Cornellians Named

Governor Roosevelt Selects Commission to Study New York State Farm Problems

The commission to study the farm relief problem in New York State, recently appointed by Governor Franklin D. Roosevelt, includes two members of the Faculty of the College of Agriculture. The appointment of the commission is one of the steps recommended by an informal committee which included several other Faculty members.

Dr. Carl E. Ladd '12, director of extension, and Professor Martha Van Rennselaer '09, director of the College of Home Economics, are members of the commission. Other Cornellians on the commission are Maurice C. Burritt '08, Jared Van Wagenen, Jr., '91, and Henry Morgenthau, Jr., '13.

Harold E. Babcock, former professor of marketing in the College of Agriculture and now manager of the Grange League Federation Exchange, is also a member of the commission.

The commission is asked to study the State farm problem and present findings to the Governor as the basis of his future recommendations to the Legislature.

Members of the original committee named to draft recommendations included Dean Albert R. Mann '04 of the College of Agriculture and Dr. George F. Warren '05, professor of agricultural economics.

The first question facing the commission is that of the tax on real estate which greatly affects the farmer. The commission is also expected to take up the questions of abandoned farms, marketing, and the reduction of the margin between the returns to the farmer for his produce and what the ultimate consumer pays for it.

The Governor's letter of appointment says in part: "It is hoped that this commission will be able to find an early solution of the complex farm problem which faces this State and report their findings and recommendations to the State Legislature."

BUYS BROOKLYN EAGLE

Sale of *The Brooklyn Daily Eagle*, one of the noted newspapers in Metropolitan New York, to Frank E. Gannett '98, a Trustee of the University, was formally announced January 7. The *Eagle* has been the leading newspaper in Brooklyn during the past eighty-seven years. The acquisition of the *Eagle* makes the sixteenth newspaper in the Gannett group, now the third largest in the country.

Announcement was made at the same time that Millard V. Atwood '10, for the past year managing editor of *The Rochester Times-Union*, has been appointed associate editor of the Gannett Newspapers. From 1918 to 1924 he was in the extension department of the College of Agriculture, leaving to become managing editor of *The Utica Observer-Dispatch*.

Mr. Gannett has been president and is now a director of the Cornellian Council.

GEOLOGISTS MEET

During the meeting of the Geological Society of America in New York in December, at which Professor Heinrich Ries was elected president, Cornell geologists held a luncheon at which forty-one were present. Fourteen guests from Ithaca were presented. Addresses were given by Professor Louis C. Graton '00 of Harvard and Dr. David White of the United States Geological Survey.

These luncheons were inaugurated in 1927 at the society's annual meeting at Cleveland. It is planned to hold a luncheon each year.

Building Site Not Chosen

No Decision Reached on Location of Myron Taylor Hall, New Law School Building

The location of Myron Taylor Hall, to be constructed soon as the result of the \$1,500,000 gift of Myron C. Taylor '94 of New York, a member of the Board of Trustees, is causing speculation on the Campus. University officials have stated that no decision has as yet been reached as to the location of the building which will house the Law School. Announcement of Mr. Taylor's gift stated that the building would be erected at the "south end of the Campus overlooking the city of Ithaca and Cayuga Lake."

The first location mentioned in discussions of the project involved properties owned by the University but occupied by Psi Upsilon and Sigma Phi on long term leases, expiring respectively in 1934 and 1942 with renewal privileges.

It is known that both fraternities will cooperate with the University in the selection of a site. The leases of the two fraternities provide that renewals for twenty-five year periods may be made at the expiration of the present terms. A further renewal of twenty-five years is also provided.

Other possible sites, however, are the Armory green, the green south of Sage College, the Sigma Phi lawn exclusive of the property on which the house is located, or the land south of Willard Straight Hall.

A favorite solution is to tear down 3 Central Avenue, formerly called Sage Cottage and now the University Club, change the direction of South Avenue a bit, and thus utilize one of the best views available and rid the campus of an antique that was long ago regarded as unsafe, at least for students.

Princeton Wins on Court

Cornell played its first Eastern Intercollegiate League court game at Princeton January 12, losing to the Tiger quintet, 25 to 21, when a rally near the close of the game failed to cut down the Tiger's margin.

In the one other game of the week, Cornell lost its second encounter to Syracuse, 39 to 29, on the Drill Hall court January 8.

In the Princeton game, Cornell took an early four-point lead on two field goals by Lewis, who started at center, but the Tigers, with Skillman, center, starring, got their attack going strong, and at the half Cornell was on the short end of a 14 to 10 score.

The Tigers continued the drive in the second period, scoring ten points to three for Cornell. With three minutes left to play, Hall, who started at right forward, caged four field goals in succession to bring Cornell within three points of the Princeton five. A foul shot ended the scoring with the Tigers holding the four-point margin of victory.

Hall's dashing play in the closing minutes gave him the high scoring honors for the Red and White with nine points, two more than the total for Lewis. Skillman of Princeton was the high scorer of the game with ten points.

The Syracuse encounter at Ithaca saw the Orange five jump into a commanding lead in the first half, after the Red and White courtmen had battled on even terms for the first five minutes of play. Cornell was leading, 6 to 5, when the Syracuse five started an offensive that brought the score at the half to 21 to 8.

Cornell's play in the second half improved, and the Ithacans outscored the Orange, but the margin was too great. Kass, left guard, was the high scorer for Cornell, getting six points on one field

goal and four shots from the foul line. Katz, Syracuse right guard, who replaced De Filippo half way through the first period, accounted for fifteen of his team's points. He did some of the most spectacular goal shooting seen on the court this year, looping seven baskets from difficult angles.

The line-ups of the two games:

TWO OF THE vice-presidents and sectional chairmen of the American Association for the Advancement of Science for next year are Cornellians. Professor Madison Bentley, Ph.D. '98, head of the Department of Psychology, was elected to head Section I, Psychology, and Professor Henry L. Rietz, Ph.D. '02, of the University of Iowa, was chosen to preside over Section K, Mathematics.

SPORT STUFF

The latest sport is walking.

The apostles of this pastime put up a prize for the best slogan. "Get There On Your Own Feet" won the money. Everyday there is a piece about walking in the paper contributed by some prominent sedentary person. So far all the contributors have been in favor of walking—for students. Next week, it is believed, a number of students will walk.

Students ought to walk more. They don't know what they are missing. I love to look back on my undergraduate days and think of all those wonderful walks I used to take up Buffalo Hill and of how splendidly they used to make me feel. Nothing was so conducive to a good night's sleep as to finish the day with a brisk walk up Buffalo Hill. This was particularly true when you had to carry your roommate up. The number of times I've done that!

And the chances are that the big bum is one of those who are now writing those articles in praise of walking. It would be just like him to have won ten dollars by inventing that slogan, "Get There On Your Feet."

R. B.

FORM REGATTA ASSOCIATION

The Intercollegiate Regatta Association of Poughkeepsie, formed by citizens interested in the annual Intercollegiate Rowing Association regatta there, has been incorporated "to advocate and foster rowing and intercollegiate and interscholastic competition therein, particularly for the promotion of intercollegiate regattas on the Hudson River."

The incorporators, acting for the committee of citizens which has functioned in past years, include Peter H. Troy, known to many Cornellians, and William E. Seely '17. Other members of the committee are Governor Franklin D. Roosevelt, Dr. Henry Noble MacCracken, president of Vassar, Supreme Court Justice Joseph Morschauer, Henry Morgenthau, Jr., '13, and State Senator J. Griswold Webb, '14-15 Sp.

ALUMNUS NAMED FELLOW

Maurice C. Rosenblatt '11, was elected a fellow of the British Royal Society of Arts last week. The distinction came as recognition of his engineering achievements in sound control.

Rosenblatt was graduated from Cornell as a mechanical engineer and specialized in acoustics. He is at present engaged in the sound-control equipment of the new Convention Hall in Atlantic City. He has contributed articles to technical magazines on this subject. He is a resident of Philadelphia.

Observe Founder's Day

**Two Ithaca Clubs Unite in Celebration—
Hear Dr. Farrand, Dean Kimball
and Walter P. Cooke '91**

Cornellians in Ithaca observed Founder's Day, January 11, at a banquet in Willard Straight Hall under the auspices of the Cornell Women's Club and the Cornell Club. Many other groups of Cornellians throughout the country also observed the anniversary of the birthday of Ezra Cornell.

Guests of the two clubs at the dinner included Miss Dorothy Cornell, Charles E. Cornell, Franklin C. Cornell '89 and Mrs. Cornell, Mr. and Mrs. Charles L. Taylor, and Perry C. Dechert '31. Miss Mary E. Cornell, daughter of the Founder, was unable to be present.

The speakers were President Farrand, Dean Dexter S. Kimball of the College of Engineering, and Walter P. Cooke '91 of Buffalo, a Trustee. Robert E. Treman '09 was toastmaster, Romeyn Berry '04 told stories and Roger W. Kinne '31, baritone, sang several songs.

President Farrand and Dean Kimball both spoke of the fitness of meeting to do honor to the Founder. President Farrand declared that it was of the highest importance "that at least once a year we should come together to honor the great man and his colleagues who founded Cornell. The dream was wonderful, the achievement is thrilling. It is a true and a rare realization of a wonderful conception." But the fact that the conception was grand and the realization corresponding carries tremendous responsibilities."

He referred to the broad outlook on the meaning of learning, a type of education "of which Cornell was and remains the model. But in this demand," he said, "for a broad outlook on the meaning of learning and the research for truth, there is danger of overemphasis. Unless the greatest care is taken, an institution of learning is as apt to be led astray as the individual. It is hard to keep the balance clear.

"We must turn out men and women prepared to accept responsibilities not only in this country but more and more in the world in which we live. There could not be a greater aim.

"It is well to come together, to take stock, and to determine afresh the ideals of Ezra Cornell and Andrew D. White, which should be held firm in our hands, so that we may turn over to our successors a Cornell of even greater promise."

Talks of Other Founders

Dean Kimball discussed, through anecdote, some other founders associated with the early life of Cornell—Hiram Sibley, Estevan Fuertes, and James Law. He spoke of the "tremendous speed of development of things in the mind of the Founder," and drawing his illustrations from the field of engineering, he showed how the world has progressed.

Mr. Cooke devoted his address to a discussion of his recent experiences in Europe when he served as a member of the Arbitral Tribunal of Interpretation, which served in connection with the discussions of the reparations question, and as the American citizen member of the Reparations Commission.

The question of reparations is "the most important unsettled question in the world today," said Mr. Cooke. He spoke of the history of the reparations question, and outlined the Dawes Plan. He also discussed personalities he met in Europe, including Gustave Stresemann of Germany and Premier Mussolini, dictator of Italy.

Mr. Cooke spoke of the need for international understanding, saying that the necessity for such an understanding was clearly to be seen while he was abroad.

ANOTHER ART EXHIBIT

The Art Gallery in Morse Hall reopened January 14 with an exhibition of paintings by well-known artists, sent to the University by the Grand Central Art Galleries in New York. The artists represented are Dean Cornwell, Walter Ufer, Jerome Myers, Elmer Schofield, Paul M. Gustin, and others.

A collection of prints and etchings, sent by Frederick Keppel and Company of New York, is included in the exhibition. The artists include Rembrandt, Rubens, Corot, and Millet of the old masters, and George Bellows and Joseph Pennell of the moderns.

The present exhibition will continue until February 10. The gallery is open from 10 a. m. to 4 p. m. daily.

BOOKS

The Passion for Life

The Passion for Life. By John Lewis. New Haven. Yale University Press. 1928. 21 cm., pp. xiv, 123. Price, \$2.

The substance of these lectures was delivered here last year on the Goldwin Smith Foundation. Dr. Lewis was for a year minister of the First Unitarian Church of Ithaca, and since his return to his native land has been minister of the Richmond Road Congregational Church, Cardiff, and tutor in anthropology and comparative religion at the University of Cardiff. He is a careful scholar, an eloquent speaker, and a vigorous yet polished writer.

The theory which he works out to a logical and convincing conclusion is that the evolution of religion is based upon and due to man's passion for the fullness of life. It was this same passion for life that called the first deities into being in the minds of man. And these were mother deities, Demeter, Athene, Ishtar, Hathor. Conceptions of good and evil as we understand them were not primitive. Whatever was harmful to life was bad; whatever was kind to struggling man, warring with the elements, with human enemies, with savage beasts, was good. It was this fact that led to setting up by the side of the Great Mother, in Babylon, a supreme deity of evil, the spirit of the watery chaos, of the winter and spring floods which annually visited the rich bottom lands of the Tigris and Euphrates valleys. With the good deity there came to be associated the offices of religion as we have come to recognize them; with the evil deity there came to be associated magic and witchcraft.

Later, as matriarchy was replaced by patriarchy, the female gods first shared their sovereignty with and then by degrees yielded it to new male gods. But they did not wholly disappear. As Demeter, Aphrodite, Freya they continued to be worshiped; and among the divine-human beings still worshiped in Christian lands there is no difficulty in recognizing traces of this ancient conception of tens of thousands of years ago.

Dr. Lewis concludes with some practical considerations. The world today needs great leaders, above nationalism and denominationalism, who can capitalize this fundamental passion for life and lead the multitudes out of their narrowing beliefs and crude superstitions into the light of larger truth. We need less denominationalism, fewer creeds, fewer priests who have nothing but propaganda, more of the larger humanity of the daring undenominational Founder of Christianity.

A vital and stimulating book; may it have a wide reading!

Books and Magazine Articles

In *The Journal of Philosophy* for November 22 Professor George P. Conger '07 of the University of Minnesota reviews "The Nature of Deity" by J. E. Turner.

In *The American Journal of Sociology* for November "Cultural Evolution" by Professor Charles A. Ellwood '96 of the University of Missouri is reviewed by William F. Ogburn. Professor Ellwood reviews Friedrich Hertz's "Race and Civilization."

In *The Sigma Xi Quarterly* for December Professor Christian A. Ruckmick, Ph.D. '13, of the University of Iowa has a poem entitled "The Garden Path." It was read before the Iowa Chapter of Sigma Xi, of which Professor Ruckmick was president during the past year.

In *The Elmira College Alumnae News* Professor Ida Langdon, A.M. '10, Ph.D. '12, writes a travel sketch entitled "In the Irish West."

In *The North American Review* for December Henry F. Pringle '19 writes on "When the Reporters Come: Personal Privacy vs. the Press."

In *The Country Gentleman* for January Professor Elmer S. Savage, M.S. Agr. '09, Ph.D. '10, writes on "Buying Cows." Earl W. Benjamin '11 discusses "Co-operative Eggs."

Professor Christian A. Ruckmick, Ph.D. '13, of the University of Iowa, has lately published, through the Athens Press of Iowa City, "A German-English Dictionary of Psychological Terms." It contains forty-five pages and is sold for seventy-five cents.

The University of Buffalo Alumni News for December includes a portrait of James B. Wilson '21, Buffalo Law School '25, coach of the Lafayette High School team, which has for three years won the Harvard Cup and will now retain it permanently. The head of the department of physical education at the school says of Wilson, "He is an outstanding coach, for he puts his all into every game."

In *The Ohio State University Monthly* for December Archie M. Palmer '18 writes on "The Intellectual Ambassadors."

In *The Sibley Journal of Engineering* for December Robert M. Curtis '23 writes on "Zinc Base Die Casting Alloys." Professor Earl H. Kennard, Ph.D. '13, discusses "Mathematicians, Physicists and Engineers." Dean Kimball prints his letter to students in the College of Engineering on the Sibley Personnel Rating System. Lloyd P. Smith, Grad., writes on "The Emission of Electricity from Hot Bodies and Its Applications." Lorenzo A. Richards, Grad., describes "A Sodium Photo-Electric Cell." There is a portrait with sketch of Frank D. Newbury '01. Wayne E. Kuhn, Grad., reviews "American Chemistry" by Harrison Hale. Professor Fred S. Rogers '13 reviews "The Principles of Mechanism" by F. Dyson.

THE COLLEGE WORLD

TORONTO is to have a new Pathology Building which will have a total floor area of 90,000 square feet and will cost approximately \$800,000.

THE DEPARTMENT of Engineering Research at the University of Michigan, since its organization in 1920, has worked on more than six hundred projects. It has published eleven bulletins, some of which have gone into second editions.

SYRACUSE is debating whether or not to retain her crew. It is maintained by some that the university must retrench on some part of its athletic program and that the crew is too costly a luxury. Others argue that rowing is one of the most valuable sports in which Syracuse engages. A special commission consisting of five trustees, five alumni, and five members of the Athletic Governing Board will decide the question. The first Syracuse crew was that of 1900. James A. Ten Eyck began coaching there in 1903. Since then Syracuse has participated in 56 intercollegiate races at Poughkeepsie besides rowing in many dual regattas.

DARTMOUTH has lost a junior to the wilderness. C. H. Glover, Dartmouth '30, has left for the northern wilds, where he intends to prepare himself for a higher life than college leads to: the life described by Thoreau in "Walden". In a letter to *The Dartmouth* he says: "Instead of coming to college to wear ourselves out studying to work eight hours a day in after years in order to maintain a high material standard, I should advise young people to go somewhere and study how to limit their material desires so that they could be quickly satisfied, and the rest of their time spent on spiritual affairs. For the solid satisfactions of life are to be found in spiritual things—in art, literature, and the world of ideas—not in the production of faster and cheaper automobiles. It is not without regret that I am leaving your fine new library, Dartmouth, for that is a asset. If you would only call off your petty lectures and examinations and system of credits, I should be glad to stay and study with you—for then I might find time. But I have found studying and living a difficult task where 'results' are demanded with such inexorable regularity."

MISS R. LOUISE FITCH, dean of women, has returned from Europe and will be a guest at the Founder's Day celebration of the Cornell Women's Club of Philadelphia.

PROFESSOR JAMES F. MASON who is a member of the Committee on Undergraduate Study in France of the Institute of International Education lectured on January 10 on the preceptorial system at the Sorbonne. This plan is one whereby students studying French in American universities spend their junior year studying in France.

THE CLUBS

Buffalo

The Club held a luncheon on December 28 for the undergraduates who were home for the holidays. The latter brought along as guests friends who were still in the high and prep schools of Buffalo. All together there were about seventy-five undergraduates and guests. About an equal number of alumni were present.

Frederick C. Backus '14, president of the Club, presided. Neil M. Willard '18 led the singing of Cornell songs, and Philip Catalano '12 and his octet rendered vocal selections. President Backus announced that the Club was donating a cup for the basketball player on the varsity squad showing the most improvement during the year. More details will be announced later regarding this cup.

James B. Wilson '21, coach of the Lafayette High School championship basketball and football team for the past three years, spoke and was followed with a few words from Howard B. Ortnier '18, coach of the varsity basketball team.

Parton Swift '98 and Judge Harry L. Taylor '88 spoke of Cornell ideals, and John L. Collyer '17 introduced Edward V. Gouinlock '23 as one of the few Cornell men in existence who had played for three years on undefeated football teams.

This luncheon was voted as the most successful ever held by the Club and it was decided to make it an annual event.

New England

At the annual meeting, held on December 17 at the Chamber of Commerce in Boston, officers for the ensuing year were elected as follows: president, Albert C. Blunt, Jr., '07; vice-president, Malcolm S. Jones '10; treasurer, Archie C. Burnett '90; secretary, Clarence B. Piper '05; vice-president for Central Massachusetts, Howard W. Nestor '13; vice-president for Rhode Island, Leonard B. Colt '22; vice-president for New Hampshire, Ernest F. Bowen '12; athletic director, Francis A. Niccolls '13; alumni representative, Arthur P. Bryant '00; members to the Board of Governors, Herman G. Curtis '13, Anthony O. Shallna '16, Newton C. Burnett '24, and Walter P. Phillips '15.

The first official act of President Blunt was to appoint the following committees: Preparatory Schools: Malcolm S. Jones '10, chairman, with further members to be added by the chairman.

Membership Committee: Newton C. Burnett '24, chairman, with further members to be added by the chairman.

Annual Banquet: Anthony O. Shallna '16, chairman, Howard W. Nestor '13, Walter P. Phillips '15, with other members to be chosen by the chairman.

Annual Wash: Edgar McNaughton '11, Chester T. Reed '03, Howard W. Nestor '13, and Leonard B. Colt '22.

Dartmouth Game: Herman G. Curtis '13, Ernest F. Bowen '12, Arthur P. Bryant '00, and Howard W. Nestor '13.

Football Policy: Arthur P. Bryant '00, Barrett Smith '04, George S. Tompkins '96, Walter P. Phillips '15 and Francis A. Niccolls '13.

Weekly Luncheons: Frederic S. Auerbach '04, Anthony O. Shallna '10, and Newton C. Burnett '24.

The annual banquet was held on January 16, with President Farrand as guest.

TO ESTABLISH FOUNDATION

Isador B. Hoffman, the former rabbi of Temple Beth-El, Utica, will become director of the Hillel Foundation at Cornell this month. He will also serve as rabbi for Temple Beth-El in Ithaca, now under construction.

The Hillel Foundations were named after the great scholar and rabbi, Hillel. They have been established in six universities and are under the direction of the Independent Order of B'nai B'rith.

HONOR VETERINARIANS

A tablet honoring the charter members of the New York State Veterinary Medical Society has been placed in the south wing of James Law Hall.

The charter members listed are Dr. John A. Bell, Watertown; Dr. W. L. Baker, Cortland; Dr. James Carnrite, Amsterdam; Mr. W. G. Dodds, Canandaigua; Dr. A. Drinkwater, Rochester; Dr. O. B. French, Honeoye Falls; Dr. A. L. Hunter, Watkins; Dr. Wilson Huff, Rome; Dr. E. D. Hayden, Syracuse; Dr. W. G. Hollingworth, Utica; Dr. N. P. Hinkley, Buffalo; Dr. J. G. Hill, Sennett; Dr. Benjamin Howes, Brockport; Dr. D. Leary, Kendall; Dr. Asa N. McLean, Hornellsville; Dr. C. D. Morris, Bath; Dr. M. M. Poucher, Oswego; Dr. F. A. Rich, Avon; Dr. H. E. Rowell, Albion; Dr. Harry Sutterby, Batavia; Dr. Frank Sutterby, Lyons; Dr. Joseph Sutterby, Leroy; Dr. D. K. Seltzer, Penn Yan; Dr. J. D. Whyte, Rochester; and Dr. John Wende, Buffalo.

OBITUARIES

John T. Drake '99

John Thomas Drake died of pneumonia on December 7. He was born in Chester, N. J., on April 7, 1877, the son of Henry P. and Lydia Horton Drake. He spent three years at Cornell in the mechanical engineering course. He was for a number of years associated with the Delaware, Lackawanna, and Western Railroad. His wife survives him.

Edward A. Smith '01

Edward Albert Smith, a member of the banking firm in Chicago of Colvin and Company, died in Santa Barbara, Calif., on December 17.

He was born in Chicago on December 17, 1877, the son of Albert and Clara Small Smith. He was at Cornell two years, taking arts and mechanical engineering, and was a member of Zeta Psi. His wife, who was Miss Virginia Winslow, survives him.

Frank H. Teagle '02

Frank Henry Teagle, vice-president and treasurer of the Bishop and Babcock Manufacturing Company, and brother of Walter C. Teagle '00, died at his home in Cleveland on December 29.

He was born in Cleveland on December 13, 1879, the son of John and Amelia Clark Teagle. He received the degree of M.E., was a member of Alpha Delta Phi, Quill and Dagger, and the Mandolin Club, and was manager of the crew.

Teagle had served as president and treasurer of the Cleveland Society for the Blind, and four years ago was made a life member of the University Club of Cleveland for his services as chairman of the club's building committee.

He is survived by his mother, his wife, Mrs. Alice Wright Teagle, his brother, two sons, John Teagle, '3d, '29 and Frank H. Teagle, Jr., and a daughter, Helen Teagle.

Joseph J. Bradac '29

Joseph James Bradac, a freshman in the College of Civil Engineering, died at the Infirmary on December 29 from blood poisoning resulting from a scraped shin.

He was born in Pittsburgh on February 29, 1908, the son of Mr. and Mrs. Andrew Bradac. He was a member of Phi Kappa Psi. He is survived by his parents, two brothers, and two sisters.

R. Lee Cuthbert '29

Richard Lee Cuthbert, a senior in civil engineering, died at his home in Brooklyn on January 8, of pneumonia, contracted during the Christmas vacation.

He was born in Brooklyn on June 29, 1906, the son of the late Richard Lee Cuthbert and Mrs. Bessie Cook Cuthbert.

He was a member of Phi Delta Theta, Sphinx Head, and Red Key, and was manager of freshman track.

Published for the Alumni Corporation of Cornell University by the Cornell Alumni News Publishing Corporation.

Published weekly during the college year and monthly in July and August; forty issues annually. Issue No. 1 is published the last Thursday of September. Weekly publication, numbered consecutively, ends the last week in June. Issue No. 40 is published in August and is followed by an index of the entire volume, which will be mailed on request.

Subscription price \$4.00 a year, payable in advance. Foreign postage 40 cents a year extra. Single copies twelve cents each.

Should a subscriber desire to discontinue his subscription a notice to that effect should be sent in before its expiration. Otherwise it is assumed that a continuance of the subscription is desired.

Checks, drafts and orders should be made payable to Cornell Alumni News. Cash at risk of sender.

Correspondence should be addressed—

FOUNDER'S DAY

HOLIDAYS and fêtes perform certain useful functions which often go by default in the ordinary course of work a day life. They form the reason and excuse for gatherings of persons with similar objectives where fundamentals may be restated and where performance and ideals can be checked against each other like an annual inventory.

Founder's Day offers such an opportunity to Cornellians the world over. The alumnal attachment is not a full-time permanent feverish state, but intermittent and occasional. Other interests intervene, and the state of mind with which the alumnus returns to his hobby is not always the same as the one with which he left it.

It is very desirable from the point of view of the alumnus, the Cornell Club, the general alumni organization, and the University to have this annual inventory at a time comparatively free from other activity. Founder's Day, January 11, has proven itself worth while in offering the opportunity to hail Ezra Cornell's memory as well as to speculate on the real values in the relation between the University and its alumni.

APPOINTED DEAN

Carl P. Blackwell, '15-18 Grad., has been named dean of the College of Agriculture and director of the Agricultural Experiment Station of Oklahoma Agricultural and Mechanical College, from which he received his baccalaureate degree. He was formerly a member of the faculty of the University of Texas and head of the Department of Agronomy at Clemson College.

Dean Blackwell has been a member of mittee of the National Fertilizer Association for the past four years.

COMING EVENTS

Thursday, January 17

Lecture. Professor Kurt Koffa, of Smith College. "Form and Color." Goldwin Smith B. 8.15 p. m.

Friday, January 18

University Concert. Beniamino Gigli. Bailey Hall. 8.15 p. m.

Saturday, January 19

Basketball, Yale. The Drill Hall. 8 p. m.

Freshman Basketball. Cook Academy. The Drill Hall. 6.30 p. m.

Thursday, January 24

Lecture. Professor Albert Brachet. "La Situation Actuelle de l'Europe et le Progrès Scientifique." Goldwin Smith B. 8.15 p. m.

Friday, January 25

Meeting of the State College Council. President's office. 2.30 p. m.

Lecture. "Heredity as an Embryological Process." Stimson Hall. 8.15 p. m.

Saturday, January 26

Meeting of the Board of Trustees. President's office. 10 a. m.

Monday, January 28

Final examinations begin.

PROFESSOR RIES NAMED

Professor Heinrich Ries, head of the Department of Geology and president of the Geological Society of America, has been named technical director of the Committee on Molding Sand Research of the American Foundrymen's Association. Dr. Ries has been connected with the committee since its inauguration in 1921, first as chairman of the subcommittee on geological survey of foundry sand resources and later as chairman of the subcommittee on tests.

Dr. Ries was a pioneer in investigating foundry sands, for his work in 1904-5 on the surveys of the foundry sand resources of Michigan and Wisconsin was the earliest systematic investigation of foundry sands.

DR. ROBERT P. SIBLEY, secretary of the College of Arts and Sciences, has been made assistant dean of the College because of the heavy duties carried by the dean.

State Trustee Dies

Thomas B. Wilson Had Served Since 1909
—Was Keenly Interested in the
Agricultural College

Thomas B. Wilson, a Trustee under appointment by the Governor, died at Hall on January 11. He was seventy-six years old.

Mr. Wilson, father of Charles S. Wilson '04, former member of the Faculty of the College of Agriculture and State Commissioner of Agriculture, and of John C. Wilson '06, began his long service as a Trustee in 1909. He was reappointed in 1927 for a five-year term.

At the same time he was first appointed Trustee, he was named a member of the Council of the College of Agriculture, on which he served until 1925, when a reorganization was effected. The Council of the State Colleges was formed at that time, and he was continued as a member. He served as chairman of the Council for many years.

Mr. Wilson served several terms in the State Assembly and was State Senator for four years. During his term in the Legislature he was active in the interests of the College of Agriculture.

Dean Albert R. Mann '04 said that the death of Mr. Wilson means a distinct loss to the College and that it will be difficult to find another man who can give the interest, ability, and understanding of the colleges' programs which represented the contribution made by Mr. Wilson to their growth and welfare.

TO ATTEND CENTENNIAL

President Farrand and President James Rowland Angell of Yale have already accepted invitations to attend the celebration of the centennial of Illinois College at Jacksonville, Ill., in the fall. Dr. Charles H. Rammelkamp '96 is president of the College, which is the oldest institution of higher learning in the State.

Dr. Rammelkamp has been president for the past twenty-five years. He has recently published "A Centennial History of Illinois College."

A new library, now in the course of construction, and a new commons for men, soon to be built, are to be ready for dedication at the time of the centennial.

SCHOOLMASTERS MEET

The Cornell Schoolmasters' Club of New York State held its annual dinner at the Hotel Syracuse, Syracuse, on December 28. Professors Riverda H. Jordan and Julian E. Butterworth were present from the Hill and explained many matters regarding the division of education and closer relationship between Cornell men in the field and in the University.

F. Robert Wegner '21 is president of the Club and Horace S. Sirrine '18 of Hammondsport is secretary-treasurer.

The Week on the Campus

THE FOUNDER'S 122d birthday anniversary was celebrated in the ritual manner last Friday by a dinner in Willard Straight Hall. Following the common breaking of bread, in all times the emblem of solidarity, the Alma Mater was sung. Robert E. Treman '09, was toastmaster. Dean Kimball discussed the personalities of certain men who so shaped our University in its early days that it became something much greater than a country college. He spoke especially of Hiram Sibley and of Estevan Fuertes, the father of our College of Civil Engineering. Walter P. Cooke '91, speaking with authority as a member of the Reparations Commission, told of the Dawes Plan and of the present reparations situation. Romeyn Berry '04 told some stories, and President Farrand uttered some inspiring words concerning the present and future of Cornell. "This is Cornell's greatest age," he concluded, "and for the next few years will see the greatest development in years."

"GET THERE ON YOUR FEET" is the ten-dollar slogan for the new pedestrian movement sponsored by Professor Charles V. P. Young '99. Chester F. M. Buchanan '32 is the winning sloganeer. The contest will continue until the spring vacation; the walker with the highest mileage will then receive a silver loving cup. We shall watch with interest this movement to prevent the human leg from becoming a vestigial organ like the appendix.

THE CHRISTIAN ASSOCIATION has opened its annual drive for funds. \$4000 is the objective; \$2500 is sought from the undergraduates, and \$1500 from the Faculty and friends.

THE JEWISH STUDENTS are at last to have a regular spiritual director. Rabbi Isador B. Hoffman of Utica is to be the rabbi of the new Temple Beth-El, a beautiful building, by the way. He will also be director of the Hillel Foundations, which are established in six universities under the Independent Order of B'nai B'rith, in order to minister to the spiritual needs of Jewish students.

THE '94 MEMORIAL DEBATE was held last Thursday for the thirty-fifth time. The subject at issue was "Resolved, that the Jury System should be abolished." The prize was adjudged to Nathan Hyman '29, speaking for the affirmative. Other contestants were Saul R. Kelson '30, Lester A. Blumner '30, Harold D. Feuerstein '29, Harry A. Freeman '29, and Jason Rich '29. The serious-minded regret that the audience at this interesting discussion numbered only about a hundred. But what would you? The bitterest competition on the hill these days is the competition for the student's time.

THE CAREY PRIZE in Law, given by William D. P. Carey '26, was awarded,

after two competitive examinations, to Maxwell H. Tretter '29. Tretter has stood at the head of his class for the last two years, and is editor-in-chief of *The Law Quarterly*. Short-handed law firms please note.

IT IS OUR PAINFUL duty to record two deaths among the undergraduates. Joseph J. Bradac '32 of Pittsburgh died in the Infirmary as the result of an infection arising from a bruise on the leg. Richard L. Cuthbert '29 died at his home in Brooklyn of pneumonia, resulting from influenza.

TWO LECTURES last week. Dr. Ernest C. Faust, professor of parasitology in Tulane, spoke on "Travels of a Parasitologist in the Orient." Count Felix von Luckner, the sea pirate, played a return engagement under the auspices of the Clef Club, nearly filling Bailey Hall at twenty-five cents to a dollar.

THE DRAMATIC CLUB repeated William Vaughn Moody's play, "The Faith Healer," last Saturday.

PROFESSOR JAMES F. MASON discussed publicly the Delaware plan for study at the Sorbonne. Perhaps you have not heard about this interesting idea. It originated at the University of Delaware, with the benevolent aid of Pierre S. du Pont. The idea is that a certain number of students would benefit by spending one of their four undergraduate years in the University of Paris. Therefore properly qualified students are permitted to pass their junior year there without loss of credit in their alma mater. They are lodged in French families where the speaking of English is taboo. They unite to make journeys to the Alps and the Pyrenees. This year over a hundred American undergraduates are abroad under the regulations of this plan. Several Cornellians have already availed themselves of it; their praise of it and their apparent profit encourages a further development of this experiment in cosmopolitanism.

DR. ROBERT P. SIBLEY, secretary of the College of Arts and Sciences, has been made assistant dean of the College.

DR. ALBERT H. SHARPE, former director of athletics here, coach of the football teams of 1914, 1915, and 1916, and since the dean of the Ithaca School of Physical Education, will soon leave to become director of athletics in Washington University, St. Louis. L. S. Hill, now Director of Physical Education in the schools of Albany, succeeds him.

DR. EDWIN W. KEMMERER, Ph.D. '03, and a member of our Faculty for some years, has gone to China as the head of a mission of eleven experts to rehabilitate the country's finances. This is Dr. Kemmerer's twelfth mission of the sort.

The Ithaca Journal-News has just absorbed the Brooklyn Daily Eagle. This is the sixteenth in the string of Gannett newspapers, owned and operated by Frank E. Gannett '98, Trustee of the University, former president of the Cornellian Council, and translator of "Friars and Filipinos" from the Spanish.

M. G. B.

INTERESTING SCHOLARSHIP

The Cornell Club of New England has rules that the name of the scholarship given each year by the Club should be formally entitled the "Scholarship of the Cornell Club of New England"; that it should be in the amount of \$100 per annum, and should be awarded to the best qualified and deserving male junior whose residence is in any one of the New England States, except Connecticut; that the award should be made on the basis of satisfactory scholarship, character, and extra-curricular activities similar to the requirements for a Rhodes Scholarship; that the award should be made at the discretion of authorities of Cornell who will certify to the president or treasurer of the Cornell Club of New England each year to whom the scholarship has been awarded and his qualifications therefor. These payments have been made during the last two years and the action was approved and confirmed.

A YALE committee has been studying the cost of living in New Haven and the incomes and salary needs of Yale professors. It finds that the minimum salary is about one-third of what it ought to be. "A reasonable standard for the economic level for a professor after twenty-five years of service would be the amount of money necessary to maintain a home in a ten-room house, which he owns free of mortgage to keep one servant and pay for some occasional service, and to provide an education for his children in preparatory school, college, and professional school on an equality with that obtained by the general run of students in this University. From the costs of various modes of living it appears that life at this level in New Haven comes to about \$15,000 or \$16,000 a year." For assistant and associate professors with children coming up to school age, the least salaries that would permit those without private income to devote their time and energy wholly to teaching and scholarship would be \$6,000 to \$8,000.

A REPORT on married professors' budgets at the University of California recently appeared in *Science*. The average of ninety-six professors' families consisted of 3.5 persons and the expenditure of this group averaged \$5,000 a year. In three fourths of the families the salary did not provide the goods and service regarded as necessities. The mean cost of living was \$5,511.77; in general the professors spent about \$7000 and the instructors about \$4,000 a year.

SCIENTIFIC PAPERS

(Continued from last week.)

Zoology. "Morphological Studies of Genetically Different Color Patterns in *Platyopocilus*," Myron Gordon '25. "Observations on the Fat-Bodies in *Ambystoma Maculatum*," Dr. Gladys K. McCosh '28. "Polymorphism Among the Castes of Termites," Professor Alfred E. Emerson '18, University of Pittsburgh. "Parthenogenesis in Lampreys: Ova in Male Govads of the Brook and the Lake Lamprey," Professor Simon H. Gage '77. "Normal Variations in Red Blood Cell Counts and Haemoglobin Determinations," Dr. Christianna Smith, A.M. '19, Mt. Holyoke. "The Effect of the Removal of Median and Lateral Areas of the Anterior End of the Urodelan Neutral Plate on the Development of the Eye," Howard B. Adelman '20. "A Quantitative Study of the Fowl Coccidiosis," Professor Benjamin P. Young, Ph.D. '19. "Comparative Metamorphogenic Properties of Three Iodized Isomers of Tyrosin on *R. Temporaria Larvae*," Alexander B. Gutman '23. "The Biological Significance of Amphibian Parathyroids," Dr. Roy A. Waggener '27. "The Nutritional Requirements of Brook Trout and Their Rate of Growth," Professor C. M. McCay, W. E. Dille, and Miss M. F. Crowell, Grad. "A New Approach to the Study of the Ultimo-Branchial Body," Amy Grace Mekeel '10. "The Pigment Granules of Human Head Hair: a Comparative Racial Study," Professor Leon A. Hausman '14, Rutgers. "Results of a Study of *Daucus Carota* Seeds," Olive M. Hoeffle '26, Geneva. "Reminiscences of Europe and the International Seed Testing Congress," Professor Munn, E. Brown, and E. H. Toole. "The Work of the International Seed Testing Association," Professor Munn.

Nature Study. "Who's Who in Nature Education," Professor E. Laurence Palmer, Ph.D. '11. Illustrated lecture, Professor Arthur A. Allen '08.

THE ALUMNI

'84 BS; '87 MS—A Christmas greeting, dedicated to Nelson Ackley Wells '84, was sent out this year by Dr. Henry P. de Forest "to those others of the Early Eighties, our classmates and our friends." The greeting is a poem, "Ships of Yule," by Bliss Carman, whose picture also appears on the greeting.

'96 ME—Henry H. Norris, formerly head of the Department of Electrical Engineering, for the past three years has been associated in an advisory capacity with the general manager's office of the Boston Elevated Railway. He is concerned chiefly with personnel matters and advertising. Norris is also editor, for the American Electric Railway Association, of "Electric Railway Practices," an annual volume summarizing the latest developments in that field. He lives at 40 South Franklin Street, Holbrook, Mass.

'05—Harry F. Harding has been appointed United States Commissioner. Since September he has been practicing law at 140 Liberty Street, Buffalo. Previously he had been in the law office of

The Bausch and Lomb Tool-maker's Microscope is rugged and sturdy. Enables the ordinary mechanic to make accurate measurements and checks quickly.

SO INDUSTRY, TOO, CAN LOOK CLOSER

*—optical science brings surer methods of control,
the precision that mass production demands*

STEP by step, optical science has kept pace with modern research and experimentation. Year after year remarkable new optical instruments are helping push back the boundaries of man's knowledge.

Now, too, industry seeks this aid. Everywhere engineers are saying: "Give us optical instruments for the shop as well as the laboratory—that will help us check our tools as well as our

products—that will give us the precision even unaided hand work cannot give . . ."

The Bausch and Lomb Tool-maker's Microscope is one of the answers to this demand. If it is part of your problem to meet closer and closer limits of accuracy and yet reduce production costs, we may be able to help you. We should be glad to consult with you about your definite problems.

'28 ME—Seymour M. Whitney is a transportation engineer for the Diamond Ice and Coal Company of Wilmington, Del. His address is 2600 Market Street.

JUST PLAIN LOVE OF THE GAME

"THE storm broke early in the day, and by night our lines were in a state of chaos. I sat in the distribution office all through that night and watched the battle fought out. What kept those linemen on the job without food or sleep? It wasn't wages—you can't pay men for such losses—it was just plain love of the game—just fighting spirit—Stone & Webster Spirit—that kept them at it. They sensed the romance in it. Why, they stormed in there, beaten from the towers by a 75 mile gale of sleet, soaking wet or frozen stiff, grousing like soldiers in a front-line trench, damning the cars, the tools, the wind, damning everything, till the cars were replenished with gas and oil and they were off

again. There was trouble to spare that night—everyone knew where to find it, and went out to get their share. Swearing? Sure—Mad? Clean through—who but a moron or fool giggles at a blizzard—but happy? Every last one of them, and fighting with all they had."

—A Manager's Report

Stone & Webster men are recognized for the part they play not only on the job but in the community. Wherever there is a Stone & Webster company, there you'll find a group of men, bound together by a common fellowship, taking an active part in local affairs; working for civic betterment, helping to develop local industries. The Stone & Webster training fits its men for public service.

STONE & WEBSTER

INCORPORATED

There is Still Time to Get a Troy Calendar

\$1.55 Postage Paid

We have about fifty left after the Christmas buying. It is a good calendar this year. It was delayed purposely to secure a picture of the Dartmouth game. The winter views for the winter months give the usual Campus atmosphere which you knew so well.

The Campus Map Has Been an Important Item This Fall

\$1.50

We have shown a reduced cut of it in the News. Get out some of the old numbers and go over the map with a magnifying glass. The map is printed on cream tinted paper. Ten dollars will buy one hand colored.

Book- plates

A set of samples is yours for the asking. The samples are very convincing. Here is the list:

Lake
Willard Straight
Entrance
"Dorms" Entrance
