Dedication

Dr. James Zimmer

The class of 1987 dedicates this yearbook to Dr. James F. Zimmer. Dr. Zimmer's philosophy of teaching and personal enthusiasm have touched us, given us confidence, and moved us to strive for high professional standards. We would like to thank him for cultivating practicality tempered with compassion in our clinical work, and for being a good friend to our class.

*In
Memoriam
Charmaine
Mosher
1960-1986*

Charmaine was a good friend to all who knew her. She was full of smiles and hope, and she clearly loved what she did, as well as the people around her. Each of us will remember her for the different ways she touched our lives. None of us, though, can forget her courage, faith, and optimism throughout the course of her illness. She remains an inspiration as a fighter, and as a truly exceptional human being.

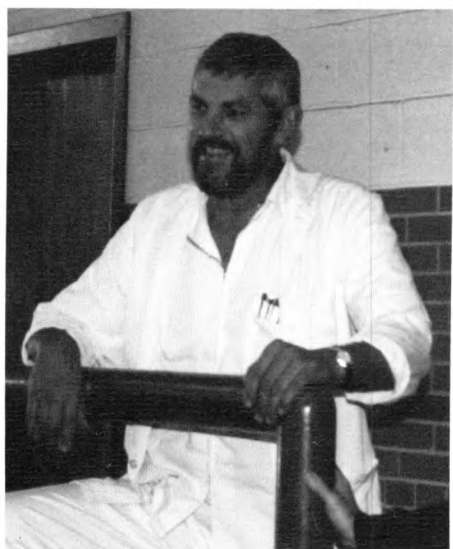

Thank You

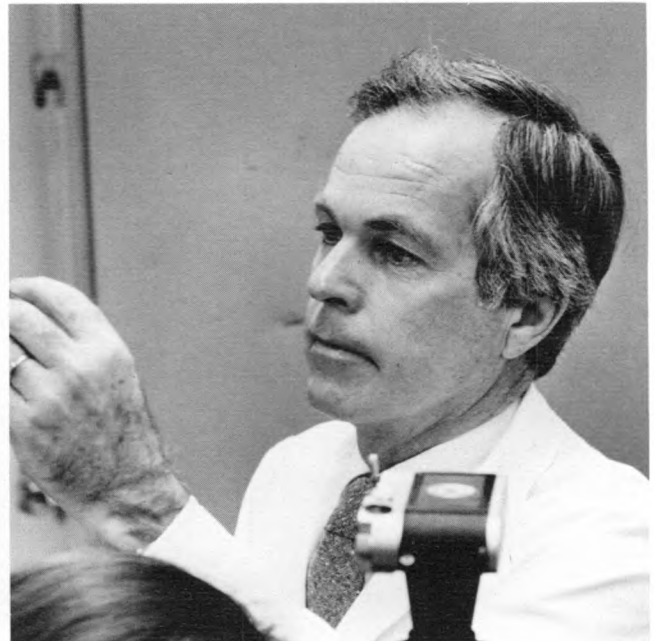

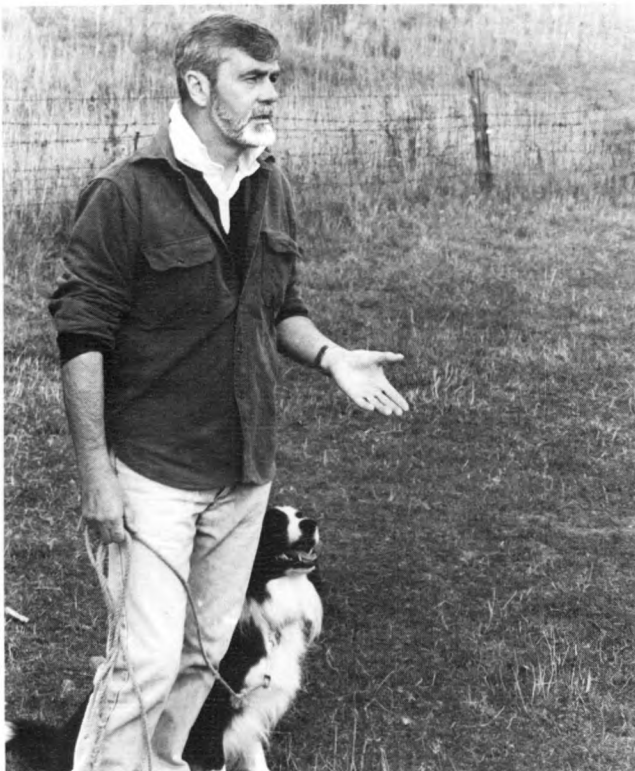

We would like to acknowledge the contributions to the Cornell Veterinary College of a special group of people, the Animal Health Technicians. In addition to their responsibilities to clinicians and patients, they are faced with the demanding task of guiding senior students through the clinics, and junior students through Junior Surgery. With patience, they teach us skills, instill confidence and answer an endless stream of hows, wheres and whys. For the patience and good cheer with which they fulfill this role, we offer our sincere appreciation and admiration.

What a long, strange trip it's been . . . Cornell has been part of my life for the past eight years. Between the Ag School, the Vet School, concession stand, old-time friends and new ones, and of course, Dunbars, it's going to be really hard to leave without feeling an emptiness inside of me.

I hope that I can leave a little part of myself in Cornell and Ithaca as they have definitely left a part of themselves inside of me.

But, in any case, let's get psyched for the end.

Favorite Quotes: "I think I could turn and live with the animals, they are so placid and self-contained; I stand and look at them long and long. They do not sweat and whine about their condition; They do not lie awake in the dark and weep for their sins; They do not make me sick discussing their duty to God."

Walt Whitman

"If a being suffers there can be no moral justification for not taking that suffering into consideration."

Peter Singer

"Veterinary medicine must be the conscience of society with regard to animals and must shape our attitudes and direct our minds concerning our awesome responsibility to those creatures whose lives and natures are in our hands and who on their own have no defense and no voice."

Bernard E. Rollin

Thanks — To my family and to others who have helped me to survive and to grow.

I began this trek in Montville, N.J. and intend to continue it somewhere in the Northeast surrounded for the rest of my life by cats and horses, be they friends, patients or hopefully both.

Special Memories: Calf chucking with Doug and Russ; Michael; the Cornell Tae Kwon Do Club where I found friendship, bruises and Bob; and of course Wendy, the other end of my umbilicus, a great lab partner, and an even better friend.

Special Thanks to: Mom and George who provided the love and support to make this dream a reality; Dave, who has put up with much and always given love in return; Uther, who I love pathologically and who loves back in his own furry way; and Ander, for being Uther's friend and a great cat in her own right. I only wish my Dad could still be here to see me now.

"Beak"

What I'll remember about vet school are all the crazy times and antics of the gang. Can you guys believe some of the things we did? Lizzettes, Charades, beer, shopping carts, state fair invitations, beer, house wrecking parties ("He looks, he shoots, he pops!"), slide shows, beer, "Leave it out" and of course more beer.

Thanks to my Tims and my family for their love and support.

Pharmaceutical Development Division, Norden Laboratories, Inc.

Because someone had an idea...

Consider the many different Norden pharmaceuticals — Filaribits®, Filaribits® Plus, Spanbolet® II, CalfSpan®, Life-Guard® ... to name a few. All uniquely different, yet all uniquely alike.

Because deep inside each is an idea. Something that sets the Norden pharmaceutical apart from all others. And makes it different. Special.

This compulsion to break with traditional concepts calls for a special group of research scientists. Along with a corporate willingness to provide the facilities and finances necessary to nurture their ideas, from laboratory to reality.

It's an investment and a commitment that each day becomes more significant at Norden. On our horizon are a host of new ideas in different stages of development: anthelmintics (both prophylactic and therapeutic), physiological modulators, antibacterials, ectoparasitocides, gastrointestinal medications ... other projects too numerous to mention.

Our research goal, as always, is to bring you not just a new product, but a new concept within that product. To provide the something extra that will make these new offerings distinctive, exclusive ... better for you and the profession.

Stimulants for learning

Solvay aids the study of veterinary medicine with its Veterinary College Program.

Your veterinary college is developing many fine doctors. And Solvay wants to support that development.

That's why we established our Veterinary College Program. It's designed to help students and their schools in a number of ways.

Solvay awards an annual research grant to a postgraduate resident at each veterinary college. These grants can be used for research in a variety of disciplines.

Solvay sponsors trips for a selected student from each college to the annual meeting of the American Veterinary Medical Association. We provide special publications year 'round,

including Clinical Symposia, *Dermatology Reports* and *Equine Sportsmedicine*.

Other Solvay contributions include a comprehensive handbook about the business considerations of opening a practice; special discounts for your college pharmacy on all Solvay veterinary products; and cooperative research ventures between Solvay and interested investigators in the colleges.

These are the main elements of our Veterinary College Program now. And we hope to add even more in the near future. We believe stimulants for learning are very good medicine.
