouraged.

ART H 368(3550) Modern and Contemporary Latin American Art (also LSP 368(3551), LAT A 368(3680)) (HA-AS)

Spring. 4 credits. M. Fernandez.

This course is designed as a thematic survey of Latin American art from the early 20th century to the present. Attention is given to issues such as: the effect of colonialism on Latin America's visual arts, the creation of national artistic styles, the relation of Latin American art and artists to European and American culture centers, the interaction of high art and popular culture, the role of art criticism on popular perceptions of Latin American Art, and the contributions of Latin American women to various aspects of artistic practice. Special classes will examine border arts and Latin American artists' exploration of electronic technologies.

ART H 371(3171) Architectural History of Washington, D.C. # (HA-AS)

Fall or spring. 4 credits. Prerequisite: students in Cornell in Washington program; nonarchitects. P. Scott.

Historical and critical survey of the architecture of Washington. Attention is given to the periods, styles, architects, and clients—public and private—of the notable buildings and to the urban landscape of the nation's capital. The vocabulary of architectural analysis and criticism is taught. Field trips required.

ART H 377(3500) African American Art (LA-AS)

Spring. 3 credits. S. Hassan.

This course investigates the different forms of African-American visual artistic traditions in relation to their historical origins and sociocultural context from the early days of slavery to the present time. We start with an overview of African art and the experiences of the Middle Passage and slavery in relation to African-American traditions in the decorative arts including: pottery, architecture, ironwork, quilt making, and basketry. This is followed

by a fine-art survey starting with the 18th and 19th centuries and continuing through the early-20th-century Harlem Renaissance up to the present. Certain issues related to African-American arts and creativity such as improvisation, Black Aesthetic, and Pan Africanism also are explored. Slides, films, and filmstrips are used extensively to illustrate topics discussed. Visits to museums and relevant current exhibitions may be arranged.

ART H 378(3510) Introduction to African Art (also AS&RC 310(3501)) # (LA-AS)

Fall. 3 credits. S. Hassan.

Survey of the visual art and material cultural traditions of sub-Saharan Africa. It aims at investigating the different forms of visual artistic traditions in relation to their historical and sociocultural context. The symbolism and complexity of traditional African art are explored through the analysis of myth, ritual, and cosmology. In-depth analysis of particular African societies is used to examine the relationship of the arts to indigenous concepts of time, space, color, form, and sociopolitical order. New and contemporary art forms associated with major socioeconomic changes and processes of assimilation and accumulation also are explored. These include tourist art, popular art, and elite art.

ART H 380(3800) Introduction to the Arts of China (also ARKEO 380(3880)) # # (LA-AS)

Fall. 4 credits. A. Pan.

This course offers a survey of the art and culture of China, from the Neolithic period to the 20th century. We begin with an inquiry into the meaning of national boundaries and the controversy of the Han Chinese people, which helps us identify the scope of Chinese culture. Pre-dynastic (or prehistoric) Chinese culture is presented through both legends about the origins of the Chinese, and scientifically excavated artifacts. Art of the dynastic and modern periods is presented in light of contemporaneous social, political, geographical, philosophical and religious contexts. Students work directly with objects in the Herbert F. Johnson Museum of Art.

ART H 384(3820) Introduction to the Arts of Japan # # (LA-AS)

Spring. 4 credits. A. Pan.

As an island nation east of the Asian continent, Japan developed a unique culture that reflects both continental and indigenous characteristics. This course examines pre-and post-contact with continental culture and the process of artistic acculturation and assimilation in successive periods of Japanese art history.

ART H 385(3805) Representation and Meaning in Chinese Painting # # (CA-AS)

Summer. 4 credits. A. Pan.

Using major monuments of art, this course introduces various genres of Chinese painting through sociopolitical and religious history. The focus is on understanding the aesthetic criteria, artistic movements, stylistic transformations, and agendas of different social classes. Weekly sections meet at the Herbert F. Johnson Museum so that students can gain first-hand experience examining and handling Chinese paintings.

[ART H 390(3520) African American Cinema (LA-AS)]

Fall. 4 credits. Next offered 2008–2009.
C. Finley.]

ART H 395(3855) The House and the World: Architecture of Asia (also VISST 394[3655]) @ # (HA-AS)

Spring. 4 credits. K. McGowan.

ART H 396(3850) The Arts of Southeast Asia (also VISST 396[3696]) @ # (CA-AS)

Fall. 4 credits. K. McGowan.

Seminars

Courses at the 400 to 600 level are open to juniors and seniors, majors, and graduate students unless otherwise stated. All seminars involve the writing and presentation of research papers. Enrollment is limited to 15 students, and *permission of the instructor is required*. Students may repeat courses that cover a different topic each semester.

ART H 400(4100) Proseminar (also VISST 400[4200], ART H 600[6100]) (HA-AS)

Fall and spring. 4 credits. Limited enrollment. Prerequisite: history of art majors. Grads should enroll in 600.
M. Fernandez and I. Dadi.

Works of art have always engendered political, social, and cultural meanings. This seminar introduces the methods that art historians have engaged in, studying the objects and ideas that constitute the historiography of their discipline. Challenged and enlarged by cultural debates over issues of class, ethnicity, nationality, sexual orientation, and gender, the field of art history is expanding to incorporate problems of assessing quality of intention and reception along with authorship, of artistic production in place of artistic creation, and of Western-oriented attitudes to race in reference to orientalism and colonialism. Readings focus on historically situating methods and the implications of their cross-cultural application. Papers encourage students to put methods into practice, realizing in the process that subject matter is not an isolated choice to which methods are applied, but something that profoundly affects the approach the researcher brings to the writing of art history. In addition to the seminar meeting from 2:30 to 4:30, students are required to attend the Visual Culture Colloquium held on most Mondays from 5:00 to 6:30 P.M.

ART H 401(4991) Independent Study

Fall or spring. 2–4 credits; may be repeated for credit. Prerequisite: permission of department faculty member.

Individual investigation and discussion of special topics not covered in the regular course offerings, by arrangement with a member of the department.

ART H 402(4992) Independent Study

Fall or spring. 2–4 credits; may be repeated for credit. Prerequisite: permission of department faculty member.

Individual investigation and discussion of special topics not covered in the regular course offerings, by arrangement with a member of the department.

ART H 403(4003) Modernity and Critique (also S HUM 426)

Spring. 4 credits. Limited to 15 students.
B. Maxwell.

Modernity: the condition of life attendant on the massive dislocations commencing with the process defined by Marx as the “primitive

accumulation” of capital. As the psycho-geographic regime of “transcendental homelessness” (Lukács), as an “exploded picture puzzle” (Bloch), modernity provoked critical examinations by Marxist and anarchist thinkers, extraordinary often in their insight and often enough in their blindness to the world beyond Europe. Surrealism arguably breached the self-enclosure of European radical thought and met a world of anger and analysis speaking its own languages of critique: Césaire, Fanon. The subsequent work of Debord, Vaneigem, and others of the Situationist International shows both the ruins of the earlier projects and important means for living critically in and against our moment. These matters are what we will study.

ART H 407(4107) The Museum and the Object (also VISST 407[4607]) (CA-AS)

Fall. 4 credits. Prerequisite: history of art majors; freshmen and sophomores by permission of instructor. All classes meet in Johnson Art Museum study gallery.
K. McGowan.

Gives advanced students the opportunity to work directly with original objects from the collection in the Herbert F. Johnson Museum. Focuses on art and connoisseurship by questioning the ways quality is determined in works of art. Topics include methods of attribution, fakes and forgeries, technique and media, restoration and conservation, art education and theories of perception. Session leaders include the curatorial staff of the art museum.

[ART H 408(4508) Exhibiting Cultures: Museums, Monuments, Representation and Display (also ART H 608[6508], AS&RC 408/608[4504/6508], AM ST 408/608[4508/6508]) (CA-AS)]

Fall. 4 credits. Grads should enroll in 608.
Next offered 2008–2009. C. Finley.]

ART H 409(4509) Black Arts Movement (also ART H 609[6509], AS&RC 409/609[4505/6509], AM ST 409/609[4509/6509])

Fall. 4 credits. C. Finley.

This course examines the art, music, literature and film of the Black Arts Movement (1965–1972), an explosive cultural flourishing that emerged in the United States in the wake of African liberation and decolonization movements in the 1950s and 1960s as well as the Civil Rights and Black Power movements of the same period. Visual art practices such as abstraction (Mel Edwards and Barbara Chase-Riboud), collage (Romare Bearden), performance (Faith Ringgold) and photography (Roy DeCarava, Dawoud Bey) will be examined alongside pioneering works of revolutionary theatre (Le Roi Jones), activist poetry (Nikki Giovanni), jazz (John Coltrane, Thelonious Monk), soul (James Brown, Marvin Gaye and Curtis Mayfield) and rock-n-roll (B.B. King, Jimi Hendrix). The transition from race cinema to experimental film to Blaxploitation (Melvin Van Peebles and Pam Grier) also will be studied in this seminar. There will be film screenings and guest lecturers.

[ART H 410(4310) Methods in Medieval # (CA-AS)]

4 credits. Next offered 2009–2010.
C. Robinson.]

[ART H 411(4311) The Multicultural Alhambra]

4 credits. Next offered 2008–2009.
C. Robinson.]

[ART H 412(4312) The Late Medieval Art of Devotion # (HA-AS)]

4 credits. Next offered 2008–2009.
C. Robinson.]

[ART H 413(4113) Race, Technology and Visuality (also AAS 413[4130], AM ST 412[4113]) (CA-AS)]

4 credits. Next offered 2009–2010. T. Tu.]

[ART H 414(4114) Popular Culture and Visual Practice in Asian America (also AAS 414[4140], AM ST 414[4114]) (CA-AS)]

4 credits. Next offered 2008–2009. T. Tu.]

ART H 415(4315) Visualizing the Sacred Iberia (also ART H 615[6315], NES 423/623[4523/6523])

Fall. 4 credits. Comfortable reading knowledge in Spanish required.
C. Robinson.

Full Title: Visualizing the Sacred in Late Medieval Iberia: Images and Image Devotion in a Multi-confessional Landscape. This seminar will examine the role of images, including “sacred” or “miraculous” ones, in the Christian, Jewish and Muslim Iberian devotional imaginaire during the final centuries of the Middle Ages. Readings will proceed from a diverse range of primary sources both in translation and in the original, as well as scholars such as Belting, Bynum, Echevarria, Hamburger, Hames, Lopez-Baralt, Narvaez-Cordoba, Pereda, Puerta Vilchez, Robinson, Surtz, and others. The class is, in part, conceived as part of the preparations for an exhibition to be held in the Johnson Museum in 2010 entitled “Constructions of Devotion,” about which students will learn (a great deal...) more in the class.

ART H 421(4201) Undergraduate Seminar in Cultural History (also HIST/AM ST 421[4120])

Fall. 4 credits. M. Kammen.
For description, see HIST 421.

[ART H 422(4322) The Late Medieval Devotional Image in Iberia # (CA-AS)]

4 credits. Next offered 2010–2011.
C. Robinson.]

ART H 425(4525) Rastafari, Race, and Resistance (also AS&RC 426[4526], VISST 425[4625])

Fall. 4 credits. P. Archer-Straw.

Seminar focusing on Jamaican artists whose images stem from Rastafarianism. Examines how their cultural expression born out of a clash of European and African civilizations challenged western cultural values and posited new ways of talking about race and spirituality. Rastafarianism is viewed as an aberrant modern paradox, at once a vehicle for racial resistance and a belief system advocating universal equality.

ART H 435(4235) Metamorphosis (also ART H 635[6235], CLASS 437/637[4737/7737])

Fall. 4 credits. A. Alexandridis.

The term metamorphosis is used according to discipline to designate (among others) physiological, psychical, textual or cultural transformations. This seminar focuses on Greek and Roman culture, so we will predominantly discuss body transformations of gods, humans, animals and plants as

represented in antiquity. We will explore the relationship between metamorphosis and concepts such as masquerade, fantasy, hybridity, plurality, alterity and transgression. We will also ask whether the idea of transformation developed by the Latin poet Ovid in his *Metamorphoses*, which stresses the discrepancy between old or unaltered mind and new body, can be applied to help to understand Greek and Roman imagery. Given the rich variety of fields taught at Cornell as well as its interdisciplinary tradition, the (optional) goal of this class is to organize a conference on various aspects and uses of the concept of "metamorphosis" in different disciplines.

ART H 438(4938) Leon Battista Alberti: Architect as Orator

Fall. 4 credits. P. Morin.

Alberti's work reverberates with the voices of other texts and edifices. This class investigates the work of Alberti in relation to these literary and architectural precedents. The seminar combines weekly lectures on selected themes with student individual research projects. Themes include the construction of architectural identity, the quest for fame, aesthetic theory and its origins in classical rhetoric, the literary origins of artistic method, and society and space. The objective of the course is to familiarize the student with all of Alberti's primary works on the arts, both painting and architecture as well as some of his more important literary texts which position him in Renaissance literary culture. This course also examines the myth of Alberti created by scholars versus Alberti's self-constructed persona. As a means of unpacking Renaissance aesthetic theory, students are introduced to Classical communications theory through the texts of Aristotle and Cicero.

ART H 439(4939) The Architectural Treatise in the Renaissance: Tradition and Innovation

Spring. 4 credits. P. Morin.

One of the most inventive periods in Western architecture will be examined through architectural treatises. Vitruvius' *Ten Books of Architecture*, the only architectural treatise to have survived antiquity, was the foundation from which architectural theory was built in the Renaissance. Alberti's *De re aedificatoria* (1452), inaugurated a period of intense architectural treatise writing. This seminar examines Renaissance treatises, which include Filarete's *Libro architetonico* (1460), Francesco Colonna's *Hypnerotomachia Poliphili* (1499), Philibert De L'Orme's *Le Premier tome de l'Architecture* (1567), Sabastiniano Serlio's *Architettura* (1584), and Palladio's *Quattro Libri dell'Architettura* (1570). We will examine the myths and evolution of the architectural order, issues of authority, origins, imitation, invention and communication. Through our engagement with architectural texts we will study the impact of sciences, new technologies, politics, domesticity, and morality.

ART H 444(4144) Responsive Environments (also ART H 644[6144]) (CA-AS)

Spring. 4 credits. M. Fernandez.

This seminar will examine notions of interactivity, immersion, and responsiveness in works of art and architecture from the 1950s to present. Select historically significant works in traditional media, telematics, machine sculpture, interactive and digital installation

will be explored as well as more recent genres of artistic practice including interactive cinema, locative media and video games. Theorizations of interactivity, addressing narrativity, performativity, embodiment, 'liveness' and the sensual and affective engagement of the user with the work will be discussed, as will the relation of art and surveillance, and the relation of 'high art' interactivity with popular techno-cultural forms. The relevance of these topics to architecture will be a recurrent theme.

ART H 448(4440) Constructing the Self in the 16th Century # (HA-AS)

Spring. 4 credits. C. Lazzaro.

This seminar examines the construction of the self through gender, class, and group identity in early modern Europe, especially Italy. Portraits, self-portraits, and autobiographies recorded "self-fashioning" in clothing, bearing, gesture, manners, and speech, while etiquette manuals instructed in "civility," the mark of class and education. The course considers some of the public and private settings in which the social self was performed, among them studies and banquets, as well as such socially constructed identities as the male adolescent and the artist.

[ART H 450(4450) Women in Italian Renaissance Art (also FGSS 451[4510]) # (HA-AS)

4 credits. Prerequisite: permission of instructor required. Not open to freshmen or sophomores. Next offered 2008-2009. C. Lazzaro.]

ART H 451(4451) Prints and Visual Culture in Early Modern Europe # (HA-AS)

Fall. 4 credits. C. Lazzaro.

This seminar introduces students to prints and to the major printmakers of the period, including Marcantonio Raimondi, Dürer, and Rembrandt, while giving them first-hand experience with original prints in the Herbert F. Johnson Museum. Weekly readings consider the uses, appreciation, handling, and collecting of prints, as well as the social, cultural, and political issues raised in their subject matter and through their unique visual language. Among these issues are the social hierarchies of class and gender (including witches), moral concerns and religious devotion, the construction and transmission of notions of antiquity and classicism, and the representation of the urban and rural environment. Meets at the Johnson Museum.

ART H 461(4761) Art and Social Histories (also AM ST 430.08[4306]) (CA-AS)

Spring. 4 credits. Prerequisite: permission of instructor. Auditing not permitted. L. Meixner.

Topic for spring 2008: American Art and the Machine. This seminar examines early modernism in America with a particular emphasis on the machine, mechanical reproduction, and moving images including film and television. Machine is defined in the broadest sense to mean the artist, the city, the camera, the department store, and consumer by-products including pictorial monthlies such as *Life*, advertisements, comic books, and political cartoons. Themes include the machine and the comic body, photography and social surveillance, early cinema and working class women, women and urban consumption, comic books and censorship, the construction of gender and the "American

family" in early T.V. sitcoms, T.V. ads and the American homemaker, and "women's films" of the 1940s. Key artists include the Ashcan School, Lange, Evans, Steichen. Hine, Chaplin, Hitchcock, and Bette Davis. Films include *Modern Times*, *Rear Window*, *North by Northwest*, *Dark Victory*, and *Now Voyager*.

ART H 464(4600) Studies in Modern Art (LA-AS)

Spring. 4 credits. Prerequisite: permission of instructor. No auditors. J. E. Bernstock. Topic for spring 2008: U.S. Art in the Fifties. This class examines closely art that emerged in the United States as a creative reaction against consensus culture. Civil rights protests, the birth of rock'n'roll, and the beat generation are some of the phenomena considered as essential to the development of avant-garde art during this period.

ART H 466(4610) Women Artists (also FGSS 404[4040]) (LA-AS)

Fall. 4 credits. J. E. Bernstock.

This seminar examines both feminist art criticism and the work of women artists from antiquity to the present. We consider the works of the most prominent women artists from each period in relation to the changing roles of women in society. The artists covered include Jennifer Barlett, Artemisa Gentileschi, Elizabeth Vigee-Lebrun, Mary Cassatt, Kathe Kollwitz, Georgia O'Keefe, Louise Nevelson, Joan Mitchell, Judy Chicago, and Barbara Kruger.

ART H 470(4150) Intro to Critical Theory (also ART H 670[6150])

Fall. 4 credits. M. Fernandez.

This seminar will introduce students to theoretical texts relevant to multiple areas in the history of art and visual culture. Readings will include classic texts in post-structural theory and more recent writings in new areas of theory and artistic practice including: digital art, cyberfeminism, globalization, museums and museology, architecture in/ as visual space, biotechnology and artificial life as well as issues in cognitive science and human computer interaction centering on space and embodiment. Occasionally, the seminar will focus on a single topic of convergence for these diverse areas.

ART H 473(4773) Photography and the Colonial Gaze

Spring. 4 credits. J. Rickard.

Photography and the Colonial Gaze examines the role photography plays in the colonization of the Americas. This seminar balances 19th century "master" narratives of erasure, savage, natural, and scientific images of Native America with contemporary Indigenous media artists negotiating the issue of self representation.

[ART H 479(4979) Advanced Seminar in American Literature: Visual Culture in Women's Literature (also ENGL 479[4790], VISST 480[4800], FGSS 479[4790])

Fall. 4 credits. Next offered 2008-2009. S. Samuels.]

ART H 486(4816) Modern Chinese Art

Fall. 4 credits. A. Pan.

China, a cultural giant of East Asia, made a passive entrance into modernity. With the advent of Western and American colonialism and imperialism, coupled with recent successes in westernization by the Japanese, Chinese artists had to redefine their roles as well as their visions. This turmoil bore witness

to a vibrant beginning in modern Chinese art. Interactions between the Chinese themselves, and Chinese interactions with foreigners in the major cities of Shanghai and Beijing, fostered new directions in Chinese art and helped shape western visions of Chinese art history. Issues covered include: Chinese debates on western influence—their theoretical foundations and rationales; New visions for the future of Chinese art in the late 19th and early 20th centuries; Pluralistic approaches and arguments on “Chinese identity” in the modern era; Collecting art and the vision of history; The identity of traditional literati painters in the modern era—their roles, artworks, and deeds; Foreigners in China—the formation of major European collections of Chinese art, and the formation of “Chinese art history” in the West.

[ART H 491(4690) Comparative Modernities (also ART H 691[6910]) @ (CA-AS)]

Spring. 4 credits. Next offered 2008–2009. I. Dadi.]

[ART H 497(4997) Honors Research]

Fall or spring. 2 credits. Staff. The prospective honors student does rigorous independent readings supervised by a selected thesis advisor. By the end of the semester, an annotated bibliography and detailed outline of the thesis should be completed.

[ART H 498(4998) Honors Work I]

Fall or spring. 4 credits. Intended for senior art history majors who have been admitted to the honors program. Basic methods of art historical research are discussed and individual readings assigned, leading to selection of an appropriate thesis topic.

[ART H 499(4999) Honors Work II]

Fall or spring. 4 credits. Prerequisite: ART H 498. The student under faculty direction prepares a senior thesis.

[ART H 506(5505) Contemporary African Diaspora Art (also AS&RC 506[6500])]

Spring. 4 credits. C. Finley. Since the 1950's, projects of African decolonization and Black liberation and empowerment have influenced the work of African Diaspora artists in the Black Atlantic. Pivotal historic events, such as the Civil Rights Movement, the dismantling of colonial rule in Africa and the Brixton race riots in England, have urged Black artists to reexamine issues of memory, identity, history and belonging. This course considers those artists who trace a visual genealogy of the African Diaspora and Work in what has been identified as a practice of remembrance. We will focus on Artists working after 1960, but also will study the roots of the 20th century and in earlier periods.

[ART H 540(5440) Nature, Cultural Landscape, and Gardens in Early Modern Europe]

4 credits. Prerequisite: permission of instructor. C. Lazzaro.]

[ART H 571(5571) African Aesthetics (also AS&RC 503[6506])]

Spring. 4 credits. S. Hassan.

[ART H 580(5850) Dancing the Stone: Body, Memory, and Architecture (also THETR 580[5800])]

Spring. 4 credits. Prerequisite: permission of instructor. K. McGowan.

[ART H 585(5855) Threads of Consequence: Textiles in South and Southeast Asia]

Spring. 4 credits. Next offered 2008–2009. K. McGowan.]

[ART H 591-592(5991-5992) Supervised Reading]

591, fall; 592, spring. 4 credits; may be repeated for credit. Prerequisite: graduate standing.

[ART H 593-594(5993-5994) Supervised Study]

593, fall; 594, spring. 4 credit; may be repeated for credit. Prerequisite: graduate standing.

[ART H 600(6100) Proseminar (also ART H 400[4100], VISS 400[4200])]

Spring. 4 credits. Limited enrollment. Undergraduates should enroll in 400. I. Dadi.

Works of art have always engendered political, social, and cultural meanings. This seminar presents an introduction to the methods which art historians have engaged in, studying the objects and ideas that constitute the historiography of their discipline. Challenged and enlarged by cultural debates over issues of class, ethnicity, nationality, sexual orientation, and gender, the field of art history is expanding to incorporate problems of assessing quality of intention and reception along with authorship, of artistic production in place of artistic creation, and of Western-oriented attitudes to race in reference to orientalism and colonialism. Readings will focus on historically situating methods and the implications of their cross-cultural application. Papers will encourage students to put methods into practice, realizing in the process that subject matter is not an isolated choice to which methods are applied, but something which profoundly affects the approach which the researcher brings to the writing of art history.

[ART H 608(6508) Exhibiting Cultures: Museums, Monuments, Representation and Display (also ART H 408[4508], AS&RC 408/608[4504/6508], AM ST 408/608[4508/6508])]

4 credits. Undergraduates should enroll in 408. Next offered 2008–2009 C. Finley.]

[ART H 609(6509) Black Arts Movement]

Fall. 4 credits. C. Finley. For description, see ART H 409.

[ART H 615(6315) Visualizing the Sacred Iberia (also ART H 415[4315])]

Fall. 4 credits. C. Robinson. For description, see ART H 415.

[ART H 630(6250) Seminar in Classical Archaeology (also CLASS 630[7750], ARKEO 630[6300])]

Fall. 4 credits. Staff. For description, see CLASS 630.

[ART H 635(6235) Metamorphosis]

Fall. 4 credits. A. Alexandridis. For description, see ART H 435.

[ART H 642(6252) Research Methods in Archaeology (also CLASS 642[7742])]

Spring. 4 credits. S. Manning. For description, see CLASS 642.

[ART H 644(6144) Responsive Environments (also ART H 444[4144])]

Fall. 4 credits. M. Fernandez. This seminar will examine notions of interactivity, immersion, and responsiveness in

works of art and architecture from the 1950s to present. Select historically, significant works in traditional media, telematics, machine sculpture, interactive and digital installation will be explored as well as more recent genres of artistic practice including interactive cinema, locative media and video games. Theorizations of interactivity, addressing narrativity, performativity, embodiment, “liveliness” and the sensual and affective engagement of the user with the work will be discussed, as will the relation of art and surveillance, and the relation of ‘high art’ interactivity with popular techno-cultural forms. The relevance of these topics to architecture will be a recurrent theme.

[ART H 670(6170) Intro to Critical Theory]

Fall. 4 credits. M. Fernandez. For description, see ART H 470.

[ART H 691(6690) Comparative Modernities (also ART H 491[4690])]

4 credits. Next offered 2008–2009. I. Dadi. For description, see ART H 491.]

HUMAN BIOLOGY PROGRAM

J. Haas, nutritional sciences, director (220 Savage Hall, 255–2665); A. Clark (molecular biology and genetics); P. Cassano (nutritional sciences); B. Finlay (psychology); J. Fortune (physiology/women's studies); E. Frongillo (nutritional sciences); R. Johnston (psychology); K. A. R. Kennedy (ecology and systematics/anthropology); D. Levitsky (nutritional sciences); D. L. Pelletier (nutritional sciences); W. Provine (ecology and systematics/history); S. Robertson (human development); R. Savin-Williams (human development); M. Small (anthropology)

Human biology integrates the methods and theories of many disciplines, such as biological anthropology, nutrition, neurobiology, physiology, psychology, demography, ecology, genetics, and paleontology into a comprehensive study of biological diversity in *Homo sapiens*. A central focus of this interdisciplinary approach to the study of the human organism is an understanding of evolutionary processes that explain our biological variation through space and time. The curriculum of study seeks to educate future biological scientists to address the concerns of a society that is becoming more demanding of the scientific community to place its specialized biological knowledge in a broad context. The human biology curriculum is of particular relevance to undergraduate students in premedical and predentistry programs, biological anthropology, nutrition, human development, ecology and evolutionary biology, psychology, physiology, genetics, and the health-related sciences. It serves to bring together students who have a common interest in humankind as defined from these diverse fields and to provide a forum for student-faculty interaction on various topics relating to human evolution and biological diversity. Human biology is not a major but a curriculum of study that provides majors in various departments and colleges with a program for selecting elective courses that deal with the biology of the human species. Students after their freshman year may develop a program of study in human biology while majoring in any one of a number of different departmental fields.

Basic Requirements

The requirements for a program of study in human biology are designed to ensure sufficient background in physical sciences and mathematics to enable the student to pursue a wide range of interests in the fields of modern biological sciences, anthropology, and fields related to the evolution and biological diversity of the human species. Adjustments may be made in these requirements, depending on the student's academic background and affiliation with colleges and schools within the university.

The basic requirements are one year of introductory biology (BIO G 101-103 plus 102-104 or 105-106 or BIO G 107-108 offered during the eight-week Cornell Summer Session); one year of general chemistry (CHEM 207-208 or 215-216); one year of college mathematics (MATH 111-112 or 105-106 or 111-105); one course in genetics (BIO G 280, 281, or 282); one course in biochemistry (BIO G 330, 331, 332, or 333 or NS 320). It is recommended that students planning graduate study in biological anthropology, psychology, and related fields in the medical and nutritional sciences take a course in statistics. Students should consult their faculty advisor in human biology for help in selecting appropriate courses.

Elective courses should be taken that enable the student to acquire breadth in the subject matter of human biology outside of their departmental major. Therefore only 6 of the 15 human biology elective credits may also fulfill requirements for the major. Courses should be selected that also provide sufficient exposure to the integration of basic anatomical and physiological sciences with the behavior of individuals and groups within the context of evolutionary theory and ecology. The courses listed below are representative of the offerings in human biology and are included to assist the student in organizing a curriculum of study. They are organized into three groups that reflect the three levels of integration noted above: (1) human anatomy and physiology, (2) human behavior, and (3) human evolution and ecology. Students should choose at least one course from each of these areas of integration. It is anticipated that the student will include in a program of study at least one of the laboratory courses offered. It is expected that a student will take a minimum of 15 credits from among these courses.

There is no foreign language requirement for human biology beyond what is dictated by specific departments and colleges. The requirements for the human biology curriculum are set alongside requirements of the undergraduate majors as these are defined by different departments. Students with independent majors may design their own programs of study under the guidelines provided by their college. Although a student may indicate an interest in human biology in the freshman year and be able to obtain early guidance from a faculty advisor representing the curriculum of study, it is more usual for students to establish their course programs in the first semester of the junior year. The student may request one of the faculty advisors in his or her department who is listed as faculty in human biology to be their principal advisor, or he or she may have an advisor in the department of the major and seek the advice of a human biology faculty advisor in matters pertaining to satisfaction of the requirements. In certain cases a faculty

advisor may represent both the major and the curriculum of study in human biology.

Courses

Human Anatomy and Physiology

AN SC 410(4100) Nutritional Physiology and Metabolism
Fall. 3 credits.

BIOAP 214(2140) Biological Basis of Sex Differences (also B&SOC 214[2141], FGSS 214[2140])
Spring. 3 credits.

BIOAP 311(3110) Introductory Animal Physiology, Lectures (also VETPH 346[3460])
Fall. 3 credits.

BIOAP 319(3190) Animal Physiology Experimentation
Fall. 4 credits.

BIOAP 427(4270) Fundamentals of Endocrinology
Fall. 3 credits.

BIOAP 458(4580) Mammalian Physiology
Spring. 3 credits.

BIOBM 434(4340) Applications of Molecular Biology to Medicine, Agriculture, and Industry
Fall. 3 credits.

BIOBM 439(4390) Molecular Basis of Human Disease (also BIOGD 439[4390])
Fall. 3 credits.

BIOEE 274(2740) The Vertebrates: Structure, Function, and Evolution
Spring. 4 credits.

BIOGD 487(4870) Human Genomics
Fall. 3 credits.

BIOMI 417(4170) Medical Parasitology (also VETMI 431[4310])
Fall. 2 credits.

NS 115(1150) Nutrition, Health, and Society
Fall. 3 credits.

NS 315(3150) Obesity and the Regulation of Body Weight (also PSYCH 613[3150])
Spring. 3 credits.

NS 331(3310) Physiological and Biochemical Bases of Human Nutrition
Spring. 4 credits.

NS 341(3410) Human Anatomy and Physiology
Spring. 4 credits.

NS 361(3610) Biology of Normal and Abnormal Behavior (also PSYCH 361[3610])
Fall. 3 credits.

NS 421(4210) Nutrition and Exercise
Spring. 3 credits.

NS 431(4310) Mineral Nutrition and Chronic Disease
Fall. 3 credits.

NS 441(4410) Nutrition and Disease
Fall. 4 credits.

NS 475(4750) Mechanisms Underlying Mammalian Developmental Defects (also BIOAP 475[4750])
Spring. 3 credits.

NS 614(6140) Topics in Maternal and Child Nutrition
Fall. 3 credits.

PSYCH 322(3220) Hormones and Behavior (also BIONB 322[3220])
Fall. 3 or 4 credits.

PSYCH 425(4250) Cognitive Neuroscience
Fall. 4 credits.

PSYCH 460(4600) Human Neuroanatomy
Spring. 3 credits.

Human Behavior

ANTHR 208(3308) Anthropology of Human Mating (also BIONB 208[2080])
Spring. 3 credits.

ANTHR 390(3390) Primate Behavior and Ecology
Spring. 4 credits.

ANTHR 490(4930) Topics in Biological Anthropology
Spring. 4 credits.

BIONB 327(3270) Evolutionary Perspectives on Human Behavior
Fall. 3 credits.

BIONB 331(3310) Human Sociobiology
Spring. 3 credits.

BIONB 392(3920) Drugs and the Brain
Fall. 4 credits.

BIONB 421(4210) Effects of Aging on Sensory and Perceptual Systems (also PSYCH 431/631[4310/6310])
Fall. 3 or 4 credits.

BIONB 422(4220) Modeling Behavioral Evolution
Spring. 4 credits.

BIONB 424(4240) Neuroethology (also PSYCH 424[4240])
Spring. 3 credits.

BIONB 427(4270) Animal Social Behavior
Fall. 4 credits.

BIONB 428(4280) Clinical Neurobiology
Fall. 3 credits.

BIONB 431(4310) Genes and Behavior
Spring. 3 credits.

BIONB 496(4960) Bioacoustic Signals in Animals and Man
Fall. 3 credits.

BIOPL 247(2470) Ethnobiology
Fall. 3 credits.

BIOPL 348(3480) The Healing Forest
Spring. 2 credits.

BIOPL 442(4420) Current Topics in Ethnobiology
Fall. 3 credits.

DEA 325(3250) Human Factors: Ergonomics—Anthropometrics
Fall. 3 credits.

DEA 350(3500) Human Factors: The Ambient Environment
Spring. 3 credits.

- HD 220(2200) The Human Brain and Mind: Biological Issues in Human Development (also COGST 220[2200])**
Fall. 3 credits.
- HD 266(2660) Emotional Functions of the Brain**
Spring. 3 credits.
- HD 320(3200) Human Developmental Neuropsychology**
Spring. 3 credits.
- HD 344(3440) Infant Behavior and Development**
Fall. 3 credits.
- HD 366(3660) Psychobiology of Temperament and Personality**
Fall. 3 credits.
- HD 433(4330) Developmental Cognitive Neurosciences (also COGST 433[4330])**
Spring. 3 credits.
- NS 245(2450) Social Science Perspectives on Food and Nutrition**
Fall. 3 credits.
- NS 347(3470) Human Growth and Development: Biological and Behavioral Interactions (also HD/B&SOC 347[3470])**
Spring. 3 credits.
- NS 361(3610) Biopsychology of Normal and Abnormal Behavior (also PSYCH 361[3610])**
Fall. 3 credits.
- PAM 380(3800) Human Sexuality**
Spring. 4 credits.
- PSYCH 223(2230) Introduction to Biopsychology**
Fall. 3 credits.
- PSYCH 332(3320) Biopsychology of Learning and Memory (also BIONB 328[3280])**
Spring. 3 credits.
- PSYCH 326(3260) Evolution of Human Behavior**
Spring. 4 credits.
- PSYCH 422(4220) Developmental Biopsychology**
Fall. 4 credits.
- PSYCH 425(4250) Cognitive Neuroscience (also BIONB 423[4230])**
Fall. 4 credits.
- PSYCH 427(4270) Evolution of Language (also COGST 427[4270])**
Fall. 3 credits.
- PSYCH 440(4400) The Brain and Sleep**
Fall. 4 credits.

Human Evolution and Ecology

- ANTHR 101(1300) Introduction to Anthropology: Biological Perspectives on the Evolution of Humankind**
Fall. 3 credits.
- ANTHR 203(2200) Early People: The Archaeological and Fossil Record (also ARKEO 203[2200])**
Spring. 3 credits.
- ANTHR 375(3375) Evolutionary Theory and Human Behavior**
Spring. 4 credits.

Fall. 3 credits.

HUNGARIAN

See "Department of Linguistics" and "Russian."

INDEPENDENT MAJOR PROGRAM

J. Finlay, director, 55 Goldwin Smith Hall, 255-5004.

The Independent Major Program is described in the introductory section of "College of Arts and Sciences."

IM 351(3510) Independent Study

Fall or spring. 1-4 credits. Prerequisite: permission of program director.

IM 499(4990) Honors Research

Fall or spring. 1-8 credits; max. of 8 credits may be earned for honors research. Prerequisite: permission of program director. Each participant must submit brief proposal approved by Honors Committee.

INDONESIAN

See "Department of Asian Studies."

INEQUALITY CONCENTRATION

363 Uris Hall
www.inequality.cornell.edu
254-8674

The study of inequality lies at the heart of current debates about segregation, affirmative action, the "glass ceiling," globalization, and any number of other contemporary policy issues. In recent years, public and scholarly interest in issues of inequality has intensified, not merely because of historic increases in income inequality in the United States and other advanced industrial countries, but also because inequalities of race, ethnicity, and gender are evolving in equally dramatic and complicated ways.

The inequality concentration allows undergraduate students to supplement their studies for their major with a coherent program of courses oriented toward the study of inequality. Although Cornell University is a leading center of scholarship on poverty and inequality, this strength is necessarily distributed across many departments and colleges; an interdisciplinary concentration thus allows students to combine these resources into an integrated program of study. The institutional home for the inequality concentration is the Center for the Study of Inequality (located at 363 Uris Hall and at www.inequality.cornell.edu).

The inequality concentration is appropriate for students interested in government service, policy work, and related jobs in non-governmental organizations (NGOs) as well as students who wish to pursue post-graduate education in such fields as public policy,

economics, government, law, history, psychology, sociology, anthropology, literature, and philosophy. In many of these fields, the study of inequality is becoming increasingly central and fundamental, and the inequality concentration can therefore provide students with a valuable and unique foundation for further study.

The inequality concentration is not a major but rather is an interdisciplinary program that should be completed in conjunction with a major. The concentration is open to students enrolled in any of the seven Cornell undergraduate colleges. When the requirements of the concentration are met, a certification is recorded on a student's transcript.

Concentration Requirements

The inequality concentration exposes students to a breadth of approaches, methods, and topic areas while also allowing them to tailor a program to their particular interests. The requirements are as follows:

1. Overview Course

The required overview course may be selected from any of the eight courses listed below. When possible, the overview course should be completed early in the program, as it serves to define the field and to expose students to areas and topics that might be explored in future course work.

- Income Distribution (ILRLE 441)
- Inequality, Diversity, and Justice (PHIL 193, CRP/GOVT/SOC 293)
- Power and Poverty in America (GOVT 310)
- Social Inequality (SOC 208 and D SOC 209)
- Comparative Social Stratification (D SOC 370 and SOC 371)
- Organizations and Social Inequality (ILROB 626)
- Racial and Ethnic Differentiation (PAM/SOC 337)

2. Controversies About Inequality

(PHIL 195, SOC/PAM/ILROB/D SOC/GOVT 222)

This 3-credit course introduces students to current controversies in the study of inequality while facilitating interdisciplinary dialogue between concentrators and faculty members at Cornell University. Students are exposed to research on inequality under way at Cornell presented by guest lecturers and also participate in debates on pressing inequality-relevant issues (e.g., welfare reform, school vouchers, immigration policy, affirmative action).

3. Electives

In addition to the overview course and core course, students must select four electives from the list of qualified courses. This list can be viewed on the web site for the Center for the Study of Inequality, www.inequality.cornell.edu. Although students may tailor their programs to match their interests, the electives and overview course must be distributed across at least three departments (thereby ensuring breadth in the analytic approaches that are represented).

4. Lectures and Seminars

The Center for the Study of Inequality (CSI) hosts occasional lectures and symposia, and concentrators are expected to attend them when possible. These events will be announced via e-mail and are also listed on the center web site, www.inequality.cornell.edu.

Enrolling in the Concentration

The web site for the Center for the Study of Inequality, www.inequality.cornell.edu, provides current information on the Inequality Concentration. For students considering the concentration, it may be useful to schedule a meeting with the assistant to the director (inequality@cornell.edu).

Sample Programs

The inequality concentration allows students considerable flexibility in devising programs that reflect their interests. As examples of possible programs, we have listed below sample tracks, each comprising a different set of possible electives. The first program listed below is a general track that provides an overview of the field, while the remaining nine programs are more specialized and focus on particular issues within the field. This sampling of programs is obviously illustrative and does not cover the entire wide range of interests that may be addressed within the concentration.

Globalization and Inequality

As a global economy takes hold, there has been increasing concern that economic inequalities will grow apace, especially North-South inequalities between rich and poor countries. The countervailing "optimistic view" is that between-country disparities will in the long run wither away and render inequality an entirely internal, within-country affair. These and related lines of argumentation can be explored in courses that address such topics as trends in income inequality, theories of economic development, emerging patterns of international migration, and globalization and gender.

1. *Overview Course (choose any one)*
2. *Controversies About Inequality* (PHIL 195, SOC/PAM/ECON/ILROB/GOVT/D SOC 222)
3. *Possible Electives (choose any four):*
 - International Development (D SOC 205, SOC 206)
 - Economic Development (ECON 371)
 - Labor Markets and Income Distribution in Developing Countries (ILRIC 635)
 - Contemporary Controversies in the Global Economy (AEM 200)
 - Environmental Aspects of International Urban Planning (CRP 453/683)
 - Gender and Globalization (FGSS 360, CRP 3950)
 - Education, Inequality, and Development (D SOC 305)
 - Sex and Gender in Cross-Cultural Perspective (ANTHR 321/621, FGSS 321/621)
 - Rural Areas in Metropolitan Society (D SOC 336)

Gender and International Development (FGSS/CRP 614)

Politics of Transnationalism (GOVT 681)

Social Policy and Inequality

In the modern period, inequalities generated in the market and through other social institutions are typically regarded as excessive, and the state is seen as the main tool for redistribution, discrimination abatement, equalization of life chances, and related forms of amelioration. The social policy and inequality track explores the role of the state in generating and reducing inequalities of various kinds.

1. *Overview Course (choose any one)*
2. *Controversies About Inequality* (PHIL 195, SOC/PAM/ILROB/D SOC/GOVT 222)
3. *Possible Electives (choose any four):*
 - Organizations and Social Inequality (SOC 322, ILROB 626)
 - Economic Security (ECON 451)
 - Employment Discrimination and the Law (ILRCB 684)
 - Human Resource Economics and Public Policy (ILRHR 360)
 - Diversity and Employee Relations (ILRHR 463)
 - Social Welfare as a Social Institution (PAM 383)
 - Economics of the Public Sector (PAM 204)
 - Introduction to Policy Analysis (PAM 230)
 - Introduction to Public Policy (GOVT 307)
 - Urban Politics (GOVT 311)
 - Demography and Family Policy (PAM 371)
 - Evolving Families: Challenges to Family Policy (PAM 336)
 - Low-Income Families: Qualitative and Policy Perspectives (PAM 335)
 - Risk and Opportunity Factors in Childhood and Adolescence (HD 353)
 - Social Policy (PAM 473)
 - Social Policy and Social Welfare (CRP 448/548)
 - Policy Analysis: Welfare Theory, Agriculture, and Trade (ECON 430, AEM 630)
 - Economic Analysis of the Welfare State (ILRLE 642, ECON 460)
 - Families and Social Policy (HD 456)
 - Health and Social Behavior (HD 457)
 - Public Policy and the African-American Urban Community (AS&RC 420)
 - Beliefs, Attitudes, and Ideologies (PSYCH 489, FGSS 488)
 - Research on Education Reform and Human Resource Policy (ILRHR 653)

The Ethics of Inequality

Charges of social injustice are often charges of excessive inequality. What are the political, philosophical, and legal debates that are relevant to such judgements? Under what conditions should rich countries assist poor ones? At what point should governments step

in and redistribute income? When should parents pass on their wealth to their children? The ethics of inequality track examines the conditions under which inequalities might be deemed legitimate or illegitimate, evaluates prevailing inequalities and social policy as against this yardstick, and explores the larger role of values in popular and scholarly judgments about inequality.

1. *Overview Course: Inequality, Diversity, and Justice* (PHIL 193, SOC/CRP/GOVT 293)
2. *Controversies About Inequality* (PHIL 195, SOC/PAM/ILROB/GOVT 222)
3. *Possible Electives:*

A. Ethics Courses (choose two)

Values in Law, Economics, and Industrial Relations (ILRCB 607)

Contemporary Moral Issues (PHIL 145)

Global Thinking (GOVT 294)

Modern Political Philosophy (PHIL 346)

Feminism and Philosophy (PHIL/FGSS 249)

Marx: An Overview of His Thought (ANTHR 368)

B. Social Science Classes (choose two)

Select courses in consultation with advisor (see list of electives below).

Poverty and Economic Development

Over the past century, rich countries have of course become yet richer, while less developed countries remain burdened with massive poverty. The courses listed below examine the sources and causes of world poverty, the rise of global anti-inequality social movements, and the types of policy interventions that might stimulate economic development and reduce poverty.

1. *Overview Course (choose any one)*
2. *Controversies About Inequality* (PHIL 195, SOC/PAM/ILROB/D SOC/GOVT 222)
3. *Possible Electives (choose any four):*
Economic Development (ECON 371)
Issues in African Development (CRP 477/677)
Labor Markets and Income Distribution in Developing Countries (ILRIC 635)
Health and Survival Inequalities (SOC 410)
Applied Economic Development (ECON 372)
Low-Income Families: Qualitative and Policy Perspectives (PAM 335)
Population, Environment, and Development in Sub-Saharan Africa (D SOC 495)
Gender and International Development (FGSS/CRP 614)
Politics of Transnationalism (GOVT 681)
Economics of Hunger and Malnutrition (NS 457, ECON 474)

Social Movements and Inequality

The history of modern society may be seen in large part as a history of anti-inequality social movements (e.g., the Enlightenment, socialism, the union movement, the civil rights movement, feminism) interspersed with

occasional inequality-inducing reactions (e.g., the post-socialist transition). The social movements track examines the causes, effects, and likely future of such social movements and the reactions they spawn.

1. *Overview Course (choose any one)*
2. *Controversies About Inequality* (PHIL 195, SOC/PAM/ILROB/GOVT 222)
3. *Possible Electives (choose any four):*
Utopia in Theory and Practice (SOC 115)
Social Movements (SOC 280)
Social Movements in American Politics (GOVT/AM ST 302)
States and Social Movements (SOC/GOVT 660)
Politics of Transnationalism (GOVT 681)
Feminism Movements and the State (GOVT/FGSS 353)
Comparative Labor Movements in Latin America (ILRIC 631)
Union Organizing (ILRCB 400)
Theories of Industrial Relations Systems (ILRCB 606)
Revitalizing the Labor Movement: A Comparative Perspective (ILRIC 632)
Women and Unions (ILRCB/FGSS 384)
Latina Activism Feminist Theory (LSP 300)
Prisons (GOVT 314)

Education and the Reproduction of Inequality

In the contemporary period, the study of inequality has increasingly turned on the study of formal education, as schools have become the main institutional locus for training and credentialing workers and for signaling potential employers about (putative) worker quality. The inequality and education track examines educational institutions and how they are organized, how they generate equality and inequality, and how possible institutional changes (e.g., vouchers, required testing) might affect the reproduction of inequalities.

1. *Overview Course (choose any one)*
2. *Controversies About Inequality* (PHIL 195, SOC/PAM/ILROB/D SOC/GOVT 222)
3. *Possible Electives (choose any four):*
Social and Political Context of American Education (EDUC 271)
Education, Inequality, and Development (D SOC 305)
Schooling, Racial Inequality, and Public Policy in America (SOC 357)
Research on Education Reform and Human Resource Policy (ILRHR 653)
Education, Technology, and Productivity (ILRHR 695)
Educational Innovations in Africa and the Diaspora (AS&RC/EDUC 459)
Education and Development in Africa (AS&RC 502)

Race and Ethnicity in Comparative Perspective

This program of study examines the many forms of racial and ethnic inequality as revealed across different times and places. When race and ethnicity are examined from

an explicitly comparative perspective, it becomes possible to identify regularities and better understand the forces of competition, conflict, and subordination among ethnic and racial groups. The courses listed below address such issues as the causes of discrimination, the implications of residential segregation for inequality, the sources of ethnic and racial differences in income, the effects of anti-inequality reform efforts (e.g., affirmative action), and the possible futures of ethnic and racial stratification.

1. *Overview Course (choose any one)*
2. *Controversies About Inequality* (PHIL 195, SOC/PAM/ILROB/D SOC/GOVT 222)
3. *Possible Electives (choose any four):*

A. General Courses

Introduction to American Studies: New Approaches to Understanding American Diversity, the 20th Century (AM ST/LSP 110)

Racial and Ethnic Politics (GOVT 319)

Health and Survival Inequalities (SOC 410)

Sociology of Health and Ethnic Minorities (LSP/D SOC 220)

Prisons (GOVT 314)

Minority Politics in the United States (GOVT/LSP 319)

Racial and Ethnic Differentiation (SOC 337)

Race, Gender, and Organization (FGSS 415)

Employee Relations and Diversity (ILRHR 463)

Ethnicity and Identity Politics: An Anthropological Perspective (ANTHR 479)

Political Identity: Race, Ethnicity, and Nationalism (GOVT/LSP 610)

B. Immigration and Ethnicity

Comparative Migration to the Americas (LSP 203, HIST 202)

Strangers and Citizens: Immigration and Labor in U.S. History (ILRCB 302)

Immigration and Ethnic Identity (AAS 438)

The Immigrant City: 1900 to 2000 (LSP/S HUM/AM ST 406, HIST 412)

Immigration and the American Labor Force (ILRHR 469)

Immigration and Ethnicity in 20th-Century United States (HIST 201)

Immigrants, Migrants, and Metro Governance (GOVT 422)

C. Case Studies

African-American Social and Political Thought (AS&RC 231)

African-American Women: 20th Century (HIST/AM ST/FGSS 212)

African-American History from Slavery to Freedom (HIST 335)

African-American Social History, 1865 to 1910: The Rural and Urban Experience (HIST 375, ILRCB 385)

African-American Social History, 1910 to The Present: Race, Work, and the City (HIST 376, ILRCB 386)

African-American Women in Slavery and Freedom (HIST/AM ST 303, FGSS 307)

- Public Policy and the African-American Urban Community (AS&RC 420)
- Politics and Social Change in Southern Africa (AS&RC 484)
- Afro-American Historiography (HIST 610)
- African-American Women (HIST 608)
- Latinos in the United States (SOC/D SOC 265, LSP 201)
- Latinos in the United States: Colonial Period to 1898 (LSP/HIST 260, AM ST 259)
- Latinos in the United States: 1898 to the Present (LSP/HIST/AM ST 261)
- Latina Activism Feminist Theory (LSP 300)
- Latino Politics in the United States (LSP 306)
- Introduction to Asian American Studies (AAS 110)
- Asian American History (AAS/HIST 213)
- Asians in the Americas: A Comparative Perspective (AAS/ANTHR 303)
- Introduction to American Indian Studies (AIS/D SOC 100)
- Indian America in the 20th Century (AIS 175)
- Indians, Settlers, and Slaves in the Early South (AIS/HIST 329)
- Antisemitism and the Crisis of Modernity: From the Enlightenment to the Holocaust (HIST/JWST 459)

The Family and Inequality

Although workers in modern labor markets are often analytically treated as independent individuals, they of course typically belong to families that pool the labor supply of their members, consume goods jointly, and serve in some circumstances as units of collective production. It might therefore be asked how the modern labor market has adapted to and evolved in the context of the family (and, conversely, how the family has responded to the market). The courses within this track explore such issues as the causes and consequences of the intrafamilial division of labor, the effects of marriage and family structure on careers, and the transmission of socioeconomic advantage from one generation to the next.

1. *Overview Course (choose any one)*
2. *Controversies About Inequality* (PHIL 195, SOC/PAM/ILROB/D SOC/GOVT 222)
3. *Possible Electives (choose any four):*
 - Work and Family in Comparative Perspective (SOC 203)
 - Demography and Family Policy (PAM 371)
 - Families and Social Policy (HD 456)
 - Families and the Life Course (SOC 251, HD 250)
 - Parent-Child Development in African-American Families (HD 458)
 - Economics of Family Policy (PAM 605)
 - Politics and Culture SOC 248/GOVT 363
 - Inequality, Diversity, and Justice SOC 293/GOVT 293/CRP 293/PHIL 193

INFORMATION SCIENCE

C. Cardie, director; J. Abowd, W. Y. Arms, G. Bailey, K. Bala, L. Blume, R. Caruana, R. Constable, D. Easley, S. Edelman, E. Friedman, G. Gay, J. Gehrke, T. Gillespie, P. Ginsparg, C. Gomes, J. Halpern, J. Hancock, A. Hedge, D. Huttenlocher, T. Joachims, J. Kleinberg, C. Layoze, L. Lee, A. Leiponen, B. Lust, M. Macy, P. Martin, T. Pinch, R. Prentice, M. Rooth, B. Selman, P. Sengers, D. Shmoys, M. Spivey, D. Strang, E. Tardos, E. Wagner, S. Wicker, D. Williamson, C. Yuan.

The Major

Information Science (IS) is an interdisciplinary field that explores the design and use of information systems in a social context: the field studies the creation, representation, organization, application, and analysis of information in digital form. The focus of Information Science is on systems and their use rather than on the computing and communication technologies that underlie and sustain them. Moreover, Information Science examines the social, cultural, economic, historical, legal, and political contexts in which information systems are employed, both to inform the design of such systems and to understand their impact on individuals, social groups, and institutions.

Courses in the Information Science (IS) major are assigned to three area-based tracks:

Human-Centered Systems This area examines the relationship between humans and information, drawing from human-computer interaction and cognitive science.

Information Systems This area examines the computer science problems of representing, organizing, storing, manipulating, and accessing digital information.

Social Systems This area studies the cultural, economic, historical, legal, political, and social contexts in which digital information is a major factor.

Students must complete a set of 11 core courses: one introductory course, four courses in mathematics and statistics, and two courses from each of the three IS area-based tracks. Students must also obtain depth in two tracks—a primary and a secondary track—that together best represent their interests. In particular, completion of the major requires four advanced courses from the selected primary track and three advanced courses from the secondary track.

Requirements

Core (11 courses)

1. **Introductory (one course):**
INFO 130 Introductory Design and Programming for the Web
2. **Math and Statistics (four courses):**
MATH 111 Calculus I
either MATH 231 Linear Algebra with Applications or MATH 221 Linear Algebra and Differential Equations
INFO 295 Mathematical Methods for Information Science

One of the following:

- MATH 171 Statistical Theory and Application in the Real World
- H ADM 201 Hospitality Quantitative Analysis

- AEM 210 Introductory Statistics
 - PAM 210 Introduction to Statistics
 - ENGRD 270 Basic Engineering Probability and Statistics
 - BTRY 301 Statistical Methods I
 - SOC 301 Evaluating Statistical Evidence
 - CEE 304 Uncertainty Analysis in Engineering
 - ILRST 312 Applied Regression Methods
 - ECON 319 Introduction to Statistics and Probability
 - PSYCH 350 Statistics and Research Design
3. **Human-Centered Systems (two courses):**
- INFO 214 Cognitive Psychology
 - INFO 245 Psychology of Social Computing
4. **Information Systems (two courses):**
- CS 211 Computers and Programming
 - INFO 230 Intermediate Design and Programming for the Web
5. **Social Systems (two courses):**
- either ECON 301 Microeconomics or ECON 313 Intermediate Microeconomic Theory
 - one of the following: INFO 292 Inventing an Information Society, INFO 320 New Media and Society, INFO 355 Computers: From the 17th Century to the Dot.com Boom, INFO 356 Computing Cultures, INFO 320 New Media and Society

Where options in the core courses exist, the choice will depend on the student's interests and planned advanced courses for the selected primary and secondary tracks.

Tracks

Students must complete four advanced courses in their primary track and three advanced courses in their secondary track, selected from those listed below.

Courses taken to satisfy the core course requirements may not be used to fulfill the track requirements.

Additional information on Information Science courses can be found below and in the "Computing and Information Science (CIS)" section of *Courses of Study*. Course information for all other courses in the major can be found in the relevant departments (e.g., AEM, CS, S&TS).

Human-Centered Systems

- PSYCH 342 Human Perception: Applications to Computer Graphics, Art, and Visual Display*
- INFO 345 Human-Computer Interaction Design
- PSYCH 347 Psychology of Visual Communications
- PSYCH 380 Social Cognition*
- PSYCH 413 Information Processing: Conscious and Unconscious
- PSYCH 416 Modeling Perception and Cognition
- INFO 440 Advanced Human-Computer Interaction Design
- INFO 445 Seminar in Computer-Mediated Communication
- INFO 450 Language and Technology
- DEA 470 Applied Ergonomic Methods

* Students who take PSYCH 342 may also count its prerequisite, PSYCH 205, toward the Human-Centered Systems primary or secondary track requirements. Similarly, students who take PSYCH 380 may also count PSYCH 280 toward the Human-Centered Systems primary or secondary track requirements. At most, one of PSYCH 205 or PSYCH 280 can be counted toward the primary or secondary track requirements.

Information Systems

- INFO 330 Data-Driven Web Applications
- CS 419 Computer Networks
- LING 424 Computational Linguistics
- INFO 430 Information Retrieval
- INFO 431 Web Information Systems
- CS 432 Introduction to Database Systems
- CS 465 Introduction to Computer Graphics
- CS 472 Foundations of Artificial Intelligence
- LING 474 Introduction to Natural Language Processing
- OR&IE 474 Statistical Data Mining
- CS 478 Machine Learning
- OR&IE 480 Information Technology
- CS 501 Software Engineering
- CS 513 System Security
- INFO 530 Architecture of Large-Scale Information Systems
- OR&IE 574 Statistical Data Mining
- CS 578 Empirical Methods in Machine Learning and Data Mining

Social Systems

- INFO 204 Networks
- SOC 304 Social Networks and Social Processes
- INFO 320 New Media and Society
- AEM 322 Technology, Information, and Business Strategy*
- INFO 349 Media Technologies
- INFO 355 Computers: From the 17th Century to the Dot.com Boom
- INFO 356 Computing Cultures
- INFO 366 History and Theory of Digital Art
- ECON 368 Game Theory (formerly ECON 467)*
- INFO 387 The Automatic Lifestyle: Consumer Culture and Technology
- S&TS 411 Knowledge, Technology, and Property
- INFO 415 Environmental Interventions
- ECON 419 Economic Decisions under Uncertainty
- INFO 429 Copyright in a Digital Age
- INFO 435 Seminar on Applications of Information Science
- OR&IE 435 Introduction to Game Theory*
- S&TS 438 Minds, Machines, and Intelligence
- INFO 444 Responsive Environments
- INFO 447 Social and Economic Data
- H ADM 474 Strategic Information Systems*
- ECON 476/477 Decision Theory I and II
- H ADM 489 The Law of the Internet and E-Commerce

INFO 515 Culture, Law, and Politics of the Internet

*Only one of OR&IE 435 and ECON 368 may be taken for IS credit. Only one of AEM 322 and H ADM 474 may be taken for IS credit.

Admission

All potential affiliates are reviewed on a case-by-case basis relative to the following criteria:

- Completion of four core courses, one in each of the core course areas listed above (i. e., Math and Statistics, Human-Centered systems, Information Systems, and Social Systems). Courses must be taken for a letter grade.
- A grade of C or better in each of the completed core courses with an overall GPA for these courses of 2.5 or more.

Courses used in the affiliation GPA computations may be repeated if the original course grade was below a C. The most recent grade will be used for all repeated courses. Qualifying courses must be taken at Cornell.

Honors

To qualify for departmental honors, a student must have:

- maintained a cumulative GPA greater than or equal to 3.5;
- completed INFO 435 Seminar on Applications of Information Science;
- completed 3 additional credits of IS course work at or above the 500 level (graded courses only; no seminars or 2-credit project courses; these courses are in addition to the primary and secondary track requirements);
- completed 6 credits of INFO 490 Independent Study and Research with an IS faculty member, spread over at least two semesters and with grades of A- or better. It is expected that the research pursued in INFO 490 will result in a project report.

The Concentration

A concentration in Information Science is also available to students in the College of Arts and Sciences, CALS, AAP (Architecture and Planning students only), Engineering, Human Ecology, Hotel, and ILR. The concentration has been designed to ensure that students have substantial grounding in all three tracks: Human-Centered Systems, Information Systems, and Social Systems. Detailed information about the concentration can be found in the CIS section of *Courses of Study*. Students are also referred to www.infosci.cornell.edu/ugrad/concentrations.html for the most up-to-date description of the concentration and its requirements.

Courses

For complete course descriptions, see the Information Science listings under Computing and Information Science (CIS).

INFO 130(1300) Introductory Design and Programming for the Web (also CS 130[1300])
Fall. 3 credits.

For description, see INFO 130 in CIS section.

[INFO 172(1700) Computation, Information, and Intelligence (also

COGST 172, CS 172[1700], ENGR172[1700]) (MQR)

Fall. 3 credits. Prerequisites: some knowledge of differentiation; permission of instructor for students who have completed equivalent of CS 100. Next offered 2008–2009.

For description, see CS 172 in CIS section.]

INFO 204(2040) Networks (also ECON 204[2040], SOC 209[2120]) (SBA-AS)
Spring. 4 credits.

For description, see ECON 204.

INFO 214(2140) Cognitive Psychology (also COGST 214[2140], PSYCH 214[2140]) (KCM-AS)

Fall. 4 credits. Limited to 175 students. Prerequisite: sophomore standing. Graduate students, see INFO/PSYCH 614.

For description, see PSYCH 214.

INFO 230(2300) Intermediate Design and Programming for the Web (also CS 230[2300])

Spring. 3 credits. Prerequisite: CS/INFO 130 or equivalent.

For description, see INFO 230 in CIS section.

INFO 245(2450) Psychology of Social Computing (also COMM 245[2450])

Fall. 3 credits.

For description, see COMM 245.

[INFO 292(2921) Inventing an Information Society (also AM ST 292[2980], ECE/ENGRG 298[2980], HIST 292[2920], S&TS 292[2921]) (HA-AS)]

Spring. 3 credits; may not be taken for credit after ECE/ENGRG 198. Next offered 2008–2009.

For description, see ENGRG 298.]

INFO 295(2950) Mathematical Methods for Information Science

Fall. 4 credits. Corequisite: MATH 231 or equivalent.

For description, see INFO 295 in CIS section.

INFO 320(3200) New Media and Society (also COMM 320[3200])

Spring. 3 credits.

For description, see COMM 320.

INFO 330(3300) Data-Driven Web Applications (also CS 330[3300])

Fall. 3 credits. Prerequisite: CS/ENGRD 211.

For description, see INFO 330 in CIS section.

INFO 345(3450) Human-Computer Interaction Design (also COMM 345[3450])

Spring. 3 credits.

For description, see COMM 345.

INFO 349(3491) Media Technologies (also COMM 349[3490], S&TS 349[3491]) (HA-AS)

Spring. 3 credits.

For description, see COMM 349.

INFO 355(3551) Computers: From the 17th Century to the Dot.com Boom (also S&TS 355[3551]) (HA-AS)

Fall. 4 credits.

For description, see S&TS 355.

[INFO 356(3561) Computing Cultures (also S&TS 356[3561]) (CA-AS)]

INFO 366(3650) History and Theory of Digital Art (also ART H 366[3650]) (CA-AS)

Fall. 4 credits.

For description, see ART H 366.

INFO 372(3720) Explorations in Artificial Intelligence (also CS 372[3700])

Spring, 3 credits. Prerequisites: MATH 111 or equivalent, an information science approved statistics course, and CS 211 or permission of instructor.

For description, see INFO 372 in CIS section.

[INFO 387(3871) The Automatic Lifestyle: Consumer Culture and Technology (also S&TS 387[3871]) (CA-AS)]

Spring, 4 credits. Next offered 2008-2009.

For description, see S&TS 387.]

INFO 415(4150) Environmental Interventions (also S HUM 415)

Fall, 4 credits.

For description, see S HUM 415.

INFO 429(4290) Copyright in the Digital Age (also COMM 429[4290])

Fall, 3 credits.

INFO 430(4300) Information Retrieval (also CS 430[4300])

Fall, 3 credits. Prerequisite: CS/ENGRD 211 or equivalent.

For description, see INFO 430 in CIS section.

INFO 431(4302) Web Information Systems (also CS 431[4302])

Spring, 3 credits. Prerequisites: CS 211 and some familiarity with web site technology.

For description, see CS 431 in CIS section.

INFO 435(4390) Seminar on Applications of Information Science (also INFO 635[6390])

Spring, 3 credits. Prerequisites: background in computing, data structures, and programming at level of CS 211 or equivalent, and experience in using information systems.

For description, see INFO 435 in CIS section.

INFO 440(4400) Advanced Human-Computer Interaction Design (also COMM 440[4400])

Fall, 3 credits. Prerequisite: COMM/INFO 245.

For description, see COMM 440.

INFO 444(4144) Responsive Environments (also ART H 444[4144]) (CA-AS)

Spring, 4 credits.

For description, see ART H 444.

[INFO 445(4450) Seminar in Computer-Mediated Communication

Fall, 3 credits. Prerequisites: COMM/INFO 245. Next offered 2009-2010.

For description, see COMM 445.]

INFO 447(4470) Social and Economic Data (also ILRLE 447[4470])

Spring, 4 credits. Prerequisites: one semester of calculus, IS statistics requirement, at least one upper-level social science course, or permission of instructor.

For description, see INFO 447 in CIS section.

INFO 450(4500) Language and Technology (also COMM 450[4500])

Spring, 3 credits. Prerequisite: COMM 240 or COMM/INFO 245 or permission of instructor.

For description, see COMM 450.

INFO 490(4999) Independent Reading and Research

Fall, spring, 1-4 credits.

Independent reading and research for undergraduates.

INFO 491(4910) Teaching in Information Science, Systems, and Technology

Fall, spring, Variable credit.

Involves working as a TA in a course in the information science, systems, and technology major.

INFO 515(5150) Culture, Law, and Politics of the Internet

Fall, 4 credits.

For description, see INFO 515 in CIS section.

INFO 530(5300) The Architecture of Large-Scale Information Systems (also CS 530[5300])

Spring, 4 credits. Prerequisite: CS/INFO 330 or CS, 432.

For description, see INFO 530 in CIS section.

INFO 614(6140) Cognitive Psychology (also PSYCH 614[6140])

Fall, 4 credits.

For description, see PSYCH 614.

INFO 630(6300) Advanced Language Technologies (also CS 674[6740])

Fall or spring. In 2007-2008, offered in fall, 3 credits. Prerequisites: permission of instructor. Neither INFO/CS 430 nor CS 474 are prerequisites.

For description, see CS 674 in CIS section.

INFO 635(6390) Seminar on Applications of Information Science (also INFO 435[4390])

Spring, 3 credits. Prerequisites: background in computing, data structures, and programming at level of CS 211 or equivalent, and experience using information systems. Undergraduates and master's students should register for INFO 435; Ph.D. students should register for INFO 635.

For description, see INFO 635 in CIS section.

INFO 640(6400) Human-Computer Interaction Design (also COMM 640[6400])

Fall, 3 credits. Prerequisite: graduate standing or permission of instructor.

For description, see COMM 640.

INFO 645(6450) Seminar in Computer-Mediated Communication (also COMM 645[6450])

Spring, 3 credits. Prerequisite: graduate standing or permission of instructor.

For description, see COMM 645.

INFO 648(6648) Speech Synthesis by Rule (also LING 648[6648])

Spring, 4 credits. Prerequisite: LING 401, 419, or permission of instructor.

For description, see LING 648.

INFO 650(6500) Language and Technology (also COMM 650[6500])

Spring, 3 credits. Prerequisite: graduate standing or permission of instructor.

For description, see COMM 650.

[INFO 651(6002) Critical Technical Practices]**INFO 685(6850) The Structure of Information Networks (also CS 685[6850])**

Fall or spring, 4 credits. Prerequisite: CS 482.

For description, see INFO 685 in CIS section.

INFO 709(7090) IS Colloquium

Fall, spring, 1 credit. For staff, visitors, and graduate students interested in information science.

INFO 747(7400) Social and Economic Data (also ILRLE 740[7400])

Spring, 4 credits. Prerequisites: open to

Ph.D. and research master's students only.

For description, see INFO 747 in CIS section.

INFO 790(7900) Independent Research

Fall, spring, Variable credit. Prerequisite: permission of an information science faculty member.

Independent research for M.Eng. students and pre-A exam Ph.D. students.

INFO 990(9900) Thesis Research

Fall, spring, Variable credit. Prerequisite: permission of an information science faculty member.

Thesis research for post-A exam Ph.D. students.

INTERNATIONAL RELATIONS CONCENTRATION

Office: 152 Uris Hall, 254-5004, www.einaudi.cornell.edu/initiatives/itc.asp, D. R. Lee (AEM), director

Objective

The International Relations (IR) Concentration is an interdisciplinary program for undergraduate students enrolled in any of the seven Cornell undergraduate colleges. The IR Concentration provides a structured yet flexible program for undergraduates to take advantage of the vast resources available at the university for studying the politics, economics, history, languages, and cultures of the countries and regions of the world.

Graduates of the program have gone on to pursue further education in fields such as political science and anthropology and to successful careers in international law, economics, agriculture, trade, finance, international development, and government service, among others. They have gone on to work in international and nongovernmental organizations, in cross-cultural affairs, in journalism, and in education.

The International Relations Concentration is not a major or a department, but rather a program offering a selection of courses reaching across colleges and departments. Students pursue the IR Concentration in addition to their regular degree. Students concentrating in international relations have majored in fields ranging from anthropology, city and regional planning, communications, economics, government, and history to natural resources, industrial and labor relations, and computer science. International course work and language study add a global and cross-cultural dimension to those majors. Some students even design an independent major in some aspect of international relations or comparative social or cultural studies. Spending a semester or year of study abroad can contribute to meeting the course requirements of the IR Concentration, including the language requirement.

Course Requirements

These requirements are designed to expose students to a broad range of perspectives in international relations while allowing them to tailor their course selections to specific interests. Courses throughout the university are grouped into four subject areas, including:

1. International Economics and Development
2. World Politics and Foreign Policy
3. Transnational Processes and Policies
4. Cultural Studies

Within these four subject areas, courses are also identified as "core" or "elective." Students must complete altogether eight courses from the four groups according to one of two options. Option A emphasizes the politics and economics of international relations. Option B puts greater stress on culture. In choosing either option, students should ensure that they acquire familiarity with more than one geographic region or country. All courses used to fulfill the concentration requirements must be taken for a letter grade. Courses can count both toward a major and the International Relations Concentration.

Option A: One core course from each of Groups 1, 2, 3, and 4; one elective from each of Groups 1, 2, 3, and 4

Option B: One core course from each of Groups 1, 2, 3, and 4; One elective from either Group 1 or Group 2—One elective from Group 3 and 4, and one additional elective from either Group 3, and Group 4

Before pre-registration a course list for the following semester (as well as lists for the current and previous semesters) can be obtained from the administrative coordinator in 152 Uris Hall, as well as from the web site. Note: These lists are not necessarily complete. Other courses throughout the university qualify for the IR Concentration by prior arrangement.

Language Requirement

Students in the IR Concentration are expected to complete additional language study beyond the College of Arts and Sciences' degree requirement (for those in Arts and Sciences). This study can be accomplished in one of two ways: (1) two years of one foreign language (proficiency plus one course); (2) two languages at proficiency.

Study Abroad

Students in the IR Concentration are encouraged to study abroad to bring a practical dimension to their expertise in international issues. Those who choose this option will find the requirements for the concentration highly compatible with courses taken abroad. Students are encouraged to contact the administrative coordinator before departure.

Completion

Transcripts will reflect successful completion of the requirements for the Concentration. In addition, students will receive a special certificate and a letter of confirmation signed by the director of the IR Concentration and the director of the Mario Einaudi Center for International Studies.

Enrollment

To obtain course lists, to enroll and for all further information, please contact the IR administrative coordinator, Mario Einaudi Center for International Studies, 152 Uris Hall, 254-5004.

Course List for 2007-2008

Core course options and selected electives are listed below; other electives are possible. Most courses are offered one semester only. Offerings may change, so see the administrative coordinator, course roster, and IR web site for updates and further details.

Group 1: International Economics and Development

Core:

ECON/AEM 230 International Trade and Finance
 AEM 429 International Finance
 AEM 430 International Trade Policy
 ECON 361 International Trade Theory
 ECON 362 International Monetary Theory and Policy

Electives:

AEM 432 Business and Governments in Global Marketplace
 AEM 442 Emerging Markets
 ECON 324 American Economic History
 ECON 371 Economic Development
 ECON/ILRLE 444 Evolution of Social Policy in Britain and America
 ECON/AEM 450 Resource Economics
 ECON/AEM 464 Economics of Agricultural Development
 CRP 327 Regional Economic Impact Analysis
 CRP 371 Cuba: The Search for Development Alternatives
 CRP 417 Economic Development: Firms, Industries, and Regions

PROGRAM OF JEWISH STUDIES

D. I. Owen, director (Ancient Near Eastern History and Archaeology; Assyriology; Biblical History and Archaeology), L. Adelson (German-Jewish Literature and Culture), D. Bathrick (Holocaust Film Studies), R. Brann (Judeo-Islamic Studies), V. Caron (Modern French and European-Jewish History), M. Diesing (Yiddish Language and Linguistics), Z. Fahmy (Modern Middle Eastern History), K. Haines-Eitzen (Early Judaism and Early Christianity), R. Hoffmann (Holocaust Studies), P. Hohendahl (German Literature), P. Hyams (Medieval Jewish History), D. LaCapra (Holocaust Studies), M. Migiel (Italian Literature), C. Monroe (Near Eastern Mediterranean Studies; Nautical Archaeology), L. Monroe (Hebrew Bible Studies), R. Polenberg (American-Jewish History), D. Powers (Islamic History and Law), E. Rebillard (Jews in the Roman Empire), N. Scharf (Hebrew Language), D. Schwarz (Anglo-Jewish Literature), G. Shapiro (Russian-Jewish Literature), S. Shoer (Hebrew Language), D. Starr (Modern Hebrew and Arabic Literature; Critical Theory; Middle Eastern Film), P. Stevens (curator),

S. M. Toorawa (Arabic Literature and Islamic Studies), J. Zorn (Biblical Archaeology). Emeritus: N. Furman, J. Porte, E. Rosenberg, Y. Szekely.

The Program of Jewish Studies was founded as an extension of the Department of Semitic Languages and Literatures, now the Department of Near Eastern Studies, in 1973 and attained status as an intercollegiate program in 1976.

The program has grown out of the conviction that Judaic civilization merits its own comprehensive and thorough treatment and that proper understanding of any culture is inconceivable without adequate knowledge of the language, literature, and history of the people that created it. Accordingly, the offerings in the areas of Jewish languages and literatures have been considerably expanded, and courses in ancient, medieval, and especially modern Jewish history and culture have been added to the program.

It is a broadly based, interdisciplinary program, bringing together faculty from various Cornell departments and colleges.

The Program of Jewish Studies supports teaching and research in the many areas of Jewish Studies. It is a secular, academic program, whose interests are diverse and cross-cultural. The program recognizes its special relationship to teaching and research in classical Judaica and Hebraica pursued by the members of the Department of Near Eastern Studies, with particular emphasis on the interrelationship between Judaism, Christianity, and Islam.

It presently enables students to obtain basic instruction and specialization in the fields of Semitic languages; the Hebrew Bible; medieval and modern Hebrew literature; ancient, medieval, and modern European and Middle Eastern Jewish history; and Holocaust studies. In some of these fields students may take courses on both graduate and undergraduate levels. Faculty throughout the university provide breadth to the program by offering courses in related areas of study.

For more information, please visit www.arts.cornell.edu/jwst/index.html.

Courses Offered

JWST 101-102(1101-1102) Elementary Modern Hebrew I and II (also NES 101-102[1101-1102])

101, fall; 102, spring, 4 credits. Letter grades only. S. Shoer.

For description, see NES 101-102.

JWST 103(1103) Elementary Modern Hebrew III (also NES 103[1103])

Fall, 4 credits. N. Scharf.

For description, see NES 103.

JWST 123(1111) Introduction to Biblical Hebrew (also NES/RELST 123[1111])

Fall, 3 credits. L. Monroe.

For description, see NES 123.

JWST 200(2100) Intermediate Modern Hebrew (also NES 200[2100])

Spring, 4 credits. N. Scharf.

For description, see NES 200.

JWST 224(2724) Introduction to the Hebrew Bible—Prophecy (also NES/RELST 224[2724])

Fall, 3 credits. L. Monroe.

For description, see NES 224.

JWST 251(2651) Holy War, Crusade, and Jihad in Judaism, Christianity, and Islam (also HIST 269[2691], COM L 231[2310], NES/RELST 251[2651])

Fall. 3 credits. R. Brann.
For description, see NES 251.

JWST 252(2910) Modern European Jewish History 1789–1948 (also HIST 291[2910])

Fall. 4 credits. V. Caron.
For description, see HIST 291.

JWST 254(2350) Antisemitism and Crisis Modernity (also HIST 235[2350])

Fall. 4 credits. V. Caron.
For description, see HIST 235.

JWST 256(2556) Introduction to the Quran (also NES/RELST 256[2556])

Fall. 3 credits. S. M. Toorawa.
For description, see NES 256.

JWST 261(2661) Ships and Seafaring—Introduction to Nautical Archaeology (also NES 261[2661], ARKEO 275[2661])

Spring. 4 credits. C. Monroe.
For description, see NES 261.

JWST 263(2663) Introduction to Biblical History and Archaeology (also ARKEO/RELST/NES 263[2663])

Fall. 3 credits. J. Zorn.
For description, see NES 263.

JWST 268(2668) Ancient Egyptian Civilization (also ARKEO/NES 268[2668])

Spring 3 credits. C. Monroe.
For description, see NES 268.

JWST 272(2672) Imperialism and the History of the Modern Middle East (also NES 272[2672])

Spring. 3 credits. Z. Fahmy.
For description, see NES 272.

JWST 274(2674) History of the Modern Middle East: 19th–20th Centuries (also NES 272[2672], GOVT 274[2747], HIST 276[2674])

Fall. 3 credits. Z. Fahmy.
For description, see NES 274.

JWST 275(2675) The Religions of Ancient Israel (also NES/RELST 275[2675], ARKEO 276[2675])

Spring. 3 credits. J. Zorn.
For description, see NES 275.

JWST 291(2793) Middle Eastern Cinema (also NES 293[2793], FILM/COM L 293[2930], VISST 293[2193])

Fall. 4 credits. D. Starr.
For description, see NES 293.

JWST 301/302(3101/3102) Advanced Intermediate Modern Hebrew (also NES 301/302[3101/3102])

301, fall; 302, spring. 4 credits. N. Scharf.
For description, see NES 301–302.

JWST 305(3105) Conversational Hebrew (also NES 305[3105])

Spring. 2 credits. Limited to 15 students.
Prerequisite: NES 302, 400, or permission of instructor; non-native speakers only.
N. Scharf.

For description, see NES 305.

JWST 353(3700) History of the Holocaust (also HIST 370[3700])

Spring. 4 credits. V. Caron.
For description, see HIST 370.

JWST 365(3665) Ancient Iraq II (also NES/ARKEO 365/3665)

Fall. 4 credits. D. I. Owen.
For description, see NES 365.

JWST 400(4100) Advanced Readings in Modern Hebrew (also NES 400[4100])

Fall. 4 credits. Limited to 15 students.
D. Starr.
For description, see NES 400.

JWST 401(4101) Modern Hebrew Literature (also NES 401[4101])

Spring. 4 credits. D. Starr.
For description, see NES 401.

JWST 420(4102) Biblical Hebrew Prose—Judges (also NES 420[4102], RELST 420[4102])

Spring. 4 credits. L. Monroe.
For description, see NES 420.

JWST 438(4738) Imagining the Mediterranean (also NES 438[4738], COM L 496[4960])

Fall. 4 credits. G. Holst-Warhaft.
For description, see NES 438.

JWST 440(4540) Maimonides and Averroes (also NES/RELST 440[4540], SPAN 438[4380])

Spring. 4 credits. R. Brann.
For description, see NES 440.

JWST 446(4170) History of Jews: Modern France (also HIST 417[4170])

Spring. 4 credits. V. Caron.
For description, see HIST 417.

JWST 458(4580) Imagining the Holocaust (also ENGL 458[4580], COM L 483[4830])

Spring. 4 credits. D. Schwarz.
For description, see ENGL 458.

JWST 470(4670) Wealth and Power in Early Civilizations (also NES 470[4670])

Fall. 4 credits. C. Monroe.
For description, see NES 470.

JWST 491–492(4991–4992) Independent Study—Undergraduate

Fall and spring. Variable credit. Staff.

JWST 620(6112) Readings in Medieval Hebrew Poetry and Prose (also NES 620[6112])

Fall. 4 credits. R. Brann.
For description, see NES 620.

Courses not offered 2007–2008

JWST 236 Israel: Literature and Society (also NES 236)

JWST 248 Introduction to Classical Jewish History (also RELST/NES 248)

JWST 255 Women and the Holocaust (also ENGL/FGSS 252)

JWST 271 Yiddish Linguistics (also LING 241)

JWST 299 The Hebrew Bible and the Arabic Qur'an in Comparative Perspective (also NES/RELST/COM L 299)

JWST 323 Reinventing Biblical Narrative Apocrypha and Pseudepigrapha (also NES/RELST 323)

JWST 328 Gnosticism and Early Christianity (also NES 328, RELST 330)

JWST 344 The History of Early Christianity (also NES 324, CLASS 344, RELST 325)

JWST 371 A Mediterranean Society and Its Culture: The Jews under Classical Islam (also NES/RELST/COM L 371)

JWST 435 Aramaic (also NES 435)

JWST 449 Rescreening the Holocaust (also GERST 449, COM L 453, THETR 450)

JWST 494 Studies in the Novel: Reading Joyce's Ulysses (also ENGL 470)

JWST 639 Islamic Spain: Culture and Society (also NES 339/639, JWST 339, RELST/COM L 334, SPAN 339/699)

JWST 694 Joyce's Ulysses and the Modern Tradition (also ENGL 670)

JOHN S. KNIGHT INSTITUTE FOR WRITING IN THE DISCIPLINES

The director of the John S. Knight Institute is Paul Lincoln Sawyer, professor in the Department of English. Katherine Gottschalk, senior lecturer in the Department of English, is the Walter C. Teagle Director of First-Year Writing Seminars. The institute's offices are in 101 McGraw Hall, 255–4061.

D. Evans (Writing Workshop), M. Gilliland (Writing Workshop), K. Hjortshoj (Writing in the Majors), B. LeGendre (Writing Workshop), J. Martin (Writing Workshop), J. Pierpont (Writing Workshop), E. Shapiro (Writing Workshop).

The John S. Knight Institute helps to coordinate the teaching of writing in all undergraduate schools and colleges (the School of Industrial and Labor Relations; the School of Hotel Administration; and the colleges of Agriculture and Life Sciences; Architecture, Art, and Planning; Arts and Sciences; Engineering; and Human Ecology). The program administers writing seminars for first-year and upperclass students, discipline-based seminars in its Writing in the Majors/Sophomore Seminar Program, tutorial writing classes, and seminars in the teaching of writing. More than 30 academic departments and programs participate in the program.

First-Year Writing Seminars

For first-year students the Institute offers the First-Year Writing Seminars—more than 125 different courses in the humanities, social sciences, expressive arts, and sciences. Through introductory work in a particular field of study, seminars help students write good English expository prose—prose that, at its best, is characterized by clarity, coherence, intellectual force, and stylistic control. All seminars pursue this common aim through small classes, with a maximum of 17 students, and adherence to a program-wide set of guidelines:

- Seminars should require at least six—and at most nine—formal essays on new topics, totaling 25–30 pages of polished prose.

- No fewer than three of the six to nine required essays should go through a process of development under the instructor's guidance (e.g., revision, peer review, responses to readings, conferences).
- All seminars should spend ample classroom time on work directly related to writing.
- Reading assignments in the course subject should be kept under ca. 75 pages per week to permit regular, concentrated work on writing.
- All students should meet in at least two individual conferences with the instructor.

Offerings change from semester to semester. Each semester's First-Year Writing Seminars are described on the web at <http://fws.arts.cornell.edu>.

To ensure that students will enjoy the benefits of small writing classes, First-Year Writing Seminars are limited to no more than 17 students. Instead of pre-enrolling in their writing courses, students request placement in one of five writing seminars by filling out an electronic ballot in August for the fall semester and in November for the spring semester. Over 90 percent receive one of their top three choices. After placement by ballot, students may change their writing seminars via electronic add and drop. Writing seminars may be added only during the first two weeks of each semester.

The colleges and the schools served by the Institute accept First-Year Writing Seminars in fulfillment of their individual graduation requirements in categories referred to variously as "first-year writing," "oral and written expression," and the like. The Institute does not decide whether students may graduate: it makes courses available. Individual colleges and schools administer their own graduation requirements.

Currently, most undergraduate students are required to take two First-Year Writing Seminars. Architecture majors, however, need only one. Hotel students fulfill their requirement in one semester, through H ADM 165 in one semester plus one First-Year Writing Seminar in the other. Agriculture and Life Sciences students can take First-Year Writing Seminars or choose from among a variety of other courses to fulfill their requirement.

All students who score 5 on the Princeton Advanced Placement Examination in English receive 3 credits. Such credits are awarded automatically; no application to the John S. Knight Institute or the Department of English is necessary. How these credits may be applied to first-year writing or other distribution requirements depends on the student's college and score. All students who score 5, except Architecture majors, may apply their 3 credits toward the writing requirements of their college. Of students who score 4, only Agriculture and Life Sciences students and Industrial and Labor Relations students may apply their 3 credits toward the writing requirements of their college. Students should always consult their college registrars to be certain that they understand their writing requirements.

Students who have already taken a First-Year Writing Seminar, or who score 4 or 5 on the Princeton AP exam, or 700 or better on the

English Composition or CEEB tests, may enroll, space permitting, in the following upper-level First-Year Writing Seminars: ENGL 270, 271, or 272.

Although there are no exemptions from college writing requirements, some students may fulfill all or part of their college's writing requirement through transfer credits or writing-course substitutions.

For work done at other institutions to be accepted as equivalent to First-Year Writing Seminars, students should demonstrate that they have done a reasonably equivalent amount of writing in a formal course (e.g., it is not sufficient to write one 30-page term paper.) Students in the College of Engineering and the College of Arts and Sciences must file an "application for transfer evaluation" to request writing credit for such courses; students in other colleges should consult their college registrars.

In unusual circumstances, upper-level students may petition to use a Cornell writing course other than a First-Year Writing Seminar to satisfy part of their writing requirement. The John S. Knight Institute must approve all such petitions in advance.

For information about the requirements for First-Year Writing Seminars and descriptions of seminar offerings, see the John S. Knight Institute web site at http://arts.cornell.edu/knight_institute.

English 288-289: Expository Writing

Helps students write with more confidence and skill in all disciplines. Open to Cornell sophomores, juniors, and seniors, ENGL 288-289 courses explore themes shaped by a genre or use of expository writing, by the common concerns of several disciplines, or by an interdisciplinary topic intimately related to the written medium. Although English department instructors make up roughly half the staff, the Knight Institute's involvement enables the course to extend and diversify its offerings in separately defined, 16-member sections that appeal to the varied interests and needs of students in many areas of study. Students may choose among a variety of sections focusing on such themes as "War, Peace, Terror, and the Law," "Making the News," "The Reflective Essay," "Hollywood Babylon," and "Rights, Democracy, and the Courts." All staff are selected because their special interests and their training and experience in First-Year Writing Seminars promise original course design and superior performance.

Writing in the Majors/Sophomore Seminars

Spanning the humanities, social sciences, and sciences, the Knight Institute's upper-level, Writing in the Majors courses do not satisfy formal writing requirements, and faculty participation is entirely voluntary. While all Writing in the Majors courses include extensive writing, usually with guided revision, they also emphasize other forms of active, interactive learning essential to scholarship and careers in the disciplines. Writing in the Majors initiatives have included individual and collaborative research projects, collaborative writing, oral presentations, group oral exams, field studies, authentic student-designed laboratory experiments, debates, analytical and critical reading exercises, topical

symposia, conversation groups, student-led discussions, poster sessions, and many kinds of informal writing, including online exchanges. Varying radically in design and size, from enrollments of fewer than 10 students to more than 300, Writing in the Majors courses over the past 19 years have involved collaboration with 150 faculty members and more than 250 graduate teaching assistants to enrich learning in 75 upper-level courses offered in 24 departments. In 2007-2008, the Knight Institute substantially increased the number of Writing in the Majors courses offered at the 200 level. These courses are intended to provide students who are still in the early stages of their academic careers with opportunities to engage with disciplinary subject matter through writing.

WRIT 701(7101) Writing in the Majors Seminar

Fall and spring. 1 credit. S-U grades only. Teaching assistants assigned to Writing in the Majors projects enroll in a six-week course on teaching strategies in advanced instruction.

Teaching Writing

Each summer and fall, the institute offers instruction in the teaching of writing to new staff members in the First-Year Writing Seminars and other interested instructors. Teaching Writing, offered in the summer or fall, is primarily a course for graduate students. The program also sponsors a summer apprenticeship program for a limited number of graduate students, and a summer seminar for faculty members interested in the teaching of writing.

WRIT 700(7100) Teaching Writing

Summer and fall. 1 credit. S-U grades only. Summer and fall. 1 credit. S-U grades only.

Prepares graduate instructors of Cornell's First-Year Writing Seminars to teach courses that both introduce undergraduates to particular fields of study and help them develop writing skills they will need throughout their undergraduate careers. Seminar discussions and readings on pedagogical theories and practices provide an overview of the teaching of writing within a disciplinary context. As part of the course, participants develop written assignments designed to be used in their own First-Year Writing Seminars.

Writing Workshop

The John S. Knight Institute offers "An Introduction to Writing in the University" for first-year students (or transfer students needing writing credit) through the Writing Workshop. This course is designed for students who have had little training in composition or who have serious difficulty with writing assignments.

WRIT 137 and 138 are graded S-U only, and students receiving a grade of S are granted credit toward their college writing requirements. Students who think this course might be appropriate including non-native speakers of English scoring less than 600 on the Test of English as a Foreign Language (TOEFL) should attend the assessment sessions offered by the Writing Workshop during orientation week each fall. The workshop also offers a Walk-In Service (see below) to help students work on writing assignments. The director is Joe Martin, senior lecturer in the Writing Workshop. The

workshop offices are in 174 Rockefeller Hall, 255-6349.

The Writing Walk-In Service

Through the Writing Walk-In Service, the Writing Workshop offers tutoring assistance in writing to any student who needs help with a writing project. The Writing Walk-In Service has tutors available during the academic year in 174 Rockefeller Hall and North and West Campus residential areas. The director is Mary Gilliland. For information, contact the Writing Workshop, 174 Rockefeller Hall, 255-6349.

WRIT 137-138, 134(1137-1138, 1134) An Introduction to Writing in the University

137, fall; 138, spring; 134, summer. 3 credits each semester. Limited to 12 students per sec in fall and spring, 6 in summer. Prerequisite: permission of instructor. S-U grades only.

Writing seminar designed for students who need more focused attention to master the expectations of academic writing. Emphasizes the analytic and argumentative writing and critical reading essential for university-level work. With small classes and weekly student/teacher conferences, each section is shaped to respond to the needs of students in that particular class.

WRIT 139(1139) Special Topics in Writing

Fall and spring. 3 credits. Cannot fulfill writing or distribution requirements. Prerequisite: undergraduate standing; permission of instructor. S-U grades only.

These courses allow students the opportunity to resolve significant writing challenges that have interfered with their academic progress. Students must have ongoing writing projects on which to work. Instruction is in weekly tutorials. Interested students should go to 174 Rockefeller for more information.

WRIT 702(7102) Graduate Writing Workshop

Fall and spring. 3 credits. Limited to 10 students per sec. Prerequisites: graduate standing; permission of instructor. S-U grades only.

Gives graduate students the opportunity to resolve significant writing challenges that have interfered with their academic progress. Students must have ongoing writing projects to work on. Instruction is in weekly tutorials. Interested students should go to 174 Rockefeller Hall for further information.

WRIT 703(7103) Work in Progress

Fall and spring. 3 credits. Limited to 10 students per sec. Prerequisite: graduate standing and permission of instructor. S-U grades only.

Writing seminar for graduate students who have substantial work in progress, such as professional articles, theses, or dissertations. In the first two weeks students discuss rhetorical and stylistic features of scholarly writing and methods of composing and revising, with relevant readings. Remaining weeks emphasize exchange and discussion of drafts, supplemented by individual conferences. The course goal is the improvement and completion of student writing projects.

LATIN AMERICAN STUDIES PROGRAM

190 Uris Hall

David Block, Ibero-American Bibliographer, Interim Director, Latin American Studies Program; Vilma Santiago-Irizarry, Anthropology, please contact LASP; Lourdes Benería, City and Regional Planning; Robert Blake, Animal Science; Bruno Bosteels, Romance Studies; Debra Ann Castillo, Romance Studies, please contact LASP; María Lorena Cook, School of Industrial and Labor Relations; Raymond Craib, History; Eleanor Dozier, Romance Studies; María Fernandez, History of Art; Gary Fields, International Labor Relations and Economics; María Antonia Garcés, Romance Studies; María Cristina García, History; William W. Goldsmith, City and Regional Planning; Karen Graubart, History; Jere D. Haas, Anthropology, Nutritional Science; Luz Horne, Romance Studies; Zulma Iguina, Romance Studies; Steven Jackson, Government; Teresa Jordan, Geological Science; Eduardo Kohn, Anthropology; Steven Kyle, Agricultural Economics; David R. Lee, Applied Economics and Management; Barbara Lynch, City and Regional Planning; Luis Morató, Romance Studies; Jura Oliveira, Romance Studies; Edmundo Paz Soldán, Romance Studies; Gretel Peltó, Nutritional Sciences; Simone Pinet, Romance Studies; Alison Power, Department of Ecology and Evolutionary Biology; Eloy Rodríguez, Plant Biology; Jeannine Routier-Pucci, Romance Studies; Elvira Sánchez-Blake, Romance Studies; Roberto Sierra, Music; Jose M. Rodríguez-García, Romance Studies; María Stykos, Romance Studies. Emeritus: Donald Freebairn, Agricultural Economics; Thomas Poleman, Agricultural Economics; Don Sola, Romance Studies; Joseph M. Stykos, Development Sociology; David Thurston, Plant Pathology; Frank Young, Development Sociology.

Cornell's Latin American Studies Program (LASP) was founded in 1961 with funds from the Mario Einaudi Center for International Studies and a major grant from the Ford Foundation. The National Defense Education Act (NDEA) Language and Area Center established LASP in 1966 as one of the nation's premier Latin American centers. Today, the Latin American Studies Program provides a focus for all activities oriented toward Latin America on the Cornell campus. Latin Americanists are active in most of Cornell's colleges and schools, with such diverse strengths as the languages and literatures of the area, agricultural sciences, city and regional planning, anthropology, history, economics and the other social sciences. It is the purpose of the program to stimulate teaching by establishing contacts with Latin American universities and institutions, supporting research through grants to faculty members and graduate students, and sponsoring visiting scholars from Latin America. LASP offers a concentration in

Latin American Studies for undergraduate students and a graduate minor for graduate students.

Undergraduate Concentration

To complete an undergraduate concentration in Latin American Studies, students must earn a minimum of 15 credits in Latin American Studies. Latin American content courses not on the list may be approved by petition only. To satisfy the requirements of the concentration, undergraduates must select courses from at least three fields and must include at least one course at the advanced level. Language Instruction below the 300 level may not be counted toward the credit requirement. However, language facility in Spanish, Portuguese, or Quechua must be demonstrated by successfully completing SPAN 219, PORT 219, QUECH 219, or the equivalent.

Courses

LAT A 195(1950) Colonial Latin America (also HIST/AIS 195[1950])

Fall and spring. K. Graubart. For description, see HIST 195.

LAT A 215(2150) The Tradition of Rupture (also SPAN 215[2150])

Fall. J. Rodriguez-Garcia and staff. For description, see SPAN 215.

LAT A 217(2170) Readings—Medieval/Early Mod Sp (also SPAN 217[2170])

Fall. M. A. Garcés. For description, see SPAN 217.

LAT A 220(2200) Perspectives on Latin America (also SPAN 220[2200])

Fall. E. Paz-Soldan and Director, Latin American Studies Program. For description, see SPAN 220.

LAT A 245(2450) Drugs: People, Policies, Politics (also HIST 245)

Fall. M. Roldan. For description, see HIST 245.

LAT A 301(3010) Hispanic Theater Production (also SPAN 301[3010])

Fall. D. Castillo. For description, see SPAN 301.

[LAT A 306(3060) Modern Mexico (also HIST 306[3060])]

LAT A 312(3211) Forging Nations (also HIST 312[3120])

Fall. M. Roldan. For description, see HIST 312.

LAT A 329(3290) Comparative Politics of Latin America (also GOVT 329[3293])

Fall. 4 credits. K. Roberts. For description, see GOVT 329.

LAT A 330(3300) Latin American Studies: Issues in Interdisciplinary Perspective (also HIST 333[3331], ANTHR 331[3431])

Fall. M. Roldan and J. Henderson. Examines a range of topics that characterize Latin America in the 20th and 21st centuries by examining key texts dealing with the region and interpreted by the instructors and several visiting lecturers. The course provides advanced undergraduates and graduate students with an opportunity to broaden their knowledge of the area and to do in-depth research on an area of interest.

LAT A 339(3390) Political Economy of Mexico (also ILRIC 339[3390])

Spring. M. Cook.

For description, see ILRIC 339.

LAT A 368(3680) Modern and Contemporary Latin American Art (also ART H 3680[3550], LSP[3680])

Spring. M. Fernandez.

For description, see ART H 368.

LAT A 371(3710) Cuba: Search for Development Alternatives (also CRP 371[3710])

Fall. B. Lynch.

For description, see CRP 371.

LAT A 376(3760) Latin American Cities (also CRP 376[3760])

Fall. B. Lynch.

For description, see CRP 376.

LAT A 405(4050) U.S.-Cuba Relations (also HIST/LSP/AM ST 405/605[4050/6050])

Fall. M. C. Garcia.

LAT A 426(4260) Social Movements in Latin America (also GOVT 426/626[4264/6264], LAT A 626[6260])

Fall. K. Roberts.

For description, see GOVT 426.

LAT A 519(5190) Urban Theory and Spatial Development (also CRP 519[5190])

Spring. W. W. Goldsmith.

For description, see CRP 519.

LAT A 600(6000) Contemporary Issues in Latin America

Fall and spring. Director, Latin American Studies Program.

An exploration of critical topics in the Anthropology, Art, Economics, History, Literature, Political Science, and Sociology of Latin America. Course features guest speakers from Cornell and other institutions.

LAT A 602(6020) Agriculture in the Developing Nations II (also IARD 602[6020])

Spring. R. Blake.

For description, see IARD 6020.

LAT A 605(6050) U.S.-Cuba Relations (also AM ST/LSP/HIST 405/605[4050/6050])

Fall. 4 credits. M. C. Garcia.

[LAT A 612(6120) Colonial Latin America (also HIST 612[6120])

Fall. 4 credits. Next offered 2009-2010.

K. Graubart.]

LAT A 626(6260) Social Movements in Latin America (also GOVT 426/626[4264/6264], LAT A 426[4260])

Fall. K. Roberts.

For description, see GOVT 426.

LAT A 635(6350) Labor Markets and Income Distribution in Developing Countries (also ILRIC 635[6350])

Spring. M. Cook.

For description, see ILRIC 739.

LATINO STUDIES PROGRAM

434 Rockefeller Hall

Undergraduate Concentration

The Latino Studies Program offers an interdisciplinary undergraduate concentration in Latino studies, with courses mostly drawn from history, sociology, anthropology, literature, and language, but the program also cross-lists courses from other colleges.

- To complete the concentration, students must take at least five courses (a minimum of 15 credits) in Latino Studies, including Latinos in the United States (D SOC 265, LSP 201, and SOC 265), which is offered each spring semester.
- Students are required to include at least three courses from Groups I and II (one from each group, and another from either group). Of the three courses, two must be at the 300 or 400 level.

One elective course (see list below) can count toward the concentration. Courses must be completed with a letter grade of C or above. Independent studies and first-year writing seminars do not count toward concentration requirements. The list varies each semester in accordance with faculty schedules and visiting appointments.

Group I: Humanities

- LSP 225 The United States-Mexico Border: History, Culture, Representation (also AM ST/HIST 225)
- LSP 240 Survey in U.S. Latina/o Literature (also AM ST/ENGL 240)
- LSP 246 Contemporary Narratives by Latina Writers (also FGSS/SPAN 246)
- LSP 248 Poetry of the Latina/o Experience (also SPAN 248)
- LSP 260 Latinos in the United States: Colonial Period to 1898 (also AM ST 259, HIST 260)
- LSP 261 Latinos in the United States: 1898 to the Present (also AM ST/HIST 261)
- LSP 264 Exploring Latino/a Identity (also ENGL 264)
- LSP 303 American Dreams (also SPAN 303)
- LSP 398 Latina/o Popular Culture (also AM ST 396, ENGL 398)
- LSP 413 Classics of Latina/o Literature (also SPAN 413)
- LSP 462 Senior Seminar in Latina/o Studies: Chicana Feminism in a Globalizing World (also ENGL 462, AM ST 452)

- LSP 693 Gender, Globalization, and Latina/o Literature (also ENGL 693)

Group II: Social Sciences

- LSP 201 Latinos in the United States (also D SOC/SOC 265)
- LSP 220 Sociology of Health and Ethnic Minorities (also D SOC 220)
- LSP 221 Anthropological Representation: Ethnographies of Latino Culture (also AM ST/ANTHR 221)
- LSP 230 Latino Communities (also D SOC 230, AM ST 231)
- LSP 355 Latinos, Law, and Identity (also AM ST 357, D SOC 355)
- LSP 375 Comparative U.S. Racial and Ethnic Relations (also AM ST/D SOC 375)
- LSP 431/631 Farmworkers (also HIST 431/631)
- LSP 451 Multicultural Issues in Education (also EDUC 451)
- LSP 610 Political Identity: Race, Ethnicity, and Nationalism (also GOVT 610)
- LSP 624 Ethnoracial Identity in Anthropology, Language, and Law (also ANTHR 624, LAW 723)
- LSP 660 Language, Ideologies and Practices (also ANTHR 660)

Electives:

- LSP 100 Introduction to World Music I: Africa and the Americas (also MUSIC 103)
- LSP 101 Research Strategies in Latino Studies
- LSP 111 Introduction to American Studies: New Approaches to Understanding American Diversity, the 20th Century (also AM ST 110, HIST 161)
- LSP 202 Spanish for English-Spanish Bilinguals (also SPAN 200)
- LSP 241 Immigration and Ethnicity in 20th-Century United States (also HIST 240, AM ST 239)
- LSP 311 Social Movements (also AIS/D SOC 311)
- LSP 319 Racial and Ethnic Politics in the United States (also GOVT 319, AM ST 313)
- LSP 368 Modern and Contemporary Latin American Art (also ART H 368)
- LSP 377 The United States (also ANTHR/AM ST 377)
- LSP 405/605 U.S.-Cuba Relations (also HIST 405/605, LAT A 405/605)
- LSP 423 Borders (also COM I 423, SPAN 490)
- LSP 485 Immigration: History, Theory, Practice (also HIST/AM ST 485)
- LSP 694 Bilingual Education in Comparative Perspectives (also EDUC 694)
- ART 214 Art and the Multicultural Experience

Other elective courses will be determined each semester.

Graduate Minor

Students wishing to complete a graduate minor in Latino studies need to formally register with the Latino Studies Program office, take an upper-level seminar plus two advanced courses in Latino Studies and work intensively with a faculty member outside of their major field. In

lieu of available courses, the student and his or her minor field advisor may design a special project that culminates in a paper given at a conference or presented for publication. Each special project requires the approval of the director of graduate studies for the minor field. Upon completion of the minor, students receive a certificate from the program. Students wishing to pursue the graduate minor field in Latino studies must file an application at the Latino Studies Program, 434 Rockefeller Hall.

Library

The Latino Studies Program library in 432 Rockefeller Hall serves Cornell students, faculty, staff, and the wider local community. The library maintains print and media material pertinent to U.S. Latino issues including a collection of books, research material, archives, and films. The library and conference room also provide meeting space for more than 25 Latino student organizations.

Courses

[LSP 100(1301) Introduction to World Music: Africa and the Americas (also MUSIC 103(1301))

3 credits. 1-hour disc. Next offered 2008–2009. S. Pond.
For description, see MUSIC 103.]

LSP 101(1101) Research Strategies in Latino Studies

Spring. 1 credit. T. Cosgrave.
The digital revolution has made an enormous amount of information available to research scholars, but discovering resources and using them effectively can be challenging. This course introduces students with research interests in Latino Studies to search strategies and methods for finding materials in various formats (e.g., digital, film, and print) using information databases such as the library catalog, print and electronic indexes, and the World Wide Web. Instructors provide equal time for lecture and hands-on learning. Topics include government documents, statistics, subject-specific online databases, social sciences, the humanities, and electronic citation management.

LSP 201(2010) Latinos in the United States (also SOC/D SOC 265(2650))

Spring. 4 credits, variable. H. Velez.
For description, see SOC 265.

LSP 202(2020) Spanish for English-Spanish Bilinguals (also SPAN 200(2000))

Fall. 4 credits. N. Maldonado-Mendez.
For description, see SPAN 200.

LSP 220(2200) Sociology of Health and Ethnic Minorities (also D SOC 220(2200))

Fall. 3 credits. P. Parra.
Discusses the health status of minorities in the United States. Specifically explores intragroup diversity such as migration, economic status, and the influence of culture and the environment on health status and access to health care. Although special attention is given to Latino populations, discussion encompasses other minorities who face similar problems.

[LSP 221(2721) Anthropological Representation: Ethnographies on Latino Culture (also AM ST/ANTHR 221(2721))

3 credits. Next offered 2008–2009.
V. Santiago-Irizarry.
For description, see ANTHR 221.]

[LSP 230(2300) Latino Communities (also D SOC/AM ST 231(2300))

3 credits. Next offered 2008–2009. R. Mize.
For description, see D SOC 230.]

LSP 246(2460) Contemporary Narratives by Latina Writers (also SPAN/FQSS 246(2460))

Fall. 3 credits. D. Castillo.
For description, see SPAN 246.

[LSP 248(2480) Poetry of the Latina/o Experience (also SPAN 248(2480))

Spring. 3 credits. Next offered 2008–2009.
For description, see SPAN 248.]

LSP 260(2600) Latinos in the United States: Colonial to 1898 (also HIST 260(2600), AM ST 259(2590))

Fall. 4 credits. M. C. Garcia.
For description, see HIST 260.

LSP 261(2610) Latinos in the United States: 1898 to the Present (also HIST/AM ST 261(2610))

Spring. 4 credits. M. C. Garcia.
For description, see HIST 261.

LSP 313(3130) Spanish Writing Workshop for Advanced English/Spanish Bilinguals (also SPAN 313 [3130])

Fall. 1 credit. Prerequisite: permission of instructor. Students must be registered concurrently with LSP 202. N. Maldonado-Mendez.

For description, see SPAN 313.

[LSP 319(3191) Racial and Ethnic Politics in the United States (also GOVT 319(3191), AM ST 313(3191))

4 credits. Next offered 2008–2009.
M. Jones-Correa.

For description, see GOVT 319.]

LSP 355(3550) Latinos, Law, and Identity (also AM ST 357(3550), D SOC 355(3550))

Fall. 3 credits. R. Mize.
For description, see D SOC 355.

LSP 368(3551) Modern and Contemporary Latino/Latin American Art (also ART H 368(3550), LAT A 368(3680))

Spring. 4 credits. M. Fernandez.
For description, see ART H 368.

[LSP 375(3750) Comparative U.S. Racial and Ethnic Relations (also AM ST 375(3750), D SOC 375(3750))]

LSP 377(3777) The United States (also ANTHR/AM ST 377(3777))

Fall. 4 credits. V. Santiago-Irizarry.
For description, see ANTHR 377.

[LSP 398(3980) Latina/o Popular Culture (also ENGL 398(3980), AM ST 398(3981))

4 credits. Next offered 2008–2009.
M. P. Brady.

For description, see ENGL 398.]

LSP 405/605(4050/6050) U.S.-Cuba Relations (also AM ST/HIST/LAT A/ LSP 405/605(4050/6050))

Spring. 4 credits. M. C. Garcia.
For description, see HIST 405/605.

LSP 420–421(4200–4210) Undergraduate Independent Study

Fall and spring. 2–4 credits. Prerequisite: permission of instructor.
Guided independent study.

LSP 423(4230) Borders (also COM L 423(4230), SPAN 490(4900))

Fall. 4 credits. D. Castillo.
For description, see COM L 423.

LSP 431/631(4310/6310) Farmworkers (also CRP 395.72/679.72, HIST 431/631(4310/6310), ILRCB 402(4020)) (HA-AS)

Spring. 4 credits. Team taught. Faculty supervisor: TBA.
Interdisciplinary, team-taught course on the world of rural migrant labor. Weekly sessions taught by faculty members from across campus combine short lectures and discussion of assigned readings. Emphasis is on migrant farmworkers in the United States, mostly from the Caribbean and mainland Latin America, with an increasing focus as the semester progresses on farmworkers in central and upstate New York. Course requirements include analytical essays, a final paper, and participation in a service-learning project that are arranged in conjunction with the instructors.

LSP 451(4510) Multicultural Issues in Education (also EDUC 451(4510))

Fall. 3 credits. S. Villenas.

LSP 485(4850) Immigration: History, Theory, and Practice (also HIST 485(4850), AM ST 485(4850))

Fall. 4 credits. M. C. Garcia.
For description, see HIST 485.

LSP 620–621(6200–6210) Graduate Independent Study

Fall, spring. 2–4 credits. Prerequisite: permission of instructor.
Guided independent study.

LSP 624(6242) Ethnoracial Identity in Anthropology, Language, and Law (also ANTHR 624(6242), LAW 723)

Spring. 4 credits. V. Santiago-Irizarry.
For description, see ANTHR 624.

[LSP 694(6940) Bilingual Education in Comparative Perspectives (also EDUC 694(6940))

3 credits. Next offered 2008–2009.
S. Villenas.]

LAW AND SOCIETY

Co-directors: M. Lynch (science and technology studies), 302 Rockefeller Hall, 255-7294, mel27@cornell.edu, and R. Lieberwitz (ILR), 287A Ives Hall, 255-3289, rl5@cornell.edu

Advisers: G. Alexander (law), D. Dunning (psychology), G. Hay (law), B. Hendrix (government), P. Hyams (history), M. Katzenstein (government), R. Miller (philosophy), M. Moody-Adams (philosophy), M. B. Norton (history), D. Powers (Near East studies), A. Riles (law), V. Saptiango-Irizarry (anthropology), S. Shiffrin (law)

The law and society concentration provides an opportunity for focused study of the interaction between law and society from an interdisciplinary perspective predominantly rooted in the social sciences and humanities: anthropology, comparative literature, economics, government, history, philosophy, psychology, science and technology studies, and sociology.

The concentration is open to all undergraduates, but interested students with

majors outside the College of Arts and Sciences are advised to check their college's policy and procedures regarding external concentrations, including whether the concentration is included on their college transcript. All students completing the concentration will receive a certificate and can include their participation in the law and society concentration on a résumé or law school application.

To allow sufficient time for a coherent program of study to be developed and completed, students who have an interest in this concentration are required to register before the start of the second semester of their junior year. Under extenuating circumstances, late registrations may be accepted at the discretion of the directors, but only if the registrant has a plan already formulated for completing the concentration's requirements. Special late registration forms that include the student's plan outline are available in the Ethics and Public Life (EPL) office, 240 Goldwin Smith Hall.

The standard law and society registration form is available online at www.arts.cornell.edu/epl and in the EPL office. As part of the registration process, each student is assigned a law and society adviser who is available to provide guidance with course selection and help with other questions or concerns related to the student's participation in the concentration. The name and contact information of the assigned adviser are included in a welcome e-mail that is sent shortly after a student's registration form is received.

Four-Event Requirement

Many students find access to and participation in law and society events a particularly beneficial component of the concentration. Officially registered law and society students are notified of qualifying events (usually at least 10 per semester) and other information related to the concentration through an e-mail listserve and postings outside the Ethics and Public Life office. Attendance at a minimum of four events (tracked with sign-in sheets) is required between registration and graduation, but students seeking a broader perspective are encouraged to attend as many events as they can.

Four-Course Requirement

Law and society is an interdisciplinary concentration requiring students to successfully complete four courses (at least 12 credits) from the approved course list, earning a letter grade no lower than C- in each. Of the four qualifying courses, at least two must be outside the student's major, and no more than two can be in the same subject area. Cross-listed courses may be counted in any of the departments listed. Students who have a double major are permitted to select one major as the dominant and use applicable courses from the second major toward the four-course requirement. Appropriate courses taken before registering for the law and society concentration can be counted toward the four-course requirement. There are no required courses, but past students have found GOVT 313 and PSYCH 265 particularly relevant.

At the discretion of the law and society directors, permission may be granted to substitute an appropriate course that has been:

1. accepted from another educational institution toward the student's degree program (one course maximum)
2. taken as part of a semester abroad program
3. recently added to the Cornell curriculum

The best evidence of a course's appropriateness is the syllabus, which is often available online and can be submitted electronically to one of the directors for their determination. Petitions for course substitutions should be submitted before the student's final semester.

To facilitate tracking of courses taken and/or events attended, a printable student progress record can be accessed electronically or obtained as a preprinted form from the EPL office.

The law and society concentration is administered by the Ethics and Public Life (EPL) office. For more information, contact the EPL administrative assistant at 240 Goldwin Smith Hall, epl@cornell.edu, or 255-8515.

LESBIAN, BISEXUAL, AND GAY STUDIES

S. Bem, B. Correll, J. Culler, I. DeVault, J. Frank, J. E. Gainer, S. Haenni, E. Hanson, C. Howie, I. V. Hull, P. Hyams, M. Katzenstein, P. Liu, T. Loos, K. March, C. A. Martin, K. McCullough, T. Murray, M. B. Norton, J. Peraino, M. Raskolnikov, N. Salvato, R. Savin-Williams, A. M. Smith, A. Villarejo, S. Warner, R. Weil

The field of Lesbian, Bisexual, & Gay Studies is devoted to the interdisciplinary study of the social construction of sexuality. LBG Studies is founded on the premise that the social organization of sexuality is best studied from the perspectives offered by those positions that have been excluded from established cultural norms.

In addition to offering a graduate minor, the field of LBG Studies offers an undergraduate concentration, which is administered under the auspices of Feminist, Gender, & Sexuality Studies (FGSS) and which consists of four courses from the list below. Although most of the courses in LBG studies (including those on men) generally fall under the aegis of FGSS and are hence crosslisted with it, not all of the courses in FGSS are sufficiently focused enough on the social construction of sexuality per se to be part of the LBG studies concentration. In order to qualify for the concentration, courses must devote a significant portion of their time to sexuality and to questioning the cultural and historical institution of exclusive heterosexuality. Students selecting their four courses from the

LBG studies subset must identify their concentration as either LBG studies or FGSS; they cannot double-count their credits and thereby use the same courses for both concentrations.

Students interested in the LBG studies concentration should contact the Lesbian, Bisexual, & Gay Studies Office in 391 Uris Hall.

Courses

ANTHR 200(1420) Cultural Diversity and Contemporary Issues

Fall. 3 credits. M. Fiskesjö.
For description, see ANTHR 200.

ANTHR 321/621(3421/6421) Sex and Gender in Cross-Cultural Perspective (also FGSS 321/631[3210/6210])

Fall. 4 credits. K. March.
For description, see ANTHR 321.

ENGL 276(2760) Desire (also FGSS/COM L 276[2760], THETR 278[2780])

Spring. 4 credits. Letter grades only.
E. Hanson.
For description, see ENGL 276.

[ENGL 355(3550) Decadence (also COM L/FGSS 355[3550])

4 credits. Next offered 2008–2009.
E. Hanson.]

[ENGL 478(4780) Intersections in Lesbian Fiction (also FGSS 477[4770], AM ST 468[4780])

4 credits. Next offered 2009–2010.
K. McCullough.]

ENGL 603(6030) The Question of Feminist and Queer Criticism in Premodern Studies (also FGSS 603[6030])

Spring. 4 credits. M. Raskolnikov.
For description, see ENGL 603.

ENGL 625(6250) Love, Loss, and Lament in the Renaissance (also FGSS 628[6280])

Fall. 4 credits. B. Correll.
For description, see ENGL 625.

ENGL 655(6550) Modernist Fiction and the Erotics of Style (also FGSS 655[6550])

Spring. 4 credits. E. Hanson.
For description, see ENGL 655.

FGSS 201(2010) Introduction to Feminist, Gender, and Sexuality Studies

Fall and spring. 4 credits. Staff.
For description, see FGSS 201.

FGSS 400(4000) Senior Seminar in Feminist, Gender, and Sexuality Studies

Fall. 4 credits. Staff.
For description, see FGSS 400.

FREN 442/642(4420/6420) Sex in French (also FGSS 432/632[4320/6320])

Spring. 4 credits. C. Howie.
For description, see FREN 442.

[FREN 449/649(4490/6490) Mystics and Mystique (also FGSS 449[4490])

4 credits. Next offered 2009–2010.
C. Howie.]

GOVT 462(4625) Sexuality and the Law (also AM ST 460[4265], FGSS 461[4610])

Spring. 4 credits. A. M. Smith.
For description, see GOVT 462.

GOVT 762(7625) Sexuality and the Law (also FGSS 762[7620])

Spring. 4 credits. A. M. Smith.
For description, see GOVT 762.

HD 384(3840) Gender and Sexual Minorities (also FGSS 385[3850])

Fall. 3 credits. K. Cohen.
For description, see HD 384.

[HIST 209(2090) Seminar in Early America (also AM ST/FGSS 209[2090])

4 credits. Next offered 2008–2009.
M. B. Norton.]

HIST 273(2730) Women in American Society, Past and Present (also FGSS 273[2730])

Fall. 4 credits. M. B. Norton.
For description, see HIST 273.

[HIST 368(3860) Marriage and Sexuality in Medieval Europe (also FGSS/RELST 368[3680])

4 credits. Next offered 2008–2009.
P. Hyams.]

HIST 416(4160) Gender and Sex in Southeast Asia (also ASIAN 416[4416], FGSS 416[4160])

Fall. 4 credits. T. Loos.
For description, see HIST 416.

[MUSIC 695(7311) Topics in Music: Gender, Sexuality, and Glam Rock (also FGSS 695[6950])

Fall. 4 credits. Next offered 2009–2010.
J. Peraino.]

THETR 420/620(4200/6200) Parody (also FGSS 427/637[4270/6370])

Spring. 4 credits. N. Salvato.
For description, see THETR 420.

THETR 605(6050) Camp, Kitsch and Trash (also FGSS 605[6050])

Fall. 4 credits. N. Salvato.
For description, see THETR 605.

THETR 606(6060) Passionate Politics: Affect, Protest, Performance (also FGSS 604[6040])

Fall. 4 credits. S. Warner.
For description, see THETR 606.

LINGUISTICS

<http://ling.cornell.edu>

J. Whitman, chair (209 Morrill Hall);
M. Diesing, director of graduate studies (fall) (211 Morrill Hall); W. Harbert, director of undergraduate studies (210 Morrill Hall);
D. Abusch, J. Bowers, W. Browne, A. Cohn, S. Hertz, J. Legate, A. Miller, A. Nussbaum, M. Rooth, C. Rosen, M. Wagner, M. Weiss, director of graduate studies (spring) (218 Morrill Hall), D. Zec.

Linguistics, the systematic study of human language, lies at the crossroads of the humanities and the social sciences, and much of its appeal derives from the special combination of intuition and rigor that the analysis of language demands. The interests of the members of the Department of Linguistics

and linguistic colleagues in other departments span most of the major subfields of linguistics: phonetics and phonology, the study of speech sounds; syntax, the study of how words are combined; semantics, the study of meaning; historical linguistics, the study of language change over time; and sociolinguistics, the study of language's role in social and cultural interactions.

Studying linguistics is not a matter of studying many languages. Linguistics is a theoretical discipline with ties to such areas as cognitive psychology, philosophy, logic, computer science, and anthropology. Nonetheless, knowing particular languages (e.g., Spanish or Japanese) in some depth can enhance understanding of the general properties of human language. Not surprisingly, then, many students of linguistics owe their initial interest to a period of exposure to a foreign language, and those who come to linguistics by some other route find their knowledge about languages enriched and are often stimulated to embark on further foreign language study.

Students interested in learning more about linguistics and its relationship to other disciplines in the humanities and social sciences are encouraged to take LING 101, a general overview, which is a prerequisite for most other courses in the field, or one of the first-year writing seminars offered in linguistics (on topics such as metaphor and the science of language). LING 101 and other introductory courses fulfill the social science distribution requirement. Most 100- and 200-level courses have no prerequisites and cover various topics in linguistics (e.g., LING 170 Introduction to Cognitive Science; LING 285 Linguistic Theory and Poetic Structure) or focus on the linguistics of a particular geographic region or historical development of particular languages (e.g., LING 217 History of the English Language to 1300; LING 241 Yiddish Linguistics). Some of these courses also fulfill the breadth requirements.

Talks and discussions about linguistics are offered through the Undergraduate Linguistics Forum and the Linguistics Colloquium (sponsored by the department and the Cornell Linguistic Circle). These meetings are open to the university public and anyone wishing to learn more about linguistics is most welcome to attend.

The Major

For questions regarding the linguistics major, contact Professor Wayne Harbert (210 Morrill Hall, 255-8441, weh2@cornell.edu).

The prerequisite for a major in linguistics is the completion of LING 101 and either LING 301, 302, 303, or 304. The major has its own language requirement, different from that of the College of Arts and Sciences, which should be completed as early as possible: majors must complete the equivalent of two semesters of college-level study of a language that is either non-European or non-Indo-European (language study undertaken to satisfy the college requirement can also count toward the major requirement if the language meets these conditions). With approval of the department's director of undergraduate studies, this requirement may be waived for students taking the cognitive studies concentration or a double major.

The other standard requirements for the linguistics major are as follows:

1. LING 301 Introduction to Phonetics, LING 302 Introduction to Phonology, LING 303 Introduction to Syntax, and LING 304 Introduction to Semantics and Pragmatics (One of which will already have been taken as a prerequisite to the major).
2. LING 314 Historical Linguistics.
3. Three additional courses in linguistics at the 300 or 400 level, of which two must be general linguistics.
4. A course at or beyond the 300 level in the structure of a language, or LING 300 Field Methods for Undergraduates or LING 400 Language Typology.

Some substitutions to these standard requirements are possible after consultation with your advisor and approval by the DUS.

Honors

Applications for honors should be made during the junior year or by the start of fall semester of the senior year. For further information, please contact the DUS. Candidates for admission must have a 3.0 (B) average overall and should have a 3.5 average in linguistics courses. In addition to the regular requirements of the major, the candidate for honors will complete an honors thesis and take a final oral exam in defense of it. The thesis is usually written during the senior year but may be started in the second semester of the junior year when the student's program so warrants. The oral exam will be conducted by the honors committee, consisting of the thesis advisor and at least one other faculty member in linguistics. Members of other departments may serve as additional members if the topic makes this advisable. LING 493 and 494 may be taken in conjunction with thesis research and writing but are not required.

First-Year Writing Seminars

For descriptions, consult the John S. Knight brochure for times, instructors, and descriptions.

Courses

LING 101(1101) Introduction to Linguistics (KCM-AS)

Fall or spring. 4 credits each semester. Fall, A. Miller; spring, J. Legate.

Overview of the science of language, especially its theoretical underpinnings, methods, and major findings. Areas covered include: the relation between sound and meaning in human languages, social variation in language, language change over time, universals of language, and the mental representation of linguistic knowledge. Students are introduced to a wide variety of language phenomena, drawn not only from languages resembling English, but also from many that appear to be quite unlike English, such as those native to the Americas, Africa, Asia, Australia, and the South Pacific.

[LING 109(1109) English Words: Histories and Mysteries # (HA-AS)]

Spring. 3 credits. Next offered 2008–2009. Staff.

Where do the words we use come from? This course examines the history and structure of the English vocabulary from its distant Indo-European roots to the latest in technical jargon and slang. Topics include formal and semantic change, taboo and euphemism, borrowing,

new words from old, "learned" English loans from Greek and Latin, slang, and society.]

LING 111(1111) American Sign Language I

Summer only. 4 credits. T. Galloway. Students with no previous background in American Sign Language (ASL) are introduced to the nature of a signed language and develop expressive and receptive skills in ASL. Basic grammar and vocabulary are covered, including explanations of the fundamental parts of a sign, proper use of fingerspelling, and the significance of nonmanual features. Instruction is supplemented with videotexts allowing students to begin to explore the visual literature of the Deaf community in the United States—stories, poems, and jokes that are unique to Deaf culture. Readings and class discussions acquaint students with the causes of deafness, the historical development of ASL and its linguistic status, and characteristics of deaf education both throughout history and in the present day.

LING 112(1112) American Sign Language II

Summer only. 4 credits. Prerequisite: LING 111 or permission of instructor. T. Galloway.

In this intermediate course, students continue to develop expressive and receptive fluency in ASL. Focus is on greater descriptive skill, developing intermediate-level narratives, and enhancing conversational ability. Advanced grammar and vocabulary is supplemented with further instruction in the linguistic structure of ASL. Readings, class discussions, and videotexts containing samples of the visual literature of the U.S. Deaf community continues students' investigation into American Deaf history and the shaping of modern Deaf culture.

LING 131–132(1131–1132) Elementary Sanskrit (also CLASS 191–192[1331–1332], SANSK 131–132[1131–1132])

For description, see SANSK 131–132.

LING 170(1170) Introduction to Cognitive Science (also COGST 101[1101], CS 170[1710], PHIL 191[1910], PSYCH 102[1200]) (KCM-AS)

For description, see COGST 101.

LING 215(2215) Psychology of Language (also COGST/PSYCH 215[2150]) (KCM-AS)

For description, see PSYCH 215.

LING 217(2217) History of the English Language to 1300 (also ENGL 217[2170]) # (HA-AS)

Fall. 4 credits. W. Harbert.

Explores the development of the English language from its Indo-European beginnings through the period of Early Middle English. Topics include linguistic reconstruction, changes in sound, vocabulary and grammatical structure, external influences, and Old and Early Middle English language and literature. This course forms a sequence with LING 218, but the two may be taken independently.

LING 218(2218) History of the English Language since 1300 (HA-AS)

Spring. 4 credits. W. Harbert.

Traces English from Chaucer to the present, including the development of standard English and dialects, and the rise of English as a world language.

[LING 236(2236) Introduction to Gaelic Spring. 3 credits. Next offered 2009–2010. W. Harbert.]

Introduction to the Scottish Gaelic language, with some discussion of its history, structure, and current status.]

LING 238(2238) Introduction to Welsh Fall. 3 credits. W. Harbert.

Introduction to the Welsh language, with discussion of its history, structure, and current status, and a brief introduction to Welsh literature.

[LING 241(2241) Yiddish Linguistics (SBA-AS)]

Fall. 3 credits. No previous knowledge of Yiddish required. Next offered 2008–2009. M. Diesing.

Yiddish language and culture, including structure and history of the Yiddish language, Yiddish in America, minority language issues, influence of Yiddish on present-day American English.]

[LING 244(2244) Language and Gender (also FGSS 244[2440]) (SBA-AS)]

Spring. 4 credits. For nonmajors or majors. Next offered 2009–2010. S. McConnell-Ginet.

Explores connections between language (use) and gender/sex systems, addressing such questions as the following: How do sex and gender affect the ways we speak, the ways we interpret and evaluate speech? How do sociocultural differences in women's and men's roles affect their language use, their relation to language change? What is meant by sexist language? How does conversation structure the social worlds of women and men? Readings draw from work in linguistics, anthropology, philosophy, psychology, literature, and general women's studies and feminist theory.]

[LING 246/546(2246/5546) Minority Languages and Linguistics (SBA-AS)]

Fall. 4 credits. Graduate students register under LING 546. Next offered 2008–2009. W. Harbert.

Examines minority languages from linguistic, social, and political perspectives, including such issues as language death, language maintenance, bilingualism, language policy, and language rights.]

[LING 251–252(2251–2252) Intermediate Sanskrit (also CLASS 291–292[2351–2352], SANSK 251–252[2251–2252]) @

Satisfies Option 1. Next offered 2008–2009. For description, see SANSK 251–252.]

LING 270(2270) Truth and Interpretation (also COGST/PHIL 270[2700]) (KCM-AS)

Fall. 4 credits. B. Weatherston.

For description, see PHIL 270.

LING 285/585(2285/5585) Linguistic Theory and Poetic Structure (also ENGL 296/585[2960/5850]) (LA-AS)

Fall. 4 credits. Graduate students register under LING 585. J. Bowers.

The aim of this course is to show how certain results of modern linguistics can usefully be applied to the analysis and interpretation of poetry.

LING 300(3300) Field Methods for Undergraduates (KCM-AS)

Spring. 4 credits. Prerequisite: students should normally have completed (or be concurrently enrolled in) LING 301, 302, 303, 304. W. Harbert.

A hands-on course in which students gain experience in eliciting linguistic data from a native speaker of an unfamiliar language, organizing and analyzing those data and producing descriptions of the lexicon, phonetics, phonology, morphology, syntax, and texts in the language on the basis of them.

LING 301(3301) Introduction to Phonetics (KCM-AS)

Fall. 4 credits. Prerequisite: LING 101 or permission of instructor. Y. Chen.

Introduction to the study of the physical properties of human speech sounds, including production, acoustics, and perception of speech. Provides in-depth exposure to the breadth of sounds found across human languages. Students achieve a high level of skill in phonetic transcription and some practice in reading spectrograms. An introduction to speech synthesis and automatic speech recognition is also provided. A small course project to discover the phonemes of an unknown language is undertaken.

LING 302(3302) Introduction to Phonology (KCM-AS)

Spring. 4 credits. Prerequisite: LING 101 or permission of instructor. D. Zec.

Introduction to phonology, which studies the patterning of speech sounds in human language. Emphasis is on formal devices, such as rules and representations, that capture the internal organization of speech sounds as well as their grouping into larger units, syllables, and feet.

LING 303(3303) Introduction to Syntax (KCM-AS)

Fall. 4 credits. Prerequisite: LING 101 or permission of instructor. J. Legate.

Introduction to syntax, which studies how words are combined to form phrases and sentences. The course aims to give students the ability to address questions regarding the syntactic properties that are shared by natural languages (as well as those that distinguish them) in a precise and informed way. Topics include those that lie at the heart of theoretical syntax: phrase structure, transformations, grammatical relations, and anaphora. Emphasis throughout the course is placed on forming and testing hypotheses.

LING 304(3304) Introduction to Semantics and Pragmatics (KCM-AS)

Spring. 4 credits. Prerequisite: LING 303 or permission of instructor. D. Abusch.

Examines the two major components of sentence meaning: (1) how sentences mean what they mean and (2) how they can be used to communicate more than what they (literally) mean. Investigates precise ways of describing the possible interpretations of a sentence and the relationship between meaning and syntactic structure. Topics include the representation of lexical meaning, the meaning of quantifier phrases and analyses of scope ambiguities, and classic puzzles of reference. Also examines possible applications of the theory to linguistically interesting legal cases (torts and criminal law), slips of the tongue, acquisition studies,

language disorders, and connections with the philosophy of language.

LING 308(3308) Readings in Celtic Languages

Fall or spring, depending on demand. 2 credits. Prerequisite: permission of instructor. S-U grades only. W. Harbert.

Reading/discussion groups in Welsh or Scottish Gaelic.

LING 314(3314) Introduction to Historical Linguistics # (HA-AS)

Spring. 4 credits. Prerequisite: LING 301 or permission of instructor. M. Weiss.

Survey of the basic mechanisms of linguistic change, with examples from a variety of languages.

LING 315-316(3315-3316) Old Norse

315, fall; 316, spring. 4 credits each semester. K. Jónatansdóttir.

Old Norse is a collective term for the earliest North Germanic literary languages: Old Icelandic, Old Norwegian, Old Danish, and Old Swedish. The richly documented Old Icelandic is the center of attention, and the purpose is twofold: the students gain knowledge of an ancient North Germanic language, important from a linguistic point of view, and gain access to the medieval Icelandic (and Scandinavian) literature. 315: The structure of Old Norse (Old Icelandic), phonology, and morphology, with reading of selections from the Prose-Edda, a 13th-century narrative based on the Eddaic poetry. 316: Extensive reading of Old Norse texts, among them selections from some of the major Icelandic family sagas: Njals saga, Grettis saga, and Egils saga, as well as the whole Hrafnkels saga.

LING 321-322(3321-3322) History of the Romance Languages (also ROM S 321-322[3210-3220]) # (HA-AS)

321, fall; 322, spring. 4 credits each semester. Prerequisites: for LING 321, LING 101 or equivalent and qualification in any Romance language; for LING 322, LING 321 or permission of instructor.

321 covers popular Latin speech, early documentary sources, Pan-Romance phonological changes, regional divergence, early external history, and non-Latin influences. 322 covers the shaping of Romance morphological systems, changes in the lexicon, medieval diglossia, and the emergence of Romance standards. 321 and 322 both include selected readings in the earliest Romance texts.

LING 332(3332) Philosophy of Language (also PHIL 332[3320])

For description, see PHIL 332.

[LING 333(3333) Problems in Semantics (also COGST 333[3330]) (KCM-AS)]

Spring. 4 credits. Prerequisite: logic or semantics course or permission of instructor. Next offered 2009-2010. Staff.

Looks at problems in the semantic analysis of natural languages, critically examining work in linguistics and philosophy on particular topics of current interest. Topics for 2007 are presuppositions, events and argument structure, information structure, dynamic semantics.]

[LING 347(3347) Topics in the History of English (HA-AS)]

Fall. 4 credits. Prerequisite: LING 217, 314, course in Old or Middle English, or permission of instructor. Next offered 2009-2010. W. Harbert.

Treats specific topics in the linguistic history of the English language, selected on the basis of the particular interests of the students and the instructor.]

LING 390(3390) Independent Study in Linguistics

Fall or spring. 1-4 credits, variable.

Prerequisite: LING 101 and permission of instructor. Staff.

Independent study of linguistics topics not covered in regular curriculum for undergrads.

LING 400(4400) Language Typology (KCM-AS)

Spring. 4 credits. Prerequisite: LING 101. J. Whitman.

Studies a basic question of contemporary linguistics: in what ways do languages differ, and in what ways are they all alike? Efforts are made to formalize universals of syntax and to characterize the total repertoire of constructions available to natural languages. Common morphological devices and their syntactic correlates are covered. Emphasis is on systems of case, agreement, and voice.

LING 401-402(4401-4402) Phonology I, II (KCM-AS)

401, fall; 402, spring. 4 credits each semester. Prerequisites: for LING 401, LING 302 or equivalent; for LING 402, LING 401 or permission of instructor. Fall, D. Zec; spring, M. Wagner.

401 provides a basic introduction to phonological theory. The first half of the course focuses on basic principles of phonology, patterns of sounds, and their representations. In the second half, the nature of syllable structure and feature representations are explored. 402 provides further refinement of the issues investigated in 401, focusing in particular on metrical theory, lexical phonology, autosegmental phonology, and prosodic morphology.

LING 403-404(4403-4404) Syntax I, II (KCM-AS)

403, fall; 404, spring. 4 credits each semester. Prerequisites: for LING 403, LING 303; for LING 404, LING 403 or permission of instructor. Fall, D. Zec; spring, J. Legate.

403 is an advanced introduction to syntactic theory within the principles and parameters/minimalist frameworks. Topics include phrase structure, argument structure (unaccusative verbs, unergative verbs, double object constructions), principles of word order, and the binding theory. 404 is a continuation of 403, focusing on syntactic dependencies, including the theory of control, an examination of locality constraints on movement, covert versus overt movement, and the syntax of quantification. The purpose of the course is to develop the background needed for independent syntactic research.

LING 405(4405) Sociolinguistics (CA-AS)

Fall. 4 credits. Prerequisite: LING 101 or another linguistics course or permission of instructor. Y. Chen and J. Whitman.

This course surveys some of the different issues, theories, concepts, and methods in sociolinguistics, the study of the interaction of language with society.

[LING 409(4409) Structure of Italian (KCM-AS)]

Spring. 4 credits. Prerequisites: LING 101 and qualification in any Romance language. Next offered 2009–2010. C. Rosen.]

[LING 411(4411) History of the Japanese Language (also ASIAN 411[4411], JAPAN 410[4410]) # @ (HA-AS)]

Fall. 4 credits. Prerequisite: reading knowledge of Japanese. Next offered 2009–2010. J. Whitman.

Overview of the history of the Japanese language followed by intensive examination of issues of interest to the participants. Students should have a reading knowledge of Japanese.]

[LING 412(4412) Linguistic Structure of Japanese (also ASIAN 412[4412]) (KCM-AS)]

Spring. 4 credits. Prerequisites: JAPAN 102 or permission of instructor and LING 101. Next offered 2009–2010. J. Whitman.

Introduction to the linguistic study of Japanese, with an emphasis on morphology and syntax.]

[LING 413(4413) Applied Linguistics and Second Language Learning (KCM-AS)]

Spring. 4 credits. Prerequisite: at least one course in applied linguistics, linguistics, psychology, anthropology, communication, cognitive studies, education, or literary analysis; or permission of instructor. Next offered 2008–2009. Staff.

An introduction to the field of applied linguistics with focus on different domains of language research as they bear on second language learning.]

[LING 416(4416) Structure of the Arabic Language (also NES 416[4206]) @ (KCM-AS)]

Spring. 4 credits. Next offered 2009–2010. M. Younes.

For description, see NES 416.]

[LING 417(4417) History of the Russian Language (also RUSSA 401[4401]) (HA-AS)]

Spring. 4 credits. Prerequisite: permission of instructor. Next offered 2008–2009.

W. Browne.

Phonological, morphological, and syntactic developments from Old Russian to modern Russian.]

[LING 419(4419) Phonetics I (KCM-AS)]

Fall. 4 credits. Prerequisite: LING 301 or permission of instructor. A. Miller.

Provides a basic introduction to the study of phonetics. Topics include anatomy and physiology of the speech production apparatus, transcription and production of some of the world's sounds, basic acoustics, computerized methods of speech analysis, acoustic characteristics of sounds, speech perception, speech synthesis, and stress and intonation.

[LING 420(4420) Phonetics II (KCM-AS)]

Spring. 4 credits. Prerequisite: LING 419. A. Miller.

Continuation of Phonetics I, providing a more detailed survey of some areas in acoustic and articulatory phonetics. Topics include feature theory, vocal tract acoustics, quantal theory, speaker normalization, theories of speech perception, coarticulation, theories of speech production, and prosody. In addition, a number of "hands-on" projects are part of the course.

[LING 421(4421) Semantics I (KCM-AS)]

Fall. 4 credits. Prerequisite: LING 304. D. Abusch.

Introduces methods for theorizing about meaning within generative grammar. These techniques allow the creation of grammars that pair syntactic structures with meanings. Students look at several empirical areas in detail, among them complementation (combining heads with their arguments), modification, conjunction, definite descriptions, relative clauses, traces, bound pronouns, and quantification. An introduction to logical and mathematical concepts used in linguistic semantics (e.g., set theory, functions and their types, and the lambda notation for naming linguistic meanings) is included in the course.

[LING 422(4422) Semantics II (KCM-AS)]

Spring 4 credits. Prerequisite: LING 421 or permission of instructor. M. Rooth.

Uses the techniques introduced in Semantics I to analyze linguistic phenomena, including quantifier scope, ellipsis, and referential pronouns. Temporal and possible worlds semantics are introduced and used in the analysis of modality, tense, and belief sentences. The phenomena of presupposition, indefinite descriptions, and anaphora are analyzed in a dynamic compositional framework that formalizes the idea that sentence meaning effects a change in an information state.

[LING 423(4423) Morphology (KCM-AS)]

Fall. 4 credits. Prerequisite: LING 101 or permission of instructor. M. Wagner.

Addresses the basic issues in the study of words and their structures. Provides an introduction to different types of morphological structures with examples from a wide range of languages. Special emphasis is given to current theoretical approaches to morphological theory and to computational models of morphology.

[LING 424(4424) Computational Linguistics (also COGST 424[4240], CS 324[3740]) (MQR)]

Fall. 4 credits. Recommended: CS 114. M. Rooth.

Introduces methods for doing a language computationally, including parsing and representation of syntactic analyses; computational morphology; probabilistic grammars; feature constraint formalisms for syntax; treebank methodology.

[LING 425(4425) Pragmatics (KCM-AS)]

Fall. 4 credits. Prerequisite: LING 304 or PHIL 231, or permission of instructor. Next offered 2008–2009. D. Abusch.

Introduction to aspects of linguistic meaning that have to do with context and with the use of language. Topics include context change semantics and pragmatics, presupposition and accommodation, conversational implicature, speech acts, and the pragmatics of definite descriptions and quantifiers.]

[LING 427(4427) Structure of Hungarian (also HUNGR 427[4427]) (KCM-AS)]

Fall. 4 credits. Prerequisite: LING 101. Next offered 2008–2009. W. Browne.]

[LING 428/628(4428/6628) Connectionist Psycholinguistics (also COGST 428[4280], PSYCH 428/628[4280/6280])]

Next offered 2008–2009.

For description, see PSYCH 428.]

[LING 430(4430) Structure of Korean (also ASIAN/KOREA 430[4430]) (KCM-AS)]

Spring. 4 credits. Prerequisite: KOREA 102 or linguistics course. No previous knowledge of Korean required. Next offered 2009–2010. J. Whitman.

Intensive examination of the syntax and phonology of a non-Indo-European language with the objective of testing principles of current linguistic theory.]

[LING 431(4431) Structure of an African Language (KCM-AS)]

Spring. 4 credits. Prerequisite: LING 101 or permission of instructor. A. Miller.

Survey of the structure of Southern African Khoesan languages in light of current linguistic theory.

[LING 432(4432) Middle Korean (also KRLIT 432[4432]) @ # (LA-AS)]

Spring. 4 credits. Offered alternate years. Prerequisite: KOREA 202 or equivalent.

Next offered 2009–2010. J. Whitman.

Introduction to the premodern Korean language. Focuses on the earliest *hangeul* texts of the 15th century, but also introduces materials written in Korean using Chinese characters before the 15th century, including *hyangga*. No previous background in linguistics is required, but students should have a command of written Korean of at least the third-year level.]

[LING 433(4433) The Lesser-Known Romance Languages (also ROM S 433[4330]) (KCM-AS)]

Spring. 4 credits. Prerequisites: LING 101 and qualification in any Romance language. Next offered 2008–2009. C. Rosen.

Surveys several Romance languages/dialects, examining sound systems, grammars, and historical evolution from Latin. Readings represent both the modern languages and their earliest attested stages.]

[LING 436(4436) Language Development (also COGST/HD 337[3370], PSYCH 436[4360]) (KCM-AS)]

For description, see COGST 337.

[LING 437(4437) Celtic Linguistic Structures (KCM-AS)]

Spring. 4 credits. Prerequisite: LING 403.

Next offered 2008–2009. W. Harbert.

Treats selected topics in the syntax and morphosyntax of the modern Celtic languages.]

[LING 441(4441) Introduction to Germanic Linguistics (also GERST 441[4410]) (HA-AS)]

Spring. 4 credits. Prerequisite: LING 101 or permission of instructor. Next offered 2008–2009. W. Harbert.

Survey of major issues in historical Germanic linguistics.]

[LING 443(4443) Linguistic Structure of Russian (also RUSSA 403[4403]) (KCM-AS)]

Fall. 4 credits. Prerequisites: reading knowledge of Russian. W. Browne.

A synchronic analysis of the structure of modern Russian. This course deals primarily with phonology and its relation to morphology.

[LING 450(4500) Lab Course: Language Development (also COGST 450[4500], HD/PSYCH 437[4370])]

Fall. 2 credits.

For description, see COGST 450.

[LING 451(4451) Greek Comparative Grammar (also CLASS 421[4421]) (KCM-AS)]

Next offered 2009–2010.
For description, see CLASS 421.]

[LING 452(4452) Latin Comparative Grammar (also CLASS 422[4422]) (KCM-AS)]

Fall. 4 credits. A. Nussbaum.
For description, see CLASS 422.

[LING 453(4453) Structure of Latin (also LATIN 453[4453], ROM S 454[4453]) # (KCM-AS)]

Fall. 4 credits. Prerequisite: a basic knowledge of Latin forms and constructions or some previous work in Romance and/or general linguistics.
A. Nussbaum.

An analysis of the phonology, morphology, and syntax of Latin from a synchronic point of view. The course is intended for a twofold audience—students of Latin interested in a linguist's-eye view of the facts and students of general and/or Romance linguistics interested in what Latin data might have to offer for historical and general linguistic purposes.

[LING 455(4455) Greek Dialects (also GREEK 425[4455]) (KCM-AS)]

Next offered 2009–2010.
For description, see GREEK 425.]

[LING 456(4456) Archaic Latin (also LATIN 426[4456]) (LA-AS)]

Next offered 2008–2009.
For description, see LATIN 426.]

[LING 457(4457) Homeric Philology (also GREEK 427[4457]) # (LA-AS)]

Next offered 2008–2009.
For description, see GREEK 427.]

[LING 459(4459) Mycenaean Greek (also GREEK 429[4459]) (LA-AS)]

Next offered 2009–2010.
For description, see GREEK 429.]

[LING 460(4460) Sanskrit Comparative Grammar (also CLASS 490[4490]) (KCM-AS)]

Fall. 4 credits. Prerequisite: reasonable familiarity with classical Sanskrit morphology. Next offered 2008–2009.
A. Nussbaum.

Survey of the historical phonology and morphology of Sanskrit in relation to the Indo-Iranian and Indo-European comparative evidence.]

[LING 461(4461) Introduction to Indo-European Linguistics (HA-AS)]

Fall. 4 credits. M. Weiss.
An introduction to the phonology, morphology, and syntax of Proto-Indo-European and the chief historical developments of the daughter languages.

[LING 474(4474) Introduction to Natural Language Processing (also COGST/CS 474[4740])]

Next offered 2008–2009.
For description, see CS 474.]

[LING 493(4493) Honors Thesis Research]

Fall. 4 credits. Staff.
May be taken before or after LING 494, or may be taken independently.

[LING 494(4494) Honors Thesis Research]

Spring. 4 credits. Staff.
May be taken as a continuation of, or before, LING 493.

[LING 530(5530) Representation of Structure in Vision and Language (also COGST/PSYCH 530[6300])]

Next offered 2008–2009.
For description, see PSYCH 530.]

[LING 600(6600) Field Methods]

Spring. 4 credits. Prerequisites: LING 401 and 403 or permission of instructor.
J. Bowers and M. Wagner.

Elicitation, recording, and analysis of data from a native speaker of a non-Western language not generally known to students.

[LING 601(6601) Topics in Phonological Theory]

Spring. 4 credits, variable. Prerequisites: LING 401 and one higher-level phonology course. Next offered 2008–2009. Staff.
Selected topics in current phonological theory.]

[LING 602(6602) Topics in Morphology]

Fall. 4 credits. Prerequisites: LING 401 or 403 or permission of instructor. Next offered 2008–2009. Staff.
Selected topics in current morphological theory.]

[LING 604(6604) Research Workshop]

Fall. 2 credits. Requirement for third-year linguistics graduate students. S-U grades only. M. Diesing.
Provides a forum for presentation and discussion of ongoing research, and development of professional skills. Participants must enroll in a concurrent independent study with a special committee member, or a relevant workshop.

[LING 606(6606) Historical Syntax]

Fall. 4 credits. Prerequisite: LING 403. Next offered 2009–2010. J. Whitman.]

[LING 609(6609) SLA and the Asian Languages (also ASIAN 610[6610])]

Next offered 2008–2009.]

[LING 615(6615) Topics in Semantics]

Fall. 4 credits. Prerequisite: LING 421 or permission of instructor. D. Abusch.
Selected topics in semantic theory, focusing on recent literature.

[LING 616(6616) Topics in Syntactic Theory]

Fall. 4 credits, variable. Prerequisite: LING 404 or permission of instructor. Next offered 2008–2009.

Examination of recent developments in syntactic theory, including "minimalist" approaches to phrase structure, derivations/representations and the nature of economy conditions, and parametric differences.]

[LING 617-618(6617-6618) Hittite]

617, fall; 618, spring. 4 credits each semester. Prerequisites: for LING 617, permission of instructor; for LING 618, LING 617 or permission of instructor. Next offered 2008–2009. M. Weiss.

Introduction to the cuneiform writing system and the grammar of Hittite, followed by the reading of selected texts.]

[LING 619(6619) Rigveda]

Fall. 4 credits. Prerequisite: permission of instructor. Next offered 2008–2009. Staff.]

[LING 621(6621) Avestan and Old Persian]

Fall. 4 credits. Prerequisite: basic knowledge of Sanskrit forms and morphology syntax. Next offered 2008–2009. M. Weiss.
Linguistically oriented readings of Old Persian and Avestan.]

[LING 623-624(6623-6624) Old Irish I, II]

623, fall; 624, spring. 4 credits each semester. Prerequisite: for LING 624, LING 623 or permission of instructor. Next offered 2009–2010. M. Weiss.]

[LING 625(6625) Middle Welsh]

Spring. 4 credits. Prerequisite: permission of instructor. Next offered 2008–2009. W. Harbert.
Students develop a reading knowledge of Middle Welsh through translating selections from prose and poetry. No familiarity with Welsh is assumed.]

[LING 633(6633) Language Acquisition Seminar (also COGST/HD 633[6330])]

Fall. 1–4 credits. Prerequisite: LING 436 or equivalent or permission of instructor.
B. Lust.
This seminar reviews and critiques current theoretical and experimental studies of first language acquisition, with a concentration on insights gained by cross-linguistic study of this area. Attention is also given to the development of research proposals.

[LING 635-636(6635-6636) Indo-European Workshop]

635, fall; 636, spring. 4 credits each semester. Prerequisite: permission of instructor. Next offered 2008–2009. M. Weiss.

An assortment of subjects intended for students with previous training in Indo-European linguistics.]

[LING 637(6637) Introduction to Tocharian]

Fall. 4 credits. Prerequisite: knowledge of other ancient IE language and historical linguistics methods. Next offered 2008–2009. M. Weiss.
Introduction to the grammar of Tocharian A and B.]

[LING 645(6645) Gothic]

Fall. 4 credits. Prerequisite: LING 101.
Offered every three years; next offered 2009–2010. W. Harbert.
Linguistic structure of Gothic, with extensive readings of Gothic texts.]

[LING 646(6646) Old High German, Old Saxon (also GERST 658[6580])]

Spring. 4 credits. Prerequisite: LING 101.
Highly recommended: reading knowledge of Modern German. Offered every three years; next offered 2009–2010. W. Harbert.
Combines a survey of the linguistic history and structure of Old High German and Old Saxon with extensive readings from the major documents in which they are recorded.]

[LING 648(6648) Speech Synthesis (also INFO 648[6648])]

Spring. 4 credits. Prerequisite: LING 401, 419, or permission of instructor. Offered alternate years; next offered 2008–2009. S. Hertz.
Investigates the nature of the acoustic structure of speech synthesis, using speech as a tool for exploring this structure. A particular acoustic model is proposed, developed, and

motivated by considering the relationship between phonological and acoustic structure, speech timing, phonetic universals, coarticulation, and speech perception. The primary tool for investigation is the Delta System, a powerful software system for investigating phonology and phonetics through speech synthesis. The course is meant for graduate students and advanced undergraduate students in linguistics, but may also be of interest to students in psychology/psycholinguistics, computer science, and cognitive studies.]

LING 649(6649) Structure of Old English
 Fall. 4 credits. Prerequisite: LING 441.
 Offered every three years. W. Harbert.
 Linguistic overview of Old English, with emphasis on phonology, morphology, and syntax.

LING 659(6659) Seminar in Vedic Philology (also ASIAN 659[6659], CLASS 659[7459])
 Fall. 4 credits. Prerequisite: two years of Sanskrit or permission of instructor.
 M. Weiss.

A seminar for intensive reading of Vedic texts, primarily the Rig Veda. Attention will be given to the study of Vedic ritual and mythology, and to the later commentarial and performance traditions. Students will be familiarized with the various methods, primarily philological, necessary for the competent reading of Vedic texts.

LING 661(6661) Old Church Slavonic (also RUSSA 601[6601])
 Fall. 4 credits. Prerequisite: knowledge of Slavic or ancient Indo-European language. Prerequisite to LING 662 and 671.
 W. Browne.

Grammar and reading of basic texts.

LING 662(6662) Old Russian Texts (also RUSSA 602[6602])
 Spring. 4 credits. Prerequisite: LING 661.
 W. Browne.

Grammatical analysis and close reading of Old Russian texts.

LING 671(6671) Comparative Slavic Linguistics (also RUSSA 651[6651])
 Fall. 4 credits. Prerequisites: LING 661 taken previously, or simultaneously, or permission of instructor. Offered alternate years. W. Browne.

Sounds and forms of the Slavic languages and of prehistoric common Slavic; main historical developments leading to the modern languages.

LING 700(7700) Seminar
 Fall or spring. Credit TBA.
 Seminars are offered according to faculty interest and student demand. Topics for 2006–2007 include: semantics; computational linguistics; language acquisition; and the nature of the interfaces between phonetics, phonology, and syntax.

LING 701-702(7701-7702) Directed Research
 701, fall; 702, spring. 1–4 credits. Times TBA. Staff.

Rosenberg, M. Sweedler.

Mathematics is the language of modern science; basic training in the discipline is essential for those who want to understand, as well as for those who want to take part in, the important scientific developments of our time. Acquaintance with mathematics is also extremely useful for students in the social sciences and valuable for anyone interested in the full range of human culture and the ways of knowing the universe in which we live.

The Department of Mathematics faculty has strong groups specializing in algebra, number theory, combinatorics, real and complex analysis, Lie groups, topology and geometry, logic, probability and statistics, mathematical physics, and applied mathematics. Related departments at Cornell have specialists in computer science, operations research, linear programming, and game theory, and courses in these topics can be integrated readily into the mathematics major.

The department offers a rich variety of undergraduate courses, and many of its beginning graduate courses are suitable for advanced undergraduates as well. Under some conditions, a student may carry out an independent reading and research project for college credit under the supervision of a faculty member.

Members of the department are available to discuss with students the appropriate course for their levels of ability and interest, and students are urged to avail themselves of this help.

Students who want to take any of the courses numbered 300 or above are invited to confer, before registering, with the instructor concerned. The level of a course is indicated by the first digit of the course number: roughly, 1, 2, indicate underclass courses; 3, 4, upperclass courses; 5, professional level and mathematics education courses; 6, 7, graduate courses. The subject matter of courses is often indicated by the second digit: 0, general; 1, 2, analysis; 3, 4, algebra and combinatorics; 5, 6, topology and geometry; 7, probability and statistics; 8, logic; 9, other.

Midterm grades, when required, will be S or U only, except in special circumstances. In courses with numbers below 700, students will receive letter grades, with the exception of nonmathematics majors who have requested an S-U grade.

Advanced Placement

Secondary school students are strongly urged to take one of the two advanced placement exams of the College Entrance Examination Board in their senior year. Freshmen who have had some calculus but who have not taken an advanced placement exam should take the placement exam in mathematics offered at Cornell just before the beginning of classes in the fall. Anyone with any knowledge of calculus should carefully read "Advanced Placement," p. 7.

The Major

The mathematics major adapts to a number of purposes. It can emphasize the theoretical or the applied. It can be appropriate for professionals and nonprofessionals alike, and can be broad or narrow. It can also be combined easily with serious study in another subject in the physical, biological, or social sciences by means of a double major and/or concentration. For example, a double major in mathematics and computer science is facilitated by the concentration in computer science (requirement 4, option b) described below. This concentration permits a student to use certain computer science courses to satisfy the requirements of both majors. Questions concerning the major should be brought to a member of the Mathematics Major Committee.

Prerequisites

Students are admitted to the major after successfully completing a semester of multivariable calculus and a semester of linear algebra. The department recommends students take either MATH 221–222 or 223–224. Normally students will be admitted to the major only when they have grades of B- or better in all 200-level mathematics courses taken. Alternative prerequisites for admission to the major are MATH 192 and 294 with grades of B- or better or MATH 213 and 231 with grades of B+ or better. A grade of C- or better in CS 100 is also required for admission to the major for students graduating in 2010 or later.

Requirements

Students must complete nine courses to fulfill the following three requirements for the mathematics major. (Students graduating in 2009 or earlier must also complete CS 100 with a grade of C- or better as part of the requirements for the major rather than as a prerequisite for the major.) A course may be counted toward the major only if it is taken for a letter grade, and a grade of C- or better is received for the course. Major advisors can alter these requirements upon request from an advisee, provided the intent of the requirements is met. In particular, many suitable graduate courses are not listed here. No course may be used to satisfy more than one requirement for the math major.

- Two courses in algebra.* Eligible courses are
 MATH 431 or 433
 MATH 432 or 434
 MATH 437
 MATH 332 or 336

2. Two courses in analysis. Eligible courses are MATH 311, 321, 323, 413, 414, 418, 420, 422, 424, 425 (also CS 421), 426 (also CS 422), 428.
3. Five further high-level mathematical courses. Two-credit courses count as half courses. 500-level MATH courses will not normally count toward the major. In rare cases, exceptions are made. Students should consult their advisors. The seven alternatives (a-g) below do not exhaust the possibilities. A mathematics major interested in a concentration in a subject different from those below may develop a suitable individual program in consultation with his or her major advisor.
 - a. **Concentration in Mathematics:**
 - i. Four additional MATH courses numbered 300 or above.
 - ii. One course dealing with mathematical models. Any course from outside mathematics with serious mathematical content and dealing with scientific matters. Serious mathematical content includes, but is not limited to, extensive use of calculus or linear algebra. Any course from another department that would satisfy one of the other concentrations may be used. In addition, CS 211, MATH 335*/CS 480, MATH/BIOEE 362, MATH 384/PHIL 330, MATH 425/CS 421, MATH 481/PHIL 431, MATH 482/PHIL 432, MATH 483/PHIL 436, MATH/CS 486, PHYS 116, 208, 213, or 217 may be used. Other 100-level physics courses, PHYS 207, and PHYS 209 may not be used. Some courses in biology, chemistry, and other fields may be used.
 - b. **Concentration in Computer Science:** Five additional courses from (iii) and (iv) below, of which at least one is from (iii) and three are from (iv).
 - iii. Mathematics courses numbered 300 or above.
 - iv. Computer science courses with significant mathematical content. Eligible courses are: CS 305, 321, 322, 381, 400, 411, 421 (also MATH 425), 422 (also MATH 426), 426, 428, 465, 467, 472, 474, 475, 478, 480, 482, 483, 485, 486, and 487. Students graduating in May 2009 or earlier may also use CS 427, 468, 481.
 - c. **Concentration in Economics:** Five additional courses from (v), (vi), and (vii) below, as follows: one course from (v), three courses from (vi), and a fifth course from any of (v), (vi), or (vii).
 - v. Mathematics courses numbered 300 or above.
 - vi. Economics courses with significant mathematical content. Eligible courses are ECON 319*/619, 320/620, 325, 327, 368 (formerly 467), 416, 419, 476/676, 477/677, 609, 610, 613, 614, 717, 718, 748, 749, 756. Only two of the econometrics courses (320/620, 325, 327, 748, 749) are allowed. Students graduating in May 2009 or earlier may also use ECON/AEM 450.
 - vii. Courses in operations research with significant mathematical content and dealing with material of interest in economics. Eligible courses are OR&IE 320, 321, 432, 435, 474, and 476.
 - d. **Concentration in Mathematical Biology:** Five additional courses from (viii) and (ix) below, with three courses from (viii) and two courses from (ix).
 - viii. Biology courses that have mathematical content or provide background necessary for work at the interface between biology and mathematics. Eligible courses are BIOBM/CS 321, BIOEE/MATH 362, BIOEE 460, BIONB 422, BTRY 382, 408*, 409*, 482, 483, 484, EAS 359. Students graduating in May 2009 or earlier may also use BIOGD 481, 484, 487, BIONB 330.
 - ix. Mathematics courses numbered above 300. Particularly appropriate are MATH 420 and 471*.
 - e. **Concentration in Mathematical Physics:** Five additional courses from (x) and (xi) below, of which at least one is from (x) and three are from (xi).
 - x. Mathematics courses in analysis, geometry, algebra and combinatorics, probability and statistics, and mathematical logic. Eligible courses are MATH 311, 321, 323, 401, 413, 414, 420, 418 or 422, 424, 425 (also CS 421), 426 (also CS 422), 428, 431 or 433, 432 or 434, 437, 441, 442, 450, 451, 452, 453, 454, 455, 471*, 472*, 481, 482, 483, 486.
 - xi. Physics courses that make significant use of advanced mathematics. Eligible courses are PHYS 314, 316, 318, 323, 327, 341, 443, 444, 445, 451, 454, 455, 457, 480, 481. Students graduating in May 2009 or earlier may also use PHYS 317, 456.
 - f. **Concentration in Operations Research:** Five additional courses from (xii) and (xiii) below, of which at least one is from (xii) and three are from (xiii).
 - xii. Mathematics courses numbered 300 or above.
 - xiii. Courses in operations research in which the primary focus involves mathematical techniques. Eligible courses are OR&IE 320, 321, 360, 361, 431, 432, 434, 435, 436, 451, 462, 464, 473, 483, 573.
 - g. **Concentration in Statistics:** Five additional courses from (xiv), (xv), and (xvi) below, which include both from (xv) and at least two from (xvi). MATH 171 is recommended as an additional course, not counting toward the requirements. It should be taken, or audited, before or simultaneously with MATH 471.
 - xiv. Mathematics courses numbered 300 or above.
 - xv. MATH 471* and 472*.
 - xvi. Courses in other departments with significant content in probability and statistics, complementing (xiv). Eligible courses are BTRY 302, 482, 602, 603, 604; OR&IE 361, 462, 464, 468, 469, 473, 474, and 476 (counted as half a course here); ILRST 312, 410, and 411; and ECON 320.

Senior Thesis

A senior thesis can form a valuable part of a student's experience in the mathematics major. It is intended to allow students to conduct an in-depth investigation not possible in regular course work. The work should be independent and creative. It can involve the solution of a serious mathematics problem, or it can be an expository work, or variants of these. Both the process of doing independent research and mathematics exposition, as well as the finished written product and optional oral presentation, can have a lasting positive impact on a student's educational and professional future.

Double Majors

The Departments of Computer Science, Economics, and Physics all permit double majors with the mathematics major, allowing the courses listed under the corresponding concentrations above to be counted for both majors. Students should consult the appropriate departments for any further conditions.

Honors

The Department of Mathematics awards honors (cum laude) and high honors (magna cum laude and summa cum laude) to graduating mathematics majors who have demonstrated outstanding ability in the major program.

The awards are determined by the Mathematics Major Committee in the latter part of the semester before graduation. The committee will primarily be looking for excellent performance in mathematics courses, particularly in challenging courses at the 400 level or beyond. Participation in the honors seminar (MATH 401) for one semester, or independent study at a high performance level can also contribute to honors. Students interested in any level of honors should consult their major advisors or a member of the Mathematics Major Committee concerning suitable courses. Outstanding performance in graduate classes or an excellent senior thesis can contribute to high honors.

Teacher Education in Mathematics

For information on the various possibilities for students considering teaching mathematics in

*See the list of courses with overlapping content at the end of the introduction.

*See the list of courses with overlapping content at the end of the introduction.

schools, go to www.math.cornell.edu/Undergraduate/Teaching.

Studying Mathematics Outside the Major

The College of Arts and Sciences and the Department of Mathematics offer no minor or concentration in mathematics for students who are not math majors. However, some other scientific departments in the college offer, within their own majors, concentrations in mathematics and mathematics-related fields. A student interested in such a concentration should consult the director of undergraduate studies of his or her major department.

The College of Engineering offers a minor in applied mathematics that is open to any undergraduate in that college. The minor is sponsored jointly by the Department of Mathematics and the Department of Theoretical and Applied Mechanics, and is administered by the latter department. Engineering students interested in this minor should contact Professor Richard Rand of the Department of Theoretical and Applied Mechanics (255-7145; rhr2@cornell.edu).

The Department of Mathematics welcomes into its upper-level courses students from all colleges, schools, and departments at Cornell. In particular, undergraduates who wish to pursue serious study of mathematics, whether within or to complement their own major fields, are encouraged to consult with the department. The department's director of undergraduate studies and other faculty can provide assistance in selecting appropriate areas of study and individual courses.

Distribution Requirement

The mathematics courses that can be used to satisfy the Mathematics and Quantitative Reasoning part of the Arts College distribution requirements are indicated by the symbol "(MQR)".

Basic Sequences

Precalculus

Description	Courses
1. Algebra and trigonometry to prepare students for calculus	MATH 109* or EDUC 005*
2. Algebra, analytic geometry, elements of calculus	EDUC 115*, MATH 100*

*MATH 100, MATH 109, EDUC 005, and EDUC 115 do not carry credit for graduation in the Arts College.

Students who want a semester of calculus after EDUC 115 or MATH 100 may take MATH 106 or 111. Noncalculus alternatives are MATH 105 or 171.

Calculus

Description	Mathematics Courses
1. Standard three-semester sequence for students who do not expect to take advanced courses in mathematics	111-112-213
2. Calculus for engineers (also taken by some physical science majors)	191-192-293-294

- Several sequences are possible for prospective mathematics majors and others who expect to take advanced courses in mathematics: 111-112-221-222, 111-112-221-222, 111-112-223-224 or some mix of these courses. Students may also take the engineering sequence 191-192-293-294. Students are encouraged to consult with their advisors.

MATH 191 may be substituted for 112. The two-year sequences include some linear algebra. Students who take the three-semester sequence 111-112-213 may learn some linear algebra by taking MATH 231.

Special-Purpose Sequences

Description	Mathematics Courses
1. Finite mathematics and calculus for life and social science majors	105-106
2. Other possible finite mathematics and calculus sequence	105-111
3. Calculus and statistics sequences	106-171 111-171

Students who want to take two semesters of calculus are advised to take the first two semesters of one of the three calculus sequences. Students with excellent performance in MATH 106 may follow that course with MATH 112 or 122. The courses in each of the calculus and statistics sequences may be taken in either order, since no calculus background is required for MATH 171. Each of the sequences listed here satisfies the mathematics requirement for most medical schools.

Switching between calculus sequences is often difficult, especially at the 200 level. Students should not attempt such a switch without consulting the director of undergraduate studies.

Courses with Overlapping Content

Because the department offers many courses with overlapping content, students must choose their courses carefully to ensure that they will receive credit for each course they take. Listed below are groups of courses that have similar content. Students will receive credit for only one of the courses in each group.

- MATH 106, 111
- MATH 112, 122, 191
- MATH 192, 213, 222, 224
- MATH 221, 223, 231, 294
- MATH 332, 335, 336*
- MATH 431 and 433
- MATH 432 and 434
- MATH 471, ECON 319, BTRY 408, MATH 472, ECON 319, BTRY 409

*Credit for both MATH 332 and MATH 336 will be granted only if both were taken during or before spring 2002.

Note: Courses with overlapping content are not necessarily equivalent courses. Students are encouraged to consult a mathematics faculty member when choosing between them.

Fees

In some courses there may be a small fee for photocopying materials to be handed out to students.

Summer Courses

A list of mathematics courses usually offered every summer can be found in the School of Continuing Education and Summer Sessions section of this catalog. Students interested in taking summer courses in mathematics should consult the Department of Mathematics web site (www.math.cornell.edu). A tentative summer listing may be available as early as October.

Undergraduate Course Offerings

Please visit www.math.cornell.edu for further information and up-to-the-minute corrections.

Foundation courses: 105, 106, 111, 112, 122, 191, 192, 213, 221, 222, 223, 224, 231, 293, 294
 Mathematics Education: 408, 451

History of Mathematics: 403

General and Liberal Arts Courses: 103, 134, 135, 171, 304, 401, 408

Analysis: 311, 321, 413, 414, 418

Algebra and Number Theory: 332, 336, 431, 432, 433, 434, 437

Combinatorics: 441, 442, 455

Geometry and Topology: 356, 450, 451, 452, 453, 454

Probability and Statistics: 171, 275, 471, 472

Mathematical Logic: 281, 384, 481, 482, 486

Applied Analysis and Differential Equations: 323, 362, 420, 422, 424, 425, 426, 428

MATH 005(0005) Academic Support for MATH 105

Fall. 1 transcript credit only; cannot be used toward graduation.
 Reviews material presented in MATH 105 lectures, provides problem-solving techniques and tips as well as prelim review. Provides further instruction for students who need reinforcement. Not a substitute for MATH 105 lectures or recitations.

MATH 006(0006) Academic Support for MATH 106

Spring. 1 transcript credit only; cannot be used toward graduation.
 Reviews material presented in MATH 106 lectures, provides problem-solving techniques and tips as well as prelim review. Provides further instruction for students who need reinforcement. Not a substitute for MATH 106 lectures or recitations.

MATH 011(0011) Academic Support for MATH 111

Fall, spring. 1 transcript credit only; cannot be used toward graduation.
 Reviews material presented in MATH 111 lectures, provides problem-solving techniques and tips as well as prelim review. Provides further instruction for students who need reinforcement. Not a substitute for MATH 111 lectures or recitations.

MATH 012(0012) Academic Support for MATH 112

Fall, spring. 1 transcript credit only; cannot be used toward graduation.
 Reviews material presented in MATH 112 lectures, provides problem-solving techniques and tips as well as prelim review. Provides further instruction for students who need reinforcement. Not a substitute for MATH 112 lectures or recitations.

MATH 100(1000) Calculus Preparation

Fall, spring. 2 transcript credits only; cannot be used toward graduation.

Introduces a wide variety of topics of algebra and trigonometry that have applications in various disciplines. Emphasis is on the development of linear, polynomial, rational, trigonometric, exponential, and logarithmic functions. Students will have a better understanding of the behavior of these functions in their application to calculus because of the strong emphasis on graphing. Application of these mathematical ideas is addressed in problem-solving activities.

MATH 103(1103) Mathematical Explorations (MQR)

Fall, spring, summer. 3 credits.

For students who wish to experience how mathematical ideas naturally evolve. The homework consists of the students actively investigating mathematical ideas. The course emphasizes ideas and imagination as opposed to techniques and calculations. Topics vary depending on the instructor and are announced (www.math.cornell.edu) several weeks before the semester begins. Some assessment is done through writing assignments.

MATH 105(1105) Finite Mathematics for the Life and Social Sciences (MQR)

Fall. 3 credits. Prerequisite: three years high school mathematics, including trigonometry and logarithms.

Introduction to linear algebra, probability, and Markov chains that develops the parts of the theory most relevant for applications. Specific topics include equations of lines, the method of least squares, solutions of linear systems, matrices; basic concepts of probability, permutations, combinations, binomial distribution, mean and variance, and the normal approximation to the binomial distribution. Examples from biology and the social sciences are used.

MATH 106(1106) Calculus for the Life and Social Sciences (MQR)*

Spring. 3 credits. Prerequisite: readiness for calculus, such as can be obtained from three years of high school mathematics (including trigonometry and logarithms) or from MATH 100, MATH 109, or EDUC 115. For students planning to take MATH 112, MATH 111 is recommended rather than 106.

Introduction to differential and integral calculus, partial derivatives, elementary differential equations. Examples from biology and the social sciences are used.

MATH 109(1109) Precalculus Mathematics

Summer. 3 transcript credits only; cannot be used toward graduation.

Designed to prepare students for MATH 111. Reviews algebra, trigonometry, logarithms, and exponentials.

MATH 111(1110) Calculus I (MQR)*

Fall, spring, summer. 4 credits. Prerequisite: MATH 109 or three years of high school mathematics, including trigonometry and logarithms.

Topics include functions and graphs, limits and continuity, differentiation and integration of algebraic, trigonometric, inverse trig, logarithmic, and exponential functions;

applications of differentiation, including graphing, max-min problems, tangent line approximation, implicit differentiation, and applications to the sciences; the mean value theorem, and antiderivatives, definite and indefinite integrals, the fundamental theorem of calculus, substitution in integration, the area under a curve. Graphing calculators are used, and their pitfalls are discussed, as applicable to the above topics. MATH 111 can serve as a one-semester introduction to calculus or as part of a two-semester sequence in which it is followed by MATH 112 or 122.

MATH 112(1120) Calculus II (MQR)*

Fall, spring. 4 credits. Prerequisite: MATH 111 with grade of C or better or excellent performance in MATH 106. Those who do well in MATH 111 and expect to major in mathematics or strongly mathematics-related field should take 122 instead of 112.

Focuses on integration: applications, including volumes and arc length; techniques of integration, approximate integration with error estimates, improper integrals, differential equations (separation of variables, initial conditions, systems, some applications). Also covers infinite sequences and series: definition and tests for convergence, power series, Taylor series with remainder, and parametric equations.

MATH 122(1220) Honors Calculus II (MQR)*

Fall. 4 credits. Prerequisite: one semester of calculus with high performance or permission of department. Students planning to continue with MATH 213 are advised to take 112 instead of this course.

Takes a more theoretical approach to calculus than MATH 112. Topics include differentiation and integration of elementary transcendental functions, techniques of integration, applications, polar coordinates, infinite series, and complex numbers, as well as an introduction to proving theorems.

MATH 134(1340) Mathematics and Politics (MQR)

Fall, spring. 4 credits.

We apply mathematical reasoning to some problems arising in the social sciences. We discuss game theory and its applications to political and historical conflicts. Power indices are introduced and used to analyze some political institutions. The problem of finding a fair election procedure to choose among three or more alternatives is analyzed.

MATH 135(1350) The Art of Secret Writing (MQR)

Fall, spring, summer. 3 credits. Prerequisite: three years high school mathematics.

Examines classical and modern methods of message encryption, decryption, and cryptanalysis. Mathematical tools are developed to describe these methods (modular arithmetic, probability, matrix arithmetic, number theory), and some of the fascinating history of the methods and people involved is presented.

MATH 160(1600) Totally Awesome Mathematics

Spring. 2 credits. Prerequisite: one semester calculus. (AP credit is sufficient.)

Mathematics is a broad and varied field that extends far beyond calculus and the high

school curriculum. This course will introduce exciting mathematical topics to stretch your imagination and give you a feel for the great variety of problems that mathematicians study. Each week a different lecturer will present a new topic and fun problems for discussion. Topics will vary from year to year, but may include the following: encryption and number theory, non-Euclidean geometry, knots and surfaces, combinatorics of polyhedra, the Heisenberg Uncertainty Principle and signal processing, unsolvable problems and noncomputable functions, card shuffling and probability, symmetry and solutions of polynomial equations.

MATH 171(1710) Statistical Theory and Application in the Real World (MQR)

Fall, spring, summer. 4 credits. Prerequisite: high school mathematics. No previous familiarity with computers presumed. No credit if taken after ECON 319, 320, or 321.

Introductory statistics course discussing techniques for analyzing data occurring in the real world and the mathematical and philosophical justification for these techniques. Topics include population and sample distributions, central limit theorem, statistical theories of point estimation, confidence intervals, testing hypotheses, the linear model, and the least squares estimator. The course concludes with a discussion of tests and estimates for regression and analysis of variance (if time permits). The computer is used to demonstrate some aspects of the theory, such as sampling distributions and the Central Limit Theorem. In the lab portion of the course, students learn and use computer-based methods for implementing the statistical methodology presented in the lectures.

MATH 191(1910) Calculus for Engineers (MQR)*

Fall, spring, summer. 4 credits. Prerequisite: three years high school mathematics including trigonometry and logarithms and at least one course in differential and integral calculus.

Essentially a second course in calculus. Topics include techniques of integration, finding areas and volumes by integration, exponential growth, partial fractions, infinite sequences and series, and power series.

MATH 192(1920) Multivariable Calculus for Engineers (MQR)*

Fall, spring, summer. 4 credits. Prerequisite: MATH 191.

Introduction to multivariable calculus. Topics include partial derivatives, double and triple integrals, line integrals, vector fields, Green's theorem, Stokes' theorem, and the divergence theorem.

MATH 213(2130) Calculus III (MQR)*

Fall, spring. 4 credits. Prerequisite: MATH 112, 122, or 191.

Designed for students who wish to master the basic techniques of multivariable calculus, but whose major will not require a substantial amount of mathematics. Topics include vectors and vector-valued functions; multivariable and vector calculus including multiple and line integrals; first- and second-order differential equations with applications; systems of differential equations; and elementary partial differential equations. The course may emphasize different topics in the syllabus in different semesters.

*See the list of courses with overlapping content at the end of the introduction.

*See the list of courses with overlapping content at the end of the introduction.

*See the list of courses with overlapping content at the end of the introduction.

MATH 221(2210) Linear Algebra (MQR)*

Fall, spring, 4 credits. Prerequisite: two semesters of calculus with high performance or permission of department. Recommended for students who plan to major in mathematics or a related field. For a more applied version of this course, see MATH 231.

Topics include vector algebra, linear transformations, matrices, determinants, orthogonality, eigenvalues, and eigenvectors. Applications are made to linear differential equations.

MATH 222(2220) Multivariable Calculus (MQR)*

Fall, spring, 4 credits. Prerequisite: MATH 221. Recommended for students who plan to major in mathematics or a related field. Differential and integral calculus of functions in several variables, line and surface integrals as well as the theorems of Green, Stokes, and Gauss.

MATH 223(2230) Theoretical Linear Algebra and Calculus (MQR)*

Fall, 4 credits. Prerequisite: two semesters of calculus with grade of A- or better, or permission of instructor. MATH 223-224 provides an integrated treatment of linear algebra and multivariable calculus designed for students who have been highly successful in their previous calculus courses. The material is presented at a higher theoretical level than in 221-222. Topics in 223 include vectors, matrices, and linear transformations; differential calculus of functions of several variables; inverse and implicit function theorems; quadratic forms, extrema, and manifolds; multiple and iterated integrals.

MATH 224(2240) Theoretical Linear Algebra and Calculus (MQR)*

Spring, 4 credits. Prerequisite: MATH 223. Topics include vector fields; line integrals; differential forms and exterior derivative; work, flux, and density forms; integration of forms over parametrized domains; and Green's, Stokes', and divergence theorems.

MATH 231(2310) Linear Algebra with Applications (MQR)*

Fall, spring, 3 credits. Prerequisite: MATH 111 or equivalent. Students who plan to major in mathematics should take MATH 221 or 294. Introduction to linear algebra for students who wish to focus on the practical applications of the subject. A wide range of applications are discussed and computer software may be used. The main topics are systems of linear equations, matrices, determinants, vector spaces, orthogonality, and eigenvalues. Typical applications are population models, input/output models, least squares, and difference equations.

MATH 275(2750) Living in a Random World (MQR)

Spring, 3 credits. Prerequisite: one semester of calculus. Some familiarity with integration and differentiation is useful, but the equivalent of a one-semester course in calculus is more than enough. Concentrates on applications of probability in the physical, biological, and social sciences, and to understanding the world around us

(e.g., games, lotteries, option pricing, and opinion polls).

MATH 281(2810) Deductive Logic (also PHIL 331(3310)) (MQR)

Spring, 4 credits. H. Hodes. For description, see PHIL 331.

MATH 293(2930) Differential Equations for Engineers (MQR)

Fall, spring, summer, 4 credits. Prerequisite: MATH 192. Taking MATH 293 and 294 simultaneously is not recommended.

Introduction to ordinary and partial differential equations. Topics include: first-order equations (separable, linear, homogeneous, exact); mathematical modeling (e.g., population growth, terminal velocity); qualitative methods (slope fields, phase plots, equilibria, and stability); numerical methods; second-order equations (method of undetermined coefficients, application to oscillations and resonance, boundary-value problems and eigenvalues); Fourier series; linear partial differential equations (heat flow, waves, the Laplace equation); and linear systems of ordinary differential equations.

MATH 294(2940) Linear Algebra for Engineers (MQR)*

Fall, spring, summer, 4 credits. Prerequisite: MATH 192. Taking MATH 293 and 294 simultaneously is not recommended. Linear algebra and its applications. Topics include matrices, determinants, vector spaces, eigenvalues and eigenvectors, orthogonality and inner product spaces; applications include brief introductions to difference equations, Markov chains, and systems of linear ordinary differential equations. May include computer use in solving problems.

MATH 304(3040) Prove It! (MQR)

Spring, 4 credits. Prerequisite: MATH 221, 223, 294, or permission of instructor. In mathematics, the methodology of proof provides a central tool for confirming the validity of mathematical assertions, functioning much as the experimental method does in the physical sciences. In this course, students learn various methods of mathematical proof, starting with basic techniques in propositional and predicate calculus and in set theory and combinatorics, and then moving to applications and illustrations of these via topics in one or more of the three main pillars of mathematics: algebra, analysis, and geometry. Since cogent communication of mathematical ideas is important in the presentation of proofs, the course emphasizes clear, concise exposition. This course is useful for all students who wish to improve their skills in mathematical proof and exposition, or who intend to study more advanced topics in mathematics.

MATH 311(3110) Introduction to Analysis (MQR)

Fall, spring, 4 credits. Prerequisites: MATH 221-222, 223-224, or 192 and 294. Provides a transition from calculus to real analysis. Topics include rigorous treatment of fundamental concepts in calculus: including limits and convergence of sequences and series, compact sets; continuity, uniform continuity and differentiability of functions. Emphasis is placed upon understanding and constructing mathematical proofs.

MATH 321(3210) Manifolds and Differential Forms (MQR)

Fall, 4 credits. Prerequisites: multivariable calculus and linear algebra (e.g., MATH 221-222, 223-224, or 192 and 294). A manifold is a type of subset of Euclidean space that has a well-defined tangent space at every point. Such a set is amenable to the methods of multivariable calculus. After a review of some relevant calculus, this course investigates manifolds and the structures that they are endowed with, such as tangent vectors, boundaries, orientations, and differential forms. The notion of a differential form encompasses such ideas as surface and volume forms, the work exerted by a force, the flow of a fluid, and the curvature of a surface, space, or hyperspace. The course re-examines the integral theorems of vector calculus (Green, Gauss, and Stokes) in the light of differential forms and apply them to problems in partial differential equations, topology, fluid mechanics, and electromagnetism.

MATH 323(3230) Introduction to Differential Equations (MQR)

Fall, 4 credits. Prerequisites: multivariable calculus and linear algebra (e.g., MATH 221-222, 223-224, or 192 and 294), or permission of instructor. Intended for students who want a brief one-semester introduction to the theory and techniques of both ordinary and partial differential equations. Topics for ordinary differential equations may include initial-value and two-point boundary value problems, the basic existence and uniqueness theorems, continuous dependence on data, stability of fix-points, numerical methods, special functions. Topics for partial differential equations may include the Poisson, heat and wave equations, boundary and initial-boundary value problems, maximum principles, continuous dependence on data, separation of variables, Fourier series, Green's functions, numerical methods, transform methods.

MATH 332(3320) Algebra and Number Theory (MQR)*

Fall, 4 credits. Prerequisite: MATH 221, 223, or 294. Covers various topics from number theory and modern algebra. Usually includes most of the following: primes and factorization, Diophantine equations, congruences, quadratic reciprocity, continued fractions, rings and fields, finite groups, and an introduction to the arithmetic of the Gaussian integers and quadratic fields. Motivation and examples for the concepts of abstract algebra are derived primarily from number theory and geometry.

MATH 336(3360) Applicable Algebra (MQR)*

Spring, 4 credits. Prerequisite: MATH 221, 223, 231, or 294. Introduction to the concepts and methods of abstract algebra and number theory that are of interest in applications. Covers the basic theory of groups, rings and fields and their applications to such areas as public-key cryptography, error-correcting codes, parallel computing, and experimental designs. Applications include the RSA cryptosystem and use of finite fields to construct error-correcting codes and Latin squares. Topics

*See the list of courses with overlapping content at the end of the introduction.

*See the list of courses with overlapping content at the end of the introduction.

*See the list of courses with overlapping content at the end of the introduction.

include elementary number theory, Euclidean algorithm, prime factorization, congruences, theorems of Fermat and Euler, elementary group theory, Chinese remainder theorem, factorization in the ring of polynomials, and classification of finite fields.

[MATH 356(3560) Groups and Geometry (MQR)

Spring. 4 credits. Prerequisite: MATH 221, 223, 231 or 294. Prior knowledge of group theory is not a prerequisite. Next offered 2008-2009.

A geometric introduction to the algebraic theory of groups through the study of symmetries of planar patterns and 3-dimensional regular polyhedra. Course also provides an introduction to abstract mathematical thinking and mathematical proofs.]

MATH 362(3620) Dynamic Models in Biology (also BIOEE 362[3620]) (MQR)

Spring. 4 credits. Prerequisite: two semesters of introductory biology (BIO G 101-102, 105-106, 107-108, 109-110, or equivalent) and completion of math requirements for biological sciences major or equivalent.

For description, see BIOEE 362.

MATH 384(3840) Foundations of Mathematics (also PHIL 330[3300]) (MQR)

Fall. 4 credits.

For description, see PHIL 330.

MATH 401(4010) Honors Seminar: Topics in Modern Mathematics (MQR)

Spring. 4 credits. Prerequisite: two mathematics courses numbered 300 or higher or permission of instructor.

Participatory seminar aimed primarily at introducing senior and junior mathematics majors to some of the challenging problems and areas of modern mathematics. Helps students develop research and expository skills in mathematics, which is important for careers in any field that makes significant use of the mathematical sciences (i.e., pure or applied mathematics, physical or biological sciences, business and industry, medicine). Content varies from year to year.

MATH 403(4030) History of Mathematics # (MQR)

Spring. 4 credits. Prerequisite: two mathematics courses above 300, or permission of instructor.

Survey of the development of mathematics from antiquity to the present, with an emphasis on the achievements, problems, and mathematical viewpoints of each historical period and the evolution of such basic concepts as number, geometry, construction, and proof. Readings from original sources in translation. Students are required to give oral and written reports.

[MATH 408(4080) Mathematics in Perspective (MQR)

Spring. 4 credits. Prerequisite: permission of instructor. Next offered 2008-2009.

Re-examines very basic mathematics from an advanced perspective, emphasizing the connections between branches and ties of current mathematical interest. Emphasis on communication of mathematics.]

MATH 413(4130) Honors Introduction to Analysis I (MQR)

Fall, spring. 4 credits. Prerequisite: high level of performance in MATH 221-222, 223-224, or 192 and 294 and familiarity with proofs. Students who do not intend to take MATH 414 are encouraged to take MATH 413 in spring.

Introduction to the rigorous theory underlying calculus, covering the real number system and functions of one variable. Based entirely on proofs. The student is expected to know how to read and, to some extent, construct proofs before taking this course. Topics typically include construction of the real number system, properties of the real number system, continuous functions, differential and integral calculus of functions of one variable, sequences and series of functions.

MATH 414(4140) Honors Introduction to Analysis II (MQR)

Spring. 4 credits. Prerequisite: MATH 413. Proof-based introduction to further topics in analysis. Topics may include the Lebesgue measure and integration, functions of several variables, differential calculus, implicit function theorem, infinite dimensional normed and metric spaces, Fourier series, ordinary differential equations.

MATH 418(4180) Introduction to the Theory of Functions of One Complex Variable (MQR)

Spring. 4 credits. Prerequisite: MATH 223-224, 311, or 413 or permission of instructor.

Theoretical and rigorous introduction to complex variable theory. Topics include complex numbers, differential and integral calculus for functions of a complex variable including Cauchy's theorem and the calculus of residues, elements of conformal mapping. Students interested in the applications of complex analysis should consider MATH 422.

MATH 420(4200) Differential Equations and Dynamical Systems (MQR)

Fall. 4 credits. Prerequisite: high level of performance in MATH 221-222, 223-224, 192 and 294, or permission of instructor.

Covers ordinary differential equations in one and higher dimensions: qualitative, analytic, and numerical methods. Emphasis is on differential equations as models and the implications of the theory for the behavior of the system being modeled and includes an introduction to bifurcations.

MATH 422(4220) Applied Complex Analysis (MQR)

Spring. 4 credits. Prerequisite: MATH 221-222, 223-224, 192 and 294, or 213 and 231.

Undergraduates who plan to attend graduate school should take MATH 418. Covers complex variables, Fourier transforms, Laplace transforms and applications to partial differential equations. Additional topics may include an introduction to generalized functions.

MATH 424(4240) Wavelets and Fourier Series (MQR)

Spring. 4 credits. Prerequisite: MATH 221-222, 223-224, 192 and 294, or permission of instructor.

Both Fourier series and wavelets provide methods to represent or approximate general functions in terms of simple building blocks. Such representations have important consequences, both for pure mathematics and for applications. Fourier series use *natural* sinusoidal building blocks and may be used to

help solve differential equations. Wavelets use *artificial* building blocks that have the advantage of localization in space. A full understanding of both topics requires a background involving Lebesgue integration theory and functional analysis. This course presents as much as possible on both topics without such formidable prerequisites. The emphasis is on clear statements of results and key ideas of proofs, working out examples, and applications. Related topics that may be included are Fourier transforms, Heisenberg uncertainty principle, Shannon sampling theorem, and Poisson summation formula.

MATH 425(4250) Numerical Analysis and Differential Equations (also CS 421[4210]) (MQR)

Fall. 4 credits. Prerequisites: MATH 221 or 294 or equivalent, one additional mathematics course numbered 300 or above, and knowledge of programming.

Introduction to the fundamentals of numerical analysis: error analysis, approximation, interpolation, numerical integration. In the second half of the course, the above are used to build approximate solvers for ordinary and partial differential equations. Strong emphasis is placed on understanding the advantages, disadvantages, and limits of applicability for all the covered techniques. Computer programming is required to test the theoretical concepts throughout the course. MATH 425 (CS 421) and MATH 426 (CS 422) provide a comprehensive introduction to numerical analysis; these classes can be taken independently from each other and in either order.

MATH 426(4260) Numerical Analysis: Linear and Nonlinear Problems (also CS 422[4220]) (MQR)

Spring. 4 credits. Prerequisites: MATH 221 or 294 or equivalent, one additional mathematics course numbered 300 or above, and knowledge of programming.

Introduction to the fundamentals of numerical linear algebra: direct and iterative methods for linear systems, eigenvalue problems, singular value decomposition. In the second half of the course, the above are used to build iterative methods for nonlinear systems and for multivariate optimization. Strong emphasis is placed on understanding the advantages, disadvantages, and limits of applicability for all the covered techniques. Computer programming is required to test the theoretical concepts throughout the course. MATH 425 (CS 421) and MATH 426 (CS 422) provide a comprehensive introduction to numerical analysis; these classes can be taken independently from each other and in either order.

MATH 428(4280) Introduction to Partial Differential Equations (MQR)

Spring. 4 credits. Prerequisite: MATH 221-222, 223-224, or 192 and 294, or permission of instructor.

Topics are selected from first-order quasilinear equations, classification of second-order equations, with emphasis on maximum principles, existence, uniqueness, stability, Fourier series methods, approximation methods.

MATH 431(4310) Linear Algebra (MQR)*

Fall. 4 credits. Prerequisite: MATH 221, 223, 231, or 294. Undergraduates who plan to attend graduate school in mathematics should take MATH 433-434.

*See the list of courses with overlapping content at the end of the introduction.

Introduction to linear algebra, including the study of vector spaces, linear transformations, matrices, and systems of linear equations. Additional topics are quadratic forms and inner product spaces, canonical forms for various classes of matrices and linear transformations.

MATH 432(4320) Introduction to Algebra (MQR)*

Spring. 4 credits. Prerequisite: MATH 332, 336, 431 or 433, or permission of instructor. Undergraduates who plan to attend graduate school in mathematics should take MATH 433–434.

Introduction to various topics in abstract algebra, including groups, rings, fields, factorization of polynomials and integers, congruences, and the structure of finitely generated abelian groups. Optional topics are modules over Euclidean domains and Sylow theorems.

MATH 433(4330) Honors Linear Algebra (MQR)*

Fall. 4 credits. Prerequisite: high level of performance in MATH 221, 223, 231, or 294.

Honors version of a course in advanced linear algebra, which treats the subject from an abstract and axiomatic viewpoint. Topics include vector spaces, linear transformations, polynomials, determinants, tensor and wedge products, canonical forms, inner product spaces, and bilinear forms. Emphasis is on understanding the theory of linear algebra; homework and exams include at least as many proofs as computational problems. For a less theoretical course that covers approximately the same subject matter, see MATH 431.

MATH 434(4340) Honors Introduction to Algebra (MQR)*

Spring. 4 credits. Prerequisite: MATH 332, 336, 431, or 433, or permission of instructor.

Honors version of a course in abstract algebra, which treats the subject from an abstract and axiomatic viewpoint, including universal mapping properties. Topics include groups, groups acting on sets, Sylow theorems; rings, factorization: Euclidean rings, principal ideal domains and unique factorization domains, the structure of finitely generated modules over a principal ideal domain, fields, and Galois theory. The course emphasizes understanding the theory with proofs in both homework and exams. An optional computational component using the computer language GAP is available. For a less theoretical course that covers similar subject matter, see MATH 432.

MATH 437(4370) Computational Algebra (MQR)

Spring. 4 credits. Prerequisite: linear algebra (MATH 294, or MATH 221, or MATH 431).

Introduction to Gröbner bases theory, which is the foundation of many algorithms in computational algebra. In this course, students learn how to compute a Gröbner basis for polynomials in many variables. Covers the following applications: solving systems of polynomial equations in many variables, solving diophantine equations in many variables, 3-colorable graphs, and integer programming. Such applications arise, for example, in computer science, engineering, economics, and physics.

MATH 441(4410) Introduction to Combinatorics I (MQR)

Fall. 4 credits. Prerequisite: MATH 221, 223, 231, or 294.

Combinatorics is the study of discrete structures that arise in a variety of areas, particularly in other areas of mathematics, computer science, and many areas of application. Central concerns are often to count objects having a particular property (e.g., trees) or to prove that certain structures exist (e.g., matchings of all vertices in a graph). The first semester of this sequence covers basic questions in graph theory, including extremal graph theory (how large must a graph be before one is guaranteed to have a certain subgraph) and Ramsey theory (which shows that large objects are forced to have structure). Variations on matching theory are discussed, including theorems of Dilworth, Hall, König, and Birkhoff, and an introduction to network flow theory. Methods of enumeration (inclusion/exclusion, Möbius inversion, and generating functions) are introduced and applied to the problems of counting permutations, partitions, and triangulations.

MATH 442(4420) Introduction to Combinatorics II (MQR)

Spring. 4 credits. Prerequisite: MATH 221, 223, 231, or 294.

Continuation of the first semester, although formally independent of the material covered there. The emphasis here is the study of certain combinatorial structures, such as Latin squares and combinatorial designs (which are of use in statistical experimental design), classical finite geometries and combinatorial geometries (also known as matroids, which arise in many areas from algebra and geometry through discrete optimization theory). There is an introduction to partially ordered sets and lattices, including general Möbius inversion and its application, as well as the Polya theory of counting in the presence of symmetries.

MATH 450(4500) Matrix Groups (MQR)

Fall. 4 credits. Prerequisite: MATH 221–222, 223–224, or 192 and 294.

An introduction to a topic that is central to mathematics and important in physics too, although usually taught only at the graduate level as in MATH 650, Lie Groups. The objects of study are certain classes of matrices, such as orthogonal, unitary, or symplectic matrices. These classes have both algebraic structure (groups) and geometric/topological structure (manifolds). Thus the course will be a mixture of algebra and geometry/topology, with a little analysis as well. Concrete examples will be emphasized, as is appropriate for an undergraduate introduction. Background not included in the official prerequisites will be developed as needed.

MATH 451(4510) Euclidean and Spherical Geometry (MQR)

Fall. 4 credits. Prerequisite: MATH 221, 223, 231, or 294, or permission of instructor.

Covers topics from Euclidean and spherical (non-Euclidean) geometry. Nonlecture, seminar-style course organized around student participation.

MATH 452(4520) Classical Geometries (MQR)

Spring. 4 credits. Prerequisite: MATH 221, 223, 231, or 294, or permission of instructor. Offered alternate years.

Introduction to hyperbolic and projective geometry—the classical geometries that developed as Euclidean geometry was better understood. For example, the historical problem of the independence of Euclid's fifth postulate is understood when the existence of the hyperbolic plane is realized. Straightedge (and compass) constructions and stereographic projection in Euclidean geometry can be understood within the structure of projective geometry. Topics in hyperbolic geometry include models of the hyperbolic plane and relations to spherical geometry. Topics in projective geometry include homogeneous coordinates and the classical theorems about conics and configurations of points and lines. Optional topics include principles of perspective drawing, finite projective planes, orthogonal Latin squares, and the cross ratio.

MATH 453(4530) Introduction to Topology (MQR)

Fall. 4 credits. Prerequisite: MATH 221, 223, 231, or 294, plus at least one mathematics course numbered 300 or above, or permission of instructor.

Topology may be described briefly as qualitative geometry. This course begins with basic point-set topology, including connectedness, compactness, and metric spaces. Later topics may include the classification of surfaces (such as the Klein bottle and Möbius band), elementary knot theory, or the fundamental group and covering spaces.

MATH 454(4540) Introduction to Differential Geometry (MQR)

Spring. 4 credits. Prerequisites: MATH 221–222, 223–224, or 293–294, plus at least one mathematics course numbered 300 or above. MATH 453 is not a prerequisite.

Differential geometry involves using calculus to study geometric concepts such as curvature and geodesics. This introductory course focuses on the differential geometry of curves and surfaces. It may also touch upon the higher-dimensional generalizations, Riemannian manifolds, which underlie the study of general relativity.

[MATH 455(4550) Applicable Geometry (MQR)

Spring. 4 credits. Prerequisite: good introduction to linear algebra (e.g., MATH 221, 223, 231, or 294) or permission of instructor. Does not assume students know the meaning of all words in the following description. Next offered 2008–2009.

Introduction to the theory of n-dimensional convex polytopes and polyhedra and some of its applications, with an in-depth treatment of the case of 3 dimensions.]

MATH 471(4710) Basic Probability (MQR)*

Fall. 4 credits. Prerequisites: one year of calculus. Recommended: some knowledge of multivariate calculus.

Introduction to probability theory, which prepares the student to take MATH 472. The course begins with basics: combinatorial probability, mean and variance, independence, conditional probability, and Bayes formula. Density and distribution functions and their properties are introduced. The law of large numbers and the central limit theorem are stated and their implications for statistics are discussed.

*See the list of courses with overlapping content at the end of the introduction.

*See the list of courses with overlapping content at the end of the introduction.

MATH 472(4720) Statistics (MQR)*

Spring. 4 credits. Prerequisites: MATH 471 and knowledge of linear algebra (e.g., MATH 221). Recommended: some knowledge of multivariable calculus. Statistics have proved to be an important research tool in nearly all of the physical, biological, and social sciences. This course serves as an introduction to statistics for students who already have some background in calculus, linear algebra, and probability theory. Topics include parameter estimation, hypothesis testing, and linear regression. The course emphasizes both the mathematical theory of statistics and techniques for data analysis that are useful in solving scientific problems.

[MATH 481(4810) Mathematical Logic (also PHIL 431(4310)) (MQR)

Spring. 4 credits. Prerequisites: MATH 222 or 223 and preferably some additional course involving proofs in mathematics, computer science, or philosophy. Next offered 2008–2009.

First course in mathematical logic: formal definitions of languages, truth, proofs and computability. Completeness, incompleteness and compactness theorems.]

MATH 482(4820) Topics in Logic (also PHIL 432(4320)) (MQR)

Fall. 4 credits.
For description, see PHIL 432.

MATH 486(4860) Applied Logic (also CS 486(4860)) (MQR)

Spring. 4 credits. Prerequisites: MATH 221–222, 223–224, or 192 and 294; CS 280 or equivalent (e.g., MATH 332, 336, 432, 434, or 481); and additional course in mathematics or theoretical computer science.

Covers propositional and predicate logic; compactness and completeness by tableaux, natural deduction, and resolution. Other possible topics include equational logic; Herbrand Universes and unification; rewrite rules and equational logic, Knuth-Bendix, method and the congruence-closure algorithm and lambda-calculus reduction strategies; topics in Prolog, LISP, ML, or Nuprl; and applications to expert systems and program verification.

MATH 490(4900) Supervised Reading and Research

Fall, spring. 1–6 credits.
Supervised reading and research by arrangement with individual professors. Not for material currently available in regularly scheduled courses.

Professional-Level and Mathematics Education Courses**MATH 505(5050) Educational Issues in Undergraduate Mathematics**

Spring. 4 credits. Prerequisite: graduate standing or permission of instructor. Examines various educational issues in undergraduate mathematics and the relationship of these issues to the mathematics itself. The precise choice of topics varies, but the intent is that a balance of different views be presented and discussed. There are extensive readings in the course and occasional guest lectures. Possible topics include: nature of proof and how and when to teach it, calculus “reform,” teaching mathematics to school teachers, using writing,

using history, alternative assessments, alternatives to lecturing, equity issues, effective uses of technology, what is mathematical understanding and how do we recognize it, what should every mathematics major know, and research in undergraduate mathematics.

[MATH 507(5070) Teaching Secondary Mathematics: Theory and Practices

Spring. 4 credits. Next offered 2008–2009. Explore foundations/connections among number, operations, measurement, proof, algebra, geometry, trigonometry, data analysis, probability. For seniors/grads planning to teach secondary mathematics or teach future teachers.]

MATH 508(5080) Mathematics for Secondary School Teachers

Fall, spring. 1–6 credits. Prerequisite: secondary school mathematics teachers or permission of instructor. Examination of the principles underlying the content of the secondary school mathematics curriculum, including connections with the history of mathematics and current mathematics research.

Graduate Courses

Many of our graduate courses are topics for which descriptions are not included here; however, during each pre-enrollment period a schedule of graduate courses to be offered the following semester is posted at www.math.cornell.edu/Courses/courses.html. This web site includes course descriptions that are often more detailed than those included here, as well as a means for interested students to participate in the process of selecting meeting times.

MATH 611(6110) Real Analysis

Fall. 4 credits.
MATH 611–612 are the core analysis courses in the mathematics graduate program. 611 covers measure and integration and functional analysis.

MATH 612(6120) Complex Analysis

Spring. 4 credits.
MATH 611–612 are the core analysis courses in the mathematics graduate program. 612 covers complex analysis, Fourier analysis, and distribution theory.

[MATH 613–614(6130–6140) Topics in Analysis

613, fall; 614, spring. 4 credits each. Next offered 2008–2009.]

MATH 615(6150) Mathematical Methods in Physics

Fall. 4 credits. Prerequisite: for undergraduates, permission of instructor. Intended for graduate students in physics or related fields. Recommended: a strong advanced calculus course and at least two years of general physics. Assumes knowledge of elements of finite dimensional vector space theory, complex variables, separation of variables in partial differential equations, and Fourier series. Designed to give a working knowledge of the principal mathematical methods used in advanced physics. Covers Hilbert space, generalized functions, Fourier transform, Sturm-Liouville problem in ODE, Green's functions, and asymptotic expansions.

MATH 617(6170) Dynamical Systems

Fall. 4 credits. Generally offered every two years.

Topics include existence and uniqueness theorems for ODEs; Poincaré-Bendixon theorem and global properties of two-dimensional flows; limit sets, nonwandering sets, chain recurrence, pseudo-orbits and structural stability; linearization at equilibrium points: stable manifold theorem and the Hartman-Grobman theorem; and generic properties: transversality theorem and the Kupka-Smale theorem. Examples include expanding maps and Anosov diffeomorphisms; hyperbolicity: the horseshoe and the Birkhoff-Smale theorem on transverse homoclinic orbits; rotation numbers; Herman's theorem; and characterization of structurally stable systems.

[MATH 618(6180) Smooth Ergodic Theory

Spring. 4 credits. Next offered 2008–2009. Topics include invariant measures; entropy; Hausdorff dimension and related concepts; hyperbolic invariant sets: stable manifolds, Markov partitions and symbolic dynamics; equilibrium measures of hyperbolic attractors; ergodic theorems; Pesin theory: stable manifolds of nonhyperbolic systems; Liapunov exponents; and relations between entropy, exponents, and dimensions.]

MATH 619–620(6190–6200) Partial Differential Equations

619, fall; 620, spring. 4 credits each semester.
Covers basic theory of partial differential equations.

MATH 621(6210) Measure Theory and Lebesgue Integration

Fall. 4 credits.
Covers measure theory, integration, and L_p spaces.

MATH 622(6220) Applied Functional Analysis

Spring. 4 credits. Not offered every year. Covers basic theory of Hilbert and Banach spaces and operations on them. Applications.

MATH 628(6280) Complex Dynamical Systems

Fall. 4 credits. Prerequisite: MATH 418. Various topics in the dynamics of analytic mappings in one complex variable, such as: Julia and Fatou sets, the Mandelbrot set, Mañé-Sad-Sullivan's theorem on structural stability. Also covers: local theory, including repulsive cycles and the Yoccoz inequality, parabolic points and Ecalle-Voronin invariants, Siegel disks and Yoccoz's proof of the Siegel Brjuno theorem; quasi-conformal mappings and surgery: Sullivan's theorem on non-wandering domains, polynomial-like mappings and renormalization, Shishikura's construction of Hermann rings; puzzles, tableaux and local connectivity problems; and Thurston's topological characterization of rational functions, the spider algorithm, and mating of polynomials.

MATH 631(6310) Algebra

Fall. 4 credits. Assumes familiarity with material of standard undergraduate course in abstract algebra. MATH 631–632 are the core algebra courses in the mathematics graduate program. 631 covers group theory, especially finite groups; rings and modules; ideal theory in commutative rings; arithmetic and factorization in principal

*See the list of courses with overlapping content at the end of the introduction.

ideal domains and unique factorization domains; introduction to field theory; tensor products and multilinear algebra. (Optional topic: introduction to affine algebraic geometry.)

MATH 632(6320) Algebra

Spring. 4 credits. Prerequisite: MATH 631. MATH 631–632 are the core algebra courses in the mathematics graduate program. 632 covers Galois theory, representation theory of finite groups, introduction to homological algebra. Familiarity with the material of a standard undergraduate course in abstract algebra will be assumed.

[MATH 633(6330) Noncommutative Algebra

Fall. 4 credits. Next offered 2008–2009. Covers Wedderburn structure theorem, Brauer group, and group cohomology.]

MATH 634(6340) Commutative Algebra

Spring. 4 credits. Covers Dedekind domains, primary decomposition, Hilbert basis theorem, and local rings.

[MATH 649(6490) Lie Algebras

Fall. 4 credits. Next offered 2008–2009. Topics include nilpotent, solvable and reductive Lie algebras; enveloping algebras; root systems; Coxeter groups; and classification of simple algebras.]

MATH 650(6500) Lie Groups

Fall. 4 credits. Topics include topological groups, Lie groups; relation between Lie groups and Lie algebras; exponential map, homogeneous manifolds; and invariant differential operators.

MATH 651(6510) Algebraic Topology

Spring. 4 credits. One of the core topology courses in the mathematics graduate program. An introductory study of certain geometric processes for associating algebraic objects such as groups to topological spaces. The most important of these are homology groups and homotopy groups, especially the first homotopy group or fundamental group, with the related notions of covering spaces and group actions. The development of homology theory focuses on verification of the Eilenberg-Steenrod axioms and on effective methods of calculation such as simplicial and cellular homology and Mayer-Vietoris sequences. If time permits, the cohomology ring of a space may be introduced.

MATH 652(6520) Differentiable Manifolds I

Fall. 4 credits. Prerequisites: advanced calculus, linear algebra (MATH 431), point-set topology (MATH 453).

One of the core topology courses in the mathematics graduate program. Introduction to geometry and topology from a differentiable viewpoint, suitable for beginning graduate students. The objects of study are manifolds and differentiable maps. The collection of all tangent vectors to a manifold forms the tangent bundle, and a section of the tangent bundle is a vector field. Alternatively, vector fields can be viewed as first-order differential operators. Students study flows of vector fields and prove the Frobenius integrability theorem. In the presence of a Riemannian metric, the notions of parallel transport, curvature, and geodesics are development. Students examine the tensor calculus and the exterior differential calculus

and prove Stokes' theorem. If time permits, de Rham cohomology, Morse theory, or other optional topics are introduced.

[MATH 653(6530) Differentiable Manifolds II

Spring. Prerequisites: MATH 652 or equivalent. Next offered 2008–2009. Advanced topics from differential geometry and differential topology selected by instructor. Examples of eligible topics include transversality, cobordism, Morse theory, classification of vector bundles and principal bundles, characteristic classes, microlocal analysis, conformal geometry, geometric analysis and partial differential equations, and Atiyah-Singer index theorem.]

MATH 661(6610) Geometric Topology

Fall. 4 credits. Introduction to some of the more geometric aspects of topology and its connections with group theory. Possible topics include surface theory, 3-manifolds, knot theory, geometric and combinatorial group theory, hyperbolic groups, and hyperbolic manifolds.

MATH 662(6620) Riemannian Geometry

Spring. 4 credits. Topics include linear connections, Riemannian metrics and parallel translation; covariant differentiation and curvature tensors; the exponential map, the Gauss Lemma and completeness of the metric; isometries and space forms, Jacobi fields and the theorem of Cartan-Hadamard; the first and second variation formulas; the index form of Morse and the theorem of Bonnet-Myers; the Rauch, Hessian, and Laplacian comparison theorems; the Morse index theorem; the conjugate and cut loci; and submanifolds and the Second Fundamental form.

MATH 671(6710) Probability Theory I

Fall. 4 credits. Prerequisite: knowledge of Lebesgue integration theory, at least on real line. (Students can learn this material by taking parts of MATH 413–414 or 621.) Conditional expectation, martingales, Brownian motion. Other topics such as random walks and ergodic theory, depending on time and interest of the students and the instructor.

MATH 672(6720) Probability Theory II

Spring. 4 credits. Prerequisite: MATH 671. Content will vary from year to year. Course may be taken more than once for credit. Previously, topics have been chosen from stochastic calculus, diffusion processes, martingale problems, weak convergence, and Markov processes in continuous time.

MATH 674(6740) Introduction to Mathematical Statistics

Spring. 4 credits. Prerequisites: MATH 671 (measure theoretic probability) and OR&IE 670, or permission of instructor.

Topics include an introduction to the theory of point estimation, hypothesis testing and confidence intervals, consistency, efficiency, and the method of maximum likelihood. Basic concepts of decision theory are discussed; the key role of the sufficiency principle is highlighted and applications are given for finding Bayesian, minimax, and unbiased optimal decisions. Modern computer-intensive methods like the bootstrap receive some attention, as do simulation methods involving Markov chains. The parallel development of some concepts of machine learning is exemplified by classification algorithms. An

optional section may include nonparametric curve estimation and elements of large sample asymptotics.

[MATH 675(6750) Statistical Theories Applicable to Genomics

Fall. 4 credits. Next offered 2008–2009. Focuses on statistical concepts useful in genomics (e.g., microarray data analysis) that involve a large number of populations. Discusses false discovery rate (FDR) of Benjamini and Hochberg, and Storey's papers relating to pFDR. Also discusses the Empirical Bayes approach, which could "borrow the strength" from other populations.]

MATH 681(6810) Logic

Spring. 4 credits. Covers basic topics in mathematical logic, including propositional and predicate calculus; formal number theory and recursive functions; completeness and incompleteness theorems, compactness and Skolem-Loewenheim theorems. Other topics as time permits.

MATH 711-712(7110-7120) Seminar in Analysis

711, fall; 712, spring. 4 credits.

MATH 713(7130) Functional Analysis

Spring. 4 credits. Covers topological vector spaces, Banach and Hilbert spaces, and Banach algebras. Additional topics selected by instructor.

[MATH 715(7150) Fourier Analysis

Spring. 4 credits. Next offered 2008–2009.]

MATH 717(7170) Applied Dynamical Systems (also T&AM 776(7760))

Spring. 4 credits. Recommended: T&AM 675, MATH 617, or equivalent. Topics include review of planar (single-degree-of-freedom) systems; local and global analysis; structural stability and bifurcations in planar systems; center manifolds and normal forms; the averaging theorem and perturbation methods; Melnikov's method; discrete dynamical systems, maps and difference equations, homoclinic and heteroclinic motions, the Smale Horseshoe and other complex invariant sets; global bifurcations, strange attractors, and chaos in free and forced oscillator equations; and applications to problems in solid and fluid mechanics.

MATH [731]-732([7310]-7320) Seminar in Algebra

731, fall; 732, spring. 4 credits each semester. 731 next offered 2008–2009.

MATH 735(7350) Topics in Algebra

Fall, spring. 4 credits. Selection of advanced topics from algebra, algebraic number theory, and algebraic geometry. Course content varies.

MATH 737(7370) Algebraic Number Theory

Fall. 4 credits.

MATH 739(7390) Topics in Algebra

Spring. 4 credits. Selection of advanced topics from algebra, algebraic number theory, and algebraic geometry. Content varies.

MATH 740(7400) Homological Algebra

Fall. 4 credits.

MATH [751]-752([7510]-7520) Bernstein Seminar in Topology

751, fall; 752, spring. 4 credits each semester. 751 next offered 2008–2009.

[MATH 753(7530) Algebraic Topology II

Fall. 4 credits. Next offered 2008-2009. Continuation of 651. The standard topics most years are cohomology, cup products, Poincaré duality, and homotopy groups. Other possible topics include fiber bundles, fibrations, vector bundles, and characteristic classes. May sometimes be taught from a differential forms viewpoint.]

MATH [755]-756([7550]-7560) Topology and Geometric Group Theory Seminar

755, fall; 756, spring. 4 credits each semester. 755 next offered 2008-2009.

MATH 757-758(7570-7580) Topics in Topology

757, fall; 758, spring. 4 credits each semester.

Selection of advanced topics from modern algebraic, differential, and geometric topology. Content varies.

MATH 761-762(7610-7620) Seminar in Geometry

761, fall; 762, spring. 4 credits each semester. Either 761 or 762 generally offered every year.

MATH 767(7670) Algebraic Geometry

Fall. 4 credits.

MATH 771-772(7710-7720) Seminar in Probability and Statistics

771, fall; 772, spring. 4 credits each semester.

MATH 774(7740) Statistical Learning Theory

Fall. 4 credits. Prerequisites: basic mathematical statistics (MATH 674 or equivalent) and measure theoretic probability (MATH 671).

The course aims to present the developing interface between machine learning theory and statistics. Topics are classification and pattern recognition, support vector machines, neural networks, tree methods, and boosting.

MATH 777-778(7770-7780) Stochastic Processes

777, fall; 778, spring. 4 credits each semester.

MATH 781-782(7810-7820) Seminar in Logic

781, fall; 782, spring. 4 credits each semester.

MATH 783(7830) Model Theory

Spring. 4 credits.

Introduction model theory at the level of the books by Hodges or Chang and Keisler.

MATH 784(7840) Recursion Theory

Fall. 4 credits.

Covers theory of effectively computable functions; classification of recursively enumerable sets; degrees of recursive unsolvability; applications to logic; hierarchies; recursive functions of ordinals and higher type objects; generalized recursion theory.

[MATH 787(7870) Set Theory

Fall. 4 credits. Next offered 2008-2009.

First course in axiomatic set theory at the level of the book by Kunen.]

MATH 788(7880) Topics in Applied Logic

Fall. 4 credits.

Covers applications of the results and methods of mathematical logic to other areas of mathematics and science. Topics vary each year; some recent examples are: automatic

theorem proving, formal semantics of programming and specification languages, linear logic, constructivism (intuitionism), nonstandard analysis, and automata theory. This year the course will cover finite model theory.

MATH 790(7900) Supervised Reading and Research

Fall, spring. 1-6 credits.

*See the list of courses with overlapping content at the end of the introduction.

MEDIEVAL STUDIES

A. S. Galloway, director; F. M. Ahl, R. Brann, C. Brittain, E. W. Browne, O. Falk, A. B. Groos, K. Haines-Eitzen, W. E. Harbert, T. D. Hill, T. J. Hinrichs, C. Howie, P. R. Hyams, W. J. Kennedy, S. MacDonald, S. Manning, M. Migiel, J. M. Najemy, J. A. Peraino, S. Pinet, D. S. Powers, M. Raskolnikov, E. Rebillard, C. Robinson, C. Ruff, S. Senderovich, S. M. Toorawa, D. X. Warner, M. L. Weiss, S. Zacher. Emeritus: A. M. Colby-Hall, J. J. John, C. V. Kaske, P. I. Kuniholm, W. Wetherbee.

Undergraduate Study in Medieval Studies

Course work in medieval studies enhances the student's enjoyment and understanding of the artistic and material relics of the Middle Ages: Gregorian chant, illuminated manuscripts and stained glass windows, Gothic cathedrals, Crusader castles, and picturesque towns cramped within ancient walls. Students discover the serious realities involved in, and shaped by, Arthurian tales of brave knights and fair ladies, dungeons, dragons, and other marvels. Students can analyze and appreciate the horrors of the Black Death, triumphs in courtly love and pitched battle, swords and scimitars, caliphs and popes, fear of demons and djinns, and the reassuring presence of angels. Students can study all this and more very well in English, but see below for how to acquire the medieval languages that so enhance the experience.

The period saw many of the foundational choices that have, for good and ill, made the world what it is today. Many of our current challenges in the fields of law, human rights, attitudes toward power, authority, gender relations, and sexual mores derive from the ways in which these and other questions were formulated a millennium ago. It actually makes good sense to think out your positions on today's world through study of the less complicated but intriguing medieval West, with whose successes and failures we must still contend. Serious investigation of exotic materials marks this concentration out as a unique addition to Cornell's training. The Medieval Studies Program houses a lively undergraduate association, *Quodlibet*, that arranges frequent lectures on medieval topics and an annual celebratory Reading of prose and poetry in many medieval languages. The graduate students host an annual student colloquium, which is entirely student-run and includes grad medievalists from all over campus.

The "middle" in "Middle Ages" comes from its position between antiquity and the "modern" period, in a schema created for European and Western conditions. Our concentration,

however, is more properly inclusive and treats a time span from roughly the fifth century into the 16th and ranges from Western Europe and the Mediterranean to China and Japan. To discover the vibrant state of medieval studies today, students should look at the extraordinary range of scholarly, but accessible, web sites that have sprung up all over the Internet. (They can start from *Cornucopia* noted below.) Cornell possesses a wealth of resources to introduce students to every corner of the field.

Many students feel bound to choose their majors with an eye to future careers and earning potential. While this concentration can add strong interdisciplinary breadth to many majors (e.g., classics, all modern languages, history, music, philosophy), and is excellent preparation for graduate study in a medieval field, science majors thrive in it too. The program provides encouragement, guidance, and an avenue for intelligent appreciation of an important part of all our pasts.

Undergraduates who wish to undertake an independent major or concentration in medieval studies should consult the director of the program, 259 Goldwin Smith Hall, 255-8545, medievalst@cornell.edu.

The undergraduate concentration in medieval studies shall consist of five medieval courses (at the 200 level or above) in at least two different disciplines, of which up to two may also count toward the major.

Medieval Languages

Medieval texts (like all others) become most lively and informative when read in the original, and Cornell fortunately offers many courses for students interested in acquiring the relevant skills: Medieval Latin, Old English, Middle English, Gothic, Old Saxon, Old High German, Middle High German, Old Norse-Icelandic, Old Irish, Middle Welsh, Old Occitan (Provençal), Old French, Medieval Spanish, Medieval Italian, Old Russian, Old Church Slavonic, Classical Arabic, Medieval Hebrew, Classical Chinese, and Classical Japanese.

Some medieval languages require study of a modern language (e.g., French for Old Occitan and Old French) or a classical language (Classical Latin for Medieval Latin) as background. Students interested in a concentration in Medieval Studies should begin the study of a medieval language as early as possible, so that they may be able to study texts in the original before they graduate. Students are advised to consult the sponsoring departments for information about the prerequisites for various medieval languages.

Graduate Study

The Medieval Studies Program offers both an interdisciplinary and a literary comparative Ph. D. in medieval studies. Disciplinary fields of concentration offered within the Field of medieval studies are medieval archaeology, medieval history, medieval history of art, medieval literature, medieval music, medieval philology and linguistics, and medieval philosophy. Information about the graduate program in medieval studies is available from the field coordinator (medievalst@cornell.edu), and at *Cornucopia*, the program's web site (www.arts.cornell.edu/medieval).

Medieval Studies Courses: Graduate and Undergraduate

Courses in various aspects of medieval studies are offered every year in several cooperating departments, including Art History, Asian Studies, Classics, Comparative Literature, English, German Studies, History, Linguistics, Music, Near Eastern Studies, Philosophy, Romance Studies, Russian Literature, and by the Society for the Humanities. For descriptions, please see the home department. The current year's offerings are:

ART H 250(2350) Introduction to Art History: Islamic Art and Culture (also NES 247[2647])
Fall. 4 credits. C. Robinson.

ART H 255(2355) Introduction to Art History: Medieval Art and Culture
Spring. 4 credits. C. Robinson.

ART H 415/615(4315/6315) Visualizing the Sacred in Late Medieval Iberia: Images and Image Devotion in a Multi-Confessional Landscape (also NES 423/623[4523/6523])
Fall. 4 credits. C. Robinson.

CHLIT 213-214(2213-2214) Introduction to Classical Chinese
213, fall; 214, spring. 3 credits each semester. D. X. Warner (fall); staff (spring).

CHLIT 300(3300) Reading from the Early Masters
Spring. 4 credits. R. McNeal.

CHLIT 418(4418) Marvels and Wonders: Medieval Chinese Narrative Tales
Fall. 4 credits. D. X. Warner.

CLASS 330(3750) Introduction to Dendrochronology (also ART H 309[3250], ARKEO 309[3090])
Fall. 4 credits. S. Manning.

CLASS 446(4646) Platonism (also PHIL 413[4130])
Spring. 4 credits. C. Brittain.

CLASS 642(7742) Research Methods in Archaeology
Spring. 4 credits. S. Manning.

ENGL 213(2130) Cultures of the Middle Ages
Spring. 4 credits. A. Galloway.

ENGL 308(3080) Icelandic Family Sagas
Fall. 4 credits. T. Hill.

ENGL 311/611(3110/6110) Old English
Fall. 4 credits. S. Zacher.

ENGL 319(3190) Chaucer
Fall. 4 credits. A. Galloway.

ENGL 321(3210) Spencer and Malory
Fall. 4 credits. C. Kaske.

ENGL 457/650(4570/6500) Constructing the Book, Reconstructing the Text
Fall. 4 credits. C. Ruff.

ENGL 619(6190) Chaucer and Gower
Fall. 4 credits. A. Galloway.

FREN 221(2210) Introduction to Textual Analysis
Fall. 3 credits. C. Howie.

FREN 353(3530) Monsters A-X (Aristotle-X-files) (also COM L 353[3530], FGSS 353[3530])
Fall. 4 credits. K. Long.

FREN 404(4040) Troubadours and Heretics (also COM L 404[4040])
Fall. 4 credits. R. Klein.

FREN 442(4420) Sex in French
Spring. 4 credits. C. Howie.

HIST 190(1900) East Asia to 1800
Spring. 4 credits. T. J. Hinrichs.

HIST 262(2620) The Middle Ages: Introduction and Sampler
Spring. 4 credits. P. Hyams.

HIST 369(3690) The History of Florence in the Time of the Republic 1250-1530 (also ITAL 369[3690])
Spring. 4 credits. J. Najemy.

HIST 408(4080) Feudalism and Chivalry: Secular Culture in Medieval France, 1000-1300
Fall. 4 credits. P. Hyams.

HIST 468(4680) Love and Sex in the Italian Renaissance (also ITAL 468[4680])
Spring. 4 credits. J. Najemy.

HIST 491/692(4910/6920) Approaches to Medieval Violence
Fall. 4 credits. O. Falk.

HIST 496(4961) Chinese Medicine and Healing
Spring. 4 credits. T. J. Hinrichs.

HIST 664(6641) Medieval Poverty
Fall. 4 credits. P. Hyams.

ITAL 445/645(4450/6450) Decameron
Fall. 4 credits. M. Migiel.

JPLIT 406(4406) Introduction to Classical Japanese
Fall. 4 credits. K. Selden.

JPLIT 408(4408) Readings in Classical Japanese
Spring. 4 credits. K. Selden.

LATIN 205(2201) Latin Prose
Fall. 3 credits. C. Brittain.

LING 217(2217) History of English Language to 1300
Fall. 4 credits. W. Harbert.

LING 238(2238) Introduction to Welsh
Fall. 3 credits. W. Harbert.

LING 308(3308) Readings in Celtic Languages
Fall. 2 credits. W. Harbert.

LING 315-316(3315-3316) Old Norse
315, fall; 316, spring. 4 credits each semester. K. Jonatansdottir.

LING 649(6649) Structure of Old English (also ENGL 617[6170])
Fall. 4 credits. W. Harbert.

LING 661(6661) Old Church Slavonic (also RUSSA 601[6601])
Fall. 4 credits. W. Browne.

LING 662(6662) Old Russian Texts (also RUSSA 602[6602])
Spring. 4 credits. W. Browne.

LING 671(6671) Comparative Slavic Linguistics (also RUSSA 651[6651])
Fall. 4 credits. W. Browne.

MEDVL 413/613(4103/6103) Survey of Medieval Latin Literature (also LATIN 413/613[4213/7213])
Fall. 4 credits. C. Ruff.

The Survey of Medieval Latin introduces students to the special linguistic features of post-classical Latin and the characteristic genres and modes of discourse of learned culture in the Middle Ages. Readings will focus on three or four periods or milieux and will include examples of scriptural, exegetical, encyclopedic, narrative, epistolary, hagiographical, and homiletic texts. Before enrolling in this course, students should have significant reading experience and a solid grasp of Latin grammar and should be prepared to undertake the study of advanced topics in Latin syntax, lexicon, and prosody. We will introduce the scansion of both quantitative and accentual verse for those who have no prior experience with Latin versification. Students will have the opportunity to workshop with the class Latin texts relevant to their own research.

[MEDVL 777(7770) Medieval Studies Proseminar
4 credits. Next offered 2008-2009.]

MEDVL 801(8010) Directed Study—Individual
Fall and spring. Up to 4 credits. Staff.

MEDVL 802(8020) Directed Study—Group
Fall and spring. Up to 4 credits. Staff.

NES 133-134(1211-1212) Introduction to Qur'anic and Classical Arabic (also RELST 133-134[1211-1212])
133, fall; 134, spring. 4 credits each semester. M. Younes (fall); staff (spring).

NES 251(2651) Holy War, Crusade, and Jihad in Judaism, Christianity, and Islam (also COM L 231[2310], HIST 269[2691], JWST/RELST 251[2651])
Fall. 3 credits. R. Brann.

NES 256(2556) Introduction to the Qur'an (also RELST 256[2556])
Fall. 3 credits. S. Toorawa.

NES 440/640(4640/6640) Maimonides and Ibn Rushd (also SPAN 438[4380])
Spring. 4 credits. R. Brann.

NES 460(4560) Theory and Method in Near Eastern Studies
Spring. 4 credits. K. Haines-Eitzen.

NES 620(6112) Readings in Medieval Hebrew Poetry and Prose (also JWST 620[6112])
Fall. 4 credits. R. Brann.

PHIL 315(3150) Medieval Philosophy
Fall. 4 credits. S. MacDonald.

PHIL 410(4100) Latin Philosophical Texts (also LATIN 612[7212], RELST 410[4100])
Fall and spring. Variable credit. S. MacDonald and C. Brittain.

PHIL 612(6120) Seminar in Medieval Philosophy
Spring. 4 credits. S. MacDonald.

S HUM 404(4040) The Task of the Cleric (also SPAN 404[4040])
Fall. 4 credits. S. Pinet.

SPAN 217(2170) Early Hispanic Modernities: Readings in Medieval and Early Modern Iberian and Spanish-American Literatures (also LAT A 217[2170])
Fall. 4 credits. M. Spofford.

MODERN EUROPEAN STUDIES CONCENTRATION

Sydney Van Morgan, coordinator

Students from any college may choose an undergraduate concentration in modern European studies to complement any major. The purpose of the concentration is to provide a coherent structure for students with an interest in interdisciplinary study in the field of European studies.

The concentration has three tracks: European politics, economics, and society; modern European history; and European culture. The requirements for the concentration are:

1. Competence in at least one modern European language, Romance, Germanic, or Slavic (i.e., completion of a 300-level course or equivalent with a grade of at least B-, or demonstration of an advanced level of competence in an oral proficiency interview test where available).

2. Completion of **two out of four** interdisciplinary core courses:

ANTHR 450(4852) Europe: Post-Socialist Capitalism

Fall, 4 credits. J. Rigi.

GOVT/SOC 341(3410) Modern European Society and Politics

Spring, 4 credits. S. Van Morgan.

COM L 364(3640) The European Novel

Spring, 4 credits. A. François.

NES 438(4738) Imagining the Mediterranean

Fall, 4 credits. G. Holst-Warhaft.

Under certain conditions, students may be permitted to substitute other courses for those listed above.

3. Completion of one course in modern (post-1789) European history.
4. Two additional courses in any of the three areas, which may include a senior seminar (400 level).
 - a. Courses in European and comparative politics, anthropology, sociology, feminist, gender and sexuality (FGSS) studies, and related courses in the School of Hotel Administration, the College of Agriculture and Life Sciences, and the School of Industrial and Labor Relations.
 - b. Courses in modern European history (post-1789).
 - c. Courses in (post-1789) English and European literatures, comparative literature, semiotics, FGSS, fine arts, architecture, music, philosophy, and film and theatre arts.

Only two courses may be used to satisfy requirements for both the major and the concentration. Courses satisfying the breadth and distribution requirements in the College of Arts and Sciences, however, may be applied to the concentration. Students interested in completing a research project under the European Summer Research Program may apply for the Wood Fellowship in their junior year. All concentrators are encouraged to participate in the Language House Program, the Model European Union program (GOVT 431/432), and study abroad. Courses taken abroad may be applied to the concentration if they are approved for Cornell credit.

Departmental advisors include D. Greenwood (anthropology); C. Otto (architecture); S. Christopherson (CRP); G. Fields (economics); D. Schwarz (English); A. Schwarz (German studies); S. Tarrow (government/sociology); J. Weiss (history); C. Rosen (linguistics); N. Zaslaw (music); T. Campbell (romance studies); G. Shapiro (Russian literature); D. Bathrick (theatre, film, dance); L. Abel (classics); D. Brown (developmental sociology).

For a complete list of relevant courses and seminars, and any further information, contact Sydney Van Morgan, coordinator of the Modern European Studies Concentration, at the Institute for European Studies, 120 Uris Hall, 255-7592, sydney.morgan@cornell.edu, www.einaudi.cornell.edu/Europe.

MUSIC

R. Harris-Warrick, chair; R. Sierra, director of undergraduate studies (338 Lincoln Hall, 255-3663); J. Peraino, director of graduate studies (116 Lincoln Hall, 255-5059); X. Bjerken, B. Boettcher, K. Ernste, A. Groos, J. Haines-Eitzen, M. Hatch, C. Johnston Turner, J. Kellock, C. Kim, J. Lin, P. Merrill, S. Pond, A. Richards, S. Stucky, K. Taavola, S. Tucker, J. Webster, M. Yampolsky, D. Yearsley, N. Zaslaw. Emeritus: M. Bilson, J. Hsu, K. Husa, S. Monosoff, R. Palmer, D. Rosen, T. Sokol, M. Stith

Office: 255-4097

Web site: www.arts.cornell.edu/music/

Musical Performance and Concerts

Musical performance is an integral part of Cornell's cultural life and an essential part of its undergraduate academic programs in music. The department encourages music making through its offerings in individual instruction and through musical organizations and ensembles that are directed and trained by members of the faculty. Students from all colleges and departments of the university join with music majors in all of these ensembles:

Vocal ensembles

Chamber Singers
Chorale
Chorus
Glee Club
Sage Chapel Choir
World Music Choir

Instrumental ensembles

Chamber Music Ensembles
Chamber Orchestra
Symphony Orchestra
Jazz Ensembles
Jazz Combos
Chamber Winds
Wind Ensemble
Wind Symphony
Gamelan
Middle Eastern Music Ensemble
World Drum and Dance Ensemble
Steel Band

Information about requirements, rehearsal hours, and conditions for academic credit can be found in the following listings for the Department of Music. Announcements of auditions are posted during registration each fall semester and, where appropriate, each spring semester as well.

The university is also home to many student-run musical organizations not affiliated with the Department of Music, including the Big Red Marching Band and Big Red Pep Band, the Cornell Savoyards, and several a cappella groups. Information is available directly from each group.

The Department of Music and the Faculty Committee on Music sponsor more than 100 formal and informal concerts each year by Cornell's ensembles, faculty, and students and by distinguished visiting artists. The great majority of these concerts are free and open to the public. Lectures and concerts are listed at www.arts.cornell.edu/music/. Additional information is available through the events office (255-4760).

Nonmajors

In addition to its performing, instructional, and concert activities, the department offers numerous courses for nonmajors, many of which carry no prerequisites and presuppose no previous formal training in music. Consult the following course listings, and for further information consult Professor R. Sierra, director of undergraduate studies (255-3663), or the department office, 101 Lincoln Hall (255-4097).

The Major

The major carries the study of music to an advanced level through the integration of performance, music theory, and music history. It is designed to accommodate both students who are oriented toward eventual graduate or professional work in music and those who wish to take a more general approach, often in conjunction with a major in another department.

Students contemplating a major in music should arrange for placement examinations and advising in the department as early as possible, preferably during the freshman orientation period. Information is available from the director of undergraduate studies. Prerequisites for admission to the major are completion of MUSIC 152 and 154, preferably by the end of the freshman year (the sophomore year is possible, but reduces flexibility), with an overall grade of B- or better in each course. In consultation with the director of undergraduate studies, students are expected to have chosen an advisor from among the department faculty before acceptance into the major; admission to the major is decided by the faculty as a whole. Students majoring in music then design their course of study with their advisor.

Music majors must complete the Core Curriculum plus at least two electives. The Core Curriculum serves as the basis for focus in specific areas, such as composition, performance, jazz studies, vernacular music, Western art music, or Asian music. Students may, however, choose electives that reflect a more broadly based study. Those intending to pursue graduate study or professional work in music are advised to take further courses in addition to the two required electives.

The Core Curriculum consists of courses:

1. in music theory: MUSIC 251, 252, 253, 254
2. in music history: MUSIC 207, 208, 300, 400

- in performance: four semesters of participation in a musical organization or ensemble sponsored by the department of music (MUSIC 331 through 346 and 421 through 448)

Electives: at least 8 credits from the following:

- in music theory: courses among the theory listings at the 300 level or above
- in music history: MUSIC 374 through 399, 401 and above.
- in performance: MUSIC 322 or 323

Honors. The honors program in music is intended to provide special distinction for the department's ablest undergraduate majors. Qualified students are invited to become candidates by the faculty early in the second semester of their junior year. As soon as possible thereafter, the student forms a committee of three or more faculty members to guide and evaluate the honors work. In their senior year, candidates enroll in MUSIC 401-402 with the chair of the honors committee as instructor. Candidates are encouraged to formulate programs that allow them to demonstrate their musical and scholarly abilities, culminating in an honors thesis, composition, or recital, to be presented not later than April 1 of the senior year. A comprehensive examination administered by the candidate's committee is held not later than April 20. The level of honors conferred is based primarily on the candidate's performance in the honors program, and secondarily on the candidate's overall record in departmental courses and activities.

Computing in the Arts Undergraduate Concentration

A concentration in Computing in the Arts with an emphasis on music is available both to music majors and to students majoring in other subjects. For more information, contact the department office, 101 Lincoln Hall (255-4097).

Distribution Requirement

College of Arts and Sciences students may apply either one or two music department courses toward the distribution requirement in Literature and the Arts (LA) or Cultural Analysis (CA), as noted. Neither first-year seminars nor advanced placement credit count toward this requirement.

If one music course is counted for distribution, it must carry at least 3 credits, and it may not be in musical performance (MUSIC 321, 322, or 323) or in organizations and ensembles (MUSIC 331 through 348 and 421 through 448). Any two of the 2-credit courses MUSIC 361, 362, 363 count as one course for this purpose.

If two music courses are counted for distribution in LA, they must total at least 6 credits, and at least one of the courses must be academic (as described in the preceding paragraph), not performance-oriented. The second "course," however, may comprise either up to 4 credits earned in performance (MUSIC 321, 322, or 323) or up to 4 credits earned in organizations and ensembles (MUSIC 331 through 348 and 421 through 448), but not both.

Facilities

Music Library. The Sidney Cox Library of Music and Dance in Lincoln Hall has an excellent collection containing approximately 143,000 periodicals, books, scores, and parts; 64,000 sound and video recordings; and 7,800 microforms, including early printed and manuscript sources. Its depth and breadth serve the needs of a wide variety of users on the campus and its computer lab (designed specifically for music uses), listening, and video viewing facilities are open to all members of the Cornell community. Highlights of the research collection include early opera libretti and scores, 18th-century keyboard and chamber music, 17th- and 18th-century books on music, and an archival collection of American popular song from 1850 to 1950. In addition, the Carl A. Kroch Library houses, in the Division of Rare and Manuscript Collections, a collection of musical manuscripts and early printed books on music.

Concert Halls. The Department of Music sponsors more than 100 concerts annually. Cornell's principal concert halls are Bailey Hall Auditorium (about 1,400 seats), Sage Chapel (about 800), and Barnes Hall Auditorium (about 280).

Rehearsal Spaces and Practice Rooms. Departmental ensembles rehearse primarily in Lincoln Hall, Barnes Hall, and Sage Chapel. Twenty-six studios in Lincoln Hall are available for individual practice by pianists, vocalists, and instrumentalists who are members of the Cornell community. Of these, eight have grand pianos, six have upright pianos, and two have percussion instruments.

To guarantee practice times, a practice room must be reserved. Practice-room fees for a room with a grand piano are \$100 per semester for up to 12 hours weekly. A \$20 cash deposit must be made for a key to the grand piano practice rooms, which is refunded upon return of the key. Fees for a room with either an upright piano or percussion instruments are \$75 per semester for up to 12 hours weekly, and fees for a room without a piano are \$35 per semester for up to 12 hours weekly. The fee for use of the pipe organs is \$60 per semester for up to 12 hours weekly. All fees are nonrefundable and are not prorated.

Instruments. Six concert grand pianos are available for performances in the various concert halls, plus the following historical keyboard instruments: a modern copy of an 18th-century fortepiano by Johann Andreas Stein, a new fortepiano by Robert McNulty, a Broadwood grand piano from 1827, an 1824 Conrad Graf fortepiano replica, an 1868 Erard grand, one Dowd and one Hubbard harpsichord, and a Challis clavichord. Four distinctive organs are available to qualified individuals for lessons and practice: a two-manual mechanical-action instrument (1972) in Anabel Taylor Chapel; a small Italian organ (1746) and a three-manual symphonic organ (1941), both in Sage Chapel; and an 18th-century German-style chamber organ (2003) in Barnes Hall. In addition, the Music Department owns a limited number of string, wind, and percussion instruments that may be rented by members of the department's ensembles.

Electroacoustic Music Center. The center comprises five studios each outfitted with

state-of-the-art hardware and software for music recording, creation, and experimentation. Macintosh, Windows, and Linux operating systems are represented. A variety of MIDI and OSC (Open Sound Control) devices are available for live and interactive performance interests. Available software includes commercial, open source, and custom-designed in-house applications. Max/MSP, PD(PureData), Steinberg Cubase, Ardour, Reason, Csound, Peak, Audacity, and Abelton Live are represented alongside dozens of modular utilities. Video editing and DVD creation are available using Final Cut Pro and Cinelerra. The primary studio hosts a multichannel hardware/software environment (up to 12 channels) for ambisonic mixing, 5.1 surround mixing and mastering, and "vbap" localization techniques. In addition, the Center operates its own server with space for data backup, web site hosting, and remote login.

Digital Music Program Workstations

Cornell Electroacoustic Music Center (CEMC): The center is made up of three project studios, a primary multichannel studio used by graduate students and for small group teaching, a 14-workstation teaching lab, as well as an experimental space for research and testing of new ideas and technologies. In addition, several remote performance and recording solutions are available from handheld to solid state. A combination of commercial and open source software solutions service an array of student and faculty interests including live performance (interactive, improvisational, networked, etc), sound manipulation and sound spatialization, multimedia, intelligent music systems (adaptive and algorithmic composition), music notation, and high-quality recording. The facilities are state-of-the-art and can accommodate almost any creative inclination. A sampling of available software tools include Max/MSP, PureData, Supercollider, Csound (with Score11 or Cecilia), Abelton Live, Reason, Cubase, JACK (and associated tools), Ardour, ambisonic tools (vspace, ICST tools, etc), and many others. CEMC supports a combination of software platforms (Mac, Linux, Windows) and emphasizes cross-platform and/or platform-neutral software tools.

Introductory Courses

MUSIC 100(1100) Elements of Musical Notation

Fall or spring, weeks 2-5. 1 credit.

Corequisite: any 3-credit music course and permission of instructor. Staff.

This four-week course, given at the beginning of each semester, fulfills the requirement of basic pitch, rhythm, and score-reading skills needed for some introductory courses and 200-level courses with prerequisites.

MUSIC 101(1311) Popular Music in America: A Historical Survey (also AM ST 105[1311]) # (LA-AS)

Spring. 3 credits. S. Pond.

This is a general introduction course addressing the broad range of styles described as popular music, as it has developed in the United States. The course interrogates the label of "popular" music as distinct from "art" music and examines such musical elements as rhythm, tone color, melody, harmony, form, lyrics, performance style, and dance, as a reflection of culture and aesthetics. Beyond

this, the addresses cultural and cross-musical influences in the development of popular musics from the 1840s to recent years.

Underlying the course is an interest in ways that popular music expresses culture: how popular music affects, and is affected by, ethnicity, class, nationalism, art, gender, and genre. Two lectures and required discussion section per week.

[MUSIC 102(1101) Fundamentals of Music (LA-AS)]

Fall. 3 credits. No previous training in music required. Next offered 2008-2009. M. Hatch.

An introduction to the theory of music from around the world: the structures of melody and rhythm (pulse, meter, scales, modes, texture, timbre, harmony, form) and the influences of audiences, music technologies (including instruments), reasons, and contexts for music making on instrumental and vocal music from classical, folk, traditional, and popular music of Asia, Africa, Europe, and the Americas. Extensive listening and video examples.]

[MUSIC 103(1301) Introduction to World Music I: Africa and the Americas (also LSP 100[1301]) @ (CA-AS)]

Spring. 3 credits. No previous training in music required. Next offered 2008-2009. S. Pond.

Exploration of folk, popular, and traditional musical genres of the Western Hemisphere, particularly the African diaspora. Examines both the elements of musical styles and the features of society that influence music. Listening assignments are major components of the course.]

[MUSIC 104(1302) Introduction to World Music II: Asia (also ASIAN 192[1192]) @ (CA-AS)]

Spring. 3 credits. No previous training in music required. Next offered 2008-2009. M. Hatch.

An exploration of folk, popular, and traditional musical genres from South, Southeast, and East Asia.]

[MUSIC 105(1105) Introduction to Music Theory (LA-AS)]

Fall. 3 credits. Recommended: experience in reading music; students may take MUSIC 100 concurrently. Staff.

An elementary, self-contained introduction to the theory of Western art music, emphasizing fundamental musical techniques, theoretical concepts, and their application. Intervals, scales, triads; basic concepts of tonality and form; extensive listening to music in various styles; analysis of representative works of Bach, Mozart, Beethoven, and Debussy.

[MUSIC 107(1201) Hildegard to Handel # (LA-AS)]

Fall. 3 credits. Prerequisite: ability to read music or concurrent enrollment in MUSIC 100. Staff.

The main trends in Western music from the beginnings of musical staff notation in the 10th century to the mid-18th century. Emphasis on the evolution of musical styles and the changing social, cultural, economic, and political conditions that gave rise to those styles. Topics include Gregorian chant, organum, Ars nova, Renaissance polyphony, the invention of opera, and the rise of instrumental music.

[MUSIC 108(1202) Mozart to Minimalism # (LA-AS)]

Spring. 3 credits. Prerequisite: ability to read music or concurrent enrollment in MUSIC 100. N. Zaslaw.

A survey of Western art music in many genres from the second half of the 18th century to the present. Composers whose music is studied include Haydn, Mozart, Beethoven, Schubert, Schumann, Mendelssohn, Berlioz, Chopin, Wagner, Verdi, Liszt, Brahms, Mahler, Debussy, Strauss, Stravinsky, Bartok, Ives, Webern, Messiaen, Copland, Bernstein, Stucky, and Sierra.

Music Theory

Students contemplating the music major are strongly advised to take MUSIC 151, 152, 153, and 154 in the freshman year; in any case MUSIC 152 and 154 must be completed no later than the end of the sophomore year.

[MUSIC 151(2101) Tonal Theory I (LA-AS)]

Fall. 3 credits. Prerequisites: admission by departmental placement exam and concurrent enrollment in or previous credit for MUSIC 153, or equivalent. Intended for students expecting to major in music and other qualified students. K. Taavola.

Detailed study of the fundamental elements of modal and tonal music: rhythm, scales, intervals, triads; melodic principles and two-part counterpoint; diatonic harmony and four-part voice leading; basic formal structures. Study engages different repertoires, including Western art music as well as non-Western and popular traditions.

[MUSIC 152(2102) Tonal Theory II (LA-AS)]

Spring. 3 credits. Prerequisites: MUSIC 151 and 153 or equivalent; concurrent enrollment in or previous credit for MUSIC 154. Intended for students expecting to major in music and other qualified students. A grade of B- or better in MUSIC 152 is required for admission to music major. Staff.

Continued study of voice leading and harmonic progression, including diatonic modulation; analysis of binary and ternary forms as well as jazz, blues, and pop phrase models.

[MUSIC 153(2103) Musicianship I]

Fall. 2 credits. Pre- or corequisite: MUSIC 151. Intended for students expecting to major in music and other qualified students. K. Taavola.

Sight singing: diatonic melodies in treble, alto, and bass clefs. Keyboard: scales, triads, seventh chords, short diatonic chord progressions. Dictation: intervals, rhythms; short diatonic melodies; short diatonic chorale phrases. Score reading: two parts using treble, alto, and bass clefs. Musical terms: tempo markings and rhythmic terminology.

[MUSIC 154(2104) Musicianship II]

Spring. 2 credits. Pre- or corequisite: MUSIC 152. Intended for students expecting to major in music and other qualified students. A grade of B- or better in MUSIC 154, and failure in no individual musicianship components of the course, are required for admission to the music major. Staff.

Sight singing: longer melodies in three clefs, including diatonic modulation. Keyboard: diatonic chord progressions and sequences. Dictation: intervals, rhythms; longer melodies; chorale phrases with diatonic modulation.

Score reading: three parts using treble, alto, and bass clefs. Transcriptions of pop, jazz, and other genres.

[MUSIC 204(2111) Physics of Musical Sound (also PHYS 204[1204]) (PBS)]

Spring. 3 credits. K. Selby. For description, see PHYS 204.

[MUSIC 251(3101) Tonal Theory III (LA-AS)]

Fall. 3 credits. Prerequisites: MUSIC 152 and 154 or equivalent. Corequisite: MUSIC 253. R. Sierra.

Continuation of diatonic and introduction to chromatic harmony; species counterpoint; composition in small forms.

[MUSIC 252(3102) Tonal Theory IV (LA-AS)]

Spring. 3 credits. Prerequisites: MUSIC 251 and 253 or equivalent. Corequisite: MUSIC 254. K. Taavola.

Study of and composition in larger forms, including sonata form; systematic study of chromatic harmony, voice-leading, and modulation; composition in chromatic style.

[MUSIC 253(3103) Musicianship III]

Fall. 2 credits. Pre- or corequisite: MUSIC 251. R. Sierra.

Sight singing: melodies with chromaticism in treble, alto, tenor, and bass clefs. Keyboard: diatonic modulation, chromatic chords. Dictation: melodies with modulation; chorale phrases with secondary dominants and other chromatic chords. Score reading: four parts using treble, alto, tenor, and bass clefs. Musical terms: orchestral ranges, terms, clefs, and transpositions.

[MUSIC 254(3104) Musicianship IV]

Spring. 2 credits. Pre- or corequisite: MUSIC 252. K. Taavola.

Sight singing: melodies in four clefs, including modality and chromatic modulation. Keyboard: chromatic sequences, chromatic modulations, improvised modulations employing diatonic pivot chords. Dictation: intervals, rhythms, short melodies, and short, diatonic chorale phrases. Score reading: four parts, including transposing instruments. Musical terms: other terms in French, German, and Italian.

[MUSIC 361(3111) Jazz Improvisation I]

Fall. 2 credits. Prerequisite: MUSIC 151 or permission of instructor. P. Merrill.

An introduction to fundamental jazz theory, technique, and applied skills. Class work and assignments emphasize basic nomenclature, diatonic seventh chords, upper-structures, modes of the major scale, linear style and melodic motive development, feel, cycles, and phrase construction. Performance, composition, analysis, listening, and ear training.

[MUSIC 362(3112) Jazz Improvisation II]

Fall. 2 credits. Prerequisite: MUSIC 361. Next offered 2008-2009. P. Merrill.

Continuation of jazz theory, technique, and applied skills. Class work and assignments emphasize altered upper-structures and dominants, chords and modes of melodic minor, harmonic minor, substitutions, and advanced rhythmic development. Performance, composition, analysis, transcribing, listening, and ear training.]

MUSIC 363(3113) Jazz Improvisation III

Spring. 2 credits. Prerequisite: MUSIC 362 or permission of instructor. P. Merrill
Continuation of jazz theory, technique, and applied skills. Class work and assignments emphasize Coltrane and post Coltrane harmony, pentatonics, advanced rhythmic development, static-structures, odd-meters, triad pairs, triadic development, augmented vocabulary, composite scales, and an introduction to playing "free." Performance, composition, analysis, listening, and ear training.

[MUSIC 365(3115) Jazz Piano

Spring. 2 credits. Prerequisite: MUSIC 351 or permission of instructor. Next offered 2008–2009. P. Merrill.

An introduction to jazz keyboard technique, including reading chord symbols, comping, bass line construction, and soloing. This course is intended primarily for jazz instrumentalists with little or no keyboard experience and pianists with little or no jazz experience.]

[MUSIC 451(4101) Counterpoint # (LA-AS)

Spring. 4 credits. Prerequisite: MUSIC 251 or permission of instructor. Next offered 2008–2009. S. Stucky.]

[MUSIC 452(4102) Topics in Music Analysis (also MUSIC 602[6101]) (LA-AS)

Spring. 4 credits. Prerequisite: MUSIC 251 or permission of instructor. Next offered 2009–2010. J. Webster.]

[MUSIC 453(4111) Composition (LA-AS)

Fall. 4 credits. Prerequisite: MUSIC 152 or permission of instructor. Next offered 2008–2009. R. Sierra.

Study of music composition through the use of traditional forms such as variation and sonata. The student is required to write original pieces for solo and chamber ensembles.]

MUSIC 454(4112) Composition in Recent Styles (LA-AS)

Spring. 4 credits. Prerequisite: MUSIC 251 or permission of instructor. Next offered 2008–2009. R. Sierra.

Through analysis, repertoire from the 20th and 21st centuries furnishes models for composing new works. Styles and techniques are drawn from composers such as Debussy, Bartók, Schoenberg, Copland, and Adams. Recommended (though not required) before taking MUSIC 454; when both 453 and 454 are offered, they form a full-year sequence.]

MUSIC 455(4121) Conducting (LA-AS)

Fall. 4 credits. Prerequisite: MUSIC 251 or permission of instructor. C. Kim.
Covers fundamentals of score reading, score analysis, rehearsal procedures, and conducting technique; instrumental and choral contexts.

MUSIC 456(4122) Orchestration (LA-AS)

Spring. 4 credits. Prerequisite: MUSIC 251 or permission of instructor. Next offered 2008–2009. R. Sierra.
Orchestration based on 19th- and 20th-century models.

MUSIC 457(4103) Topics in Post-Tonal Theory and Analysis (also MUSIC 654[7102]) (LA-AS)

Spring. 4 credits. Prerequisites: MUSIC 252 and 254. K. Taavola.
Topic: Set theory and 12-tone theory.

[MUSIC 458(4123) Jazz Arranging (LA-AS)

Fall. 4 credits. Prerequisite: MUSIC 358 or permission of instructor. Next offered 2009–2010. P. Merrill.

A survey of jazz arranging techniques for the big band.]

Music in History and Culture**[MUSIC 221(1312) History of Rock Music (also AM ST 223[1312]) (LA-AS)**

Spring. 3 credits. No previous training in music required. Next offered 2008–2009. J. Peraino.

This course examines the development and cultural significance of rock music from its origins in blues, gospel, and Tin Pan Alley up to present-day genres of alternative rock and hip hop.]

MUSIC 222(1313) A Survey of Jazz (also AM ST 222[1313]) (LA-AS)

Fall. 3 credits. S. Pond.
This course addresses jazz from two perspectives: the various sounds of jazz, as well as the historical streams—musical and cultural—that have contributed to its development.

MUSIC 245(1341) Gamelan In Indonesian History and Cultures (also ASIAN 245[2245], VISST 244[2744]) @ (LA-AS)

Fall or spring. 3 credits. Prerequisite: permission of instructor. No previous knowledge of musical notation or performance experience necessary. Fall, staff; spring, M. Hatch.
An introduction to Indonesia through its art. Elementary techniques of performance on the Indonesian *gamelan*; a general introduction to Indonesian history and cultures, and the sociocultural contexts for the arts there. Several short papers and one longer research report are required. Instruction by visiting Balinese musician.

MUSIC 261(2221) Bach and Handel # (LA-AS)

Spring. 3 credits. Prerequisite: any 3-credit music course or permission of instructor. Staff.

Born within hundred miles of one another in 1685, Bach and Handel followed very different and but equally exciting paths through the musical geography of the 18th century. The course will look in depth at selected masterpieces of each composer, investigating these works' significance in the 18th century and in our own time, and will ask why the keyboard music, operas, and passions of these celebrated contemporaries should still matter to us.

[MUSIC 262(2222) Haydn and Mozart # (LA-AS)

Fall. 3 credits. Prerequisite: any 3-credit music course or permission of instructor. Next offered 2009–2010. J. Webster.
A survey of the lives, works, and historical roles of Joseph Haydn and Wolfgang Amadeus Mozart. Attention is also given to developments in musical style 1750–1800, and to intellectual currents such as the Enlightenment, the aesthetics of music, and changing concepts of genius.]

[MUSIC 263(2223) Beethoven # (LA-AS)

Spring. 3 credits. Prerequisite: any 3-credit music course or permission of instructor. Next offered 2008–2009. J. Webster.]

[MUSIC 264(2231) Musical Romantics # (LA-AS)

Spring. 3 credits. Prerequisite: ability to read music or concurrent enrollment in MUSIC 100. Next offered 2009–2010. D. Rosen.]

[MUSIC 272(2245) Words and Music (also GERST 342[3420]) # (LA-AS)

Spring. 4 credits. Next offered 2008–2009. A. Groos.
For description, see GERST 342.]

MUSIC 274(2241) Opera (also THETR 273[2730]) # (LA-AS)

Fall. 3 credits. D. Rosen and A. Groos.
An introduction to opera through the examination of six major works of the operatic repertory by such composers as Mozart, Donizetti, Verdi, Wagner, Bizet, Puccini, and Britten, with attention to the interaction of the words, music, and visual elements. With two of the operas studied, we will trace the development of the opera libretto from the play or short story upon which it is based. We will compare and critique some of the different productions available on video and DVD recordings and, for Verdi's *Rigoletto* and possibly Mozart's *Don Giovanni* in live performance (these works are being performed by the Syracuse Opera and Tri-Cities Opera, respectively).

[MUSIC 276(2242) The Orchestra and Its Music # (LA-AS)

Spring. 3 credits. Prerequisite: any 3-credit music course or permission of instructor. Next offered 2008–2009. N. Zaslav.
The music of, and the social structures supporting, large instrumental ensembles in the Western world from the 16th century to the present.]

[MUSIC 277(2243) The Piano and Its Music (LA-AS)

Fall or spring. 3 credits. Prerequisite: one semester of music theory (MUSIC 105, equivalent course, or equivalent experience) or permission of instructors. Next offered 2008–2009. Staff.]

MUSIC 407(4511) Early Dance (also DANCE 407[4399])

Fall. 1 credit. R. Harris-Warrick.
Topic: Baroque Dance. This course introduces students to the basic movement vocabulary of dances from Western Europe during the Renaissance and Baroque periods. It will consider the contexts in which such dances were performed, the music that accompanied the dance, the issues of how to reconstruct dances from the past. It is primarily a movement course, but will involve some reading from primary sources. Semesters that focus on Renaissance dance will include dances such as the pavanne, galliard, branles, allemande, balli, and canarie from France, England, and Italy. Semesters that focus on the Baroque will teach the dance style that emanated from France and became the basis for ballet, including dances such as the minuet, courante, bouree, and sarabande. The course may be repeated for credit.

MUSIC 408(4512) Music and Choreography (also DANCE 324[3530]) (LA-AS)

Spring. 3 credits. Attendance at dance concerts and music concerts required. A. Fogelsanger.
For description, see DANCE 324.

Music History Courses for Majors and Qualified Nonmajors

MUSIC 207(3201) Survey of Western Music I # (LA-AS)

Spring. 4 credits. Pre- or corequisite: MUSIC 151/153 or permission of instructor. N. Zaslaw.

A survey of Western music and its social contexts from the beginning of notation (circa 900) to 1700. Topics include sacred chant, secular song, polyphony, madrigals, early opera, and the development of independent instrumental music. The course emphasizes listening and comprehension of genres and styles, and is intended for music majors and qualified nonmajors.

MUSIC 208(3202) Survey of Western Music II # (LA-AS)

Fall. 4 credits. Pre- or corequisite: MUSIC 152/154 or permission of instructor. K. Taavola.

A survey of Western music and its social contexts from 1700 to the present. Topics include the decline of church music, the rise of public concerts and opera, the evolution of the orchestra, and modernism in the 20th century. The course, which emphasizes listening and comprehension of genres and styles, is intended for music majors and qualified nonmajors.

MUSIC 300(3211) Proseminar in Musicology (LA-AS)

Spring. 4 credits. D. Yearsley.

Introduction to methods in musicology, including historiography, criticism, approaches to vernacular and non-western musics, and gender studies.

[MUSIC 374(3222) Opera and Culture (also GERST 374(3740)) # (LA-AS)

Spring. 4 credits. Prerequisite: any 3-credit music course or proficiency in German or Italian. Next offered 2008-2009. A. Groos.

For description, see GERST 374.]

[MUSIC 381(3231) Topics in Western Art Music to 1750 #

Fall. 4 credits. Prerequisite: MUSIC 152 or permission of instructor. Next offered 2008-2009. Staff.]

[MUSIC 382(3232) Topics in Western Art Music 1750-Present

Spring. 4 credits. Prerequisite: MUSIC 152 or permission of instructor. Next offered 2008-2009. Staff.]

MUSIC 386(3301) Topics in Popular Music and Jazz

Spring. 4 credits. Prerequisite: MUSIC 152/154 or permission of instructor. S. Pond.

This course addresses various topics, centering on the post-World War II years to ca. 1970. **Topic for 2008: Post-WWII Rhythm-and-Blues to Funk.** The course investigates the various sounds of black popular music in the post-World War II period, its antecedents, interactions with other popular musics, and influences on later developments, principally to the mid-1970s. The historical focus engages with R&B in terms of ethnicity, class, nationalism, racial politics, aesthetics, gender, and genre. The course is both reading and listening based, with opportunities for music-making as well. The course entails a significant writing component. It partially satisfies the Music major history requirement. Since the course addresses different topics in

different years, it may be taken more than once for credit.

[MUSIC 390(3242) Culture of the Renaissance II (also COM L 362(3620), ENGL 325(3250), HIST 364(3640), ART H 351(3420), FREN 362(3620)] # (CA-AS)

Fall. 4 credits. Next offered 2008-2009. K. Long and W. J. Kennedy.]

MUSIC 398-399(3901) Independent Study in Music History

398, fall; 399, spring. 4 credits. Prerequisite: MUSIC 152 and permission of instructor. Staff.

Advanced study of various topics in music history. Students enrolling in MUSIC 398-399 participate in, but do not register for, an approved 200-level music history course and, in addition, pursue independent research and writing projects. See also "Independent Study and Honors."

MUSIC 400(4211) Senior Seminar

Fall. 4 credits. B. Boutwell.

This seminar concerns a number of prominent trends linking musical composition and visual art within the U.S. since World War II. Through an explicitly interdisciplinary approach, students will explore aesthetic and ideological affinities among movements in these fields while studying specific works by leading American composers and artists. Readings will be drawn from the literature of musicology, art-history, and social theory.

MUSIC 404(4301) Introduction to Ethnomusicology (also MUSIC 604(6301)) @ (SBA-AS)

Fall. 4 credits. S. Pond.

For description, see MUSIC 604.

[MUSIC 410(4222) Music and Monstrous Imaginings # (LA-AS)

Fall. 4 credits. Next offered 2008-2009. A. Richards.]

[MUSIC 411(2244) The Organ in Western Culture # (LA-AS)

Fall. 4 credits. Prerequisite: permission of instructor. Next offered 2009-2010. A. Richards and D. Yearsley.]

MUSIC 418(4181) Psychology of Music (also PSYCH 418(4180)) (KCM-AS)

Fall. 3 or 4 credits, depending on whether student elects to do an independent project. C. L. Krumhansl.

For description, see PSYCH 418.

[MUSIC 492(4231) Music and Queer Identity (CA-AS)

Spring. 4 credits. Next offered 2008-2009. J. Peraino.]

[MUSIC 493(4232) Women and Music (CA-AS)

Spring. 4 credits. Next offered 2008-2009. J. Peraino.]

Digital Music and New Media

MUSIC 120(1421) Introduction to Digital Music (LA-AS)

Fall. 3 credits. Limited enrollment. Prerequisite: permission of instructor. Recommended: ability to read music. K. Ernste.

A composition-based introduction to computer hardware and software for digital sound and digital media. Fundamentals of MIDI sequencing and other techniques for producing electroacoustic music. Each student creates several short compositions.

MUSIC 165(1465) Computing in the Arts (also CS/CIS/ENGR1 165(1610))

Fall. 3 credits. G. Bailey. For description, see CS 165.

MUSIC 220(2421) Computers in Music Performance (LA-AS)

Spring. 3 credits. Limited enrollment. Prerequisite: permission of instructor. K. Ernste.

A course in live performance and real-time, interactive sound manipulation techniques both in concert and over networks. Students will work individually or in small groups toward realizing short pieces that utilize tools and ideas from the course. MUSIC 220 is appropriate as a continuation for those who have taken MUSIC 120 but is open to others by permission.

[MUSIC 320(3421) Scoring the Moving Image Using Digital Technology (LA-AS)

Spring. 4 credits. Prerequisite: MUSIC 120 with grade of B or higher and MUSIC 251. Next offered 2008-2009. K. Ernste.]

MUSIC 355(3431) Sound Design and Digital Audio (also THETR/DANCE 368(3680)) (LA-AS)

Spring. 3 credits. W. Cross. For description, see THETR 368.

MUSIC 356(3441) Interactive Performance Technology (also DANCE 369(3690), THETR 369(3690)) (LA-AS)

Fall. 4 credits. W. Cross and A. Fogelsanger. For description, see THETR 369.

Independent Study and Honors

MUSIC 301-302(4901) Independent Study in Music

301, fall; 302, spring. Credit TBA. Prerequisite: departmental approval; experience in proposed area of study. Staff. See also MUSIC 398-399 under "Music in History and Culture."

MUSIC 401-402(4911) Honors in Music

401, fall; 402, spring. 8 credits per year. Prerequisite: senior honors candidates. Staff.

See "Honors" under "The Major" at the beginning of the MUSIC listings.

Musical Instruction

Cornell faculty members offer individual instruction in voice, organ, harpsichord, piano and fortepiano, violin, viola, cello, and some brass and woodwind instruments to those students advanced enough to do college-level work in these instruments. Lessons are available by audition only. They may be taken either without credit (MUSIC 321) or with credit (MUSIC 322 or 323). All students studying with Cornell faculty members must enroll in MUSIC 321, 322, or 323. Other instruments may sometimes be studied for credit outside Cornell, but also by audition only (see MUSIC 321-323, Secs 9 and 10).

Lessons for beginners. The Department of Music can recommend outside teachers for those who wish to begin studying voice or an instrument. No credit is available for beginning instruction.

Auditions. Auditions are held at the beginning of each semester for lessons for advanced students. Contact the music

department office in 101 Lincoln Hall for information.

Earning academic credit for lessons. For every 4 credits earned in MUSIC 322, the student must have earned, or currently be earning, at least 3 credits in another music course (excluding MUSIC 322, 323, 331-348, or 421-448). These 3 credits must be earned before, or simultaneously with, the first 2 credits in 322; they cannot be applied retroactively. Only music courses taught at Cornell (or approved transfer courses from other colleges or universities) may be used to satisfy this requirement.

Fees. The fee for a one-hour lesson (or two half-hour lessons) weekly, with or without credit, is \$480 per semester. For a one-half hour lesson weekly (without credit only), the fee is \$240. All fees are nonrefundable once lessons begin, even if the course is subsequently dropped.

Lessons taken outside Cornell. Under certain conditions, advanced students may earn credit for lessons taken outside Cornell. An audition is required, and no credit can be granted for beginning instruction. For further information, read the description of MUSIC 322-323, Secs 9 and 10, and contact the Music Department office.

Scholarships. Music majors receive a scholarship of up to \$480 per semester. Any member of department-sponsored ensembles may, with the permission of the director of the ensemble, receive a partial scholarship to help defray the cost of the lessons. All scholarships are intended only for lessons in the student's primary performing medium. Scholarship forms, available in the music department office, are to be returned to the office within the first three weeks of classes.

MUSIC 321-322-323(3501-3502-4501) Individual Instruction

Prerequisite: advanced students only; may register after successful audition with instructor, or, if student needs to study outside Cornell, with appropriate faculty sponsor. Students should contact instructor or music department office for audition information. Students may register for these courses in successive semesters or years.

MUSIC 321(3501)

Fall or spring. 0 credits each semester. See section listing below for instructors. Students who pass a successful audition to study with Cornell faculty, but either wish to take only a half-hour lesson per week or cannot receive credit for lessons, must enroll in MUSIC 321. S-U grades only.

MUSIC 322(3502)

Fall or spring. 2 credits each semester. See section listing below for instructors. Students earn 2 credits each semester for one-hour lesson (or two half-hour lessons) per week, accompanied by appropriate practice schedule. Credit may be earned only in conjunction with academic music courses; see "Earning Academic Credit for Lessons," above. Letter grades only.

MUSIC 323(4501)

Fall or spring. 4 credits each semester. See section listing below for instructors. Open only to juniors and seniors majoring in music and graduate students in music. The section numbers listed below apply to MUSIC 321, 322, or 323, depending on the instrument studied.

Sec 01 Voice. J. Kellock.

Sec 02 Organ. A. Richards and D. Yearsley.

Sec 03 Piano. X. Bjerken and Staff.

Sec 04 Harpsichord. A. Richards and D. Yearsley.

Sec 05 Violin or Viola. J. Lin.

Sec 06 Cello. J. Haines-Eitzen.

Sec 07 Brass. Staff.

Sec 08 Woodwinds. Staff.

Sec 09/Sec 10 Individual Instruction Outside Cornell.

All the standard orchestral and band instruments, keyboard instruments, guitar, and voice may, under certain conditions, be studied for credit with outside teachers. This course is available primarily for the study of instruments not taught at Cornell and when there is limited enrollment in MUSIC 321 and 322. Prior approval and audition by a member of the faculty in the department are required, and credit may be earned only as described under "Earning academic credit for lessons," above. Additionally, a departmental petition must be completed by the end of the third week of classes. For information and a list of approved teachers, consult the department office, 101 Lincoln Hall.

Musical Organizations and Ensembles

Students may participate in musical organizations and ensembles throughout the year. Permission of the instructor is required, and admission is by audition only (usually at the beginning of each semester), except that the Sage Chapel Choir, World Music Choir, and the Cornell Gamelan Ensemble are open to all students without prior audition. Registration is permitted in two of these courses simultaneously and students may register in successive years, but no student may earn more than 8 credits in these courses. Membership in these musical organizations and ensembles is also open to qualified students who wish to participate without earning credit.

MUSIC 331-332(3601) Sage Chapel Choir

331, fall; 332, spring. Either 0 credits, S-U, or 1 credit, letter grade, each semester. No audition required. Staff.

Open to all students and members of the university. Varied and demanding repertoire. The Sage Chapel Choir sings regularly in the Sunday service of worship, which is broadcast on 870 WHCU-AM radio, and on special occasions throughout the year.

MUSIC 333-334(3602) Chorus

333, fall; 334, spring. Either 0 credits, S-U, or 1 credit, letter grade, each semester. Prerequisite: successful audition. S. Tucker.

A treble-voice chorus specializing in music for women's voices and in mixed-voice repertoire.

MUSIC 335-336(3603) Glee Club

335, fall; 336, spring. Either 0 credits, S-U, or 1 credit, letter grade, each semester. Prerequisite: successful audition. S. Tucker.

A male-voice chorus specializing in music for men's voices and in mixed-voice repertoire.

MUSIC 338(3631) Wind Symphony

Fall and spring. Either 0 credits, S-U, or 1 credit, letter grade, each semester. Prerequisite: successful audition. C. Johnston Turner and Staff.

MUSIC 339-340(3615) Jazz Ensemble II

339, fall; 340, spring. Either 0 credits, S-U, or 1 credit, letter grade, each semester.

Prerequisite: successful audition. P. Merrill. Study and performance of classic and contemporary big band literature. Rehearsal once a week with one to two performances a semester.

MUSIC 342(3633) Wind Ensemble

Fall and spring. Either 0 credits, S-U, or 1 credit, letter grade, each semester.

Prerequisite: successful audition. C. Johnston Turner.

MUSIC 343-344(3621) Symphony Orchestra

343, fall; 344, spring. Either 0 credits, S-U, or 1 credit, letter grade, each semester.

Prerequisite: successful audition. C. Kim. Study and performance of a broad repertoire of orchestral works from Beethoven to the present.

MUSIC 345-346(2541) Advanced Instruction—Gamelan

345, fall; 346, spring. Either 0 credits, S-U, or 1 credit, letter grade, each semester.

Limited enrollment. Prerequisite: permission of instructor. Fall, staff; spring, M. Hatch.

Concentrated instruction for students in advanced techniques of performance on the Indonesian *gamelan*.

MUSIC 348(3611) World Music Choir

Spring. Either 0 credits, S-U, or 1 credit, letter grade, each semester. Prerequisite: permission of instructor. S. Tucker.

A mixed-voice chorus whose repertoire is drawn from Africa, Central America, South America, the Caribbean, Eastern Europe, and Asia. Music reading skills are not necessary, but a good ear is essential.

MUSIC 421-422(4621) Chamber Orchestra

421, fall; 422, spring. Either 0 credits, S-U, or 1 credit, letter grade, each semester.

Prerequisite: successful audition. C. Kim. Study and performance of chamber orchestra works from the baroque period to the present.

MUSIC 423-424(4616) Jazz Combos

423, fall; 424, spring. Either 0 credits, S-U, or 1 credit, letter grade, each semester.

Prerequisite: successful audition. P. Merrill. Study and performance of classic and contemporary small-group jazz.

MUSIC 431-432(3614) Middle Eastern Music Ensemble (also NES 447-448[4947-4948])

431, fall; 432, spring. Either 0 credits, S-U, or 1 credit, letter grade, each semester.

Prerequisite: permission of instructor. M. Hatch.

Performance of diverse musical traditions from the Middle East. Instruction in individual instruments (oud, ney, kanoun, and percussion) and group rehearsals, culminating in one or two performances per semester. Songs are taught in several languages, with the assistance of local language and diction teachers.

MUSIC 433-434(3613) Steel Band

433, fall; 434, spring. Either 0 credits, S-U, or 1 credit, letter grade, each semester.

Prerequisite: background in music and permission of instructor. Staff.

This performance group specializes in traditional Caribbean steel drum repertoire and beyond.

MUSIC 435-436(3612) World Drum and Dance Ensemble

435, fall; 436, spring. Either 0 credits, S-U, or 1 credit, letter grade, each semester. Prerequisite: permission of instructor. Staff. This group specializes in traditional music from West Africa and the Caribbean. Drumming techniques, song, and dance styles are incorporated into each semester's activities. No previous percussion experience is necessary.

MUSIC 437-438(4631) Chamber Winds

437, fall; 438, spring. Either 0 credits, S-U, or 1 credit, letter grade, each semester. Corequisites: enrollment in one course drawn from MUSIC 333-344, 439, 440, and permission of instructor. Coordinator: C. Johnston Turner.

Flexible instrumentation ensembles perform original woodwind, brass, and percussion music. The ensembles participate in Wind Symphony and Wind Ensemble concerts in addition to several chamber concerts throughout the year.

MUSIC 439-440(4615) Jazz Ensemble I

439, fall; 440, spring. Either 0 credits, S-U, or 1 credit, letter grade, each semester. Prerequisite: successful audition. P. Merrill. Study and performance of classic and contemporary big band literature. Rehearsals twice a week with two to four performances per semester.

MUSIC 441-442(4651) Chamber Music Ensembles

441, fall; 442, spring. Either 0 credits, S-U, or 1 credit, letter grade, each semester. Prerequisite: successful audition. Coordinator: Staff.

Study and performance of chamber music works from duos to octets, for pianists, string, and wind players.

MUSIC 443-444(3604) Chorale

443, fall; 444, spring. Either 0 credits, S-U, or 1 credit, letter grade, each semester. Prerequisite: successful audition. Staff. Study and performance of selected choral music for mixed voices.

MUSIC 445-446(4641) Gamelan Ensemble

445, fall; 446, spring. Either 0 credits, S-U, or 1 credit, letter grade, each semester. Prerequisite: permission of instructor. Fall, staff; spring, M. Hatch.

Advanced performance on the Indonesian *gamelan*. Tape recordings of *gamelan* and elementary number notation are provided. Some instruction by visiting Balinese artist.

MUSIC 447-448(4601) Chamber Singers

447, fall; 448, spring. Either 0 credits, S-U, or 1 credit, letter grade, each semester. Prerequisite: successful audition. Staff. A mixed-voice chamber choir specializing in Renaissance and 20th-century music.

Graduate Courses

Open to qualified undergraduates by permission of instructor.

MUSIC 601(6201) Introduction to Bibliography and Research

Fall. 4 credits. B. Boettcher. This course explores the nature of the discipline and introduces the many types of bibliographic tools, both printed and electronic, needed to pursue research in music.

[MUSIC 602(6101) Analytical Technique (also MUSIC 452(4102))

Spring. 4 credits. Next offered 2009-2010. J. Webster.]

[MUSIC 603(6202) Editorial Practice

Spring. 4 credits. Next offered 2008-2009. Staff.]

MUSIC 604(6301) Introduction to Ethnomusicology

Fall. 4 credits. Also open to graduate students in anthropology, linguistics, psychology, sociology, Africana, Asian Studies, and other cognate fields by permission of instructor. S. Pond. This course surveys a spectrum of issues central to the field, including but not limited to issues of identity and representation, methods of musical and cultural analysis, area studies, applied ethnomusicology, and intersections with other fields in the humanities and social sciences.

MUSIC 620(6420) Techniques for Computer Music

Fall. 4 credits. Prerequisite: permission of instructor. K. Ernste. Intended principally for doctoral students in music composition but open to others by permission. The course presents a practical overview of both classical and state-of-the-art techniques for computer music including digital synthesis, signal processing and sound manipulation, analysis and resynthesis, spatialization, and real-time and/or interactive applications. Students will produce several short studio projects as well as one larger piece to be presented in a final concert.

[MUSIC 653(7101) Topics in Tonal Theory and Analysis

Spring. 4 credits. Next offered 2008-2009. J. Webster.]

MUSIC 654(7102) Topics in Post-Tonal Theory and Analysis (also MUSIC 457(4103))

Spring. 4 credits. K. Taavola. Topic: Set theory and 12-tone theory.

[MUSIC 656(7121) Advanced Orchestral Technique

Fall. 4 credits. Next offered 2008-2009. S. Stucky. Intensive analysis of orchestral scores by such composers as Debussy, Ravel, Stravinsky, Dutilleux, Boulez, Lutoslawski, Berio, Takemitsu, Druckman, Knussen, Benjamin, Adams, Saariaho, and Lindberg, with an emphasis on modern instrumental techniques, gestures, and textures. Composition exercises aimed at harnessing these discoveries for the students' own work. Designed for doctoral candidates in composition; others admitted by permission only.]

MUSIC 657-658(7111) Composition

657, fall; 658, spring. 4 credits each semester. R. Sierra and S. Stucky.

MUSIC 659(6421) Electroacoustic Composition

Spring. 4 credits. Prerequisite: permission of instructor. K. Ernste. Intended principally for doctoral students in music composition but open to others by permission. Depending on students' backgrounds and interests, the course may include an introduction to electroacoustic composing, an emphasis on aesthetic issues associated with the field, interactivity and real-time performance, software instrument design, performance controllers, or other topics.

[MUSIC 677(7221) Mozart: His Life, Works, and Times

Fall. 4 credits. Next offered 2008-2009. N. Zaslav.]

[MUSIC 680(7301) Topics in Ethnomusicology

Spring. 4 credits. Also open to graduate students in anthropology, linguistics, psychology, sociology, Africana Studies, Asian Studies, and other cognate fields by permission of instructor. Next offered 2008-2009. S. Pond.]

[MUSIC 681(7201) Seminar in Medieval Music

Fall. 4 credits. Next offered 2008-2009. J. Peraino.]

[MUSIC 683(7231) Music and Postmodern Critical Theory

Fall. 4 credits. Next offered 2008-2009. J. Peraino.]

MUSIC 684(7202) Seminar in Renaissance Music

Spring. 4 credits. R. Harris-Warrick. Topic: Josquin Desprez.

MUSIC 686(7203) Seminar in Baroque Music

Fall. 4 credits. D. Yearsley. Topic: The Wondrous Machine: The Organ in Musical Culture. Once at the center of the humanistic study of music, not to mention keyboard culture, the organ now occupies a shadowy position on the fringes of musical scholarship and performance. This course will examine the changing status of the organ from the late Gothic to the present, and will argue that our understanding of the European musical past and present is fundamentally enriched by a host of musical, social, cultural, and technological perspectives on the King of Instruments.

[MUSIC 688(7204) Seminar in Classical Music

Spring. 4 credits. Next offered 2008-2009. J. Webster. Topic: Haydn.]

MUSIC 689(7205) Seminar in Music of the Romantic Era

Spring. 4 credits. Next offered 2009-2010. Staff.]

MUSIC 690(7206) Seminar in Music of the 20th Century

Spring. 4 credits. B. Boutwell. Topic: The American Experimental Tradition from Ives to Zorn. Mostly broadly, this course will survey the modernist/post-modernist lineage in 20th-century American art music; more specifically, it will chart the genealogy of what's become known in recent musicological literature as the "American experimental tradition," in the process parsing the definition of that label and assessing its usefulness as an historical category. Readings from period sources, from the body of recent music scholarship, and from social theory will complement musical analysis and an abundance of listening assignments.

MUSIC 691-692(7501) Historical Performance

691, fall; 692, spring. 4 credits each semester. Prerequisite: permission of instructor. M. Bilson. Lessons on the major instrument with supplementary study and research on related subjects.

MUSIC 693(7211) Seminar in Performance Practice

Fall. 4 credits. N. Zaslaw.

Topic: Controversies in the study and implementation of historical performance practices. Prerequisite: Reading knowledge of at least one western European language.

[MUSIC 695(7311) Gender, Sexuality, and Glam Rock (also FGSS 695(6950))

Fall. 4 credits. Next offered 2009–2010.

J. Peraino.

This course will examine the history and legacy of glam rock, with a focus on the use of music, fashion, and performance as a means of exploring non-normative gender and sexual identities. Key artists and groups include the Velvet Underground, Marc Bolan, David Bowie, Roxy Music, Queen, Iggy pop, and the New York Dolls. Cinematic treatments of glam rock, such as Velvet Goldmine and Hedwig and the Angry Inch, will also be considered. Readings will be drawn from cultural, gender and sexuality studies as well as musicology.]

MUSIC 697–698(7901) Independent Study and Research

697, fall; 698, spring. Credit TBA. Staff.

[MUSIC 785(7103) History of Music Theory

Fall. 4 credits. Next offered 2009–2010.

K. Taavola.

Issues and problems in the history of music theory; topics vary from year to year. Topic for 2006: Esoteric French and German theory in the 19th and 20th centuries.]

MUSIC 787(7232) History and Criticism

Spring. 4 credits. A. Richards.

Topic: Music, performance, visual culture: critical intersections, 1750–1800.

MUSIC 901–902(9901) Thesis Research

901, fall; 902, spring. Up to 6 credits each semester, TBA. S-U grades only.

Limited to doctoral students in music who have passed the Admission to Candidacy exam.

NEAR EASTERN STUDIES

K. Haines-Eitzen, chair, L. Allred, I. Begen, R. Brann (director of graduate studies), R. Daneshvar, Z. Fahmy, A. Gadotti, I. Gocheleishvili, F. Hijazi, C. Monroe, L. Monroe, D. I. Owen (director of Program of Jewish Studies); D. S. Powers, N. Scharf, S. Shoer, D. Starr (director of undergraduate studies), S. M. Toorawa, M. Younes, J. Zorn. Joint faculty: G. Holst-Warhaft, C. Robinson

The Department

The Department of Near Eastern Studies (409 White Hall, 255-6275) offers courses in Near Eastern civilization including archaeology, history, religions, languages, and literatures. These course offerings treat the Near East from the dawn of history to the present and emphasize methods of historical, cultural, and literary analysis. Students are encouraged to take an interdisciplinary approach to the religions and cultures of the region and their articulation during antique, late antique, medieval, and modern times. For more information, please visit www.arts.cornell.edu/nest/.

Distribution Requirements

Any two Near Eastern Studies history or archaeology courses at the 200, 300, or 400 level that form a reasonable sequence or combination satisfy the distribution requirement in the social sciences/history. Any two Near Eastern Studies civilization or literature courses at the 200, 300, or 400 level that form a reasonable sequence or combination satisfy the distribution requirement in the humanities. NES 197 or 251 plus any other Near Eastern Studies course will constitute a sequence to fulfill the distribution requirement in either social sciences/history or humanities, depending on the second course used in combination with 197 or 251. All 200- or 300-level language courses may fulfill the humanities requirement.

The Major

A major in Near Eastern Studies offers students the opportunity to explore the languages, literatures, cultures, religions, and history of the Near East/Middle East from antiquity to the modern day. The major is designed both to acquaint students broadly with the region and its cultures as well as to study a particular subfield in depth.

Prerequisites

- The applicant for admission to the major in Near Eastern Studies must have completed at least two Near Eastern Studies content courses, one of which can be a language course. Students are strongly encouraged to enroll in language courses and/or NES 251 or 254 either before signing into the major or early on in their major.
- Prospective majors must meet with the director of undergraduate studies before submitting a major application.
- To qualify as a major, a cumulative grade average of C or better is required.

Major Requirements

For students graduating in the Classes of 2006 or earlier, consult the department. The precise sequence and combination of courses chosen to fulfill the major is selected in consultation with the student's advisor. All majors must satisfy the following requirements (no course may be used to satisfy two requirements; S-U option not permitted):

1. Two years of one Near Eastern language or, in exceptional cases, one year of two Near Eastern languages
2. Nine 3- or 4-credit NES courses, which must include the following:
 - a. NES 251 Judaism, Christianity, and Islam or NES 254 Introduction to Near Eastern Civilizations
 - b. NES 460 Junior/Senior Proseminar: Theory and Method in Near Eastern Studies
 - c. Seven additional courses, of which
 - i. three must fulfill temporal breadth, defined as: one course whose chronological parameters fall within the period 3000 BCE to 600 CE, one course whose chronological parameters fall within the period 600 CE to 1800 CE, and one course whose chronological parameters fall between 1800 CE and the present. The following are examples (a

complete list may be obtained in the department office):

3000 BCE to 600 CE

- NES 223 Introduction to the Hebrew Bible
 NES 229 Introduction to the New Testament
 NES 244 Introduction to Ancient Judaism
 NES 261 Ancient Seafaring
 NES 266 Jerusalem through the Ages
 NES 320 Women in the Hebrew Bible
 NES 360 Ancient Iraq
 NES 323 Reinventing Biblical Narrative
 NES 394 Gender, Sexuality, and the Body in Early Christianity

600 CE to 1800 CE

- NES 214 Qur'an and Commentary
 NES 234 Muslims and Jews in Confluence and Conflict
 NES 256 Introduction to the Qur'an
 NES 273 History of the Middle East: 13th to 18th Centuries
 NES 339 Islamic Spain
 NES 351 Law, Society, and Culture in the Middle East
 NES 418 Seminar in Islamic History

1800 CE to the present

- NES 235 Jews and Arabs in Contact and Conflict: The Modern Period
 NES 274 History of the Modern Middle East: 19th to 20th Centuries
 NES 319 Crime and Conflict in the Modern Arabic Novel
 NES 385 Middle Eastern Cities
 NES 393 History of Jews and Christians in the Modern Middle East
 NES 397 History of the Israeli-Palestinian Conflict
 NES 493 Cosmopolitan Alexandria
- ii. A maximum of three of these seven courses can be at the 200 level; a minimum of four must be at the 300 level or above.
 - iii. One of the 300-level or above courses must be a research seminar (courses are designated with ®) The following are examples (a complete list can be found in the department office):

339 Islamic Spain: Culture and Society @ # (CA) ®
 385 Middle Eastern Cities: History, Society, and Culture @ # (HA) ®
 394 Gender, Sexuality, and the Body in Early Christianity # (CA) ®
 427 New York, Paris, Baghdad: Poetry of the City) ®
 457 Formation of Islamic Law @ # (HA) ®
 466 History of Israelite Religion @ (CA) ®
 - iv. Note: a maximum of two independent studies can be applied to the major; a maximum of two non-cross-listed courses may be applied to the major; a maximum of two courses may receive credit for more than one major; a maximum of 15

credits of relevant, departmentally approved course work taken overseas or at another university may be applied to the major.

For students graduating in the classes of 2006 or earlier, consult the department.

Honors. Candidates for the degree of Bachelor of Arts with honors in Near Eastern Studies must fulfill the requirements of the appropriate major study and enroll in the honors course, NES 499, in the fall and spring semesters of their senior year. For admission to the honors program, candidates must have a cumulative average of B+ or better and have demonstrated superior performance overall in Near Eastern Studies courses. After consulting their major advisor, candidates should submit an outline of their proposed honors work to the department **during the second semester of their junior year.** The Near Eastern Studies main office has more specific guidelines for the honors thesis.

Study abroad. Near Eastern Studies majors may choose to study in the Near East during their junior year. There are various academic programs in the countries of the Near East that are recognized by the Department of Near Eastern Studies and that allow for the transfer of credit. Archaeological fieldwork on Cornell-sponsored projects in the Near East may also qualify for course credit.

First-Year Writing Seminars

For descriptions, consult the John S. Knight Institute brochure for times, instructors, and descriptions.

Language Courses

Arabic

NES 111-112(1201-1202) Elementary Arabic I and II (also AS&RC 111/112[1104/1105])

111, fall; 112, spring. 4 credits each semester. Limited to 18 students per section. Prerequisite: for NES 112, NES 111 or permission of instructor. M. Younes and staff.

Provides a thorough grounding in all language skills: listening, speaking, reading, and writing. It starts with spoken Arabic and gradually integrates Modern Standard Arabic in the form of listening and reading texts. Emphasis is on learning the language through using it in meaningful contexts. Students who successfully complete the two-semester sequence are able to (1) understand and actively participate in simple conversations involving basic practical and social situations (e.g., introductions, greetings, school, home and family, work, simple instructions); (2) read Arabic material of limited complexity and variety (e.g., simple narrative and descriptive texts, directions); (3) write notes and short letters describing an event or a personal experience. An important objective of the course is to familiarize students with basic facts about the geography, history, and culture of the Arab world.

NES 113-210(1203-2200) Intermediate Arabic I and II (also AS&RC 113/212[1106/2101])

113, fall; 210, spring. 4 credits each semester. *NES 210 @ satisfies Option 1.* Limited to 18 students per section. Prerequisites: for NES 113, one year of Arabic or permission of instructor; for NES 210, NES 113 or permission of instructor. Letter grades recommended. M. Younes and staff.

Sequel to NES 111-112. Continued development of the four language skills through extensive use of graded materials on a wide variety of topics. Increased attention is given to developing native-like pronunciation and grammatical accuracy, but the main focus is on developing communication skills. The student who successfully completes 210 is able to: (1) understand and express himself or herself in Arabic in situations beyond the basic needs; (2) read and comprehend written Arabic of average difficulty; (3) write a letter, a summary of a report, or a reading selection. An appreciation of Arabic literature and culture is sought through the use of authentic materials.

NES 125(1205) Elementary Arabic for Native Speakers (also AS&RC 125[1125])

Fall. 4 credits. M. Younes.

This course is designed for students who can speak and understand a spoken Arabic dialect (Egyptian, Lebanese, Syrian, Iraqi, etc.) but have little or no knowledge of written Arabic, known as Classical Arabic, Modern Standard Arabic, or Fusha. The focus of the course will be on developing the reading and writing skills through the use of graded, but challenging and interesting materials. As they develop their reading and writing skills, students will be learning about Arab history, society, and culture. Classroom activities will be conducted totally in Arabic. Students will not be expected or pressured to speak in Classical Arabic, but will use their own dialects for speaking purposes. However, one of the main goals of the course will be to help the development of the skills to communicate and understand Educated Spoken Arabic, a form of Arabic that is based on the spoken dialects but uses the educated vocabulary and structures of Fusha.

NES 133-134(1211-1212) Introduction to Qur'anic and Classical Arabic (also RELST 133-134[1211-1212]) (LA-AS)

133, fall; 134, spring. 4 credits each semester. M. Younes.

This course is designed for students who are interested in reading the Qur'an and other texts in Classical Arabic. By the end of the semester, students will have mastered many of the common grammatical structures and will have a good working vocabulary. This course, and its follow-up in the Spring, provide a firm foundation on which to build an advanced study of Classical Arabic. No prior knowledge of Arabic is required.

NES 311-312(3201-3202) Advanced Intermediate Arabic I and II (also AS&RC 308-312[3100-3101]) @

311 fall; 312 spring. 4 credits each semester. *NES 311 satisfies Option 1.* Limited to 15 students. Prerequisite: for NES 311, NES 210 or permission of instructor; for NES 312, NES 311 or permission of instructor. Letter grades recommended. M. Younes and staff.

Introduces students to authentic, unedited Arabic language materials ranging from poems, short stories, and plays to newspaper articles dealing with social, political, and cultural issues. Emphasis is on developing fluency in oral expression through discussion of issues presented in the reading selections. There is more focus on the development of native-like pronunciation and accurate use of grammatical structures than on elementary and intermediate Arabic. A primary objective of the course is the development of writing skill through free composition exercises in topics of interest to individual students.

NES 414(4211) Readings in Arabic Literature # @ (LA-AS)

Fall. 4 credits. Prerequisite: NES 312, a 400-level Arabic course, or permission of instructor. S. M. Toorawa.

This course introduces students to Arabic prose literature through a close reading of selections by classical, medieval, and modern writers. The emphasis is on grammar and vocabulary.

NES 419(4203) Readings in Arabic Poetry (LA-AS)

Fall. 4 credits. Prerequisite: NES 312, a 400-level NES Arabic course, or permission of instructor. S. M. Toorawa.

This course introduces students to Arabic poetry through a close reading of unedited selections by major Arab poets. The emphasis is on grammar.

Hebrew

NES 101-102(1101-1102) Elementary Modern Hebrew I and II (also JWST 101-102[1101-1102])

101, fall; 102, spring. 4 credits each semester. Limited to 18 students per section. Prerequisite: for NES 102, NES 101 with grade of C- or better or permission of instructor. Letter grades only. S. Shoer.

Intended for beginners. Provides a thorough grounding in reading, writing, grammar, oral comprehension, and speaking. Students who complete the course are able to function in basic situations in a Hebrew-speaking environment.

NES 103(1103) Elementary Modern Hebrew III (also JWST 103[1103])

Fall. 4 credits each semester. Limited to 15 students per section. Prerequisite: NES 102 with grade of C- or better or permission of instructor. Letter grades recommended. N. Scharf.

Sequel to NES 101-102. Continued development of reading, writing, grammar, oral comprehension, and speaking skills.

NES 200(2100) Intermediate Modern Hebrew (also JWST 200[2100]) @

Spring. 4 credits. *Satisfies Option 1.* Prerequisite: NES 103 with grade equivalent to C- or above or permission of instructor. Letter grades recommended. N. Scharf.

Introduces Hebrew literature and Israeli culture through the use of texts and audiovisual materials.

NES 301-302(3101-3102) Advanced Intermediate Modern Hebrew I and II (also JWST 301-302[3101-3102]) @

301, fall; 302, spring 4 credits. *Satisfies Option 1.* Limited to 15 students. Prerequisites: for 301, NES 200 with grade of C- or above or permission of instructor; for 302, NES/JWST 301. N. Scharf.

Advanced study of the Hebrew language both orally and through the analysis of mostly unedited texts of social, political, and cultural relevance, with less emphasis on the study of grammar. Students are introduced to articles published in Israeli newspapers and magazines, works by authors, and movies. Students develop composition and advanced writing skills by studying language structure, idioms, and various registers of style.

NES 305(3105) Conversational Hebrew (also JWST 305[3105])

Spring, 2 credits. Limited to 15 students. Prerequisite: NES 302, 400, or permission of instructor; non-native speakers only. Letter grades recommended. N. Scharf.

Intended to continue the development of all aspects of the language. Emphasis, however, is placed on speaking skills and understanding by using text material relevant to Israeli contemporary society. The instructor is sensitive to individual student needs.

NES 401(4101) Modern Hebrew Literature (also JWST 401[4101]) @ (LA-AS)

Spring, 4 credits. D. Starr.

For description, see NES 401 under "NES Topics Courses."

NES 420(4102) Biblical Hebrew Prose—Judges (also JWST/RELST 420[4102]) @ # (LA-AS)

Spring, 4 credits. *Satisfies Option 1.* Prerequisite: one year of biblical or modern Hebrew. L. Monroe.

The biblical book of Joshua recounts miraculous stories of the Israelite conquest and settlement of the land of Canaan under the leadership of Joshua ben Nun. The details of these accounts have drawn the attention of biblical scholars and archaeologists alike, who are interested in questions of who the Israelites were, how they came to occupy the land of Canaan, and how they understood themselves in relation to their Canaanite neighbors. In this class we will read the book of Joshua in the original Hebrew, with a particular focus on how the language of the text illuminates the Israelites' own evolving understanding of their origins and collective identity. Close attention will be paid to matters of grammar, syntax, and vocabulary in order to develop students' skills in reading biblical Hebrew prose and to enhance their understanding of the Hebrew language itself as a window on ancient Israelite thought. Students will be expected to utilize commentaries, biblical Hebrew grammars and lexicons in their preparation of assigned texts. Prior training in Hebrew is required.

Hindi-Urdu

NES 201-202(2201-2202) Intermediate Written Urdu (also URDU 201-202[2201-2202])

201, fall; 202, spring, 2 credits. Prerequisite: HINDI 102 or HINDI 110; and URDU 125 or permission of instructor. Letter grades only. S. Singh.

For description, see URDU 201-202.

Persian

NES 115-116(1320-1321) Elementary Persian I and II

115, fall; 116, spring, 4 credits each semester. Limited to 15 students. I. Gocheleishvili.

Designed for students who want an effective and comprehensive approach to learning Persian that will enable them to progress in the language skills of speaking, listening, reading, and writing. At the completion of this course, students are prepared to deepen their comprehension of Persian through literature and the media.

NES 119-219(1319-2319) Intermediate Persian I and II

119, fall; 219, spring, 4 credits. *NES 219 @ satisfies Option 1.* Prerequisite: one year (two semesters) elementary Persian or permission of instructor. I. Gocheleishvili.

A continuation of NES 115-116. Continued development of speaking, listening, reading, and writing skills.

Turkish

NES 117-118(1330-1331) Elementary Turkish I and II

117, fall; 118, spring, 4 credits each semester. Limited to 15 students. I. Begen.

Intended for students with no experience in Turkish. The goal is to provide a thorough grounding in Turkish language with an emphasis on communication. Small class size provides intensive practice in speaking, writing, and listening/comprehension. The course is co-sponsored by the Institute for European Studies.

Ancient Near Eastern Languages

Akkadian

NES 333-334(3410-3411) Elementary Akkadian I and II (also NES 633-634[6410-6411])

333, fall; 334, spring # @ (LA-AS). 4 credits each semester. Prerequisite: for NES 334, NES 333 or permission of instructor. Recommended: knowledge of another Semitic language. A. Gadotti and L. Allred.

Introduction to the Semitic language of the Akkadians and Babylonians of ancient Mesopotamia. Using the inductive method, students are rapidly introduced to the grammar and the cuneiform writing system of Akkadian through selected readings in the Code of Hammurabi, the Descent of Ishtar, and the Annals of Sennacherib. Secondary readings in comparative Semitic linguistics, the position of Akkadian in the family of Semitic languages and on the history and culture of Mesopotamia provide a background for study of the language.

Topics Courses

NES 123(1111) Introduction to Biblical Hebrew I (also JWST/RELST 123[1111])

Fall, 3 credits. L. Monroe.

This course is designed to introduce students to the language, grammar, and vocabulary of the Hebrew Bible/Old Testament. By the end of the semester students will be able to read and understand a number of biblical narrative passages. This course will benefit students interested in ancient Israel and the ancient

Near East. It will also permit students to read and understand the grammar of medieval and modern Hebrew. Emphasis will be placed on learning vocabulary in context so that students begin to understand the language of the Bible as a window on ancient Israelite religion, culture, and experience.

NES 224(2624) Introduction to Hebrew Bible—Prophecy (also JWST/RELST 224[2624]) (LA-AS)

Fall, 3 credits. L. Monroe.

The purpose of this course is to examine the phenomenon of prophecy in the religion of ancient Israel, as it is revealed through prophetic texts within the Hebrew Bible. We will seek to understand the social reality that underlies both the content and composition of these texts, and the relationship of the prophet to the Israelite institutions of the temple/cult and palace. We will implement literary critical, historical, sociological and anthropological approaches in an effort to reconstruct the development of Israelite prophecy from its earliest appearance in narrative sources to its alleged cessation during the Second Temple Period.

NES 247(2747) Introduction to Art History: Islamic Art (also ART H 250[2350]) (HA-AS)

Fall, 4 credits. C. Robinson.

For description, see ART H 250.

NES 251(2651) Holy War, Crusade, and Jihad in Judaism, Christianity, and Islam (also HIST 269[2691], JWST/RELST 251[2651], COM L 231[2310]) # @ (HA-AS)

Fall, 3 credits. R. Brann.

Articulating and elaborating religious justifications for war is a cultural practice unique to the three monotheistic traditions and their respective textual communities. This notion and its practice have had profound historical consequences in the past that extend to and inform present-day global socio-political conflicts. The first part of this course will examine the origins of the concept of holy war, crusade and jihad and trace their cultural histories. The second part of the course will be devoted to discussing the ways in which contemporary discourses such as a "clash of civilizations," "the Evil Empire," "The Great Satan," and the "Axis of Evil" draw upon these respective cultural histories and explicitly or implicitly positing political conflict as a "battle for God."

NES 256(2556) Introduction to the Quran (also JWST/RELST 256[2556]) # @ (CA-AS)

Fall, 3 credits. S. M. Toorawa.

In 7th-century Arabia, a merchant by the name of Muhammad shared with his followers the Book of God as revealed to him through the archangel Gabriel. That book has since become a source of spiritual guidance and law for over a billion people the world over. In this course, a literary, historical and religious introduction to that book, the Quran, we explore: the circumstances of the Quran's revelation (asbaah an-nuzuul); its written compilation (or redaction); its narrative structure; its major themes; its connections to and departures from the Hebrew Bible (Tawraat) and the New Testament (Injeel); Qur'anic commentary (tafseer); translation and the problems associated with it; the impact of the Qur'an on political and religious thought; and the influence of the Qur'an on literature.

NES 261(2661) Ships and Seafaring—Introduction to Nautical Archaeology (also ARKEO 275[2661], JWST 261[2661]) @ # (HA-AS)

Spring. 4 credits. C. Monroe.

A survey of the history and development of ships and seafaring as revealed by shipwrecks, boat burials, texts, art, and other evidence. The role of nautical technology and seafaring among the maritime peoples of the ancient Mediterranean world—Canaanites, Minoans, Mycenaean, Phoenicians, Hebrews, Greeks, and Romans—as well as the riverine cultures of Mesopotamia and Egypt, is addressed. The survey stretches from the earliest evidence for Mediterranean seafaring around 10,000 BCE to the first transatlantic voyages in the 15th century, including Arab, Viking, and European explorers, and the birth of modern capitalism in the Italian Maritime Republics. Along the way, economics, war, exploration, cult, life at sea, and colonization are discussed.

NES 263(2663) Introduction to Biblical History and Archaeology (also JWST/ARKEO/RELST 263[2663]) (HA-AS)

Fall. 3 credits. J. Zorn.

There are no prerequisites for this class. A survey of the principal historical and archaeological developments in Canaan/Israel from the Neolithic period (ca. 9000 BCE) to the Babylonian Exile (586 BCE), with a focus on the origins and evolution of the Israelite people. Includes an introduction to archaeological and historical methodologies utilized in the reconstruction of ancient cultures in the area, as well as the basic bibliography of the field. Emphasis will be placed on the use of archaeological and historical data for the understanding of some major problems in Israelite history and archaeology. Topics to be covered include: the Neolithic Revolution, the rise of the Canaanite city states, the dating of the cultural milieu of the Patriarchs, the question of the Israelite conquest, and the role of the Philistines. There will be weekly lectures on aspects of daily life, such as food production, metallurgy and Israelite religion. Recommended for students planning to participate in excavations in Israel.

NES 268(2668) Ancient Egyptian Civilization (also ARKEO/JWST 268[2668]) @ # (HA-AS)

Spring. 3 credits. C. Monroe.

The course surveys the history and culture of pharaonic Egypt from its prehistoric origins down to the early first millennium BCE. Within a chronological framework, the following themes or topics will be considered: the development of the Egyptian state (monarchy, administration, ideology); social organization (class, gender and family, slavery); economic factors; empire and international relations.

NES 272(2672) Imperialism and the History of the Modern Middle East (also JWST 272[2672])

Spring. 3 credits. Z. Fahmy.

This introductory course examines the historical impact that western imperialism and anti-colonial resistance had on the shaping of society, culture and politics in the modern Middle East. Through tracing the dynamics of Middle Eastern responses to European dominance, we hope to better understand the history of the region.

NES 274(2674) History of the Modern Middle East: 19th–20th Centuries (also JWST 274[2674], GOVT 274[2747], HIST 276[2674]) (HA-AS)

Fall. 3 credits. Z. Fahmy.

This course examines major trends in the evolution of the Middle East in the modern era. Focusing on the 19th and 20th centuries, we will consider Middle East history with an emphasis on four themes: imperialism, nationalism, modernization, and Islam. Readings will be supplemented with translated primary sources, which will form the backbone of class discussions.

NES 275(2675) The Religions of Ancient Israel (also JWST/RELST 275[2675], ARKEO 276[2675]) (HA-AS)

Spring. 3 credits. J. Zorn.

A casual reading of the Hebrew Bible might suggest that the Iron Age Israelites were normative monotheists, with occasional deviations. However, a religion approaching society-wide, true monotheism began to emerge only with the return from the Babylonian Exile, after 539 BC. Before that, Israelite religious beliefs and practices were much more complex and their society anything but strictly monotheistic. This class, through the use of archaeological and epigraphic data and a closer reading of the Biblical text, will explore topics like: temple worship, private religion, religion of women, cult prostitution, burial practices and beliefs about the afterlife, the role of prophets, the roles of "foreign" gods like Baal, Asherah, and Tammuz, human sacrifice, and more.

NES 293(2793) Middle Eastern Cinema (also JWST 291[2793], FILM/COM L 293[2930], VISST 293[2193]) @ (LA-AS)

Fall. 4 credits. D. Starr.

We frequently see representations of "Middle Easterners" in the American media, whether on the news, or in TV dramas and film. But there are far fewer opportunities to see how the media from the Middle East represent their own cultures. Students in this course view films from the Arab world, including North Africa and the Eastern Mediterranean, as well as from Iran and Israel. The films range from musical comedies, to dramas, to experimental genres. Readings provide background on the particular cultural and historical contexts in which the films are produced and familiarize students with techniques for critically interpreting visual media. Films are screened on Mondays at 7:30 p.m. and also are available on reserve.

NES 303(3703) Cosmopolitan Alexandria (also NES 603[6703])

Spring. 4 credits. D. Starr.

Alexandria, the Egyptian port city, has a long history of rich cultural interaction. In this course we will examine literary and artistic representations of modern Alexandria which have played an important role in creating, disseminating and immortalizing the city as a cosmopolis. Readings and discussions will interrogate the relationship between the city's cosmopolitan character and its colonial history. Texts may include works by: E. M. Forster, Constantin Cavafy, Lawrence Durrell, Fausta Cialente, Edwar al-Kharrat, Ibrahim Abdel Meguid, André Aciman, and Harry Tsalas. We will also discuss Youssef Chahine's semi-autobiographical Alexandria films.

NES 309(3709) Modern Arabic Drama

Spring. 4 credits. S. M. Toorawa.

An introduction to the richness of Arabic drama in the 20th century. We will use our readings (silent and performed) and discussions to broach such topics as Arabic theatre's antecedents, its relationship to the cinema, the influence of the West, the role of religion, and the avant-garde. All texts in English translation.

NES 320(3720) Women in Ancient Israel (also RELST/JWST 320[3270])

Spring. 4 credits. L. Monroe.

NES 350(3850) Middle Eastern Politics (also GOVT 331[3313])

Spring. 4 credits. D. Patel.

For description, see GOVT 331.

NES 365(3665) Ancient Iraq II (also JWST/ARKEO 365[3665]) (HA-AS)

Fall. 4 credits. D. I. Owen.

An introduction to the history, culture, literature, and archaeology of Syro-Mesopotamia from the emergence of the Babylonians around 2000 BCE through the Persian period, which was brought to an end by the conquest of Alexander the Great in 331 BCE. The inter-relationships between the various political entities during this long period, the Amorites, Hittites, Hurrians, Syrians, and Elamites (Iranians), will be emphasized.

NES 392(3792) The Discovery of Modernity in Iranian Literature

Spring. 4 credits. R. Daneshvar.

Contemporary Persian literature in English translation. No prior knowledge of Persian needed. The focus of the course is on the writing of two authors who essentially founded modern Iranian literature: Sadehg Hedayat and Jamalzadeh. Hedayat, who began publishing in the 1920s, is considered the first modern Iranian author. His celebrated novel *The Blind Owl* has been translated into many languages. Although each of the men wrote a novel, their chief works were short stories, which will be the focus of this course. Both men were influenced by world literature and also by Iranian literature at the very beginning of the 20th century. In the early 1900s, a new kind of writing—a political prose—had emerged in Iran, by writers highly influenced by the French revolution and the literature of the French Enlightenment (Voltaire, Diderot, etc.). This political literature was in part born of the country's constitutional revolution. We will read some of this material as background to better understand the fiction of Hedayat and Jamalzadeh.

NES 400(4100) Advanced Readings in Modern Hebrew (also JWST 400[4100]) @ (LA-AS)

Fall. *Satisfies Option 1*. Limited to 15 students. Prerequisite: NES 302 or permission of instructor.

This course is designed to hone the reading skills of advanced Hebrew-language students. We will read authentic, unedited texts from a variety of sources including newspapers (news and cultural features), journals, graphic novels, and short stories. Written assignments will include short analytic essays, op-ed articles and fictional pieces in Hebrew. Students are also expected to engaging in regular translation exercises. Class discussion is conducted in Hebrew.

NES 401(4101) Modern Hebrew Literature (also JWST 401[4101]) @ (LA-AS)

Spring. 4 credits. *Satisfies Option 1.*
Prerequisite: NES 400 or equivalent.
Students who successfully completed 302 may enroll with permission of instructor. Literature has held a privileged place in the revival of modern Hebrew and the formation of Israeli culture. This course affords students the opportunity to read a sampling of this exciting literature. Each semester features a different theme, topic, or period in the development of modern Hebrew literature. Readings may include short stories, novels, poetry, and drama. Readings, writing assignments, and discussions are in Hebrew.

NES 405(4605) Contesting Identities in Modern Egypt (also HIST 409[4091]) @ (HA-AS)

Fall. 4 credits. Z. Fahmy.
This seminar examines the dynamics of modern collective identities that dominated the Egyptian public sphere in the long 20th century. We will explore the underpinnings and formation of territorial Egyptian nationalism, pan-Arabism and Islamism through close readings and class discussions of important theoretical, historiographical and primary texts.

NES 414(4211) Readings in Arabic Literature (LA-AS)

Spring. 4 credits. S. M. Toorawa.

NES 423(4523) Visualizing Sacred Iberia (also NES 623[6523], ART 415/615[4315/6315])

Fall. 4 credits. C. Robinson.
For description, see ART H 415.

NES 438(4738) Imagining the Mediterranean (also JWST 438[4738], COM L 496[4960]) @ (LA-AS)

Fall. 4 credits. G. Holst-Warhaft.
Through a series of readings in poetry and prose from Greece, Spain, Morocco, Turkey, Israel and Egypt, the course examines how Mediterranean writers interact with the sensuous aesthetics of landscape, music, and ritual in the Mediterranean. We will be concerned with how poetry, music, dance and image interact in the region, and how this relationship is reflected in 20th-century literature from and about the Mediterranean. The readings will focus on particular cases, such as the relationship of Lorca's poetry to the of Andalusia, lowbrow musical form in Greece, and the nostalgia for the mythical city of Alexandria in Cavafy and other Alexandrian authors. We will also consider how the myth of the Mediterranean has affected modern literary imagination within and beyond the region.

NES 440(4540) Maimonides and Averroes (JWST/RELST 440[4540], SPAN 438[4380])

Spring. 4 credits. R. Brann.
Moses Maimonides, who was born in Cordoba (1138), moved to Fez as a youth, and died in Cairo (1204), is regarded by Jewish, Islamic, and Christian tradition alike as the most important Jewish religious intellectual of the classical age of Islam/the High Middle Ages. This seminar will examine Maimonides as the product of his time and place and, because of his stature as a communal figure, rabbinic scholar, court physician and philosopher, as a catalyst for cultural developments including

his complex relationship with Arabo-Islamic culture.

NES 447-448(4947-4948) Middle Eastern Music Ensemble (also MUSIC 431-432[3614])

447, fall; 448, spring. 1 credit each semester. Limited to 40 students.
Prerequisite: permission of instructor.
M. Hatch and staff.
Performance of diverse musical traditions from the Middle East. Instruction in percussion, oud, ney, and kanoun, among others.

NES 449(4549) The Mediterranean in the Age of Cervantes (also S HUM 424, COM L 411[4111], SPAN 4340, HIST 429[4290])

Spring. 4 credits. M. Garces.
For description, see S HUM 424.

NES 460(4560) Theory and Method in Near Eastern Studies (CA-AS)

Spring. 4 credits. Requirement for NES majors. K. Haines-Eitzen.
Seminar offering advanced Near Eastern Studies students the opportunity to read and discuss the range of theories and methods that have been employed by scholars in the interdisciplinary area of Near Eastern Studies. After giving attention to the historical development of area studies programs—and their current status and relevance—students read a wide range of highly influential works in Near Eastern Studies. Literary theory, historiography, post-colonialism, archaeology, gender theory, and comparative religions are a few of the approaches, methods, and theories explored. Authors include Talal Asad, Homi K. Bhabha, Mircea Eliade, Timothy Mitchell, Mary Douglas, Zachary Lockman, Edward Said, J. Z. Smith.

NES 470(4670) Wealth and Power in Early Civilizations (also JWST 470[4670]) @ # (HA-AS)

Fall. 4 credits. C. Monroe.
How were wealth and power created and distributed in ancient Mesopotamia, Egypt, and the Aegean? Using archaeological, anthropological, sociological and historical approaches, several case studies will be considered: the emergence of urbanism in the Uruk and Minoan worlds; the construction of bureaucracy in the Ur III state; the organization of empire under Hittite, Egyptian and Assyrian rulers; and the economic strategies of resistance used in smaller kingdoms and city-states like Israel and Phoenicia. The role of the trader in these societies will be examined, as will the role of certain polities within larger economic systems. The case studies are approached after students are introduced to the intellectual foundations of historical materialism in early authors (like Smith, Marx, and Weber) and are versed in current approaches to political economy in early states.

NES 472(4672) Nationalism(s) and Nation-States in the Arab World

Spring. 4 credits. Z. Fahmy.
This seminar examines the emergence of national identities, nationalist movements, and nation-states in the modern Arab world. First, we will examine various approaches to the question of nationalism, using Benedict Anderson's *Imagined Communities* as our basic reference. We will then test the applicability of these general theories to the Arab World through our examination of specific cases studies.

NES 491-492(4991-4992) Independent Study, Undergraduate Level

Fall and spring. Variable credit.
Prerequisite: permission of instructor. Staff.

NES 498-499(4998-4999) Independent Study, Honors

Fall and spring. 8 credits. Prerequisite: permission of instructor. Staff.

NES 620(6112) Readings in Medieval Hebrew Poetry and Prose (also JWST 620[6112])

Fall. 4 credits. R. Brann.
Critical readings in medieval Hebrew lyrical and liturgical poetry and imaginative rhymed prose from 10th-century Muslim Spain to Renaissance and Baroque Italy. Course may be repeated for credit.

NES 691-692(6991-6992) Independent Study: Graduate Level

Fall and spring. Variable credit.
Prerequisite: permission of instructor. Staff.

PHILOSOPHY

S. MacDonald, Chair, K. Bennett, R. Boyd, W. Breckenridge, T. Brennan (on leave fall 2007), A. Chignell, M. Eklund, G. Fine (on leave spring 2008), H. Hodes, T. Irwin (on leave fall 2007-2008), M. Kosch, C. Mag Uidhir, R. W. Miller (on leave Fall 2007), M. Moody-Adams, D. Pereboom, N. Sethi, C. Shields, N. Silins, N. Sturgeon, B. Weatherston. Emeritus: C. A. Ginet, S. Shoemaker.

The study of philosophy provides students with an opportunity to become familiar with some of the ideas and texts in the history of thought while developing analytical skills that are valuable in practical as well as academic affairs. It affords the excitement and satisfaction that come from understanding and working toward solutions of intellectual problems. The curriculum includes offerings in the history of philosophy, logic, philosophy of science, ethics, social and political philosophy, metaphysics, and theory of knowledge. Any philosophy course numbered in the 100s or 200s is suitable for beginning study in the field. Sections of PHIL 100, 110, and 111 are part of the first-year writing seminar program; they are taught by various members of the staff on a variety of philosophical topics, and because of their small size (17 students at most) they provide ample opportunity for discussion. Students who want a broad introduction to philosophy may take PHIL 101, but many students with special interests may find that the best introduction to philosophy is a 200-level course in some particular area of philosophy; such courses have no prerequisites and are usually open to first-year students.

The Major

Students expecting to major in philosophy should begin their study of it in their freshman or sophomore year. Admission to the major is granted by the director of undergraduate studies of the department on the basis of a student's work during the first two years. Normally the student must have completed two philosophy courses with grades of B or better. Eight philosophy courses, taken for a letter grade, are required for the major. They must include at least one course on ancient philosophy (PHIL 211, or a course with a large component on Plato or Aristotle), at least one course on classical modern metaphysics and epistemology from Descartes through Kant (e.g., PHIL 212 or a course on the empiricists, the rationalists, or Kant), and a minimum of three courses numbered above 300. Students admitted to the major (after fall 1996) are required to take a minimum of six philosophy courses numbered above 200, and may not count more than one section of PHIL 100, 110, or 111 toward the major. Courses numbered 191-199 do not count toward the major. A course in formal logic (e.g., PHIL 231), while not required, is especially recommended for majors or prospective majors.

Philosophy majors must also complete at least 8 credits of course work in related subjects approved by their major advisors. Occasionally majors may serve as teaching or research aides, working with faculty members familiar with their work.

Honors. A candidate for honors in philosophy must be a philosophy major with an average of B- or better for all work in the

College of Arts and Sciences and an average of B+ or better for all work in philosophy. In either or both semesters of the senior year a candidate for honors enrolls in PHIL 490 and undertakes research leading to the writing of an honors essay by the end of the final semester. *Honors students normally need to take PHIL 490 both semesters of their senior year to write a satisfactory honors essay.* PHIL 490 does not count toward the eight philosophy courses required for the major. Prospective candidates should apply at the Department of Philosophy office, 218 Goldwin Smith Hall.

Fees

In some courses a small fee may be charged for photocopying materials to be handed out to students.

Introductory Courses

First-Year Writing Seminars in Philosophy

Fall and spring, 3 credits. Consult John S. Knight Institute brochure for times, instructors, and descriptions.

PHIL 101(1101) Introduction to Philosophy # (KCM-AS)

Fall and spring, 3 credits. Prerequisite: none. Open to freshmen. Fall: K. Bennett, Spring: M. Eklund.

Fall: An introduction to basic issues and methods in philosophy. Topics will include the following: the existence of God (what evidence would belief in God require? And how can God's existence be reconciled with the amount of pain and suffering in the world?), knowledge of the external world (can we be sure that we are not dreaming, or in the Matrix?), freedom of the will (do you really have a choice about what classes you take next semester?), some basic questions in ethics (what, if anything, makes an action right or wrong?), and possibly an application thereof (e.g. is vegetarianism morally obligatory?)

Spring: The course aims to give a broad introduction to philosophy – the different types of questions about ourselves, the world, and the relation between ourselves and the world that traditionally have been the focus of philosophy. Among the topics we will consider are questions about the nature of knowledge, the nature of our minds, the existence of free will and the existence of God.

PHIL 145(1450) Contemporary Moral Issues (KCM-AS)

Fall, 3 credits. Staff.
For description, see department web site.

PHIL 191(1910) Introduction to Cognitive Science (also COGST 101[1101], PSYCH 102[1200], CS 101[1710], LING 170[1170])

Fall, 4 credits. M. Spivey.
For description, see PSYCH 102.

PHIL 195(1950) Controversies About Inequality (also SOC/D SOC/PAM/ILROB 222[2220], GOVT 222[2225]) (SBA-AS)

Fall, 4 credits. S. Morgan.
For description, see SOC 222.

PHIL 201(2010) Puzzles and Paradoxes

Fall, 4 credits. M. Eklund.
The course provides an overview of a number of famous philosophical puzzles and paradoxes and important attempts to solve

them. Among the paradoxes we will discuss are Zeno's paradoxes of space, time and motion, the paradox of the heap, the liar paradox, Russell's set-theoretic paradox, and paradoxes of knowledge and rationality.

PHIL 211(2110) Ancient Philosophy (also CLASS 231[2661]) # (KCM-AS)

Fall, 4 credits. Prerequisite: none. Open to freshmen. G. Fine.

This course examines the origin and development of Western philosophy in Ancient Greece and Rome. We will study some of the central ideas of the Pre-Socratics, Socrates, Plato, Aristotle, and the Hellenistic philosophers (Epicureans, Stoics, and Skeptics). Questions to be considered include: What are the nature and limits of knowledge? Is knowledge even possible? How reliable is perception? What are the basic entities in the universe: atoms, Platonic Forms, or Aristotelian substances? Is moral knowledge possible? What is the nature of happiness and what sort of life will make people happy? Do human beings have free will? Ought we to fear death?

PHIL 212(2120) Modern Philosophy # (KCM-AS)

Spring, 4 credits. Prerequisite: none. Open to freshmen. A. Chignell.

A survey of Western philosophy in the 17th and 18th centuries: Descartes, Locke, Spinoza, Leibniz, Berkeley, Hume, and Kant. We will focus largely on epistemology (ideas, skepticism, belief, knowledge, science) and metaphysics (bodies, minds, God, causation, natural laws, afterlife, personal identity). Some of the ethical implications of these systems will also be mentioned in passing. Best taken in conjunction with PHIL 211 (Ancient Philosophy), although this is not a prerequisite.

PHIL 217(2170) 19th- and 20th-Century European Thought (also GERST 353[3550]) (KCM-AS)

Spring, 4 credits. M. Kosch.
Survey of European social theory from Hegel to Foucault (via Marx, Nietzsche, Freud, Weber, and the Frankfurt School).

PHIL 231(2310) Introduction to Deductive Logic (MQR)

Spring, 4 credits. Prerequisite: none. Open to freshmen. H. Hodes.

The logic of truth-functional connectives, identity, and the universal and existential quantifiers; a formal language; translation between it and English; constructing worlds and models; and constructing proofs. We'll use a textbook accompanied by a software package, *Language, Proof, and Logic* by J. Barwise and J. Etchemendy.

PHIL 241(2410) Ethics (KCM-AS)

Spring, 4 credits. Prerequisite: none. Open to freshmen. N. Sturgeon.

An introduction to the philosophical evaluation of moral theories and moral arguments. Ethical relativism, ethical egoism, ethical skepticism, utilitarianism, and duty-based theories; some application to controversial contemporary issues.

PHIL 242(2420) Social and Political Philosophy (KCM-AS)

Spring, 4 credits. K. Bennett.
For description, see department web site.

PHIL 245(2450) Ethics and Health Care (KCM-AS)

Spring. 4 credits. Prerequisites: none. Open to freshmen. N. Sethi.

An introduction to the philosophical study of ethical problems that arise from the practice of medicine as such or that arise in response to developments within medicine and the larger world. Does it require that all have access to approximately the same level of health care? In addition to learning how to arrive at and defend ethical positions, we reflect on the techniques and methods we use.

PHIL 246(2460) Ethics and the Environment (also B&SOC/S&TS 206[2061]) (KCM-AS)

Spring. 4 credits. Limited to 40 students. Open to all undergraduates; freshmen by permission of instructor. Staff.

For description, see B&SOC 206.

PHIL 249(2490) Feminism and Philosophy (also FGSS 249[2490]) (KCM-AS)

Fall. 4 credits. Prerequisite: none. Open to freshmen. N. Sethi.

This class will examine a variety of feminist attempts to understand and explain the various ways in which traditional philosophy reflects bias against women. We will also consider a variety of feminist viewpoints and examine how these are used to address "real life" issues regarding sexuality, violence, family structure, identity, peace, and war.

PHIL 251(2510) Introduction to Philosophy of Art (KCM-AS)

Fall. 4 credits. C. Mag Uidhir.

This course will be an introduction to the core issues in contemporary analytic philosophy of art. The areas covered will include definitions of art, the ontology of art, the nature of art interpretation and evaluation, aesthetic properties, and fictionality. Special attention will be given to issues in the philosophy of literature and the philosophy of music.

PHIL 261(2610) Knowledge and Reality (KCM-AS)

Spring. 4 credits. Prerequisite: none. Open to freshmen. N. Silins.

An introduction to philosophical questions about the nature of knowledge and reasonable belief, about sources of knowledge and reasonable belief such as perception, memory, reasoning and testimony, and about the extent and source of our knowledge about our own minds.

PHIL 262(2620) Philosophy of Mind (KCM-AS)

Fall. 4 credits. Prerequisite: none. Open to freshmen. N. Silins.

We will evaluate views about the nature of mental states and about their relation to the brain, behavior, and the world. Questions we will consider include: are mental states the same as states of our brains? If not, what is the relation between them and states of our brains? How is it possible for mental states to cause our behavior? We will pay special attention to questions about the nature of consciousness and about whether consciousness can be understood in physical terms.

PHIL 263(2630) Religion and Reason (also RELST 262[2630]) (KCM-AS)

Fall. 4 credits. Prerequisites: none. D. Pereboom.

In this course we will examine the most prominent arguments for the existence of

God—the ontological, cosmological, teleological arguments, and the argument from religious experience—and the most significant arguments against the existence of God—the arguments from evil and from divine hiddenness. We will then consider ways in which belief in God might contribute to meaning and fulfillment in life, and whether these ways might provide reasons for believing in God. Course readings will be from both historical and contemporary sources.

PHIL 264(2640) Introduction to Metaphysics

Spring. 4 credits. K. Bennett.

For description, see department web site.

PHIL 270(2700) Truth and Interpretation (also LING 270[2270], COGST 270[2700]) (KCM-AS)

Fall. 4 credits. B. Weatherston.

An introduction to a variety of issues in semantics and in the related philosophical literature. Topics include: the nature of semantic representations; the relationship between meaning and the world; word-meaning; the interaction of semantics and pragmatics.

Intermediate or Advanced Courses

Some of these courses have prerequisites.

PHIL 308(3080) Hellenistic Philosophy (also CLASS 341[3661])

Spring. 4 credits. T. Brennan.

For description, see department web site.

PHIL 310(3100) Aristotle (also CLASS 340[3664]) # (KCM-AS)

Fall. 4 credits. Prerequisite: one philosophy course. C. Shields.

For description, see department web site.

PHIL 311(3110) The Rationalists #

Spring. 4 credits. Prerequisite: one philosophy course. A. Chignell.

A mid-level look at the epistemology and metaphysics of some classical continental rationalists. Readings from some (but not all) of the following: Descartes, Malebranche, Spinoza, Leibniz, Wolff, the early Kant. One previous course in philosophy is required, and PHIL 211 or something comparable is recommended.

PHIL 315(3150) Medieval Philosophy # (KCM-AS)

Fall. 4 credits. S. MacDonald. Prerequisite: one previous philosophy course.

A selective survey of Western philosophical thought from the 4th to the 14th century. Topics include the problem of universals, the theory of knowledge and truth, the nature of free choice and practical reasoning, and philosophical theology. Readings (in translation) include Augustine, Boethius, Anselm, Abelard, Aquinas, Scotus, and Ockham. Some attention will be given to the development of ideas across the period and the influence of non-Western traditions on the West.

PHIL 318(3180) Origins of Analytic Philosophy

Fall. 4 credits. M. Eklund. Prerequisite: two previous philosophy courses or permission of instructor.

We will cover some of the important texts from the early years of analytic philosophy. Among the authors we will read are Frege, Russell, the early Wittgenstein, and Frank Ramsey. We will also cover some important

secondary literature. The emphasis will be on are foundational issues in metaphysics, philosophy of language and philosophy of mathematics.

PHIL 330(3300) Foundations of Mathematics (also MATH 384[3840]) (MQR)

Fall. 4 credits. H. Hodes.

This will be a course on the set theory of Zermelo and Fraenkel: the basic concepts, set-theoretic construction of the Natural, Integral, Rational and Real Numbers, cardinality, and time permitting the ordinals. Text: Enderton's "Elements of Set Theory."

PHIL 331(3310) Deductive Logic (also MATH 281[2810]) (MQR)

Spring. 4 credits. B. Weatherston.

The syntax and model-theory of classical propositional logic and classical predicate logic, including proofs of the soundness and completeness of Natural Deduction formalizations of these logics, with some attention to related material.

PHIL 332(3320) Philosophy of Language (also LING 332[3332])

Fall. 4 credits. Prerequisite: one philosophy course or permission of instructor.

W. Breckenridge.

For description, see department web site.

PHIL 347(3470) Global Justice (also GOVT 368[3685]) (KCM-AS)

Spring. 4 credits. R. Miller.

A study of the leading debates over the nature of justice among governments and people throughout the world. What are the obligations of people in rich countries to help the foreign poor? What principles of fairness should be observed in international economic arrangements? To what extent do governments have a right to control their territories without foreign intervention? What kinds of wars are just and what conduct in war is morally permissible? What is the moral significance of nationality, patriotism and national self-determination? How should international institutions operate, and what is their proper role in global governance? Readings will include work by political philosophers, political scientists, and economists, and will sometimes involve specific case studies.

PHIL 381(3810) Philosophy of Science: Knowledge and Objectivity (also S&TS 381[3811]) (KCM-AS)

Spring. 4 credits. R. Boyd.

Topics in the philosophy of science.

PHIL 382(3820) Philosophy of Psychology

Spring. 4 credits. D. Pereboom.

For description, see department web site.

PHIL 387(3870) Philosophy of Mathematics

Spring. 4 credits. Prerequisite: two courses in philosophy. Recommended: at least one course in logic. H. Hodes.

This course will consider several philosophical topics raised by mathematics, attending to the discussion of these topics in the course of the last 120 years; special attention to: the relationships between Mathematics and Logic, and the semantics of mathematical discourse.

PHIL 390(3900) Independent Study

Fall or spring. Credit TBA.

To be taken only in exceptional circumstances. Must be arranged by the student with his or her advisor and the faculty member who has agreed to direct the study.

Advanced Courses and Seminars

These courses are offered primarily for majors and graduate students.

PHIL 409(4090) German Philosophical Texts (KCM-AS)

Fall and spring. Variable credit.

Prerequisite: basic reading (not necessarily speaking) knowledge of German.

A. Chignell.

Reading and translation of philosophical texts in German.

PHIL 410(4100) Latin Philosophical Texts (also LATIN 612[7212], RELST 410[4100]) # (KCM-AS)

Fall and spring. Variable credit.

Prerequisites: knowledge of Latin and permission of instructor. S. MacDonald.

Reading and translation of philosophical texts in Latin.

PHIL 411(4110) Greek Philosophical Texts (also GREEK 611[7111]) # (KCM-AS)

Fall and spring. Variable credit.

Prerequisites: knowledge of Greek and permission of instructor. C. Shields.

Reading and translation of philosophical texts in Greek.

PHIL 417(4170) Topics in German Philosophy

Fall. 4 credits. M. Kosch.

For description, see department web site.

PHIL 419(4190) History of 20th-Century Philosophy

Spring. 4 credits. Prerequisite: two previous philosophy courses or permission of instructor. M. Eklund.

An overview of central issues in mid-20th-century analytic philosophy. Among the authors we will discuss will be Quine, Carnap, Geach and the later Wittgenstein. The emphasis will be on foundational issues in metaphysics and epistemology.

PHIL 432(4320) Topics in Logic (also MATH 482[4820]) (MQR)

Fall. 4 credits. Prerequisite: course in logic or permission of instructor. H. Hodes.

This course will focus on intuitionistic logic, including (1) its relationships to classical logic, some "intermediate logics" between intuitionistic and classical, and a modal logic. We'll consider (2) both proof-theoretic and model-theoretic characterizations of the consequence relations for these logics, (3) algebraic/topological (and time permitting, categorical) characterizations of intuitionistic consequence. (4) We'll also look at how certain mathematical theories have been developed on the basis of intuitionistic logic.

PHIL 437(4370) Problems in the Philosophy of Language

Spring. 4 credits. W. Breckenridge.

For description, see department web site.

PHIL 441(4410) Contemporary Ethical Theory (KCM-AS)

Fall. 4 credits. N. Sturgeon.

Topic: Moral Realism and its critics.

PHIL 446(4460) Topics in Political Obligation

Spring. 4 credits. E. Taylor.

For description, see department web site.

PHIL 460(4600) Epistemology

Spring. 4 credits. N. Silins.

Testimony and Disagreement. The focus of this course is on how we can gain, or lose, knowledge and reasonable beliefs through

discourse with others. We will first look at when and how we can come to know that something is true on the basis of somebody's saying that it's true. We will then look at whether and how we should revise our beliefs when we learn that someone else, apparently as intelligent and well-informed as us, disagrees with us.

PHIL 464(4640) Metaphysics (KCM-AS)

Fall. 4 credits. D. Pereboom.

What must agents be like in order to be morally responsible for their actions? Plausibly, they must be able to exercise some type of control in action, and this ability has traditionally been conceived as a kind of freedom of the will. In this course we will attempt to discern the exact nature of the freedom of the will required for moral responsibility, and to determine whether we could have this freedom given what we know about ourselves and the world. The course readings will mainly be from the analytic philosophical tradition since 1960, while there will be some reference to the work of Spinoza, Hume, and Kant on this topic.

PHIL 490(4900) Informal Study for Honors

Fall and spring. 4 credits. Prerequisite: senior honors students.

See "Honors" at the beginning of the Philosophy section.

PHIL 611(6110) Ancient Philosophy (also CLASS 673[7173])

Fall and spring. 4 credits. Fall: C. Shields, spring: Staff

Fall: For description, see department web site.

Spring: A study of Aristotle's *Posterior Analytics* in the context of his other writings on logic, epistemology, and the philosophy of science.

PHIL 612(6120) Medieval Philosophy

Spring. 4 credits. Prerequisite: graduate student in philosophy or permission of instructor. S. Macdonald.

A topic in medieval philosophy.

PHIL 641(6410) Ethics and Value Theory

Spring. 4 credits. Prerequisite: this course is a seminar for Philosophy graduate students; others may enroll only with permission of instructor. M. Kosch.

Topic: Relativism, Realism, Subjectivism and Noncognitivism in Ethics and Value Theory.

PHIL 662(6620) Philosophy of Perception

Fall. 4 credits. N. Silins.

A survey of contemporary work in the philosophy of perception.

PHIL 665(6650) Metaphysics

Spring. 4 credits. D. Boyd and K. Bennett.

For description, see department web site.

PHIL 700(7000) Informal Study

Fall or spring. Credit TBA.

To be taken by graduate students only in exceptional circumstances and by arrangement made by the student with his or her Special Committee and the faculty member who has agreed to direct the study.

PHYSICS

S. A. Teukolsky, chair (109 Clark Hall, 255-6016); C. P. Franck, director of undergraduate studies (101 Clark Hall, 255-8158, physicsdus@mailbox@cornell.edu); J. P. Alexander, T. A. Arias, E. Bodenschatz, P. Brouwer, D. G. Cassel, E. Cassel, I. Cohen, C. Csaki, J. C. Davis, G. F. Dugan, V. Elser, E. Flanagan, R. Fulbright, R. S. Galik, A. Giambattista, L. K. Gibbons, P. Ginsparg, B. Greene, Y. Grossman, S. M. Gruner, L. N. Hand, D. L. Hartill, C. I. Henley, G. Hoffstaetter, P. Krasicky, A. LeClair, G. P. Lepage, M. U. Liepe, P. L. McEuen, E. Mueller, M. Neubert, H. Padamsee, J. M. Parpia, J. R. Patterson, M. Perelstein, D. C. Ralph, B. Richardson, R. C. Richardsort, D. L. Rubin, A. Ryd, K. Schwab, K. Selby, J. P. Sethna, K. M. Shen, A. J. Sievers, E. Siggia, P. C. Stein, R. M. Talman, J. Thom, R. Thorne, H. Tye, C. Umrigar, M. D. Wang, I. Wasserman, P. Wittich, T.-M. Yan, J. York

The Department of Physics offers a full range of university-level work in physics, from general education courses for nonscientists to doctoral-level independent research. Major research facilities are operated by two component organizations, the Laboratory of Atomic and Solid State Physics (LASSP) and the Laboratory for Elementary Particle Physics (LEPP). LASSP carries out extensive research efforts in condensed-matter physics and biophysics. LEPP operates a major high-energy particle physics research facility at Wilson Laboratory, the Cornell electron-positron storage ring (CESR). Theoretical work is carried out in many fields of physics, including astrophysics. There is a full schedule of weekly research-oriented seminars and colloquia. Students find many opportunities for research participation and summer employment.

Introductory physics sequences are: 101-102, 207-208, and 112-213-214, or its more analytic version 116-217-218. In addition, there is a group of general-education courses, PHYS 200-206, 209, 210. PHYS 101-102, a self-paced autotutorial course, is designed for students who do not intend to take further physics courses and who do not have preparation in calculus. PHYS 112 and 207 both require calculus (MATH 190 or 191 or 111), and additional mathematics is required for subsequent courses in the sequence. PHYS 101-102 or 207-208 may be taken as terminal physics sequences. The three-semester sequences 112-213-214 or 116-217-218, are recommended for engineers and physics majors.

Courses beyond the introductory level that might be of interest to nonmajors include PHYS 316 Modern Physics I; PHYS 330 Modern Experimental Optics; and PHYS 360 Electronic Circuits.

Advanced placement and credit are offered as outlined in "Advanced Placement of Freshmen," or students may consult the director of undergraduate studies, as should students requesting transfer credit for physics courses taken at another college.

The Major

The major program is constructed to accommodate students who wish to prepare for professional or graduate work in physics as well as those who wish to complete their major program in the field of physics but have other post-graduation goals. The physics major

provides flexibility to pursue diverse interests through concentrations either within physics or outside physics.

Students who wish to major in physics are advised to start the physics sequence in the first semester of their freshman year. The major program still can be completed with a second-semester start, but flexibility in future course scheduling is reduced.

Prospective majors are urged to make an early appointment at the physics office for advice in program planning. Acceptance into the major program is normally granted upon completion of a year of physics and mathematics courses at Cornell with all course grades at the B minus level or higher. Students wishing to declare the major should meet with the director of undergraduate studies, who will match the student with a major advisor following discussion of the student's interests. Details of the major course program are worked out in consultation between the student and major advisor. For students graduating after 2008, grades of at least C- or S for S-U only courses are required in all courses for the physics major.

Physics Core

Common to all major programs is a requirement to complete a core of physics courses. In addition to the three-semester introductory sequence (PHYS 112–213–214 and 216 before 316 or 116–217–218), the core includes five upper-level courses—(1) the two-course sequence in modern physics (PHYS 316–317), (2) at least three semester hours of laboratory work selected from PHYS 310, 330, 360, 410, ASTRO 410, (3) an intermediate course in classical mechanics, and (4) an intermediate course in electromagnetism.

Accompanying these physics courses should be work in mathematics through at least MATH 222 or 294. Students following the

professional/graduate school channel are expected to complete at least one additional year of applicable mathematics (A&EP 321–322 or appropriate selections from mathematics).

In addition to the core, each physics major must complete 15 semester hours of credit in an area of concentration that has been agreed on by the student and major faculty advisor.

Concentration within Physics

A student who wishes to pursue professional or graduate work in physics or a closely related field should follow a concentration within the field of physics. For those students with a strong secondary school preparation, the sequence PHYS 116–217–218 is encouraged. Students are strongly encouraged to start the sequence with PHYS 116, even if they qualify for advanced placement credit for PHYS 112 and/or 213. Core courses in mechanics and electromagnetism will normally be PHYS 318 and 327, respectively. The minimum 15 hours beyond the core must be composed of physics courses with numbers greater than 300 and must include the senior laboratory course PHYS 410. This means a physics concentration needs a minimum of 7 credit hours of laboratory work to complete the requirements. The accompanying table shows several typical course sequences by means of which the major requirements may be completed. The primary distinction among students who may follow the different sequences is the amount and level of pre-college work in calculus and in physics. Changes in these typical patterns are common, as agreed on between student and major faculty advisor. Research work is encouraged of all majors. If this work is done as an independent project, PHYS 490, up to 8 credits can be applied to the concentration.

Concentration outside Physics

Such a concentration will reflect the student's interest in some area related to physics. The array of courses that comprise the concentration must have internal coherence. The array will normally be worked out in conference with the major faculty advisor and must be approved by the advisor. Of the required 15 hours credit beyond the core, at least 8 credits must be in courses numbered above 300. Students in the past have chosen to concentrate in a wide variety of fields, including (but not limited to) astronomy, business, chemical physics, computer science, econometrics, education, geophysics, history, and philosophy of science, law, meteorology, or public policy. A combined biology-chemistry concentration is common for pre-medical students or those who wish to prepare for work in biophysics.

The department particularly wishes to encourage students with an interest in science education. Physics majors can obtain teaching certification by concentrating in education and then completing a one-year master of arts in teaching (MAT) degree. Information about the education concentration and MAT can be obtained from the Department of Education's Cornell Teacher Education Program or from the director of undergraduate studies in physics. For students with concentrations outside physics, the core requirements in mechanics and electromagnetism can be appropriately met with PHYS 314 and 323, respectively.

Students with an astronomy concentration who might continue in that field in graduate school should use ASTRO 410, 431, 432 as part of the concentration; they are encouraged to use PHYS 318 and 327 to satisfy the core requirements in mechanics and electromagnetism.

Honors

A student may be granted honors in physics upon the recommendation of the Physics Advisors Committee of the physics faculty. There is no particular course structure or thesis requirement for honors.

Double Majors

Double majors including physics are possible and not at all uncommon. It should be noted, however, that any course used to satisfy a requirement of another major may be used in satisfaction of physics major requirements only if the student's concentration is *within* physics.

Courses with Overlapping Content

Because the department offers several courses with overlapping content, students should select courses carefully to meet the needs of their academic programs and to ensure credit for each course they take. Listed below are groups of courses with largely similar content. In general, students may receive credit for only one of the courses in each group.

PHYS 101, 112, 116, 207
PHYS 102, 208, 213, 217
PHYS 214, 218
PHYS 314, 318
PHYS 323, 327
PHYS 116, 216

In addition, students with credit for PHYS 101, 112, 116, or 207, or an advanced placement equivalent who wish to enroll in PHYS 200–

Typical Physics Course Sequences (other sequences are also possible)

Semester	No AP math or physics	1 year AP calculus and good HS physics	Outside concentrators	Outside concentrators (alternate)
1st – Fall	112	116	112	
2nd – Spring	213	217	213	112
3rd – Fall	214, 216	218	214, 216	213
4th – Spring	316, 3x0	316, 3x0	3x0	214, 216
5th – Fall	317, 327, 3x0	317, 327, 3x0	316	3x0, 316
6th – Spring	314/318, 443	318, 443	314	314, 3x0
7th – Fall	341, 410	341, 410	317, 323	317, 323
8th – Spring	Elective(s)	Elective(s)		

- For majors with concentrations outside physics, there is wide variation in individual programs, arranged to best match the field of concentration.
- Crossovers between the two sequences 112–213–214 and 116–217–218 are possible, although the combination 112–213–218 is difficult. PHYS 207 may be substituted for PHYS 112. Students taking 217 after 112 must co-register for 216.
- Students taking the honors sequence 116–217–218 are strongly encouraged to start with PHYS 116. Exceptionally well-prepared students may be able to begin work at Cornell with PHYS 217. Such students should visit the department office for advice in planning a course program.
- Physics electives for the major include 360, 444, 454, 455, 480, 490, 525, 553, 561, 572, the senior seminars 481–489, ASTRO 332 or 431–432, and A&EP 434.
- **One** semester of intermediate laboratory, listed here as 3x0, is required.
- Well-prepared sophomores wishing to take PHYS 318 should consult the instructor before registering.

206, 209, or 210 should obtain written permission from the instructor and the director of undergraduate studies in physics.

Course Prerequisites

Prerequisites are specified in physics course descriptions to illustrate the materials that students should have mastered. Students who wish to plan programs different from those suggested by the prerequisite ordering are urged to discuss their preparation and background with a physics advisor or with the instructor in the course. In many cases an appropriate individual program can be worked out without exact adherence to the stated prerequisites.

Courses

PHYS 012(1012) PHYS 112(1112) Supplement

Spring. 1 credit. S-U grades only.
R. Lieberman.

Provides backup instruction for PHYS 112. Recommended for students who either feel insecure about taking PHYS 112 or simply want to develop their problem-solving skills. Emphasis is on getting the student to develop a deep understanding of basic concepts in mechanics. Much class time is spent solving problems and applications.

PHYS 013(1013) PHYS 213(2213) Supplement

Fall. 1 credit. S-U grades only.
R. Lieberman.

Provides backup instruction for PHYS 213. Description is the same as for PHYS 012, except the material covered is electricity and magnetism.

PHYS 101(1101) General Physics I (PBS)

Fall, summer (eight-, six-, or first four weeks only for those during PHYS 102 in the second four weeks). 4 credits. Enrollment may be limited and freshmen are excluded. General introductory physics for nonphysics majors. Prerequisites: three years high school mathematics, including some trigonometry. Students without high school physics should allow extra time for PHYS 101. Includes less mathematical analysis than PHYS 207 but more than PHYS 200-206, 209, 210. B. Richardson.

Emphasizes quantitative and conceptual understanding of the topics of introductory physics developed without use of calculus. The course is mostly self-paced in a mastery-oriented format including eight subject units and a final retention (review) unit. Most instruction occurs in the learning center with personal tutoring by staff, assigned readings, problems, laboratory exercises, videotaped lectures, and solutions of sample test questions at our web site. Unit testing is designed to measure mastery with a limit of three test tries. Major topics for 101: kinematics, forces and dynamics, momentum, energy, fluid mechanics, waves and sound, thermal physics, kinetic theory, and thermodynamics. At the level of *College Physics*, second edition, by Giambattista, Richardson, and Richardson.

PHYS 102(1102) General Physics II (PBS)

Spring, summer (eight-week, six-week, or second four weeks only for those doing PHYS 101 in first four weeks). 4 credits. Enrollment may be limited. Prerequisite: for PHYS 102, PHYS 101 or 112 or 207. Includes less mathematical analysis than PHYS 208 but more than PHYS 200-206, 209, 210. B. Richardson.

Emphasizes quantitative and conceptual understanding of the topics of introductory physics developed without use of calculus. The course is mostly self-paced in a mastery-oriented format including eight subject units and a final retention (review) unit each semester. Most instruction occurs in the learning center with personal tutoring by staff, assigned readings, problems, laboratory exercises, videotaped lectures, and solutions of sample test questions at the course web site. Unit testing is designed to measure mastery with a limit of three test tries taken at the time of the student's choice. Major topics for 102: electricity and magnetism, optics, relativity, quantum, nuclear, and particle physics. At the level of *College Physics*, second ed., by Giambattista, Richardson, and Richardson.

[PHYS 103(1103) General Physics (PBS)

Summer. 4 credits. Prerequisite: three years high school mathematics, including trigonometry. Students without high school physics should allow extra time for PHYS 103. Introductory physics taught through interactive lectures; not recommended for students majoring in physics or engineering; fulfills same requirements as PHYS 101. Next offered 2008-2009.

Basic principles treated quantitatively but without calculus. Topics include kinematics; forces and Newton's Laws; momentum, angular momentum, and energy; thermal physics and fluid mechanics; sound and waves, thermodynamics. Text is *College Physics*, by Giambattista, Richardson, and Richardson.]

PHYS 112(1112) Physics I: Mechanics (PBS)

Fall, spring, summer (six-week session). 4 credits. Primarily for engineering students and prospective physics majors. Prerequisite: MATH 191. Recommended: co-registration in MATH 192. Students co-registered in MATH 191, 112, or equivalent may enroll, but PHYS 112 employs some math concepts before their completion in these calculus courses. Fall, A. LeClair; spring, E. Mueller; summer, R. Wheeler.

Covers the mechanics of particles with focus on kinematics, dynamics, conservation laws, central force fields, periodic motion. Mechanics of many-particle systems: center of mass, rotational mechanics of a rigid body, and static equilibrium. At the level of *University Physics*, Vol. 1, by Young and Freedman.

PHYS 116(1116) Physics I: Mechanics and Special Relativity (PBS)

Fall, spring. 4 credits. More analytic than PHYS 112; intended for students who are comfortable with deeper, somewhat more abstract approach; intended mainly but not exclusively for prospective majors in physics, astronomy majors, or applied and engineering physics majors. Prerequisites: good secondary school physics course, familiarity with basic calculus, and enjoyment of puzzle-solving. Corrective transfers between PHYS 116 and PHYS 112 (in either direction) are encouraged during first three weeks of instruction. Fall, L. Gibbons; spring, staff.

At the level of *An Introduction to Mechanics* by Kleppner and Kolenkow.

PHYS 117(1117) Concepts of Modern Physics

Fall. 1 credit. Enrollment may be limited. Corequisite: PHYS 112 or 116 or 213 or 217. For freshmen who plan to major in physics, applied and engineering physics, or astronomy. S-U grades only. A. Sadoff.

Intended for freshmen who plan to major in physics or a closely related field (i.e., applied and engineering physics or astronomy) and would like to learn about the concepts of modern physics early in their physics education. Possible topics of discussion are methodology, symmetry and conservation laws, quantum theory, the unification of forces and matter, and big-bang cosmology.

PHYS 190(1190) Supplemental Introductory Laboratory

Fall, spring. 1 credit. Times TBA with instructor. Limited enrollment. S-U grades only. Prerequisites: 3 transfer credits for introductory physics lecture material; a degree requirement for laboratory component of that introductory course; approval of director of undergraduate studies; and permission of lecturer of that course at Cornell. Students must file PHYS 190 permission form 12J Clark Hall with physics department course coordinator.

Students perform the laboratory component of one of the introductory courses (PHYS 112, 207, 208, 213, 214) to complement the lecture-related course credit acquired elsewhere. Those wishing to take equivalent of one of these introductory courses at another institution should receive prior approval from the physics director of undergraduate studies.

PHYS 201(1201) Why the Sky Is Blue: Aspects of the Physical World (PBS)

Fall. 3 credits. A. Sadoff.

Descriptive physics course aimed specifically at the nonscience student. There is an emphasis on the ideas of modern physics where the approach is both historical and thematic. The methodology of science and the nature of evidence is emphasized. An overriding theme is the unification and character of physical laws as shown, for example, through the great principles of symmetry and conservation. While a few computational problems are assigned, the purpose is to help students to understand the concepts rather than to master problem-solving techniques.

PHYS 202(1202) How Physics Works (PBS)

Spring. 3 credits. Intended for nonphysics majors. No background in either science or mathematics beyond high school algebra assumed. P. Stein.

Introduces students who are not majoring in scientific or quantitative disciplines to the techniques and ways of reasoning employed in physics. By gaining an understanding of two milestones in the history of physics (the discoveries of Newton and the application of the laws of probability to physical problems), students learn about the interaction of experiment, mathematics, and conjecture that has fueled the advance of physics.

PHYS 203(1203) Physics of the Heavens and the Earth—A Synthesis (PBS)

Spring. 3 credits. Prerequisite: none; uses high school algebra and geometry. For nonscience majors. H. Padamsee.

Shows how the unification of apparently distinct areas of physics leads to an explosion in the growth of our knowledge and

understanding. The material is divided into three parts: the physics of motion on earth; motion in the heavens; and synthesis. Trace how ideas about celestial and terrestrial motion evolved separately at first, from the ancient ideas of Greek philosophers to the dynamics and telescopic discoveries of Galileo during the Renaissance. The two arenas finally melded under Newton's Universal Gravitation. Einstein's special and general theories of relativity eventually supplanted Newton's ideas. There is an emphasis throughout on "how do we know the laws?" These are the stories of breakthrough discoveries and brilliant insights made by fascinating people, offering a humanistic perspective.

PHYS 204(1204) Physics of Musical Sound (also MUSIC 204(2111)) (PBS)

Spring. 3 credits. Intended for nonscientists; does not serve as prerequisite for further science courses. Assumes no scientific background but uses high school algebra. K. Selby.

Explores musical sound from a physics point of view. Topics include: how various musical instruments work; pitch, scales, intervals and tunings; hearing; room acoustics; reproduction of sound. Science writing and physics problem-solving skills are developed through weekly assignments. Student activities include hands-on investigations of musical instruments, and field trips. Students write a term paper investigating a topic of their choice. At the level of *The Science of Sound* by Rossing, Moore, and Wheeler.

PHYS 207(2207) Fundamentals of Physics I (PBS)

Fall. 4 credits. Prerequisites: high school physics plus MATH 111, 190, or 191, or solid grasp of basic notions of introductory calculus. Corequisite: math course approved by instructor. M. Liepe.

A two-semester introduction to physics, intended for students majoring in an analytically oriented biological science, a physical science, or mathematics. The combination of lectures illustrated with applications from the sciences, medicine, and everyday life, weekly labs tightly coupled to lectures that introduce computer-aided data acquisition and analysis, and recitations that emphasize cooperative problem-solving, provide a rich exposure to the methods of physics and the basic analytical and scientific communication skills required by all scientists. Course covers mechanics, conservation laws, waves, and topics from thermal physics, fluids, acoustics, and materials physics. At the level of *Fundamentals of Physics*, Vol. I, seventh ed., by Halliday, Resnick, and Walker.

PHYS 208(2208) Fundamentals of Physics II (PBS)

Spring. 4 credits. Prerequisites: PHYS 207 or 112 or 101; substantial contact with introductory calculus (e.g., MATH 111, 190, or 191). 207-208 is a two-semester introduction to physics with emphasis on tools generally applicable in sciences, intended for students majoring in physical science, mathematics, or analytically oriented biological science. R. Fulbright.

Covers electricity and magnetism, and topics from geometrical and physical optics, quantum and nuclear physics. At the level of *Fundamentals of Physics*, Vol. II, seventh ed., by Halliday, Resnick, and Walker.

PHYS 213(2213) Physics II: Heat/Electromagnetism (PBS)

Fall, spring, summer (six-week session). 4 credits. Primarily for students of engineering and prospective physics majors. Prerequisite: PHYS 112 and MATH 192. Students co-registered in MATH 192, 221, or equivalent may enroll, but PHYS 213 employs some math concepts before their completion in these calculus courses. Fall, M. Perelstein; spring, D. Krasicky; summer, R. Wheeler.

Topics include temperature, heat, the laws of thermodynamics, electrostatics, behavior of matter in electric fields, DC circuits, magnetic fields, Faraday's law, AC circuits, and electromagnetic waves. At the level of *University Physics*, Vols. 1 and 2, by Young and Freedman, 11th ed.

PHYS 214(2214) Physics III: Optics, Waves, and Particles (PBS)

Fall, spring, summer (six-week session). 4 credits. Primarily for engineering students and prospective physics majors. Prerequisites: PHYS 213 and MATH 293. Students co-registered in MATH 293, 222, or equivalent may enroll, but PHYS 214 employs some math concepts before their completion in these calculus courses. Fall, A. Giambattista; spring, staff; summer, D. Briota.

Physics of oscillations and wave phenomena, mechanical waves, sound waves, electromagnetic waves, reflection and diffraction effects, transport of momentum and energy, wave properties of particles, and introduction to quantum physics.

PHYS 216(2216) Introduction to Special Relativity

Fall, spring, weeks 5-7. 1 credit. Enrollment may be limited. Co-registration in this course is requirement for registration in PHYS 217, unless the student has taken a relativity course at level of PHYS 116 or ASTRO 106. Students cannot get credit for PHYS 216 if they have taken PHYS 116. Prerequisites: PHYS 112 or 207 or permission of instructor. S-U grades only.

Introduction to Einstein's Theory of Special Relativity, including Galilean and Lorentz transformations, the concept of simultaneity, time dilation and Lorentz contraction, the relativistic transformations of velocity, momentum and energy, and relativistic invariance in the laws of physics. At the level of *An Introduction to Mechanics* by Kleppner and Kolenkow.

PHYS 217(2217) Physics II: Electricity and Magnetism (also A&EP 217(2170)) (PBS)

Fall, spring. 4 credits. Enrollment may be limited. Intended for students who have done very well in PHYS 112 or 116 and in mathematics and who desire more analytic treatment than that of PHYS 213. Prospective physics majors encouraged to register. Prerequisites: approval of student's advisor and permission of instructor. Corequisite: MATH 293 or equivalent. Placement quiz may be given early in semester, permitting students who find PHYS 217 too abstract or analytical to transfer into PHYS 213. Vector calculus is taught in this course, but previous contact, especially with the operations *grad*, *div*, and *curl*, is helpful. It is assumed the student has seen special relativity at level of PHYS 116 or is currently enrolled in

PHYS 216 and that student has covered material of MATH 192. Fall, M. Wang; spring, L. Pollack.

At the level of *Electricity and Magnetism*, Vol. 2, by Purcell (Berkeley Physics Series).

PHYS 218(2218) Physics III: Waves and Thermal Physics (PBS)

Fall, spring. 4 credits. Enrollment may be limited. Intended for students who have done very well in PHYS 116 and 217 and in mathematics and who desire more analytic treatment than that of PHYS 214. Prospective physics majors are encouraged to register. Prerequisites: PHYS 217 (with grade of B or higher) and course in differential equations or permission of instructor. Fall, J. C. Davis; spring, staff.

The first part of the course gives a thorough discussion of wave equations, including traveling waves, standing waves, energy, momentum, power, reflection and transmission, interference and diffraction. Derives wave equations on strings, sound, elastic media, and light. Covers solutions of these wave equations and Fourier series and transforms. The second part introduces thermodynamics and statistical mechanics, including heat engines, the Carnot cycle, and the concepts of temperature and entropy. Evening exams may be scheduled. At the level of *Physics of Waves* by Elmore and Heald and *Thermal Physics* by Schroeder.

PHYS 310(3310) Intermediate Experimental Physics (PBS)

Spring. 3 credits. Enrollment may be limited. Prerequisite: PHYS 208 or 213.

Students select from a variety of experiments. An individual, independent approach is encouraged. Facilities of the PHYS 410 lab are available for some experiments.

PHYS 314(3314) Intermediate Mechanics (PBS)

Spring. 4 credits. Prerequisites: PHYS 208 or 214 (or equivalent) and MATH 294 (or equivalent). Assumes prior introduction to linear algebra and Fourier analysis. Intended for physics majors with concentration outside of physics or astronomy; PHYS 318 covers similar material at more analytical level. J. C. Davis.

Likely topics include Lagrangian mechanics; Newtonian mechanics based on a variational principle; conservation laws from symmetries; two-body orbits due to a central force; analysis of scattering experiments; small amplitude oscillating systems including normal mode analysis; parametrically driven systems; rigid body motion; motion in non-inertial reference frames; and nonlinear behavior including bistability and chaos. Students not only become more familiar with analytic methods for solving problems in mechanics but also gain experience with computer tools. At the level of *Classical Dynamics* by Marion and Thornton.

PHYS 316(3316) Basics of Quantum Mechanics (PBS)

Fall, spring. 3 credits. Prerequisites: PHYS 214 or 218; PHYS 116 or 216; and co-registration in at least MATH 294 or equivalent. Assumes that majors registering in PHYS 316 will continue with PHYS 317. Fall, G. Dugan; spring, staff.

Topics include breakdown of classical concepts in microphysics; light quanta and matter waves; Schrödinger equation and solutions for square well, harmonic oscillator, and the hydrogen atom; angular momentum,

spin, and magnetic moments. At the level of *An Introduction to Quantum Physics* by French and Taylor.

PHYS 317(3317) Applications of Quantum Mechanics (PBS)

Fall. 3 credits. Prerequisite: PHYS 316. K. Schwab.

Covers a number of applications of quantum mechanics to topics in modern physics. Topics include: the physics of single and multi-electron atoms, quantum statistical mechanics, molecular structure, quantum theory of metals, band theory of solids, superconductivity, nuclear structure, radioactivity, nuclear reactions, and elementary particle physics.

PHYS 318(3318) Analytical Mechanics (PBS)

Spring. 4 credits. Prerequisites: PHYS 116 or permission of instructor; A&EP 321 or appropriate course(s) in mathematics. Intended for junior physics majors concentrating in physics or astronomy. PHYS 314 covers similar material at less demanding level. Assumes prior exposure to Fourier analysis, linear differential equations, linear algebra, and vector analysis. E. Flanagan.

Newtonian mechanics of particles and systems of particles, including rigid bodies; oscillating systems; gravitation and planetary motion; moving coordinate systems; Euler's equations; Lagrange and Hamilton formulations; normal modes and small vibrations; introduction to chaos. At the level of *Classical Mechanics* by Goldstein, *Classical Dynamics* by Marion and Thorton, and *Analytical Mechanics* by Hand and Finch. Supplementary reading is assigned.

PHYS 323(3323) Intermediate Electricity and Magnetism (PBS)

Fall. 4 credits. Prerequisites: PHYS 208 or 213/214 (or equivalent) and MATH 293/294 (or equivalent). Recommended: co-registration in A&EP 321 or appropriate mathematics course. Intended for physics majors with concentration outside of physics or astronomy; PHYS 327 covers similar material at more analytical level. A. Sievers.

Topics include electro/magnetostatics, boundary value problems, dielectric and magnetic media, Maxwell's Equations, electromagnetic waves, including guided waves, and sources of electromagnetic radiation. At the level of *Introduction to Electrodynamics* by Griffiths.

PHYS 327(3327) Advanced Electricity and Magnetism (PBS)

Fall. 4 credits. Prerequisites: PHYS 217/218 or permission of instructor. Corequisite: A&EP 321 or appropriate mathematics course(s). Intended for physics majors concentrating in physics or astronomy. PHYS 323 covers similar material at less demanding level. Assumes knowledge of material at level of PHYS 217 and makes extensive use of vector calculus, and some use of Fourier transforms and complex variables. P. Brouwer.

Covers electro/magnetostatics, vector and scalar potentials, multipole expansion of the potential solutions to Laplace's Equation and boundary value problems; time-dependent electrodynamics; Maxwell's Equations, electromagnetic waves, reflection and refraction, wave guides, retarded potential, antennas; relativistic electrodynamics, four vectors, Lorentz, transformation of fields. At

the level of *Classical Electromagnetic Radiation* by Heald and Marion.

PHYS 330(3330) Modern Experimental Optics (also A&EP 330[3300]) (PBS)

Fall. 4 credits. Limited enrollment. Prerequisite: PHYS 214 or equivalent. G. Hoffstaetter.

Practical laboratory course in basic and modern optics. The six projects cover a wide range of topics from geometrical optics to classical wave properties such as interference, diffraction, and polarization. Each experimental setup is equipped with standard, off-the-shelf optics and opto-mechanical components to provide the students with hands-on experience in practical laboratory techniques currently employed in physics, chemistry, biology, and engineering. Students are also introduced to digital imaging and image processing techniques. At the level of *Optics* by Hecht.

PHYS 341(3341) Thermodynamics and Statistical Physics (PBS)

Fall. 4 credits. Prerequisites: PHYS 214, 316, and MATH 294. I. Cohen.

Covers statistical physics, developing both thermodynamics and statistical mechanics simultaneously. Also covers concepts of temperature, laws of thermodynamics, entropy, thermodynamic relations, and free energy. Applications to phase equilibrium, multicomponent systems, chemical reactions, and thermodynamic cycles. Application of statistical mechanics to physical systems, and introduction to treatment of Maxwell-Boltzmann, Bose-Einstein, and Fermi-Dirac statistics with applications. Elementary transport theory. At the level of *Fundamentals of Statistical and Thermal Physics* by Reif.

PHYS 360(3360) Electronic Circuits (also A&EP 363[3630]) (PBS)

Fall, spring. 4 credits. Prerequisites: undergraduate course in electricity and magnetism (e.g., PHYS 208, 213, or 217) or permission of instructor. No previous electronics experience assumed, although course moves quickly through introductory topics such as basic dc circuits. Fall semester usually has smaller enrollment. S-U grade option available by permission of instructor for students who do not require course for major. Fall, E. Kirkland; spring, R. Thorne.

Practical electronics as encountered in a scientific or engineering research/development environment. Analyze, design, build, and test circuits using discrete components and integrated circuits. Analog circuits: resistors, capacitors, filters, operational amplifiers, feedback amplifiers, oscillators, comparators, passive and active filters, diodes and transistor switches and amplifiers. Digital circuits: combinational and sequential logic (gates, flip-flops, registers, counters, timers), analog to digital (ADC) and digital to analog (DAC) conversion, signal averaging, computer architecture and interfacing. Additional topics may include analog and digital signal processing, light wave communications, transducers, and noise reduction techniques. At the level of *Art of Electronics* by Horowitz and Hill.

PHYS 400(4400) Informal Advanced Laboratory

Fall, spring. 1-3 credits, variable. Prerequisites: two years physics or permission of instructor. Fall, P. McEuen; spring, D. Hartill.

Experiments of widely varying difficulty in one or more areas, as listed under PHYS 410, may be done to fill the student's special requirements.

PHYS 410(4410) Advanced Experimental Physics (PBS)

Fall, spring. 4 credits. Prerequisite: senior standing or permission of instructor; PHYS 214 (or 310 or 360) plus 318 and 327, or permission of instructor. Fall, P. McEuen; spring, D. Hartill.

Selected topics in experimental concepts and techniques. About 60 different experiments are available in acoustics, optics, spectroscopy, electrical circuits, electronics and ionics, magnetic resonance, X-rays, low temperature, solid state, cosmic rays, and nuclear physics. The student performs three to four different experiments, depending on difficulty, selected to meet individual needs and interests. Independent work is stressed. Lectures are on experimental techniques used in experiments in the laboratory and on current research topics.

PHYS 443(4443) Intermediate Quantum Mechanics (PBS)

Spring. 4 credits. Prerequisites: PHYS 327 or 323; and PHYS 316 and A&EP 321 or appropriate mathematics course(s); co-registration in PHYS 314 or 318; or permission of instructor. Assumes prior experience in linear algebra, differential equations, and Fourier transforms. Staff.

Provides an introduction to concepts and techniques of quantum mechanics, at the level of *An Introduction to Quantum Mechanics* by Griffiths.

PHYS 444(4444) Introduction to Particle Physics (PBS)

Spring. 4 credits. Prerequisite: PHYS 443 or permission of instructor. Staff.

The standard model of particle physics; behavior of high-energy particles and radiation; elementary particles; basic properties of accelerators and detectors; general symmetries and conservation laws. At the level of *Introduction to Elementary Particles* by Griffiths or *Modern Elementary Particle Physics* by Kane.

PHYS 445(4445) Introduction to General Relativity (also ASTRO 445[4445]) (PBS)

Fall. 4 credits. Offered as alternative to more comprehensive, two-semester graduate sequence PHYS 553 and 554. E. Flanagan.

One-semester introduction to general relativity, which teaches physics concepts and phenomenology while keeping mathematical formalism to a minimum. General relativity is a fundamental cornerstone of physics that underlies several of the most exciting areas of current research. These areas include theoretical high-energy physics and the search for a quantum theory of gravity, relativistic astrophysics, and in particular, cosmology, where there have been several groundbreaking observations over the last few years. It uses the new textbook *Gravity: An Introduction to Einstein's General Relativity* by Hartle.

PHYS 454(4454) Introductory Solid-State Physics (also A&EP 450[4500]) (PBS)

Fall. 4 credits. Prerequisite: PHYS 443, A&EP 361, or CHEM 793 highly desirable but not required. J. Silcox.

Introduction to modern solid-state physics, including crystal structure, lattice vibrations, electron theory of metals and semiconductors, and selected topics from magnetic properties, optical properties, superconductivity, and defects. At the level of *Introduction to Solid State Physics* by Kittel and *Solid State Physics* by Ashcroft and Mermin.

PHYS 455(4455) Geometrical Concepts in Physics (PBS)

Spring. 4 credits. Prerequisite: PHYS 323 or equivalent and at least co-registration in PHYS 318 or permission of instructor. Usually offered every other spring.

Most non-quantum physical theories are based on one or another form of geometry: Newtonian mechanics on Euclid, electromagnetism on Minkowski, general relativity on Riemann, string theory on higher dimensionality. This course surveys the unification of classical physics that accompanies the application of Hamilton's principle of least action to these various geometries. At the level of *A First Course in String Theory, Part I* by Zwiebach or *Geometric Mechanics* by Talman.

[PHYS 456(4456) Introduction to Accelerator Physics and Technology (also PHYS 656(7656)) (PBS)]

Fall. 3 credits. Prerequisites: PHYS 323 or 327 and PHYS 314 or 318. Next offered 2008–2009. G. Hoffstaetter.

Fundamental physical principles of particle accelerators and enabling technologies, with a focus on basic effects in linear and circular accelerations as high-energy physics colliders and x-ray sources.]

PHYS 480(4480) Computational Physics (also PHYS 680(7680), ASTRO 690(7690)) (PBS)

Spring. 3 credits. Assumes familiarity with standard mathematical methods for physical sciences and engineering, differential equations and linear algebra in particular and with computer programming in general (e.g., Fortran or C). S-U grades only. T. Arias.

Covers numerical methods for ordinary and partial differential equations, linear algebra and eigenvalue problems, nonlinear equations, and fast Fourier transforms and nonlinear optimization problems from the hands-on perspective of how they are used in modern computational research in the era of open software and the web. Depending on the instructor, the course emphasizes different areas of computational science. Emphasis ranges from general methods for tackling PDEs, including finite-difference and spectral methods, to developing students' own working ab initio computer program for calculating the properties of molecules and materials with the methods that won Walter Kohn and John Pople the Nobel Prize in Chemistry in 1998.

PHYS 481(4481) Quantum Information Processing (also PHYS 681(7681), CS 483(4812))

Spring. 2 credits. S-U grades only. Prerequisite: familiarity with theory of finite-dimensional vector spaces over complex numbers.

A technology that successfully exploits fundamental principles of quantum physics can spectacularly alter both the nature of computation and the means available for the transmission of information.

[PHYS 487(4487) Selected Topics in Accelerator Technology (also PHYS 687(7687))]

Fall. 2 credits. Prerequisite: PHYS 323 or 327. S-U grades only. Next offered 2008–2009.

Fundamentals of accelerator technology. Consists of a series of topical seminars covering the principal elements of accelerator technology.]

PHYS 488(4488) Advanced Topics in Accelerator Physics (also PHYS 688(7688))

Spring. 3 credits. S-U grades only. G. Hoffstaetter.

After an introduction to the history of particle accelerators and to their fundamental physical principles, special topics in accelerator physics will be covered. Such topics are: microwave structures in particle acceleration, linear and nonlinear beam dynamics, collective effects and beam instabilities, characteristics of synchrotron radiation and x-ray experiments, a project in storage ring design, and experiments with the beam in Cornell's storage ring CESR.

PHYS 490(4490) Independent Study in Physics

Fall or spring. Variable to 4 credits; max. of 8 credits may be applied to physics major. Prerequisite: permission of professor who will direct proposed work. Copy of Request for Independent Study form must be filed with physics department course coordinator, 121 Clark Hall. Individual project work (reading or laboratory) in any branch of physics.

PHYS 500(6500) Informal Graduate Laboratory

Fall, spring. Variable to 2 credits. Prerequisite: permission of instructor. Fall, P. McEuen; spring, D. Hartill.

Experiments of widely varying difficulty in one or more areas, as listed under PHYS 510, may be done to fill special requirements.

PHYS 510(6510) Advanced Experimental Physics

Fall, spring. 3 credits. Optional lec associated with PHYS 410 available M. Fall, P. McEuen; spring, D. Hartill.

About 60 different experiments are available in acoustics, optics, spectroscopy, electrical circuits, electronics and ionics, magnetic resonance, X-rays, low temperature, solid state, cosmic rays, and nuclear physics. Students perform three to four experiments selected to meet individual needs. Independent work is stressed. Lectures include techniques used in experiments in the advanced laboratory and on current research topics.

PHYS 520(6520) Projects in Experimental Physics

Fall, spring. Variable to 3 credits. Prerequisite: PHYS 510. To be supervised by faculty member. Students must advise department course coordinator of faculty member responsible for project.

Projects of modern topical interest that involve some independent development work by student. Opportunity for more initiative in experimental work than is possible in PHYS 510.

[PHYS 525(6525) Physics of Black Holes, White Dwarfs, and Neutron Stars (also ASTRO 511(6511))]

Spring. 4 credits. Prerequisite: none. D. Lai. Next offered 2008–2009.

For description, see ASTRO 511.]

[PHYS 553-554(6553-6554) General Relativity (also ASTRO 509-510(6509-6510))]

553, fall; 554, spring. 4 credits. Prerequisite: knowledge of special relativity and methods of dynamics at level of *Classical Mechanics* by Goldstein. Next offered 2008–2009. J. York.

Introductory study of Einstein's theory using methods of vector analysis, differential geometry, and tensor calculus. Topics include moving frames, connections and curvature, equivalence principle, variational principle, electrodynamics, hydrodynamics, thermodynamics, statistical mechanics in the presence of gravitational fields, special relativity from the viewpoint of GR, GR as a dynamical theory, and experimental tests of GR. At the level of *Gravitation* by Misner, Thorne, and Wheeler and *General Relativity* by Wald. Hartles's book *Gravity: An Introduction to Einstein's General Relativity* may also be useful. PHYS 554 is a continuation of 553, which emphasizes applications to astrophysics and cosmology. Topics include gravitational collapse and black holes, gravitational waves, elementary cosmology, and the use of active gravitational dynamics as a fundamental element of astrophysical and cosmological research.]

PHYS 561(6561) Classical Electrodynamics

Fall. 3 credits. C. Csaki.

Covers Maxwell's equations, electromagnetic potentials, electrodynamics of continuous media (selected topics), special relativity, and radiation theory. The practical application of appropriate mathematical methods is emphasized. At the level of *Classical Electrodynamics* by Jackson.

PHYS 562(6562) Statistical Mechanics

Spring. 4 credits. Primarily for graduate students. Prerequisites: good knowledge of quantum mechanics, classical mechanics, and undergraduate-level thermodynamics or statistical mechanics class. Staff.

Starts with the fundamental concepts of temperature, entropy, and free energy, defining the microcanonical, canonical, and grand canonical ensembles. Touches upon Markov chains, random walks, diffusion equations, and the fluctuation-dissipation theorem. Covers Bose-Einstein and Fermi statistics, black-body radiation, Bose condensation, superfluidity, metals, and white dwarfs. Discusses fundamental descriptions of phases, and introduce Landau theory, topological order parameters, and the homotopy classification of defects. Briefly studies first-order phase transitions and critical droplet theory and concludes with a discussion of critical phenomena, scaling, universality, and the renormalization group.

PHYS 572(6572) Quantum Mechanics I

Fall. 4 credits. V. Elser.

Covers the general principles of quantum mechanics, formulated in the language of Dirac. Covers systems with few degrees of freedom such as hydrogen atom, including fine and hyperfine structure. Theory of angular momentum, symmetries, perturbations and collisions are developed to analyze phenomena displayed by these systems. At the level of *Quantum Mechanics: Fundamentals* by Gottfried and Yan. A knowledge of the subject at the level of PHYS 443 is assumed, but the course is self-contained.

PHYS 574(6574) Applications of Quantum Mechanics II

Spring. 4 credits. Knowledge of concepts and techniques covered in PHYS 561 and 572 and of statistical mechanics at undergraduate level assumed.

Possible topics include identical particles, many electron atoms, second quantization, quantization of the electromagnetic field, scattering of complex systems, radiative transitions, and introduction to the Dirac equation.

PHYS 599(6599) Cosmology (also ASTRO 599[6599])

For description, see ASTRO 599.

PHYS 635(7635) Solid-State Physics I

Fall. 3 credits. Prerequisites: good undergraduate solid-state physics course (e.g., PHYS 454), as well as familiarity with graduate-level quantum mechanics. D. Ralph.

Survey of the physics of solids: crystal structures, x-ray diffraction, phonons, and electrons. Selected topics from semiconductors, magnetism, superconductivity, disordered materials, dielectric properties, and mesoscopic physics. The focus is to enable graduate research at the current frontiers of condensed matter physics.

PHYS 636(7636) Solid-State Physics II

Spring. 3 credits. Prerequisite: PHYS 635. Staff.

Continuation of PHYS 635. Topics from quantum condensed matter physics not included in that course, which may include Fermi Liquid Theory, magnetism, superconductivity, broken symmetries, elementary excitations, topological defects, superfluids, the quantum Hall effect, mesoscopic quantum transport theory, Anderson localization, and other metal insulator transitions.

PHYS 645(7645) An Introduction to the Standard Model of Particle Physics

Spring. 3 credits. A. Ryd.

This course is an introduction to the Standard Model of particle physics. Familiarity with Feynman rules, Lagrangians, and relativistic wave equations at the level of PHYS 651 is assumed. Topics covered include strong and electro-weak interactions, Higgs mechanism, and phenomenology of weak interactions, the quark model, particle accelerators and detectors. The course is taught at the level of *Electroweak Interactions: An Introduction to the Physics of Quarks and Leptons* by Peter Renton and *Introduction to High-Energy Physics* by Donald H. Perkins.

PHYS 646(7646) Topics in High-Energy Particle Physics

Spring. 3 credits. Staff.

Covers topics of current interest, such as high-energy electron and neutrino interactions, electron positron annihilation, and high-energy hadronic reactions.

PHYS 651(7651) Relativistic Quantum Field Theory I

Fall. 3 credits. S-U grades only.

Y. Grossman.

Topics include consequences of causality and Lorentz invariance, quantization of Klein-Gordon and Dirac fields, perturbation theory, Feynman diagrams, calculation of cross sections and decay rates, and an introduction to radiative corrections and renormalization with applications to electromagnetic and

interactions. At the level of *An Introduction to Quantum Field Theory* by Peskin and Schroeder.

PHYS 652(7652) Relativistic Quantum Field Theory II

Spring. 3 credits. S-U grades only. C. Csaki.

A continuation of PHYS 651. Introduces more advanced methods and concepts in quantum field theory. Topics include renormalization, non-abelian gauge theories, functional integral methods, and quantization of non-abelian gauge theories, spontaneous symmetry breaking, anomalies, solitons, and instantons. At the level of *An Introduction to Quantum Field Theory* by Peskin and Schroeder.

PHYS 653(7653) Statistical Physics

Fall. 3 credits. Prerequisites: quantum mechanics at level of PHYS 572, statistical physics at level of PHYS 562. S-U grades only. C. Henley.

Survey of topics in modern statistical physics selected from phase transitions and the renormalization groups, linear response and fluctuations-dissipation theories; quantum statistical mechanics; and nonequilibrium statistical mechanics.

PHYS 654(7654) Basic Training in Condensed Matter Physics

Spring. 3 credits. Prerequisites: PHYS 562, 574, 635, 636, and 653 or permission of instructor. S-U grades only. Staff.

Advanced topics in condensed-matter physics are taught by several members of the faculty. Past modules include random matrix theory, the quantum Hall effect, disordered systems and computational complexity, and asymptotic analysis. Future topics may include dilute cold gases and exotic quantum phenomena, thermodynamic Green's functions, $1/N$ expansions, density functional theory, instantons, dynamical mean-field theory, conformal field theory, Fermi liquid theory and superconductivity, localization and disordered metals, renormalization groups, duality transformations, Luttinger liquids, frustrated and quantum magnetism, and Chern-Simons gauge theory. Detailed course content will be announced at the end of the fall semester.

[PHYS 656(7656) Introduction to Accelerator Physics and Technology (also PHYS 456[4456])

Next offered 2008-2009.

For description, see PHYS 456.]

[PHYS 661(7661) Advanced Topics in High-Energy Particle Theory

Fall. 3 credits. Prerequisite: PHYS 652. S-U grades only. Next offered 2008-2009.

Presents advanced topics of current research interest. Subject matter varies from year to year. Some likely topics are two-dimensional conformal field theory with applications to string theory.]

[PHYS 665(7665) Seminar: Astrophysics Gas Dynamics (also ASTRO 699[7699])

Next offered 2008-2009.

For description, see ASTRO 699.]

[PHYS 667(7667) Theory of Stellar Structure and Evolution (also ASTRO 560[6560])

Next offered 2008-2009.

For description, see ASTRO 560.]

PHYS 680(7680) Computational Physics (also PHYS 480[4480], ASTRO 690[7690])

For description, see PHYS 480.

PHYS 681-689(7681-7689) Special Topics

Offerings are announced each semester.

Typical topics are group theory, analyticity in particle physics, weak interactions, superfluids, stellar evolution, surface physics, Monte Carlo methods, low-temperature physics, magnetic resonance, phase transitions, and the renormalization group.

PHYS 681(7681) Quantum Information Processing (also PHYS 481[4481], CS 483[4812])

For description, see PHYS 481.

PHYS 682(7682) Computational Methods for Nonlinear Systems (also CIS 629[6229])

Fall. 4 credits. Enrollment may be limited.

Graduate computer laboratory, focusing on the next generation of tools for computation, simulation, and research in a broad range of fields of interest to the IGERT program and the Life Sciences Initiative. The course is pitched at a high level of computational sophistication, but is designed to fit into the busy schedules of first-year graduate students.

[PHYS 687(7687) Selected Topics in Accelerator Technology (also PHYS 487[4487])

Next offered 2008-2009.

For description, see PHYS 487.]

PHYS 688(7688) Advanced Topics in Accelerator Physics (also PHYS 488[4488])

For description, see PHYS 488.

PHYS 690(7690) Independent Study in Physics

Fall or spring. Variable to 4 credits.

Students must advise department course coordinator, 121 Clark Hall, of faculty member responsible for grading their project. S-U grades only.

Special graduate study in some branch of physics, either theoretical or experimental, under the direction of any professorial member of the staff.

PSYCHOLOGY

S. L. Bem, M. Christiansen, J. E. Cutting, T. J. DeVoogd, D. A. Dunning, S. Edelman, M. Ferguson, D. J. Field, B. L. Finlay, T. D. Gilovich, M. Goldstein, B. P. Halpern, A. M. Isen, R. E. Johnston, C. L. Krumhansl, D. A. Levitsky, J. B. Maas, D. A. Pizarro, H. S. Porte, D. T. Regan, E. A. Regan, H. Segal, D. Smith, M. Spivey, B. J. Strupp, V. Zayas

The major areas of psychology represented in the department are perceptual and cognitive psychology, biopsychology, and personality and social psychology. These areas are very broadly defined, and the courses are quite diverse. Biopsychology includes animal learning, neuropsychology, interactions between hormones, other biochemical processes, and behavior. Perceptual and cognitive psychology includes such courses as cognition, perception, memory, and psycholinguistics. Personality and social psychology is represented by courses in social psychology and personality (e.g., Psychology and Law, Judgment and Decision Making), as well as courses in fieldwork and psychopathology. In addition to the three major areas mentioned above, the department emphasizes the statistical and logical analysis of psychological data and problems.

The Major

Admission to the major is usually granted to any student in good standing in the college who has passed three or more psychology courses with grades of C+ or better. Provisional admission requires two such courses. To apply to the major and receive an advisor, a major application form may be obtained from the department office (211 Uris Hall) and should be completed and taken to one of the faculty members whose name is listed on the form.

Requirements for the major are:

1. a total of 40 credits in psychology (including prerequisites), from which students majoring in psychology are expected to choose, in consultation with their advisors, a range of courses that covers the basic processes in psychology (laboratory and/or field experience is recommended); and
2. demonstration of proficiency in statistics before the beginning of the senior year. (See the section below on the statistics requirement.)

Normally it is expected that all undergraduate psychology majors will take at least one course in each of the following three areas of psychology:

1. **Perceptual cognition and development (PCD)**
2. **Behavioral and evolutionary neuro science (BEN)**
3. **Personality and social psychology**

The following classification of Department of Psychology offerings is intended to help students and their advisors choose courses that will ensure that such breadth is achieved.

1. **Perceptual cognition and development:** PSYCH 205, 209, 214, 215, 281, 305, 316, 342, 412, 414, 416, 418, 426, 427, 428, 436, 465, 492.

2. **Behavioral and evolutionary neuro science:** PSYCH 223, 322, 324, 326, 332, 361, 396, 424, 425, 429, 431, 435, 440, 492.
3. **Personality and social psychology:** PSYCH 265, 275, 280, 325, 327, 328, 380, 385, 452, 481, 482, 485, 491.
4. **Other courses:** PSYCH 101, 199, 282, 347, 350, 410, 440, 441, 470, 471, 472, 473, 478. The major advisor determines to which group, if any, these courses may be applied.

With the permission of the advisor, courses in other departments may be accepted toward the major requirements.

Fieldwork, independent study, and teaching. The department requires students to observe the following limits on fieldwork, independent study, and teaching.

1. Undergraduates may not serve as teaching assistants for psychology courses if they are serving as teaching assistants for any other course during the same semester.
2. An undergraduate psychology major cannot apply more than 12 of the credits earned in independent study (including honors work) and fieldwork toward the 40 credits required by the major.

Statistics requirement. Proficiency in statistics can be demonstrated in any one of the several ways listed below.

1. Passing PSYCH 350.
2. Passing an approved course or course sequence in statistics in some other department at Cornell.
3. Passing a course or course sequence in statistics at some other college, university, or college-level summer school. The course or sequence must be equivalent to at least 6 semester credits. The description of the course from the college catalog and the title and author of the textbook used must be submitted to Professor Gilovich for approval.
4. Passing an exemption examination. This examination can be given at virtually any time during the academic year if the student gives notice at least one week before. Students who have completed a theoretical statistics course in a department of mathematics or engineering and who wish to demonstrate competence in applied statistics usually find this option the easiest. Students planning this option should discuss it in advance with Professor Gilovich.

Concentration in biopsychology.

Psychology majors interested in psychology as a biological science can elect to specialize in biopsychology. Students in this concentration must meet all of the general requirements for the major in psychology and must also demonstrate a solid background in biology; the physical sciences, including at least introductory chemistry; and mathematics. Students will design with their advisors an integrated program in biopsychology built around courses on physiological, chemical, anatomical, and ecological determinants of human and nonhuman behavior offered by the Department of Psychology. Additional courses in physiology, anatomy, biochemistry, neurochemistry, neurobiology, and behavioral biology may be designated as part of the psychology major after consultation between the student and his or her biopsychology advisor.

Concentration in personality and social psychology. Psychology majors who wish to specialize in social psychology are expected to meet the general requirements set by their department, including statistics. To ensure a solid interdisciplinary grounding, students in the concentration are permitted to include some major courses in sociology and related fields. Advisors will assist students in the selection of a coherent set of courses from social organization, cultural anthropology, experimental psychology, social methodology, and several aspects of personality and social psychology. Seniors in the concentration may elect advanced and graduate seminars, with the permission of the instructor.

Undergraduate honors program. The honors program is designed for exceptional students who wish to pursue an intensive and independent program of research in psychology. Successful participation serves as evidence of the student's facility in the two most important skills required of an academic psychologist: namely, the capacity to acquire and integrate a substantial body of theoretical and factual material and the ability to devise and execute a creative empirical research project.

The honors program offers students the closest contact and consultation with faculty they will likely experience while at Cornell, and all qualified majors who are planning graduate work in any academic field should consider applying. However, it should also be noted that conducting honors research and completing a thesis is an extremely demanding undertaking, both in time and effort. Due to the demands of both research and writing, it is expected that after the Christmas break, honors students will return to campus as early as possible to continue their work, as well as remain on campus through all of spring break.

The focus of the honors program is conducting an experiment, analyzing the data that result, and describing the project in a thesis that closely approximates a professional-level research report both in form and quality. The research project is to be conducted under the close sponsorship of a faculty member. Subject to approval, the sponsor need not be in the psychology department per se. Students that successfully complete the honors program graduate with one of levels of honors, which is noted on their diplomas. The customary level is cum laude, awarded to approximately two-thirds of psychology honors graduates. Approximately one-third receive the next higher level of honors, which is magna cum laude. A student who has both an unusually strong academic record in psychology and completes a thesis of exceptionally high quality will be considered for summa cum laude, the highest level of honors. However, those are unusual cases. The T. A. Ryan Award, accompanied by a cash prize, is awarded to the student who conducts the best honors project in a given year. Students in the program register for 3 or 4 credits of PSYCH 471 Independent Study in both fall and spring semesters. Format and binding of the thesis follows guidelines for the doctoral dissertation and master's thesis, outlined by the Cornell University Graduate School. Stylistic format is APA style. Alternative style formats are possible, if approved in advance.

Computing in the Arts Undergraduate Concentration

A concentration in Computing in the Arts with an emphasis on psychology is available both to psychology majors and to students majoring in other subjects. For more information, see pages ****.

Courses

PSYCH 101(1101) Introduction to Psychology: The Frontiers of Psychological Inquiry (SBA-AS)

Fall, summer (six-week). 3 credits.

Attendance at lec mandatory. Students who wish to take disc seminar should also enroll in PSYCH 103. M W F. J. B. Maas.

The study of human behavior. Topics include brain functioning and mind control, psychophysiology of sleep and dreaming, psychological testing, perception, learning, cognition, memory, language, motivation, personality, abnormal behavior, psychotherapy, social psychology, and other aspects of applied psychology. Emphasis is on developing skills to critically evaluate claims made about human behavior.

PSYCH 102(1200) Introduction to Cognitive Science (also COGST 101[1101], CS 101[1710], LING 170[1170], PHIL 191[1910]) (KCM-AS)

Fall, summer (six-week). 3 or 4 credits (4-credit option involves writing sec instead of exams). T R. M. Spivey.

For description, see COGST 101.

PSYCH 103(1103) Introductory Psychology Seminars

Fall. 1 credit. Limited to 200 students.

Corequisite: PSYCH 101. 12 different time options. J. B. Maas and staff.

Weekly seminar that may be taken in addition to PSYCH 101 to provide an in-depth exploration of selected areas in the field of psychology. Involves extensive discussion and a semester paper related to the seminar topic. Choice of seminar topics and meeting times are available at the second lecture of PSYCH 101.

PSYCH 111(1110) Brain, Mind, and Behavior (also BIONB/COGST 111[1110]) (PBS)

Spring. 3 credits. Letter grades only.

Prerequisite: freshmen and sophomores in humanities and social sciences; juniors and seniors not allowed. Not recommended for psychology majors; biology majors may not use for credit toward major. M W F. E. Adkins Regan and R. Hoy.

For description, see COGST 111.

PSYCH 165(1650) Computing in the Arts (also CS/CIS/ENGRI 165[1650], MUSIC 165[1465])

Fall. 3 credits. G. Bailey.

For description, see CS 165.

PSYCH 205(2050) Perception (also PSYCH 605[6050])

Spring. 3 credits. Open to all students.

Graduate students, see PSYCH 605. T R. J. E. Cutting.

One of four introductory courses in cognitive psychology. Basic perceptual concepts and phenomena are discussed with emphasis on stimulus variables and sensory mechanisms. All sensory modalities are considered. Visual and auditory perception are discussed in detail.

PSYCH 209(2090) Developmental Psychology (also PSYCH 709[7090]) (KCM-AS)

Spring. 4 credits. Graduate students, see PSYCH 709. M W. M. Goldstein.

One of four introductory courses in cognition and perception. A comprehensive introduction to current thinking and research in developmental psychology that approaches problems from both psychobiological and cognitive perspectives. We will use a comparative approach to assess principles of development change. The course focuses on the development of perception, action, cognition, language and social understanding in infancy and early childhood.

PSYCH 214(2140) Cognitive Psychology (also PSYCH 614[6140], COGST 214[2140], COGST 614[6140]) (KCM-AS)

Fall. 3 credits. Limited to 175 students.

Prerequisite: sophomore standing.

Graduate students, see PSYCH 614. M W F. S. Edelman.

Introduces the idea of cognition as information processing or computation, using examples from perception, attention and consciousness, memory, language, and thinking. Participants acquire conceptual tools that are essential for following the current thought on the nature of mind and its relationship to the brain.

PSYCH 215(2150) Psychology of Language (also COGST 215[2150], LING 215[2215]) (KCM-AS)

Spring. 3 credits. Prerequisites: sophomore, junior, or senior standing; any one course in psychology or human development. T R. M. Christiansen.

Provides an introduction to the psychology of language. The purpose of the course is to introduce students to the scientific study of psycholinguistic phenomena. Covers a broad range of topics from psycholinguistics, including the origin of language, the different components of language (phonology, morphology, syntax, and semantics), processes involved in reading, computational modeling of language processes, the acquisition of language (both under normal and special circumstances), and the brain bases of language.

PSYCH 223(2230) Introduction to Biopsychology (PBS: supplementary list)

Fall. 3 credits. Prerequisites: none. May be used to satisfy psychology major breadth requirement and as alternative prerequisite for upper-level biopsychology courses. D. Smith.

Introduction to psychology from a biological perspective, including both evolutionary and physiological approaches to behavior. Topics include the structure and function of the nervous system, genetic and biochemical models of behavior, hormones and behavior, biological bases of learning, cognition, communication, and language, and the evolution of social organization.

Introductory courses in social and personality psychology.

Each of the following three courses (265, 275, 280) provides an introduction to a major area of study within social and personality psychology. These courses are independent of one another, and none have any prerequisites. Students may take any one of the courses or any combination of them (including all three). Courses may be taken in any order or simultaneously.

PSYCH 231(2310) Borges and I: A Quest for Self-Knowledge (KCM-AS)

Spring. 4 credits. Limited to 15 students. S. Edelman.

This seminar will survey the state of the art in theoretical neuroscience, a discipline whose ultimate goal is finding the mind in the brain. Our journey through the scientific literature on minds and brains, covering topics such as memory and identity, love, solitude and society, language, creativity, religion, and morality, will be accompanied by a choice of short stories by Jorge Luis Borges.

PSYCH 265(2650) Psychology and Law (SBA-AS)

Fall. 3 credits. M W F. D. A. Dunning.

Examines the implications of psychological theory and methods for law and the criminal justice system. Concentrates on psychological research on legal topics (e.g., confession, eyewitness testimony, jury decision making, homicide, aggression, the prison system), social issues (e.g., death penalty, affirmative action), and on psychologists as participants in the legal system (e.g., assessing insanity and dangerousness and for expert testimony).

PSYCH 275(2750) Introduction to Personality Psychology (also HD 260[2600]) (SBA-AS)

Fall. 3 credits. Recommended: introductory psychology or human development. V. Zayas.

A shared assumption among personality psychologists is that each person possesses a personality—i.e., characteristic ways of thinking, feeling, and behaving—that uniquely distinguishes him or her from other people. Each individual's personality is the culmination of his or her genetic makeup, biology, early life experiences, learning and culture. In this undergraduate-level course, we will review the major theories and research paradigms (e.g., trait, biological, cognitive) of modern-day personality psychology. The course will emphasize contemporary research, theory, and methodology, as well as provide a review of historical accounts that have significantly contributed to current conceptualizations.

PSYCH 280(2800) Introduction to Social Psychology (SBA-AS)

Spring, summer (three-week). 3 credits. T R. T. D. Gilovich and D. T. Regan.

Introduction to research and theory in social psychology. Topics include social influence, persuasion, and attitude change; social interaction and group phenomena; altruism and aggression; stereotyping and prejudice; and everyday reasoning and judgment.

[PSYCH 282(2820) Community Outreach (also HD 282[2820])

Fall. 2 credits. Prerequisites: PSYCH 101 or HD 115. Next offered 2008–2009. T. H. Segal.

Provides students with information and perspectives essential to volunteer fieldwork with human and social service programs in the community. Readings are drawn from the field of community psychology and include analyses of successful programs, such as Head Start, as well as a review of the methods by which those programs are developed and assessed. Although students are not required to volunteer, the instructor provides students with a list of local agencies open to student placements.]

[PSYCH 305(3050) Visual Perception (also VISST 305(3305))]

Fall. 4 credits. Limited to 25 students.

Prerequisite: PSYCH 205 or permission of instructor. M W F. Next offered 2008–2009. J. E. Cutting.

Detailed examination of pictures and their comparison to the real world. Linear perspective in Renaissance art, photography, cinema, and video is discussed in light of contemporary research in perception and cognition.]

[PSYCH 313(3130) Problematic Behavior in Adolescence (also HD 313(3130))]

Fall. 3 credits. Prerequisite: HD 115 or PSYCH 101. Recommended: HD 216. M W. J. Haugaard.

For description, see HD 313.

[PSYCH 316(3160) Auditory Perception (also PSYCH 716(7160)) (KCM-AS)]

Fall. 3 or 4 credits; 4-credit option involves lab project or paper. Limited to 30 students. Prerequisite: PSYCH 102, 205, 209, or 214 (or other psychology, linguistics, or biology courses by permission of instructor). Graduate students, see PSYCH 716. M W. Next offered 2008–2009. C. L. Krumhansl.

Covers the major topics in auditory perception including: physics of sound; structure and function of the auditory system; perception of loudness, pitch, and spatial location, with applications to speech production and perception; and music and environmental sounds.]

[PSYCH 322(3220) Hormones and Behavior (also BIONB 322(3220), PSYCH 722(7220)) (PBS)]

Fall. 3 credits. Two lec plus sec in which students read and discuss original papers in the field, give an oral presentation, and write a term paper. Prerequisites: junior or senior standing; any one of the following: PSYCH 223, BIONB 221 or 222, or one year introductory biology plus psychology course. Graduate students, see PSYCH 722. M W F. E. Adkins Regan.

Comparative and evolutionary approaches to the study of the relationship between reproductive hormones and sexual behavior in vertebrates, including humans. Also hormonal contributions to parental behavior, aggression, stress, learning and memory, and biological rhythms.

[PSYCH 324(3240) Biopsychology Laboratory (also BIONB 324(3240)) (PBS)]

Fall. 4 credits. Limited to 20 students. Prerequisites: junior or senior standing; PSYCH 223 or BIONB 221 or 222, and permission of instructor. Next offered 2008–2009. T R. T. J. DeVoogd.

Experiments designed to provide experience in animal behavior (including learning) and its neural and hormonal mechanisms. A variety of techniques, animal species, and behavior patterns are included.]

[PSYCH 325(3250) Adult Psychopathology (also HD 370(3700)) (SBA-AS)]

Spring. 3 credits. Prerequisite: sophomore, junior, or senior standing; any one course in psychology or human development. T R. No S-U option. M W. H. Segal.

A theoretical and empirical approach to the biological, psychological, and social (including cultural and historical) aspects of adult psychopathology. Readings range from Freud

to topics in psychopharmacology. The major mental illnesses are covered, including schizophrenia as well as mood, anxiety, and personality disorders. Childhood disorders are not covered.

[PSYCH 326(3260) Evolution of Human Behavior (also PSYCH 626(6260)) (PBS: Supplementary List)]

Spring. 4 credits. Prerequisite: PSYCH 223, or introductory biology, or introductory anthropology. Graduate students, see PSYCH 626. T R. R. E. Johnston.

Broad comparative approach to the behavior of animals and humans with special emphasis on the evolution of human behavior. Topics vary but include some of the following: human evolution, evolutionary and sociobiological theory, animal communication, nonverbal communication, language, cognitive capacities, social behavior and organization, cooperation and altruism, sexual behavior, mating and marriage systems, aggression, and warfare.

[PSYCH 327(3270) Field Practicum I (also HD 327(3270)) (SBA-AS)]

Fall only. 3 credits. Limited enrollment. Prerequisites: PSYCH 325 or HD 370 (or taken concurrently), and permission of instructor. Students must commit to taking PSYCH 328 in spring semester. Letter grades only. Next offered 2008–2009. M W. H. Segal.

Composed of three components that form an intensive undergraduate field practicum. First, students spend three to six hours a week at local mental health agencies, schools, or nursing facilities working directly with children, adolescents, or adults; supervision is provided by host agency staff. Second, the instructor provides additional weekly individual, clinical supervision for each student. Third, seminar meetings cover issues of adult and developmental psychopathology, clinical technique, case studies, and current research issues. Students write one short paper, two final take-home exams, and present an account of their field experience in class.]

[PSYCH 328(3280) Field Practicum II (also HD 328(3280)) (SBA-AS)]

Spring. 3 credits. Limited enrollment. Prerequisites: PSYCH 327 taken previous semester, PSYCH 325 or HD 370 (or taken concurrently), permission of instructor. Letter grades only. M W. H. Segal.

Continues the field practicum experience from PSYCH 327.

[PSYCH 330(3300) Introduction to Computational Neuroscience (also BIONB/COGST 330(3300)) (PBS)]

Fall. 3 credits. Limited to 25 students. Prerequisite: BIONB 222 or permission of instructor. S-U or letter grades. Offered alternate years. C. Linster.

For description, see BIONB 330.

[PSYCH 332(3320) Biopsychology of Learning and Memory (also BIONB 328(3280), PSYCH 632(6320)) (PBS)]

Spring. 3 credits. Limited to 60 students. Prerequisites: one year of biology and either a biopsychology course or BIONB 222. Graduate students, see PSYCH 632. M W F. T. J. DeVoogd.

Surveys the approaches that have been or are currently being used to understand the biological bases for learning and memory. Topics include invertebrate, "simple system" approaches, imprinting, avian song learning,

hippocampal and cerebellar function, or research using fMRI pathology in humans. Many of the readings are from primary literature.

[PSYCH 340(3400) Autobiographical Memory]

Spring. 3 credits. Limited to 20 students.

Prerequisites: any one course in psychology or human development. Staff. Much recent research has focused on people's ability to remember—and often to misremember—their own life experiences. This course reviews that research, including such topics as "flashbulb" memories, "childhood amnesia," the development of memory in children, cultural differences, the "false memory syndrome," eyewitness testimony, prospective memory, sex differences, recall of school learning, the amnesic syndrome, and the relation between memory and self.

[PSYCH 342(3420) Human Perception: Applications to Computer Graphics, Art, and Visual Display (also PSYCH 642(6420), COGST 342(3420), VISST 342(3420))]

Fall. 3 or 4 credits; 4-credit option involves term paper. Highly recommended: PSYCH 205. Graduate students, see PSYCH 642. T R. D. J. Field.

Our present technology allows us to transmit and display information through a variety of media. To make the most of these media channels, it is important to consider the limitations and abilities of the human observer. The course considers a number of applied aspects of human perception with an emphasis on the display of visual information. Topics include "three-dimensional" display systems, color theory, spatial and temporal limitations of the visual systems, attempts at subliminal communication, and "visual" effects in film and television.

[PSYCH 347(3470) Psychology of Visual Communications (SBA-AS)]

Spring. 3 credits. Limited to 15 students. Prerequisites: PSYCH 101 and permission of instructor. R. J. B. Maas.

Exploration of theories of education, communication, perception, attitude, and behavior change as they relate to the effectiveness of visually based communication systems. Emphasis is on the use of photography and computer graphics to deliver educational messages. A digital camera with manual control of f-stops and shutter speed is mandatory.

[PSYCH 350(3500) Statistics and Research Design (MQR)]

Fall, summer (three-week). 4 credits.

Limited to 120 students. M W F. Staff. Acquaints the student with the elements of statistical description (e.g., measures of average, variation, correlation) and, more important, develops an understanding of statistical inference. Emphasis is placed on those statistical methods of principal relevance to psychology and related behavioral sciences.

[PSYCH 361(3610) Biopsychology of Normal and Abnormal Behavior (also NS 361(3610)) (PBS: Supplementary List)]

Spring. 3 credits. Limited to 50 students in psychology and 50 students in nutritional sciences. Prerequisites: junior or senior standing; introductory biology and introductory psychology or permission of instructor. S-U or letter grades. M W F. Next offered 2008–2009. B. J. Strupp.

Critical evaluation of factors thought to underlie normal and abnormal behavior and/or cognitive functioning. Psychological, biological, and societal influences are integrated. Topics include the psychobiology of learning and memory; nutritional influences on behavior/cognition (e.g., sugar, food additives, choline); cognitive dysfunction (e.g., amnesia, Alzheimer's disease); developmental exposure to environmental toxins and drugs of abuse; and psychiatric disorders (depression, eating disorders).

PSYCH 380(380) Social Cognition (SBA-AS)

Fall. 3 credits. Prerequisites: junior or senior standing; PSYCH 280. T R. M. Ferguson.

What are the causes and consequences of our own and other's judgments, feelings, attitudes, and behaviors? This course introduces students to social cognition, which is a research perspective that uses both cognitive and social psychological theories and methodologies to explain such social phenomena.

PSYCH 385(385) The Psychology of Emotion (SBA-AS)

Fall. 3 credits. D. Pizarro.

We've all been mad, sad, happy, and disgusted. Some of us get nostalgic at times, and some of us are easily embarrassed. We've been feeling these emotions nearly our whole lives, and this makes us all emotion experts of a sort. Nonetheless, these feelings can be mysterious. Where do they come from? Do people across all cultures experience similar emotions? How can we regulate our emotions? Do emotions make us less rational? Do they make us smarter? What triggers certain emotions? Are there gender differences in emotions? The science of emotion is fairly young, but there has been an enormous amount of progress in understanding emotional phenomena in the last few decades. In this course, we will tackle the aforementioned questions and more. By the end of the course you should be familiar with the most influential theories of emotion—from the evolutionary explanations of emotion to the developmental and social factors involved in making us emotional creatures. So while we are all intuitive experts on emotion, by the end of the course you will have a different kind of expertise—one grounded in the most recent scientific discoveries in this exciting field.

[PSYCH 396(396) Introduction to Sensory Systems (also BIONB 396[396]) (PBS)

Spring. 4 credits. Limited to 35 students. Next offered 2009–2010. B. P. Halpern.

Somesthetic, auditory, and visual system neuroscience principles and methods of study are taught using the Socratic method. Original literature read and discussed.

[PSYCH 405(405) Intuitive Judgment (SBA-AS)

Fall. 4 credits. Limited to 18 students by application. Priority given to senior psychology majors. Prerequisites: at least one course in each of social and cognitive psychology. Next offered 2009–2010. T. Gilovich.

Judgment pervades everyday experience. Can this person be trusted? Does this relationship have promise? Is the economy likely to flourish? This course examines how people answer such questions by examining—in depth—classic and contemporary scholarship

on the subject. Readings are mostly primary sources.]

PSYCH 410(410) Undergraduate Seminar in Psychology

Fall or spring. 2 credits. Priority given to psychology majors. Staff.

Information on specific sections for each semester, including instructor, prerequisites, and time and place, may be obtained from the Department of Psychology office, 211 Uris Hall.

PSYCH 412(412) Laboratory in Cognition and Perception (also PSYCH 612[612]) (KCM-AS)

Spring. 4 credits. Limited to 15 students. Prerequisite: statistics and one course in cognition or perception recommended. Graduate students, see PSYCH 612. M W. D. J. Field.

Laboratory course designed to introduce students to experimental methods in perception and cognitive psychology. Students take part in a number of classic experiments and develop at least one independent project. Computers are available and used in many of the experiments although computer literacy is not required. Projects are selected from the areas of visual perception, pattern recognition, memory, and concept learning.

[PSYCH 414(414) Comparative Cognition (also PSYCH 714[714], COGST 414[414]) (KCM-AS)

Spring. 3 or 4 credits; 4-credit option involves annotated bibliography or creation of relevant web site. Prerequisites: PSYCH 205, 209, 214, 223, 292 or permission of instructor. Graduate students, see PSYCH 714. T R. Next offered 2008–2009. Staff.

Examines some of the conceptual and empirical work resulting from and fueling the recent surge of interest in animals' thinking. Specific topics may include whether nonhumans behave intentionally; whether they show concept and category learning, memory, and abstract thinking similar to that of humans; the role of social cognition in the evolution of intelligence; and whether animals are conscious or self-aware. Evidence from communication studies in which animal signals provide a "window on the mind" plays a strong role in the deliberations, including studies of naturally occurring signaling in various species and experiments in which nonhumans are trained in human-like language behavior. Cognition in nonhuman primates is a specific focus throughout. The course is a mix of lecture and discussion, emphasizing the latter as much as possible.]

PSYCH 416(416) Modeling Perception and Cognition (also PSYCH 616[616], COGST 416[416])

Spring. 4 credits. Prerequisites: PSYCH 205, 209, 214, or 215, or permission of instructor. Graduate students, see PSYCH 616. M W F. M. Spivey.

Offers a survey of several computational approaches to understanding perception and cognition. Explores linear systems analysis, connectionist models, dynamical systems, and production systems, to name a few. Emphasis is placed on how complex sensory information gets represented in these models, as well as how it gets processed. Covers computational accounts of language processing, language acquisition, visual perception, and visual development, among other topics. Students complete a final project that applies a computational model to some perceptual/cognitive phenomena.

PSYCH 418(418) Psychology of Music (also MUSIC 418[418], PSYCH 618[618]) (KCM-AS)

Fall. 3 or 4 credits, depending on whether student elects to do independent project. Intended for upper-level students in music, psychology, engineering, computer science, linguistics, physics, anthropology, biology, and related disciplines. Some music background desirable but no specific musical skills required. Graduate students, see PSYCH 618. M W. C. L. Krumhansl.

Covers the major topics in the psychology of music treated from a scientific perspective. Reviews recent developments in the cognitive science of music, beginning with music acoustics and synthesis, and extending to music and its emotional and social effects.

PSYCH 423(423) Navigation, Memory, and Context: What Does the Hippocampus Do? (also PSYCH 623[623]) (SBA-AS)

Spring. 4 credits. Prerequisites: intended for juniors, seniors and graduate students. D. Smith.

Although the hippocampus has been the subject of intense scrutiny, for nearly 50 years, there remains considerable disagreement about functional contributions the hippocampus makes to learning and memory process. This seminar will examine the diverse functions attributed to the hippocampus with an eye toward integrating the differing viewpoints in the literature. After a brief historical overview, students will discuss cutting-edge literature on the hippocampal role in spatial navigation, learning, and memory, and context processing.

PSYCH 424(424) Neuroethology (also BIONB 424[424]) (PBS)

Fall. 4 credits. Prerequisites: BIONB 221 or 222 or BIO G 101–102 and permission of instructor. S-U or letter grades. M W F; disc, one hour each week. C. D. Hopkins. For description, see BIONB 424.

PSYCH 425(425) Cognitive Neuroscience (also BIONB 423[423], PSYCH 625[625]) (KCM-AS)

Fall. 4 credits. Prerequisites: introductory biology; biopsychology or neurobiology (e.g., PSYCH 223 or BIONB 221, 222); and an introductory course in perception, cognition, or language (e.g., PSYCH 102, 209, 214, or 215). Graduate students, see PSYCH 625. S-U or letter grades. M W F. Offered alternate years. B. L. Finlay.

Studies the relationship between structure and function in the central nervous system. Stresses the importance of evolutionary and mechanistic approaches for understanding the human behavior and cognition. Focuses on issues in cognitive neuroscience, including mechanisms of perception, particularly vision, and the neuropsychology of everyday acts involving complex cognitive skills such as recognition of individuals, navigation in the world, language, memory, social interaction, and consciousness.

[PSYCH 426(426) Learning Language (also PSYCH 726[726], COGST 426[426]) (KCM-AS)

Spring. 4 credits. Prerequisite: PSYCH 214 or permission of instructor. Letter grades only. Next offered 2008–2009. S. Edelman.

A survey of a promising new synthesis in the understanding of the cognitive function that is at the core of the human nature: language.

The material focuses on two aspects of the study of language: (1) psycholinguistic data and their interpretation, and (2) algorithmic studies and computational modeling. In psycholinguistics, students will read key papers that shed light on the nature of linguistic knowledge ("grammar") possessed by normal adult speakers, and on the learning of this knowledge by children. In computation, the focus is on learning grammar from raw data. The common thread to this course is realism: in psycholinguistics, we shall consider only those results obtained empirically by established psychological procedures (as opposed to intuition, either of experts or of lay speakers); in computation, the only approaches of interest to us are those that are algorithmically tractable, and that are effective when applied to realistic data.]

PSYCH 427(4270) Evolution of Language (also COGST 427[4270], PSYCH 627[6270])

Fall. 3 credits. Prerequisite: junior or senior standing; any one course in psychology or human development. Graduate students, see PSYCH 627. S-U or letter grades.

Offered alternate years. M. Christiansen.

Seminar surveying a cross-section of modern theories, methods, and research pertaining to the origin and evolution of language. Considers evidence from psychology, the cognitive neurosciences, comparative psychology, and computational modeling of evolutionary processes. Topics for discussion may include: What does the fossil record tell us about language evolution? What can we learn from comparative perspectives on neurobiology and behavior? Can apes really learn language? Did language come about through natural selection? What were the potential preadaptations for language? What is the relationship between phylogeny and ontogeny?

[PSYCH 428(4280) Connectionist Psycholinguistics (also COGST 428[4280], LING 428/628[428/6628], PSYCH 628[6280])]

Fall. 3 credits. Prerequisite: senior standing or permission of instructor. Graduate students, see PSYCH 628. Offered alternate years; next offered 2008–2009. T. M. Christiansen.

Connectionist psycholinguistics involves using (artificial) "neural" networks, which are inspired by brain architecture, to model empirical data on the acquisition and processing of language. As such, connectionist psycholinguistics has had a far-reaching impact on language research. This course surveys the state of the art of connectionist psycholinguistics, ranging from speech processing and word recognition, to inflectional morphology, sentence processing, language production and reading. An important focus of discussion is the methodological and theoretical issues related to computational modeling of psychological data. Furthermore, the course discusses the broader implications of connectionist models of language, not only for psycholinguistics, but also for computational and linguistic perspectives on language.]

[PSYCH 429(4920) Olfaction and Taste: Structure and Function (also BIONB 429[4290], PSYCH 629[6290]) (PBS)]

Spring. 4 credits. Next offered 2008–2009. B. Halpern.

Explores structural and functional characteristics of smelling and tasting by reading and discussing current literature in these areas, using the Socratic method.]

PSYCH 430(4300) Moral Reasoning (also PSYCH 630[6300]) (SBA-AS)

Spring. 4 credits. Prerequisites: open to junior and senior psychology majors and to graduate students; open to others by permission of instructor. D. Pizarro.

In recent years there has been a resurgence of interest in the science of morality. Recently, scientists across a wide range of disciplines have made discoveries that bear on the question of how and why humans have a sense of morality. The goals of this course are to offer an introduction to the science behind our moral sense. In order to achieve this goal, we will read articles on almost every area of scientific psychology. By the end of the course you should be well versed in the primary issues and debates involved in the scientific study of morality.

PSYCH 431(4310) Effects of Aging on Sensory and Perceptual Systems (also PSYCH 631[6310]), BIONB 421[4210]) (PBS)

Fall. 3 or 4 credits; 4-credit option involves term paper or creation of relevant web site. Limited to 35 students. Prerequisites: introductory biology or psychology, plus second course in perception, neuroscience, cognitive science. Graduate students, see PSYCH 631. T. R. B. P. Halpern.

Literature-based examination of post-maturation changes in the perceptual, structural, and physiological characteristics of somesthetic, visual, auditory, and chemosensory systems. Emphasis is on human data, with nonhuman information included when especially relevant. Quality of life issues are included. Current developments in human sensory prosthetic devices, and in regeneration or replacement of receptor structures or organs are examined. Brief written statements by e-mail of questions and problems related to each set of assigned readings are required in advance of each class meeting and are automatically distributed to all members of the class. This course is taught using the Socratic method, in which the instructor asks questions of the students. Students read, analyze, and discuss in class difficult original literature dealing with the subject matter of the course. Readings are from Internet sites, a course packet, materials on reserve, and from the course Blackboard site. Students are expected to come to each class having already done and thought about the assigned readings, and to take an active part in every class. All examinations are take-home.

PSYCH 435(4350) Olfaction, Pheromones, and Behavior

Fall. 4 credits. Prerequisites: introductory biology and course in neurobiology and behavior or biopsychology or 300-level course in biopsychology or permission of instructor. R. Johnston.

Covers chemical signals, olfaction, and behavior in vertebrates (including humans), as well as the neurobiology of olfaction and odor-mediated behaviors. Behavioral topics may vary from year to year but include

evaluation of and advertisement for mates, aggression and territorial behavior, parental-young interactions, social recognition (species, sex, individual, kin reproductive state, status), memory for odors, odor and endocrine interactions, imprinting, and homing and navigation. Basic aspects of the structure and function of the olfactory system are also covered, including the molecular biology of chemo-reception, olfactory coding, and higher-order processing in the central nervous system. The format includes lectures, discussions, and student presentations.

PSYCH 436(4360) Language Development (also COGST 337[4360], HD 337[3370], LING 436[4436]) (KCM-AS)

Fall. 4 credits. Open to undergraduate and graduate students. Graduate students should also enroll under HD 633/LING 700/PSYCH 600, supplemental graduate seminar. Prerequisite: at least one course in developmental psychology, cognitive psychology, cognitive development, or linguistics. S-U or letter grades. T. R. B. Lust.

For description, see COGST 337.

PSYCH 437(4370) Lab Course: Language Development (also COGST 450[4500], LING 450[4500], HD 437[4370]) (in conjunction with COGST 436[4360], HD 339[4360], LING 436[4436], Language Development)

Spring. 2 credits. R. B. Lust.

Optional supplement to the survey course Language Development (HD 337/COGST/PSYCH/LING 436). Provides students with a hands-on introduction to scientific research, including design and methods, in the area of first-language acquisition.

PSYCH 440(4400) The Brain and Sleep (also PSYCH 640[6400])

Fall. 4 credits. Prerequisites: at least PSYCH 223 or BIONB 221. Recommended: additional course in biology, biopsychology, or neurobiology. S-U or letter grades. Graduate students, see PSYCH 640. M. W. H. S. Porte.

Taking a comparative evolutionary perspective, this course examines the neural events that instigate, maintain, and disturb the states and rhythms of sleep in various species. Emphasizing human data where possible, special topics include sleep deprivation and the biological functions of sleep; biologically interesting deviations from normal sleep; and the cognitive neuroscience of sleep, including sleep's possible role in learning and memory.

PSYCH 441(4410) Laboratory in Sleep Research (also PSYCH 641[6420])

Spring. 4 credits. Lab fee: \$50. Graduate students, see PSYCH 641. W. H. S. Porte.

Emphasizing the neurobiology of sleep state, this course introduces students to the laboratory study of human sleep and its psychological correlates. Serving as both experimenter and subject, each student learns the physical rationale and techniques of electroencephalography and other bioelectric measures of behavioral state. Using computerized data analysis, students complete weekly laboratory reports and a collaborative term project. Sleep recordings are done during the day or evening when possible. In addition, overnight recording sessions are required.

PSYCH 452(4520) Trauma and Treatment (also PSYCH 652(6520)) (SBA-AS)

Fall. 4 credits. Limited to 12 students; priority given to senior psychology and human development majors. Prerequisite: course work in both psychopathology and social development; permission of instructor by e-mail application during preregistration. Letter grades only. S. Bem. An in-depth examination of psychological trauma and its treatment in psychotherapy. Special attention is given to the neuroscience of danger, defense, and emotional dysregulation, the effects of early traumatic attachment on development, the key role of dissociation, and an array of treatments including dialectical behavior therapy, play therapy, sensorimotor therapy, gestalt therapy, and psychoanalytic therapy.

[PSYCH 465(4650) Topics in High-Level Vision (also COGST 465(4650), PSYCH 665(6650)) (KCM-AS)]

Spring. 4 credits. Graduate students, see PSYCH 665. Offered alternate years; next offered 2008-2009. S. Edelman. High-level vision is a field of study concerned with functions such as visual object recognition and categorization, scene understanding, and reasoning about visual structure. It is an essentially cross-disciplinary endeavor, drawing on concepts and methods from neuroanatomy and neurophysiology, cognitive psychology, applied mathematics, computer science, and philosophy. This course concentrates on a critical examination of a collection of research publications, linked by a common thread, from the diverse perspectives offered by the different disciplines. Students write biweekly commentaries on the assigned papers and a term paper integrating the material covered in class.]

PSYCH 470(4700) Undergraduate Research in Psychology

Fall or spring. 1-4 credits. Prerequisite: written permission from staff member who will supervise the work and assign grade must be included with course enrollment material. Students should enroll in section listed for that staff member; section list available from Department of Psychology. S-U or letter grades. Staff. Practice in planning, conducting, and reporting independent laboratory, field, and/or library research.

PSYCH 471(4710) Advanced Undergraduate Research in Psychology

Fall or spring. 1-4 credits. Prerequisite: written permission of staff member who will supervise work and assign grade must be included with course enrollment material. Students should enroll in sec listed for that staff member; sec list available from Department of Psychology. S-U or letter grades. Staff. Advanced experience in planning, conducting, and reporting independent laboratory, field, and/or library research. One, and preferably two, semesters of PSYCH 470 is required. The research should be more independent and/or involve more demanding technical skills than that carried out in PSYCH 470.

PSYCH 472(4720) Multiple Regression

Spring, weeks 1-7. 2 credits. Prerequisite: one solid semester of introductory statistics. Recommended: analysis of variance. M W F. Staff.

Covers uses and pitfalls of multiple regression in causal analysis, path analysis, and prediction. Emphasis is on analyzing data collected under uncontrolled conditions. Includes collinearity, indicator variables, sets, adjusted and shrunken R^2 , suppressors, hierarchical analysis, overcontrol, and experimental design. Students may use the Minitab, SPSS, Stata, SAS, or Systat statistics packages.

PSYCH 473(4730) General Linear Model

Spring, weeks 8-14. 2 credits. Prerequisite: PSYCH 472 or equivalent. M W F. Staff. Topics include multicategorical variables, corrections for multiple tests, diagnostic methods, nonlinear relationships, interaction, main and simple effects, and basic power analysis. Student may use Minitab, SPSS, Stata, SAS, or Systat.

[PSYCH 478(4780) Parenting and Child Development (also PSYCH 678(6780), HD 444(4440)) (KCM-AS)]

Fall. 4 credits. Limited to 25 students. Intended for seniors and graduate students. Graduate students, see PSYCH 678. Next offered 2008-2009. M W. M. Goldstein. Explores the influence of parenting skills and styles on the development of infants and children. By studying parents and their infants together, the family can be viewed as a system in which the members engage in reciprocal stimulation and regulation of learning and behavior. Patterns of interaction within a family serve as a source of developmental change in infants. Such a system is influenced by internal and external forces. This course examines internal factors such as the biology of parenting and mechanisms of social learning in infants. Also studies the influence of external factors on family life, such as socioeconomic status and changes in family structure (e.g. single vs. dual parenting). Finally, it examines and evaluates the role of public policies and intervention strategies that impact parents and children.]

PSYCH 481(4810) Advanced Social Psychology (also PSYCH 681(6810))

Fall. 4 credits. Limited to 15 students, by application. Priority given to senior psychology majors. Graduate students, see PSYCH 681. T R. D. T. Regan. Readings are primary sources, namely selected articles from very recent issues of the best social psychological journals. Readings are chosen for their importance, their readability, and the likelihood that they will generate stimulating discussion.

PSYCH 482(4820) Automaticity (also PSYCH 682(6820)) (SBA-AS)

Spring. 4 credits. Prerequisites: PSYCH 280; at least one course in cognitive psychology or permission of instructor. R. M. Ferguson. What is automaticity? This is a topic that has gained considerable momentum in social psychology over the past 10 to 15 years and has been broadly applied to classic social psychological phenomena, including judgments, attitudes, emotion, motivation, and behavior. The crux of this momentum has been the controversial argument that such phenomena can occur without a person's awareness, intention, effort, or control. Although there is an abundance of empirical work on this topic, there still remain a number of unanswered and interesting questions. The objective of the course is twofold. The first is for students to learn the automaticity literature in social psychology; the second is to identify

such critical questions, and speculate on possible answers. The course reviews the wide range of theoretical and empirical work on automaticity and examines contemporary definitions of automaticity within social and other areas of psychology. The analysis of automaticity is necessarily closely linked with issues such as unconscious vs. conscious processing, attention, control, intentionality, and free will.

PSYCH 485(4850) The Self (also PSYCH 685(6850))

Spring. 4 credits. Limited to 15 students. Prerequisite: permission of instructor, with priority given to seniors and graduate students. D. Dunning. An enduring task in psychological inquiry has been to survey the ways in which a person's self-image influences emotion, thought, and action. What is self-esteem, and is it a good or a bad thing? How do concerns over self-image motivate people? Do people really know themselves accurately? How does a person's sense of self develop, and does it differ across cultures? Students will be introduced to these and other topics by reading original research articles, and should expect take part in class discussions of the issues raised.

[PSYCH 489(4890) Seminar: Beliefs, Attitudes, and Ideologies (also PSYCH 689(6890)) (CA-AS)]

Fall. 4 credits. Prerequisites: admission by application during spring pre-registration period for fall semester. Priority given to juniors, seniors, and graduate students. Next offered 2008-2009. M. Staff. Course in cultural analysis examining the properties of beliefs and attitudes, how they are formed and changed, the psychological functions they serve, and how they get organized into ideologies. Several specific issues involved in America's "culture wars" are examined, such as abortion, gender, sexual orientation, and affirmative action. Other topics include deaf culture, utilitarian ethics, and the ideology of science. Participants write weekly commentaries on the readings and a term paper examining a particular ideology.]

PSYCH 491(4910) Research Methods in Psychology (also COGST 491(4910), PSYCH/COGST 691(6910))

Prerequisite: permission of instructor. V. Zayas. Research methods are the tools that allow psychologists to test the validity of hypotheses. This course provides a survey of the methods used by scientists in personality and social psychology as well as related behavioral sciences to empirically test hypotheses. Specifically, this course will discuss the following topics: (i) philosophy of science, (ii) research designs and methods, (iii) data collection, analysis, and validity, (iv) report writing, and (v) recurrent and emerging trends and issues in the field of research methods and quantitative analysis. Students concentrate on completing a small research project in which they conduct an experiment, interpret its data, and write up the results.

[PSYCH 492(4920) Sensory Function (also BIONB 492[4920], PSYCH 692[6920]) (PBS)]

Spring. 4 credits. Limited to 25 students. Prerequisite: 300-level neuroscience course, or BIONB 222 or BIOAP 311, or equivalent; knowledge of elementary physics, chemistry, and behavior. S-U or letter grades. Graduate students, see PSYCH 692. M W F. Offered alternate years; next offered 2009–2010.

B. P. Halpern and H. C. Howland.

In general, this course has covered classical topics in sensory function such as vision, hearing, touch, and balance, as well as some more modern topics like sensory processing, location of stimulus sources in space, the development of sensory system, and nonclassical topics such as electroreception and internal chemoreceptors.]

Advanced Courses and Seminars

Advanced seminars are primarily for graduate students, but with the permission of the instructor they may be taken by qualified undergraduates. The selection of seminars to be offered each semester is determined by the needs of the students.

A supplement describing these advanced seminars is available at the beginning of each semester and can be obtained from the department office (211 Uris Hall). The following courses may be offered either semester and carry 4 credits unless otherwise indicated.

PSYCH 510-511(6100-6110) Perception

PSYCH 512-514(6120) Visual Perception

PSYCH 518(6181) Topics in Psycholinguistics

PSYCH 519-520(6830) Affects and Cognition (also NRE 507)

Fall. 4 credits. A. M. Isen.

PSYCH 521(6210) Behavioral and Brain Sciences

Fall and spring. 4 credits each semester.

PSYCH 522(6220) Topics in Perception and Cognition

PSYCH 523(6230) Hormones and Behavior

PSYCH 527(6270) Topics in Biopsychology

[PSYCH 530(6300) Structure in Vision and Language (also COGST 530[6300], LING 530[5530])

Spring. 4 credits. Graduate seminar. Limited to 20 graduate students. Prerequisites: graduate standing; course each in cognitive psychology, linguistics, computer science, or permission of instructor. Offered alternate years; next offered 2008–2009. S. Edelman.

One of the central puzzles of cognition is the manner in which brains deal with structured information such as scenes composed of a variety of objects, or sentences composed of words and phrases. The processing of structure by the brain is constrained by the neuronal architecture, as well as by general principles of information processing that are studied in computer science. This course focuses on insights from these different disciplines, striving for understanding couched in abstract computational terms, yet compatible with the basic neurobiological constraints, with behavioral data, and with philosophical intuition.]

PSYCH 535(6350) Evolutionary Perspectives on Behavior

PSYCH 541(6410) Statistics in Current Psychological Research

PSYCH 550(6500) Special Topics in Cognitive Science (also COGST 550[5500])

Fall. 4 credits. M. Spivey.

PSYCH 580(6800) Experimental Social Psychology

PSYCH 600(6000) General Research Seminar

Fall or spring. 0 credits.

PSYCH 605(6050) Perception (also PSYCH 205[2050])

Spring. 4 credits. Non-arts graduate students only. T R. J. E. Cutting.

PSYCH 612(6120) Laboratory in Cognition and Perception (also PSYCH 412[4120])

Spring. 4 credits. M W. D. J. Field.

PSYCH 613(3150) Obesity and the Regulation of Body Weight (also NS 315[3150])

Spring. 3 credits. Limited to 30 students.

Prerequisites: one course each in psychology and nutrition; undergraduates by permission of instructor. S-U or letter grades. Offered alternate years. T R. D. A. Levitsky.

Multidisciplinary discussion of the causes, effects, and treatments of human obesity. Topics include the biopsychology of eating behavior, the genetics of obesity, the role of activity and energy metabolism, psychosocial determinants of obesity, anorexia nervosa, therapy and its effectiveness, and social discrimination.

PSYCH 614(6140) Cognitive Psychology (also PSYCH 214[2140], COGST 214[2140], COGST 614[6140])

Fall. 3 credits. M W. F. S. Edelman.

PSYCH 616(6160) Modeling Perception and Cognition (also PSYCH 416[4160], COGST 416[4160])

Spring. 4 credits. M. Spivey.

PSYCH 618(6180) Psychology of Music (also PSYCH 418[4180], MUSIC 418[4181])

Fall. 4 credits. M W. C. Krumhansl.

PSYCH 623(6230) Navigation, Memory, and Context: What Does the Hippocampus Do? (also PSYCH 423[4230])

Spring. 4 credits. D. Smith.

PSYCH 625(6250) Cognitive Neuroscience (also PSYCH 425[4250])

Fall. 4 credits. M W F. B. L. Finlay.

PSYCH 626(6260) Evolution of Human Behavior (also PSYCH 326[3260])

Spring. 4 credits. T R. R. E. Johnston.

PSYCH 627(6270) Evolution of Language (also COGST/PSYCH 427[4270])

Fall. 3 credits. M. Christiansen.

[PSYCH 628(6280) Connectionist Psycholinguistics (also LING 428[628][4428,6628], PSYCH 428[4280], COGST 428[4280])

Fall. 3 credits. Next offered 2009–2010. W. M. Christiansen.]

[PSYCH 629(6290) Olfaction and Taste: Structure and Function (also PSYCH/ BIONB 429[4290])]

PSYCH 630(6300) Moral Reasoning

Spring. 4 credits. T R. D. Pizarro.

PSYCH 631(6310) Effects of Aging on Sensory and Perceptual Systems (also PSYCH 431[4310], BIONB 421[4210])

Fall. 4 credits. T R. B. P. Halpern.

PSYCH 632(6320) Biopsychology of Learning and Memory (also PSYCH 332[3320], BIONB 328[3280])

Spring. 4 credits. M W F. T. J. DeVoogd.

PSYCH 640(6400) The Brain and Sleep (also PSYCH 440[4400])

Fall. 4 credits. M W. H. S. Porte.

PSYCH 641(6410) Laboratory in Sleep Research (also PSYCH 441[4410])

Spring. 4 credits. W. H. S. Porte.

PSYCH 642(6420) Human Perception: Applications to Computer Graphics, Art, and Visual Display (also PSYCH/ COGST 342[3420], VISST 342[3342])

Fall. 4 credits. T R. D. J. Field.

PSYCH 652(6520) Trauma and Treatment (also PSYCH 452[4520])

Fall. 4 credits. S. Bern.

[PSYCH 665(6650) Topics in High-Level Vision (also PSYCH 465[4650], COGST 465[4650])

Spring. 4 credits. Next offered 2008–2009. S. Edelman.]

[PSYCH 678(6780) Parenting and Child Development (also PSYCH 478[4780], HD 444[4440])

Fall. 4 credits. M. Goldstein.]

PSYCH 681(6810) Advanced Social Psychology (also PSYCH 481[4810])

Fall. 4 credits. T R. D. T. Regan.

PSYCH 682(6820) Automaticity (also PSYCH 482[4820])

Spring. 4 credits. R. M. Ferguson.

PSYCH 685(6850) The Self (also PSYCH 485[4850])

Spring. 4 credits. D. Dunning.

[PSYCH 689(6890) Seminar: Beliefs, Attitudes, and Ideologies (also PSYCH 489[4890])]

PSYCH 691(6910) Research Methods in Psychology (also PSYCH 491[4910], COGST 491[4910])

Spring. 4 credits. T R. V. Zayas.

[PSYCH 692(6920) Sensory Function (also PSYCH/BIONB 492[4920])

Spring. 4 credits. M W F. Next offered 2009–2010. B. P. Halpern and H. C. Howland.]

[PSYCH 696(6960) Introduction to Sensory Systems (also PSYCH/ BIONB 396[3960])

Spring. 4 credits. M W F. Next offered 2009–2010. B. P. Halpern.]

PSYCH 700(7000) Research in Biopsychology

PSYCH 709(7090) Developmental Psychology (also PSYCH 209[2090])

Spring. 4 credits. M W. M. Goldstein.

PSYCH 710(7100) Research in Human Experimental Psychology**PSYCH 713(7130) Information Processing: Conscious and Nonconscious**

Spring. 4 credits. R. Staff.

[PSYCH 714(7140) Comparative Cognition (also PSYCH/COGST 414(4140))]

Spring. 4 credits. T R. Next offered 2008-2009. Staff.]

[PSYCH 716(7160) Auditory Perception (also PSYCH 316(3160))]

Fall. 4 credits. M W. Next offered 2008-2009. C. L. Krumhansl.]

PSYCH 720(7200) Research in Social Psychology and Personality**PSYCH 722(7220) Hormones and Behavior (also PSYCH/BIONB 322(3220))]**

Fall. 4 credits. M W F E. A. Regan.

PSYCH 726(7260) Learning Language (also PSYCH/COGST 426(4260))]

Spring. 4 credits. S. Edelman.

PSYCH 775(7750) Proseminar in Social Psychology I

Fall. 2 credits. Limited to 10 students. Prerequisite: graduate students in social psychology; permission of instructors. D. Dunning, M. Ferguson, T. Gilovich, D. Pizarro, and D. Regan.

First semester of a yearlong discussion-seminar course intended to give graduate students an in-depth understanding of current research and theory in social psychology. Emphasizes social cognition, but other topics, such as group dynamics, social influence, the social psychology of language, and emotional experience, are covered.

PSYCH 776(7760) Proseminar in Social Psychology II

Spring. 2 credits. Limited to 10 students. Prerequisite: graduate students in social psychology; permission of instructors. D. A. Dunning, M. Ferguson, T. D. Gilovich, D. Pizarro, and D. T. Regan.

Second semester of a yearlong discussion-seminar course intended to give graduate students an in-depth understanding of current research and theory in social psychology. Emphasizes social cognition, but other topics, such as group dynamics, social influence, the social psychology of language, and emotional experience are covered.

PSYCH 900(9000) Doctoral Thesis Research in Biopsychology**PSYCH 910(9100) Doctoral Thesis Research in Human Experimental Psychology****PSYCH 920(9200) Doctoral Thesis Research in Social Psychology and Personality****Summer Session Courses**

The following courses are also frequently offered in the summer session, though not necessarily by the same instructor as during the academic year. Not all of these courses are offered in a particular summer. Information regarding these courses and additional summer session offerings in psychology is available from the department before the end of the fall semester.

PSYCH 101 Introduction to Psychology: The Frontiers of Psychological Inquiry

PSYCH 102 Introduction to Cognitive Science

PSYCH 128 Introduction to Psychology: Personality and Social Behavior

PSYCH 223 Introduction to Biopsychology

PSYCH 280 Introduction to Social Psychology

PSYCH 350 Statistics and Research Design

RELIGIOUS STUDIES MAJOR

D. Boucher, director; A. Blackburn, R. Brann, C. M. Carmichael, K. Clinton, J. Fajans, D. Fredericksen, D. Gold, S. Greene, K. Haines-Eitzen, J. S. Henderson, T. D. Hill, T. J. Hinrichs, D. Holmberg, P. R. Hyams, C. V. Kaske, W. J. Kennedy, J. M. Law, S. MacDonald, K. S. March, L. Monroe, R. L. Moore, D. I. Owen, D. S. Powers, C. Robinson, P. S. Sangren, S. Toorawa, M. Washington, A. Willford

The Religious Studies Program, an academic unit providing a major in the scholarly study of religion, offers a wide variety of courses addressing various approaches to, and topics in, the study of religion.

The Religious Studies Program is designed to meet the needs of three classes of students: (1) students planning to pursue advanced degrees in the academic study of religion or allied disciplines or subdisciplines (e.g., history of religions, religion and literature, religion and psychology, ethics, theology, area studies); (2) students seeking courses on topics relating to religion to fulfill distribution requirements; and (3) students desiring a more systematic exposure to the academic study of religion as a significant component of a liberal arts education. To all students, our program offers an excellent opportunity to develop a deeper understanding and appreciation of the complex ways in which religious traditions inform human thought and behavior. The courses offered through our program are built on the established scholarly tradition of the study of religion as an academic, as opposed to confessional, pursuit. Religious traditions are explored in all of their complexity through comparative, contextual (in specific historical or cultural contexts), and thematic studies.

The program also hosts lecture series, conferences, symposia, and periodic social gatherings for faculty members and students throughout the academic year to foster a sense of intellectual community.

The Major in Religious Studies

Signing into the major: To sign into the major in Religious Studies, a student must have completed at least one course in Religious Studies before scheduling an appointment with the program director. Here is the process:

1. Schedule an appointment with the director of the Religious Studies Program, whose name and e-mail address can be found on the Religious Studies web site.
2. In addition to a copy of the current Cornell transcript (the informal one students regularly receive is acceptable), students should bring to their meeting with the director all of these forms, available in the Religious Studies office, 409 White Hall:
 - a. a completed Religious Studies major application form
 - b. a proposed "course of study," which will be used as a guide in the student's conversation with the director and revised for formal submission to the program upon your entrance as a major
 - c. a College of Arts and Sciences advisor/major form, which will be signed by the director and advisor. The advisor will be assigned in the student's meeting with the director based on interest.

Advising in the Religious Studies

Program: Upon entering the major in Religious Studies, a student is assigned a faculty advisor whose area of expertise most closely matches the proposed interest of the student. An up-to-date approved advisor list is available in the Religious Studies office. Note that not all faculty members who cross-list courses with RELST can serve as RELST advisors. Working closely with one's RELST advisor when selecting courses is an important component of this program, enabling students to fulfill the requirements for the major while creating an integrated and coherent course of study out of our large number of multidisciplinary course offerings.

To graduate as a major in Religious Studies, a student must (1) complete with letter grades the program's three core courses, RELST 250 Introduction to Asian Religions, RELST 251 Introduction to Judaism, Christianity, and Islam, and RELST 449 History and Methods of the Academic Study of Religion; and (2) complete with letter grades seven additional courses approved for the major.

Students must complete 10 courses cross-listed with Religious Studies:

Three Core Courses:

RELST 250 Introduction to Asian Religions

RELST 251 Introduction to Judaism, Christianity, and Islam

RELST 449 History, Theory, and Methods in the Academic Study of Religion

The requirement for either or both RELST 250/251 may be satisfied by taking two or more courses in the relevant traditions with some attention to breadth:

The requirement for RELST 250 may be satisfied by taking at least one course on South Asian traditions AND one course on East Asian traditions.

The requirement for RELST 251 may be satisfied by taking at least one course in each of two or more of the traditions of Near Eastern origin (Judaism, Christianity, and Islam).

Absolutely no student will be exempted from RELST 449.

Seven Additional Courses

In selecting their additional courses for the major, students are expected to consult closely with their advisors to ensure that their programs have adequate breadth in Religious Studies generally and depth in a particular tradition, cultural area, or approach to the field.

Most courses approved for the major are offered by cooperating departments within the College of Arts and Sciences. A comprehensive up-to-date list of these courses is maintained at the office of the Religious Studies Program, 409 White Hall.

Graduating with Honors in Religious Studies:

GENERAL INFORMATION

- Eligibility.** 3.0 cumulative average and 3.5 average inside the major with no grade in the major below B-. Program director notifies eligible candidates during the spring semester of the junior year or before commencement of final year.
- Honors Courses.** Candidates must sign into RELST 495 Senior Honors Essay for 8 credits (two courses) for two semesters. After the first semester, an R in the transcript indicates that this course (usually for 8 credits) is a yearlong course. When the project is completed at the end of the second semester, the grade recorded counts for all 8 credits. (The 8-credit limit is the result of the conviction/belief that earning more than 8 credits for a single "piece" of one's undergraduate education is unwise.)
The student submits the honors proposal (with and according to the program's instruction/cover sheet) to the Religious Studies administrator before the end of the spring semester of the junior year, or not later than Sept. 15 of the final year. The administrator then approves the student's signing into the honors courses.
- Honors Committee—three faculty members.** While students are required to have three faculty members on their committee at the time of the submission of the final draft, only two of them must be identified when the proposal is submitted. In the event the advisor is on leave, the program will assign a committee member from the list of approved RELST advisors. The three members should be:

- The professor who has agreed to work closely with the student over the year and to be the supervisor/grader of the project is chair of the committee.
- The student's Religious Studies major advisor (required)
- Another knowledgeable faculty member

Sometimes the advisor is the supervisor/chair. If that is the case, the student needs two additional knowledgeable professors for the committee of three.

Courses Approved for the Major Sponsored by Religious Studies

RELST 123(1111) Introduction to Biblical Hebrew 1 (also JWST/NES 123[1111])
Fall. 4 credits. L. Monroe.
For description, see NES 123.

RELST 133-134(1211-1212) Introduction to Qur'anic and Classical Arabic (also NES 133-134[1211-1212])
133, fall; 134, spring. 4 credits. M. Younes.
For description, see NES 133-134.

[RELST 202(2105) The Greek New Testament (also CLASS 202[2105])
Spring. 3 credits. Prerequisites: at least one year of Ancient Greek (CLASS 101-103 or 104, or permission of instructor). Next offered 2008-2009. E. Rebillard.
For description, see CLASS 202.]

RELST 211(2110) Black Religious Traditions: Sacred and Secular (also AM ST 251[2110], HIST 211[2110])
Spring 4 credits. M. Washington.
For description, see HIST 211.

[RELST 215(2150) Crusade, Heresy, and Inquisition in the Medieval Mediterranean (also HIST 214[2141])
Spring. 4 credits. Limited to 15 students. Next offered 2009-2010. P. Hyams.
For description, see HIST 214.]

RELST 224(2724) Introduction to the Hebrew Bible II (also JWST/NES 224[2724])
Fall. 4 credits. L. Monroe.
For description, see NES 224.

[RELST 225(2261) Society and Religion in China (also HIST 226[2261])
Fall. 4 credits. Next offered 2008-2009. T. J. Hinrichs.
For description, see HIST 226.]

[RELST 226(2646) Atheism Then and Now (also CLASS 226[2646])
Spring. 3 credits. Next offered 2009-2010. J. Coleman.
For description, see CLASS 226.]

[RELST 242(2420) Religion and Politics in American History (also HIST/AM ST 242[2420])
Spring. 4 credits. Sophomore seminar. Limited to 15 students. Prerequisite: permission of instructor. Next offered 2008-2009. R. L. Moore.
For description, see HIST 242.]

RELST 250(2250) Introduction to Asian Religions (also ASIAN 250[2250])
Spring. 3 credits. D. Boucher.
For description, see ASIAN 250.

RELST 251(2651) Holy War, Crusade, and Jihad (also HIST 269[2691], NES 251[2651], JWST 251[2651], COM L 231[2310])
Fall. 3 credits. R. Brann.
For description, see NES 251.

RELST 256(2556) Introduction to the Qu'ran (also JWST/NES 256[2556])
Fall. 4 credits. S. Toorawa.
For description, see NES 256.

RELST 262(2630) Religion and Reason (also PHIL 263[2630])
Fall. 4 credits. D. Pereboom.
For description, see PHIL 263.

RELST 263(2663) Introduction to Biblical History and Archaeology (also ARKEO/NES 263[2663])
Fall. 4 credits. J. Zorn.
For description, see NES 263.

RELST 275(2675) Religions of Ancient Israel (also ARKEO 276[2765], JWST/NES 275[2675])
Spring. 4 credits. J. Zorn.
For description, see NES 275.

[RELST 277(2277) Meditation in Indian Culture (also ASIAN 277[2277])
Spring. 3 credits. Next offered 2008-2009. D. Gold.
For description, see ASIAN 277.]

RELST 315(3150) Medieval Philosophy (also PHIL 325[3150])
Fall. 4 credits. S. Macdonald.
For description, see PHIL 315.

RELST 320(3720) Women in the Hebrew Bible (also NES 320[3720])
Spring. 4 credits. L. Monroe.
For description, see NES 320.

RELST 323(3230) Myth, Ritual, and Symbol (also ANTHR 320[3230])
Spring. 4 credits. D. Holmberg.
For description, see ANTHR 320.

RELST 326(3260) Christianity and Judaism (also COM L 326[3260])
Spring. 4 credits. C. Carmichael.
For description, see COM L 326.

[RELST 328(3280) Literature of Old Testament (also COM L 328[3280])
Fall. 4 credits. Next offered 2009-2010. C. Carmichael.
For description, see COM L 328.]

[RELST 332(3644) Sages and Saints/Ancient World (also HIST 338[3644], CLASS 332[3644])
Spring. 4 credits. Next offered 2008-2009. E. Rebillard.
For description, see CLASS 332.]

[RELST 347(3347) Tantric Traditions (also ASIAN 347[3347])
Fall. 4 credits. Next offered 2009-2010. D. Gold.
For description, see ASIAN 347.]

RELST 348(3348) Indian Devotional Poetry (also ASIAN 348[3348])
Spring. 4 credits. D. Gold.
For description, see ASIAN 348.

RELST 349(3460) Modernization of the American Mind (also AM ST/HIST 346[3460])
Fall. 4 credits. L. Monroe.
For description, see HIST 346.

[RELST 351(3351) Indian Religious Worlds (also ASIAN 351[3351])
Fall. 4 credits. Next offered 2008-2009. D. Gold.
For description, see ASIAN 351.]

RELST 354(3354) Indian Buddhism (also RELST 654[6654], ASIAN 354/654[3354/6654])
Fall. 4 credits. D. Boucher.
For description, see ASIAN 354.

RELST 355(3355) Japanese Religions: A Study of Practice (also ASIAN 355[3355])
Spring. 4 credits. J. M. Law.
For description, see ASIAN 355.

[RELST 359(3359) Japanese Buddhism (also ASIAN 359(3359))

Spring. 4 credits. Next offered 2008–2009.
J. M. Law.

For description, see ASIAN 359.]

[RELST 368(3680) Marriage and Sexuality in Medieval Europe (also HIST/FQSS 368(3680))

Fall. 4 credits. Next offered 2008–2009.
P. Hyams.

For description, see HIST 368.]

[RELST 405(4665) Augustine's Confessions (also CLASS 405(4665))

Spring. 4 credits. Next offered 2008–2009.
C. Brittain.

For description, see CLASS 405.]

RELST 410(4100) Latin Philosophical Texts (also PHIL 410(4100), LATIN 612(7212))

Fall. Variable credit. Prerequisite: knowledge of Latin and permission of instructor. Staff.

For description, see PHIL 410.

RELST 420(4102) Biblical Hebrew Prose—Judges (also NES/JWST 420(4102))

Spring. 4 credits. L. Monroe.

For description, see NES 420.

[RELST 421(4421) Religious Reflections on the Human Body (also ASIAN 421(4421))

Fall. 4 credits. Next offered 2009–2010.
J. M. Law.

For description, see ASIAN 421.]

RELST 426(4260) New Testament Seminar (also COM L 426(4260))

Spring. 4 credits. C. Carmichael.

For description, see COM L 426.

RELST 427(4280) Biblical Seminar (also COM L 428(4280))

Fall. 4 credits. C. Carmichael.

For description, see COM L 428.

RELST 429(4290) Adam's Rib and Other Divine Signs: Reading Biblical Narrative (also ENGL 429(4290))

Spring. 4 credits. L. Donaldson.

For description, see ENGL 429.

RELST 438(4438) Monks, Texts, and Relics: Transnational Buddhism in Asia (also ASIAN 438(4438))

Spring. 4 credits. A. Blackburn.

For description, see ASIAN 438.

RELST 440(4540) Maimonides and Averroes (also NES 440(4540))

Spring. 4 credits. R. Brann.

For description, see NES 440.

RELST 441(4441) Mahayana Buddhism (also ASIAN 441(4441))

Spring. 4 credits. D. Boucher.

For description, see ASIAN 441.

RELST 449(4449) History and Methods of the Academic Study of Religion (also ASIAN 449(4449))

Spring. 4 credits. Requirement for Religious Studies majors. J. M. Law.

For description, see ASIAN 449.

[RELST 460(4460) Indian Meditation Texts (also ASIAN 460(4460))

Fall. 4 credits. Next offered 2008–2009.
D. Gold.

For description, see ASIAN 460.]

[RELST 475(4625) Christianization/Roman World (also CLASS 475(4625), HIST 483(4831))

Fall. 3 credits. Next offered 2008–2009.
E. Rebillard.

For description, see CLASS 475.]

[RELST 489(4489) Religion and Sustainability (also ASIAN 489)(CA-AS)

Fall. 4 credits. Next offered 2009–2010.
J. M. Law.

For description, see ASIAN 489.]

RELST 490–491(4990–4991) Directed Study

490, fall; 491, spring. 2–4 credits each semester. For majors in Religious Studies; permission of director required. Staff.

RELST 495(4995) Senior Honors Essay

Fall and spring (two semesters). 8 credits. Requirement for honors in Religious Studies. Staff.

[RELST 650(6650) Seminar on Asian Religions (also ASIAN 650(6650))

Fall. 4 credits. Limited to 10 students. Prerequisite: graduate standing. Reading knowledge of modern Japanese desirable. Next offered 2008–2009. J. M. Law.

For description, see ASIAN 650.]

RELST 654(6654) Indian Buddhism (also RELST 354(3354), ASIAN 354/654(3354/6654))

Fall. 3 credits. D. Boucher.

For description, see ASIAN 354/654.

Additional courses offered by cooperating departments may also be approved through petition for the major in Religious Studies. For details see the program director, whose name and e-mail address can be found on the Religious Studies web site.

Stycos, P. Swenson, B. Teutli (associate chair), S. Tun, M. C. Vallois, C. Waldron. Emeriti; C. Morón Arroyo, J. Béreaud, A. Colby-Hall, N. Furman, A. Grossvogel, P. Lewis, A. Seznec. Adjunct Associate Professor: S. Tarrow.

The Department of Romance Studies offers courses in the following areas: Catalan, French, Hispanic, Italian, and Luso-Brazilian literatures; French, Italian, Portuguese, Quechua, and Spanish language; Francophone, Italian, Luso-Brazilian, and Hispanic cultures; and linguistics and semiotics. Through its course offerings and opportunities for independent study, the department seeks to encourage study of the interactions of the Romance literatures among themselves, with other literatures, and with other fields of inquiry.

Catalan

[CATAL 121–122(1210–1220) Elementary Catalan

121, fall; 122, spring. 4 credits each semester. 121 must be taken before 122. Recommended: knowledge of another Romance language. Next offered 2008–2009. Staff.

Catalan is a Romance language spoken by some 10 million people in four European states (Andorra, France, Italy, and Spain). This course provides a thorough grounding in all language skills: speaking, listening, reading, and writing, and is designed to provide students with the basis for establishing linguistic contact with Catalan culture.]

French

T. Alkire, A. Berger, L. Dubreuil, M. Greenberg, C. Howie, R. Klein, S. LoBello, K. Long, J. Luks, T. McNulty, R. Possen, K. Proux-García, C. Sparfel, S. Tun, M. C. Vallois, C. Waldron. Emeriti: J. Béreaud, A. Colby-Hall, N. Furman, D. I. Grossvogel, P. Lewis, A. Seznec. Adjunct Associate Professor: S. Tarrow

The Major

The major in French is divided into two options: French cultural studies and French literature. While prospective majors should try to plan their programs as far ahead as possible, especially if they intend to study abroad, no students will be refused admission to the major merely because of a late start. See the director of undergraduate studies, Professor Kathleen Long (kpl2@cornell.edu), 320 Morrill Hall. This consultation is especially important for finding out what sequence of courses will follow the current choice of courses.

We are currently not admitting students to the French linguistics major. Students having such interests should apply for admission through the field of linguistics. Courses in general linguistics are offered.

French Literature

This option is designed to give students mastery of the oral and written language, as well as knowledge and understanding of French and Francophone literatures and cultures, and to develop their skills in literary analysis.

To be admitted to the major, a student should have completed FREN 219 and 221 or equivalent courses (to be determined by the director of undergraduate studies).

To complete the major, a student must:

1. Acquire advanced knowledge of and competence in French language. This competence is demonstrated by the successful completion of FREN 301, Advanced French I; or FREN 305, French through Film (**only one may be taken for credit) or a properly accredited study abroad program or the passing of a special language test (the CASE examination) or permission of the director of undergraduate studies.
2. Take the two core courses for the major: FREN 321, Readings in Modern French Literature and Culture; FREN 322, Readings in Early Modern French Literature and Culture.
3. Take five or more additional courses or the 300 level or above, including

- One course on Francophone Literature or culture
- One course on French Literature or culture pre-1789
- One course at the 400 level
- Three courses conducted in French (i.e., no more than two courses conducted in English may be counted toward the major), and
- Up to two courses offered by a department other than Romance Studies (for example Comparative Literature, History, Linguistics, Philosophy, Art History, or Visual Studies), provided the course includes a significant (at least 50 percent) French component.

French Cultural Studies

This option is designed to give students mastery of the oral and written language, as well as a broader knowledge of French and Francophone culture in an interdisciplinary context.

To be admitted to the major, a student should have completed FREN 219 or 221 or equivalent courses (to be determined by the director of undergraduate studies).

To complete the major, a student must

- Acquire advanced knowledge of and competence in French language. This competence is demonstrated by the successful completion of FREN 301, Advanced French I; or FREN 305, French through Film (**only one may be taken for credit), or a properly accredited study abroad program or the passing of a special language test (the CASE examination) or the permission of the director of undergraduate studies.
- Take one of the core courses for the major: FREN 320, Introduction to the 21st Century; FREN 321, Readings in Modern French Literature and Culture; or FREN 325, Being French (all may be taken for credit, but only one is required)
- Take six or more additional courses at the 300-level or above, including
 1. One course on French literature or culture pre-1789
 2. One course at the 400 level
 3. Three courses offered by the Department of Romance Studies
 4. Three courses conducted in French (i.e., no more than three courses conducted in English may be counted toward the major) and
 5. Up to three courses offered by a department other than Romance Studies (for example History, Government, Philosophy, Art History, Comparative Literature, or Visual Studies), provided the course includes a significant (at least 50 percent) French component.

Administration of the French Major

Students are admitted to the major by the director of undergraduate studies in the French section of the Department of Romance Studies but are guided by their individual advisors. A copy of each student's progress is given to the director of undergraduate studies for approval and safe-keeping.

Concentration in French Studies

At Cornell, a concentration is the functional equivalent of a minor. Its purpose is to supplement a student's major with a complementary focus or concentration that is indicated on the graduate's transcript. The concentration in French Studies, organized by the interdisciplinary Program in French Studies, is designed to be compatible with all kinds of majors and is open to students in all the undergraduate colleges. The concentration promotes broad understanding of French culture, as well as Francophone literatures, societies, and their political/economic systems; it also encourages students to refine and practice their language skills. Students pursuing the concentration must attain proficiency (by taking a placement exam or completing a 200-level course in French) and must take the core course The French Experience (FREN 224 or HIST 270) or an approved equivalent of the core course (approved alternatives will be listed on the program web site). Students may also petition the program director to use an advanced course conducted in French as their core course. Completion of the concentration requires, in addition to the core, three non-language courses on French and Francophone topics. Only one of the four courses required for the concentration can be taken S-U.

Applications for the concentration are accessible at the French Studies web site, www.einaudi.cornell.edu/french-studies/about/index.asp and should be submitted to the Department of Romance Studies (303B Morrill Hall) or to Callean Hile at chl2@cornell.edu.

Study Abroad in France

French majors or other interested students may study in France for one or two semesters during their junior year. Opting for one of several study-abroad plans recognized by the Department of Romance Studies facilitates the transfer of credit. Information about these plans is available from the director of undergraduate studies.

Students must be Cornell undergraduates with a strong academic record. The minimum French preparation is the completion of FREN 219 or its equivalent in advanced credit or placement by the Cornell CASE examination. Taking FREN 301 or 305, or even 312 or 313 is, however, strongly recommended. Students interested in Studying in France are encouraged to consider the special benefits offered by EDUCO, the program in Paris cosponsored by Cornell, Emory, and Duke Universities. EDUCO offers advanced students a challenging course of study and the experience of total immersion in French life and culture in Paris. Participants in this program spend the year or semester as fully matriculated students at the Universities of Paris VII or IV and other institutions of higher learning in Paris, including the Institut d'Etudes des Sciences Politiques (Science Po), selecting courses in many fields from the regular university course offerings. Students begin the academic year with an intensive three-week orientation in French history, society and daily life. While it is possible to enroll in the EDUCO Program for one semester, admission will be offered first to students planning to study abroad for the full academic year.

EDUCO maintains a center in Paris with full support staff. The resident director, chosen

annually from the Cornell, Emory, and Duke faculties, teaches a special seminar each semester, provides academic advice, and helps ensure the quality of the courses. The center, which includes a small library and word-processing facilities, is regularly used by students for special tutorials, seminars, and lectures, as well as informal gatherings.

Honors. The honors program encourages well-qualified students majoring in French literature and culture to do independent work in French beyond the required course work for the major. The preparation of the senior honors essay, generally spread over two semesters, provides a unique learning opportunity, since it allows for wide reading and extensive rewriting to a degree not possible in the case of course papers.

To be eligible for honors, students must have a general grade point average of at least 3.00 and a grade point average of at least 3.5 in the French major.

No special seminars or courses are required of honors students, but they will have regular meetings with the faculty advisors who have agreed to supervise their work. They may receive course credit by enrolling in FREN 429-430, but these independent study courses must be taken in addition to the courses that meet the minimum requirements for the major. At the end of the senior year, each honors student is examined orally on the honors essay by a jury consisting of his or her faculty advisor and two other faculty members. The senior essay is to be made available for reading by the jury on or before April 15. The awarding of honors is determined by the student's grades in the major and the quality of the honors essay.

Enrollment in a language course is conditional upon the student's eligibility for the particular level and on attendance at the first scheduled class session. Because of the high demand for language courses, a student who fails to attend the first class meeting will be dropped so others may register.

Note: Students placed in the 200-level course have the option of taking language and/or literature courses.

FREN 121-122(1210-1220) Elementary French

121, fall; 122, spring. 4 credits each term. Students who have previously studied French must have an LPF score lower than 37, or SAT II lower than 410, to be eligible for FREN 121. Prerequisite for 122: LPF score 37-44 or SAT II 410-480, FREN 121.

J. Luks (course coordinator) and staff. FREN 121-122 is a two-semester sequence of courses designed to provide a thorough grounding in French language and an introduction to intercultural competence as preparation for real-world application or eventual work in literary and/or cultural studies. Classes provide context- and genre-specific practice in speaking, listening, reading, writing, as well as analytical skills for grammar, with the goal of helping students to develop the necessary tools to become independent language learners.

FREN 123(1230) Continuing French

Fall or spring. 4 credits. Prerequisite: FREN 122 or an LPF score of 45-55 or SAT II 490-590. Recommended courses after FREN 123: FREN 206 or 209. Fall: K. Proux-García (course coordinator) and staff; spring: K. Proux-García.

FREN 123 is an all-skills course designed to improve pronunciation, oral communication, and reading ability; to establish a groundwork for correct writing; and to provide a substantial grammar review. The approach in the course encourages the student to see the language within the context of its culture.

FREN 206(2060) French Intermediate Reading and Writing

Fall or spring. 4 credits. *Satisfies Option 1.* Prerequisite: FREN 123, LPF score 56-64, or SAT II 600-680. Conducted in French. Recommended courses after FREN 206: FREN 210, 219 or 221. Students who have taken FREN 206 are not eligible to take FREN 209 for credit. S. Tun.

This language course is designed for students who want to focus on their reading and writing skills. Emphasis is placed on grammar review and expansion, vocabulary development, and appreciation of different styles of language. Diverse text types are used, including a contemporary novel and student-selected material.

FREN 209(2090) French Intermediate Composition and Conversation I

Fall, spring, or summer. 4 credits. *Satisfies Option 1.* Prerequisite: FREN 123, LPF score 56-64, or SAT II 600-680.

Recommended courses after FREN 209: FREN 210, 219 or 221. Students who have taken FREN 209 are not eligible to take FREN 206 for credit. Fall: C. Sparfel (course coordinator), C. Waldron, and staff; spring: C. Sparfel (course coordinator), and staff; summer: C. Waldron.

This intermediate level course is designed for students who want to focus on their speaking and writing skills. Emphasis is placed on strengthening of grammar skills, expansion of vocabulary and discourse levels to increase communicative fluency and accuracy. The course also provides continued reading and listening practice as well as development of effective language learning strategies.

FREN 210(2100) Pronunciation of Standard French

Spring. 3 credits. **This course cannot serve to fulfill the language requirement.** Prerequisites: FREN 206 or higher, CASE Q+, or permission of instructor. T. Alkire.

This intermediate level course focuses on accent reduction. Students will learn how to transcribe French sounds while simultaneously engaging in systematic listening and pronunciation exercises. The exercises target vowels, consonants and basic intonational patterns. Expressive intonation may be addressed near the end of the semester if time permits. Class work will include memorization of short dialogues and scenes from films. Students will achieve better pronunciation, greater fluency, and increased self-assurance in spoken French by the end of the course.

FREN 219(2190) French Intermediate Composition and Conversation II

Fall or spring. 4 credits. *Satisfies Option 1.* Prerequisite: FREN 206 or 209, or permission of instructor, or Q+ on the Cornell Advanced Standing Examination (CASE). Taught in French. FREN 221 may be taken concurrently with 219. Recommended courses after FREN 219: FREN 221, 301 or 305. Fall: S. LoBello (course coordinator) and staff; spring: S. LoBello (course coordinator) and staff.

This course emphasizes conversation based on short stories, poems, a play, a novel, newspaper articles, short videos and oral presentations by students. Improving grammatical accuracy and enriching vocabulary in oral and written expression of French occur in the lively classroom discussions, as well as through written and oral analyses of the readings, compositions on student-selected topics, and through grammar review. Themes and emphases may vary from section to section.

FREN 221(2210) Introduction to Textual Analysis (LA-AS)

Fall or spring. 3 credits. *Satisfies Option 1.* Prerequisite: FREN 206 or 209 or CASE Q+. Conducted in French. Fall: C. Howie and staff; spring: M. C. Vallois and staff.

Designed to introduce students to methods of textual analysis, through reading and discussion of works in various genres (narrative prose, drama, poetry) from the French and Francophone world. Emphasizes the development of analytical skills, in particular close readings by a variety of authors from different periods.

FREN 224(2240) The French Experience (CA-AS)

Fall. 4 credits. Conducted in English. C. Howie.

The French Experience is inevitably a misleading title: as if there were only one experience to speak of, and only one France: as if we could say with any precision what these are and why they might matter. This course intends to give students the chance to see that France has meant many different things to many different folks over time. From the Middle Ages to modernity, we'll take a look at a handful of texts—literary, historical, philosophical—that have wrestled with issues of identity and community. In the process, we'll have a chance to engage with what, if anything, France might mean for us now. Readings could include the romances of Chrétien de Troyes, the histories of Renaissance heretics and witches, the scandals and seductions of early modern aristocrats, ongoing debates surrounding philosophy and sovereignty, and various modern accounts—in print and on film—of love, language and citizenship. We'll give priority to texts and voices that challenge customary notions of Frenchness (white, male, Parisian, post-Enlightenment) as well as meditation upon the afterlife of those notions in the American imaginary (e.g., David Sedaris, *Le Divorce*).

FREN 301(3010) Advanced French Composition and Conversation

Fall or spring. 4 credits. *Satisfies Option 1.* Prerequisite: FREN 219 or Q++ on the Cornell Advanced Standing Examination (CASE). Recommended courses after FREN 301: FREN 221, 312 or above. FREN 221 may also be taken concurrently with 301. Students who have taken FREN 305 are not eligible to take FREN 301 for credit. Either FREN 301 or 305 is required for the major. S. LoBello (course coordinator) and staff.

In this course, oral communication skills, writing practice, and a comprehensive review of fundamental grammatical structures are integrated with the reading of short stories and articles on current events taken from French magazines or newspapers, chosen for thematic or cultural interest. Students write weekly papers (essays or translations) and give at least one oral presentation in class.

FREN 305(3050) Advanced French through Film

Fall or spring. 4 credits. *Satisfies Option 1.* Prerequisite: FREN 219 or Q++ on the Cornell Advanced Standing Examination (CASE). Recommended courses after FREN 305: FREN 221, 312 or above. FREN 221 may also be taken concurrently with 305. Students who have taken FREN 301 are not eligible to take FREN 305 for credit. Either FREN 305 or FREN 301 is required for the major. C. Waldron.

This language course provides students with opportunities to further develop their written and oral communication, as well as their listening and reading skills, through the use of French contemporary films, related readings, and presentations by guest speakers. Particular emphasis is given to the cultural and historical context within viewed films, as it relates to French contemporary society.

FREN 312(3120) Advanced French Stylistics

Fall. 4 credits. *Satisfies Option 1.* Prerequisite: FREN 301 or 305, or Q++ on the Cornell Advanced Standing Examination (CASE). Students who have taken FREN 313 are not eligible to take FREN 312 for credit. T. Alkire.

This course on stylistics and translation aims to help students develop a richer, more nuanced and idiomatic command of both the spoken and written language. Systematic study of grammar is discontinued as more attention is devoted to topics such as descriptive and prescriptive stylistics, authorial style, varieties of spoken and written French and their literary representations, rhetorical figures, poetics, as well as translation theory and textual analysis. Writing exercises include pastiche, *précis*, *explication de texte*, an *exercice de style*, and theme. Additional exercises will target vocabulary development. Seminar-style participation in class discussions is expected, as are two oral presentations.

FREN 313(3130) Advanced French through News

Spring. 4 credits. *Satisfies Option 1.* Prerequisite: FREN 301 or 305, or placement by Cornell Advanced Standing Examination (CASE). Students who have taken FREN 312 are not eligible to take FREN 313 for credit. C. Waldron.

This course prepares students for interacting at an advanced level of proficiency in both speaking and writing. Students will increase their vocabulary and knowledge of idiomatic

French, while discussing and debating topics of current interest as they are presented in French televised news broadcasts and other media. A flexible approach allows students to improve their language skills on an individualized basis.

FREN 321(3210) Readings in Modern French Literature and Culture (LA-AS)

Fall. 4 credits. *Satisfies Option 1.*
Prerequisites: FREN 221, 301, or 305 or CASE Q++ placement. Conducted in French. L. Dubreuil.

Designed to teach ways of reading and understanding works created from the Romantic period to the present day, in their cultural context. A range of texts from various genres is presented, and students refine their analytical skills and their understanding of various methodologies of reading. Texts by authors such as Balzac, Baudelaire, Cixous, Colette, Duras, Genet, Mallarmé, Michaux, Proust, Rimbaud, Sarraute, Sartre.

FREN 322(3220) Readings in Early Modern French Literature and Culture (LA-AS)

Fall. 4 credits. *Satisfies Option 1.*
Prerequisite: FREN 221, 301 or 305 or CASE Q++ placement. Conducted in French. M. Greenberg.

Designed to familiarize students with works from the Renaissance, the Classical period, and the Enlightenment, as well as the cultural and historical context in which these texts are created, reflecting a dynamic period of significant change for France. Texts by such authors as Ronsard, du Bellay, Montaigne, Molière, Marguerite de Navarre, Corneille, Diderot, de Lafayette, Racine, Perrault, Rousseau. Students may read texts in the original languages or in translation.

FREN 331(3310) Detours of Desire: Love in France

Fall. 4 credits. Conducted in English.
M. Greenberg.

By reading several key texts that span the history of French literature from the Middle Ages (Tristan and Iseult) to the contemporary period (Jean Genet), we will look at the complicated issues involved in romantic love. Why are the great love stories across the ages tragic? What is the relation between love, desire and death? The readings will be in English and may include Racine, de LaFayette, Laclos, Stendhal, Zola, Proust. These readings will be informed by several different theories of desire ranging broadly from Andreas Capellanus to Freud and Foucault.

FREN 332(3220) Speed Narrating: Nouvelles, Contes, Récits, and Romans Courts in 19th-Century France

Fall. 4 credits. *Satisfies Option 1.*
Prerequisite: FREN 221, 301, or 305 or CASE Q++ placement. Conducted in French. L. Dubreuil.

Contrary to common opinion, the 19th century marks not only the apogee of the novel in French literature, but also new directions for a number of genres. As a counterpoint to the development of narrative "masterworks," numerous oeuvres invent or reinvent ways of telling stories "at great speed." Throughout the century, the non-genre of nouvelle or contes becomes a locus for fantastic or preSciFi, as well as the perfect medium for experimental writing. Texts to be studied may include short stories or récits by Prosper Mérimée,

Théophile Gautier, Gérard de Nerval, Guy de Maupassant, Antoine Villiers de L'Isle-Adam, Alfred Jarry.

FREN 353(3530) Monsters A-X (Aristotle-X-files) (also COM L/FGSS 353(3530)) # (CA-AS)

Fall. 4 credits. Conducted in English.
This course will explore the classical, medieval, and early modern sources for our notions of monsters, including strange beasts, wild men, demons, witches, and cyborgs. What do these figures tell us about our own attitudes towards racial and gender differences, towards other species and towards nature more generally? Finally, what do these figures tell us about our idea of what constitutes life? Texts to be considered will include Aristotle, *On the Generation of Animals*, Pliny's *Natural History*, Victor Hugo's *Notre Dame de Paris*, Gorton Leroux's *Phantom of the Opera*, Ambroise Paré's *On Monsters and Marvels*, *Beowulf*, Bram Stoker's *Dracula*, and various episodes of the *X-Files* ("Detour," "Bad Blood," "El Mundo Gira," etc.) as well as critical material from Donna Haraway (*Simians, Cyborgs, and Women* and *Primate Visions*), Judith Butler (*Gender Trouble*), and Julia Kristeva (*Powers of Horror*).

FREN 370(3700) The French Enlightenment and the Modern Citizen # (CA-AS)

Fall. 4 credits. *Satisfies Option 1.*
Prerequisite: FREN 301 or 305, 321, 322, 323, or CASE placement, or permission of instructor. Conducted in French.
M. C. Vallois.

Through a reading of various works of the French 18th century (by Montesquieu, Voltaire, Diderot, Rousseau, as well as by other, less canonical authors), this course studies the emergence of new literary discourses and practices aiming at a "secularization" of the literary field, in conjunction with the ideological and epistemological changes that took place under the name of Enlightenment. One of those changes, often seen as the most important, is the production of the modern citizen.

FREN 373(3730) Religious Violence # (CA-AS)

Spring. 4 credits. *Satisfies Option 1.*
Prerequisite: FREN 221, 301, or 305, or CASE placement, or permission of instructor. Conducted in French. K. Long.
Seminar exploring, by means of literary texts and other documents, representations of religious violence in Western Europe from the Middle Ages to the modern era, with a particular focus on France. From Holy War to religiously motivated resistance, what are secular mechanisms used to deploy and to deflect religious violence and what is the significance of the ritualistic aspects of such violence for the culture that produces it? How does violence mark the sacred and secular (for example, the dependence of the Catholic church upon secular authorities for various aspects of enforcement of religious doctrine, from interrogation to execution of heretics)?

FREN 389(3890) Canonical States, Canonical Stages (also COM L 389(3890))

Spring. 4 credits. Conducted in English.
M. Greenberg.
The course will be a comparative reading of several 17th-century tragedies. The authors we will read will be Shakespeare, Lope de Vega,

Calderon, Corneille, and Racine. The course will attempt to delimit the origins of modern state in the exclusionary practices that 17th-century tragedy stages for both contemporary (to the plays) audiences and to 21st-century audiences. Our critical apparatus will borrow from different theories of ideology and subjectivity, as they pertain to the theatrical experience.

FREN 390(3900) The Roots of Modernism

Fall. 4 credits. *Satisfies Option 1.*
Prerequisite: FREN 301 or 305, 321, 322, 323, or CASE placement, or permission of instructor. Conducted in French R. Klein.
The Modernist era in art, which is associated with movements like Cubism, Surrealism, and Dada, has its roots in "the Banquet Years," the effervescent fin de siècle in Europe that lasted until 1913. In France, the period includes writers like Jarry, Apollinaire, Gide, Valéry, Cocteau, Tzara, and Proust. Composers such as Satie, Stravinsky, artists like Cézanne and Rousseau. In this course, individual works will be examined with an eye to their role as precursors of more familiar recent forms of artistic expression.

FREN 404(4040) Troubadours and Heretics (also COM L 404(4040))

Fall. 4 credits. Conducted in English.
R. Klein.
Seminar serving as an introduction to reading old Provençal, with discussions of the structure of the language and problems in translation. Readings include some of the greatest examples of troubadour poetry, as well as extensive historical material for the purpose of understanding social and ideological conflicts that shaped the environment in which that poetry arose and declined.

FREN 413(4130) History of Jews: Modern France (also GOVT 313(4130))

Spring. 4 credits. Conducted in English.
V. Caron.

For description, see GOVT 413.

FREN 418(4180) On the Inner Voice (also S HUM 418(4180))

Fall. 4 credits. Limited to 15 students.
D. Riley.
Is the "inner voice" spontaneous, imposed, or a dictated improvisation? We shall be reflecting on this topic [in its poetic, but more often in its extra-literary incarnations] via readings in phenomenology, the history of aphasiology and the history of consciousness, recent developments in neurology, and in philosophies of language and of self. The emphasis will range from theories of the inner voice's location, to its vulnerability or durability. Detailed readings will be suggested on a weekly basis, as the course evolves.

FREN 419-420(4190-4200) Special topics in French Literature

419, fall; 420, spring. 2-4 credits each semester. Prerequisite: permission of instructor. Staff.
Guided independent study of special topics.

FREN 422(4220) Women's (Hi)stories in French and Francophone Literature (also FREN 622(6220))

Fall. 4 credits. M. C. Vallois.
Based on a limited number of texts the course will re-examine the differing relations between literature, history, genre and gender practice and theory across time. Through close analyses of some of our most important gendered and non-gendered stories, we will

attempt to resituate the roots of the fables of identity of our modernity. Examples of case studies may include: the memoirs of and legends around Marguerite de Valois; salon writing and fairy tales; juridical writings and revolutionary pamphlets, Romantic and exotic short stories, domestic and pastoral novels.

FREN 423(4230) Cerebral Seductions (also S HUM 425(4250))

Spring. 4 credits. Limited to 15 students. W. Jones.

What's the most important sexual organ for humans? The brain, of course! Cerebral Seductions concerns both sex and the brain in various ways. We will explore the emergent field of cognitive literary theory and criticism, reading the work of cognitive critics (e.g., Hogan, Richardson, and Zunshine) and cognitive scientists (e.g., Damasio, Gazzaniga), while also considering the ways that other types of literary theory (historical, post-structuralist, psychoanalytic) might be incorporated within a cognitive framework. With this approach in mind, we will read texts within a literary tradition that recognized—right from the start—the cerebral element in human sexuality: the libertine tradition in 18th-century England and France. Authors will include Rochester, Behn, Richardson, Loclos, de Sade, Austen, and others.

FREN 424(4240) Psychoanalysis (also FREN 624(6240))

Spring. 4 credits. M. Greenberg.

The class is intended to be an introduction for beginning graduate students and advanced undergraduate students to study the history and theory of psychoanalysis. We will be primarily interested in reading the early texts of psychoanalysis, especially Freud, while indicating the different directions analytic theory and practice will take in their later developments.

FREN 426(4260) Reading French and Francophone Bande dessinée

Spring. 4 credits. Satisfies Option 1. Conducted in French. L. Dubreuil.

What if *bande dessinée* were not doomed to be an inferior kind of entertainment, a mass-media production, a part of popular culture, a codified sign, a new genre of literature, a social discourse or a pure expression of the unconscious? Couldn't it be an art, generating actual *oeuvres*? After a brief survey of the main theoretical approaches to comics and "BD" (from semiotics to cultural studies), we shall try something new in really reading what *bande dessinée* shows and says. We will certainly study one classical Belgian "album" (such as *Tintin*) and should take a look at "pre-historic" BD (from the late 19th century), but the bulk of our time will be devoted to French/francophone works of the last two or three decades coming from various geographical areas (for instance: Tardi, David B., Lewis Trondheim, Marjane Satrapi, Yvan Alagbé).

FREN 429-430(4290-4300) Honors Work in French

429, fall; 430, spring (year-long). 8 credits. R grade given at end of fall-semester and final grade at end of spring semester. Open to juniors and seniors. Consult director of honors program for more information. Staff.

FREN 442(4420) Sex in French (also FGSS 442(4420)) (LA-AS)

Spring. 4 credits. Satisfies Option 1. Prerequisite: FREN 221, 301 or 305, or CASE placement, or permission of instructor. Conducted in French. C. Howie.

Does a close investigation of French culture sustain its reputation for sexual provocation? From the medieval *querelle de la Rose* to the recent bestseller *La vie sexuelle de Catherine M.*, the boundaries between representing sex and philosophizing about it are more or less constantly permeable. We'll look at a few particularly fraught moments in this history of permeability, beginning with the medieval dirty stories known as *fabliaux* and the debates that grew out of the *Roman de la rose*, Sade's *Philosophie dans le boudoir*, Cocteau's *Le livre blanc*, Genet's *Miracle de la rose*, Bataille's *Erotisme*, Duras' *Les yeux bleus cheveux noirs*; and films by Patrice Chereau, Cyril Collard, Catherine Breillat, and François Ozon.

FREN 607(6070) Proseminar (also ITAL/SPAN 607(6070))

Fall. 2 credits. Staff.

The proseminar is the place for sustained exchanges between graduate students, faculty, and visiting lecturers. Activities include reading and discussion of seminal texts, chapters from dissertations and works in progress, and articles and essays from visiting lecturers.

FREN 622(6220) Women's (Hi)stories in French and Francophone Literature (also FREN 422(4220))

Fall. 4 credits. M. C. Vallois.

For description, see FREN 422.

FREN 629(6290) Colonial Language and Social Order

Spring. 4 credits. Required for Romance Studies graduate students. Conducted in French. L. Dubreuil.

Seminar will explore the relationships between French language (including: discourse, usages, syntax, vocabulary, etc.) and social prescription or political order in the French colonial empires. While focusing on the specificity of each type of enunciation, we will consider various recourses to language; journal articles, literature, texts of law, political discourses, theatrical performances, songs, etc. We will study colonialist texts as well as "indigenous speech." The class will cover the whole period of French (post)colonialism, from the Ancien Régime to the present, with an emphasis on the 1850–1950 period.

FREN 630(6300) French Reading for Graduates

Spring. 3 credits. Prerequisite: graduate standing.

Designed for those with little or no background in French. Aims primarily to develop skill in reading French. Covers grammar basics, extensive vocabulary, and strategies for reading in a foreign language. Some flexibility in selecting texts according to fields of interest.

FREN 639-640(6390-6400) Special Topics in French Literature

639, fall; 640, spring. 2–4 credits each semester. Staff

Guided independent study for graduate students.

FREN 663(6330) Idolatry: Vision and Belief

Spring. 4 credits. C. Howie.

This course is an introduction of idolatry, and specifically to the ways in which seeing is believing. What kinds of risks do we run when we place our faith in what we see, and what kinds of visual culture—and visual theory—make room for what sight can't capture? Do the other senses run parallel risks? We'll be pursuing the link between vision and belief in contemporary French thought, focusing especially on recent work by Jean-Louis Chrétien, Jean-Luc Marion, Marie-José Mondzain, and Jean-Luc Nancy. We'll also have occasion to look at other phenomenologists of the visible, in particular Sara Ahmed, Maurice Merleau-Ponty, Martin Seel, Kaja Silverman, and Vivian Sobchack.

FREN 667(6670) Rethinking the Symbolic (also COM L 667(6670))

Spring. 4 credits. Required of Romance Studies graduate students. Conducted in English. T. McNulty.

Jacques Lacan's distinction between the three registers of the real, the imaginary, and the symbolic has become part of the lingua franca of the human sciences, but often at the cost of any real engagement with the properly psychoanalytic stakes of these terms. This course will explore the articulation of these different registers with a particular emphasis on the symbolic, considering (1) its importance within psychoanalytic theory and practice, and (2) the resources it might offer for an examination of the social link and the political sphere. The argument of this course is that the tendency of many cultural critics to equate the symbolic with social norms and laws not only obscures its properly psychoanalytic expression (the elaboration of the signifying chain under transference that inaugurates the "talking cure"), but repeats the failures and impasses of what Freud called the "solution of neurosis: the appeal to social norms and prohibitions as a defense against the workings of the death drive (or *jouissance*) in the body.

FREN 672(6720) Deleuze and Lyotard: Aesthetics and Technology (also COM L/VISST 634(6340), ENGL 629(6290))

Spring. 4 credits. T. Murray. For description, see COM L 634.

FREN 690(6900) Gender and Sexuality in Early Modern Europe (also FGSS 691(6910))

Fall. 4 credits. Required for Romance Studies graduate students. Conducted in English. K. Long.

Is there a norm in depictions of sex and gender in early modern Europe? The conservative (Aristotelian) model of sex difference presents the male as the ideal form, with the female as a defective or lacking version of the male, but the ground for this distinction shifts constantly. This seminar proposes an examination of the deviance already present in this model, and played upon by early modern treatises on gender and sexuality. We will also examine the gap between theoretical presentations of gender and accounts of clinical examination of the gendered body. Texts considered will include medical treatises (Ambroise Paré, Jacques Duval, Jean Riolan), satirical and other literary works (*Rabelais*, *Le Tiers livre*), Michel de Montaigne's *Essais*, and the works of Marie de Gournay, as well as Thomas Artus's *L'Isle des hermaphrodites*, alchemical works, as well as some political material and popular

pamphlets. Topics to be discussed will include transsexualism, the politics of gender identity, and monstrosity and gender. Most texts will be in French, the seminar will be conducted in English.

Italian

T. Alkire, M. Baraldi, K. Bättig von Wittelsbach, T. Campbell, F. Cervesi, M. Migiel (director of undergraduate studies), P. Swenson. Emerita: A. Grossvogel.

The Major

The Italian section offers a major in Italian with tracks in Italian literature and culture and Italian studies. The first track is designed for students who wish to study Italian language, literature, and culture through the works of writers, artists, and cultural figures who have developed rich and varied aesthetic traditions. The second track in Italian studies includes a broader progression of courses that entails work in related disciplines. Both are designed to provide students with proficiency in reading, speaking, and writing in Italian, to familiarize them with Italian culture, and to assist them in analyzing Italian texts in related fields. For further information, students are asked to consult the director of undergraduate studies.

Track 1: Italian Literature and Culture

Track 1 is designed for students who: (1) wish to study Italian language, literature, and culture through the works of writers, artists, and cultural figures; and (2) may wish to pursue a Ph.D. in Italian.

Admission: the prerequisite for official admission to Track 1 of the Italian major is successful completion of any ITAL course at the 200 level or higher conducted in Italian.

Students who wish to follow Track 1 in Italian are advised to consult with the director of undergraduate studies (DUS), Professor Kathleen Long (kpl2@cornell.edu), whose office is 320 Morrill Hall. The DUS will take into account the student's interest, preparation, and career goals and assign the student to an advisor. Students majoring in Italian are expected to become conversant with a fair portion of the masterworks of Italian literature, to acquaint themselves with the outlines of Italian literary and cultural history, and to develop some skill in textual and cultural analysis. In conjunction with the major advisor, the student will craft an individualized plan of studies that will meet the minimum requirements for Track 1 as listed here:

- At least 10 Italian literature courses at the 200 level and higher (the prerequisite may be counted toward this requirement. The 1-credit Italian practicum and the 1- or 2-credit independent study options do not count as full courses). One of these courses must be at the 400 level and one must focus on Italian texts before the 19th century. With the permission of the advisor, the student may substitute for two of these courses other courses that are deemed relevant to the student's study of Italian, e.g., a course in another national literature, a course in critical theory, or a course in European history.
- At least 20 credits in courses conducted entirely in Italian. The Italian practica may be used to fulfill 3 of these credits. Twelve of these credits must be in

courses in Italian at the 300 level or above.

- Competency in the Italian language (as demonstrated by examination or by course work approved by the DUS).

ITAL 404, History of the Italian Language, and ITAL 403, Linguistics Structure of Italian, may be counted toward the 10 courses required for the major. Note: An introductory course is prerequisite for ITAL 402 and 403.

Track 2: Italian Studies

Track 2 in Italian Studies is designed primarily for students who wish to pursue individual interests that do not fall within Track 1 of a major. Students select courses from Italian as well as courses from other departments that have a substantial Italian component, such as History of Art, Architecture, Government, Music, and Comparative Literature. For the list of approved Italian studies courses, please see the director of undergraduate studies.

Admission: By the end of their sophomore year, prospective majors in Track 2 should have taken ITAL 219, Intermediate Conversation and Composition, or demonstrated the equivalent level of fluency.

To complete the program, students must:

1. Demonstrate competence in the Italian language by completing ITAL 313, Advanced Conversation and Composition, or its equivalent;
2. Complete the core series of Italian Studies courses: ITAL 290, Perspectives in Italian Culture (fall), ITAL 295, Italian Cinema (fall), and ITAL 297, Introduction to Italian Literature (spring);
3. Complete at least five courses (20 credits) from the approved list of Italian Studies courses at the 300 level or above from no more than three departments. Students planning on studying abroad for a year or a semester in Italy should plan their course work to emphasize their individual interests. Notes: Students must maintain a B- in each of the five Italian Studies courses; and
4. Select a committee of one or more faculty advisors to help formulate a coherent program of study. One of the advisors must come from the Italian section.

Students are encouraged to enrich the program by combining this option with other majors in related fields such as history of art, music, comparative literature, or architecture.

Concentration in Italian Studies

In order to complete an undergraduate concentration in Italian Studies, students must take at least five courses (a minimum of 15 credits) by selecting courses from the Italian Studies Concentration Course List, one of which must be ITAL 290, Perspectives in Italian Culture. These courses must be allocated among at least three Cornell departments and must include one introductory course and one course at the advanced level. Courses not on the list may be approved by petition only. Language competence must be demonstrated by successfully completing ITAL 219. Please note that courses taken as part of a study abroad program approved by the Study Abroad Dean may count toward meeting the above requirements.

Students wishing to enroll in the concentration must register their intent by contacting Professor Kathleen Long, Director of Undergraduate Studies, 320 Morrill Hall, who will assign a faculty advisor to students.

Study Abroad in Italy: Italian studies faculty members strongly encourage students to consider studying abroad in Italy. Students will have the opportunity to immerse themselves in Italian and gain a singular perspective on the Italian cultural context.

Students are urged to consider the Bologna Cooperative Studies Program (BCSP), of which Cornell is an associated member. BCSP offers qualified undergraduate students an opportunity to study for a full academic year or a second semester at the University of Bologna for credit. During each semester of the academic year, which begins in October and extends through June, BCSP students enroll in one or two regular University of Bologna courses with Italian studies. Students may also take special courses in Italian literature, language, art history, film studies, and contemporary politics.

Enrollment in a language course is conditional upon the student's eligibility for the particular level and on attendance at the first scheduled class session. Because of the high demand for language courses, a student who fails to attend the first class meeting will be dropped so others may register.

Note: Students placed in the 200-level course have the option of taking language and/or literature courses.

ITAL 121-122(1210-1220) Elementary Italian

121, fall; 122, spring. 4 credits each semester. Prerequisite: for ITAL 122, 121 or LPI 37-44 or SAT II 370-450. Intended for beginners or students placed by examination. At the end of ITAL 122, students who score lower than 56 on the LPI take ITAL 123; those with 56 or higher may enter the 200-level sequence. Fall: P. Swenson (course coordinator), T. Alkire, K. Bättig von Wittelsbach, and staff; spring: P. Swenson (course coordinator), K. Bättig von Wittelsbach, and staff.

This introductory course provides a thorough grounding in all the language skills: listening, speaking, reading, and writing, with practice in small groups. Lectures cover grammar and culture.

ITAL 123(1230) Continuing Italian

Fall or spring. 4 credits. Prerequisite: ITAL 122, or LPA 45-55 or SAT II 460-580. K. Bättig von Wittelsbach.

This is an all-skills course designed to improve speaking and reading ability, establish a groundwork for correct writing, and provide a substantial review of grammar.

ITAL 209(2090) Italian Intermediate Composition and Conversation I

Fall or spring. 4 credits. Satisfies Option 1. Prerequisite: ITAL 123, or LPI 56-64, or SAT II 590-680, or CASE Q. Fall: F. Cervesi (course coordinator) and staff; spring: K. Bättig von Wittelsbach.

This course provides a guided conversation, as well as a review of composition, reading, pronunciation, and grammar. It emphasizes the development of accurate and idiomatic expression in the language.

ITAL 219(2190) Italian Intermediate Composition and Conversation IISpring. 4 credits. *Satisfies Option 1.*

Prerequisite: ITAL 209 or equivalent. Staff. Guided conversation, composition, reading, pronunciation, and grammar review emphasize the development of accurate and idiomatic expression in the language.

ITAL 227(2270) Family Life in Renaissance Italy # (HA-AS)

Spring. 3 credits. Conducted in English. J. Najemy.

For description see HIST 227.

ITAL 290(2900) Perspectives in Italian Culture (CA-AS)

Fall. 3 credits. "Core course" in track two of the Italian major, offered every year. Conducted in English with discussion section in Italian. C. Howie.

This course aims to provide students with the tools necessary to understand the most important social, political and artistic development occurring in contemporary Italian culture. These include the nature of geographic and national fragmentation in post-Risorgimento Italy; the "southern" question and the phenomenon of "Costa Nostra"; Italian contributions to world cinema; and the politics of food. By providing students with interdisciplinary perspectives on Italian culture, students will be introduced to how Italian culture is produced and consumed globally today. Primary readings include selections from Peter Robb, Leonardo Sciascia and Tim Parks, and films from Rossellini, de Sica, Sergio Leone, and Benigni. A group of secondary readings stimulates the discussion of the historical and cultural panorama of contemporary Italy.

ITAL 295(2950) The Cinematic Eye of Italy (CA-AS)Fall. 3 credits. *Satisfies Option 1.*

Prerequisite: ITAL 209 or permission of instructor. Conducted in Italian. A. Righi. An introduction to Italian cinema from the 1940s to today. Students will view representative works of the most important Italian directors in order to create a perspective on one of the world's major national cinematic traditions. We will pay close attention to the socio-political context of the films as well as considering the technical and formal issues that arise when studying Italian cinema. Emphasis will be given to Italian neo-realism, and contemporary Italian films.

ITAL 297(2970) Introduction to Italian Literature (LA-AS)

Spring. 3 credits. *Satisfies Option 1.* "Core course" in Italian Studies major. Conducted in Italian. M. Migiel.

This course aims to introduce students to Italian literature of the 20th century in the genres of the short story and the novel. The course includes significant practice in grammar and composition and to this end, the students are required to write five papers of medium length over the course of the semester.

ITAL 304(3040) Italian After the Renaissance # (LA-AS)Fall. 4 credits. *Satisfies Option 1.*

Prerequisites: ITAL 297 (or equivalent course) or permission of instructor. Conducted in Italian. M. Migiel. Italian was for many centuries almost exclusively an artificial construct, a written

language actually utilized by very few people in an Italy where political unification remained a dream until the 1860s and where literacy rates were not particularly high even during the first part of the 20th century. How do Italians manage to transform their language from an artificial construct based on imitation of centuries-old authors into an expressive instrument that can be used by the entire Italian people? What does language that is "alive and true" to people's experience look and sound like? What kinds of subjects should it treat? What is the place of visual and auditory media (especially film, radio, and television) in this cultural project? In considering these questions, this seminar will focus on major authors, texts, and linguistic-literary-cultural debates in Italy from the post-Renaissance period to the 20th century.

ITAL 313(3130) Advanced Italian: Language in Italian Culture (LA-AS)Fall. 4 credits. *Satisfies Option 1.*

Prerequisite: ITAL 219 or equivalent or permission of instructor. Conducted in Italian. P. Swenson.

This course focuses on developing oral and written language skills through the study of cultural and social issues of contemporary Italy. Students improve their fluency in the language through oral exercises, compositions, as well as group and individual presentations. The course also entails a grammar review of selected points and analysis of present-day Italian.

ITAL 330(3300) Italian Writing Workshop (LA-AS)

Spring. 4 credits. Prerequisite: ITAL 219 or permission of instructor. Conducted in Italian. M. Migiel.

Aimed at helping students to improve their writing abilities in Italian, this course will focus on writing to narrate, writing to persuade, writing to entertain, and writing for social and political change. Objects of study will include the playwright, actor, and political activist Dario Fo (1997 Nobel laureate); one of Italy's most acclaimed feminist writers, Dacia Maraini; and the high-school teacher and prize-winning author Paolo Mastrocola.

ITAL 333(3330) 1919 A.D. The Rise of Italian Modernism (also ITAL 633(6330))

Fall. 4 credits. Prerequisite: ITAL 219 or permission of instructor. Conducted in Italian. T. Campbell.

The year 1919 represents a watershed in the history of Italian culture for a number of reasons. The First World War had come to an end with Italy's victory as well as its exhaustion; political upheaval on the right and left was commonplace, setting the scene for fascism's grab for power a few short years later; and the role of women in the war effort had created demands for equal representation and rights. A number of writers, artists, and filmmakers began in the immediate post-war to engage deeply with these important changes, giving rise to the birth of Italian modernism, the subject of the course. To understand and appreciate these modernist works, we'll begin by reading Italian accounts of war (and the First World War) including Marinetti's *Futurist Manifestos*, *Lalcova Dacciaio* and *Lussus Un anno sull'altipiano*, turning next to two short novels inflected by the war, Bontempelli's *Una vita intensa* and Palazzeschi's *Il codice di perela*, ending with selections from Pirandello. We'll also screen a

number of films that capture the peculiarities of Italy's modernization in the 20th century, including the blockbuster *Cabiria*.

ITAL 350(3500) The Italian Renaissance (also HIST 350(3500)) # (HA-AS)

Spring. 4 credits. Conducted in English. J. Najemy.

For description, see HIST 350.

ITAL 389(3890) Modern Italian Novel (LA-AS)Spring. 4 credits. *Satisfies Option 1.*

Prerequisite: permission of instructor. Students who have taken ITAL 389 previously may retake the course for credit, provided that the readings are different. Conducted in Italian. P. Swenson. Through the novels of N. Ginzburg, G. Bassani, P. Levi, R. Loy, this course examines the Italian social and political situation during the Fascist period, the Second World War, and the post-war years. Time, memory, family, the responsibility of the individual, the fate of the Jews, are common themes that pervade the narrative of the authors in both comparable and dissonant ways.

ITAL 419-420(4190-4200) Special Topics in Italian Literature

419, fall; 420, spring. 2-4 credits each semester. Prerequisite: permission of instructor. Staff.

Guided independent study of special topics.

ITAL 429-430(4290-4300) Honors Work in Italian

429, fall; 430, spring (year-long). 8 credits. R grade given at end of fall semester and final grade at end of spring semester. Open to junior and seniors. Consult director of honors program for more information. Staff.

ITAL 445(4450) Decameron (also ITAL 645(6450))

Fall. 4 credits. Conducted in English. M. Migiel.

Seminar will be dedicated to a reading of Boccaccio's *Decameron* (1349-51). Particular attention will be dedicated to exploring how the stories of the *Decameron* represent competing notions of love, marriage, sexuality truth, and honor, as well as how the *Decameron* represents a world caught between aristocratic ideals and the interests of a new mercantile and business class.

ITAL 607(6070) Proseminar (also FREN/SPAN 607(6070))

Fall. 2 credits. Staff.

The proseminar is the place for sustained exchanges between graduate students, faculty, and visiting lecturers. Activities include reading and discussion of seminal texts, chapters from dissertations and works in progress, and articles and essays from visiting lecturers.

ITAL 633(6330) 1919 A.D. The Rise of Italian Modernism (also ITAL 333(3330))

4 credits. Conducted in Italian. T. Campbell. For description, see ITAL 333.

ITAL 639-640(6390-6400) Special Topics in Italian Literature

639, fall; 640, spring. 2-4 credits each semester. Staff.

Guided independent study for graduate students.

ITAL 645(6450) Decameron (also ITAL 445[4450])

Fall. 4 credits. Conducted in English.
M. Migiel.

For description, see ITAL 445.

Portuguese

Faculty: L. Horne, J. Oliveira.

PORT 121-122(1210-1220) Elementary Brazilian Portuguese I-II

121, fall; 122, spring. 4 credits each semester. Prerequisite: PORT 121 is the prerequisite for PORT 122. J. Oliveira.

This is a full-year introductory course, intended for students with no knowledge of Portuguese, and with limited or no knowledge of Spanish*. Stress is placed upon the development of the fundamental communication skills: listening, speaking, reading, and writing.

PORT 209-219(2090-2190) Intermediate Brazilian Portuguese for Spanish Speakers I-II @

209, fall; 219, spring. 4 credits each semester. *PORT 209 satisfies Option 1.* Prerequisite for 209: PORT 122 or permission of instructor; Prerequisite for 219: PORT 209 or permission of instructor. J. Oliveira.

PORT 209-219 is a full-year course intended for students who have already taken the first level of Portuguese, or as an intensive introductory course for those who are native/near native speakers of Spanish*. An all-skills course with particular emphasis on Brazilian Portuguese spoken within the context of its culture, it presents a fast-paced review focused on improving grammatical accuracy, pronunciation and on enriching vocabulary.

PORT 320(3200) Readings in Luso-Brazilian Literature of the 20th Century

Spring. 4 credits. *Satisfies Option 1.* Prerequisites: PORT 219 or permission of instructor. Conducted in Portuguese. L. Horne.

This course aims to provide an overview of modern Brazilian literature. It will cover the major literary movements and the essential canonical writers of 19th- and 20th-century Brazil. Some of the topics to be discussed are: the formation of a national literature; literature and slavery; foreign models and rewritings; diverse definitions of national spaces and landscapes; relationships between aesthetic innovations and political issues and different literary definitions of frontiers, margins, and exclusions. The course also intends to introduce students to the practice of literary analysis, and to provide an opportunity to improve language skills in Portuguese through extensive oral and written practice. Some of the authors to be read include Aluzio Azevedo, J. M. Machado de Assis, José de Alencar, Mário de Andrade, Oswald de Andrade, Clarice Lispector, Graciliano Ramos, Joãa Guimarães Rosa, Nelson Rodrigues and Ana Cristina César.

PORT 420(4200) Special Topics in Brazilian Literature

Spring. 2-4 credits. Prerequisite: permission of instructor. L. Horne. Guided independent study of specific topics. For undergraduates interested in special problems not covered in courses.

PORT 640(6400) Special Topics-Grad

Spring. 2-4 credits. L. Horne. Guided independent study of specific topics.

Quechua

Faculty: L. Morató-Peña.

QUECH 121-122(1210-1220) Elementary Quechua

121, fall; 122, spring. 4 credits each semester. Prerequisite: for 122, QUECH 121. L. Morató-Peña. Beginning conversation course in Quechua.

QUECH 136(1360) Quechua Writing Lab

Spring. 1 credit. Corequisite: QUECH 122 or permission of instructor. Letter grade only. L. Morató-Peña.

Computer-assisted drill and writing instruction in elementary Quechua.

QUECH 209-219(2090-2190) Continuing Quechua @

209, fall; 219, spring. 3 credits each semester. *Satisfies Option 1.* Prerequisites: for 209, QUECH 122 or equivalent; for 219: QUECH 209 or equivalent. L. Morató-Peña. Intermediate conversation and reading course. Study of the Huarochiri manuscript.

QUECH 300(3000) Directed Studies

Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. Times TBA with instructor. L. Morató-Peña. Taught on a specialized basis to address particular student needs.

Romance Studies**ROM S 321(3210) History of Romance Language (also LING 321[3321]) # (HA-AS)**

Fall. 3 credits. C. Rosen. For description, see LING 321.

ROM S 452(4520) Renaissance Humanism (also ROM S 652[6520]; ENGL 420/624[4200/6240], COM L 452/652[4520/6520]) # (LA-AS)

Spring. 4 credits. W. Kennedy. For description, see COM L 452.

ROM S 453(4530) Structure of Latin (also LING 453[4453]) # (KCM-AS)

Fall. 4 credits. A. Nussbaum. For description, see LING 453.

ROM S 507(5070) Methodology of Romance Language Learning and Teaching

Spring. 3 credits. J. Luks, M. K. Redmond, and P. Swenson. Focuses on language teaching as facilitation of learning, thus on the learner's processing of language acquisition and the promotion of reflective teaching. Pedagogical approaches will be addressed from a learner-centered perspective involving effective language learning strategies and analysis.

ROM S 508(5080) TA Practicum

Fall. 1 credit. Required for all graduate TAs teaching language for the first time in the Department of Romance Studies. Staff. This practicum is designed to better enable the TAs to meet the needs of their students in the understanding and acquisition of the linguistic forms, notions and functions covered in their course.

ROM S 652(6520) Renaissance Humanism (also ROM S 452[4520]; ENGL 420/624[4200/6240], COM L 452/652[4520/6520])

Spring. 4 credits. W. Kennedy. For description, see COM L 452.

Spanish

S. Amigo-Silvestre, I. Auffret, T. Beviá, B. Bosteels, L. Carrillo, D. Castillo, M. A. Garcés, J. Rodríguez-García, L. Horne, C. Lawless, L. Meza-Riedewald, N. Maldonado-Méndez, S. Morales-Rivera (visiting), L. Morató-Peña, J. E. Paz-Soldán, S. Pinet, M. K. Redmond, J. Routier-Pucci, E. Sánchez-Blake, A. Stratakos-Tió, B. Teutli (associate chair). Emeritus: C. Morón Arroyo.

The Major

The Spanish major is designed to give students proficiency in the oral and written language, to acquaint them with Hispanic culture, and to develop their skill in literary and linguistic analysis. Satisfactory completion of the major should enable students to meet language and literature requirements for teaching, to continue with graduate work in Spanish or other appropriate disciplines, and to satisfy standards for acceptance into the training programs of the government, social agencies, and business concerns. A Spanish major combined with another discipline may also allow a student to undertake preprofessional training for graduate study in law or medicine. Students interested in the major are encouraged to seek faculty advice as early as possible. For acceptance into the major, students should consult Professor Kathleen Long (kpl12@cornell.edu), director of undergraduate studies, in 320 Morrill Hall, who will admit them to the major, and assign them an advisor from the Spanish faculty. Spanish majors will then work out a plan of study in consultation with their advisors. Spanish majors have great flexibility in designing their programs of study and areas of concentration. Previous training and interests as well as vocational goals will be taken into account when the student's program of course is determined.

SPAN 219 is a prerequisite to entering the major in Spanish.

All majors will normally include the following core courses in their programs:

1. SPAN 215, 215, and 217 (not necessarily in that order).
2. SPAN 310 and 311.
3. One of the two annually designated senior seminars.

The Spanish Literature Option

The Spanish literature option normally includes at least 15 credits of Spanish literature beyond the core courses. Literature majors are strongly urged to include in their programs all the major periods of Hispanic literature.

Area Studies Option (Spanish, Latin American, or U.S. Latino Studies):

At least 15 credits of courses at the 300 level and above in any of those focus areas beyond the core, all courses to be approved through consultation with the major advisor. Courses should reflect interdisciplinary interests in the area and may include up to three other academic fields of interest. For example, a

student interested in Latin American studies may want to include courses on such topics as Latin American history, government, rural sociology, and economics. Students who want to specialize in U. S. Latino issues may want to include such topics as sociology of Latinos, Latino history, and Latino medical issues in addition to further studies in literature. Students specializing in Spanish studies planning on spending a year or semester in Spain (but not exclusively such students) frequently plan their course work to emphasize Spanish history, art, political economy, and other related field courses, such as courses on Islam and Moorish or Jewish Spain.

Students are encouraged to enrich the major program by including a variety of courses from related fields or by combining Spanish with related fields such as history, philosophy, sociology, anthropology, art, music, classics, English, comparative literature, and other foreign languages and literatures. The interdepartmental programs in Latin American studies and Latino studies sponsor relevant courses in a variety of areas.

The J. G. White Prize and Scholarships are available annually to undergraduate students who achieve excellence in Spanish.

Concentration in Spanish

The concentration promotes a broad understanding of Spanish and Spanish American culture, literature, and society; it also encourages students to refine and practice their language skills. In order to complete the concentration, students must take a minimum of 5 courses (15 credits), distributed as follows: Language competence must be demonstrated by successfully completing either SPAN 310 (Advanced Spanish Conversation and Pronunciation) or SPAN 311 (Advanced Spanish Composition and Conversation I). Concentrators must furthermore complete either SPAN 220 (Perspectives on Latin America) or SPAN 223 (Perspectives on Spain), as well as three elective courses to be chosen in consultation with the student's advisor. Among those electives, students are strongly encouraged to take at least one course at the advanced 300-400 level.

Students wishing to enroll in the concentration must register their intent by contacting Professor Kathleen Long (kpl12es@cornell.edu), 320 Morrill Hall, who will assign a faculty advisor to each concentrator.

Study Abroad in Spain: Cornell, the University of Michigan, and the University of Pennsylvania co-sponsor an academic year in Spain program. Students enrolled in this program spend the first month before the fall semester begins in an orientation session at the University of Seville, where they take courses in Spanish language and culture and take advantage of special lectures and field trips in Andalusia. The College of Arts and Sciences awards 3 credits for orientation. Once the semester begins, students enroll in regular classes at the University of Seville and at the program's center facility. Center courses are designed for the program and include a seminar offered by the resident director, from the faculty of either Cornell, Michigan, or Pennsylvania. Other center courses typically include history of art, history of the Mediterranean region, a literature course, and Spanish composition and syntax. In Seville,

students live in private homes and a rich array of cultural activities and excursions are organized every semester.

Applicants are expected to have completed SPAN 219 before departure. Completion of SPAN 311 is highly recommended. Students are strongly encouraged to study abroad for the entire year rather than one semester. Students interested in the study abroad program should visit Cornell Abroad in 474 Uris Hall and see the Cornell Abroad web site: www.einaudi.cornell.edu/cuabroad.

Study Abroad in Bolivia: The summer program in Cochabamba, Bolivia, is sponsored by the Latin American Studies Program and accepts both undergraduate and graduate students. Students live with Bolivian families and normally take two courses with Cornell faculty who participate in this program. In addition to course work in Bolivian culture, politics, and social movements, the program features the opportunity to do intensive study in Quechua, the native language spoken by many Bolivians, and Peruvians, as well as Spanish, and to participate in research and internships with grass-roots communities, government offices, and businesses.

Honors: Honors in Spanish may be achieved by superior students who want to undertake guided independent reading and research in an area of their choice. Students in the senior year select a member of the Spanish faculty to supervise their work and direct the writing of their honors essay (see SPAN 429-430).

Enrollment in a language course is conditional upon the student's eligibility for the particular level and on attendance at the first scheduled class session. Because of the high demand for language courses, a student who fails to attend the first class meeting will be dropped so others may register.

Note: Students placed in the 200-level course have the option of taking language and/or literature courses.

SPAN 112(1120) Elementary Spanish: Review and Continuation

Fall. 4 credits. Prerequisite: LPS 37-44 or SAT II 370-450. Students who have taken SPAN 121 may enroll. S. Amigo-Silvestre. Provides a basic review and then moves on to cover new material for the remainder of the semester. As part of the final exam, students take the LPS and, according to their score, may place into SPAN 123 (score below 56) or into the 200-level course (score 56 or above).

SPAN 121-122(1210-1220) Elementary Spanish

121, fall and summer; 122, spring. 4 credits each semester. Intended for students with no experience in Spanish; students who have previously studied two or more years of Spanish may not attend unless they have LPS lower than 37 or SAT II lower than 370. Prerequisite: for 122, SPAN 121 or LPS 37-44 or SAT II 370-450. M. K. Redmond (course coordinator), and staff.

The goal of SPAN 121-122 is to provide a thorough grounding in the language and insights into Spanish language and Hispanic cultures so that students can function in basic situations in a Spanish-speaking culture. Small classes provide intensive, context-specific practice in speaking, reading, writing, and listening comprehension.

SPAN 123(1230) Continuing Spanish

Fall, spring, or summer. 4 credits. Prerequisite: SPAN 112 or 122, or LPS 45-55, or SAT II 460-580. Fall: N. Maldonado-Méndez (course coordinator), L. Morató-Peña, E. Sánchez-Blake, and staff; spring: N. Maldonado-Méndez (course coordinator), L. Morató-Peña, and staff; summer: A. Stratakos-Tiö.

Lower intermediate-level course providing an intensive grammar review in communicative contexts and practice in all skills. After this course, the student may take SPAN 200, 207, or 209.

SPAN 200(2000) Spanish for English/Spanish Bilinguals (also LSP 202[2020])

Fall. 4 credits. *Satisfies Option 1.* Prerequisite: LPS 56 or higher, SAT II 590 or higher, CASE placement, or permission of instructor. Not open to students who have taken SPAN 207 or 209. N. Maldonado-Méndez and staff.

Designed to expand bilingual students' knowledge of Spanish by providing them with ample opportunities to develop and improve each of the basic language skills, with a particular focus on writing accuracy. After this course, a student may take SPAN 214, 215, 217 or 219.

SPAN 207(2070) Intermediate Spanish for the Medical and Health Professions

Fall or spring. 4 credits. *Satisfies Option 1.* Prerequisite: SPAN 123, LPS 56-64, or SAT II 590-680, Q on CASE exam, or permission of instructor. Students who have taken SPAN 200 or 209 should speak to instructor. A. Stratakos-Tiö.

Provides a conversational grammar review, with dialogues, debates, compositions, and authentic readings on health-related themes. Special attention is given to relevant cultural differences and how cultural notions may affect medical care and communication between doctor and patient. The objective of 207 is to provide practice in real-life application, such as taking a medical history, calming a patient, and how to speak to a Hispanic patient in a culturally acceptable manner. After this course, a student may take SPAN 214, 215, 217 or 219.

SPAN 209(2090) Spanish Intermediate Composition and Conversation I

Fall or spring. 4 credits. *Satisfies Option 1.* Prerequisite: SPAN 123, LPS 56-64, or SAT II 590-680. Not open to students who have taken SPAN 200 or 207. J. Routier-Pucci (course coordinator), I. Auffret, T. Beviã, and staff; spring: T. Beviã (course coordinator), S. Amigo-Silvestre, and staff.

Provides a conversational grammar review with special attention to the development of accurate and idiomatic oral and written expression. Assignments include composition-writing, reading and discussion Spanish and Spanish American short stories and poetry, and viewing several films. After this course, a student may take SPAN 214, 215, 217 or 219.

SPAN 214(2140) The Spanish Difference: Readings in Modern Iberian Literatures (LA-AS)

Fall or spring. 4 credits. *Satisfies Option 1.* Prerequisite: SPAN 207 or 209, or CASE Q+, or permission of instructor. Conducted in Spanish. J. M. Rodríguez-García and staff.

Introductory survey of modern Spanish literature. Students develop their analytical skills and learn basic literary concepts such as genre (drama, lyric, short story and novel) and style (romanticism, realism, etc.) as well as male/female perspectives and the translation of literature to film language. The survey introduces students to Spain's cultural complexity through readings of works by authors representative of its diverse linguistic and literary traditions.

SPAN 215(2150) The Tradition of Rupture: Latin American Writing from Modernism to the Present (also LAT A 215[2150]) @ (LA-AS)

Fall or spring. 4 credits. *Satisfies Option 1*. Prerequisite: SPAN 207 or 209, or CASE Q+ or permission of instructor. Conducted in Spanish. Fall: M. Stycos and staff, Spring: L. Horne and staff.

Readings and discussion of representative texts of the 19th and 20th centuries from various regions of Spanish America. Among the authors considered are Sarmiento, Hernández, Martí, Darío, Agustini, Cortázar, García Márquez, Poniatowska, and Valenzuela.

SPAN 217(2170) Early Hispanic Modernities: Readings in Medieval and Early Modern Iberian and Spanish-American Literatures (also LAT A 217[2170]) (LA-AS) #

Fall or spring. 4 credits. *Satisfies Option 1*. Prerequisites: SPAN 207 or 209, or CASE Q+, or permission of instructor. Conducted in Spanish. Staff.

This course explores major texts and themes of the Hispanic tradition from the 11th to the 17th centuries. We will examine general questions on literary analysis and the relationship between literature and history around certain events, such as medieval multicultural Iberia, the creation of the Spanish Inquisition in the 15th century and the expulsion of the Jews in 1492; the encounter between the Old and the New Worlds; the "opposition" high/low popular culture of the secular and the sacred in poetry and prose. Issues of representation regarding gender, identities, and subjectivity may also be studied. Readings may be drawn from medieval short stories and miracle collections; chivalric romances, Columbus and the literary discovery, Lazarillo de Tormes, Cervantes, Lope de Vega, Calderón, and Sor Juana Inés de la Cruz, among others.

SPAN 219(2190) Spanish Intermediate Composition and Conversation II

Fall or spring. 4 credits. *Satisfies Option 1*. Prerequisite: SPAN 207 or 209, or CASE Q+. Fall: L. Meza-Riedewald (course coordinator), and C. Lawless; spring: L. Meza-Riedewald (course coordinator) and I. Auffret.

This advanced-intermediate course is designed to prepare students for entry into the major, and for study abroad. Very specifically, it aims to prepare students for advanced level courses, in a native-speaker context, where analytical writing is required, as well as more sophisticated grasp and discussion of texts. Overall, the course goal is to guide students to take greater command of their own language learning process to optimize their continued progress in the acquisition of Spanish and the understanding of the diversity of cultures in which the language is spoken. SPAN 219 may be taken concurrently with SPAN 214, 215, or 217.

SPAN 220(2200) Perspectives on Latin America (also LAT A 220[2200]) @ (CA-AS)

Spring. 3 credits. Highly recommended for Latin American studies concentrators. Conducted in Spanish. B. Bosteels and C. Lawless.

Interdisciplinary, co-taught course offered every spring through the Latin American Studies Program. Topics vary by semester, but readings always focus on current research in various disciplines and regions of Latin America. The range of issues addressed include the economic, social, cultural, and political trends and transitions in the area. In the weekly meetings, instructors and guest lecturers facilitate student discussions. Students taking the course are required to participate in all class discussions and write a research paper in their chosen focus area.

SPAN 223(2230) Perspectives on Spain (LA-AS)

Fall. 4 credits. *Satisfies Option 1*. Prerequisite: SPAN 219 or permission of instructor. Conducted in Spanish. S. Morales-Rivera.

An introduction to Spain's history, plural cultures, and present-day society. Through a series of key literary works, films, and other visual representations we will explore such topics as the place of tradition, religion, and the family in modern Spain. Our focus will be on the transformation of Spain from an authoritarian state under General Franco's dictatorship (1939–1975) into a remarkably diverse and pluralistic nation in which linguistic, cultural, political, and gender differences have been consecrated in a very progressive legislation. This course satisfies the main requirement for the concentration in Spanish, may be used as an elective for the major, and is crucial to those planning to study abroad in Spain in the near future.

SPAN 246(2460) Contemporary Narratives by Latina Writers (also LSP/FGSS 246[2460]) (LA-AS)

Fall. 3 credits. Conducted in English. D. Castillo.

Survey of narratives, including novels, short fiction, essays, political/feminist manifestoes, and memoirs by representative Latina writers of various Latino ethnic groups in the United States and the Americas, including Chicana, Chilean, Cuban, Dominican, and Puerto Rican, among others. Investigates the parallel development of a Latina perspective on personal, social and cultural issues alongside that of the U. S. ethnic liberation/revitalization movements of the 1960s to contemporary feminist activism and women of color movements. The course investigates these works as artistic attempts to deal with issues of culture, language and bilingualism, family, gender, sexuality, and domesticity among others. Regional distinctions and contributions are accounted for. Readings include works by Julia Alvarez, Elena Castedo, Sandra Cisneros, Judith Ortiz Cofer, Cristina García, Ana Lydia Vega, and others.

SPAN 248(2480) Poetry of the Latino Experience (also LSP 248[2480]) (LA-AS)

Spring. 3 credits. Staff. Survey of the central importance of poetry in the modern and contemporary Latino/a experience. Readings chart and critique the developments beginning in the civil rights struggles during the 1960s among Chicanos/as in the West and the Southwest United States

and among Nuyorican writers in the East Coast through to the 1980s development of feminist, lesbian, and gay poetry, the Cuban poets emerging as the "American" generation, and concluding with recent poetry produced in the atmosphere of immigration, labor issues, globalization, and the institutional academy.

SPAN 301(3010) Hispanic Theatre Production (also LAT A 301[3010])

Fall or spring. 1–3 credits variable. D. Castillo and E. Sánchez-Blake.

Students develop a specific dramatic text for full-scale production. The course involves selection of an appropriate texts close analysis of the literary aspects of the play, and group evaluation of its representational value and effectiveness. All students in the course are involved in some aspects of production of the play, and write a final paper as a course requirement. Credit is variable depending upon the student's role in play production: a minimum of 50 hours of work is required for 1 credit; a maximum of 3 credits are awarded for 100 hours or more of work.

SPAN 310(3100) Advanced Spanish Conversation and Pronunciation

Fall or spring. 3 credits. *Satisfies Option 1*. Prerequisite: SPAN 219 or CASE Q++ or permission of instructor. B. Teutli.

Conversation course with intensive oral practice obtained through the production of video programs. Students practice the fundamental aspects of communication in the standard spoken and written Spanish, with some focus on dialectal variations. There are weekly pronunciation labs.

SPAN 311(3110) Advanced Spanish Writing Workshop

Fall or spring. 4 credits. *Satisfies Option 1*. Prerequisite: SPAN 219 or CASE Q++ or equivalent. C. Lawless (course coordinator) and staff.

This course, which is required for the major, is designed to help the learner develop increased accuracy and sophistication in writing in Spanish for academic purposes. To this end, there will be ample writing and revising practice, with a focus on specific grammatical and lexical areas, customized to the needs of the students enrolled in the course. SPAN 311 may be taken concurrently with SPAN 214, 215, or 217.

SPAN 313(3130) Spanish Writing Workshop for Advanced English/Spanish Bilinguals (LSP 313[3130])

Fall. 1 credit. Prerequisite: permission of instructor. N. Maldonado-Méndez and staff.

Designed for the advanced bilingual seeking support in the development of written accuracy, this workshop can serve as a complement for a literature or culture course conducted in Spanish. Meets one hour per week, concurrently with one of the weekly sessions of SPAN 200. Students enrolled in this course are expected to work autonomously, to keep up with the syllabus of SPAN 200, and to come to class with focused questions drawn from writing tasks either assigned from other courses, or prepared as self-assigned exercises. The workshop will be conducted in a peer-editing format. The final exam will consist of preparing a term paper in Spanish that demonstrates progress achieved in written accuracy. Students who have taken other Spanish language courses in the department including SPAN 200, and who have difficulties with writing identified as specific to the

English/Spanish bilingual, are eligible to enroll in the 1 credit SPAN 313, with the instructor's permission. Course may be repeated for credit.

SPAN 330(3300) Literature and the Arts

Fall. 4 credits. *Satisfies Option 1.*

Prerequisite: SPAN 214, 215, or 217, or permission of instructor. Conducted in Spanish. J. M. Rodríguez-García.

Literature is just one of many genres and media that artists have used to capture the ongoing transformations in our ways of looking at reality. The dialogue between literature and other artistic productions (e.g., painting, music, sculpture) will be the main focus of this course, whose topics may feature one or more of the following combinations: the interface of poetry and the visual arts, of fiction and cartography, and of avant-garde writing and technology-based modes of representation, among others.

SPAN 404(4040) The Task of the Cleric (also S HUM 404(4040), COM L 406(4060))

Fall. 4 credits. S. Pinet.

This seminar will explore three main topics—translation, cartography, and economy—through two 13th-century Spanish works of mester de clerecía, the *Libro de Alexandre*, and the *Libro de Apolonio*. While all of these are decidedly Spanish (Castilian) works, their obvious links to a general Western European romance and epic tradition offer ample opportunity to reflect on questions of sources, authority, originality, as well as the close analysis of the practices that reveal developments—especially in the visual arts, politics, and economy—contemporary to their composition. Readings will include a variety of theoretical materials on translation, space/place, cartography, and political economy by authors such as Michel de Certeau, Marcel Mauss, Paul Zumthor, George Steiner, Walter Benjamin, and Fredric Jameson, among others.

SPAN 419-420(4190-4200) Special Topics in Spanish Literature

419, fall; 420, spring. 2-4 credits each semester. Prerequisite: permission of instructor. Staff.

Guided independent study of special topics.

SPAN 429-430(4290-4300) Honors Work in Spanish

429, fall; 430, spring (yearlong). 8 credits. R grade given at end of fall semester and final grade at end of spring semester. Open to junior and seniors. Consult director of honors program for more information. Staff.

SPAN 434(4340) The Mediterranean and Cervantes (also S HUM 424, COM L 411.01)

Spring. 4 credits. M. A. Garcés.

This course concentrates on the twin themes of cultural exchanges and cultural frontiers in the early modern Mediterranean, where the writer Miguel de Cervantes played an important role as soldier, captive, and spy. We will explore contacts between Muslims and Christians in historical and literary texts emerging from Granada, Algiers, Sicily, Cyprus, and Istanbul in the 16th and 17th centuries. Particular attention will be paid to the dynamic improvisation of identities and transfer of men and ideas promoted by the "renegades"—Christians who converted to Islam and fled to Ottoman territories. The readings will range widely and include chronicles on the Guerra de Granada (1568-

1570)—the last armed struggle on Spanish soil between Christianity and Islam—by Nuñez-Muley and Pérez de Hita; English and Spanish reports of captivity; plays and novels by Calderón, Cervantes, Marlowe, and Shakespeare, as well as eyewitness accounts of life in Algiers and Istanbul by Antonio de Sosa and Ogier de Busbecq. Course selections will be supplemented with an ample range of critical approaches. Reading knowledge of Spanish is highly recommended.

SPAN 441(4410) Iberian Communities (LA-AS)

Spring. 4 credits. J. M. Rodríguez-García.

This is a survey of modern Peninsular poets and prose writers whose work foregrounds one or more of the following concepts: community, tradition, collective/national identity, and historical consciousness. Many of these authors either envisioned ideal communities or set out to expose the fraudulent communities promoted by others. The poets studied may include Eduardo Pondal, Rosalía de Castro, Joan Maragall, Antonio and Manuel Machado, Rafael Alberti, Vicente Aleixandre, Luis Cernuda, Emilio Prados, Miguel Hernández, and Luis Rosales. We will also look at narrative works by Valle-Inclán (*Sonata de invierno*), Unamuno (*San Manuel Bueno Mártir*), Eugeni d'Ors (*Aldeamediana*), and Semprún (*La escritura o la vida*), as well as relevant essays by Unamuno, Maeztu, Ortega y Gasset, María Zambrano, and select non-Castilian authors. Various critics and theories will provide context and background reading.

SPAN 481(4810) Conspiracy Theories and Practices-Senior Seminar for Hispanic Majors

Fall. 4 credits. This is the mandatory senior seminar for Spanish majors. B. Bosteels.

This course will study the rising popularity of conspiracy theories and their practice in literature and film from Latin America, with a special focus on the southern cone. Authors include Jorge Luis Borges, Ricardo Piglia, Roberto Arlt and Diamela Eltit.

SPAN 490(4900) Borders (also COM L 423(4230))

Fall. 4 credits. D. Castillo.

This course will focus on literary works that thematize geographical, cultural, and linguistic borders between cultures, languages, and sexual orientations. Topics will include discussion of immigration/exile/diaspora; representations of indigenous cultures and languages; transgender, transborder, transamerican voices. Texts may include films like *Transamerica*, *Todo sobre mi madre*, *Happy Together*, *Shabnam Mousi*, *Espaldas mojadas*; narratives like Carson's *Autobiography of Red*, Schneebaum's *Keep the River on your Right*, Coetzee's *Waiting for the Barbarians*, Garcia's *Monkey Hunting*, Warner-Vieyra's *As the Sorcerer Said*. Theorists like Donna Haraway, Rey Chow, Walter Dignolo will provide context and background readings.

SPAN 630(6300) Spanish for Reading

Fall. 3 credits. Prerequisite: graduate standing. J. Routier-Pucci.

Designed for those with little or no background in Spanish and little exposure to written Spanish. Aims primarily to develop skill in reading Spanish. Covers grammar basics, extensive vocabulary, and strategies for reading in a foreign language. The choice of texts depends on the interest of the students.

SPAN 639-640(6390-6400) Special Topics in Spanish Literature

639, fall; 640, spring. 2-4 credits each semester. Staff

Guided independent study for graduate students.

SPAN 661(6610) Sin, Crimes, and Scandal in Early Modern Hispanic Literature

Fall. 4 credits. M. A. Garcés.

Five centuries after its publication, *La Celestina* continues to be one of the most submersive works in the Spanish language, a work that imposes its crude and disenchanting worldview on its readers. Sin, crime, and scandal not only mark this splendid artistic achievement, but also distinguish other experimental fictions often characterized as "picaresque" because of their marginal subjectivity, their fascination with the erotic, and their transgression against the law. Our seminar will explore various dissident works within the context of the societies that produced them, such as the aggressively erotic *Lozana andaluza* by Francisco Delicado, and some not very exemplary novels by Cervantes and María de Zayas among other various critics and theories will provide context and theoretical approaches.

SPAN 665(6650) Dandies and Decadents

Spring. 4 credits. B. Bosteels.

This seminar studies figures of dandyism, decadence, and anarchy in late 19th- and early 20th-century fiction in Latin America. We will also read Nietzsche, Baudelaire, and Huysmans, in dialogue with Martí, Silva, and Díaz Rodríguez.

RUSSIAN

N. Pollak, chair; P. Carden, director of undergraduate studies (on leave spring 2008) (226B Morrill Hall, 255-8350); S. Paperno, director of Russian language program (226E Morrill Hall); W. Browne, R. Krivitsky, S. Senderovich (on leave fall 2007), G. Shapiro, V. Tsimberov. Visiting: C. Golkowski, G. Nehler

For updated information, consult our web sites:

(literature) www.arts.cornell.edu/russian
(language) <http://russian.cornell.edu>

The Russian Major

Russian majors study Russian language, literature, and linguistics and emphasize their specific fields of interest. It is desirable, although not necessary, for prospective majors to complete RUSSA 121-122, 203-204, and RUSSL 209 as freshmen and sophomores, because these courses are prerequisites to most of the junior and senior courses that count toward the major. Students may be admitted to the major upon satisfactory completion of RUSSA 122 or the equivalent. Students who elect to major in Russian should consult the director of undergraduate studies as soon as possible. For a major in Russian, students are required to complete (1) RUSSA 303-304 or the equivalent, and (2) 18 credits from 300- and 400-level literature and linguistics courses, of which 12 credits must be in literature in the original Russian.

With the permission of the instructor, students may add 1 credit to certain literature courses

by registering for RUSSA 491. Such courses involve a one-hour section each week with work in the Russian language. Students may count two 1-hour credits toward the 12 hours of Russian literature in the original language required for the major.

Satisfying the Foreign Language Requirement

1. Under Options 1a and 1b:

1a. Any Russian-language (RUSSA) course totaling 3 or 4 credits at the 200 level or above (with the exception of RUSSA 300 Directed Study) satisfies the Arts and Sciences language requirement under Option 1a.

1b. Under Options 1a and 1b: After completing the prerequisites RUSSA 121 and RUSSA 122, students may satisfy the language requirement by taking RUSSL 209. Students who qualify for RUSSL 212 may satisfy the language requirement by taking that course. Other RUSSL courses that are taught in Russian may also be used when appropriate.

2. Under Option 2:

- In two semesters: RUSSA 103 and 121 in the fall, RUSSA 104 and 122 in the spring.
- In three semesters: RUSSA 121 in the fall, 122 in the spring, 203 the following fall.
- In four semesters: RUSSA 121 in the fall, 122 in the spring, 125 the following fall, 126 the following spring.

Study Abroad

Students from Cornell frequently participate in the Council on International Educational Exchange and the American Council of Teachers of Russian programs for language study, as well as other Russian language programs. Opportunities are available for study during the summer, a single semester, or the full year. Further information is available from Professor Wayles Browne in the Department of Linguistics (220 Morrill Hall) and from the Cornell Abroad Office.

Honors. Students taking honors in Russian undertake individual reading and research and write an honors essay. Students planning to take honors should consult the director of undergraduate studies in their junior year.

Russian Language

Detailed information and schedules of the Russian language courses, as well as office hours of the instructors, are available at: <http://russian.cornell.edu>.

Suggested tracks for first- and second-year Russian language study:

- First-year intensive: 103 + 121 in the fall, 104 + 122 in the spring
- First-year nonintensive: 121 in the fall, 122 in the spring
- Second-year intensive: 125 + 203 in the fall, 126 + 204 in the spring
- Second-year nonintensive: 203 in the fall, 204 in the spring
- Second-year "mostly reading; lighter load": 125 in the fall, 126 in the spring

RUSSA 103-104(1103-1104)

Conversation Practice

103, fall; 104, spring. 2 credits each semester. Students must enroll in one sec of 103 and one sec of 121 in fall and one sec of 104 and one sec of 122 in spring. R. Krivitsky.

Reinforces the speaking skills learned in RUSSA 121 and 122. Homework includes assignments that must be done in the language lab or on the students' own computers.

RUSSA 121-122(1121-1122) Elementary Russian through Film

121, fall; 122, spring. 4 credits each semester. Prerequisite: for RUSSA 122, RUSSA 121. R. Krivitsky, S. Paperno, and V. Tsimberov.

Gives a thorough grounding in all the language skills: listening, speaking, reading and writing. Course materials include clips from original Russian films and TV programs. Homework includes assignments that must be done in the language lab or on the students' own computers.

RUSSA 125-126(1125-1126) Reading Russian Press

125, fall; 126, spring. 2 credits each semester. sec 1 for non-native speakers of Russian; sec 2 for native speakers of Russian. Prerequisite for 125 sec 1: RUSSA 122 or placement by department; prerequisite for 126 sec 1: RUSSA 125 or placement by department; prerequisite for 125 and 126 sec 2: placement by department. Times TBA with instructors.* See starred (*) note at end of RUSSA section. S. Paperno and V. Tsimberov.

The emphasis is on reading unabridged articles on a variety of topics from current Russian periodicals and web pages and translating them into English; a certain amount of discussion (in Russian) may also be undertaken.

RUSSA 203-204(2203-2204) Intermediate Composition and Conversation

203, fall; 204, spring. 3 credits each semester. *Satisfies Option 1.* Prerequisite: for RUSSA 203, RUSSA 122 and 104, or RUSSA 122 with grade higher than B, or placement by department; for RUSSA 204, RUSSA 203 or equivalent. R. Krivitsky, S. Paperno, and V. Tsimberov.

Guided conversation, translation, reading, pronunciation, and grammar review, emphasizing the development of accurate and idiomatic expression in the language. Course materials include video clips from an original Russian feature film and work with Russian web sites, in addition to the textbook.

RUSSA 300(3300) Directed Studies

Fall or spring. 1-4 credits, variable. Prerequisite: permission of instructor. Times TBA with instructor.* See starred (*) note at end of RUSSA section. Staff. Taught on a specialized basis for students with special projects (e.g., to supplement a non-language course or thesis work).

RUSSA 303-304(3303-3304) Advanced Composition and Conversation

303, fall; 304, spring. 4 credits each semester. *RUSSA 303 Satisfies Option 1.* Prerequisite: for RUSSA 303, RUSSA 204 or equivalent; for RUSSA 304, RUSSA 303 or equivalent. R. Krivitsky, S. Paperno, and V. Tsimberov.

Reading, writing, and conversation: current Russian films (feature and documentary), newspapers, TV programs, Russian web sites,

and other materials are used. In some years, completing interviews with native speakers of Russian is a component of RUSSA 304.

RUSSA 305-306(3305-3306) Reading and Writing for Heritage Speakers of Russian

305, fall; 306, spring. 2-3 credits, variable. Prerequisite: placement by department. Times TBA with instructor.* See starred (*) note at end of RUSSA section. Course may be cancelled if enrollment is insufficient. S. Paperno and V. Tsimberov.

Intended for students who speak grammatically correct Russian but do not know Russian grammar and have not learned to read or write Russian well (or have not learned written Russian at all). The two courses are very similar and do not constitute a sequence. Each may be taught slightly faster or slower in a given year, depending on the needs and interests of the students. Two classes a week teach writing and grammar and include related reading. These classes are required, and the students who take them receive 2 credit hours. The third (optional) class teaches reading and discussion, and grants an additional credit hour.

RUSSA 308(3308) Russian Through Popular Culture

Spring. 2-3 credits, variable. Prerequisite: RUSSA 304 for non-native speakers of Russian; RUSSA 305 or 306 for heritage speakers of Russian; for all others with advanced knowledge of Russian, placement by department. Not open to fluent native speakers of Russian (recommended: RUSSA 309/310 and RUSSL courses). Conducted in Russian. Times TBA with instructor.* See starred (*) note at end of RUSSA section. R. Krivitsky.

Aims to expand the students' vocabulary and their comprehension, speaking, reading, and writing skills, as well as cultural competence, through a mosaic study and discussion of a variety of styles in contemporary Russian popular culture (1970's through the present). Course materials include traditional and urban folklore, film, animation, published texts (prose and poetry), and recordings of songs. Includes two or three essays or similar writing assignments. Work is distributed so that a student may attend all three weekly meetings for 3 credit hours or only two of the meetings for 2 credit hours.

RUSSA 309-310(3309-3310) Advanced Reading

309, fall; 310, spring. 4 credits each semester. *Satisfies Option 1.* Sec. 1 for non-native speakers of Russian; sec 2 for native speakers of Russian. Prerequisites: for sec. 1 of RUSSA 309, RUSSA 204; for RUSSA 310, RUSSA 309 or equivalent; for sec 2 of 309 and 310, placement by department. Two meetings per week. Times TBA with instructors.* See starred (*) note at end of RUSSA section. May be canceled if enrollment is insufficient. S. Paperno and V. Tsimberov.

Designed to teach advanced reading and discussion skills. In section 1, weekly reading assignments include 20-40 pages of unabridged Russian, fiction or nonfiction. In section 2, the weekly assignments are 100-130 pages. Discussion of the reading is conducted entirely in Russian and centered on the content of the assigned selection.

[RUSSA 401(4401) History of the Russian Language (also LING 417[4417]) (HA-AS)]

Spring. 4 credits. W. Browne.
For description, see LING 417-418.]

[RUSSA 403(4403) Linguistic Structure of Russian (also LING 443[4443]) (KCM-AS)]

Fall. 4 credits. W. Browne.
For description, see LING 443-444.

[RUSSA 413-414(4413-4414) Advanced Conversation and Stylistics]

413, fall; 414, spring. 2 credits each semester. Prerequisites: for RUSSA 413, RUSSA 304 or equivalent; for RUSSA 414, RUSSA 413 or equivalent. Times TBA with instructor.* See starred (*) note at end of RUSSA section. V. Tsimberov.

Involves discussion of authentic Russian texts and films (feature or documentary) in a variety of nonliterary styles and genres.

[RUSSA 491(4491) Reading Course: Russian Literature in the Original Language]

Fall or spring. 1 credit each semester. Prerequisite: permission of instructor. Times TBA with instructor.* See starred (*) note at end of RUSSA section. Staff.

To be taken in conjunction with any Russian literature course at the advanced level. Students receive 1 credit for reading and discussing works in Russian in addition to their normal course work.

[RUSSA 601(6601) Old Church Slavonic (also LING 661[6661])]

Fall. 4 credits. W. Browne.
For description, see LING 661.

[RUSSA 602(6602) Old Russian Texts (also LING 662[6662])]

Spring. 4 credits. W. Browne.
For description, see LING 662.

[RUSSA 633-634(6633-6634) Russian for Russian Specialists]

633, fall; 634, spring. 1-4 credits, variable. Prerequisite: four years of college Russian or equivalent. Times TBA with instructor.* See starred (*) note at end of RUSSA section. Staff.

Designed for students whose areas of study require advanced active control of the language. Fine points of syntax, usage, and style are discussed and practiced. Syllabus varies from year to year.

[RUSSA 651(6651) Comparative Slavic Linguistics (also LING 671[6671])]

Fall. 4 credits. W. Browne.
For description, see LING 671.

* For RUSSA courses marked "Time to be arranged with instructor(*)", bring your class schedule to the organizational meeting, usually held on the second or third day of the semester, where class meeting times will be chosen so as to accommodate as many students as possible. The date, time and place of the organizational meeting is announced at <http://russian.cornell.edu>, and posted at the Russian Department office (226 Morrill Hall). You may also contact the department office at 255-8350 or e-mail russiandept@cornell.edu.

**For TBA courses taught by Wayles Browne, contact Professor Browne (ewb2@cornell.edu or 255-0712).

Russian Literature

A variety of courses is offered in Russian literature. Readings may be in English translation or in the original Russian or both (see course descriptions). Instruction often encompasses culture and intellectual history as well as literature. Some courses are cross-listed with appropriate departments.

First-Year Writing Seminars: consult the John S. Knight Institute brochure for times, instructors, and descriptions. Next offered 2009-2010.

[RUSSL 207-208(2207-2208) Themes from Russian Culture # (LA-AS)]

Spring. 3 credits. In translation. Offered alternate years; next offered 2008-2009. G. Shapiro.

These courses are based on lectures, discussions, and audio-visual presentations and cover various aspects of Russian culture, such as literature, art, architecture, music, religion, philosophy, and social thought. RUSSL 207 extends through the 18th century, and RUSSL 208 covers the 19th and 20th centuries.]

[RUSSL 209(2209) Readings in Russian Prose and Poetry # (LA-AS)]

Fall. 3 credits. Reading in Russian; discussion in English. *Satisfies Option 1.* Prerequisite: For students with 2+ semesters of Russian language (RUSSA 121/122 or equivalent). N. Pollak.

Short classics of the 19th-20th centuries, including Pushkin, Lermontov, Tolstoy, Chekhov, Blok, Akhmatova. Assignments adjusted for native fluency. May be used as a prerequisite for RUSSL 300-400 courses with reading in Russian.

[RUSSL 212(2212) Readings in 20th-Century Russian Literature (LA-AS)]

Spring. 3 credits. Reading, writing, and discussion in Russian. *Satisfies Option 1.* G. Shapiro.

Course designed for students with native background needing a course to satisfy the language requirement. Goals are to introduce students to 20th-century Russian literature in the original and to improve their Russian reading and writing skills. Readings are from 20th-century masters such as Bunin, Bulgakov, and Nabokov. May be used as a prerequisite for RUSSL 300-400 courses with reading in Russian.

[RUSSL 279(2279) The Russian Connection, 1830 to 1867 (also COM L 279[2790]) # (LA-AS)]

4 credits. In translation. Next offered 2008-2009. P. Carden.

Examines Russian prose of mid-19th century (Lermontov, Tolstoy) against background of European prose (Rousseau, Musset, Stendhal, Thackeray, et al.)

[RUSSL 280(2280) The Russian Connection, 1870 to 1960 (also COM L 280[2800]) (LA-AS)]

4 credits. In translation. Next offered 2008-2009. P. Carden.

Examines the Dostoevskian novel against background of European prose (Diderot, Camus, Sarraute, et al.)

[RUSSL 331(3331) Introduction to Russian Poetry # (LA-AS)]

Spring. 4 credits. Reading in Russian; discussion in English. Prerequisite: proficiency in Russian or permission of instructor. May be counted toward 12 credits of Russian literature in original language for Russian major. Next offered 2009-2010. S. Senderovich.

A survey of Russian poetry, with primary emphasis on the analysis of individual poems by major poets.]

[RUSSL 332(3332) Russian Drama and Theater (also THETR 322[3220]) # (LA-AS)]

4 credits. In translation. Next offered 2008-2009. S. Senderovich.

19th-20th century plays (Gogol, Ostrovsky, Chekhov). Historical period, cultural atmosphere, literary trends.]

[RUSSL 333(3333) 20th-Century Russian Poetry (LA-AS)]

4 credits. Reading in Russian; discussion in English. May be counted toward 12 credits of Russian literature in original language for Russian major. Next offered 2008-2009. N. Pollak.

Close readings of lyrics by major 20th-century poets.]

[RUSSL 334(3334) The Russian Short Story # (LA-AS)]

Fall. 4 credits. Reading in Russian; discussion in English. Prerequisite: proficiency in Russian or permission of instructor. May be counted toward 12 credits of Russian literature in original language for Russian major. P. Carden.

Survey of two centuries of Russian storytelling. Analysis of individual stories by major writers. Emphasis on narrative structure and on related landmarks of Russian literary criticism.

[RUSSL 335(3335) Gogol # (LA-AS)]

Fall. 4 credits. In translation. G. Shapiro. Selected works of Gogol are read closely and viewed in relation to his life and to the literature of his time.

[RUSSL 337(3337) Films of Russian Literary Masterpieces (LA-AS)]

4 credits. In translation. Next offered 2009-2010. S. Senderovich.

Comparative analysis of American films based on Russian novels: *War and Peace*, and *Dr. Zhivago*. Problems of translation between media and cultures.]

[RUSSL 338(3338) Lermontov's Hero of Our Time # (LA-AS)]

Spring. 4 credits. Reading in Russian; discussion in English. Next offered 2009-2010. N. Pollak.

Mikhail Lermontov's *Hero of Our Time* has been called the first major Russian novel. Close reading with attention to linguistic and literary problems.]

[RUSSL 350(3350) Education and the Philosophical Fantasies # (LA-AS)]

Fall. 4 credits. In translation. Next offered 2009-2010. P. Carden.

Fundamental issues of education explored through great works: Plato's *Republic*, Rousseau's *Emile*, and Tolstoy's *War and Peace*.]

[RUSSL 367(3367) The Russian Novel # (LA-AS)]

Spring. 4 credits. In translation. Next offered 2008–2009. Students who read Russian may sign up for a discussion section of the Russian text for 1 credit (RUSSA 491). N. Pollak.

The rise of the Russian novel in the 19th century: Pushkin, Lermontov, Turgenyev, Dostoevsky, Tolstoy, Chekhov.]

[RUSSL 368(3368) 20th-Century Russian Literature (LA-AS)]

Spring. 4 credits. In translation. G. Shapiro. A survey of 20th-century Russian prose, including such writers as Bunin, Bulgakov, and Nabokov, as well as Solzhenitsyn, Shalamov, and Voinovich. Students who read Russian may sign up for discussion of Russian text for 1 credit (RUSSA 491).

[RUSSL 369(3369) Dostoevsky # (LA-AS)]

Fall. 4 credits. In translation. Limited to 40 students. P. Carden.

A survey of Dostoevsky's major novels: *Notes from Underground*, *Crime and Punishment*, *The Idiot*, and *The Brothers Karamazov*.

[RUSSL 373(3373) Chekhov in the Context of Contemporary European Literature and Art # (LA-AS)]

4 credits. In translation. Next offered 2008–2009. S. Senderovich.

Anton Chekhov's stories in the context of the European art of the short story and contemporary paintings. Readings in English translation.]

[RUSSL 385(3385) Reading Nabokov (also ENGL 379[3790]) (LA-AS)]

Fall. 4 credits. In translation. Limited to 18 students; priority given to seniors. G. Shapiro.

Offers an exciting trip into the intricate world of Nabokovian fiction. After establishing himself in Europe as a distinguished Russian writer at the outbreak of World War II, Nabokov came to the United States, where he re-established himself as an American writer of world renown. In our analysis of the Nabokovian artistic universe, we focus on his Russian corpus of works, from *Mary* (1926) to *The Enchanter* (writ. 1939), and examine the two widely read novels that he wrote in Ithaca while teaching literature at Cornell, *Lolita* (1955) and *Invitation to a Beheading* (1957).

[RUSSL 393(3393) Honors Essay Tutorial]

Fall and spring. 8 credits. Must be taken in two consecutive semesters in senior year; credit for first semester is awarded upon completion of second semester. For information, see director of undergraduate studies. Times TBA with instructor. Staff.

[RUSSL 409(4409) Russian Stylistics (LA-AS)]

Spring. 4 credits. Also open to graduate students. Prerequisite: proficiency in Russian or permission of instructor. This course may be counted toward the 12 credits of Russian literature in the original language for the Russian major. S. Senderovich.

Beyond normative grammar. Introduction to idiomatic Russian (morphology, syntax, vocabulary, phraseology) and genres of colloquial and written language. Development of writing skills.

[RUSSL 415(4415) Post-Symbolist Russian Poetry (LA-AS)]

4 credits. Reading in Russian; discussion in English. Prerequisite: proficiency in Russian or permission of instructor. This course may be counted toward the 12 credits of Russian literature in the original language for the Russian major. Next offered 2009–2010. N. Pollak.

Verse, critical prose, and literary manifestos by selected early 20th-century Russian poets, including Annenskii, Pasternak, and Mandelstam.]

[RUSSL 430(4430) Practice in Translation (LA-AS)]

Spring. 4 credits. Prerequisite: proficiency in Russian or permission of instructors. Next offered 2009–2010. W. Browne and S. Senderovich.

Practical workshop in translation: documents, scholarly papers, literary works (prose and poetry). Mostly Russian to English, some English to Russian.]

[RUSSL 432(4432) Pushkin # (LA-AS)]

Spring. 4 credits. Reading in Russian; discussion in English. Prerequisite: proficiency in Russian or permission of instructor. May be counted toward 12 credits of Russian literature in original language for Russian major. S. Senderovich. Selected works by Pushkin: lyrics, narrative poems, and *Eugene Onegin*.

[RUSSL 433(4433) Short Works of Tolstoy # (LA-AS)]

Fall. 4 credits. Reading in Russian; discussion in English. Prerequisite: RUSSL 209 or 212 or equivalent mastery of Russian language skills. Next offered 2009–2010. P. Carden.

A selection of short stories and short novels will be read in the original Russian text. Class discussion will focus on the themes and style of Tolstoy's writings, with particular attention to his use of the Russian idiom. The assignments will be adjusted to take into account the language capabilities of those enrolled.]

[RUSSL 437(4437) A Moralist and a Pornographer (also COM L 437[4370]) (LA-AS)]

Spring. 4 credits. In translation. Limited to 15 students. Next offered 2008–2009. S. Senderovich.

Bestsellers *Doctor Zhivago* and *Lolita* (both October 1958) concerned the sexual exploitation of a teenage girl.]

[RUSSL 492(4492) Supervised Reading in Russian Literature]

Fall or spring. 1–4 credits each semester. Independent study. Prerequisite: students must find an advisor and submit a plan before signing up. Times TBA with instructor. Staff.

[RUSSL 493(4493) Anton Chekhov # (LA-AS)]

4 credits. Reading in Russian; discussion in English. Prerequisite: proficiency in Russian or permission of instructor. Next offered 2008–2009. S. Senderovich.

Major works of Chekhov in Russian; focus on style and language. Readings include stories ("Anna on the Neck," "Darling," "Steppe") and plays (*Uncle Vanya* and *Seagull*.)

[RUSSL 499(4499) The Avant-Garde in Russian Literature and the Arts (LA-AS)]

Fall. 4 credits. Reading in Russian; discussion in English. Prerequisite: proficiency in Russian or permission of instructor. Next offered 2009–2010. P. Carden.

Literature, theater, and the visual arts in the richly innovative period 1890–1920.]

Graduate Seminars**[RUSSL 611(6611) Supervised Reading and Research]**

Fall or spring. 2–4 credits each semester. Prerequisite: proficiency in Russian or permission of instructor. Times TBA with instructor. Staff.

Related Languages**Czech****[CZECH 300(3300) Directed Studies]**

Fall or spring. 1–4 credits, variable. Prerequisite: permission of instructor. Times TBA with instructor.** See double-starred (**) note at end of UKRAN section. Staff.

Taught on a specialized basis to address particular student needs.

Hungarian**[HUNGR 131–132(1131–1132) Elementary Hungarian]**

3 credits. Prerequisite: For 132: HUNGR 131 or permission of instructor. This language series (131–132) is not sufficient to satisfy the language requirement. G. Nehler.

Teaches the basic grammar of Hungarian. Designed to aid the student in all facets of language acquisition: speaking, listening comprehension, reading, and writing. Second-semester Hungarian (132) teaches more advanced grammar of the language at an intermediate level.

[HUNGR 133–134(1133–1134) Continuing Hungarian]

133, fall; 134, spring. 3 credits. Prerequisite: for 133, HUNGR 132 or permission of instructor; for 134, HUNGR 133 or permission of instructor. This language series (133–134) is not sufficient to satisfy the language requirement. Next offered 2008–2009. G. Nehler.

A conversation and reading course designed to aid the student in all facets of language acquisition: speaking, listening comprehension, reading, and writing. Fourth-semester Hungarian (134) teaches more advanced instruction of the language at an intermediate level.]

[HUNGR 300(3300) Directed Studies]

1–4 credits, variable. Prerequisite: permission of instructor. Times TBA with instructor.** See double-starred (**) note at end of UKRAN section. Staff. Taught on a specialized basis to address particular student needs.

[HUNGR 427(4427) Structure of Hungarian (also LING 427[4427]) (KCM-AS)]

Next offered 2008–2009. For description, see LING 427.]

Polish**[POLSH 131-132(1131-1132) Elementary Polish**

131, fall; 132, spring. 3 credits each semester. Prerequisite: for POLSH 132, POLSH 131 or equivalent. This language series (131-132) is not sufficient to satisfy the language requirement. Offered alternate years; next offered 2008-2009. Staff.

Covers all language skills: speaking, listening comprehension, reading, and writing.]

[POLSH 133-134(1133-1134) Continuing Polish

133, fall; 134, spring. 3 credits each semester. Prerequisites: for POLSH 133, POLSH 132 or permission of instructor; for POLSH 134, POLSH 133 or equivalent. Times TBA with instructor. **Offered alternate years. See double-starred (**) note at end of UKRAN section. W. Browne.

An intermediate conversation and reading course.

[POLSH 300(3300) Directed Studies

Fall or spring. 1-4 credits, variable. Prerequisite: permission of instructor. Times TBA with instructor. ** See double-starred (**) note at end of UKRAN section. W. Browne.

Taught on a specialized basis to address particular student needs.

[POLSH 301(3301) Polish through Film and Literature

Spring. 3 credits. *Satisfies Option 1.* Prerequisite: POLSH 134 or permission of instructor. Times TBA with instructor. ** See double-starred (**) note at end of UKRAN section. Next offered 2008-2009. C. Golkowski.

Language proficiency and insight into Polish culture through videos, films, and contemporary texts. Listening and reading comprehension, conversation, grammar review.]

Serbo-Croatian**[SEBCR 131-132(1131-1132) Elementary Serbo-Croatian**

131, fall; 132, spring. 3 credits each semester. Prerequisite for SEBCR 132: SEBCR 131 or equivalent. This language series (131-132) is not sufficient to satisfy language requirement. Times TBA with instructor. ** Offered alternate years. See double-starred (**) note at end of UKRAN section. W. Browne.

Covers all language skills: speaking, listening comprehension, reading, and writing. Includes Bosnian.

[SEBCR 133-134(1133-1134) Continuing Serbo-Croatian

133, fall; 134, spring. 3 credits each semester. Prerequisite for SEBCR 133: SEBCR 132 or equivalent; for SEBCR 134: SEBCR 133 or equivalent. Times TBA with instructor. ** See double-starred (**) note at end of UKRAN section. Offered alternate years; next offered 2008-2009. Staff.

An intermediate conversation and reading course.]

[SEBCR 300(3300) Directed Studies

Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. Times TBA with instructor. ** See double-starred (**) note at end of UKRAN section. Staff.

Taught on a specialized basis to address particular student needs.

[SEBCR 302(3302) Advanced Serbo-Croatian

Fall. 3 credits. *Satisfies Option 1.* Prerequisite: SEBCR 134 or permission of instructor. Next offered 2009-2010. Staff. Includes Bosnian with Croatian and Serbian. Intensive speaking and writing practice; grammar review. Fiction and nonfiction readings; videos reflecting contemporary South Slavic societies.]

Ukrainian**[UKRAN 300(3300) Directed Studies**

Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. Times TBA with instructor. ** See double-starred (**) note at end of section. Staff.

Taught on a specialized basis to address particular student needs.

**For these courses, contact Professor Browne (ewb2@cornell.edu or 255-0712) for time and place of organizational meeting(s).

SCIENCE AND TECHNOLOGY STUDIES

S. Hilgartner, chair (304 Rockefeller Hall, 255-9950); K. Vogel (DUS), R. N. Boyd, P. R. Dear, S. H. Hilgartner, R. Kline, C. Leuenberger, B. V. Lewenstein, M. Lynch, T. J. Pinch, A. G. Power, R. Prentice, J. V. Reppy, M. W. Rossiter, P. J. Sengers, S. Seth, Emeritus: W. R. Lynn, L. P. Williams. Adjunct faculty: R. W. Miller, H. Shue, Z. Warhaft

In today's world, issues at the intersection of the technical and the social arise continually in all aspects of life, from the role of computers in society, the history of evolutionary theory, and the challenges of environmental controversies, to the ethical dilemmas of genomics and biomedicine. The field of science and technology studies (S&TS) addresses such issues through the study of the social aspects of knowledge, especially scientific and technological knowledge. S&TS explores the practices that shape science and technology, examines their social and cultural context, and analyzes their political and ethical implications. S&TS provides a strong liberal arts background from which students can go on to careers in law, medicine, environmental policy, business, and a variety of other professions where the social aspects of science and technology loom large.

The Science and Technology Studies Major

S&TS courses are organized into a set of core courses plus three themes. Students select the theme that best represents their interests. In consultation with a faculty member, students may devise their own theme as long as it

meets the general criteria of coherence and rigor.

Admission to the Major

Students intending to major in Science and Technology Studies should submit an application during their sophomore year. Juniors are considered on a case-by-case basis. The application includes (1) a one-page statement explaining the student's intellectual interests and why the major is consistent with the student's academic interests and goals; (2) the theme the student wishes to pursue in the major; (3) a tentative plan of courses fulfilling S&TS requirements; and (4) an up-to-date transcript of work completed at Cornell University (and elsewhere, if applicable).

Acceptance into the major requires completion of the following prerequisites:

1. S&TS 101 and 102, or S&TS 101 or 102 and an additional Social Science or Humanities course. (Students who have not taken S&TS 101 or 102, but have taken a different S&TS course and an additional Social Science or Humanities course should contact the S&TS department for guidance about whether those courses can substitute for the prerequisites.)
2. the science and quantitative requirement of the College of Arts and Sciences.

These courses cannot be used to fulfill the core or other course requirements for the major and must be taken for a letter grade. Sophomores in the process of completing these prerequisites may be admitted to the major on a *provisional* basis. Further information and application materials are available in 306 Rockefeller Hall (255-6047).

Requirements

S&TS majors must complete the following requirements:

Note: All courses used to fulfill major requirements must be taken for a letter grade, which must be C- or above.

1. Core: one course in each of the following groups (a-c).
 - a. Foundation (S&TS 201)
 - b. Ethics (choose from S&TS 205, 206, 360, or 490)
 - c. History (choose from S&TS 233, 250, 281, 282, 330, 355, 357, 447, 458, 474, 475, or 476)
2. Theme: Students must elect a theme and take four courses in the theme. Courses taken to satisfy the core course requirements may not be used as part of the required four courses in the theme. At least two of the courses should be at the 300 level or higher, and at least one should be at the 400 level.

Available themes are:

- a. Minds and Machines (S&TS 212, 250, 281, 282, 286, 292, 349, 354, 355, 356, 381, 387, 400, 402, 409, 431, 453, 458, 481, 496)
- b. Science, Technology, and Public Policy (S&TS 281, 282, 324, 331, 352, 357, 360, 390, 391, 401, 407, 411, 412, 433, 442, 444, 466, 468, 471, 473, 483, 487, 490)

- c. Life in Its Environment (S&TS 205, 206, 233, 281, 282, 285, 286, 287, 301, 311, 324, 331, 333, 411, 412, 415, 420, 422, 431, 444, 447, 468, 471, 487, 495, or 496)

In consultation with an S&TS faculty advisor, students may also devise their own theme as long as it meets the general criteria of coherence and rigor.

3. Additional Science and Technology Studies Courses: additional courses to total 34 credit hours in the major, chosen from the general list of S&TS courses.
4. Science Requirement: in addition to the science requirement of the College of Arts and Sciences, Science and Technology Studies majors are required to take an additional two semesters of a natural science or engineering (including computer science). Mathematics sufficient to provide background for the additional science requirement should be completed before undertaking that requirement. Choice of these courses should be made in consultation with the student's major advisor and should be related to the theme selected by the student.

The Honors Program

The honors program is designed to provide independent research opportunities for academically talented S&TS majors. Students who enroll in the honors program are expected to do independent study and research, with faculty guidance, on issues in science and technology studies. Students who participate in the program should find the experience intellectually stimulating and rewarding whether or not they intend to pursue a research career. S&TS majors are considered for entry into the honors program at the end of the second semester of their junior year. To qualify for the S&TS honors program, students must have an overall Cornell cumulative grade point average (GPA) of at least 3.00 and a 3.30 cumulative GPA in courses taken for the major. Additionally, the student must have formulated a research topic, and have found a project supervisor and a second faculty member willing to serve as the advisors; at least one of these must be a member of the S&TS department. More information on the honors program is available from the S&TS undergraduate office at 306 Rockefeller Hall (255-6047).

The Biology and Society Major

The Department of Science and Technology Studies also offers the Biology and Society major, which includes faculty from throughout the university. The Biology and Society major is designed for students who wish to combine the study of biology with exposure to perspectives from the social sciences and humanities. In addition to providing a foundation in biology, Biology and Society students obtain background in the social dimensions of modern biology and in the biological dimensions of contemporary social issues.

The Biology and Society major is offered to students enrolled in the College of Arts and Sciences, the College of Human Ecology, and the College of Agriculture and Life Sciences. The major is coordinated for students in all colleges through the Biology and Society office. Students can get information, specific course requirements, and application

procedures for the major from the office in 306 Rockefeller Hall, 255-6047.

A full description of the Biology and Society major can be found on p. 477 of this catalog.

The Concentration in Science and Technology Studies

S. H. Hilgartner, chair (304 Rockefeller Hall, 255-9950); K. Vogel (DUS); R. N. Boyd, P. R. Dear, R. Kline, C. Leuenberger, B. V. Lewenstein, M. Lynch, T. J. Pinch, A. G. Power, R. Prentice, J. V. Reppy, M. W. Rossiter, P. J. Sengers, S. Seth, Emeritus; W. R. Lynn, L. P. Williams. Adjunct faculty: R. W. Miller, H. Shue, Z. Warhaft

The concentration (or minor) in Science and Technology Studies (S&TS) is designed for students who wish to engage in a systematic, interdisciplinary exploration of the role of science and technology in modern societies. The concentration is intended for students with varied academic interests and career goals. Majors in the natural sciences and engineering have an opportunity to explore the social, political, and ethical implications of their selected fields of specialization, while students majoring in the humanities and social sciences have a chance to study the processes, products, and impacts of science and technology from an S&TS perspective.

To satisfy the requirements for the S&TS concentration, students must complete with letter grades of C- or above a minimum of four courses selected from the course offerings listed for the major. At least one course must be chosen from the list of core courses. Two courses must be chosen from one of the themes listed below:

1. Minds and Machines
2. Science, Technology, and Public Policy
3. Life in Its Environment

The concentration is completed with one other course in S&TS. Interested students may obtain further information about courses and a list of course descriptions by contacting the S&TS undergraduate office, 306 Rockefeller Hall (255-6047).

Introductory Courses

S&TS 101(1101) Science and Technology in the Public Arena (SBA-AS)

Fall. 3 credits. S&TS 101 and 102 may be taken separately or in any order.

Recommended as introduction to field; not required and may not be used to fulfill a major requirement. J. Reppy.

Introduction to public policy issues involving developments in science and technology. Studies such topics as secrecy and national security, the politics of expertise, public understanding of science, computers and privacy, and the management of risk. Applies concepts from the field of science and technology studies to analyze how issues are framed and public policy produced.

S&TS 102(1102) Histories of the Future (CA-AS)

Spring. 3 credits. Recommended as introduction to field; not required and may not be used to fulfill a major requirement. S&TS 101 and 102 may be taken separately or in any order. S. Seth.

From *Frankenstein* to *The Matrix*, science fiction and film have depicted contemporary science, technology, and medicine for almost two centuries. This course introduces students to historical and social studies of science and technology using science fiction films and novels, as well as key readings in science and technology studies. What social questions can fictional accounts raise that factual ones can only anticipate? How have "intelligent machines" from Babbage's Analytical Engine to Hal raised questions about what it means to be human? What can Marvel Comics teach us about changes in science and technology? When can robots be women and, in general, what roles did gender play in scientific, technological, and medical stories? How was the discovery that one could look inside the human body received? How do dreams and nightmares of the future emerge from the everyday work of scientific and technological research?

Core Courses

Foundation Course

S&TS 201(2011) What Is Science? An Introduction to the Social Studies of Science and Technology (also SOC 210[2100]) (CA-AS)

Spring. 3 credits; also offered as writing-intensive 4-credit option, by permission only, and limited to 15 students. T. Pinch.

Introduces some of the central ideas in the field of Science and Technology Studies (S&TS). As well as serving as an introduction to students who plan to major in Biology and Society or in Science and Technology Studies, the course is aimed at students with backgrounds in either the sciences or the humanities who are challenged to think more critically about what we mean by science, what counts as scientific knowledge and why, and how science and technology intervene in the wider world. The course is a mixture of lecture, discussion, and other activities. The discussion sections are an integral part of the course and attendance is required. In addition, a series of written assignments throughout the semester and a take-home final during exam week compose the majority of the grade.

Ethics**S&TS 205(2051) Ethical Issues in Health and Medicine (also B&SOC 205[2051]) (KCM-AS)**

Fall. 4 credits. Limited to 150 students.
K. Vogel.

For description, see B&SOC 205.

S&TS 206(2061) Ethics and the Environment (also B&SOC 206[2061], PHIL 246[2460]) (KCM-AS)

Spring. 4 credits. Limited to 50 students.
S. Pritchard.

For description, see B&SOC 206.

S&TS 360(3601) Ethical Issues in Engineering (also ENGRG 360[3600])

Spring. 3 credits. Limited to juniors and seniors only. P. Doing.

For description, see ENGRG 360.

History**[S&TS 233(2331) Agriculture, History, and Society: From Squanto to Biotechnology (HA-AS)]**

Fall. 3 credits. Next offered 2009–2010.
M. Rossiter.

For description, see "Life in Its Environment" theme.]

S&TS 250(2501) Technology in Society (also ENGRG/ECE/HIST 250[2500]) (HA-AS)

Fall. 3 credits. Offered alternate years.
R. Kline.

For description, see ENGRG 250.

S&TS 281(2811) Science in Western Civilization: Medieval and Early-Modern Europe up to Isaac Newton (also HIST 281[2810]) # (HA-AS)

Fall. 4 credits. P. Dear.

For description, see HIST 281.

S&TS 282(2821) Science in Western Civilization: Newton to Darwin, Darwin to Einstein (also HIST 282[2820]) # (HA-AS)

Spring. 4 credits. S&TS 281 is *not* a prerequisite to 282. S. Seth.

For description, see HIST 282.

[S&TS 330(3301) Making Modern Science (also HIST 329[3290]) (HA-AS)]

Spring. 4 credits. Next offered 2008–2009.
S. Seth.

Examines the history of the physical sciences in Europe and the United States from 1800 to the present. Students study such topics as the development of thermodynamics and electrostatics, the quantum and relativity theories, science during the world wars, and post-war "big science." As well as a history of ideas, the course emphasizes the broader historical contexts in which physical science has been produced, focusing on issues raised in relation to Romanticism, the first and second industrial revolutions, social statistics, train travel, and the military-industrial-scientific complex, among others. Reading for the course ranges from primary source material (original papers by Thomson, Helmholtz, Planck, and Einstein) to extracts from Mary Shelley's *Frankenstein* and Michael Frayn's *Copenhagen*.]

[S&TS 357(3571) Engineering in American Culture (also ENGRG/HIST 357[3570])]

Fall. 3 credits. Next offered 2008–2009.
R. Kline.

For description, see ENGRG 357.]

S&TS 447(4471) Seminar in the History of Biology (also BIOEE 467[4670], B&SOC 447[4471], HIST 415[4150]) (PBS)

Summer and fall. 4 credits. W. Provine and G. Gorman.

For description, see BIOEE 467.

[S&TS 458(4581) Intelligibility in Science (also HIST 458[4580]) (HA-AS)]

Spring. 4 credits. Next offered 2009–2010.
P. Dear.

For description, see HIST 458.]

Theme Courses**Minds and Machines****S&TS 250(2501) Technology in Society (also ECE/ENGRG/HIST 250[2500]) (HA-AS)**

Fall. 3 credits. Offered alternate years.
R. Kline.

For description, see ENGRG 250.

S&TS 281(2811) Science in Western Civilization: Medieval and Early-Modern Europe up to Isaac Newton (also HIST 281[2810]) # (HA-AS)

Fall. 4 credits. P. Dear.

For description, see HIST 281.

S&TS 282(2821) Science in Western Civilization: Newton to Darwin, Darwin to Einstein (also HIST 282[2820]) # (HA-AS)

Spring. 4 credits. S. Seth.

For description, see HIST 282.

[S&TS 292(2921) Inventing an Information Society (also ECE/ENGRG 298[2980], HIST 292[2920]) (HA-AS)]

Spring. 3 credits. Next offered 2008–2009.
R. Kline.

For description, see ENGRG 298.]

[S&TS 349(3491) Media Technologies (also INFO 349[3491], COMM 349[3490]) (HA-AS)]

Spring. 3 credits. Offered odd-numbered years; next offered 2008–2009. T. Gillespie.

For description, see COMM 349.]

[S&TS 354(3541) The Sociology of Contemporary Culture (also SOC 352[3520]) (CA-AS)]

Fall. 4 credits. Next offered 2008–2009.
C. Leuenberger.

Introduces students to the rapidly expanding body of work at the intersection of sociology, cultural studies, and science and technology studies. Provides an introduction to theoretical debates in cultural studies and to sociological studies of culture. Discusses the emergence of the tourist industry, the significance of consumption in modern life, the culture of music and art, the use of rhetoric in social life, cultural and feminist analyses of knowledge and science, and the social construction of self, bodies, and identities.]

S&TS 355(3551) Computers: From the 17th Century to the Dot.com Boom (also INFO 355[3551], COMM 355[3550]) (HA-AS)

Fall. 4 credits. No technical knowledge of computer use is presumed or required. S&TS 355 and 356 can be taken separately or in any order. J. Ratcliff.

Computers have not always been ubiquitous boxes gracing our desktops: in Victorian

London, Charles Babbage tried to build an analytical engine using brass gears and steel rods, and during World War II the Allied governments used sophisticated electro-mechanical and electronic "brains" to break Axis codes. How did computing technology, once useful only to technical specialists, come to colonize industry, academia, the military, and the home? This course explores the history of computing, placing ideas and technologies in social and historical context; for example, it relates Charles Babbage's difference engines to the factory system, IBM to the population census, and feedback systems and Turing machines to the demands of war. Looking at the history of the computer teaches something of how technology, society and knowledge depend on and change one another. It also helps students discover something about the relationship between machines and society today. This is a course in the history of computing; a background in computer science is not required.

[S&TS 356(3561) Computing Cultures (also INFO/VISST 356[3560], COMM 356[3560]) (CA-AS)]

Spring. 4 credits. No technical knowledge of computer use presumed or required.

S&TS 355 and 356 may be taken separately or in any order. Next offered 2008–2009.

R. Prentice.

Computers are powerful tools for working, playing, thinking, and living. Laptops, PDAs, webcams, cell phones, and iPods are not just devices, they also provide narratives, metaphors, and ways of seeing the world. This course critically examines how computing technology and society shape each other and how this plays out in our everyday lives. Identifies how computers, networks, and information technologies reproduce, reinforce, and rework existing cultural trends, norms and values. Looks at the values embodied in the cultures of computing and consider alternative ways to imagine, build, and work with information technologies.]

S&TS 381(3811) Philosophy of Science: Knowledge and Objectivity (also PHIL 381[3810]) (KCM-AS)

Spring. 4 credits. R. Boyd.

For description, see PHIL 381.

[S&TS 387(3871) The Automatic Lifestyle: Consumer Culture and Technology (also INFO 387[3871]) (CA-AS)]

Spring. 4 credits. Next offered 2008–2009.
P. Sengers.]

[S&TS 400(4001) Components and Systems: Engineering in a Social Context (also M&AE 400/401[4000/4010])]

Spring. 3 credits. Offered alternate years.
Z. Warhaft.

For description, see M&AE 400.]

S&TS 402(4021) Bodies in Medicine, Science, and Technology (also S HUM 420)

Spring. 4 credits. Limited to 15 students.
R. Prentice.

For description, see S HUM 420.

[S&TS 409(4091) From the Phonograph to Techno (also SOC 409[4090]) (SBA-AS)]

Spring. 4 credits. Next offered 2009–2010.
T. Pinch.]

S&TS 422(4221) New York Women (also FGSS 422[4220], HIST 445[4450]) (HA-AS)

Fall. 4 credits. M. Rossiter.

For description, see S&TS 422 Life in Its Environment Theme.

S&TS 423(4231) Gender and Technology

Spring. 4 credits. S. Pritchard.

Why are some technologies such as cars and computers associated with men and masculinity? How did sewing machines and vacuums become gendered female? How do technological artifacts and systems constitute, mediate, and reproduce gender relations and gender identities? How do technologies uphold gender hierarchies and thus social inequalities? This course explores the relationship between gender and technology in comparative cultural, social, and historical perspective. Specific themes addressed include: work, labor, gender, and technology; the gendered dimensions of industrial technologies; consumption and gender; technologies of (gendered) identity; the intersection of race, class, and gender with technology; and gender, sex, and technology. Most of the course material focuses on western Europe and the United States since the mid-18th century, but the issues raised in this class will prepare students to think about gender and technology in other contexts including our own.

[S&TS 431(4311) From Surgery to Simulation (SBA-AS)]

Spring. 4 credits. Next offered 2008–2009. R. Prentice.

A cliché among medical professionals says, "If you have a hammer, every problem looks like a nail." In other words, treatment decisions often are dictated by available technologies. This course looks at medical technologies from dissection to x-rays to anti-depressants and the ways they shape how medical professionals look at and practice upon the human body. Takes a broad view of technology, encompassing systems of practice that shape how work is conducted and the body is understood, as well as specific machines and treatments with specific uses. Considers how these technologies often are not only treatments for individual patients but also metaphors for larger cultural questions.]

[S&TS 453(4531) Knowledge and Society (also SOC 453[4530]) (CA-AS)]

Fall. 4 credits. Limited to 15 students. Next offered 2008–2009. C. Leuenberger.

Focuses on the historical evolution of the sociology of knowledge as a theoretical paradigm and an empirical research field. Examines the phenomenological origins of the sociology of knowledge and many of its central texts. Studies how it has been applied to such areas as personhood, interaction, religion, identity, and the emotions. Also considers epistemological questions that arise, and cover various theoretical and empirical approaches that have been influenced by the sociology of knowledge such as ethnomethodology, conversation analysis, and the sociology of science and technology.]

[S&TS 468(4681) Understanding Innovation (HA-AS)]

Fall. 4 credits. Next offered 2008–2009.

J. Reppy.

For description, see S&TS 468 Science, Technology and Public Policy.]

[S&TS 481(4811) Philosophy of Science (also PHIL 481[4810], S&TS 681[6811]) (KCM-AS)]

Spring. 4 credits. Next offered 2008–2009. R. Boyd.

For description, see PHIL 481.]

Science, Technology, and Public Policy**S&TS 281(2811) Science in Western Civilization (also HIST 281[2810]) # (HA-AS)**

Fall. 3 credits. P. Dear.

For description, see HIST 281.

S&TS 282(2821) Science in Western Civilization (also HIST 282[2820]) # (HA-AS)

Spring. 4 credits. S. Seth.

For description, see HIST 282.

S&TS 324(3241) Environment and Society (also D SOC 324[3240]) (SBA-AS)

Fall and spring. 3 credits. Fall, C. Geisler; spring, G. Gillespie.

For description, see D SOC 324.

S&TS 331(3311) Environmental Governance (also B&SOC 331[3311], NTRES 331[3310]) (CA-AS)

Spring. 3 credits. S. Wolf.

For description, see NTRES 331.

S&TS 343(3431) Biotechnology and the Economy (also B&SOC 343[3431])

Fall. 4 credits. J. Reppy.

In the 30 years since Genetech was founded to exploit recombinant DNA technologies, the biotechnology industry has grown to be a multi-billion dollar industry, employing perhaps 800,000 workers (not to mention the trillions of microbial "workers" in some industrial applications). This course will survey the industry, with particular attention to biomedical applications. Topics will include the historical emergence of biotechnology as a separate industry in government statistics and popular discourse, the role of venture capital and small firms in industry growth, links to universities, intellectual property rights, and regulatory issues. The focus will be on the U. S. industry in the context of globalized economy. Readings include case studies, government reports, and background readings in innovation studies and emerging technologies.

S&TS 352(3521) Science Writing for the Mass Media (also COMM 352[3520])Fall and summer. 3 credits. L. Levitan and staff. *Students who take S&TS 352 may not receive credit for COMM 260 or 263.*

For description, see COMM 352.

[S&TS 357(3571) Engineering in American Culture (also ENGRG 357[3570], AM ST 356[3570], HIST 357[3570])]

Fall. 4 credits. Offered alternate years; next offered 2008–2009. R. Kline.

For description, see ENGRG 357.]

S&TS 360(3601) Ethical Issues in Engineering (also ENGRG 360[3600])

Spring. 3 credits. P. Doing.

For description, see ENGRG 360.

[S&TS 391(3911) Science in the American Polity, 1960 to Now (also GOVT 309[3091], AM ST 389[3911]) (SBA-AS)]

Spring. 4 credits. Next offered 2008–2009.

S. Hilgartner.

Reviews the changing political relations between science, technology, and the state in America from 1960 to the present. It focuses on the politics of choices involving science and technology in a variety of institutional settings, from Congress to courts and regulatory agencies. The tensions and contradictions between the concepts of science as an autonomous republic and as just another special interest provide a central theme for the course. Topics addressed include research funding, technological controversies, scientific advice, citizen participation in science policy, and the use of experts in courts.]

[S&TS 401(4011) Genomics and Society (also NS 401[4010])]

Fall. 3–4 credits. Taught in Washington, D.C. D. Pelletier.

For description, see NS 401.]

S&TS 407(4071) Law, Science, and Public Values (also B&SOC 407[4071]) (SBA-AS)

Spring. 4 credits. M. Lynch.

Examines problems that arise at the interface of law and science. These problems include the regulation of novel technology, the role of technical expertise in public decision-making, and the control over scientific research. The first part of the course covers basic perspectives in science and technology studies (S&TS) and how they relate to legal decisions and processes. The second part covers a series of examples and legal cases on the role of expert judgments in legal and legislative settings, intellectual property considerations in science and medicine, and legal and political oversight of scientific research. The final part examines social processes and practices in legal institutions, and relates these to specific cases of scientific and technological controversy. Lectures and assignments are designed to acquaint students with relevant ideas about the relationship between legal, political, and scientific institutions, and to encourage independent thought and research about specific problems covered in the course.

[S&TS 411(4111) Knowledge, Technology, and Property (SBA-AS)]

Spring. 4 credits. Prerequisite: one course in science and technology studies. Next offered 2008–2009. S. Hilgartner.

Should the human genome be treated as private property or a public resource? How should copyright be managed in the digital environment of the Internet? Is music "sampling" high-tech theft or artistic expression? Does bioprospecting represent an enlightened strategy for preserving biodiversity or a post-colonial means for transferring resources from the developing world to the North? Debate about the nature and scope of intellectual property is an increasingly salient feature of contemporary politics. This course examines the ownership of knowledge and technology, exploring fundamental tensions that intellectual property systems express and incompletely reconcile. Perspectives from science and technology studies, sociology, law, and economics inform the course. Case studies explore the construction of property in contexts ranging from the early history of copyright to the ownership of life forms, airwaves, algorithms, artistic content, electronic databases, and the personal identities of celebrities.]

[S&TS 412(4101) Science, Technology, and Culture (also COM L 410[4100]) (CA-AS)]

Fall. 4 credits. Next offered 2008-2009.
A. Banerjee.

For description, see COM L 410.]

S&TS 429(4291) Politics of Science (also GOVT 429[4293])

Fall. 4 credits. R. Herring.

For description, see GOVT 429.

S&TS 433(4331) International History of Science # (HA-AS)

Spring. 4 credits. M. Rossiter.

Survey of the major scientific events and institutions in several foreign nations, including developing countries. Covers the period 1660 to the present and gives some attention to who in each country becomes a scientist, who rises to the top, and who emigrates. Weekly readings and a research paper.

S&TS 434(4341) Science and Empire: The Case of Britain and India

Spring. 4 credits. J. Ratcliff.

What is the historical relationship between global politics and science? This is a subject of volatile debate; it raises difficult questions about the perceived superiority of Western systems of knowledge, and it invites the more fundamental question of what is meant by Western science. Within science studies these are long-standing issues, but their scope has recently begun to change as new resources and perspectives from postcolonial regions are brought to the table. This course will examine the current literature on one specific case: the role of science, technology and medicine in the historical development of relations between Britain and India. We will take the long view, covering the medieval era to the present.

S&TS 444(4441) Historical Issues of Gender and Science (also FGSS 444[4440]) (CA-AS)

Spring. 4 credits. Not open to freshmen.
M. Rossiter.

For description, see "Life in Its Environment" theme.

S&TS 466(4661) Public Communication of Science and Technology (also COMM 466[4660])

Spring. 3 credits. Limited to 15 students.
Offered even-numbered years.

B. Lewenstein.

For description, see COMM 466.

[S&TS 468(4681) Understanding Innovation (HA-AS)]

Fall. 4 credits. Next offered 2008-2009.
J. Reppy.

Ideas about innovation occupy a central place in any description of our era, whether the topic is economic growth, military power, or globalization. The course will explore different ways of understanding the innovation process, the institutions and practices that are meant to foster innovation, and the issues that governments face when they seek to regulate innovations. We will read across a range of literature in economics, history, and science and technology studies.]

[S&TS 471(4711) The Dark Side of Biology: Biological Weapons, Bioterrorism, and Biocriminality (also B&SOC 471[4711]) (SBA-AS)]

Fall. 4 credits. Next offered 2008-2009.
K. Vogel.

For description, see B&SOC 471.]

S&TS 287(2871) Evolution (also BIOEE 207[2070], HIST 287[2870]) (PBS)

Fall. 3 credits. W. Provine.

For description, see BIOEE 207.

S&TS 301(3011) Life Sciences and Society (also B&SOC 301[3011]) (SBA-AS)

Spring. 4 credits. J. Crane.

For description, see B&SOC 301.

S&TS 311(3110) Sociology of Medicine (also SOC 313[3130]) (SBA-AS)

Fall. 4 credits. Not open to freshmen.

C. Leuenberger.

This course provides an introduction to the ways in which medical practice, the medical profession, and medical technology are embedded in society and culture. We will ask how medicine is connected to various sociocultural factors such as gender, social

class, race, and administrative cultures. We will examine the rise of medical sociology as a discipline, the professionalization of medicine, and processes of medicalization and demedicalization. We will look at alternative medical practices and how they differ from and converge with the dominant medical paradigm. We will focus on the rise of medical technology in clinical practice with a special emphasis on reproductive technologies. We will focus on the body as a site for medical knowledge, including the medicalization of sex differences, the effect of culture on nutrition and eating disorders such as obesity and anorexia nervosa. We will also read various classic and contemporary texts that speak to the illness experience and the culture of surgeons, hospitals, and patients and we will discuss various case studies in the social construction of physical and mental illness.

S&TS 324(3241) Environment and Society (also D SOC/SOC 324[3240]) (SBA-AS)

Fall and spring. 3 credits. Fall, C. Geisler; spring, G. Gillespie.

For description, see D SOC 324.

S&TS 331(3311) Environmental Governance (also B&SOC 331[3311], NTRES 331[3310]) (CA-AS)

Spring. 3 credits. S. Wolf.

For description, see NTRES 331.

[S&TS 409(4091) From the Phonograph to Techno (also SOC 409[4090]) (SBA-AS)]

Spring. 4 credits. Next offered 2008-2009.
T. Pinch.

In this seminar, we treat music and sound and the ways they are produced and consumed as sociocultural phenomena. We specifically investigate the way that music and sounds are related to technology and how such technologies and sounds have been shaped by and have shaped the wider society and culture of which they are a part. We look at the history of sound technologies like the phonograph, the electronic music synthesizer, samplers, and the Sony walkman. Our perspective is drawn from social and cultural studies of science and technology. Students are encouraged to carry out a small original research project on their own favorite sound technology.]

[S&TS 411(4111) Knowledge, Technology, and Property (SBA-AS)]

Spring. 4 credits. Prerequisite: one course in science and technology studies. Next offered 2008-2009. S. Hilgartner.

For description, see S&TS 411, "Science, Technology, and Public Policy" theme.]

[S&TS 412(4101) Science, Technology, and Culture (also COM L 410[4100]) (CA-AS)]

Fall. 4 credits. Next offered 2008-2009.

A. Banerjee.

For description, see COM L 410.]

S&TS 415(4151) Environmental Interventions (also S HUM 415)

Fall. 4 credits. Limited to 15 students.

P. Sengers

For description, see S HUM 415.

S&TS 417(4171) Science, Religion, and the Humanities since Darwin (also S HUM 450)

Spring. 4 credits. G. Ortolano.

This seminar considers a series of episodes in which the dichotomy between science and religion has been contested and defended.

Topics will include debates about Darwinian evolution, Victorian education, animal experimentation, Christian fundamentalism, literary Modernism, "two cultures" quarrelling, and sociobiology. The approach here will be contextual and historical, with a primary goal in each case being to identify and discuss the rhetorical strategies that have been available to advocates and critics of scientific authority. The focus will primarily fall on debates and developments within Britain, with some consideration of the American context, but the issues and problems considered are likely to interest to students of scientific authority, cultural politics, and the public culture more generally.

S&TS 422(4221) New York Women (also HIST 445[4450], FGSS 422[4220]) (HA-AS)

Fall. 4 credits. Limited to 15 students
M. Rossiter.

Over the centuries New York State has been the site of activity for a great many women of consequence. This course is a one-semester survey of the past and present activities and contributions of rural and urban women in a variety of fields of interest to Cornell students—politics, medicine, science, the law, education, business (including hotels), entertainment, communications, government, labor, religion, athletics, the arts and other areas. Weekly readings and discussion and a paper, possibly using local or university archives.

S&TS 424(4241) Medicine, Science, and the Body in Postcolonial Africa

Spring. 4 credits. J. Crane.

Growing attention to the global AIDS epidemic and the rise of "global health sciences" programs in the West have recently made health and medicine in Africa a topic of growing interest in international health. At the same time, inequalities in access to resources and education mean that African researchers often remain at the periphery of scientific knowledge production in global health. This course examines current issues surrounding biomedical practice and research in Africa, paying particular attention to colonial histories, postcolonial power relations, and the role of African clinicians and scientists in shaping health care and medical knowledge.

[S&TS 431(4311) From Surgery to Simulation (SBA-AS)]

Spring. 4 credits. Next offered 2008–2009.
R. Prentice.

For description, see "Minds and Machines."

S&TS 444(4441) Historical Issues of Gender and Science (also FGSS 444[4440]) (CA-AS)

Spring. 4 credits. Not open to freshmen.
M. Rossiter.

A one-semester survey of women's role in science and engineering from antiquity to the 1980s, with special emphasis on the United States in the 20th century. Readings include biographies and autobiographies of prominent women scientists, educational writings and other primary sources, and recent historical and sociological studies. By the end of the semester, students attain a broad view of the problems that have faced women entering science and those that still remain.

S&TS 447(4471) Seminar in the History of Biology (also B&SOC 447[4471], HIST 415[4150], BIOEE 467[4670]) (PBS)

Summer and fall. 4 credits. Limited to 18 students. S-U or letter grades. W. Provine and G. Gorman.

For description, see BIOEE 467.

[S&TS 471(4711) The Dark Side of Biology: Biological Weapons, Bioterrorism, and Biocriminality (also B&SOC 471[4711]) (SBA-AS)]

Fall. 4 credits. Next offered 2008–2009.
K. Vogel.

For description, see B&SOC 471.]

S&TS 495(4951) Social Studies of the Human Sciences (CA-AS)

Fall. 4 credits. C. Leuenberger.

Explores how the human and social sciences have provided the knowledge and categories we use to make sense of people and their behavior. Looking across a range of disciplines—including sociology, psychology, psychiatry, and economics—the course examines how human beings have become objects of scientific investigation. Discusses the rise of the human sciences and their role in politics, culture, and society.

S&TS 496(4961) Medicine and Healing in China (also HIST 496[4960], B&SOC 496[4961], ASIAN 469[4469]) # @ (HA-AS)

Spring. 4 credit. T. Hinrichs.

For description, see HIST 496.

Independent Study

S&TS 399(3991) Undergraduate Independent Study

Fall, spring. 1–4 credits. No more than 8 hours total of independent study (not including honors) can count toward S&TS major. Prerequisite: permission of instructor.

More information and applications available in 306 Rockefeller Hall.

S&TS 499(4991/4992) Honors Project

Fall and spring (yearlong)*. Prerequisite: senior S&TS students by permission of department; overall Cornell cumulative GPA of 3.00 and 3.30 cumulative GPA in courses taken for major. Apply in 306 Rockefeller Hall.

Students admitted to the honors program are required to complete two semesters of honors project research and to write an honors thesis. The project must include substantial research, and the completed work should be of wider scope and greater originality than is normal for an upper-level course. The student must find a project supervisor and a second faculty member willing to serve as faculty reader; at least one of these must be a member of the S&TS department.

*Students must register for total credits desired for the whole project each semester (e.g., 8 credits for the fall semester and 8 credits for the spring semester). After the fall semester, students will receive a letter grade of "R" for the first semester with a letter grade for both semesters submitted at the end of the second semester whether or not they complete a thesis, and whether or not they are recommended for honors. Minimally, an honors thesis outline and bibliography should be completed during the first semester. In consultation with the advisors, the director of undergraduate studies will evaluate whether

the student should continue working on an honors project. Students should note that these courses are to be taken in addition to those courses that meet the regular major requirements. If students do not complete the second semester of the honors project, they must change the first semester to independent study to clear the "R" and receive a grade. Otherwise, the "R" will remain on their record and prevent them from graduating.

Graduate Seminars

[S&TS 626(6261) Seminar in the History of Technology (also HIST 619[6190])]

Spring. 4 credits. Next offered 2008–2009.
R. Kline.

Exploration of the history of technology in Europe and the United States from the 18th century to the present. Typical topics include the industrial revolution in Britain, the emergence of engineering as a profession, military support of technological change, labor and technology, the "incorporation" of science and engineering, technological utopias, cultural myths of engineers and inventors, social aspects of urbanization in the city and on the farm, post-war consumerism, and gender and technology. The interests of students and recent literature in the field are considered in selecting the topics for the seminar.]

[S&TS 627(6271) Making People Through Expert Knowledge]

Spring. 4 credits. Next offered 2009–2010.
C. Leuenberger.

This seminar explores how the human and social sciences have provided the knowledge and categories we use to make sense of human beings and their behavior. Looking across a range of disciplines—including sociology, psychiatry, psychology, psychoanalysis, anthropology, and economics—we will look at how human beings have become objects of scientific investigation. We will focus on how culture, politics, and the professional environment impact the human sciences and how the use of rhetoric constitutes academic discourse. We will also focus on the social scientific construction of selves, sex, gender, and race.]

[S&TS 628(6281) Self and Society]

Fall. 4 credits. Next offered 2008–2009.
C. Leuenberger.

How has the self become a political, scientific, and cultural project caught up in the ideological battles of modern times? What roles do cultural institutions, politics and science play in making human beings visible, understandable, and treatable? Students in this course will read and discuss texts at the intersection of sociology, cultural studies, history of the human and behavioral sciences, and science and technology studies that treat the self as a social construction. The course focuses on how culture, politics, science, as well as bureaucratic and economic imperatives help shape modern and postmodern conceptions of the self.]

[S&TS 630(6301) Social Theory for Science Studies]

Fall. 4 credits. Next offered 2009–2010.
R. Prentice.

Sociologist C. Wright Mills challenged his readers to develop their "sociological imaginations" to understand the social and historical forces at work in seemingly individual events, such as the receipt of a pink slip, a draft card, or a drug prescription. Within

science and technology studies, scholars have documented how social issues can become scientific, technological, or medical, often appearing to leave the social realm altogether to become biological, technical, or pathological. The best social constructivist work in Science and Technology Studies reveals how scientific, technological, and medical worlds are thoroughly social; that is, theories of social structure and action underpin the best empirical work in the field. This course introduces graduate students to classic texts and concepts in social theory with a focus on applying such theories to empirical research in science, technology, and medicine. It will consider major thinkers and schools of social thought, such as Marx, Weber, Durkheim, Mannheim, Foucault, and the Frankfurt School. It will also consider how a nuanced interplay of theory and empirical data can bring critically important insights to both theoretical and empirical understandings of the world.]

S&TS 631(6311) Qualitative Research Methods for Studying Science (also SOC 631[6310])

Spring. 4 credits. P. Doing.

Much has been learned about the nature of science by sociologists and anthropologists donning lab coats and studying scientists in action. This course looks at the methods used in this new wave of science studies. Examines what can be learned by interviewing scientists, from videos, and from detailed examinations of scientific texts. Students gain hands-on experience by conducting a mini-project in which they investigate some aspect of scientific culture.

S&TS 632(6321) Inside Technology: The Social Construction of Technology (also SOC 632[6320])

Spring. 4 credits. T. Pinch.

Rather than analyze the social impact of technology upon society, this course investigates how society gets inside technology. In other words, is it possible that the very design of technologies embody assumptions about the nature of society? And, if so, are alternative technologies, which embody different assumptions about society, possible? Do engineers have implicit theories about society? Is technology gendered? How can we understand the interaction of society and technology? Throughout the course the arguments are illustrated by detailed examinations of particular technologies, such as the ballistic missile, the bicycle, the electric car, and the refrigerator.

[S&TS 634(6341) Information Technology in Sociocultural Context

Fall. 4 credits. Next offered 2009–2010.

P. Sengers.

Analyzes information technology using historical, qualitative, and critical approaches. Discusses questions such as: In what ways is information technology—often portrayed as radically new—actually deeply historical? How do information technologies represent and intervene in debates and struggles among people, communities, and institutions? How is the design of information technology tools entangled in the realms of law, politics, and commerce? In what ways are the social consequences of information technologies produced as much by the claims we make about the technologies as about the raw functionality of the tools themselves? This course investigates these issues through the lenses of long-standing debates and current controversies.]

[S&TS 640(6401) Science, Technology, Gender: Historical Issues (also FGSS 640[6400], HIST 641[6410])

Spring. 4 credits. Next offered 2008–2009.
S. Seth.

Explores five, often interrelated, aspects of the literature on gender, science, and technology: (1) The historical participation of women (and men) in scientific work, (2) the embodiment of scientific, medical and technical knowledge, (3) the scientific construction of sexuality, (4) the gendering of technological systems and artifacts, and (5) feminist critiques of scientific knowledge. Examines the origins of modern western science in the scientific revolution, considering the claim that “science,” by its very nature, is an androcentric enterprise. The rise of scientific and medical disciplines and professions in the 19th century provides a focus for discussions of the systematic exclusion of women from the production of scientific knowledge at precisely the point that women’s bodies become the object of intensive scientific study. Drawing on a range of material, the course considers the construction of homosexual and intersexual individuals in scientific discourse. In later weeks, it discusses so-called “postmodernist” critiques of science, and debates the possibilities for “feminist science.”]

[S&TS 645(6451) The New Life Sciences: Emerging Technologies, Emerging Politics (also GOVT 634[6349])

Fall. 4 credits. Next offered 2009–2010.

S. Hilgartner.

The new life sciences (including genetics, genomics, and biotechnology) are highly controversial areas of emerging science and technology. They inspire both hope and anxiety, and are a source of ongoing conflicts. This course will examine the politics of the new biology, both to consider the issues in their own right and to examine the relationships among science, technology, and politics. In particular, the course will focus on three themes—the politics of property, the politics of identity, and the politics of risk—as they pertain to the emerging technologies of life. Topics may include the social shaping biological research; eugenics and genetics; genomic medicine; risk; commercial biotechnology; university-industry relationships; social movements; North-South issues; the Human Genome Project; genetics and race; intellectual property; the debate over human cloning; and the capacity of contemporary societies to manage emerging technologies.]

S&TS 680(6801) Historical Approaches to Science (also HIST 680[6800])

Fall. 4 credits. Prerequisite: graduate standing.

P. Dear.

Examines philosophical, sociological, and methodological dimensions of recent historiography of science. For description, see HIST 680.

[S&TS 681(6811) Philosophy of Science (also PHIL 481[4810], S&TS 481[4811])

Fall. 4 credits. Next offered 2008–2009.

R. Boyd.

For description, see PHIL 681.]

[S&TS 693(6931) Economics Meets Science Studies

Fall. 4 credits. Next offered 2008–2009.

J. Reppy.

Covers a variety of possible interactions between the disciplines of economics and

science and technology studies. Some economists are interested in science and technology as important components in economic growth, while scholars in science studies often appeal to economic motives and institutions to explain behavior in the production of scientific and technological knowledge. This course explores ways in which economics can provide new questions and theoretical approaches for science and technology studies. From another perspective, economics, as the most “scientific” of the social sciences, is itself a subject for study. Internal critiques by economists are compared to external analyses in the science studies literature. Readings include works on the epistemology and use of rhetoric in economics and on the “new economics of science,” and examples of the use of economic analysis in the science studies literature.]

S&TS 700(7001) Special Topic 1: Science Studies and the Politics of Science

Fall. 4 credits. Prerequisites: S&TS 711 or permission of instructor.

M. Rossiter.

Theoretical developments in science and technology studies have called attention to the contingent and socially embedded character of both knowledge claims and technological systems. Drawing on literature from several disciplines, this seminar explores the consequences of these findings for social and political studies of science. Issues and problems considered include trust and skepticism, political and legal agency, reflexive institutions, relativism and social action, science and norms, and the co-production of knowledge and social order.

[S&TS 700(7002) Special Topic 2: Technology Transfer Issues

Fall. 4 credits. Next offered 2009–2010.

J. Reppy.

The goal of this course is to develop a coherent analytical framework for analyzing technology transfer, using insights from economics, sociology, history, and science and technology studies, and to employ that framework to evaluate current policy issues. Studies the process of technology transfer in different contexts, ranging from intra-firm and intra-industry to technology transfer between civil and military sectors, and between industrialized and less-industrialized countries. The readings include a mix of theoretical writings and case studies.]

[S&TS 700(7003) Special Topic 3: Issues in the Social and Cultural History of Technology

Spring. 4 credits. Next offered 2009–2010.

R. Kline.

This seminar focuses on different issues in the social and cultural history of technology each semester. Typical issues include Gender and Technology, Rethinking Technological Determinism, Was there an Information Revolution?, Consumerism, and the Military and Technology in the United States. Students read and discuss exemplary books and articles on a topic for the first half of the course, then give presentations on their research papers.]

S&TS 711(7111) Introduction to Science and Technology Studies (also HIST 711[7110])

Fall. 4 credits. M. Lynch and S. Pritchard.

Provides students with a foundation in the field of science and technology studies. Using classic works as well as contemporary exemplars, seminar participants chart the

terrain of this new field. Topics for discussion include, but are not limited to: historiography of science and technology and their relation to social studies of science and technology; laboratory studies; intellectual property; science and the state; the role of instruments; fieldwork; politics and technical knowledge; philosophy of science; sociological studies of science and technology; and popularization.

[S&TS 720(7201) Emerging Technologies

Spring. 4 credits. Prerequisite: graduate students in social sciences, sciences, and humanities. Next offered 2008–2009.

S. Hilgartner and B. Lewenstein.

Examines the peculiar speculative world of emerging technologies—a social and technical “space” found at the edges of expanding technological systems, where new technologies are being most actively constructed and transformed. In this dynamic world, emerging technologies exist in a state of flux as a mixture of blueprint and hardware, plan and practice, the nearly online and the almost obsolete, surrounded by speculation and speculators, who make often-contested claims about their promises, perils, and possibilities. Among the characteristics of this space are: the frequent appearance of unverifiable claims about technologies that have yet to materialize; an entrepreneurial drive for commercial implementation; ongoing institutional innovation; frequent public controversies; and problems of political legitimacy. The course examines the epistemic, discursive, institutional, and political dimensions of emerging technologies in an effort to understand the social worlds that shape technological change.]

[S&TS 721(7211) Archiving Contemporary Science

Spring. 4 credits. Next offered 2009–2010. B. Lewenstein.

Methodology course exploring the conceptual and practical issues associated with creating archives of science “as it happens.” Readings focus on issues in historiography of contemporary science and on issues in contemporary archiving. Practical examples are drawn from several Cornell-based archives (on cold fusion, on the role of science in the O. J. Simpson trial, on the “Y2K bug,” and on voting technologies in the 2000 presidential election.)

Independent Study

S&TS 699(6991) Graduate Independent Study

Fall or spring. 2–4 credits. Permission of department required.

Applications and information are available in 306 Rockefeller Hall.

SCIENCE OF EARTH SYSTEMS

See “Department of Earth and Atmospheric Sciences.”

SERBO-CROATIAN

See “Department of Russian.”

SINHALA (SINHALESE)

See “Department of Asian Studies.”

SOCIETY FOR THE HUMANITIES

Brett de Bary, Director

Fellows for 2007–2008

Max Cavitch (University of Pennsylvania)

Safaa Fathy

Mariá Antonia Garcés (Cornell University)

Wendy Jones (Cornell University)

Charles Kronengold (Wayne State University)

Dominick LaCapra (Cornell University)

Jeffrey Mantz (George Mason University)

Barry Maxwell (Cornell University)

Chris Nealon (University of California, Berkeley)

Simone Pinet (Cornell University)

Rachel Prentice (Cornell University)

Denise Riley (University of East Anglia)

Phoebe Sengers (Cornell University)

C. J. Wan-ling Wee (Nanyang Technological University)

Meg Wesley (University of California, San Diego)

The Society annually awards fellowships for research in the humanities. The fellows offer, in line with their research, informal seminars intended to be exploratory or interdisciplinary. These seminars are open to graduate students, suitably qualified undergraduates, and interested auditors. The theme for 2007–2008 is “Improvisation.”

S HUM 404 The Task of the Cleric (also SPAN 404, COM L 406.01)

Fall. 4 credits. Limited to 15 students.

S. Pinet.

This seminar will explore three main topics—translation, cartography, and economy—through two 13th-century Spanish works of *mester de clerecía*, the *Libro de Alexandre*, and the *Libro de Apolonio*. While all of these are decidedly Spanish (Castilian) works, their obvious links to a general Western European romance and epic tradition offer ample opportunity to reflect on questions of sources, authority, originality, as well as the close analysis of the practices that reveal developments—especially in the visual arts, politics, and economy—contemporary to their composition. Readings will include a variety of theoretical materials on translation, space/place, cartography, and political economy by authors such as Michel de Certeau, Marcel Mauss, Paul Zumthor, George Steiner, Walter Benjamin, and Fredric Jameson, among others.

S HUM 408 Improvisational Economies (also ANTHR 407)

Fall. 4 credits. Limited to 15 students.

J. Mantz.

This course will examine how labor has been transformed by the digital age and the extent to which the concept requires reconceptualization. In particular, this course is concerned with the ways in which global economies disorganize labor, and the methods that laborers use to humanize the labor process and infuse work with meaning.

S HUM 415 Environmental Interventions (also S&TS 415, INFO 415, VISST 415)

Fall. 4 credits. Limited to 15 students.

P. Sengers.

This course explores the environment as a scene and technology design as a tool for improvisational political action. We will trace the work of artists, designers, and programmers who are expanding the role of information technology (IT) from a modernist tool for representing and controlling the environment to an open-ended medium for situated consciousness-raising, networking, and reflecting about the environment. We will analyze the cultural and political issues involved with the environment and their potential for IT-based interventions using a variety of on-the-ground strategies. The course will include a collaborative group project leveraging students from different disciplinary backgrounds to develop an environmental intervention of their own. No experience with computers or other technologies is required.

S HUM 416 Poetry and Totality (also COM L 406.02, ENGL 407.01)

Fall. 4 credits. Limited to 15 students.

C. Nealon.

For centuries, the humanities have offered “poetry” as the metaphor for what distinguishes them from the sciences. In this metaphor, “poetry” is meant to indicate an illuminating totality of experience, a kind of knowledge that gives you a holistic understanding of the world. But from the time of the Cold War, “totality” has come to be seen as a figure for totalitarianism, or for the shutting-down of open-ended, ongoing experience. Both ideas about totality are deeply ingrained in contemporary poetry, though they are contradictory. How do contemporary poets navigate this contradiction? To answer this question, we will read a variety of recent and contemporary poetry, as well as theories of totality, including Agamben, Arrighi, Debord, Hardt and Negri, Jameson, Postone, Shutt, and Zizek.

S HUM 418 On the Inner Voice (also COM L 406.03, ENGL 407.03, FREN 418, COGST 418)

Fall. 4 credits. Limited to 15 students.

D. Riley.

Is the “inner voice” spontaneous, imposed, or a dictated improvisation? We shall be reflecting on this topic (in its poetic, but more often in its extra-literary incarnations) via readings in phenomenology, the history of aphasiology and the history of consciousness, recent developments in neurology, and in philosophies of language and of the self. The emphasis will range from theories of the inner voice’s location, to its vulnerability or durability. Detailed readings will be suggested on a weekly basis, as the course evolves.

S HUM 419 Imagining Contemporary Asia (also ENGL 407.02, ASIAN 423)

Fall. 4 credits. Limited to 15 students.

W. Wee.

This seminar will examine the emerging cultural imagining of an Asian Modern in the realms of cultural identity and production. Theoretical and historicized readings will range widely and include Arjun Appadurai, Chen Kuan-Hsing, Sun Ge, Wang Hui, Koichi Iwabuchi, and Fredric Jameson. The seminar will also look at various “high” and “mass cultural” productions from East Asia that have arisen since the 1990s.

S HUM 420 Bodies in Medicine and Culture (also S&TS 402, FGSS 425, B&SOC 402)

Spring. 4 credits. Limited to 15 students.
R. Prentice.

Every day we are barraged with cultural messages telling us to eat better, get more exercise, stop smoking, practice safe sex. These messages make us insecure about our bodies: Am I thin enough, ripped enough, sexy enough? They are also contradictory: Fish makes you smarter, mercury in fish makes you sick. Many of these messages use the language of science and medicine: There are obesity "epidemics" and chocolate "addictions." Our bodies are described and treated like machines: transplant surgeons talk about our "spare parts"; computer programmers describe their brains as "wetware." Our sense of our bodies may feel improvised, created on the fly from a collage of scientific, medical, cultural, and advertising snapshots. This course draws from literature in science and technology studies, anthropology, and feminist and gender studies to examine how bodies emerge from the shifting lessons of science, technology, and medicine, as well as how cultural and political concerns express themselves in and through bodies.

S HUM 421 Cutting and Film Cutting (also COM L 411.03, FGSS 426)

Spring. 4 credits. Limited to 15 students.
S. Fathy.

This course will consist of comparative analysis of films on female and male genital cutting. The deconstruction of the cinematographic discourse will be dealt with on both thematic and technical levels. Theoretical references will include Derrida's *Circonfession* along with works by Freud, Jean-Luc Nancy, etc.

S HUM 423 Futures of American Poetry (also AM ST 402, ENGL 408.01)

Spring. 4 credits. Limited to 15 students.
M. Cavitch.

A broad-based introduction to American poetry, from the beginnings of English settlement to the early 20th century. We'll eschew historical determinism and concentrate instead on the uncertain and dynamic futures that American poetry anticipates and helps bring into being. In other words, we'll be reading forward rather than backward, paying special attention to how all sorts of futures—improvisatory scenarios of desire, audience, vision, prophecy, exhortation, novelty, anxiety, mortality, transmission, and transcendence—get figured in and for American poetry by a wide range of authors.

S HUM 424 The Mediterranean and Cervantes (also SPAN 434, NES 449, HIST 429, COM L 411.01)

Spring. 4 credits. Limited to 15 students.
M. Garcés.

This course concentrates on the twin themes of cultural exchanges and cultural frontiers in the early modern Mediterranean, where the writer Miguel de Cervantes played an important role. We will explore contacts between Muslims and Christians in literary texts emerging from Granada, Algiers, Sicily, Cyprus, and Istanbul in the 16th and 17th centuries. Particular attention will be paid to the improvisation of identities promoted by the "renegades"—Christians who converted to Islam and fled to Ottoman territories. Course readings will include chronicles on the Guerra de Granada (1568–1570); English and Spanish reports of captivity; plays and novels by

Calderón, Cervantes, Marlowe, and Shakespeare, as well as accounts of life in Algiers and Istanbul by Antonio de Sosa and Busbecq. Reading knowledge of Spanish is highly recommended.

S HUM 425 Cerebral Seductions (also ENGL 408.02, COM L 411.02, COGST 425, FREN 423)

Spring. 4 credits. Limited to 15 students.
W. Jones.

Quick quiz: what's the most important sexual organ for humans? The brain, of course! Cerebral Seductions concerns both sex and the brain in various ways. We will explore the emergent field of cognitive literary theory and criticism, reading the work of cognitive critics (e.g., Hogan, Richardson, and Zunshine) and cognitive scientists (e.g., Damasio, Gazzaniga), while also considering the ways that other types of literary theory (historicist, poststructuralist, psychoanalytic) might be incorporated within a cognitive framework. With this approach in mind, we will read texts within a literary tradition that recognized—right from the start—the cerebral element in human sexuality: the libertine tradition in 18th-century England and France. Authors will include Rochester, Behn, Richardson, Laclós, de Sade, Austen, and others.

S HUM 426 Modernity and Critique (also COM L 454, ENGL 408.03, ART H 416)

Spring. 4 credits. Limited to 15 students.
B. Maxwell.

Modernity: the condition of life attendant on the massive dislocations commencing with the process defined by Marx as the "primitive accumulation" of capital. As the psychogeographic regime of "transcendental homelessness" (Lukács), as an "exploded picture puzzle" (Bloch), modernity provoked critical examinations by Marxist and anarchist thinkers, extraordinary often in their insight and often enough in their blindness to the world beyond Europe. Surrealism arguably breached the self-enclosure of European radical thought and met a world of anger and analysis speaking its own languages of critique: Césaire, Fanon. The subsequent work of Debord, Vaneigem, and others of the Situationist International shows both the ruins of the earlier projects and important means for living critically in and against our moment. These matters are what we will study.

S HUM 428 Sensing Thinking (also ENGL 408.04)

Spring. 4 credits. Limited to 15 students.
C. Kronengold.

This course explores how the activity of thinking is depicted and embodied in a variety of late-modern artistic practices. We will move across media and genres, studying examples of poetry, music, art, dance and film. The course begins from the premise that artworks convey the nature of thinking by showing us that thought relies upon the senses. We'll be particularly concerned to register modes of thought that lie beneath intellectual attention but above the level of preconscious body/brain responses, especially as these liminal modes work to establish relations between a self and its environment. At the center is the question of what it means to look for signs of thinking. How might we characterize the politics and the erotics of such a search?

S HUM 430 Epistemologies of U.S. Empire (also ENGL 408.05)

Spring. 4 credits. Limited to 15 students.
M. Wesling.

This course will consider how the struggle for imperial dominance has involved the production of various ways of knowing, where the conflicts over political, material, and geographical dominance rely upon and give rise to epistemological conflicts as well. We will begin the course with general concerns about the production of knowledge in relation to empire. First, we'll consider how the historical process of imperial expansion has been driven by the desire to document the colonial Other; from sources as disparate as travel narratives, ethnographies, census reports, photography displays, tour guides, and the like, part of the temptation of colonial expansion has been the consolidation of power through the production of knowledge, with these forms emerging as instruments of classification and subjugation, as well as ways of translating and relaying the evidence of cultural difference from colony to metropole and back again. The course will then turn to a more concrete example of this epistemological struggle, by looking closely at the production of knowledge surrounding the U.S. expansion into the Pacific and the Atlantic after 1898. We'll be looking at the surge of epistemological changes that mark the turn from the 19th to the 20th century in the U.S.: the emergence of the disciplines of Anthropology and of American literary study, the changing classification strategies for museum and library collections, the proliferation of photographic technology, and the great captivation with the displays at the Worlds Fairs are just a few of the interpretive shifts that accompany the U.S. entry into the global colonial stage. We'll consider as well, however, precisely how the logic of American exceptionalism called upon the interests of knowledge production as justification for its colonial expansion. Readings will include works by Michael Elliott, Carol Duncan, Inderpal Grewal, Caren Kaplan, Amy Kaplan, Renato Rosaldo, and Lisa Lowe, Frantz Fanon, Antonio Gramsci, Albert Memmi, Paolo Friere, Mary Louise Pratt, Dipesh Chakrabarty, and Gauri Viswanathan.

S HUM 450 Science, Religion, and the Humanities Since Darwin (also S&TS 417)

Spring. 4 credits. Limited to 15 students.
G. Ortolano.

S HUM 477 Improvising Across Disciplines (also HIST 477/677, COM L 477)

Fall. 4 credits. Limited to 15 students.
D. LaCapra.

How does one best understand the concept and practice of improvisation? How is it related to processes of repetition, displacement, conversion, trauma, and radical change? How does one situate the notion of creation ex nihilo, and does it refer to an improvisational form? Is cliché the opposite of improvisation or does a crucial form of improvisation involve the recycling and possible renewal of cliché? What is the differential role of improvisation in religion, philosophy, politics, literature, and historiography? Is improvisation a specifically human capacity, serving as another criterion to divide the human from the animal? In addressing these questions, the seminar will pay particular attention to the

(improvisational?) relation between the secular and the sacred, including the recent turn to the "postsecular" as well as the more or less "creative" return of political theology. Readings include Flaubert, Nietzsche, Beckett, Heidegger, Woolf, Kristeva, Derrida, Agamben, Badiou, and Zizek. Some attention will also be paid to the music of Art Tatum.

SOCIOLOGY

K. Weeden, chair (322 Uris Hall, 255-3820), M. Berezin, S. Correll, M. de Santos, D. Harris, D. Heckathorn, E. Hirsh, E. Lawler, M. Macy, P. McLaughlin, S. Morgan, V. Nee, S. Soule, D. Strang, R. Swedberg, S. Tarrow, S. Van Morgan, E. Wethington, Emeritus: S. Caldwell, B. C. Rosen

Sociology is the study of human social organization, institutions, and groups. The Department of Sociology offers courses in a number of key areas, including comparative sociology, culture, economy and society, family and the life course, gender inequality, political behavior and public policy, organizations, race and ethnicity, social inequality, social psychology and group processes, social and political movements, and social networks. A particular emphasis of the department is the linkage of sociological theory to issues of public concern such as ethnic conflict, drugs, poverty, and gender and race segregation. Interests of faculty members range from the study of interaction in small groups to the study of economic and social change in a number of different countries. The department offers the opportunity for students to develop fundamental theoretical insights and understanding as well as advanced research skills in quantitative and qualitative methods. Graduates of the department take up careers in university, government, and business settings, and enter professions such as law, management, and urban policy.

Sociology Courses for Nonmajors

Sociology provides students with particularly effective ways to understand the complexities of modern life. For many students, the undergraduate years are a last opportunity to gain the insights these fields have to offer. The Department of Sociology is continuing to design an array of beginning and advanced courses that convey a broad understanding of the methods and insights of sociological analysis—courses that is of particular interest to undergraduates who may not major in sociology. First- and second-year students should note that the introductory courses (101, 103, 105, and 115) focus on the sociological analysis of major issues of public life, and that a wide selection of general education courses is available at the 200 level. Advanced undergraduates who are majors in other fields should also see, in particular, descriptions of the 300- and 400-level courses, for which there are no prerequisites other than junior or senior standing.

Related Courses in Other Departments

Students interested in sociology should consult the course lists of the other social science departments in the College of Arts and Sciences (including Anthropology, Economics, Government, and Psychology) and of the following departments in other colleges: Organizational Behavior (School of Industrial

and Labor Relations), Human Development (College of Human Ecology), and Development Sociology (College of Agriculture and Life Sciences).

The Sociology Major

The Department of Sociology is one of the social science departments at Cornell with the highest national ranking. Faculty members are internationally recognized for their scholarly work, and have received numerous awards, research fellowships, and research grants.

The 20 professors currently in the department are dedicated to scholarly inquiry that is both methodologically rigorous and theoretically innovative. The breadth of their substantive interests and the variety of their methodological styles are well demonstrated in the different fields that are represented within the department. These include comparative societal analysis, culture, deviance and social control, education, economic sociology, family, gender, inequality, social networks, organizations, political sociology, public policy, race and ethnic relations, religion, science and technology, social movements, and social psychology.

Career Opportunities for Graduates

An undergraduate degree in sociology is one of the most popular degrees with employers. After engineering and computer science, sociology is the most able to place graduates into jobs immediately after completing their bachelor's degree. This is not altogether surprising, since sociology can lead to a rewarding career in any of the following fields:

- **government:** urban/regional planning, affirmative action, foreign service, human rights management, personnel management
- **research:** social research, consumer research, data analysis, market research, survey research, census analysis, systems analysis
- **criminal justice:** corrections, criminology assistance, police work, rehabilitation counseling, criminal investigation, parole management
- **teaching:** public health education, school admissions, college placement
- **community affairs:** occupational counseling, career counseling, public health administration, hospital administration, public administration, social assistance advocacy, fund-raising, community organizing, social work
- **business:** advertising, sales, project management, sales representation, market analysis, real estate management, journalism, public relations, insurance, human resource management, production management, labor relations, quality control management

A large number of sociology majors also go onto graduate school and obtain advanced (i.e., master's and Ph.D.) degrees in such varied fields as sociology, political science, philosophy, economics, and psychology. Many also complete professional degrees in education, law, medicine, social work, and business administration.

Requirements for the Major

In addition to the academic requirements established by the College of Arts and Sciences, students must also fulfill requirements toward a specified major. Ten courses are required in the sociology major. All courses toward the major must be taken for a letter grade, and students must maintain at least a 2.0 grade point average (GPA) while enrolled in the major. The five courses required for the major are divided into the following categories:

- SOC 101
- SOC 375
- two research methods courses (SOC 301 and 303)
- one advanced-level sociology course (400-level or higher)
- five additional (i.e., elective) courses in sociology

Declaring the Sociology Major

Students in the College of Arts and Sciences who wish to declare a major in sociology should do so as soon as possible. Students who are *not* currently in the College of Arts and Sciences need to be admitted to A&S *before* declaring the major. To declare the sociology major, students need to take the following steps:

- Obtain a **campus copy** of their transcript from Day Hall and bring it to the department office (316 Uris Hall).
- Obtain a sociology major packet from Susan Meyer, undergraduate assistant, during her office hours (316 Uris Hall). During the meeting, the student fills out a major declaration form.
- Leave this form and the transcript with the undergraduate assistant. The declaration will be reviewed by the director of undergraduate studies and sent on to the College of Arts and Sciences for official notification that the student has declared a major. Please allow two weeks for the declaration to be approved and entered into the campus computer.

A student file will be set up to maintain the student's records in the department. Once the students is officially recognized as a major in sociology, the Sociology Department will receive a copy of the transcript at the end of each semester, which will be kept in the student's file at 316 Uris Hall. Records are maintained until five years after graduation.

Academic Advising in Sociology

Cornell students are ultimately responsible for the policies, procedures, and requirements regarding their degree as stated in the current *Courses of Study*. After reading this document, students may find that they are still confused or unclear about some of the requirements, and may have questions and concerns that pertain to their individual situation. Several sources of academic assistance and advice are available.

College Advisor: Because sociology majors are students in the College of Arts and Sciences, college advisors are available by appointment in the Office of Undergraduate Admissions and Academic Advising (Goldwin Smith Hall). It is recommended that students consult with a college advisor sometime before their last semester to discuss the completion of college requirements, graduation, and residency requirements.

Undergraduate Program Coordinator: The undergraduate assistant (Susan Meyer) in the Department of Sociology is located in 316 Uris Hall. She is available to provide assistance with the following:

- the process of declaring the sociology major.
- information about transferring courses from other universities and/or other departments.
- other administrative matters or concerns (e.g., forms, adding and dropping courses).

Director of Undergraduate Studies: The director of undergraduate studies will:

- provide information about departmental curricula and the requirements for the major.
- meet with applicants to the major.
- review applications for sociology majors and accept students into the program.
- assist students in finding an advisor in the sociology department.
- screen sociology classes taken outside Cornell for acceptance as Cornell credit.
- serve as the backup for faculty advisors who are absent during advising periods.

Faculty Advising: Once a student is a declared sociology major, he or she is assigned a faculty advisor within the Sociology Department. The student is asked to name his or her preference for an advisor; however, if he or she is not sufficiently familiar with the program, the director of undergraduate studies can assist in selecting a faculty member. Faculty advisors are there to:

- discuss education, career goals, and graduate school opportunities.
- meet to talk about courses and plan your program of study within the department.
- go over the student's academic program each semester.

Sociology Peer Advisors: Approximately five advanced sociology majors serve as peer advisors in the department. These advisors change from year to year, but a complete list of their names and e-mail addresses is available from the undergraduate assistant in the sociology office (316 Uris Hall). Peer advisors do not provide academic counseling; they are there to help students adjust to life in the major, as well as to let them know about the department's many support services and activities.

Research Opportunities

Qualified sociology majors are invited to participate with faculty members in conducting research. Such projects are usually initiated in one of two ways: the student may offer to assist the faculty member in an ongoing project, or the student may request that the faculty member supervise the execution of a project conceived by the student. In either case, the student should enroll in SOC 491 Independent Study. Interested students may direct inquiries to any faculty member.

The Sociology Honors Program

Honors in sociology are awarded for excellence in the major, which includes overall GPA and completion of an honors thesis. In

addition to the regular requirements of the major, candidates for honors must maintain a cumulative GPA of at least a A- in all sociology classes, complete SOC 495 and 496 (in the senior year), and write an honors thesis.

Students are awarded either honors (*cum laude*), high honors (*magna cum laude*), or highest honors (*summa cum laude*) in the program based on the honors advisors' evaluation of the level and the quality of the work completed towards the honors thesis and the quality of the course work. The honors distinction will be noted on the student's official transcript and it will also be indicated on the student's diploma.

Admission to the Honors Program

To qualify for entrance into the honors program, students must have at least a B+ GPA overall and an A- GPA in the major. In addition, they must secure the permission of a faculty member in the Department of Sociology who will guide their honors thesis.

Students who wish to be considered for honors should apply to the director of undergraduate studies no later than the second semester of their junior year. Honors program application forms are available in 316 Uris Hall. The application must include a copy of the student's undergraduate transcript, a brief description of the proposed research project (due May 15), and the endorsement of a faculty member in the Sociology Department who will supervise the honors work (due September 15).

The Honors Thesis

During the senior year, each candidate for honors in sociology enrolls in a yearlong tutorial (SOC 495 and 496) with the faculty member who has agreed to serve as the student's thesis advisor. During the first semester of their senior year, students determine the focus of their honors thesis, and submit a 10- to 15-page overview (or, alternatively, a preliminary draft) of the thesis to their advisor. During the second semester, they complete their honors thesis and submit final copies to the department.

The text of the honors thesis may not exceed 60 pages except by permission of the honors advisor. Three copies of the honors thesis are due to the undergraduate assistant (316 Uris Hall) during the third week of April. Honors thesis preparation guidelines are available from the undergraduate assistant (316 Uris Hall).

Any honors candidate whose research directly involves working with human subjects must receive approval for the project from the Cornell University Committee on Human Subjects.

Introductory Courses

SOC 101(1101) Introduction to Sociology (SBA-AS)

Fall, spring. 3 credits. *Students may not receive credit for both SOC 101 and D SOC 101.* Staff.

Introduces students to the distinctive features of the sociological perspective, as opposed to psychological, historical, or economic approaches. First discusses the sociological perspective in the context of small groups and face-to-face interaction. As the course unfolds, the same perspective is applied to progressively larger social groupings, such as peer groups and families, formal organizations,

social classes, racial and ethnic groups, and nation states. This approach also provides new insights into such topics as deviance, gender inequality, culture, and lifestyles. Whenever possible, class lectures and discussions illustrate these themes by exploring contemporary social problems and developments, including the rise of Generation X (and Generation Y?), the sources of current racial tensions, and the gender gap in the workplace.

SOC 105(1105) Introduction to Economic Sociology (SBA-AS)

Fall. 3 credits. V. Nee.

Modern social thought arose out of attempts to explain the relationship between economic development and the social transformations that gave rise to the contemporary world. Classical theorists from Karl Marx and Max Weber to Karl Polanyi focused their writings on emergent capitalist economies and societies. Contemporary social theorists likewise have sought to understand the interaction between capitalism and the social forces reacting against and emerging from modern economic development. From exchange and rational choice theories to network analysis and institutional theory, a central theme in contemporary social thought has been the relationship between the economy and society, economic action and social structure, and rationality and fundamental social processes. This course provides an introduction to social thought and research seeking to understand and explain the relationship between economy and society in the modern era.

(SOC 115(1150) Utopia in Theory and Practice (SBA-AS)

Spring. 3 credits. Next offered 2008-2009. D. Strang.

People have always sought to imagine and realize a better society, with both inspiring and disastrous results. This course discusses the literary utopias of Moore, Morris, and Bellamy, and the dystopias of Huxley, Orwell, and Zamiatin. Also examines real social experiments, including 19th-century intentional communities, 20th-century socialisms and religious cults, and modern ecological, political, and millennial movements. Throughout, the emphasis is on two sociological questions: What kinds of social relationships appear as ideal? How can we tell societies that might work from those that cannot?

General Education Courses

SOC 202(2202) Population Dynamics (also D SOC 201[2010]) (CA-AS)

Spring. 3 credits. Staff.

For description, see D SOC 201.

(SOC 203(2203) Work and Family In Comparative Perspective (SBA-AS)

Fall. 4 credits. Next offered 2008-2009. Staff.

Family life is often portrayed in the popular media as a haven away from the harsh realities of public life, suggesting that work and family constitute separate and distinct spheres. By contrast, many sociologists point out the links between work and family, and how these links have different consequences for men and women. This course highlights the responses of individuals, employers, and governments, both in the United States and internationally, to the dilemmas posed by the interface between work and family.]

SOC 206(2206) International Development (also D SOC 205[2050]) (HA-AS)

Spring. 3 credits. Staff.
For description, see D SOC 205.

SOC 207(2070) Problems in Contemporary Society (also D SOC 207[2070]) (SBA-AS)

Fall. 4 credits. Staff.
Examines contemporary social problems, with a focus on their sources in the organization of society. Modern societies are based on three fundamental types of institutions—social norms, hierarchies, and markets. Each is subject to distinctive types of failures resulting in problems that include poverty, prejudice and discrimination, intolerance and hate, alcohol and drug abuse, physical and mental illness, crime and delinquency, and urban problems. In analyzing these problems the course emphasizes the institutions through which they are created and perpetuated and the form of institutional change required to address them.

SOC 208(2208) Social Inequality (also D SOC 209[2090]) (SBA-AS)

Spring. 4 credits. K. Weeden.
Reviews contemporary approaches to understanding social inequality and the processes by which it comes to be seen as legitimate, natural, or desirable. We address questions of the following kind: What are the major forms of stratification in human history? Are inequality and poverty inevitable? How many social classes are there in advanced industrial societies? Is there a "ruling class?" Are lifestyles, attitudes, and personalities shaped fundamentally by class membership? Can individuals born into poverty readily escape their class origins and move upward in the class structure? Are social contacts and "luck" important forces in matching individuals to jobs and class positions? What types of social processes serve to maintain and alter racial, ethnic, and gender discrimination in labor markets? Is there an "underclass?" These and other questions are addressed in light of classical and contemporary theory and research.

SOC 209(2090) Networks (also ECON 204[2040]) (SBA-AS)

Spring. 4 credits. D. Easley and J. Kleinberg.
For description, see ECON 204.

SOC 210(2100) What Is Science? (also S&TS 201[2011]) (CA-AS)

Spring. 3 credits. T. Pinch.
For description, see S&TS 201.

SOC 215(2150) Organizations: An Introduction (SBA-AS)

Fall. 4 credits. E. Hirsh.
This course examines the fundamental and pervasive role that organizations play in modern society. From universities, hospitals, banks, factories, prisons and churches to museums, art galleries and NGOs, contemporary society is inconceivable without organizations. Whether one struggles for change, seeks to protect the status quo, or simply wants to get things done in the modern world, it is crucially important to understand how organizations work. This course will explore such issues as the historical origins of complex organizations, the internal structure and dynamics of organizations, organizations interactions with their external environments, and how organizations change over time.

[SOC 221(2210) Race, Class, and Gender Research in Practice (SBA-AS)]

Spring. 4 credits. Sophomore seminar. Next offered 2008–2009. K. Weeden.

What are the promises and limitations of social science as a tool for understanding the sources and consequences of social inequality? This course introduces the underlying logic of social scientific research in the context of contemporary debates about social inequality: e.g., educational testing and tracking, race-based affirmative action, and the roles of intelligence and parental resources in affecting who gets ahead. Its goals are to encourage students to be critical consumers of social scientific data, evidence, and discourse and to develop their own rigorous, informed explanations of social phenomena.]

SOC 222(2220) Controversies about Inequality (also GOVT 222[2225], PAM/ILROB/D SOC 222[2220], PHIL 195[1950]) (SBA-AS)

Fall. 4 credits. S. Morgan.
Introduces students to contemporary debates and controversies about the underlying structure of inequality, the processes by which it is generated and maintained, the mechanisms through which it comes to be viewed as legitimate, natural, or inevitable, and the forces making for change and stability in inequality regimes. These topics are addressed through readings, class discussion, visiting lectures from distinguished scholars of inequality, and debates staged between students who take opposing positions on pressing inequality-relevant issues (e.g., welfare reform, school vouchers, immigration policy, affirmative action).

SOC 246(2460) Drugs and Society (SBA-AS)

Spring. 4 credits. D. Heckathorn.
The course focuses on drug use and abuse as a social rather than as a medical or psychopathological phenomenon. Specifically, the course deals with the history of drug use and regulatory attempts in the United States and around the world; the relationship between drug use and racism/class conflict; pharmacology and use patterns related to specific drugs; perspectives on the etiology of drug use/abuse; AIDS prevention and harm reduction interventions; drug-using subcultures; drug policy, drug legislation, and drug enforcement; and the promotion and condemnation of drug activities in the mass media.

SOC 248(2480) Politics and Culture (also GOVT 363[3633]) (HA-AS)

Spring. 4 credits. M. Berezin.
Focuses on currently salient themes of nationalism, multiculturalism, and democracy. It explores such questions as who is a citizen; what is a nation; what is a political institution; and how do bonds of solidarity form in modern civil society. Readings are drawn principally from sociology and where applicable from political science and history. Journalist accounts, films, and web site research supplement readings.

SOC 250(2500) Aging and the Life Course (also HD 251[2510])

Spring. 3 credits. E. Wethington.
For description, see HD 251.

SOC 265(2650) Latinos in the United States (also LSP 201[2010], D SOC 265[2650]) (SBA-AS)

Spring. 3 credits; 4-credit option available. H. Velez.

Exploration and analysis of the Hispanic experience in the United States. Examines the sociohistorical background and economic, psychological, and political factors that converge to shape a Latino group identity in the United States. Perspectives are suggested and developed for understanding Hispanic migrations, the plight of Latinos in urban and rural areas, and the unique problems faced by the diverse Latino groups. Groups studied include Mexican Americans, Dominicans, Cubans, and Puerto Ricans.

[SOC 270(2700) Gender: Meanings and Practice (also FGSS 270[2700]) (SBA-AS)]

Spring. 3 credits. Next offered 2008–2009. S. Correll.

People have many ideas about gender—about women, men, femininity, and masculinity. These ideas organize our social lives in important ways and often in ways that we do not even notice. This course critically examines the ways that gender structures the social world in which we live. After laying the theoretical groundwork, the course examines cultural conceptions about gender, paying special attention to how beliefs about masculinity and femininity create and enforce a system of gender difference and inequality.]

SOC 280(2800) Social Movements (SBA-AS)

Spring. 3 credits. Staff.
This course presents a sociological examination of the emergence and development of social movements and collective action at both the societal and individual levels. Students will learn about the major theoretical perspectives on social movements, as well as several recent and classical empirical works in the area. Students will learn about a variety of different social movements (both contemporary and historic).

Methods and Statistics Courses**SOC 301(3010) Evaluating Statistical Evidence (MQR)**

Fall. 4 credits. Prerequisite: Arts and Sciences students only. Staff.
First course in statistical evidence in the social sciences, with emphasis on statistical inference and multiple regression models. Theory is supplemented with numerous applications.

SOC 303(3030) Design and Measurement (SBA-AS)

Spring. 4 credits. Staff.
Research methods are the foundation upon which all research rests. When there are flaws in the methodology, the whole project usually crumbles. This course uses methods texts, and examples from real research projects, to investigate the research methods and logic employed by sociologists. Topics explored include surveys, experimentation, sampling, observation, causal inference, and ethics. By the end of the course, students are able to identify methodological weaknesses in others' research, and design projects that can withstand a critical eye.

[SOC 304(3040) Social Networks and Social Processes (SBA-AS)]

Fall. 4 credits. Next offered 2008–2009. D. Strang.

How do groups self-segregate? What leads fashions to rise and fall? How do rumors spread? How do communities form and police themselves on the Internet? This course examines these kinds of issues through the

study of fundamental social processes such as exchange, diffusion, and group formation. Focuses on models that can be explored through computer simulation and improved through observation.]

[SOC 307(3070) Society and Party Politics (also GOVT 306[3063]) (SBA-AS)]

Spring. 4 credits. Next offered 2008-2009. S. Van Morgan.

This course will focus on the role that society plays in the emergence and functioning of political parties. In addition to investigating different types of party systems, the societal roots of political parties, and the influence of institutions on electoral politics, the course will also examine contemporary debates, such as the relationship between culture and electoral behavior. Case studies will be drawn from a number of Western and non-Western democracies.]

Intermediate Courses

SOC 311(3110) Group Solidarity (SBA-AS)

Fall. 4 credits. M. Macy.

What is the most important group that you belong to? What makes it important? What holds the group together, and how might it fall apart? How does the group recruit new members? Select leaders? Make and enforce rules? Do some members end up doing most of the work while others get a free ride? This course explores these questions from an interdisciplinary perspective, drawing on sociobiology, economics, and social psychology, as it applies alternative theories of group solidarity to a series of case studies, such as urban gangs, spiritual communes, the civil rights movement, pro-life activists, athletic teams, work groups, and college fraternities.

SOC 313(3130) Sociology of Medicine (also S&TS 311[3110]) (SBA-AS)

Fall. 4 credits. C. Leuenberger.

For description, see S&TS 311.

SOC 318(3180) Contemporary Latin American Societies

Spring. 4 credits. M. de Santos.

This course examines selected aspects of the social landscape of contemporary Latin American societies. We will analyze social, economic, and political changes that have taken place in recent decades. Some of the topics to be covered include: changes in the class structure, gender and race relations; the rise of new social movements and forms of protest in civil society; shifts in economy and state relations and changes in the urban landscapes. Even though cases will be drawn from all over Latin America, this course will be centered in the Southern Cone.

SOC 324(3240) Environment and Society (also S&TS 324[3241], D SOC 324[3240]) (SBA-AS)

Fall or spring. 3 credits. Staff.

For description, see D SOC 324.

[SOC 327(3270) Toleration and Fundamentalism (SBA-AS)]

Spring. Next offered 2008-2009.

M. Berezin.

The purpose of this course is to help students to think historically and sociologically about the resurgence of religion as a political issue. In order to cover a wide range of time periods and cultures, this seminar views religion through an institutional framework concentrating particularly on the separation of

Church and State which has been the hallmark of modern Western political organization. The seminar asks students first, to think about how the boundary between church and state, sacred and secular was negotiated in various nation-states; and second, how that divide encourages toleration and discourages fundamentalisms of various stripes. The institutional focus will lead us to consider the legal frames, i.e., the laws that govern the boundaries between religion and the polity.]

SOC 336(3360) Evolving Families: Challenges to Family Policy (also PAM 336[3360]) (SBA-AS)

Fall. 3 credits. S. Sassler.

For description, see PAM 336.

SOC 337(3370) Racial and Ethnic Differentiation (also PAM 337[3370]) (SBA-AS)

Spring. 3 credits. S. Sassler.

For description, see PAM 337.

SOC 341(3410) Modern European Society and Politics (also GOVT 341[3413]) (SBA-AS)

Spring. 4 credits. S. Van Morgan.

For description, see GOVT 341.

SOC 357(3570) Schooling, Racial Inequality, and Public Policy in America (SBA-AS)

Spring. 4 credits. S. Morgan.

After examining alternative explanations for why individuals obtain different amounts and types of educational training, the course focuses on how an individual's family background and race affect his or her trajectory through the educational system. The course covers the specific challenges that have confronted urban schooling in America since the 1960s, including the classic literature on the effects of school and community resources on student achievement and as well as the development and later evaluation of school desegregation policies. Also considers case studies of current policy debates in the United States, such as housing segregation and school desegregation, voucher programs for school choice, and the motivation for and consequences of the establishment of state-mandated testing requirements. Throughout the course, emphasis is placed upon the alternative modes of inquiry and writing which opposing scholars, policymakers, and journalists use to address these contentious topics.

SOC 362(3620) Inequality and the Workplace (SBA-AS)

Fall. 4 credits. E. Hirsh.

The work people do is important for all aspects of their lives, including their earnings, social status, where they live, and opportunities for their children. This course examines the sources, extent, and consequences of workplace inequality across gender, racial, and ethnic lines. While traditional explanations of workplace inequality focus on how differences in workers' skills and qualifications lead to disparities in income, status, and other work-related rewards, this course emphasizes how characteristics of the workplace—such as hiring practices, pay scales, workforce diversity, and legal context—produce variation in gender, race, and ethnic inequality. The course concludes with a discussion of how public policy can intervene in the perpetuation of workplace inequality.

SOC 371(3710) Comparative Social Stratification (also D SOC 370[3700]) (SBA-AS)

Fall. 3 credits. T. Lyson.

For description, see D SOC 370.

SOC 375(3750) Classical Theory # (SBA-AS)

Fall. 3 credits. R. Swedberg.

Introduction to the classics in sociology, primarily works by Karl Marx, Max Weber, Emile Durkheim, and Georg Simmel. Students also study the works of Alexis de Tocqueville, Montesquieu, and Joseph Schumpeter. Special emphasis is put on the concepts, ideas, and modes of explanation that characterize the classics. Students also look at these writers' empirical material, and what may be termed the social construction of the classics. Course requirements include active class participation and three tests in class.

SOC 395(3950) Advanced Economic Sociology (SBA-AS)

Spring. 4 credits. R. Swedberg.

Aims at reinforcing and adding to the insights presented in SOC 105 Introduction to Economic Sociology (taught by Professor Victor Nee in the fall). Begins with the theoretical foundation of economic sociology (classical and modern). The contributions by Max Weber, Joseph Schumpeter, Mark Granovetter, and others are presented. This segment is followed by lectures on different types of economic organization, from capitalism and the global economy to the firm and entrepreneurship. Topics such as politics and the economy, law and the economy, culture and the economy, and gender and the economy are then discussed. Normative aspects of economic sociology are also on the agenda.

Advanced Courses

The following courses are intended for advanced undergraduates with substantial preparation, as well as for graduate students in sociology and related disciplines. The normal prerequisite for all 400-level courses is one introductory course plus 301 (or an equivalent statistics course). Students who are not sure whether their background is sufficient for a particular course should consult the professor.

SOC 408(4080) Qualitative Methods (also SOC 508[5080]) (SBA-AS)

Spring. 4 credits. M. Berezin.

This course aims to acquaint students with the practice of non-quantitative research methods. It does not offer a laundry list of techniques, rather it asks students to think about how particular methods are more or less suited to the answering of particular types of research questions. The course is divided into four parts: (1) a general discussion of theory; methods and evidence in social science; (2) a series of readings and exercises on particular methods; (3) an analysis of full-length works to see how they were put together; (4) discussion of student projects.

SOC 409(4090) From the Phonograph to Techno (also S&TS 409[4091]) (SBA-AS)

Spring. 4 credits. T. Pinch.

For description, see S&TS 409.

SOC 410(4100) Health and Survival Inequalities (also FGSS/D SOC 410[4100]) (SBA-AS)

Fall. 4 credits. A. Basu.
For description, see D SOC 410.

SOC 415(4150) Internet and Society

Spring. 4 credits. M. de Santos.
This course examines how social contexts shape the Internet and how the Internet has changed established institutions. We cover issues such as the "digital divide"; how blogs, news aggregators and online news sites have changed the news media landscape; privacy in the Internet era; and how the Internet has changed and created opportunities for social movements, social identities and communities.

SOC 421(4210) Theories of Reproduction (also FGSS/D SOC 421[4210]) (SBA-AS)

Spring. 4 credits. A. Basu.
For description, see D SOC 421.

SOC 425(4250) Artificial Societies (also SOC 527[5270]) (SBA-AS)

Spring. 4 credits. M. Macy.
This seminar is an introduction to computer simulation. The course surveys the history of social simulation and introduces students to complexity theory, game theory, and evolutionary models of social change. The remainder of the course (nine weeks) teaches students to program in Delphi and give them simulation programs to modify as a class project.

SOC 457(4570) Health and Social Behavior (also HD 457[4570])

Fall. 3 credits. Prerequisites: HD 250, SOC 101, D SOC 101, or SOC 250 and a course in statistics. Letter grades only.
E. Wethington.
For description, see HD 457.

SOC 478(4780) The Family and Society in Africa (also AS&RC 478[4606]) @ (SBA-AS)

Fall. 4 credits. N. Assiè-Lumumba.
For description, see AS&RC 478.

SOC 491(4910) Independent Study

Fall or spring. 1–4 credits. For undergraduates who wish to obtain research experience or do extensive reading on a special topic. Prerequisite: acceptable prospectus and agreement of a faculty member to serve as supervisor for project throughout semester. Graduate students should enroll in 891–892.

[SOC 492(4920) Economic Sociology of Entrepreneurship (SBA-AS)

Fall. 4 credits. Next offered 2008–2009.
V. Nee.
This course introduces the classical and contemporary writings on the rise of entrepreneurial capitalism in the West and the global diffusion of the modern entrepreneurship in its rational orientation to profit-making and innovative drive to apply new technologies and ideas to production. Contemporary approaches shift the emphasis away from the analysis of individual attributes and agency to focus on examining the role of social networks, organizational forms and institutional environment in facilitating the entrepreneurs and the firm. In the second part of the course, we will examine case studies of entrepreneurs, drawing selectively from novels, movies and autobiographies.]

SOC 495(4950) Honors Research

Fall or spring. 4 credits. Prerequisite: sociology seniors; permission of instructor.

SOC 496(4960) Honors Thesis: Senior Year

Fall or spring. 4 credits. Prerequisite: SOC 495.

Graduate Core Courses

These courses are primarily for graduate students in sociology but may be taken by other graduate students with permission of the instructor.

[SOC 501(5010) Basic Problems in Sociology I

Fall. 4 credits. Next offered 2008–2009.
V. Nee.

Analysis of theory shaping current sociological research. Examination of several central problems in sociological inquiry provides an occasion for understanding tensions and continuities between classical and contemporary approaches, for indicating the prospects for unifying microsociological and macrosociological orientations, and for developing a critical appreciation of efforts to integrate theory and research.

SOC 502(5020) Basic Problems in Sociology II

Fall. 4 credits. D. Heckathorn.
Continuation of SOC 501. Emphasis is on the logical analysis of theoretical perspectives, theories, and theoretical research programs shaping current sociological research. The course includes an introduction to basic concepts used in the logical analysis of theories and examines their application to specific theories and theoretical research programs. Theoretical perspectives include functionalism, social exchange, and interactionism.

SOC 505(5050) Research Methods I

Fall. 4 credits. Prerequisite: a first course in statistics and probability. Staff.
This course is an introduction to techniques of social inference. We cover research methods, sources of evidence, model design, and questions of empirical validity.

SOC 506(5060) Research Methods II

Spring. 4 credits. E. Hirsh.
Course on advanced linear regression analysis in theory and practice. After a review of classical bivariate regression and elementary matrix algebra, the course progresses under the credible assumption that the most important fundamentals of data analysis techniques can be taught in the context of simple multivariate linear models. Accordingly, the course provides a relatively formal treatment of the identification and estimation of single equation OLS and GLS regression models, instrumental variable models, traditional path models, and multiple indicator models. Interspersed with this material, the course addresses complications of regression modeling for the practicing researcher including: missing data problems, measurement error, regression diagnostics, weighting, and inference for surveys. The course concludes with a brief introduction to nonlinear regression, counterfactual models of causality, Bayesian inference, and hierarchical models.

Graduate Seminars

These seminars are primarily for graduate students but may be taken by qualified advanced undergraduates who have permission of the instructor. The seminars offered in each semester are determined in part by the interests of students, but it is unlikely that any seminar will be offered more frequently than every other year. The list below indicates seminars that are likely to be offered, but others may be added and some may be deleted. Students should check with the department before each semester.

[SOC 510(5100) Seminar on Comparative Societal Analysis

Spring 3 credits. Prerequisite: advanced graduate students throughout social sciences; permission of instructor. Next offered 2008–2009. M. Berezin.
Intended for advanced graduate students interested in comparative methods and research in the social sciences. It is offered in conjunction with the Comparative Societal Analysis program in the Einaudi Center for International Studies. Students enrolled for credit write critiques of papers presented at the seminar by faculty members and other graduate students, and work on their own project. Some weeks are devoted to collective reading and analysis of background work. Students may enroll for more than one semester.]

SOC 518(5180) Social Inequality

Fall. 4 credits. S. Morgan.
This course serves as an introduction to contemporary theories, debates, and models regarding the structure of social classes, the determinants of social mobility, the sources and causes of racial, ethnic, and gender-based inequality, and the putative rise of postmodern forms of stratification. The twofold objective is to both review contemporary theorizing and to identify areas in which new theories, hypotheses, and research agendas might be fruitfully developed.

[SOC 519(5190) Workshop on Social Inequality

Spring. 4 credits. Prerequisite: SOC 518; sociology Ph.D. students, or permission of instructor. Next offered 2008–2009.
K. Weeden.
Provides a forum in which students and others can present, discuss, and receive instant feedback on their inequality-related research. Its primary goal is to help students advance their own research; its secondary goal is to introduce selected debates in the contemporary inequality literature in a more comprehensive fashion than is possible in the introductory graduate-level seminar on inequality.]

SOC 527(5270) Artificial Societies (also SOC 425[4250])

Spring. 4 credits. M. Macy.
For description, see Soc. 425.

[SOC 528(5280) Conflict and the Nation-State

Fall. 4 credits. Next offered 2008–2009.
D. Strang.
The nation-state developed out of conflict, through military competition within Europe and the rise of and response to colonial empires in the Americas, Asia, and Africa. Conflict is just as virulent today, as ethnic cleansing and movement toward American imperialism attest. This course examines these conflicts both in comparative historical terms and in terms of fundamental social processes,

with an eye to what they tell us about contemporary issues. Questions include: when and why do groups seek to leave polities, through secession or decolonization? When and why do states become imperial powers? How are intra-state and inter-state conflict conditioned by the changing content of nationality and citizenship, global institutions, and inequalities of wealth and power.]

[SOC 540(5400) Organizational Research

Fall. 4 credits. Next offered 2008–2009.
D. Strang.

Seminar focusing on contemporary sociological research on organizations. It centers theoretically on the interplay of institutional, ecological, and choice-theoretic accounts of organizational structure and action. Subjects include organizational founding and mortality; change in organizational practices over time; the relationship between organizations and their legal, social, and cultural environment; and stratification and mobility within organizations.]

[SOC 580(5800) Identity and Interest in Collective Action

Spring. 4 credits. Offered every other year; next offered 2008–2009. M. Macy.

This research seminar examines the problem of collective action from alternative theoretical perspectives: one centered on shared interests, the other on common identities. The former claims that groups are held together because the members are interdependent and thus benefit from mutual trust and cooperation in a common endeavor. Identity theorists contend that trust and cooperation may also depend on affective and normative ties among participants who share a salient demarcation (including a "shared fate"). We will explore this debate, and its possible resolution, through an examination of formal theoretical studies (including game theoretic, evolutionary, and agent-based models) as well as empirical research using experimentation and comparative case analysis. We will also examine research on informal social control (including reciprocity and reputation systems), social networks, and mobilizing strategies as mechanisms for reconciling the tension between individual self-interest and collective obligations. The primary goal is to identify, formulate, and launch promising research projects, and to that end, seminar members will be expected to critically engage the literature each week and to write a final paper that advances original research (as a detailed prospectus or, where practical, as a publishable article.)]

[SOC 591(5910) Special Seminars in Sociology

Fall and spring. 2–4 credits. Staff. These graduate seminars are offered irregularly. Topics, credit, and instructors vary from semester to semester. Students should look at the Sociology Department bulletin board at the beginning of each semester for current offerings.

[SOC 605(6050) Political Sociology

Fall. 3 credits. Next offered 2008–2009.
S. Soule.

This seminar presents the basic approaches to political sociology, with emphasis on the political process in the United States (including the study of both conventional and unconventional politics). Students will learn about explanations for individual participation in both conventional and unconventional

politics. Major theoretical and empirical works in this area will be studied.]

[SOC 606-607(6060-6070) Sociology Colloquium

Fall and spring. 0 credits. Requirement for sociology graduate students. Staff. A series of talks representative of current research interests in sociology, given by distinguished visitors and faculty members.

[SOC 608(6080) Proseminar in Sociology

Fall. 1 credit. Prerequisite: first-semester sociology graduate students. Staff. Discussion of the current state of sociology and of the research interests of members of the graduate field; taught by all members of the field.

[SOC 609(6090) Special Topics in Methodology

Spring. 2 credits. Next offered 2008–2009.
S. Morgan.

After considering alternative modes of explanation in the social sciences, this course offers an introduction to techniques and strategies for estimating causal effects from a counterfactual perspective. For problems where potential outcomes exist because they can be specified for well-defined causal states, alternative data analysis techniques will then be introduced and explained, including matching as stratification, propensity scores as weights in regression analysis, natural experiments as instrumental variable estimators of local average treatment effects, longitudinal data techniques from an interrupted time series perspective, and the front-door criterion for estimating causal effects via the exhaustive modeling of mechanisms. Because the course assumes some familiarity with advanced data analysis techniques, the course is not suitable for students who have not had some training in statistics and data analysis techniques at the graduate level. The course will meet weekly for the first seven weeks of the spring semester. Students who attend the lectures and participate in the discussion of the readings for the first seven weeks should enroll in the pass-fail 2-credit version of the course. Students who wish to carry on in the remaining weeks of the semester to write a term paper using the techniques should enroll in the graded 4-credit version of the course.]

[SOC 610(6100) The Sociological Classics

Spring. 3 credits. R. Swedberg. This course is primarily intended for graduate students who lack a background in the classics as well as for those who are only familiar with elementary works such as *The Protestant Ethic and The Communist Manifesto*. The readings and the discussion will primarily be concentrated to Weber's *Economy and Society*, Durkheim's *Elementary Forms of Religious Life* and Marx's *Capital*. Works by Georg Simmel are also part of the reading list. The purpose of the course is to make the student familiar with the concepts, ideas and ways of reasoning that characterize the major works of the classics. The main idea is to lay a foundation for future work in sociology. Each class will be in the form of a seminar with mainly discussion. The requirements include active class participation and a research paper on some aspect of the classics. Each class will be introduced by one or several students, who will suggest topics for discussion. The exact way that this will be done, depends on the participants and their interest.

[SOC 630(6300) Cultural Sociology

Fall. 4 credits. M. Berezin. Cultural sociology is a flourishing sub-field within sociology that incorporates a wide range of substantive areas (art, inequality, family, politics) and uses a wide range of methods from the ethnographic to the textual. This course proposes to explore some of the leading works and ideas in that field and to analyze how culture operates in social life. It begins by analyzing the different meanings that sociologists have ascribed to culture. We begin by reading classics like Durkheim's *Elementary Forms of Religious Life* then move on to contemporary theorists such as Geertz, Bourdieu, Alexander and Swidler. We then read a series of empirically grounded case studies that make culture the basis of the analysis (i.e., Lamont, *Money Manners and Morals*). We will also analyze certain cultural objects such as films, art, etc. to put into practice some of the ideas from the readings. There is no course such as this taught by a practicing cultural sociologist in the university.

[SOC 631(6310) Inside Technology: The Social Construction of Technology (also S&TS 631[6311])

Spring. 4 credits. Staff.
For description, see S&TS 631.

[SOC 632(6320) Inside Technology: The Social Construction of Technology (also S&TS 632[6321])

Spring 4 credits. Staff.
For description, see S&TS 632.

[SOC 640(6400) Methods of Social Movements Research

Spring. 4 credits. S. Soule. This seminar presents the dominant research methodologies employed by social scientists studying social movements (surveys, semi-structured interviews, case studies, network analysis, event analysis, participant observation, and historical analyses). In addition to reading about these methods as applied to social movements, we will also discuss the major theories of social movements with an eye toward considering appropriate research designs for empirical examinations of hypotheses derived from these theories. Many historical and contemporary social movements in the United States will be discussed as we examine these methods and theories; for example, the women's movement, civil rights movement, labor movement, suffrage movement, peace movement, homeless movement, environmental movement, to name just some of these.

[SOC 660(6600) States and Social Movements (also GOVT 660[6603])

Spring. 4 credits. Next offered 2008–2009.
S. Tarrow.
For description, see GOVT 660.]

[SOC 680(6800) Workshop on Transnational Contention (also GOVT 681[6817])

Spring. 4 credits. Next offered 2008–2009.
S. Tarrow.
For description, see GOVT 681.]

[SOC 682(6820) Experimental Sociology Workshop

Fall. 1 credit. S. Correll. This course is a workshop where students develop original research projects using experimental research methods. Students take turns presenting their projects, as work-in-progress. Students will receive feedback from

the instructor and from their fellow classmates. The goal is to turn student research projects into published journal articles.

[SOC 685(6850) Research Practicum on Gender]

Fall. 4 credits. Next offered 2008–2009.
S. Correll.

This course is an advanced graduate seminar designed to help Ph.D. students learn to conduct publishable research in the sociology of gender/sexuality. The goal will be to develop projects that are both empirically sound and reflect an understanding and appreciation of gender as a social phenomenon. In the second week of class, students will give a short presentation of a research project on gender that they began in a previous course. We will then read and discuss current debates on topics such as feminist methods and the application and penetration of gender theories in sociological research. Students will apply these readings as they critique and improve their own projects. Students will also be exposed to the review process and gain practice reviewing each others papers following the guidelines provided by the journal *Gender & Society*. We will conclude the class with short presentations of students' final projects.]

SOC 691(6910) Independent Study

Fall or spring. 2–4 credits. Prerequisite: graduate status and permission of faculty member willing to supervise project. Staff. For graduates who wish to obtain research experience or to do extensive reading on a special topic. Permission to enroll for independent study is granted only to students who present an acceptable prospectus and secure the agreement of a faculty member to serve as supervisor for the project throughout the semester.

SOC 778(7780) Solidarity in Groups (also ILROB 778(7780))

Fall. 3 credits. Next offered 2008–2009.
E. Lawler.

For description, see ILROB 778.]

SOC 891–892(8910–8920) Graduate Research

891, fall; 892, spring. Variable to 4 credits each semester. Prerequisite: graduate standing and permission of faculty member willing to supervise project.

SOC 895–896(8950–8960) Thesis Research

895, fall; 896, spring. Variable to 6 credits each semester. Prerequisite: permission of thesis supervisor.

SOUTH ASIA PROGRAM

A. Basu, director; A. Banerjee, K. Basu, A. Blackburn, D. Bor, D. Boucher, I. Dadi, L. Derry, S. Feldman, D. Gold, D. Ghosh, D. Gurak, M. Hatch, R. Herring, D. Holmberg, R. Kanbur, M. Katzenstein, K. A. R. Kennedy, N. Kudva, S. Kuruvilla, W. Liyanage, B. Lust, B. MacDougall, M. Majumdar, K. March, L. McCrea, K. McGowan, S. Mohanty, S. Mukherjee, V. Munasinghe, A. Nussbaum, S. Oja, P. Olpadwala, B. Perlus, K. V. Raman, J. Rigi, S. Rizvi, A. Ruppel, N. Sethi, S. Singh, E. Tagliacozzo, S. Toorawa, R. Travers, M. Walter, M. Weiss, A. Willford. Emeritus: M. Latham, N. Uphoff.

The South Asia Program coordinates research, teaching, and special campus events relating to Afghanistan, Bangladesh, India, Pakistan, Nepal, and Sri Lanka. The program faculty include members from a variety of disciplines, including agricultural economics, agricultural engineering, anthropology, architecture, art, city and regional planning, comparative religion, development sociology, ecology and systematics, economics, English, geology, government, history, history of art, human ecology, industrial and labor relations, international agriculture, linguistics, and literature. Undergraduates with a special interest in the region may major in Asian Studies with a South Asian concentration, or complete a South Asia concentration with any other major. Graduate students may pursue the M.A. degree in Asian Studies with a concentration in South Asia.

Languages offered are Bengali, Hindi, Nepali, Sinhala, Sanskrit, Tamil, and Urdu. Foreign Language and Area Studies scholarships are available to graduate students who are U.S. citizens or permanent residents. Cornell is a member of the American Institutes of Bangladesh, Indian, Pakistan, and Sri Lankan studies. For details on the major, see the Department of Asian Studies listing in this volume. For courses available in South Asian studies, or for further information on research opportunities, direct questions to the South Asia Program Office, 170 Uris Hall, 255–8493. www.einaudi.cornell.edu/SouthAsia.

SOUTHEAST ASIA PROGRAM

T. Chaloeintiarana, director (180 Uris Hall); I. Azis, W. Bailey, A. Blackburn, A. Cohn, M. Fiskesjo, M. Hatch, S. Kuruvilla, F. Logevall, T. Loos, K. McGowan, L. Paterson, J. Siegel, E. Tagliacozzo, K. Taylor, A. Willford, L. Williams. Emeritus: B. Anderson, R. Barker, R. Jones, S. O'Connor, E. Thorbecke, J. Wolff, M. Welker. Lecturers: J. Pandin, H. Phan, N. Jagacinski, T. Savella, T. Tranviet, S. Tun

Southeast Asia studies at Cornell is within the framework of the Department of Asian Studies and affiliates with the Einaudi Center for International Studies. Eighteen core faculty members in the colleges of Arts and Sciences, Business and the Johnson Graduate School of Management, the School of Industrial and Labor Relations, and Agriculture and Life Sciences participate in an interdisciplinary program of teaching and research on the history, culture, and societies of the region stretching from Burma through the Philippines. Courses are offered in such fields as anthropology, Asian studies, economics, finance, government, history, history of art, labor relations, linguistics, music, and

development sociology. Instruction is also offered in a wide variety of Southeast Asian languages: Burmese, Cambodian (Khmer), Indonesian, Tagalog, Thai, and Vietnamese. In addition, faculty from other disciplines provide area instruction on Southeast Asia. The formal program of study is enriched by a diverse range of extracurricular activities, including an informal weekly brown bag seminar, art exhibits at the Johnson Museum, and concerts of the Gamelan Ensemble. The George McT. Kahin Center for Advanced Research on Southeast Asia is also the site for public lectures as well as publication and outreach activities related to this area. The John M. Echols Collection on Southeast Asia, in Kroch Library, is the most comprehensive collection on Southeast Asia in the United States.

Undergraduates may major in Asian Studies with a focus on Southeast Asia and its languages, or they may elect to take a concentration in Southeast Asian studies with any other major by completing 18 credits of course work. Graduate students may work toward an M.A. degree in Southeast Asian studies or pursue a Master of Professional Studies in another school with a concentration in Southeast Asian studies. Ph.D. students specializing in Southeast Asia receive a doctorate in a discipline such as history, history of art, anthropology, government, linguistics, music, economics, or city and regional planning. Academic Year and Summer Foreign Language and Area Studies scholarships are available to graduate students who are U.S. citizens or permanent residents.

For courses available in Southeast Asian studies and details on the major, see the Department of Asian Studies listing in this volume. Additional information is available at www.einaudi.cornell.edu/southeastasia. Inquiries for further information should be directed to the program office, 180 Uris Hall, 255–2378 or SEAP@cornell.edu.

SPANISH

See "Department of Romance Studies."

STATISTICAL SCIENCE DEPARTMENT

The university-wide Department of Statistical Science coordinates undergraduate and graduate study in statistics and probability. A list of suitable courses can be found in the CIS section of this catalog.

SWAHILI

THEATRE, FILM, AND DANCE

Faculty: K. Goetz, chair; R. Archer, D. Bathrick (director of graduate studies), S. Bernstein, S. Brookhouse, J. Chu, S. Cole, W. Cross, D. Feldshuh, A. Fogelsanger (director of undergraduate studies in dance); D. Fredericksen (director of undergraduate studies in film); J. E. Gainor (on leave 2007-2008); S. Haenni, D. Hall, E. Intemann, J. Kovar, B. Levitt, P. Lillard, R. MacPike, B. Milles, J. Morgenroth, M. Rivchin, N. Salvato, J. Self, B. Suber, A. Van Dyke (director of undergraduate studies in theatre), A. Villarejo (on leave 2007-2008), S. Warner

Teaching staff: A. Bernstein, L. Boquist, B. Cirno, B. Komala, E. Lloyd, T. Ostrander, K. Phoenix, C. Seekatz, F. Sellers, J. Tindall.

Through its courses and production laboratories, the department provides students with a wide range of opportunities in theatre, film, and dance. It also offers bachelor of arts degrees in each of those areas. These majors educate students in accordance with the general liberal arts ethic of the college. The department invites and encourages academic and studio participation by students from all disciplines.

Theatre Arts Major

R. Archer, D. Bathrick, S. Bernstein, S. Brookhouse, S. Cole, W. Cross, D. Feldshuh, J. E. Gainor (on leave 2007-2008); K. Goetz, chair; D. Hall, E. Intemann, B. Levitt, P. Lillard, R. MacPike, B. Milles, N. Salvato, A. Van Dyke (director of undergraduate studies), S. Warner

The theatre major offers studies in the history of theatre, dramatic theory and criticism, playwriting, acting, directing, design/technology, and stage management. Students interested in the theatre arts major should consult with Alison Van Dyke (director of undergraduate studies).

Theatre major requirements Credits

- | | |
|--|-----|
| 1. THETR 240 and 241 | 8 |
| THETR 250 Introduction to Theatre Design and Technology | 4 |
| THETR 280 Introduction to Acting | 3 |
| 2. Four laboratory courses distributed as follows: | |
| THETR 151 Production Lab I | 1-3 |
| THETR 153, 253, or 353 Stage Management Lab I, II, or III | 1-4 |
| THETR 155 Rehearsal and Performance or THETR 151 in a different area | 1-3 |
| THETR 251 or 351 Production Lab II or III | 1-3 |
| 3. Four courses in the area of theatre studies (see "Theatre Studies" section of theatre courses) chosen in the following manner: | |
| one course must be at 300 level | |
| one course must be at 400 level | |
| two additional courses at the 300 or above level | |

one of the three courses must be pre-20th century.

- Three courses (at least 9 credits) in other theatre courses chosen in consultation with the faculty advisor. Course taken to qualify for admission to the Advanced Undergraduate Theatre Program (described below) may also be used to fulfill this requirement.
- Courses in which a student receives a grade below C cannot be used to fulfill the requirements for a Theatre major.

Honors

The theatre honors program is for majors who have demonstrated exceptional ability in the major and who seek an opportunity to explore branches of their subject not represented in the regular curriculum or to gain experience in original research. To be part of the honors program the student must maintain a GPA of 3.5 in classes for the theatre major and an average of 3.0 in all courses. Students must consult with their advisors in the spring of their junior year to enroll in the honors programs.

The Advanced Undergraduate Theatre Program

The department offers advanced study in directing, playwriting, design/technology, and stage management to students who qualify on the basis of outstanding achievement in course work. Admission to the AUTP is by invitation of the area faculty supervisor and the completion of a recommended "track" of courses or equivalent experience. (For recommended courses of study see listing of courses at end of departmental listings.) Approval process includes a portfolio review and/or interview. The program provides students with intensive study in theatre as well as the opportunity to collaborate with professional faculty and guest artists.

Independent Study, Internships and Honors

THETR 300(3000) Independent Study

Fall, spring, or summer. 1-4 credits. Independent study in theatre allows students the opportunity to pursue special interests not treated in regularly scheduled courses. A faculty member, who becomes the student's instructor for the course, must approve the student's program of study and agree to provide continuing supervision of the work. Students must prepare a proposal for independent study, which is available in 225 Schwartz Center.

THETR 485(4850) Undergraduate Internship

Fall, spring, or summer. 1-3 credits. Prerequisite: majors or concentrators in the department.

Students are responsible for arranging their own internships in consultation with the faculty in their area of choice *before* preregistration for the semester in which the internship is planned to take place. To receive credit for this course, the internship must be unpaid. Students must follow the rules and procedures stated in the departmental internship form.

THETR 495(4950) Honors Research Tutorial

Fall, spring. 4 credits. Prerequisite: honors students in theatre. First of a two-semester sequence (the second is THETR 496) for seniors engaged in an honors project.

THETR 496(4960) Honors Research Tutorial

Fall or spring. 4 credits. Prerequisite: honors students in theatre. Second of a two-semester sequence (the first is THETR 495) for students engaged in an honors project.

First-Year Writing Seminars

Consult the John S. Knight Institute brochure for times, instructors, and descriptions.

Theatre Studies

THETR 223(2230) The Comic Theater (also CLASS 223[2641]) # (LA-AS)

Spring. 3 credits. J. Rusten. For description, see CLASS 223.

THETR 277(2770) Shakespeare (also ENGL 227[2270]) # (LA-AS)

Fall. 4 credits. B. Correll. For description, see ENGL 227

[THETR 236(2360) Public Voice and Civic Gesture (also DANCE 236[2450], VISST 236[2340])

Fall. 1 credit. Next offered 2008-2009. B. Suber and B. Milles. For description, see DANCE 236.]

THETR 240(2400) Introduction to World Theatre I—Antiquity through 1500 # (LA-AS)

Fall. 4 credits. N. Salvato. A survey of practices, literatures, and themes of theatrical performance in Africa, America, Asia, and Europe from antiquity through 1500. Examines case studies from ancient Egypt, Greece, Rome, the Near East, India, China, Japan, and England, continuing up to the age of European imperialism. Looks at issues of masking and identity, storytelling and ritual, stage and society, tradition and modernity. Lectures are combined with periodic student projects.

THETR 241(2410) Introduction to World Theatre II—NEO Classical to the Present # (LA-AS)

Spring. 4 credits. S. Warner. Survey of global performance from around 1600 to the present. Examines the development of European and Asian vernacular and national theatrical traditions; recent ethnic and popular performance traditions of Europe, Asia, Africa, and meso-America; recurring issues of realism and theatricality; avant-garde innovations; colonial expansion and marginalization; intercultural and transactional exchanges. Lectures are combined with periodic student projects.

THETR 273(2730) Opera (also MUSIC 274[2241]) # (LA-AS)

Spring. 3 credits. R. Harris-Warrick. For description, see MUSIC 274.

THETR 278(2780) Desire (also ENGL/COM L/FQSS 276[2760]) (LA-AS)

Spring. 4 credits. E. Hanson. For description, see ENGL 276.

THETR 313(3130) Special Topics in Drama and Performance (also ENGL 376[3760], FGSS 313[3130])

Fall. 4 credits. S. Warner.

An intensive study of a particular dramatist, period, form or problem in drama and/or performance. Topics, prerequisites and formats will vary from year to year.

THETR 319(3190) Music, Dance, and Light (also DANCE 319[3590], VISST 319[3519]) (LA-AS)

Spring. 3 credits. Attendance at dance concerts and music concerts required.

A. Fogelsanger and E. Intemann.

Artistic values, parameters, and concerns of music (sound design), dance, and lighting design are compared and contrasted, and the combination of design elements is analyzed in contemporary dance. Includes writing in response to readings, audio and video recordings, and performances. Some classes devoted to creating sound, movement, and lighting.

[THETR 326(3260) Queer Performance (also FGSS 325[3250]) (LA-AS)]

Spring. 3 credits. Limited to 15 students.

Next offered 2008–2009. S. Warner.

What constitutes queer performance? Is queer who you are or what you do? Is sexuality all we mean by queer? Has queer performance enhanced or eclipsed gay and lesbian theater? This course investigates the polymorphously perverse relationship between queer theory and performance. Integral to our theoretical discussions are questions of practice and production: Where is queer performance staged and how is it received? How is it produced, for whom, by whom, and with what funds? What is the relationship between politics and performance? Students are expected to attend at least one performance outside of class and to collaborate on an in-class performance.]

[THETR 335(3350) Modern Western Drama, Modern Western Theatre: Theory and Practice (also VISST 335[3735], ENGL 335[3350]) (LA-AS)]

Fall. 4 credits. Next offered 2008–2009.

N. Salvato.

This course investigates drama and the cultural contexts of its performance from the mid-19th century to the mid-20th century in Europe and the United States. We will consider such artistic movements as expressionism, symbolism, naturalism, futurism, constructivism, surrealism, and dadaism. The course will conclude with an emphasis on Brecht's epic theater, Artaud's theater of cruelty, and a few of their more contemporary descendants.]

THETR 336(3360) American Drama and Theatre (also AM ST 334[3360])

Spring. 4 credits. Prerequisite: permission of instructor. Limited to 25 students.

N. Salvato.

This course explores major American playwrights from 1900 to 1960, introducing students to American theater as a significant part of modern American cultural history. Our focus will be to consider the ways in which theater has contributed to the construction and deconstruction of a national identity. We will pay special attention to the social, political, and aesthetic contexts of the time period and discuss the shifting popularity of dramatic forms, including melodrama, realism, expressionism, absurdism, and the folk play, in the American theater canon. Authors

include: O'Neill, Glaspell, Odets, Rice, Hellman, Hughes, Hurston, Hansberry, Miller, Williams, and Albee, among others.

[THETR 337(3370) Contemporary American Theatre (also AM ST 335[3370], ENGL 337[3370]) (LA-AS)]

Fall. 3 credits. Limited to 15 students. Next offered 2008–2009. Staff.

How has theatre helped shape our notion of what it means to be an American in the second half of the 20th century? What role has politics played in recent theatrical experimentation? How has performance been used as a platform for constructing and deconstructing conceptions of identity, community, and nationality? In this course we will examine major trends in American drama from 1960 to the present. Readings for the class focus on theatre that responds directly to or intervenes in moments of social crisis, including: the Vietnam War, the Civil Rights Movement, the Women's Movement, the Gay and Lesbian Liberation Movement, and AIDS.]

[THETR 345(3450) The Tragic Theatre (also CLASS 345[3645], COM L 344[3440]) # (LA-AS)]

Fall. 4 credits. Limited to 40 students. Next offered 2009–2010. F. Ahl.

For description, see CLASS 345.]

THETR 372(3720) Medieval and Renaissance Drama (also ENGL 372[3720]) # (LA-AS)]

Spring. 4 credits. M. Raskolnikov.

For description, see ENGL 372.

THETR 375(3750) Studies in Drama and Theatre: "Enemies, A 'Love' Story?" (also ENGL 375[3750]) (LA-AS)]

Spring. 4 credits. P. Lorenz.

For description, see ENGL 375.

[THETR 403(4030) Ritual, Play, Spectacle, Act: Performing Culture (also THETR 603[6030]) (LA-AS)]

Spring. 4 credits. Next offered 2008–2009. S. Warner.

Takes a broad-spectrum approach to performance. Includes anthropological texts on ritual and play, sociological texts on performances in everyday life, literary studies texts on "performatives" in speech and writing, folklore studies on parades and reenactments, psychological and philosophical studies on the role of performance in the formation of identity, as well as standard texts of the theater. Considers the distinctions between play, ritual, spectacle, festival, theater, and the "visual" arts. Explores the differences between spectating and witnessing and examines studies on audience behavior. At the base of the inquiry is the broad issue of the role of representational practices within culture and among cultures. If, as Barbara Meyerhoff has written, we understand ourselves by showing ourselves to ourselves, what role does "showing" have in construction of the selves we seek to understand? Why is postmodern culture often called the "society of the spectacle" (Debord)? If, as Aristotle claimed, we are mimetic creatures at base, which comes first—representation or reality? Looking closely at the notion of "live" art, students weigh theorists who claim that performance is ephemeral and disappearing against those who claim that performance, such as oral history, is resilient and enduring. Students have the opportunity to do fieldwork, create performative works, and engage in scholarly study.]

[THETR 404(4040) Mythology and Postmodern Performance (also THETR 604[6040]) (LA-AS)]

Spring. 4 credits. Limited to 15 students.

Next offered 2008–2009.

Why has mythology flourished in performance projects despite the rather marginal position it has occupied in the academy in the past few decades? Does a survey of postmodern performances, especially by so called "marginal" or "minority" groups, suggest a shift toward a postsecular society? Bringing a variety of divergent discourses into dialogue, this course investigates the critical potentiality mythology holds for both performance theory and social activism. Specifically, it looks to mythology to provide a fresh perspective on cultural performances: sanctioned and unsanctioned forms of transgression; ritualized behavior; initiation and incarceration; and artistic projects aimed at consciousness raising and social change. In what ways does mythology provide an interesting alternative to mimesis as a discursive and performative strategy? How efficacious is it in representing concepts or situations that cannot adequately be conceived of in language or under the law?]

THETR 420(4200)/620(6200) Parody (also ENGL 437/637, FGSS 427/637[4270/6370]) (LA-AS)]

Spring. 4 credits. N. Salvato.

In *A Theory of Parody*, Linda Hutcheon defines parody broadly as "repetition with critical difference, which marks difference rather than similarity." Taking a cue from Hutcheon, we will consider parody as a form of intertextuality that is not necessarily used in the service of ridicule. Rather, we will examine a number of recent imitative texts in order to distinguish the rich variety of political agendas and aesthetic rationales for postmodern parody. Reading canonical texts (*Oedipus Rex*, *Hamlet*) alongside some of their revisions (*Oedipus at Palm Springs*, *Stage Blood*), we will map the ways in which parody has been the defining theatrical form of the American avant-garde in the second half of the 20th century and at the beginning of the 21st. Individual authors and theatre collectives include Charles Busch, Christopher Durang, Five Lesbian Brothers, Christopher Marlowe, Chuck Mee, William Shakespeare, Sophocles, Split Britches, Gertrude Stein, Mac Wellman, Tennessee Williams, and The Wooster Group.

[THETR 426(4260) Adaptation: Text/Theatricality (also VISST 426[4260]) (LA-AS)]

Spring. 4 credits. Prerequisite: permission of instructor. B. Milles.

Mounting a script into a show is a process of adaptation from page to stage. But dramas have also been translations of other media. Sondheim's *Sunday in the Park with George* "adapted" a painting by Seurat. Stringberg's *Ghost Sonata* "translated" a symphony by Beethoven. Plays can even be adapted into other plays: Césaire's *A Tempest*, Paula Vogel's *Desdemona: A Play about a Handkerchief*, Heiner Müller's *Hamletmaschine*. In performance art (where there is often no script) examples abound as well: Can you imagine reenacting Edward Manet's *Olympia* while someone builds a frame around you? And there are lots of exciting possibilities that arise in adapting across cultures—such as a Kathakali *Lear* or a Shakespearean *Mababbarata*. This course challenges the boundaries of text to discover the possibilities

of performance. Asks: How do we translate inspiration into tangible (or intangible) theatrical imagery? Working in workshop format as actors and writers, students explore the process of developing theatre pieces based on a variety of sources.]

THETR 436(4360) The Female Dramatic Tradition (also FGSS 433[4330]) (LA-AS)

Spring. 4 credits. S. Warner.
Is there a "female dramaturgy?" What is the female tradition in the theatre? This course explores these questions through an investigation of texts by women dramatists, including Hrotsvitha, Aphra Behn, and Caryl Churchill, as well as theory by such critics as Sue Ellen Case and Jill Dolan.

[THETR 440(4400) Romantic Drama (also THETR 644[6440], ENGL 440/644[4440/6440]) (LA-AS)

Fall. 4 credits. Next offered 2008-2009.
R. Parker.
For description, see ENGL 440.]

THETR 445(4450) Text Analysis for Production: How to Get from the Text onto the Stage (also ENGL 444[4441])

Spring. 4 credits. Limited to 15 students.
Prerequisite: THETR 281 or 250 or 398, or permission of instructor. B. Levitt.
Examines the play as the central, essential source for production decisions made by the actor, the director, the designer, and the dramaturg. Students "present" their conclusions about the performance of studied texts through project work as either an actor, director, designer, or dramaturg, as well as through two to three papers.

[THETR 446(4460) Shakespeare in (Con)text (also ENGL 445[4450]) # (LA-AS)

Spring. 4 credits. Limited to 15 students.
Prerequisite: permission of instructor. Next offered 2008-2009. B. Levitt.

Examines how collaboration among stage directors, designers, and actors leads to differing interpretations of plays. The course focuses on how the texts themselves are blueprints for productions with particular emphasis on the choices available to the actor inherent in the text.

This is a special seminar sponsored by the John S. Knight Institute's Sophomore Seminars Program. Seminars offer discipline-intensive study within an interdisciplinary context. While not restricted to sophomores, the seminars aim at initiating students into the discipline's outlook, discourse community, modes of knowledge, and ways of articulating that knowledge. Limited to 15 students. Special emphasis is given to strong thinking and writing and to personalized instruction with top university professors.]

THETR 447(4470) Hamlet: The Seminar (also ENGL 482[4820]) # (LA-AS)

Fall. 4 credits. Limited to 15 students.
Prerequisites: THETR 240, 241, 242 or equivalent and permission of instructor.
B. Levitt.

The most studied and written about work in Western Literature outside the Bible, Hamlet, according to Harold Bloom, is our secular savior and our ambassador to death. This course centers on a close reading of the play. Through research and assigned readings the course tests theoretical viewpoints about the

play against the text itself by reading the theory in relationship to the production history.

[THETR 483(4830) Seminar in Comparative 20th-Century Anglophone Drama (also ENGL 483[4601]) (LA-AS)

Fall. 4 credits. Recommended: some knowledge of classical and avant-garde theories of drama and theatre. B. Jeyifo.
For description, see ENGL 483.]

THETR 580(5800) Problems in Asian Art: Dancing the Stone: Body, Memory, and Architecture (also ART H 580[5850])

Spring. 4 credits. K. McGowan.
For description, see ART H 580.]

THETR 600(6000) Proseminar in Theatre Studies

Spring. 4 credits. Prerequisite: graduate standing.
An introduction to the theory and methods involved in the study of the theatre. Attention focuses on pedagogy and the profession in Part I. Part II explores current scholarly trends.

THETR 605(6050) Camp, Kitsch, and Trash (also ENGL 651[6510], FGSS 605[6050])

Fall. 4 credits. N. Salvato.
This graduate seminar investigates three key terms for 20th-century aesthetic thought and performance theory: camp, kitsch, and trash. As we analyze the various meanings assigned to these terms (and the performances articulated under their banners), we will also consider histories of taste; the traffic between popular culture and "high art"; and the relationships among material artifacts, identity politics, and community formations. Issues of class, race, gender, and sexuality will be foregrounded. Authors include Adorno, Bourdieu, Broch, Butler, Debord, Greenberg, Ludlam, Newton, Sedgwick, Sontag, Waters, and Warhol.

THETR 606(6060) Passionate Politics (also FGSS 604[6040])

Fall. 4 credits. S. Warner.
Complete Course Title: Passionate Politics: Affect, Protest, Performance. This course explores the relationship between affect, performance and political engagement. What role have emotions played in social movements? In the success or failure of political leaders? How do affects such as shame, pride, fear, anger, alienation, compassion, sentimentality, boredom, disgust and paranoia inspire us to act or to refrain from acting? What role do race, class, gender, and sexuality play? Readings may include Plato, Seneca, Augustine, Weber, Durkheim, Freud, Adorno, Jameson, Tompkins, Fanon, Berlant, Ahmed, Ngai, and Massumi.

THETR 627(6270) Studies in Shakespeare: Shakespeare and Marlowe (also ENGL 627[6270])

Fall. 4 credits. B. Correll.
For description, see ENGL 627.

[THETR 703(7030) Theorizing Film

Fall. 4 credits. Next offered 2008-2009.
T. Murray.]

THETR 710(7100) The Pedagogy of Theatre

Fall. 4 credits. Corequisite: relevant undergraduate class and permission of instructor. Staff.
Provides graduate students in the field of theatre an opportunity to work directly with a

faculty member to explore pedagogical theory and practice for undergraduate theatre classes in all areas of the curriculum.

Acting

THETR 155(1550) Rehearsal and Performance

Fall or spring. 1-2 credits; 1 credit per production experience per semester up to 2 credits per semester. Students must register for course in semester in which credit is earned. Prerequisite: students who are assigned roles after tryouts at department's scheduled auditions. Students should add this course only after they have been assigned roles. S-U grades only.

The study, development, and performance of roles in departmental theatre or dance productions or the study and practice of directing as experienced in assisting faculty and guest directors.

THETR 205(2050) Rehearsal Workshop

Fall or spring. 2 credits. Limited to 30 students. Prerequisites: participation in a particular department production and permission of instructor. Staff.
Enables students participating in a particular production to gain expertise and/or knowledge to contribute to that production. The focus of the course depends on the needs of a particular production (e.g., history, choreography, textwork, dramaturgy).

THETR 280(2800) Introduction to Acting (LA-AS)

Fall or spring. 3 credits. Limited to 16 students per sec. Preregistration and registration only through roster in department office, 223 Schwartz Center. No online registration. Staff.

An introduction to the actor's technique and performance skills, exploring the elements necessary to begin training as an actor, i.e., observation, concentration, and imagination. Focus is on physical and vocal exercises, improvisation, and text and character. There is required play reading, play attendance, and some scene study.

THETR 281(2810) Acting I (LA-AS)

Fall or spring. 3 credits. Limited to 14 students per sec. Prerequisites: sophomore standing and above; THETR 280 and audition. Registration only through roster in department office, 223 Schwartz Center. Practical exploration of the actor's craft through exercises in physical and psychological action, improvisation and scene study.

[THETR 282(2820) Standard American Stage Speech (LA-AS)

Fall. 3 credits. Limited to 10 students.
Prerequisites: THETR 280 and permission of instructor. Next offered 2007-2008.
A. Van Dyke.

Introduction to Standard American Stage Speech. Study of various regional American accents and Standard American Stage Speech using the International Phonetic Alphabet (IPA) as a way to designate the vowel, diphthong, and consonant sounds of spoken English. The goal of this course is to learn speech for use in performing Shakespeare, Shaw, Chekhov, Moliere, etc.]

THETR 284(2840) Speech and Dialects for Performance (LA-AS)

Spring. 3 credits. Limited to 10 students. Primarily for department majors. Prerequisites: THETR 281 and permission of instructor. A. Van Dyke.

Development of speech and dialects in dramatic text.

THETR 380(3800) Acting II (LA-AS)

Fall. 3 credits. Limited to 12 students. Prerequisite: THETR 281 and audition. S. Cole.

Continuation of Acting I. Special consideration is given to a physical approach to characterization.

THETR 381(3810) Acting III: Advanced Scene Study (LA-AS)

Spring. 3 credits. Limited to 10 students. Prerequisite: audition. Strong preference given to those who have taken THETR 446. B. Levitt.

Focuses on advanced problems for the stage. Monologues and scenes are drawn from Shakespeare and classical sources.

[THETR 384(3840) Commedia: A Contemporization of Physical Acting Styles and the Comic Approach (also VISST 385(3850)) (LA-AS)]

Fall. 3 credits. Limited to 10 students. Prerequisite: THETR 281 and permission of instructor. Next offered 2008–2009. B. Milles.

A wholly physical acting course based in the practices of Commedia dell'arte—stock characters, physical lazzi, improvisation, street theatre—using improvisation, some mask work, clown and viewpoint training. An exploration of how to use the body to illuminate text, and how to mine text to maximize comedy.]

THETR 385(3850) Advanced Studies in Acting Techniques (LA-AS)

Fall. 3 credits; may be repeated for credit. Limited to 8 students. Prerequisites: THETR 281, audition, and permission of instructor. Fall: The Techniques of Comedy. S. Cole.

Acting in Comedy. Text: A study of the nature of comedy and laughter in the theatre and the techniques of acting which sustain the actor in the comedic style.

THETR 386(3860) Solo Performance

Fall. 4 credits. Prerequisites: THETR 280, 281 and permission of instructor. B. Levitt. THETR 386 was designed to explore the evolution and performance of material from nonscripted texts and focus on the performance of those texts by the solo performer. Material may be drawn from newspapers, novels, poetry, non-fiction, biography, auto-biography, and interviews.

[THETR 481(4810) Senior Seminar in Theater Exploration

Spring. 3 credits. Prerequisites: 300-level acting course and/or senior theater student by permission of instructors. Next offered 2008–2009. B. Levitt and A. Van Dyke. This seminar will re-explore and summarize the techniques taught in acting and theater classes relating to performance and serve as a culminating experience for those undergraduates whose major study of interest during their four years at Cornell has been in the performance side of Theatre Arts. Over the semester, students will read and analyze material written by actors, agents, and scholars in acting technique, comparing it to what they have learned, and working toward creating a guide for graduating seniors who will pursue

performing arts. Studies will focus on auditioning, scene-work, cold reading, text analysis, and acting in film, theater, and television. The course will include lectures given by Resident Professional Teaching Associates, guest artists visiting the department, and possibly from members of other departments and the professional theater community.]

Directing**THETR 177(1770) Student Laboratory Theatre Company**

Spring. 1–2 credits.

The Student Laboratory Theatre Company (SLTC) is a group of student-actors who earn credit by acting in three scenes directed by students taking THETR 498. Students enrolling in SLTC for credit earn 1 credit for two projects and 2 credits for three projects. SLTC also meets with directors once a week.

THETR 398(3980) Fundamentals of Directing I (also VISST 398(3798)) (LA-AS)

Fall. 3 credits. Limited to 9 students. Prerequisite: permission of instructor. Special consideration given to students who have completed THETR 280 or are intending to continue in area of stage or screen directing. Students should see instructor one year in advance to sign up for course. D. Feldshuh.

Focused, practical exercises teach the student fundamental staging techniques that bring written text to theatrical life. A core objective is to increase the student's awareness of why and how certain stage events communicate effectively to an audience. Each student directs a number of exercises as well as a short scene.

THETR 498(4980) Fundamentals of Directing II (LA-AS)

Spring. 4 credits. Limited enrollment. Prerequisite: THETR 280 and 398, and permission of instructor. Recommended: THETR 250 and 281. D. Feldshuh.

Builds on the staging techniques learned in Fundamentals of Directing I. In this course each student directs actors from the Student Laboratory Theatre Company in a series of projects and public presentations focusing on specific directorial challenges.

THETR 499(4990) Practicum in Directing

Fall or spring. 1–4 credits. Prerequisites: THETR 240, 250, 280, 398, 498, and permission of instructor. D. Feldshuh. Allows the student who has completed the appropriate prerequisites the opportunity to direct a full presentation of theatre in conjunction with a faculty mentor. May also involve an internship with a prominent director on campus or the opportunity to assistant direct a faculty or guest director.

Playwriting**THETR 348(3480) Playwriting (LA-AS)**

Fall. 4 credits. Limited to 12 students. Prerequisite: permission of instructor. B. Milles.

Various approaches and techniques are examined as the student is introduced to the art and craft of dramatic writing. The student is required to read dramatic texts, observe theatre productions and rehearsals, and write. The semester culminates in the completion of a 20- to 30-minute one-act play.

[THETR 349(3490) Advanced Playwriting (LA-AS)]

4 credits. Prerequisite: THETR 348 or permission of instructor. Next offered 2008–2009. B. Milles.

Continuation of THETR 348. An intensive writing class. Students are encouraged to explore a rich creative landscape culminating in the completion of a full length play. Focus is on the clarification of dramatic action with emphasis on conflict, theatrical language and refining the visual impulse.]

[THETR 497(4970) Seminar in Playwriting

1–4 credits. Prerequisite: THETR 348 and 349 and permission of instructor. Next offered 2008–2009. Staff.

Extension of THETR 348 and 349. Students formulate a process for developing a full-length play, which they develop over the course of the semester. The class meetings are made up of discussions about the students' process and creative tactics, and reading of material generated by the playwrights.]

Design, Technology, and Stage Management**Design****THETR 250(2500) Fundamentals of Theatre Design and Technology (LA-AS)**

Fall and spring. 4 credits. Limited to 12 students. Not open to first-semester freshmen. Registration only through department roster in 223 Schwartz Center. Highly recommended: concurrent enrollment in 1 credit of Production Lab (THETR 151 or 251). Students required to purchase materials that instructors specify (approx. cost \$50). K. Goetz, W. Cross, E. Intemann, and S. Bernstein.

Lectures, discussion, and project work introduce the principles of designing scenery, costumes, lighting and sound, and the technical process of realizing designs on stage.

[THETR 254(2540) Theatrical Makeup Studio

Spring. 3 credits. Limited to 10 students. Prerequisite: permission of instructor. Registration only through department roster in 223 Schwartz Center. Students are required to purchase makeup kits that instructor provides (approx. cost \$50). It is expected that any interested student will have taken courses within the department in any of the areas of: design, acting, dance, or film, or will have completed rehearsal and performance (THETR 155) credit. Basic technique of makeup design and application for the stage including corrective, old age, likeness, and animals; use of some three-dimensional makeup and false facial hair.]

THETR 319(3190) Music, Dance, and Light (also DANCE/VISST 319(3590)) (LA-AS)

Fall. 3 credits. Attendance at dance concerts and music concerts required. E. Intemann and A. Fogelsanger.

Artistic values, parameters, and concerns of music (sound design), dance, and lighting design are compared and contrasted, and the combination of design elements is analyzed in contemporary dance. Includes writing in response to readings, audio and video recordings, and performances. Some classes devoted to creating sound, movement, and lighting.

THETR 341(3410) CAD Studio for Theatre Design

Fall and/or spring. 3 credits. Prerequisite: THETR 250 and 340 and permission of instructor. Registration only through department roster in 223 Schwartz Center. Experience in theatre production and graphic communication helpful but not essential. Staff.

Students will utilize commercially available computer assisted design software to explore the process of designing scenery, costume and lighting for the live theatre. AutoCad, Vectorworks and Photoshop are some of the applications utilized.

THETR 343(3430) Costume History: From Fig Leaf to Vanity # (LA-AS)

Fall. 3 credits. Limited to 20 students. S. Bernstein.

Offers an overview of the history of clothing from the first signs of clothing to the early 20th century. It investigates social, political, economic, technological, geographic, ecological, and artistic influences on costume.

THETR 362(3620) Lighting Design Studio I (also DANCE 362(3660), VISST 364(3620)) (LA-AS)

Fall. 4 credits. Limited to 6 students. E. Intemann.

The theory and practice of lighting design as a medium for artistic expression. This course explores the aesthetic and mechanical aspects of light and their application in a variety of disciplines. Emphasis is on understanding lighting's function in an environment and manipulating light effectively. Artistic style and viewpoint are also covered.

THETR 364(3640) Scenic Design Studio (LA-AS)

Fall. 3 credits. Limited to 10 students. Prerequisite: THETR 250 and 340 or permission of instructor. Recommended: experience in theatre production and graphic skills. Students are required to purchase materials that instructor will specify (approx. cost \$50). K. Goetz.

An exploration of the process of designing scenery for the live theatre. Projects employ various media to explore dramatic use of architecture, the scenic space, and elements of interior design.

THETR 365(3650) Automated Lighting and Control

Fall. 3 credits. Limited to 8 students. E. Intemann and F. Sellers.

Covers the understanding and application of light control technologies, including electrical systems, color, optics, dimming protocols, and console programming. Students complete a series of projects culminating in the programming and use of moving fixtures and lighting visualization software.

THETR 366(3660) Costume Design Studio (LA-AS)

Spring. 3 credits; may be repeated for credit Limited to 10 students. Students are required to purchase materials that instructor will specify (approx. cost \$70). S. Bernstein.

Design of costumes for the theatre, concentrating on script and character analysis, period research, design elements, figure drawing and rendering skills, and an understanding of production style.

THETR 368(3680) Sound Design and Digital Audio (also DANCE 368(3680), MUSIC 355(3431)) (LA-AS)

Spring. 3 credits. Prerequisite: permission of instructor. Recommended: some experience with audio/video recording or editing.

Basics of digital audio, psychoacoustics, and sound design as they apply to theatre, film, and music production. Weekly projects require time spent in the studio outside of class. Students create soundtracks for text and moving image, with final projects in 5.1 surround sound, using Pro Tools and Digital Performer.

THETR 369(3690) Interactive Performance Technology (also DANCE 369(3560), MUSIC 356(3441)) (LA-AS)

Fall. 3 credits. Prerequisite: laptop computer and MAX/MSP and Jitter software required, see www.cycling74.com for student software pricing. Lab performance at end of semester. W. Cross and A. Fogelsanger.

Introduction to the multimedia programming platforms MAX/MSP/Jitter and their application to computer-interactive dance (interactive dance technology). Intended to bring together programmers and dancers. Each student will create software patches and movement pieces, and collaborate with others on a final project focusing on the input, manipulation, and output of movement, sound, video, graphics, and lighting in live dance performance. Topics include digital audio/video processing, MIDI control, sensor use, electroacoustic music, history of computer technology and dance up to the present, gestural expression, choreography, composition, design, and aesthetics. Includes 2-hour lab. There will be assigned online readings.

THETR 371(3710) Costume Design Studio II (LA-AS)

Fall. 3 credits. Limited to 10 students. Prerequisite: THETR 366, or THETR 250 with permission of instructor. Students are required to purchase materials that instructor will specify (approx. cost \$50). S. Bernstein.

Explores unconventional costume designs for theatre and dance. Deals with the special considerations found in many plays and performance pieces, such as the theatricalization of nonhuman subjects (e.g., animals, plants, machines, magical creatures), the visualization of music, or the support or enhancement of movement. Also covers alternative (some non-Western) ways to create character through costume, make-up, masks, and wearable forms of puppetry.

THETR 462(4620) Lighting Design Studio II (also DANCE 462(4660)) (LA-AS)

Spring. 4 credits. Limited to 6 students. Prerequisite: THETR 250 or 362 or permission of instructor. E. Intemann.

Concentrates on designing lighting for different genres of performance in various venues. Emphasis is placed on developing both the visual sophistication and the technical artistry of the lighting designer. Commitment, personal style, and professional presentation are stressed.

THETR 464(4640) Scene Design Studio II (LA-AS)

Spring. 3 credits. Prerequisite: THETR 364 or permission of instructor. Students are required to purchase materials that instructor will specify (approx. cost \$50). K. Goetz.

Projects and activities are tailored to the creative and developmental needs of the individual student with emphasis on developing professional standards and practices that would prepare the student for a major design assignment in the department production season.

Technology**THETR 252(2520) Technical Production Studio I**

Fall. 3 credits. Limited to 6 students. D. Hall and F. Sellers.

Stage Lighting and Sound Technology: the practical aspects of lighting and sound technology including equipment setup, engineering, electrics, organization, recording techniques, and production paperwork are explored through projects, lectures, and class discussions. In addition to twice-weekly class meetings the course requires a laboratory commitment of 50 hours for the semester.

THETR 256(2560) Technical Production Studio II

Spring. 3 credits. Limited to 6 students. Students are required to purchase materials that instructor will specify (approx. cost \$15). Prerequisite: THETR 250 or permission of instructor. Additional hands-on time in prop and paint shops required, to be discussed. C. Seakatz and T. Ostrander.

Scene Painting: introduction to the basic techniques of painting scenery, including but not limited to the layout and painting of bricks, marble, stone, and wood grain for the theatre. Individual projects in scene painting and participation on paint crew for productions are included.

Stage Properties: introduction to the processes of propmaking, including furniture construction and upholstery techniques, use of shop tools and materials, period research, and painting and finishing.

THETR 340(3400) Theatrical Drafting and Technical Drawing Studio

Fall. 3 credits. Limited to 5 students. Prerequisite: permission of instructor. S. Brookhouse.

Implementation of the fundamentals of drafting and technical drawing. Introduction of the concept of an individual style in the approach to drafting for the theatre. Involves a series of projects to familiarize students with the convention and process of visualization and drafting, using both mechanical drafting techniques and AUTOCAD.

THETR 352(3520) Themed Entertainment: The Technical Perspective

Fall. 3 credits. Limited to 12 students. R. Archer.

Exploration into the integration of art and science in today's theme parks and interactive entertainment attractions. Papers, projects, and discussions deal with planning and development aspects of large-scale entertainment projects including architecture, engineering, construction, and attraction installation. Focus is on the specialized

entertainment technologies that make these attractions work: audio and lighting design, ride and show control systems, and special effects.

THETR 354(3540) Stagecraft Studio

Fall. 3 credits. Prerequisite: THETR 250 or permission of instructor. Highly recommended: concurrent enrollment in at least 1 credit of THETR 151 or 251. R. Archer.

Exploration of the techniques and practice of theatre operation, scenic construction, stage mechanics, rigging, painting, and model building.

THETR 356(3560) Costume Construction Studio

Spring. 3 credits. Highly recommended: concurrent enrollment in at least 1 credit of THETR 151 or 251. Lab fee: \$100 (paid in class). R. MacPike.

Project/lecture/discussion class in costume research, patterning, cutting, construction, and fitting.

THETR 360(3600) Costumes: Special Projects

Fall. 3 credits; may be repeated for credit. Prerequisite: permission of instructor. Lab fee: \$150 (paid in class). R. MacPike.

Designed for students who have completed a basic construction class (in THETR or TXA, or another department). Each fall, this project-oriented course focuses on one of the following areas of costume crafts: millinery, fabric modification, or mask making. Students should check with the instructor to find out each fall which topic is being offered.

Stage Management

THETR 153(1530) Stage Management Production Laboratory I (also DANCE 153[1630])

Fall and spring. 1-2 credits; may be repeated for credit. Before registering, students must attend orientation meeting at 7:30 P.M. in Kiplinger Theatre at Schwartz Center on first Tuesday of classes. Prerequisite: permission of instructor. P. Lillard.

Practical experience in theatrical production as assistant stage manager for a dance theatre concert or as a stage manager for readings, Black Box lab productions, or SLTC under the supervision of the faculty production manager. THETR 370 complements this course.

THETR 253(2530) Stage Management Laboratory II (also DANCE 253[2630])

Fall and spring. 1-5 credits; may be repeated for credit. Before registering, students must attend orientation meeting at 7:30 P.M. in Kiplinger Theatre at Schwartz Center on first Tuesday of classes. Prerequisite: permission of instructor. P. Lillard.

Practical experience in theatrical production as assistant stage manager for a season production under the supervision of the faculty production manager. THETR 370 complements this course.

THETR 353(3530) Stage Management Laboratory III

Fall and spring. 1-4 credits; may be repeated for credit. Before registering, students must attend orientation meeting at 7:30 P.M. in Kiplinger Theatre at Schwartz Center on first Tuesday of classes. Prerequisite: permission of instructor. P. Lillard.

Practical experience in theatrical production as stage manager for a dance theatre concert or an AUTP production under the supervision of the faculty production manager. THETR 370 complements this course.

THETR 370(3700) Stage Management Studio

Fall. 2 credits. Prerequisite: THETR 250 or 280 or permission of instructor. Students are required to purchase materials that instructor will specify (approx. cost \$10). P. Lillard.

Introduction to the concepts and techniques of stage management as they relate to specific areas of production. Development of relevant communication skills and an understanding of the production process as experienced by a working stage manager or assistant stage manager. THETR 153, 253, and 353 complement this course.

THETR 453(4530) Stage Management Laboratory IV

Fall and spring. 1-5 credits; may be repeated for credit. Prerequisite: admission to Advanced Undergraduate Theatre Program. P. Lillard.

Practical experience in theatrical production as stage manager for a season production under the supervision of the faculty production manager.

Production Laboratories

THETR 151(1510) Production Laboratory I (also DANCE 151[1610])

Fall and spring. 1-3 credits; may be repeated for credit. No prerequisites or experience required. Orientation meeting at 7:30 P.M. first Tuesday of classes each semester in Kiplinger Theatre at Schwartz Center. P. Lillard, S. Brookhouse, and F. Sellers.

Provides practical experiences in theatrical production. Students can work on scenery, costumes, properties, lighting, or stage crew.

THETR 251(2510) Production Laboratory II (also DANCE 251[2610])

Fall and spring. 1-3 credits; may be repeated for credit. Prerequisite: permission of instructor. Orientation meeting at 7:30 P.M. on first Tuesday of classes each semester in Kiplinger Theatre at Schwartz Center. P. Lillard, D. Hall, F. Sellers, and R. MacPike.

Practical experience in theatrical production, as a light board operator, sound board operator, video operator, sound technician, head dresser or scenery/props special project.

THETR 351(3510) Production Laboratory III

Fall and spring. 1-3 credits; may be repeated for credit. Prerequisite: permission of instructor. P. Lillard, R. Archer, S. Brookhouse, K. Goetz, D. Hall, E. Intemann, and F. Sellers.

Practical experience in theatrical production as a master electrician, assistant technical director, assistant costume shop manager, or assistant to a faculty or guest director or designer.

THETR 451(4510) Production Laboratory IV

Fall and spring. 1-4 credits; may be repeated for credit. Prerequisite: admission to Advanced Undergraduate Theatre Program. P. Lillard, R. Archer, S. Brookhouse, K. Goetz, D. Hall, and E. Intemann.

Practical experience in theatrical production, in the position of designer, shop manager, technical director, or sound engineer.

Independent Study, Internships, and Honors

THETR 300(3000) Independent Study

Summer, fall, or spring. 1-4 credits. Independent study in the theatre allows students the opportunity to pursue special interests not treated in regularly scheduled courses. A faculty member, who becomes the student's instructor for the course, must approve the student's program of study and agree to provide continuing supervision of the work. Students must prepare a proposal for independent study, which is available in 225 Schwartz Center.

THETR 485(4850) Undergraduate Internship

Fall, spring, or summer. 1-3 credits. To be eligible to enroll and receive credit for an internship, students must either be majors or be concentrators in the department. Students are responsible for arranging their own internships in consultation with the faculty in their area of choice *before* preregistration for the semester in which the internship is planned to take place. To receive credit within this course, the internship must be unpaid. Students must follow the rules and procedures stated in the departmental internship form.

THETR 495(4950) Honors Research Tutorial

Fall or spring. 4 credits. Prerequisite: honors students in theatre. First of a two-semester sequence (the second is THETR 496) for seniors engaged in an honors project.

THETR 496(4960) Honors Research Tutorial

Fall or spring. 4 credits. Prerequisite: honors students in theatre. Second of a two-semester sequence (the first is THETR 495) for students engaged in an honors project.

Film

D. Fredericksen (director of undergraduate studies in film), S. Haenni, M. Rivchin, A. Villarejo (on leave 2007-2008)

The study of film began in this department in the 1930s and continues to be based here. In the intervening years, however, it has also spread into a significant number of other departments in the College: African studies, anthropology, Asian studies, comparative literature, English, German studies, government, history, psychology, Romance studies, and women's studies. This proliferation of courses has been accompanied by a comparable proliferation of perspectives and faculty concerns, e.g., the relationship of national cinemas to national literatures and specific cultures, film's relationships to myth and ideology, the use of film as historical evidence, film's efficacy as a rhetorical medium, and film's contribution to perennial issues in aesthetics, the history of the arts, and studies in cognition. However, foundational courses in film production and in the history, theory, and criticism of film as an art are centered in this department.

This richness of courses and perspectives is matched by the ways in which students may make film the focus of their undergraduate studies. The three ways currently being used are: (1) majoring in film within the Department of Theatre, Film, and Dance; (2) constructing an individually tailored Independent Major in film (including the possibility of placing film in tandem with another medium or discipline); and (3) focusing on film as a College Scholar. Students interested in options 2 or 3 should consult both Don Fredericksen (director of undergraduate studies in film) and the director of the College Scholar Program or the director of the Independent Major program. Students interested in the first option should consult Don Fredericksen (director of undergraduate studies in film). In addition, students should be aware that the college has recently approved a five-course concentration in visual studies, which can be taken independently of, or in conjunction with, a major in film. Students interested in the visual studies concentration should contact its director, Shirley Samuels, in the Department of Art History and Visual Studies.

Film Major Requirements

The department's film major requires a total of 50 credits in film and related courses. Students should note that a number of film courses—including two required "core" courses: (FILM 375 and 376)—are offered in alternating years. This means that *students cannot fulfill the requirements for the major in less than two years* and that they should plan accordingly, in consultation with their major advisor. In particular, students must plan to be in residence at Cornell during the fall semesters of both their junior and senior years to take FILM 375 and 376. Within the "core" required courses, FILM 274, Introduction to Film Analysis, is to be taken during the sophomore year. **Note: Prospective majors must earn a grade of B (not B-) or higher in FILM 274 to be accepted into the major. Students may not enter the major until they have completed FILM 274 in the fall semester of their sophomore year.**

Majors wishing to use the production courses in a substantial manner must plan carefully and work within certain limits. These courses are FILM 324, 377, 383, 422, 477, 478, 493. *Enrollment in each of these courses is limited by the nature of the work and by facilities.* Enrollment in FILM 422, 477, 478, and 493 depends on the quality of previous work in FILM 377 and/or 383; enrollment is not guaranteed. Majors *without* a strong interest in production can complete the production requirement with one course: FILM 377, after they have taken FILM 274 in their sophomore year. The total credits in production courses cannot exceed 20 hours; this limit is strictly enforced.

1. A core of *four* film courses:

FILM 274 Introduction to Film Analysis (offered every fall semester) 4

[FILM 375 History and Theory of Commercial Narrative Film (offered alternate fall semesters; next offered fall 2008 (prerequisite for film majors: FILM 274)) 4

FILM 376 History and Theory of Documentary and Experimental Film (offered alternate fall semesters;

offered fall 2007) (prerequisite for Film majors: FILM 274) 4

FILM 377 Introduction to 16mm and Digital Filmmaking (offered fall 2007, spring 2008, and fall 2008; not offered spring 2009) 4

2. *One* of the following theatre courses:

THETR 250 Fundamentals of Theatre Design/Technology (offered every semester) 4

THETR 280 Introduction to Acting (offered every semester) 3

THETR 398 Directing I (prerequisite: permission) (offered every fall semester) 3

3. *Four* courses (15–16 credits) in film offered by Theatre, Film and Dance as below, or (with permission of advisor) by other departments:

[FILM 265 Studies in Film Analysis: Hitchcock's Films (offered fall 2008) 4]

FILM 276 Survey of American Film (offered fall 2007) 4

FILM 329 Political Theory and Cinema (offered spring 2008) 4

FILM 305 (also AM ST 305) Americans Abroad (offered spring 2008)

FILM 344 American Film Melodrama (offered spring 2008) 4]

[FILM 346 Film Noir (offered occasionally) 4]

FILM 369 Fast-Talking Dames and Sad Ladies: 1940s and Now (offered yearly; offered spring 2008) 4

[FILM 378 Soviet Film of 20s and French Film of 60s (offered occasionally) 4]

FILM 379 Modern Documentary Film (offered alternate spring semesters; offered spring 2008) 4

FILM 383 Screenwriting (offered spring 2008) 4

[FILM 386 Cinema and Social Change (offered occasionally; next offered 2008–2009)] 4]

FILM 393 International Film of the 1970s (offered fall 2007) 4

FILM 395 Video: Art, Theory, Politics (offered occasionally) 4

[FILM 422 Cinematography (offered spring 2009) 3]

AS&RC 435 African Cinema (offered spring 2008) 4

[FILM 455 History of Modern Polish Cinema (next offered spring 2009) 4]

[FILM 473 Film and Spiritual Questions (offered alternate spring semesters; next offered spring 2009) 4]

FILM 474 Jung, Film, and the Process of Self-Knowledge (offered alternate years; offered spring 2008) 4

[FILM 475 Seminar in the Cinema I (offered most years; next offered 2008–2009; topic varies; may be repeated for credit) 4

[FILM 476 Seminar in the Cinema II (offered occasionally; topic varies; may be repeated for credit) 4

FILM 477 Intermediate Film and Video Projects: Documentary and Experimental Workshop (offered alternate years; offered fall 2007) 4

[FILM 478 Intermediate Film and Video Projects: Narrative Workshop (offered alternate years; offered fall 2008)] 4

FILM 493 Advanced Film and Video Projects (offered spring 2008) 4

4. 15 credits of related course work inside or outside the Department of Theatre, Film and Dance (as approved by the major advisor). The courses chosen to fulfill this requirement should reinforce a major's particular interest in film and will not necessarily be film courses *per se*. For example, a student interested in the psychology of film, or in ethnographic film, or in film *vis-à-vis* intellectual or social history, or in film and social change will be encouraged to choose related course work in those areas.

5. Students must earn at least a B (not B-) in FILM 274 to enter the major. In all subsequent courses used for the major a grade of C (not C-) must be achieved. Courses in which these minimums are not achieved must be repeated if the student is to receive credit in the major.

6. Course work in production cannot exceed 20 credit hours.

Honors

Students who have maintained a GPA of 3.7 in their film major courses, and an average of 3.2 in all courses, may elect to work for honors in film during their senior year. They must consult with their advisor *in the spring of their junior year* about the honors program in film. Honors projects are possible in filmmaking and film analysis (history, criticism, theory). Projects in filmmaking require written analytical component related to the creative work.

The Advanced Undergraduate Filmmaking Program

The department offers advanced study in filmmaking to students who qualify on the basis of outstanding achievement in film studies and film production courses. Acceptance to the AUFPP and admission to the advanced film production course (FILM 493) will be determined by a committee of film faculty in December of each year, based on applications from students who have a proposal (script or treatment) for a film or video project.

Film Study Abroad

The College of Arts and Sciences, through this department and in concert with a number of other American colleges and universities, offers up to a full year of study at the Paris Center for Critical Studies and, through the center, at the University of Paris III. The center's film program is theoretical, critical, and historical. It is most useful to students whose major interest is in the academic study of film and serves as a complement to Cornell's film courses. Fluency in French is

required. FILM 274 and 375 are prerequisites. Inquiries should be addressed to Professor Fredericksen, Cornell's liaison with the center.

Computing in the Arts Undergraduate Concentration

A concentration in Computing in the Arts with an emphasis on film is available both to film majors and to students majoring in other subjects. For more information, see "Computing in the Arts Undergraduate Concentration" under "Departments, Programs and Courses" in the "College of Arts and Sciences," or contact the Director of Undergraduate Studies in Film.

[FILM 265(2650) Studies in Film Analysis: Hitchcock's Films (also ENGL/FGSS 263(2630)) (LA-AS)]

Fall. 4 credits. Next offered 2008–2009. L. Bogel.

For description, see ENGL 263.]

FILM 274(2740) Introduction to Film Analysis: Meaning and Value (also FILM 674(6740), VISST 274(674/2174/6740)) (LA-AS)

Fall. 4 credits. Limited to 40 students. Graduate students must enroll in FILM 674. D. Fredericksen.

Intensive consideration of the ways films generate meaning and of the ways we attribute meaning and value to films. Discussion ranges over commercial narrative, art cinema, documentary, and personal film modes. Prospective film majors should enroll in their sophomore year.

FILM 276(2760) Survey of American Film (also AM ST 230(2760), VISST 230(2300)) (LA-AS)

Fall. 4 credits. Required film screenings; discussion once a week. Offered alternate years. S. Haenni.

For description, see AM ST 230.

FILM 293(2930) Middle Eastern Cinema (also NES 293(2793), COM L 293(2930), JWST 291(2793), VISST 293(2193)) @ (LA-AS)

Fall. 4 credits. D. Starr.

For description, see NES 293.

FILM 305(3050) Americans Abroad (also AM ST 305(3050), ENGL 352(3520), VISST 306(3605))

Spring. 4 credits. S. Haenni.

For description see AM ST 305.

[FILM 324(3240) Animation Workshop: Experimental and Traditional Methods (LA-AS)]

Summer. 3 credits. Cost for equipment: \$150. L. Tomlinson.

The art of animation involves many dimensions, including time and motion. This course introduces students to the fundamentals of traditional animation and the mechanics used to capture the illusion of movement. By modeling the projects on the work of artists who have pushed the potential of animation in new directions, students investigate innovative ways of animating sequential images and objects. Emphasizing tactile processes—drawing, sculpting, and painting—and recording the images, we create to capture movement and expression students explore a variety of experimental and fine-arts approaches used in modern-day animation.

[FILM 325(3250) Animation History and Practice (LA-AS)]

Summer. 3 credits. Limited to 12 students. Equipment fee: \$75. Next offered summer 2008. M. Tomlinson.

Beginning with the pre-history of animation, optical toys and magic lantern projections, and continuing through a century of animation history to contemporary work, this course investigates the history of animation from around the world, through a variety of hands-on production projects, as well as lectures, discussions, research, and screenings. Combining tactile and digital methods, students create weekly collaborative and individual animated films, incorporating lessons from the historical work studied.

FILM 329(3290) Political Theory and Cinema (also GERST 355(3550)) (CA-AS)

Spring. 4 credits. G. Waite.

For description, see GERST 355.

[FILM 341(3410) French Film (also FREN 336(3360)) (LA-AS)]

Fall. 4 credits. Offered occasionally; next offered 2008–2009. T. Murray.]

FILM 344(3440) American Film Melodrama (also AM ST 338(3440), ENGL 344(3440), VISST 345(3645)) (LA-AS)

Spring. 4 credits. Recommended: some background in film analysis. S. Haenni.

Melodrama has often been dismissed as overwrought with emotion, moralizing, and sensationalism. Film studies, however, has reconceptualized melodrama as an intriguing "mode of excess" which powerfully and profoundly affects film audiences. In this course will examine how and to what purposes melodrama has been used in the U. S. context. We will look at different aspects of melodrama—its inheritance from 19th-century stage melodrama, its pictorialism, acting style, music; its uses of paranoia, entrapment, and fast-paced action. We will consider the form and function of melodrama in different periods—1950s America, the early 20th century, the Jazz Age, the economic Depression of the 1930s, World War II, the contemporary moment. And we will ask questions such as: How does melodrama position and affect its spectators? How does it allow space for the representation of marginalized voices (of women and African Americans, for example)? How does it allow us to understand the nation? How does it address questions of social justice? How has melodrama been viewed and appropriated by oppositional audiences and fan cultures? What are the implications of film style for melodrama, and why is music so important to the genre? Screenings will include films by Griffith, Vidor, Cukor, Hitchcock, Ophuls, Sirk, Ray, Spielberg, and others and will be guided by readings in film history and film theory.

[FILM 346(3460) Film Noir (also AM ST 348(3480), VISST 348(3480)) (LA-AS)]

Spring. 4 credits. Recommended: some course work in film. Offered occasionally; next offered 2008–2009. S. Haenni.

Focuses on Hollywood films of the 1940s–1950s known for their stylizedness and commentary on the dark side of American life, and on "neo-noir" from the 1970s to the present. Considers stylistic aspects and cultural contexts.

FILM 369(3690) Fast-Talking Dames and Sad Ladies: 1940s and Now (also ENGL/FGSS 369(3690)) (LA-AS)

Fall. 4 credits. L. Bogel.

For description, see ENGL 369.

[FILM 375(3750) History and Theory of the Commercial Narrative Film (also VISST 375(3175)) (LA-AS)]

Fall. 4 credits. Prerequisite for film majors FILM 274. Offered alternate years; next offered 2008–2009 and 2010–2011. Fee for screening expenses, \$10 (paid in class). S. Haenni.

A survey of narrative cinema from around the world, with emphases on early narrative cinema, cinematic realism, interwar European modernist cinema, popular American film, post-World War II art cinema, and recent global cinema.]

FILM 376(3760) History and Theory of Documentary and Experimental Film (also VISST 376(3176)) (LA-AS)

Fall. 4 credits. Highly recommended: FILM 274. Offered alternate years. Fee for screening expenses: \$10 (paid in class). D. Fredericksen.

Analyzes canonical works in documentary film up to the end of World War II, including films by Vertov, Flaherty, Grierson, Hurwitz, Grierson, Wright, Capra, Riefenstahl, and the connection between documentary film and modernism(s) in the 1920s and 1930s. Also includes analysis of canonical works in the avant-garde/experimental/personal film tradition(s) in Europe and the United States from the 1920s to the 1980s, including French impressionism, surrealism, the New Realism, graphic cinema, and the several patterns of the American personal film during its heyday (1940s to the late 1970s).

FILM 377(3770) Introduction to 16mm and Digital Filmmaking (LA-AS)

Fall 2007, spring 2008, and fall 2008. 4 credits. Limited to 12 students. Intended for juniors and seniors (who may need to sign up a year or more in advance), with priority given to film majors. Prerequisite: FILM 274 (or higher-level film studies course) and permission of instructor. Equipment fee: \$150 (paid in class). Average cost to each student for materials and processing is \$500. M. Rivchin.

Creative, hands-on production course in filmmaking, emphasizing the development of original ideas and the acquisition of basic technical skills in both 16mm and miniDV formats: cinematography, lighting, sound recording and editing, and film and non-linear digital editing. Students complete several exercises and two short projects; the final project may be narrative, documentary, experimental, or animation and is shown in a public screening at the end of the semester on campus.

[FILM 378(3780) Soviet Film of the 1920s and French Film of the 1960s (LA-AS)]

Spring. 4 credits. Fee for screening expenses: \$10 (paid in class). Highly recommended: FILM 375. Offered occasionally. D. Fredericksen.

Intensive treatment of two distinct periods of radical innovation in film theory and history. Emphasis is on the animated relationship between theory and filmmaking during these two decades.]

FILM 379(3790) Modern Documentary Film (LA-AS)

Spring. 4 credits. Highly recommended: FILM 376. Fee for screening expenses: \$10 (paid in class). Offered alternate spring semesters. D. Fredericksen.

An intensive consideration of canonical documentary films from 1945 to the present. Emphases are on the documentary film as an artistic form with a distinct history and set of theoretical questions, as a sociopolitical force, as an ethnographic medium within and without a filmmaker's culture, and as a televised medium of persuasion and expression.

FILM 383(3830) Screenwriting (LA-AS)

Spring. 4 credits. Limited to 12 students. Prerequisite: completed application, writing sample, and permission of instructor.

Students must go to 225 CT to apply. Staff. This course explores the fundamentals of traditional Hollywood and independent screenplays.

[FILM 386(3860) Cinema and Social Change (LA-AS)]

Spring. 4 credits. Next offered 2008-2009. A. Villarejo.

Explores the role of cinema in social and political change that address processes of decolonization as well as issues of labor, health-care, gender and racial equity, globalization, war, and imperialism.]

FILM 393(3930) International Film of the 1970s (also AM ST/VISST 393[3930]) (LA-AS)

Fall. 4 credits. Recommended: some background in film analysis. S. Haenni. More than being characterized by a retreat from political, critical cinema and by the reemergence of the Hollywood blockbuster such as *The Godfather*, *Star Wars*, and *Jaws*, the 1970s was also a period of enormous innovation and cross-fertilization in film history and film style. Profound changes in the film industry and film technology, along with larger social, political, and cultural developments, enabled new ways of understanding—and using—the cinematic image as well as film sound. In this course, we focus on the transnational nature of seventies film: the influence of European art cinema on American film; the reworking and rejuvenation of American film genres (neo-noir, western, horror film, the road movie); European responses to and appropriation of American film genres, film conventions, and subject matter; Asian influences in the United States, particularly the martial arts film; and the emergence of film subcultures, such as black independent film and blaxploitation. Screenings may include work by directors such as Robert Altman, Francis Ford Coppola, Michelangelo Antonioni, Rainer Werner Fassbinder, and Charles Burnett and are guided by readings in film criticism and film history.

[FILM 422(4220) Cinematography (LA-AS)]

Spring. 4 credits. Limited to 8 students. Pre- or corequisite to FILM 493. Prerequisite: permission of instructor. Letter grades only. Equipment fee: \$150. Advanced camera and lighting techniques, designed for students who have taken at least FILM 377 and/or advanced photography courses or computer animation courses. Next offered 2008-2009. M. Rivchin.

Students work on a series of tests, short exercises, and scene projects using sync and

non-sync 16mm cameras, digital video cameras, camera movement apparatus, lighting instruments, a range of lighting instruments, filters, and gels and digital video cameras to expand their knowledge of the technical and aesthetic aspects of cinematography.]

[FILM 430(4300) Topics in American Studies: The Cinema and the American City (also AM ST 430.10, VISST 430[4630]) (CA-AS)]

Fall. 4 credits. Weekly screenings TBA. Next offered 2008-2009. S. Haenni.

The emergence of the cinema in the late-19th century coincided with the emergence of a new kind of metropolis, characterized, among other things, by new traffic systems (elevated train, subway, automobile), new racial, ethnic, and sexual regimes, and new urban planning. The cinema was inevitably affected by the ways in which the city developed, while at the same time it also made the city legible. In this course, we will examine how American cities and towns have been represented in film in different ways, as, for instance, musical symphonies, mysteries to be deciphered, or post-apocalyptic wastelands. We will explore how gender, racial, ethnic, class and sexual identities are negotiated in the modern, cinematic city. Screenings will range from silent and early sound films, such as *The Crowd* and 1930s musicals, to contemporary cinema, such as *Do the Right Thing* and *Blade Runner*. Our viewings will be guided by readings in film and urban theory and history.]

[FILM 455(4550) History of Modern Polish Film (LA-AS)]

Spring. 4 credits. Prerequisite: some film analysis course work. Next offered 2008-2009. D. Fredericksen.

Analysis of Polish film from 1945 to the present, within the context of Poland's postwar history. Topics include the period of socialist realism, the so-called "Polish School" (1956-1962), the cinema of moral anxiety, Solidarity cinema, and the Polish documentary tradition. Key directors considered include Ford, Wajda, Munk, Polanski, Skolimowski, Zanussi, Falk, Piwowski, Bugajski, Krzystek, Kijowski, Zaorski, Kieslowski, and Lozinski. Some attention is given to the development of Polish film theory. The extra-filmic context is set by such works as Norman Davies' *Heart of Europe*, Czeslaw Milosz' *The Captive Mind*, and Eva Hoffman's *Exit into History*.]

[FILM 473(4730) Film and Spiritual Questions (LA-AS)]

Spring. 4 credits. Limited to 20 students. Offered alternate years; next offered 2008-2009. D. Fredericksen.

The use of film as a medium for the expression of spiritual questions has a long and rich history, although little attention is given to this fact in contemporary film studies. This seminar examines films and writings by filmmakers who are so inclined, including Baillie, Gardner, Bergman, Dreyer, Bresson, Gibson, Brakhage, Belson, Whitney, Rouquier, Newby, Kubrick, and Bae Yong-Kyun. Special attention is given to the work of Andrey Tarkovsky, the Russian film director and theorist. Readings include Tarkovsky's *Sculpting in Time*, Smith's *Why Religion Matters*, Eliade's *The Sacred and the Profane*, Edinger's *The Christian Archetype*, and Schrader's *Transcendental Style in Film*.]

FILM 474(4740) Jung, Film, and the Process of Self-Knowledge (LA-AS)

Spring. 4 credits. Limited to 20 students.

Offered alternate years. D. Fredericksen. "Know thyself" is one of the oldest and most enduring imperatives of the human spirit, and the *raison d'être* for liberal studies. This seminar traces in some detail the Jungian approach to this imperative and then tests its critical capacities with respect to films.

[FILM 475(4750) Seminar in Cinema (LA-AS)]

Fall. 4 credits. Next offered 2008-2009.]

FILM 476(4760) Seminar in the Cinema II (LA-AS)

Fall or spring. 4 credits. Offered occasionally.

FILM 477(4770) Intermediate Film and Video Projects: Documentary and Experimental Workshop (also VISST 477[4770]) (LA-AS)

Fall. 4 credits. Limited to 8 students. Prerequisites: FILM 377 as minimum production; priority given to those who have taken FILM 376, 379, or 386 and permission of instructor based on project proposals. Equipment fee: \$150 (paid in class). Film projects costs: \$300-\$1,500; video: \$100-\$400. M. Rivchin.

Intensive course in 16mm filmmaking and digital video in which each student develops a significant documentary or experimental project both critically and creatively. Readings, discussions, and exercises are designed to increase the student's knowledge and practice of: cinematography, lighting, sync-sound filming, and editing techniques; working with labs; digital video camera; and nonlinear (Final Cut Pro and AVID) digital editing.

[FILM 478(4780) Intermediate Film and Video Projects: Narrative Workshop (LA-AS)]

Fall. 4 credits. Limited to 8 students. Prerequisites: FILM 377 as minimum production; priority given to those who have taken FILM 375 or 383: THETR 398 or 413, and permission of instructor based on proposals. Equipment fee: \$150 (paid in class). Film projects costs: \$500-1,500; video: \$100-200. Next offered 2008-2009. M. Rivchin.

Intensive course in 16mm filmmaking and digital video in which each student develops a significant, original narrative script project that he or she then directs, shoots in crews, and edits. Student may opt for narrative documentary or experimental work as well. Readings, discussions, and exercises are designed to increase the student's knowledge and practice of directing; cinematography, lighting, sync-sound filming, and editing techniques; working with labs and sound houses; digital video camera; and digital (Final Cut Pro, AVID, and ProTools) editing.]

FILM 485(4850) Undergraduate Internship

Fall, spring, or summer. 1-3 credits.

To be eligible to enroll and receive credit for an internship, students must either be majors or concentrators in the department. Students are responsible for arranging their own internships in consultation with the faculty in their area of choice before preregistration for the semester in which the internship is planned to take place. To receive credit within the course, the internship must be unpaid.

Students must follow the rules and procedures stated on the departmental internship form.

FILM 493(4930) Advanced Film and Video Projects (LA-AS)

Spring. 4 credits. Limited to 6–8 students. Permission only. Prerequisite: minimum FILM 377, priority given to those who have taken 477, 478, or 324. Recommended: FILM 383 and THETR 398. Equipment fee: \$150. Project costs: \$500–2,000. M. Rivchin.

Intensive filmmaking course in which students focus on developing and producing a single, already-proposed (15–30 min.) 16mm film or digital video project over the semester. Students direct and edit their own (or collaborative) projects working in crews for sync-sound dialog narrative films or documentaries and in small groups for technical exercises and assisting in non-sync projects. Readings, discussions, and exercises are designed to increase the student's knowledge and practice of script revision; directing; scene breakdowns, auditions, and casting; cinematography, lighting, sync-sound filming, and editing techniques; working with labs and sound houses; digital video camera; and digital (Final Cut Pro, AVID, and ProTools) editing.

FILM 674(6740) Introduction to Film Analysis: Meaning and Value

Fall. 4 credits. Limited to 10 graduate students. D. Frederickson.

Intensive consideration of the ways films generate meaning and of the ways we attribute meaning and value to films. Discussion ranges over commercial narrative, documentary, and personal film modes. Graduate students who intend to teach film at the undergraduate level are especially welcome. In addition to full participation in the work of FILM 274, graduate students read and discuss in tutorials primary sources in film theory.

FILM 722(7220) Independent Study in Film for Graduate Students

Fall or spring. Staff.

Related Courses in other Departments

COM L 408 Global Martial Arts Film and Literature. Fall. 4 credits. Liu.

ENGL 469 The Paranoid Style in Contemporary American Film and Fiction. Spring. 4 credits. Attell.

S HUM 421 Cutting and Film Cutting. Spring. 4 credits. Fathy.

S HUM 428 Sensing Thinking. Spring. 4 credits. Kronengold.

Dance

Faculty: J. Chu, A. Fogelsanger (director of undergraduate studies in dance), E. Intemann, J. Kovar, J. Morgenroth, J. Self, B. Suber.

The dance program offers courses in dance technique, improvisation, composition, performance, anatomical analysis of movement, dance technology, music for dance, and the history, theory, and criticism of dance. Technique courses include introductory dance technique, modern dance at three levels, and Western classical dance at three levels. (Other dance forms, such as Indian dance, and Javanese dance, are offered periodically. A variety of courses in other dance idioms, taken through the Physical Education program, supplement these

offerings.) Technique courses develop strength, flexibility, coordination, and the ability to perceive and reproduce phrases of dance movement with clarity of rhythm, body design, and expression. The more advanced courses require the ability to perform complex phrases in various styles. Students may earn up to 16 academic credits (2 each semester) in technique courses. Students may also satisfy the physical education requirement by taking dance technique courses or other movement courses in the dance program. Students taking technique for academic credit must also register through their own colleges. The schedule for all dance technique courses is available in the main office of the Sheila W. and Richard J. Schwartz Center for the Performing Arts.

The faculty offer rehearsal and performance workshops in which they choreograph and rehearse original dances, performed in public concert. Admission to rehearsal and performance courses is by permission. Students may receive one academic credit per semester (S-U grades only) when performing in student-faculty concerts by registering for DANCE 155.

Dance Major Requirements

A revised dance major has been approved for implementation in Fall 2006. Students accepted into the major through Spring semester 2006 may choose to meet either the old requirements or the new. Students accepted beginning in Fall semester 2006 must satisfy the new requirements below. Copies of the previous requirements may be obtained from the director of undergraduate studies in dance through Spring 2008.

Prerequisites: 2 credits in category I below and one course in category II below.

Prerequisites count towards the 40 credits fulfilling the major.

The major: 40 credits (towards which the prerequisites for the major count) are required of all students majoring in dance as follows:

- I. 6 credits: six 1-credit movement courses chosen from Dance Technique (DANCE 122, 230, 231, 232, 303, 304, 306, 308, 309), Explorations (DANCE 233, 234), Improvisation (DANCE 201), Indian Dance (307), and other courses approved by the dance faculty. The 6 credits must include at least 2 from Dance Technique courses, and at least 2 from Explorations and Improvisation courses. Any two of these courses taken to satisfy the university's Physical Education requirement may be counted towards the major, thus decreasing the number of academic credits possibly to as low as 38. Movement courses taken for 0 academic credits do not count towards the major.
- II. 14 credits: Dance composition (DANCE 210, 310) and history/theory (DANCE 313, 418).
- III. 2 credits: 1 credit of performance (DANCE 155) and 1 credit of production (DANCE 151, 153, 251, or 253).
- IV. 18 credits: selected from Dance and related fields, including: at most two 1-credit movement courses beyond those required in category I; at most four credits in DANCE 151, 153, 155, 251, 253, and 316 beyond those required in category III; and at most two courses outside of Dance, which may include courses on sound,

music, light, non-western movement forms, design, performance and visual studies, and must be approved by the dance faculty. Otherwise any Dance courses may be used to satisfy category IV.

In all courses used for the dance major, a grade of C (not C-) must be achieved. Courses in which this minimum is not achieved must be repeated if the student is to receive credit in the major.

A partial list of courses from outside Dance that may be used to satisfy part IV of the major requirements includes MUSIC 103, 104, 105, 107, and 108; and THETR 250.

Honors

Students who have maintained a GPA of 3.5 in classes for the dance major and an average of 3.0 in all courses may elect to work for honors in dance during their senior year. They must consult with their advisor in the spring of their junior year about the honors program in dance.

Computing in the Arts Undergraduate Concentration

A concentration in Computing in the Arts with an emphasis on dance is available both to dance majors and to students majoring in other subjects. For more information, see "Computing in the Arts Undergraduate Concentration" under "Departments, Programs and Courses" in the "College of Arts and Sciences," or contact the Director of Undergraduate Studies in Dance, danceprogram@cornell.edu. Information is also online at www.cis.cornell.edu/ComputingArts/.

Dance Technique

Students may register for any Western dance technique course (DANCE 122, 230, 231, 232, 303, 304, 306, 308, and 309) for 0 or 1 academic credit, with a limit of 2 credits per semester and 16 credits total. That is, in a single semester students may take at most two 1-credit dance technique courses; all additional dance technique courses must be taken for 0 credit. All these courses may be repeated for credit, and students will usually be placed in a given course for at least two semesters.

Dance Improvisation (DANCE 201), Explorations in Movement and Performance (DANCE 233), and Indian Dance (DANCE 307) may be taken for 0 or 1 academic credit, which does not count as part of the 2 credit per semester and 16 credits total limit above.

Students also have the option to receive physical education (PE) credit for all the courses above to satisfy the university's physical education requirement. Students may not get Dance and PE credit simultaneously for the same course.

The courses Dance Technique I (DANCE 122), Dance Improvisation (DANCE 201), Explorations in Movement and Performance (DANCE 233), and Indian Dance (DANCE 307) are introductory courses open to all students. Students registering in Dance may pre-enroll, enroll online, or sign up with the Department of Theatre, Film, and Dance registrar in 223 Schwartz before the end of the add period; they will need a drop/add slip. Students registering in PE may pre-enroll, or add during the one- or two-day PE registration before the

first day of classes; afterward, registration is not allowed.

The non-introductory dance technique courses (DANCE 230, 231, 232, 303, 304, 306, 308, and 309) will now allow online pre-enrollment and online enrollment, but the instructor will ultimately use his or her own discretion to determine the right classes for a student to attend. All students, and new students in particular, should be prepared for the possibility of being asked to switch courses during the first few weeks of the semester.

The advanced dance technique courses (DANCE 303, 304, 306, 308, and 309) may be taken with an additional 1-credit academic component, Writing Dance Criticism (DANCE 316). Students may also receive credit for performing in two ways, by being cast in a faculty-choreographed dance (DANCE 155), and by dancing in student-choreographed works made for composition courses (DANCE 156). Any two 1-credit dance courses may be aggregated to count as one-half course for the purpose of satisfying the College of Arts and Sciences 34-course requirement. They do not satisfy a distribution requirement.

DANCE 122(1200) Dance Technique I (also PE 160[1180])

Fall and spring. 0 to 1 credit; may be repeated. Satisfies PE requirement if taken as PE. Attendance at dance concerts required. S-U grades only. Fall, J. Kovar, J. Chu; spring, J. Morgenroth, J. Self.

Entry-level class. Covers the fundamentals of elementary dance training. Movement sequences focusing on rhythm, placement, and vitality of performance through an anatomically sound dance technique.

DANCE 127(1300) Non-Western Dance Techniques

Spring. 0 to 1 credits. Staff.

Study and practice of basic movement vocabulary and dances in performance traditions outside of the European and American concert genres of ballet and modern dance. Specific form to be studied will vary. No previous experience in dance is necessary. May be repeated for credit.

DANCE 155(1250) Rehearsal and Performance

Fall and spring. 1 credit. Students must register for course in semester in which credit is earned; requests for retroactive credit are not honored. Prerequisite: students cast in faculty-choreographed dances. Students may add this course only after they have been assigned roles. S-U grades only.

Includes the study, development, and performance of roles in departmental dance productions.

DANCE 156(1500) Dance Performance Workshop

Fall and spring. 1 credit. Attendance at dance concerts is required. May be repeated. S-U grades only. Fall, B. Suber; spring, J. Chu.

Students learn and perform dances choreographed by Dance Composition students. Course work includes: rehearsing an average of two hours a week with student choreographers, attending dance composition class (faculty led) once a week for 90 minutes, and possibly performing in departmental dance productions or mid or end of semester class showings. Students in this course will receive feedback on their performance from

the faculty member teaching the Composition course and from the composition students within class discussion periods, to help them refine their skills as performers (including dynamics, focus, phrasing, rhythm, dramatic presence, etc.) in both classroom and public showing of student work. They will sometimes participate in class discussion of the student compositions, gaining insight into the compositional process. This type of participation will be an introduction to dance composition for students interested in pursuing the composition curriculum.

DANCE 201(2480) Dance Improvisation

Fall. 1 credit. Limited to 12 students.

Attendance at dance concerts required. S-U grades only. A. Fogelsanger.

When the body knows when, where, and how to move without prior direction, we call that improvisation. This course coaxes inspiration, seeking to make it reliable and to keep it surprising. It offers the possibility of "training" one's movement instincts to respond relevantly and with spontaneity. Solo and group forms are covered. Live musical accompaniment.

DANCE 230(2200) Dance Technique II

Fall. 0 to 1 credit; may be repeated. S-U grades only. Satisfies PE requirement if taken as PE. Attendance at dance concerts required. Fall, J. Self.

Introductory dance technique intended for students with some dance training. Material covered includes attention to rhythm, design, and movement expression.

[DANCE 231(2210) Dance Technique II/Classical (also PE 161)]

Spring. 0 to 1 credit; may be repeated. Satisfies PE requirement if taken as PE. Attendance at dance concerts required. S-U grades only. Next offered 2008-2009. B. Suber.

Introductory Western classical technique intended for students with some dance training. Includes basic barre and centre work focusing on presence and presentation.]

DANCE 232(2220) Dance Technique II/Modern (also PE 162)

Spring. 0 to 1 credit; may be repeated. S-U grades only. Satisfies PE requirement if taken as PE. Attendance at dance concerts required. J. Kovar.

Introductory modern technique intended for students with some dance training. Material covered includes specific spinal and center work with attention to rhythm, design, and movement expression.

DANCE 233(2410) Explorations in Movement and Performance (also PE 163, VISST 233[2533])

Spring. 0 or 1 credit. Limited to 16 students. Satisfies PE requirement if taken as PE. Attendance at dance concerts required. S-U grades only. J. Self.

A physically demanding exploration into various movement realms. Specific subjects covered are genderized movement, erotic power, spiritual power, ritual, and performance. Techniques include extensive use of breath, animal movement, improvisation, and group games. This course requires an eagerness to investigate the nature of performance and explore unfamiliar territory in movement.

[DANCE 234(3410) Explorations in Movement and Performance II: Masculine, Feminine, or Neutral

Spring. 0 or 1 credit. Limited to 16 students. Prerequisite: DANCE 201, 233, or permission of instructor. Satisfies PE requirement if taken as PE. Attendance at dance concerts required. S-U grades only. Next offered 2008-2009. J. Self.

Continues themes from Explorations in Movement and Performance (DANCE 233), with special emphasis on the differences and similarities between "masculine" or "feminine" expressions in movement and performance.]

DANCE 235(2430) Hip-Hop, Hollywood, and Home Movies: Exploring Movement and Media (also PE 164, VISST 235[2430])

Fall. 3 credits. Permission of instructor. Letter grades. Requirements include attendance at performances with written responses, selected readings, and home-movie production. J. Self.

This course is a laboratory for generating and exploring contemporary dance forms. Monday sessions are devoted to viewing media and discussion. We will be looking at early B-boy films, recent dance-battle documentaries, classic dance clips from Hollywood films, and other related pieces (Black Dance, Show Dance, Art Dance). Wednesday is a laboratory for trying out movements and creating simple dance/music videos (home-movies). This course will be of special value for choreographers using popular dance forms and those interested in the history of popular culture. Everyone must be willing and able to improvise dance moves, teach classmates and exchange movement ideas.

[DANCE 236(2450) Public Voice and Civic Gesture (also THETR 236[2360], VISST 236[2360])

Fall. 1 credit. Next offered 2008-2009. B. Suber and B. Milles.

This course combines acting and movement techniques encouraging process-oriented work. Focusing on performance in civic spaces, the class works to examine the politics of status and the social role of bodily (including vocal) expression of both performer and audience. Working within the specific context of urban public spaces, the class will question the function of monument and the character of urbanism in relation to individual bodies while understanding how these bodies combine to create a body politic. The class will consider traditional tools of political and social satire, including Commedia dell'Arte. Fundamental in commedia is the exploration of status, the gradations of power and influence and role-playing. Students will create their own texts and movement as well as draw from other textual and visual sources. The class will conclude with a public performance.]

DANCE 303(2240) Dance Technique Workshop (also PE 165, VISST 303[3503])

Spring. 0 to 1 credit; may be repeated. Satisfies PE requirement if taken as PE. Attendance at dance concerts required. S-U grades only. Requirements include attendance at performances with written responses. J. Self.

Primarily Parallel Universe. The course will explore working primarily in parallel position as a basic technique for strengthening the legs, posture and physical presence by blending movements from Modern Dance, Jazz, Hip

Hop, Yoga and other related forms. Students must be willing to experiment with new concepts of constructing movement techniques.]

DANCE 304(3210) Dance Technique III/ Classical (also PE 166)

Fall and spring. 0 to 1 credit; may be repeated. Satisfies PE requirement if taken as PE. Attendance at dance concerts required. S-U grades only. B. Suber. Intermediate Western classical technique. Work is done on strengthening the body through a movement technique emphasizing presence and musicality based on harmonic muscular control.

DANCE 306(3220) Dance Technique III/ Modern (also PE 167)

Fall and spring. 0 to 1 credit; may be repeated. Satisfies PE requirement if taken as PE. Attendance at dance concerts required. S-U grades only. Fall, J. Morgenroth; spring, J. Chu. Intermediate modern technique focusing on rhythm, placement, and phrasing for students who are prepared to refine the skills of dancing. Students are challenged by complex phrases and musicality.

DANCE 308(4220) Dance Technique IV/ Modern (also PE 168, VISST 308[3508])

Fall and spring. 0 to 1 credits; may be repeated. Satisfies PE requirement if taken as PE. Attendance at dance concerts required. S-U grades only. Fall, J. Chu; spring, B. Suber.

Advanced and pre-professional Modern technique. A continuation of and supplement to DANCE 306.

DANCE 309(4210) Dance Technique IV/ Classical (also PE 169)

Fall and spring. 0 to 1 credit; may be repeated. Satisfies PE requirement if taken as PE. Attendance at dance concerts required. S-U grades only. B. Suber.

Advanced and pre-professional Western classical. A continuation of and supplement to DANCE 304.

DANCE 316(3240) Writing Dance Criticism

Fall and spring. 1 credit; may be repeated. Corequisite: DANCE 303, 304, 306, 308, or 309. Attendance at two or three concerts required. Fall, J. Chu, B. Suber, and J. Morgenroth; spring, J. Chu, B. Suber, and J. Self.

Dance criticism for incorporation with technique. Topics rotate depending on instructor, class focus, and relevance to guest dance companies. Attendance at two or three concerts required (same as for dance technique), additional readings and/or viewing of recorded performances as assigned by instructor, and three five- to seven-page analytic papers.

DANCE 355(3250) Repertory

Spring. 0 or 1 credit. Prerequisite: permission of instructor. Attendance at dance performances required. J. Chu. Reconstructs a dance by an important modern dance choreographer. Through a close examination of the composition process, and with readings, the course studies the historical and aesthetic role of this work and its continued influence today.

DANCE 407(4399) Early Dance (also MUSIC 407[4511])

Fall. 1 credit. R. Harris-Warrick. For description, see MUSIC 407.

Dance Composition

DANCE 210(2500) Beginning Dance Composition (also VISST 211[2711]) (LA-AS)

Fall and spring. 3 credits. Attendance at dance concerts required. Fall, B. Suber; spring, J. Chu. Weekly assignments in basic elements of choreography. Students compose and present short studies that are discussed and reworked. Problems are defined and explored through class improvisations. Informal showing at end of semester. Includes informal showing of work.

DANCE 310(3500) Intermediate Dance Composition I (LA-AS)

Fall and spring. 3 credits. Prerequisite: DANCE 210. Fall, B. Suber; spring, J. Chu. Intermediate choreographic projects are critiqued in progress by faculty and peers. Consideration of design problems in costuming and lighting. For full description, see DANCE 210.

DANCE 311(3510) Intermediate Dance Composition II (LA-AS)

Fall and spring. 3 credits. Prerequisite: DANCE 310. Co- or prerequisite: DANCE 323 or 324. Attendance at dance concerts required. Fall, B. Suber; spring, J. Chu. Continuation of DANCE 310. For full description, see DANCE 210.

DANCE 324(3530) Music and Choreography (also MUSIC 408[4512]) (LA-AS)

Spring. 3 credits. Attendance at dance concerts and music concerts required. A. Fogelsanger. Intended to expose students to music they probably have not heard and are unlikely to seek out on their own, particularly contemporary "classical" music and music used in modern concert dance; to mark out the possible relationships between music and dance when combined in concert; and to pull apart the compositional construction of musical pieces to consider what musical structuring ideas might be profitably applied by choreographers to making dances. The course also considers examples from film and the plastic arts, provides students with some experience making sound and movement, and includes discussion of and writing about concerts, and audio and video recordings. Reading topics include criticism and aesthetics of dance, music, and the arts in general, in particular concentrating on counterpoint, minimalism, improvisation, and polystylism. DANCE 324 replaces the sequence DANCE 212-323.

DANCE 410(4500) Advanced Dance Composition I (LA-AS)

Fall and spring. 3 credits. Prerequisite: DANCE 311. Attendance at dance concerts required. Fall, B. Suber and J. Self; spring, J. Chu.

Students work on advanced choreographic problems, to be presented in performance. Work in progress is critiqued by faculty members on a regular basis. For full description, see DANCE 210.

DANCE 411(4510) Advanced Dance Composition II (LA-AS)

Fall and spring. 3 credits. Prerequisite: DANCE 410. Attendance at dance concerts required. Fall, B. Suber and J. Self; spring, J. Chu. Continuation of DANCE 410. For full description, see DANCE 210.

DANCE 491(4010) Senior Project in Dance

Fall and spring. 3 credits; students receive grade when DANCE 492 is completed. Prerequisite: DANCE 311; senior dance majors. First of a two-semester sequence (the second is DANCE 492) for senior dance majors. Students create a project in choreography and performance, dance, film or video, dance pedagogy, or other appropriate area agreed on with their senior project advisor and committee. In addition, there is a 15-page paper that expands their work into a historical, theoretical, or aesthetic context. For guidelines see the director of undergraduate studies in dance.

DANCE 492(4020) Senior Project in Dance II

Fall or spring. 3 credits. Prerequisite: DANCE 491. Second of a two-semester sequence (the first is DANCE 491) for senior dance majors.

History, Criticism, and Theory

DANCE 312(3120) The Moving Body: Form and Function (PBS supplementary list)

Fall. 3 credits. J. Morgenroth. Examines the bodily systems involved in human movement with particular attention to dance movement. Readings in texts on human anatomy, physiology, and kinesiology.

DANCE 313(3141) History: The Body in Performance (LA-AS)

Fall. 4 credits. Prerequisites: Readings, viewing of videos, and attendance at live performances. Letter grades only. J. Chu. How does the social production of dance reflect its historical context? What is the meaning of the "beautiful" in dance? Beginning with 16th-century court dances, we will explore how aesthetics have been aligned both with and against politics in various periods and genres of the performing body, looking at dance as insiders' diplomacy and outsiders' rebellion. Is postmodern dance a discourse of its past? What is the contemporary relationship among African, European, and stubbornly American traditions? This course is designed to promote a critical appreciation of dance, its values and its ambitions, by developing an historical and cultural understanding.

DANCE 418(4080) Seminar in Dance Studies (also VISST 419[4719]) (CA-AS)

Spring. 4 credits. Limited to 15 students. J. Morgenroth. Topic for Spring 2008: Movement in Time or Space.

According to modern science, we live in a spacetime continuum. The visual arts, including dance, painting, sculpture, film, and theater, create their own spacetimes in which they perform and present their work. While the arts and sciences are often thought of as existing in separate worlds, practitioners of each realm are exploring similar questions within their own modes of inquiry. Thinking

about dance performance will be pivotal in this course, looking at the ways in which artists in the 20th century have warped traditional notions of time and space. We will also consider how scientific theories about time and space have affected the arts. We will view selections and excerpts from dances and theater pieces by Merce Cunningham, Anna Halprin, Trisha Brown, Elizabeth Streb, Robert Wilson, Eiko & Koma. There will be a variety of writing assignments and an individual or paired project that will ask that you reexamine and renew your assumptions about time and space.

[DANCE 424(4089) Formalist Aesthetics of Modernism and Postmodernism in Music, Dance, and Painting]

Spring. 4 credits. Limited to 15 students. Next offered 2008-2009. A. Fogelsanger. This seminar examines the formalist side of the aesthetics of modernism from the idea of absolute music and the rise of abstraction in painting, through atonality, modern dance, minimalism, and postmodernism. Includes readings of Sally Banes, Monroe Beardsley, Walter Benjamin, Hans Bertens, Peter Berger, Italo Calvino, Roger Copeland, Susanne Langer, David Michae Levin, Susan Manning, Leonard Meyer, Yvonne Rainer, Meyer Schapiro, Susan Sontag, and others.]

DANCE 490(4000) Senior Paper in Dance

Fall and spring. 4 credits. Prerequisite: DANCE 418, senior standing. Attendance at dance concerts is required. Under faculty direction, the students write a senior paper in dance history, criticism, or theory.

Interdisciplinary Courses

DANCE 237(2580) Courses of Action (LA-AS)

Fall. 3 credits. J. Self. This course is a hands-on, pro-active course devoted to studying current performance venues on the Cornell Campus, the Tompkins County area, New York State, New York City and beyond. There will be several components, including a movement/warm-up sequence in every class meeting and some additional movement exercises to promote flexibility and movement awareness. Each session will also include some performance history. Most importantly, it will include planning, creating, and producing short-term and long-term events. This includes finding venues, finding financial support and promotion. Events at Cornell in the Schwartz Center Summer Series will be included as well as interacting with New York State Dance Force members which include artists, producers, and presenters from around New York State and NYC. In addition, we would be working via e-mail and live contact with the internationally renowned performance artist, Robert Wilson as consultant for creating international works of performance. The course will include visits to venues in NYC (Dance Theater Workshop, Danspace at St. Mark's Church in the Bowery), as well as visits to Robert Wilson's Watermill Arts Center on Long Island, and other upstate venues in Rochester, Elmira, Buffalo and Albany.

DANCE 258(3550) Techno Soma Kinesics: Repositioning the Performing Body in Space through the Lenses of Digital Media (LA-AS)

Spring. 4 credits. B. Suber.

Works to expand the specific aesthetics of live performance (music, theatre, and dance) and traditional technological media presentation (sound, film, and video) through the use of emerging digital technologies. Included in the process is the analysis of built environments that both inspire and are designed to be inhabited by these disciplines. This studio course explores the resulting neo-performance forms being created within the range of digital media processing; such as gallery installations, multimedia dance-theatre, personal interactive media (games and digital art) and web projects. Computer-imaging and sound-production programs are examined and used in the class work (human form-animation software [Life Forms], vocal recording and digital editing [Protools and Hyperprism], digital-imaging tools [Photoshop, Final Cut Pro, Flash, Dreamweaver, and Director]. The new context of digital performance raises questions concerning the use of traditional lighting, set, costume, and sound-design techniques that are examined as they are repositioned by digital-translation tools with the goal of creating experimental and/or conceptual multimedia performance and/or installation work. Theoretical texts on dance and theatrical performance, film studies, the dynamic social body, architecture, and digital technology are also used to support conceptual creative work.

DANCE 319(3590) Music, Dance, and Light (also THETR 319[3190], VISST 319[3519]) (LA-AS)

Spring. 3 credits. Attendance at dance concerts and music concerts required. E. Intemann and A. Fogelsanger. Artistic values, parameters, and concerns of music (sound design), dance, and lighting design are compared and contrasted, and the combination of design elements is analyzed in contemporary dance.

DANCE 358(4550) Techno Soma Kinesics II: Repositioning the Performing Body in Space through the Lenses of Digital Media (LA-AS)

Spring. 4 credits. B. Suber. Continuation of DANCE 258. DANCE 358 expands on principles using more complex and interactive software using MAX/MSP and Jitter. Director, DVD Studio Pro, and Dreamweaver.

DANCE 369(3560) Interactive Performance Technology (also THETR 369[3690], MUSIC 356[3441]) (LA-AS)

Fall. 3 credits. Prerequisites: laptop computer and MAX/MSP software and Jitter software required, see www.cycling74.com for student software pricing. Lab performance at end of semester. W. Cross and A. Fogelsanger. Introduction to the multimedia programming platforms MAX/MSP/Jitter and their application to computer-interactive dance (interactive dance technology). Intended to bring together programmers and dancers. Each student will create software patches and movement pieces, and collaborate with others on a final project focusing on the input, manipulation, and output of movement, sound, video, graphics, and lighting in live dance performance. Topics include digital audio/video processing, MIDI control, sensor use, electroacoustic music, history of computer technology and dance up to the present, gestural expression, choreography, composition, design, and aesthetics. Includes 2-hour lab. There will be assigned online readings.

[DANCE 391(3570) Media Arts Studio I (also ART/MUSIC/FILM 391, ARCH 459/659) (LA-AS)]

Fall or spring. 3 credits. Prerequisite: permission of instructor and junior standing, minimum FILM 377 or 277, or DANCE 258. Equipment fee: \$50 (paid in class). Next offered 2008-2009. Participating faculty include M. Rivchin, film; B. Suber, dance. A collaborative interdisciplinary studio course in a variety of digital and electronic media, including art, architecture, music, dance, film, and video.]

Production

DANCE 151(1610) Dance Production Laboratory I (also THETR 151[1510])

Fall and spring. 1-3 credits; may be repeated for credit. Prerequisite: permission of instructor. No experience required. Orientation meeting at 7:30 p.m. first Tuesday of classes each semester in Kiplinger Theatre at Schwartz Center. P. Lillard.

Provides practical experiences in running stage crew or dresser crew for dance.

DANCE 153(1630) Dance Stage Management Production Laboratory I (also THETR 153[1530])

Fall and spring. 1-2 credits; may be repeated for credit. Before registering, students must attend orientation meeting at 7:30 p.m. in Kiplinger Theatre at Schwartz Center on first Tuesday of classes. Prerequisite: permission of instructor. P. Lillard.

Practical experience in dance production as assistant stage manager for a dance theatre concert under the supervision of the faculty production manager. THETR 370 complements this course.

DANCE 251(2610) Dance Production Laboratory II (also THETR 251[2510])

Fall and spring. 1-3 credits; may be repeated for credit. Prerequisite: permission of instructor. Orientation meeting at 7:30 p.m. on first Tuesday of classes each semester in Kiplinger Theatre at Schwartz Center. P. Lillard, D. Hall, F. Sellers, and R. MacPike.

Practical experience in dance production, as a light board operator, sound board operator, video operator, or head dresser.

DANCE 253(2630) Dance Stage Management Laboratory II (also THETR 253[2530])

Fall and spring. 1-4 credits; may be repeated for credit. Before registering, students must attend orientation meeting at 7:30 p.m. in Kiplinger Theatre at Schwartz Center on first Tuesday of classes. Prerequisite: permission of instructor. P. Lillard.

Practical experience in theatrical production as assistant stage manager for the dance mainstage concert under the supervision of the faculty production manager. THETR 370 complements this course.

DANCE 362(3660) Lighting Design Studio I (also THETR/VISST 362[3620]) (LA-AS)

For description, see THETR 362.

DANCE 368(3680) Sound Design and Digital Audio (also THETR 368[3680], MUSIC 355[3431]) (LA-AS)

For description, see THETR 368.

DANCE 462(4660) Lighting Design Studio II (also THETR 462(4620))

For description, see THETR 462.

Independent Study, Internships, and Honors**DANCE 300(3000) Independent Study**

Summer, fall, or spring. 1–4 credits.

Independent study in the dance allows students the opportunity to pursue special interests not treated in regularly scheduled courses. A faculty member, who becomes the student's instructor for the course must approve the student's program of study and agree to provide continuing supervision of the work. Students must prepare a proposal for independent study, which is available in 225 Schwartz.

DANCE 485(4850) Undergraduate Internship

Fall, spring, or summer. 1–3 credits.

To be eligible to enroll and receive credit for an internship, students must be majors in the department. Students are responsible for arranging their own internships in consultation with the faculty in their area of choice *before* preregistration for the semester in which the internship is planned to take place. To receive credit within this course, the internship must be unpaid. Students must follow the rules and procedures stated in the departmental internship form.

DANCE 495(4050) Honors Research Tutorial

Fall or spring. 4 credits. Prerequisite: honors students in dance.

First of a two-semester sequence (the second is DANCE 496) for seniors engaged in an honors project. For guidelines, see the director of undergraduate studies in dance.

DANCE 496(4060) Honors Research Tutorial

Fall or spring. 4 credits. Prerequisite: honors students in dance.

Second of a two-semester sequence (the first is DANCE 495) for students engaged in an honors project.

Tracks toward admission into the advanced undergraduate theatre program**Design, Technology, and Stage Management**

Recommended for individuals interested in a **Design, Technology, or Stage Management** track:

THETR 250 Fundamentals of Theatre Design and Technology

THETR 151 and 251 Production Lab I and II (at least 1 credit of each)

Recommended for Scenic Design emphasis:

THETR 340 Theatrical Drafting and Technical Drawing Studio

THETR 351 Production Lab III (as design assistant)

THETR 354 Stagecraft Studio

THETR 364 Scene Design Studio

Upon admission to the program:

THETR 451 Production Lab IV (at least 1 credit)

Recommended for costume design or costume shop management emphasis:

THETR 351 Production Lab III (as design assistant)

THETR 356 Costume Construction Studio

THETR 366 Costume Design Studio I

THETR 371 Costume Design Studio II

Upon admission to the program:

THETR 451 Production Lab IV (at least 1 credit)

Recommended for Lighting Design or costume shop management emphasis:

THETR 252 Technical Production Studio I

THETR 351 Production Lab III (as student electrician)

THETR 351 Production Lab III (as design assistant)

THETR 362 Lighting Design Studio I

Upon admission to the program:

THETR 451 Production Lab IV (at least 1 credit)

Recommended for Sound Design emphasis:

THETR 251 Production Lab II (as student sound technician)

THETR 252 Technical Production Studio I

THETR 351 Production Lab III (as design assistant)

THETR 368 Sound Design Studio

Upon admission to the program:

THETR 451 Production Lab IV (at least 1 credit)

Recommended for Technical Direction emphasis:

THETR 252 Technical Production Studio I

THETR 256 Technical Production Studio II

THETR 340 Theatrical Drafting and Technical Drawing Studio

THETR 351 Production Lab III (as assistant technical director)

THETR 354 Stagecraft Studio

Upon admission to the program:

THETR 451 Production Lab IV (at least 1 credit)

Recommended for Stage Management emphasis:

THETR 253 or 353 Stage Management Lab II or III—two assignments

THETR 280 Introduction to Acting

THETR 370 Stage Management Studio

THETR 398 Fundamentals of Directing I

Upon admission to the program:

THETR 453 Stage Management Lab IV

Directing

Recommended for individuals interested in a directing track:

THETR 151 and THETR 251 Production Lab I and II (at least 2 combined credits)

THETR 240/THETR 241 Introduction to Western Theatre (one semester *only*)

THETR 250 Fundamentals of Design and Technology

THETR 280 Introduction to Acting

THETR 398 Directing I

THETR 498 Directing II

Playwriting

Recommended for individuals interested in a playwriting track:

THETR 240/241 Introduction to Western Theatre (one semester *only*)

THETR 250 Fundamentals of Design and Technology

THETR 280 Introduction to Acting

THETR 348 Playwriting

THETR 349 Advanced Playwriting

Students in the advanced undergraduate theatre program may also elect to take FILM 485 (Undergraduate Internship) in addition to or in place of one production assignment.

VISUAL STUDIES UNDERGRADUATE CONCENTRATION

Visual studies is a concentration that provides students with an interdisciplinary approach to visual art, media (including digital works), performance, and perception. Faculty from departments throughout the college offer courses toward the concentration, drawing on such various disciplines as the history of art, film, literary studies, psychology, theatre, and others. Requirements for the concentration include the core course VISST 200 Introduction to Visual Studies, which introduces students to critical thinking about visual studies as well as close textual analysis in social and historical contexts. Responsibility for teaching the core course rotates among faculty affiliated with the concentration, and the course, as much as possible, entail interdepartmental collaboration in the form of team-teaching or visiting lectures. In addition to the core course, students must take one course within the Theory/Practice group plus three additional courses at the 300 level or above. No more than two courses from the concentration may be double-counted toward a student's major. All courses must be taken for a letter grade.

Students interested in pursuing the concentration should first discuss it with their current advisors, and then either download the form from the visual studies web site (www.arts.cornell.edu/histart/vstudies.html) or contact the visual studies undergraduate coordinator, Gina Miller. After completing the form, students should attach a copy of their transcript and submit it to Gina Miller, GM08 Goldwin Smith Hall. Students who have not been in contact with a visual studies advisor will have one selected for them from among the concentration's affiliated faculty.

Interdisciplinary Graduate Concentration

In the spring of 2004, Cornell began plans for an interdisciplinary graduate concentration in visual studies that will take several years to institutionalize. The concentration in visual studies is not meant to substitute for

disciplinary training, which will not be waived by the addition of interdisciplinary courses. The "Course List in Visual Studies for 2007-2008" alerts incoming students to courses that may be relevant to their interests, and aids them in discovering the network of professors working in visual studies, spanning multiple departments and schools at Cornell.

Visual Studies Concentration Course List

VISST 101(1101) Visual Literacy and Interior Design (also DEA 101)

Fall. 3 credits. J. Elliott.
For description, see DEA 101.

VISST 200(2000) Introduction to Visual Studies (also COM L 200[2001], ENGL 292[2920]) (LA-AS)

Spring. 4 credits. Requirement for undergraduate concentrators.
M. Fernandez.

Provides a broad introduction of modes of vision and the historical impact of visual images, visual structures, and visual space on culture, communication, and politics. The question of "how we see" is discussed in terms of (1) procedures of sight (from optical machines to the psychology of vision and the philosophy of aesthetics); (2) spaces of vision (from landscapes to maps to cities); (3) objects of vision (from sacred sites to illuminated books to digital art); and (4) performances of vision (race, sexualities, ethnicities, cultures). Of importance to the course is the practical and conceptual relation of 20th-century visual technologies (photography, cinema, video, and computing) to their historical corollaries in the arts. The course draws on the visual traditions of both Western and non-Western societies and study texts that have defined the premises and analytic vocabularies of the visual. Through viewings, screenings, collaborative writing, and art projects, students develop the critical skills necessary to appreciate how the approaches that define visual studies complicate traditional models of defining and analyzing art objects. Guest lecturers occasionally address the class. Requirements: two objective midterm exams; occasional listserv postings; two five-page papers.

VISST 203(2020) Introduction to Feminist Theory (also FGSS 202[2020])

Fall. 3 credits. D. Reese.
For description, see FGSS 202.

VISST 211(2711) Beginning Dance Composition (also DANCE 210[2500])

Fall and spring. 3 credits. Concurrent enrollment in DANCE 212 and a dance technique class at appropriate level. Attendance at dance concerts required.
Fall, B. Suber; spring, J. Chu.

VISST 219(2190) Thinking Surrealisms (also ART H 219[2019], COM L 220[2200])

Spring. 3 credits. B. Maxwell.
For description, see COM L 220.]

VISST 230(2300) Survey of American Film (also FILM 276[2760], AM ST 230[2760])

Fall. 3 credits. S. Haenni.
For description, see AM ST 230.

[VISST 233(2533) Explorations in Movement (also DANCE 233[2410])

Fall. 0 to 1 credit. Limited to 16 students. Attendance at dance concerts required.
J. Self.

For description, see DANCE 233.]

VISST 235(2430) Hip-Hop Hollywood (also DANCE 235[2430], PE 161[1181])

Fall. 3 credits. J. Self.
For description, see DANCE 235.

[VISST 236(2430) Public Voice and Civic Gesture (also DANCE 236[2450], THETR 236[2360])

Fall. 1 credit. P. Suber and B. Milles.
For description, see DANCE 236.]

VISST 244(2744) Gamelan in Indonesian History and Cultures (also MUSIC 245[1341], ASIAN 245[2245])

Fall and spring. 3 credits. Prerequisite: permission of instructor. No previous knowledge of musical notation or performance experience required. Staff.
For description, see MUSIC 245.

VISST 245(2645) Renaissance and Baroque (also ART H 245[2400])

Fall. 4 credits. Each student must enroll in a sec. C. Lazzaro.
For description, see ART H 245.

VISST 274/674(2174/6174) Introduction to Film Analysis: Meaning and Value (also FILM 274/674[2740/6740])

Fall. 4 credits. Limited to 40 students. Graduate students should enroll in FILM 674. D. Fredericksen.
For description, see FILM 274/674.

VISST 293(2193) Middle Eastern Cinema (also NES 293[2793], COM L/FILM 293[2930], JWST 291[2793])

Fall. 4 credits. D. Starr.
For description, see NES 293.

[VISST 305(3305) Visual Perception (also PSYCH 305[3050])

Fall. 4 credits. Limited to 20 students. Prerequisite: PSYCH 205 or permission of instructor. J. Cutting.
For description, see PSYCH 305.]

VISST 306(3605) Americans Abroad (also AM ST/FILM 305[3050], ENGL 352[3520])

Spring. 3 credits. S. Haenni.
For description, see AM ST 305.

[VISST 308(3508) Dance Technique IV/Modern (also DANCE 308[4220], PE 161[1181])

Fall. 1 credit. By placement only; no pre-enrollment. Attendance at dance concerts required. J. Chu.
For description, see DANCE 308.]

VISST 319(3519) Music Dance and Light (also DANCE 319[3590])

Spring. 3 credits. E. Intemann and A. Fogelsanger.
For description, see DANCE 319.

[VISST 335(3735) Modern Western Drama, Modern Western Theatre: Theory and Practice (also THETR 335, ENGL 335[3530])

Fall. 4 credits. N. Salvato.
For description, see THETR 335.]

VISST 342(3342) Human Perception: Application to Computer Graphics, Art, and Visual Display (also PSYCH/COGST 342[3420], PSYCH 642[6420])

Fall. 3 or 4 credits; 4-credit option involves term paper. Prerequisite: PSYCH 101 or permission of instructor. PSYCH 205 strongly recommended. D. Field.
For description, see PSYCH 342.

VISST 345(3645) American Film Melodrama (also FILM 344[3440], AM ST 338[3440], ENGL 344 [3440], FGSS 345[3450])

Spring. 3 credits. S. Haenni.
For description, see FILM 344.

[VISST 348(3480) Film Noir (also AM ST 348[3480], FILM 346[3460])

Spring. 4 credits. S. Haenni.
For description, see FILM 346.

VISST 356(3560) Computing Cultures (also S&TS/COMM/INFO 356[3561])

Spring. 4 credits. P. Sengers.
For description, see S&TS 356.

VISST 362(3660) Impressionism in Society (also ART H 362[3760])

Spring. 4 credits. Not open to freshmen. Recommend: ART H 245. L. Meixner.
For description, see ART H 362.

VISST 364(3620) Lighting Design Studio I (also THETR 362[3620], DANCE 362[3660])

Fall. 4 credits. E. Intemann.
For description, see THETR 362.

VISST 366(3466) History and Theory of Digital Art (also ART H 366[3650])

Fall. 4 credits. M. Fernandez.
For description, see ART H 366.

VISST 372(3672) The Art of the Historical Avant-Garde (also GERST 377[3770], ART H 372[3672])

Fall. 4 credits. P. McBride.
For description, see GERST 377.

[VISST 375(3175) History and Theory of Commercial Narrative Film (also FILM 375[3750])

Fall. 4 credits. Fee for screening expenses: \$10 (paid in class). S. Haenni.
For description, see FILM 375.]

VISST 376(3176) History and Theory of Documentary and Experimental Film (also FILM 376[3760])

Fall. 4 credits. Fee for screening expenses: \$10 (paid in class). D. Frederickson.
For description, see FILM 376.

[VISST 385(3850) Commedia: A Contemporization of Physical Acting Styles and the Comic Approach (also THETR 384[3840])

Fall. 4 credits. Next offered 2008-2009.
B. Milles.
For description, see THETR 384.]

[VISST 387(3870) Literature and Film of South Asia (also COM L 386[3860], ASIAN 387[3387])

Spring. 4 credits. Next offered 2008-2009.
A. Banerjee.
For description, see COM L 386.]

VISST 393(3930) International Film of the 1970s (also AM ST/COM L/FILM 393[3930])

Fall. 4 credits. S. Haenni.
For description, see FILM 393.

VISST 394(3655) The House and the World: Architecture of Asia (also ART H 395[3855])

Spring. 4 credits. K. McGowan.
For description, see ART H 395.

VISST 396(3696) Arts of Southeast Asia (also ART H 396[3850])

Fall. 4 credits. K. McGowan.
For description, see ART H 396.

VISST 398(3798) Fundamentals of Directing I (also THETR 398[3980])

Fall. 3 credits. Limited to 10 students.
Prerequisite: permission of instructor.
Special consideration given to students who have completed THETR 280 or intend to continue in area of stage or screen directing. Students should see instructor one year in advance to sign up for course.
D. Feldshuh.

For description, see THETR 398.

VISST 400(4200) Proseminar (also ART H 400/600[4100/6100])

Fall and spring. 4 credits. Limited enrollment. Prerequisite: History of Art majors only. M. Fernandez and I. Dadi.
For description, see ART H 400.

VISST 407(4607) The Museum and the Object (also ART H 407[4107])

Fall. 4 credits. Prerequisites: History of Art majors only. Not open to freshmen or sophomores without permission of instructor. All classes meet in Johnson Art Museum Study Gallery. K. McGowan.

For description, see ART H 407.

[VISST 412(4120) Science, Technology and Culture (also COM L 410[4100], S&TS 412[4101])

4 credits. Next offered 2008–2009.
A. Banerjee.

For description, see COM L 410.]

VISST 415(4615) Environmental Interventions (also S HUM 415, S&TS 415[4151], INFO 415[4150])

Fall. 4 credits. P. Sengers.

For description, see S HUM 415.

VISST 419(4719) Movement in Time and Space (also DANCE 418[4080])

Spring. 4 credits. J. Morgenroth.

For description, see DANCE 418.

VISST 425(4625) Rasta, Race, and Resistance (also ART H 425[4525], AS&RC 426[4526])

Fall. 4 credits. P. Archer-Straw.

For description, see ART H 425.

VISST 426(4260) Adaption: Text/Theatrically (also THETR 426[4260])

Spring. 4 credits. B. Milles.

For description, see THETR 426.

[VISST 480(4800) Advanced Seminar in American Literature: Visual Culture in Women's Literature (also ENGL/FGSS 479[4790], ART H 479[4979])]**VISST 506(5106) Contemporary African Diaspora Art (also ART H 506[5505], AS&RC 506[6500])**

Fall. 4 credits. P. Archer-Straw.

For description, see ART H 506.

VISST 619(6619) Translation in Theory (also ASIAN 619[6619], COM L 616[6160])

Spring. 4 credits. B. deBary.

For description, see ASIAN 619.

VISST 634(6340) Deleuze and Lyotard: Aesthetic Excess and Artistic Practice (also ENGL 629[6290], COM L 634[6340], FREN 672[6720])

Spring. 4 credits. T. Murray.

For description, see COM L 634.

VISST 665(6625) Race, Gender, and Crossing Water (also ENGL 665[6650])

Spring. 4 credits. S. Samuels.

For description, see ENGL 665.

[VISST 666(6466) Media Theory: Film and Photography (also GOVT 666[6665])

Fall. 4 credits. Next offered 2009–2010.

D. Rubenstein.

For description, see GOVT 666.]

VISST 674(6174) Intro to Film Analysis (also FILM 274/674[2740/6740])

Fall. 4 credits. D. Fredericksen.

For description, see FILM 274.

Allmon, Warren, Ph.D., Harvard U. Adjunct Assoc. Prof., Earth and Atmospheric Sciences
Almy, James, Ph.D., U. of California, Irvine. Lec., Chemistry
Altschuler, Glenn C., Ph.D., Cornell U. The Thomas and Dorothy Litwin Professor of American Studies, American Studies
Ambegaokar, Vinay, Ph.D., Carnegie Inst. of Technology. Goldwin Smith Professor of Physics Emeritus, Physics/LASSP*
Amigo-Silvestre, Silvia., M.A., U. of Oregon. Sr. Lec., Romance Studies
Anderson, Benedict R., Ph.D., Cornell U. Aaron L. Binenkorb Professor of International Studies Emeritus, Government
Anderson, Christopher J., Ph.D., Washington U. Prof., Government
Andronicos, Christopher L., Ph.D., Princeton U. Assoc. Prof., Earth and Atmospheric Sciences
Arcadi, Adam Clark, Ph.D., U. of Michigan. Assoc. Prof., Anthropology
Archer, Richard J., M.A., U. of Missouri, Kansas City. Assoc. Prof., Theatre, Film, and Dance
Arias, Tomas A., Ph.D., Massachusetts Inst. of Technology. Prof., Physics/LASSP*
Arms, William, Ph.D., U. of Sussex. Prof., Computer Science
Armstrong, James, M.M., Bowling Green State U. Lec., Music
Arnesen, Ingrid, M.A., U. of California, Davis; M.A. SUNY Stony Brook. Sr. Lec., English for Academic Purposes
Arroyo, Ciriaco M., Ph.D., U. of Munich (Germany). Emerson-Hinchliff Prof. Emeritus, Romance Studies/Comparative Literature
Ascher, Robert, Ph.D., U. of California, Los Angeles. Prof. Emeritus, Anthropology
Ashcroft, Neil W., Ph.D., Cambridge U. (England). Horace White Professor of Physics Emeritus, Physics/LASSP*
Assié-Lumumba, N'Dri, Ph.D., U. of Chicago. Prof., Africana Studies and Research Center
Auffret, Isabelle, M.A., L'Universite Catholique de l'Ouest (France). Lec., Romance Studies

- Back, Allen H., Ph.D., U. of California, Berkeley. Sr. Lec., Mathematics
- Bailey, Graeme, Ph.D., U. of Birmingham. Prof., Computer Science
- Baird, Barbara, Ph.D., Cornell U. Prof., Chemistry and Chemical Biology
- Bala, Kavita, Ph.D., Massachusetts Inst. of Technology. Asst. Prof., Computer Science
- Banerjee, Anindita, Ph.D., U. of California, Los Angeles. Asst. Prof., Comparative Literature
- Baptist, Edward, Ph.D., U. of Pennsylvania. Assoc. Prof., History
- Bar, Talia, Ph.D., Yale U. Asst. Prof., Economics
- Baraldi, Michela, B.A. equivalent, U. of Bologna. Lec., Romance Studies
- Barazangi, Muawia, Ph.D., Columbia U. Prof., Earth and Atmospheric Sciences/INSTOC*

- Kanbur, Ravi, Ph.D., Oxford U. (England) T. H. Lee Prof. of World Affairs, Economics
- Kaplan, Steven L., Ph.D., Yale U. Goldwin Smith Professor of History, History
- Karig, Daniel E., Ph.D., U. of California, San Diego. Prof. Emeritus, Earth and Atmospheric Sciences
- Kaske, Carol V., Ph.D., Johns Hopkins U. Prof. Emerita, English
- Kassabov, Martin, Ph.D., Yale U. Asst. Prof., Mathematics
- Katagiri, Yukiko, M.A., Nihon Joshi Daigaku (Japan). M.A., Cornell U. Sr. Lec., Asian Studies
- Katzenstein, Mary F., Ph.D., Massachusetts Inst. of Technology. Stephen and Evalyn Milman Professor of American Studies, Government
- Katzenstein, Peter J., Ph.D., Harvard U. Walter S. Carpenter, Jr., Professor of International Studies, Government
- Kay, Robert W., Ph.D., Columbia U. Prof., Earth and Atmospheric Sciences/INSTOC*
- Kay, Suzanne Mahlburg, Ph.D., Brown U. Prof., Earth and Atmospheric Sciences/INSTOC*
- Keich, Uri, Ph.D., Courant Inst. Asst. Prof., Computer Science
- Kelley, E. Wood, Ph.D., Indiana U. Assoc. Prof., Government
- Kelley, Michael C., Ph.D., U. of California, Berkeley. Prof., Earth and Atmospheric Sciences/Electrical and Computer Engineering
- Kellock, Judith, M.M., Boston U. Assoc. Prof., Music
- Kennedy, William J., Ph.D., Yale U. Prof., Comparative Literature
- Kesten, Harry, Ph.D., Cornell U. Prof. Emeritus, Mathematics
- Khoussainov, Bakhadyr, Ph.D., Novosibirsk U. (Russia). Adj. Prof., Mathematics
- Kiefer, Nicholas M., Ph.D., Princeton U. Ta-Chung Liu Prof. of Economics
- Kim, Chris Y., M.M., U. of Michigan, Ann Arbor. Asst. Prof., Music
- Kinoshita, Toichiro, Ph.D., Tokyo U. (Japan). Goldwin Smith Professor of Physics Emeritus/LEPP¶
- Kirshner, Jonathan, Ph.D., Princeton U. Prof., Government
- Klein, Richard J., Ph.D., Yale U. Prof., Romance Studies
- Kleinberg, Jon, Ph.D., Massachusetts Inst. of Technology. Prof., Computer Science
- Kleinberg, Robert, Ph.D., Massachusetts Inst. of Technology. Asst. Prof., Computer Science
- Kline, Ronald, Ph.D., U. of Wisconsin. Sue G. and Harry E. Bovay Jr. Professor of History and Ethics of Engineering, Science and Technology Studies
- Klonner, Stefan, Ph.D., Rupecht Karls U. (Germany). Asst. Prof., Economics
- Knapp, Warren W., Ph.D., U. of Wisconsin. Prof. Emeritus, Earth and Atmospheric Sciences
- Koch, Michael, M.F.A., Wichita State U. Sr. Lec., English
- Kohn, Eduardo, Ph.D., U. of Wisconsin. Asst. Prof., Anthropology
- Kosch, Michelle, Ph.D., Columbia U. Assoc. Prof., Philosophy
- Koschmann, J. Victor, Ph.D., U. of Chicago. Prof., History
- Kovar, Janice Sue, B.S., U. of Illinois. Sr. Lec., Theatre, Film and Dance
- Kozen, Dexter, Ph.D., Cornell U. Joseph N. Pew Professor of Engineering/Computer Science
- Kramnick, Isaac, Ph.D., Harvard U. Richard J. Schwarz Professor of Government
- Krasicky, Philip, Ph.D., Cornell U. Sr. Lec., Physics
- Krivitsky, Raissa, M.A., Odessa U. (Ukraine). Sr. Lec., Russian
- Krumhansl, Carol L., Ph.D., Stanford U. Prof., Psychology
- Kufner, Herbert L., Ph.D., Cornell U. Prof. Emeritus, Modern Languages and Linguistics
- Kuniholm, Peter I., Ph.D., U. of Pennsylvania. Prof., Archaeology and Dendrochronology
- LaCapra, Dominick C., Ph.D., Harvard U. Bryce and Edith M. Bowman Professor in Humanistic Studies, History/Comparative Literature
- LaFeber, Walter F., Ph.D., U. of Wisconsin. Marie Underhill Noll Professor of American History Emeritus, History
- Lai, Clement, Ph.D., U. of California, Berkeley. Asst. Prof., Asian American Studies
- Lai, Dong, Ph.D., Cornell U. Assoc. Prof., Astronomy/CRSR†
- Lambert, Bernd, Ph.D., U. of California, Berkeley. Prof. Emeritus, Anthropology
- Langwick, Stacey, Ph.D., U. of North Carolina. Asst. Prof., Anthropology
- Larson, Naomi, M.A., Seikei U. (Japan). Sr. Lec., Asian Studies
- Law, Jane Marie, Ph.D., U. of Chicago. Assoc. Prof., Asian Studies
- Lawler, Edward J., Ph.D., U. of Wisconsin. Prof. Sociology/Industrial and Labor Relations
- Lawler, Gregory F., Ph.D., Princeton U. Adj. Prof., Mathematics
- Lawler, Margaret, M.A., San Jose State Coll. Assoc. Prof. Emerita, Theatre Arts
- Lawless, Cecelia Burke, Ph.D., Cornell U. Sr. Lec., Romance Studies
- Lazzaro, Claudia, Ph.D., Princeton U. Prof., History of Art
- Leavitt, Thomas W., Ph.D., Harvard U. Prof. Emeritus, History of Art
- LeClair, André R., Ph.D., Harvard U. Prof., Physics/LEPP¶
- Lee, David M., Ph.D., Yale U. James Gilbert White Distinguished Professor in the Physical Sciences Emeritus, Physics/LASSP*
- Lee, Lillian, Ph.D., Harvard U. Assoc. Prof., Computer Science
- Lee, Stephen, Ph.D., U. of Chicago. Prof., Chemistry and Chemical Biology
- Leed, Richard L., Ph.D., Cornell U. Prof. Emeritus, Modern Languages and Linguistics
- Legate, Julie, Ph.D., Massachusetts Inst. of Technology. Asst. Prof., Linguistics
- LeGendre, Barbara A., Ph.D., Case Western Reserve U. Sr. Lec., Knight Institute for Writing in the Disciplines
- Lepage, G. Peter, Ph.D., Stanford U. Prof., Physics/LEPP¶
- Leuenberger, Christine A., Ph.D., U. of Konstanz (Germany). Sr. Lec., Science and Technology Studies
- Levitsky, David A., Ph.D., Rutgers U. Prof., Nutritional Sciences/Psychology
- Levitt, Bruce, Ph.D., U. of Michigan. Prof., Theatre, Film and Dance
- Lewenstein, Bruce V., Ph.D., U. of Pennsylvania. Assoc. Prof., Science and Technology Studies/Communication

- Lewis, Philip E., Ph.D., Yale U. Prof. Emeritus, Romance Studies
- Liepe, Matthias, Ph.D., U. Hamburg (Germany). Asst. Prof., Physics/LEPP¶
- Lillard, Pamela S., M.F.A., Virginia Tech. Sr. Lec., Theatre, Film and Dance
- Lin, Hening, Ph.D., Columbia U. Asst. Prof., Chemistry and Chemical Biology
- Lischke, Gunhild Iris, Zweites Staatsexamen, Ministry of Education, Hamburg (Germany). M.A. Cornell U. Sr. Lec., German Studies
- Littauer, Raphael M., Ph.D., Cambridge U. (England). Prof. Emeritus, Physics/LEPP¶
- Liu, Petrus, Ph.D., U. of California, Berkeley. Asst. Prof., Comparative Literature
- Livesay, G. Roger, Ph.D., U. of Illinois. Prof. Emeritus, Mathematics
- Liyanage, Wasantha, M.A., U. of Wisconsin, Madison. Lec., Asian Studies
- Lloyd, James P., Ph.D., U. of California, Berkeley. Asst. Prof., Astronomy/CRSR†
- LoBello, Susan, M.A., U. of Kansas. Sr. Lec., Romance Studies
- Logevall, Fredrik, Ph.D., Yale U. Prof., History
- Lohman, Rowena B., Ph.D., California Inst. of Technology. Asst. Prof., Earth and Atmospheric Sciences
- Long, Kathleen P., Ph.D., Yale U. Prof., Romance Studies
- Loos, Tamara L., Ph.D., Cornell U. Assoc. Prof., History
- Lorenz, Philip, Ph.D., New York U. Asst. Prof., English
- Loring, Roger F., Ph.D., Stanford U. Prof., Chemistry and Chemical Biology
- Lovelace, Richard V. E., Ph.D., Cornell U. Prof., AEP/Astronomy/CRSR†
- Lowi, Theodore J., Ph.D., Yale U. John L. Senior Professor of American Institutions, Government
- Luks, Joanna G., Ed.M., Boston U. Sr. Lec., Romance Studies
- Lurie, Alison, A.B., Radcliffe Coll. Frederic J. Whiton Professor of American Literature Emerita, English
- Luster, Martin, LL.B., New York U. Government
- Lynch, Michael, Ph.D., U. of California, Irvine. Prof., Science and Technology Studies
- Lyons, Thomas, Ph.D., Cornell U. Prof., Economics

KEY FOR CORNELL UNIVERSITY MAP (following page)

- Admissions Office, Undergraduate** (also offices in each college and school) C2
- A. D. (Andrew Dickson) White House:** Society for the Humanities C4-5
- Africana Studies and Research Center:** facilities, library C1
- Alumni House:** alumni affairs, Cornell's Adult University D3
- Anabel Taylor Hall:** café; interfaith center B6
- Appel (Robert and Helen) Commons:** cafeteria, fitness center, student activities E2
- Bailey Hall** D4
- Baker Laboratory:** chemical biology, chemistry CD3-4
- Bard Hall:** materials-sciences engineering C6
- Barnes Hall:** auditorium, career and minority services, Public Service Center C5
- Bartels Hall:** climbing wall, fencing salle, Newman Arena, outdoor program, strength and conditioning center, ticket office E5-6
- Barton Hall:** gymnasium, Cornell Police, ROTC D5
- Beebe Hall:** human ecology offices F4
- Big Red Barn:** cafeteria, graduate-student center D4
- Biotechnology Building:** café, biochemistry, biotechnology and life-science technologies, genetics and development, molecular and cell biology, nanobiotechnology DE5
- Boyce Thompson Institute for Plant Research** GH5
- Bradfield Hall:** earth and atmospheric sciences E5
- Caldwell Hall:** Graduate School and other offices DE4
- Carpenter Hall:** engineering administration, engineering and computer-science library C6
- Center for Jewish Living/104West!** kosher/multicultural cafeteria B6
- Clark Hall:** physical sciences, library D4
- College Avenue:** 409 (Employee Assistance Program, student health insurance); 312 (Cornell Chronicle, University Photography, Web Communications); 301 (Cornell Information Science) BC7
- Computing and Communications Center:** CIT, telecommunications, university counsel and Board of Trustees offices D4
- Comstock Hall:** biological sciences, entomology, library D5
- Cornell Store:** retail and service departments; credit union C5
- Cornell University Press—ILR Press (Sage House)** A7
- Corson (Dale R.) Hall:** ecology and evolutionary biology DE5
- Dairy Bar/Store (Cornell)** in Stocking Hall: Cornell food products FG5
- Day Hall:** School of Continuing Education and Summer Sessions offices, Information and Referral Center, university administration offices C5
- Duffield (David A.) Hall:** café; advanced materials and nanoscience, Cornell NanoScale Facility, Knight Laboratory C6
- Emerson Hall:** crop and soil sciences E4-5
- Fernow Hall:** natural resources E4
- Food Science Laboratory** G5
- Friedman (Stephen and Barbara) Wrestling Center** EF5-6
- Friends Hall,** in Schoellkopf Memorial Hall DE6
- Fuertes Observatory** EF3
- Gannett Health Services** B5-6
- Goldwin Smith Hall:** coffeehouse; arts and sciences administration and facilities C4
- Grumman Hall:** aerospace engineering C6
- Grumman Squash Courts** D6
- Helen Newman Hall:** fitness center, intramural-sports office, physical education E3
- Hollister Hall:** civil and environmental engineering C6
- Housing, Student:**
 Akwe:kon D1 • Cook House: cafeteria; Becker House: cafeteria; South Baker Group; Mennen-Lyon-McFaddin complex; Bethel House: cafeteria AB4-5 • Balch Hall: Campus Life offices, Carol Tatkon Center: café D2-3 • Cascadilla Hall B7 • Comstock (Anna) Hall (Latino Living Center) C2 • Court-Kay-Bauer Hall, Mews Hall DE2 • Dickson (Clara) Hall D2 • Donlon (Mary) Hall DE2 • Hasbrouck Apartments FG1-2 • High Rise 5; Holland (Jerome H.) International Living Center; Jameson (George) Hall; Just About Music (JAM); Low Rises 6, 7; Ujamaa E1-2 • Hughes (Charles Evans) Hall: cafeteria B6 • Hurlburt House (Ecology House) C1 • Maplewood Park EF7 • 112 Edgemoor A6 • Risley (Prudence) Hall: cafeteria, theatre CD2-3 • Schuyler House A7 • Sheldon Court B7 • Thurston Court Apartments B2 • Townhouse Community DE1
- Humphreys Service Building** E6-7
- ILR Conference Center, ILR Extension Building, and ILR Research Building:** conference facilities, industrial and labor relations; post office D5
- Ives Hall:** distance learning, industrial and labor relations, library CD5
- Johnson (Herbert F.) Museum of Art:** café; exhibits, galleries B3-4
- Kahin (George MCT) Center for Advanced Research on Southeast Asia** A5
- Kennedy (W. Keith) Hall:** cafeteria; communication, education; post office D4-5
- Kimball Hall:** materials-processing engineering C6
- Kinzelberg (Harvey) Hall:** nutritional sciences D4
- Knight (Lester B.) Laboratory:** in Duffield Hall C6
- Kroch (Carl A.) Library (access through Olin Library):** Asia, rare, and manuscript collections; University Archives C4-5
- Lincoln Hall:** music, music-and-dance library C4
- Livestock Pavilion** G5
- Lynah Rink:** hockey, ice-skating E5-6
- McGraw Hall:** anthropology, government, history; Knight Institute for Writing B4
- McGraw (Jennie) Tower (on Uris Library):** chimes, chimes museum BC5
- Malott Hall:** mathematics, statistics, library D4-5
- Mann Library Building:** café (courtyard); agriculture, life-sciences, and human-ecology library; Bailey (L. H.) Hortorium E4
- Martha Van Rensselaer Hall:** cafeteria; human ecology DE4
- Morrill Hall:** linguistics, Romance studies, Russian B4
- Morrison Hall:** animal science G5
- Mudd (Seeley G.) Hall:** neurobiology and behavior D5
- Myron Taylor Hall:** law, library B6
- Newman (Floyd R.) Laboratory/Annex:** elementary-particle physics D4
- Noyes Community Recreation Center:** fitness center, student gym/recreation facilities B5
- Noyes Lodge:** language laboratory D3
- Olin (Spencer T.) Chemistry Research Laboratory** D3-4
- Olin Hall of Chemical Engineering** C5-6
- Olin Library:** café; graduate/research library, access to Kroch Library C5
- Parking Garage** D6
- Performing Arts, Schwartz (Sheila W. and Richard J.) Center for the** B7
- Phillips Hall:** computer engineering, electrical engineering C6
- Plant Science Building and Greenhouses** E4-5
- Plantations (Cornell) Lewis (Richard M.) Education Center** F4
- Rand Hall:** architecture studios C3
- Rhodes (Frank H. T.) Hall:** computer graphics, engineering facilities, Cornell Theory Center CD6
- Rice Hall:** various program offices F5
- Riley-Robb Hall:** agricultural and biological engineering FG5-6
- Robert Purcell Community Center:** cafeteria; Campus Life Housing and Dining Office, Conference Services offices, student activities and services E1-2
- Roberts (Isaac P.) Hall:** agriculture and life sciences, Cornell Cooperative Extension, landscape architecture D4
- Rockefeller Hall:** Asian, Asian American, and Latino studies; science and technology studies CD4
- Sage Chapel** C5
- Sage Hall:** cafeteria; executive education, management studies, library C5-6
- Sage House:** Cornell University Press—ILR Press A7
- Savage Hall:** nutritional sciences D4
- Schoellkopf Memorial Hall:** Athletic Hall of Fame, athletics and physical-education offices, Friends Hall, physical therapy DE6
- Schoellkopf (Paul) House:** athletics and physical-education offices D6
- Schurman Hall:** veterinary-college administrative and other facilities H4-5
- Schwartz (Sheila W. and Richard J.) Center for the Performing Arts** B7
- Sibley Hall:** coffeehouse; architecture, art, and planning; fine-arts library C3
- Snee (William E.) Hall:** earth and atmospheric sciences BC6
- Space Sciences Building:** radiophysics and space research; National Astronomy and Ionosphere Center; rooftop teaching radio telescope D4
- Statler Hall and Hotel:** dining and lodging facilities, executive-education center, hotel administration, library C5-6
- Stimson Hall:** biological sciences, ombudsman C5
- Stocking Hall:** Dairy Bar/Store; food science, microbiology FG5
- Straight (Willard) Hall:** cafeterias, information, student activities/services, theatre B5
- Surge 3 Facility:** OHR and statutory business and finance offices G5
- Tatkon (Carol) Center:** in Balch Hall; café, new-student services D2-3
- Teagle Hall:** athletics and physical-education facilities, fitness center D5-6
- Thurston Hall:** theoretical- and applied-mechanics engineering C6
- Tjaden (Olive) Hall:** visual arts B3
- Transportation Services (116 Maple Avenue):** information on parking, bus service, and traffic regulations E7
- Upson Hall:** computer science, industrial and mechanical engineering, plasma studies C6
- Uris Hall:** cognitive science; economics; feminist, gender, and sexuality studies; international studies; psychology; sociology C5
- Uris Library:** café; chimes, chimes museum (McGraw Tower); undergraduate library BC5
- Veterinary Medicine, College of:** cafeteria (Schurman Hall); facilities, library HJ4-5
- Ward Center for Nuclear Sciences** C6
- Warren Hall:** cafeteria; applied economics and management; biometrics; development sociology E4
- White Hall:** government, Jewish studies, Near Eastern studies B4
- White (Andrew D.) House:** Society for the Humanities C4-5
- Willard Straight Hall:** cafeterias, information, student activities/services, theatre B5
- Wilson (Robert Rathbun) Synchrotron Laboratory:** CHESS, CESR/CLEO F6
- Wing Hall:** biochemistry, environmental engineering, microbiology FG5

 Sunday-Saturday, May 17-23
 Sunday, May 24

Wednesday, May 27
 Monday, June 8
 Monday, June 22

*Exams begin Wednesday at 7:00 p.m.

The dates shown in this calendar are subject to change at any time by official action of Cornell University.

In this calendar, the university has scheduled classes, laboratories, and examinations on religious holidays. It is the intent of the university that students who miss those activities because of religious observances be given adequate opportunity to make up the missed work.

The Law School and College of Veterinary Medicine calendars differ in a number of ways from the university calendar. Please consult the catalogs of those colleges for details.

The courses and curricula described in this catalog, and the teaching personnel listed herein, are subject to change at any time by official action of Cornell University.

The rules and regulations stated in this catalog are for information only and in no way constitute a contract between the student and Cornell University. The university reserves the right to change any regulation or requirement at any time.

This catalog was produced by the Office of Publications and Marketing at Cornell University.
