Exposes students to Internet Technology based systems used in the hospitality industry which enhance guest service and support management decision making. Specific topics include global distribution systems, yield management systems, property-management systems, communication networks (LANS and WANS), food service management systems, including point-of-sale systems sales and catering systems, system selection, and cost justification. Heavy emphasis is placed on the impact the Internet is having on distribution systems.

## [H ADM 474 Corporate Information Systems Management

Fall. 3 credits. Limited to juniors, seniors, and graduate students. Elective. Not offered fall 2002. R. Alvarez. Covers ten key issues in information technology management. It explores these issues through the use of case studies of companies with relevant experience with the issues. Cases used are not exclusively from the hospitality industry but are drawn from a variety of industry segments in order to provide appropriate insights that are nonindustry specific. No assumption is made about student backgrounds, but a basic understanding of information technology, organizational behavior, and general management is advised.]

## H ADM 475 Information Technology for Hospitality Managers

Fall, spring. 3 credits. Prerequisite: H ADM 174. Limited to Hotel students. Required. R. Alvarez, M. Talbert.

Composed of two blocks: Block 1, lecture: the goal of this block is to provide the students with a broad-base knowledge of Information Technology (IT) management issues. Block 2, lab: the goal of this block is to provide the students with advanced Excel model building skills and concepts.

## H ADM 476 Visual Basic for Applications: End-user Programming

Fall, spring 3 credits. Limited to 30 students per lecture. Elective. M. Talbert. This is an introductory programming course for end-users (business managers, consultants, and so on). Students develop fluency in the popular Visual Basic for Applications (VBA) language. Using VBA, students learn how to customize and extend the Microsoft Office Suite, with an emphasis on Excel. They also develop custom Information Systems using Microsoft Office applications as programmable building blocks. Secondary objectives of the course are to cover fundamental design and programming principles. The course is entirely lab based. Note: due to capacity restraints in the Binenkorb lab, the following restrictions apply: attendance at the first class meeting is mandatory. No-show students will be dropped from the course to make room for stand-by students. You may not drop the course after the second week of class.

#### H ADM 574 Strategic Information Systems

Fall, spring, 3 credits, Elective, G. Piccoli, Information technologies, particularly Internet technologies, are revolutionizing business organizations, commerce, and society. This course explores how information technology can be leveraged to create shareholder value and service customers. The fundamental technologies, the economic premises of the new competitive landscape, business strategy in this environment and the risks these strategies engender are analyzed. The course has a managerial orientation but a basic understanding of information systems and basic knowledge of the characteristics of information systems are required. Cases and examples drawn from the hospitality industry are used, but the concepts covered are generally applicable and a number of applications to other industries are contemplated as well.

## [H ADM 575 Internet Technologies

Fall, spring. 3 credits. Prerequisite: H ADM 174 or equivalent. Elective. Not offered fall 2002. M. Talbert.

Introduces students to the technical underpinnings of the Internet, with an emphasis on the World Wide Web. Students survey many of the key technologies that form the mechanism of the Web, including HTML, DHTML, XML, JavaScript, VBScript, Java, Style Sheets, Browsers, Servers, ActiveX, and Active Server Pages. The goal is a managerial familiarity with a broad range of important technologies, rather than proficiency in any single technology. This is an implementation course, in other words, programming. Students should expect a considerable demand on outside time for practice necessary to gain programming fluency in the languages introduced. Note: due to capacity restraints in the Binenkorb lab, the following restrictions apply: attendance at the first class meeting is mandatory. No-show students will be dropped from the course to make room for stand-by students. You may not drop the course after the second week of class.]

#### H ADM 772 Information Technology for Hospitality Managers

Fall. 3 credits. MMH Requirement. Open to MMH students, others by written permission of the instructor in advance of preenrollment. G. Piccoli.

percention of the percentication of the percention of the percention of the percenti

## FINANCE AND REAL ESTATE

## **Finance/Accounting**

## H ADM 120 Personal Financial Management

Fall, spring. 2 credits. Limited to 50 non-Hotel students. Elective. L. Hensley. An overview of personal financial planning including money management, tax planning,

including money management, tax planning, use of credit, insurance, investing, retirement planning, and estate planning.

## H ADM 121 Financial Accounting

Fall, spring. 3 credits. Limited to Hotel students. Required. D. Dittman. An introduction to the basic principles of accounting, involving transaction analysis, flow of accounting data to the financial statements, and careful consideration of accounting for revenues, expenses, assets, liabilities, and owner's equity.

#### H ADM 123 Financial Accounting Principles

Fall, spring. 3 credits. Limited to non-Hotel students. Elective. P. Sinha, J. Eyster. An in-depth introduction to the principles of financial accounting, involving transaction analysis, flow of accounting data to the financial statements, and careful consideration of accounting for revenues, expenses, assets, liabilities, and owner's equity.

## HOTEL ADMINISTRATION - 2002-2003

## H ADM 125 Finance

Fall, spring. 3 credits. Limited to undergraduate non-Hotel students only. Elective. S. Gibson.

Students are exposed to a wide variety of corporate finance topics including: time value of money, risk and return, valuation models, cost of capital, capital budgeting, capital structure, and dividend policy.

## **H ADM 221** Managerial Accounting

Fall. 3 credits. Prerequisites: H ADM 121 and H ADM 174, or equivalents. Required. G. Potter.

Focuses on the use of accounting information for management decision making and control. Topics include product costing, budgeting, management decision making, and control systems. There is one common exam at the end of the semester.

## H ADM 222 Finance

Spring. 3 credits. Prerequisites: H ADM 121, H ADM 221, or equivalents, or permission of instructor. Limited to Hotel students, others by permission. Required. S Gibson

Provides students with accounting cash flow information for financial planning, capital structure decisions, capital budgeting evaluation, and short-term and long-term financial decision-making. Topics include current asset management, short-term financing, capital budgeting, long-term financing, cost of capital, and problems in international finance.

#### H ADM 321 Hospitality Financial Management

Fall, spring. 3 credits. Prerequisites: H ADM 121, H ADM 221, and H ADM 222, or permission of instructor. Each section limited to 54 Hotel students. Required. A. N. Geller.

Integrates the areas of financial accounting, managerial accounting, and finance and applies the interpretive and analytical skills of each to hospitality industry situations. Course topics provide an understanding of: the analysis and interpretation of financial statements and operating reports, the budgeting and forecasting process, the application of C-V-P and other decision models to hospitality operations, operating agreements, capital investment analysis, financial feasibility, project and general financing, valuation techniques, and measuring value for important stakeholders.

## **H ADM 322** Principles of Investment Management

Fall, spring. 3 credits. Limited to students outside the School of Hotel Administration. Students with background in economics, quantitative analysis, and computers are advised to consider H ADM 424: Security Analysis and Portfolio Management. Elective. C. Gadarowski.

Covers basic institutional and analytical aspects of investment management. Topics include: financial markets, sources of investment information, risk-return analysis, bond and stock valuation, behavior of security prices, portfolio analysis and portfolio management, asset allocation, and mutual fund investment. While newcomers to investment management commonly believe that investing is about how to make money in the markets, this course instead focuses on identifying and managing to reasonable and feasible investment objectives in general and in today's highly competitive investment

markets. To that end, students are required to apply concepts and tools to managing a simulated investment portfolio (the Investment Management Game) during the course of the semester

### H ADM 323 Hospitality Real Estate Finance

Spring. 3 credits. Prerequisite: H ADM 321 or equivalent. Limited to juniors and seniors (graduate students must enroll in

H ADM 621). Elective. D. Quan. Focuses on real estate financing for hospitality-oriented projects. The following topics are addressed: methods of measuring rates of return; feasibility and appraisal processes; equity and debt financing vehicles to include joint ventures, limited partnerships, construction mortgages, participating, convertible and seller-financed mortgages; forms of operating agreements to include management contracts, leases, and franchises; and trends in international hotel franchising. Presentations of hospitality industry real estate practitioners tie course material to current industry practices.

#### **H ADM 324** International Financial Management

Fall, spring. 3 credits. Prerequisites: H ADM 121, H ADM 221 and H ADM 222 or equivalents, Micro and Macroeconom-

ics. Elective. Not offered fall 2002. Faculty. Focuses on the international aspects of financial management important to the hospitality industry with the intention of providing an understanding of and confidence in dealing with the economic issues faced by the multinational corporation. The major areas of coverage are: the international financial management environment, the management of foreign exchange risk, international asset management, and international sources of funds

## H ADM 326 Corporate Finance

Fall. 3 credits. Prerequisite: H ADM 321. Limited to juniors and seniors. Elective. S. Gibson.

Course provides in-depth analysis of corporate financial management including: financing alternatives and capital structure decisions, cash management and working capital management, capital budgeting decisions, risk analysis, valuations of real options, and Economic Value Added analysis. Although applicable to all businesses, special attention is placed on issues important to the hospitality industry. The course emphasizes analytical methods through case studies and a semester project

#### H ADM 421 Internal Control in **Hospitality Operations**

Spring. 3 credits. Prerequisites: H ADM 321, H ADM 722, or equivalent. Limited to 30 students. Elective. A. N. Geller.

Deals primarily with operations. Generally, hotel and restaurant operations are analyzed from the perspective of preventing fraud and embezzlement. Specifically, the design and distribution of production, accounting, information systems, and supervisory tasks are studied in a manner that ensures effective internal control and verifiable audit trails. The course relies heavily on case studies of actual frauds perpetrated in hotel and restaurant operations.

#### H ADM 422 Taxation and Management Decisions

Fall. 3 credits. Limited to 50 juniors, seniors, and graduate students. Elective. A. Sciarabba.

An introduction to tax advantages and disadvantages of various organizational structures, including: corporations, partnerships, subchapter "S" corporations; financial information reporting to tax authorities and to shareholders and how this reporting differs; use of depreciation methods to achieve tax reductions; and syndication techniques and the role tax laws play in promoting private investments and development.

## H ADM 423 Financial Management Policy

Fall, spring. 3 credits. Prerequisites: H ADM 326 or H ADM 721. Elective. Not offered fall 2002. S. Gibson.

Building on the course prerequisites, this class further develops a theoretical and applied understanding of corporate finance. The goal is to gain insights into the methods by which financial managers can create value for their shareholders. Among the specific topics studied are equity valuation techniques, capital structure and corporate strategy, the effect of financing decisions on operating assets and managerial incentives, bankruptcy costs and financial stakeholder conflicts, the information conveyed by financial decisions, and real options.

## H ADM 424 Security Analysis and Portfolio Management

Fall, spring. 3 credits. Prerequisites: macro and micro rconomics, introductory course in statistics and/or quantitative analysis, and knowledge of computers beyond word processing. Limited to juniors, seniors, and graduate students. Elective. C. Gadarowski.

Provides an introduction to securities analysis and portfolio management but with an emphasis on the analysis of individual securities. As a basis, the course covers the various securities available for portfolio management, portfolio theory, and analysis of expected return based on risk. Next, the course covers the valuation of individual equity and debt securities. Through a semester-long term project, students are required to apply concepts and tools covered in the course to develop an investment recommendation on a publicly traded security. Recent developments in investments research are covered and current financial databases are used for practical applications of the models and techniques presented in the course in developing this recommendation.

#### H ADM 525 Securitization and Structured **Financial Products**

Fall. 3 credits. Prerequisites: H ADM 222 or H ADM 721, and H ADM 427 (or by permission of the instructor). Limited to 40 seniors and graduate students. Elective. D. Quan.

Deals with the structure and analysis of securitized financial products with an emphasis on residential and commercial mortgage-backed securities (MBS). The course is intended for those who wish to acquire a working knowledge in the analysis of such securities (such as collateralized mortgage obligations, commercial MBS, auto loan, and credit card backed securities) and an understanding of the securitization process. The course's subject matter necessitates a highly analytic and quantitative approach and

students are required to have a strong background in finance and economics. If you have any questions about your preparation or background, please see the instructor.

H ADM 526 Hotel Management Contracts Spring. 1 credit. First seven weeks of the semester. Limited to 50 Hotel juniors, seniors, and graduate students. Prerequisites: H ADM 321 or 721. The deadline to drop a seven-week course is the mid-point of the course. Elective. J. Eyster.

Management contracts are a major but controversial expansion vehicle for hotel operating companies. Controversy and conflict arise unless the three parties involvedowner, operator, and lender-adequately align their interests during contract negotiations and develop flexible relationships during the life of the contract. This course analyzes how each party assesses a proposed project from its own perspective; how equity and debt vehicles are structured to finance the project: how project return tradeoffs are negotiated; how the contract's major provisions of concern are negotiated; how the parties attempt to develop flexible relationships during contract administration; how conflicts are resolved; and how damages are assessed on unilateral termination. The role of the asset manager in the process also is discussed. A case study highlights the above process.

#### H ADM 528 Advanced Topics in Real Estate and Finance

Spring. 2 credits. Limited to 20 seniors, graduate students or permission of the instructor. Prerequisites: H ADM 323, H ADM 428, 621. Offered during the first seven week of the semester. Elective. D. Quan.

This is an intense seven-week course which takes an analytically oriented approach at understanding advanced real estate finance topics. It is intended for students who are highly motivated to learn advanced techniques and are not afraid of mathematical rigor. The course emphasizes the use of financial and economic principles and makes extensive use of statistics and mathematics. Students are required to have a solid background in the basics of finance, microeconomics, and macroeconomics.

## H ADM 621 Hospitality Real Estate Finance

Spring, 3 credits. Prerequisite: H ADM 722 or equivalent. Limited to graduate students. Elective. D. Quan.

Focuses on real estate financing for hotel and restaurant projects. The following topics are addressed: methods of measuring rates of return, feasibility and appraisal processes, equity and debt financing vehicles to include participating, convertible and seller-financed mortgages, forms of operating agreements to include management contracts, leases, and franchises, and trends in international hotel financing. Presentations of hospitality industry real estate practitioners tie course material to current industry practices.

## **H ADM 622 Capital Investment Analysis** Spring. 3 credits. Prerequisite: A course in principles of corporate finance. For graduate students, H ADM 721, Financial Economics, or its equivalent. For undergraduate students, H ADM 222 and by

permission. Elective. Faculty. Covers how financial managers must make capital investment decisions in order to maximize shareholder wealth. This requires an in-depth understanding of both the investing and financing decision-making process. To understand the former, students learn about the capital budgeting process and acquire specific skills enabling them to evaluate capital projects; e.g., net present value, discounted cash flow and risk analysis. For the latter, students learn how equity and debt securities are priced in a dynamic capital market and how the firm's cost of capital and capital structure are linked with shareholder wealth maximization. Cases are used to illustrate theory, and industry guest speakers conduct occasional seminars.

## H ADM 624 Reporting and Analysis of Financial Statements

Fall, spring. 3 credits. Limited to 60 juniors, seniors and graduate students. Elective. P. Sinha.

Designed to provide understanding of the basic accounting model, the underlying concepts for income measurement, and the accounting rules for the valuation of assets, liabilities and owners' equity. Emphasis is placed on understanding the economic substance of the transactions and the implication of using alternate accounting rules on the resulting numbers, especially in assessing the "earnings quality". Focus is from an outsider's view of the company, and students should be able to evaluate and interpret the published financial information, specifically in the context of valuation, debt and compensation contracts, and credit assessment.

## **H ADM 721** Financial Economics

Fall. 3 credits. Open to MMH students only, except by written permission of the instructor in advance of pre-enrollment. MMH Requirement. S. Carvell.

Integrates corporate finance with the framework of value maximization and the competitive analysis of product and factor markets in the hospitality industry. Topics include short-term asset management, strategic valuation, capital budgeting analysis, capital structure decisions, leasing, and international financial management.

## H ADM 722 Hospitality Financial Management

Spring. 3 credits. Open to MMH students only, except by written permission of the instructor in advance of preenrollment. MMH Requirement. G. Potter.

Covers both managerial accounting and financial management as they are practiced in the hospitality industry. Topics include hospitality accounting systems, financial analysis, operational analysis, cost behavior, budgeting and forecasting, pricing, and feasibility analysis.

## **Real Estate Development**

## H ADM 320 (formerly 350) Real Estate Management

Fall. 2 credits. Offered during the first seven weeks of the semester. Elective. J. deRoos.

This introductory course is designed for students interested in learning the principles of property management for residential and commercial real estate. The lectures provide an overview of the different aspects of property management such as leases and management contracts (including landlord/ tenant issues), accounting and finance, staffing, and building operations. Case studies focus on the dynamics of operating real estate assets.

## H ADM 420 (formerly 450) Principles of Real Estate

Fall. 3 credits. Offered during summer session most years as H ADM 420/620. Prerequisite: H ADM 222 or equivalent. Limited to 50 juniors and seniors (graduate students must enroll in H ADM 620). Elective. P. Chinloy.

This survey course approaches real estate from four perspectives: investment, market, mortgage finance, and legal. Understanding these perspectives enable students to make better investment and financing decisions, to use real-estate resources wisely, to understand public-policy issues, and to be prepared for additional courses in real-estate investment, finance, and development.

#### [H ADM 428 (formerly 458) Hospitality Real Estate

Spring, 3 credits. Prerequisite: H ADM 323 or H ADM 420, or permission of instructor. Limited to 40 seniors or grad students. Elective. Not offered spring 2003.

Expands the students' understanding of the role of real estate in the hospitality business and, specifically, corporations. The course is designed for those who plan careers in the hospitality industry, but may be of interest to others. The objectives of the course are to develop an appreciation of real estate as a factor in the production of income of hospitality businesses; to develop an appreciation of real estate as an asset that can be managed, sold, and otherwise used to increase the wealth of hospitality corporation shareholders; and to understand the importance of valuing real estate, the approaches to valuation and contemporary hospitality valuation issues.]

## H ADM 429 (formerly 459) International Hospitality Development

Spring. 3 credits. Limited to 30 seniors and graduate students. Elective. R. Penner.

A seminar course covering the strategic development of international hospitality projects. Topics include corporate expansion strategies, the international development process, viewpoints of public and private stakeholders, and such development challenges as technology, infrastructure, environmental concerns, and public policy issues. Senior corporate guest lecturers will present and discuss new projects in such locations as Hawaii, Mexico, western and eastern Europe, Southeast Asia, and Latin America, and they will contrast these opportunities with development in the U.S.

#### H ADM 520 (formerly 550) Principles of Timeshare Development and Operations

Fall. 2 credits. Offered during the second seven weeks of the semester. Elective. J. deRoos.

Provides an introduction to the rapidly growing timeshare and vacation ownership industry. Students learn how the four major business disciplines of financial management, real estate development, marketing and sales, and resort operations are specifically applied to the industry. The course makes use of guest speakers to supplement lecture and lab material. A course project and case studies give students the opportunity to study the nuances and challenges of the business.

## HOTEL ADMINISTRATION - 2002-2003

## H ADM 620 (formerly 651) Principles of Real Estate

Fall. 3 credits. Offered during summer session most years as H ADM 420/620. Prerequisite: H ADM 721 or equivalent. Limited to graduate students. Elective. P. Chinloy.

This survey course approaches real estate from four perspectives: investment, market, mortgage finance, and legal. Understanding these perspectives enables students to make better investment and financing decisions, to use real estate resources wisely, to understand public-policy issues, and to be prepared for additional courses in real estate investment, finance, and development. This course includes much of the material in the H ADM 450 plus special topic sessions that feature guest speakers from industry, faculty from other colleges, and case studies.

## H ADM 628 (formerly 658) Real Estate Finance and Investments

Spring. 3 credits. Prerequisites: H ADM 323 or H ADM 621, H ADM 450 or H ADM 651. Limited to 40 graduate students. Elective. P. Chinloy.

Promotes sound real estate investment and finance decision-making, use of advanced theory, and techniques in financial economics. Real estate investment decisions are made through applications of an extended version of the after-tax discounted cash flow model, and other valuation models including option pricing models and regression models. Financing decisions are made using the techniques of modern financial analysis. A wide array of financing options are considered including participating and accrual mortgages. Securitization of equity and debt claims to real estate also are extensively covered. All types of residential and non-residential real estate are analyzed, including hospitality properties.

## OTHER

## H ADM 290 (formerly 230) Introduction to Culinary Arts

Fall, spring. 2 credits. Limited to 28 non-Hotel students; priority is given to seniors and graduate students. There is a course fee of \$75, which includes the cost of a uniform and uniform cleaning. Note: preregistered students who do not attend the first class are automatically dropped from the instructor's record. The absolute drop deadline for this course is by Wednesday of the second week of classes. Students on the waitlist will be selected through a lottery system. All lottery participants must attend the first week's class. Elective. B. Lang.

This course is a study of food groups and their methods of preparation, cooking and presentation. The course is designed specifically for non-Hotel students who are interested in learning the professional approach to food preparation and service with hands-on practice. Students are involved in food product identification, preparation and service methods and learning the professional language of food and cooking.

## H ADM 490 Housing and Feeding the Homeless

Spring. Variable credit. Elective. T. O'Connor.

Explores public and private sector approaches to addressing hunger and homelessness.

Through lectures, class discussions, research, community service work, and a field placement practicum, students explore the economic, social and political issues of our country's concern with housing and feeding disenfranchised and homeless people. Students study the history of homelessness and the strategies to prevent or alleviate the problem through public policy, housing programs, food assistance programs, and job training initiatives. This is a service learning course centered around community work experience. There are three options for involvement in this course. Students must choose one of the following: a.) 4 credits: whereby students work in pairs or small groups with a local area agency that provides services for homeless or disadvantaged people. They analyze the agency's mission and goals, identify managerial challenges, and formulate an approach in the form of product or service that is useful to the agency. This field practicum comprises approximately 60 credits of work during this semester, half of which will be in direct contact with the agency and its clients. b.) 4 credits: whereby students participate in an alternative spring break in an agency(ies) in Washington DC or New York City. Students work five full days in an agency that serves homeless, hungry, or disenfranchised people such as homeless shelters, community kitchens, or battered womens' housing units. Housing and transportation are arranged. This option may cost students up to \$100. Students interested in this option must see the instructor at preregistration time. c.) 3 credits: whereby students do community work in the Ithaca area with an agency that serves homeless, hungry, incarcerated, or disenfranchised people. Students work on a regular weekly basis for a minimum of 30 credits during this semester.

## H ADM 491 Hotel Ezra Cornell (H.E.C.)

Fall, spring. Variable prerequisite: written permission. Limited to Hotel juniors and seniors. Cost is estimated at \$200. Elective. G. Norkus.

Student elected board members of Hotel Ezra Cornell receive free elective credit for their participation in the planning, organizing, staffing, directing and controlling of H.E.C. '78 to be held on April 10–13 in 2003. Next year's board will continue to implement the business plan that has been developed by the board of directors of H.E.C '77. To establish Hotel Ezra Cornell as the premier forum to deliver a unique hospitality learning experience to industry leaders and students in an interactive setting.

Executive board positions are limited to students in good standing with a minimum cumulative G.P.A. of 3.0. Assistant board positions are limited to students in good standing with a minimum cumulative G.P.A. of 2.5. Eligibility requirements for specific board positions can be obtained in the Student Services Office, Room 178A. Eligible students who are considering a board position for H.E.C. '78 should pre-enroll for the course and speak with the instructor. Final enrollment in H ADM 491 will be determined by the election process upon the conclusion of H.E.C. in April of this year. A field trip to New York City during the "Hotel Show" in November is a required course activity.

## H ADM 493 Management Intern Program

Fall, spring. 6 credits. Prerequisites: students are expected to have completed the following courses: H ADM 105 or 115, 211, 121, 221, 222, 106 or 236, 243, 255, 165, and 174. In addition, completion of the following courses is strongly recommended: H ADM 321, 305, 355, and 365. Additional course work may be required for applicants considering specialized internships. A detailed plan for the completion of all remaining academic requirements must be submitted prior to acceptance into the course. Elective. R. Chase.

Limited to juniors and seniors in the Hotel School with approval of the Management Intern Program faculty committee. The application process begins the semester before the planned internship. At the beginning of each semester, an MIP information meeting is presented. Students accepted to MIP enroll in both H ADM 493 and 494. Students enrolled in H ADM 493 receive academic credit in free electives as well as practical experience in the hospitality field. Six performance evaluations are used to determine this grade. Students must be in good academic standing and have a GPA of at least 2.0 in the preceding term. Further information is available in the Career Services Office, 255 Statler Hall.

## H ADM 494 Management Intern Program II—Academic

Fall, spring. 6 credits. Elective. R. Chase. Limited to juniors and seniors in the Hotel School with approval of the Management Intern Program faculty committee. The application process begins the semester before the planned internship. At the beginning of each semester, an MIP information meeting is presented. Students accepted to MIP enroll in both H ADM 493 and 494. Students enrolled in H ADM 494 receive academic credit in free electives for submission of a goals and objectives statement, four management reports, six journal entries which focus on insights gained through analysis of events occurring in the workplace, and four Hospitality Management Checklist summaries. Upon return to campus, each intern completes a debriefing and an oral presentation to fulfill the academic requirements. Students must be in good academic standing and have a GPA of at least 2.0 in the proceeding term. Further information is available in the Career Services Office, 255 Statler Hall.

#### H ADM 495 Implementing Strategies for Tying Wellness Practices to Company Profit

Fall. 3 credits. Limited to juniors, seniors, and graduate students. Elective.

M. Tabacchi.

There is increasing evidence linking job induced stress to overall health and happiness or lack thereof. Adding to workplace stress are the needs of its diverse and changing population. These stresses affect the financial health of the corporation as well as the psychological and physical health of the individual. The purpose of this course is to encourage future managers to evaluate the work environment and to enhance opportunities for diverse worker productivity which can increase the corporation's competitive edge. The emerging fields of complementary and alternative medicines are explored as preventive and cost effective methods of improving workers' health. Business models

for encouraging workplace wellness, systems for implementation, reward and accountability of managers and corporate officers are introduced in this course. Only a few corporations overtly reward managers and corporate officers for the well being and concomitant enhanced performance and productivity of their employees

## H ADM 498 Undergraduate Independent Study

Fall, spring. Variable credits. Elective. Faculty.

Can only be taken if conducting two independent studies in one semester.

## H ADM 499 Undergraduate Independent Study

Fall, spring. Variable credits. Elective. Faculty.

Students have the option of conducting an independent study project in any academic area. The number of credits for which students may register are arranged on an individual basis. Note that students commit themselves to a certain number of credits of independent academic work per week per credit hour if they choose to do an independent study project, and the work must be performed in the term for which the student is enrolled in the independent study. The usual add/drop policy applies, and retroactive credit for work commenced after an academic term has ended is not allowed. Projects are conducted under the direction of a faculty member, and regular, frequent consultations are mandatory. Also, a written report must be produced and made available to all faculty members and students of the school after its submission to the supervising faculty member. Credit for independent study projects may not count toward the Hotel elective requirement, but, rather, toward free electives. Students cannot earn academic credit for independent study when the equivalent material is offered in a regular course, and credit is not earned for teaching a course. Students should consider all aspects of their situation before committing themselves to an independent study project.

## H ADM 690 Honors Monograph Faculty

Year long. 4 credits. Elective. Limited to professional master's students who: either have a minimum GPA of 3.7 or are in the top 10% of the students in the year group in their first-year professional master's courses; have given evidence of being a good writer by meeting all components of the written communication benchmark; and who have obtained the approval of a brief topic proposal from the potential advisor.

This is a special integrative course for students who write well and desire to explore in depth a topic of mutual interest to them and a faculty advisor of their choice. The approval of a second reader is required for completion of the course. Special recognition of students who complete the course will be made at graduation. Applications are available in the Graduate Office, 172 Statler.

## H ADM 698 Graduate Independent Research

Fall, spring. Elective.

Each student must have in mind a project and obtain agreement from an individual faculty member to oversee and direct the study. Written permission is required prior to course enrollment. Permission forms can be obtained in the Hotel School Graduate Office, Room 172.

## H ADM 699 Graduate Independent Research

Spring. 2 credits. Elective. Each student must have in mind a project and obtain agreement from an individual faculty member to oversee and direct the study. Written permission is required prior to course enrollment. Permission forms can be obtained in the Hotel School Graduate Office, Room 172.

## H ADM 793 Industry Mentorship Program Fall. 0 credits. MMH Requirement. Faculty.

## H ADM 794 Management Development

Year long. 0 credits. MMH Requirement.

D. Jameson. All first-year students in the Master of Management in Hospitality program must enroll in H ADM 794 both semesters. This requirement includes participation in the MMH Assessment Center, program benchmarking, team project, and other activities related to students' professional development. Satisfactory completion of the second semester of H ADM 794 documents achievement of all program benchmarks.

## H ADM 795 Cornell Graduate Hospitality **Management Project**

Year long. 0 credits. MMH Requirement. M. Redlin.

The five MMH core courses in the spring semester are focused on the completion of an integrated and interdisciplinary project for an industry client. Under this course number, the client, the faculty, and the MMH students accumulate information necessary for the completion of the project and the presentation of the results to the industry client. Although the course is listed as year long, the students and faculty access the information primarily in the spring semester.

## H ADM 890 M.S. Thesis Research Fall, spring. Required. Faculty.

## H ADM 990 Ph.D. Thesis Research Fall, spring. Required.

## **ADMINISTRATION**

Patsy M. Brannon, dean

Jennifer Gerner, associate dean S. Kay Obendorf, associate dean

Brenda Bricker, director, undergraduate affairs

Darryl Scott, director, admission, student and career services

Duncan Bell, college registrar

## COLLEGE FOCUS

The College of Human Ecology anticipates and responds to human needs in the areas of nutrition and health, economic and social well-being, environmental design and technology; as well as human development through education, basic and applied research, and the extension of knowledge. The college is distinctively characterized by the quality of its research in the natural and social sciences and the design arts, a global perspective in academic programs, a preventive approach to contemporary societal problems, multidisciplinary departments and programs, development of leadership in students and citizens, and a commitment to diverse populations. Faculty and students examine individuals in relation to their family, neighborhood, workplace, and community, seeking a balance between theory and practice that will improve the quality of everyday life.

## FACILITIES

The college is housed in Martha Van Rensselaer, Savage and Kinzelberg Halls. The buildings include administrative and faculty offices, classrooms, auditoriums, galleries, and lecture halls; wet chemistry and biochemistry laboratories for nutrition, food science, and textile science; experimental food laboratories; design studios and computer-aided design laboratories; woodworking shops; experimental observation rooms with one-way vision screens and sound-recording equipment; human factors and infant research facilities; educational television studios; and an audio/ visual classroom for distance learning. Also included are learning resource centers for career planning, field and international study, a historical costume collection, a human metabolic research unit, an animal research facility, cold rooms, a constant temperature and humidity laboratory, and an early childhood research and care program.

Specialized equipment for teaching and research includes biochemical and chemical instruments for spectroscopy, chromatography, radioisotope analysis, electrophoresis, microscopy, and ultracentrifugation; physical testing equipment; and cameras, videotape, and sound recording equipment.

## DEGREE PROGRAMS

Cornell programs in Human Ecology lead to the degrees of Bachelor of Science (B.S.), Master of Arts (M.A.), Master of Science (M.S.), Master of Professional Studies in Human Ecology (M.P.S.), Master of Health Services Administration (M.H.A.), and Doctor of Philosophy (Ph.D.).

General academic information concerning the Bachelor of Science degree is given here under the heading "Undergraduate Study." Curricula for major studies are described under the various academic areas.

Programs leading to master and doctoral degrees are administered by the Graduate School. They are described in the *Announcement of the Graduate School* and in announcements published by the individual field offices (Design and Environmental Analysis, Human Development, Nutrition, Policy Analysis and Management, and Textiles and Apparel). For information regarding The Sloan Program in Health Services Administration, contact the Department of Policy Analysis and Management.

## UNDERGRADUATE DEGREES

Bachelor of Science (B.S.) degrees are offered in the following areas:

Biology and Society

Design and Environmental Analysis

Human Development

Human Biology, Health, and Society

Nutritional Sciences

Policy Analysis and Management

Textiles and Apparel

Individual Curriculum

## **UNDERGRADUATE AFFAIRS**

Persons interested in undergraduate study in human ecology should contact the admissions office, 170 Martha Van Rensselaer Hall (255– 5471). Those interested in graduate study should contact the graduate field representative identified among the faculty of each department. Department faculty are listed at the beginning of the course descriptions for each department.

Counselors in the Office of Admission, Student, and Career Services (172 MVR) can help perspective students understand college programs and requirements, as well as college and university resources and services. They provide a broad range of career services and personal support for all matriculated undergraduates. The college registrar (145 MVR) assists undergraduates with questions about academic credit and graduation requirements.

## **The Student Body**

The College of Human Ecology undergraduate enrollment is 1,402. Roughly 400 students graduate each year; last year 245 freshmen and 195 transfer students matriculated. Ninetyfive faculty members serve as advisers to undergraduates.

The college's undergraduate admissions committee selects applicants who are academically well prepared and appear most likely to profit from the college's various curricula. Admission is highly selective. Approximately two-thirds of the student body comes from New York State, with the remainder coming from other parts of the United States and abroad. In 2001, 29 percent were identified as members of minority groups. Approximately 202 graduate students have members of the college's faculty chairing their special committees. The college awarded 44 master's degrees and 34 doctorates last year.

## **Mature Students**

The college recognizes that students who interrupted their formal education and are returning to school have needs different from those of younger undergraduates. To facilitate the education of mature students, defined as those 24 years old or older at first matriculation, the college has adopted certain procedures specifically for that group. Counselors in the Office of Admission, Student, and Career Services (172 MVR) can provide information of interest to mature students. Mature students are permitted to enroll for as few as six credits without petitioning for permission and also are permitted to extend their residency beyond the normal eight terms. To find out about qualifying for prorated tuition, mature students must see the registrar before registration each semester

## **Special Students**

Students eligible for special status are those visiting from other institutions and interested in particular programs in the college, those with a bachelor's degree who are preparing for graduate study or jobs and careers in human ecology-related fields, or those who have interrupted their education and are considering completing degree programs. Students accepted in the nondegree status of special student may enroll for a maximum of two semesters. During the second semester of attendance, a special student must either apply for admission as a transfer student or plan to terminate studies in the college at the end of the semester. Special students are expected to take a minimum of 12 credits each semester and to take one-half to twothirds of their work in the statutory divisions of the university. Courses taken while a person is classified as a special student may be counted toward the requirements of the bachelor's degree. Those interested in becoming special students should make appointments to discuss admissions procedures in the Office of Admission (170 MVR, 255-5471).
## **Empire State Students**

Occasionally a student who is completing requirements for a degree through the Empire State College Program is interested in taking a human ecology course. This can be done by registering through the Division of Summer Session, Extramural Study, and Related Programs (B20 Day Hall, 255-4987). All rules of the extramural division apply, and registrations will be accepted only on a spaceavailable basis and with the written approval of the course instructor. At the time of registration, Empire State College students must provide the extramural division with a completed copy of Empire State College's notification of cross-registration (form number, SA-22, F-031) to verify enrollment in Empire State College. Such students will be charged 25 percent of the standard extramural tuition per credit.

#### **Transfer students**

Students who enter the College of Human Ecology after the first semester of their freshman year are considered transfer students. An internal transfer student is one who transfers to Human Ecology from one of the other colleges at Cornell University. An external transfer student is one who transfers to Human Ecology from an institution outside of Cornell University. Internal transfer students should take special care to learn the policies of Human Ecology because each college at Cornell operates under a different set of rules. Staff in the Office of the College Registrar (145 MVR, 255-2235) and in the Office of Admission, Student, and Career Services (172 MVR, 255-5471) are available to answer students' questions. External transfer students may transfer a maximum of 60 credits to the college after admission. Both internal and external transfer students should contact the Office of the College Registrar to discuss how the transfer credits will apply to the various degree programs.

## MAJORS

The college requires students to fulfill requirements for a major in order to graduate. Students must declare a major by the end of the sophomore year, and may elect to complete more than one College of Human Ecology major. It is common for students to change interests during their undergraduate careers. Counselors in the Office of Admission, Student, and Career Services (172 MVR) and directors of undergraduate study in each of the academic departments can help students to consider their options and engage in academic planning. All changes of major require submission of the Change of Major form, and are processed through the College Registrar's office, 145 MVR. Change of major will trigger re-evaluation of credit and assignment of a new faculty adviser.

# DESIGN AND ENVIRONMENTAL ANALYSIS

The Department of Design and Environmental Analysis (DEA) is concerned with planning, designing, and managing interior environments to satisfy human needs. Most people spend over 90 percent of their lives inside buildings. Those settings have substantial and far-reaching effects on the quality of our lives. The processes for creating and maintaining the built environment face enormous challenges, including frequent social and organizational changes, technological advances, new building methods, and finite resources. The program in DEA is dedicated to preparing professionals who can meet these challenges.

Diverse faculty backgrounds and teaching approaches help students to develop multidisciplinary problem-solving and creative abilities, aesthetic judgment, and analytical thinking. Excellent laboratory, shop, studio, and computer facilities permit exploration of innovative concepts for the design and management of interior environments. The relationship between people and their physical surroundings is explored through a combination of academic courses, field experience, and applied research. Examples of student class projects and faculty work are frequently on display in the MVR gallery. The DEA Resource Center includes books, journals, newsletters, and material samples for student use.

## **Options**

The department offers undergraduate education in three professional areas: interior design, facility planning and management, and human factors and ergonomics. The interior design option is accredited by the Foundation for Interior Design Education Research (FIDER). The Facilty Planning and Management Program at Cornell is an "IFMA Recognized Program." This means that it meets the standards for recognition of programs established by the International Facility Management Association.

To take full advantage of the course sequences and electives, it is important to select an option as early as possible. This is particularly true in the interior design option. Transfer students in the interior design option may need one or two extra semesters to complete the program.

#### **Option I: Interior Design**

This option prepares students for professional careers in interior design. The program emphasizes a systematic design process in which innovative solutions are based on research derived knowledge of human behavior, values, and attitudes. Students develop an understanding of design theory and methods, design history, behaviorally based programming, and post-occupancy evaluation. They learn about design communication, building systems, furnishings, materials and finishes, and professional practice. The program is accredited by FIDER. Students may utilize their elective courses to develop a concentration in areas such as design history, historic preservation, hotel and restaurant design, theater design, digital media, design for aging, and design sustainability.

Careers are available in interior design and space planning, interior architecture, facility planning, interior product design, and housing. This program also serves as an excellent preparation for graduate study in interior design, facility management, architecture, and product design.

#### **Option II: Facility Planning and Management**

This option is designed to prepare students for professional careers in facility management. The program focuses on the planning, design, and management of facilities for large, complex organizations such as corporations, health-care institutions, research and development laboratories, and universities. Facility planning and management is a basic ntanagement function that coordinates and integrates information and expertise from areas such as planning and design, real estate, and business administration with human factors, ergonomics, environmental psychology, telecommunications, and building operations for the purpose of developing and managing facilities that support individual and organizational effectiveness.

Excellent career opportunities exist in the facility management divisions of private companies, institutions, the health-care industry, and with private consulting firms offering facility management services. The program is also a good preparation for graduate study in business, planning, or one of the design disciplines and for advanced study in facility planning and management.

#### **Option III: Human Factors and Ergonomics**

Human factors and ergonomics focuses on the interaction between people and their physical surroundings. This option seeks to expand understanding of how the environment affects human perception, cognition, motivation, performance, health, safety, and social behavior. This knowledge is then used to help architects, planners, interior and product designers, and facility managers to plan, design, and manage safe and effective environments. The effect of human capabilities or characteristics such as family structure, life-style, social class, and stage-in-life cycle on environmental needs and requirements is also a focus of the program. Career opportunities are available in design firms and in urban planning and other public agencies as well as in the facility management and product design division of private companies. Human factors and ergonomics is good preparation for graduate study leading to a Ph.D. degree in the social sciences and a career in academic or other research-oriented settings in either the public or private sector. It can also serve as the basis for graduate study in an environmental planning or design discipline such as architecture, facility planning and management, interior design, landscape architecture, or city and regional planning. Electives in the social sciences and in research methods and statistics are encouraged.

#### Academic Advising

All DEA majors are matched with a faculty adviser during their first semester by the director of undergraduate studies, William Sims, in E214 Martha Van Rensselaer Hall.

Consultation with faculty advisers about future goals, departmental requirements, sequences of courses, and electives inside or outside the college helps students develop their programs. Students majoring in interior design, especially, must begin early to plan and collect materials for a portfolio of their work, which is necessary for many positions and for application to graduate schools. Faculty advisers can make recommendations on what to include. Students are free to change advisers. Although advisers must sign the

## HUMAN ECOLOGY - 2002-2003

schedule card during course enrollment each term, it is the student's responsibility to keep track of his or her courses and to make sure that they meet graduation requirements for their major and college.

## Ownership and Exhibition of Student Work

All design work done in studios as part of an academic program is the property of the department until it has been released by the instructor. The department is not responsible for loss or theft of student work.

# HUMAN BIOLOGY, HEALTH, AND SOCIETY

The Human Biology, Health, and Society (HBHS) Program permits you to combine your interests in the biological sciences while exploring human health issues from the perspectives of both the biological and behavioral sciences. HBHS majors select the issues they want to explore in depth from Human Ecology courses that address health and the broad range of factors that influence human well-being. Examples of issues you can explore include: biology and behavior; metabolism, genetics, and health; biology, growth, and development; and food and health policy and health promotion. Most students in this program will proceed to programs of advanced study to pursue careers related to health. This major is offered by faculty in the Division of Nutritional Sciences. More information about this program can be found in a separate section of the catalog that describes the division's programs

## HUMAN DEVELOPMENT

Human Development majors explore the psychological, social, cultural, and biological development of people from conception to old age, focusing on the processes and mechanisms of growth and change over the life course. A wide range of issues are included in the study of human development, including biological, cognitive, and emotional development; the role of family, neighborhood, workplace, and culture in development; and the influence that developing humans have on their environment. The Human Development major provides an excellent foundation for many careers, such as medicine (particularly family medicine, pediatrics, and psychiatry), clinical psychology and other mental health professions, law, business (especially human resources), child and family advocacy, and education (from preschool and elementary school teaching to school administration). The major prepares students for academic careers as professors in human development, psychology, or sociology departments. Learning about human development also helps students understand more clearly their own development and the development of those around them

The faculty of the Department of Human Development comes from several disciplines, including developmental and clinical psychology, sociology, and history. The diversity of faculty expertise results in a wideranging view of human development. The research of the department's faculty is extensive. It includes basic research on issues such as the neurobiology of personality, the role of childhood attachments in the development of adult romantic relationships, the acquisition of language in infants, and the effects of environmental toxins on children's cognitive development. It also includes applied research useful for the creation of public policy, such as studies of the causes and consequences of child maltreatment and studies of the effectiveness of reading programs for Headstart preschoolers, apprenticeship programs for high school students, and support programs for older adults moving into retirement communities.

#### Curriculum

Human Development is the most flexible major in the College of Human Ecology. While all students learn the fundamentals of human development, each student can focus on one or more areas of particular interest. The flexibility of the major also allows students ample opportunity to meet the requirements for admission to many professional schools, including medical, dental, law, and business schools.

Requirements specified by the College of Human Ecology make up part of each student's curriculum, and include classes in the social and natural sciences, humanities, writing, and communication. In addition, there are requirements for the Human Development major. Students in this major can choose up to 14 elective courses from the broad range of offerings across the Cornell campus.

#### Special Opportunities

Beyond formal coursework, students have many other opportunities that involve ongoing individual work with Cornell faculty or other professionals. Academic credit can be earned through all of them. These opportunities include the following:

Field Placements. Human Development majors can arrange internships with Urban Semester in New York City, Cornell-in-Washington, and Cornell Abroad programs and in local agencies. These have included hospitals, psychiatric hospitals, juvenile detention centers, retirement homes, and the department's on-campus Early Childhood Program. Students have also participated in projects with the Tompkins County Office of Aging, the Tompkins County Youth Bureau, and the Law Guardian's Office of Tompkins County.

Faculty Research. Many students work as research assistants on faculty projects. Students use research techniques ranging from laboratory procedures to family observations to large surveys. They assist in study design, data collection, and data analysis. Participation in faculty research provides the type of experience that many graduate and professional schools expect from their top applicants. Recent projects have included the study of parent-infant interactions, the transition of high school students into the world of work, and the study of recent trends in the composition of American families.

**Independent Research.** Under faculty supervision, some advanced students complete an honors thesis in an area of personal interest by designing a study and collecting and analyzing data. Recent thesis topics have included marital quality in Asian and interracial couples, development in families that adopt school-age children, and connections between speed of visual processing in infants and later scores on intelligence tests.

## Undergraduate Teaching Assistant.

Advanced students can serve as undergraduate teaching assistants. This requires close work with the professor teaching the course as well as with students taking the course.

**Teaching Certification.** A cooperative education program exists between Human Development and Wells College. This program requires careful planning and course scheduling. It enables students to graduate with a Cornell Bachelor's Degree and New York State Certification to teach nursery school through sixth grade. This certification is honored by most other states.

The program requires a minimum of a threesemester commitment. Cornell HID students take four courses at Wells College and student teach their last semester at Cornell. Although there is van transportation between Cornell and Wells College, it is important for students to have access to a car, especially while student teaching. Students will be registered at Cornell during the entire undergraduate program and usually maintain Ithaca housing. Wells College courses count as Cornell courses and are used as electives, but do not get included in a student's GPA. The onesemester student teaching experience is typically based in the Ithaca area, though not necessarily within the City of Ithaca.

This program is open to HD majors only. You must have at least a 3.0 Cornell cumulative GPA upon application, and must maintain a 3.0 GPA to qualify for student teaching and to complete the program. For more information, contact Judith Ross-Bernstein in G56 MVR at 255–0826.

## NUTRITIONAL SCIENCES

A major of Nutritional Sciences (NS) focuses on the complex interrelationships of food patterns, nutritional status, and health. This field draws upon chemistry, biology, and the social sciences to understand questions such as: How are nutrients used by the body? What factors influence human food choice? What nutrients and dietary patterns are recommended to promote growth, maintain health, or reduce the risk of chronic disease? Students in this program may also fulfill the courses required for professional membership in The American Dietetic Association, which will enable them to be employed as nutrition counselors, clinical nutritionists, sports nutritionists, or administrators of food and nutrition services. Students also may prepare for medical school and other types of advanced degree programs through this major. The requirements for this program are outlined in the section of this catalog that describes the division's programs.

## Special Opportunities Dietetics and Clinical Nutrition

Interested students should complete the academic requirements for The American Dietetic Association (ADA). Courses in foods, nutrition and disease, microbiology, management, statistics, and economics are added to the core curriculum (specific requirements). Evaluation of academic credentials for active membership and registration in ADA should be completed before graduation. Seniors should initiate this academic evaluation process in March if they will graduate in January or in September if they will graduate in May. All students who will complete the academic requirements by graduation should participate in the evaluation process while at Cornell. Students who meet most but not all of the academic requirements are encouraged to have their academic work evaluated while they are at Cornell so that deficiencies can be identified and documented.

Advisers in the dietetics program can also help students plan to meet the experience or supervised practice component required for active membership and/or eligibility to take the Registration Examination to be certified as a registered dietitian (R.D<sub>x</sub>). For additional information about meeting ADA requirements, contact Gail Canterbury, Dietetics Program Administrative Assistant, 335 MVR.

#### **Exercise Science Minor**

Students can complete the Applied Exercise Science Concentration at Ithaca College, which includes courses in fitness measurements, exercise physiology, and biomechanics of human movement. Nutrition courses of special interest relate to growth and development, regulation of body weight, and community nutrition and health. For information about the Applied Exercise Science Concentration, contact the DNS Academic Affairs Office (309 MVR, 255–4410).

# POLICY ANALYSIS AND MANAGEMENT

The Policy Analysis and Management (PAM) major produces graduates skilled in policy analysis, program planning, and evaluation and possessing management skills applicable in the public, nonprofit, and private sectors. In addition, the Policy Analysis and Management graduate will have concentrated knowledge in one of three areas: family/social welfare, health, and consumer policy. Graduates are well-qualified for a wide variety of public, nonprofit, and private sector employment emphasizing either program analysis and evaluation or management. The major also attracts large numbers of pre-law students, pre-MBA students, and students intending to pursue graduate education in public affairs and policy analysis programs. The potential exists to pursue a five-year program resulting in a BS and a Master of Health Administration.

The PAM major combines theoretical underpinnings from economics, sociology, psychology, and government to critique and analyze our society's values, laws, policies, and programs. It also gives students the knowledge to build management skills for use in public, nonprofit, and for-profit settings. Ideas of social justice, equity, and efficiency will be studied concurrently with strategic planning, human resources, supervision, and organizational development. Research methods, statistics, and planning and evaluation concepts will be learned and used to direct and aid in program planning, policy analysis, program evaluation, and management. In addition to learning basic policy analysis and management skills, the student will be expected to apply these skills to a particular concentration-social welfare/family, health. or consumer policy. Social welfare/family policy and management includes a panoply of governmental and private sector income maintenance, social, and human service delivery programs and policies that range from child adoption, neglect, and abuse policies and antipoverty programs to policies and programs that impinge on or regulate marriage, divorce, and fertility. Health programs and policies include such politically sensitive programs and issues as health care access, Medicare, Medicaid, long-term care, health maintenance organizations, public health issues, and substance abuse policies. Consumer programs and policies include the regulation and laws governing advertising, product safety, food and drug safety, nutrition policies, the regulation of credit, insurance, telecommunications, mortgage, housing, and public utility markets and also deal with issues such as the invasion of privacy, Internet security, and children's television. A specific focus in the consumer concentration is the role of marketing and its relationship to consumer well-being and consumer behavior.

In addition to college requirements, all PAM majors are expected to take core courses: Introduction to Management, Introduction to Policy Analysis, Research Methods, Multivariate Statistics, Intermediate Microeconomics, and Public Finance. Students will also be expected to develop a concentration of three courses in either social welfare/family, health, or consumer policy. These concentrations may emphasize either policy analysis or management skills. Finally, PAM majors are encouraged to participate in experiential learning such as Cornell in Washington, the Capital Semester, or Urban Semester, Please check with the undergraduate advising coordinator, Professor Alan Mathios, for further details.

## TEXTILES AND APPAREL

The Department of Textiles and Apparel (TXA) focuses on the use of textiles and fibrous materials for apparel, composites, biomaterials, residential and contract interiors, geotechnical and other applications. Programs in the department, in keeping with the overall mission of the college, emphasize the use of materials to meet human needs. The undergraduate curriculum focuses on the development of design skills, an understanding of the properties of textile materials, knowledge of marketing, and the use of technology in the industry.

Practical problem-solving skills are developed in the department's studios and laboratories. Academic course work is further enhanced by field and international experiences. Gallery space provides the setting to display design work. In addition, the Cornell University Costume Collection, housed in the department, provides a valuable resource; items from the collection are made available to students for classroom and special study use.

## Academic Advising

All TXA majors are matched with a faculty adviser by the director of undergraduate studies, Anita Racine (316 MVR). Students are strongly urged to discuss their goals, course selection and sequence, electives, and career plans with their faculty adviser. Students in apparel design must begin working with their advisers early to develop a professional portfolio of their work. Students are free to change advisers; changes must be recorded with the director of undergraduate studies. Although advisers must provide the PIN number to lock in courses during course enrollment each term, it is the student's responsibility to keep track of his or her courses and to make sure that the program meets graduation requirements for his/her major and college.

## Ownership and Exhibition of Student Work

All apparel design work done as part of the academic program is the property of the department until it has been released by the instructor. Certain exceptional work may be retained by the department to exhibit for academic purposes. The department is not responsible for the loss or theft of student work.

## **Course Fees**

No grade will be given in a course unless the course fee has been paid and equipment returned by the last week of classes.

## Options

Students may select options in apparel design, apparel/textile management, or fiber science. The curriculum is based on manipulation of form, color, and the physical characteristics and structures of fabric to solve aesthetic and functional apparel problems; the application of economic and marketing principles to consumer and industry problems in the textile-apparel sector; and the study of chemical, physical, and engineering properties of fibrous structures and polymers. Most transfer students will need at least one extra semester to fulfill the requirements of the major.

#### **Option I: Apparel Design**

The study of apparel design includes both aesthetic and functional considerations in the design of body coverings. The program emphasizes a problem-solving approach that enables the student to bring a background in apparel, textiles, and human factors to the design process.

#### **Option II: Apparel/Textile Management**

Apparel and textile management combines the fields of apparel and textiles with those of economics, business management, and organizational policy. Students combine theory with case studies to find solutions to everyday problems. Course work is drawn from many interrelated disciplines, including textiles, apparel, product development, economics, business management, and communication, as well as practical field experiences. This provides students with the experiences. This provides students with the experience of working with professionals from a wide variety of disciplines. Students often combine this option with either Option I (Apparel Design) or III (Fiber Science).

#### **Option III: Fiber Science**

Applications for textile structures include advanced engineering composites, protective clothing for industrial and military environments, and biomedical materials, as well as the more traditional applications found in apparel and home furnishings. The fiber science option provides a strong base in mathematics and the physical sciences combined with supporting courses in engineering, consumer economics, and the social sciences.

## **Career Opportunities**

Graduates of programs in the Department of Textiles and Apparel have found challenging employment within the textile and apparel sector, in independent and governmentsponsored research, and in community organizations. Recent graduates are working in the fields of design, management, new product development, engineering, communications, and marketing. In addition, the program prepares students for graduate or professional study in fiber and polymer science, textile marketing, apparel design, textiles, or business and management.

# INTERDEPARTMENTAL MAJOR IN BIOLOGY AND SOCIETY

Biology and Society is a multidisciplinary program for students with special interests in such problems as genetic engineering, environmental quality, food and population, the right to medical care, and the relation between biology, society, and ethics and/or public policy. It is also designed for students who plan postgraduate study in management, health, medicine, law, or other related fields.

Because the biology and society major is multidisciplinary, students must attain a basic understanding of each of the several disciplines it comprises, by including courses in the fields of mathematics, biology, humanities, and social sciences. In addition, majors are required to take core courses in biology and society, a set of electives, and a special senior seminar.

Course work in the College of Human Ecology may be selected from concentrations in: human development and the environment, health, or social policy and human services. The other basic requirements of the college must also be met. Programs incorporating those required courses are designed in consultation with a faculty adviser to accommodate each student's individual goals and interests. For further information on the major, including courses of related interest, specific course requirements, and application procedures, see the Director of Undergraduate Studies in MVR 205.

## INDIVIDUAL CURRICULUM

A student who has educational and professional objectives that cannot be met satisfactorily within the framework of existing majors in the College of Human Ecology may petition to develop an individual curriculum. To be approved, the curriculum must be within the focus of the college and be interdisciplinary in design, include at least 40 credits in human ecology courses, and not exceed the normal number of credits allowed in the endowed divisions. A student develops an individual curriculum in consultation with faculty advisers from at least two subject-matter fields and the program coordinator, Patti Papapietro, Office of Admission, Student and Career Services (172 MVR).

Such a program of study should encompass a substantial part of the student's undergraduate education and must include at least three semesters. For this reason, a request to follow an individual curriculum should be made after the freshman year and must be made before the second semester of the junior year.

If an individual curriculum seems advisable, the individual curriculum coordinator will provide direction in formally developing a program of study. Although the coordinator must approve the course enrollment schedule during course enrollment each term, it is a student's responsibility to follow the curriculum as planned or to have any necessary revision approved in writing by his or her adviser and the program coordinator before the program change.

## SPECIAL OPPORTUNITIES

Several programs allow students to receive academic credit for fieldwork and internship experience, study abroad, study in absentia, college-wide certificate programs, and joint programs with other schools and colleges at Cornell. Students may petition the college registrar to have concentrations that are formally recognized elsewhere within the university noted on their transcripts when accompanied by appropriate documentation from the program.

## **Study Abroad**

Each year nearly 100 Human Ecology students spend a semester or more off campus in places spanning the globe, such as Australia and Zaire. There they supplement their Cornell studies with a wide range of crosscultural and academic experiences. Study abroad opportunities are available through Cornell Abroad, U.S. college-sponsored programs abroad, and individual applications at foreign universities.

All study abroad students must meet college study abroad requirements and remain registered at Cornell during the overseas study. Credits earned count towards the 60 Cornell credits required for graduation. Study abroad credits do not count toward the maximum number of endowed credits that Human Ecology students are permitted to earn. Typically, students considering study abroad begin their planning at least by September or October of their sophomore year.

To start:

- Carefully consider what it is you hope to get out of a study abroad experience (academically and culturally). The Cornell Abroad Center (474 Uris Hall) houses the largest on-campus collection of materials on programs around the world. The Human Ecology Career Development Center (159 MVR) has additional materials.
- Pick up an application from the Office of the Registrar (145 MVR).
- Meet with the college's study abroad adviser (172 MVR). The adviser, with the college registrar, will help you complete the application, plan for your semester off

campus, and secure the necessary signatures.

 Submit your application to the Office of the Registrar. Deadlines are early February for study abroad the following fall term, and early September for study abroad the following spring term. Please note that some programs fill up quickly and applications to these most popular programs should be submitted several months before these deadlines.

## **Independent Research**

Research opportunities for undergraduates are extensive and valued as an important part of the learning experience. The opportunity to engage in substantive research with some of the leading scientists in their fields is so compelling that approximately half of the college's undergraduates conduct research projects. Students may become involved in research with the guidance of faculty members by conducting research assigned in a class, joining a faculty member's research group, completing an independent study research project, or carrying out an honors program project.

For further information, contact individual faculty members or the director of undergraduate studies (DUS) in your department.

## **Honors Programs**

Students interested in college honors programs that lead to the degree "bachelor of science with honors" usually apply to the appropriate honors committee no later than the end of their sophomore year. Generally, a minimum grade point average of 3.3 and demonstrated potential for honors-level research is required. Students take approved courses in research methodology and evaluation, attend honors seminars, complete a written thesis, and defend it in an oral examination.

In addition to the college honors program, special programs are offered by the Department of Human Development and the Division of Nutritional Sciences.

If you are interested in the honors program, it is important to contact the director of undergraduate studies (DUS) in your department or division for information and guidelines.

## **Field Study and Internships**

Field study and internships provide experiential learning opportunities in real-life circumstances where classroom knowledge is tested and applied. Students are able to master new skills, develop and implement plans of action, solve problems, interact in multicultural situations, and build networks for future job opportunities. By applying techniques of research methods, critical thinking, and self-directed learning, students learn to think conceptually while becoming agents of change.

Check with the Director of Undergraduate Studies for major specific information. The Career Development Center (159 MVR) can also provide resources and assistance in finding internships and other experiential opportunities.

## Concentration/Certificate in Gerontology

For students interested in pursuing study related to aging, the College of Human Ecology, under the auspices of the Bronfenbrenner Life Course Center, offers the option of completing an undergraduate concentration in gerontology. This program is designed to develop an understanding of and competence in dealing with the processes and issues of aging. Study in gerontology enriches the practical experience of students and prepares them for professional work in this area. The program draws on the resources of several departments and colleges at Cornell and Ithaca College to shape a curriculum suited to each student's professional goals and interests.

The concentration is available in combination with any major offered by the university. Twelve credit hours of course work must be completed with nine of these taken in the College of Human Ecology. The courses explore aging through biology, psychology, sociology, economics, and design.

Experiential learning opportunities are strongly recommended as a complement to classroom work. With faculty sponsorship, students can participate in experiences in the Ithaca area, the Urban Semester in New York City, Cornell-in-Washington, the Capitol Semester, or in a placement arranged more individually.

Both Cornell and Ithaca College offer courses that incorporate a service-learning component into their curriculum. Cornell's course, "Housing for the Elderly," (PAM 375) has placements in a variety of local agencies (e.g., Office of Aging, Housing Authority, Ithacare) where students gain valuable experience with the different ways communities make it possible for adults to remain independent. This course and others at Ithaca College are sponsored by the Ithaca Partnership for Service Learning in Elder Care. They offer a variety of options for combining volunteer service with classroom experiences. Opportunities for undergraduates to become involved in research projects, such as the Pathways to Life Quality Study, a new Cornell University/ Ithaca College longitudinal study of residential changes and adjustments in the later years are also available. In addition, senior students can apply to work as a teaching assistant for a gerontology course.

Departments and programs have designated academic advisers for the gerontology concentration who will help students plan the sequences of courses and electives needed to complete both a major and the gerontology concentration. Because many gerontology courses have prerequisites, early and careful planning is essential.

Specific program requirements may be obtained in the Office of the College Registrar (145 MVR, 255-2235) or from Donna Dempster-McClain, Bronfenbrenner Life Course Center (G20 MVR, 255-5557).

### **General Concentration**

Students may develop a concentration in additional fields taught at Cornell by taking 12 credits in an approved area. Computer science, Africana Studies, Women's Studies, communications, or business are just a few examples of concentrations that are possible.

## THE URBAN SEMESTER PROGRAM IN NEW YORK CITY

#### **Multicultural Issues in Urban Affairs** Sam Beck, Ph.D., director

The Urban Semester Program is a set of courses spanning the entire year. Students choose either fall or spring semester and enroll in three classes focusing on the opportunities and barriers that a multicultural society presents and their relationship with professional, community, or public policy settings and concerns (15-credit residential program). They also intern three days each week in placements of their choosing. One day each week, students carry out community service in an inner city school (pre-k to high school). One day each week, students participate in site visits. Seminars are incorporated into these activities. All students reside in the Olin Hall dormitory of the Weill Medical College of Cornell University.

The two-week Winter Session course (two credits) enables students to carry out community service through a reflective practice and problem-solving curriculum. In the eight-week summer semester (one to two credits), students carry out internships in placements of their choosing, including a new summer medical program. Students work with the program staff to locate internship placements. For information, contact the Urban Semester Program staff (159 MVR Hall. (607) 255-1846) or the Urban Semester Program in New York City at (212) 746-2273.

New York City offers a wide variety of internship settings. Many bilingual and bicultural internship settings are available in Chinese, Spanish, Creole, Russian, Yiddish, and other languages. Examples of internships follow:

Health and Medicine-New York Presbyterian Hospital/New York Weill Cornell Center, Oueens Medical Center for Women and Children, South Bronx Health Center for Children and Families, Memorial Sloan Kettering Hospital, Hospital for Special Surgery, Montifore Hospital, Bellevue Hospital, Our Lady of Mercy Hospital

Private and Public Law-NOW Legal Defense and Education Fund, Agenda for Children Tomorrow, Skadden Arps, Slate, Meagher, & Flom, Lawyers for Children, DA's Office, Legal Aid Society, AALDEF, Committee Against Anti-Asian Violence, Center for Immigrant Rights, NAACPLDEF, Dorsey & Whitney

Government and community agencies-Cornell University Cooperative Extension. Senator Charles Schumer's office, NYC Housing Authority, Dept. of Aging, Women's Action Alliance, NYC Commission on the Status of Women, NYC Dept. of Consumer Affairs, The Center for Puerto Rican Studies. Manhattan Borough President's office, Central Park Wildlife Center, Attorney General's office, The Parks Dept., Health Dept.

Wall Street firms and other private businesses-Bloomingdales, Prudential Securities, Merrill Lynch, Price Waterhouse, Cairns & Associates, Burson Marsteller, Cushman & Wakefield, AIG-AI Underwriters, Smith Barney, Jane Clark Chermayeff Associates, DDB Needham, KCSA, William M. Mercer Consulting Co., MGM,

Madison Square Garden, Gensler Architecture, Niedefhoffer-Henkel Century Group, American Management Association

Private not-for-profit organizations-City Lights Youth, Council on Economic Priorities. Planned Parenthood, Talbot Perkins, FEGS, National. Resources Defense Council, Urban Youth Alliance Inc., Phipps Housing, The Door, Covenant House, Global Policy and International Law, UN International Assoc. of Religious Freedom, Mothers and Others for a Livable Planet, UN Child Care Center, WHEDCO, YAI, Families and Work Institute

Private and public schools—Beginning with Children, Banana Kelly High School, East Harlem School at Exodus House, The Hetrick Martin Institute, Nuestros Ninos, Theodore Roosevelt High School. The Choir Academy of Harlem, El Puente, Genesis RFK Center, River East School, MS 118, Mott Haven Village

Design and arts organizations-Harlem Textiles Works, TADA!, NY Theater Workshop, Cynthia Rowley, Inc., Perry Ellis International, Museum of African Art, SOHO20 Gallery, Lower East Side Tenement Museum, Tommy Hilfiger, Polo, The Gap, Liz Claiborne

Communications and media-Nickelodeon, Do Something magazine, NBC "Dateline" CNN, CBS News-"48 Hours", NBC News, ABC "One Life to Live", MSNBC "The News w/ Brian Williams", The Village Voice, Good Housekeeping, The New Yorker, Essence, Children's Television Workshop, Good Morning America, MTV, HarperCollins Publishing, Maxim Magazine, Nickelodien, MTV Online International

## **Other Off-Campus Programs**

## **Capital Semester**

Combine a full semester of Cornell credit with a three-day-a-week paid internship of \$3,000. Students intern directly for New York State legislators in Albany to explore their interests in greater depth, doing research projects, meeting with lobbyists and constituents, writing reports for legislation and publication. and working on legislative hearings. This is great experience for law school, graduate school, and employment. It is available for the spring semester only with preference given to juniors.Visit the Career Development Center (159 MVR) for more information and applications.

#### Cornell-in-Washington

Students take courses from Cornell faculty, conduct individual research projects, and work as externs while taking advantage of the rich resources of the nation's capital. For more information, visit the program office (471 Hollister Hall).

## **Courses at Ithaca College and Wells** College

Full-time undergraduate students at Cornell may petition to enroll in courses at Ithaca or Wells College. Students pay regular full tuition to Cornell and only special fees to either Ithaca or Wells where applicable. Students are allowed to register for one course per term and a maximum of 12 credits in four years. Exceptions will be granted to Cornell students enrolled in methods and practice teaching courses at Ithaca and Wells, and those students pursuing a concentration in exercise

science through a specially arranged program with Ithaca College.

Cornell students are eligible to register only for Ithaca and Wells College courses that are relevant to their program and that do not duplicate Cornell courses. Ithaca and Wells College credit counts as Cornell credit, but not as Human Ecology credit. Students are accepted on a space-available basis. Participation in this program is not guaranteed, and both Ithaca and Wells have the right to accept or reject students for any reason deemed appropriate. The program is available only during the fall and spring semesters. For further information, contact the college registrar (145 MVR, 255-2235).

## **Double-Registration Programs**

#### Five-Year BS/MPS in Health Care Administration

Undergraduates from HBHS and PAM are eligible to apply to the Sloan Program in their junior year for a five-year B.S./M.P.S. degree. During their senior year, students will take first-year Sloan courses which will be counted twice to satisfy both undergraduate as well as graduate requirements. Also during this year, students will complete a graduate school application and take the GRE or GMAT test. At the end of their senior year, students will graduate with a B.S. degree. If the students' grades and test scores are competitive, they will be notified during the spring semester of their senior year that they have been formally accepted into the Sloan Program.

Those students accepted will participate in a health care administration residency during the summer after earning their BS. The following year they will complete the second year of required Sloan courses and earn a Masters in Professional Studies with Cornell certifying completion of requirements in a degree in health administration.

#### **Double-Registration Program for Law**

A small number of highly qualified applicants may be admitted to the Cornell Law School after only three years of undergraduate education. The requirements for admission under these circumstances are more stringent than for acceptance after four years of undergraduate study. Applicants must present outstanding qualifications and strong professional motivation. The junior year applicant follows the ordinary application procedures for Cornell Law School admission.

Interested students should contact the Law School director of admissions (Myron Taylor Hall, 255-5141) to discuss the admissions criteria. Because students accepted to this program will be spending their senior year away from Human Ecology, they need to plan ahead to ensure that distribution requirements for the BS degree will be met. Successful applicants need the approval of the college registrar in Human Ecology.

## ACADEMIC ADVISING AND STUDENT SFRVICES

## **Faculty Advisers**

Students who choose to major in a particular department are assigned an adviser whose special interests match their need. Students may change advisers as their own interests

change by working with the director of undergraduate studies (DUS).

Faculty advisers are available to discuss course requirements and sequences, useful electives inside or outside the college, as well as future goals and career opportunities. Although advisers must provide the adviser key number (PIN) during course enrollment each term, it is the student's responsibility to make sure that his or her program meets graduation requirements for the major and the college. Directors of undergraduate studies in each department are available to answer questions about the advising system and the undergraduate major. Students who are exploring alternative majors should work closely with college counselors.

## Office of Admission, Student, and **Career Services**

The Office of Admission, Student, and Career Services (ASCS) (172 MVR) is a center for student orientation activities; academic, personal, and career advising; study abroad; and minority student programs.

Personal counseling, including exploration of problems or concerns of a personal nature, is available to all students. These ASCS counselors, however, are not psychiatrists or therapists; they are available to help you understand and navigate the Cornell system. and to offer support, assistance, and referral. Discussions are completely confidential. Appointments may be made through the receptionist in ASCS or by calling 255-2532

In addition, ASCS provides support for several student organizations, including Human Ecology Ambassadors, the Mature Students Association, the Association for Students of Color, the Pre-professional Association towards Careers in Health, the Pre-law Undergraduate Society, the Orientation Committee, and Human Ecology Voices. Primary responsibilities of the office are listed below

Academic advisement. This service is provided to all students as an adjunct to faculty advising. Counselors can assist in course scheduling, academic planning, selection of a major, graduation requirements, and related issues.

Undeclared majors. Students who have not yet declared a major are urged to work closely with student services staff to plan their program of study. For the period a student is undeclared, counselors will provide assistance during course enrollment.

Career counseling. Career counseling is designed to help students clarify the relationship between personal skills, abilities, and career goals. Services are offered on an individual or group basis. Counselors assist in identifying career outcomes of the majors. discuss employment trends in various fields, and suggest course work appropriate to various career goals.

Post graduate advisement. Material pertaining to graduate and professional schools, graduate entrance examinations, courses of study, and career outcomes is readily available.

Students with disabilities. The college is committed to assisting students with disabilities. Students who have special needs are urged to contact the Student Disability

Services (420 CCC) when they arrive on campus.

Financial aid. Students who encounter financial difficulty or anticipate running short of funds may discuss their needs with a counselor. Complete information is available from the Office of Financial Aid, 203 Day Hall.

The Human Ecology Alumni Association Casb Award Fund This fund provides small emergency grants to students in the college who have unexpected financial problems. Applications may be made through ASCS.

## Office of the Registrar

The Office of the University Registrar (B7 Day Hall) maintains the official academic records for the university and provides students with their official university transcripts. Additional information is available on the university registrar's web site: www.sws.cornell.edu/our. The college registrar (145 MVR) maintains students' official academic records, including the audit of progress toward the degree. The college registrar also provides services such as adding and dropping classes, correcting student records, issuing letters verifying that a student is registered, and approving the transfer of credit from other institutions.

## **Minority Programs**

The College of Human Ecology at Cornell University believes that a diverse community enriches the educational process for all members of the college community. Consequently, the college focuses particular efforts on a broad range of services for students of color. This includes not only recruitment but also services for students already on campus. Additionally, the college collaborates with university and New York State programs to assure Human Ecology students have access to the vast array of services available here.

The professional staff of Human Ecology's Office of Admission, Student, and Career Services includes a director of multicultural programs who assists in the recruitment. admission, and enrollment of the most qualified and appropriate EOP (a program for New York State residents), African American, Native American, Hispanic American, and Asian American students to the college. All EOP students are invited to a special university-wide pre-freshman summer program that introduces accepted students to the Cornell campus and its classrooms. Services for current students include EOP/ COSEP; academic, career, and personal counseling; recommendation letters for employment or graduate schools; and advising and support for student activities and programs.

The Human Ecology Partnership Program provides mentorship through a network of faculty and upper-class students to all incoming students of color, particularly during their first year. In addition, this office serves as a liaison to the Office of Minority Educational Affairs (COSEP), State Programs (EOP), and the Learning Strategies Center. Students are also encouraged to visit the college's Career Development Center to enhance personal career exploration and decision making.

Selected programs include the following:

BBMTA (Black Biomedical and Technical Association). A university organization that provides enrichment activities for minority

## ACADEMIC ADVISING AND STUDENT SERVICES 287

students interested in pursuing medical careers. For more information, contact Janice Turner (55 Goldwin Smith, 255–5004).

**ASC** (Association for Students of Color). With the motto "Yesterday's vision, today's reality, and tomorrow's hope," the ASC was created to bring together Human Ecology students to provide a supportive foundation for enrollment, retention, graduation, and career placement for students of color.

The goals of the ASC are to increase communication between students of color, administration, and faculty, to assist in increasing enrollment of students of color in Human Ecology, and assist in increasing the retention of students of color in Human Ecology and in their selected majors.

ASC's four committees are recruitment and retention, student relations, career development, and peer advising. For more information contact Verdene Lee (172 MVR, 255–2532).

Human Ecology Peer Partnership Program helps incoming students of color transition to the college and university. Small groups of freshmen, usually about six to eight students, are paired with faculty and upperclassmen. They meet weekly for discussions, guidance, and explorations of the Cornell campus and the Ithaca community. For more information, contact Verdene Lee (172 MVR, 255–2532); Gary Evans in the Department of Environmental Analysis (E306 MVR, 255–4775); or Lorraine Maxwell in the Department of Design and Environmental Analysis (E310 MVR, 255– 1958).

**CSTEP.** The Collegiate Science and Technology Entry Program is the New York State program of enrichment activities and programs for pre-med and pre-law New York State residents. Services are targeted at populations who are historically underrepresented in scientific, technical, health-related, or licensed professions and/or who are economically disadvantaged and who demonstrate interest in, and potential for, a CSTEP-targeted profession. For more information, contact Verdene Lee (172 MVR, 255–2532).

## **Multicultural Education**

Multicultural education broadens understanding of the world's many different societies as well as the various cultures of this country. Students take courses in the Cornell programs listed below that may be used to meet degree requirements. The college encourages students to incorporate courses from these cultural programs and from study abroad experiences in their degree programs. See information on study abroad opportunities.

Africana Studies and Research Center

American Indian Program

Asian American Studies Program

East Asia Program

Gender and Global Change

Institute for European Studies

Languages and Linguistics

Latin American Studies Program

Latino Studies Program

Peace Studies Program

Program for Contemporary Near Eastern Studies

Program in Jewish Studies Religious Studies South Asia Program Southeast Asia Program Women's Studies Program

## **International Students**

The International Students and Scholars Office (ISS0, B50 Caldwell Hall, 255–5243) provides a broad range of services to international students. All international students should maintain contact with the ISSO. Counselors in ASCS are also available for assistance.

International students in the College of Human Ecology are encouraged to meet with the college registrar to discuss any questions or concerns that they have about their academic record.

## Career Planning, Graduate and Professional School, and Job Search Services

**Counseling.** The Office of Admission, Student, and Career Services (ASCS, 172 MVR, 255–2532) provides career counselors and resources in the Career Development Center to help students assess possible career outcomes and access educational and extracurricular programs and resources to prepare for those careers. Assistance is available through one-on-one advising or group programming. The office works with the Cornell Career Services (103 Barnes Hall, 255–5221) to facilitate access to larger, university-wide programs.

The Career Development Center (CDC, 159 MVR, 255–2532) is a starting point for students looking for career information. Selected resources about career planning and job search techniques, general directories to begin job or graduate school searches, and information for alumni networking are housed here. Also available are Cornell Career Services handouts and registration forms, graduate and professional school testing booklets and registration packets, study abroad, and Urban Semester program materials. Computer terminals provide access to web-based information regarding internship and employment opportunities, as well as graduate/professional schools.

The CDC is open most weekdays during class hours and closes at 4:00 P.M. on Fridays. Student career assistants are available during these hours to provide résumé and cover letter critiques, conduct mock interviews on video, and help navigate the library resources. Final critiques can be provided by a career counselor once the student review has been completed.

Former Urban Semester Program participants comprise a portion of the CDC student staff and are available daily to answer questions about the program and its application process.

Selected services are listed below. They will help you to investigate your interests, skills, and values as they relate to career options, provide you with useful information and tips for a successful summer or full-time job search, and provide access to employment opportunities. In addition, please refer to the college's career services web site: www.human.cornell.edu/student.

Prelaw or Premed. Students who consider themselves prelaw or premed are encouraged to join a student group affiliated with ASCS. Those interested in a law career can join PLUS (PreLaw Undergraduate Society) where information on applying to law school, preparing for the LSAT, and examining career opportunities in law is provided. Students interested in pursuing a health-related career are welcome to join PATCH (Pre-professional Association Towards Careers in Health) which serves as a link to the university health careers network and provides guidance as students prepare for the MCAT, apply to medical school, and explore the various specialties of medicine.

**Extern Program.** Spend one day to one week over winter break shadowing an alum in a career field of your choice. Observe day-to-day activities, discuss specific jobs and careers, and sometimes obtain limited hands-on experience. This service is available to sophomores, juniors, and seniors.

**Internship and Employer Files.** The CDC keeps files of more than 300 internships and hundreds of potential employers for student review.

**Student Jobs and Internships.** This is an electronic listing of information about internships and career-related summer and academic year employment that is exclusive to Cornellians.

Alumni Career Presentations. Alumni from the college come back to campus throughout the year to discuss their postgraduate or professional experiences. These meetings are ideal for exploring career outcomes of specific majors.

AlumNet. Students have access to Human Ecology alumni who can provide information on their careers and offer suggestions on a job search in their particular field or location. Students can query alumni on a host of variables and review selected alumni résumés to learn more about specific careers.

**Job Search Workshops.** The college hosts approximately 12 workshops every semester. These workshops are designed to help students market themselves for either summer or full-time job opportunities. Students learn how to conduct an effective job search, write a résumé and cover letter, and interview successfully.

**Jobtrak**. Exclusively for Cornell students, Jobtrak provides a listing of job opportunities available. Most are full-time jobs, although some summer opportunities are listed. Search by career field, geographic location, or both.

**On-campus Recruiting.** This service provides access to on-campus interviews with employers interested specifically in Cornell students. Interviews occur primarily in banking and financial services, retail sales and management, and consulting, along with a few nonprofit organizations. All activity regarding on-campus recruiting is handled through Interactive, our web-based listing of employers.

New York Recruiting Consortium.

Available exclusively to Human Ecology and Arts and Sciences students, the New York Recruiting Consortium happens in New York City over winter break. It offers interviews for full-time employment with employers involved in banking and financial services, retail sales/management, advertising, law, and consulting.

## HUMAN ECOLOGY - 20 2-2003

NFP in New York City and NFP in Washington, D.C. Speak with representatives from dozens of New York City or Washington, D.C. not-for-profit/public service agencies about work or internship opportunities in health, education, advocacy, government, and more (occurs only during the spring semester).

**Communications Consortium**. Interview with organizations in advertising, public relations, film and radio, and print media. National organizations come to Syracuse, New York to meet with you for individual appointments. During the spring semester, a job fair occurs the evening before.

# GRADUATION REQUIREMENTS AND POLICIES

It is important for students to track their graduation progress by comparing their current transcript with an appropriate curriculum sheet. Unofficial transcripts and curriculum sheets are available in the Human Ecology Registrar's Office (145 MVR Hall).

#### **Cornell Credit Requirements**

- To graduate, a student must earn a minimum of 120 academic credits. An unlimited number of credits may be taken in Cornell's statutory colleges.
- Of the 120 credits required to graduate, at least 60 credits must be earned at Cornell University.

#### Human Ecology Credit Requirements

- The college divides the 120 minimum required academic credits into four general categories. (*Refer to curriculum sheets for your major for specific details on course selections. These sheets are available in the Office of the Registrar (145 MVR) and in the Office of Admission, Student, and Career Services (172 MVR) as well as on the college web site at www.human.cornell.edu.)* 
  - a) Category I—College distribution requirements
    - Natural sciences
    - Social sciences

First-Year Writing Seminars

Humanities

Quantitative and analytical courses (math and statistics)

b) Category II-Requirements for a major

c) Category III—Electives (see definition below)

d) Category IV-Physical education

- Students must complete a minimum of 40 Human Ecology credits in Category II.
- Within Category II, students must earn nine credits in Human Ecology departments outside the major.
- These Human Ecology courses outside the major may not include HE 100. HE 101, or any 403 course. Any non-major 403 course will count as elective credit and not towards the 40 required HE credits. A maximum of three credits of special studies outside the major (400,

401, and 402), or any internship credit may be applied to this requirement. A maximum of five credits of HE 470, HE 480, HE 490 may be used. Seven credits of PAM 392 may be used in this category.

- Human Ecology courses used to satisfy distribution requirements in Category 1:
  - 1) WILL NOT count towards the 40-credit minimum in Category II.
  - 2) Will satisfy the nine-credit requirement for course work outside the major.

(*Exception*: B&S majors must refer to the "NOTE" on B&S curriculum sheets at the end of Category II requirements for appropriate guidelines.)

## **Elective Credits**

 Students have individual objectives in choosing courses beyond the minimum requirements of the major. The university is diverse: the departments, centers, and special programs numerous; the fields of study almost unlimited. Counselors and faculty advisers are available to discuss which courses may interest students and best round out their education.

Students should consult the index in this book to learn where different subjects are taught in the university. Some subjects are taught in more than one division.

Elective credits can be earned in the endowed and statutory divisions of Cornell.

## Endowed Colleges

Africana Studies and Research Center

College of Architecture, Art, and Planning

College of Arts and Sciences

College of Engineering

School of Hotel Administration

Johnson Graduate School of Management

#### **Statutory Colleges**

College of Agriculture and Life Sciences

College of Human Ecology

School of Industrial Relations

College of Veterinary Medicine

- Students are allowed 21 credits of endowed courses as electives or in their major; they may take more than 21, but will then be billed at the endowed rate of tuition for the extra credits.
- To the extent possible, courses taken in the endowed colleges will be counted to meet distribution requirements in Category I. More than 40 endowed credits taken in Category I, however, will count against the 21 allowed endowed elective credits.
- Endowed credits earned in Category II (even if the endowed courses are required for the major) and Category III will be counted against the 21.
- Required credits listed in the requirements charts for Categories I and II are the minimums; credits taken in excess of those minimums count toward the additional credits required in Category III to make a total of 120 credits (exclusive of physical education). An unlimited number of credits may be taken in the

**statutory colleges of Cornell.** Students may choose to take additional statutory credits and graduate with more than 120 credits.

 Elective credits in Category III earned in Cornell's endowed divisions during summer session, study abroad credits, in absentia credits, and transfer credits do not count against the 21 credits allowed in the endowed divisions.

#### Minimum Semester Requirements

- Students enrolling in the college as freshmen must complete at least 12 credits of Human Ecology courses by the end of the fourth semester, and at least 5 credits of Human Ecology courses must be taken in each of the freshman and sophomore years (ECON 101 and 102 may be used to fulfill this requirement).
- Students must carry 12 credits each semester, excluding physical education, to be matriculated as full-time students (*Exception:* mature students).

## **Requirements for Majors**

 Students must fulfill the requirements specified for a major that are in effect at the time of their matriculation or thereafter.

## **Grade Point Average**

- Students must earn a minimum cumulative grade point average of 1.7 (C-) or better to graduate.
- To be eligible for the Dean's List, students must have a semester GPA of 3.7 with no F or U grades. At least 12 credits of letter grades are required.

#### S-U Grade Options

- The S-U grading option may NOT be used for courses in Category I or required courses in Category II unless it is the only grade option offered for those courses.
  S-Us MAY be used for the nine credits of Human Ecology coursework outside of one's major and for electives in Category III.
- Students may apply no more that 12 credits of S-U towards graduation. If a required course is only offered S-U, it will not count towards this limit. Also, Honors Research 499 taken S-U does not count. Students may take more S-Us if they choose, but the additional credit cannot be applied towards graduation.

## **First-year Writing Seminars**

All freshmen must complete the First-year Writing Seminars during their first two semesters. Those who do not fulfill this requirement will be referred to the Committee on Academic Status (CAS) and will be required to complete the writing requirement during the third semester or a hold will be placed on the student's record. First-year Writing Seminars must be taken at Cornell and will not be approved for in absentia study.

#### **Special Studies**

 Students may use only 12 credits of 400, 401, 402, or 403 courses toward graduation. • Additional credits of 400, 401, 402, or 403 courses can be taken but will not be applied towards graduation.

## "00" Courses

• "00" courses do not count towards graduation requirements but do count towards full-time semester status.

## Wells, Ithaca College, and Study Abroad Credits

Any credits earned with the Wells or Ithaca College exchange program are considered Cornell credits for the purpose of fulfilling the 60 Cornell credit graduation requirement. They can not be used for Human Ecology credit. Study Abroad courses may also count as Cornell credit.

## **Physical Education**

- Students must earn two credits of physical education within their first two semesters. These two credits do not count as part of the 60 Cornell credits, or as part of the 120 total credits required for a degree, or towards full-time status. Students who matriculate at Cornell with 12 or more credits must complete only one credit of physical education. Students who transfer more than 25 credits (excluding AP credits) are not required to take physical education at Cornell, regardless of whether they took physical education at their previous college.
- Students must pass the university's swim test. Students who transfer more than 25 credits (excluding AP credits) are exempt. Refer to page 13 of this book for specifics.

## **Advanced Placement Credit**

Students can earn advanced placement credit from one of the following:

- 1. The requisite score on a departmental examination at Cornell (usually given during orientation week) or on a College Entrance Examination Board (CEEB) achievement test. The requisite scores for the CEEB exams are determined by the relevant department at Cornell, vary by subject, and are listed in the beginning of this book (pages 6 and 7).
- 2. A regular course taught at an accredited college to college students and approved by the relevant department at Cornell. Some departments have delegated the review of courses to college staff according to guidelines they have formulated. Some departments review each request individually. Some departments accept credit from virtually all accredited colleges; some do not.
- 3. Credit from the international baccalaureates is evaluated individually.

**Note:** Cornell does not accept credit for courses sponsored by colleges but taught in high schools to high school students. This is true even if the college provides a transcript of such work. Students who have taken such courses may, however, take the appropriate CEEB test to qualify for credit as in paragraph 1 above. For information and limitations on Advanced Placement credit, see pages 6 and 7 of this book.

## Foreign Language Study and Placement

Students who studied a foreign language before coming to Cornell and who want to continue must take either the CEEB test in that language or a departmental language placement test. The latter is given during orientation week in September and again in December, January, and May. Human Ecology students who plan to work with non-Englishspeaking people in this country or abroad often find it necessary to be proficient in another language. Many study abroad programs in non-English-speaking countries require the equivalent of two years of collegelevel language study. For more detailed information, see Advanced Placement Credits.

## **Extramural Credit**

Extramural credit is administered by the Office of Continuing Education and Summer Sessions (B20 Day Hall, 255–4987). Extramural credit is charged by the credit hour at the endowed tuition rate. Students may count only 15 credits of extramural credit toward their degree requirements. A student may enroll for extramural credit during the fall or spring semester only if he or she is not registered in the College of Human Ecology. For example, some students enroll for extramural credit before matriculating at Cornell.

An exception to this rule is credit earned in the Ithaca College or Wells College exchange. Students enrolled in these programs simultaneously maintain their status as students registered in the College of Human Ecology.

## **Humanities**

Only certain classes will count for Category I.D. Humanities. To determine eligibility the college uses the following definition: "The humanities include the study of literature, history (including art and design history), philosophy, religion, and archaeology. Critical, historical, and theoretical studies of the arts and design are considered humanities. Languages and creative or performing arts such as the writing of fiction or poetry, painting, sculpting, designing, composing or performing music, acting, directing, and dance are not considered humanities." Additionally, social science courses such as sociology, government, anthropology, and psychology are not considered humanities.

Specifically, courses in the following list will count as humanities:

Africana Studies (literature and history)

Archaeology

Asian American Studies

Asian and Near Eastern Studies (literature and history)

Classics (literature and history)

Comparative Literature

English (literature only)

History

History of Art/History of Architecture LA 282

Music and Theatre Arts (theory, literature, and history only)

Natural Resources 407, 411 Philosophy **Religious Studies** 

Rural Sociology 100, 175, 318, 442 S&TS 233, 250, 281, 282, 292, 360, 389, 433, 444, 447, 490 HD 241, 359, 417 DEA 111, 243, 251, 443 PAM 652

## **PROCEDURES**

## **Registration and Course Enrollment**

#### **Registration Requirements**

University registration is the official recognition of a student's relationship with the university and is the basic authorization for a student's access to services and education. Completion of registration is essential to enable the university to plan for and provide services and education, guided by the highest standards for efficiency and safety. Unauthorized, unregistered persons who use university services and attend classes have the potential to use university resources inappropriately and to displace properly registered students. In addition, the university assumes certain legal responsibilities for persons who participate as students in the university environment. For example, policy states that New York State health requirements must be satisfied. Because these requirements are intended to safeguard the public health of students, the university has a responsibility to enforce the state regulations through registration procedures.

The policy on university registration is intended to describe clearly the meaning of and the procedures for registration so that students can complete the process efficiently and be assured of official recognition as registered students. With the clear communication of the steps for registration, it is hoped that compliance will occur with a minimum of difficulty.

To become a registered student at Cornell University, a person must complete course enrollment according to individual college requirements; settle all financial accounts including current semester tuition; satisfy New York State health requirements; and have no holds from the college, the office of the Judicial Administrator, Gannett Health Center, or the Bursar.

Individuals must become registered students by the end of the third week of the semester. Cornell University does not allow persons who are not registered with the university in a timely manner to attend classes. The university reserves the right to require unauthorized, unregistered persons who attend classes or in other ways seek to exercise student privileges to leave the university premises.

#### Verification of Registration

Many insurance companies or scholarship funds require verification of full-time registration at Cornell. Should students need such verification, request an official letter from the Office of the University Registrar (B-7 Day Hall). Students who need letters of good standing should contact the Human Ecology Registrar's Office (145 MVR).

#### **Bursar Bill**

A bursar bill is sent to each student over the summer and winter breaks; it summarizes what is owed to the university. The bursar bill can also be viewed through Just the Facts. Any questions regarding the bursar bill can be directed to the Bursar's Office (260 Day Hall, 255–2336). Initial New York State residency eligibility is determined during the admissions process, but the Bursar's Office will handle any request for a status change after matriculation.

#### Late University Registration

A student clearing his or her financial obligations after the deadline date on the bursar's bill is considered late. Late registrants are assessed a finance charge on the bursar's bill starting from the date the bill is due. According to university policy, all students must be registered before the end of the third week of classes. If for any reason a student registers after that time, the Bursar's Office will charge a late fee. Students who fail to register by the third week of the term may be withdrawn from the university. Should withdrawn students wish to return, they must reapply through the admissions committee.

#### **Proration of Tuition**

Except for mature students, it is seldom possible to have tuition prorated if a student carries fewer than 12 credits during a semester. (See the college registrar or counselors for more information.) Students of mature status may carry 6 to 11 credits without petitioning, but must request that their tuition be prorated. Prorated tuition will only be considered for requests of 10 credits or fewer. All requests should be made to the college registrar by the first week of classes and no later than the third week of the term.

## **Course Enrollment**

#### Initiating the process

Students are expected to make course requests for the subsequent semester during a specified time in the current semester. Those dates are advertised publicly and available on the University Registrar's web site (www.sws.cornell.edu/our). CoursEnroll takes place electronically, using software available through Just the Facts. During this time, each student must meet with his or her faculty adviser to discuss academic plans and to obtain the advising PIN code required for finalizing course requests. A student may enter and hold courses prior to entering their PIN. Once the PIN number is entered, however, the schedule is locked and it is not possible to change until the add/drop period of the next term. Information on courses is readily available in this book and in the Course and Time Rooster for each semester. Both of these publications can be accessed on the web through CUInfo.

Incoming students will receive tentative schedules upon their arrival to campus, and will meet with faculty advisers during the orientation period.

#### **Course Loads**

The normal course load in the college ranges from 12 to 18 credits, although there is no limit to the number of statutory credits a student may take each semester. Nonetheless, students should avoid planning excessive workloads; the time required to keep abreast of courses tends to increase as the semester progresses. Classes cannot be withdrawn from after the seventh week of classes without petitioning and by substantiating extenuating circumstances. Students should avoid the need to drop courses by taking on a reasonable workload and using the drop period to make changes in their program.

Except for those with mature student status, students must carry at least 12 credits (exclusive of physical education) to maintain full-time status. In special cases, a student may petition to carry between 8 and 12 credits. Forms for petitioning and advice on how to proceed are available from the Office of Admission, Student, and Career Services (172 MVR).

#### Late Course Enrollment

3

Students who do not complete course enrollment during the CoursEnroll period usually must wait until the beginning of the next semester's add/drop period to enroll. Extensions are rarely granted and usually only for documented illness.

Students who do not meet the deadline for any reason should see the college registrar in 145 MVR as soon as possible. The college registrar can explain available options and course enrollment procedures under such circumstances.

**Note:** Students can review their course schedule via computer using Just the Facts. Students are responsible for checking their course schedule for accuracy of course numbers, credit hours, grade options, and other data. Errors must be corrected immediately. Procedures for correcting enrollment errors as well as for making any other changes are described below under Course Enrollment Changes.

## **Course Enrollment Changes**

It is to the student's advantage to make any necessary course enrollment changes as early in the term as possible. Adding new classes early makes it easier for the student to keep up with class work. Dropping a class early makes room in the class for other students who may need it for their academic programs.

Ideally, students evaluate their class workload carefully at the beginning of the term. If, in the first week or two, the instructors do not discuss the amount of material to be covered and the extent of student assignments, students need to ask about course requirements.

Some procedures required for course enrollment are also required for course enrollment changes. For example, students must obtain the instructor's permission for a course requiring it, and must complete the same forms for special studies courses. Aside from the procedures listed below for course enrollment changes, all drop/add forms for nutritional science majors must be signed by a faculty adviser.

## Deadlines for Add/Drop and Grade Option Changes

 During the first three weeks of the term, courses may be added, dropped, or the grade option changed.

- From the fourth through the seventh week of the term, courses may be dropped. Grade option changes cannot be made at this point regardless of instructor's permission.
- From the fourth week of the term, instructors have the right to consider students' requests for course changes on an individual basis or to announce at the beginning of the term a specific date between the fourth and seventh weeks beyond which they will no longer approve course changes.
- After the seventh week of the term, any requests for course changes must be made through the petition process.
- After the seventh week of the term, any student granted permission to drop a course after petitioning will automatically receive a grade of W (Withdrawn), and the course will remain on the official transcript, even if repeated in a later term.

#### **Deadlines for Half-Term Courses**

Students may drop half-term courses within the first three-and-one-half weeks of the course. Students may add a course after the first week of classes only with the permission of the instructor. After the first three-and-onehalf weeks, students must petition to drop the course.

## Procedures for Add/Drop and Grade Option Changes

To make course changes during the add/drop period, a student must take the following five steps:

- Obtain an add/drop form from the Human Ecology Registrar's Office (145 MVR).
- 2. Complete the form and take it to the appropriate office for a signature: for Human Ecology courses, the forms should be taken to the Human Ecology Registrar's Office; for courses outside the college, the forms should be taken to the appropriate departmental office of the college. (Students in the Division of Nutritional Sciences must have their adviser's signature on all add/drop forms.)
- 3. Make sure their name is added to the list of enrolled students for a course being added, or removed from the class list for a course being dropped. Ask the person recording the change to sign the form.
- 4. Submit all signed forms to the Human Ecology Registrar's Office, including the forms for out-of-college courses. Changes are not completed until the signed forms are filed in that office. Students who do not drop a course they no longer attend are in danger of receiving an F in the course.
- 5. Receive carbon copies of each course change form at the time it is submitted. It is important for students to keep these copies to verify any changes.

To make course changes after the seventh week of the term, a student must file a general petition form. (See the section, *Petition Process.*) Students are expected to attend classes and to do assigned work until the petition has been formally approved or denied.

290

## Time and Place for Add/Drop and Grade Option Changes

All students may adjust their schedules and grading options during the first three weeks of each semester. The university also holds a course exchange the day before fall classes begin where students have the opportunity to change their class enrollment in centralized locations. The Human Ecology Course Exchange is located in the MVR auditorium. For course exchange location for other colleges check the registration website each semester.

#### Permission of Instructor

Certain courses may be taken only with the permission of the instructor as indicated in this book. Undergraduates must obtain permission of the instructor to take any graduate course. Students must request the instructor's permission during the CoursEnroll period by placing their name on a list maintained by the departmental advising assistant.

Students interested in taking a course in the Department of Art in the College of Architecture, Art, and Planning are required to register with the departmental secretary (100 Olive Tjadan Hall) before enrolling in the course. Seniors who want to take an elective course in the Johnson Graduate School of Management are required to obtain permission of the instructor on a course authorization form that the student then files with that school's registrar in Sage Hall.

#### Course Enrollment while Studying Abroad

Students who plan to study abroad have several options available to enroll for their returning semester at Cornell. Students can consult with their faculty adviser before departure to consider the schedule of classes that they will take upon their return to campus. Once abroad, the student can use the web to access the Cornell University Courses of Study and the Course and Time Roster for the coming term. The roster is available on the web in approximately the first week of October and the first week of March. Using these resources, the student can e-mail the course requests to the student's faculty adviser for approval; the faculty adviser can then e-mail them to the college registrar. A student who does not have access to the Internet while abroad can wait for the Course and Time Roster to arrive via airmail from the Cornell Abroad Office. The student can then e-mail, fax, or mail the course requests to their faculty adviser and ask the faculty adviser to submit the course requests to the college registrar. The Course and Time Roster becomes available only the day that pre-enrollment begins; thus, students who depend on receiving the mailed copy will experience some delay in submitting their course requests.

#### **Oversubscribed Courses**

Enrollment in many human ecology courses is limited. When a course is over enrolled, students are generally assigned on the basis of seniority or by criteria defined for each course as listed in this book. Students' professional goals may be considered. Those students not admitted to a course may be placed on a waiting list.

#### **Course Wait List**

The Human Ecology Registrar's Office maintains waiting lists for selected courses to accommodate students who want to enroll in courses that have been filled. Course instructors are responsible for determining the criteria to fill their classes from waiting lists. Waiting lists are maintained only for the first three weeks of each semester.

## **Limited Enrollment Classes**

Students who do not attend the first two class sessions of courses with limited enrollment may be dropped from the course list. Students can avoid being dropped from a class by notifying the instructor that unavoidable circumstances have prevented their attendance.

#### **Special Studies Courses**

Each department in the College of Human Ecology (DEA, HD, DNS, PAM, and TXA) offers special studies courses that provide opportunities for students to do independent work not available in regular courses. One of those courses, designated 300, Special Studies for Undergraduates, is intended primarily for students who have transferred from another institution and need to make up certain course work.

The other special studies courses are 400, Directed Readings; 401, Empirical Research; and 402, Supervised Fieldwork. Junoirs and seniors normally take those courses, and a faculty member in the department in which the course is offered supervises work on an individual basis. It is important for students to use the appropriate course number (300, 400, 401, or 402) for a special project.

To register for a special studies course, a student obtains a special studies form from the departmental office where they plan to take the course. The student discusses the proposed course with the faculty member under whose supervision the study would be done and then prepares a plan of work. If the faculty member agrees to supervise the study, the student completes a special studies form and obtains signatures from the instructor and department chair before submitting the form to the Office of the College Registrar (145 MVR). The student must also submit a course registration form (add/drop form) to the Office of the College Registrar. Special studies forms are available in 145 MVR or in departmental offices. Add/drop forms are only available in 145 MVR.

Semester credits for special studies courses are determined by the number of contact hours the student has with the supervising faculty member (or a person designated by the faculty member). To earn one credit, a student must have the equivalent of three to four hours of contact time per week for 15 weeks (a total of 45 contact hours). For additional credit, multiply the number of credits to be earned by 45 to determine the number of contact hours needed for the course. A student can only use 12 credits of 400, 401, 402, or 403 courses towards graduation and only three 400-, 401-, or 402credits can be used to satisfy the ninecredit-outside-the-major requirement. To register in a special studies course taught in a department outside the college, follow the procedures established by that department.

## **Changes in status**

#### **General Petition Process**

The petition process permits students to request exceptions to existing regulations. Petitions are considered individually, weighing the unique situation of the petitioning student with the intent of college and university regulations. In most cases, extenuating circumstances are needed for a petition to be approved if it involves waiving a deadline. These are situations beyond a student's control, such as a documented medical emergency.

Students can avoid the necessity to petition by carefully observing the deadlines that affect their academic program. See the Course Enrollment Changes section above for some of the important deadlines. If unsure of a deadline, check with a counselor in the Office of Admission, Student, and Career Services (172 MVR) or with the Office of Registrar's staff (145 MVR).

A general petition may be needed to carry fewer than 12 credits, withdraw from a class after the seventh week deadline, add a course after the third week deadline, change a grade option after the third week deadline, be exempt from one or more of the college's graduation requirements, substitute a required course in one's major with another course, or stay an additional semester to complete the graduation requirements.

Although many kinds of requests can be petitioned in the college, options other than petitioning may be preferable in some cases. To explore whether a petition is appropriate, the student may discuss the situation with a college counselor or the college registrar.

If a student decides to submit a general petition, the form is available in the Office of the Registrar (145 MVR) and in the Office of Admission, Student, and Career Services (172 MVR) or on the web at www.human.cornell. edu/student/forms/. After completing the form and obtaining the required signatures, the student must turn the form in to the Office of the Registrar. Once a decision is made, a letter is placed in the Registrar's Office mail folder indicating approval or denial of the petition.

Students may appeal the college registrar's decision to the Committee on Academic Status. Students who elect to appeal have the option of appearing in person before the committee to state their case. A member of the counseling staff can guide a student through this process.

#### In Absentia Study

Under certain conditions, credit toward a Cornell degree may be given for in absentia study, that is, study done at an accredited institution away from Cornell after the student matriculates in the College of Human Ecology. In absentia study can be done during any term; fall, winter, spring, or summer. (First-Year Writing Seminars cannot be taken in absentia).

To be eligible for in absentia study, a student must be in good academic standing and must receive permission in advance from the college registrar. Students not in good standing may study in absentia but will not receive transcript credit until the Committee on Academic Status has returned them to good standing. In some cases, students may petition for in absentia credit after the work has been completed, but there is no guarantee that such credit will be awarded without advance approval.

In absentia petition forms are available in the Human Ecology Registrar's Office (145 MVR) or on the web at www.human.cornell.edu/ student/forms/. The student completes the form, attaches catalog descriptions for the courses that will be taken, then submits the form to the Human Ecology Registrar's Office (145 MVR). In absentia study during the fall or spring term carries a nominal administrative fee. (Contact the Bursar's Office, 260 Day Hall, for the current amount).

Students will receive a letter in their mail folder from the college registrar notifying them of the petition decision.

A student may take up to 15 credits in absentia as long as the courses do not duplicate courses already taken and the in absentia courses are applicable to the requirements of the college. Students who study abroad during the summer or winter term are limited to a maximum of nine in absentia credits. Study abroad during the fall or spring semester must be done through the Study Abroad Office and is not considered in absentia study.

On rare occasions a student's petition for more than 15 credits in absentia may be allowed: (1) the work taken represents a special educational opportunity not available at Cornell, (2) it relates to the student's particular professional goals, and (3) those goals are consistent with the focus of the college. The in absentia petition form is used to request more than 15 credits in absentia. Wells and Ithaca College credit are not considered in absentia credit and are not included in the 15 credit limit.

The college registrar requests approval from the appropriate department if a student wants to apply in absentia credit to requirements in his or her major. If in absentia credit is sought for a modern foreign language in which the student has done work, approval by the Department of Modern Languages and Linguistics (College of Arts and Sciences) must be obtained. The department will recommend the number of credits the student should receive and may require the student to take a placement test after returning to Cornell.

The student is responsible for having the registrar of the institution where in absentia study is taken send transcripts of grades to the Human Ecology Registrar's Office at 145 MVR Hall. Only then will credit be officially assessed and applied to the Cornell degree. Credit for in absentia study will be granted **only** for those courses with grades of C- or better. In absentia courses appear on the Cornell University transcript, but the grades are not calculated in the student's GPA.

A student who holds a Regents' or Children of Deceased or Disabled Veterans Scholarship may claim that scholarship for study in absentia if the study is done in a college in New York State and if it is for a maximum of 15 credits acceptable to the College of Human Ecology.

The rules regarding study in absentia apply to transfer students with the additional stipulation that at least 60 credits must be taken at Cornell. At least 40 of the 60 credits must be in the College of Human Ecology at Cornell unless the student has transferred equivalent human ecology credit. (No more than 20 credits of equivalent credit may be applied to the 40 credits required in human ecology course work.)

#### Leaves of Absence

A student may request a leave of absence before the beginning of the semester or during the first seven weeks of the semester for which a leave is sought. A leave may be extended for a second semester by making a written request to the Office of Admission. Student, and Career Services. Note that in absentia study status and leave of absence status are mutually exclusive. Students on leave must notify the college registrar in MVR 145, in writing, of their intention to return to campus prior to the beginning of the semester. Those whose leave period has expired will be withdrawn from the college after the seventh week of the semester they were due back.

Students considering a leave of absence should discuss their plans with a counselor in the Office of Admission, Student, and Career Services. The counselor can supply the necessary forms for the student to complete and file with the Human Ecology Registrar's Office (145 MVR). Leaves initiated after instruction begins will be charged a percentage of the semester tuition. (Refer to Bursar Information in this book for a billing schedule.)

Requests for a leave of absence received after the first seven weeks of the semester, or requests for a leave of absence from students who have already had two semesters' leave of absence, will be referred for action to the Committee on Academic Status. The committee may grant or deny such requests, attaching conditions as it deems necessary. Leaves of absence after the first seven weeks are generally granted only when there are compelling reasons why a student is unable to complete the semester, such as extended illness.

A student who requests a leave of absence after the first seven weeks is advised to attend classes until action is taken on the petition. A student whose petition for a leave of absence is denied may choose to withdraw or to complete the semester. If the petition for leave is approved the student's courses will remain on the transcript with "W"s.

The academic records of all students who are granted a leave of absence are subject to review, and the Committee on Academic Status may request grades and other information from faculty members to determine whether the student should return under warning or severe warning or in good academic standing.

Under certain documented medical circumstances a student may be granted a **medical leave of absence**. Medical leaves are initiated by the student with Gannett Health Center. If Gannett Health Center recommends a medical leave for the student, the college registrar may grant the leave. A medical leave is for an indeterminate period of time not to exceed five years. Students who are granted a medical leave of absence are encouraged to maintain contact with a counselor in the Office of Admission, Student, and Career Services (255– 2532) to arrange their return to campus. The counselor will advise the student on procedures to obtain a recommendation from Gannett Health Center to the college registrar for the student's return. The student should plan sufficiently in advance to assure time for Gannett Health Center and the college registrar to consider their request.

#### Withdrawal

A withdrawal is a termination of student status at the university. Students may voluntarily withdraw at any time by notifying a counselor in the Office of Admission, Student, and Career Services and filing a written notice of withdrawal in the Human Ecology Registrar's Office. A student considering such an action is urged to discuss plans with a counselor in the Office of Admission, Student, and Career Services (172 MVR).

In some instances a student may be given a withdrawal by the college registrar. Students who leave the college without an approved leave of absence, or do not return after the leave has expired will be given a withdrawal after the seventh week of the term in which they fail to register.

A student who has withdrawn from the college or who has been given a withdrawal by the college registrar and who wishes to return at a later date must reapply through the Office of Admissions for consideration along with all other applicants for admission. If the student was in academic difficulty at the time of the withdrawal, the request for readmission will be referred to the Committee on Academic Status for consideration, and that committee may stipulate criteria under which the student may be readmitted to the college.

## GRADES AND EXAMINATIONS

#### **Grade Definitions and Equivalents**

The official university grading system uses a system of letter grades ranging from A+ to Dwith F denoting failure. An INC grade is given for incomplete work and R is given at the end of the first semester of a two-semester class. If a student is given permission to withdraw from a class after the seventh week of the term a W is automatically assigned. Students can view their grades on Just the Facts after the semester has ended. Final spring semester grades are mailed to student's homes during the summer. See the "Grading Guidelines" section in this book for more information on the official university grading policies.

To compute a semester grade point average, first add up the products (credits hours X grade quality points) and divide by the total credit hours taken. Grades of INC, R, S, SX, U, UX, and W should not be included in any GPA calculations. A grade of F has no quality points, but the credits are counted thereby lowering the average. A cumulative GPA is just the sum of all semester products divided by all credits taken. For further help on calculating a grade point average ask at the Office of the College Registrar (145 MVR).

These are the quality point equivalents:

A+ = 4.3	C+ = 2.3
A = 4.0	C = 2.0
A- = 3.7	C- = 1.7
B+ = 3.3	D+= 1.3
B = 3.0	D = 1.0
$B_{-} = 2.7$	D- = 0.7
	F = 0.0

## **S-U Grades**

Some courses in the college and in other academic units at Cornell are offered on an S-U basis: that fact is indicated in this book. Courses listed as SX-UX are only available on an S-U basis and may not be taken for a letter grade. University regulations concerning the S-U system require that a grade of S be given for work equivalent to a C- or better; for work below that level, a U must be given. **No grade** point assignment is given to S, and S or U grades are not included in the computation of semester or cumulative averages. A course in which a student receives an S is, however, counted for credit. No credit is received for a U. Both the S and U grades appear on a student's record. A student who is attempting to qualify for the Dean's List must take at least 12 credits of A-F grades. See the section. Awards and Honors for more details about the Dean's List

No more than 12 S-U credits will count towards a student's 120-credit graduation requirement. However, a student may take more than one S-U course in any one semester. S-U courses may be taken only as electives or in the nine credits required in the college outside the major unless the requirements for a specific major indicate otherwise. Freshmen enrolled in English 137 and 138 (offered for S-U grades only) are permitted to apply those courses to the freshman writing seminar requirement. If a required course is only offered S-U, it will not count toward the 12-credit or four-course limit. To take a course for an S-U grade, a student must check the course description to make sure that the course is offered on the S-U basis; then either sign up for S-U credit during course enrollment, or file an add/drop form in the Human Ecology Registrar's Office before the end of the third week of the term. Forms are available in the Human Ecology Registrar's Office. After the third week of the term, students cannot change grade options.

Note: students considering medical school or law school should discuss selecting any S-U option with the college's pre-med/pre-law adviser, Paula Jacobs (172 MVR).

## **Grades of Incomplete**

A grade of incomplete is given when a student does not complete the work for a course on time but when, in the instructor's judgment, there was a valid reason. A student with such a reason should discuss the matter with the instructor and request a grade of incomplete.

A grade of incomplete may remain on a student's official transcript for a maximum of two semesters and one summer after the grade is given, or until the awarding of a degree, whichever is the shorter period of time. The instructor has the option of setting a shorter time limit for completing the course work.

If the work is completed within the designated time period, the grade of incomplete will be changed to a regular grade on the student's official transcript. If the work is not completed within the designated time period, the grade of incomplete automatically will be converted to an F.

When a student wants to receive a grade of incomplete, the student should arrange a conference with the instructor (preferably before classes end and the study period

begins) to work out the agreement. A form, called explanation for reporting a final grade of F or incomplete, which must be signed by both the instructor and the student, needs to be submitted by the instructor to the Human Ecology Registrar's Office. This form is submitted with the final grade sheets whenever a grade of incomplete is given. This form is for the student's protection, particularly in the event that a faculty member with whom a course is being completed leaves campus without leaving a record of the work completed in the course. If circumstances prevent a student from being present to consult the instructor, the instructor may, if requested by the student, initiate the process by filling out and signing part of the form and turning it in to the Human Ecology Registrar's Office with the grade sheet. Before a student will be allowed to register for succeeding semesters, he or she must go to the Human Ecology Registrar's Office to fill out and sign the remainder of the form.

If the work is satisfactorily completed within the required time, the course appears on the student's official transcript with an asterisk and the final grade received for the semester in which the student was registered for the course. A student who completes the work in the required time and expects to receive a grade must take the responsibility for checking with the Human Ecology Registrar's Office (about two weeks after the work has been handed in) to make sure that the grade has been received. Any questions should be discussed with the course instructor.

#### **Grade Disputes**

Students who find themselves in disagreement with instructor over grades have several options:

- 1. Meet with the instructor and try to resolve the dispute.
- Meet with the chair of the department in which the instructor has their appointment.
- Meet the associate dean for undergraduate studies of the college in which the course was taught.
- 4. Meet with the university ombudsman (118 Stimson Hall, 255–4321).

A student may also seek advice from their faculty adviser or with a counselor in the Office of Admission, Student, and Career Services (172 MVR).

## **Repeating Courses**

Students are allowed to register a second time for a course they have already passed or have received an "F." If a student has previously passed a course they are taking a second time, the second registration will not count towards their degree requirements and the grade received will not be included in their cumulative GPA.

If a student enrolls in a course in which they previously received an F, the credits from the second registration will count towards their graduation requirements and the grade will be included in their cumulative GPA. The F will also remain on the record and will be included in the GPA.

#### Examinations

Both the preliminary and final examination schedules are printed every semester in the

*Course and Time Roster*. The current exam information is also available on the university web page at www.cornell.edu/Academic/Academic.html#Class.

#### **Final Examinations**

The following is quoted from the Cornell University Faculty Handbook, 1990, pages 66–67:

"The University Faculty long ago established, and has never reversed, the policy that each course should require a final examination or some equivalent exercise (for example, a term paper, project report, final critique, oral presentation, or conference) to be conducted or due during the period set aside for final examinations.

"Although not specifically prohibited, it is University policy to discourage more than two examinations for a student in one twenty-four hour time period and especially on any one day. It is urged that members of the faculty consider student requests for a make-up examination, particularly if their course is the largest of the three involved and thus has the strongest likelihood of offering a makeup for other valid reasons, i.e. illness, death in the family, etc.

Legislation of the University Faculty governing study period and examinations is as follows:

- No final examinations can be given at a time other than the time appearing on the official examination schedule promulgated by the Registrar's Office without prior written permission of the Dean of the Faculty.
- No permission will be given, for any reason, to schedule final examinations during the last week of classes or the designated study period preceding final examinations.
- 3. Permission will be given by the Dean of the Faculty to reschedule examinations during the examination period itself if requested in writing by the faculty member, but only on condition that a comparable examination also be given for those students who wish to take it at the time that the examination was originally scheduled. The faculty member requesting such a change will be responsible for making appropriate arrangements for rooms or other facilities in which to give the examination. This should be done through the Registrar's Office.
- 4. No tests are allowed during the last week of scheduled classes unless such tests are part of the regular week-by-week course program and are followed by an examination (or the equivalent) in the final examination period.
- Papers may be required of students during the study period if announced sufficiently far in advance that the student did not have to spend a significant segment of the study period completing them.
- Faculty can require students to submit papers during the week preceding the study period.
- 7. Take home examinations should be given to classes well before the end of the regular term and should not be required to be submitted during study period but rather well into the examination period.

Students have a right to examine their corrected exams, papers, and the like, in order to be able to question their grading. They do not, however, have an absolute right to the return thereof. Exams, papers, etc., as well as grading records, should be retained for a reasonable time after the end of the semester preferably until the end of the following term, to afford students such right of review."

#### **Preliminary Examinations**

The following is quoted from the Cornell University Faculty Handbook (1990), pages 65–66:

"Preliminary examinations are those given at intermediate times during a course. It is common to have three of these in a term to encourage review and integration of major segments of the course, to provide students with feedback on how well or poorly they are progressing, and to contribute to the overall basis for a subsequent final grade.

The most convenient times and places for "prelims" are the normal class times and classrooms. But many courses, particularly large ones with multiple sections, choose to examine all the sections together at one time and to design an examination that takes more than one class period to complete. In such cases the only alternative is to hold the prelim in the evening. This practice creates conflicts with other student activities, with evening classes and laboratories, and among the various courses that might choose the same nights.

To eliminate direct conflicts, departments offering large multisection courses with evening prelims send representatives annually to meet with the dean of the University Faculty to lay out the evening prelim schedule a year in advance. Instructors of smaller courses work out their own evening prelim schedules, consulting their students to find a time when all can attend. Room assignments are obtained by the faculty member through the contact person in his or her college or the Central Reservations Coordinator.

The policy governing evening examinations is as follows:

- 1. Evening examinations may be scheduled only on Tuesday and Thursday evenings and only after 7:30 P.M. without prior permission from the Office of the University Faculty.
  - a. Such prior permission is not, however, required for examinations or makeup examinations involving small numbers of students (generally 30 or fewer) provided that the scheduled time is acceptable to the students involved and that an alternate examination time is provided for those students who have academic, athletic, or employment conflicts at the time scheduled.
- 2. Permission from the Office of the University Faculty to schedule on evenings other than Tuesdays and Thursdays or at a time prior to 7:30 P.M. will be granted only on the following conditions:
  - a. Conditions such as the nature of the examination, room availability, large number of conflicts, etc., justify such scheduling.

- b. An alternate time to take the exam must be provided for those students who have academic, athletic, or employment conflicts at the time scheduled.
- 3. If there is a conflict between an examination listed on the schedule developed at the annual evening prelim scheduling meeting and an examination not on the schedule, the examination on the schedule shall have a priority, and the course not on the schedule must provide an alternate time to take the examination for those students faced with the conflict.
- 4. If there is a conflict between examinations, both of which are on the schedule developed at the annual evening prelim scheduling meeting or both of which are not on the schedule, the instructors of the courses involved must consult and agree on how to resolve the conflict. Both instructors must approach this resolution process with a willingness to provide an alternative or earlier examination.
- 5. Note that courses using evening examinations are strongly urged to indicate this in the course description listed in Courses and must notify students of the dates of such examinations as early as possible in the semester, preferably when the course outline is distributed."

## ACADEMIC STANDING

## **Criteria for Good Standing**

The College of Human Ecology has established a set of minimum academic standards which all students must meet or exceed each semester. These standards are as follows:

- 1. A student must maintain a semester and cumulative grade point average of 1.7 or higher.
- A student must successfully complete at least 12 credits per semester, excluding physical education courses.
- Freshmen and sophomore students must complete at least one human ecology course each semester. (ECON 101 and ECON 102 are considered Human Ecology courses).
- 4. A student must be making "satisfactory progress" toward a bachelor's degree.

Upon the completion of each semester the Committee on Academic Status (CAS) reviews each student's academic record to ensure the above academic standards are upheld. The committee then takes appropriate action for students whose academic achievement is considered unsatisfactory as defined by the above criteria. The five voting faculty members, along with several nonvoting student services staff, consider each case individually before deciding on a course of action. The committee may take any of the following actions depending on the seriousness of the student's academic difficulties:

- 1. Take no action.
- 2. Return the student to Good Standing.
- Place the student on a **Review List**. which means the case will be monitored throughout the semester.
- 4. Place the student on a Warning status.

- 5. Place the student on a **Severe Warning** status.
- 6. Place the student on a Severe Warning with Danger of Being Dropped status, implying that if the student does not show considerable improvement during the semester the committee will likely drop the student at the end.
- 7. **Suspend** the student for one or more terms during which the student may not register at Cornell (except in extramural status with CAS approval).
- 8. Permanently **withdraw** the student from the college and Cornell University.

Students who have been suspended or withdrawn have the right to appeal the decision in front of the committee during the appeals meeting. Students who have been placed on warning due to incomplete or missing grades may request their status be updated to good standing once they have cleaned up their records. These requests should be made with a general petition and submitted to the Office of the Registrar.

All students with a status will automatically be reviewed at the end of the subsequent semester. In most cases, students put on a warning, severe warning, or severe warning with danger of being dropped status will be informed of conditions that they are expected to fulfill in order to return to good standing. In general these conditions are that a student must earn a minimum GPA of 2.0, complete 12 credits, and not have any incomplete, missing, "F", or "U" grades on their semester record.

If a student who has been previously suspended wishes to return to the college he/she must submit a plan of study to the committee before being rejoined.

Students who have been withdrawn by CAS may request reconsideration and ask to be readmitted by the committee. Such students have three years from the date they were withdrawn to make this request. After three years, a former student must apply for admission through the Office of Admission. A student should discuss their situation with a counselor in the Office of Admission, Student, and Career Services (172 MVR). They should also talk with others who may be able to help them-faculty advisers, instructors, or a member of the medical staff. A students may also write directly to the committee (via the committee chair, whose name can be obtained from the college registrar) and present new or previously unknown information. Any information given to the committee is held in the strictest confidence.

## Academic Integrity

Academic integrity is a critical issue for all students and professors in the academic community. The University Code of Academic Integrity states that (1) a student assumes responsibility for the content and integrity of the academic work he or she submits, such as papers, examinations, or reports and (2) a student shall be guilty of violating the code and subject to proceedings under it if he or she:

- a. Knowingly represents the work of others as his or her own.
- b. Uses or obtains unauthorized assistance in any academic work.

- c. Gives fraudulent assistance to another student.
- d. Fabricates data in support of laboratory or fieldwork.
- e. Forges a signature to certify completion of approval of a course assignment.
- f. Uses an assignment for more than one course without the permission of the instructor involved.
- g. Uses computer hardware and/or software to abuse privacy, ownership, or user rights of others.
- h. In any manner violates the principle of absolute integrity.

The Academic Integrity Hearing Board, which consists of a chairperson, three faculty members, and three students, hears appeals from students who have breached the code. It also deals with cases brought directly to it by members of the faculty.

#### **Academic Records**

Students may obtain their Cornell academic record in several ways. The Cornell transcript, which is the official record of the courses, credits, and grades that a student has earned can be ordered with no charge at the Office of the University Registrar (B7 Day Hall). For more information call (607) 255-4232. Students who merely want an unofficial working copy of their transcript can request a copy of their record card from the Office of the College Registrar (145 MVR). Students may also access their grades and course schedules electronically using Just the Facts. Student should be in the habit of checking Just the Facts by the second week of every semester to confirm that their schedule and grade options are correct.

The college also maintains a **graduation progress worksheet** for each student showing progress towards the degree. At the beginning of fall term continuing students should check their updated worksheet online. It is important to check this document and bring any errors to the attention of the staff in the Office of the College Registrar (145 MVR).

#### **Access to Records**

The Family Educational Rights and Privacy Act of 1974 assures students of privacy of their records. The law also assures students' access to their records. Information concerning a student's relationship with the university is considered restricted and may be released only at the student's specific written request. Restricted information includes the courses elected; grades earned; class rank; academic and disciplinary actions by appropriate faculty, student, or administrative committees; and financial arrangements between the student and the university. Letters of recommendation are restricted information unless the student has specifically waived right of access

Students who want additional information on access to their records may contact the Office of the College Registrar (145 MVR) or the Office of the University Registrar (B7 Day Hall). An inventory of those student records maintained by Cornell University offices in Ithaca, their location, and cognizant officer are available in the Office of the Dean of Students (401 Willard Straight Hall). For specific information, refer to the university's policy, "Access to Student Information," at the following web address: www.univco.cornell.edu/policy/ASI.html, or talk with the college registrar in the Office of the College Registrar (145 MVR).

## ACADEMIC HONORS AND AWARDS

The college encourages high academic achievement and recognizes outstanding students in several ways.

#### Honors

**Dean's List.** Excellence in academic achievement is recognized each semester by placing on the Dean's List the names of students who have completed satisfactorily at least 12 credits of letter grades and who have a semester grade point average of 3.7 or above. No student who has received an F or U in an academic course will be eligible.

**Kappa Omicron Nu** seeks to promote graduate study and research and to stimulate scholarship and leadership toward the wellbeing of individuals and families. As a chapter of a national honor society in the New York State College of Human Ecology, it stimulates and encourages scholarly inquiry and action on significant problems of living—at home, in the community, and throughout the world.

Students are eligible for membership if they have attained junior status and have a cumulative average of not less than B. Transfer students are eligible after completing one year in this institution with a B average.

Current members of Kappa Omicron Nu elect new members. Not more than 10 percent of the junior class may be elected to membership and not more than 20 percent of the senior class may be elected. Graduate students nominated by faculty members may be elected. The president of Kappa Omicron Nu has the honor of serving as First Degree Marshall for the college during May commencement.

Bachelor of Science with Honors recognizes outstanding scholastic achievement in an academic field. Programs leading to a degree with honors are offered to selected students by the Department of Human Development and the Division of Nutritional Sciences. Information about admission to the programs and their requirements may be obtained from the appropriate department or division. Students in other departments who wish to qualify for honors should contact Bowie Armitage (172 MVR) during their sophomore year or the first semester of their junior year. Most honors candidates have a minimum grade point average of 3.3 and have demonstrated potential for honors-level research. To graduate with honors a student must take approved courses in research methodology and evaluation, attend honors seminars. complete a written thesis, and successfully defend it in front of a committee.

**Bachelor of Science with Distinction** recognizes outstanding scholastic achievement. Distinction is awarded to students in the top 10 percent of the graduating class based on the last 60 credits earned at Cornell. The graduating class includes students who will complete requirements for Bachelor of Science degrees in January or May of the same academic year or the prior August. Names of seniors who meet these requirements are presented to the faculty of the college for approval.

The primary objectives of the honor society, **Phi Kappa Phi**, are to promote the pursuit of excellence in higher education and to recognize outstanding achievement by students, faculty, and others through election to membership. Phi Kappa Phi is unique in that it recognizes scholarship in all academic disciplines. To be eligible for membership students must rank in the top 10 percent of the senior class, or in the top 5 percent of the junior class. Provisions also exist for the election of faculty members and graduate students whose work merits recognition.

**Gamma Sigma Delta** is an honor society of the faculty in the colleges of Human Ecology, Agriculture and Life Sciences, and Veterinary Medicine. The common bond is promotion of excellence in work related to the quality of our environment and life based on "agriculture and the related sciences." The Cornell chapter recognizes the academic achievements of students, faculty, and alumni of those colleges with nominations for membership and with special awards. To be eligible, seniors must be in the upper 15 percent of their major. Five juniors with the highest grade point average in their college are also nominated.

#### Awards

The Elsie Van Buren Rice Award in Oral Communication is awarded for original oral communication projects related to the college's mission by undergraduate students in the College of Human Ecology. The contest is held each year in February and awards prizes totaling \$1,500.

**The Flora Rose Prize** is given biennially to a Cornell junior or senior whom, in the words of the donor, "shall demonstrate the greatest promise for contributing to the growth and self-fulfillment of future generations." The recipient will receive a cash prize of \$500.

The Florence Halpern Award is named for the noted psychologist, Dr. Florence Halpern, in recognition of her lifelong interest in "innovative human service, which betters the quality of life." In that spirit the award is presented to a undergraduate in the College of Human Ecology who has demonstrated, through supervised field work or community service, creativity in the search for solutions to human problems. The award carries a \$500 cash prize.

# COLLEGE COMMITTEES AND ORGANIZATIONS

## Student Groups and Organizations

Following are brief descriptions of some of the organizations that offer valuable experiences to human ecology students. Information about many other student activities on campus may be obtained from the Office of the Dean of Students (401 Willard Straight Hall).

The American Council on Consumer Interests (ACCI) offers a student membership for those interested in consumer economics. Contact the department of Consumer Economics and Housing for further information.

The Cornell Design League was formed to give students interested in apparel a chance to express their creativity outside of the classroom by producing a fashion show every spring. It has become concerned with all aspects of a professional presentation. Consequently, it also provides a creative outlet for those interested in graphics, photography, illustration, or theater production. Although many of its designers are part of the Department of Textiles and Apparel, the Design League welcomes people of all majors and schools.

Students have opportunities to work throughout the community in a variety of service capacities. They volunteer in day care centers, youth programs, health-related agencies, services for elderly people and people with disabilities, as well as nutrition programs, arts organizations, and Ithaca schools. For further information, contact the Public Service Center (200 Barnes Hall). Call 255-1148 for information about volunteer work or 255-1107 for information about work-study arrangements

Human Ecology Ambassadors is a group of undergraduates who assist the Office of Admission, Student, and Career Services by participating in group conferences with prospective students to provide information from a student's perspective, assisting with recruitment and yield activities for potential students, conducting high school visitations, assisting with on-campus open-house programs for high school students and potential transfer students, helping with prospective students and alumni phonathons.

In addition, ambassadors attend regular meetings and serve as coordinators for activities in the Office of Admission, Student, and Career Services.

For information, contact the Office of Admission, Student, and Career Services (172 MVR, 255-5471).

The mission of the Human Ecology Voices is to build unity among students, faculty, and staff in the College of Human Ecology Membership consists of all representatives of all other Human Ecology student organizations and other interested students. Patti Papapietro serves as Voices adviser from the Office of Admission, Student, and Career Services (172 MVR, 255-2532).

The Human Ecology Mature Students Association is an organization of students who are 24 years of age or older at the time of matriculation. Many mature students need to balance family, work, and other concerns with their academic efforts. The Mature Students Association strives to help by providing a forum for resource exchange and referral, support, socializing, and special projects depending upon expressed interest. These goals are pursued through seminars and informational meetings, the mature students listsery, supplementary orientation activities, liaison with other university offices, and the encouragement of informal networking. Contact Patti Papapietro in the Office of Admission, Student, and Career Services (172 MVR) for more information.

Students interested in the relationship between the physical environment and human behavior may join the Human-Environment Relations Students Association (HERSA). For more information, contact the Department of Design and Environmental Analysis.

The International Facility Managers Association (IFMA) also has a student chapter. Membership information is available from the Department of Design and Environmental Analysis.

The Association for Students of Color (ASC) unites human ecology minority students to provide a supportive foundation for their enrollment, retention, graduation, and career placement. ASC members work toward these goals by

- participating in admissions hosting programs and conducting high school visitations.
- sponsoring presentations on career and graduate school outcomes of a human ecology education.
- providing volunteer services to the Cornell and Ithaca communities.
- attending regular meetings and hosting annual fall and spring forums.

Contact Verdene Lee in the Office of Admission, Student, and Career Services (172 MVR, 255-2532) for more information.

The PreLaw Undergraduate Society (PLUS) is sponsored by Human Ecology and welcomes members from the Cornell community. Meetings provide information and support for students considering careers in law. Programs include information on applications and admissions, law school applications, LSAT preparations, tour of the Cornell Law School and information panels with current law students, and Mock Trial and internship opportunities. Guest speakers include practicing attorneys, law faculty, and current law school. Contact the Office of Admission, Student, and Career Services, 172 MVR (255-2532) for more information.

The Preprofessional Association Toward Careers in Health (PATCH) provides support, advising, and up-to-date information to students pursuing careers in health care. Programs include academic advising, guest speakers from allopathic and alternative medicine, information on medical school admissions, exposure to complementary healthcare career options, MCAT preparation tips, information on research and internship opportunities, and a visit to a local medical school. This student-run organization is sponsored by Human Ecology and is open to the Cornell community. Contact the Office of Admission, Student, and Career Services, 172 MVR (255-2532) for more information.

The Orientation Committee consists of students and advisers interested in planning and implementing programs to acquaint new students with the College of Human Ecology. The committee is particularly active at the beginning of each semester and is always eager for new members. For information, contact Patti Papapietro in the Office of Admission, Student, and Career Services (172 MVR, 255-2532).

Membership in the Sloan Student Association is open to students interested in health care and related fields. Contact the president of the association (N222 MVR, 255-8013) for more information.

The Students for Gerontology (SFG) is composed of students from a wide variety of majors who are interested in career and internship opportunities that contribute to the well-being of our aging population. Programs

sponsored by this organization focus on developing linkages with community organizations and other student gerontology groups. SFG meets monthly. Contact Donna Dempster-McClain, faculty adviser, Bronfenbrenner Life Course Center, (259 MVR Hall, 255-5557), for further information.

## The Undergraduate Nutrition Organization

(UNO) promotes nutritional well-being through education, communication, and research. Members of the student chapter organize programs such as Food and Nutrition Day in March, host on-campus speakers in nutrition and health-related fields, and publish NutriNews, a campus-wide nutrition newsletter. The student chapter is open to all students interested in nutrition education. For further information contact Gail Canterbury (302 MVR. 255-5473).

## **Committees and Councils**

Several official organizations exist within the college to deal with matters of policy and to provide leadership in college planning. Most include elected student and faculty representatives; the actions of these various groups affect all students directly or indirectly.

The Educational Policies Committee (EPC) has two student members, one graduate and one undergraduate, who vote along with the faculty members on all matters relating to college academic policy. Recommendations are submitted to this committee regarding revisions in degree requirements, new curriculum changes, and new course approval.

Students also have the opportunity to serve on the Admissions Policy Subcommittee, and the Academic Integrity Hearing Board

The Selection Committee for the Chancellor's Award for Excellence in Teaching or Professional Service handles the nomination and selection process for this prestigious yearly award. The committee consists of three teaching faculty members, one professional staff member, and three undergraduate members.

The Human Ecology Alumni Association Board of Directors includes two student board members-one junior and one senior. One student is selected each spring to begin a two-year term as student representative. The two students co-chair the board's Student Activities Committee, which works to increase the visibility of the Alumni Association among the student body by funding a variety of activities. The student members also bring an important perspective to board deliberations about programming and annual goals.

The Committee on Academic Status does not include student representatives, but has a faculty representative from each department. This committee is responsible for upholding the academic standards of the college and takes action when appropriate. The committee also hears appeals regarding student petitions and requests to be readmitted.

## INTERDEPARTMENTAL COURSES

#### **HE 100 Critical Reading and Thinking**

Fall, spring, or summer. 2 credits. Enrollment limited. Priority is given to freshmen and sophomores; juniors and seniors are admitted with permission of the instructor. Letter or S-U grades.

The objective of this course is to enable students to increase critical reading and thinking abilities. Theory and research associated with a wide range of reading, thinking, and learning skills are examined. Emphasis is placed on developing and applying analytical and evaluative skills. Laboratory instruction is individualized and provides the opportunity to focus intensively on increasing comprehension, reading rate, and vocabulary.

**HE 101 College Achlevement Seminar** 6-week summer session. 2 credits. Enrollment limited to and required of prefreshman Summer Program students. Letter

or S-U grades. The objective of this course is to improve the study and learning skills of incoming freshmen. Emphasis is placed on acquisition of skills necessary to achieve academic success. Topics include time management, note-taking, mapping, textbook comprehension, exam preparation, and exam strategies. The application of theory to the demands of Cornell course work is stressed. In addition, students are introduced to library and computing resources through hands-on projects.

## THE URBAN SEMESTER PROGRAM IN MULTICULTURAL DYNAMICS IN URBAN AFFAIRS

**Cornell in New York City** provides students with many study options that focus on multicultural dynamics in urban affairs. The options available include internships, individual and group community service projects, research, independent study, collaborative learning, and mentorships. Students must enroll concurrently in the three courses, HE 470, HE 480 and HE 490. Students learn through reflection and action. Program options are possible throughout the academic year, during winter break, and in the summer.

Courses of study enable students to seek out the relationship between theory and practice, apply theory to practice, identify and acquire professional practice skills, and learn about the impact of diversity on New York City. By applying ethnographic research techniques and methods, students learn to think conceptually, reflect on their actions, and be agents of change.

Several majors in the college require internships or encourage field study. Check with the Director of Undergraduate Studies of each major for more information. The Career Development Center in 159 MVR and counselors in the Office of Admission, Student, and Career Services in 172 MVR can help you find internships and provide more information on departmental opportunities and enrolling in Cornell in New York City.

#### **HE 470 Multicultural Practice** Fall and spring semesters.

Students immerse themselves in internship activities three days each week. During small group seminars, students reflect on their internship experiences, focusing on multicultural issues, professional practice, and organizational culture.

#### HE 480 Multicultural Issues in Urban Affairs

Fall and spring.

This course is a study of multicultural issues in urban affairs. It occurs as students enhance their academic foundations and their career development. Using a historical perspective, students examine issues of diversity (e.g., race, ethnicity, religion, class, gender, sexual orientation) in relationship to (1) professional life in different sectors of the economy; (2) the development of neighborhoods and communities; and (3) the basis of a just and democratic society. Reading focuses on inner-city children and youth under a variety of multiculturallyinfluenced conditions and contexts. Costs include travel to and from sites by public transportation at about \$3.00–6.00 each week.

#### HE 490 Communities In Multicultural Practice

#### Fall and spring.

This course provides students with an understanding of community building processes and enables them to interact with children, youth, and their families in school settings. For a full day once each week, students work in inner-city schools with teachers, staff, and children, providing community service. Student learning is focused on how to increase children's learning capacities and expand their horizons by teaching them to envision success. Students focus on the assets that inner city children bring to their school environment and learn how to mentor them. They help teach skills. knowledge, values, behaviors, and perspectives that school children must develop in order to enter the working world. Costs include public transportation costs to and from the various sites, about \$3.00-6.00 each week

#### HE 402 The Winter Session in Community Service and Mutual Learning: The South Bronx-Banana Kelly/Cornell University Project in Community Building Winter Session.

Over the course of two intensive study weeks, students participate in an ongoing community service project in the South Bronx with children of the Banana Kelly community. In carrying out community service, students participate with the director of the Cornell in New York City Program. Since the 1995 intersession, students have mentored children in an after-school program through projects that have documented the community with photographs, models, and stories. Each intersession, seven students mentor 15 ninth graders from Banana Kelly High School.

In 1998, Cornell students and children produced three-dimensional models of their imagined community in future years and a book of essays and photographs.

#### HE 406 Fieldwork in Diversity and Professional Practice

Summer session. Over the course of an eight-week summer session, students participate in a communitybased medical center, hospital or clinic a member of the New York Presbyterian Hospital and Weill College of Medicine of Cornell University. This is a four-day internship and one day of seminars and site visits.

# DESIGN AND ENVIRONMENTAL ANALYSIS

F. Becker, chair; W. Sims, director of undergraduate studies; S. Danko, director of graduate studies; A. Basinger, J. Elliott, P. Eshelman, G. Evans, K. Gibson, R. Gilmore, A. Hedge, J. Jennings, J. Laquatra, L. Maxwell, N. Wells

*Note: A minimal charge for photocopied course bandouts may be required.* 

Note: Class meeting times are accurate as of the time of publication. If changes are necessary, the department will provide new information as soon as possible.

## DEA 4+1 Master's Degree Program

Outstanding students who complete their four year undergraduate degree in DEA are eligible to complete a Master of Arts/ M.A (Interior Design) or a Master of Science/M.S. (Human Environment Relations) degree in one additional year of graduate study.

Through careful planning many of the courses required in the M.A. or M.S. programs can be taken during the undergraduate years, creating an opportunity to focus the fifth year of study on completing course and thesis requirements. As early as the freshman year, students can plan their curriculum toward completing a fifth year masters. Typically, this means students will take 4 to 5 courses in their fall term as a graduate student, and 2 to 3 courses plus their thesis research in the spring term. Students should expect to complete their thesis by the end of the summer term of their fifth year.

Admission to the 4+1 Master's program is not automatic. Students must meet with their advisers early in their undergraduate programs to plan carefully for this possibility. In the fall of the senior year, interested students must submit an application to the Graduate School. The GRE exam is not required for admissions, but students must submit a statement of intent, letters of reference, and transcripts. Students who have compiled a strong undergraduate record in the department are usually good candidates for admission into the graduate program in Design and Environmental Analysis. Students interested in this program should meet with their DEA adviser as early as possible to discuss and plan for application to this program.

## DEA 101 Design Studio I

Fall. 3 credits. Each section limited to 20 students. Permission of instructor required for non-DEA majors. Priority given to interior design majors. Option I majors must take DEA 101 in fall of their first year. Approximate cost of materials, \$200.

M W 1.25–4:25 or T R 10:10–1:10. J. Elliott. This studio course introduces the fundamental vocabulary and principles of two- and threedimensional design. Students experiment with the development of image and form through problem-solving activities. Visit http:// instruct1.cit.comell.edu/courses/dea101/.

#### DEA 102 Design Studio II

Spring. 3 credits. Limited to Option I DEA majors only. B- or higher in DEA 101 required to register for this course. Option I majors must take DEA 102 and 115 concurrently. Approximate cost of materials, \$200; shop fee, \$10. T R 1:25-4:25. P. Eshelman.

A studio course in three-dimensional design with an interior design emphasis. Problems in spatial organization are explored through drawings and models.

#### DEA 111 Making a Difference: By Design

Fall. 3 credits. Limit 130. Lab Fee: \$25. M W F 11:15-12:05. S. Danko. Students from any academic area may examine how design affects their daily lives and future professions. This course focuses on issues of leadership, creative problem-solving, and risk-taking through case study examination of leaders in business, education, medicine, human development, science, and other areas who have made a difference using design as a tool for positive social change. Utilizing a micro to macro framework, students explore the impact of design from the person to the planet. Additional topics include: nurturing innovation, visual literacy, design criticism, design and culture, semiotics, proactive/reflective decision making, and ecological issues. Note: this course has evening exams.

#### **DEA 115 Design Graphics**

Spring. 3 credits. Option I DEA majors only. Prerequisite: DEA 101; must take DEA 102 and DEA 115 concurrently. Minimum cost of materials, \$100; technology fee \$10. M W F 9:05–11:00. K. Gibson.

A studio drawing course for interior designers. Discussion groups on drawing techniques are held to develop a visual understanding and vocabulary. Students are introduced to the functions of line, shape, and value. Perspective, spatial, and conceptual drawing are emphasized.

## DEA 150 Introduction to Human-Environment Relations

Spring. 3 credits. M W F 12:20–1:10. G. Evans.

This course analyzes environment and human behavior. We examine the interface of social and environmental sciences with application for the design and management of built and natural habitats. Topics include environmental effects on health, well-being, moods, aesthetics, performance, interpersonal relationships, and organizational effectiveness as well as the ecological consequences of human attitudes and behaviors. Visit our web site at instruct1.cit.cornell.edu/courses/dea150. Note: this course has evening exams.

#### DEA 201 Design Studio III

Fall. 4 credits. Limited to Option I DEA -students. Prerequisites: DEA 101,102, and 115 (minimum grades of B-) Recommended: DEA 111 and 150. Coregistration in DEA 251 is required. Minimum cost of materials, \$150; lab fee, \$40; optional field trip, approximately \$120. M W F 1:25–4:25. J. Jennings.

This is the third semester in the studio sequence of eight semesters. The theme and objectives focus on design as critical thinking, introducing means by which students can think, draw, write, and build their way critically through design. Taken concurrently with DEA 251, the course applies historical and theoretical knowledge to design projects. The course also includes a collaborative project with a professor and students from another design discipline.

#### DEA 202 Design Studio IV

Spring. 4 credits. Each section limited to Option I DEA students. Prerequisites: DEA 201 and 203. Prerequisites or corequisites: DEA 204. Minimum cost of materials, \$120; diazo machine fee, \$8; field trip fee. T R 12:20–4:25. R. Gilmore.

Interior design studio. Emphasis of the course is on continued development of basic proficiency in design skills through exposure to a selected set of interior design problems of limited complexity. Each problem of three to five weeks duration is structured to emphasize different aspects of the design process.

#### **DEA 203 Digital Communications**

Fall. 2 credits. Limit 41. Priority given to DEA majors. Lab fee \$10. M 7:30–9:55. J. Elliott.

Digital information technologies for designers of the built environment. Students explore issues in relation to text and image and form and content through a series of weekly projects. They work towards the development of a professional web-based portfolio of selfpromotional materials. The primary course objective is to reinforce principles of visual communications while learning the rudiments of vector, raster, and html graphic software. Visit http://instruct 1.cit.cornell.edu/courses/ dea203/

#### DEA 204 Introduction to Building Technology

Spring. 2 credits. M 2:30–4:25. W. Sims. Introduction to building technology for interior designers and facility managers. Emphasis is placed on developing basic understanding of buildings and building systems and their implications for interior design and facility management. Covers basic building types; structural systems; construction materials and methods; HVAC systems; plumbing, electrical, lighting, fire, and security systems; and telephone, computer, and other communication systems. Visit http:// courseinfo.cit.cornell.edu/courses/dea204.

#### DEA 250 The Environment and Social Behavior

Fall. 3 credits. Limited to 16. Priority order: DEA seniors, juniors, sophomores, freshmen. Prerequisite: DEA 150 and written permission of instructor. Field trip fee \$65. T R 2:55–4:10. G. Evans.

A combination seminar and lecture course for students interested in the social sciences, design, or facility management. Through projects and readings the influence of environmental form on social behaviors such as aggression, cooperation, communication, community, and crime is explored. Also covered are the influences of stage in life cycle, family structure, and social class on environmental needs and purposes. Implications for the planning, design, and management of complex environments such as offices, hospitals, schools, and housing are emphasized.

#### DEA 251 History and Theory of the Interior

Fall. 3 credits. Limited to 65. Priority given to DEA majors. M W F 9:05–9:55. L. Jennings.

An historic study of interior architecture and design with an emphasis on the concepts of

design theory. Overarching themes encompass several time periods from the classical to the twentieth century and isolate cultural patterns, spatial ideas, dialectics, design elements, and theorists. Reading, discussion, analytical exercises, essays, examinations, and a field trip will be included. Visit http:// instruct1.cit.cornell.edu/courses/dea251/.

#### DEA 300 Special Studies for Undergraduates

Fall or spring. Credit to be arranged. Department faculty.

Special arrangement for course work to establish equivalency for courses not transferred from a previous major or institution. Students prepare a multicopy description of the study they want to undertake on a form available from the College Registrar's Office. The form, signed by both the instructor directing the study and the head of the department, is filed at course registration or during the change-of-registration period.

#### DEA 301 Design Studio V

Fall. 4 credits. Prerequisites: DEA 111, 150, 201, 202, 203, and 204. Corequisite: DEA 303 and 459. Minimum cost of materials, \$150; shop fee, \$10; optional field trip, approximately \$10. T R 12:20–4:25. P. Eshelman.

Intermediate-level interior design studio. The course is organized around a series of interior and interior-product design problems of intermediate-level complexity, three to five weeks in duration. Focus is on development of design skills and on understanding of a selected set of generic problem types.

#### DEA 302 Design Studio VI

Spring. 5 credits. Prerequisites: DEA 301 and 303 or permission of instructor. Corequisite: DEA 305. Minimum cost of materials, \$150; shop fee, \$10. M W F 1:25–4:25. K. Gibson.

Intermediate-level interior design studio with an introduction to computer applications. Emphasis on using the microcomputer as a design tool in the process of creating and planning interior spaces. Continued development of design skills and problem solving in relation to a selection of problem types.

#### DEA 303 Introduction to Furnishings, Materials, and Finishes

Fall. 2 credits. W 2:30–4:25. R. Gilmore. Basic understanding of furniture types and systems; interior products and equipment such as work-stations; window, wall, and floor coverings; ceiling and lighting systems; and materials and finishes. Emphasis is placed on criteria for selection of furnishings, materials, and finishes for typical interior design and facility management problems.

#### DEA 304 Introduction to Professional Practice of Interior Design

Spring. 1 credit. W 2:30–4:25. A. Basinger. Introduction to organizational and management principles for delivery of interior design and facility management services. Covers basic organizational structures and basic management functions within interior design and facility management organizations, work flow and scheduling, business practices, legal and ethical responsibilities and concerns, contracts, basic contract documents such as working drawings and specifications, supervision of construction and installation, and cost estimation.

#### DEA 305 Construction Documents and Detailing

Spring. 2 credits. Prerequisites: DEA 301 and DEA 303. Corequisite: DEA 302. Minimum cost of materials \$50. Field trips, \$50. F 9:05–11:00. R. Gilmore.

Comprehensive study of drafting, detailing, schedules, and specifications. Emphasis on drawing conventions, symbols, dimensioning, detailing of interior elements, terminology, construction methods, and materials.

#### DEA 325 Human Factors: Ergonomics-Anthropometrics

Fall. 3 credits. Recommended: DEA 150. T R 8:40–9:55. A. Hedge.

Implications of human physical and physiological characteristics and limitations on the design of settings, products, and tasks. An introduction to engineering anthropometry, biomechanics, control/display design, work physiology, and motor performance. Course includes practical exercises and field project work.

#### DEA 350 Human Factors: The Ambient Environment

Spring. 3 credits. Recommended: DEA 150. T R 8:40–9:55. A. Hedge.

An introduction to human-factor considerations in lighting, acoustics, noise control, indoor air quality and ventilation, and the thermal environment. The ambient environment is viewed as a support system that should promote human efficiency, productivity, health, and safety. Emphasis is placed on the implications for planning, design, and management of settings and facilities. Course includes a field project.

#### DEA 400-401-402-403 Special Studies for Undergraduates

Fall or spring. Credits to be arranged. S-U grades optional. Department faculty. For advanced independent study by an individual student or for study on an experimental basis with a group of students in a field of DEA not otherwise provided through course work in the department or elsewhere at the university. Students prepare a multicopy description of the study they want to undertake on a form available from the department office. This form must be signed by the instructor directing the study and the department head and filed at course registration or within the change-of-registration period in 145 MVR, College Registrar's Office, along with an add/drop slip. To ensure review before the close of the course registration or change-of-registration period, early submission of the special studies form to the department head is necessary. Students, in consultation with their advisers and the instructor should register for one of the following subdivisions of independent study.

## **DEA 400** Directed Readings

For study that predominantly involves library research and independent reading.

#### **DEA 401 Empirical Research**

For study that predominantly involves data collection and analysis or laboratory or studio projects.

#### **DEA 402 Supervised Fieldwork**

For study that involves both responsible participation in a community setting and reflection on that experience through discussion, reading, and writing. Academic credit is awarded for this integration of theory and practice.

## **DEA 403 Teaching Apprenticeship**

For study that includes teaching methods in the field and assisting faculty with instruction. Students must have demonstrated a high level of performance in the subject to be taught and in the overall academic program.

#### DEA 407 Design Studio VII

Fall. 5 credits. Prerequisites: DEA 302, DEA 303, DEA 304, and DEA 305. Minimum cost of materials, \$150. Field trip \$50. T R 12:20–4:25. R. Gilmore.

Advanced interior design studio organized around a series of interior design problems, three to five weeks in duration. Focus is on development of design skills and on competence in solving a selected set of generic interior design problem types.

#### DEA 408 Design Studio VIII

Spring. 5 credits. Prerequisites: DEA 301, 302, 303, and 304. Minimum cost of materials, \$150. T R 12:20–4:25. S. Danko. Design problem-solving experiences involving completion of advanced interior design problems. Problems are broken into five phases: programming; schematic design and evaluation; design development, including material and finish selection; design detailing; and in-process documentation and the preparation of a professional-quality design presentation.

#### DEA 422 Ecological Literacy and Design (also ARCH 464.02)

Spring. 3 credits. Letter grade only. Field trips approximately \$25. T R 10:10–12:05. J. Elliott.

This is a lecture/seminar course for students interested in learning about the effects of designing the built environment of the biophysical world. Course objectives are to develop sensitivities to environmental issues, construct conceptual frameworks for analysis, and demonstrate how ecological knowledge can be applied to the practice of design through participatory approaches to learning. Visit http://instruct1.cit.cornell.edu/courses/ dea422/.

## DEA 423 Restaurant Design Charrette

Spring. 1 credit. Limited to 18. Permission of instructor. Letter grade only. Minimum materials costs \$50. 4 class meetings on Friday evening (Week 1) 6–10 p.m.; one complete weekend (Week 2) F 6–10 p.m., \$9:00 a.m.–10:00 p.m. and Sunday 10:00

a.m.-8:00 p.m. R. Gilmore, S. Robson. This intensive weekend long course pushes the boundaries of current restaurant design by developing a concept plan for an innovative restaurant in a non-traditional setting. Students work in teams to develop design solutions and prepare design presentations for review by course instructors and visiting design professionals.

#### DEA 430 Furniture as a Social Art

Spring. 3 credits. Limited to 15. Permission of instructor. Cost of building materials: \$150. Students must also sign up for 2 hours of DEA shop time each week for model building. M W 9:05–11:00. P. Eshelman.

This course examines furniture as a design process that emphasizes support of human behavior. Information about specific social issues including health care, aging, child care, and education is the starting point for assignments. Students analyze products currently available and design new furniture. Also covered are furniture materials, fabrication processes, and manufacturing techniques.

#### [DEA 451 Introduction to Facility Planning and Management

Fall. 1 credit. Letter grades only. Not offered fall 2002. M. F. Becker, W. Sims. Series of seminars led by Cornell faculty and other facility management professionals. Topics include strategic space planning, space standards, office automation, project management, energy conservation, environmental protection, and regulatory issues. Visit http:// instruct1.cit.cornell.edu/courses/dea/451\_659.]

#### [DEA 453 Planning and Managing the Workplace

Fall. 3 credits. Prerequisite: limited to juniors and seniors. Purchase of course packet required. T. 7:30–10:30 p.m. Not offered fall 2002. F. Becker.

Intended for students interested in the planning, design, and management of facilities for complex organizations. The purpose of the course is to explore how characteristics of the workplace, including building, design, furniture and equipment, and policies governing their use and allocation, affect individual and organizational effectiveness. Special topics, such as the human implications of new information technologies and work at home, are also covered. Visit http:// instruct1.cit.cornell.edu/courses/dea/453\_653\_]

#### DEA 454 Facility Planning and Management Studio

Spring. 4 credits. Prerequisite: DEA 459 or permission of instructor. Letter grades only. Minimum cost of materials, \$200. T R 1:25–4:25. W. Sims.

For advanced undergraduates interested in facility planning and management. Purpose is to provide basic tools, techniques, and concepts useful in planning, designing, and managing facilities for large, complex organizations. The course covers strategic and tactical planning for facilities, organizing to deliver facility management services, project management, space forecasting, space allocation policies, programming, relocation analysis, site selection, building assessment, space planning and design, furniture specifications, and moves. Sociopsychological, organizational, financial, architectural, and legal factors are considered. Visit http:/ courseinfo.cit.cornell.edu/courses/dea454\_654.

#### DEA 455 Research Methods in Human-Environment Relations

Fall. 3 credits. Prerequisites: DEA majors only or permission of instructor, and a statistics course. M W F 1:25–2:15. N. Wells.

The course develops the student's understanding and competence in the use of research and analytical tools to study the relationship between the physical environment and human behavior. Emphasis is placed on selection of appropriate methods for specific problems and the policy implications derived from research. Topics include research design, unobtrusive and obtrusive data-collecting tools, the processing of qualitative and quantitative data, and effective communication of empirical research findings.

#### DEA 459 Programming Methods in Design

Fall. 3 credits. Letter grade only. Minimum cost of materials \$100. T R 10:10–11:25. W. Sims.

Introduction to environmental programming. Emphasis on formulation of building requirements from user characteristics and limitations. Diverse methods for determining characteristics that will enable a particular environmental setting to support desired behaviors of users and operators. Methods include systems analysis, soft system, behavior circuit, behavior setting, and user characteristic approaches. Selection of appropriate methods to suit problems and creation of new methods or techniques are emphasized. Visit http:// instruct1.cit.comell.edu/courses/dea/459\_650.

## DEA 470 Applied Ergonomic Methods

Spring. 3 credits. Prerequisite: DEA 325.

T R 2:55-4:10. A. Hedge. This course covers ergonomics methods and techniques and their application to the design of modern work environments. Emphasis is placed on understanding key concepts. Coverage includes conceptual frameworks for ergonomic analysis, systems methods and processes, a repertoire of ergonomics methods and techniques for the analysis of work activities and work systems. This course is the undergraduate section of DEA 670, which shares the same lectures but meets for an additional hour. DEA 670 has additional readings and projects.

#### DEA 472 Environments for Elderly: Housing and Design for an Aging Population

Spring. 3 credits. Field trip fee \$20. M W 8:40–9:55. N. Wells.

Through seminars, lectures, field trips, and service learning opportunities, students examine the relationship between older adults and the physical environment. Students gain understanding of the relevance of design characteristics on the well-being of older people; an appreciation of late-life social, cognitive and physiological changes; as well as familiarity with a variety of housing options for late life.

#### **DEA 499 Senior Honors Thesis**

Fall or spring. Variable credit. Prerequisite: permission of thesis advisor and DEA director of undergraduate studies. Letter grades only.

This is an opportunity for DEA majors to undertake original research and scholarly work leading to the preparation of a thesis. Students work closely with their thesis adviser on a topic of interest.

#### DEA 600–603 Special Problems for Graduate Students

Fall or spring. Credit to be arranged. S-U grades optional. Department faculty. Independent advanced work by graduate students recommended by their special committee chair and approved by the head of the department and instructor.

**600: Special Problems.** For study of special problems in the areas of interior design, human environment relations, or facilities planning and management.

**601: Directed Readings**. For study that predominantly involves library research and independent study.

**602: Graduate Empirical Research**. For study that predominantly involves collection and analysis of research data.

**603: Graduate Practicum**. For study that predominantly involves field experiences in community settings.

#### DEA 645 Dancing Mind/Thinking Heart: Creative Problem-Solving Theory and Practice

Spring. 3 credits. Limited to 15 graduate and advanced undergraduate students. Prerequisite for undergraduates: permis-

sion of instructor. T 4:30-7:30. S. Danko. Focuses on thinking processes and techniques that support creative problem solving. Theories of creative behavior and critical thinking are examined. The course is highly participatory and experiential by design. Weekly discussions include hands-on applications of theories on short problems tailored to the backgrounds of the students. The primary goal is to demonstrate perceptual, emotional, intellectual, cultural, and environmental blocks to creative thinking and expand the student's repertoire of creative problem solving strategies for use in day-today professional practice. Case studies of creative individuals and organizations from a variety of fields are presented.

#### DEA 648 Advanced Applications in Computer Graphics

Fall. 3 credits. Limited to 18 graduate and advanced undergraduate students. Prerequisites for undergraduates: DEA 302 or permission of instructor. Minimum cost of materials \$150. Lab fee \$35. T R 9:05–12:05. K. Gibson.

Advanced use of computer technology to create and analyze interior environments. Emphasis is on the use of 3-D modeling, animation, photorealistic rendering, and emerging technologies to investigate dynamic design issues.

#### DEA 650 Programming Methods in Design

Fall. 4 credits. T R 10:10–11:25. W. Sims. A course intended for graduate students who want a more thorough introduction to environmental programming methods than is provided by DEA 459. Each student is required to attend DEA 459 lectures, meet with the instructor and other graduate students for an additional class each week, and complete additional readings and projects. See DEA 459 for more detail.

#### DEA 651 Human Factors: Ergonomics-Anthropometrics

Fall. 4 credits. Recommended: DEA 150 and a 3-credit statistics course. T R 8:40– 9:55. A. Hedge.

A course intended for graduate students who want a more thorough grounding in human factors than is provided by DEA 325. Each student is required to attend DEA 325 lectures, meet with the instructor and other graduate students for an additional class each week, and complete additional readings and projects. See DEA 325 for more detail.

#### DEA 652 Human Factors: The Ambient Environment

Spring, 4 credits. Recommended: DEA 150. T R 8:40–9:55. A. Hedge.

A course intended for graduate students who want a more thorough grounding in human factors considerations than is provided by DEA 350. Each student is required to attend DEA 350 lectures, meet with the instructor and other graduate students for an additional class each week, and complete additional readings and projects. For detailed description, see DEA 350.

#### [DEA 653 Planning and Managing the Workplace

Spring, 4 credits. Letter grades only. Purchase of course packet required. T 7:30–10:30 p.m. Not offered fall 2002. F. Becker.

Intended for graduate students who want a more thorough grounding in the planning, design, and management of facilities for complex organizations than is provided by DEA 453. Each student is required to attend DEA 453 lectures, meet with the instructor and other graduate students for an additional class each week, and complete additional readings and projects. See DEA 453 for more detail.]

#### DEA 654 Facility Planning and Management Studio

Spring, 4 credits. Prerequisite: DEA 459/ 650 or permission of instructor. Letter grades only. Minimum cost of materials, \$200. For graduate students in facility planning and management. T R 1:25–4:25. W. Sims.

For description, see DEA 454.

#### DEA 656 Research Methods in Human-Environment Relations

Fall. 4 credits. Prerequisites: DEA majors only or permission of instructor, and a statistics course. M W F 1:25–2:15. N. Wells.

Intended for graduate students who want a more thorough understanding of the use of research to study the relationship between physical environment and human behavior than is provided by DEA 455. Each student is required to attend DEA 455 lectures, meet with the instructor and other graduate students for an additional class each week, and complete additional readings and projects. See DEA 455 for more detail.

#### [DEA 659 Introduction to Facility Planning and Management

Fall. 1 credit. For graduate students interested in careers in facility planning and management. Letter grades only. Not offered 2002. F. Becker, W. Sims.

Series of seminars led by Cornell faculty members and other professionals directly involved in facility planning and management. Topics include strategic and tactical facility planning, space standards, project management, computer and facility management, facility maintenance and operations, energy conservation, and building systems. Visit http:/ /instruct1.cit.cornell.edu/courses/dea451\_659.]

#### DEA 660 The Environment and Social Behavior

Fall. 4 credits. Prerequisite: DEA 150 and written permission of instructor. Field trip fee \$65. T R 2:55–4:10. G. Evans.

Intended for graduate students who want a more thorough understanding of the influence of environmental form on social behavior than is provided by DEA 250. Each student is required to attend DEA 250 lectures, meet with the instructor and other graduate students for an additional class each week, and complete additional readings and projects. See DEA 250 for more detail.

#### DEA 668 Design Theory Seminar

Spring. 3 credits. Enrollment limited to 25 students. T R 10:10–11:40. J. Jennings. Directed toward advanced undergraduate and graduate students with interest in the theory of design. The purpose is to provide an understanding of major theoretical ideas underlying design movements of the twentieth century. Explores these ideas through

#### HUMAN DEVELOPMENT 301

readings, lectures by faculty and visitors, student presentations of research papers, and seminar discussions. Visit http:// instruct1.cit.cornell.edu/courses/dea668.

## **DEA 670** Applied Ergonomics Methods

Spring. 4 credits. Enrollment limited to 20. Prerequisite: DEA 651. T R 2:55-4:10. A. Hedge.

Intended for graduate students who want a more thorough understanding of applied ergonomics methods than is provided by DEA 470. Each student is required to attend DEA 470 lectures, meet with the instructor and other graduate students for an additional class each week, and complete additional readings and projects. See DEA 470 for more detail.

#### **DEA 899 Master's Thesis and Research**

Fall or spring. Credits to be arranged. Prerequisite: permission of the chair of the graduate committee and the instructor. S-U grades optional. Department graduate faculty.

## HUMAN DEVELOPMENT

J. Eckenrode, chair; S. Cornelius, director of graduate studies; J. Haugaard, director of undergraduate studies; C. Anderson,

- U. Bronfenbrenner, J. Brumberg, M. Casasola,
- S. Ceci, M. Cochran, D. Dempster-McClain,
- R. Depue, J. Doris, J. Garbarino, K. Greene,
- S. Hamilton, C. Hazan, B. Koslowski,
- L. C. Lee, B. Lust, P. Moen, K. Pillemer, H. Ricciuti, S. Robertson, J. Ross-Bernstein,
- R. Savin-Williams, E. Temple, Q. Wang, E. Wethington, W. Williams

#### NOTE: Class meeting times are accurate as of the time of publication. If changes are necessary, the department will provide new information as soon as possible.

## HD 115 Human Development

Fall or summer. 3 credits. S-U grades optional. M W F 1:25-2:15. J. Garbarino and C. Schelhas-Miller.

Provides a broad overview of theories, research methods, and current knowledge of human development from conception into adulthood. Course material covers infancy, childhood, and adolescence. Topics include biological, intellectual, linguistic, social, and emotional development as well as the cultural, social, and interpersonal contexts that affect the developmental processes and outcomes of these domains.

#### HD 120 Exploring Human Development

Fall. 1 credit. Letter grades only. Limited to Human Development freshmen. TBA. HD faculty.

This course is a series of small group discussions with HD freshmen and a HD faculty member. Each faculty member sets the topics and style of discussion. Discussion groups meet one hour a week, each week of the fall semester. No exams are given. Grading is done on attendance, participation, and short written assignments.

#### HD 216 Human Development: **Adolescence and Youth**

Spring. 3 credits. Prerequisite: HD 115 or Psychology 101 or permission of instructor. S-U grades optional. T R 11:40-12:55. C. Schelhas-Miller

Provides a broad overview of theories. research, and issues in the study of human development from early to late adolescence

(youth). Attention is focused on the major biological, cognitive, and social changes during adolescence; the psychosocial issues of adolescence, including identity, autonomy, intimacy, sexuality, achievement, and problems; and the contexts in which adolescent development occurs, particularly families, peer groups, schools, work, and popular culture. Empirical research, theories. case studies of the lives of real adolescents, and, to a lesser degree, public policies are discussed.

#### [HD 218 Human Development: Adulthood and Aging

Spring. 3 credits: Prerequisite: HD 115. S-U grades optional. T R 11:40-12:55. Not

offered 2002-2003. S. Cornelius. Provides a general introduction to theories and research in adult development and aging. Psychological, social, and biological changes from youth through late adulthood are discussed. Both individual development within generations and differences among generations are emphasized.]

#### HD 220 The Human Brain and Mind: **Biological Issues in Human** Development

Fall. 3 credits. Prerequisite: HD 115. S-U grades optional. M W F 11:15-12:20. E. Temple.

What do we know about the biology of the mind? As long ago as the 1600's, when the philosopher Descartes speculated on how the mind and body interact, humans have been fascinated by how the chunk of tissue we call the brain can give rise to all the complexity that is human behavior. This course is an introduction to the biology underlying human behavior. After studying basic concepts in neurobiology and neuroanatomy, the course covers a variety of topics including how the brain reacts to drugs and hormones, and what brain mechanisms underlie seeing, hearing, thinking, talking, feeling emotions and desires, and dreaming. We try to understand what is and is not yet understood (about the biological mechanisms underlying the human experience. We discuss the biology of clinical disorders throughout. This course gives the background necessary for other courses in HD that focus on biological mechanisms of human development and serves as a prerequisite for many of them.

#### HD 230 Cognitive Development

Spring. 3 credits. Letter grades only. Prerequisites: HD 115 or PSYCH 101. T R 2:55-4:10. Q. Wang.

This course surveys current theory and research on various aspects of cognitive development across the lifespan, with emphasis on infancy and early childhood. Topics include perception, representation and concepts, reasoning and problem solving, social cognition, memory, metacognition, language and thought, and academic skills. Students will develop a broad understanding of the mechanisms, processes, and current issues in cognitive development and learn to critically assess developmental research. The class is structured in a combination of lecture. seminar, and fieldwork.

#### [HD 233 Children and the Law

Fall. 3 credits. Prerequisites: HD 115 and an introductory statistics course. TBA. Not offered 2002-2003. S. Ceci.

This course examines psychological data and theories that shed light on the practical issues that arise when children enter the legal arena. It attempts to integrate theories, research, and methodology from several areas of psychology including, developmental, cognitive, social, and clinical. This course also attempts to examine the degree to which basic research can (and should) be used to solve applied issues. The topic of children and the law provides an opportunity to meet all these requirements. Rapid changes involving child witnesses in our legal system have forced social scientists to bring their work into the courtroom. At the same time, bringing this fray into the legal system has changed the course of research and thinking about certain aspects of child development and cognition: it has encouraged researchers to tackle new issues and to develop innovative experimental paradigms. Selected topics to be covered include: memory development, suggestibility, theory of mind, childhood amnesia, expectancy formation, symbolic representational ability, and finally, what can (or should) an expert witness tell the court. Several actual cases involving child witnesses will be presented to illustrate the application of scientific data to the courtroom. Because of the heavy use of case materials; video and textual coverage of actual trials, it is expected that students will devote more than the usual number of hours to this course.]

#### [HD 241 History of Childhood in the United States (also HIST 271, AM ST 241)

Spring. Recommended for sophomores and juniors. 3 credits. M W 8:40-9:55. Not offered 2002-2003. J. Brumberg.

An examination of childhood and adolescence in various historical contexts: Puritan New England, slave plantations, evangelical revivals, the Western frontier, Victorian families, reform schools, early high schools and colleges, the sexual revolution of the 1920s, immigrant communities, the Depression and World War II, the 1950s, and more recent social and cultural changes affecting families. Students will evaluate continuities and changes in the lives of American children as well as changing scientific ideas about children. Students have an opportunity to reflect on and write about their own childhood and adolescence. This course is designed to give students a humanities perspective on approaches to childhood.]

#### HD 242 Participation with Groups of Young Children

Fall or spring. 4 credits. Limited to 20 students (limit depends on availability of placements and of supervision). Prerequisites: HD 115 and permission of instructor. S-U grades optional. W 1:25-3:30. J. Ross-Bernstein.

This course is designed to integrate developmental theories with supervised experience in child care centers, the intention being to enhance the student's abilities to understand and to relate effectively to young children. This class involves participation, observation, reflection, reading, writing, and sharing of viewpoints. Placements are in local nursery schools, day care centers, Head Start programs, and kindergartens.

#### HD 250 Families and the Life Course (also SOC 250)

Spring. 3 credits. S-U grades optional. M W 2:55-4:10. E. Wethington.

This course provides an introduction to social scientific research on family roles and functions in American society. Topics include the history of the family, family change over

the life course, and the influence of cultural and economic forces on families

#### [HD 251 Social Gerontology: Aging and the Life Course

Spring. 3 credits. Limited to 60 students. Strongly recommended: HD 250 or equivalent to be determined by instructor. S-U grades optional. T R 10:10-11:25. Not

offered 2002-2003. D. Dempster-McClain. This course analyzes the social aspects of aging in contemporary American society from a life course perspective. Topics to be covered include: (1) an introduction to the field of gerontology, its history, theories, and research methods; (2) a brief overview of the physiological and psychological changes that accompany aging; (3) an analysis of the contexts (such as family, friends, social support, employment, volunteer work) in which individual aging occurs, including differences of gender, ethnicity, and social class; (4) and the influences of society on the aging individual. Guest speakers will provide an introduction to various careers in the field of gerontology.]

#### [HD 253 Gender and the Life Course (also WOMNS 253)

Fall. 3 credits. S-U grades optional. TBA. Not offered 2002-2003. Staff.

We will examine the complex interplay between gender and age as well as the social construction of the life course. Students explore the relationship between social change and individual lives, observing the significance of two key institutions-work and family-in shaping basic life choices and their consequences throughout the life course. Implications of key life trajectories and transitions for individual lives and for social policy will also be discussed.]

#### HD 258 History of Women in the Professions, 1800 to the Present (also WOMNS 238 and HIST 238, AM ST 258)

Spring. 3 credits. Letter grades only. Human ecology students must register for HD 258. Limited to 50 students. Permission of instructor required. M W 8:40-9:55. J. Brumberg.

Covers the historical evolution of the female professions in America (midwifery, nursing, teaching, librarianship, home economics, and social work) as well as women's struggles to gain access to medicine, law, and the sciences. Lectures, reading, and discussions aim to identify the cultural patterns that fostered the conception of gender-specific work, and the particular historical circumstances that created these different work opportunities. The evolution of "professionalism" and the consequences of professionalism for women, family structures, and American society are also discussed.

#### HD 260 Introduction to Personality (also **PSYCH 275)**

Spring. 3 credits. Limited to 600 students (300 HD 260, 300 PSYCH 275). Recommended: introductory course in psychology or human development. T R 1:25-2:40. C. Hazan.

This course is designed as an introduction to theory and research in the area of personality psychology, with special emphasis on personality development. It covers the major influences-including genetic, environmental, and gene-environment interactions-and involves in-depth study of the major theories. The assumptions and models of human

behavior that form the basis of each theoretical orientation are examined and compared, and the relevant empirical evidence reviewed and evaluated. In addition, basic psychometric concepts and the methods for measuring and assessing personality are covered, as are the major related debates and controversies.

#### HD 261 The Development of Social **Behavior**

Spring. 3 credits. Strongly recommended: HD 115 or PSYCH 128. Offered alternate years. T R 1:25-2:40. Staff.

Covers issues in the development of social behavior are viewed from the perspective of theory and research. Likely topics include bases of social behavior in infancy and early childhood, the role of parents, siblings, and peers, the development of prosocial and aggressive behavior, the development and functioning of attitude and value systems, and the function and limits of experimental research in the study of social development.

#### [HD 266 Emotional Functions of the Brain

Spring. 3 credits. Prerequisite: HD 220. Letter grades only. M 10:10-12:35. Not offered 2002-2003. R. Depue.

Much of our social behavior, and what we refer to as personality, is related to phylogenetically-old emotional systems that help us to adapt to critical stimuli in the environment. These systems are structured and organized within the brain, but they are also capable of being modified by our everyday experiences. After an overview of the gross neuroanatomy of the primate brain is presented, the focus of the course concerns networks of brain regions that are organized around the integration of processes related to emotion and motivation. First, general features of the brain in relation to emotional evaluation and expression processes are discussed, and then the brain organization related to several specific types of emotional systems is presented, including incentive-reward motivation, social bonding, fear versus anxiety and affective aggression. Emotion, memory, and conscious awareness of emotional feelings are also discussed. Neurobiological modulation of emotional processes by neurotransmitters and neuropeptides of wide distribution in the brain are detailed as well. The latter lay the groundwork for understanding the nature of individual differences in much of our social and emotional behavior as explored in HD 366.]

#### [HD 282 Community Outreach (also **PSYCH 282)**

Fall and spring. 2 credits. Letter grades only. Prerequisites: HD 115 or PPSYCH 101. Students may not concurrently register with HD 327 or HD 328 or PSYCH 327 or PSYCH 328. T 10:10-11:25. Not offered 2002-2003. H. Segal.

This course provides students with information and perspectives needed to do volunteer fieldwork with human and social service programs in the community. To gain a practical understanding of what mental health professionals do in the workplace, students examine problems that emerge in fieldwork settings, which raise ethical, methodological, theoretical, and practical issues in the observation or treatment of clients or patients. They are also introduced more generally to the field of Community Psychology, its history, theory, and applications. Although students are not required to volunteer at a local agency, the instructor assists students in finding sites that may provide appropriate learning opportunities.]

#### HD 284 Gender and Sexual Minorities (also WOMNS 285)

Fall. 3 credits. S-U grades only. Prerequisite: one social science course. M 7:30-10:10 p.m. R. Savin-Williams.

This course introduces students to theories, empirical scholarship, public policies, and current controversies with lesbian, gay, bisexual, transgender, sexually questioning, and other sexual minority populations. The major focus is on sexual development, lifestyles, and communities with additional emphasis on ethnic, racial, gender, and class issues. Videos supplement the readings and lectures.

#### HD 300 Special Studies for Undergraduates

Fall or spring. Credit to be arranged. Permission required.

Special arrangement for course work to establish equivalency for courses not transferred from a previous major or institution. Students prepare a multicopy description of the study they want to undertake on a form available from the College Registrar's Office. The form, signed by both the instructor directing the study and the coordinator of undergraduate education, is filed at course registration or during the change-of-registration period.

#### [HD 313 Problematic Behavior in Adolescence (also PSYCH 313)

Fall. 3 credits. Prerequisite: HD 115 or PSYCH 101. M W 2:55-4:10. Not offered 2002-2003. J. Haugaard.

This course explores several problematic behaviors of adolescence, including depression, drug abuse, eating disorders, and delinquency. Various psychological, sociological, and biological explanations for the behaviors are presented. Appropriate research is reviewed; treatment and prevention strategies are explored. Lectures are supplemented by several novels and movies that focus on troubled adolescents.]

#### HD 327 Field Practicum I (also PSYCH 327)

Fall. 3 credits. Enrollment limited to 30 students. Students must commit to taking HD 328 in the spring semester. Prerequisites: HD 370 or PSYCH 325 and permission of instructor. Letter grades only. M W 8:40-9:55. H. Segal.

This course provides three components, which form an intensive undergraduate field practicum. Students spend three to six hours a week at local mental health agencies, schools, or nursing facilities working directly with children, adolescents, or adults; supervision is provided by host agency staff. Cornell faculty provide additional weekly educational supervision for each student. Seminar meetings cover issues of adult and developmental psychopathology, clinical technique, case studies, and current research issues Students write two short papers, two final take-home exams, and present an account of their field experience in class.

#### HD 328 Field Practicum II (also PSYCH 328)

Spring. 3 credits. Enrollment is limited to 30 students. Prerequisites: HD 327 or PSYCH 327 taken the previous term, PSYCH 325 or HD 370 and permission of instructor. Letter grades only. M W 8:40-9:55. H. Segal.

This course continues the field practicum experience from HD 327. Students spend

three to six hours a week at local mental health agencies, schools, or nursing facilities working directly with children, adolescents or adults; supervision is provided by host agency staff. Cornell faculty provide additional weekly educational supervision for each student. Seminar meetings cover issues of adult and family psychopathology, clinical technique, case studies, and current research issues. Students write two short papers, two final take-home exams, and present an account of their field experience in class.

#### HD 344 Infant Behavior and Development

Fall. 3 credits. Prerequisites: HD 115, a biology course, and a statistics course. Not open to freshmen. M W F 1:25–2:15. S. Robertson.

Behavior and development from conception through the first two years of life is examined in traditional areas (e.g., perception, cognition, socioemotional theory, language, motor function). The fundamental interconnectedness of these aspects of development is strongly emphasized, as is their relation to the biology of fetal and infant development. Topics with implications for general theories of development are emphasized (e.g., the functional significance of early behavior, the nature of continuity and change, and the role of the environment in development). Conditions which put infants at risk for poor development (e.g., premature birth, exposure to environmental toxins, maternal depression) and topics with current social. ethical, or political implications (e.g., infant day care, fetal rights) are also considered. An emphasis on research methodology in the study of early behavior and development is maintained throughout the course.

#### HD 346 The Role and Meaning of Play

Fall. 2 credits. Limited to 30 juniors and seniors. Prerequisite: HD 115. M 7:30–9:25. J. Ross-Bernstein.

The aim of this course is to examine the play of children ages three through seven. Through seminar discussions, workshops, films, and individualized research students explore the meaning and validity of play in the lives of young children, the different ways that children play and the value of each, and the effect of the environment in enhancing and supporting play.

#### HD 347 Human Growth and Development: Biological and Behavioral Interactions (also B&SOC 347 and NS 347)

Spring. 3 credits. Prerequisites: Biological Sciences 101 or 109 or equivalent, and HD 115 or PSYCH 101. Limited to 150 students. M W F 1:25–2:15. Offered

alternate years. S. Robertson and J. Haas. This course is concerned with the interrelationships of physical and psychological growth and development in humans during infancy. Intrinsic and extrinsic causes of variations in growth, including various forms of stimulation, are considered. In addition, the consequences of early growth and its variations for current and subsequent behavioral, psychological, and physical development are examined. The interaction between physical and behavioral or psychological factors is emphasized throughout the course.

#### HD 348 Advanced Participation with Children

Spring. 4–8 credits. Limited to 20 students (limit depends on availability of placements and supervision). Prerequisites: HD 115 and HD 242; and permission of instructor. Recommended: HD 346. S-U grades optional. T 12:20–2:15. I. Ross-Bernstein.

An advanced, supervised field-based course. designed to help students deepen and consolidate their understanding of children. Students are expected to define their own goals and assess progress with supervising teachers and the instructor; to keep a journal; and to plan, carry out, and evaluate weekly activities for children within their placement. Conference groups and readings focus on the contexts of development and on ways to support children's personal and interpersonal learning. Each student is expected to do a presentation and paper on a self-selected topic within the scope of the class. Participation is in settings that serve typical and/or special needs children from three to eight years of age and provide education, care, or special-purpose interventions for them.

#### HD 353 Risk and Opportunity Factors in Childhood and Adolescence

Spring, 3 credits. Enrollment limited to 100 students. Prerequisites: HD 115 and HD 250. S-U grades optional. M 7:30–10:00. I. Garbarino.

This course explores the meaning of risk and opportunity in the lives of children and youth. It begins with understanding risk accumulation and resilience as they relate to social policy, professional practice, and community development. The concept of "social toxicity" is a central theme of the course. Assignments include writing research-based editorials and participating in a simulated public policy debate.

#### [HD 359 American Families in Historical Perspective (also WOMNS 357, HIST 359, AM ST 359)

Fall. 3 credits. Prerequisite: HD 250 or one 200-level social science or history course. S-U grades optional. Human ecology students must register for HD 359. Not

offered 2002-2003. J. Brumberg. This course provides an introduction to and overview of problems and issues in the historical literature on American families and the family life cycle. Reading and lectures demonstrate the pattern of American family experience in the past, focusing on class, ethnicity, sex, and region as important variables. Analysis of the private world of the family deals with changing cultural conceptions of sexuality, sex roles, generational relationships, stages of life, and life events. Students are required to do a major research paper on the history of their family, covering at least two generations, and demonstrating their ability to integrate life-course development theory, data drawn from the social sciences, and historical circumstances.]

#### [HD 362 Human Bonding

Fall. 3 credits. Limited to 600 students. Recommended: introductory course in psychology or human development. S-U grades optional. T R 1:25–2:40. Not offered 2002–2003. C. Hazan.

Covers the science of interpersonal relationships. Examines the basic nature of human affectional bonds, including their functions and dynamics. Covers such topics as interpersonal attraction and mate selection, intimacy and commitment, love and sex, jealousy and loneliness, the neurobiology of affiliation and attachment, and the role of relationships in physical and psychological health.]

#### HD 366 Psychobiology of Temperament and Personality

Fall. 3 credits. Letter grades only. Prerequisite: HD 266. M 7:30–10:00. R. Depue.

This course is for students who have an interest in the neurobiology of behavior, in general, and in temperament and personality, in particular. The course material is presented within an evolutionary biology perspective, where the development of neurobehavioral systems as a means of adapting to critical stimuli is explored as the basis of emotional traits in humans. The nature of temperament. and personality is explored from psychometric, social, genetic, and biological points of view. There is a focus on the general role played by the biogenic amines (dopamine, norepinephrine, and serotonin), corticotropic hormone and opiates in determining individual differences in temperament and personality. Implications for modeling several forms of personality disorders and psychopathology are also discussed. Finally, the manner in which environmental influences across the life span may be coded in the brain and influence the development of personality is explored.

#### HD 368 Children's Development in Different Cultures

Spring. 3 credits. Letter grades only. Prerequisites: HD 115 or PSYCH 101 and one college-level statistics course. M W 2:55–4:10. K. Greene.

This course examines the influence of ecological, cultural, and ethnic factors on the social and cognitive development of children in different cultures. Particular attention is given to research methodologies that guide us in making comparisons about parent-child development across cultures. Topics include family origin and universality, parental roles, child-family interaction, patterns of kinship, and economic and health issues.

#### HD 370 Adult Psychopathology (also PSYCH 325)

Spring. 3 credits. Limited to sophomores, juniors, and seniors. Prerequisites: any one course in psychology or human development. M W 2:55–4:10. Staff.

A research-based introduction to the biological, psychological, and social (including cultural and historical) aspects of adult psychopathology. The major mental illnesses are covered, including but not limited to, schizophrenia, mood disorders, anxiety disorders, and personality disorders. Childhood disorders are not covered.

#### HD 382 Research Methods in Human Development

Spring. 3 credits. Prerequisites: HD 115. Letter grades only. M W 2:55–4:10. M. Casasola.

The course reviews different methodological approaches in the study of human development. In particular, students learn about the research designs as well as different methods of data collection and analysis, with a focus on those methods used by the faculty in the HD department. Through lectures, discussions, assignments, computer labs, and two projects, students gain a strong understanding of the strengths and limitations of experimental, quasi-experimental, survey, and qualitative research designs.

#### HD 400-401-402-403 Special Studies for Undergraduates

Fall or spring. Credits to be arranged (1-4). Permission required. S-U grades optional. For advanced independent study by an individual student or for study on an experimental basis with a group of students in a field of HD not otherwise provided through course work in the department or elsewhere at the university. Students prepare a multicopy description of the study they want to undertake, on a form available from the department office in NG14. This form must be signed by the instructor directing the study and the student's faculty adviser and submitted to NG14 MVR, the Office of Undergraduate Education. After the form is approved, the student takes the form to the College Registrar's Office, 145 MVR, along with an add/drop slip. To ensure review before the close of the periods, early submission of the special studies form to the Office of Undergraduate Education is necessary. Students, in consultation with their supervisor, should register for one of the following subdivisions of independent study.

**400: Directed Readings** Permission required. For study that predominantly involves library research and independent study.

**401: Empirical Research**. Permission required. For study that predominantly involves data collection and analysis, or laboratory or studio projects.

**402: Supervised Fieldwork**. Permission required. For study that involves both responsible participation in a community setting and reflection on that experience through discussion, reading, and writing. Academic credit is awarded for this integration of theory and practice.

**403: Teaching Apprenticeship**. Enrollment limited to juniors and seniors with a minimum 3.0 GPA. Prerequisites: either HD 115. or PSYCH 101, and two intermediate level HD courses, or equivalent courses in psychology or sociology. Students must have taken the course and received a grade of B+ or higher. Permission required. For study that includes assisting faculty with instruction.

#### [HD 417 Female Adolescence in Historical Perspective (also WOMNS 438, HIST 458, AM ST 417)

Spring. 3 credits. Limited to 25 students. Prerequisites: HD 216 and at least one 300level history or women's studies or American studies course. Permission of instructor required. Juniors and seniors only. T 1:25–4:25. Not offered 2002–2003. J. Brumberg.

A reading, writing, and discussion course that attempts to answer a basic historical question that has consequences for both contemporary developmental theory and social policy: how has female adolescence in the United States changed in the past 200 years? The focus is on the ways in which gender, class, ethnicity, and popular culture shape adolescent experience. Although the required readings are primarily historical in nature, students are encouraged to think about the interaction of biology, psychology, and culture. Students are required to do a primary source research paper.]

#### (HD 418 Psychology of Aging

Fall. 3 credits. Enrollment limited to 25 students. Prerequisites: HD 218, 250, and 251 or permission of instructor. Letter grades only. Offered alternate years. T R 2:55–4:10. Not offered 2002–2003. S. Cornelius.

This seminar addresses major issues and controversies in the field of aging. It is designed for upper-level students who wish to pursue an in-depth analysis of concepts such as "successful" aging and wisdom, as well as controversies surrounding issues of generational equity and the right to die. Although these issues are addressed primarily from a psychological viewpoint, interdisciplinary perspectives are considered and incorporated in both readings and discussions. The seminar is designed for advanced undergraduates who have completed an introductory course in adulthood and aging and wish to pursue such issues in more depth. Class time is primarily devoted to discussion of assigned readings.]

#### HD 419 Midlife Development

Fall. 3 credits. Enrollment limited to 25 students. Letter grades only. Prerequisites: HD 218, 250 and 251 or permission of instructor. T R 1:25–2:40. Offered alternate years. S. Cornelius.

This course examines the burgeoning research literature on adult development during midlife. The focus of the course is on research and theory examining psychological changes during middle adulthood such as relativistic and dialectical thinking, personality, identity, and sense of control. It also considders the social and physical changes that occur at this time of life especially regarding issues such as empty nest anxieties, divorce, career transitions, menopause, and cardiovascular disease. The course is conducted in a seminar format for upper-level undergraduates. Oral presentations, class participation, and an integrative paper is required.

#### HD 433 Developmental Cognitive Neuroscience

Spring. 3 credits. Prerequisites: one neurobiology class such as HD 220 OR one cognitive psychology/development class. S-U grades optional. T R 1:25–2:40. E. Temple.

What are the brain mechanisms underlying human behavior and cognition? How do those underlying brain mechanisms develop? These are the questions that developmental cognitive neuroscience tries to address and those we explore in this course. The course covers methods used in the field (including brain imaging techniques), recent findings on the development of brain mechanisms underlying human behaviors such as, language, attention, and memory, as well as the brain mechanisms that may underlie various developmental disorders such as, developmental dyslexia, autism, and attention deficit (hyperactive) disorder (AD(H)D). The format includes lecture, discussion, and reading of primary research literature.

#### HD 436 Language Development (also COGST 436, PSYCH 436 and LING 436)

Spring, 4 credits. Open to undergraduate and graduate students. Graduate students should also enroll in HD 633/LING 700, a supplemental graduate seminar. Prerequisite: at least one course in developmental psychology, cognitive psychology, cognitive development, neurobiology, biology, or linguistics. S-U grades optional. A supplemental lab course is available (HD 437, COGST 450, PSYCH 437, LING 450). T R 2:55–4:10. B. Lust.

This course surveys basic issues, methods, and research in the study of first-language acquisition. Major theoretical positions in the field are considered in the light of experimental studies in first-language acquisition of phonology, syntax, and semantics from infancy on. The fundamental issues of relationships between language and thought are discussed, as are the fundamental linguistic issues of "Universal Grammar" and the biological foundations for language acquisition. The acquisition of communication systems in nonhuman species such as chimpanzees is addressed, but major emphasis is on the child.

#### HD 437 Lab Course: Language Development (also COGST 450, PSYCH 437 and LING 450)

Spring. 2 credits. Prerequisite: HD/COGST/ PSYCH/LING 436 or equivalent. R 1:25– 2:40. B. Lust.

This laboratory course is an optional supplement to the survey course, Language Development (HD/COGST/PSYCH/LING 436). The lab course will provide students with a hands on introduction to scientific research, including design and methods in the area of first language acquisition.

#### HD 438 Thinking and Reasoning

Fall. 3 credits. Prerequisite: HD 115 or PSYCH 101. T R 2:55–4:10. B. Koslowski. The course examines problem solving and transfer, pre-causal thinking, logical thinking, practical syllogisms, causal reasoning, scientific reasoning, theories of evidence, expert vs. novice differences, and nonrational reasoning. Two general issues run through the course: the extent to which children and adults approximate the sorts of reasoning that are described by various types of models, and the extent to which various models accurately describe the kind of thinking that is required by the types of problems and issues that arise and must be dealt with in the real world.

## [HD 439 Cognitive Development: Infancy through Adolescence

Spring. 3 credits. Prerequisites: HD 115 or Psychology 101. Letter grades only. T R 2:55–4:10. Not offered 2002–2003. B. Koslowski.

The course is an overview of current and classic issues and research in cognitive development. Central topics of both "hard cognition" (e.g., information processing and neuropsychological functioning) and "soft cognition" (e.g., problem solving, concepts, and categories) are covered. Selected topics are linked to methodological issues and to important social issues such as cross-cultural cognitive development and putative racial and social class differences.]

#### HD 440 Internship in Educational Settings for Children

Fall or spring. 8–12 credits. Prerequisites: HD 115, 242 and 348. Recommended: HD 346. Permission of instructor required. S-U grades optional. J. Ross-Bernstein.

Opportunity to integrate theory with practice at an advanced level and to further develop understanding of children ages 2 to 10 and their families. Interns function as participants in varied settings and participate in curriculum planning, evaluation, staff meetings, home visits, parent conferences, and parent

304

meetings. Supervision by head teacher and instructor. Students are expected to define their own goals and to assess their progress, to do assigned and self-directed readings, and to keep a critical incident journal.

#### [HD 451 Nontraditional Families and Troubled Families

Spring. 3 credits. Limited to 30 students. Prerequisites: HD 115 and 250. Letter grades only. T R 8:40–9:55. Offered alternate years. Not offered 2002–2003. J. Haugaard.

This is an advanced course designed to explore the functioning of families. The first part of the course examines family system theory and how it relates to our understanding of all families. Four types of families are then examined: two nontraditional families (e.g., adoptive families) and two troubled families (e.g., families with a chronically ill child).]

#### HD 452 Culture and Human Development

Fall. 3 credits. Prerequisites: HD 115 or PSYCH 101. Letter grades only. Open to undergraduate and graduate students. Limited to 30 students. M W 2:55-4:10. Q. Wang.

This seminar takes an interdisciplinary approach to address the central role of culture in human development. It draws on diverse theoretical perspectives, including psychology, anthropology, education, ethnography, and linguistics, to understand human difference, experience, and complexity. It takes empirical reflections upon major developmental topics such as cultural aspects of physical growth and development; culture and cognition; culture and language; culture, self, and personality; cultural construction of emotion; culture issues of sex and gender; and cultural differences in pathology.

## HD 456 Families and Social Policy

Spring. 3 credits. Prerequisite: one course in the area of the family or in sociology. S-U grades optional. TBA. Staff.

An examination of the intended and unintended family consequences of governmental policies, using case studies in areas such as social welfare, day care, and employment. The policy implications of changes in the structure and composition of families are also considered.

#### [HD 457 Health and Social Behavior (also SOC 457)

Fall. 3 credits. Prerequisites: a course in statistics and **one** of the following: HD 250, Sociology 101, Sociology 251, or Rural Sociology 101. Letter grades only. T R. Offered alternate years. Not offered 2002– 2003. E. Wethington.

This course critically examines theories and empirical research on the relationships among social group membership, social status, and physical and mental health. The lectures focus on social stress, social support, and socioeconomic status, all of which are associated with variations in physical health, mental health, and health maintenance behaviors. Students are expected to read widely from current literature in medical sociology, health psychology, public health, and epidemiology.]

#### HD 458 Parent-Child Development in African-American Families

Fall. 3 credits. Letter grades only. Enrollment limited to 30 seniors and juniors. Prerequisites: HD 115, HD 250, and a college level statistics course. T R 10:10–11:25. K. Greene. This course examines parent-child relationships in African-American families. Topics include historical influences on contemporary parenting behaviors, the impact of societal forces on African American families' socialization practices, and the influence of parental child rearing beliefs, strategies, and practices on African American children's development. Particular attention is given to the relevance of mainstream theoretical formulations of African American's parental and familial functioning.

#### (HD 459 Disease In American Culture and Society (also AM ST 430)

Fall. 4 credits. Limited to 15 students. Prerequisites: HD 241, or HD 258, or HD 359, or HD 417. Permission of instructor required. Not offered 2002–2003. I. Brumberg.

How a society defines, explains, treats, and tries to prevent disease reveals a great deal about its basic ideals, values, and institutions. Diseases are not simple biological "facts," but the product of a complex amalgam of biological and social forces. This course uses the history of specific diseases to examine: (1) the ways in which the social and cultural environment shape the experience of illness; (2) the ideas that Americans have held about why some people get sick and others do not; (3) how those ideas reflect larger cultural as well as scientific trends; (4) the ways in which power relationships are involved in defining and responding to the threat of disease; (5) and the impact that disease has had on American society. A short response paper must be written for each session. An additional historiographical essay or research paper will be prearranged with the instructor.]

#### HD 464 Adolescent Sexuality (also WOMNS 467)

Spring, 3 credits. Instructor permission required. T R 10:10–11:25. R. Savin-Williams.

This course covers topics selected by students regarding theoretical, research, and applied issues on adolescent sexuality. In the second half of the course, students lead a class that focuses on a research topic of their choosing. The success of the course depends on students feeling personally engaged and committed to the course content. Students are expected to participate fully in the class discussions. Because of the multidisciplinary nature of the course, students from a variety of backgrounds in academic disciplines, gender, sexual orientation, ethnicity, race, class, and religious affiliation will be in the course.

#### [HD 468 Stress in Childhood and Adolescence

Fall. 3 credits. Recommended: HD 115, HD 250 and a statistics course. Letter grades only. TBA. Not offered 2002–2003. J. Eckenrode.

This is an advanced seminar that reviews research related to the nature and consequences of stressful experiences in childhood and adolescence, particularly those arising in the family. Topics covered represent common stressors in the lives of children (e.g. divorce of parents), which have potentially damaging consequences for development (e.g. child abuse). Topics in which faculty at Cornell have conducted significant research (e.g. children's memory for stressful events) are also covered. In addition to considering the negative affect of stress on development, we also consider issues of individual differences in stress reactivity, including the concepts of coping and resilience. These topics lead naturally into discussions of practice and policy.]

## HD 471 Child Development and Psychopathology (also PSYCH 476)

Fall. 3 credits. Prerequisites: HD 115 or PSYCH 101. Recommended: a basic course in psychopathology. Letter grades only. M W 2:55–4:10. J. Haugaard.

This class explores the development and process of mental, emotional, and behavioral disorders in children such as mental retardation, autism, depression, and attention deficit disorder. Topics include: (1) the classification of mental disorders; (2) biological, psychological, and sociological theories regarding the development and maintenance of mental disorders; (3) prevalence and etiology of childhood mental disorders, and (4) therapeutic and preventive interventions. If there is sufficient enrollment, an optional discussion section will be available to those students who would like an opportunity to discuss readings and lecture material in greater depth.

#### HD 483 Early Care and Education in Global Perspective

Fall. 3 credits. Enrollment limited to 25 juniors and seniors. Prerequisites: HD 115 and HD 250. S-U grades optional. T R 2:55–4:10. M. Cochran.

In this course we examine American child care and early education policies and programs, broadly defined, in the context of policies and programs in Africa, Asia, Europe, and Latin America. Comparison and analysis are guided by several complementary conceptual frameworks. Particular attention is given to relativism and universalism as applied to developmental and educational principles and concepts. Students specialize in the child care policies and programs of another country, work in teams to analyze a contemporary policy issue, and apply course content to an issue of their choice in a final paper.

#### HD 498 Senior Honors Seminar

Fall and spring. 1 credit. Required for, and limited to, seniors in the HD honors program. S-U grades only. M 12:20–1:10. S. Cornelius.

This seminar is devoted to discussion and presentation of honors theses being completed by the senior students.

#### HD 499 Senior Honors Thesis

Fall or spring. Credit to be arranged. Prerequisite: permission of thesis adviser and coordinator of honors program. S-U grades optional. Department faculty.

#### HD 206, 306, 406 Topics in Human Development

2–4 credits. S-U grades optional. These topics vary each time the course is offered and are taught by advanced graduate students in the field of human development. Descriptions are available at the time of course registration. These courses do not fulfill any requirements for the major; they must be taken as electives.

## **Topics Courses**

Fall or spring. 2–4 credits. Prerequisites and enrollment limits vary with topic being considered in any particular term. Permission of instructor may be required.

This series of courses provides an opportunity for undergraduates to explore an issue, a theme, or research in the areas of departmental concentration. Topics vary each time the

course is offered. Descriptions are available at the time of course registration. Although the courses are usually taught as seminars, a subject may occasionally lend itself to lecture, practicum, or other format.

- HD 215, 315, 415 Topics in Adolescent and Adult Development
- HD 235, 335, 435 Topics in Cognitive Development
- HD 245, 345, 445 Topics in Early-**Childhood Development and** Education
- HD 255, 355, 455 Topics in Family Studies and the Life Course
- HD 265, 365, 465 Topics in Social and **Personality Development**
- HD 275, 375, 475 Topics in **Developmental Psychopathology**
- HD 285, 385, 485 Topics in the Ecology of Human Development

#### The Graduate Program

HD graduate courses are only open to undergraduates with instructor's permission.

#### **General Courses**

#### [HD 617 Adolescence

Spring. 3 credits. Not offered 2002-2003. Staff.

Critical examination of seminal theoretical and empirical writings on adolescent development. Empirical research on specific questions chosen by students is considered in the light of these approaches.]

#### [HD 631 Cognitive Development

Fall. 3 credits. Letter grades only. Not offered 2002-2003. Staff.

Faculty members involved in the course will present their area of specialization in cognitive development. These areas will include perception, attention, memory, language, thinking and reasoning, learning, creativity, and intelligence.]

#### [HD 640 Infancy

Fall. 3 credits. TBA. Not offered 2002-2003. S. Robertson.

Development in infancy is examined through a critical review of key research and theory in selected aspects of neurobehavior, perception, cognition, language, emotion, and social relationships. Theoretical issues to be considered include the role of experiences in early development, sensitive periods, continuity and discontinuity in development, and the functional significance of early behavior. Some of the conditions that put infants at risk for poor development are also considered, such as premature birth, perinatal medical complications, and exposure to environmental toxins. The course combines perspectives from developmental psychology and psychobiology.]

#### [HD 650 Contemporary Family Theory and Research

Fall. 3 credits. Not offered 2002-2003. E. Wethington.

Sociological and social psychological theories and research on the family are examined with reference to the relationship between the family and society. Topics change from year to year, but focus on the processes of socialization and social control, the reproduction of gender and social class across

generations, changes in family "values" across time, the rise of divorce and single motherhood, family diversity, and the genesis of deviance and psychological disorder.]

#### HD 660 Social Development

Spring. 3 credits. Letter grades only. TBA. K Greene.

This seminar examines literature relevant to early childhood determinants and developmental processes of personality and social behavior. Current research, theories, and methodological issues are addressed. Special emphasis is placed on possible interrelations between the quality of relationships with parents and with peers, and on the meaning of risk, vulnerability, and resilience in children's lives.

#### [HD 670 Experimental Psychopathology

Spring. 3 credits. Prerequisite: an undergraduate course in abnormal psychology or psychopathology; a course in multivariate statistics; and substantive course work in neurobiology or related biological

science. TBA. Not offered 2002-2003. Staff. Overview of current theories and empirical research on functional and organically based psychological disorders. Topic areas covered include autism, schizophrenia, anxiety disorders, affective disorders, and personality disorders. Focus is on the developmental and etiology of psychopathology.]

## **Topical Seminars**

Seminars offered irregularly, with changing topics and instructors. Content, hours, credit, and instructors to be announced. Seminars offer concentrated study of specific theoretical and research issues.

#### HD 618 Seminar in Adolescence and Adult Development

Topics include peer relations, parent-teen relationships, self-esteem, youth and history, work, and moral development.

#### HD 633 Seminar on Language **Development**

Topics include acquisition of meaning in infancy, precursors of language in early infancy, and atypical language development.

#### HD 635 Seminar in Cognitive Development

Topics include early attention, perception, memory, and communication. Assessment and intervention in relation to these processes will be considered when possible.

#### HD 645 Seminar on Infancy

Focuses on selected topics in the developmental psychology and psychobiology of infancy (including fetal development). Special topics vary and depend in part on student interests.

#### HD 646 Seminar in Early-Childhood **Development and Education**

Topics include analysis of models and settings, design of assessment techniques, program evaluation, and early childhood in a cross-cultural context.

#### HD 655 Seminar in Family Studies and the Life Course

Topics include the sociology of marital status. the single-parent family, work-family linkages, women and work, and families and social change.

#### HD 665 Seminar in Personality and Social Development

Focuses on selected issues related to personality and social development. The issues selected vary each year according to current importance in the field and student interests.

#### HD 675 Seminar in Developmental **Psychopathology**

Topics include learning disabilities, therapeutic interventions in atypical development, child abuse and maltreatment, family factors in the etiology of functional disorders, and cognitive characteristics of atypical groups.

#### HD 685 Seminar In Research Methods

This course focuses on quantitative and qualitative research methods frequently used in developmental psychology or life course studies, such as surveys, questionnaires, observations, and interviews.

#### HD 690 Seminar on Ecology of Human Development

Topics include the institutional setting as a determinant of behavior, the poor family, and the identification and measurement of ecological variables.

#### Individualized Special Instruction

#### HD 700-806 Special Studies for Graduate Students

Fall or spring. Credits and hours to be arranged. Credits 1-15 (3 hours work per week per credit). S-U grades at discretion of instructor.

Independent advanced work by graduate students recommended by their Special Committee chair with permission of the instructor

#### HD 700 Directed Readings

For study that predominantly involves library research and independent study.

#### HD 701 Empirical Research

For study that predominantly involves collection and analysis of research data.

#### HD 702 Practicum

For study that predominantly involves field experience in community settings.

#### HD 703 Teaching Assistantship

For students assisting faculty with instruction. Does not apply to work for which students receive financial compensation.

#### HD 704 Research Assistantship

For students assisting faculty with research. Does not apply to work for which students receive financial compensation.

#### HD 705 Extension Assistantship

For students assisting faculty with extension activities. Does not apply to work for which students receive financial compensation.

## HD 706 Supervised Teaching

4 credits.

For advanced students who assume major responsibility for teaching a course. Supervision by a faculty member is required.

## HD 806 Teaching Practicum

4 credits. For advanced graduate students to independently develop and teach an undergraduate topics course under the supervision of a faculty member.

## HD 899 Master's Thesis and Research

Fall or spring. Credit to be arranged. Credits 1–15 (3 hours work per week per credit). S-U grades only. Prerequisite: permission of thesis adviser.

**HD 999 Doctoral Thesis and Research** Fall or spring. Credit to be arranged. Credits 1–15 (3 hours work per week per credit). S-U grades only. Prerequisite: permission of thesis adviser.

# POLICY ANALYSIS AND MANAGEMENT

R. Burkhauser, chair; R. Avery, associate chair; E. Peters, Policy Analysis and Management, director of graduate studies; A. Mathios, director of undergraduate studies; D. Kenkel, interim director of Sloan Program; K. Waldron, associate director of Sloan Program; J. Allen, R. J. Avery, R. Battistella, B. J. Bristow, R. Burkhauser, J. S. Butler, J. Cawley, P. Chi, R. Dunifon, R. Geddes, J. Gerner, K. Joyner, D. Kenkel, J. Kuder, A. Mathios, L. O'Neill, A. Parrot, E. Peters, P. Pollak, E. Rodriguez, W. Rosen, N. Roufaiel, J. Schultz, K. Simon, R. Swisher, S. Tennyson, D. Tobias, W. Trochim, M. Waller; R. Babcock, Emeritus; D. Barr, Emeritus; H. Biesdorf, Emeritus; W. K. Bryant, Emeritus; F. M. Firebaugh, Emerita; J. Ford, Emeritus; A. Hahn, Emeritus; E. S. Maynes, Emeritus; C. McClintock, Emeritus; J. Mueller, Emerita; L. Noble, Emerita; J. Robinson, Emerita; C. Shapiro, Emerita; L. Street, Emeritus; K. Walker, Emerita; B. L. Yerka, Emerita; J. Ziegler, Emeritus

NOTE: Class meeting times are accurate at the time of publication. If changes are necessary, the department will provide new information as soon as possible.

## PAM 200 Intermediate Microeconomics

Fall or spring. 4 credits. Prerequisite: ECON 101 or equivalent. J. Cawley, R. Geddes, A. Mathios, W. Rosen. Topics include theory of demand and consumer behavior including classical and indifference curve analyses; theories of production and cost; models for the following markets—competitive, monopoly, monopolistic competition, oligopoly, and inputs; general equilibrium; welfare economics; public goods; and risk. A section is mandatory.

#### PAM 204 Applied Public Finance

Fall or spring, 3 credits. Prerequisites: PAM 200. S-U grades optional. S. Tennyson, K. Simon.

The public sector now spends nearly 2 out of every 5 dollars generated as income in the U.S. economy. A thorough knowledge and understanding of this important sector is an essential part of training in policy analysis and management. This course provides an overview of the public sector of the U.S. economy, the major categories of public expenditures, and the main methods used to finance these expenditures. The principles of tax analysis and cost-benefit analysis are presented with a focus on the role of public policy in improving economic efficiency, promoting the goals of equity and social justice, and improving equity by altering the distribution of wealth and income.

#### **PAM 210** Introduction to Statistics Fall and spring. 4 credits. K. Joyner,

R. Swisher.

This course introduces students to descriptive and inferential statistics. Topics include hypothesis testing, analysis of variance, and multiple regression. To illustrate these topics, this course examines applications of these methods in studies of child and family policy.

#### PAM 215 Research Methods

Fall or spring. 3 credits. Prerequisites: PAM

210 or equivalent. Sections TBA. Staff. Students learn the logic and methods of social science research, as well as how to create researchable questions out of their issues of interest. Readings, written assignments, and in-class exercises focus on stating hypotheses, designing studies and samples to test hypotheses, measuring variables, and simple statistical analysis. PAM majors should take this course no later than their junior year.

#### PAM 220 Introduction to Management: Principles and Differences Among Sectors

Fall. 3 credits. D. Tobias. This course is a basic introduction to major management and related concepts of planning, organizing, controlling, leadership, and special topics within five major management contexts including individual/personal, groups/families, firms, not-for-profit organizations, and governments/communities.

## [PAM 223 Consumer Markets

Fall. 4 credits. Not offered 2002–2003. R. J. Avery.]

## **PAM 230 Introduction to Policy Analysis** Fall or spring. 3 credits. R. Avery,

J. Gerner.

Policy analysis is an interdisciplinary field that uses theories, concepts, and methods from disciplines such as economics, sociology, and political science to address substantive issues in the public policy arena. Students are introduced to the functions of and interactions between the major institutions (public and private) at the national, state, and local level involved in the policy making process. The course focuses on public policy analysis in the consumer, health, and family/social welfare areas and also includes an introduction to the technical skills required to undertake policy analysis.

## PAM 280 Race, Power, and Privilege in the United States

Spring. 3 credits. D. Barr. J. Turner. For description, see AS&RC 280.

#### PAM 300 Special Studies for Undergraduates

Fall or spring. Credit to be arranged. Special arrangement for course work to establish equivalency for training in a previous major or institution. Students prepare a multicopy description of the study they want to undertake on a form available from the College Registrar's Office. This form, signed by both the instructor directing the study and the head of the department, should be filed at course registration during the change-ofregistration period.

#### PAM 303 Ecology and Epidemiology of Health

Spring. 3 credits. S-U grades optional. Limited to 50 students. E. Rodriguez. Ecological and epidemiological approaches to the problems which restrict human health within the physical, social, and mental environment. The course introduces epidemiological methods and surveys the epidemiology of specific diseases such as AIDS, hepatitis, Legionnaires' disease, plague, cancer, herpes, and chlamydia. Application of epidemiology to health care will be discussed.

#### PAM 305 Introduction to Multivariate Analysis

Fall or spring, 4 credits. Prerequisites: PAM 210, AEM 210 or ILRST 210 or equivalent. I. Schultz.

The course introduces basic econometric principles and the use of statistical procedures in empirical studies of economic models. Assumptions, properties, and problems encountered in the use of multiple regression procedures are discussed. Students are required to specify, estimate, and report the results of an empirical model. Section meets once a week.

#### [PAM 310 Evaluation of Public Policies

Fall. 3 credits. Prerequisites: PAM 200, 330, or permission of instructor. Not offered 2002–2003. Staff.]

#### [PAM 320 Intermediate Policy Management

Spring. 3 credits. Prerequisite: PAM 205, 220, and 230. Not offered 2002–2003. W. Trochim.

An intermediate undergraduate course in policy management that is focused around a single broad policy area that has numerous specific policies and programmatic implementations associated with it and that touches upon the three major substantive areas in PAM: consumer, health, and family and social welfare. Through lectures, intensive readings, case study, in-class discussion, secondary data analysis, and small-group projects, students develop a deep understanding of what policy management means, and how it draws from a wide variety of disciplines (politics and government, history, sociology, economics, law, management) and utilizes a wide range of methods, both quantitative and qualitative.]

#### [PAM 323 Consumer Markets II

Spring. 4 credits. Not offered 2002–2003. R. J. Avery.

This course focuses on the cognitive, behavioral, and environmental forces that drive consumer demand. The first half of the course draws on theories and concepts from psychology and focuses on the cognitive processes whereby consumers interpret market-provided information and other stimuli in the purchase environment. The second half of the course draws on theories and concepts from retail anthropology to explain the behavior of consumers in the in-store environment. Particular emphasis is placed on communication institutions (advertising, television, print media), their impact on consumer decision making, and their control through government regulation. Course format is highly audio-visual and incorporates guest lectures from prominent consumer product firms, advertising agencies, and government regulators.]

#### PAM 334 Corporations, Shareholders, and Policy

Fall. 3 credits. Prerequisites: ECON 101. R. Geddes.

This course uses economic analysis to study the interaction of the market, the corporation, and the law and how these interactions affect the well being of shareholders and consumers. The costs and benefits of the corporate form of organization are examined. The legal institutions defining the corporation, such as limited liability and shareholder voting, are analyzed along with regulations governing these institutions. A particular focus is mechanisms that control the behavior of managers. Those mechanisms include hostile takeovers, insider trading, outside directors on the board, the role of large investors, and executive compensation plans. Additional topics include government ownership of corporations and non-profit enterprises.

#### PAM 340 The Economics of Consumer Policy

Spring. 4 credits. Prerequisites: PAM 200 or permission of instructor. S. Tennyson. This course is designed to familiarize students with the basic approaches to consumer policy and the economic analysis of consumer policy issues. The course is structured around the major forms of government intervention in consumer markets, and examines a wide variety of economic and social regulations from the economic perspective. Students are required to write a term paper analyzing a consumer policy issue of their choosing.

#### PAM 341 Economics of Consumer Law and Protection

Fall. 3 credits. Prerequisite: ECON 101 or equivalent. S-U grades optional. A. Mathios.

Economic analysis of the roles played both by the courts and by federal and state regulatory legislation in altering consumer markets, consumer behavior, and consumer welfare. Topics include economic analyses of contract law, product liability, accident law and antitrust law, and the activities of such agencies as the Federal Trade Commission, the Food and Drug Administration, and the Consumer Product Safety Commission.

#### PAM 346 Economics of Social Security (also ECON 447)

Spring. 3 credits. Prerequisite: PAM 200. S-U grades optional. R. Burkhauser. This course provides students with an economic perspective on social security policies. The readings illustrate the use of economic analysis to predict the behavioral effects and income distributional consequences of policy. The course primarily focuses on the Old-Age, Survivors, and Disability Insurance Program. But other programs such as, the Supplemental Security Income, and mandates, such as the Americans with Disabilities Act, that affect the aged and those with disabilities are discussed.

#### PAM 350 Contemporary Issues in Women's Health

Fall. 3-4 credits. A. Parrot

This course deals with the history of women in medicine and the historical and cultural treatment of women's health problems. Health care research and the exclusion of women from research trials and protocols are also addressed. Reproductive issues, alternative approaches to treatment, medical problems, ethical issues, cancers, factors that contribute to post-traumatic stress disorders, health promotion behaviors, political issues, and routine medical recommendations are also discussed in depth. Students may take the course for a fourth credit, which requires attending a discussion section every other week and observing seven facilities (i.e., birthing center, mammogram, and ultrasound center, wellness center, hospital labor and delivery unit, LaMaze class, women's self

defense class, etc.) that provide a variety of women's health care.

## PAM 371 Demography and Family Policy

Fall. 3 credits. K. Joyner. This course examines from a demographic perspective family policies that concern children and adults. Toward this end, this course considers the relationships between family policies and demographic behavior. It also addresses the effects of family policies and demographic behavior on the well-being of children. Although this course focuses on the United States, it considers U.S. trends against the backdrop of changes in other industrialized countries.

## PAM 380 Human Sexuality

Spring. 3 credits. Limited to 500 students. Prerequisite: an introductory course in human development and family studies, psychology, or sociology (or equivalent social science course). Recommended: one course in biology. A. Parrot.

The aim of this course is to provide students with an understanding of the interactions and interrelationships of human behavior that influence sexual development and behavior. The course focuses on the evolution of sexual norms, cross-cultural customs, legislation within changing sociopolitical systems, and delivery of services related to sexual issues, needs, and/or problems. Future trends in sexuality are addressed.

#### PAM 383 Social Welfare as a Social Institution

Fall. 3-4 credits. S-U grades optional. J. Allen.

A philosophical and historical introduction to social welfare policy, programs and services, this course examines the social, political and economic contexts within which social welfare has evolved in this country. It discusses the ideological, the social, and the political processes through which public policy is formed, the significance of social and economic disparities, social justice, and the ways in which policies are translated into social welfare programs. The importance of a global perspective is emphasized.

#### PAM 392 New York State Government Affairs

Spring semester only. 12 credits, letter grade and instructor permission only. Preference is given to juniors and seniors. PAM 220 or a course in government strongly recommended. Staff.

Students participate in the New York State Assembly Intern Program that includes a seminar and other course work on legislative processes, political party dynamics, and policy analysis and management. Students also participate in a thirty-hour-a-week New York State Assembly internship requiring research on legislation, support for legislator initiatives and pubic hearings, and work on constituent and interest group issues.

#### PAM 400-401-402 Special Studies for Undergraduates

Fall and spring. Credits to be arranged. S-U grades optional. Staff.

For advanced independent study by an individual student or for study on an experimental basis with a group of students not otherwise provided through course work in the department or elsewhere at the university. Students prepare a multicopy description of the study they want to undertake on a form available from the department field office. This form must be signed by the instructor directing the study and the department chair and filed at course registration or within the change-of-registration period after registration with an add/drop slip in 145 MVR, College Registrar's Office. To ensure review before the close of the course registration or change-of-registration period, early submission of the special studies form to the department chair is necessary. Students, in consultation with their faculty supervisor, should register for one of the following subdivisions of independent study.

**PAM 400: Directed Readings**. For study that predominantly involves library research and independent reading.

**PAM 401: Empirical Research**. For study that predominantly involves data collection and analysis.

**PAM 402: Supervised Fieldwork.** For study that involves both responsible participation in a community setting and reflection on that experience through discussion, reading, and writing. Academic credit is awarded for this integration of theory and practice.

#### PAM 403 Teaching Apprenticeship

Prerequisite: students must have taken the course (or equivalent) in which they will be assisting and have demonstrated a high level of performance. For study that includes assisting faculty with instruction.

#### PAM 420 Management Information Systems for the Public Sector.

Spring. 3 credits. L. O'Neill. This course focuses on managing information systems in the public and nonprofit sector. Its purpose is to present an overview of the management of technology and to develop the computer literacy that is required of today's managers. It consists of three modules: technology, planning and management, and public/nonprofit applications such as those related to family and social welfare, health care, and consumer policy.

#### PAM 423 Risk Management and Policy

Spring. 3 credits. Prerequisite: ECON 101 and a course in statistics. Enrollment limited to 80. S. Tennyson.

The objective of this course is to provide students with a broad understanding of risk management problems and solutions, a greater appreciation of the importance of risk and risk regulation in our society, and increased comprehension of the complexities of making decisions about risk. Topics covered include alternative ways to define and measure risk, the importance of risk-tradeoffs, and models of decision making under risk. With this background, alternative approaches to risk management are discussed, including insurance, noninsurance financing alternatives, and loss control. The impact on risk management of the legal liability system and government programs, laws and policies are also considered.

#### [PAM 427 Complementary Alternative Medicine

Fall. 3 credits. Prerequisites: a health course and intro biology or permission of instructor. Not offered 2002–2003. A. Parrot.

This course particularly helps pre-medical students, health administration students, and health economics students understand the relationship between alternative medicine and western allopathic medicine. The course covers health and wellness, treatments for specific health conditions, differing philosophies of health care, financing health services, and cross-cultural approaches to these topics.]

#### PAM 435 The U.S. Health Care System Fall or spring. 3 credits. R. Battistella,

J. Kuder.

This course provides an introduction to the health care delivery systems in the United States, and covers the inter-relatedness of health services, the financing of health care, and the key stakeholders in health care delivery including regulators, providers, health plans, employers, and consumers. The course describes the history and organization of health care, behavioral models of utilization, issues of health care reform, and current trends. The course provides an overview of the key elements of the field including ambulatory care services, mental health services, hospitals and clinicians, insurers, the role of public health organizations, and the politics of health care in the United States.

## PAM 437 Economics of Health Policy

Spring. 3 credits. Prerequisite: ECON 101 or equivalent. S-U grades optional. K. Simon. Uses the economic tools of policy analysis to understand the health care system and critically evaluate current policy debates. In the past decade, some of the most controversial policies considered by state and federal governments have involved issues that have been studied by health economists and health services researchers. PAM 437 uses the United States as its main institutional framework, but also pays attention to health care topics of international concern, particularly through the group projects in the second half of the semester.

## PAM 440 Critical Perspectives

Fall. 3 credits. J. Allen. This course presents an overview of different perspectives on U.S. social policies and programs with an emphasis on health, welfare, family, and consumer issues. Historical, political, social science and personal perspectives are contrasted. Students are gain knowledge about the social policy and program topics presented in the course, critically analyze them using conceptual frameworks presented in class, and evaluate policy debates by applying these insights.

#### PAM 444 Violence Against Women: Policy Implications and Global Perspectives

Spring. 3 credits. A. Parrot. Violence is committed against women worldwide at an alarming rate. This course focuses on the historical and current reasons for and impact of violence against women both domestically and internationally. The impact of legislative, public, social, or religious policies on the incidence of such violence is considered. Violence against women is committed to protect women's virginity, because women are viewed as property, for political reasons, as hate crimes, and in the name of culture, religion, and tradition. The types of violence discussed in this course include: rape, child sexual abuse, homicide, battering, hate crimes, gay bashing, kidnapping, ethnic cleansing, war crimes, forced prostitution, female genital mutilation, honor killings, public beating, lashing, stoning, torture, female infanticide, trafficking of women, forced abortions, acid attacks, and sati (self -immolation). Each student is required to evaluate the impact of one current policy and critique the potential value of one pending policy relating to violence against women.

#### [PAM 454 Contemporary Issues in Human Sexuality and Research

Spring. 4 credits. Permission of instructor required. Not offered 2002–2003. A. Parrot.]

#### PAM 473 Social Policy

Spring. 3 credits. Prerequisites: GOVT 111 or SOC (R SOC) 105 or permission of the instructor. S.U. grades optional. L. Allen

instructor. S-U grades optional. J. Allen. An examination of the policy-making process and the significance of national policies as they affect the distribution of resources and services. Several analytic frameworks are used for evaluating social programs and service delivery systems. Implications for change and the significance of current competing policy priorities at the national, state and local levels are discussed. Students observe and analyze a policy-making board.

#### **PAM 499 Honors Program** Fall or spring.

The honors program provides students with the opportunity to undertake basic or applied research which will be preparation of a thesis representing original work of publishable quality. The program is intended for students who desire the opportunity to extend their interests and efforts beyond the current course offerings in the department. Furthermore, the program is designed to offer the student the opportunity to work closely with a professor on a topic of interest. PAM majors doing an honors program may take PAM 499 for up to 15 credits. See Professor Alan Mathios for more details.

#### PAM 547 Microeconomics for Management and Policy

Spring. 4 credits. S-U grades optional. D. Kenkel.

This course introduces microeconomic theory and its application to decision making in the management and policy arenas. Special emphasis is placed on the economic environment of health care organizations and the problems faced by managers in this environment.

### PAM 552 Health Care Services:

**Consumer and Ethical Perspectives** Fall. 3–4 credits. Limited to 30 students; undergraduates with permission of instructor. 4-credit option, may be used as Biology and Society Senior Seminar option. A. Parrot.

The course focuses on consumer and ethical issues faced by the health care field today. Broad topics to be discussed include ethical standards and guidelines, health care costs and accessibility of services, government role in health care delivery, health care as a right or privilege, private industry role in health care, services for the medically indigent and elderly, practitioner burnout and training, ethics of transplant surgery and funding, reproductive technology, AIDS research and funding, animals in medical research, right to die, and baby and granny Doe cases.

#### [PAM 553 Health Economics and Policy

Spring. 3 credits. Prerequisites PAM 604. ECON 609 or permission of instructor. S-U grades optional. Not offered 2002–2003. D. Kenkel.]

#### [PAM 554 Legal Aspects of Health Care

Spring. 3 credits. Prerequisites: PAM 557 or permission of instructor. Taught in alternate years. H. Allen.

This course introduces principles of the law that are specifically applicable to healthservice delivery. Topics considered include: the liability of hospitals and their staff and personnel for injuries to patients; medical records and disclosure of information; consent to medical and surgical procedures; responsibility for patients' personal property; collection of bills; medical staff privileges; and confidential communications.]

#### [PAM 556 Managed Care

Fall. 3 credits. Prerequisite: PAM 557 or permission of instructor. Not offered 2002– 2003. J. Kuder.

Managed Care models (HMOs, PPOs, and POSs, etc.) now dominate health insurance/ financing in the United States and influence every aspect of health care delivery. This course explores the development of Managed Care as a insurance device, a care delivery system, and a public policy product. We study the unique problems that managed care firms face in the market, the problems they present for others, and the options for resolving these issues. The perspective for looking at managed care shifts throughout the course and includes managed care management, health care providers (largely hospitals and physicians), patients, and public policy. Recent evaluations and developments in management and policy are emphasized.]

#### PAM 557 Health Care Organization

Fall. 3 credits. Limited to 30 students. Priority given to Sloan students or

permission of the instructor. R. Battistella. The course provides an introduction at the graduate level to the organization of health providers in the United States, the interrelationships of health services and the major sources and methods of paying for care. The course describes how health services are structured in the United States and how these different services interrelate along the continuum of care. The course describes and analyzes organization, delivery, and financing issues from a variety of perspectives using specific performance criteria (e.g., equity, quality, efficiency). Innovations by the public and private sectors in the delivery and reimbursement of health care are also presented.

#### PAM 558 Field Studies in Health Administration and Planning

Fall or spring. 1–4 credits. Staff. Students interested in developing administrative and program-planning research skills are given an opportunity to evaluate an ongoing phase of health care agency activity in the light of sound administrative practice and principles of good medical care. In planning and carrying out the research, students work closely with a skilled practicing administrator and with members of the faculty.

#### PAM 559 Epidemiology, Clinical Medicine, and Management Interface Issues

Spring. 3 credits. E. Rodriguez. From an empirical and analytical framework this course explores the relationships between epidemiology, clinical medicine, and management. The course reviews the epidemiology, policy issues, and treatment of selected diagnoses accounting for a significant percentage of utilization and cost of health

care services. In addition, students have an opportunity to explore issues of resource allocation and continuous quality improvement. The format for the class is lecture, discussion, and case analysis.

#### [PAM 560 Quality in Health Care Organizations

Fall. 3 credits. Not offered 2002-2003. Staff.]

## [PAM 561 Economics of Health and

**Medical Care** Spring. 3 credits. Not offered 2002-2003. J. Schultz.]

#### PAM 562 Health Care Financial Management I

Fall. 3 credits. Staff.

The course is designed to give graduate students an intensive introduction to the issues and techniques in the financial management of health service organizations. Class lectures, readings, guest speakers, problems, case studies, and research for term paper/projects will all be used to demonstrate important points, which will be reinforced by examples and applications. The course emphasizes the internal financial management knowledge and skill necessary for financial success in complex health organizations.

#### PAM 563 Health Care Financial Management II: Payment Systems and Decision-Making

Fall. 3 credits. Prerequisite: PAM 562 or other financial management course. I Kuder

Designed to strengthen student's abilities to use the tools of financial management in guiding strategic decisions made in the health services sector. The class does this by 1) expanding and deepening the students knowledge and skills in general financial management and financial risk management, 2) describing and examining the unique features of the health care industry that make both the problems, the problem solving process, and the solutions different (especially important is a complete understanding of the effects of alternative payment systems, 3) emphasizing the development of skills in decision-making under conditions of uncertainty, and 4) using the knowledge and skills to analyze real world situations, make and defend decisions, and understand the risks involved with each decision their consequences and approaches to their management.

#### PAM 564 Information Resources **Management in Health Organizations**

Spring. 3 credits. Recommended: strong basic computer skills. S-U grades optional. L. O'Neill.

Students are expected to have basic computer skills upon entry into the course. This course is a graduate course in Health Services Administration. Students are exposed to the opportunities and challenges inherent in the use of health management information systems (HMISs) in clinical and nonclinical applications. The course focuses on the manager's role in the application of HMISs to solve problems and address concerns in today's health care service industry. Students learn how an HMIS can enhance the ability to appraise multiclinical and nonclinical services of care.

#### PAM 565 Managing Health and Human Service Organizations |

Fall. 1 credit. D. Tobias. This is the first segment of a six-credit sequence addressing the management and leadership of health and human services organizations. Different perspectives are examined, from that of the first-line supervision to the CEO level. This course begins with a study of the basics of managementcommunications, motivation, change management, leadership, human resources, organizational design issues, and labor relations. It then looks at the development of technical skills in the areas of problem solving, decision making, productivity measurement, resource allocation and performance measurement. The course is taught with an applied focus and utilizes a case study approach.

#### PAM 566 Strategic Management and **Organizational Design of Health Care** Systems

3 credits. Prerequisite: PAM 565. Staff. This is the second segment of a six-credit sequence in the management and leadership of health and human services organizations. This course concentrates on strategy issues, marketing, organizational culture issues, development of mission, the management of professionals, and studies the importance of roles, structure, and inter- and intra-institutional relationships within these organizations. The course is taught via a case study approach.

## PAM 567 Health and Welfare Policy

Fall. 3 credits. J. Schultz. This course addresses major health policy issues and the critical processes that influence them. It focuses primarily on the United States, with some coverage of health policy in other countries. Topics discussed include: Medicare, Medicaid, the uninsured, public health, the effect of welfare policy on health care, managed care development and regulation, state and federal health care reform, and many others. The course analyzes the politics of health policy in terms of legislative and executive processes; the forces involved including economic, social, ethical and political factors; and key players in health policy, such as special interest groups, lobbyists, public agencies, the press, elected officials, and legislative staff.

#### PAM 568 Long-Term Care and the Aged: **Alternative Health and Social** Service Delivery Systems

Spring. 3 credits. Prerequisite: PAM 557. R. Battistella.

Alternatives for the organization and delivery of long-term care services are examined within the context of public-financing constraints. Progressive long-term care is viewed as a continuum encompassing medical and social services positioned to optimize independent living. Relevant experience from other highly developed countries is presented. Visiting speakers from the public and private sectors are featured. Field trips provide additional insights into the many challenges and opportunities of long-term care policy and management.

#### PAM 569 Regression Analysis and **Managerial Forecasting**

Fall. 3 credits. Prerequisite: at least one statistics course. L. O'Neill.

This course teaches various statistical methods for managerial decision making, with a particular emphasis on regression and forecasting. Other topics include: ANOVA, correlation, confounding, interaction, and statistical process control. Applications to health care organizations are emphasized.

#### PAM 570 Health Care Accounting Fall, 4 credits, N. Roufaiel,

This is a core course for students in Sloan Graduate Program, Master in Health Care Administration. The course introduces the basic concepts of financial and managerial accounting with emphasis on health care applications. The course explains the measurement system of business operations. business valuation, financial reporting, budgeting, cost allocation, service and product costing, and special reports for managerial use. Ethical and international issues are integrated throughout the course materials with real world applications. At the conclusion of the course, students should be able to read. understand, and analyze the annual financial reports of an organization. Collaborative learning, cases, discussions, readings, researches, presentation, speakers, problem solving, videotapes, and lectures are used as teaching pedagogy.

#### PAM 600 Special Problems for Graduate Students

Fall and spring. Credits to be arranged. S-U grades optional. Staff.

Independent advanced work by graduate students recommended by their chair and approved by the department chair and the instructor.

## PAM 601 Policy Process and Theory

Fall. 3 credits. R. Swisher. This course introduces students to the policy process model, of goal setting and problem formulation, identification of policy alternatives, cost-benefit analysis and policy selection, implementation, monitoring, and feedback. At each stage, we read and discuss theoretical contributions from across the social sciences and political philosophy, that help to contextualize and "socially embed" this mainstream, micro-economics driven model. Such contributions include: notions of bounded-rationality, satisficing, incremental-ism, and muddling-through from organizational behavior; heuristics and biases from social psychology; theories of justice from political philosophy; habitus and other pragmatic logics from anthropology; and concepts such as bureaucracy, power, status, symbolic interaction, and social learning from sociology and psychology.

#### PAM 602 Measurement and Validity in **Policy Analysis and Management**

Spring. 3 credits. E. Rodriguez. This course provides an introduction to the theoretical foundations of validity in applied social research, basic probabilistic and nonprobabilistic sampling methods, survey research methods (including questionnaires, interviews, and scaling), and other practical inquiry methods are required for valid inferences.

#### PAM 603 Experimental, Quasi-Experimental, and Economic Evaluation Methods

Spring. 3 credits. Strongly recommended: background in statistics (e.g., BTRY 601 or equivalent) and micro-economics (e.g., PAM 200, PAM 547 or ECON 639). E. Peters.

Focuses on quantitative methods of policy analysis and program evaluation, with an emphasis on those programs and policies that are related to health, family, and consumer issues. The first part of the course covers experimental design and methods of making causal inferences from non-experimental data. The second part of the course covers benefitcost analysis, explicitly incorporating both equity and efficiency considerations. Throughout the course attention is paid to the role of economic modeling in program evaluation, including the role of structural theoretical models and general equilibrium analysis.

#### [PAM 604 Qualitative and Mixed-Method Approaches to Policy Analysis and Management

Spring. 3 credits. Not offered 2002–2003. Staff.

This course introduces qualitative traditions of social inquiry and their roles in policy analysis and management. The course also addresses visions of and strategies for mixing different inquiry traditions and approaches in applied policy analysis and management.]

#### PAM 605 Economics of Household Behavior

Fall. 3 credits. Prerequisite: PAM 604 or ECON 609–610 or consent of instructor. S-U grades optional. E. Peters.

This course examines household decision making in both single agent and multiple agent (e.g., game theoretic or bargaining) frameworks. The first half of the course focuses on: (1) fertility; (2) household production; (3) and time allocation models of behavior-decisions that are usually modeled in a single-agent framework. The second half of the course looks at: (1) marriage markets; (2) family formation and dissolution; (3) bargaining models of resource allocation within the household; (4) and intergenerational transfers across households. These kinds of behaviors are more fruitfully studied using multiple agent models such as contract theory, game theory, and household bargaining. Empirical applications of the theoretical models are presented for both developed and developing countries. Implications for family policies such as child care subsidies, divorce laws, family planning, government subsidies to education, and social security are also discussed. Much of the material covered by this course could also be found in economic demography and economics of the family courses

#### PAM 606 Demographic Techniques (also R SOC 608)

Fall. 3 credits. S-U grades optional. Staff. This course provides an introduction to the methods, measures, and data used in the analysis of human populations. Topics include demographic rates, life-table analysis, cohort versus period analysis, sources and quality of demographic data, population estimation and projection, and stable population models.

#### PAM 608 Economics of Consumer Demand (also AEM 670)

Fall. 3 credits. Prerequisite: PAM 200, ECON 313, or concurrent enrollment in one of the 2, and 2 semesters of calculus. S-U grades optional. C. Ranney.

A graduate level introduction to theory and empirical research on household demand, consumption, and saving. Emphasis is on the use of the theory in empirical research. Topics include neo-classical theory of demand, duality, complete demand systems, conditional demand, demographic scaling and translating, consumption, and savings. Becker and Lancaster models of demand are introduced.

#### PAM 611 Social Demography

Fall. 3 credits. Prerequisites: STBTRY 601, SOC 505, or equivalent. K. Joyner. This course considers demographic behavior from a sociological perspective. Topics include fertility, cohabitation, marriage, divorce, inequality, immigration, and health. Close attention is paid to the effects of social policies on demographic behavior. To a lesser extent, this course addresses the effects of social policies and demographic behavior on individual well-being. Although a background in demographic methods is not required, some of the assigned articles are based on these methods.

#### [PAM 616 Strategies for Policy and Program Evaluation

Fall. 3 credits. Prerequisites: PAM 612 and 613 or 617 or equivalent. Not offered 2002–2003. W. Trochim.]

#### PAM 632 The Intergovernmental System: Analysis of Current Policy Issues

Fall. 3 credits. Open to seniors who have had a course in American government and to graduate students. J. Ziegler.

This course offers advanced policy analysis of current political/social/economic issues in the context of the intergovernmental system. Particular attention is paid to how certain policy and human service issues are played out at the federal, state, and local levels of government, and to the formulation of federal and state budget policy. General public administration theory is considered. Students work in teams on a policy/administrative research project and report to the class.

#### PAM 639 Graduate Microeconomics for Policy Analysis

Spring. 3 credits. Prerequisites: Principles of Economics, Calculus. Priority given to Ph.D. students, undergraduates welcome with permission of the instructor. L. Cawley.

The goal of this course is to train graduate students in the use of the tools of microeconomics in order to prepare them to conduct high quality research in the social sciences. This comprehensive course covers microeconomic theory and its application to public policy analysis. Topics addressed include consumer decision-making, the theory of the firm, general equilibrium, welfare economics, monopolies and oligopolies, strategy, and market imperfections.

#### [PAM 718 Advanced Seminar in Program Evaluation

Fall, spring. 1–3 credits. S-U grades optional. Prerequisite: permission of instructor. Not offered 2002–2003. Staff.]

#### PAM 742 Applied Econometrics II (also ILRLE 742)

Spring. 4 credits. S-U or letter grades. J. Butler.

Course covers statistical methods for models in which the dependent variable is not continuous. Covers: models for dichotomous response (including probit and logit); polychotomous response (including ordered response and multinomial logit); various types of censoring and truncation (e.g. the response variable is only observed when it is greater than a threshold); and sample selection issues. Course includes an introduction to duration analysis. Covers not only the statistical issues but also the links between behavioral theories in the social sciences and the specification of the statistical model.

#### PAM 760 Challenges and Trends in the Health Services Industry

Fall and spring. 1 credit. S-U grades only. Staff.

The goal of the course is to provide students with information and exposure to current and emerging issues in the health services industry. Topics may include such matters as: financial management of health care facilities, human resource management, information systems, cost effective clinical decision making, quality measurement and outcomes, public health, and entrepreneurship in the health services industry.

#### **PAM 799 MPS Problem Solving Project** Fall or spring. Credits to be arranged. For students recommended by their chair and approved by the instructor in charge of independent advanced work. S-U grades optional.

- **PAM 899 Master's Thesis and Research** Fall and spring. Credit to be arranged. Prerequisite: permission of the chair of the graduate committee and the instructor. S-U grades optional.
- **PAM 999 Doctoral Thesis and Research** Fall and spring. Credit to be arranged. Prerequisite: permission of the chair of the graduate committee and the instructor. S-U grades optional.

## **TEXTILES AND APPAREL**

A. Lemley, chair; C. C. Chu, director of graduate studies; A. Racine, director of undergraduate studies; S. Ashdown, C. Coffman, C. Jirousek, V. D. Lewis, S. Loker, A. Netravali, S. K. Obendorf

Note: Class meeting times are accurate at the time of publication. If changes are necessary, the department will provide new information as soon as possible.

#### TXA 114 Introduction to Computer-Aided Design

Fall and summer. 3 credits. Priority given to TXA students. Not open to those who have taken or are currently enrolled in DEA 115 and 203. Minimum cost of materials \$60; lab fee \$15. S-U grades optional. Fall, T or R 1:25–4:25. A. Racine.

A studio course that explores the creative potential of microcomputers. The AutoCAD software program is used as a design tool for generating a wide variety of visual images. Basic Photoshop software commands are introduced to enhance AutoCAD drawings. Daily hands-on demonstrations and studio work. Students develop two-dimensional designs based on historical, cultural, and museum sources for portfolios and display.

#### TXA 117 Drawing the Clothed Figure

Spring. 3 credits. Enrollment limited to 21 students. Prerequisite: a basic drawing course. Priority given to apparel design students. Letter grades only. Minimum cost of supplies \$125.00. Lab fee: \$30. T R 10:10–1:10. V. D. Lewis.

The goal of this course is to improve a student's capacity to communicate apparel design ideas visually by drawing clothing on the human body. Emphasis is placed on development of techniques used to express the human body, materials, and clothing designs quickly and clearly in working sketches and to present clothing designs in finished renderings.

#### TXA 125 Art, Design, and Visual Thinking

Fall. 3 credits. S-U grades optional. Lecs M W F 12:20–1:10. C. Jirousek.

An introduction to the visual arts and design that explores aesthetic and cross-cultural dimensions of visual experience. Augmented by slide presentations, artifacts, video, and an Internet-based electronic textbook, lectures emphasize the varieties of visual expression seen in works of art and design. Social, cultural, and historic interpretations of visual expression are discussed.

## TXA 135 Fibers, Fabrics, and Finishes

Spring. 3 credits. S-U grades optional. Lecs M W F 9:05–9:55. Staff.

An introduction to fibers, fibrous materials, and dyes and finishes. Special emphasis is given to the use of fibrous materials in apparel, residential and contract interiors, and industrial applications. Topics covered include fiber properties, fabric structure, coloration of fibrous materials, dimensional stability, flammability, product specifications, and performance standards.

## TXA 145 Introduction to Apparel Design

Spring. 4 credits. Limited to 36 students with 18 students per lab section; priority given to TXA students, and students transferring into TXA; not open to seniors outside of TXA. Letter grades only. Apparel design majors should take course during the first year. Minimum cost of materials, \$140. Lec T 1:25–4:25 and lab F 10:10– 12:05 or lec R 1:25–4:25 and lab F 12:20– 2:15. A. Racine.

Intensive study of principles and processes of flat-pattern design with emphasis on creative expression in children's apparel. Students develop an understanding of the techniques needed to produce apparel from sketches, including patternmaking and garment assembly.

#### TXA 225 Color and Surface Design of Textiles

Fall. 4 credits. Limited to 20 students. Recommended: TXA 114 and TXA 135. Minimum cost of other materials, \$100; lab fee, \$75. Preference given to TXA majors. T R 1:25-4:25. C. Jirousek.

Studio experience in the surface design of textiles combined with exercises in color theory. Textile projects use techniques such as block printing, shibori, batik, silk painting, silk screen, and stitchery to produce a portfolio of textile designs. Studio work is augmented by lectures on pattern and color theory illustrated by slides and textile examples.

#### TXA 237 Structural Fabric Design

Fall. 3 credits. S-U grades optional. Prerequisite: TXA 135. Recommended: college algebra. Lecs M W F 9:05–9:55. Staff.

This course covers the elements of technical fabric design with an emphasis on woven and knitted fabrics. Topics include structure of woven and knitted fabrics, openness, manufacturability, equivalence, and color effects.

## TXA 264 Draping

Fall. 4 credits. Limited to 30 students; 15 in each lab. Prerequisite: TXA 125 and TXA 145; one drawing course recommended. Minimum cost of materials, \$125; lab fee, \$10. Lec 01 M 2:55–4:10; lab 01 W 1:25–

4:25; lab 02 F 10:10–1:10. S. Ashdown. This studio course examines the process of creating a three-dimensional garment from the two-dimensional fabric. The principles and processes of draping, advanced flat pattern making, and fitting are studied through projects. Drawing exercises focus on the communication of three-dimensional garments in two-dimensional sketches. Assigned problems require the students to make judgments regarding the design process, the nature of materials, body structure, function, and fashion.

#### TXA 269 Style, Fashion, and the Apparel Industry

Spring (first 7 weeks of semester). 2 credits. Limited to 40 students. Recommended: TXA 125 and TXA 135. Not open to freshmen, S-U grades optional. Lec M W 2:30–4:25. A. Racine.

Illustrated lectures focus on changes in the U.S. apparel industry and fashion from the nineteenth century to the present day due to social forces, technological developments, and shifting demographics. The Cornell Costume Collection is used for discussion. Students write a term paper on issues relating to the fashion industry.

#### TXA 275 Photoshop for Portfolio Presentations in Textiles and Apparel

Spring (first 7 weeks of semester). 2 credits. Limited to 25 students. Prerequisite: TXA 114, TXA 217, or TXA 225. Course fee covering CAD lab color

printing, \$15.00. T R 1:25–4:25. C. Jirousek. This course explores the use of Adobe Photoshop as a tool for portfolio development in textile and apparel design. Building on studio work produced in other courses, students learn the basics of Photoshop and create a design line for a formal portfolio that involves textile design applied to either apparel or home furnishings use.

#### TXA 300 Special Studies for Undergraduates

Fall or spring, Credit to be arranged. Staff. Special arrangement for course work to establish equivalency for courses not transferred from a previous major or institution. Students prepare a multicopy description of the study they want to undertake on a form available from the College Registrar's Office. The form, signed by both the instructor directing the study and the department chair, is filed at course registration or during the change-of-registration period.

#### TXA 331 Apparel Production and Management

Spring. 3 credits. Enrollment limited to 40 students. Prerequisites: ECON 101 and 102 and an upper-division course in either appared or textile. TP 255, 4:10, S. Loker

apparel or textiles. T R 2:55–4:10. S. Loker. This course presents an introduction to the global textile and apparel industry, particularly the technical and economic aspects of apparel production. It includes analysis of specific apparel manufacturing and management issues such as international sourcing, Quick Response, mass customization, production and information technology, labor, and logistics.

#### TXA 332 Designers as Entrepreneurs

Spring. 1 credit. Enrollment limited to 40 students. Prerequisite: any design course.

S-U grade optional. W 12:20–1:10. S. Loker. This course presents issues that are critical to designers who are entrepreneurs, such as product development and maintenance; sourcing materials, assembly, and other services; copyright, trademark, and patents; branding and licensing; mass customization; distribution options including e-commerce; and social responsibility in business. The course draws extensively on guest speakers and case studies.

#### TXA 335 Fiber Science

Spring. 3 credits. Limited to 20 students. Prerequisites: college chemistry and physics. Lecs T R 1:25–2:15. Lab T 2:30– 4:25. A. Netravali.

This course covers fibers commonly used in various engineering, medical, and apparel applications. Topics include the nature of polymer molecules, the chemical structure of organic fibers, inorganic fibers, micro-macro structure of fibers, fiber dimensions, environmental effects, and mechanical, optical, thermal, and frictional properties of fibers. The following fiber uses are discussed: composites in aerospace and other structural components, circuit boards, bulletproof vests, sutures, artificial arteries, geotextiles, sporting goods, and others.

#### [TXA 336 Fundamentals of Color and Dyeing

Fall. 3–4 credits. 3 credits for lecture only; 4 credits for lecture and lab. Prerequisite: college Natural Science Requirements. Fiber science students are required to take the lab. Lab fee, \$15. Lecs M W F; lab M. Not offered 2002–2003. C. C. Chu.

Color is extremely important and useful in daily life. This course emphasizes theories and scientific principles of color, providing a framework for the use of color in design, marketing, or research. How colorants are used to dye fabrics is addressed. Although fabrics are chiefly used to illustrate color in the class, much of the information and knowledge is useful to nontextile majors. Guest lecturers from the industry address the practical aspects of color in business.]

#### TXA 346 Apparel Design Process and Pattern Development

Spring. 4 credits. Enrollment limited to 30. Prerequisite: TXA 135 and TXA 145. Letter grades only. Minimum cost of materials, \$125; lab fee, \$10. M W 1:25–4:25. V. D. Lewis.

This course provides an exposition of the methods used by a creative fashion designer. The course aims to develop each student's personal handwriting as a designer. This is done by uniting a provocative design issue with the requirement of functionality. In satisfying their ideas students discuss, adapt, and experiment with garment design techniques for new and original effect. On completion of the course students should be in possession of a portfolio consisting of at least 15 finished pieces of work which include development sheets, illustrations, design drawings, work sheets, and photographs of finished garments, and a sketchbook which documents their ideas through the course.

## TXA 368 Computer-Aided Apparel Design

Fall. 3 credits. Prerequisite: TXA 114, TXA 145. Pre or co-requisite: TXA 264. Minimum cost of materials, \$60. M W 10:10–12:05. A. Racine.

A team-based studio course in which a finished line of apparel is completed with patterns, sketches, flat drawings, and cost sheets created on the computer. This is an appropriate product development course for management students who have taken TXA 114 and TXA 145.

#### TXA 400-401-402-403 Special Independent Studies for Undergraduates

Fall, summer, or spring. Credits to be arranged. S-U grades optional. Staff. For advanced independent study by an individual student or for study on an experimental basis with a group of students in a field of TXA not otherwise provided through course work in the department or elsewhere at the university. Students prepare a multicopy description of the study they want to undertake on a form available from the department office. This form must be signed by the instructor directing the study and the department chair and filed at course registration or within the change-of-registration period after registration along with an add/ drop slip in 145 MVR, College Registrar Office. To ensure review before the close of the course registration or change-of-registration period, early submission of the special-studies form to the department chair is necessary. Students, in consultation with their supervisor, should register for one of the following subdivisions of independent study.

**TXA 400: Directed Readings.** For study that predominantly involves library research and independent reading.

**TXA 401: Empirical Research**. For study that predominantly involves data collection and analysis, or laboratory or studio projects.

**TXA 402: Supervised Fieldwork**. S-U only. For study that involves both responsible participation in a community setting and reflection on that experience through discussion, reading, and writing. Academic credit is awarded for this integration of theory and practice.

**TXA 403: Teaching Apprenticeships**. Fall or spring. 2–4 credits. Prerequisites: student must have upperclass standing, have demonstrated a high level of performance in the subject to be taught and in the overall academic program, and have permission of the instructor and the department chair. S-U grades optional. Staff. Apprenticeship includes both a study of teaching methods in the field and assisting the faculty with instruction.

#### TXA 432 Product Quality Assessment

Spring. 3 credits. Enrollment limited to 36 in lecture and 18 in each lab section. Prerequisites: TXA 135 and Statistics. Lab fee, \$15. Lecs M W 11:15–12:05; lab M or W 2:30–4:25. N. Breen.

This course covers evaluation of fibers, yarns, fabrics, and garments, with emphases on the meaning of standards. testing philosophy, quality control, and statistical analysis. Day-today tests done in textile and apparel industry are discussed. Laboratory sections introduce students to various test methods, data generation for analysis, and evaluation.

#### [TXA 436 Fiber Chemistry

Spring. 3 credits. S-U grade optional. Senior and first-year graduate students. Lecs M W F. Offered alternate years. Not offered 2002–2003. C. C. Chu.

The chemical and physical structure of several commercially important fibers, such as cotton, wool, silk, polyesters, nylons, acrylics, polyolefins and spandex, and their polymerization process are discussed. The general chemical and physical properties of each are given. Degradation reactions for certain fibers such as polyolefins and acrylics are discussed.]

#### TXA 439 Biomedical Materials and Devices for Human Body Repair

Spring. 2–3 credits. 2 credits meets T only; 3 credits meets T and R. S-U grades only for 2 credits, letter grades only for 3 credits. Juniors and seniors only. Prerequisites: college Natural Science requirement. (Chem. or Biol.). T R 1:25–2:40. C. C. Chu.

Survey of materials and devices for repair of injured, diseased, or aged human tissues/ organs. It includes properties of synthetic and biological materials, wound healing processes, medical devices for repair of wounds, blood vessels, hearts, joints, bones, nerves, male impotence, vision/hearing/voice, and drug control/release.

#### TXA 444 Apparel/Textile Retailing and Distribution

Fall. 3 credits. S-U grades optional. Juniors and seniors only. Prerequisite: TXA 135, TXA 331, and a marketing course. Lec T R 10:10–11:25. N. Breen.

This course provides an overview of the business of design, production, distribution, marketing, and merchandising of apparel and related products from a management perspective. The organization and structure of both domestic and international retailers is included along with pricing strategies, merchandise planning, inventory management, and sales promotion. New uses of computer systems and information technologies are emphasized throughout.

#### TXA 465 Apparel Design: Product Development

Fall. 3 credits. Prerequisites: minimum of 2 drawing or art courses, TXA 264, TXA 368, and TXA 225 or permission of instructor. Minimum cost of materials, \$250; lab fee, \$10, T, P10,10,1205; S. Ashdonzi, S. Ashdonzi, S. Ashdonzi, S. Standar, S. S

\$10. T R 10:10–12:05. S. Ashdown. Through studio problems in apparel design, students examine the influence of manufacturing technology and cost on apparel products. Garments are developed to various stages from sketches to finished samples. Sketching exercises explore the relationship between technical drawing and illustration. Some portfolio development included.

#### TXA 470 Fashion Presentation: Portfolio Development

Fall. 3 credits. Prerequisites: TXA 117, TXA 264, and TXA 346. Pre- or co-requisite: TXA 368. Enrollment limited to 20. T R 2:30–4:25. V. D. Lewis.

The purpose of this course is to provide students with an understanding of presenta-

tion methods currently used by fashion designers, runway illustrative journalists, forecasting artists and fashion editorial illustrators. Skills in fashion illustration, image manipulation and photography are developed. To satisfy personal philosophies of fashion, students discover and adopt current presentation techniques with new and original effects. Students create fashion presentation boards, worksheets, and organize portfolios for inspection by industry professionals. (Course may include an optional field trip to New York City.)

#### TXA 499 Honors Thesis Research

Fall and spring. 1–6 credits (maximum 6 credits for graduation). S-U grades optional. Prerequisite: TXA students who have been admitted to college honors program. Staff.

Independent research leading to the honors thesis. College honors program guidelines are to be followed.

#### TXA 600 Special Problems for Graduate Students

Fall or spring. Credit to be arranged. S-U grades optional. Staff.

Independent advanced work by graduate students recommended by their chair and approved by the department chair and instructor.

#### TXA 620 Physical Properties of Fiber-Forming Polymers and Fibers

Spring. 3 credits. Prerequisite: permission of instructor. Offered alternate years. T R 2:30–3:45. A. Netravali.

Formation and properties of fiber-forming polymers, rubbery, glassy, and crystalline states and their interconnection. Fiber structure, relationship between chemical structure and physical properties of manufactured and natural fibers, mechanical, thermal, and viscoelastic properties of fibers and testing methods will be discussed.

#### TXA 626 The Chemistry of Textile Finishes and Dyeing

Spring, 3 credits. S-U optional. Prerequisites: TXA 336 or equivalent and organic chemistry, or permission of instructor. Offered alternate years. M W F 10:10– 11:00. C. C. Chu.

Chemical aspects of textiles with emphasis on finishes and dyeing are discussed. Industrially important textile chemicals used for dyeing and enhancing fiber and fabric properties, such as durable press, anti-soiling, water repellency are studied. The emphasis is on the correlation of the observed effect with chemical structure, end-use influences, interaction with fabric and fibers, sources, and synthetic routes. The environmental effect of these textile chemicals and current federal regulation is briefly discussed.

#### TXA 637 Research Seminars in Apparel Design

Fall and spring. 1 credit; S-U only; repeat of course each semester is encouraged for all apparel design graduate students. Available to advanced undergraduate students with permission of individual instructor. Apparel Design faculty.

#### [TXA 639 Mechanics of Fibrous Assemblies

Fall. 3 credits. Prerequisite: solid mechanics or permission of instructor. Offered alternate years. M W F. Not offered 2002– 2003. Staff.

A study of the mechanics of fiber assemblies: idealized yarn and fabric models; statistical bundle theories; deformation of yarns and fabrics in tensile, shear, and compressive stress; bending and buckling; and the mechanical behavior of nonwoven textile materials ]

#### [TXA 664 Human Factors: **Anthropometrics and Apparel**

- Spring (even-numbered years). 3 credits. S-U grades optional. Prerequisites: course in statistics and permission of instructor.
- Open to advanced undergraduates. Offered alternate years. Not offered 2002-

2003. T R. S. Ashdown. Seminar course focusing on the human form and its relationship to clothing. Includes discussion of quantification of body sizes and human variation; historical, cultural, and aesthetic concepts of fit; apparel sizing techniques; national and international sizing systems and standards; impact of sizing systems on various populations (elderly, handicapped, etc.).]

#### TXA 675 Aesthetics and Meaning in **World Dress**

Spring. 3 credits; S-U grades optional. Prerequisites: TXA 125 or course in history of art, costume history, or other history. Offered alternate years. T R 10:10-12:05. C. Jirousek.

An examination of the aesthetic and social/ psychological relationship between body and clothing in the context of various cultures. Students develop a research topic to be presented orally and in a term paper, and they participate in the development of an exhibition.

#### TXA 899 Master's Thesis and Research Fall or spring. Credits to be arranged. Prerequisite: permission of the chair of the graduate committee and the instructor. S-U grades optional. Staff.

**TXA 999 Doctoral Thesis and Research** Fall or spring. Credits to be arranged. Prerequisite: permission of the chair of the graduate committee and the instructor. S-U grades optional. Staff.

## FACULTY ROSTER

- Allen, Josephine A., Ph.D., U. of Michigan. Assoc. Prof., Policy Analysis and Management
- Ashdown, Susan, Ph.D., U. of Minnesota. Assoc. Prof., Textiles and Apparel
- Avery, Rosemary J., Ph.D., Ohio State U. Prof., Policy Analysis and Management
- Battistella, Roger M., Ph.D., U. of Michigan. Prof., Policy Analysis and Management
- Becker, Franklin D., Ph.D., U. of California at Davis. Prof. and Chair, Design and **Environmental Analysis**
- Brannon, Patsy, Ph.D., Cornell U. Prof., Nutritional Sciences, Dean
- Brumberg, Joan J., Ph.D., U. of Virginia. Prof., Human Development
- Burkhauser, Richard, Ph.D., U. of Chicago. Prof. and Chair, Policy Analysis and Management
- Butler, J.S., Ph.D., Cornell U. Prof., Policy
- Analysis and Management Casasola, Marinella, Ph.D., U. of Texas, Austin. Asst. Prof., Human Development
- Cawley, John, Ph.D., U. of Chicago, Asst. Prof., Policy Analysis and Management

- Ceci, Stephen J., Ph.D., U. of Exeter (England). Prof., Human Development
- Chu, Chih-Chang, Ph.D., Florida State U. Prof., Textiles and Apparel
- Cochran, Moncrieff, Ph.D., U. of Michigan. Prof., Human Development
- Cornelius, Steven W., Ph.D., Pennsylvania State U. Assoc. Prof., Human Development
- Danko, Sheila, M.I.D., Rhode Island School of Design. Assoc. Prof., Design and Environmental Analysis
- Depue, Richard, Ph.D., U. of Oklahoma. Prof., Human Development
- Dunifon, Rachel, Ph.D., Northwestern. Asst. Prof. Policy Analysis and Management
- Eckenrode, John J., Ph.D., Tufts U. Prof. and Chair, Human Development
- Elliott, John, M.E. Des., U. of Calgary. Asst. Prof., Design and Environmental Analysis
- Eshelman, Paul E., M.F.A., U. of Illinois. Assoc. Prof., Design and Environmental Analysis
- Evans, Gary, Ph.D., U. of Massachusetts at Amherst. Prof., Design and Environmental Analysis
- Frey, Margaret, Ph.D., NC State University. Asst. Prof., Textiles and Apparel
- Garbarino, James, Ph.D., Cornell U. Prof. and Co-Director, Family Life Development Center
- Geddes, Raymond R., Ph.D., U. of Chicago. Asst. Prof., Policy Analysis and Management Gerner, Jennifer L., Ph.D., U. of Wisconsin.
- Prof., Policy Analysis and Management, Assoc. Dean Gibson, Kathleen J., M.A., Ohio State U.
- Assoc. Prof., Design and Environmental Analysis
- Greene, Katrina, Ph.D., U of Virginia. Asst. Prof., Human Development
- Hamilton, Stephen F., Ed.D., Harvard U. Prof., Human Development, Co-Director, Family Life Development Center
- Haugaard, Jeffrey, Ph.D., U. of Virginia. Assoc. Prof., Human Development
- Hazan, Cindy, Ph.D., U. of Denver. Assoc. Prof., Human Development
- Hedge, Alan, Ph.D., U. of Sheffield (England). Prof., Design and Environmental Analysis Jennings, Jan, M.S., Oklahoma State U. Assoc.
- Prof., Design and Environmental Analysis Jirousek, Charlotte, Ph.D., U. of Minnesota.
- Assoc. Prof., Textiles and Apparel Joyner, Kara, Ph.D., U. of Chicago, Asst. Prof.,
- Policy Analysis and Management
- Kenkel, Donald, Ph.D., U. of Chicago. Assoc. Prof., Policy Analysis and Management
- Koslowski, Barbara, Ed.D., Harvard U. Assoc. Prof., Human Development
- Kuder, John, Ph.D., U. of Michigan. Assoc. Prof., Policy Analysis and Management
- Laquatra, Joseph Jr., Ph.D., Cornell U. Assoc. Prof., Design and Environmental Analysis
- Lemley, Ann T., Ph.D., Cornell U. Prof. and Chair, Textiles and Apparel
- Lewis, Van Dyk, Ph.D., University of Central England, Birmingham. Asst. Prof., Textiles and Apparel
- Loker, Suzanne, Ph.D., Kansas State U. Prof., Textiles and Apparel

Christopher Haley, director, external relations John Bunge, graduate faculty representative Tove Hammer, editor, *Industrial and Labor Relations Review* 

## DEGREE PROGRAMS

Industrial and Labor Relations

B.S. M.I.L.R. M.P.S. M.S. Ph.D.

Degree

## THE SCHOOL

The School of Industrial and Labor Relations at Cornell (ILR) is a small school within a large university. It tries to maintain the smallcollege atmosphere expected of an institution that has about 750 undergraduates and approximately 150 graduate students, even as ILR students participate fully in the activites of the larger Cornell community.

ILR students study in modern, technologically advanced lecture halls, seminar rooms, and libraries.

Almost half of the school's typical freshman class comes from the greater New York City area. Another 30 percent live in other parts of New York State. Students from other states and a few from foreign countries make up the rest of the class. Women constitute about 50 percent of entering classes, and minority students comprise about 25 percent of new freshmen and transfer students.

Students enrolled in the School of Industrial and Labor Relations at Cornell may take a substantial number of courses in the other six undergraduate colleges and schools of the university, including the College of Arts and Sciences. Cornell students have access to all of the libraries and other services of the university.

The school operates in four areas: (1) resident instruction, (2) extension and public service, (3) research, and (4) publications. It provides instruction to undergraduates and graduate students who are preparing for careers in industrial and labor relations, as well as to men and women already engaged in industrial relations activities and the general public through its Extension and Public Service Division.

The school's Conference Center, part of the extension division, initiates and hosts conferences covering the full scope of industrial and labor relations. The center provides continuing education and information to practitioners and scholars.

The Research Division develops materials for resident and extension teaching and originates studies in industrial and labor relations. The Publications Division publishes and distributes the research results.

## **GRADUATE DEGREES**

More than 150 students on the Cornell campus are enrolled in graduate study in industrial and labor relations, one of the largest graduate fields in the university. Students may work toward the degrees of Master of Industrial and Labor Relations, Master of Professional Studies, Master of Science, and Doctor of Philosophy. For further information on graduate programs, contact the Graduate Office, School of Industrial and Labor Relations, Cornell University, 216 Ives Hall, Ithaca, NY 14853–3901.

## DEPARTMENTS OF INSTRUCTION

Courses in the school are organized into six departments:

## Collective Bargaining, Labor Law, and Labor History

In the study of workers, employers, and the government policies affecting them, members of this faculty concentrate on subjects of industrial and labor relations best understood by reliance on the fields of administration, economics, history, and law. Courses explore subjects within the framework of American society, stress fundamental forces of change, and analyze texts and empirical data with methods drawn from the social sciences, the humanities, and the legal professions.

#### **Human Resource Studies**

This department offers specialization in human resource studies. Human Resources focuses on employer-employee relationships and deals with such topics as human-resource planning, staffing, computer applications to personnel, personnel information systems, training, management development, performance appraisal, compensation administration, organization development, and the sociological environment of human resource management. The study of human resource policy focuses on government efforts to enhance the population's ability to be employed. Although primarily concerned with governmental measures that influence the supply of labor (for example, training, education, health, mobility, and immigration), the subject area also includes policies in private industry that relate to the demands for labor.

#### International and Comparative Labor Relations

International and Comparative Labor Relations is concerned with industrial and labor relations systems and labor markets in other parts of the world. Countries include those in Western Europe, as well as in Asia, Latin America, and South America.

#### **Labor Economics**

Labor Economics deals with labor markets: that is, the institutional arrangements, terms, and conditions under which workers supply their labor and under which firms demand their labor. Faculty members are especially concerned with understanding the workings of labor markets and the effects of various public policies. The topics dealt with in courses and research include the following: analysis of the labor force, employment and unemployment, wages and related terms of employment, income distribution, income security programs, health and safety in industry, retirement, pensions and social security, economic aspects of collective bargaining, and economic demography.

#### **Organizational Behavior**

By studying individuals, groups, single organizations, and associations or organizations, persons in the field of organizational behavior understand human behavior within organizations as well as the actions of the organizations themselves. At the individual level of analysis, courses consider motivation, leadership, attitudes, personality, group processes, organizational change, and worker participation. At the organizational level, courses examine occupations, deviance in the work place, conflict, power, organizational design, public policy regarding organizations, and industrial conflict. The department also offers courses on research methods in organizational research and general survey courses in both psychological and sociological research.

#### **Social Statistics**

Economic and social statistics includes the principles of statistical reasoning, statistical methods, and the application of statistical tools of analysis.

A full list of required and elective courses is available from the Office of Student Services, 101 Ives Hall.

## RESIDENT INSTRUCTION

This division conducts the on-campus programs leading to the degrees of Bachelor of Science, Master of Industrial and Labor Relations, Master of Professional Studies, Master of Science, and Doctor of Philosophy from Cornell.

## Office of Student Services

Staff members from the Office of Student Services, 101 Ives Hall, work closely with faculty and faculty committees to administer degree programs for the school and many of the school's support services. The office's responsibilities include the admitting and orienting of new students, maintaining students' personal and academic records, and counseling students on personal and academic problems. The office also works closely with seniors who are planning graduate study.

## **Counseling and Advising**

New students are provided advising on orientation, academic procedures, and course registration by counselors in the Office of Student Services

Each of the school's academic departments names faculty members to serve as advisers for students who wish to consult with them regarding career possibilities in the field, postgraduate programs, or similar matters. Questions or issues related to graduation requirements, course registration, and related academic procedures should be raised with counselors in the Office of Student Services.

## **Minority Programs**

Cornell University administers a variety of special opportunity programs designed to provide financial assistance and other forms of assistance to (1) minority students and (2) low-income students meeting program guidelines. The purpose of these programs is to provide access to a Cornell education for capable students who otherwise might not secure the admissions consideration, financial assistance, or supportive services necessary for their success at the university. The associate director for minority education in the Office of Student Services provides academic and personal counseling to all ILR minority students. ILR offers a variety of support services to enhance academic achievement.

## STUDY OPTIONS

Several study options are open to ILR undergraduates, making it possible to tailor a program to fit special circumstances.

One such option is the five-year ILR master's degree. With early planning, some students may earn the M.S. degree in the fifth year. Some students elect to spend a semester in New York City, Albany, or Washington, D.C., with a chance to observe actual labor problem solving as interns in congressional offices, labor organizations, personnel offices, and state and federal agencies. For more information, see "Special Academic Programs," below.

Study abroad options are also available at a number of foreign universities. Qualified students may spend a semester or a full year studying abroad.

A number of ILR courses deal directly with today's problems and involve fieldwork in the Ithaca area and elsewhere in New York State.

The ILR program allows juniors and seniors who want to conduct their own research to receive course credit for individually directed studies if the program is supervised by a faculty member.

### **Study in Absentia**

NDUSTRIAL AND LABOR RELATIONS 2002-2003

Registration in absentia enables a student to seek admission in another American institution for a semester or a year and transfer credit toward completion of the Cornell degree. This study option requires the development of a plan of study, a statement of appropriate reasons for study away from the university (e.g., availability of courses not offered at Cornell), good academic standing, approval of the plan by the director of student services, and payment of a special in absentia registration fee.

#### Leave of Absence or Withdrawal

If a student desires to withdraw or to take a leave of absence from the university, an interview should be scheduled with a counselor in the Office of Student Services. Counselors will assist students in petitioning for approval of a leave of absence and in contacting the appropriate offices or departments of the university.

## REQUIREMENTS FOR GRADUATION

To earn the Cornell Bachelor of Science degree in industrial and labor relations, the student must successfully complete 120 credits. This requires eight terms for an average of 30 credits a year although some students accelerate their studies.

## **Freshman Year**

**Fall Semester** 

Freshman Writing Seminar

Introductory Microeconomics (ECON 101)

History of American Labor: Nineteenth Century (ILRCB 100)

Introduction to Micro Organizational Behavior and Analysis: The Social Psychology of the Workplace (ILROB 170)

ILR Colloquium (ILRID 150)

Elective

#### **Spring Semester**

Freshman Writing Seminar	3
Introductory Macroeconomics 102	3
History of American Labor: Twentieth Century (ILRCB 101)	3
Introduction to Macro Organizational Behavior and Analysis (ILROB 171)	3
Elective	3
	15

Collective Bargaining (ILRCB 300)	3
Distribution: International and Comparative Labor ILRIC	3
Distribution: Upper Division Writing	3
Distribution: Science and Technology	3

ILR and General Electives

ILR Electives-30 credits (one course must be ILRIC)

Minimum of 12 credits of ILR course work including 495 (Honors), 499 (Independent Study) and approved list of courses from the LE Department.

Maximum of 12 credits from foreign languages, advanced math or other non-ILR courses as approved by ILR departments.

Maximum of 9 credits for one semester abroad or 15 credits for a full year.

Maximum of 9 credits for Internships (497: 3 credits: 498: 6 credits S-U).

General Electives-34 credit hours of which up to 22 hours may be freely elected in the university's endowed divisions

## **Elective Courses**

(71 credits)

From the courses offered by the school. students must select a minimum of 30 credits of ILR elective courses. No more than nine of these credits may be satisfied by ILR 497-498, Internships, or one semester of Study Abroad.

Undergraduates are required to select one intensive writing course (for a minimum of three credits) from a list of designated courses.

The remaining 34 credits may be selected from the courses of any other college at Cornell, but a student who takes more than 34 credits in the endowed colleges (the College of Architecture, Art, and Planning; the College of Arts and Sciences; the Johnson Graduate School of Management; the College of Engineering; and the School of Hotel Administration) must pay for each credit taken in excess of 34, whether or not the courses are passed. For the precise fee per credit, students should call the Office of the Bursar.

The number of credits that may be taken in the endowed colleges at no additional cost to the student may be changed at any time by official action of the school.

_
## ACADEMIC STANDING AND GRADES 317

## **ILR Math Requirement**

A students who took AP calculus in high school and scored a 3 or better on the AB exam or subscore of BC exam, has fulfilled the ILR math requirement. If AP calculus wasn't completed, or if the scores noted above were not achieved, you will be expected to take and pass the ILR Math Assessment before registering for required courses in Statistics and Labor Economics. The Math Assessment is based on materials covered in New York State Regents Exams for Courses 2 and 3. (Calculus is not covered in those courses.)

The ILR Math Assessment will be scheduled in August, January, and May. Those who do not pass in the first attempt will be expected to register in an appropriate math course and pass the assessment *before the beginning of their third semester* in the school. Any student who cannot meet the requirement by the beginning of the third semester will be enrolled for a terminal term and will be expected to leave the school thereafter.

Transfer students will be expected to meet the same standards in math: either present the score required by Cornell University for AP calculus (AB or BC) credit, or pass the ILR Math Assessment before being permitted to register in ILRST 210 or ILRLE 240 with a terminal semester possible after failing the assessment given at the beginning of a third semester as an ILR student.

## SCHEDULING AND ATTENDANCE

## **Schedule Changes**

Occasionally it may be necessary for a student to request changes in his or her course schedule either before a term begins or during the semester. Such requests must be directed to the Office of Student Services to avoid possible loss of academic credit.

## **Class Attendance**

It is each student's responsibility to attend all scheduled classes unless excuses have been approved by the faculty. In some courses an instructor may permit a maximum number of class absences without a grade penalty or dismissal from the course. An explanation for absence from class may occasionally be secured from the Office of Student Services in advance of the expected absence. An approved absence may be warranted by:

 participation in authorized university activities such as athletic events, dramatic productions, or debates;

- medical problems supported by a record of clinic or infirmary treatment;
- serious illness or death in the immediate family;
- 4) other circumstances beyond the student's control.

A request for explanation of an absence should, when possible, be made to the Office of Student Services before the date of expected absence. A reported and explained absence does not relieve a student from fulfillment of academic requirements during the period of absence. The course instructor has the authority to determine what work must be completed. The office can only confirm the explanation for absence. Students should inform the Office of Student Services of any problems they have meeting course requirements.

## ACADEMIC STANDING AND GRADES

## **Academic Integrity**

In 1987 the faculty of the School of Industrial and Labor Relations approved a revised code of academic integrity. This code, while based on the Cornell University code, varies somewhat.

Absolute integrity is expected of all Cornell students in all academic undertakings. They must in no way misrepresent their work, fraudulently or unfairly advance their academic status, or be a party to another student's failure to maintain academic integrity. The code specifically prohibits:

- knowingly representing the work of others as one's own;
- using or obtaining unauthorized assistance in any academic work;
- fabricating data in laboratory or field work;
- 4) giving fraudulent assistance to others;
- 5) fabricating data in support of laboratory or field work.

Full details on the applications of those prohibitions to course work, term papers, examinations, and other situations are listed in the code. Copies are available from the Office of Student Services, 101 Ives Hall.

## **Dean's List**

A Dean's List is compiled for each of the four undergraduate classes each term on the seventh day following receipt of final grades from the registrar. Eligibility for the Dean's List is determined by applying all of the following criteria:

- achievement of a term average for freshmen of 3.3 or better; for sophomores of 3.4 or better; and for juniors and seniors of 3.6 or better;
- a minimum course load for the term of 12 letter-graded credits;
- completion of all courses registered for at the beginning of the term;
- satisfaction of all good-standing requirements.

## **Academic Standing**

Good standing requires that all of the following criteria be met at the end of each term:

- an average of C- (1.7) for the semester's work, including a minimum of eight completed and letter-graded credits;
- no failing grades in any course, including physical education;
- a cumulative average of C- (1.7) for all completed terms.

If at the end of any term a student fails to maintain good standing or if overall academic performance is so marginal as to endanger the possibility of meeting school and university degree requirements, his or her record is reviewed by the Committee on Academic Standards and Scholarships. The committee may issue a written warning to the student at that time. If a student does not improve after the written warning, he or she may be denied permission to register for the next term.

# Involuntary Separation from the School for Academic Reasons

A student may be denied permission to reregister at the end of any term when he or she has failed:

- to establish good standing after a semester on warning;
- 2) to maintain an average of 1.7 in any term after a previous record of warning;
- to achieve good standing after being on warning any two previous semesters;
- 4) two or more classes in one term or has a term average of 1.0 or below.

The Academic Standards and Scholarship Committee may decide to permit a student to remain on warning more than one semester if there has been significant improvement even though the cumulative average is still below 1.7.

## **S-U Grading Policy**

An undergraduate may register to receive a final grade of S (Satisfactory) or U (Unsatisfactory) in courses that offer this option—either in the school or in other divisions of the university—subject to the following conditions:

- the S-U option may be used in ILR and in out-of-college course electives only, not in directed studies;
- students are limited to registering in *two* S-U courses a term;
- S-U registration is limited to four credits for each course;
- 4) students registering for S-U grades must be in good standing;
- 5) students must fulfill the graduation requirement of 105 letter-graded credits.

ILR faculty members assign a grade of U for any grade below C– and a grade of S for any grade of C– or better. A grade of U is considered equal to an F in determining a student's academic standing, although it is not included in the cumulative average.

No change of grading (from letter to S-U or from S-U to letter) may be made after the first three weeks of class. There are no exceptions to this restriction, and appeals will not be accepted.

## **Grades of Incomplete**

A grade of incomplete is assigned when the course has not been completed for reasons that are acceptable to the instructor. It is understood that the work will be completed later and credit given. Instructors may grant a grade of incomplete for a limited number of clearly valid reasons, but only to students with substantial equity in a course. A firm and definite agreement on the conditions under which it may be made up must be made with the instructor. The school's policy allows a maximum of two full terms of residence for removal of a grade of incomplete. If it is not made up within this time, the grade automatically becomes an F.

318

## SPECIAL ACADEMIC PROGRAMS

To meet the special academic objectives of some students, the school's faculty has established several special academic programs. For additional information, students should contact a counselor in the Office of Student Services. Counselors will explore the program with students to help them decide if it suits their interests.

# Five-Year Master of Science Degree Program

With early planning it is possible to earn the M.S. degree in a fifth year of study. This program is designed specifically for those who wish concentrated study in an area of specialization in the school for a Master of Science degree. Students considering this program should consult a counselor in the Office of Student Services after their freshman year.

## Internships

The Credit Internship Program has provided students with a vivid understanding of problems in labor and industrial relations through observation and participation in "reallife" labor problem solving. A number of selected students spend a term of their junior year in Albany, New York City, or Washington, D.C., in close contact with practitioners. Their activities include independent research under direction of ILR faculty members and seminars drawing on fieldwork experience with employers, labor organizations, and government agencies. More information about this program is available from the Office of Student Services.

## **Honors Program**

Undergraduates who are ranked in the top 20 percent of their class at the end of the junior year may propose a two-semester research project, an honors thesis, for review by the Committee on Academic Standards and Scholarships. When approved, the candidate for graduation with honors works for two semesters (for three credits in each term) to research, write, and then defend the thesis.

## Study Abroad

Cornell students with strong academic records and the necessary preparation in required and elective courses are encouraged to consider study abroad. The university currently has contact with universities in more than 40 countries that permit undergraduates to register for courses while maintaining Cornell registration and financial aid for a semester or a year. Information about those opportunities may be requested from Cornell Abroad, 474 Uris Hall.

Some study abroad programs require the development of language proficiency and preparation in appropriate courses at Cornell. Students should consult the Office of Student Services and Cornell Abroad in the freshman and sophomore years to be sure that they comply with the academic and procedural requirements for study abroad.

# COLLECTIVE BARGAINING, LABOR LAW, AND LABOR HISTORY

N. Salvatore, chair; M. Cook, J. Cowie, C. Daniel, I. DeVault, M. Gold, L. Gray, J. Gross, H. Katz, S. Kuruvilla, R. Lieberwitz, D. Lipsky, K. Stone, L. Turner

## ILRCB 100 Introduction to U.S. Labor History: Nineteenth Century

Fall. 3 credits. J. Cowie, C. Daniel, I. DeVault, N. Salvatore.

This first semster of a two-semester sequence covers the major changes in the nature of work, the workforce, and the institutions involved in industrial relations in the United States through the end of the nineteenth century.

## ILRCB 101 Introduction to U.S. Labor

**History: The Twentieth Century** Spring. 3 credits. Prerequisite: ILRCB 100. J. Cowie, C. Daniel, I. DeVault, N. Salvatore.

This second semester of a two-semester sequence covers the major changes in the nature of work, the workforce, and the institutions involved in industrial relations in the United States from the end of the nineteenth century up to the present.

## **ILRCB 201** Labor and Employment Law

Fall and one section in spring. 3 credits. M. Gold, J. Gross, R. Lieberwitz, K. Stone. A survey and analysis of the law governing labor relations and employee rights in the workplace. The first half of the course examines the legal framework in which collective bargaining takes place, including union organizational campaigns, negotiations for and enforcement of collective bargaining agreements, and the use of economic pressure. The second half of the course surveys additional issues of rights in employment, including such topics as employment discrimination, the developing law of "unjust dismissal," occupational safety and health, and union democracy. Also serves as an introduction to judicial and administrative systems.

## ILRCB 300 Collective Bargaining (200)

Fall and spring. 3 credits. M. Cook,

H. Katz, S. Kuruvilla, L. Turner. A comprehensive introduction to industrial relations and collective bargaining in the United States; the negotiation, scope, and dayto-day administration of contracts; the major substantive issues in bargaining, including their implication for public policy; industrial conflict; the major challenges facing unions and employers today; U.S. industrial relations in international and comparative perspective.

#### ILRCB 301 Labor Union Administration Fall, 3 credits, Staff.

Study and analysis of the structure and operations of American unions, including the complicated internal life of the organizations; the varied environments in which unions develop and grow or decline; the relationship of national unions, local unions, and members in the many different sections of internal union government; the ways in which unions are set up to handle organizing, collective bargaining, contract administration, and political activity; and the widespread movement toward merger and consolidation of unions that began in the sixties and continues today. All of these involve a study of union constitutions and other primary documents, in addition to secondary readings. Attention is given to relevant legislation,

current problems of unions, and the eternal problems of attaining union democracy.

#### ILRCB 302 Strangers and Citizens: Immigration and Labor in U.S. History

Fall or spring. 3 credits. I. DeVault. This course explores immigrant workers' experiences in the nineteenth and twentieth centuries from different perspectives. Students examine what it meant to the immigrants themselves to arrive as strangers in the United States while also examining the ways in which pre-existing American groups defined these immigrants as "strangers." Similarly, students look at U.S. citizens in their roles as greeters of immigrants, detractors of immigrants, and as models for the aspirations of immigrants. Throughout the course our main examples come from the industrial and union realms.

## ILRCB 303 Working-Class America in Mass Media and Popular Culture

Spring. 3 credits. J. Cowie. Examines a variety of representations of working people found in commercial popular culture throughout the 20<sup>th</sup> century as a means to explore the ways in which history, memory, and politics are shaped through popular discourse. Uses sources as diverse as popular music, Hollywood movies, the mainstream press, and television sit-coms to understand the ideological and political influences on our pre-conceptions of workers, and how those forces influence our notions of authenticity, the historical experience, and the politics of social class.

#### ILRCB 304 Seminar in American Labor and Social History

Fall or spring. 4 credits. Permission of instructor. C. Daniel, I. DeVault, N. Salvatore.

An undergraduate seminar whose topic changes depending on semester and instructor.

#### ILRCB 305 Introduction to Labor Arbitration and Alternative Dispute Resolution

Fall. 3 credits. J. Gross.

An introductory survey that focuses on the U.S. labor arbitration process in the private and public sectors (legal issues, discipline and discharge, contract language interpretation, remedies, and procedures), and on alternative dispute resolution systems in the United States and other countries. Student participation in class discussion is expected and assignments include an original research paper.

#### ILRCB 306 Recent History of American Workers: From the 60s through the 90s

Fall. 3 credits. J. Cowie.

Focuses on the social history of American workers and the role of organized labor in American life since the 1960s. Course themes often center on the complexities of social class in the United States. Topics covered include: the transformations of liberalism, the civil rights and black power movements, the Vietnam War, the rise and fall of the New Left, industrial restructuring, the decline of organized labor, the rise of industrial restructuring, the decline of organized labor, the rise of neoconservatism, changes in civic identity, and sources of cultural conflict. Course ends with an examination of globalization, changes in the major political parties, the future of work, and prospects for social change.

#### ILRCB 384 Women and Unions (also WOMNS 384)

Fall or spring. 4 credits. I. DeVault. This course explores women's participation in the United States labor movement in the nineteenth and twentieth centuries. Issues covered include women workers' relations with male-dominated union movements, the role of cross-class alliances of women in organizing women workers, interactions with radical parties and organizations, problems faced by women union leaders and activities, and others.

#### ILRCB 385 The African-American Workers, 1865–1910: The Rural and Urban Experience

Spring. 3 credits. Prerequisites: junior or senior or permission of instructor. N. Salvatore.

Examines the history of blacks in America from Emancipation through the experience of the first generation born after slavery, with a focus on the work experience. Topics include the restructuring of work during Reconstruction; the relationship between work and black organizational developments; between black and white workers; and the nature of work in the agricultural south and in cities throughout the nation.

#### ILRCB 386 The African-American Workers, 1910-the Present: Race, Work, and the City

Fall. 3 credits. Prerequisites: junior or senior. N. Salvatore.

Examines the history of blacks in America from the start of the Great Migration through the 1970s, with a focus on the work experience. Topics include the effect of migration and urbanization on black workers; the nature of the relationship between black and white workers as influenced by the depression and the two world wars; and an examination of the effect of the Civil Rights movement on the economic circumstances of black workers.

## ILRCB 400 Union Organizing

Spring. 3 credits. Prerequisites: undergraduates, ILRCB 201 and 300; graduate students, ILRCB 500 and 501. K. Bronfenbrenner.

Explores various aspects of unions' attempts to organize workers: including why some workers join unions and others do not; strategy and tactics implemented by unions and management during organizing campaigns; present status of labor law as it affects organizing; creative approaches to union organizing; and the organizing model of unionism.

## ILRCB 401 My Brother's Keeper: Volunteerism and Philanthropy

Spring. 3 credits. Prerequisites: junior or senior or permission of instructor. M. Gold. The philosophy, practice, economics, and law of volunteering labor and donating money. Topics include: altruism versus self interest; why individuals volunteer labor and raise and donate money; the structure and practices of charitable organizations; the economic effects of voluntary labor and philanthropic gifts; and the law of raising and distributing money.

## **ILRCB 404** Contract Administration

Fall. 3 credits. Prerequisites: ILRCB 300 and 201 or ILRCB 500 and 501.

K. Bronfenbrenner.

This course focuses on the practice, nature, and challenges of union representation under collective bargaining agreements. Working

with union contracts, constitutions, and bylaws from a diversity of national and local public and private sector agreements, the course examines how U.S. unions represent their members in different industries and different collective bargaining environments. Issues addressed include union representative/ steward rights and responsibilities, contract enforcement structures and practice, access to information, new work systems, hours of work and scheduling, contingent staffing arrangements, workplace discrimination, health and safety, promotional opportunities, down-sizing, leadership development, membership involvement and commitment, internal organizing, community coalition building, and decertification campaigns. Students practice hands-on work in interpreting contract language and preparing and presenting grievances and unfair labor practices.

## ILRCB 405 Negotiation and Dispute Resolution

Fall and spring. 3 credits. Prerequisites: background in economics and the social sciences, or permission of instructor. D. Lipsky, R. Seeber.

Deals with four related topics: (1) nature of conflict particularly between organizations, (2) negotiation and bargaining, with a focus on process, practice, and procedures; (3) third party dispute resolution, with a focus on mediation and arbitration; and (4) alternative dispute resolution (ADR), with a focus on its current use in the corporate sector and the implications for our system of justice. This is a generic dispute resolution course, that is, we do not focus on labor relations or any particular types of disputes, but deal with many different kinds of conflicts. Examples and cases are used to illustrate general principles. Few if any of these cases and examples are drawn from labor relations; illustrative material in the course is based on exercises in areas such as product liability, environmental regulation, commercial relations, and personal injury disputes.

## ILRCB 407 Contemporary Trade Union Movement

Spring. 3 credits. Prerequisites: undergraduates, ILRCB 100, 101; graduate

students ILRCB 502. R. Seeber, R. Hurd. An examination of contemporary trade union issues, including union power, political action, collective bargaining approaches, and organizing efforts. The course covers structural, functional, and strategic aspects of contemporary unions. Speakers from the union movement will address the class.

## ILRCB 482 Ethics at Work

Fall or spring. 3 credits. Prerequisites: junior or senior or permission of instructor. M. Gold.

Major theories of ethics are examined, then applied to issues in the employment relationship such as genetic screening of job applicants, random drug testing of employees, affirmative action, discipline for off-duty conduct, whistle-blowing, worker safety and cost/benefit analysis, comparable worth, strikes by employees providing crucial services, and crossing a picket line.

## ILRCB 488 Liberty and Justice for All

Fall or spring. 3 credits. Prerequisite: junior or senior or permission of instructor. M. Gold.

Major theories of ethics are examined, then applied to contemporary issues such as

affirmative action and reverse discrimination, the right to life (from abortion to capital punishment), comparable worth, and constitutional rights such as freedom of speech.

## ILRCB 495 Honors Program

Fall and spring (yearlong course). 3 credits each term. Admission to the ILR senior honors program may be obtained under the following circumstances: (a) students must be in the upper 20 percent of their class at the end of their junior year; (b) an honors project, entailing research leading to completion of a thesis, must be proposed to an ILR faculty member who agrees to act as thesis supervisor; and (c) the project, endorsed by the proposed faculty sponsor, is submitted to the Committee on Academic Standards and Scholarships.

Accepted students embark on a two-semester sequence. The first semester consists of determining a research design, familiarization with germane scholarly literature, and preliminary data collection. The second semester involves completion of the data collection and preparation of the honors thesis. At the end of the second semester, the candidate is examined orally on the completed thesis by a committee consisting of the thesis supervisor, a second faculty member designated by the appropriate department chair, and a representative of the Academic Standards and Scholarship Committee.

## ILRCB 497-498 Internship

Fall and spring. 497, 3 credits; 498, 6 credits. Staff.

All requests for permission to register for an internship must be approved by the faculty member who will supervise the project and the chairman of the faculty member's academic department before submission for approval by the director of Off-Campus Credit Programs. Upon approval of the internship, the Office of Student Services will register each student for 497, for 3 credits graded A+ to F for individual research, and for 498, for 6 credits graded S-U, for completion of a professionally appropriate learning experience, which is graded by the faculty sponsor.

## ILRCB 499 Directed Studies

Fall and spring. 3 credits. For individual or group research projects conducted under the direction of a member of the ILR faculty, in a special area of labor relations not covered by regular course offerings. Sophomores, juniors and seniors with a preceding semester of 3.0 term average, are eligible to submit projects for approval by the Academic Standards Committee. Students should consult with a counselor in the Office of Student Services at the time of CoursEnroll in order to arrange for formal submission of their Directed Study.

## ILRCB 500 Collective Bargaining

Fall. 3 credits. Open only to graduate students. Recommended: ILRCB 501 taken previously or concurrently. M. Cook, H. Katz, S. Kuruvilla, L. Turner.

A comprehensive introduction to the industrial relations system of the United States. The negotiation, scope, and day-to-day administration of contracts; union and employer bargaining structures; implications of industrial relations issues for U.S. competitiveness and public policy; industrial conflict; and U.S. industrial relations in international and comparative perspective.

## ILRCB 501 Labor and Employment Law

Fall. 3 credits. Open only to graduate students. L. Compa, M. Gold, R. Lieberwitz, K. Stone.

A survey and analysis of the law governing labor relations and employee rights in the workplace. The first half of the course examines the legal framework in which collective bargaining takes place, including union organizational campaigns, negotiations for and enforcement of collective bargaining agreements, and the use of economic pressure. The second half of the course surveys additional issues of rights in employment, including such topics as employment discrimination, the developing law of "unjust dismissal," and union democracy. Also serves as an introduction to judicial and administrative systems.

## ILRCB 502 History of Industrial Relations in the United States since 1865

Spring. 3 credits. Open only to graduate students. C. Daniel, I. DeVault, N. Salvatore.

This introductory survey course emphasizes historical developments in the twentieth century. Special studies include labor union struggles over organizational alternatives and such other topics as industrial conflicts, working-class life styles, radicalism, welfare capitalism, union democracy, and the expanding authority of the federal government.

## ILRCB 504 The U.S. Industrial Relations System

4 credits. Offered only in New York City for the M.P.S. Program. Staff.

Examines the development, operation, and outcomes of the U.S. industrial relations system in a comparative context. Specifically, the course contrasts the American experience with industrial relations institutions and outcomes with the experience of several other countries in Europe and Asia. Students look at the process of union formation, the practice of collective bargaining at different levels, the methods of dispute resolution, and the legal regime germane to industrial relations. The course also focuses on both processes and outcomes of different country systems, focusing on the degree of collaboration or conflict, wage levels and wage inequality, and practices in different industries and firms. Finally the role played by industrial relations and human resource policy in economic and social development in these nations is addressed.

## ILRCB 602 Arbitration

Fall and spring. 4 credits. Limited to 21 students. Prerequisites: undergraduates, ILRCB 201, 300; graduate students, ILRCB 500 and 501. J. Gross, M. Leibowitz, R. Lieberwitz.

A study of arbitration in the field of labormanagement relations, including an analysis of principles and practices, the law of arbitration, the handling of materials in briefs or oral presentation, the conduct of a mock arbitration hearing, and the preparation of arbitration opinions and post-hearing briefs.

## ILRCB 603 The Economics of Collective Bargaining in Sports

Fall or spring. 3 credits. L. Kahn. Surveys economic and industrial issues in the sports industry. Topics include: salary determination, including free agency, salary caps, salary arbitration; competitive balance and financial health of sports leagues; antitrust issues in sports; labor disputes, union history, and contract administration issues in sports leagues; discrimination in sports; and performance incentives.

## ILRCB 604 Theories of Equality and Their Application in the Workplace

Fall or spring. 3 credits. R. Lieberwitz. An examination of the various aspects of equality in the workplace, focusing on issues of race, gender, and national origin, and the ways in which societal discrimination on these bases are institutionalized in the workplace. Theories attempting to define "equality" and specific workplace issues are studied, including the means for achieving equality at the workplace. The course entails a high level of student participation in class discussions, and assignments include a research paper.

#### ILRCB 605 Readings in the History of Industrial Relations in the United States

Fall. 3 credits. Limited to seniors and graduate students. C. Daniel, N. Salvatore. An intensive seminar covering original printed sources and scholarly accounts for different periods in American history.

## ILRCB 606 Theories of Industrial Relations Systems

Fall or spring. 3 credits. Limited to seniors and graduate students. Prerequisites: seniors, ILRCB 100, 101, 300; graduate students, ILRCB 500. H. Katz.

This course traces the evolution of theory and research on industrial relations. Topics include: theories of the labor movement; institutional models and evidence regarding what unions do; the origins of internal labor markets and their relationship with unionization; models of strikes; empirical assessments of arbitration; research on union decline; and empirical evidence of the impacts of new technology.

## ILRCB 607 Values in Law, Economics, and Industrial Relations

Fall and spring. 3 credits. Limited to 21 students. Prerequisites: ILRCB 201, 300, 500, 501. J. Gross.

An examination of the often hidden values and assumptions that underlie the contemporary U.S. systems of employment law, work and business, and industrial relations. Classroom discussions and student research projects use novels and short stories (as well as the literature of industrial and labor relations) to focus on issues such as: discrimination; law, economics, and the state; work and business; power, conflict, and protest; and rights and justice.

#### ILRCB 608 Special Topics in Collective Bargaining, Labor Law and Labor History

Fall. 3 credits. Prerequisites: ILRCB 201 or 501 or permission of instructor. M. Leibowitz.

Lec 03—An advanced labor law course which builds on the foundation of the study of labor law in the required labor and employment law course. The course is an in-depth study of labor law, with particular focus on the National Labor Relations Act, including issues of organizing across different occupational groups, collective bargaining, strikes, picketing, and contract enforcement. The course also includes a study of legal issues of union democracy and other labor and employment law issues.

#### ILRCB 608 Collective Bargaining Simulation

Fall. 3 credits. Open only to juniors, seniors, and graduate students. Limited to 14 students. One evening extended bargaining session is required. H. Kramer.

Lec 04-After a brief introduction to negotiations techniques, participants take part in a simulated negotiation, set in a hypothetical company and union environment (for 2001 in the chemicals industry), for a moderately sized bargaining unit, either as members of a management or a union team. The course stresses the process of negotiations over their outcome. Negotiation problems are highly realistic, with attention given to dynamic legal, economic, political, and communication concerns. Participants plan for negotiations, cost proposals, negotiate contract language, and bargain wages, benefits, and other economic items, in the context of a company and union with an established contract, history, policies, and culture (which are supplied by the course leaders). Students are required to read, "Game, Set, Match—Winning the Negotiations Game," but the primary thrust is on using practical methods for managing the negotiation process. This is a participation based hands-on course. Students wishing merely to observe should not take this program. There is a group planning paper requirement. This course is recommended for graduate and undergraduate students who have taken or who are taking collective bargaining and labor law. Participants are required to adhere to high standards

## ILRCB 608 Introduction to Labor Research

for "completed staff work."

Spring. 3 credits. Limited to 20. K. Bronfenbrenner.

Lec 07-Designed to provide students interested in the labor field with the skills necessary to understand and utilize social science research as it relates to the labor movement. The course has four major goals: 1) to develop the skills to critically evaluate a wide variety of research relating to unions and the workplace; 2) to provide an introduction to a number of both quantitative and qualitative research techniques utilized by unions and those who study the labor movement; 3) to familiarize students with the broad range of library and computer resources that can be utilized for labor and corporate research; and, 4) to provide students an opportunity to design and conduct a research project for a national or local union.

## ILRCB 609 Special Topics: Labor Law Policy Seminar

Spring. 3 credits. K. Stone.

The United States' collective bargaining system, which had its origins during the New Deal period, has come under intense attack. The intellectual premises of the system have been challenged by scholars on both the right and the left, and at the same time the decline in the labor movement has undermined its political support. This seminar looks at the theoretical attacks on the New Deal collective bargaining system and at some of the current proposals for its replacement. Among the topics to be discussed are: the theory of regulation embodied in the National Labor Relations Act and its critique; alternative concepts of labor markets and their policy ramifications; the emergence of the global economy and its ramifications for domestic labor regulation. There are also discussions of

320

alternative systems of labor regulation, such as is found in West Germany, Sweden, and Japan.

#### ILRCB 650 Service Work and Workers in Historical Perspective

Fall or spring. 3 credits. I. DeVault. Takes a historical perspective on the development of a service economy in the United States. Readings include general and theoretical works, but the main focus is recent historical scholarship on specific occupations and situations in the "nonproductive" workforce. Students explore primary sources for research on the subject and write research papers.

## ILRCB 651 Industrial Relations in Transition

Spring. 3 credits. Limited to seniors and graduate students. H. Katz.

Considers whether recent developments such as concession bargaining, worker participation programs, and the growth of nonunion firms represent a fundamental transformation in industrial relations practice. Reviews recent research and new theories arguing that such a transformation is occurring, including the work of Piore and Sabel, Bluestone and Harrison, and Kochan, McKersie, and Katz. Also reviews the counterarguments and evidence put forth by those who believe no such transformation is under way. Course material focuses on industrial relations practice in the private sector in the United States, although some attention is paid to developments in Western Europe, the United Kingdom, and Japan.

## ILRCB 655 Employment Law I

Fall. 3 credits. Prerequisites: ILRCB 201, 501, or permission of instructor. Classroom presence and participation are mandatory. This course can be taken either before or after ILRCB 656. There are considerable reading responsibilities. L. Adler.

The approach taken is similar to ILRCB 656, but the subject matter differs. The subject studied include employment at will and its exceptions; the role of the Constitution in the US workplace; the law of electronic and traditional privacy at work; and the slowly evolving rights of contingent workers in the old and new economies. One study primarily reviews federal and state court decisions and focuses upon the way that employees' rights are advanced or constricted by law.

## ILRCB 656 Employment Law II

Spring. 3 credits. Prerequisites: ILRCB 201, 501, or permission of the instructor. Classroom presence and participation are mandatory. This course can be taken either before or after ILRCB 655. L. Adler. The approach taken is similar to ILRCB 655, but the subject matter differs. The areas covered include the meaning and validity of pre-employment arbitration agreements; the critical distinctions in the status and thus the rights of employees, independent contractors, and contingent workers; what rights the working poor, the homeless, and workfare individuals have on the "job;" and the origin and application of the workers compensation laws that apply when people are injured or contract disease from their work. One study primarily reviews federal and state court decisions and focuses upon the way that employees' rights are advanced or constricted by the law. There are considerable reading responsibilities.

## ILRCB 682 Seminar in Labor Relations Law and Legislation

Fall or spring. 3 credits. Limited enrollment. Prerequisite: permission of instructor. R. Lieberwitz.

This course covers legal problems in public employment and other areas of labor relations affecting the public interest.

## ILRCB 683 Research Seminar in the History of Industrial Relations

Fall or spring. 3 credits. Prerequisites: undergraduates, ILRCB 100 and 101; graduate students, ILRCB 502. C. Daniel, I. DeVault, N. Salvatore.

Areas of study are determined each semester by the instructor offering the seminar.

## ILRCB 684 Employment Discrimination and the Law

Fall or spring. 3 credits. Prerequisite: ILRCB 201/501 or equivalent. M. Gold, R. Lieberwitz.

An examination of the laws against employment discrimination based on race, color, religion, sex, national origin, age, and disability.

## ILRCB 685 Research Seminar on Trade Unions

Fall or spring. 3 credits. Prerequisite: ILRCB 300 or 500; permission of instructor S. Kuruvilla.

Designed to provide an analytical survey of research on trade unions in the United States. Major topics include unions in politics, unions as complex organizations, public opinion and attitudes toward unions, determinants of union growth and decline, economic and noneconomic effects of unions, internal union government, and commitment and participation in trade union activity. This is a researchoriented course.

## ILRCB 686 Collective Bargaining in the Public Sector

Fall or spring. 3 credits. Prerequisites: undergraduates, ILRCB 300 and 201;

graduate students, ILRCB 500 and 501. Staff. An examination of the development, practice, and extent of collective bargaining between federal, state, and local governments and their employees. The variety of legislative approaches to such matters as representation rights, unfair practices, scope of bargaining, impasse procedures, and the strike against government are considered along with implications of collective bargaining for public policy and its formulation.

## ILRCB 689 Constitutional Aspects of Labor Law

Fall or spring. 3 credits. R. Lieberwitz. In-depth analysis of the Supreme Court decisions that interpret the United States Constitution as it applies in the workplace. This study focuses on the First Amendment, Fifth Amendment, Fourteenth Amendment, and Commerce Clause, with issues including freedom of speech and association, equal protection, due process, and other issues in the area of political and civil rights. The course entails a high level of student participation in class discussion, and assignments include a research paper.

## ILRCB 703 Theory and Research in Collective Bargaining

Spring. 3 credits. Open to graduate students who have taken ILRCB 500 and ILROB 723 or their equivalents. Recommended: a statistics course beyond the level of ILRST 510. Staff.

This is a second-level course in collective bargaining that builds on the institutional research covered in ILRCB 500. The existing literature in the area of collective bargaining is appraised for its theoretical and empirical content. Efforts are made to explore the appropriate role for theory and empirical analysis in moving research in collective bargaining toward a more analytical perspective, and to identify and appraise the underlying paradigms used to study collective bargaining-related issues.

## ILRCB 705 The Economics of Collective Bargaining

Spring. 3 credits. Prerequisites: ILRCB 500; ILRLE 540 (or their equivalents) and an understanding of multiple regression analysis; or permission of instructor. Staff.

Focuses on both the economic analysis of unions and collective bargaining in our economy and on the economic forces that affect collective bargaining. The method is to identify and conceptualize the structural determinants of relative bargaining power. On this basis, the course examines both the economic outcomes of collective bargaining and current bargaining trends in a variety of industries. Tentative theoretical analyses of unionism (neoclassical, institutionalist) are compared. The statistical techniques and empirical results of research on the union effect on economic outcomes (wages, prices, inflation, profits, productibility, earnings inequality) are also evaluated. The effect of technology, corporate structures, and public policy on union bargaining power is outlined, and a number of case studies of collective bargaining in the private sector are reviewed. A term paper is required.

# ILRCB 708 Negotiations in Practice (also LAW 672)

Fall. 3 credits. S. Kuruvilla. This course aims to provide opportunities for class participants to develop their negotiating abilities for use in organizational and other settings. The course is premised on the assumption that negotiating concepts are best learned through practice which is grounded in rigorous analysis and reflection. While theoretical principles and concepts from various reference disciplines (such as social psychology, sociology, and economics) are presented through lectures and readings, this course focuses primarily on improving practical skills. Class participants not only learn to enhance their individual abilities in dyadic and group situations, but also learn to analyze contexts for the most effective

## ILRCB 783 Seminar in American Labor History (also HIST 683)

3 credits. Graduate students only. Permission of instructor required. A

application of these skills.

research paper is required. N. Salvatore. This course explores the relationship of scholarly biographical writing to the field of American social history. More and more historical biographies look to incorporate social analyses at the center of their biographical structures. Students read, discuss, and analyze the varied strengths and weaknesses of a number of these efforts. The author's understanding of the play between biographical subject and the larger social context, and its meaning for the structure of the book, are a point of inquiry that encourage numerous approaches and interpretations.

## ILRCB 790 ILR M.P.S. Program

Fall and spring. 1–9 credits. Staff. Supervised research only for those enrolled in the ILR M.P.S. program.

NDUSTRIAL AND LABOR RELATION

## ILRCB 798 Internship

Fall and spring. 1–3 credits. Designed to grant credit for individual research under direction of a faculty member by graduate students who have been selected for an internship. All requests for permission to register for ILRCB 798 must be approved by the faculty member who will supervise the project.

## ILRCB 799 Directed Studies

Fall and spring. Credit TBA. For individual research conducted under the direction of a member of the faculty.

#### ILRCB 980 Workshop in Collective Bargaining, Labor Law, and Labor History

Fall and spring. 2 credits. Limited to M.S. and Ph.D. candidates in the department. S-U grades only. Staff.

Designed to provide a forum for the presentation of current research being undertaken by faculty members and graduate students in the Department of Collective Bargaining, Labor Law, and Labor History, and by invited guests. All M.S. and Ph.D. candidates in the department who are at work on their theses are strongly urged to enroll. Each student in the course is expected to make at least one presentation during the year, focusing on the formulation, design, execution, and results of that student's thesis research.

## HUMAN RESOURCE STUDIES

P. Wright, chair; R. Batt, B. Bell, J. Bishop,

J. Boudreau, V. Briggs, M. Cavanaugh,

C. Collins, L. Dyer, G. Milkovich, Q. Roberson,

S. Snell, W. Wasmuth

## ILRHR 260 Human Resource Management

Fall. 3 credits. Open only to ILR students; others by permission. Staff.

Intended to introduce students to the field of human resource management (HRM). Students learn theories and applications involved in effectively managing people in organizations. In addition, this course covers current topics in HRM that have resulted from environmental and organizational challenges-e.g., technology, globalization, legislation, restructuring, work/life balance, changing labor markets, and so on. Emphasis is placed on developing relevant problem solving and critical thinking skills, as the basic concepts of HRM and the skills developed in this course are applicable to all types of organizations and jobs in which students will eventually work.

## ILRHR 266 Personal Computer Basics

Fall, spring, and summer. 2 credits.

Limited. C. Homrighouse. Provides basic skills in the use of personal computers using the (PC5) Windows environment. Course covers the basics of Lexis Nexis, Windows, Microsoft Excel, Access, and Powerpoint. Emphasis is placed on hands-on experience using examples demonstrating human resource issues and PCbased solutions. This course is a prerequisite to several advanced Human Resource Management electives.

## ILRHR 360 Human Resource Economics and Public Policy

002-2003

Fall and spring, 3 credits. Open to sophomores, juniors, and seniors. V. Briggs, J. Bishop.

A review of labor-market trends, data collection systems, and theories pertaining to public efforts to develop the employment potential of the nation's human resources and to combat unemployment. The major segments of the nation's educational training enterprise (e.g. public education, higher education, employer-provided training, apprenticeship, and special training programs for the economically disadvantaged) are examined. The course examines programmatic issues pertaining to such groups as youth and disabled rural workers. It also covers public policies pertaining to welfare reform, direct job creation, worker relocation, economic development, targeted tax credits, and "empowerment zone" proposals. Comparisons are made with other industrialized nations.

## ILRHR 362 Career Development: Theory and Practice

Fall, spring. 2 credits. 7 weeks. Limited to 30. S-U only, L. Gasser.

covers the components of career management, individual factors and organizational realities in the development of both careers and organized programs for career management. Two complementary learning tasks are required, information-gathering for career decision making based on self-assessment activities, and comprehension of organizational circumstances and practices encountered as careers develop. Grades are based on short writing assignments and a research paper.

## ILRHR 366 Women at Work

Spring. 3 or 4 credits. Prerequisite: ILRHR 260 or equivalent. J. Farley.

This course covers various aspects of female occupational roles in twentieth-century United States. Historical, social, and legal factors that influence women's choice of careers, work socialization and training, and subsequent labor-market experience are considered. Working women's entry-level jobs, opportunities for advancement, and income are compared to men's.

## ILRHR 456 International Human Resource Management

Fall. 3 credits. Staff.

Provides an examination of international human resource management issues in multinational enterprises. The course has two major objectives: to enhance understanding of key strategic and functional issues related to IHRM, and to develop analysis of practical IHRM issues in multinational enterprises. Includes topics such as strategic issues for IHRM, cross-cultural management issues, coordination issues, and expatriate management.

#### ILRHR 460 Human Resource Strategies for Entrepreneurial Firms

Spring. 3 credits. Open to juniors and seniors. Prerequisites: ILR 260 or permission of instructor. C. Collins.

Explores the human resource problems and solutions specific to start-up firms and growing entrepreneurial organizations. Over the course of the semester, students integrate their knowledge of the functional areas of human resource management with general management, business strategy, entrepreneurship, accounting/finance, marketing, public relations, and small business management. Course material and creative solutions to problems are communicated to the class through lectures, case studies, class and group discussions, and formal presentations. The emphasis for the course is on the integration of concepts, application to real-life business situations, and the acquisition of general management skills and knowledge.

#### ILRHR 461 The Organization of Work: Comparative International Perspectives

Fall, spring. 3 credits. Prerequisite: ILRHR 260 or equivalent. Open to juniors and seniors. R. Batt.

Considers classic texts on the organization of work and workers' experiences at work. Includes discussion of mass production, flexible specialization, team-based systems, and lean production. Changes at work are explored in the context of changing product and labor market institutions and national contexts. Student papers and presentations focus on the experience of firms and workers in specific industries and occupations.

## ILRHR 462 Staffing, Training, and Development

Spring. 3 credits. Prerequisites: ILRHR 260 or permission of the instructor. C. Collins. This course provides overviews of the staffing, training, and development functions in organizations. The first half of the semester focuses on the process by which organizations fill positions. Topics include legal issues, job/ competency analysis and planning, external selection practices, and internal staffing decisions. The second half of the semester focuses on the process by which organizations train and develop employees. Topics include training needs assessment, program design, training evaluation, and management development practices. Throughout the semester students examine the relationship between the staffing and training/development functions.

## ILRHR 463 Diversity and Employee Relations

Fall. 3 credits. Q. Roberson. Explores the policies, programs and practices used by employers to promote the fair treatment of employees, especially those not covered by collective bargaining contracts. Includes such policies as organizational justice and the protection of employee rights of such programs as work/life balance, and worker health and safety; and elements of such practices as employee communication and conflict resolution. Also examines individual and organization climate factors that are important to the management of diversity in business organizations. Considers variations in employee relations and diversity management practices and the effects of these practices on relevant individual and organization outcomes.

## ILRHR 464 Business Strategy

Fall. 3 credits. C. Collins. Intended to be an integrative course focusing on strategic management. The main purpose of the course is to provide an opportunity for students to study and analyze issues associated with strategic thinking in complex business situations, top management decision making, and the functions of corporations as a whole. Allows students to bring together all of the functional skills they have learned in other business or related classes (e.g., marketing, accounting, finance, human resources, etc.) and to apply this knowledge to business problems faced by top management in existing organizations. Class is comprised of both a lecture and case study format.

## ILRHR 465 The Globalization of Services.

Fall, spring. 3 credits. Prerequisite: ILRHR 260 or equivalent. R. Batt.

beregulation, privatization, immigration, and advances in information technology have profoundly affected service sector activities, which now comprise two-thirds of advanced industrial economies. This course considers how firms are responding to globalization in services and how employees, consumers, and unions are affected. Student papers and presentations compare the process and outcomes of restructuring in a range of service industries and occupations across advanced economies.

## [ILRHR 466 Comparative Human Resource Management

Fall. 3 credits. Not offered 2002–2003. Staff. Provides a survey of human resource management practices in two key regions: Europe and the Asia-Pacific region. Focus of this course is on HRM issues such as selection and staffing, training and development, and appraisal and reward systems. Special attention is given to HRM trends and developments. Issues of transferability of HRM practices, and implications for multinational enterprises operating in those regions, is also discussed.]

## ILRHR 468 Human Resources Management Simulation

Spring. 2 credits. Limited to 30 juniors and seniors. Prerequisite: ILRHR 260 or

equivalent. 7 weeks. W. Wasmuth. Uses a simulation model and an open-systems approach as means to enhance students' skills in strategic planning and managerial decision making. Attention is given to the implications and efforts of strategic human resource managerial and supervisory decisions as measured by 10 organizational performance indicators, including quality of work life, employee productivity, customer satisfaction, employee retention, internal control, and the bottom line. Each student is assigned to a group (team) of five members and must be committed to the work of that group. An individual research paper is also required. Regular attendance is required.

## ILRHR 469 Immigration and the American Labor Force

Fall and spring. 3 credits. V. Briggs. Assesses the role that immigration policy plays as an instrument of human resource development in the United States. Immigration policy will be placed in an evolutionary context but primary attention will be given to the post-1965 revival of mass immigration. In addition to legal immigration, policies pertaining to illegal immigration, border commuters, "maquiladoras," refugees, asylees, and nonimmigrant workers are also examined. Comparisons are also made with immigration systems of other nations.

### ILRHR 495 Honors Program

Fall and spring (year-long course). 3 credits each term. For description, see the section on Collective Bargaining, Labor Law, and Labor History.

## ILRHR 497-498 Internship

Fall and spring. 3 and 6 credits. For description, see the section on Collective Bargaining, Labor Law, and Labor History.

## ILRHR 499 Directed Studies

For description, see the section on Collective Bargaining, Labor Law, and Labor History.

## ILRHR 560 Human Resource Management

Fall and spring. 3 credits. Open to graduate students only. Staff.

A survey course covering the major areas of the management of human behavior in work organizations. Consideration is given to aspects of strategic human resource management such as: staffing, training and development, performance management, compensation, and employee relations. Emphasis is on exploring these issues from both strategic and tactical levels to increase organizational effectiveness.

#### ILRHR 564 Human Resources Management in Effective Organizations

Fall or spring. 4 credits. Offered only in New York City for the M.P.S. Program. Staff.

This course offers the opportunity to become better prepared to make effective decisions about human resources. Successful organizations depend on people; their human resources. The first module examines strategic human resource management and the effects of HR decisions on organization success and fair treatment of people. The second module focuses on alternative systems used to staff and develop people. The third module focuses on compensating and rewarding people. The final module includes employee relations and alternative work systems. Case and field studies are used throughout the course.

## ILRHR 653 Research on Education Reform and Human Resource Policy

Spring. 3 credits. J. Bishop. State and local efforts to improve K-12 education are employing a variety of (sometimes contradictory) reform strategies. A research seminar that will critically examine the case that is made for (and against) each of the major reform proposals and review studies that provide objective evidence on their effectiveness. The education reform strategies that will be examined include: vouchers, charter schools, smaller classes, direct instruction versus discovery learning, extending the school day and year, better preparation and selection of new teachers, better professional development, ending tenure, merit pay, state standards and school accountability, ending social promotion, and externally set end-of-course examinations.

#### ILRHR 661 Applied Personal and Organization Development

Fall. 3 credits. Seniors and graduate students. C. Warzinski.

An experiential course that deals with OD and its role in the organizational change process. Combines the opportunity for hands-on practice in a workshop setting, Students are responsible for researching and writing a paper that examines a specific method, technique, or critical issue; preparing an inclass demonstration/presentation illustrating applications of a chosen subject; and completing a final project requiring a comprehensive proposal that describes an appropriate and logically supported intervention strategy.

#### ILRHR 662 The Agile Organization: Exploring the Dynamics of Marketplace and Organizational Agility

Fall. 4 credits. Prerequisites: ILRHR 260/ 560 and additional course work in business and human resource strategy. L. Dver.

Increasingly, dynamic external environments are encouraging active experimentation with new (i.e., non-bureaucratic) organizational paradigms. One such paradigm is the agile organization. This course explores the dynamics of the agile organization with particular emphasis on: underlying justification and rationale, approaches to pursuing marketplace agility, infrastructure designs and human resource strategies that promote organizational agility, new approaches to leadership, and societal implications and attendant public policy issues. Toward the end of the semester, the class applies what has been learned to design a course (ILRHR 663) to be conducted as an agile organization.

## ILRHR 663 People in the Agile Organization

Spring. 4 credits. Prerequisites: ILRHR 662 and permission of instructor. L. Dyer. Learning about the agile organization is one thing, learning to operate and live in one is another. This course is totally experiential. It is conducted as much like an agile organization as is possible in an academic setting. In pursuit of a vision and armed with a few basic principles, students function autonomously, albeit with accountability, to generate, share, absorb, and use knowledge and experiences to enhance their, and others' understanding and appreciation of the pluses and minuses of life in an agile organization.

## ILRHR 664 "e-HR: Human Resource Management and the WEB in The Information Age"

Fall. 3 credits. J. Boudreau, S. Basefsky. Designed to teach students skill-based techniques in HR research methodology. Students are taught to act as their own consultants in both a classroom and workforce setting as they access data and find statistical information to support their research topics. The first five weeks of the semester consist of weekly meetings with the reference librarians at the Martin P. Catherwood Library. These meetings cover a different research technique each week, and students are given readings and a hands-on assignment to gain practical experience on these techniques.

## ILRHR 665 Business Strategy and Human Resources

Fall. 4 credits. Limited. Prerequisite: ILRHR 260/560 plus 3 other courses in human resource studies and permission of instructor. P. Wright.

instructor. P. Wright. As the capstone course in HR studies, students integrate the theories and practices learned in other courses, to explore the linkages between business strategy and HRM. Extensive fieldwork is involved. The field projects are designed to make students explore and understand business strategy and draw upon and integrate their course work in HR planning, staffing, development, compensation and regard, and new work systems.

## ILRHR 666 Strategic HR Metrics

Fall. 4 credits. Prerequisites: ILRHR 260/ 560 or equivalent, on course in statistics, one elective in human resource studies. J. Boudreau. Explores how to account for the contribution of human resource management programs and decisions to achieving organizational goals. This course emphasizes a systematic decision-making system that organizes the discipline of human resource management and can assist in planning and evaluating programs. Topics include the role of financialaccounting statements in managing human resources, cost-benefit analysis for programs, managing human resource as a profit center, and identifying human resource management constituents to address their goals.

## ILRHR 667 Diversity and Inclusion in Organizations

Spring. 4 credits. Prerequisites: ILRHR 260/ 560 or equivalent and permission of instructor. Q. Roberson.

Designed to explore diversity management and practices for inclusion in business organizations. The primary goals of the course are to increase students knowledge of strategic and tactical uses of HR practices and policies to effectively manage organizational diversity issues. Specifically the course aims to develop students skills in the practical management of diversity, particularly, linking diversity strategy to business strategy and developing diversity and inclusion initiatives to help improve organizational competitiveness and enhance bottom line outcomes. The course also assists students in developing sensitivity to differences among people and to the importance of promoting fair treatment among all employees.

## ILRHR 668 Staffing Organizations

Spring. 3 credits. Prerequisites: ILRHR 260/ 560 and one course in statistics or

permission of instructor. C. Collins. Seminar providing an overview of the processes by which organizations staff positions with both internal and external applicants. Because staffing is one of the primary human resource activities, it is critical for human resource professionals to understand how theory, research, and legal foundations can inform staffing decisions. Therefore, this course focuses on theories, research, policies, and practices concerning job recruitment and selection. Topics covered include staffing strategy and context, measurement of staffing effectiveness, job/ competency analysis, human resource planning, recruitment and job choice, and internal and external selection practices.

## ILRHR 669 Managing Compensation

Spring. 4 credits. Limited to 30 students. Prerequisites: ILRHR 260/560 or equivalent, ILRHR 266 and basic statistics or permission of instructor. G. Milkovich.

Focuses on managing employee compensation in contemporary organizations. The major objectives are: to examine the current state of compensation decision making, to examine how recent theoretical and research developments inform compensation decisions, and to offer an opportunity to develop competencies in making compensation decisions.

## ILRHR 690 Comparative Human Resource Management

Fall. 3 credits. Prerequisites: ILRHR 260/ 560, or permission of instructor. Staff. Surveys human resource practices in two key regions of the world: Western Europe and the Pacific Rim. The focus is on HR issues related to management of professional and managerial work force, such as selection and staffing, development, and appraisal and reward systems. Special attention is given to current changes and trends in the human resource management area (e.g., unification of Europe, transformation of Japanese firms). Implications for multinationals operating in these countries is also discussed.

#### ILRHR 692 Training the Displaced and Disadvantaged

Spring. 3 credits. Prerequisite: permission of instructor. J. Bishop.

Examines public and private efforts to lower unemployment and underemployment of displaced and disadvantaged workers. The seminar examines the scope of the problem, its causes, and why specific programs have worked and others have not. Topics covered include training for displaced workers, rehabilitation of the disabled, job-search training, tax credits for hiring, vocational training, literacy instruction, EEO, public service employment, assisting new business, and industrial policy. The seminar also investigates how the structure of the economy influences the ability of targeted training and job creation to achieve sustained reductions in unemployment and draws lessons from the experience of other societies.

## ILRHR 693 Training and Development in Organizations

Spring. 3 credits. Prerequisites: ILRHR 260/ 560 or equivalent, one course in statistics or permission of instructor. B. Bell. The purpose of this course is to acquaint students with aspects of learning in organizations. We begin by discussing organizational learning, and then focus more narrowly on specific ways in which learning is achieved through the training and development functions. Topics throughout the semester

include: how learning is linked to organizational strategy, how to determine that training is needed, issues regarding the design of training programs, current training techniques, evaluation strategies, and management development practices.

## **ILRHR 694** Competing in Services

Fall, spring. 4 credits. Prerequisite: HR 560 or equivalent and consent of instructor. R. Batt.

Examines alternative service management strategies and outcomes, with particular focus on customer relationship management. Priority is given to analyzing the relationship between business strategy, marketing, customer segmentation, organizational structures, and human resource practices. Student projects focus on critical analysis of service management in particular companies and settings, using live cases where possible.

#### ILRHR 695 Education, Technology, and Productivity

Fall. 3 credits. J. Bishop.

This seminar investigates the nexus between the education and training in schools and at the workplace and the technological progressiveness, productivity, and competitiveness of firms, individuals, and nations. Students investigate: how technological progress is changing the nature of work and what this implies for reform of education and training; why United States productivity has increased so little in the past two decades; how education and training contribute to growth and competitiveness; why educational achievement has declined; and how the responsibility for education and training should be apportioned among individuals, firms, private nonprofit organizations, and government.

## ILRHR 696 Knowledge Management

Fall. 3 credits. Open to seniors and graduate students. S. Snell. Designed to acquaint students with the

systems and strategies used to manage a firm's intellectual capital. Focus is on foundation concepts and frameworks related to intellectual capital (human, social, and organizational), knowledge management, and HRM. Discussions cover both the point of view of the organization (e.g., competitive challenges, core competencies) as well as the employees (e.g., psychological contracts, employment relationships). Ultimately, the goal is to integrate these views to develop a framework of how both the organization and the individual maximize value. Also explores the processes that drive knowledge management. In particular students focus on how firms create, transfer, and integrate knowledge to support learning and innovation. We discuss the managerial methods that support knowledge processes and cover various models and frameworks for integrating elements of knowledge management and intellectual capital.

#### ILRHR 697 Special Topics in Resource Studies

Fall or spring. 3 credits. Staff. Areas of study are determined each semester by the instructor offering the seminar.

#### ILRHR 698 International Human Resource Policies and Institutions

Spring. 3 credits. J. Bishop. A comparative study of human resource policies and institutions in Western Europe, North America, Japan, and East Asia (with special emphasis on math and science education) and of the effects of these institutions on productivity, growth, and equality of opportunity. The institutions studied include primary and secondary education, apprenticeship, employer training, and higher education. Data on the consequences of policies is presented and an effort made to understand how human resource policies and institutions have contributed to the rapid growth and low levels of inequality in Europe, and East Asia. An important focus of the course is understanding the causes of the low levels of achievement of American high school students relative to their counterparts abroad.

#### ILRHR 699 Advanced Desktop Applications

Spring, 1 credit. Letter grade only. Prerequisite: ILRHR 266 or significant experience (2–4 years) using office applications. C. Homrighouse.

Explores advanced topics for common desktop applications including Windows, Word, Excel, Access, PowerPoint, and basic HTML. The course is designed based on student input and instructor recommendations, covering those subjects that students feel would be most useful and relevant in the job market. Examples of areas include working with tables, columns or sections in Word, pivot tables in Excel, taking a PowerPoint presentation "on the road" and using join tables to create relationships in Access.

#### ILRHR 760 Seminar in Human Resource Studies

Fall or spring. 3 credits. Prerequisites: ILRHR 560, ILRST 510/511, and ILRHR 669

and permission of instructor. Staff. A "floating" seminar designed to give faculty and students an opportunity to pursue specific topics in detail, with an emphasis on theory and research. Topics vary from semester to semester. Interested students should consult current course announcements for details.

#### **ILRHR 763** Interdisciplinary Perspectives on the Organization of Work

Fall or spring. 4 credits. R. Batt. Ph.D. research seminar examining the evolution of the literature on the organization of work, group effectiveness, teams, and social capital, including recent critical and international perspectives. It reviews alternative theories and evidence from industrial engineering, I/O psychology, social psychology, organization studies, sociology, economics, and industrial relations. Outcomes for firms and employees are debated.

## **ILRHR 765** International Compensation

Spring. 4 credits. G. Milkovich. Seminar focuses on international developments in employee compensation. Recent research, theoretical developments, and specific organizations' practices in a wide variety of countries are considered. Local national practices are the principal focus along with expatriates and others. The course draws upon research and theories from sociology, economics, psychology, and other disciplines. Four operative terms are seminar, comparative, compensation, and organization. Students should come to each session prepared to be active players in discussions. The focus is comparative, including research, theory, and practices of specific enterprises in different countries. Compensation includes all forms of pay including cash, benefits, allowances, and so on. Primary focus is at the organization level of analysis.

## ILRHR 769 Topics in International

**Compensation Theory and Research** Spring. 4 credits. Prerequisite: ILRHR 669. G. Milkovich.

Examines recent developments in theory, research, and practice related to compensation. Discussion emphasizes the relevance of theory and research to compensation decision making. Students examine compensation and reward-related theories and research from supporting disciplines such as economics, psychology, sociology, and organizational behavior and evaluate their relevance to employee, managerial, executive, and international compensation.

## ILRHR 790 ILR M.P.S. Program

Fall and spring. 1-9 credits. Supervised research only for those enrolled in the ILR M.P.S. program.

#### ILRHR 798 Internship

For description, see the section on Collective Bargaining, Labor Law, and Labor History.

## **ILRHR 799** Directed Studies

For description, see the section on Collective Bargaining, Labor Law, and Labor History.

## ILRHR 960 Workshop in Human **Resource Studies**

Fall and spring. 2 credits. Enrollment limited to M.S. and Ph.D. candidates. S-U grades only. Staff.

The workshop is designed to provide a forum for the presentation and critical discussion of current research being undertaken by graduate students, faculty members, and invited guests in the field of human resource studies. All M.S. and Ph.D. candidates in the Department of Human Resource Studies are

urged to enroll; candidates in other departments are cordially invited. Each participant has an opportunity to benefit from the collective wisdom of the others in the formulation, design, and execution of his or her research, as well as to become current on the latest developments in the field.

## ILRHR 961 Doctoral Research Seminar in Human Resource Management

Fall. 3 credits. Ph.D. candidates only. Staff. This seminar is aimed at reading, understanding, and conducting research in HRM. Students should obtain thorough understanding of the current research in traditional areas of HRM such as validation, job analysis, EEO, selection, performance appraisal, compensation, and training, and should develop the skills necessary to evaluate, criticize, and contribute to the literature on HRM.

## ILRHR 962 Doctoral Research Seminar in **Strategic Human Resource** Management

Spring. 3 credits. Ph.D. candidates only. Staff.

Seminar is aimed at reading, understanding, and conducting research in SHRM. The course should enables students to obtain a thorough understanding of the current research in Strategic HRM, and to develop the skills necessary to evaluate, criticize, and contribute to the literature on SHRM.

#### [ILRHR 963 Research Methods in HRM/ Strategic Human Resource Management

Spring. 3 credits. Ph.D. candidates only. Staff.

Designed to build social science research skills, particularly in the area of human resource studies (HRS). Topics include measurement reliability, construct validity, design of studies, external validity, metaanalysis, critiquing/reviewing HRS research, publishing HRS research, and applications of statistical models of HRS issues.]

## INTERNATIONAL AND COMPARATIVE **LABOR**

G. Fields, chair; J. Abowd, R. Batt, J. Bishop, F. Blau, G. Boyer, V. Briggs, M. Cook, I. DeVault, L. Kahn, H. Katz, S. Kuruvilla, I. Turner

## ILRIC 333 Europe, United States, and

Japan in a Global Economy Fall. 3 credits (1 additional credit may be arranged). L. Turner.

Introduction to the contrasting political economies of Germany, the European Union, Japan, and the United States in today's changing global economy. Emphasis is on national differences, global debates, and on the different strategies pursued by labor, business, and government in the face of growing trade competition, political conflicts, production reorganization, and labor movement revitalization efforts.

#### [ILRIC 337 Special Topics: Fall. 3 or 4 credits. Staff.

Devoted to new topics in the field. The specific content and emphasis vary depending upon the interests of the faculty member teaching the course.]

#### ILRIC 339 The Political Economy of Mexico

Spring. 3 credits. M. Cook.

Explores the range of challenges affecting contemporary Mexican politics, society, and economic development—from democratiza-tion to immigration to NAFTA. The course provides both an introduction to Mexican political economy for those with no prior background and an opportunity for students with more knowledge of Mexico to explore a research topic in greater depth.

## ILRIC 499 Directed Studies

For description, see the section, Collective Bargaining, Labor Law, and Labor History.

# ILRIC 533 Europe, the United States, and Japan in a Global Economy

Fall, 4 credits. Graduate students. L. Turner.

See description for ILRIC 333. Graduate students also submit an analytical term paper at the end of the semester.

## **ILRIC 537** Special Topics

Fall or spring. 3 or 4 credits. Staff. Devoted to new topics in the field. The specific content and emphasis vary depending upon the interests of the faculty member teaching the course.

## **ILRIC 631** Comparative Labor **Movements in Latin America**

Fall. 3 credits. M. Cook. Examines the historical development of labor movements in Latin America, their role in national political and economic development, and the impact of economic liberalization, authoritarianism, and redemocratization on contemporary labor organizations in the region. Countries examined will include, but are not limited to, Mexico, Brazil, Argentina, Chile, Peru, and Guatemala.

## ILRIC 632 Revitalizing the Labor **Movement: A Comparative** Perspective

Fall. 4 credits. Graduate seminar open to seniors only with permission of instructor. L. Turner

Examines contemporary efforts in the United States and Europe to revitalize unions and reform industrial relations. The first half of the course examines contemporary reform efforts in the United States. The second half covers Britain, Germany, Italy, Spain, and the "Europeanization" of labor.

#### ILRIC 633 Labor, Industry, and Politics in Germany

Fall. 4 credits. Open to seniors with permission and graduate students. I. Turner

Is the successful postwar "social partnership" model of organized capitalism in the Federal Republic of Germany viable in the twenty-first century? To answer this question, this course looks at the works councils and codetermination, the rise of a strong postwar labor movement, the contemporary German version of social partnership, with an emphasis on current events and the new challenges for German industry and labor posed by German unification and European integration.

## [ILRIC 635 Labor Markets and Income **Distribution in Developing Countries**

Spring. 4 credits. Prerequisite: ILRLE 240 or Economics 313 or permission of instructor. Not offered 2002-2003. G. Fields.

A course analyzing who benefits and how much from economic growth in developing countries and how income distribution would be affected by various public policies. Topics to be covered include: poverty, inequality, social welfare, and economic growth-theory and evidence; poverty profiles, earnings functions, and decompositions; employment, unemployment, wages, and labor markets; and an introduction to benefit-cost analysis, with application to the economics of education.]

## [ILRIC 636 Comparative History of Women and Work (also WOMNS 636)

Spring. 4 credits. Permission of instructor. Not offered 2002–2003. I. DeVault. Explores the similarities and differences between different cultures' assumptions about the work of women as well as women's experiences in varying work circumstances throughout history. Beginning with theoretical pieces and overviews of the history of women and work, most of the course consists of indepth examinations of specific work situations or occupations across time and geography. Comparative examples are taken from the United States, Europe, and the Third World.]

## ILRIC 637 Labor Relations in Asia

Spring. 3 credits. Permission of instructor required. S. Kuruvilla.

A comparative survey of the industrial relations systems of selected Asian nations such as Japan, South Korea, Thailand, Malaysia, Singapore, Hong Kong, China, and several others. The emphasis is on economic development strategies and industrial relations policies in these countries. Industrial relations practices, the extent of union organization, and labor force demographics of these countries is examined. The primary objective is to provide students with an introduction to industrial relations systems in Asia. The countries chosen are representative, but not exhaustive.

#### [ILRIC 638 Labor, Free Trade, and Economic Integration in the Americas

Spring, 3 credits. Limited. Open to seniors and graduate students; juniors by permission. Not offered 2002–2003. Next offered 2004. M. Cook.

Analyzes the contemporary movements toward free trade and regional economic integration in the Western Hemisphere. Special attention is paid to labor's role in this process. Examines the origins and implications of the North American Free Trade Agreement (NAFTA) and looks at integration schemes in South America (Mercosur), Central America, and the Caribbean, and at hemisphere-wide initiatives. A research paper is required.]

## ILRIC 639 Building a "Social Europe": Regional Integration in the Global Economy (also GOVT 736)

Spring. 4 credits. Seminar designed for graduate students and seniors with permission. Limited. L. Turner.

Central questions addressed include: what have the European Union and its member nations done to develop and reform the social dimension in the 1990s and beyond? How are the major actors—labor, government, and business—positioned to influence social policy and industrial relations reform, and what strategies are they pursuing? How do EMU and enlargement affect the effort of European societies to defend and develop the social dimension of their market economies? What are the prospects for the "Social Europe" in an increasingly deregulated global economy?

## ILRIC 730 Research Seminar on Labor

Markets and Economic Development Fall or spring. 3 credits. Prerequisite: open to M.S. and Ph.D. students only. G. Fields. Research seminar for students writing theses or dissertations on aspects of labor markets and economic development. Addresses research questions, methodologies, and contributions in the areas of employment and unemployment, income and earnings, educational and human resource development, welfare economics, and economic growth. Presentations and written papers are required.

## ILRIC 731 Industrial Relations in Latin America

Fall. 4 credits. M. Cook. Examine and compares changes in contemporary industrial relations throughout Latin America. Faced with the competitive pressures brought on by globalization, employers and governments throughout the region are transforming practices, laws, policies, and institutions that shape the industrial relations arena. The course analyzes and compares the extent and character of these changes, the responses and strategies of trade unions and other political and social actors, and the implications of industrial relations changes in the region for economic development, political stability, and democracy. The aim is to introduce students to the key issues in contemporary Latin American industrial relations, and through individual research papers, to enable students to become familiar with a specific country or sector/theme in two or more countries of the region. Reading knowledge of Spanish or Portuguese recommended but not required.

## ILRIC 739 The Political Economy of Mexico

Spring. 3 credits. M. Cook. For course description, see ILRIC 339. Graduate students attend ILRIC 339 lectures, meet with the professor, and write a research paper.

## ILRIC 790 ILR M.P.S. Program

Fall and spring. 1–9 credits. Supervised research only for those enrolled in the ILR M.P.S. Program.

## **ILRIC 799 Directed Studies**

For description, see the section, Collective Bargaining, Labor Law, and Labor History.

## Other courses approved to fulfill ILRIC distribution

## [ILRCB 304 Latin American Labor History

Fall. J. Cowie.

For description, see the section, Collective Bargaining, Labor Law, and Labor History.]

## ILRCB 681 International Labor Law

Spring. L. Compa. For description, see the section, Collective Bargaining, Labor Law and Labor History.

## ILRHR 456 International Human Resource Management

Spring, Staff. For description, see the section, Human Resource Studies.

## ILRHR 461 The Organization of Work: Comparative International Perspectives

Fall or spring. R. Batt. For description, see the section, Human Resource Studies.

## ILRHR 465 The Globalization of Services

Fall. R. Batt. For description, see the section, Human Resource Studies.

#### [ILRHR 466 Comparative Human Resource Management

Fall. Staff. For description, see the section, Human Resource Studies.]

## ILRHR 469 Immigration and the American Labor Force

Spring. V. Briggs. For description, see the section, Human Resource Studies.

#### [ILRHR 690 Comparative Human Resource Management

Fall. Staff.

For description, see the section, Human Resource Studies ]

## ILRHR 698 International Human Resource Policies and Institutions

Spring. J. Bishop. For description, see the section, Human

Resource Studies.

## [ILRLE 444 The Evolution of Social Policy in Britain and America

Spring. G. Boyer. For description, see the section, Labor Economics.]

## ILRLE 446 Economy History of British Labor (also ECON 459)

Spring. G. Boyer. For description, see the section, Labor Economics.

#### [ILRLE 448 Topics in Twentieth-Century Economic History: The Economics of Depression and the Rise of the Managed Economy Fall. G. Boyer.

For description, see the section, Labor Economics.

#### ILRLE 642 Economic Analysis of the Welfare State

Fall. 4 credits. R. Hutchens For description, see the section, Labor Economics

## INTERDEPARTMENTAL COURSES

## ILRID 150 Freshman Colloquium

Fall. 1 credit. Open only to ILR freshman. S-U only. Staff.

This course is offered to acquaint new freshman students with some of the issues and disciplines in the field of industrial and labor relations, and, establish acquaintanceship among members of the ILR faculty and small, randomly assigned groups of students. The course includes a plant visit and several meetings early in the semester designed to introduce issues encountered in studying the employment relationship.

## ILRID 250 Diversity in the Workplace

Spring. 1 credit. S-U only. Limited to 30 ILR sophomores. E. Lawler.

Attendance at all sessions is mandatory, as is participation in group discussions, and completion of written work. Exposes students to issues of diversity and discrimination in corporate, union, and legal environments. The purpose is to understand, analyze, and discuss the experience of being part of a culturally and ethnically diverse workplace. Examples of topics include: subtle forms of prejudice and discrimination, how employing organizations are responding to the changing composition (demographics) of the workplace, mentoring programs, the role of networking opportunities for minorities and women, how unions are changing in response to increasingly diverse workforces, and unique issues or problems faced by other disadvantaged groups (e.g., disabled, gays and lesbians). Most sessions involve presentations by practitioners (many of whom are ILR Alumni) and discussion. The goals of course are: to sensitize students to the subtle ways that prejudice and discrimination can arise in the workplace; to bring students into direct contact with practitioners in corporations, labor unions, and law firms in order to familiarize students with current practices for addressing the opportunities and challenges of racial, ethnic, gender, and other forms of diversity in the workplace; and to analyze and discuss with practitioners ways to reduce prejudice and discrimination in workplaces.

## ILRID 450 Workplace Diversity: Stepping into the 21st Century

Spring, 1 credit. S-U only, Prerequisite: ILRHR 260. Limited to 30 ILR students. Priority is given to seniors. Henderson, Woods.

Provides an orientation to diversity in the workplace and to the expectations and challenges presented for future workplace leadership. With an emphasis on hands-on experiential learning, the course begins by familiarizing class participants with current practitioner approaches to diversity awareness training and competency building. Course focus then shifts to examine diversity as an issue of organizational change. Class participants consider the range of policies, practices and procedures being used to create workplaces that are both diverse and inclusive. Dialogues and case study presentations with invited workplace diversity leaders offer participants an opportunity to learn from an insider's perspective about the experiences, successes and challenges of making diversity work. Students are required to complete a "case study" of an organization.

## ILRID 451 Science, Technology, and the American Economy

Spring. 4 credits. V. Briggs.

The industrial revolution did not begin in the United States, but the nation became the world's first technological society. Attention is given to the evolutionary confluence of science, technology, mathematics, religion, and capitalism in the formation of the U.S. economy, its institutions, and its labor force. Primary attention is given to the post–World War II economic developments. The vantage point is the linkage with employment, unemployment, income, and productivity considerations. Public policy issues (such as the employment impact of the computer, research and development policy, national defense influences, the "agricultural revolution," savings and investment rates, and labor force preparedness) are explored. Critical concerns pertaining to environmental impacts, income polarization, and consumerism are also examined.

#### [ILRID 452 Writing in Industrial and Labor Relations

Fall or spring. 3 credits. Not offered 2002-2003. J. Farley.

Requires close reading of four or five books related to the term's theme in the field of industrial and labor relations and careful writing about them. Students also have an opportunity to practice writing about the world of work for different audiences.]

## ILRID 566 Public Policy

Spring. 4 credits. Offered **only** for the New York City M.P.S. Program. Staff.

The government's influence on the workplace and the role of public policy in the utilization and preparation of the nation's human resources for employment is assessed. Areas of study include the government's historical role in the labor market, and the effect of efficiency, price stability and economic growth, equity, and immigration policy and its market implications.

## ILRID 790 ILR M.P.S. Program

Fall and spring. 1–9 credits. Supervised research only for those enrolled in the ILR M.P.S. program.

## LABOR ECONOMICS

L. Kahn, chair; J. Abowd, F. Blau, G. Boyer, J. DeVaro, R. Ehrenberg, G. Fields, R. Hutchens, G. Jakubson, R. Smith

## ILRLE 140 Development of Economic Institutions

Fall. 3 credits. Prerequisite for non-ILR students: permission of instructor. G. Boyer.

Examines the historical roots of the economic system currently dominant in Western Europe and the United States. The course focuses on the process of European economic growth prior to 1914, the effect of industrialization on labor in Great Britain, and the historical evolution of economic thought from Adam Smith to J. M. Keynes.

## ILRLE 240 Economics of Wages and Employment

Fall and spring. 3 credits. Prerequisites: ECON 101–102, ECON 313, or permission of instructor.

Applies the theory and elementary tools of economics to the characteristics and problems of the labor market. Considers both the demand (employer) and supply (employee) sides of the market to gain a deeper understanding of the effects of various government programs and private decisions targeted at the labor market. Topics covered include employment demand, basic compensation determination, education and training, benefits and the structure of compensation, labor-force participation and its relation to household production, occupational choice, migration, labor-market discrimination, and the effects of unions.

## ILRLE 340 Economic Security (also ECON 451)

Spring. 3 credits. Prerequisites: ILRLE 240 or equivalent.

Considers the economic and social effects of income security measures. Analyzes programs offering protection against economic loss due to industrial accident, temporary and permanent disability, illness, old age, premature death, and unemployment, as well as private efforts to provide security, and the problems of integrating public and private programs. Proposals for amending or modifying economic security measures are also considered.

## ILRLE 440 Economics of Wages and Employment II (also ECON 341)

Spring. 3 credits. J. DeVaro. See ILRLE 240 for description. Designed for

## ECON majors with calculus. ILRLE 441 Income Distribution (also ECON 455)

Fall. 4 credits. Prerequisite: ILRLE 240 or ECON 341. R. Hutchens.

Explores income distribution in the United States and the world. Topics to be covered include functional and size distributions of income, wage structure, income-generating functions and theories, discrimination, poverty, public policy and income distribution, and changing income distribution and growth. Students who have taken PAM 370 may not receive credit for 441.

## ILRLE 442 The Economics of Employee Benefits (also ECON 456)

Fall. 4 credits. Prerequisites: ILR 240 or equivalent. F. Blau.

An in-depth treatment of the economics and financial management and administration of all employee benefits: health care, insurance, retirement income, family-care benefits, executive incentive plans, and other compensation provided as a service or contingent financial package to employees. Detailed international comparisons of health care and retirement systems are included.

## ILRLE 443 Personnel Economics for Managers (also ECON 443)

Fall. 4 credits. Prerequisites: ILRLE 240 or equivalent. J. DeVaro.

Examines topics in labor economics of particular relevance to individual managers and firms. Representative topics include: recruitment, screening, and hiring strategies; compensation (including retirement pensions and other benefits); training, turnover, and the theory of human capital; incentive schemes and promotions; layoffs, downsizing, and buyouts; team work; and internal labor markets. The course focuses on labor-related business problems using the analytic tools of economic theory, and should appeal to students contemplating careers in general business, consulting, and human resource management as well as in economics. Some assignments are case studies requiring teamwork.

## ILRLE 444 The Evolution of Social Policy in Britain and America

Spring, 4 credits. Prerequisite: ILRLE 240 or equivalent. G. Boyer.

Surveys the history of social policy in Great Britain and the United States from 1800 to the adoption of the British welfare state after World War II. Topics covered include: the role of poor relief in the early nineteenth century; the changing relationship between public relief and private charity; the adoption of social insurance programs and protective labor legislation for children and women; government intervention in the Great Depression; and the beginnings of the welfare state.

## ILRLE 445 Women in the Economy (also ECON 457 also WOMNS 446) Fall. 4 credits. Prerequisite: ILRLE 240 or

equivalent.

Examines the changing economic roles of women and men in the labor market and in the family. Topics include: a historical overview of changing gender roles; the determinants of the gender division of labor in the family; trends in female and male labor force participation; gender differences in occupations and earnings; and the consequences of women's employment for the family.

#### ILRLE 446 Econemic History of British Labor 1750–1940 (also ECON 459) Fall or spring, 4 credits. Prerequisite: ILRLE

240 or equivalent. G. Boyer.

Examines various aspects of British labor history from the beginning of the Industrial Revolution until World War II. Specific topics include: monetary and nonmonetary changes in workers' living standards; internal migration and emigration; the London labor market; the extent of poverty and the evolution of the wvelfare state; Luddism and Chartism; and the development of trade unions.

#### ILRLE 448 Topics in Twentieth-Century Economic History: The Economics of Depression and the Rise of the Managed Economy (also ECON 458) Spring. 4 credits. Prerequisites: ILRLE 240 or ECON 314. G. Boyer.

Topics covered include: the causes of the Great Depression in the United States; the economics of the New Deal; the causes of high unemployment in interwar Great Britain; the rise of Keynesian economics and the development of demand management policies in Great Britain and the United States after 1945.

## ILRLE 495 Honors Program

Fall and spring (year-long course). 3 credits each term.

For description, see the section on Collective Bargaining, Labor Law, and Labor History.

## ILRLE 497-498 Internship

Fall and spring. 3 and 6 credits. For description, see the section on Collective Bargaining, Labor Law, and Labor History.

#### **ILRLE 499 Directed Studies**

For description, see the section on Collective Bargaining, Labor Law, and Labor History.

## ILRLE 540 Labor Economics

Fall. 3 credits. Prerequisites: ECON 101– 102 or ECON 103 or equivalent. Required of M.I.L.R. candidates. G. Fields.

A course in labor market economics for prospective managers in the corporate, union, and governmental sectors. Begins with demand and supply in labor markets, presenting the tools of decision analysis for workers and firms. It then goes on to consider various topics for managers including deciding on the optimal mix of capital and labor to employ, attract and retain talent, pay and productivity, hiring and training investments, and pensions and retirement. The final section of the course covers other important labor market issues including unemployment, discrimination, poverty and inequality, and analysis of public policies.

## [ILRLE 544 Labor Market and Personnel Economics

4 credits. Offered only in New York City for the M.P.S. Program. Not offered 2002– 2003. Staff.

A four-module course, in which the first module covers the basic elements of supply and demand in the labor market, the second and third modules cover the "new personnel economics" (emphasizing economic issues in a firm that relate to selecting, training, assigning, motivating, and compensating workers), and the final module covers key institutions and economic security issues (including unemployment, pensions, disability, discrimination, and unions). The goals of this course are to have students learn to analyze both business and public policy problems, taking into account both basic principles of economic theory and the relevant institutional environments.]

## ILRLE 642 Economic Analysis of the Welfare State (also ECON 460)

Spring. 4 credits. R. Hutchens. Uses the tools of public economics to analyze modern welfare states. Although examples are drawn from several countries, the course focuses on the U.S., Canada, and Sweden. What are the rationales for the level of government intervention in these states, and how do these rationales square with notions of market failure? What are the economic costs and benefits of taxes, transfers, and regulations in these states? Can voting models explain the growth and operation of welfare states? The possible answers to these questions are discussed.

#### ILRLE 648 Economic Analysis of the University (also ECON 342) Fall. 4 credits.

Seeks to illustrate the complexity of decision making in a nonprofit organization and to show how microeconomic analysis in general, and labor market analysis in particular, can be usefully applied to analyze resource allocation decisions at universities. Among the topics covered are financial aid, tuition, admissions policies, endowment policies, faculty salary determination, the tenure system, mandatory retirement policies, merit pay, affirmative action, comparable worth, collective bargaining, resource allocation across and within departments, undergraduate versus graduate education, research costs, libraries, athletics, and "socially responsible" policies. Lectures and discussions of the extensive readings are supplemented by presentations by Cornell administrators and outside speakers who have been engaged in university resource allocation decisions or have done research on the subject.

## ILRLE 741 Applied Econometrics I

Fall. 4 credits. S-U or letter. G. Jakubson. Considers methods for the analysis of longitudinal data, that is, data in which a set of individual units are followed over time. Focus is on both estimation and specification testing of these models. Students consider how these statistical models are linked to underlying theories in the social sciences. Course coverage includes panel data methods (fixed, random, mixed effects models, etc.) factor analysis, measurement error models, and general moment structure methods.

## ILRLE 742 Applied Econometrics II

Spring. 4 credits. Letter or S-U grades. J. Butler.

Covers statistical methods for models in which the dependent variable is not continuous. Covers: models for dichotomous response (including probit and logit); polychotomous response (including ordered response and multinomial logit); various types of censoring and truncation (e.g., the response variable is only observed when it is greater than a threshold); and sample selection issues. Includes an introduction to duration analysis. Covers not only the statistical issues but also the links between behavioral theories in the social sciences and the specification of the statistical model.

## ILRLE 743 Applied Econometrics III

Spring. 4 credits. Letter only. Prerequisites: ILRLE 741–742 or permission of instructor. ILRLE 741, 742, and 743 constitute a Ph.D.level sequence in applied microeconometrics. G. Jakubson.

Covers topics not covered in ILRLE 741–742, including further development of duration analysis, panel data methods for nonlinear models, quantile regression and related techniques, and an introduction to nonparametric and semiparametric methods. Additional topics as suggested by their use in applied areas of social science. Covers not only the statistical issues but also the links between behavioral theories in the social sciences and the specification of the statistical model. Also develops a general framework for the techniques covered in the ILRLE 741–742–743 sequence.

#### ILRLE 744 Seminar in Labor Economics I (also ECON 641)

Spring. 3 credits. ILRLE 744, 745, and 746 constitute the Ph.D.-level sequence in labor economics.

Course includes reading and discussion of selected topics in labor economics. Applications of economic theory and econometrics to the labor market and human resource areas are stressed.

#### ILRLE 745 Seminar in Labor Economics II (also ECON 642)

Fall. 3 credits. ILRLE 744, 745, and 746 constitute the Ph.D.-level sequence in labor economics.

Course includes reading and discussion of selected topics in labor economics. Applications of economic theory and econometrics to the labor market and human resource areas are stressed.

#### ILRLE 746 Seminar in Labor Economics III (also ECON 643)

Spring. 4 credits. ILRLE 744, 745, and 746 constitute the Ph.D.-level sequence in labor economics.

Course includes reading and discussion of selected topics in labor economics. Applications of economic theory and econometrics to the labor market and human resource areas are stressed.

#### ILRLE 747 Economics of Higher Education

Spring. 4 credits. R Ehrenbeg. A survey of the econometric research on a wide variety of higher education issues. Examples of the issues addressed include public and private funding, financial aid and tuition policies, faculty labor markets and Ph.D. production. While the emphasis is on the American educational system, research from other countries may also be discussed. Interested students other than economics and labor economics Ph.D. students should speak to the instructor before enrolling for the COURSE

#### ILRLE 748 Economics of Employee Benefit-Fall. 4 credits.

Students in this course attend the lectures in ILRLE 442 (see description for 442) but have additional course requirements. If enrollment warrants, they will also meet separately at a time TBA for discussion of topics in 442 and additional topics.

#### **ILRLE 749** Economics of Development (also ECON 772)

Fall. 4 credits. Prerequisites: first-year graduate economic theory and econometrics.

Analytical approaches to the economic problems of developing nations. Topics to be covered include: some old and new directions in development economics thinking; the welfare economics of poverty and inequality; empirical evidence on who benefits from economic development; labor market models; project analysis with application to the economics of education; and development policy

## ILRLE 790 ILR M.P.S. Program

Fall and spring. 1-9 credits. Supervised research only for those enrolled in the ILR M.P.S. program.

## ILRLE 798 Internship

For description, see the section on Collective Bargaining, Labor Law, and Labor History.

## ILRLE 799 Directed Studies

For description, see the section on Collective Bargaining, Labor Law, and Labor History.

## ILRLE 940 Workshop in Labor Economics

Fall and spring. 3 credits. Intended for Ph.D. students who have started to write their dissertations.

Presentations of completed papers and work in progress by faculty members, advanced graduate students, and speakers from other universities. Focus is on the formulation, design, and execution of dissertations.

## ORGANIZATIONAL BEHAVIOR

P. Tolbert, chair; S. Bacharach, T. Hammer, E. Lawler, M. Lounsbury, W. Sonnenstuhl, L. Williams

## ILROB 170 Introduction to Micro **Organizational Behavlor and Analysis: The Social Psychology of** the Workplace

Fall. 3 credits. Staff.

This introductory (survey) course considers the basic individual and group processes in the workplace. At the individual level, students study personality, motivation, perception, attitude formation, and decision making. On the group level, group dynamics, leadership, power and influence, and culture are emphasized.

#### ILROB 171 Introduction to Macro **Organizational Behavior and** Analysis

Spring. 3 credits. Staff.

The relationship between industry and the economy as a whole and its implications for other social institutions in American society

(including stratification, politics, and American values) is discussed. The course moves from classical sociological theory to the analysis of complex organizations. The central focus of the course is the study of industrial organizations and of complex organizations in general, emphasizing authority relations, goals, the division of labor, bureaucracy, and organizational design.

## ILROB 320 The Psychology of Industrial **Engineering** Fall. 4 credits. T. Hammer.

A study of the human factors in the industrial engineering of work, workplaces, tools, and machinery. The course examines the aspects of individual and social psychology that operate in the work setting and that should be taken into account in the design of jobs. These include limitations of the human sensory system; individual difference in skills, abilities, motives, and needs: group dynamics; intrinsic motivation; job satisfaction; conflict.

## ILROB 321 Group Solidarity (also SOC 311)

Fall. 4 credits. M. Macv.

What is the most important group that you belong to? What makes it important? What holds the group together, and how might it fall apart? How does the group recruit new members? Make and enforce rules? Do some members end up doing most of the work while others get a free ride? This course explores these questions from an interdisciplinary perspective, drawing on sociobiology, economics, and social psychology. Alternative theories of group solidarity are applied to a series of case studies such as: urban gangs, spiritual communes, the civil rights movement, pro-life activists, athletic teams, work groups, and college fraternities.

## ILROB 322 Service Learning (also SOC 323)

Fall. 4 credits. M. Lounsbury Service-learning is a course-based, creditbearing educational experience in which students participate in organized service that contributes to community well-being. Students reflect on the service to gain further understanding of course content, a broader appreciation of the discipline, and an enhanced sense of civic responsibility. The course includes a service-learning requirement that is designed to involve students in projects at local governmental and community organizations. Students draw on sociological readings to examine the relationship between organizations, society and social change. Theoretical perspectives learned in class complement field-based activity; students develop a richer understanding of how organizations and their members are connected to society.

## ILROB 324 Gender and Work (also SOC 314/514 and WOMNS 314/514)

Spring. 4 credits. M. Brinton. The purpose of this course is to familiarize students with the field of gender stratification. The first part of the course examines longterm changes in women's labor force participation and the division of labor between the sexes as societies industrialize. Students consider theoretical work as well as empirical case studies of a number of countries ranging from Taiwan to Ireland. The second part of the course focuses on gender and work in highly industrialized societies, and includes empirical studies of the gendered division of labor in households and the labor

market of the United States in particular. The structure of the course is lecture one day per week and detailed discussion and critique of selected readings on the second day. Students take a mid-term exam and prepare a research proposal on some aspect of gender and work. During the last two weeks of the course, students present synopses of their research proposals which are discussed and constructively critiqued by their classmates.

## **ILROB 329** Organizational Cultures

Fall or spring. 3 credits. Prerequisite: one or more courses in sociology. W Sonnenstuhl

Reviews the concept of culture as it has evolved in sociology and anthropology, applying it to formal organizations in workplaces such as corporations and unions. The course first examines the nature of ideologies as sense-making definitions of behavior, concentrating on the cultural forms that carry these cultural messages, rituals, symbols, myths, sagas, legends, and organizational stories. Considerable attention is given to rites and ceremonials as a cultural form in organizational life that consolidates many of these expressive forms into one. The course examines types of ceremonial behavior such as rites of passage, rites of enhancement, and rites of degradation, including the role of language gestures, physical settings, and artifacts in ceremonial behavior. The presence of subcultures and countercultures in organizational behavior will also receive attention, especially the part played by occupational subcultures in formal organizations

## ILROB 370 The Study of Work Motivation

Fall. 4 credits. Open to juniors and seniors. T Hammer.

Designed to acquaint the student with the basic concepts and theories of human motivation with implications for job design and organizational effectiveness. Focus is on theories of worker motivation and on research approaches and results as they apply to the performance of individuals and groups in formal organizations. Readings are predominantly from the field of organizational psychology, supplemented by relevant contributions from experimental and social psychology. Each student designs, executes, and analyzes a research study of his or her own

## ILROB 420 Contemporary Organizational **Behavior Applications**

Fall or spring. 3 credits. Prerequisites: ILROB 170 and 171. L. Gasser. An exploration of current practical applica-

tions of OB theory in organizations. Using a range of contemporary resources, students sift through practitioner articles and research; manage discussions; meet with managers, consultants, and employees; and explore organizational issues and problems from micro and macro perspectives in a political and legal context. Students also develop a toolbox of knowledge and skills to effectively carry out several organizational interventions or development initiatives. Choice of topics may differ to focus on contemporary issues such as: emotional intelligence, influencing organizational climate and morale, engaging strategic planning processes, managing largescale participative techniques, using job or workplace design concepts, applying SWOT analysis, developing effective teamwork, managing diversity, applying quality management tools, etc.

#### **ILROB 422** Organizations and Deviance Fall. 3 credits. Enrollment limited to 60. W. Sonnestuhl.

Focuses upon the deviant actions of organizations, including such behaviors as price fixing, environmental pollution, illegal campaign contributions, and discrimination in hiring and promotion. Examines the origins of such behaviors in organizations, the processes by which they became institutionalized, and the processes by which they become defined as deviant organizational actions. Within this context, the course examines such contemporary cases as Exxon's Valdez oil spill, Iran-Contragate, drug testing, and the federal savings and loan scandal. These events raise troubling questions about what it means to live and work in an organizational society, and they cannot be dismissed as instances of a few individuals gone bad.

## ILROB 425 Sociology of Industrial Conflict

Spring. 4 credits. R. Stern. The course focuses on the social, economic,

and political causes of industrial conflict. The nature of work and the employment relationship provide the foundation for understanding both individual and collective expressions of conflict in work settings. Worker background, psychological contracts and authority relations set the stage for studying conflict expressions including strikes, labor turnover, absenteeism, sabotage, accidents, grievance filing, violence, and other forms of conflict at work.

#### ILROB 427 The Professions: Organization and Control

Fall. 3 credits. Prerequisite: permission of the instructor. P. Tolbert.

Focuses on the sources of power and control exercised by professional groups in contemporary society. A number of issues are examined in this context including: the role of professions in society, processes through which an occupational group becomes defined as a profession, sources of control that professional associations have over their members, relations between professionals and nonprofessionals in organizations, and the relationship between unionization and professionalization of occupations.

#### ILROB 429 Organizational Politics and Institutional Change

Spring, 2 credits. 7 weeks. Limited to juniors and seniors with permission of the instructor. Please see instructor before the first class. S. Bacharach.

Examines the market, cultural, political, and structural forces that change the organizational "rules of the game," how those changes affect individuals and organizations, and the distortions that occur as individuals and organizations attempt to adjust to a new unstable order. Issues to be examined include power, corruption, dealmaking, rationality, uncertainty, and competition. Course requirements include completing a major research paper and leading a class discussion.

## ILROB 470 Group Processes

Fall. 3 credits. Prerequisites: ILROB 170 and 171 or equivalent. Permission of instructor. E. Lawler.

A review of theoretical approaches and selected research on group phenomena, including the formation of groups, the structure of group relations, and group performance. Specific topics include conformity and obedience, status and power relations, tactics of influence, solidarity and commitment, the management of emotion, the emergence and change of microcultures, and the role of groups in networks and organizations.

## ILROB 472 Applied Organizational Behavior

Fall. 3 credits. Prerequisites: ILROB 170 and 171. S. Bacharach.

Introduces students to intermediate theory of organizational behavior. The course specifically concentrates on teaching students to use organizational theories for analytical and applied purposes. Among the issues to be addressed are organizational structure, work processes, organizational politics, organizational design, job design, incentive systems, and quality-of-work-life programs.

## ILROB 495 Honors Program

Fall and spring (yearlong course). 3 credits each term.

For description, see the section, Collective Bargaining, Labor Law, and Labor History.

## ILROB 497-498 Internship

Fall and spring. 3 and 6 credits. For description, see the section, Collective Bargaining, Labor Law, and Labor History.

## ILROB 499 Directed Studies

For description, see the section, Collective Bargaining, Labor Law, and Labor History.

## ILROB 520 Organizational Behavior and Analysis

Fall or spring. 3 credits. Staff. Survey of concepts, theories, and research from the fields of organizational and social psychology as these relate to the behavior of individuals and groups in organizations. Job attitudes, motivation, performance, leadership and power, group formation, perception, and organizational climate. A preliminary course for advanced work in organizational behavior.

## ILROB 525 Organizational Behavior

Fall, spring. 4 credits. Offered **only** for the New York City M.P.S. Program. Staff.

Applies theories and methods from the behavioral sciences to the analysis of behavior in organizations. Areas of study include classical and modern theories of organization and their underlying assumptions of human nature, the relationship between organizations and their environment, the role of power, politics and decision-making in organizations, industrial history, and leadership culture.

## ILROB 622 Sociology of Markets (also SOC 622)

3 credits. M. Lounsbury.

Since World War II, the diffusion of markets in Asia, Eastern Europe, and Latin America as well as changes in the structure of Western economies has reinvigorated questions about how markets are socially structured. Drawing on the literature in economic sociology, this course explores the social, cultural, economic, and political factors that shape the emergence and dynamics of markets. Among the issues addressed are: the social organization of markets, market discrimination, the cooperative aspects of market formation and functioning, the role of government and other institutional arrangements, the relationship of economic change to broader social forces such as social movements, and the shift towards globally market-oriented economies.

#### ILROB 625 Conflict, Power, and Negotiation

Fall. 3 credits. Open to seniors and graduate students. Permission of instructor is required. Limited enrollment. E. Lawler. Theoretical seminăr adopts a power perspective on bargaining and conflict resolution. Examines how power relations and power processes affect tactics in bargaining and also when power relations inhibit or promote conflict resolution. "Power" is viewed in the course as a capability, embedded in a social structure, and tactics are the action based on or using such power. The seminar gives overview of several theoretical approaches to

## ILROB 626 Organizations and Social Inequality

cognitive, social exchange) and places the

power perspective in this context.

conflict and bargaining (e.g., rational choice,

Spring. 3 credits. P. Tolbert. Examines the central role that organizations in industrial societies play in allocating income, status, and other resources to individuals. A variety of theoretical explanations of social inequality are examined, and the social policy implications of each are considered.

## ILROB 627 Leadership in Organizations

Spring. 3 credits. Open to graduate students and seniors with permission. T. Hammer.

An examination of theories and research findings from the behavioral sciences that are relevant to leadership and the influence process in groups and organizations. Personality, situational factors, intergroup processes, interpersonal perception as well as the motivation to both lead and follow are discussed. The implications for leadership training, organization development, and action research are explored.

## ILROB 628 Cross-Cultural Studies in Organizational Behavior

Spring. 3 credits. Limited. Permission of instructor before registering in course. Staff

Designed for students interested in social psychological theory and research in international culture comparisons of behavior and experience in organizations. Variables such as power distance, individualismcollectivism, universalism-particularism, and attitudes toward authority as well as work motivation are examined. Upon completion of the readings and discussion of conceptual materials and consideration of several major international comparison studies, each student prepares and presents a paper on a topic of his/her own choice usually related to his/her country of origin (China, Japan, German, United States, etc.).

## ILROB 670 Semester in Manufacturing

Spring. 15 credits. Open to master's and Ph.D. students in Industrial and Labor

Relations with permission of instructor. Intended for students who want to work as professionals or who have a strong interest in the manufacturing industries. The course is taught by an interdisciplinary faculty team from the College of Engineering, the Johnson School of Management, and the School of Industrial and Labor Relations. Course material is based on plant visits and project work with local industry. Student participation is in interdisciplinary teams with members representing the three colleges. Course content concentrates on four major issues thought to make a competitive difference in today's economic environment: the changing environment for product design; rapidresponse production systems; organization, management, and compensation of the manufacturing team; and performance measurement.

#### ILROB 674 The Social Psychology of Behavior and Experience in Organizations

Fall. 3 credits. Prerequisite: ILROB 170 and 171 or ILROB 520. Staff.

Considers theories that seek to explain behavior at the individual, group, and organizational level. Work motivation, leadership, and the member composition and dynamics of groups are discussed. Harmony, conflict, and other aspects of the relationships among groups in the organization are evaluated.

## ILROB 679 Methods of Observation and Analysis of Behavior

Fall or spring. 4 credits. Permission of instructor required. Staff.

Focuses on qualitative methods and emphasizes learning by doing. The course examines different approaches to the collection and analysis of data. Students learn a variety of data collection techniques for understanding individual and collective behavior including: participant observation, in-depth interviews, and working with archival materials. The course also emphasizes the constant comparative method as a basic technique for data analysis. This technique is the basis of such qualitative computer programs as Ethnograph and Nudist. Students conduct their own research projects. Students, who wish to use qualitative methods either for a senior honors thesis, master's thesis, or doctoral dissertation, are encouraged to take this course. Because of the intensive nature of the course, class size is limited to 25 students.

#### ILROB 721 Advanced Micro Organizational Behavior Spring. 3 credits. Staff.

Examines the historical development of psychological theories of organizational behavior and contemporary issues in micro organizational research. The course emphasizes reading and analysis of primary source

## ILROB 722 Advanced Macro Organizational Behavior

material

Fall. 3 credits. Prerequisites: ILROB 520. Staff.

Examines the historical development of sociological theories of organizations and contemporary issues in macro organizational research. The course emphasizes reading and analysis of primary source material.

## ILROB 723 Behavioral Research Theory, Strategy, and Methods I

Fall. 4 credits. Designed to meet the needs of M.S. and Ph.D. candidates majoring in organizational behavior, but other graduate students may enroll. Staff.

Materials studied in ILROB 723 and 724 include: theoretical, conceptual, and ethical questions; survey research and attitude-scaling procedures; laboratory research methods; participant observation and interview methods; use of documents and qualitative data analysis. Provides students with important philosophical background for doing research and exposes them to a well-balanced, interdisciplinary set of quantitative and qualitative research tools.

#### ILROB 725 Analysis of Published Research in Organizational Behavior (also SOC 725)

Fall. 3 credits. Prerequisites: ILROB 520 and 1 year of statistics. Staff.

An advanced research methods course that critically examines published research papers in the field of organizational behavior in terms of research design and method as well as theory.

#### ILROB 726 Selected Topics in Organizational Behavior

Fall. 3 credits. Prerequisites: ILROB 520 and permission of instructor.

An advanced proseminar that seeks to develop an interdisciplinary perspective on selected topics in organizational behavior. The topics themselves change from year to year depending on participants' interests. Course is designed to allow students and the instructor to jointly pursue significant scholarly inquiry into one or more arenas of organizational theory. Emphasis is placed on exploring the relevance of tradition in related disciplines (anthropology, linguistics, philosophy, sociology, etc.) that may enrich our understanding of organizational life.

## ILROB 728 Theories of Motivation and Leadership

Spring. 4 credits. Prerequisite: ILROB 520. T. Hammer.

Course provides an introduction to basic concepts of human motivation in general, with particular emphasis on the theories that explain and predict work motivation. Students examine the empirical research that tests the validity of the theories and shows how and under what conditions different motivation models can be used for practice in work organizations. Several current microtheories of leadership and power and related research are examined. The disciplinary perspective employed is social organizational psychology and the level of analysis emphasized is action and experience of individuals in groups.

## ILROB 729 Organizational Change and

Intervention

Fall. 3 credits. Graduate students only. Staff.

This seminar is concerned with planned and unplanned change in organizations. It is designed to analyze theory in practice. Particular attention is paid to the role of internal and external change agents. Class members are encouraged to analyze contemporary changes such as mergers and acquisitions and work force reductions. Participants submit weekly work force journals.

## ILROB 772 The Social Construction of Economic Life

Spring. 3 credits. M. Lounsbury. Drawing on the literature in economic sociology, this course emphasizes how economic activities are constituted and shaped by the social, cultural, and historical contexts in which they are situated. This course surveys various empirical and theoretical approaches used to study the genesis and influence of broader scale organizational and institutional arrangements. The course provides students with an opportunity to formulate and refine their own research questions and perspectives.

#### ILROB 773 Advanced Seminar in Cross-Cultural Studies of Organizational Behavior

Fall. 3 credits. Permission of the instructor. Staff.

Considers theory and method for the study of cross-cultural and cognitive style variables. Members participate in the conceptualization and conduct of a comparative research project.

#### ILROB 776 Organizational Implications of World Class Manufacturing Fall. 4 credits. Staff.

Aimed at helping students develop an understanding of organizations as complex social systems, and at helping students understand the behavioral implications of new manufacturing initiatives. Case studies are used to study the introduction of a variety of innovations in contemporary manufacturing firms, including manufacturing cells and teams, concurrent engineering, total quality management, and just-in-time material flow. Analyses emphasize the impact of such innovations on individuals' role definitions and relationships, organizations' communication requirements and patterns, group dynamics, leadership behaviors, labor relations, and human resource management systems. ILROB 776 is a core course in the Master of Engineering/Manufacturing Option degree program.

# ILROB 778 Solidarity in Groups (also SOC)

Fall. 3 credits. E. Lawler. Examines sociological and social psychological theories about how social solidarity or a "sense of community" comes about and is maintained in groups and organizations. Distinguishes emotional, normative, and instrumental bases for social solidarity and shows how these promote or inhibit subgroup formation in organizations, commitment of individuals to organizations, and organizational citizenship behavior.

## ILROB 790 ILR M.P.S. Program

Fall and spring. 1–9 credits. Supervised research only for those enrolled in the ILR M.P.S. program.

## ILROB 798 Internship

For description, see the section, Collective Bargaining, Labor Law, and Labor History.

## ILROB 799 Directed Studies

For description, see the section, Collective Bargaining, Labor Law, and Labor History.

## ILROB 920 Organizational Behavior Workshop

Fall. 2 credits. Limited to M.S. and Ph.D. candidates in the department. S-U grades

only. Staff.

This workshop is designed to provide a forum for the presentation of current research undertaken by faculty members and graduate students in the Department of Organizational Behavior and by invited guests. All M.S. and Ph.D. candidates in the department who are at work on their theses are strongly urged to enroll. Each student in the course is expected to make at least one presentation during the year, focusing on the formulation, design, execution, and results of that students' thesis research.

## SOCIAL STATISTICS

T. DiCiccio, chair; J. Angellotti, J. Bunge, A. Hadi, P. Velleman, M. Wells

## ILRST 210 Statistical Reasoning I

Fall, spring, and summer 2002–2003. 3 credits. Attendance at weekly discussion section is required. J. Angellotti, T. DiCiccio.

An introduction to the basic concepts of statistics and data analysis. Descriptive methods, normal theory models, and inference procedures for univariate and bivariate data. Basic statistical designs, an introduction to probability and applications of the Binomial and Normal distributions are covered. Estimation, confidence intervals, and tests of significance for a single population mean and proportion, the difference in two population means and porportions, simple linear regression, correlation, and two-way contingency tables are also considered. Students are instructed on the use of a statistics computer package at the beginning of the term and use it for weekly assignments.

## ILRST 211 Statistical Reasoning II

Fall, spring, and summer 2002–2003. 3 credits. Prerequisite: ILRST 210 or suitable introductory statistics course. J. Angellotti, M. Wells.

A second course in statistics. Applications of statistical data analysis techniques, particularly to the social sciences. Topics include: statistical inference; simple linear regression; multiple linear regression; logistic regression; and analysis of variance. Computer packages are used throughout the course.

## ILRST 310 Statistical Sampling

Spring. 3 credits. Prerequisite: 2 terms of statistics. A. Hadi.

Theory and application of statistical sampling, especially in regard to sample design, cost, estimation of population quantities, and error estimation. Assessment of nonsampling errors. Discussion of applications to social and biological sciences and to business problems. Course includes an applied project.

## [ILRST 311 Practical Matrix Algebra

Fall. 3 credits. Not offered 2002–2003. J. Bunge.

Matrix algebra is a necessary tool for statistics courses such as regression and multivariate analysis, and for other research methods courses in various other disciplines. One goal of this course is to provide students in various fields of knowledge with a basic understanding of matrix algebra in a language they can easily understand. Topics include special types of matrices; matrix calculations; linear dependence and independence; vector geometry; matrix reduction (trace, determinant, norms); matrix inversion; linear transformation; eigenvalues; matrix decompositions; ellipsoids and distances; and some applications of matrices.]

## **ILRST 312** Applied Regression Methods

Fall. 3 credits. Prerequisite: ILRST 211 or equivalent courses. A. Hadi.

Matrix algebra necessary to analyze regression models is reviewed. Multiple linear regression, analysis of variance, nonlinear regression, and linear logistic regression models are covered. For these models, least squares and maximum likelihood estimation, hypothesis testing, model selection, and diagnostic procedures are considered. Illustrative examples are taken from the social sciences. Computer packages are used.

## [ILRST 410 Techniques of Multivariate Analysis

Spring. 3 credits. Prerequisite: ILRST 312 or equivalent. Not offered 2002–2003. P. Velleman.

Techniques of multivariate statistical analysis discussed and illustrated by examples from various fields. The course emphasizes application, but theory is not be ignored. Deviation from assumptions and the rationale for choices among techniques are discussed. Students are expected to learn how to thoroughly analyze real-life data sets using computer-packaged programs. Participants should have some knowledge of matrix notation. Topics include: multivariate normal distribution; sample geometry and multivariate distances; inference about a mean vector; comparison of several multivariate means. variances, and covariances; detection of multivariate outliers; principal component analysis; factor analysis; canonical correlation analysis; discriminant analysis, and multivariate multiple regression.]

## ILRST 411 Statistical Analysis of Qualitative Data

Fall. 3 credits. Prerequisite: 2 statistics courses or permission of instructor. A. Hadi.

An advanced undergraduate and beginning graduate course. Includes treatment of association between qualitative variates; contingency tables; log-linear models; binary ordinal, and multinomial regression models; and limit dependent variables.

## ILRST 499 Directed Studies

For description, see the section, Collective Bargaining, Labor Law, and Labor History.

#### ILRST 510 Statistical Methods for the Social Sciences I

Fall, spring, and summer. 3 credits. T. DiCiccio, M. Wells.

A first course in statistics for graduate students in the social sciences. Descriptive statistics, probability and sampling distributions, estimation, hypothesis testing, simple linear regression and correlation are all covered. Students are instructed on the use of a statistics computer package at the beginning of the term and use it for weekly assignments.

#### ILRST 511 Statistical Methods for the Social Sciences II

Fall, spring, and summer. 3 credits. Prerequisite: ILRST 510 or equivalent introductory statistics course. J. Bunge, M. Wells.

A second course in statistics that emphasizes applications to the social sciences. Topics include: simple linear regression; multiple linear regression (theory, model building, and model diagnostics); and the analysis of variance. Computer packages are used extensively.

## ILRST 515 Statistical Research Methods

Spring. 4 credits. Offered **only** for the New York City M.P.S. Program. Staff. Students learn basic skills for conducting

Students learn basic skills for conducting qualitative and survey research. Students work through an introductory review course at home on their own time. After passing an exam, they attend a two-week immersion course in Ithaca taught by the on-campus faculty in July. Topics include: an introduction to surveys and discrete analysis, basic regression, and integration of qualitative and quantitative research methods.

## [ILRST 610 Seminar in Modern Data Analysis

Fall. 3 credits. Prerequisite: 2 statistics courses or permission of instructor. Not offered 2002–2003. P. Velleman.]

## [ILRST 611 Statistical Computing

3 credits. Prerequisites: linear algebra, knowledge of a programming language, and statistics at least through multiple

regression. Not offered 2002–2003. Staff. A survey of new aspects of statistical computing. Topics include: basic numerical methods, numerical linear algebra, nonlinear statistical methods, numerical integration and approximation, smoothing and density estimation. Additional special topics may include Monte Carlo methods, statistical graphics, computing-intensive methods, parallel computation, or computing environments. Designed for graduate students in the statistical sciences and related fields interested in new advances. Students may be asked to write programs in a programming language of their choice.]

## [ILRST 612 Data Mining

Fall. 3 credits. Prerequisite: ILRST 312 or equivalent, or permission of instructor. Not offered 2002–2003 J. Bunge.

An introduction to a variety of statistical techniques that assign objects to categories on the basis of observed characteristics of the objects. Course topics include: discriminant analysis and its extensions and variations; nearest neighbor methods, classification and regression trees (CART); neural networks for classification; and estimation of error of classification rules.]

## [ILRST 613 Bayesian and Conditional Inference

3 credits. Prerequisites: graduate level courses equivalent to OR&IE 670 and OR&IE 651 or permission of instructor. Not offered 2002–2003. M. Wells.

Covers the following topics: loss functions and utility theory, prior information and subjective probability, coherency, basic Bayesian inference, empirical Bayesian inference, robust Bayesian inference, Bayesian computations, ancilliarity, conditional properties of statistical procedures, and Barndorff-Nielsen's exact likelihood theory.]

## ILRST 614 Structural Equations with Latent Variables

Fall. 3 credits. Prerequisites: ILRST 210, 211 or ILRST 510, 511, or equivalent. A. Hadi. Provides a comprehensive introduction to the general structural equation system, commonly known as the "LISREL model." One purpose of the course is to demonstrate the generality of this model. Rather than treating path analysis, recursive and nonrecursive models, classical econometrics, and confirmatory factor analysis as distinct and unique, this course treats them as special cases of a common model. Another goal of the course is to emphasize the application of these techniques.

#### [ILRST 615 Expert Systems and Probabilistic Network Models

3 credits. S-U only. Prerequisite: OR&IE 560 or an equivalent course in probability and statistics. Not offered 2002–2003. Staff.]

## [ILRST 619 Special Topics in Social Statistics

Spring, 3 credits. Prerequisite: OR&IE 670 or equivalent. Not offered 2002–2003. Staff.]

## [ILRST 711 Robust Regression Diagnostics

3 credits. S-U or letter grade. Prerequisite: ILRST 312 or equivalent or permission of instructor. Not offered 2002-2003. Staff. Regression models are simplifications of reality; we rarely expect the model to be exactly true. In many applications of regression, however, small changes in a model, a model assumption, or a data point can have very large effects on the results. Regression analysis is viewed in this course as a cyclical process, which takes inputs and produces outputs in an interactive or cyclical way; a way in which the outputs can be used to diagnose, validate, criticize, and possibly alter the inputs. This is an attempt to narrow the gap between the theory and practice of regression analysis. We discuss classical methods as well as a recently developed general framework for assessing the sensitivity of the outputs to small changes in the input. Students are expected to be able to perform thorough analyses of real-life data using computer packages. Topics to be discussed include: role of variables in a regression equation, regression outliers and influential observations, robust regression, alternatives to least squares (e.g., LMS, LAV, IRLS) error-invariables models, and generalized linear models.]

## [ILRST 712 Theory of Sampling

Fall. 3 credits. Prerequisite: calculus and at least 1 semester of mathematical statistics. Not offered 2002–2003. J. Bunge. Sampling theory from the viewpoint of mathematical statistics. The first part of the course focuses on the classical or "design" approach; the second part on the more recent "model-based" approach. Attention is paid to recent progress in the field.]

## [ILRST 713 Counting Processes with Statistical Applications

Spring. 3 credits. Prerequisite: a course at the technical level of Math 572 and 574 or permission of instructor. Not offered 2002–2003. M. Wells.

The statistical analysis of life history data is playing an increasing role in the social, natural, and physical sciences. In this course students formulate and solve various practical problems in the statistical analysis of life history data using the modern theory of stochastic processes. Students examine the martingale dynamics for point processes relevant to life history data. Both parametric and nonparametric inference for multiplicative intensity models are considered. The large sample properties of the proposed procedures are discussed in detail using recent extensions of functional central limit theorems for martingales.]

## [ILRST 714 Topics in Modern Statistical Distribution Theory

3 credits. Prerequisites: courses equivalent to OR&IE 651 or Math 571, and STATS 409 or OR&IE 670. Not offered 2002–2003. Staff.

Recent research has revealed vast territories of distribution theory that are unfamiliar to most statisticians. This course provides an introduction to three topics underlining this "modern" theory: infinite divisibility, decomposability, and stability; characterization of distributions; and extensions of univariate distributions to multivariate distributions.]

## [ILRST 715 Likelihood Inference

3 credits. Prerequisites: graduate courses equivalent to OR&IE 670 and OR&IE 670. Not offered 2002–2003. Staff.

In most statistical models, exact distribution theory for testing hypotheses or constructing confidence intervals is either unavailable or computationally cumbersome. Inferences are routinely performed by using large-sample approximations to the distributions of test statistics. This course provides a survey of some recent higher-order asymptotic approximations for likelihood-based methods of inference.]

## [ILRST 716 Statistical Consulting

2 credits. Prerequisite: limited to graduate students. S-U only. Not offered 2002–2003. Staff.

A course in practical consulting on real-world statistical problems. Under the supervision of the instructor, students hear problems presented by clients (usually faculty and graduate students from other fields) and collaborate in proposing a statistical model, analyzing data, and interpreting results. Statistical computing is used as needed.]

## [ILRST 717 The Analysis of Discrete Data

Spring. 3 credits. Prerequisites: graduate courses equivalent to OR&IE 670 or permission of instructor. Not offered 2002–2003. T. DiCiccio.

This course concerns statistical models and, methods for analyzing categorical data. The key models to be covered are log-linear models for contingency tables and logistic regression models for binary-response and multinomial data. Asymptotic distribution theory necessary for inference in these models is emphasized. Other topics include conditional inference and connections with generalized linear models. Computer packages are used for analyses in practical examples.]

## ILRST 799 Directed Studies

For description, see the section, Collective Bargaining, Labor Law, and Labor History.

## **ILR EXTENSION**

## Statewide

The following courses are open to participants in the Extension Division's statewide credit programs in labor studies and management studies. Extension offices are based in Buffalo, Albany, Rochester, Ithaca, New York City, and Long Island. These courses are not open to undergraduate or graduate students matriculated in the Ithaca ILR programs. Courses and course credits earned in Extension Division certificate programs are not automatically accepted as transfer credits or as a basis of admission to the resident ILR undergraduate and graduate programs in Ithaca. Student applications for course transfer are evaluated by the ILR school on an individual basis.

## 204 Managing Conflict

Fall or spring. 3 credits. Staff. Provides students with opportunities to apply conflict resolution theory to specific situations, based on real-life problems that require resolution. Students will examine situations, analyze the facts and perceptions driving the actors, and engage in applying communication, negotiation, and mediation techniques to reduce or eliminate the conflict.

## **205 Oral Skills for Conflict Management** Fall or spring. 3 credits. Staff.

Emphasizes development of oral communications skills required to successfully manage conflict both as a party to a dispute, and as a third party who is charged with helping to resolve a dispute. The course presents simulations to help the participants practice their skills.

## 206 The Nature of Conflict

Fall or spring. 3 credits. Staff. Provides students with the conceptual foundation to engage in further study of conflict management and conflict resolution. Having taken the course, the students will be able to: identify and describe types of conflict; be able to identify the various sources of conflict; be able to apply a conceptual model of conflict to interpersonal, organizational, and international conflict situations; be able to describe conflict situations; be able to describe conflict situations in terms of social psychological aspects using a "person perception" or "attribution" theoretical orientation; and be able to identify their personal response styles to conflict.

## 208 Workplace Negotiations

Fall or spring. 3 credits. Staff. Covers the theory and practice of negotiation as it applies to workplace and business situations. Students are exposed to theoretical models of negotiation and participate in negotiation exercises. Students participate in two negotiation exercises and are asked to write a paper on their negotiating position in each exercise. More weight is given in grading to the student's ability to present a wellthought-out rationale for positions and tactics than to the outcome of the negotiation itself.

## 209 Leadership in Unions

Fall or spring. 3 credits. Staff. What role does leadership play in the vitality of the labor movement? Is there a crisis of leadership in contemporary unions? Does the political context of a democratic membership organization affect the quality of leadership? Will changing workforce demographics create a demand of increased leadership opportunities by women and minorities in their unions? This course examines theories of leadership including a comparison of leadership styles and skills in the context of changing needs of the labor movement. The dynamic relationship of leaders and followers is examined in regard to emerging internal union organizing strategies which aim to increase membership and to activate current members.

## 212 Labor, Technology and the Changing Workplace

Fall or spring. 3 credits. Staff.

Technological changes are having a profound impact on both work and society. But what do these changes mean for workers and their unions? Is resisting technological change equivalent to obstructing progress? What can we do to influence how work is shaped and performed? These and other questions are the central concerns of this course. The course is divided into three sections: Skills, Technology, and the Labor Process; Industrial Change and Worker Responses: Four Historical Case Studies; Unions, Technology, and the Future of Work.

## 220 Health Benefits and Policy for Unions

Fall or spring. 3 credits.

Will introduce union members to the basics of health care and the role of organized labor in shaping it and providing it, and to develop critical thinking that can provide direction for future development. The course is directed at Stewards, business agents, up through senior union officers and plan staff. Interested rank and file welcome.

## 240 Union Organizing

Fall or spring. 3 credits. Staff. Students learn which unions are organizing successfully today, and which workers are joining unions. Through case studies, discussion, and in-class exercises, they learn about targeting, house calls, building rank and file organizing committees, how to talk union, inoculating against anti-union campaigns, legal aspects of organizing, and innovative ways to organize outside of government-run certification elections.

#### 241 Arbitration

Fall or spring. 3 credits. Staff.

A study of the place and function of arbitration in the field of labor-management relations, including an analysis of principles and practices, the law of arbitration, the handling of materials in briefs or oral presentation, the conduct of an arbitration hearing, and the preparation of an arbitration opinion.

#### **242** Public Sector Collective Bargaining Fall or spring. 3 credits. Staff.

An introduction to collective bargaining in the public sector. Examines the historical development of bargaining in public employment, the evolution of state and federal and bargaining theory and practices, as well as impasse resolutions techniques frequently found in this sector. Special emphasis is given to developing an understanding of the similarities and differences between public and private sector bargaining and how they have affected tactics and strategies employed by the parties.

## 245 Public Sector Labor Law

Fall or spring. 3 credits. Staff. A survey and analysis of the New York State Public Employees Fair Employment Act is made as well as a comparison with other state laws covering public employees. The course examines the extent to which the law protects and regulates concerted actions by employees in the public sector. The intent is to study and understand the law as written, but more importantly to understand how it has been interpreted by the courts of New York State in its application. Major emphasis is in employee and employer rights, including recognition and certification, improper practices, strikes, grievances, and disciplinary procedures of the New York State Public Employment Relations Board

## **247 Labor and the American Economy** Fall or spring. 3 credits. Staff.

Helps the student understand how economic theories relate to the economic problems confronting the American citizen in general and the American union member in particular. Emphasis is placed on contemporary economic theories and how their proponents attempt to solve American economic problems.

## 248 Employment Practices Law

Fall or spring. 3 credits. Staff. Considers laws and regulations that directly affect managers and employers. Students examine issues and laws such as Equal Employment Opportunity, Employee Retirement Income Security Act, Federal Wage and Hour Laws, Occupational Safety and Health Act, unemployment laws, and other topics. Students focus on the practical application of laws and their impact on the workplace.

#### 250 New York Workers' Compensation Law for Trade Unionists and Injured Workers

Fall or spring. 3 credits. Staff. There is a collective perception that the Worker's Compensation system in New York compounds an injured personal predicament with Byzantine responses that lead to despair. Unions and injured workers' organizations believe that, if properly empowered, they can be just as effective as lawyers in looking after their injured colleagues' claims. This course is structured to meet both of these realities. Students delve into every nook and cranny of New York Worker's Compensation law. The course is entirely practical. Skills teaching, how to present a case, decorum, ethics, and persuasiveness, are built into the course. Experts on how the system really works are used.

## 251 Principles and Practices of Management

Fall or spring. 3 credits. Staff. Presents the theory and processes of management with an emphasis on supervision. Management functions of planning, organizing, staffing, and evaluating are included. Concepts and theories are presented, and case studies are analyzed. Motivating people, exercising leadership, and effectively developing employees are emphasized.

## 252 Contract Bargaining

Fall or spring. 3 credits. Staff. Examines the principles of contract bargaining, including bargaining environments and structures as well as standards used in bargaining. Students learn to prepare bargaining demands, cost economic items, draft noneconomic contract language, negotiate economic and noneconomic issues, and resolve a contract bargaining impasse. The course considers the impact of contract bargaining outcomes on workers, unions, employers, and the public.

## 253 Contract Administration

Fall or spring. 3 credits. Staff. Focuses on the role of the steward in administering the union contract in the workplace. Students evaluate grievance and arbitration contract clauses, the grievance procedure in practice, the role of the union steward, the role of local and international unions, negotiation of grievances, and preparation for arbitration. Students analyze the impact of grievance and arbitration procedures on workers, unions, and employers.

#### 254 Labor Law

Fall or spring. 3 credits. Staff. Examines the principles of labor law by looking at social philosophy and the historical context of federal labor legislation from the 1930s. Students concentrate on major provisions of the National Labor Relations Act, examining how the National Labor Relations Board and the federal courts have interpreted the national labor laws. Discussion includes new directions in labor legislation and interpretation with consideration given to the impact of labor law on workers, unions, and employers.

## 255 Labor History

Fall or spring, 3 credits. Staff. Reviews American labor history from the perspective of workers' social dimensions of the development of the working class, reform and revolutionary movements, and the emergence of craft, industrial, and public employee unions. Included is a discussion of the development of trade union institutions and leaders, and the evolution of union political activities and collective bargaining. Special attention is paid to the involvement of women and minority workers with unions.

## 256 Dispute Resolution

Fall or spring. 3 credits. Staff. Examines third-party participation in dispute resolution in private and public sector collective bargaining. Development of dispute resolution methods in American labor relations; issues and practices in neutral, binding arbitration of grievances and mediation; conciliation; and fact finding procedures are discussed. Use of exclusive labor-management mechanisms to settle industry disputes is also looked at.

## 258 Organizational Behavior

Fall or spring. 3 credits. Staff. Designed to illustrate how behavioral science theory leads to research and how theory and research provide a basis for practical application in business, industry, education, and government.

## 259 Union Administration

Fall or spring. 3 credits. Staff. Focus is on the principles and practices of effective union administration. Students study the dynamics of democratic organizations and the development of organizational leadership. The course explores alternative methods of decision making and lines of responsibility. The legal obligations of unions and union officials is discussed and analyzed. The course also examines the structure and evolution of relationships inside the labor movement.

## 262 Project Management

Fall or spring. 3 credits. Staff. Through the process of restructuring, many companies are "flattening out" the hierarchy of management levels. This means that more responsibilities are shifting downward to employees who may not have the status (authority) of supervisor or manager, but who have the enormous responsibility of completing complex, critical projects within welldefined business constraints. In response to the shift in responsibility downward and with much more to be accomplished with limited resources, the demands for employees with effective project management skills are increasing. Employees who can successfully manage projects are and will continue to be the most marketable individuals in the work force because their skills are transferable to all disciplines, organizations, and situations.

## 264 Contemporary Labor Problems

Fall or spring. 3 credits. Staff. A survey of the major challenges that confront the American labor movement. Students are briefed on the background of each problem and discuss and analyze a broad range of solutions proposed by the experts.

## 269 The Evolution of Work in America

Fall or spring. 3 credits. Staff. Explores the evolution of contemporary business operations. Discussion focuses on historical and present-day theories of work organization, changes in the workplace and

334

workforce, and future trends. The relationships between businesses and the societies in which they exist, in both local and global economies, are also examined.

## 343 Health in the Workplace

Fall or spring. 3 credits. Staff. Examines the state and federal laws that affect job safety, and health, and the way workers and their unions can use legislation to promote safe and healthy working conditions. Topics include safety and health standards; the enforcement of laws and standards; the responsibilities of management; the rights of employees and their unions, including rights to information; collective bargaining for safety and health; racial- and gender-based discrimination regarding hazardous work; and drug testing.

## 344 Union Strategies for Safety and Health

Fall or spring. 3 credits. Staff. Even with OSHA, the most effective tool for change in the unionized work environment remains the collective bargaining process and collective action. This course explores specific strategies for making the workplace safer through collective bargaining, workers education, safety and health committees, joint labor-management committees, working with COSH groups, union-sponsored medical exams at occupational health clinics, and the OSHA complaint process. Case studies consider integration of occupational health initiatives into broader union strategies such as organizing drives and industrial development planning.

## 345 Health Hazards Identification and Evaluation in the Workplace

Fall or spring. 3 credits. Staff. Students learn about the many work site health hazards including toxic chemicals, biological agents, radiation, and electromagnetic fields. Routes of exposure, acute and chronic health effects, and the bases of regulatory exposure limits such as TLV's and OSHA PEL's are discussed. Basic hazard evaluation and information gathering techniques familiarize students with available resources for evaluating work site conditions.

#### 346 Introduction to Industrial Hygiene: Hazard Evaluation and Control

Fall or spring. 3 credits. Staff. Builds on the knowledge acquired in both the safety hazard and health hazard courses to provide students with greater mastery of hazard evaluation and control methods. (Students are encouraged to complete the health hazard and safety hazard courses before taking industrial hygiene.) The course provides practical, hands-on training in evaluating potential worksite hazards. Students learn about environmental monitoring methods such as air sampling and become familiar with the commonly used equipment. They also learn to interpret and evaluate monitoring data provided by professional testers.

#### **347 Safety Hazards Identification and Evaluation in the Workplace** Fall or spring. 3 credits.

Safety hazards (as opposed to health hazards) generally involve harm of an immediate and sometimes violent nature; health effects include burns, electrical shock, broken bones, and the loss of limbs, eyesight, or hearing. With chemicals, the primary concern is their explosive, reactive, or flammable nature rather than with the toxic effects that are the focus of health hazard evaluation. Students become familiar with site inspection and hazard identification methods and learn about control techniques appropriate for a variety of work settings.

## **367 Safety and Health in the Workplace** Fall or spring. 3 credits. Staff.

Provides basic education and training in workplace safety and health. The course focuses on applicable federal and state laws, standards for safety and health, industrial hygiene, and such health concerns as asbestos, radon, and AIDS. Practical experience is provided through workplace walkthrough safety and health inspections and in use of industrial hygiene equipment to measure noise, temperature, humidity, airflow, and airborne toxins.

## **FACULTY ROSTER**

- Abowd, John M., Ph.D., U. of Chicago. Edmund Ezra Day Prof. of Industrial and Labor Relations, Labor Economics
- Angellotti, Jon E., M.S. candidate, Cornell U. Lecturer, Social Statistics
- Bacharach, Samuel, Ph.D., U. of Wisconsin. Jean McKelvey-Alice Grant Prof. of Labor Management Relations, Organizational Behavior
- Batt, Rosemary, Ph.D., Mass. Inst. of Technology. Assoc. Prof., Human Resource Studies
- Bishop, John H., Ph.D., U. of Michigan. Assoc. Prof., Human Resource Studies
- Blau, Francine D., Ph.D., Harvard U. Francis Perkins Prof. of Industrial and Labor Relations, Labor Economics
- Boudreau, John W., Ph.D., Purdue U. Assoc. Prof., Human Resource Studies
- Boyer, George R., Ph.D., U. of Wisconsin. Prof., Labor Economics
- Briggs, Vernon M., Jr., Ph.D., Michigan State U. Prof., Human Resource Studies

## JOHNSON GRADUATE SCHOOL OF MANAGEMENT

## **ADMINISTRATION**

Robert J. Swieringa, dean

John A. Elliott, associate dean for academic affairs

Michael J. Hostetler, associate dean for executive education

Thomas B. Hambury, director of EMBA Program

Cathy S. Dove, associate dean for MBA Program and operations

Richard A. Shafer, associate dean for corporate relations

Rosalyn A. Hines, executive director of development and alumni development

Natalie M. Grinblatt, director of admissions

Richard A. Shafer, director of career services Rhonda H. Velazquez, director of student activities and special events

Sherry L. Canger, assistant to the dean

Ann W. Richards, financial aid director and associate director of admissions

Janet S. Gray, registrar and associate director for MBA Program

The Johnson Graduate School of Management prepares men and women for managerial careers in business. The school offers course work in many disciplines to provide potential managers with an understanding of the complexities of the professional world in which they will operate and of the organizations of which they will become a part.

A bachelor's degree or its equivalent is required for admission to the two-year program leading to the Master of Business Administration (M.B.A.) degree. Nearly half of the students have a background of undergraduate studies in arts and sciences, and about one-quarter in engineering. Five percent of the students begin their graduate training immediately after receiving their bachelor's degrees and the remaining 95 percent following work experience.

Combined degree programs allow highly qualified Cornell students to co-register in the school during their senior year, thereby earning a master's degree in less than the usual time.

The doctoral program, administered through the Graduate School, provides an advanced level of education in business for those who seek careers in teaching and research at leading universities.

More detailed information about these programs is available from the Office of Admissions and Student Affairs, Johnson Graduate School of Management, Room 111 Sage Hall.

Students in other graduate programs and undergraduate students registered with the university are welcome in many classes. Since matriculated MBA students require certain courses for graduation, non-Johnson School students are not allowed to pre-enroll. During the first week of classes, registration of non-Johnson School students occurs on a space available basis.

## UNDERGRADUATE ONLY

## NBA 300 Entrepreneurship and Enterprise

Fall, spring. 3 credits. D. BenDaniel. The course uses Cornell-developed case studies and lectures to address entrepreneurial management in start-up ventures and newbusiness development in existing companies. Among the topics covered are valuation of business, planning, obtaining resources, management of growth, and cashing out. Guest lecturers speak on specialized topics such as corporate and patent law, bankruptcy and workouts, leveraged buy-outs, and valuations of businesses. Students team up to write and present business plans. The course attempts to integrate marketing, finance, operations, and human-resource topics in the context of high-growth business ventures. For non-Johnson School students only. Johnson School students see NBA 564.

## NBA 401 Entrepreneurship for Scientists and Engineers

Fall, spring. 3 credits. J. Nesheim, G. Schneider.

This course is intended to introduce students to the new business startup process. Small teams will be formed to come up with an idea for a startup and create a business plan that can attract venture capital or other funding for the new enterprise. Guest lecturers are from successful high-technology companies. The course is led by instructors from Silicon Valley and Ithaca who created high-technology businesses.

# COURSES FOR NON-JOHNSON SCHOOL STUDENTS

## NCC 550 Financial Accounting

Fall, spring. 3 credits. Course intended for

non-Johnson School students only. Staff. An introductory accounting course that examines the subject from the viewpoint of users external to the organization. Topics include transaction analysis; the accounting cycle; financial-statement preparation, use, and analysis; revenue recognition and cost measurement; present value; and problems in financial-accounting disclosure. This course is similar in content to the MBA core course NCC 500.

## NCC 553 Marketing Management

Fall, spring. 3 credits. Course intended for non–Johnson School students only. Staff. The course addresses controllable and uncontrollable marketing variables that managers in multi-product firms face in today's business environment. Topics include customer behavior, product planning, distribution. advertising and promotion, pricing, and competitive strategy. This course is similar in content to the MBA core course NCC 503.

## NCC 554 Management and Organizations

Fall. 3 credits. Course intended for non-Johnson School students only. Staff. This course takes a resource-based approach to management by arguing that organizations should link their strategy to their internal resources and capabilities. This theme is developed by addressing: (1) the strategic value of internal resources and capabilities; (2) the role of human resources and organizational behavior in formulating and implementing strategy; and (3) the importance of structure and the design of organizations in formulating and implementing strategy. Included among the topics are: how firms create sustainable competitive advantage through internal resources and capabilities; what the best practices are for managing people; what effects best practices have on attitudes and behaviors; why putting the customer first is not necessarily best practice from a resource-based perspective; why organizational culture is central to organizational effectiveness: why the formal organizational chart and structure of an organization are important; how organizations innovate; how organizations change through rearchitecture and re-engineering; what firms gain and lose through pursuing core competencies; and what firms gain through strategic alliances and networks. The course makes extensive use of case materials. This course is similar in content to the MBA core course NCC 504

## NCC 556 Managerial Finance

Fall, spring. 3 credits. Course intended for non–Johnson School students only. Staff. An introduction to business finance through theory and case studies. Topics include stock and bond valuation, the capital-budgeting decision, portfolio theory, the asset-pricing models, raising capital, capital structure, mergers and acquisitions, costs of capital, option pricing, and risk management. International applications are considered within each topic area. Letter grade only, based on exam, group case reports, homework and class participation. This course is similar in content to the MBA core course NCC 506.

## NBA 553 Accounting and Finance for Engineers

Spring. 3 credits. Course intended for non-Johnson School students only. J. D'Souza. This course focuses on basic financial and managerial accounting and the economic and financial concepts that have a bearing on managerial decisions. The goals of the course are: (1) to give students a working knowledge of the accounting process and the value and limitations of the data that comes out of the accounting information system; (2) to familiarize students with key concepts in managerial accounting and the application of cost information to pricing and operating decisions; (3) and to promote an understanding of the use of economic theory in the evaluation of capital investment projects. The teaching methods consist of lectures and cases. Students are evaluated on the basis of exams.

## **IMMERSIONS**

Only at the Johnson School will you find learning immersion courses in manufacturing, managerial finance, investment banking, brand management, entrepreneurship, and e-business. Immersions offer a semester of continuous focus, real-world problem solving, and site visits to dozens of companies.

## MFI — Managerial Finance Immersion

This is a unique immersion course specifically designed for students planning to pursue finance careers. Some students interested in non-finance careers (including consulting) may wish to consider this course, but they should recognize that it is not specifically designed for this purpose. A major objective of this course is to help students make more informed choices about how to launch their finance careers.

- NBA 502 Managerial Cost Accounting 3.0 credits.
- NBA 549 Managerial Finance—Practicum 1.0 credits.
- NBA 506 Financial Statement Analysis 1.5 credits.
- NBA 558 Corporate Financial Policy 1.5 credits.
- NBA 565 Corporate Governance 1.5 credits.
- NBA 656 Valuation Principles 1.5 credits.

NCC 508 Managing Operations 2.5 credits.

#### NCC 509 Strategy 2.5 credits

## **IBI** — Investment Banking Immersion

This course is specifically designed for those students planning to pursue careers in investment banking. The course is inappropriate for students interested in following a finance career in non-financial industry or non-finance careers (including consulting).

This course is designed to meld the practical and the theoretical aspects of the field. We will be expecting a great deal of interaction and discussion between students, the participating faculty, and visiting practitioners. While the course is designed to make its students more attractive as candidates for employment in the investment banking profession, and we expect that some of the participating firms will be using their visits to identify candidates for summer internships, obtaining relevant summer internships remains the responsibility of the students. Prerequisite: NCC 506.

NBA 500 Intermediate Accounting 3.0 credits.

- NBA 556 Investment Banking— Practicum 1.0 credit
- **NBA 506 Financial Statement Analysis** 1.5 credits.
- **NBA 511 Financial Modeling** 1.5 credits.
- NBA 558 Corporate Financial Policy 1.5 credits.
- NCC 508 Managing Operations 2.5 credits.
- NCC 509 Strategy 2.5 credits.
- NBA 656 Valuation Principles 1.5 credits.

## SBM —Immersion in Brand Management

This is a full-time program for the semester; students will not be able to take other courses concurrently. The course objective is to begin developing students to think and act like brand managers, some of the best trained and most upwardly mobile professionals in industry. It will provide students with a unique opportunity to begin internalizing the concepts, principles, and tools necessary to achieve success in brand management. While the course focuses on managing traditional consumer brands, high tech products, services, and global branding will also be addressed. In-class methods consist of: (1) academic and industry lecturers; (2) on-site visits with marketing and manufacturing professionals; (3) case and project discussions and presentations; and (4) a brand management simulation. Course requirements consist of: (1) discussion of readings; (2) individual case write-ups and presentations; (3) group projects and presentations (including a capstone simulation); and (4) in-class exams. There will be considerable off-campus travel for field study. Prerequisites: NCC 500, 501, 502, 503, and 506. Restricted enrollment permission of the instructor required.

NBA 624 Brand Management—Practicum 4.0 credits.

- NBA 502 Managerial Cost Accounting 3.0 credits.
- NBA 620 Marketing Research 3.0 credits.
- NCC 508 Managing Operations 2.5 credits.
- NCC 509 Strategy

## SIM—Semester in Manufacturing

This is a full-time program for the semester; students cannot take other courses concurrently. The course is concerned with the integration of technological, human-resource, logistical, and financial considerations to produce a manufacturing enterprise that can respond quickly and effectively to market requirements. The class is taught by a team of faculty and industrial practitioners, and much of the student work is team-oriented. There is off-campus travel for field study of various manufacturing plants. Johnson School students should complete NCC 501 and NCC 506 before taking this course. Enrollment limited; permission of instructor required.

NBA 650 Semester In Manufacturing Practicum 10 credits

10 credits.

NCC 508 Managing Operations 2.5 credits.

NCC 509 Strategy 2.5 credits.

## **EBI**—Electronic Business Immersion

The E-Business Immersion is unusual in that it is a joint undertaking of the Johnson School and Cornell's Faculty of Computing and Information Science (CIS). Three faculty members from CIS will participate in teaching the course, providing state-of-the-art background in Internet infrastructure and technology. EBI project work will be done by mixed teams of MBA and computer science graduate students. The computer science students will learn about business models and strategy; the MBA students will get a direct understanding of the limited and potential of technology, and both will learn from the approach and perspectives of the other.

The E-Business Immersion is also unusual in that it has a corporate sponsor and partner. Corning Inc., a world leaders in fiber, cable, and photonics, will supply speakers and open its nearby facilities to site visits. In addition, the EBI project teams will join existing projects in various Corning divisions. Corning staff will be invited to attend and participate in EBI classes.

E-business, of course, is a field that has experienced unprecedented growth and, recently, attrition. The immersion will examine the rapid rise and fall of the early phases of the Internet economy and look for patterns and lessons. If the first round of pure-play B2C is somewhat tarnished, there is no doubt that multi-channel B2C activity will become vitally important in many industries. Customized manufacturing will be a significant part of this-a topic that EBI will explore jointly with the Semester in Manufacturing. Also joint with SiM will be examination of procurement and supply-chain coordination. EBI will also assess the next generation of applications that can be supported by wireless, networked Internet appliances.

EBI seeks to prepare students to deal with a world of infinite bandwidth, unlimited storage, and universal wireless connectivity. It will examine the fundamental underlying issues of intellectual property protection, privacy and security, and the challenging economics of zero-marginal-cost goods. It will identify and distinguish the four different levels of ebusiness problems: strategy, tactical design, implementation, and execution.

The Internet is inexorably transforming the way the world does business. Cornell's E-Business Immersion is an appropriately innovate way to address preparation for participation in this revolution.

NBA 508 Managing Operations 2.5 credits.

**NBA 509 Strategy** 2.5 credits.

## NBA 684 Internet Technology and Applications

3 credits.

NBA 685 Rebooting IT Strategy 3 credits.

# [NBA 686 E-Business Projects

Not offered 2002-2003.]

## EBI—Entrepreneurship and Private Equity Immersion (E&PE)

This is a comprehensive course that integrates the technical, strategic, and economic aspects of entrepreneurship and is the student's full course load for the semester. David J. BenDaniel, the Don and Margi Berens Professor of Entrepreneurship at the Johnson School, will lead the faculty team for this immersion.

- NBA 564 Entropreneurship & Private Equity 3 credits.
- NBA 653 Strategic Alliances 1 credits.
- NBA 502 Managerial Cost Accounting 3 credits.
- NBA 656 Valuation Principles 1.5 credits.

NBA 531 Startup Forum 1 credits.

NBA 559 Venture Capital & Private Equity Markets

NCC 508 Managing Operations 2.5 credits.

NCC 509 Strategy

2.5 credits.

## NCC COMMON CORE COURSES

## NCC 500 Financial Accounting

Fall. 2.5 credits. Johnson School core course. Enrollment limited. R. Libby. An introductory accounting course that examines the subject from the viewpoint of users external to the organization. Topics include transaction analysis; the accounting cycle; financial-statement preparation, use, and analysis; revenue recognition and cost measurement; present value; and problems in financial-accounting disclosure.

## NCC 501 Statistics for Management

Fall. 2.5 credits. Johnson School core course. Enrollment limited. J. McClain. An introduction to decision making under conditions of uncertainty. Topics include descriptive statistics, probability theory, classical statistics, statistical decision theory, and simple and multiple regression analysis. Applications in finance, marketing, and operations management are discussed.

#### NCC 502 Microeconomics for Management

Fall. 2.5 credits. Johnson School core course. Enrollment limited. R. Hilton. Microeconomic theory is introduced and applied to problems faced by managers. Specific topics covered include supply and demand, consumer behavior, pricing when a firm has market power, and the role of contracts. The class employs a lecture format and emphasizes problem solving. Grading is based on a midterm and a final exam.

#### NCC 503 Marketing Management

Fall. 2.5 credits. Johnson School core course. Enrollment limited. D. Stayman, S. Jain.

The course is designed to convey the key concepts of marketing and how they fit into the larger context of management strategy and decisions. Both the practical "how" and the fundamental "why" of marketing activities are presented in the light of contributions from behavioral science, economics, and statistics. The goals are to provide sufficient understanding for those who will need only to interact with the marketing function, as well as communication concepts and developing processes that can provide the foundation for further course work and future experience in marketing. The course makes extensive use of case materials.

#### NCC 504 Managing and Leading in Organizations

Fall. 2.5 credits. Johnson School core course. Enrollment limited. D. Sally, K. O'Connor.

If you think about it, stories are central to how we know and remember events, people, and facts, and to how we communicate knowledge and history. Most of the jobs you aspire to involve a particular form of story-tellingthe CEO's vision, the analyst's report, the planner's strategy, the salesperson's pitch, the consultant's analysis, and the manager's brand. What distinguishes these as business stories is that they are often analytical (based on a set of objective facts and statistics) and reflect a deep understanding of the complex interactions of individuals and organizations. This course has two goals: (1) to make you appreciate the complexity of the issues that often arise in organizations, and (2) to develop and refine your analytical story-telling abilities. To achieve these goals, the course will be taught by the case-study method. Cases are an efficient way to expand your experience base with respect to such issues as motivation, power, leadership, ethics, structure, design, and change. We hope to teach you how to make good inferences about what will and won't work in particular situations, and how to learn from your own experiences and those of others.

## NCC 506 Managerial Finance

Fall. 2.5 credits. Johnson School core course. Enrollment limited. R. Michaely. The course objective is to introduce students to the basic concepts of finance. In particular, we address the issue of what type of investments should firms and individuals take on, and how these investments should be financed. Understanding these concepts are essential to financial managers and professional investors, and has important applications to many aspects of financial decisions all of us have to make on a daily basis (e.g., is getting a MBA a good investment?). These issues involve capital budgeting decisions, stock and bond valuation, how to assess andaccount for risk through the capital asset pricing model (CAPM), option pricing, capital structure and cost of capital, and market efficiency. Letter grade only, based on examinations, quizzes, group case reports, homework, and class participation.

## NCC 508 Managing Operations

Spring. 2.5 credits. Johnson School core course. Enrollment limited. Prerequisite: NCC 501 or permission of instructor. R. Zhang.

This course focuses on managing processes: actions that convert inputs into outputs. Almost any business function can be modeled as a network of processes. The first part of the course examines processes, both individually and as part of a larger system; we see that good process design reflects both the volume and the variety of the product. A common course theme is the deleterious effect of variability (in demand, supply, quality, or capacity) in complex systems. Queuing theory and simulation are particularly helpful for analyzing process capabilities. The second part of the course analyzes how goods and services are produced. After describing the strategic role of operations, we examine forecasting systems, inventory management, and just-in-time and logistic management. Constrained optimization models provide information about managing with finite resources. The final part of the course examines process improvement through quality and productivity management and corporate learning.

## NCC 509 Strategy

Spring. 2.5 credits. Johnson School core course. Enrollment limited. V. Kadiyali, J. Johnson.

Among the critical tasks facing any senior manager are the creation, implementation, and evaluation of a business unit's strategy. This course seeks to provide the management student with the tools and frameworks essential to carrying out these tasks. Many of these tools and frameworks are based on recent advances in game theory, industrial organization, and organization theory, although the course also draws from the older business policy tradition as well. Students who successfully complete this course will be able to analyze industries, identify areas of strategy advantage and disadvantage, and to devise strategies that exploit advantages and remedy disadvantages.

# NBA MANAGEMENT ELECTIVE COURSES

## Accounting

## NBA 500 Intermediate Accounting

Fall, spring. 3 credits. Prerequisite: NCC 500 or the equivalent. T. Dyckman. The course is based on the essential concepts and terminologies of financial accounting introduced in the accounting core course. Students learn to evaluate financial statements through the use of case studies drawn from actual corporate financial reports.

## NBA 502 Managerial Cost Accounting

Fall, spring. 3 credits. Prerequisites: NCC 500, NCC 501, and NCC 502, or the equivalent. R. Hilton.

The course is designed both for those responsible for internal accounting information and those who use such information for decision making. Topics include budgeting, accumulating costs for product costing, activity-based costing, standard costs, the analysis of cost variances, cost estimation and prediction, cost-price-volume decisions, performance measurement, nonmanufacturing cost analyşis, cost allocation, and transfer pricing. Instruction will be a mixture of lecture and case discussion. Student evaluation will be based on a midterm exam, a final exam, a project, and class participation.

## NBA 503 Strategic Cost Management 1.5 credits. R. Hilton.

This course focuses on the role of cost management and related issues in helping a firm compete successfully in the global market. Topics considered include activitybased costing, activity-based management, value chain analysis, the lean enterprise, confronting competition in an industry dominated by lean enterprises, re-engineering, process value analysis, identification of nonvalue-added activities and costs, target costing, Kaizen costing, continuous improvement, time-based competition, cost versus quality, and benchmarking. The course is almost entirely based on cases, many of them lean enterprises in Japan.

#### NBA 504 Taxation Affecting Business and Personal Decision Making

Spring. 1.5 credits. Prerequisite: NCC 500 or permission of the instructor. R. Bloomfield.

This course introduces students to the fundamental concepts and techniques of tax planning for individuals and businesses. Planning opportunities considered include changing the timing and nature of income, investments, and expenses; choosing an organizational form; and constructing transactions that allow two or more parties to engage in tax arbitrage. The course also introduces tax research techniques and issues regarding tax compliance. Course continues with NBA 507.

## NBA 506 Financial Statement Analysis

Spring. 1.5 credits. Prerequisite: NCC 506, NBA 500 (or concurrent enrollment) or permission of the instructor. S. Bhorjraj, P. Hribar.

This course develops a set of core skills essential to financial statement analysis. We will cover strategic ratio analysis, cash flow analysis, pro forma financial statements, financial modeling, credit analysis, bond rating and bankruptcy predictions, and firm valuation using discounted cash flow techniques. Emphasis is on practical applications. The course format is a combination of case studies and lectures. The lectures communicate subtler aspects of the material while the cases provide hands-on experience. There will be an exam.

Note: Students who have completed the threecredit version of NBA 506 cannot enroll in this course.

## NBA 509 Advanced Financial Analysis

Fall. 1.5 credits. Prerequisites: NBA 506, a finance immersion course, or permission of the instructor. S. Bhorjraj.

This course builds on the core financial analysis skills developed in NBA 506. Topics covered include equity valuation, residual income models, quality of earnings assessments, earnings manipulation detection, market efficiency issues, fairness opinions in MBO's, and large sample stock screening strategies. The overall focus is on using accounting-based information to make investment decisions. Emphasis is on practical applications and special attention is given to cultivating analytical and communication skills. The course features both lectures and cases. There will be a group term project, but no final exam.

Note: Students who have completed the threecredit version of NBA 506 cannot enroll in this course.

## NBA 511 Financial Modeling

Fall, spring. 1.5 credits. Prerequisites: NBA 506 or permission of the instructor, and mastery of basic EXCEL skills. J. D'Souza, P. Hrilar.

Financial modeling is the art and science of constructing spreadsheet models of firms' future financial statements. This class, builds on the brief introduction to financial modeling in NBA 506 by modeling the effect on the income statement, balance sheet, and statement of cash flows of more complicated financial transactions such as leveraged buyouts, mergers & acquisitions, and corporate reorganizations. The class meets in the state-of-the-art Parker Center computer lab, and active student participation is emphasized.

## NBA 512 Applied Portfolio Management

Fall, spring. 3 credits. Restricted. B. Swaminathan, C. Lee. An accounting/finance elective course that focuses on the management of an investment fund (see Charles Lee for a full course description). Students enrolled in this course must commit to taking the course for fall and spring semesters. They receive three credit hours for each semester's work. Strong preference is given to second year MBA students who have successfully completed either NBA 506 or one of the finance immersions. Students need to apply formally. If the number of applicants exceeds 12,

## Economics

#### NBA 524 Macroeconomics and International Trade

admission is competitive and merit-based.

Fall. 3 credits. Prerequisite: NCC 502 or equivalent or permission of the instructor. I. Azis.

The course applies basic macroeconomic theory to such problems as inflation, unemployment, economic growth, and productivity and examines how those problems interact with international trade and finance. Students learn to be informed observers of national and international economic policies and discerning users of economic analyses and forecasts. A lecture/ discussion format is used as the method of instruction.

## Entrepreneurship

## NBA 530 Entrepreneurship Lab

Fall, spring. 3 credits. Prerequisites: NBA 564 Entrepreneurship, or concurrent enrollment, or permission of the instructor.

MBA students only. P. Sears. Students team up with entrepreneurs in the greater Ithaca area on defined projects, which will be integral to the companies' operations, such as production planning, new product launches, or assessing organizational structure. The goal of the course is for students to gain first-hand exposure to the application of functional knowledge in a start-up setting, while bringing real value to the host company.

#### NBA 531 Startup Forum: Cornell Technologies with New Venture Potential

Fall, spring. 1 credit. R. Ryan. The course focuses on research at Cornell, which may be a basis for new business ventures. It addresses the fundamental ways in which university-based research differs from industrial research. Students explore and critique the business potential of each concept.

## NBA 532 New Business Development

Spring. 1.5 credits. P. Sears. The course examines the role of the business development executive in managing partnerships between big companies and new ventures. Topics include setting growth targets, negotiating partnership agreements, managing expectations, licensing, and divestiture.

## NBA 559 The Venture Capital Industry and Private Equity Market

Spring. 0.5 credit. D. BenDaniel. This course focuses on the industry from the practitioners' perspective. Topics include (1) an introduction to the private equity market focusing on the transactions that define the industry, its structure, participants, history and trends; (2) institutional private equity investing—now an increasingly important and dynamic part of the asset allocation mix; and (3) issues in private equity investing such as concentration in fewer, larger funds and the critical role of a new class of gatekeeper/ consultants for limited partners. The course involves four lectures and a final paper.

## NBA 563 Initial Public Offerings and Acquisitions

Spring. 3 credits. J. Shulman. An in-depth look at initial public offerings (IPOs) and acquisitions from a practitioner's point of view. With respect to IPOs the course covers: the applicable statutory framework, pre-offering corporate preparation (such as implementation of poison pills and stock option plans), the due diligence process, the implementation of corporate governance policies appropriate for a public company, the offering registration process, liability under federal securities laws, the Securities and Exchange Commission review process, underwriting arrangements, pricing, selection of a trading forum (i.e., NYSE, NASDAQ, or AMEX) and the consequences of going public. Regarding acquisitions, the course explores: financing alternatives, accounting treatment, due diligence, choosing an appropriate transaction structure (i.e., stock versus asset sale) and crucial aspects of acquisitions, such as letters of intent, continuity of employees, anti-takeover strategies, and non-competition agreements. Mr. Shulman is an attorney with experience in IPOs and acquisitions, and an adjunct professor at the Cornell Law School where he teaches a seminar course on this topic.

## NBA 564 Entrepreneurship and Enterprise

Fall, spring. 3 credits. D. BenDaniel. The course uses Cornell-developed case studies and lectures to address entrepreneurial management in start-up ventures and newbusiness development in existing companies. Among the topics covered are valuation of business, planning, obtaining resources, management of growth, and cashing out. Guest lecturers speak on specialized topics such as corporate and patent law, bankruptcy and work-outs, leveraged buy-outs, and valuations of businesses. Students team up to write and present business plans. The course attempts to integrate marketing, finance, operations, and human-resource topics in the context of high-growth business ventures.

## NBA 653 Strategic Alliances

Spring. 1 credit. J. Suwinski. A wide variety of strategic alliances are being used today as companies try to leverage their resources for competitive advantage. This course gives an overview of the spectrum of alliances, examining the strategic rationale and pros and cons of each major type of alliance. The primary focus of the course is on joint ventures as a specific form of strategic alliance, where the success rate is less than 50 percent. The course develops a set of principles that have contributed to success for Corning Incorporated. The course is taught from the perspective of the general manager of a major business unit.

#### NBA 678 Special Lectures on the Venture Capital Industry

Spring. 1.5 credits. Prerequisites: NBA 564, NBA 300, NBA 401 or permission of instructor. J. Bartlett, D. Bendaniel. The course focuses on venture capital financing, including the issues facing emerging growth companies as they progress from early-stage start-up status to mature public companies. The emphasis is on practical skills: hands-on examination, for example, of how deals are negotiated and valuations arrived at, our principal focus being the so-called Series A, or first professional, round of financing. We view the early-stage space from three points of view: the entrepreneur, or founder; the professional investors, or VCs; and, the key executives, i.e., the major players in emerging-growth finance. We review economics; finance; tax; securities; corporate and employment law considerations; and, finally, custom and usage in the industry. This is an Internet course with one classroom lecture with Prof. Bartlett.

## Finance

#### NBA 540 Advanced Corporate Finance (Theory and Practice)

Fall, spring. 3 credits. Prerequisite: NCC 506 or the equivalent. Students who took NBA 540 and/or NBA 548, 1.5 credit version, can not enroll in this course. H. Bierman.

This course is relevant for both investment banking and the treasurer's activities of an operating corporation. Most class sessions are lecture-discussion, but there are several corporate finance cases. The topics include common stock, preferred stock, debt securities (duration, convexity, inverse floaters, bond refunding, term structure, swaps), hybrids, security design, weighted average cost of capital, basic capital structure issues, cash distribution policy, and the buy versus lease decision. The use of debt to add value, mergers and acquisitions, corporate restructuring, LBO's and MBO's, and Merchant Banking are also covered.

#### NBA 542 Investments and Portfolio Analysis

Fall, spring. 3 credits. Prerequisites: NCC 501, 502, and 506, comfort with quantitative methods. H. Li.

This course deals with several important issues pertaining to investments in securities

markets. First it deals with portfolio diversification theory, asset allocation, asset pricing models (e.g. CAPM and APT) and empirical anomalies such as size effect, January effect, and others. Second, the course also deals with the issue of evaluating portfolio performance and mutual fund performance. Third, it deals with investment strategies based on patterns in historical security returns. This may be loosely considered technical analysis. In addition, the course deals with investment strategies based on publicly available information related to accounting and other market statistics and the use of earnings forecasts. This may be considered as falling under fundamental analysis. Finally, the course deals with frictions to trading imposed by the institutional structure of securities markets. The goal of this course is to train students in the latest tools and techniques in portfolio theory and familiarizes them with the latest developments in securities market research and applications. This is a highly quantitative course involving extensive analysis of security market data using regression analysis and other statistical tools. Grades are based on mid-term and final exams, cases, a project, and a trading game.

#### NBA 543 Financial Markets and Institutions

Fall, spring. 3 credits. Prerequisite: NCC 506 (Finance core). M. O'Hara, S. Tinic. This course applies principles of finance in order to understand modern financial markets. Central themes are the structure of financial markets, their pricing function, the interaction between financial markets and macroeconomic conditions, and the processes of innovation and regulation in these markets. Students look at the workings of a variety of markets and develop an understanding of the different problems which different types of markets address. The question of market efficiency and the interaction between government policies and financial markets is studied. We analyze issues in innovation and regulation with basic principles of financial economics. Throughout the course, the relevance of these issues for the practical corporate, portfolio, or public sector decision maker is considered. The course includes ideas and evidence from academic research along with historical, institutional, and international perspectives. Recent events are used to illustrate concepts and develop analytic skills. Spreadsheet assignments and a term project requiring data analysis develop research skills and illustrate academic concepts. Exams consist of computational. short answer, and short essay questions.

## NBA 547 Applied Financial Engineering (also OR&IE 565)

Spring. 4 credits. Prerequisites: NCC 506, NBA 546, NBA 555, NBA 542, OR&IE 523, OR&IE 523, COMS 211, permission of instructor. Staff.

This course is designed to integrate students' course work in engineering (computing, stochastic modeling) and finance (options/ futures and investment theory) through the completion of a project. The course project is undertaken via student groups. It involves the implementation of a financial model to a real world problem. The implementation includes model formulation, computer programming, data collection, and data analysis. The course format is a mixture of lectures by faculty, industry professionals, and students (project presentations).

#### NBA 551 Current Topics at the Crossroads of Law and Finance Spring, 3 credits. M. O'Hara.

This course explores a series of selected topics that involve important issues in law and finance. The premise of the course is that financial institutions of all kinds, whether they are known as insurance companies, banks, investments banks, or pension funds, invest money and advise clients in a wide variety of settings. This agency relationship introduces a number of important dimensions to the intermediary-client relationship. This course looks at these issues from both an economic and legal perspective. Emphasis is placed on the intersections between modern finance theory and legal analysis.

## NBA 552 Cases in Corporate Finance

Spring. 3 credits. Prerequisites: NCC 506 or the equivalent. Recommended: NBA 540. Course is limited to second-year MBA's and Twelve-Month Option (TMO) students. Students who took NBA 535 and/ or NBA 536, 1.5 credit version, cannot

enroll in this course. H. Bierman. This course consists of discussions of corporate finance cases dealing with corporate financing. Students form groups and formally present one case and critique a second. This is in addition to the normal class sessions. The cases in this course deal with mergers, acquisitions, valuation, corporate restructuring, LBO's, MBO's, Merchant Banking, and the financing of corporations. The material applies equally to careers in investment banking and managerial finance. The course does not deal with sales trading or the details of managing an investment banking firm. Several executives working in corporate finance will present cases

## NBA 554 International Finance

Spring. 3 credits. Prerequisite: NCC 506 (Finance core) or permission of instructor. W. Bailey.

This course applies principles of finance to the international setting. International finance is different in two basic respects. First, the existence of multiple currencies adds risk to investment and financing decisions. Second, when corporations and portfolio investors cross international borders, both problems and opportunities arise. We focus on these issues and highlight how finance theory can be extended to address them. Starting with the basic principles of international finance students apply those principles to a variety of problems. The course helps students understand the ideas and research results of international finance and adapt what they learn to the practical problems in the increasingly globalized business world beyond the classroom. The first part of the class outlines three basic themes: exchange rate volatility, barriers to international capital flows, and the value of international diversification. The second part of the class presents a variety of problems, examples, and applications from the three basic themes. These range from corporate finance applications of capital budgeting to portfolio management strategies. Spreadsheet assignments and a term project requiring data analysis develop research skills and illustrate academic concepts. Exams consist of computational, short answer, and short essay questions.

340

## NBA 555 Fixed Income Securities and Interest Rate Derivatives

Fall. 3 credits. Prerequisites: NCC 506 (Finance core), NCC 501 (Quantitative Methods core). R. Jarrow.

This course is designed to study the pricing, hedging, and risk management of fixed income securities and interest rate derivatives. Topics to be studied include: the term structure of interest rates, interest rate swaps (caps, floors, collars), the risk structure of interest rates, credit risk spreads, and corporate bond valuation. The method of instruction is lectures and discussion, with computer illustrations being an integral part of the class content.

## NBA 558 Corporate Financial Policy

Spring, 1.5 credits. Prerequisite: NCC 506 (Finance core). Y. Grinstein. The course deals with frontier topics in

corporate finance and investment strategy. The financial world is changing at an increasing pace. New financial products are coming to the markets, and the financial structure of many corporations is becoming more and more complicated. Corporate financial officers and investors (such as money managers) need to know the driving forces behind the financial products (debt, equity, and more complicated products) to understand the products themselves. Understanding these issues enable us to estimate firm values more precisely. The course objective is to enable students to better analyze financial situations they may encounter in the future, as well as firms' valuation techniques.

## NBA 565 Corporate Governance

Spring. 1.5 credits. Prerequisites: NCC 506 and NBA 656 or permission of instructor. Y. Grinstein.

Corporate governance deals with the ways in which different investors assure themselves of getting a return on their investments. How do investors get managers to return some of the profits to them? How do they make sure that managers do not invest their money in bad projects? This course explores these issues through case studies and examples. We start with the venture capital process and discuss the ways venture capitalists monitor projects, and the role of stage financing in mitigating VC losses and its effect on project valuation. We then explore different governance mechanisms in more established firms, in particular, the board of directors, merger and acquisition market, institutional investors, compensation contracts, debt contracts, and bankruptcy proceedings.

## **NBA 655** Advanced Valuations

Spring. 1.5 credits Prerequisites: Must have taken the IBI Immersion or permission and

signature of professor. B. Swaminathan. The advanced valuation course builds on the valuation principles course. It applies discounted cash flow valuation (DCF) and valuation by multiples using comparables to multinational contexts. We consider mergers and acquisitions, and multinational project and firm valuations, from the viewpoint of a U.S. manager. Issues such as differences in parent and project cash flows, accounting differences, exchange risks, political risks, and valuation in developing countries are discussed. Then, we examine the contingent claims valuation approach, with emphasis on flexibility in managerial decision-making. We focus on the valuation of strategic options, growth options, and flexibility in capital investments using traditional and non-traditional option pricing

techniques. Valuation of growth options, expansion options, natural resource investments, land development, R&D, young-highgrowth companies, etc., using the Black-Scholes option pricing model and its variants are discussed. Grading is based on cases, a valuation project involving a foreign company, and a final exam.

## NBA 656 Valuations Principles

Spring. 1.5 credits B. Swaminathan. The course deals with the principles of valuation for publicly traded firms, divisions of publicly traded firms, or private firms that have publicly traded comparables, using discounted cash flow (DCF) valuation. The definitions of cash flow and discount rate depend on whether we want to value the entire firm or value only equity. We first discuss how to compute free cash flows based on historical income statements and balance sheets. We then discuss the concept of value drivers and economic value added (economic profits or residual income). Next, we cover operating risk and financial risk, the relation between financial leverage and cost of capital, the levering and unlevering of equity betas, capital asset pricing model, computing cost of equity, cost of debt, cost of preferred stock, weighted average cost of capital, divisional cost of capital, etc. We apply these concepts to computing cost of capital. Finally, we introduce valuation by multiples using comparables and discuss its applications to valuing divisions of multi-business firms.

## NBA 673 Introduction to Derivatives, Part 1

Fall, spring. 1.5 credits. Prerequisite: NCC 506 (finance core) or permission of the instructor. F. Diz, H. Li.

The course introduces students to the pricing and hedging of derivative securities. The course briefly covers forward contracts, futures contracts and swaps. The primary emphasis is on option contracts. Underlying assets include stocks, currencies, and commodities.

#### NBA 674 Introduction to Derivatives, Part 2

Fall, spring. 1.5 credits. Prerequisite: NCC 506 (finance core) or permission of the instructor. F. Diz, H. Li. See above, NBA 673.

## General Management

#### NBA 538 Inclusive Leadership Spring. 1.5 credits. P. Stepp.

This course prepares students for leadership in diverse organizations of today and the future. Discussions and readings about accountability, fairness, stereotyping, mentoring, networking, and the impact of challenging assignments are used to help students become aware of ways they may discriminate against, judge, or exclude people, and to help students initiate and develop relationships with people who are different from themselves. Case studies, group activities, a diversity awareness profile, and written assignments that require students to critically reflect on situations where they felt excluded are the primary teaching methods used in the course.

## NBA 560 Business Law I (also ARME 320)

Fall. 3 credits. Limited to juniors, seniors, and graduate students. D. Grossman.

The course introduces the basic tenets of law as they apply to businesses and their operations. Topics include personal property, contracts, agency, real property, and landlordtenant concerns. Text readings and case studies are used. All students intending to be professional accountants are required to take the course, and it is strongly recommended for finance students.

# NBA 561 Business Law II (also ARME 321)

Spring. 3 credits. Prerequisite: NBA 560 or permission of the instructor. D. Grossman. The first portion of this course examines legal issues in the formation and operation of business enterprises, particularly partnerships, corporations, and limited liability companies. The second portion of the course covers selected topics in business law, such as employment discrimination, secured transactions, product liability, unfair competition, and international business law.

# NBA 562 Estate Planning (also ARME 422)

Fall. 1 credit. Limited to juniors, seniors, and graduate students. D. Grossman. Fourteen sessions on the various aspects of estate planning. The law and use of trusts, the law of wills, federal and New York State estate and gift taxes, and probate procedures are covered.

## NBA 567 Management Writing

Fall, spring. 1.5 credits. B. Mink, A. Pike, M. Hittleman, C. Rosen.

Students learn to write clearly and effectively by focusing on the writing process as well as the finished product. Course topics include audience perspective, style, organization, strategy, and persuasion. There is a writing assignment every week. Students receive instructor and peer feedback. Priority given to MBA students. Open to other graduate students and employee degree candidates if there is room.

## NBA 568 Oral Communication

Fall, spring. 1.5 credits. B. Mink, A. Pike, C. Rosen.

This course focuses on improving the presentation skills of management students. The course covers the areas of speaking formats (impromptu, extemporaneous, manuscript), delivery, organization, visual aids, and question/answer. Student speeches constitute the bulk of class time, with each student presenting seven or eight speeches in the seven-week session. The small class size allows for significant individual attention. Students receive feedback from classmates and the instructor, and have the opportunity to review in tutorials the videotapes of most of their presentations. Priority given to MBA students. Open to other graduate students and employee degree candidates if there is room.

## NBA 569 Management Consulting

Fall, spring. 3 credits. A. McAdams. The course is case-study oriented and focuses on strategic consulting. It has multiple objectives. First, it provides students with the opportunity to understand the role of the consultant and to gain indirect experience in that role through dealing with a broad range of practical and real-world issues. Second, it helps students improve their analytic skills through practice with case studies. Third, it provides students with information that they are unlikely to gain in other courses, as well as experience in making group presentations and evaluating them. Students are required to write a comprehensive analytic term paper.

## NBA 570 Leadership in Management

Spring. 1.5 credits. MBA students only. R. Peterson, RPW Executive Development, and other Johnson School faculty.

This course is a partnership with RPW Executive Development to provide MBA students with the self-awareness and interpersonal skills required to be effective leaders (the general principles of leadership course is NBA 668). RPW has partnered extensively with the Johnson School Executive Education Department in the past. The course consists of five full-day training sessions. Staff from RPW and Johnson School faculty provide training. The first two days focus on selfawareness and employ several experiential exercises and self-assessment instruments including, the Campbell Leadership Index (CLI), Meyers-Briggs Type Indicator (MBTI), the Fundamental Interpersonal Relations Orientation-Behavior (FIRO-B), the Kirton Adaptation/Innovation inventory (KAI), and the Ambiguity Preference Scale (APS). Class members are also trained in giving and receiving feedback from team members and faculty. Mid-week activities include various leadership and team challenges, including a business simulation. Attendance is required each day of the course to receive credit. NOTE: most of the self-assessment instruments listed above will need to be completed prior to the first day of class to allow for scoring and analysis.

## NBA 571 Cornell Management Simulation

Fall, spring. 1.5 credits. Restricted to second-year MBA students. J. Hass, S. Smidt.

This computer-based simulation is played by self-selected teams of four students who make marketing, production, and finance decisions for one of five companies operating competitively in the same industry. After the first week, during which the rules of the simulation are explained and the software used by each team is demonstrated, the teams make periodic decisions (meeting at their own convenience). At the beginning of the simulation, each team writes a Strategic Intent paper and, before the results of the last decision have been determined, each team presents an in-depth analysis of its performance and its strategy for the future in a "board of directors" meeting. Letter grading only, based on the value created for the company's shareholders (relative to other firms in the same industry), the team's Strategic Intent paper and the instructor's evaluation of team's performance at the BOD meeting. Students who have completed NBA 549 cannot take this course. Open to MBA IIs only. Meetings will be periodic throughout the semester.

## NBA 572 Environmental Management Policy

Fall. 1.5 credits. D. Chapman. The seminar assists participants in remaining current with the rapidly evolving state of the art in the analysis and management of environmental policy and practice in enterprises. Although focused on the private sector, attention is given to understanding the economic basis for government's role in environmental protection. Another focus is the analysis of the operational significance of the concepts of sustainability, and ecoefficiency, and market-based environmental policies. Seminar speakers from finance, marketing, electricity, forest products, construction, and other businesses with environmental responsibilities meet with the class. Readings and Harvard Business School (HBS) case studies are distributed throughout the semester. Each student makes a case study of an individual enterprise or organization.

## NBA 573 Seminar in Sustainable Development (also ABEN 673)

Spring, first half of semester. S-U grading only. 1–3 variable credits. A. McAdams. This seminar-style course involves readings and discussion of issues in environmental management, and will also feature four significant outside speakers on the subject of environmental management. (Students interested in doing consulting projects in environmental management will be accommodated in NBA 575, Advanced Consulting.)

## NBA 575 Consulting Projects

Fall. 3 variable credits. J. Russo. The course teaches how to frame unstructured business problems through a hands-on team project. Teams must identify what the central issues are, and then determine the most appropriate tools and concepts to provide insight into these issues. Students also learn to approach business problems from a crossfunctional perspective. Specific conceptual content includes: project management; power, politics, and personalities in work groups; managing in for-profit versus not-for-profit organizations; and organizational change. This course is not classroom-based. Although there are a few class sessions early in the semester, the course structure will revolve around periodic reviews and coaching sessions as needed. The instructor team will contain one regular member of the Johnson School's faculty, an experienced executive, and an administator.

## NBA 577 The Political, Legal, and Regulatory Environment of Business

Spring. 3 credits. R. Schuler. The political climate, laws, regulations, and government arrangements for infrastructure have a profound effect on the nature, operation, and profitability of business. Many of the most important decisions that top management makes are driven by political, legal, and regulatory considerations (e.g., the responses of: Exxon to the Exxon Valdez oil spill; Union Carbide to the Bhopal, India, gas leak; and the decision of AT&T to accept the division of its company in response to an antitrust suit filed by the U.S. government). Environmental and waste-management concerns are leading to new laws and regulations that affect many aspects of business, creating opportunities as well as posing problems. The course begins with a discussion of the political and economic foundations of business regulation. Students examine different areas of application, including economic regulation, environmental regulation, antitrust, and product liability Guest speakers include leading scholars from throughout the university and business and government leaders.

## NBA 579 Cases in Business Strategy

Fall. 1.5 credits. Enrollment limited to second-year MBA students only. I. Suwinski.

A well-defined strategy is essential for business success—describing where the business is going, how it's going to get there, and then providing a framework for making decisions along the way. Strategy is the responsibility of top executives of a company/ business, and the ability to formulate effective strategy is one of the key skills that distinguishes General Managers from functional managers. This course will focus on the process of effective strategy formulation from the perspective of the general manager of a business unit. This perspective also applies to consultants working for clients on business unit strategy. Corporate strategy and its interaction with business unit strategies will be discussed, as will tools for industry and company analysis. Situational analysis will also be covered. This course compliments the core strategy course, with emphasis on understanding and practicing frameworks that are useful in case-based interviews. The course draws heavily on the instructor's experience developing strategy for numerous businesses at Corning Incorporated. Guest speakers from industry and strategy consulting firms and also from industry present their approaches to strategy, and discuss the analytical tools they find most effective in working on business strategy. Students gain experience, via assigned cases, in analyzing business problems/opportunities, using the strategic process to formulate effective business strategies, and in presenting their recommendations in written and oral form. A major case write-up and presentation in a mock board environment at the end of the course gives each student an opportunity to play the role of a strategy consultant working on a real case.

## NBA 671 Business Ethics

Fall. 3 credits. D. Radcliffe. Students examine actual situations in business, both in the United States and abroad, that involve ethical issues affecting individuals and organizations. Students are challenged to decide on appropriate ethical positions.

## NBA 689 Law for High-Growth Business

Spring. 1.5 credits. Prerequisites: Big Red Venture students only or permission of instructor. Z. Shulman.

Topics include: choice of entity, driven by accounting/tax factors and corporation (S and C), LLC, partnership; protecting confidential information: the importance of third-party NDAs and how they work; invention assignment agreements with employees; patents, trademarks, copyrights; sources of capital: applicable federal and state securities laws; bridge loans, lease lines, and down rounds; common stock, preferred stock, employee options, warrants; basic employment practices: discrimination policies, company policies for e-mail and privacy, use of written employment agreements, benefits, noncompete covenants; legal responsibilities of boards of directors and executives; advisory/scientific boards; technology licenses, particularly from universities where technology was developed; negotiating relationships with distributors, resellers, and customers: exclusivity, pay to play; foreign corrupt practices laws, foreign subsidiaries, and foreign employees; dealing with creditors; and key accounting issues.

## International Management

## NBA 576 The World Geopolitical Environment of Business

Fall, 3 credits, G. Staller, The geopolitical face of the world is changing at a pace that few could have envisioned even five years ago. The unification of Germany. the fall of communism, the institution of sweeping economic restructuring in the former Soviet Union, the move toward democracy with market economies in eastern Europe, the movement of Europe toward a unified economy, and the flirtations with reform and its implications in China are just a few of the many examples of the changing world environment of business. This course provides students with a view of those fastpaced worldwide changes. Topics covered include developments in western and eastern Europe, the former Soviet Union, the Pacific Rim, Central and South America and the Middle East and the role and fate of developing countries in the world economy. Guest speakers include leading scholars from Cornell and other universities and leaders in business and government.

## NBA 580 Strategies for Global Competitiveness

Spring. 3 credits. A. McAdams. Initially, students explore the role of government in several private-market industrialized nations-Japan, France, Germany, the United Kingdom, and Italy-for lessons the United States might learn and use. Students investigate the impact in each of those countries of government policies on the global competitiveness of the country's firms. Special emphasis is given to differential policies appropriate to each of a range of industries, from the mature to the high tech (including computers, telecommunications, and electronics), and to stages of development in each economy. Possible lessons are then tested for less developed countries that might include Venezuela and Malaysia and newly emergent countries such as Singapore. Classes are run in a discussion format. This course can be used to fulfill the strategy requirement.

## NBA 581 Special Topics—Contemporary Development of Southeast Asian Economies

Spring. 3 credits. I. Azis.

This course analyzes the patterns and economic development during the last three decades. The five plus two countries in the region that will be the focus of the course include Thailand, Indonesia, Malaysia, Singapore, the Philippines, Brunei, and Vietnam. The topics will be divided into the following categories: Southeast Asian economic development, regional economic cooperation in Southeast Asia, and the financial crisis of the 1990's. The course assesses important factors and consequences of the region's development patterns and uses international comparative analysis to explicate the relative position and uniqueness of the region's performance. Evaluation will be based equally on the student's participation in class discussions and debates and on a term paper.

## NBA 584 International Competitive Strategy

Fall and spring. 1.5 credits. This course can be used to fulfill the strategy requirement. J. Katz. The course focuses on the development of competitive strategies in the global environment—including the identification of internationally relevant strengths and weaknesses, the movement and use of resources to gain competitive advantage, and strategies to confront competitors, both domestic and multinational.

## NBA 585 International Management

Spring. 1.5 credits. A. Un. Provides frameworks for understanding the international dimensions of management, for formulating effective strategies in an increasingly complex world economy, and for building and leveraging organizations that cross borders. Cases cover a variety of countries and regions and a range of industries, from consulting to manufacturing. The first part of the course studies strategy in international context that involves not only the analysis of the external environments of companies, but also their internal organizational capabilities and core competencies. In the second part, we focus on the steps by which companies extend their activities to new locations and the competencies they need to operate effectively in diverse locations. In the last part, we analyze more closely the link between organizational competencies and managerial processes in operating across national borders.

## NBA 586 Cross-National Management Fall. 1.5 credits. J. Katz.

Focuses on the differences in managerial style across countries and develops skills to deal with these differences. Most of the material will be applicable to all countries, though two specific countries will be highlighted each semester.

## NBA 587 International Mergers & Acquisitions

Spring. 1.5 credits. J. Hanks. This course covers issues relating to mergers and acquisitions in an international context. Topics include business due diligence, pricing and negotiation, and other important topics from both the buy and sell side. The course uses both lecture and case formats. Students are evaluated on the basis of group and individual written assignments.

## NBA 592 Experience in International Management

Spring. 1.5 credits. J. Katz. The objective of this course is to combine classroom sessions and international experience with an increased awareness of business environments outside the United States. NOTE: participation in a faculty approved study trip is required to complete this course (fee charged). On trips, students visit local businesses, subsidiaries of foreign multinationals, government officials, local business school students, and others. Students must also attend two pre-trip meetings (1 1/4 hours each) and two Saturday meetings during spring semester (2 1/2 hours each). Those meetings are used to present information on international business conditions, industrial structures, management styles, and also, to develop cross-cultural skills. A final paper, integrating the material learned in the classroom with their experiences, will be required.

## **NBA 593** International Entrepreneurship Spring, 1.5 credits. M. Goldman.

Venture capital firms, corporate venture funds, and "angels" have increased their financing in high-growth start-up activities outside of their countries of origin. This course provides an overview of the diffusion of entrepreneurship institutions outside of the U.S. vis-a-vis traditional forms of start-up finance (i.e., family backing, intrapreneurship). It also focuses on the process of selecting, financing, managing, and exiting venture capital deals abroad. The course is designed to provide practical insights through the participation of guest speakers involved in various stages of international entrepreneurship activities (e.g., European corporate funds in the U.S., venture capital firms in Europe, U.S. based venture capital and "angel" initiatives investing abroad).

## NBA 595 Economics of Financial Crises

Spring. 1.5 credits. I. Azis. The main purpose of this course is to familiarize students with the analysis of the causes, nature, and consequences of financial crises, and equip them with tools of analyses to better understand the economics of financial instability and alternative strategies for dealing with them. The first part of the course concentrates on financial instability/ crisis by way of explaining the empirical episodes of the crisis in various emerging market countries, and elucidating the relevant theoretical concepts in each of the cases. The second part is devoted to discussions of postcrisis episodes, emphasizing the different paths of recovery and major policy responses to the crisis. The latter includes financial and monetary policies and the unsettled relationship between interest rates and exchange rates.

## Management Information Systems

## NBA 601 Electronic Commerce

Spring. 3 credits. Letter/S-U optional grading. L. Orman.

Electronic commerce is the use of information technology in conducting economic transactions and managing businesses over computer networks. It is a phenomenon that has captured the public attention because of its wide-ranging implications for businesses, markets, public institutions, and the general public. Electronic commerce involves a wide variety of cooperating technologies such as communications, networks, databases, expert systems, and multimedia. It also affects a wide variety of managerial issues. Electronic commerce created a new emphasis on information technologies and systems in management. It led to the development of new technologies and new combinations of existing technologies to support management. On occasion, it radically altered business practices and the role of management.

The students in this course learn to conduct economic transactions and manage businesses on the Internet. All major technical and managerial issues are covered through computer exercises on the Internet, and case studies and examples of businesses on the Internet.

## **NBA 612 Disruptive Technologies** Fall. 3 credits. D. Greenberg.

The advances of computer graphics, computer processing power, network bandwidths, and video compression technologies are forcing the merger of the telephone, television, and computer industries. The influence of these technologies has created paradigm shifts that will drastically change the way we communicate, how we are educated, the way we work, design, and in essence, how we will live in the next century. We are just beginning to fathom how these changes will influence our modus operandi and greatly modify our traditional patterns of behavior, both personal and organizational. Clearly, business and industry management will have to understand the implications of the advanced technology This course starts by presenting historical technological advances that created major paradigm shifts for communications. Advances in computer technology emphasizing the fundamentals behind the increases in processing power, video and computer graphics capabilities, and network transmission will be presented. The latter half of the course covers the effect of these scientific advances on many discipline-specific areas including photography, the film industry, the entertainment and animation industry. television broadcasting, publishing, as well as the computer industry itself. Sessions are devoted to the social and legal issues rising from the rapid advances in electronic communication. In attempting to predict the disruptive changes of the future, it is best to understand the technologies themselves. Thus, students with technology or science backgrounds are preferred. Although no computer programming is required, a working knowledge of computers is necessary. The course is especially tailored to a business school and industrial concerns and will have interactive live demonstrations at the state-of-the-art laboratory of the Program of Computer Graphics. No prior knowledge in computer science is required.

## NBA 684 Internet Technology and Applications

Spring. 3 credits. R. Conway. Basic topics in computer science and communications that underlie the current information revolution, combined with analysis of dominant business applications. No prior computer science background is assumed. Key topics are supported in depth by guest faculty from the Department of Computer Science. Professor Dan Huttenlocker, currently on leave with a Silicon Valley startup, will join his CS colleagues this year in contributing to the course.

## NBA 685 Rebooting IT Strategy

Spring. 3 credits. A. McAdams. This course builds on topics raised in the Special Edition (09–10–01) of Forbes Magazine, "Rebooting the Revolution." With input and support from the school's Technology Advisory Board, the course investigates the strategies of the major players in IT; prepares the student to understand and exploit the many real business opportunities of 2002 and beyond; and determines how, where, and why to introduce e-business approaches into established brick and mortar firms.

## NBA 686 e-Business Projects

Spring. 3 credits. A. McAdams, R. Conway. The course focuses on real-world, industrysponsored projects exploring strategic aspects of information-rich opportunities in the business environment, especially with brick and mortar businesses.

## **Management and Organizations**

#### NBA 661 Strategic Career Management Fall. 1.5 credits. B. Nelsen.

This course acquaints students with principles and strategies that can be used to strategically plan and develop their career and the careers of their employees. The first part of the course focuses on skills and concepts useful for personal career development in today's labor market; the second part examines events that can disrupt career progression. Topics of discussion include career resiliency, building developmental relations, managing the work/ family interface, involuntary job displacement and recovery, glass ceilings, expatriation and repatriation, and managing older workers.

## **NBA 663 Managerial Decision Making** Fall. 3 credits. J. Russo.

This course presents practical concepts from the behavioral sciences that can serve as guides to managerial action. Lectures, cases, and exercises are used to acquaint students with new perspectives on decision making, critical thinking, problem solving, and group processes. Taken together, these perspectives offer a trouble-shooter's guide to the uncertainty, complexity, and conflict in the business world.

## NBA 666 Negotiations

Fall, spring. 3 credits. Staff. Judgment is the art and science of transforming perception into thought or opinion. Negotiation is the art and science of securing agreements between two or more interdependent parties. The purpose of this course is to understand the theory and processes of negotiation as it is practiced in a variety of settings. This course is designed to complement the technical and diagnostic skills learned in other courses. A basic premise of the course is that while a manager needs analytical skills to develop optimal solutions to problems, a broad array of negotiation skills are needed for these solutions to be accepted and implemented. The course highlights the components of an effective negotiation and teaches students to analyze their own behavior in negotiations. The course is largely experiential, providing students with an opportunity to develop their skills by participating in negotiations and integrating their experiences with the principles presented in the assigned readings and course discussions.

## **NBA 667 Managing Intellectual Capital** Fall. 1.5 credits. B. Nelsen.

As the twentieth century draws to a close, economies long based on manufacturing are giving way to those based on the management of information, the production of knowledge, and the provision of services. Hence, organizational profits will increasingly flow from intellectual rather than material capital. A firm's success will hinge upon the manager's ability to recognize and adapt to the unique challenges presented by managing intellectual capital. This course examines this shift in the business environment and its practical implications for managers. Topics addressed include (1) motivating and managing knowledge workers; (2) employee empowerment and self-managing teams; (3) organizational learning; and (4) leadership for innovation and creativity.

#### NBA 668 Leading Teams and Organizations

Fall. 3 credits. R. Peterson.

This course focuses on general principles for successfully leading teams and organizations (the personal development course is NBA 570). The course draws on the latest research in team decision making and organizational leadership to address questions such as: what is the difference between leadership and management? how does a leader establish trust and commitment to an organization? and how do leaders transform organizations? The course consists primarily of case studies of leaders, but also includes some experiential and group activities. Course grading is based on class participation, group case analyses, and a final individual case analysis. Priority is given to MBAs.

## NBA 672 Goal Setting and Coaching for Leadership Success

Fall, spring. 1.5 credits. P. Stepp. This course is designed as a follow-up to NBA 570 Leadership Assessment for Managers. It provides structured support for personal change through personal learning plans, learning and development strategies, and feedback and coaching support from peers. The course includes a workshop on establishing a personal values statement to help guide personal learning plans and align them with career aspirations. The course employs a webbased, follow-through support system to facilitate further leadership growth by prompting students regularly to assess and document their progress. Learning coaching strategies and serving as a coach for the year for a classmate will further enhance leadership growth. The course is scheduled throughout the year to allow students time to develop personal goals and provide numerous opportunities to practice coaching.

#### NBA 680 Knowledge Management; Driving Strategic Capability and Change

Fall. 1.5 credits. Prerequisites: MBAs only. S. Snell.

Today's business equation requires a combination of firms' developing core competencies and partnering externally to appropriate and integrate knowledge. Given the rapid pace of change in many industries, management of knowledge-based assets is essential. This course focuses on the strategies used to develop and leverage a firm's intellectual capital (human, social, and organizational capital). We explore processes that drive knowledge creation, transfer, and integration. We study methods for managing knowledge workers to create high performance work systems and learning laboratories. We study how firms achieve vertical alignment between their people-related systems and their market and financial objectives. Finally, we study how firms continually renew themselves in the context of rapid change and market adaptation.

## NBA 682 Negotiation Essentials

Spring. 1.5 credits. M. Thomas-Hunt. This course is designed to complement the technical and diagnostic skills learned in other courses at the Johnson School. While a manager needs analytical skills to develop optimal solutions to problems, a broad array of negotiation skills is needed in order for these solutions to be accepted and implemented. The course is largely experiential, providing students with an opportunity to develop their skills by participating in

## Marketing

## NBA 620 Marketing Research

Fall. 3 credits. Prerequisites: NCC 501 and NCC 503, or the equivalent. V. Rao. This course deals with marketing research as a critical support function in corporations. The broad objective is to provide a fundamental understanding of marketing research methods employed by better managed firms or proposed by leading academicians. The course is aimed at the manager, the ultimate user of marketing information, who is responsible for the scope and direction of research activities involved in obtaining, analyzing, and interpreting results of research. The course covers the use of secondary sources of marketing information for designing studies and collecting primary data. Students are exposed to up-to-date methods in research design, qualitative research, measurement, data collection, and analysis. The emphasis is on evaluating research methods and on interpretation and use of results rather than on mathematical derivations. Students are also exposed to the practical side of marketing research through case studies, problem sets, and projects.

## NBA 621 Marketing Communications

Fall. 1.5 credits. Prerequisite: NCC 503

(Marketing core). D. Stayman. The course is designed to give students an understanding of the advertising and promotion management process. It covers the components of a successful advertising campaign and helps students develop an appreciation of the issues involved in advertising planning and decision making. They also learn how recent social-science findings and theory can facilitate advertising management.

## NBA 622 Marketing Strategy

Fall. 3 credits. Prerequisite: NCC 503 (Marketing core). V. Rao.

The course balances theoretical and practical approaches to the development and evaluation of marketing strategies for multiproduct firms. It considers various environmental opportunities and constraints in developing and evaluating integrated marketing strategies for new and established products and services. Recent research results are applied to decisions on product-market boundary definition, resource allocation, product positioning, and competitive reactions. It includes selected current topics such as brand equity, acquisitions, and lead-user analyses. Students use case studies extensively to develop skills in strategy analysis and to enhance skills in assessing external threats and opportunities. They employ computerassisted market strategy simulations to evaluate the effects of competing strategies. Guest speakers from industry provide a view of the operational aspects of marketing strategy

## NBA 623 Customer-Based New Product Development

Fall. 3 credits. Prerequisites: NCC 501 and NCC 503. P. Kumar.

The successful introduction of new products requires careful planning and systematic screening and testing. This course covers

models and methods that are useful to managers in the development and marketing of new products. Heavy emphasis is placed on the measurement of consumer preferences. Students are required to complete a group project, consisting of a measurement instrument, data collection (from at least 30 respondents) and data analysis, for a selfchosen product category. The method of instruction consists of a combination of lectures and discussion of cases and articles. Performance is evaluated primarily based on exams and the group project.

## NBA 625 International Marketing

Spring. 1.5 credits, Recommended: NCC 503. J. Katz.

Designed to train students to take a domestic product and expand it into international markets successfully. Market selection, international market research issues, and international marketing strategies are all discussed. The term project (actually submitted in three parts throughout the term) requires that students choose some product and develop a plan for taking it abroad. Each class includes cases, therefore, class preparation is essential. Grading is based on the term project, the final, and class participation. Core marketing provides a useful background, but is not a prerequisite.

## NBA 626 Consumer Behavior

Spring. 3 credits. S. Chatterjee. Topics include factors that influence response to advertising of various kinds, purchase decisions, product perceptions, response to promotion, consumer satisfaction, and the basic methodologies for understanding consumer behavior.

#### NBA 633 Marketing and E-Commerce Spring. 1.5 credits. Y. Park.

This class explores the effect of the Internet on marketing. Topics include an overview of the on-line industry, business models for the Internet, advertising and promotions on the Internet, marketing research on the Internet, loyalty programs for Internet marketing, and disintermediation or channel conflict resulting from Internet distribution. The course is comprised of industry speakers from Cendant, CSC, Netcentives, H-P, 1st USA, Catalina marketing, Bausch and Lomb, and others. Course requirements include write-ups on a subset of speakers, and a final report and presentation on an Internet marketing issue of the student's choice. NBA 638 is restricted to MBA II's because the same information is available for MBA I's in the strategy core.

## NBA 639 Data-Driven Marketing

Fall. 3 credits. S. Gupta.

Data-Driven Marketing introduces the future brand manager or marketing consultant to the use of market data to evaluate and construct pricing and promotional strategies. The course introduces new sources of data available on product purchases and consumers' reactions to the marketing environment. The course focuses on the practical use of popular data sources. Approximately 70 percent of the course covers panel data on high-volume consumer packaged goods, and 30 percent is devoted to direct or "database" marketing. The goal of this course is to introduce these new data sources and provide a solid foundation for the development of analytic tools. Examples are drawn from the consumer packaged goods industry. This course makes intensive use of EXCEL and the WINDOWS

computing environment. The data has been extracted and organized for use in EXCEL; this allows the student to concentrate on learning modeling tools without a large investment in computing or data manipulation methods.

## **Operations Management**

## NBA 641 Logistics and Manufacturing Strategy

Spring. 3 credits. Prerequisite: NCC 508, OR&IE 410, or permission of the instructor. L. J. Thomas.

The course is about supply-chain integration, which involves strategic management of the values chain, from materials to customer. Students discuss operations strategy issues that are important to both manufacturing and service. The course emphasizes written and oral communication skills. About a fourth of the classes are spent on case studies, with small groups presenting their analyses of them. There is one mid-term examination, but the majority of the grade is evaluated based on projects and class participation. There is an option of replacing some assignments with a "live case," a project with a local company.

#### NBA 643 Managerial Spreadsheet Modeling

Fall. 1.5 credits. L Robinson. The goal of this course is to develop proficiency in quantitative modeling within the environment of Microsoft Excel. This hands-on lab-style course, taught in the Parker Center, will develop and use spreadsheets to analyze a variety of business problems. There are two principle components of this course: spreadsheets and models. Spreadsheet topics to be covered include principles of good spreadsheet design, the effective presentation of information through spreadsheets (including graphical controls like sliding bars), and advanced Excel features (e.g., data validation, conditional formatting, scenarios, etc.). Modeling topics include the art of finding the appropriate level of modeling detail, practice in dealing with vague and unstructured problems, sensitivity analysis, and working with incomplete and unreliable data.

### NBA 647 Advanced Spreadsheet Modeling

Fall. 1.5 credits. L. Robinson. The goal of this hands-on lab course, taught in the Parker Center, is to develop proficiency with Excel's quantitative tools of Solver (for optimization) and @Risk (for simulation). Building on their brief introduction in the Managing Operations core course, students use these advanced tools to analyze problems and cases in finance, marketing, and operations. Although the bulk of this course is devoted to case analysis, occasional lectures introduce some advanced features of these two powerful modeling tools, including integer and nonlinear programming and sensitivity analysis within optimization, and correlated random variables, scenario analysis, and valid statistical analysis within simulation.

## NMI AND NRE RESEARCH AND ADVANCED STUDIES

## NMI 500-502 Directed Reading and Research

Fall, spring. 1, 2, or 3 credits. Staff. Students undertake special-interest research under the supervision of faculty members. Registration is limited to students who have the approval of their advisers and of the faculty members involved in the research.

## NMI 510 Multi-Cultural Work Environments

Spring. 1 credit. C. Rosen, B. Mink. NMI 510 is a independent study course that is open to students whose summer internships will be in a country other than that of their citizenship or prior work experience. The goal of the course is to promote an understanding of the cultural assumptions we bring to the work environment and the effects of cultural differences on organizational interactions and productivity. Registration for the course occurs in the spring semester prior to the internship, and grades are posted in the following fall semester after completion of the course project (a 10-page paper). Students may register for the course after obtaining an internship offer and completing the paperwork for the course instructors. International students obtain and process work authorization forms with the International Students Office. See Charlotte Rosen (Sage 304) for further details about the academic and immigration requirements for NMI 510.

## DOCTORAL SEMINARS

## NRE 502 Doctoral Seminar In Marketing 3 credits. Staff.

This class introduces students to empirical research in marketing. There is a strong focus on the historical development of econometric specifications of consumer choice models (with an emphasis on heterogeneity and issues of dynamic consumption patterns), and Bayesian methods in marketing. However, by the very nature of the class, the content is to some extent be driven by the participants in the course. Teaching is interactive, and each participant is expected to present one of the papers studied to the rest of the class. Furthermore, each participant is expected to replicate the results of one of the papers, requiring the participant to write the necessary code and briefly discuss their findings

Enrollment is by consent of the instructor. Students are required to have taken a graduate level course in either mathematical statistics or econometrics, although this restriction may be waived in special cases. Students are welcome to sit in on parts of the class; for example, the section on Bayesian Methods will be broad enough that students from other areas may find the presentation useful.

## NRE 504 Doctoral Seminar in Accounting 3 credits. This course is for Ph.D. students

only. Staff.

The seminar provides a rigorous and integrative exposure to those aspects of the literature in accounting, behavioral economics, and psychology that are related to questions of accounting and auditing theory and research.

## NRE 507 Doctoral Seminar: Affect and Cognition

Fall. 3 credits. Prerequisites: courses in statistics and experimental design. A. Isen. The course examines research on some of the ways affect influences such thought processes as memory, decision making (including risk taking), and problem solving (including creative problem solving). Applied topics relevant to management concerns (for example, organizational behavior and consumer behavior) as well as other theoretical and applied topics (among them medical decision making, social interaction, selfconcept, and cognitive and affective development) are considered, depending on student interests.

## NRE 523 Doctoral Seminar in **International Management**

Spring. 3 credits. A. Un. Provides an overview of the evolution of the field of international management: its domain and professional organization, the key issues and how they have changed over time, and the evolving links between the approaches of this field and related disciplines. Readings focus on the classics of the field and some more-recent work that both extends and challenges the established approaches. The seminar is organized in three parts that reflect the interdisciplinary character of international management research. The first and second parts review the existence of MNEs from the perspective of economics/political economy and sociology/organization studies. The third part reviews selected topics on the management of firms across different institutional environments and the impact of the transformation of those environments on firms,

## FACULTY ROSTER

- Adair, WendiLyn, Ph.D., Northwestern. Asst. Prof., Organizational Behavior
- Babbes, George, Ph D., U. of California at Berkeley. Asst. Prof., Marketing Bailey, Warren B., Ph.D., U. of California at
- Los Angeles. Assoc. Prof., Finance BenDaniel, David J., Ph.D., Massachusetts Inst.
- of Technology. Don and Margi Berens Professor of Entrepreneurship
- Bierman, Harold, Jr., Ph D., U. of Michigan. Nicholas H. Noyes Professor of Business Administration
- Bloomfield, Robert J., Ph.D., U. of Michigan. Assoc. Prof., Accounting

Charles D. Cramton, assistant dean for graduate legal studies

John R. DeRosa, assistant dean for student services

Richard F. Robinson, assistant dean for administration and finance

Nan A. Colvin, registrar

## LAW SCHOOL

The primary function of the Law School is to prepare attorneys for both public and private practice where they will render the highest quality of ethical and professional service to their clients and further legal progress and reform. The curriculum is designed to prepare students for admission to the bar in all American states and territories.

Ordinarily, a student who is admitted to the Law School must have a baccalaureate degree from an approved college or university. The course of study leading to the degree of Doctor of Law (J.D.) covers three academic years. Students may be admitted to a program of study leading to the degree of Doctor of Law "with specialization in international legal affairs." The Law School also offers to a limited number of students an opportunity to earn both a J.D. degree and an IL.M. degree in international and comparative law.

There are combined graduate degree programs with the Johnson Graduate School of Management, the Department of City and Regional Planning of the College of Architecture, Art, and Planning, the School of Industrial and Labor Relations, the graduate divisions in economics, history, and philosophy of the College of Arts and Sciences, the Université de Paris I (Pantheon-Sorbonne), and Humboldt University, as well as a special opportunity for highly qualified undergraduates in the College of Arts and Sciences to register in the Law School during their senior year.

Each year the graduate program of the Cornell Law School admits a limited number of

students, generally all from abroad. The LL.M. degree (Master of Laws, Legum Magister) and the J.S.D. degree (Doctor of the Science of Law, Jurisprudentiae Scientiae Doctor) are conferred. A small number of law graduates may also be admitted as special students, to pursue advanced legal studies without seeking a degree.

For further information, refer to the Law School catalog, which may be obtained from the Office of the Registrar, Myron Taylor Hall.

## FIRST-YEAR COURSES

## LAW 500 Civil Procedure

Fall and spring. 6 credits. Pass/Fail option unavailable. K. M. Clermont, B. J. Holden-Smith.

An introduction to civil litigation, from commencement of an action through disposition on appeal, studied in the context of the federal procedural system. Also, a detailed consideration of federalism and ascertainment of applicable law; jurisdiction, process, and venue; and former adjudication.

## LAW 502 Constitutional Law

Fall. 4 credits. Pass/Fail option unavailable. T. Eisenberg, S. L. Johnson, S. H. Shiffrin, G. J. Simson.

A study of basic American constitutional law, including judicial review, some structural aspects of the Constitution as developed particularly in light of the passage of the Civil War amendments, and certain of its rights provisions.

## LAW 504 Contracts

Fall and spring. 6 credits. Pass/Fail option unavailable. R. A. Hillman, R. S. Summers, W. F. Taylor.

An introduction to the nature, functions, and processes of exchange, contract, and contract law. The course focuses on the predominant rules and principles governing contract and related obligation, including the substantive reasons underlying the rules and principles.

## LAW 506 Criminal Law

Spring. 4 credits. Pass/Fail option unavailable. S. D. Clymer, S. P. Garvey.

An introductory study of the criminal law, including theories of punishment, analysis of the elements of criminal liability and available defenses, and consideration of specific crimes as defined by statute and the common law.

## LAW 508 Legal Methods

Fall and spring. 4 credits. Pass/Fail option

unavailable. P. S. Anderson, J. B. Atlas, C. D. Bond, C. Grumbach,

E. M. McKee, A. J. Mooney.

Legal Methods is a full-year course designed to introduce first-year students to lawyering skills, with primary emphasis on legal writing, analysis, and research. In the context of a law office, students create some of the essential legal writings that lawyers produce. For example, students prepare predictive memoranda for their "boss," pointing out the strengths and weaknesses of their client's case, and attempting to develop winning arguments. Students may also write a client letter, using plain English to explain to their client the law and the merits of the case, and advise the client on the best course of conduct. Students determine and investigate the essential facts to support their client's case by interviewing or deposing various witnesses. Finally, students develop their oral and written advocacy skills and start thinking about litigation strategy by researching and writing persuasive memoranda or legal briefs for a trial or appellate court. At the end of the year, the students orally argue their case. Instruction occurs not only in meetings of the class as a whole but also in individual conferences. Each student receives extensive editorial and evaluative feedback on each written assignment.

## LAW 512 Property

Spring, 4 credits. Pass/Fail option unavailable. G. S. Alexander, A. Riles. An investigation of the law's protection of ownership, including the beginnings of property, estates in land, concurrent ownership, landlord/tenant relations, and public and private regulation of land use.

## LAW 515 Torts

Fall. 4 credits. Pass/Fail option unavailable. G. A. Hay, J. A. Henderson, Jr., D. A. Kysar, J. A. Siliciano.

An introduction to the principles of civil liability in the tort field: intentional wrongs, negligence, and strict liability. Attention is also given to the processes by which tort disputes are handled in our legal system.

## **GRADUATE COURSES**

## LAW 622 Contracts in a Global Society

Fall. 3 credits. Graduate program grading-Honors, Satisfactory, Unsatisfactory.

S. J. Schwab. Limited to graduate students. This course is designed for foreign-trained lawyers who are familiar with basic contract law in their own country. It surveys the Anglo-American common law of contracts and related civil obligations. The pedagogic approach focuses on the case method and is Socratically based, similar to the traditional first-year course in Contracts.

Graduate students who wish to study contract law would generally be expected to take this one-semester course. They are free to enroll instead in the first-year Contracts course, but if they do so, they must take that course for the full year.

## LAW 676 Principles of American Legal Writing

Fall. 2 credits.Limited to graduate students. Graduate program grading—Honors, Satisfactory, Unsatisfactory. Limited enrollment. K. Silverstein.

This course provides foreign-trained lawyers with an introduction to the essential principles of legal writing in the United States and an opportunity to practice some of the forms of writing common to American legal practice. Students will prepare such documents as client letters, memoranda, pleadings, and discovery demands in the context of representing a hypothetical client.

#### LAW 799 Thesis

Fall or spring. 5 credits. Limited to graduate students and students completing the joint J.D.-LL.M. program. Graduate program grading—Honors, Satisfactory, Unsatisfactory. J.D.-LL.M. program—Pass/ Fail option unavailable.

Arrangements for a master's thesis are made by the student directly with a faculty member. A faculty member may require the student to submit a detailed outline of the proposed thesis, as well as a summary of previous writing on the subject or other appropriate information. The work is completed during the academic year under the supervision of a law faculty member.

## UPPERCLASS COURSES

## LAW 601 Accounting for Lawyers

Fall. 2 credits. Availability of Pass/Fail option to be announced first day of class. B. B. Aldave.

This course is designed to introduce students to the basic concepts and fundamentals of financial accounting. It will focus on (1) accrual accounting concepts, principles and conventions, (2) the presentation of financial statements (balance sheets, income statements, statements of cash flow), (3) the interpretation and analysis of financial statements, and (4) the use and misuse of accounting information. The goal of the course is to enable students to critically review a company's financial statements. The course is intended primarily for students with little or no prior background in bookkeeping or accounting.

# LAW 602 Administrative Law: The Law of the Regulatory State

Fall or spring. 3 credits. Limited enrollment. Pass/Fail option unavailable.

C. R. Farina, J. J. Rachlinski. An introduction to the constitutional and other legal issues posed by the modern administrative state. Topics include: procedural due process, separation of powers, procedural modes of administrative policymaking; judicial review of agency action; and the oversight and control relationships between agencies and Congress or the President. The course provides a working familiarity with the fundamentals of administrative procedure, as well as a larger inquiry into the role of agencies in our constitutional system—and the effect of legal doctrine on shaping that role.

## LAW 603 Advanced Torts: Privacy, Relational, and Economic Interests

Fall. 3 credits. Pass/Fail option available. M. Heise.

This course explores selected topics in the tort field not typically covered in the first-year Torts course. Three broad areas of civil liability receive particular attention: privacy (including defamation), relational, and economic interests (or business torts). The course also surveys leading theoretical background topics germane to tort law as a complement to the doctrinal coverage (e.g., economic analysis of tort law and relations between tort and contract regimes).

## LAW 608 American Indian Law

Fall. 2 credits. Pass/Fail option available. D. T. White

This course is intended to provide a basic understanding and overview of the fundamental principles of Indian law. It will examine the origins of Indian law, historical development of the law, tribal sovereign powers, tribal-state conflicts, Indian water rights, economic development, and hunting and fishing rights. A number of recent cases will be discussed in detail. Students will be graded on the basis of short papers, rather than a final exam.

#### LAW 609 Anatomy of a Deal: Entrepreneurial and Corporate Finance

Spring. 2 credits. Availability of Pass/Fail option to be announced first day of class. K. K. Azzarelli.

Topics will include an introduction to capital structure and corporate finance during the various stages of a company's growth. While reviewing basic corporate law concepts such as the interests and rights of debt and equity holders and basic financial concepts such as valuation and optimal capital structure, the course will focus on the interests and rights of preferred equity holders. The remainder of the course will examine the anatomy of a private equity/venture capital deal. This will involve a review of the business and legal issues that arise in the context of a venture deal, discussion of the principal players involved, and a close look at the agreements employed. Finally, the course will touch on the role of private placements and the relevant securities laws exemptions under which venture deals are done.

#### LAW 610 Antitrust Law

Spring. 2 or 3 credits. (Students who have taken the antitrust course in the Paris program will receive two credit hours for this course. All others will receive three credit hours.) Pass/Fail option unavailable. G. A. Hay.

The antitrust laws of the U.S. protect competitive markets and limit the exercise of monopoly power. Topics include: price fixing, boycotts, and market allocation agreements among competitors; agreements between suppliers and customers; joint ventures; monopolization; and mergers.

### LAW 611 Arbitration

Fall. 3 credits. Pass/Fail option unavailable. R. K. Hull.

Arbitration is the principal method of resolving disputes between unions and employers, between securities brokers and their clients, and under international business agreements, and it is gaining favor in many other areas. This course familiarizes students with arbitration practice in a variety of fields through the use of simulation exercises, roleplaying, and discussion of readings and videotapes. Class exercises focus on practical skills, including case preparation, preliminary hearings, all phases of case presentation, and post-hearing briefs. The practical distinctions between arbitration and traditional litigation are noted throughout.

## LAW 612 Banking Law and Regulation

Fall. 3 credits. Pass/Fail option available. J. A. Macey.

The course begins by defining the roles that banks and other financial intermediaries play in the economy. It considers the claim that a specialized set of regulations governing the activities of financial intermediaries is justified by the special role that banks occupy in society. In that context a variety of theoretical arguments about banking regulation are considered. The course then examines each of the major laws that govern banking activities against the background of the various regulatory theories discussed. Topics addressed include entry restrictions, growth and expansion of bank activities, regulation of the business of banking, expansion through the bank holding-company structure, the financial holding-company structure, branch banking, interstate banking, and regulation of failing or failed banks. Attention is paid to the regulation of close substitutes for banks, particularly mutual funds, and to international banking.

## LAW 613 Bankruptcy

Spring. 3 credits. Pass/Fail option unavailable. T. Eisenberg.

Selected topics in the law of bankruptcy. An overview of the various bankruptcy chapters and a detailed study of the bankruptcy provisions of most general applicability. The relationship between the rights of an Article 9secured creditor and the bankruptcy trustee's power to avoid liens. Related topics in the enforcement of money judgments and the law of fraudulent conveyance.

## [LAW Children, Parents, and the State

2 credits. Not offered 2002–2003. This course explores legal and social understandings of the rights of children, parents, and the state with respect to issues such as access to and control over the content of education, authority regarding health care, claims to speech and expression, and procreative decisions. The course also examines the operation of rights in connection with juvenile court jurisdiction over neglect and abuse, delinquency, and status offenses.]

## LAW 617 Comparative Law

Spring. 2 credits. Availability of Pass/Fail option to be announced first day of class. S. P. Baumgartner.

The course tackles first the sources, structures, and assumptions common to the legal systems of continental Europe, Latin America, and some countries of the Far East, and then examines the enduring divisions of their private law. Particular examples are then studied: they may be grouped under a topic or by country. The course aims to demonstrate the utility of the comparative method by encouraging students to rethink their own law in the light of other approaches. This enables students to see how problems may sometimes be solved by seeing past the categories of a given system, and thus to gain a better understanding of the reasons for the rules.

## [LAW Comparative Public Law

2 credits. Limited enrollment. Not offered 2002–2003.

This course will focus on a comparison between the constitutional and administrative law of the United States and the United Kingdom and the structure and influences of the legislative, executive and judicial branches in those systems. Comparisons will also be drawn from the European Union, the Commonwealth and, where helpful, other foreign jurisdictions to illustrate the ways in which legal systems influence one another and evolve. Continental public law concepts such as legitimate expectations and proportionality are among those that will be examined in relation to the ways in which they have influenced the development of British and EU public law, and questions will be raised as to

whether such concepts have a role to play in the constitutional and administrative law of the United States. The recent introduction of a British Bill of Rights, similar to the United States and European Convention models, will provide further opportunities for comparative insight. The course will involve presentation and discussion of papers in class in lieu of a final exam. Each student will write a 10-15 page paper that will be presented in class as well as very brief written critiques of the other students' papers.]

## LAW 619 Conflict of Laws

Spring. 3 credits. Pass/Fail option available. G. J. Simson.

A study of the methods used by courts to decide the applicable law in cases that, in their parties or events, involve more than one state or country. Attention to the due-process limitations on jurisdiction, a state's obligation under the full-faith-and-credit clause to respect sister-state judgments, and conflicts between federal and state law.

## LAW 620 Constitutional Law II: The First Amendment

Spring. 3 credits. Pass/Fail option available. S. H. Shiffrin.

A comprehensive discussion of freedom of speech, press, and association. The freeexercise-of-religion clause and the establishment clause of the First Amendment are treated less extensively.

## LAW 621 Consumer Law in the Global Marketplace

Spring. 3 credits. Availability of Pass/Fail option to be announced first day of class. W. Taylor.

This course will examine the basic rights, liabilities and responsibilities of parties engaged in consumer transactions. Viewing these transactions through the lens of a global marketplace, the course will focus on domestic and international problems pertaining to internet commerce, telemarketing, electronic funds transfers, credit reports, debt collection practices, credit costs, credit card fraud, false advertising, and other deceptive trade practices.

In addition, the course will explore credit discrimination issues, particularly those involving racial, gender, and other bias that impede fair access to consumer credit.

#### LAW 623 Copyright

Spring. 3 credits. Pass/Fail option unavailable. R. Ku.

Copyright law has become increasingly important as the American economy has shifted from a predominantly manufacturing economy to an information economy. This course provides students with a comprehensive overview of U.S. copyright law. It begins with coverage of the substantive and procedural requirements for qualifying for copyright protection, then provides an indepth study of the rights granted to authors under this law, the standards for judging copyright infringement, public policy limitations on the scope of copyright interest (such as the fair use defense), and remedies available to successful litigants. Issues raised by new information technologies and recent amendments addressing them receive special attention. Partly as an aid to understanding U.S. law better and partly because copyright law is of increasing international importance, the course also provides some comparative and international copyright law components.

In addition, it touches on issues of trademark and right-of-publicity law as they overlap or complement copyright.

#### LAW 624 Corporate and White Collar Crime

Fall. 3 credits. Pass/Fail option available. S. P. Garvey.

White collar crime is one of the fastest growing areas of specialization in the legal profession today. The collapse of the savings and loan industry, rampant fraud in the nation's financial markets, and systemic corruption in the health care industry contributed to a dramatic increase in federal white collar crime prosecutions over the past twenty years. This course examines some of the principal statutes that are used to prosecute corporate and white collar crime. Theories of liability we will consider include traditional white collar offenses like mail and wire fraud, insider trading, perjury, and obstruction of justice. They also include more recent entries into the field such as RICO, money laundering, and laws enacted to combat government contract fraud. The course will also provide an introductory look at the Federal Sentencing Guidelines.

#### [LAW Corporate Finance in Emerging Markets

3 credits. Not offered 2002-2003. The course examines legal aspects of various types of corporate finance transactions in emerging markets, and the role of commercial lawyers in these transactions. The course focuses on corporate finance transactions occurring in the midst of the transformation of former Soviet bloc states from command to market economic systems. Transactions in emerging markets pose different political, economic, social, and legal challenges from those arising from transactions in other, more predictable, legal systems. At the same time, the globalization of the world economy and the profound shortage of capital in many emerging markets make this one of the fastest growing field of commercial law.]

## LAW 625 Corporations

Fall or spring, 4 credits. Limited enrollment. Pass/Fail option available. B. B. Aldave, J. A. Macey.

An introduction to the business corporation laws affecting the rights and roles of corporate boards of directors, senior executive officers. and shareholders, with an emphasis on large, publicly traded firms. Shareholders' economic interests are examined from the perspective of limited liability and dividend standards, expectations of liquidity or transferability of shares, and the use of debt capital as a mode of financing corporate activity. Shareholders' limited participation rights in corporate decision making are examined from the perspective of state and federal rules governing shareholder voting and the disclosure of corporate information and the notion of managerial expertise (e.g., as evidenced by judicial application of the "business judgment rule"). The latter part of the course focuses on directors' and officers' fiduciary obligations to shareholders, examining the operation of these duties in a variety of settings and transactions. Issues relating to the roles and functions assumed by corporate attorneys (with respect to their clients) and the role of business corporations within society are also addressed. No previous business knowledge is assumed.

## LAW 626 Criminal Procedure

Fall. 3 credits. Pass/Fail option unavailable. S. D. Clymer.

This course surveys the law of criminal procedure, with emphasis on the constitutional constraints that regulate the pretrial stage of the criminal process. More specifically, the course focuses on the law of interrogations and confessions, the admissibility of evidence, and on the right to counsel throughout all stages of the criminal process.

#### LAW 627 Current Topics at the Crossroads of Law and Finance

Spring. 3 credits. Pass/Fail option available. J. R. Macey, M. O'Hara. Financial institutions of all kinds, whether they are formally known as insurance companies, banks, investment banks, mutual funds, or pension funds, invest money on behalf of clients in a wide variety of investment vehicles. This course looks at the way that these financial institutions are treated from both a legal and an economic perspective. Emphasis is placed on the intersections between modern financial theory and legal analysis. Topics covered include insurance, bank regulation and reform, securities markets, investment banking, and pensions.

## LAW 629 Cyberspace Law

Fall. 3 credits. Availability of Pass/Fail option to be announced first day of class. R. Ku.

This course will expose students to the study of the rules and norms governing the control and dissemination of information in a computer mediated world. We live in a world in which information is increasingly distributed through computers rather than traditional mediums such as paper, broadcast, or film, and the interlinking of computers that make up the Internet has increased our ability to communicate and distribute information. Correspondingly, because information is distributed through computers capable of copying, filtering, or altering information, it is now possible to control and manipulate information at various levels throughout the network in ways and to an extent that were otherwise impossible or impractical. While existing doctrines such as freedom of speech, intellectual property, and privacy are familiar doctrinal and theoretical starting points, cyberspace allows, and often requires, a reexamination of the values underlying those areas of law. This reexamination is necessary not only to translate those values into cyberspace applications, but to alter existing rules and legal institutions in real space as well. To give one example, the value of studying cyberspace law is not only about answering whether data stored in Random Access Memory should be considered a copy under copyright law, but whether copyright protection or the control of information in any form is necessary in a world in which information can be perfectly reproduced and distributed globally at almost no expense.

## LAW 630 Directed Reading

Fall or spring. 1 or 2 credits. Arrange directly with instructor. See page 18 of the Law School Catalog and Law School registrar. Must be taken Pass/Fail.

An examination of a topic through readings selected by arrangement between the instructor and an individual student or group of students (not exceeding eight).

350

## LAW 632 Education Law

Fall. 3 credits. Pass/Fail option available. M. Heise.

This course focuses on selected legal issues that arise in the public and private education context, with emphasis on the elementary and secondary school setting. Topics considered include the legal and policy dimensions of the rights of students, parents, educators, and the state with respect to such issues as access to, control over, and regulation of the education setting and institutions. Issues germane to equal education opportunity, school finance, and school governance and regulation receive particular attention.

## LAW 633 Employment Law

Fall. 3 credits. Pass/Fail option available. S. J. Schwab.

Survey of major statutory schemes and common law doctrines that affect the employer-employee relationship in the private sector, other than laws regulating union formation and collective bargaining, which are covered in Labor Law. Topics covered include unjust dismissal, drug testing, free speech, privacy, and antidiscrimination laws, as well as wage and hours laws, employee benefit regulation, and safety and health regulation.

## LAW 636 Environmental Law

Fall. 2 credits. Recommended prerequisite: Corporations. Pass/Fail option unavailable. The course surveys the major environmental laws, with a primary focus on federal statutes. Emphasis will be placed on the various sources of liability to both individuals and corporations from common law, statutory provisions, administrative regulation and enforcement policy. Corporate successor liability through mergers and acquisitions will be included, including the increasing importance of performing a full range due diligence review for environmental conditions in such transactions. Special attention is paid to the economic, social, and political obstacles to efficient regulation of the environment.

## [LAW Estate Planning

2 credits. Limited enrollment. Not offered 2002–2003.

Problems involving planning and drafting for the transfer of property, both during lifetime and at death, taking into account relevant property law and federal and state income, gift, and estate taxes.]

## LAW 640 Evidence

Fall or spring. 3 credits. J.H. Blume: (Pass/ Fail option available); S. D. Clymer: (Pass/ Fail option unavailable.) J. H. Blume, S. D. Clymer.

The rules of evidence in civil and criminal cases with emphasis on relevance, hearsay, authentication, witnesses, and experts. The course focuses on the Federal Rules of Evidence, with some attention to how they diverge from the common law.

## LAW 641 The Evolving Law of Patents: Patents and Biotechnology

Fall. 2 credits. Limited enrollment. No prior knowledge of either patent law or biotechnology is needed for this course.

Pass/Fail option available. Y. M. Cripps. This course will focus on the ways in which biotechnological developments are affecting traditional notions of property, intellectual property and information. In addition to patent law, other forms of property protection, such as copyright, will be examined through a biotechnological prism and compared with the

way in which they operate, for example, in relation to the internet and digital technology. There will also be an examination of whether genetically engineered organisms and other biotechnological products should, if at all, be granted intellectual property protection either within the existing frameworks of intellectual property law or under some new regime designed specifically for that purpose. As is inevitable in any discussion of intellectual property law, international perspectives will be important. The course will involve presentation and discussion of papers in class in lieu of a final exam. Each student will write a 10-15 page paper that will be presented in class as well as very brief written critiques of the other students' papers.

## LAW 642 Family Law

Fall. 3 credits. Pass/Fail option available. L. E. Teitelbaum.

Broadly understood, family law is the study of state-imposed rules regulating intimacy and intimate relationships in society. In this course we use scientific and social scientific information to evaluate our assumptions and beliefs and to call into question the appropriateness of a number of current state laws regulating families. We examine the evolution of our society's understanding of and expectations for marriage, as well as shifts over the past several decades in the nature of and justification for state regulation of that institution. Substantial attention is devoted to the social and legal consequences of marriage dissolution, including child custody, child support, property distribution, and spousal maintenance. Other topics considered include: definitions, policy, and trends in American family law; the legal significance of marriage-rights and obligations; private ordering within the marital context; and nonmarital relationships-rights and obligations.

#### LAW 643 Federal Courts

Spring. 4 credits. Prerequisite: Constitutional Law and second semester of Civil Procedure. Students without such background should consult with the instructor. Availability of Pass/Fail option to be announced first day of class. C. R. Farina

This course examines the various constitutional and judge-made doctrines that control access to the federal courts to vindicate federal rights. It is particularly valuable for those planning a career in public interest or the public sector, anyone else expecting to litigate extensively in federal court, and students who have or hope to obtain a judicial clerkship. Topics covered include: case or controversy limitations, including standing; constitutional and statutory limits on jurisdiction; causes of action for constitutional and statutory rights, including 42 U.S.C.§1983 and Bivens actions; bars to such actions, including the various abstention doctrine and the emerging law on 11th Amendment and sovereign immunities.

#### LAW 644 Federal Income Taxation

Fall or spring. 4 credits. Pass/Fail option available. W. C. Gifford, R. A. Green. Limited enrollment.

A basic course designed to develop understanding of tax concepts and ability to work effectively with the Internal Revenue Code, regulations, cases, and other tax materials.

## LAW 646 Feminist Jurisprudence

Spring, 3 credits. Availability of Pass/Fail option to be announced first day of class. M. A. Fineman. This course examines the role of law, and, more generally, the role of the state, in perpetuating and remedving inequities against women. We will study several paradigmatic feminist legal theories, including equality, difference, dominance, and various antiessentialist theories (e.g. intersectional, poststructuralist). Among the questions considered will be: How does the law help to construct gender? In what ways does it interact with cultural images and assumptions regarding women to perpetuate women's disadvantaged status in society? To what extent can a set of institutions implicated in women's marginalization be used to remedy it? Can a legal system predicated on the liberal assumption of a unitary, prepolitical, autonomous self accommodate feminist accounts of social construction, constrained "choice," or decentered subjects? What methods have feminists used to argue in and about the law, and do these methods themselves have the potential to transform legal thinking?

## [LAW 647 Health Law

3 credits. Not offered 2002-2003. This course examines the role of law and policy in the health care industry. Students are invited to take a "systems approach" to the study of the role of law in arriving at coherent policy solutions for a host of dilemmas facing a rapidly evolving industry. Students are asked to consider if a particular statute, regulation, or judicially crafted legal doctrine is consistent with new developments or any public policy towards health care. Topics covered include: access to health care; purchasing health care; commercialism vs. professionalism; the antitrust challenge to professional dominance; changing institutional providers; and publicand industry-sponsored quality control.]

#### LAW 649 The IPO Process and Deal Structure Alternatives

Fall or spring. 3 credits. Prerequisite: Corporations. Limited enrollment. Pass/Fail option available. Z. J. Shulman.

An in-depth look at initial public offerings and acquisitions from a practitioner's point of view. With respect to initial public offerings, the course covers: the applicable statutory framework, pre-offering corporate preparations (such as the implementation of poison pills and stock option plans), the due diligence process, the implementation of corporate governance policies appropriate for a public company, the offering registration process, liability under federal securities laws, the Securities and Exchange Commission review process, underwriting arrangements, selection of a trading forum (i.e., NYSE, NASDAQ, or AMEX), and the transaction closing. Regarding mergers and acquisitions, the course explores: financing alternatives, accounting treatment, due diligence, choosing an appropriate transaction structure (i.e., stock versus asset sale), public company transaction issues (i.e., antitakeover matters and fiduciary duty concerns), and crucial legal aspects of the acquisition, such as caps/collars, letters of intent, successor liability, continuity of employees, and noncompetition agreements.

#### LAW 650 International Business: Transactional Law and Dispute Settlement

Spring. 2 credits. Availability of Pass/Fail option to be announced first day of class. D. Ridgway.

The applicable legal regime and the role of law and lawyers in transactions that cross national boundaries. The law of international sales, including the U.N. Convention on the International Sale of Goods, and trade terms. Financing international sales and transactions, the law of documentary and stand-by letters of credit. International dispute settlement, including litigation and arbitration.

## LAW 651 International Business: WTO and International Trade Law

Spring. 3 credits. Pass/Fail option

available. J. J. Barcelo III. The law of the World Trade Organization (WTO), including international trade theory, the basic WTO rules and principles limiting national trade policy, and the WTO dispute settlement process. A study of national (U.S.) fair and unfair trade law within the WTO framework (safeguard, antidumping, subsidies and countervailing duty remedies). Consideration will also be given to non-trade values within the WTO system (environment, labor rights, and human rights).

## LAW 653 International Commercial Arbitration

Fall. 3 credits. Pass/Fail option available. J. J. Barceló III.

A study of arbitration as a dispute resolution process for international trade and business disputes. The course analyzes institutional and ad hoc arbitration, the authority of arbitral panels, enforcement of agreements to arbitrate, challenging arbitrators, procedure and choice of law in arbitral proceedings, and enforcement of international arbitral awards. The course gives special attention to the international convention on the recognition and enforcement of international arbitral agreements and awards (New York Convention) and the UNCITRAL (U.N. Commission of International Trade Law) arbitral rules and model law. It focuses on commercial arbitration as an international phenomenon and not on arbitration under any particular national system.

## LAW 655 International Human Rights

Spring. 3 credits. Recommended prerequisite: Public International Law. Pass/Fail option available. D. Wippman.

This course explores the development and effectiveness of international legal rules governing the conduct of a state toward people within its jurisdiction. Topics include the substantive norms of human rights and their philosophic basis; the mechanisms for the protection of human rights, such as the United Nations, international human rights treaty bodies, and domestic courts; and current issues such as the doctrine of humanitarian intervention, the status of indigenous peoples, and human rights during armed conflicts.

#### LAW 657 International Organizations and International Human Rights Institutions

Fall. 3 credits. Pass/Fail option unavailable. M. B. Ndulo.

The course provides a comprehensive legal analysis of problems concerning membership, the structure of the United Nations organs and a variety of other international organizations. It considers their functions and acts taking into account the United Nations Charter and texts establishing these organizations. It also considers the use of force under international law with specific reference to the United Nations Charter. The course further considers the structure, jurisdiction and functions of the International Court of Justice and the International Criminal Court. It also examines the international machinery for the protection of human rights in the world community including the United Nations Human Rights Committee, the European Court of Human Rights and the Inter-American Court of Human Rights. Relevant decisions of these courts and of municipal courts are studied as well as basic documents.

## LAW 658 International Tax Planning

Fall. 3 credits. Prerequisite: Federal Income Taxation. Pass/Fail option available. W. C. Gifford.

The international aspects of United States income taxation in the context of business planning and counseling situations. The course is based on a series of problems involving common business transactions by United States multinational corporations, such as exporting, manufacturing and marketing abroad, and repatriation of foreign earnings to the United States.

## LAW 660 Labor Law

Spring. 3 credits. Pass/Fail option available. K. V. W. Stone.

A study of collective bargaining, including the process of union formation, legal regulation of strikes and other economic weapons, negotiation and enforcement of collective agreements, the duty of fair representation, the application of antitrust law to union activity, and the relationship between federal labor law and local laws regulating the employment contract.

## LAW 661 Land-Use Planning

Fall. 3 credits. Pass/Fail option unavailable. E. F. Roberts.

A study of the legal matrix as a method of controlling the environment in which people live and work, including public nuisance as a device to control the town environment; zoning as a control mechanism; conflict between zoning as a plan for growth and as a brake on development; subdivision controls; planning as a respectable government activity; the dynamics of planning, zoning, subdivision controls, and private land-use controls; the rehabilitation-ofcenter-city syndrome; and future prospects of maintaining a decent environment in a classriven multilingual and culturally tribal society that lacks a genuine moral consensus.

## LAW 662 Law and Social Change: International Experience

Fall. 2 credits. Availability of Pass/Fail option to be announced first day of class. M. Greenberg.

This course is intended for students interested in law reform and international development. As compared with courses about international law, this course draws from an international base of experience while focusing on national laws in the context of socio-economic change: How do the concepts of "social change" and "development" differ? When does it suffice to draft and promote passage of new laws? When must the introduction of new laws be preceded or accompanied by other approaches, such as legal literacy training or public education? Who may be necessary partners: ministries of Justice, nongovernmental organizations, bar associations, or others? Issues will be illustrated by case studies drawn from Eastern Europe, Asia, Latin America and Africa. Social change topics will range from women's rights, gender and the family, to democracy-building and environmental protection. Course requirements are two short think pieces" (2-3 pages), a midterm, and a final analytical paper of 10-15 pages on a student-selected topic.

## LAW 663 Law for High Growth Companies

Spring. 3 credits. Pass/Fail option available. Z. Shulman.

An in-depth analysis of key issues that an emerging high growth business must consider and address, including: (i) choosing type of business entity, (ii) protecting confidential information and inventions, (iii) sources of capital (in both bull and bear market environments), (iv) understanding capitalization structures (common stock, preferred stock, warrants, etc.), (v) use of stock options as employee incentives, (vi) fundamental fair employment practices, (vii) proper establishment and utilization of Boards of Directors and Advisory Boards, (viii) technology licensing and commercialization, (ix) negotiating relationships with distributors, resellers and customers, (x) international business practices, (xi) dealing with creditors, and (xii) key accounting issues that affect early business decisions. Course materials compiled.

## LAW 665 Law of Branding and Advertising: Trademarks, Trade Dress, and Unfair Competition

Spring. 2 credits. Pass/Fail option available. N. D. St. Landau.

Fundamental trademark, trade dress, and false advertising laws are examined in the context of assisting clients to execute branding and marketing strategies. Special focus is given to branding as it relates to: "consumer products companies;" the impact of e-business and the internet on branding strategies and acquisitions; and complex proof issues in trademark and domain name litigation. Marketing strategies embody fundamental and longestablished principles of the trademark laws. The Lanham Act is used to address issues ranging from confusingly similar words and designs, to false and unsubstantiated advertising claims, and public appropriationand misappropriation-of long-established corporate icons in today's e-commerce world. This course examines the basics of this rapidly changing body of law.

## LAW 664 The Law Governing Lawyers

Spring. 3 credits. Satisfies the professional requirement. Pass/Fail option unavailable. W. B. Wendel.

This course is intended to provide a comprehensive overview of the law governing lawyers in a variety of practice settings, including transactional, counseling, and civil and criminal litigation. The course is not focused merely on the ABA's Model Rules, but draws extensively from judicial decisions in malpractice and disqualification cases, the new Restatement of the Law Governing Lawyers, and other sources of law. A major theme is the relationship between state bar disciplinary rules and the generally applicable law of tort, contracts, agency, procedure, and crimes. Another significant theme is the prevention of attorney discipline and malpractice liability through advance planning.

## LAW 667 Lawyers and Clients

Fall. 3 credits. Satisfies the professional responsibility requirement. Pass/Fail option unavailable. D. A. Kysar.

A survey and critique of (1) the law governing the practice of law and the legal profession's norms concerning the lawyer-client relationship; (2) the social functions of lawyers; (3) the modes and patterns in which legal services are or are not made available to the public; and (4) ethical theory relating to lawyer role and conduct.

352
#### LAW 668 Legal Aspects of Foreign Investment in Developing Countries Spring, 3 credits. Pass/Fail option

unavailable. M. B. Ndulo This course studies legal aspects of foreign investments in developing countries. It seeks to identify legal problems that are likely to affect a commercial investment in a developing country. Inter alia, it deals with the public international law principles and rules governing the establishment by foreign businesses of various factors of production (persons and capital) on the territory of other states and the protection of such investments. Thus, the course includes a discussion of the following topics: economic development and foreign capital; obstacles to the flow of investments to developing countries; guarantees to investors and investment codes; bilateral treaties: nationalization; joint ventures; transfer of technology; arbitration; investment insurance; unification of trade law; and the settlement of investment disputes.

#### [LAW Legislation

3 credits. Not offered 2002–2003. This course explores various theories of legislation by studying how statutes become a source of public policy, how judges interpret them, and how lawyers draft them. Drafting exercises are used throughout the course to determine to what degree legislation can be used to reform law or to remedy particular social problems.]

#### LAW 671 Media Law

Fall. 2 credits. Pass/Fail option available. R. Ku.

This course examines various aspects of media law. It begins by considering the scope of First Amendment protection of the media. It then focuses on legal issues arising from newsgathering and moves on to issues arising from publication, such as defamation, publication-related privacy torts, and right of publicity. The course briefly examines basic copyright concepts in order to lay the groundwork for close study of disputes over electronic publishing rights to collective works. Various recent landmark developments in the case law will be highlighted.

#### LAW 672 Mergers and Acquisitions

Fall. 2 credits. Prerequisite: Corporations or permission of the instructor. Pass/Fail option available. R. F. Balotti.

This course examines the principal business and legal issues in the purchase and sale of publicly held businesses. Emphasis is placed on the duties of directors in the acquisitions of publicly held companies (including hostile takeovers).

#### LAW 673 Negotiation and Mediation: Alternative Dispute Resolution and Non-Traditional Approaches to Conflict

Spring. 2 credits. Limited enrollment. Pass/ Fail option available. J. Meyer.

This course will inquire into the theories and practice of conflict resolution and will focus on non-traditional, cutting-edge alternatives to the traditional litigation process. The course will introduce students to the spectrum of ADR processes and will teach interviewing and counseling, negotiation and mediation as skill sets. A variety of approaches will be used to analyze issues and develop skill sets, including lecture/discussion, video tapes, negotiation exercises and simulated mediations.

#### LAW 675 Partnership Taxation

Spring. 2 credits. Pass/Fail option available. R. A. Green.

This course provides an introduction to the taxation of partnerships and limited liability companies. The course focuses on the tax issues arising upon the formation, operation, and liquidation of a partnership or LLC.

#### [LAW Problems in Commercial Law: Sales, Leases, and Electronic Commerce

3 credits. Not offered 2002–2003. This course will explore contemporary issues in Commercial Law with particular emphasis on sales, leases and electronic transactions. Because of the recent changes in the commercial world around the UCC such as electronic contracts, this course will selectively integrate materials on the Uniform Electronic Transactions Act (UETA), the Uniform Computer Information Transactions Act (UCITA) and the United Nations Convention on Contracts for the International Sale of Goods (CISG).]

#### LAW 678 Products Liability

Spring. 3 credits. Pass/Fail option unavailable. J. A. Henderson, Jr. Applications of products-liability doctrine and theory to a variety of problems drawn from or closely approximating actual litigation. An overview of the relevant case law, statutes, and administrative regulations, including the new Restatement Third of Torts: Products Liability.

#### LAW 680 Public International Law

Spring. 3 credits. Pass/Fail option

available. D. Wippman. An introduction to the legal rules governing the conduct of states vis-à-vis other states, individuals, and international organizations, with reference to major current events and issues. Topics include the nature, sources, and effectiveness of international law; the establishment and recognition of states; principles concerning state sovereignty, territory, and jurisdiction; the law of treaties; state responsibility; international criminal law; and human rights. Special attention is given to the law governing the use of force.

#### LAW 681 Securities Regulation

Spring. 3 credits. Availability of Pass/Fail option to be announced first day of class. J. F. Olson.

Capital formation is critical to the economic health of the U.S. and other nations. American capital markets have historically been the strongest in the world, but they have been under significant stress recently as a result of market declines and corporate failures. This course examines the U.S. federal regulatory scheme for capital formation through the sale of equity and debt securities, focusing on the Securities Act of 1933. The course also focuses on financial and other disclosure requirements, and regulation of "insider trading". under the Securities Exchange Act of 1934. Federal regulation of securities markets and broker-dealers, and regulation of accountants and lawyers who practice before the SEC, are also discussed. Federal regulatory requirements are explored in the context of the practical realities of structuring capital formation transactions, and advising public companies and other market participants in the post-Enron environment. Caselaw and regulatory developments will be considered through the use of hypothetical real-world fact situations.

#### LAW 682 Sex Discrimination and the

Law Spring. 3 credits. Pass/Fail option available. R. L. Lieberwitz.

This course examines various legal issues relevant to discrimination on the basis of sex. Among the problems analyzed are: sexual harassment; pornography; reproductive rights; prostitution; work-family conflict; inequality in employment opportunities; gay and lesbian rights; welfare rights; and affirmative action.

#### LAW 683 Social Security Law

Spring. 3 credits. Pass/Fail option available. P. W. Martin.

The course focuses especially on how Social Security's benefit rules relate to employment, families, and household composition and how its procedures address the challenge of adjudicating the massive numbers of benefit claims that arise each year. It introduces the general features of the Social Security Act's entitlement, benefit formulae, and procedural rules; highlights those that pose the greatest difficulty to administrators and advocates; and surveys current proposals for change.

#### LAW 684 Sports Law

Spring. 2 credits. Recommended prerequisites: Antitrust Law and Labor Law. Pass/ Fail option available. W. B. Briggs.

The course traces the development of sports law in the United States. Particular attention is given to the relationship of sports with antitrust and labor law. Contemporary issues involving arbitration, collective bargaining, amateur athletics, agents, torts, criminal law, and constitutional law are addressed.

#### LAW 686 Supervised Teaching

Fall or spring. 1 or 2 credits. Arrange directly with instructor. Must be taken Pass/Fail.

See page 18 of the Law School Catalog and the Law School registrar.

#### LAW 687 Supervised Writing

Fall or spring. 1, 2, or 3 credits. Arrange directly with instructor. Must be taken Pass/Fail.

See page 18 of the Law School Catalog and the Law School registrar.

#### LAW 688 Supervised Teaching and Supervised Writing—Legal Methods Honors Fellows Program

Fall and spring. 4 credits for full year. Prerequisite: Application Process. Must be taken Pass/Fail.

Legal Methods Honors Fellows serve for the full year as teaching assistants in the Legal Methods course and as mentors to first-year law students. With training and guidance from the Legal Methods faculty, the Honors Fellows work closely and one-on-one with the students on the various writing projects. In addition to meeting regularly with students, and reviewing and critiquing their work, Honors Fellows may help design writing and research assignments, prepare model memoranda, participate in role-playing exercises during mock interviewing or negotiating sessions, judge oral arguments, and assist the librarians with research training. The Honors Fellows are also responsible for teaching and holding classes on the Bluebook.

Additionally, Honors Fellows serve as mentors to the entering students to help them make the most of the foundational first year of law school. The Fellows hold workshops on basic law school skills and, during the spring semester, under the direction of the Dean of

Students, a small group of Fellows may tutor first-year law students.

#### LAW 689 Taxation of Corporations and Shareholders

Fall. 3 credits. Prerequisite: Federal Income Taxation. Pass/Fail option available. R. A. Green.

This course examines the federal income taxation of corporate transactions, including incorporations, dividends, redemptions, liquidations, and reorganizations.

#### LAW 692 Trial Advocacy

Spring. 4 credits. Pre/Co-Requisite: Evidence. Limited enrollment. Pass/Fail option available. G. G. Galbreath.

This course is devoted to the study of the trial. Fundamental skills are taught in the context of challenging procedural and substantive law problems. Each stage of the trial is examined: jury selection, opening, objections, direct examination, cross-examination, exhibits, impeachment, expert witnesses, child witnesses, summation, and pretrial. In addition to exercises every week on a particular segment of a trial, the student also does a full-day jury trial at the completion of the course. Video equipment is used to teach and critique student performance. There are occasional written assignments and class attendance is mandatory

#### LAW 694 Trusts and Estates

Fall. 4 credits. Pass/Fail option available. G. S. Alexander.

The course surveys the basic law of succession to property, including wills and intestate succession, and the law of trusts. Among the recurring themes of the course are strict and lenient enforcement of formal requirements and methods of interpretation. This is not a course on estate taxation.

# PROBLEM COURSES AND SEMINARS

All problem courses and seminars satisfy the writing requirement. Limited enrollment.

#### LAW 703 Advanced Legal Research

Spring. 3 credits. Prerequisite: Legal Methods. Pass/Fail option unavailable. C. M. Germain and staff.

Teaches cutting-edge research techniques to prepare students for practice in the law office of the future. Focuses on desktop electronic legal research, and covers U.S., international, and foreign law, as well as multidisciplinary research. The course is designed to teach students, whose careers will begin in a period of information transition, how to handle traditional and electronic sources and formats and make efficient choices.

#### [LAW African Americans and the Supreme Court

3 credits. Not offered 2002-2003. Beginning with its first decisions related to the slavery question, the Supreme Court has at times aided and at other times hindered efforts to afford African Americans full citizenship. This seminar explores the relationship between blacks and the Supreme Court by examining the major Court decisions affecting African Americans and attempting to understand those decisions in their historical contexts. The seminar begins with a review of the background and meaning of the constitutional provisions pertaining to the status of blacks in the new nation and ends with an intensive look at Brown v. Board of Education.]

#### LAW 707 American Legal Theory

Fall. 3 credits. Pass/Fail option unavailable. R. S. Summers.

The fall 2002 topic for this seminar is the appropriate form of basic types of legal phenomena such as criteria of valid law (for both publicly and privately made law), institutions such as legislatures and courts, statutory rules, accepted methods of statutory interpretation, the principle of stare decisis and common law rules, adjudicative processes, limitations on judicial power to modify rules, and the formal characteristics of the legal system viewed as a whole. American law lacks appropriate form in many important ways and a heavy price is paid for this. However, appropriate legal form and its distinctive underlying rationales (general legal values) profoundly affect the overall content of law and its practice by lawyers in the American as well as other legal systems. Such formality and its rationales have as much or more of a claim to primacy as the essence of law than do problem-specific policies that also inform the law's content. In this seminar, there is about equal emphasis on practical skills and theory.

#### LAW 708 Appellate Advocacy

Fall. 3 credits. Pass/Fail option unavailable. J. B. Atlas.

This seminar will examine the law and skills that are integral to representing a client on appeal. The seminar will be loosely divided into three central parts: (1) the principles of appellate law, including standards of review, the preservation doctrine, harmless-error analysis, and remedies; (2) the unique role of appellate counsel, including ethical duties to the court and client; and (3) appellate skills, including client counseling, issue selection, brief-writing, and oral argument. Miscellaneous additional topics for exploration include motion practice, leave applications, and the role of law clerks in the decision-making process.

Students will read and analyze the record of a criminal proceeding, assess and research potential appellate issues, and prepare a brief (including a re-write) for either the prosecution or defense. Each student will also orally argue the case in a moot-court session.

#### LAW 709 Biblical Law

Spring. 3 credits. Pass/Fail option available. C. M. Carmichael.

Analysis of law and narrative in the Bible from the perspective of ancient law and legal history. Topics include the nature of the law codes (e.g., hypothetical formulation versus statutory law), legal issues in the narratives (e.g., law of adultery and women's rights), law and morality (e.g., the Ten Commandments), law and religion (e.g., institutions guaranteed by the law but condemned by religious authority), the transformation of extralegal relations into legal ones (e.g., with the introduction of money), legal interpretation in antiquity (e.g., the Sermon on the Mount), social factors in legal development (e.g., shame and guilt), and aspects of criminal, family, and private law (e.g., an eye for an eye, incest rules, and unjust enrichment).

#### LAW 711 The Common Law and the **African Legal Systems**

Fall. 3 credits. Pass/Fail option unavailable. M. B. Ndulo.

The seminar studies legal systems in postcolonial Africa. It concentrates on the former British colonies. During the colonial period, the common law was imported into British Africa. As a result, these countries are

now common law jurisdictions. The description is supported by the history of the countries as well as by current statutory guidelines. African countries, however, also retained African customary law as part of the legal system. The two systems of law operated alongside one another and interacted at various points. During the colonial period, the common law was considered superior to African customary law and became the dominant system of law. In today's Africa, the two systems continue to operate side by side in very much the same way as they did in colonial times. Conflicts between them have generated considerable interest among legal scholars. The seminar considers the following issues: the introduction of the common law in Africa; the nature of the customary judicial process; the nature of the plural system; and areas of conflict between customary law and the common law in such areas as succession, land tenure, marriage laws, and gender. It also examines issues relating to constitutional law and governance. Contemporary Africa is engaged in efforts aimed at building democratic political systems that are responsive to the needs of African communities. In this regard, we examine such issues as constitutional arrangements in postindependence Africa, and conditionality, good governance, and development aid.

#### [LAW Constitutional Law and Political Theory

3 credits. Not offered 2002-2003. The purpose of the seminar is to explore theories of freedom of speech and theories of equality. How are the ideas of freedom, equality, association, and community linked in doctrine, and how should they be linked? Neoconservative, liberal, radical, feminist, and Marxist writings are considered.)

#### [LAW Consumerism

3 credits. Not offered 2002-2003. Consumerism describes the belief that "the possession and use of an increasing number and variety of goods and services is the principal cultural aspiration and the surest perceived route to personal happiness, social status and national success." Individuals subscribing to this belief are said to emphasize acts of consumption as their primary mode of self-development, self-fulfillment, and selfexpression. Societies subscribing to the consumerist belief are said to maximize opportunities for consumption by ensuring a vast supply of natural resources, by deploying public funds in a manner that enables and supports the production and distribution of consumer goods, and by allowing speech between producers and consumers (and about producers and consumers) to assume high significance in social affairs.

This seminar is designed to (a) examine evidence for the existence of consumerism as a pervasive social phenomenon, (b) weigh arguments for and against consumerism as a welfare-enhancing or welfare-decreasing social phenomenon, (c) unravel the role of current law in supporting or suppressing consumerism, and (d) speculate on possible alternative legal approaches to regulating the sources and impacts of consumerism. We will accomplish these aims through careful, contextual examination of consumerism in various legal settings. Included will be discussions of products liability law, deceptive advertising regulation, food and drug law, anti-discrimination law, environmental law, and constitutional law. Background readings

on economic, psychological, critical and other theoretical approaches to consumerism will be interspersed within these units.]

#### LAW 716 Corruption Control

Spring. 3 credits. Pass/Fail option available. R. C. Goldstock.

This seminar analyzes the types of corruption that exist in both the public and private sectors, the means by which a variety of criminal and non-traditional remedies may be used to reduce the frequency and impact of corrupt activities, and the constitutional and statutory problems implicated by such approaches.

#### [LAW Empirical Studies of Leading Civil Rights Issues

3 credits. Not offered 2002–2003. This seminar will focus on empirical studies of sex discrimination in employment cases and death penalty cases.]

#### LAW 721 Ethical Issues In Civil Litigation

Spring. 3 credits. Satisfies the professional responsibility requirement. Pass/Fail option unavailable. W. B. Wendel.

This seminar deals with the myriad disciplinary, procedural, and malpractice pitfalls that lawyers encounter in civil litigation. By the conclusion of the seminar, students will be acquainted with common law-of-lawyering issues including: conflicts of interest, investigation and discovery (including the attorney-client privilege, perjury, ex parte contacts, and document destruction), motions practice, settlement negotiations, and forensic tactics. The seminar is designed to expose students to problems typically faced by litigators in medium-sized to large law firms handling complex disputes, but is also applicable to lawyers working in small firms or government agencies who do a significant amount of civil litigation.

#### LAW 722 Ethical Issues in Criminal Practice

Spring. 3 credits. Satisfies the professional responsibility requirement. Pass/Fail option unavailable. C. Grumbach.

Using simulated problems, we will explore the ethical duties of and practical quandaries faced by prosecutors and criminal defense attorneys. As some examples, we will examine the ethical duties that pertain to the examination of witnesses and argument to the jury; the duty of the prosecutor to "seek justice," not merely to convict; the relationship of the prosecutor to witnesses and police, and the obligation to disclose exculpatory evidence; the duties and dilemmas of the defense attorney confronted with a guilty client who intends to commit perjury or an innocent client who wishes to accept a plea offer; and the right to effective assistance of counsel. We will examine these topics in the context of hypothetical and famous trials that involve coaching, "playing the race card," and blaming the victim, or arrests based upon racial profiling or planted evidence. The writing assignments will be in the form of persuasive trial memoranda prepared on behalf of or to prosecute simulated clients. Sample issues might involve attorneys who face such quandaries as what to do with the "smoking gun" that a client has just delivered to the law office or whether to inform the judge that a defendant is using an alias to hide a substantial criminal record. At the end of the semester we will hold mock hearings based upon these simulated cases.

#### LAW 725 European Union Law

Fall. 3 credits. Availability of Pass/Fail option to be announced first day of class. J. J. Barcelő III.

The seminar studies the EU treaty, institutions, and lawmaking processes; the direct effect, supremacy, and reception of EU law in the member states; the development of the four freedoms (goods, services, persons, and capital); the fundamental rights doctrine; protection of the environment; and EU antitrust law.

#### LAW 728 First Amendment Theory

Spring. 3 credits. Availability of Pass/Fail option to be announced first day of class. S. Shiffrin.

An examination of competing theories regarding the justification and scope of freedom of speech, freedom of press, and freedom of religion.

#### LAW 730 Grand Jury Investigations

Fall. 3 credits. Availability of Pass/Fail option to be announced first day of class. N. Kuckes.

This seminar will explore the special legal and practical issues related to grand jury investigations, using a combination of readings, discussions, and practical exercises. It will cover such issues as the scope of the grand jury's power, effective advocacy in a grand jury investigation, privilege issues, joint defense agreements, voluntary disclosures, parallel civil and criminal proceedings, and pre-indictment plea negotiations.

#### LAW 731 Immigration and Refugee Law

Fall. 3 credits. Prerequisite: Constitutional Law. Pass/Fail option unavailable. S. W. Yale-Loehr.

This course explores the evolving relationship between U.S. immigration policy and our national purposes. Immigration plays a central role in contemporary American life, significantly affecting our foreign relations, human rights posture, ethnic group relations, labor market conditions, welfare programs, public services, and domestic politics. It also raises in acute form some of the most basic problems that our legal system must address, including the rights of insular minorities, the concepts of nationhood and sovereignty, fair treatment of competing claimants for scarce resources, the imperatives of mass administrative justice, and pervasive discrimination. In approaching these questions, the course draws on diverse historical, judicial, administrative, and policy materials.

#### LAW 732 Insurance Law.

Fall. 3 credits. Pass/Fail option available. J. A. Henderson, Jr.

This seminar provides an overview of basic insurance law, including both general theory and practical considerations. Seminar meetings will discuss readings from Kenneth S. Abraham, INSURANCE LAW AND REGULATION (3rd ed. 2000). Performance on a series of focused written assignments, together with class participation, will determine the final grade.

#### [LAW International Criminal Law

3 credits. Recommended prerequisite: Public International Law or International

Human Rights. Not offered 2002–2003. This seminar examines the evolution of modern international criminal law, from Nuremberg to the new International Criminal Court. Topics include the nature and sources of international criminal law, jurisdiction, individual and state responsibility, penalties and deterrence, and alternatives to criminal trials, such as truth commissions and amnesties. The seminar emphasizes recent developments, such as the Pinochet extradition proceedings and efforts to try senior Khmer Rouge leaders.]

#### LAW 733 International Law, Human Rights, and Terrorism

Fall. 3 credits. Availability of Pass/Fail option to be announced first day of class. G. Gutierrez.

This seminar examines the historical and contemporary emergence of international legal principles governing issues related to terrorism. Topics include efforts by the United Nations and regional associations to develop a universal legal definition of terrorism; the relationship between terrorism and national liberation: the role of international human rights norms in addressing terrorism; and the effectiveness of international treaties prohibiting acts of terrorism. Throughout the seminar, we will examine the substantive legal rules and theoretical roots of two predominant perspectives concerning the use of international law as an instrument to combat terrorism: a criminal law model in which terrorists are subject to domestic and international criminal prosecution versus a national security model in which terrorist attacks may justify state use of armed force. It would be helpful if students have previously taken either Public International Law, International Human Rights, or International Organizations and International Human Rights Institutions, but they are not required to have done so.

#### LAW 734 Introduction to French Law

Spring. 3 credits. Not available to students with significant knowledge of civil law system. Pass/Fail option unavailable. C. M. Germain.

Introduction to the French legal system from a comparative law perspective, with a focus on civil law methodology and French legal institutions. Topics studied include French law sources and authorities, such as legislation, court decisions, and scholarly writings; the relationship between French law and the European Union; the French court structure in civil, criminal, and administrative law matters and its major procedural features; and the organization of the legal profession.

#### LAW 735 Introduction to Islamic Law

Fall. 3 credits. Pass/Fail option available. D. S. Powers.

This seminar is designed to introduce law students to the terminology, principles, and concepts of Islamic law. In Part One, we will examine the historical formation of Islamic law and the development of its principles of jurisprudence. În Part Two, we will analyze court cases that took place in Morocco and Spain in the period between 1300 and 1500, with special attention to judicial procedure, personal status law, property law, and penal law. In Part Three, we will examine the modern transformation of Islamic law by focusing on the example of Egypt, addressing issues such as codification, legal reform, and constitutional law. Seminar discussions will be based largely on primary sources in English translation.

#### [LAW Juvenile Advocacy

3 credits. Pass/Fail option available. Not offered 2002-2003.

In the context of the simulated law office of MYRON TAYLOR JUVENILE RIGHTS AND DEFENDERS INC. (JRAD), students represent juveniles charged as juvenile delinquents or persons in need of supervision. Class meetings are run as weekly law office training sessions

with the students functioning as junior attorneys. Students give oral presentations to their JRAD colleagues on issues of interest to them that arise from the clients' cases. Such issues may include: the preventive detention of juveniles, the application of criminal rights and defenses to delinquency proceedings, police questioning of suspected runaways, the role of the law guardian in representing juveniles, and the rights of children charged with incorrigibility to assert constitutional rights such as freedom of association and the free exercise of religion, over their parents' objection. Using simulated case files for the JRAD clients, students choose clients to represent and file various trial motions and legal memoranda before a designated judge. In this manner, students hone their persuasive writing skills and practice writing for a specific audience, learn to evaluate pleadings, and learn how to develop litigation theories and strategies and formulate a litigation plan.]

#### [LAW Law and Economics

3 credits. No prior acquaintance with economics is assumed. Not offered 2002–2003.

The seminar examines the ways in which the law has incorporated, wittingly or unwittingly, an economic perspective. A major theme is the art of economic modeling and the merits and demerits of simplifying assumptions to understand law. A second theme is the Coase Theorem and its application to legal rules. The seminar focuses on the major common law rules in contracts, torts, property, and procedure. The issues surrounding fairness versus efficiency are also stressed.]

#### LAW 740 Labor and Social Policy

Spring. 3 credits. Prerequisite: prior or concurrent course in labor law or permission of the instructor. Pass/Fail option unavailable, K. V. W. Stone, This seminar will focus of three areas of current controversy in labor and employment law. The first topic is the use of alternative dispute resolution to resolve workplace disputes in the wake of the Supreme Court decisions in Gilmer v. Johnson Lane/Interstate and Adams v. Circuit Cities. The use of alternative dispute resolution in the workplace, particularly the use of arbitration, for the enforcement of substantive employment rights has been rapidly expanding in the nonunion sector, giving rise to many issues such as how to ensure due process in system design, how to protect consent in the agreement to arbitrate, should there be judicial review of arbitral decisions for implementation of statutory rights, and what should be the scope of arbitral remedies. The second topic is the changing nature of the employment relationship and its implications for labor and employment law. In the past decade, there has been a marked increase in the use of flexible work practices and a corresponding abandonment of internal labor market job structures of the past. Because many features of current labor and employment law are built upon the assumption of stable workforces with long-term attachment between the worker and the firm, it is necessary to revisit many aspects of the regulatory framework. The third topic is the problems posed for labor regulation by the globalization of production. This section will study the prospects for transnational labor regulation and the barriers to achieving a mechanism for preserving domestic labor standards and promoting international labor standards.

The seminar will meet weekly, with readings to be assigned. Students will be required to write brief response pieces to four of the weekly readings, and to prepare a research paper on a topic to be selected in consultation with the instructor.

#### LAW 741 Law and Higher Education

Spring. 3 credits. Prerequisite: Constitutional Law or Administrative Law. Pass/Fail

option unavailable. J. J. Mingle. Higher education is a complex, idiosyncratic institution. Universities and colleges have a unique mission—teaching, research, and public-service—and a uniquely challenging task of accommodating the various constituencies and organizations, both internal (governing boards, faculty, students, alumni) and external (legislatures, courts, regulatory agencies) that influence how they are managed and how policies are shaped. This seminar explores the dynamic tensions, high expectations, and complex legal-policy issues universities and colleges face in fulfilling their mission.

#### LAW 742 Law and Human Behavior

Spring, 3 credits. Availability of Pass/Fail option to be announced first day of class. J. A. Siliciano.

This seminar explores the implicit psychological assumptions embedded in legal doctrine and policy. The focus is primarily on various topics in tort and substantive criminal justice, such as the law's assumed ability to control human conduct through deterrent signals and its conception of reasonable behavior implicit in various doctrines of justification and excuse. The seminar seeks to compare these legal assumptions about how people think, behave, and react with actual findings from the fields of psychology and psychiatry.

#### LAW 743 Law and Mental Health

Fall. 3 credits. Pass/Fail option available. H. R. Beresford.

The seminar explores issues at the interface of law and psychiatry. After a general introduction to clinical and scientific aspects of mental illness, the seminar addresses issues of criminal responsibility, competency and behavioral control. The focus will be on how the legal system integrates or takes into account advances in clinical and scientific understanding of mental illness. Students write and present seminar papers on self-selected topics.

#### LAW 745 Law Through Literature

Spring, 3 credits. Pass/Fail option unavailable. N. L. Cook. In this seminar, students use literature, supplemented by law texts, as a basis for understanding operations of law and the

understanding operations of law and the impact of legal process on people's lives. An explicit goal of the seminar is the acquisition of literary skills that can be cross-utilized in law practice. Students thus not only analyze legal principles in the context of stories, but also learn how to apply such literary concepts as metaphor, imagery, plot and character development, perspective, and point of view in their legal work.

#### LAW 756 Legal Aspects of Commercial Real Estate Development Spring. 3 credits. Pass/Fail option

unavailable. J. E. Blyth. Through the use of several written memo-

randa and one oral presentation, this seminar addresses considerations basic to commercial real estate development. It focuses on purchase agreements, options, rights of refusal, and memoranda thereof; representations and warranties; disclosure required of brokers and sellers; attorneys as brokers; notarial misconduct; conveyancing and surveys; commercial leases; conventional financing; conflicts between commercial tenants and institutional lenders; alternatives to conventional financing; title insurance; attorney opinion letters; and choice of real estate entity. About half of the semester is devoted to commercial leases, conventional financing, and alternatives to conventional financing (such as tax-exempt financing and synthetic leases).

#### [LAW Litigation Skills and the Protection of Civil Rights in Housing

3 credits. Not offered 2002–2003. Students perform practical, pre-trial litigation skills while exploring federal fair housing laws, history and policies. The seminar includes litigation exercises, legal writing, reading materials and class discussion. The litigation exercises and legal writing emphasize those skills necessary to investigate, evaluate, manage and resolve a case up to the point of trial.]

# LAW 758 Medical Research, Law and Policy

Spring. 3 credits. Availability of Pass/Fail option to be announced first day of class. L. Palmer.

Lawyers are increasingly being asked by clients to defend or initiate lawsuits involving medical research or to advise clients how proposed regulation or legislation would affect the way they conduct medical research. Representatives of patients who died during clinical trials have recently sued leading academic medical centers over the manner in which the medical research was conducted. In some of these lawsuits, the plaintiffs alleged that the consent was defective because the investigator, and sometimes the university, had financial interests in the small start-up companies producing the experimental treatments. In other recent lawsuits, the members of Institutional Review Boards, charged with supervising the obtaining of consent from subjects under federal regulations, have been sued for putting children at risk to harm, even though their parents had consented to the experiments. Policymakers daily make pronouncements and propose legislation on issues ranging from the use of medical records in research to the circumstances under which human stem cell research can be conducted in the United States. The Federal Drug Administration recently announced new regulations on the reporting of adverse events during clinical trials of new drugs and gene therapy. In other countries, scientists who cloned the first mammal are seeking licenses to conduct human stem cell research using human embryos as the source of the stem cells and legislatures have enacted laws to prohibit "human cloning." The regime for regulating and facilitating medical research is undergoing rapid change. This seminar will examine these emerging issues. Students will be asked to prepare a research paper on some aspects of medical research, law and policy.

#### [LAW Modern Legal Thought

3 credits. Not offered 2002–2003. This seminar is intended as a general introduction to modern legal theory. It begins with an examination of several different schools of legal thought (positivism, natural law, legal realism, and critical legal studies), focusing on the differing and often competing answers those schools give to a series of

356

questions that have defined the traditional domain of jurisprudence. It next examines several different schools of political thought (libertarianism, liberalism, communitarianism, feminism, and critical race theory), together with their principal claims and commitments. It will also examine how, if at all, the idea of each of these schools is reflected in the law, or alternatively, how those ideas might be used and relied upon to reshape the law. The seminar is intended for those students interested in a broad and even-handed overview and analysis of the most prominent contemporary schools of legal and political thought. Abstract ideas and arguments will, whenever possible, be examined in the context of particular cases and controversies, real or imagined.]

#### LAW 760 Organized Crime Control

Fall. 3 credits. Pass/Fail option available. R. C. Goldstock.

This seminar will explore the challenges organized crime poses to society and to traditional law enforcement techniques. Students will undertake a simulated investigation using physical and electronic surveillance, the analysis of documentary evidence, and the examination of recalcitrant witnesses before the grand jury. The RICO statute will be explored in detail as well as a variety of noncriminal remedies including forfeiture and court-imposed trusteeships.

#### LAW 765 Pretrial Practice, Litigation Strategies, and Remedies in Commercial Litigation

Spring. 3 credits. Prerequisite: Contracts or Contracts in a Global Society. Pass/Fail option available. Y. G. Harmon. This seminar studies the strategies of complex commercial litigation, focusing on case development in the pretrial period. It will address pretrial discovery (strategies and approaches) and remedies (e.g., preliminary injunctions, receiverships) in the context of difficult and unclear legal issues . Damages theories and development will also be explored, as well as the use of litigation to achieve business goals. Hardball litigation techniques as well as ethical considerations will be considered. Actual litigated cases will be dissected. Since 90% of commercial cases settle before trial, this seminar will be a real life presentation of the commercial litigation process

#### [LAW Problems in Advanced Torts

3 credits. Not offered 2002-2003. Students will have an opportunity to write a paper on a topic of their choosing from the law of torts. Topics not typically covered in the first-year Torts course are preferable, including (but not limited to) products liability, business torts, environmental torts and defamation. Papers will be similar in length and scope to a student note in a law review. Required written submissions include topic proposals, outlines, bibliographies, first drafts and final drafts. Early meetings will be devoted to discussions of background topics-e.g., economic analysis of tort law, fairness-based theories, and the like-and selection of topics. Later meetings will give each student an opportunity to present his/her work product to the group.]

#### LAW 770 Risk Regulation

Spring. 3 credits. Pass/Fail option available. D. A. Kysar.

This seminar concerns the science, law, and policy of society's efforts to assess and manage risks of harm to human life. In addition to the common law of tort, numerous state and federal agencies address, directly or indirectly, risks of death or bodily injury from such sources as food, drugs, automobiles, and environmental contaminants. This seminar will examine the philosophical and practical implications of such efforts to regulate risk. Topics will include: the nature of risk and how it is assessed by both experts and the public; approaches to risk management; the valuation of risks of harm to human life; and the normative treatment of risks of temporally distant harm.

#### LAW 772 Separation of Powers

Spring. 3 credits. Prerequisite: Constitutional Law and Administrative Law. Students without such background should consult with the instructor. Pass/Fail option unavailable. C. R. Farina.

The last twenty years has witnessed more debate about the nature and consequences of "separation of powers" than we have seen since the Founding Era. This seminar examines the ways this concept is understood and used by modern judges, legislators, executive officials, and scholars to justify, or to attempt to modify, the distribution of power within contemporary American government.

#### LAW 773 Sexuality, Gender, and Law

Fall. 3 credits. Pass/Fail option available. B. J. Holden-Smith, M. A. Fineman. In the last decade the field of sexuality, gender, and the law has experienced a tremendous increase in scholarly attention. This attention is richly deserved, as the area has become increasingly important. Every year courts and legislatures address these issues in numerous cases and legislative initiatives in the areas of family law, criminal law, and civil rights law. This seminar seeks to explore this developing field of law by focusing primarily upon the social meaning of "sexuality" and how the law helps to construct that meaning.

#### LAW 774 Social and Cognitive Psychology for Lawyers

Spring. 3 credits. Pass/Fail option unavailable. J. J. Rachlinski.

In their short history, cognitive and social psychology have produced a rich understanding of how human beings think and how they interact with each other. It should therefore come as no surprise that these two fields have a number of applications to law. This seminar explores those applications. Examples include: what effect common errors in judgment have on tort and contract law; how the perception of risk affects societal demand for regulation in environmental law; how organizational and group decision-making processes affect corporate governance; how social norms about fairness impede or facilitate negotiation and dispute resolution; how biases in judgment influence litigation strategies; and what studies of conformity mean for the development of international human rights law. The goal of this seminar is to introduce students with interests in different areas of law to some general principles of human thought and social interaction that will be valuable to them in their future practice.

#### LAW 775 Street Law

Fall. 3 credits. Pass/Fail option unavailable. W. F. Taylor.

This seminar allows law students to lead weekly discussions at the Auburn Correctional Facility on contemporary legal topics. Although all students enrolled in the seminar are expected to attend the weekly meeting, two students will be responsible for presenting a legal or policy issue at each meeting and then opening up the floor to questions and comments from the prisoners in attendance. It is anticipated that 10–20 prisoners will participate weekly.

The objective of this seminar is to facilitate the exchange of ideas and the discussion of current legal issues among law students and members of the Auburn prison population. It gives our students an additional opportunity to take law and legal education beyond the traditional classroom setting. The following list is a sampling of topics that hopefully will spark the kind of spirited intellectual debate this seminar envisions: Reparations for African Americans: Legal and Policy Issues; Racial Profiling; Family Law and the Rights of Fathers; Term Limits on Elected Officials; Pornography as Discrimination Against Women; The Relevance of Race, Ethnicity, and Sex to Judicial Appointments; Therapeutic Jurisprudence and Shaming Penalties; and Fourth Amendment and Other Limits on Policing Schools for Drugs and Guns.

#### LAW 776 Topics in Criminal Law

Fall. 3 credits. Prerequisite: Criminal Law. Pass/Fail option available. S. P. Garvey. This seminar will examine the principal issues and controversies dealing with the general rules of liability that structure the substantive criminal law; for example, the justification for punishment, the significance of resulting harm in the determination of liability and punishment, the nature of mens rea, and the theory of excuse (including insanity) and justification. We will proceed through an in-depth examination of Michael Moore's Placing Blame: A Theory of Criminal Law (1997).

# LAW 777 Theories of Law, Theories of Film

Fall. 3 credits. Pass/Fail option unavailable. C. D. Bond.

This seminar examines cultural representations of the American legal system and lawyers. As part of the course materials, students will view several canonical, mostly American, films that deal with the law. Students will learn the language of film form and theory, which they will use to discuss how particular films construct narratives about the legal system. Topics of inquiry will include parallels between law and film as narrative systems, the role of interpretation in constituting legal and cultural meaning, and the manner in which cultural representations of law reflect cultural values, fantasies and myths, with particular attention given to narratives of race and gender. Students will read film theory and criticism and legal theory in an attempt to correlate theories of narrative across both disciplines.

#### LAW 778 Theories of Property

Fall. 3 credits. Prerequisite: Property. Pass/ Fail option unavailable. G. S. Alexander. This seminar explores the various ways that people have conceived of, or understood, property. The materials studied are eclectic and interdisciplinary. They include readings on commonses, commodification, and women and property, as well as the classical justifications for private property (libertarian, utilitarian, etc).

#### [LAW Topics in Feminist Legal Theory

3 credits. Not offered 2002–2003. Over the course of the semester this seminar will examine the work of 5 or 6 feminist legal

theorists who will also be guest lecturers in the class. The feminist scholars chosen will be experts on a variety of legal topics including sexuality, reproduction, family and work. The objective is to introduce students to feminist thinking and critique in these specific areas, as well as generally. In addition, the seminar is designed to give students an understanding of the processes whereby scholarly (and policy) ideas and concepts are developed by an individual through much revision, reflection and struggle. Two or three pieces of<sup>o</sup>writings by each scholar reflecting different stages in her/his thinking on a topic over time will be distributed and discussed in the session preceding her/his visit to the class. The following week the scholar will speak to the students about the readings and her/his experience or process in developing and working through the issues. The scholar will also respond to questions and comments about her/his current thinking and the direction of future work in her/his area(s) of expertise. Questions and comments will be generated and distributed in advance of the scholar's appearance in the class by the students in the form of "reflection papers." A research paper on one of the topics discussed will be required at the end of the semester.]

# CLINICAL COURSES AND EXTERNSHIPS

All clinical courses and externships have limited enrollment.

#### LAW 780 Asylum and Convention Against Torture Appellate Clinic

Spring. 4 credits. Pass/Fail option available. E. M. McKee, S. W. Yale-Loehr. Students will write appellate briefs to the Board of Immigration Appeals on behalf of clients who have petitioned to remain in the United States because they fear persecution or torture in their home countries. These clients will have represented themselves pro se in Immigration Court. During the first part of the semester students will learn substantive and procedural asylum and Convention Against Torture (CAT) law, such as the nature of persecution, grounds for asylum and CAT claims, and the practical and social effects that these laws have on new immigrants who seek asylum or CAT relief. Classes may also cover practical knowledge needed for effective representation, such as advanced research and writing skills. During the second part of the semester, students will work in teams of two on appellate briefs. These briefs will not only entail serious legal analysis, but may also require socio-cultural and political research, so that the students can effectively write about the conditions of the client's home country. Students will communicate with clients during this time, although some clients may be incarcerated, and many will be out-of-state. The students' cases will provide a basis for more in-depth substantive learning, as well as practical skills and attorney-client issues. In class, each team will also discuss the legal and practice issues that arise in their case, so that all students can benefit from and assist with each individual case.

#### LAW 781 Capital Punishment Clinic: Post-Conviction Litigation

Spring. 4 credits. Prerequisite: permission of instructor; Criminal Procedure or criminal law experience preferred. Pass/ Fail option available. J. H. Blume, S. L. Johnson.

Death penalty post-conviction litigation: investigation and the preparation of petitions, memorandums, and briefs. This course is taught as a clinic. Two or possibly three South Carolina Death Row cases are worked on by students. Case selection depends on both pedagogical factors and litigation needs of the inmates. Students read the record and research legal issues. Some students are involved in investigation, while others assist in the preparation of papers. All students are included in discussions regarding the necessary investigation and strategy for the cases.

#### LAW 782 Capital Trial Clinic

Spring. 4 credits. Prerequisite: permission of instructor; Criminal Procedure or criminal law experience preferred. Pass/ Fail option available. J. H. Blume, S. L. Johnson.

The issues that are unique to a capital trial, with a focus on a specific capital trial and the issues it presents.

#### LAW 783 Full-Term Externship

Fall. 12 credits. Must be taken Pass/Fail. G.G. Galbreath, J. M. Miner.

Occasionally students find that their educational and career goals would be best achieved by spending one semester working at a placement outside the law school. The Full-Term Externship course allows students to earn 12 credit hours as externs working full time at an approved placement site off campus during the fall semester of their third year.

Written application for the Full-Term Externship course must be submitted to the instructors by March 27 of the preceding spring semester. The application should include, among other things, a description of the placement and the activities that the extern expects to perform, a statement of the extern's educational and career goals, and an explanation of how those goals are better met at the placement than at the law school. The instructors, in collaboration with the Associate Dean for Academic Affairs, will review the applications and, by April 15, decide whether each applicant should be granted conditional approval. For students to receive final approval, the placement site must accept the student for the placement and meet specified criteria including identification of an attorney at the placement who will closely supervise and mentor the extern.

In addition to his or her work responsibilities for the placement, the extern will prepare weekly journal entries for the instructor serving as his or her faculty supervisor, provide the instructor with samples of his or her written work product, engage in regular electronic communication with the instructor (and, if required by the instructor, with other students in the course), host the instructor for a site visit, do a written evaluation of the placement and the placement experience for the law school's files, and, in the semester following the externship, to do a presentation about the placement for the law school community.

#### LAW 784 Government Benefits Clinic Spring. 6 credits. Pass/Fail option available. B. Strom.

Course has two classroom components: Government Benefits Clinic class and Clinical Skills 1 or Clinical Skills 3. The course has a substantive component, in which a broad conceptual understanding of a complex and controversial area of law and public policy is developed, and a live client clinical experience, in which those concepts can be applied in solving actual client problems. The substantive component provides an introduction to government benefits law by examining various social insurance and need-based benefit programs including Social Security, Unemployment Insurance, Temporary Assistance to Needy Families (TANF), Supplemental Security Income (SSI), Medicaid, and Food Stamps. Case handling involves the representation of clients in government benefits cases involving the Tompkins County Department of Social Services, the N.Y.S. Dept. of Labor and the Social Security Administration. The course also includes Clinical Skills 1 or Clinical Skills 3. Clinical Skills 1 class will address interviewing, counseling, negotiation, and advocacy skills through the use of readings, videotapes, discussions, demonstrations, and simulation exercises. Clinical Skills 3 builds on the skills taught in Clinical Skills 1 and addresses such topics as alternative dispute resolution, formal discovery and motion argument.

#### LAW 785 Government Benefits Clinic/ Neighborhood Legal Services Externship

Spring. 6 credits. (Pass/Fail option available.) B. Strom.

This course is a combination of Government Benefits and the Neighborhood Legal Services Extenship and either Clinical Skills 1 or Clinical Skills 3. The course is the same as Government Benefits except that the case handling component involves handling cases for the Ithaca office of Neighborhood Legal Services. See the descriptions for the Government Benefits Clinic and the Neighborhood Legal Services Externship for additional details.

#### LAW 786 Judicial Externship

Fall or spring. 4 credits. Pass/Fail option available. G. G. Galbreath.

Students work with a trial court judge. Work involves courtroom observation, conferences with the judge, research and writing memoranda, and drafting decisions. The emphasis is on learning about judges, judicial decisionmaking process, and trials. There are weekly class meetings with readings and discussions of topics related to the externship experience. While the primary focus is the student's work at the placement, each student will also do class presentations, weekly journal entries, provide written work samples, and meet individually with the faculty member.

#### LAW 790 Law Guardian Externship

Fall or spring. 4 credits. Pass/Fail option available. J. M. Miner.

Students learn about the representation of children in abuse and neglect cases, juvenile delinquency proceedings, and PINS (Person in Need of Supervision) cases through their placement at the Tompkins County Law Guardian office. Duties may include interviewing, investigation, drafting memoranda and motions, and assisting in trial preparation. There will be several meetings with the instructor during the semester for discussion of issues arising from and related to the representation of children. Bi-weekly journals are also required.

## [LAW Legislative Externship

3 credits. Not offered 2002–2003. Students work with the local New York State Member of Assembly. Work involves drafting legislation, tracking legislation for constituents, legal research and writing, and responding to constituent requests that particularly require legal research or an explanation of law. The emphasis is on learning about legislative process, drafting of legislation, understanding the reasons for statutory ambiguity, and developing various skills. There are several informal meetings with the faculty supervisor during the semester with readings and group discussions related to the externship experience.]

#### LAW 792 Nelghborhood Legal Services Externship

Fall or spring. 4 credits. Pass/Fail option available. B. Strom.

Classroom component is provided by Clinical Skills 1, 2 (fall) or 3 (spring), depending on whether the student has previously been enrolled in a course in which Clinical Skills 1 was a component. Cases involve the representation of clients of a legal services office, the Ithaca office of Neighborhood Legal Services (NLS). Along with case handling, this externship includes a classroom component, provided by Clinical Skills 1, 2 or 1, 3. The classes are devoted to the development of lawyering skills and issues related to professional responsibility and the role of an attorney. In addition, each student will meet periodically with the faculty supervisor for review of the placement experience.

#### LAW 792 Prisoners Legal Services Externship

Fall or spring. 4 credits. B. Strom. The student's work involves the representation of clients of Prisoners Legal Services (PLS), which is a not-for-profit public interest law office providing civil legal services to incarcerated felons in New York state. Student work involves the full range of lawyering activities including reviewing and responding to initial correspondence, interviewing clients in prisons and investigating their claims, reviewing tapes of disciplinary hearings, conducting legal research, drafting pleadings and discovery requests, participating in case planning and discovery, working with experts, writing briefs, and making court appearances. Students keep journals of their activities. There are externship related readings and several class meetings with the faculty supervisor to discussion the extern's experiences and topics related to the externship.

#### LAW 793 Public Interest Clinic 1

Fall or spring. 4 credits. (Pass/Fail option available.) C. Cimini, G. G. Galbreath, I. M. Miner, B. Strom.

Students handle civil cases for low-income clients of the Public Interest Clinic under the supervision of the clinic faculty. Students interview and counsel; investigate and analyze facts; interrelate substantive and procedural law with facts in the context of actual representation; develop a strategy to handle clients' problems; identify and resolve professional responsibility issues; do legal writing; negotiate and settle cases; and represent clients at administrative hearings. Classroom component is provided by the Clinical Skills 1 class, in which students will develop interviewing, counseling, negotiation, and advocacy skills through the use of readings, videotapes, discussions, demonstrations, and simulation exercises. NOTE: During the second or third week there may be an additional class session. Classes are mandatory.

#### LAW 794 Public Interest Clinic 2

Fall. 4 credits. Prerequisite: Public Interest Clinic 1 or a clinic course that included the Clinical Skills 1 classroom component. Pass/Fail option available. C. Cimini, J. M. Miner, G. G. Galbreath, B. Strom.

Students handle Public Interest Clinic cases, participate in a classroom component, Clinical Skills 2, and help supervise participants in Public Interest Clinic 1. Cases are handled as described in the course description for Public Interest Clinic 1. The classroom component, Clinical Skills 2, builds on the skills taught in Clinical Skills 1 and may address such skills as fact investigation and analysis, pre-trial activities and drafting. Students represent the clinic's clients in both federal and state courts.

#### LAW 795 Public Interest Clinic 3

Spring. 4 credits. Prerequisite: Public Interest Clinic 1 or a clinic course that included the Clinical Skills 1 classroom component. Pass/Fail option available. C. Cimini, G. G. Galbreath, J. M. Miner, B. Strom.

Students handle Public Interest Clinic cases, participate in a classroom component, Clinical Skills 3, and help supervise participants in Public Interest Clinic 1. Cases are handled as described in the course description for Public Interest Clinic 1. The classroom component, Clinical Skills 3, builds on the skills taught in Clinical Skills 1 and 2 and may address such issues as alternative dispute resolution, formal discovery and motion practice.. Students represent the clinic's clients in both federal and state courts.

#### [LAW Wrongful Convictions and Sentences Clinic

4 credits. Permission of the instructors required. Preference will be given to students who have taken the Capital Trial Clinic, the Capital Punishment: Post-Conviction Litigation Clinic, Criminal Procedure, the Wrongful Convictions Seminar, the Death Penalty in America, or had some experience (either prosecution or defense) with criminal practice. Pass/ Fail option available. Not offered 2002– 2003.

Clinic students will work on one or more cases involving factual innocence or an unjust sentence. This class will work on two cases. The first case is the capital murder trial of Sterling Spann, which is set for January, 2002. This is a factual innocence case. Spann spent 17 years on death row, after which he received a new trial because of evidence that the murder was one of three serial killings, all committed by the man who was convicted of the last homicide. The second case will be a post-conviction case with an urgent filing deadline.]

#### LAW 797 Women and the Law Clinic

Spring. 6 credits. Pass/Fail option available. J. M. Miner.

Course has two classroom components: Women and the Law Clinic class and Clinical Skills 1 or Clinical Skills 3 class. Students will represent women clients who have legal matters primarily in the family law area (divorce, custody, support, domestic violence). The Women and the Law Clinic class will focus on such issues as the impact of substantive law on women, the impact of legal institutions on women, professional role development, feminist lawyering methods, and other topics related to women and the law. Students will also participate in the lawyering skills classroom component, Clinical Skills 1 or Clinical Skills 3. Clinical Skills 1 will address interviewing, counseling, negotiation, and advocacy skills through the use of readings, videotapes, discussions, demonstrations, and simulation exercises. Clinical Skills 3 builds on the skills taught in Clinical Skills 1.

#### LAW 798 Youth Law Clinic

Fall. 6 credits. Pass/Fail option unavailable. N. L. Cook.

Students work with groups of youth and service providers in a multifaceted approach to identifying and resolving problems of a legal nature. Under the supervision of faculty and community experts, clinic students both handle individual representation cases and participate in non-litigation project work such as community education, legislative advocacy, and mediation training. Strong emphasis is placed on planning, communication, policy development and non-adversarial problem solving. In addition, students are taught interviewing, counseling, fact development, and advocacy skills through the use of readings, videotapes, discussions, demonstrations, and simulation exercises.

# 

#### GOVT 313 The Nature, Functions, and Limits of Law

Spring. 4 credits. Undergraduates only. R. A. Hillman.

A general-education course for students at the sophomore and higher levels. Law is presented not as a body of rules but as a set of techniques for resolving conflicts and dealing with social problems. The course analyzes the roles of courts, legislatures, and administrative agencies in the legal process, considering also constitutional limits on their power and practical limits on their effectiveness. Assigned readings consist mainly of judicial and administrative decisions, statutes and rules, and commentaries on the legal process.

#### B&SOC 406/STS 406 Biotechnology and Law

Spring. 4 credits. Undergraduates only. L. I. Palmer.

Biotechnology, with myriad applications in areas such as medicine and agriculture, is creating many challenges for basic social institutions. This course explores the use and potential abuse of biotechnology in areas such as genetic screening and counseling, reproductive technologies, intentional release of genetically engineered organisms, patents, and ownership of human tissue. Particular attention will be given to evolving legal and management strategies for regulating the applications of biotechnology. Readings are from science, medicine, law, and public policy. Several short written assignments as well as a research paper are required.

#### **ILAW** Limits on and Protection of Creative Expression—Copyright Law and Its Close Neighbors

4 credits. Non-law students only. Not offered 2002-2003.

This course, offered during fall term 2001, provides an introduction to copyright law and closely related legal regimes for non-law students. The bulk of the instruction and discussion will be on-line.

Copyright law has become increasingly important as the U.S. has shifted from a predominantly manufacturing economy to an information economy, with such products as software, recorded music, movies, and TV assuming major importance as exports, and digital distribution exploding. This course provides an overview of U.S. copyright law and the relationship between copyright and contractual license, trademark, patent, and the "right of publicity" as these other regimes relate to information products. The survey begins with the substantive and procedural requirements that surround copyright protection. It proceeds to survey the rights granted copyright holders and important limits on those rights such as "fair use." How infringement is established, what remedies are available, and other important features of copyright litigation are covered. Issues raised by new information technologies and recent amendments addressing them receive special attention. Finally, because of the growing importance of the global market for copyrightprotected products, the international copyright system is also addressed.]

# FACULTY ROSTER

- Abrams, Kathryn A., J.D., Yale U. Prof. of Law and Assoc. Prof. of Ethics and Public Life in the College of Arts and Sciences
- Aldave, Barbara, Bader, J.D., U. of California, Berkeley. Visiting Prof.
- Alexander, Gregory S., J.D., Northwestern U. A. Robert Noll Prof.

- White, Dale T., J.D., Cornell U. Adjunct Prof. Yale-Loehr, Stephen W., J.D., Cornell U. Adjunct Prof.

# DIVISION OF NUTRITIONAL SCIENCES

# ADMINISTRATION

Jere Haas, director

Robert Parker, associate director for academic affairs

Elise West, assistant director for academic affairs

Michael Kazarinoff, director of graduate studies, Field of Nutrition

J. Thomas Brenna, director of undergraduate studies

# THE DIVISION

Nutritional Science draws upon the chemical, biological, and social sciences to understand the complex relationships between human health, nutritional status, food and lifestyle patterns, and social and institutional environments. Understanding these relationships includes the study of the metabolic regulation and function of nutrients, nutrient requirements throughout the life span, the role of diet in reducing risk of chronic disease, the nutritional quality of foods, and interventions and policies designed to promote the nutritional health of individuals, communities, and populations.

The focus of this broad field of study at Cornell is the Division of Nutritional Sciences, which brings together specialists from many disciplines. The faculty are involved in undergraduate and graduate teaching, research, and extension of research-based knowledge throughout New York State, the nation, and the world.

The division is affiliated with both the College of Human Ecology and the College of Agriculture and Life Sciences. The undergraduate program in Nutritional Sciences is offered through the College of Human Ecology. An undergraduate program, Nutrition, Food, and Agriculture, is offered in the College of Agriculture and Life Sciences. The undergraduate program in Human Biology, Health, and Society is offered through the College of Human Ecology. A program of study in nutrition for biological science majors is offered in collaboration with the undergraduate program in biology. Graduate study in the field of nutrition, is administered by faculty members throughout the university.

# FACILITIES

Most of the faculty members of the division work in Savage Hall, Kinzelberg Hall, and Martha Van Rensselaer Hall. In addition to housing offices, classrooms, and seminar rooms, these buildings contain research facilities, specialized laboratories, a human metabolic research unit, and computer facilities: The division's Learning Resource Center in Martha Van Rensselaer Hall is used by students for individual study and for small group discussions. The Learning Resource Center contains computers and printed and audiovisual resources which give students access to specialized software. Savage Hall also has a graduate reading room.

# UNDERGRADUATE PROGRAMS

The Division of Nutritional Sciences offers three programs leading to a B.S. degree:

Nutritional Sciences (NS), College of Human Ecology: this program provides students with a strong foundation in the broad field of nutritional sciences as well as thorough training in chemistry and biology. Students may prepare for a variety of career interests including medicine and other health careers, fitness and sports nutrition, nutrition counseling, clinical nutrition, dietetics, nutritional biochemistry, community nutrition, and nutrition education.

Nutrition, Food, and Agriculture (NFA), College of Agriculture and Life Sciences: this program is for students who want strong training in human nutrition combined with supportive course work in the agriculture and the life sciences. Strong preparation in biology, chemistry, and math is required. Students in the Nutrition, Food, and Agriculture program supplement the nutrition curriculum with courses in areas such as food science, animal science, plant science, advanced biology, business and economics, education, and communication.

Human Biology, Health, and Society (HBHS), College of Human Ecology: established in 1997, this program gives students a strong foundation in biology. It then goes on to explore human health issues from the perspectives of both biology and the social sciences. Students complete a rigorous curriculum in the natural sciences and then, choosing from a wide array of courses offered in the College of Human Ecology, focus their studies on health issues of their choice. Students can explore such topics as gene expression and metabolism related to disease states, biological and social aspects of growth and development, and policies and programs influencing health.

The Division also offers the **Program of Study in Human Nutrition for biological sciences majors** who may be enrolled in the College of Agriculture and Life Sciences or College of Ats and Sciences. The program of study in Human Nutrition offers biology majors courses on the nature and biochemical function of essential and non-essential nutrients, nutrient requirements, the role of nutrients in gene expression, and the role of diet in both risk of chronic disease and treatment of existing disease states.

Students in this program of study are encouraged to complete a diverse set of advanced courses. They afford a perspective on current knowledge of nutrient requirements and function, and how this knowledge can be put to use. With the exception of a core course in the structure and function of nutrients, the course requirements are unspecified.

Faculty advisers work with individual students to develop a curriculum that fits the students' interests. As part of their program, students are encouraged to obtain laboratory experience either through coursework or research. Students completing the program in nutrition most often choose to continue their education in medical or graduate school, and pursue careers in the applied aspects of nutrition or in laboratory-based or epidemiological research.

# THE CURRICULUM

Undergraduate students in these programs complete the requirements of their colleges as well as the courses required by the program of their specific interest.

The NS, NFA, and HBHS programs all require a rigorous sequence of courses in chemistry and biology, including introductory chemistry and biology, organic chemistry, biochemistry, and physiology. A minimum competency in college algebra is required with an additional math and/or statistics requirement for some programs and career paths. Students in the HBHS major also complete a course in physics and two additional courses in advanced biology.

All students complete the introductory course, Nutrition, Health and Society (NS 115). The NS and NFA programs require the completion of four other core courses: Social Science Perspectives on Food and Nutrition (NS 245); Nutritional and Physicochemical Aspects of Foods (NS 345); Physiological and Biochemical Bases of Nutrition (NS 331); and Methods in Nutritional Sciences (NS 332). Students in these programs also must select a minimum of nine credits in advanced courses in the nutritional sciences.

The HBHS major requires a minimum of six credits from courses that integrate biology and the social sciences as they examine health issues. In addition, students also must complete nine credits of advanced electives in courses focused on human biology, health, and society.

Undergraduate students in these programs have a faculty adviser with whom they meet at least twice a year. Advisers help students plan their course schedules and can suggest opportunities for individual study or experience outside the classroom.

In all undergraduate programs the correct sequencing of biology, chemistry, and/or nutrition courses is very important. Students considering these programs should get detailed information about course requirements from the division's Academic Affairs Office, 309/335 MVR. This office offers a wide range of advising materials to help students develop a program of study that matches students' interests and needs.

# CAREER OPTIONS AND COURSE PLANNING

Requirements for the programs are the minimum set of courses necessary for a bachelor's degree in these fields. Students should supplement their requirements with elective courses and other learning experiences that will prepare them for entry-leveljobs or advanced study in their field(s) of interest. A summary of suggested electives for different career interests follows:

#### **Medicine and Other Health Careers:**

Recommended courses for pre-med students include calculus and two terms of physics. Specific information about medical school admissions requirements can be obtained from the university's Health Careers Office, 203 Barnes Hall. Students interested in other health careers should acquire specific information about those requirements. Courses of interest may include those related to the biological and social determinants of health; human growth, development, and behavior through the life course; interpersonal communications; advanced biology; sociology; psychology; and ethics.

Dietetics: Students who wish to work in the areas of clinical nutrition, nutrition counseling, sports nutrition, community nutrition, or food and nutrition management should complete the academic requirements for The American Dietetic Association (ADA). Courses in foods, nutrition and disease, microbiology, management, statistics, and nutritional care are added to the courses required for the nutrition programs. For more information about meeting ADA requirements. Contact Gail Canterbury, dietetics program administrative assistant, 335 MVR.

Exercise, Nutrition, and Health Promotion: Students should complete a course in physiology and a course in anatomy after

introductory biology. Students can complete the Applied Exercise Science Concentration at Ithaca College, which includes courses in kinesiology, exercise physiology, and biomechanics. Students who wish to apply to graduate schools to study physical therapy should complete a year of introductory physics, a course in statistics, a course in ethics, and three courses in psychology. Students should check the specific requirements of their schools of interest. For information about the Applied Exercise Science Concentration, contact the DNS Academic Affairs Office, 309 MVR

**Biomedical Research/Nutritional Bio**chemistry: Recommended electives include calculus, physics, genetics, advanced biology and chemistry, toxicology, and nutritional sciences courses related to the physiology, biochemistry, and metabolism of different nutrients and disease states.

Public Health and Community Nutrition: Suggested electives include courses in communications, education, human development, policy analysis and management, maternal and child nutrition, geriatric nutrition, nutrition and disease, and food economics.

Nutrition, Food, and Business: Recommended electives include courses in management, marketing, economics, communications, hotel administration, and food science.

Nutrition and Agriculture: Recommended electives include courses in food science, animal science, plant sciences, international agriculture, agricultural economics, biological sciences, and rural sociology.

International Nutrition: Recommended electives include courses in language, anthropology, agricultural economics, policy, economics, rural sociology, international agriculture, and nutritional sciences related to maternal and child health and problems of developing nations.

Biology and Behavior: Recommended electives include courses in psychology, human development, and neurobiology.

Food, Nutrition, and Health Policy: Recommended electives include courses in economics, sociology, government, policy analysis, and management.

# SPECIAL EXPERIENCES

Undergraduates can enhance their experiences by participating in structured field experiences or study abroad. Academic credit can be earned for field experiences in a community agency, health-care facility, or business. The Urban Semester in the College of Human Ecology provides students with an opportunity to study and gain field experience in New York City. All students intending to spend a term off campus in field experience or study abroad must plan their courses well in advance to be sure that all program requirements can be met.

# INDEPENDENT STUDY ELECTIVES

Independent study courses (NS 400, 401, 402) can be used to obtain credit for more diverse or intensive experience than the classroom can offer, whether this involves laboratory work, library research, or field study. Any student interested in independent study should obtain the sponsorship of a faculty adviser and the approval of the associate director for academic affairs or consider applying to the honors program.

# HONORS PROGRAM

The honors program, leading to a B.S. degree with honors in the College of Human Ecology, or B.S. degree with Distinction in Research in the College of Agriculture and Life Sciences, gives official recognition to students who have demonstrated excellence in their academic work and their capacity for independent study.

In addition to fulfilling the requirements for a major, students in the honors program take seminars in designing and evaluating research, complete an original piece of research (at least six credits of NS 499), and prepare an honors thesis. The honors project may be laboratory or field research or deal with policy and program development. For more information, students should contact J. T. Brenna, B38 Savage Hall or C. Bisogni, 328 MVR.

# COURSES RECOMMENDED FOR NONMAJORS

Courses in nutritional sciences can strengthen programs of study in biological sciences, biology and society, communications, food science, human development, human services, and other fields.

NS 115, Nutrition, Health and Society is open to all students. After NS 115, nonmajors with limited backgrounds in chemistry and biology may elect NS 245, Social Science Perspectives on Food and Nutrition; NS 247, Food for Contemporary Living; NS 262, Nutrients and Cells; NS 275, Human Biology and Evolution; NS 306, Nutritional Problems of Developing Nations; NS 315, Obesity and the Regulation of Body Weight; NS 347, Human Growth and Development: Biological and Behavioral Interactions; NS 380, Integrating Food Systems and Human Nutrition Needs; NS 450, Public Health Nutrition; NS 451 Epidemiology and Health of Human Communities. Nonmajors with strong backgrounds in chemistry and the biological sciences may consider NS 331, Physiological and Biochemical Bases of Human Nutrition, as well as many advanced nutritional sciences courses, such as NS 345 Physicochemical and Nutritional Aspects of Foods; NS 431 Mineral Nutriton and Chronic Disease; NS 441, Nutrition and Disease; and NS 475 Mechanisms Underlying Mammalian Development Defects.

# **GRADUATE PROGRAMS**

Graduate study is administered by the Field of Nutrition, a group of about 40 faculty members from throughout the university who have a common interest in nutritional problems. In the M.S. and Ph.D. degree programs, students may specialize in molecular and biochemical nutrition, human or animal nutrition, community nutrition, or international nutrition. Research is emphasized in all graduate programs. Field experience may be an important component of concentrations in community, international and publichealth nutrition, and nutrition education. Teaching experience and participation in the graduate student seminar (NS 703) are important aspects of graduate training.

The specialties and interests represented by faculty in the Field of Nutrition provide almost unlimited opportunity for graduate study. Cornell's extensive laboratory and agricultural facilities ensure that students interested in experimental nutrition have exceptional choices and thorough training. As the largest faculty in the country devoted to the study of human nutrition, the field includes specialists in biochemical, metabolic, epidemiological, and sociocultural research. Opportunities to work with community and federal agencies are available to students interested in applied nutrition and public policy. Students in international nutrition are expected to conduct their thesis research abroad.

For more information about the graduate program, please write for the brochure. Graduate Study in Nutrition, available from the Director of Graduate Studies, Field of Nutrition, Cornell University, 309 MVR Hall, Ithaca, NY 14853–4401; telephone (607) 255– 4410; web site: www.nutrition.comell.edu/ grad.html, e-mail: nutrition\_gfr@cornell.edu

# COURSES

#### NS 115 Nutrition, Health and Society

Fall. 3 credits. S-U grades optional. M W F 1:25. D. Levitsky.

The course discusses the facts and fallacies concerning the role that nutrition, exercise, and other health behaviors play in preventing disease, maintaining good health, and maximizing athletic performance. Emphasis is on understanding the biological mechanisms through which good nutrition and regular exercise affect psychological and physical health.

#### NS 116 Personalized Concepts and Controversies

Fall. 1 credit. Corequisite: NS 115. S-U only. Limited to freshmen and transfer students, 10 per section. TBA.

This course provides students enrolled in NS 115 individualized assistance in many skills including using computers to analyze diets, finding and using scientific references, understanding and criticizing scientific articles, and reviewing material presented in lectures.

#### NS 120 Nutrition and Health: Issues, Outlooks, and Opportunities

Spring. 1 credit. S-U grades only. Limited to 120 freshmen, sophomores, and juniors, others by permission of instructor. W 12:20. E. West.

A course for students interested in exploring careers in the broad fields of food, nutrition, and health. Experts representing different areas discuss their work, focusing on current issues and trends as well as the requisite knowledge and skills. This course describes many of the disciplines that are drawn upon in addressing human problems related to food, diet, and health. Students explore career opportunities through a variety of assignments. This is **not** an introductory nutrition course for nonmajors.

#### NS 200 Vegetarian Nutrition: An Introduction

Fall. 3 credits. S-U grades optional. Prerequisites: NS 115 advised but not

essential, T R 2:55-4:10, T. C. Campbell, This introductory course surveys vegetarianism from a variety of nutrition and health considerations. The material to be presented and discussed primarily includes the empirical scientific evidence presented for easy comprehension for students without nutrition training. The course also consider the historical and sociocultural roots, both ancient and of more recent times, that have led to the growing interest in, and acceptance of, this type of dietary practice. Particular attention is given to the role of vegetarianism in the prevention and reversal of chronic degenerative diseases. Special topics on competitive sport, childhood nutrition, food preparation, and dietary transition are offered. Internationally known guest speakers, provide six to eight of the lectures.

#### NS 222 Maternal and Child Nutrition

Fall. 3 credits. Prerequisites: NS 115 and a college biology course or instructor's permission; S-U grades optional. Limited to sophomores and juniors. Preregistration is required in room 309 MVR Hall. T R 1:25–2:40. P. Brannon, C. Garza.

The course focuses on the biological bases of nutritional requirements in pregnancy, lactation, infancy, and childhood through adolescence. The course stresses critical analyses of beneficial and adverse outcomes of diverse nutrient intakes and dietary patterns, assessment of nutritional status, and the integration of nutrition, other life sciences, and social conditions in understanding nutritional needs during these life stages. Topics include oral contraception and health, relationships between maternal diet and pregnancy outcomes; breast- and formula feeding; childhood and adolescent obesity; and, the nutritional needs of young children and adolescents.

#### NS 245 Social Science Perspectives on Food and Nutrition

Fall. 3 credits. Prerequisite: NS 115. Letter grade only. T R 10:10–11:25. J. Sobal. Theories, concepts, and methods from the social sciences are used to examine food, eating, and nutrition. The course uses the food and nutrition system and the food choice process as conceptual models for examining the scope of social aspects of nutrition.

#### NS 247 Food for Contemporary Living

Fall and spring. 2 credits. Laboratory sections limited to 32 students. Preregistration during course preregistration required in 309 MVR Hall. Laboratory coat or apron required. Fall W 12:20–3:20; spring T 1:25–4:25 or R 9:05–12:05. TBA.

Emphasizes meal planning for healthy individuals using national nutrition standards; the development of food preparation and presentation skills; the application of sensory evaluation techniques; food science principles as they apply to cooking and ethnic and cultural influences on cuisine.

#### NS 262 Nutrients and Cells

Spring, 3 credits. Prerequisites: one semester of biology and chemistry. M W F 9:05. N. Noy.

The course focuses on the relationship of the cells with the environment. Examples from three general areas are considered: (1) mechanisms of uptake of nutrients by bacterial and by mammalian cells; (2) intracellular outcomes of nutritional stimuli: effects on metabolism and gene expression, toxicity; (3) and pathways of neutralization: detoxification, secretion, and DNA repair.

# NS 275 Human Biology and Evolution

(also BIOEE 275 and ANTHR 275) Fall. 3 credits. S-U grades optional with permission of either instructor. Lecs, M W F 10:10; disc, M. Lecs every W and F; occasional lectures on M. Offered alternate years. Not offered 2003–2004. K. A. R. Kennedy, J. D. Haas.

An introduction to the biology of Homo sapiens through an examination of human evolution, biological diversity, and modes of adaptation to past and present environments. Evolutionary theory is reviewed in relation to the current evidence from the fossil record and studies of the evolution of human behavior. A survey of human adaptation covers a complex of biological and behavioral responses to environmental stress. Human diversity is examined as the product of longterm evolutionary forces and short-term adaptive responses. Topics such as creationism, the Piltdown fraud, the sociobiology debate, genetic engineering, race and IQ, and racism are presented as examples of current issues in human biology

#### NS 300 Special Studies for

Undergraduates

Fall or spring. Prerequisites: permission of instructor. S-U grades optional. DNS faculty.

Special arrangements can be made to establish equivalency for courses not transferred from a previous major or institution. Students prepare a description of the study they want to undertake using a form available from the College Registrar's Office. The form, signed by both the instructor directing the study and the associate director for academic affairs, is filed at course registration or during the change-ofregistration period.

#### [NS 306 Nutritional Problems of Developing Nations

Spring. 3 credits. Prerequisites: NS 115. S-U grades optional. T R 10:10. Offered alternate years. Next offered 2003–2004. M. C. Latham.

The course is designed for undergraduates interested in the nutritional problems of developing countries. Attention is given to the array of nutritional problems encountered, the causes of hunger and malnutrition, the epidemiology of the major nutritional problems afflicting poor nations, the functional consequences of these problems on individuals and societies, and the types of programs that can be implemented to improve health and nutrition.]

#### [NS 315 Obesity and the Regulation of Body Weight (also PSYCH 613)

Spring. 3 credits. Prerequisites: NS 115, PSYCH 101. Limited to juniors and seniors. S-U grades optional. Offered alternate years. Next offered 2003–2004. T R 1:25– 3:00. D. Levitsky.

This course is a multidisciplinary discussion of the causes, effects, and treatments of human obesity. Topics include the biopsychology of eating behavior, the genetics of obesity, the role of activity and energy metabolism, the psychosocial determinants of obesity, anorexia nervosa, therapy and its effectiveness, and social discrimination.]

#### NS 320 Introduction to Human Biochemistry

Fall. 4 credits. Prerequisites: one year college biology; one year college general chemistry; and CHEM 257 or 357–358; or permission of the instructor. S-U grades optional. M W F 10:10, sec T 1:25. W. Arion, P. Stover.

The principles of biochemistry are presented within the context of human health and disease. Metabolism of carbohydrates, lipids, proteins, and selected micro-nutrients is taught from a perspective that emphasizes their role in supporting the structure and physiological functions of the major organs of the body, including the blood. The concepts of enzyme catalysis, enzyme regulation, hormone action, and bioenergetics are incorporated within this framework. The fundamental concepts of eucaryotic DNA structure, function, and gene expression are covered with reference to their importance in regulating metabolism and the impact of a changing nutrient environment.

#### NS 331 Physiological and Biochemical Bases of Human Nutrition

Spring. 4 credits. Prerequisites: BIO S 330, or 331, or NS 320, or equivalent. S-U grades optional. Lec M W F 10:10; disc, W or R. M. Stipanuk, C. McCormick.

This course examines the biochemical and physiological bases of human nutritional requirements. The instructors use an integrated approach to cover the digestion and metabolism of the nutrients (carbohydrates, proteins, lipids, vitamins, and minerals). Metabolic and chronic diseases that are related to nutrition are discussed throughout the semester. The discussion sections and problem sets provide an opportunity to examine in greater depth selected topics from lecture.

#### NS 332 Methods in Nutritional Sciences

Fall. 3 credits. Each section limited to 18 students. Prerequisites: NS 345, NS 331 preferred or concurrent registration. Laboratory preregistration during course preregistration required in 309 MVR. One evening prelim to be scheduled. Lec M 12:20; lab M W 1:25–4:25 or T R 10:10– 1:10. M. N. Kazarinoff.

Laboratory introduction to principles and analytical techniques of nutritional research. Emphasis is on analytical concepts and skills required to determine nutrient function and nutritional status of individuals. Topics include methods of nutrient, metabolite, and enzyme analysis in body fluids, and methods for assessing individual food intake and nutritional status, and methods for assessing the composition of foods.

#### NS 341 Human Anatomy and Physiology

Spring. 4 credits. Letter grade only. Prerequisites: college biology; NS 115 recommended. **Completion of laboratory permission forms required in 309 MVR during course enroll period. Limit 18 per lab. Attendance is required at first lab, or you will forfeit your placement. For further information go to room 309 MVR.** Lec M W F 11:15, lab W or R or F

9:05–11:00 or 2:30–4:25. V. Utermohlen. Introduction to human anatomy and physiology with particular emphasis on aspects of relevance to the nutrition sciences and medicine. All major organ systems will be covered. Laboratories emphasize location, recognition, and description of anatomical structures. Testing of physiological functions focuses on the tests with nutritional and medical relevance.

#### NS 345 Nutritional and Physicochemical Aspects of Food

Spring. 3 credits. Prerequisite: college course in organic chemistry or biochemistry. S-U grades optional. T R 1:25–2:40. B. Lewis, B. Parker.

A study of the nutritional, physical, and chemical properties of foods including composition, food structure, enzymic and nonenzymic phenomena, and processing/ preparation aspects. Issues related to food safety, regulation, and food composition data bases are also discussed.

# NS 346 Introduction to Physiochemical

**Aspects of Foods—Laboratory** Spring. 1 credit. Each section limited to 18 students. Limited to dietetics students in DNS. Prerequisites: NS 345 or concurrent registration; a college course in organic chemistry and permission of instructor during course registration (permission-ofinstructor forms must be obtained from and returned to 309 MVR). Letter grade only. M 12:20–3:20 or T 9:05–12:05. B. Lewis, B. Parker.

Laboratory exercises are designed to illustrate principles related to food quality and ingredient functionality, and to introduce students to the analytical methodology associated with food evaluation.

#### NS 347 Human Growth and Development: Biological and Behavioral Interactions (also HD 347 and B&S 347)

Spring. 3 credits. Prerequisites: BIO G 101 or 109 or equivalent; HD 115 or PSYCH 101 or equivalent. M W F 1:25. Offered alternate years. Not offered 2003–2004. J. Haas, S. Robertson.

This course is concerned with the interrelationships of physical and psychological growth and development in humans, particularly during infancy. Intrinsic and extrinsic causes of variations in growth, including various forms of stimulation, are considered. In addition, the consequences of early growth and its variation for current and subsequent behavioral, psychological, and physical development are examined. The interaction between physical and behavioral or psychological factors is emphasized throughout the course.

#### NS 361 Biology of Normal and Abnormal Behavior (also PSYCH 361)

Fall. 3 credits. Prerequisites: BIO G 101– 102 and PSYCH 101, or permission of the instructor. A fundamental knowledge of biology and psychology is essential. S-U grades optional. Limited to 50 juniors and seniors. M W F 9:05. B. Strupp.

Serves as a critical evaluation of biological factors thought to influence behavior and/or cognitive functioning. Biological, psychological, and societal influences are integrated. Topics include nutrition and behavior, psychiatric disorders, developmental exposure to environmental toxins and abused drugs, biopsychology of learning, memory, intelligence, and related cognitive disorders.

#### NS 378 Food, Nutrition, and Service Management

Fall. 3 credits. Prerequisites: NS 115, NS 247 or permission of instructor. T R 1:25–2:40. Faculty.

The course discusses how management principles and theories apply to foodservice operations and nutrition services. The systems concept of organization is utilized. Emphasis is placed on leadership development, decision making/problem solving as it relates to procurement, production, distribution, and quality assurance in food and nutrition services. Menu development projects demonstrate the interrelationships of nutrition, labor, equipment, food costs, and customer satisfaction. Marketing strategies and implementation are discussed. Teamwork and negotiating skills are emphasized.

#### NS 380 Integrating Food Systems and Human Nutrition Needs

Spring. 2 credits. Prerequisites: NS 115 or FOOD 200 or AN SC 100. Letter grade only. T R 8:40–9:55. Staff.

This is a student-centered course that uses case studies to examine the link between human nutrition and health issues to those involved in systems of food production and distribution. Student teams investigate new and existing technological options within food systems that can be used to address domestic or international human nutrition needs.

#### NS 398 Research in Human Nutrition and Health

Fall. 1 credit. Required for students admitted to the Division of Nutritional Sciences Honors program and open to all students. May be offered in spring if enrollment warrants. S-U grades only. Days TBA. J. T. Brenna, C. Bisogni. This lecture course focuses on the structures and practice of professional research conducted in human nutrition and health, a field that encompasses a wide range of questions ranging from subcellular components to population level issues. The course introduces the various approaches and methods used by researchers and addresses the topics of ethics and research controls. The course describes the structure of the scientific literature, preparation of research proposals, roles of scientific organizations, and funding sources. Students are required to attend and report on research seminars on campus.

#### NS 400-401-402-403 Special Studies for Undergraduates

Fall or spring. Credits to be arranged. S-U grades optional. Division faculty.

For advanced independent study by an individual or group of students who want to study a field of nutritional sciences not otherwise provided through course work in the division or elsewhere in the university. Students prepare a description of the study they want to undertake on a form to be signed by the instructor directing the study and the associate director for academic affairs. The form, available from the division office, is filed at course registration or within the change-of-registration period along with an add/drop slip in the Human Ecology Registrar Office. To ensure review before the close of the course registration or change-of-registration period, students should submit the special-studies form to the associate director for academic affairs as early as possible.

#### NS 400 Directed Readings

Study that predominantly involves library research and independent reading.

#### NS 401 Empirical Research

Study that predominantly involves data collection and analysis or laboratory or studio projects.

#### NS 402 Supervised Fieldwork

Study that involves both responsible participation in a community setting and reflection on that experience through discussion, reading, and writing. Academic credit is awarded for this integration of theory and practice.

#### NS 403 Teaching Apprenticeship

Study that includes assisting faculty with instruction.

#### NS 421 Nutrition and Exercise

Spring. 3 credits. Prerequisites: BIOAP 311 or NS 341 and NS 115 or NS 331 preferred. Limited to nutrition majors, others by permission of the instructor. S-U grades optional. Lec T R 11:15, sec T R or F 8:00– 9:55. S. Travis.

Designed for nutrition majors, students in this course examine the interaction between nutrition, exercise, and athletic performance. Topics include the biological, psychological, and sociological aspects of nutrition as it relates to exercise performance. Lectures cover current research on nutritional needs in response to exercise including: fluids, energy nutrient requirements and caloric distribution, supplementation, ergogenic aids, pre/post event recommendations. Applications are made to various sports. Critical thinking skills are enhanced by critiques of studies on sports nutrition related topics and the evaluation of popular sports nutrition claims. Students learn educational strategies for communicating with the recreational and professional athlete, coach, and trainer.

#### NS 425 Nutrition Communications and Counseling

Spring. 3 credits. Prerequisites: NS 115, NS 245. Limited to dietetics majors. S-U grades optional. M 1:25, Sec W or F. S. Travis.

Students learn the theoretical basis of effective health promotion communications and develop effective nutrition communication skills through application in a variety of settings. The course provides hands-on experiences in counseling, educational program development, and oral and written communications.

#### NS 431 Mineral Nutrition and Chronic Disease

Fall. 3 credits. Prerequisites: NS 331, AN SC 410, or permission of instructor. S-U grades optional. T R 11:15. C. McCormick.

We evaluate the evidence that diet plays a role in osteoporosis and hypertension and consider whether iron status affects the development of heart disease and inflammation. An additional goal of the course is to review the data upon which recommendations for daily nutrient intakes are currently based, and the biological basis of current recommendations. Class discussion of key research articles are conducted and evaluated.

#### NS 441 Nutrition and Disease

Fall. 4 credits. Prerequisites: NS 331 and a human physiology course. S-U grades optional. M W F 10:10, F 8:00. V. Utermohlen.

Study of the anatomical, physiological, and metabolic abnormalities in acute and chronic illness, and the role of nutritional therapy in their prevention and care. Topics covered include: nutritional assessment, nutritional pharmacology, starvation, infection, trauma, cancer, diabetes mellitus, and renal, cardiovascular, pulmonary, skeletal, neurological, liver, and gastrointestinal disorders.

#### NS 442 Implementation of Nutrition Care

Fall. 3 credits. Prerequisites: NS 247, concurrent registration in NS 441 (or equivalent background in either course). S-U grades optional. Lec M W F 9:05. TBA. Development of skills necessary to implement nutrition care in clinical settings: nutrition screening, dietary assessment, principles of medical nutrition therapy, menu planning for disease states, the role of other allied health practitioners in assuring nutritional health, and reimbursment and legislation in dietetics practice.

#### NS 450 Public Health Nutrition

Spring. 3 credits. Prerequisites: NS 115, and one course dealing with population-level studies, e.g., NS 245, HDFS 150, PAM 201, PAM 303, RSOC 100, RSOC 200. M W F

11:15, disc TBA. K. Rasmussen, D. Pelletier. Public health nutrition is the major professional career track for nutritionists outside of dietetics. It deals with efforts to improve the diets and nutritional status of whole populations by working at the community, state, and national level. This course helps prepare students to work in public health nutrition by describing methods used in the assessment of nutrition problems, development of nutritionrelated policies, and delivery of health, nutrition, and food assistance programs.

#### NS 451 Epidemiology and Health of Human Communities

Fall. 3 credits. Prerequisite: one semester of statistics (can be taken concurrently). M W F 1:25. E. Frongillo.

Examines through a series of case studies, the role of epidemiological investigation in understanding, assessing, and improving the health and nutrition of human communities and populations. Students read and discuss scientific research and public policy literature on specific topics of current interest. Emphasis is on the conceptualization of epidemiology as an ecological science that studies the interdependence and interaction of humans with their social, cultural, and physical environment. Intended for advanced undergraduates and graduate students with an interest in health, human biology, nutrition, or epidemiology.

#### NS 452 Molecular Epidemiology and Dietary Markers of Chronic Disease

Spring. 3 credits. Prerequisites: upper level biology course, introductory statistics course (can be taken concurrently), or permission of the instructor. S-U grades optional. T R 10:10–11:25. P. Cassano.

This course provides an introduction to chronic disease epidemiology, and covers the natural history of the major chronic diseases affecting the U.S. population. The course focuses on the use of biological markers in understanding the etiology of cardiovascular disease, cancer, and lung disease. The course integrates biological and epidemiological information, as well as public health considerations and concepts related to the prevention of disease. Topics include gene-nutrient interaction in relation to cardiovascular risk, micronutrients and cancer risk, and nutritional influences on the immune system in relation to asthma risk. The course provides a health context that enriches the learning experience in other advanced courses, particularly in biology and nutrition.

#### NS 455 Nobel Prizes in Biomedical Research

Spring. 2 credits. Prerequisites: a college course in biochemistry and/or cell biology, eg. BIOBM 330, BIOBM 331/332, NS 320, BIOBM 432. M W 9:05. D. Manor.

Key topics in biomedical research are covered in detail through discussions of selected Nobel prizes. For each specific biomedical problem addressed, the discussion encompasses detailed analysis of the relevant experiments and ensuing data, evaluation of the impact of the findings on public health, and retrospective assessment in view of present day knowledge. The course focuses mainly on breakthroughs associated with two major public health issues: infectious diseases and cancer. Other topics discussed include: vitamins, prions and technical breakthroughs such as DNA synthesis, mutagenesis and PCR.

#### NS 457 Economics of Hunger and Malnutrition (also ECON 474)

Spring. 3 credits. Prerequisites: ECON 101 and introductory statistics, or permission of the instructor. S-U grades optional. M W F 9:05. D. Sahn.

This course focuses on the analysis of global hunger and malnutrition. We analyze the dimensions, causes, and solutions to hunger and malnutrition, particularly in developing countries. Grades are based on a mid-term and a final exam, a term paper, and class participation.

#### NS 475 Mechanisms Underlying Mammalian Developmental Defects (also BIOAP 475)

Spring. 3 credits. Prerequisites: BIOBM 330, 331–332 or 333 (may be taken concurrently). Lec M W 9:05, lab R 2:00. D. Noden, P. Stover.

Developmental defects are present in nearly 5% of humans. Drawing upon current research, this course explores the causes of birth defects, emphasizing the interplay between genetic and environmental factors in the regulation of developmental processes. Emphasis is on nutritional disruptors, teratogens, and regulatory gene networks that are well characterized through animal studies and are associated with morphological, physiological, reproductive, or behavioral abnormalities in humans.

#### NS 488 Applied Dietetics in Foodservice Systems

Spring. 3 credits. Limited to 27 students. Prerequisites: NS 378, Micro 290. Laboratory preregistration during course preregistration is required in 309 MVR. White lab coat is required. Approximately \$25.00 will be needed for special supplies/ activities. Lec M W 9:05; labs, W or R 2:30– 6:30. Staff.

Students gain experience in facility design; equipment selection, use, and care; job analysis and evaluation; human resources planning; management of financial resources; recipe development and volume food production; computer-assisted management; employee training; applied safety and sanitation standards; and develop other skills required to operate/manage a foodservice program. The application of quality management in food service operations and facility management is stressed. Laboratories are arranged through Cornell Dining.

#### NS 499 Honors Problem

- Fall and spring. Credits to be arranged. Open only to students in the division
- honors program. J. T. Brenna,
- C. A. Bisogni and division faculty.

An independent literature, laboratory, or field investigation. Students should plan to spread the work over two or more semesters.

#### NS 600 Special Problems for Graduate Students

Fall or spring. Credit to be arranged. Limited to graduate students recommended by their chair and approved by the instructor in charge. S-U grades optional. Division faculty.

Emphasis is on independent advanced work. Experience in research laboratories in the division may be arranged.

#### NS 601 Proteins and Amino Acids (also AN SC 601)

Spring. 2 credits. Prerequisites: physiology, biochemistry, and nutrition. Offered alternate years. W F 12:20. Not offered 2003–2004. R. E. Austic.

The course emphasizes the dynamic aspects of protein digestion and absorption, amino acid transport, and amino acid and nitrogen metabolism and their relationships to the nutritional requirements for amino acids.

#### NS 602 Lipids (also BIO AP 619)

Fall. 2 credits. T R 11:15. A. Bensadoun. Advanced course on biochemical, metabolic, and physiological aspects of lipids, more specifically lipid transport. Topics covered include lipid methodology, structure of plasma lipoproteins, molecular biology and cell biology of apolipoproteins, lipoprotein receptors, lipid transfer factors, lipolytic enzymes, and atherosclerosis.

#### [NS 603 Mineral Nutrition: Metabolic, Health, and Environmental Aspects (also AN SC 603)

Fall. 2 credits. Letter grade only. Prerequisites: biochemistry, physiology, and nutrition. T 2:20–4:25. Offered alternate years. Not offered 2003–2004. X. G. Lei. The course emphasizes the metabolic roles and environmental impacts of mineral nutrition in animal, human, and food systems. Team-taught lectures include general biochemical and physiological aspects of mineral metabolism and specific mechanisms of gene expression regulation and mammal health disorders associated with individual elements. Methodology and facility of mineral research is also discussed.]

#### NS 604 The Vitamins (also AN SC 604)

Fall. 2 credits. T R 10:10. Staff. Text-based discussion sessions on nutritional aspects of the vitamins, including recent developments in nutritional and biochemical interrelationships with other nutrients and metabolites.

#### NS 605 Nutritional Biochemistry Colloquim

Fall and spring. 1 credit. S-U grades only. R 12:20. Nutritional biochemistry faculty. Nutritional biochemistry colloquium is a graduate seminar series that focuses on recent advancements in biochemical nutrition. Weekly presentations are made by faculty, postdocs, and graduate students, and are based on the primary literature. The presentations are followed by a discussion involving all participants.

#### NS 607 Nutrition as an Integrating Discipline: Concepts and Paradigms

Fall. 3 credits. Prerequisite: some prior coursework or experience in nutrition, or permission of the instructor. M W F 10:10. M. N. Kazarinoff, J. P. Habicht and division faculty.

An overview course for beginning graduate students which introduces them to the full breadth of nutritional science disciplines, including quantitative and qualitative sciences. Also suitable for seniors as an integrating course. The course presents concepts and paradigms of molecular biology, biochemistry, clinical nutrition, epidemiology, anthropology, economics, program planning and administration, policy development, and ethics. The course uses Vitamin A as the example. Emphasis is placed on the integration of factual and conceptual knowledge to solve nutrition problems in human societies.

# NS 611 Molecular Toxicology (also TOX 611)

Spring. 3 credits. Prerequisite: TOX 610 and a full-year 400-level course in biochemistry or equivalent. S-U grades optional. TBA. S. Bloom, R. Dietert.

A study of the fundamental biochemical mechanisms of absorption, transport, metabolism, and excretion of drugs, carcinogens, and toxicants. Emphasis is placed on oxidative and conjugative pathways of metabolism and of environmental and nutritional factors that influence toxicant metabolism and disposition. Methods of evaluating in vivo and in vitro metabolism are also addressed.

#### [NS 612 Methods of Assessing Physical Growth in Children

Spring. 3 credits. Limited to graduate students and undergraduate students who have permission of the instructor. A previous course in statistics required. S-U grades optional. Lec T 1:25; lab, R 1:25– 4:25; disc T 2:15–3:05. Not offered 2002– 2003. J. Haas.

A laboratory course to train students in methods and techniques used to assess the physical growth and development of children. The methods explored are those applicable for field, community, and clinical studies and cover anthropometry, body composition, skeletal age, maturity indicators, physical fitness, and energy expenditure.]

#### NS 614 Topics in Maternal and Child Nutrition

Fall. 3 credits. Prerequisites: for undergraudates only, NS 331, and 222 or 347, BIO S 311, and permission of

instructor. T R 8:30–9:55. K. Rasmussen. An advanced course on the role of nutrition during pregnancy and lactation. The feeding and growth of infants and children in health and disease is considered. Critical evaluation of current literature is emphasized via lecture, discussions, and a term paper.

#### NS 617 Teaching Seminar

Fall or spring. 0 credit. Limited to division graduate students and students who have permission of the instructor. S-U only. E. West, D. Way.

Provides individualized instruction focusing on development of teaching skills for guiding learning in lecture, discussion, and laboratory setting, and reflection on the impact of these skills on teaching and learning. Students identify the aspects of the specific teaching assignments they wish to develop, and work with instructors on independent learning projects that may include preparation for lecturing, preparation of exams, efficient grading, and so on. Optional videotaping provides opportunities for practice and analysis.

#### **NS 618 Teaching Experience**

Fall or spring, 0 credit. Limited to division graduate students and students who have

permission of instructor. S-U only. E. West. Designed to provide experience in teaching nutritional sciences by direct involvement in college courses under supervision of a faculty member. The aspects of teaching and the degree of involvement vary, depending on the needs of the course and the experience of the student.

#### NS 619 Field of Nutrition Seminar (also AN SC 619)

Fall or spring. 0 credit. S-U only. M 4:00. Faculty and guest lecturers.

Lectures on current research in nutrition.

#### [NS 620 Food Carbohydrates (also Food Science 620)

Spring. 2 credits. Prerequisites: BIO S 330 or equivalent. Letter grades only. T R 10:10. Offered alternate years. Next offered 2003–2004. J. Brady, B. Lewis.

A consideration of the chemistry of carbohydrates, including sugars and complex carbohydrates (starches, pectins, hemicelluloses, gums, cellulose, and glycoconjugates). Emphasis is placed on intrinsic chemistry, functionality in food systems, and changes occurring during food processing and storage.]

#### NS 625 Community Nutrition in Action

Fall. 5 credits. Limited to dietetic interns. M 1:25–3:25. S. Travis.

This course provides students enrolled as dietetic interns with supervised, in-depth experiences in community nutrition program and fosters the integration of research, theory and practice. Through placements in community programs, students gain experience in program administration and in assessing, designing, implementing, and evaluating food and nutrition programs for targeted populations through public organizations. In weekly seminars (and other seminars and observations as arranged) students integrate theory and practice, reflect upon their placement experience, learn about community nutrition research, and explore the many issues facing community food and nutrition practitioners.

#### NS 626 Special Topics In Food

Fall. 2 credits. TBA. B. Lewis. This course provides a discussion of current research on specific topics related to functional foods and nutraceuticals/ phytochemicals.

#### [NS 630 Anthropometric Assessment

Spring. 1 credit. Prerequisite: NS 331 or equivalent and permission of the instructor. 5 weeks only. Offered alternate years. Next offered 2003–2004. W 1:25–4:25. J. Haas.

Topics covered in this lecture/lab course are: biological basis of anthropometry for nutritional status assessment, quality control of anthropometric data, applications to special groups (infants, children, adolescents, pregnant women, and the elderly), statistical analysis and presentation of anthropometric data, references standards and interpretation, measurement techniques of anthropometry, and body composition assessment.]

#### NS 637 Epidemiology of Nutrition

Spring. 3 credits. Limited to graduate students. Prerequisites: BTRY 601 and concurrent registration in BTRY 602 or equivalent knowledge. Basic knowledge about the nutritional aspects of growth and development and about nutritional biochemistry. 73, 200, 500, U. P. Uchricht

biochemistry. T 3:00–5:00. J-P. Habicht. This course covers principles of nutritional epidemiology, impact assessment of nutrition intervention programs, and nutritional surveillance. Principles of using nutritional information in decision making are presented. The course shows how the biochemistry and physiology of nutrition can be related to epidemiological assessment and research strategies.

#### NS 638 Epidemiology of Nutrition Seminar

Spring. 3 credits. Reserved for graduate students planning field intervention studies; by permission of instructor.

Prerequisite: NS 637. TBA. J-P. Habicht. Covers the meta-analysis, design, measurement, and analytic issues involved in developing, implementing, and analyzing studies of field interventions with nutritional impact.

#### NS 640 Social Science Theories in Nutrition

Fall. 3 credits. Limited to 20 graduate students. T R 10:10–12:05. J. Sobal. Social science theories and paradigms from sociology, psychology, anthropology, economics, political science, geography, and history that contribute to understanding food, eating and nutrition will be discussed to understand how theories apply to nutrition topics, issues, and problems.

#### NS 644 Community Nutrition Seminar

Fall and spring. 1 credit. S-U only. M 11:15, spring M 12:20. A. Gillespie and Cornell Community Nutrition faculty.

Sponsored by the Cornell Community Nutrition Program. Graduate students and faculty learn about current research in the program and related fields within and outside Cornell; and learn about applications to Community Nutrition theories and research methodologies. The seminar also provides a forum to discuss participants' own research and current issues in Community Nutrition.

#### NS 646 Seminar In Physicochemical Aspects of Food

Spring. 1–3 credits. Prerequisite: a college course in organic chemistry or biochemistry. S-U grades optional. T R 1:25–2:40. B. Lewis, B. Parker.

An introduction to physicochemical aspects of food, for graduate students who have had limited or no work in this area. The seminar uses the lectures of NS 345 as a basis for supplementary readings and critical review of research on selected topics.

#### [NS 650 Assessing Food and Nutrition in a Social Context

Fall. 4 credits. Prerequisite: course in Social Sciences. Letter grades only. T R 1:25–2:40. Not offered 2002–2003. D. Pelletier, G. Pelto.

Food and nutrition problems in developed and developing countries may manifest themselves in biological or functional terms, but their causes and solutions ultimately are rooted in the socio-political world. This course provides multidisciplinary perspectives and some community experiences needed to assess and analyze the social context of nutrition problems. The course is relevant to developed and developing countries and to research and practice related to community nutrition as well as nutrition policy.]

#### [NS 651 Food and Nutrition Action in a Social Context

Spring. 3 credits. Prerequisites: at least 1 course in social sciences; NS 650 strongly recommended. Letter grades only. T R 1:25–2:40. Not offered 2002–2003.

D. Pelletier, G. Pelto.

This course builds upon the perspectives developed in NS 650. It provides a framework for combining socio-political considerations and analytical criteria in the planning, implementation, and evaluation of nutrition actions at community and policy levels. Case studies from the United States and developing countries are used extensively for examining a wide range of nutrition actions from the perspective of this integrated framework.]

#### NS 660 Special Topics in Nutrition

Fall or spring. 3 credits maximum each term. Registration by permission of the instructor. Division faculty.

Designed for students who want to become informed in any specific topic related directly or indirectly to nutrition. The course may include individual tutorial study, experience in research laboratories, a lecture series on a special topic selected by a professor or a group of students, and/or selected lectures of another course already offered. Topics may be changed so that the course may be repeated for credit.

#### [NS 680 International Nutrition Problems, Policy, and Programs

Spring. 3 credits. Prerequisite: permission of instructor. T R TBA. Offered alternate years. Next offered 2003–2004. M. Latham. Designed for graduate students who want to learn about the important nutritional problems of developing countries. The major forms of malnutrition related to poverty and their underlying causes are discussed. Emphasis is placed on programs and policies that can assist poor countries and communities to improve their nutritional and health status.]

#### NS 685 Empirical Methods for the Analysis of Household Survey Data: Applications to Nutrition, Health, and Poverty (also ECON 771)

Spring. 3 credits. Prerequisites: intermediate microeconomics, intermediate statistics or econometrics (through multiple regression and limited dependent váriable models) or permission of the instructor. M W TBA. D. Sahn.

The course focuses on empirical methods for the analysis of household survey data. Students examine a series of measurement and modeling issues, focused on health and nutrition, education, and poverty. In addition, we explore methods to evaluate social program. Course readings, and data that are used for hand-on empirical exercises, are largely from Africa and Asia.

#### [NS 690 Trace Element and Isotopic Analysis (also CHEM 628)

Spring. 3 credits. Primarily for graduate students and advanced undergrads. Prerequisite: CHEM 288 or 390, 302 or CHEM 208 and MATH 112, or permission of instructor. S-U grades optional. T R 11:15. Offered alternate years. Next offered 2003–04. J. T. Brenna.

Survey course in modern high precision isotope ratio mass spectrometry (IRMS) techniques and trace/surface methods of analysis. Topics include dual inlet and continuous flow IRMS, thermal ionization MS, inductively coupled plasma MS, atomic spectroscopy, ion and electron microscopies, X-ray and electron spectroscopies, and biological and solid state applications. The first five weeks of CHEM 628/NS 690 focus on IRMS instrumentation and are offered as a separate 1 cr. special topics course (NS 660).]

#### NS 698 International Nutrition Seminar

Fall and spring. No credit. No grades given. R 12:20–1:10. J-P. Habicht, E. A. Frongillo.

This seminar series consists of presentations by Cornell faculty and graduate students, and by invited outside speakers. Speakers cover a range of topics relating to nutritional problems, policy, and programs in the nonindustrialized countries.

#### NS 699 Special Topics In International Nutrition

Fall and spring. 3 credits maximum each term. Registration by permission of instructor. Faculty in International Nutrition Program.

This option is designed for graduate students, mainly those with a concentration in international nutrition, who wish to become familiar with some specific topic related to international nutrition that is not adequately covered in an existing course. It consists of tutorial study on an agreed topic. Because the topics change, the course may be repeated for credit.

#### NS 700 Current Topics in Toxicology (also TOX 698)

Fall or spring. 1–3 credits. S-U grades optional. TBA. Staff.

A discussion of the most current developments in various areas of toxicological research and testing. Faculty and students participate jointly in evaluating research findings and provide seminars and discussion of such material. For information regarding the topic, instructor, location, and credit, contact the office of the Graduate Field of Environmental Toxicology or go to http:// www.cFe.comell.edu/icet/seminars.htm.

# NS 702 Seminar in Toxicology (also TOX 702)

Fall or spring. 1 credit. S-U grades only. F 12:20. Staff.

The seminar program covers varied topics in biochemical, genetic, nutritional, veterinary, and regulatory toxicology, ecotoxicology, and environmental chemistry. Included are presentations of basic research studies, fundamental concepts, and research activities involving environmental problems of a toxicological nature. Presentations are given by speakers from Cornell and visitors.

#### NS 703 Seminar in Nutritional Sciences

Fall and spring. 1 credit. S-U grades only. T 12:20 or W 12:20. Division faculty. Presentations of original articles pertinent to the Nutritional Sciences. Students read and learn how to critically analyze and interpret original articles published in a wide variety of journals. Students learn how to make professional presentations and how to critique the presentations given by others.

# NS 899 Master's Thesis and Research

Fall or spring. Credit to be arranged. Prerequisite: permission of the chair of the graduate committee and the instructor. S-U grades optional. Division graduate faculty.

#### NS 999 Doctoral Thesis and Research

Fall or spring. Credit to be arranged. Prerequisite: permission of the chair of the graduate committee and the instructor. S-U grades optional. Division graduate faculty.

# OFFICER EDUCATION

Military instruction began at Cornell University in 1868 under the provisions of the Morrill Act of 1862. Since that time, officer education has been highlighted by the construction of Barton Hall in 1914 and the establishment of a formal Reserve Officers Training Corps (ROTC) unit in 1917. The program evolves to keep pace with the latest military changes and emphasizes the development of leadership and managerial skills.

The Officer Education Programs prepare students for a commission as an officer in either the United States Army, Navy, Air Force, or Marine Corps. Each service program is headed by a senior military officer who also serves as a full professor on the Cornell faculty.

# MILITARY SCIENCE

Lieutenant Colonel Robert Sova, Aviation (AV), United States Army, Professor of Military Science and Commanding Officer, U.S. Army ROTC Instructor Group

Major James O'Connor, Military Intelligence, United States Army

Captain Richard Brown, Engineer, United States Army

Captain Michelle McKeown, Air Defense Artillery, United States Army

## United States Army ROTC Program

The primary objective of the Army Officer Education Program at Cornell is to commission the future officer leadership of the United States Army. Intermediate objectives are to provide students with an understanding of the fundamentals of responsibility, integrity, and self-discipline, as well as an appreciation of the citizen's role in national defense. The application of the decision-making process to a variety of situations is given major emphasis as a valuable aid in developing leadership potential. These objectives are achieved through a program normally covering four years. A two-year program is available for those who qualify. The program includes specific courses in military science, more general academic subjects that assure a wellrounded education, practical training in leadership through participation in the Cadet Corps (including attendance at one five-week summer camp at Ft. Lewis, Washington), and the opportunity to participate in a number of extracurricular activities. This combination prepares the student for commissioning and effective performance in the many branches of the Army. The student's academic major, academic performance, leadership ability, personal desires, and the needs of the Army determine the branch of the Army into which the student is commissioned upon graduation.

#### **Requirements for Enrolling**

Applicants must be citizens of the United States and be able to obtain a Secret level security clearance prior to being commissioned as lieutenants. (Noncitizens may enroll in selected portions of the program.) Students must meet Army medical requirements. Overall sound mental and physical condition is essential; students are required to undergo periodic physical fitness tests. Enrollment and continuation in the program is subject to the approval of the Professor of Military Science. Enrollment in specific courses by students not formally enrolled in the program must be approved by course instructors. Contracted students must register for letter-grade military science classes and leadership laboratories for the purpose of commissioning into the United States Army.

#### Four-Year Program

The Four-Year Program is open to students in their freshman year or, with the approval of military and university authorities, to sophomores in a five-year degree program. Veterans of the Armed Forces of the United States and students entering Cornell with AROTC credit from secondary or military schools (Junior Division AROTC) may receive advanced standing, if qualified. Under the Four-Year Program students enroll in the Basic Course (MIL S I and II) during the first two years, and the Advanced Course (MIL S III and IV) during the next two years. A total of 12 credits of military subjects are taken. In addition, academic enrichment courses are required in such fields as written communications, computer science, and military history. All cadets attend a five-week camp, with pay, between their junior and senior years. All cadets participate in physical fitness training three days per week. Each year selected cadets are sent to the Army Airborne School. Winter Survival School, and Air Assault Course, depending upon availability and student standings within the ROTC program.

#### Basic Course (MIL S I and MIL S II)

Students in the first year of the Basic Course take one classroom course in military science in the fall and spring semesters, for which they receive academic credit depending upon their college. These courses include study of the U.S. organization for defense and principles and techniques of leadership and management.

Students also participate in leadership modules that include rappelling, orienteering, drill and ceremony, physical training, winter survival, rifle marksmanship, historical site visits, land navigation, interpersonal communication, and individual tactical training. These modules are designed to promote personal development and enrichment. While they do not receive academic credit for these activities, students may receive physical education credit. Typical freshman participation in Army officer education is 6 program-related hours per week.

In the fall of the second year, students take a two-credit course in American military history.

In the spring of the second year, students take a one-credit course in leadership theory and spend approximately two hours per week in practical leadership training, land navigation, and military skills.

# Advanced Course (MIL S III and MIL S IV)

The Advanced Course of the Four-Year Program is open to students who have successfully completed the Basic Course and are accepted by the Professor of Military Science for further enrollment. It is also open to students who have gained appropriate advanced standing through either successful completion of Basic Camp, a six-week summer training camp, or prior military training. Students entering the Advanced Course must have the equivalent of four academic semesters remaining at Cornell or another degree-granting institution. Students must pass required physical and aptitude tests. In addition, the past performance and desire of each student is evaluated to determine potential for eventual commissioning

When students are accepted for the Advanced Course or accept a scholarship, they sign a written contract with the U.S. government. Under the terms of the contract, they agree to complete the Advanced Course and to accept a commission if offered. Concurrently with the signing of the contract, students enlist in the United States Army Reserve.

Classroom study in the Advanced Course includes one military science course each semester on such subjects as leadership and management, small-unit tactics, and command and staff organization and functions. The two hours a week of practical leadership training continues, and between the junior and senior years all cadets attend a five-week advanced summer camp conducted at Ft. Lewis, Washington.

#### Scholarships

Scholarships are awarded on the basis of merit and may be available for two, three, or four years. AROTC scholarships are awarded each year to outstanding Basic Camp participants and students in the freshman and sophomore classes. Scholarships pay up to full tuition and mandatory fees. Scholarship cadets and Advanced Course cadets also receive between \$250 and \$400 a month for up to ten months a year. Scholarship cadets also receive \$600 per year toward the cost of text books.

#### Commissioning

All students who successfully complete the Advanced Course, including the advanced summer camp, are commissioned as second lieutenants in the United States Army upon graduation.

### Service Obligations

ROTC graduates may serve on Active Duty, in the Army Reserve, or in the National Guard, depending upon the needs of the Army and the leadership abilities of the cadet. Officers beginning active duty attend the Officer Basic Course (normally 10 to 16 weeks) of their assigned branch. Upon completion, officers

# OFFICER EDUCATION - 2002-2003

are assigned to a unit and location determined by the desires of the individual and the requirements of the Army. Officers selected for reserve duty attend the Officer Basic Course, after which they are released to reserve status.

ROTC graduates generally serve four years on active duty and four years in reserve status; however, some may serve eight years on reserve duty.

#### **Choice of Branch**

Cadets in the second year of the Advanced Course (normally the senior year) may specify the branch of the Army—such as Infantry, Armor, Field Artillery, Air Defense Artillery, Aviation, Corps of Engineers, Signal Corps, Military Police, Military Intelligence—in which they prefer to serve. They are notified in December of the branch to which they are assigned. Appointment in a chosen branch depends upon the student's academic and officer education performance, degree area, and the needs of the Army at that time.

#### **Graduate Study**

Active duty deferments, or educational delays, may be granted to individuals who want to attend graduate school at their own-expense. Requests will be considered on the basis of the needs of the service. Admission to graduate school is the student's responsibility.

#### Benefits

Each cadet in the Advanced Course (Mil S III and Mil S IV) receives \$350–400 a month for up to 10 months a year. While attending the advanced summer camp (between the junior and senior years), each cadet receives approximately \$700. A cadet in the Two-Year Program receives the same payments as cadets in the Advanced Course and, in addition, receives approximately \$700 for summer Basic Camp attendance before entering the Advanced Course.

#### **Military Science Courses**

All cadets take one course and a leadership laboratory each semester in military science. The number of hours a week spent in the classroom varies from semester to semester, as does the credit received for each course.

#### Freshman Year (MIL S I)

#### MIL S 101 United States Organization for Defense

Fall. 1 credit. Required. Instructor TBA. Students examine the U.S. defense structure in terms of organization, mission, personnel, and relationships among and between military forces and branches and departments of the government. The U.S. Army force structure is examined at all levels. The complexities and magnitude of operating the defense organization are studied to provide a framework for subsequent instruction. Students develop skills in conducting oral and written presentations.

#### MIL S 102 Leadership Theory

Spring. 1 credit. Required. Instructor TBA. This course allows students to develop a basic understanding and appreciation of theories of social and organizational psychology and behavior as they apply to the military setting. Attention is given to leader types, the source and exercise of authority, and the impact of varying styles of leadership, resource management, motivation, and organizational effectiveness. The student is instructed in the concepts of integrity, ethics, and professionalism. Classes on historical events and strategy are also presented.

#### Sophomore Year (MIL S II)

#### MIL \$ 222 Small Organizational Operations/Land Navigation

Spring. 1 credit. Required. Prerequisite: MIL S 102 or instructor approval. J. Lopez. Students learn the basic principles of group dynamics at the level of the smallest military unit, the squad. Troop-leading procedures are introduced through case studies and roleplaying exercises. Leadership theories introduced in MIL S 102 are examined in a variety of realistic settings. The practical application of behavioral theories is explored in the context of small military organizations. The course also provides practical knowledge of the various forms of topographic representation. Students use maps in terrain association and land navigation. Knowledge of topography is complemented by an orientation on significant environmental influences of physical, social, and climatic factors. Portions of the course offer experience in land navigation and orienteering.

#### MIL S 321 Armed Conflict in Society

Fall. 2 credits. Required. R. J. Sova. This course provides practical knowledge in American Military History. It is primarily an overview course designed to provide an understanding of the art and nature of warfare and particularly how warfare has affected the United States. The course consists of three primary areas of instruction with an emphasis on American military history. The first area of instruction addresses the art and theory of modern warfare. It analyzes America's first attempt at war, the American Revolution, and ends with the development of modern warfare under Napoleon Bonaparte. The second phase focuses on America at war in the nineteenth century. It places particular emphasis on the American Civil War and the strategy of annihilation versus the strategy of attrition. The final phase looks at warfare in the twentieth century and finishes with an analysis of the future of warfare for the military of the United States.

#### Junior Year (MIL S III)

#### MIL \$ 331 Theory and Dynamics of the Military Team

Fall. 2 credits. Required. R. Brown. After an initial introduction to techniques of presenting briefings, students are provided with a broad understanding of the principles and application of teamwork in military organizations. Particular emphasis is given to the leadership responsibilities of the commander as the team coordinator. This course helps students develop an understanding of the roles and contributions of the various branches of the Army in support of the military team.

#### MIL S 332 Leadership in Small-Unit Operations

Spring. 2 credits. Required. Prerequisite: MIL S 331. R. Brown.

The course takes on the nature of decision making and the tactical application of the military team. Through the use of conferences and extensive practical exercises, students develop familiarity with the factors influencing a leader's decisions and the process of planning, coordinating, and directing the operations of military units through operation plans and orders.

#### Senior Year (MIL S IV)

#### MIL S 441 Leadership, Management, and Ethics for the Junior Military Officer

Fall. 2 credits. Required. J. D. O'Connor. The course provides an overview of the functions, responsibilities, and interrelationships among small-unit leaders, the commander, and the staff. Discussions focus on actions of small-unit leaders, communication skills, army operations, the logistical support of the army in the field, and the army training system. The course focuses on the dynamics of leadership in battle through the detailed analysis of a series of case studies. Just war theory, ethics, and professionalism are also addressed in a seminar fashion.

#### MIL S 442 Contemporary Military Environment

Spring. 2 credits. Required. J. D. O'Connor. A continuation of MIL S 441. Conferences and seminars examine the techniques of effective military leadership, with special attention given to professionalism and ethical considerations in the armed forces during both peacetime and conflict. Army operations and basic doctrine are also discussed. This is a capstone course designed to prepare the student for commissioning.

## **Practical Leadership Training**

#### **All Army Officer-Education Students**

No credit is given for leadership training, but participation is required for successful completion of the AROTC program. Students receive physical education credit for the laboratory. Each semester, cadets register for the appropriate leadership laboratory, consisting of physical fitness training three times per week, two hours of military training each week, and one or two weekend training exercises per semester.

#### MIL S I Leadership Laboratory I

Fall.	Spring.
0 credits. S-U.	0 credits. S-U.
MIL S 151	MIL S 152
177 O.Y. I.	. 1 1

MIL S I cadets meet for two hours each week to learn a variety of military skills including rappelling, first aid, drill and ceremonies, weapons familiarization, and physical fitness training.

#### MIL S II Leadership Laboratory II

Fall.	Spring.
0 credits. S-U.	0 credits. S-U.
MIL S 251	MIL S 252
dets meet for two	hours each week as

Cadets meet for two hours each week as members of the cadet organization to participate in practical leadership exercises. Types of practical activities include rifle marksmanship, orienteering, drill and ceremonies, signal communications, physical fitness training, first aid, tactics, and field exercises.

#### MIL S III Leadership Laboratory III

Fall. 0 credits.	Spring. 0 credits
Required. S-U.	Required, S-U.
MIL S 351	MIL S 352

Cadets meet for two hours a week and ocassional weekends to prepare for a fiveweek summer camp that follows their junior year. Emphasis is placed on the development of individual practical and leadership skills. Cadets rotate through leadership positions to practice applying decision-making skills in a myriad of situations.

#### MIL S IV Leadership Laboratory IV

Fall. 0 credits.	Spring. 0 credits
S-U. Required.	Required. S-U.
MIL S 451	MIL S 452

Senior cadets plan and operate the leadership laboratory programs for MIL S I–III cadets. The development of planning and supervisory skills is emphasized. Cadets have an opportunity to practice leadership skills developed during previous ROTC training and summer camp experiences. Includes two to three hours a week devoted to physical fitness.

#### Professional Military Education (PME) Requirements

In addition to the ROTC classes and leadership laboratories listed above, a number of courses are required as part of the contracted student's academic program. These courses are offered by the university and round out the student's professional education. The PME component of the ROTC program requires at least one college course in each of the following areas: communication skills, military history, and an introduction to computers. These courses must be completed prior to graduation and commissioning. Courses that meet these requirements are approved by the Professor of Military Science.

# NAVAL SCIENCE

Captain J. Alley, United States Navy, Professor of Naval Science and Commanding Officer, Naval ROTC Unit

TBA, United States Marine Corps

Lieutenant S. Jordan, United States Navy

Lieutenant L. Seymour, United States Navy

Lieutenant J. Kashuba, United States Navy

The objective of the Naval Officer Education Program is to prepare students for service as commissioned officers in the United States Navy or United States Marine Corps; this is done by supplementing undergraduate education with instruction in essential concepts of naval science and by fostering qualities of leadership, integrity, and dedication to country. The program is compatible with most undergraduate major fields of study, including five-year baccalaureate degree programs.

The program covers four years and combines specific courses in naval science and specified academic subjects. These courses supplement weekly professional development sessions in which the practical aspects of naval science and leadership procedures are stressed. It also includes at least one summer-at-sea period.

Though the Navy–Marine Corps Program has been designed to prepare future officers, naval science courses are open to all students at Cornell as space limitations allow.

#### **Requirements for Enrollment**

An applicant for the Naval ROTC program at Cornell must be a citizen of the United States. Applicants must have reached their seventeenth birthday by June 30 of the entering year and be less than 27 years of age on June 30 of the calendar year in which they are commissioned. Waivers of the upper age limit may be available for applicants who have prior active duty military service. Applicants must also meet physical and medical requirements. Interested students can visit the Naval ROTC Unit in Barton Hall or contact their local officer recruiter.

#### Programs

There are two programs: the Scholarship Program and the College Program. The two programs differ primarily in benefits given to the student.

## Scholarship Program

The Scholarship Program provides approximately 1,000 scholarships in more than 60 universities nationwide to selected students who want to serve in the Navy or Marine Corps. Financial support is provided to students during college preceding the award of the baccalaureate degree.

#### **Benefits**

The program offers scholarships that provide *full tuition* and are not need-based. While on scholarship, students also receive money for instructional fees, textbooks, nonconsumable supplies, and \$250-330-a-month stipend for a maximum of 40 months.

Successful completion of the Scholarship Program leads to a commission in the Navy or Marine Corps Reserve. At Cornell University, over 90 percent of NROTC students have a scholarship. Students entering NROTC without a prior scholarship award are entitled to compete for two- or three-year scholarships controlled by the Chief of Naval Education and Training.

#### Entering the Scholarship Program

There are three ways to enter the Scholarship Program.

The first way is by applying to the national competition each year. This process entails filling out and submitting an appropriate application; being interviewed; having a physical examination; and applying to, and being accepted by, one of the colleges or universities throughout the country that offers an NROTC program.

The second way is by enrolling in the College Program at Cornell and being recommended by the Professor of Naval Science for a scholarship after at least one semester in the program.

The third way is by entering through the Two-Year Scholarship Program.

#### College Program

There are two College Programs available. Both lead to a commission in the Naval or Marine Corps Reserve.

Starting in the junior year, each of these programs provides textbooks for naval science courses, uniforms, and a subsistence allowance of \$300–350 a month.

The regular College Program is four years long. Academic requirements for students in this program are somewhat fewer than those for scholarship students, as noted in the curriculum section of this book.

The Two-Year College Program begins the summer before the junior year; students attend a required program, with pay, at the Naval Science Institute in Newport, R.I.

#### Summer Training

Each summer, students in the Scholarship Program spend approximately four to six weeks on a Navy ship, or participate in a naval activity that may take place anywhere in the world, for on-the-job training. College Program students attend one summer training session of the same duration between the junior and senior years.

### **Active Duty Requirements**

Scholarship midshipmen commissioned in the Navy or Marine Corps Reserve serve on active duty for a minimum of four years. College program midshipmen commissioned in the Naval or Marine Corps Reserve serve a minimum of three years. In somes cases, following commissioning, specialized training such as aviation or nuclear power will add additional active duty requirements.

#### **Choice of Assignment**

Graduates have the opportunity to request the duty they prefer upon graduation. These requests are given careful consideration, and every effort is made to assign newly commissioned officers to their duty of choice.

Among the assignments available are duties in naval aviation as either a pilot or naval flight officer, on submarines, and on surface ships. Other specialties, such as special warfare or medical service corps, may be available on a limited basis.

#### **Marine Corps Options**

The United States Marine Corps is an integral part of the Naval Services and is commanded by the Commandant of the Marine Corps. One-sixth of the NROTC scholarship students may be Marine selectees who will be designated Marine-option midshipmen. Upon successful completion of the program they will be appointed second lieutenants in the United States Marine Corps Reserve.

Marine-option midshipmen follow the same program as other NROTC midshipmen for the first two years. Beginning with the junior year, Marine-option midshipmen are taught Marine oriented courses by a Marine Officer Instructor. For First Class summer training (after the junior year), Marine-option students travel to Quantico, Virginia, where they undergo six weeks of intensive training known as the USMC Officer Candidate School. Upon commissioning the following year as second lieutenants, they are assigned to the Basic School at Quantico, Virginia. After the Basic School, the Marine officer is assigned duty in a variety of occupational fields. Among the duties available are infantry. aviation, artillery, tracked vehicles, engineering, communications, electronics, supply, administration, and computer science. The officer may serve on board naval vessels or at shore installations of the Marine Corps or Navy, either in this country or overseas.

The Marine Corps has a postgraduate training system similar in objectives and organization to that of the Navy. Marine officers selected for aviation receive flight training at the Naval Air Station, Pensacola, Florida, along with their Navy counterparts.

#### Curriculum

A student has three categories of requirements to fulfill as a midshipman. The first of these requirements is a weekly naval professional development session each semester. The second requirement is a naval science course each semester. The last set of requirements consists of further courses prescribed by the Navy to meet the growing need for more and better technically educated junior officers.

#### **Naval Professional Laboratories** NAV S 141-142, 241-242, 341-342, or 441-442

All students in the program participate in one 90-minute professional development session each week. The session is held from 2:30 until 4:00 on Wednesday afternoons, and consists of both drill and professional information briefings. Students gain experience in actual leadership situations and learn the fundamentals of seamanship, military formations, movements, commands, discipline, courtesies, and honors. During information briefings, special emphasis is given to applied leadership as it relates to the administrative and managerial aspects of a Navy or Marine Corps officer's duties.

## Naval Science Courses

All Navy and Marine midshipmen take one naval science course each semester during their freshman and sophomore years. Navyoption students continue to take a naval science course each semester during their junior and senior years. Marine-option students have slightly different curriculum requirements for their junior and senior years.

#### Freshman Year (Navy and Marines)

#### NAV S 101 Fundamentals of Naval Science

Fall. No credit. S. Jordan, J. Kashuba. This course involves a study of fundamental aspects of naval science, this includes contributions to sea power, different warfare communities involved in the physical development of naval forces, and study of resource management and naval science prospects for the future. Naval uniforms, customs, and traditions are also covered.

#### NAV S 102 Sea Power and Maritime **Affairs**

Spring. 3 credits. S. Jordan. Discussions examine the history of the Navy as a force in diplomacy and an instrument of U.S. foreign policy. Relationships between Congress and the military for determining the national defense policy are also explored. An integrated examination of current events and issues lends historical perspective throughout the course.

#### NAV S 157 Principles of Sailing

Fall and spring. Physical education credit. TBA

This is a course of instruction in basic sailing skills and safety principles. Students sail small boats on Cayuga Lake. Focus is on U.S. Navy Class B inshore skipper certifications.

#### Sophomore Year (Navy and Marines)

#### NAV S 201 Organizational Behavior and **Small Group Processes** Fall. 3 credits. J. Alley.

The theme of the course is the "evolving role of the manager, organizational decision maker, and leader." The course begins by briefly covering the theoretical principles of management and progresses through practical skills used by managers and leaders. Lectures, reading assignments, films, and discussions

provide students with an excellent opportunity to consider complex managerial and leadership issues. The goal of this course is for students to begin to develop a sound personal leadership philosophy that will enable them to more effectively accomplish the assigned responsibilities of leading men and women in today's demanding and high tech naval environment.

#### NAV S 202 Naval Ship Systems I (also M&AE 101)

Spring. 3 credits. J. Kashuba An introduction to primary ship-systems and their interrelationships. Basic principles of thermodynamics, propulsion, mechanical operation, internal communications, electronics, ship structure, and other marine systems are covered.

#### Junior Year (Navy)

#### NAV S 301 Principles of Navigation (also ABEN 305)

Fall. 4 credits. L. Seymour. An introduction to the fundamentals of marine navigation emphasizing piloting and celestial navigation procedures. This course covers coordinate systems, chart projections, navigational aids, instruments, compass observations, time, star identification, use of the nautical almanac, and study of tides and currents. Electronic navigation systems are discussed.

#### NAV S 302 Naval Operations

Spring. 3 credits. L. Seymour. The course covers the application of the nautical rules and maneuvering board in order to avoid collisions at sea. Other aspects of naval surface ship operations that are introduced include visual and electronic communications methods, tactical disposition of forces, ship handling theory, and deck seamanship topics.

#### Senior Year (Navy)

# NAV S 401 Naval Ships Systems II (Weapons) Fall. 3 credits. S. Jordan.

The principles and theories used in the development of naval weapons systems are examined. Initially, extensive study is made of detection systems, especially radar and sonar, followed by discussions of ancillary systems for computing, stabilizing, tracking, and weapons control and delivery.

#### NAV S 402 Leadership and Ethics Spring. 3 credits. J. Alley.

A variety of topics important to the naval officer for both professional and managerial development are reviewed. The material is designed to provide the midshipman with an understanding and appreciation of leadership and ethics in preparation for assignments in the naval service. Through the use of lectures, case studies, and role playing, the student learns various aspects of naval leadership and ethical decision making. Marine-option students may also take this course.

#### Junior or Senior Year (Marine Options) NAV S 310 Evolution of War

Spring. 3 credits. TBA.

A study of warfare that examines the relationship of military strategy to geography, economics, sociology, technology, and national political realities. This course includes study of the evolution of warfare, including principles of war, weapons, and associated

equipment, and the effects of nuclear weapons and guerrilla warfare on traditional concepts of national strategy.

#### NAV S 410 History of Amphibious Warfare

Spring. 3 credits. TBA.

The history of the development, theory, techniques, and conduct of amphibious operations from 490 B.C. to the present. Special emphasis is placed on amphibious operations conducted in the central Pacific during World War II and on the future of amphibious operations.

# **Other Required Courses**

#### Navy-Option Scholarship Program

To be eligible for a commission in the United States Navy, midshipmen must successfully complete all the requirements for a baccalaureate degree in any field of study offered by Cornell University, and complete courses in the following subjects (specified courses to be approved by the Professor of Naval Science):

American military affairs or national security policy (one semester)

English (one year)

calculus (one year)

calculus-based physics (one year)

computer science (one semester)

The calculus requirement must be satisfied by the end of the sophomore year and the physics requirement by the end of the junior year.

Although free choice of academic majors is permitted, students are encouraged to pursue majors in engineering and the physical sciences so that they may be best prepared to meet the technological requirements of the modern Navy.

#### Navy-Option College Program

Navy-option College Program students must complete one year of college-level study in mathematics, physical science, and English as a prerequisite for commissioning. The mathematics course must be completed by the end of the junior year; the physical science course by the end of the senior year. In addition, one term of computer science is required. College Program students who desire entry into the Navy-option Scholarship Program should fulfill all of the requirements applicable to Navy-option scholarship students if they wish to be eligible for a scholarship controlled by the Chief of Naval Education and Training.

#### Marine Option

Any midshipman, in either the Scholarship Program or the College Program, who completes all of Cornell University's degree requirements in any academic major, is eligible for a commission in the U.S. Marine Corps or U.S. Marine Corps Reserve. Marineoption students take the same naval science courses and naval professional laboratories as Navy-option students for the freshman and sophomore years. During the junior and senior years, Marine-option students have slightly different naval science course requirements than their Navy-option counterparts. Two semesters of courses (a minimum of 3 hours each) in the area of American Military Affairs or National Security Policy are

required. One semester of a modern foreign language must be completed.

# **Extracurricular Activities**

The NROTC midshipman at Cornell is offered a broad range of activities, including sail training and a comprehensive intramural sports program. Midshipmen participate in a myriad of social events, including the annual Navy/Marine Corps Birthday Ball.

# DEPARTMENT OF AEROSPACE STUDIES

Colonel Donald L. Hoover, United States Air Force, Professor of Aerospace Studies and Commander, Air Force ROTC Detachment 520

TBA, United States Air Force

Captain Michael Mowry, United States Air Force

The objective of the Air Force Officer Education Program at Cornell is to prepare men and women for positions as officers in the United States Air Force. The program is designed to teach students about the mission and organization of the Air Force, the historical development of airpower, leadership, and management. Students study national security policy and the role of the military in a democratic society. This program includes specific courses in aerospace studies and practical leadership laboratories.

# **Requirements for Enrollment**

The Air Force Officer Education Program is open to any qualified undergraduate or graduate student enrolled in any major field of study. An applicant must be a United States citizen to become a commissioned officer. Noncitizens may enroll and will receive certificates acknowledging completion of the course but cannot receive a commission.

All applicants receive physical examinations at no cost and must meet certain physical requirements to be accepted. Students who are interested in qualifying for flying categories (pilot, navigator, or air battle manager) must meet more stringent physical requirements. In addition, students enrolled in the commissioning program must meet specified physical fitness requirements.

Though the program is designed to prepare future Air Force officers, the Department of Aerospace Studies' academic courses are open to all students at Cornell.

## **Four-Year Program**

The Four-Year Program is open to all qualified freshmen. Sophomores may also enter a condensed version of the four-year program in coordination with the AFROTC staff.

Veterans of the U.S. armed forces and students entering Cornell from military schools may receive advanced standing, subject to approval by the Professor of Aerospace Studies.

The Four-Year Program consists of General Military Courses (GMC) and Professional Officer Courses (POC). For four-year scholarship cadets, the first year of the GMC carries no military commitment, and students may withdraw at any time. For nonscholarship cadets, both years of the GMC carry no military commitment, and students may withdraw at any time.

#### **General Military Course**

Students in General Military Courses (GMC) take a 1 credit Aerospace Studies course each semester. During the freshman year, the student examines the organization and mission of the United States Air Force and the environment of the Air Force officer. In the sophomore year, the student studies the history and development of American air power. In both years, officership and professionalism within the United States Air Force are emphasized.

Students also spend two hours a week in a leadership laboratory. Leadership laboratories provide cadets with an opportunity to put into practice the skills they have learned in their aerospace studies classes. These laboratories focus on the development of officer qualities through such activities as drill and ceremonies, group leadership problems, confidencebuilding exercises, and guest lecturers. In addition, all students participate in summer field training for four weeks between their sophomore and junior years.

#### **Professional Officer Course**

The Professional Officer Courses (POC) provide a two-year advanced program of instruction. Students who are accepted for the POC must have successfully completed or validated the basic course and must meet academic and physical standards. Each cadet accepted into the POC must sign an agreement to complete the program and accept, if offered, a commission in the United States Air Force upon graduation.

Classroom study in the POC is a 3 credit course each semester. In the junior year, cadets study Air Force leadership and management at the junior officer level. During the senior year, cadets study the elements of national security and the military's role in American society. Leadership laboratory requires two hours a week in the junior and senior years. In leadership laboratory, cadets are exposed to advanced leadership experiences and apply principles of leadership learned in the classroom.

## **Two-Year Program**

The Two-Year Program consists of the last two years (Professional Officer Courses) of the regular Four-Year Program plus a five-week summer training course.

The Two-Year Program is open to all qualified students with two years of academic study remaining at Cornell (graduate or undergraduate) or at schools supported under a crosstown agreement.

# **One-Year Program**

There are limited opportunities for students to enter a one-year program. Call 607–255–4004 for more details and current availability.

## **Scholarships**

The Air Force offers three- and four-year scholarships to high school seniors and one-, two- and three-year scholarships to college students. Four-year scholarships are offered on a competitive basis to high school seniors. Scholarship information can be obtained from a high school guidance counselor, from Air Force ROTC officers at Cornell (AFROTC phone number is 607–255–4004), from a local Air Force recruiter via the web at www.afrotc.com, or from the Air Force ROTC scholarship section, Maxwell AFB, AL 36112– 6106, 334–953–2093, extension 2093. The deadline for submitting a four-year scholarship application is December 1 of the year preceding the academic year in which a student wants to enter the program. Students should apply early.

### Scholarships for two and three years.

Applications for these scholarships should be made to the Professor of Aerospace Studies during the freshman, sophomore, or junior years of college. All selections are based on the student's major, scores achieved on the Air Force Officer Qualifying Test, the student's overall grade point average, and the recommendation of the Professor of Aerospace Studies. Scholarships include amounts ranging from \$3,000 per year to full tuition and fees. There is a monthly \$250–400 nontaxable allowance during the school year. A \$510 per year textbook allowance is included in every scholarship. Scholarships do not include the cost of room and board.

#### Fees

An initial uniform deposit of \$50 is required on entry into AFROTC. Prior to commissioning, cadets may purchase uniforms with their deposit or return uniforms and receive their deposit back.

## **Benefits**

All cadets in the advanced program (POC) whether they are on scholarship or not receive a \$250–400-a-month, nontaxable subsistence allowance during the academic year. During the four- or five-week summer field training (see below), each cadet receives a pay allowance plus an allowance for travel to and from the field site. Textbooks and supplies required for Department of Aerospace Studies courses are provided.

All cadets are eligible to participate in AFROTC-sponsored field trips made to Air Force bases throughout the country as well as voluntary summer programs for professional development. Scholarship and advanced cadets (POC) are entitled to space-available travel on Air Force aircraft flying within the continental United States.

# **Field Training**

There are two types of field training: a fourweek course for cadets in the Four-Year Program and a five-week course for Two-Year Program applicants.

Field training is designed to stimulate the development of military leadership skills through meaningful experiences. The curriculum consists of aircraft, aircrew, and survival orientation; junior officer training; physical training; small arms training; a socialactions program; and supplemental training. The five-week training program includes sixty hours of Air Force ROTC academic course work that substitutes for the freshman and sophomore Aerospace Studies courses.

Cadets may also volunteer for one of many Advanced Training Programs. These programs include but are not limited to the Professional Development Program, Air Force Academy Free-Fall Parachute Training, the British Royal Air Force (RAF) Exchange Program, Research and Development Experiences, the Academy Soaring Program, and Army Airborne Training.

#### **Commissioning Obligations**

All students who successfully complete the AFROTC advanced program (POC) are awarded a baccalaureate degree, tendered a commission, and enter the Air Force as second lieutenants.

Second lieutenants commissioned in nonflying categories are required to serve on active duty for four years. Pilots are required to serve on active duty for ten years after completing flying training. Navigators and Air Battle Managers serve six years after completing training.

## **Air Force Careers**

The Air Force assigns new officers to a career field based on mission requirements, educational background, and officers' preferences. Students in the engineeringscientific category may be assigned to practice in their specialty in research and development, communications, electronics, aeronautics, astronautics, the biological sciences, computer design and maintenance, meteorology, space, or other engineering and scientific fields. Graduates in the nontechnical category can anticipate assignments in manpower management, information management, logistics, law enforcement and investigation, intelligence, personnel, transportation, accounting and finance, and other career fields.

Any undergraduate major is suitable for those who are qualified and interested in entering the space and missile career fields or in becoming pilots, navigators, or air battle managers. After completion of flying training, personnel are assigned to a specific type of aircraft.

# Curriculum

Students in the Four-Year Program are required to take all courses listed below. Students in the Two-Year Program are required to take all of the courses listed for the junior and senior years. There are no prerequisites for any Aerospace Studies courses.

#### Freshman Year

#### AIR S 161 The Foundations of the United States Air Force I

Fall. 1 credit.

This is a survey course designed to introduce students to the United States Air Force and Air Force Reserve Officer Training Corps. Featured topics include: mission and organization of the Air Force, officership and professionalism, military customs and courtesies, Air Force officer opportunities, group leadership problems, and an introduction to communication skills. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

#### AIR S 162 The Foundations of the United States Air Force II

Spring. 1 credit. Continuation of AIR S 161.

#### Sophomore Year

#### AIR S 211 The Evolution of USAF Air and Space Power I

Fall. 1 credit.

This course is designed to examine general aspects of air and space power through a historical perspective. The course covers a time period from the first balloons and dirigibles to the role of air power in Afghanistan. Historical examples are provided to illustrate the development of Air Force capabilities and functions to demonstrate the evolution of what has become today's USAF air and space power. The course examines several fundamental truths associated with war in the third dimension, and provides students with an understanding of the general element and employment of air and space power from an institutional, doctrinal, and historical perspective. In addition, students continue to discuss the importance of the Air Force core values

#### AIR S 212 The Evolution of USAF Air and Space Power II

Spring. 1 credit. Continuation of AIR S 211.

#### Junior Year

#### AIR S 331 Air Force Leadership Studies I Fall. 3 credits.

This course is a study of the leadership, quality management fundamentals, professional knowledge, Air Force personnel and evaluation systems, ethics, and communication skills required of an Air Force junior officer. Case studies are used to examine Air Force leadership and management situations; they demonstrate practical applications of the concepts being studied. A mandatory leadership laboratory complements this course, providing advanced leadership experiences in officer-type activities, and giving students the opportunity to apply leadership and management principles of this course.

#### AIR S 332 Air Force Leadership Studies II

Spring. 3 credits. Continuation of AIR S 331.

#### **Senior Year**

#### AIR S 401 National Security Affairs/ Preparation for Active Duty I Fall. 3 credits.

This course is concerned with the national security process, regional studies, advanced leadership ethics, and Air Force doctrine. Other topics include the military as a profession, officership, military justice, civilian control of the military, preparation for active duty, and current issues affecting military professionalism. Continued emphasis is given to refining communication skills. A mandatory leadership laboratory complements this course by providing advanced leadership experiences, giving students the opportunity to apply the leadership and management principles described in this course.

#### AIR S 402 National Security Affairs/ Preparation for Active Duty II

Spring. 3 credits. Continuation of AIR S 401.

#### **Leadership Laboratory Courses**

All Air Force cadets spend two hours a week throughout the academic year in a leadership laboratory, for which no academic credit is given. Occasionally laboratories are held at times other than the normally scheduled period. All cadets are expected to participate in a formal dinner and to meet minimum physical fitness and weight standards each semester. Leadership lab is open to students qualified to compete for an Air Force commission.

#### AIR S 141-142 Initial Military Experiences

Introduction to the responsibilities, life, and work of an Air Force officer. Basic knowledge of drill and ceremonies, military courtesies, and the wearing of the uniform. This course includes a field trip to a local military installation.

#### AIR S 241-242 Intermediate Military Experiences

This course is designed to help students develop skill in giving commands for drill and ceremonies. They are also introduced to the Air Force base environment in which the officer functions. Career areas available based on academic majors are described. Students participate in military drills and ceremonies, and go on a field trip to a local military installation.

#### AIR S 341–342 Junior Officer Leadership Experiences

Cadets assume leadership responsibilities similar to those of a junior officer. Emphasis is on the importance of applying effective human relations skills in dealing with superiors, peers, and subordinates. Cadets also gain insight into the general structure and progression patterns of selected Air Force officer career fields.

#### AIR S 441 Advanced Leadership Experiences

Cadets assume command leadership responsibilities to operate a military organization. Cadets apply effective leadership and managerial techniques with individuals and groups, and participate in self-analysis of leadership and managerial abilities.

**AIR S 442 Precommissioning Laboratory** Factors that facilitate transition from civilian to military life are reviewed. The need for military security, base services and activities, personal finances, travel regulations, and social obligations are introduced.

Alan E. Gantert, director

# COURSES

The courses and fees described in this catalog are subject to change or cancellation at any time by official action of Cornell University. For current fee information on physical education courses call 255–4286; for outdoor education courses, call 255-6183, or visit www.coe.comell.edu.

Enrollment in any course is limited by the space available. Other restrictions are included in the course description. Most courses are coeducational. The specific time and place of class meetings, as well as information about fees, are available at the physical education course registration or may be found on "Bear Access," a package of software for accessing a variety of network services at Cornell. Course fees are billed through the Office of the Bursar.

Additional course offerings may be listed at registration, as the curriculum is frequently reviewed and changed. Drop deadlines for outdoor education courses are earlier than university deadlines, and often earlier than physical education deadlines. COE courses may be added any time by calling 255-6183, or registering online at www.coe.cornell.edu.

## Aquatic Courses

#### Lifeguard Training

Fall and spring. Fee charged. Brerequisite: swimming test consisting of 500 yards, demonstrating 3 strokes, treading water without the use of hands, and retrieving a brick from 7 feet of water. 3 classes a week

An American Red Cross certification course. Practice and execution of lifeguarding first aid and CPR skills and techniques. Certification is awarded in lifeguarding, first aid, O2, AED and CPR upon satisfactory completion of the course.

#### **Lifeguard Training Instructor**

Spring. Fee charged. Prerequisites: current Red Cross ICT or instructor card, written and skill tests in lifeguarding, first aid, and CPR techniques. Students must not miss first class. 2 classes a week

American Red Cross lifeguarding instructor and CPR-FPR certifications are awarded upon successful completion.

Scuba, Open-Water Fall, spring, and summer (6 weeks). Fee charged.

Program includes classroom work, skill training in a pool, and open-water training in Cayuga Lake. P.A.D.I. open water certification awarded upon successful completion.

#### Scuba, Advanced Open-Water

Fall and spring. Fee charged. Advanced-level open-water training in Cayuga Lake. For those who have completed the open-water course.

#### **Rescue Diver**

Fall and spring. Fee charged. Advanced course for scuba divers. For those who have completed Advanced Open-Water Scuba certification and are interested in learning rescue and safety techniques.

#### **Dive Master**

Fall and spring. Fee charged. Advanced-level scuba course open only to those who have completed the Rescue Diver course. NOTE: This is a long, time-consuming course, which requires the student to be in good physical and swimming shape.

#### **Specialty Scuba Diving**

Fall and spring. Fee charged. Courses offered in the following specialty diving areas: navigation, search and recovery, night diving, deep diving, underwater photography, wreck, multi-level, boat, tropical fish identification and buoyancy control, and underwater naturalist.

#### Scuba Diving Trips

Spring. Fee charged. This course is offered during the spring intersession period. Scuba trips to various destinations such as the Bahamas. Locations change from year to year. See the information sheet at the registration table.

#### Swimming, Introduction to (ARC)

Fall, spring, and summer. (6 weeks). Instruction and practice in skills leading to passing the basic swimming proficiency test.

#### Swimming, Advanced Beginning (ARC) Spring.

Ideal for all who have taken one term of Beginning Swimming, regardless of whether the test was successfully completed. Areas of special emphasis are the crawl stroke and rotary breathing, back crawl, elementary backstroke, diving, treading water, and underwater swimming. The primary objective is to strengthen the student's confidence and competence.

#### Swimming, Intermediate (ARC)

Fall and spring. Practice of basic skills and five basic strokes; front crawl, back crawl, elementary backstroke, breaststroke, sidestroke.

# Swimming, Advanced (ARC)

Fall and spring. Practice of nine strokes: front crawl, back crawl, elementary backstroke, breaststroke, inverted breaststroke, sidestroke, overarm sidestroke, trudgeon, and butterfly.

#### Swimming Conditioning

Fall and spring. Prerequisite: reasonable swimming ability.

Introduction to, and practice of, different training methods. Final objective: to swim 2,500 yards during class period. Primarily a conditioning and not an instructional course.

#### Water Safety Instructor

Spring. Fee charged. Prerequisite: passing of written and skill water tests which are given on the first day.

American Red Cross water safety instructor certification is awarded upon satisfactory completion of the course. This is not a course for a casual participant. Approximately 45 hours of work is required.

#### **Bowling Courses**

#### Bowling

Fall and spring. Fee charged. For the beginning and intermediate bowler. Shoe rental is included in the fee.

#### Dance Courses

Develop flexibility, coordination, and the ability to perceive and reproduce phrases of dance movement with rhythmic accuracy, clarity of body design, and fullness of feeling. Auditions are required for admission to all advanced courses, since they require the mental and physical ability to perform morecomplex phrases in various styles.

#### Ballet I

Fall and spring.

#### Ballet II

Fall and spring.

#### Ballet III

Fall and spring.

#### **Ballet IV**

Fall and spring.

#### **Ballroom Dancing**

Fall, spring and summer. Fee charged. Students and their partners must sign up at course registration.

Includes instruction in the waltz, swing, cha cha, calypso, tango, and others.

#### Belly Dancing I

Fall and spring. Fee charged. Belly dancing is an exciting Middle Eastern folk art that can help in the development of flexibility, body awareness, and overall body tone. The class will begin with warm-ups and continue with basic movements and rhythms, then put them together in a dance to music of the Middle East.

#### **Belly Dancing II**

Spring. Fee charged.

Advanced Belly Dance movements and combinations which include putting basic and advanced movements to the Beledi, Masmouodi, and Karsilma dance rhythms of the Middle East. A drum solo, taqsim (fluid, graceful movements of the arms and hands), floor work (level changes with the dance), and how to play finger cymbals are also a part of this class.

#### Introduction to Swing Dance

Fall and spring. Fee charged. No partners are needed. Beginners can expect to develop significant capacity for enjoyment of two forms of swing dance: jitterbug and street boogie. Partners will be rotated throughout the course. Effort will be made at registration to equalize male and female ratios.

#### Swing Dance II

Fall and spring. Fee charged. A class for those who have taken the introductory course.

#### Latin Dance

Fall and spring. Fee charged. Partner sign-in required. This is an introductory course that will teach salsa, mambo, Latin and meringue. Emphasis on listening, feeling, and expressing Latin rhythms with precise detail and technique.

# PHYSICAL EDUCATION AND ATHLETICS - 2002-2003

Modern Dance I (also THETR 124) Fall and spring.

Modern Dance II (also THETR 232) Fall, spring, and summer (6 weeks).

Modern Dance III (also THETR 306) Fall and spring.

Modern Dance IV (also THETR 308) Spring.

#### **Equitation Courses**

#### Basic, Intermediate, Advanced

Fall, spring, and summer (6 weeks). Fee charged.

All riding classes are held at the Cornell Equestrian Center located on Pine Tree Road near East Hill Plaza. Detailed information will be offered by the equitation staff at the registration sign-up table. Basic—never ridden; Intermediate I—completed basic with knowledge of walk/trot/canter; Intermediate II—walk/trot/canter with control over 2' course; Advanced—strong jumping/dressage skills with experience hunting/showing/ eventing. Students must fill out a release form to participate in any riding class.

#### **First Aid/CPR Courses**

#### **Emergency Response**

Fall and spring. Fee charged. This advanced-level first aid course is the most comprehensive available without NYS certification. Sixty hours of training includes CPR for the Professional Rescuer and oxygen administration, as well as many of the first aid skills taught in a basic EMT class. American Red Cross certification is valid throughout the United States and is accepted by many states as a Certified First Responder equivalent. Certification is valid for three years. This certification is valid for three years. This certification and those who work closely with pre-hospital medical staff.

#### NYS Emergency Medical Technician— Basic

Two-semester course. Fee charged. This intensive 130-hour course is taught throughout both the fall and spring semesters. Course includes training in CPR for the Professional Rescuer, oxygen administration, airway management, fracture management, bleeding control, expanded patient assessment, spinal immobilization, medical antishock trousers, and defibrillation. Students will qualify for the NYS EMT Certification Exam upon successful completion of this course. Rigid attendance and participation requirements are strictly enforced.

#### NYS Emergency Medical Technician— Critical Care

Two-semester course. Fee charged. A course for those who are currently certified NYS EMT's. AEMT-CRITICAL CARE is an intensive 160 hour course which is taught throughout both fall and spring semesters. Course includes training in CPR for the Professional Rescuer. oxygen administration. airway management. fracture management. bleeding control, expanded patient assessment, spinal immobilization, medical antishock trousers, manual defibrillation, EKG interpretation, pharmacology and IV administration. Clinical rotations, in the field and hospital are also required. Students will qualify for the New York State AEMT-CRITICAL CARE certification exam upon successful completion of the course. Attendance and participation requirements are strictly enforced.

# **Fishing Courses**

#### Fly Fishing and Basic Flytying Techniques, Level I

Fall and spring. Fee charged. Learn the art of tying several of your own artificial flies while you learn the art of fly casting. Students must have a valid NYS fishing license and their own wader boots. All other materials provided.

#### Introduction to Freshwater Angling Fall. Fee charged.

This course acquaints the student with freshwater spinning, casting and fly fishing equipment, tackle, and techniques through on-the-water experiences. It also seeks to promote an awareness of the angling opportunities that exist close to Cornell and in the Finger Lakes region of New York. The class consists of an orientation and outings to various locations around the area such as Cayuga Lake and the Susquehana River.

#### **Fitness Courses**

Aerobic Dance

Fall, spring, and summer (6 weeks). Fee charged.

A dance program designed to keep the cardiovascular system in top shape by making the body demand increased amounts of oxygen.

#### **Cardio Crazy**

Fall and spring. Fee charged. The course is designed to acquaint the student with the various types of indoor aerobic training equipment, rowing machines, tread mills, stair machines, exercycles, and Nordic Traks, and to teach them to design a personal fitness program incorporating the equipment.

#### 8 O'Clock Rock

Fall and spring. Fee charged. This class combines the best of the principles of weight training and the cardio training in the 8 O'Clock Rock Class.

#### **Aerobic Instructor Training**

Fall and spring. Fee charged. The course is designed to train the student to teach aerobics and prepare for the A.F.A.A. Primary Aerobic Instructors Certification Test.

#### **Fitness and Conditioning**

Fall and spring.

Physical fitness program that embodies features of stretching exercises, weight lifting, and jogging. Students work on their individual training needs.

#### Jogging

Fall and spring. This course will cover running and stretching techniques. A conditioning program with the objective to develop the capacity to run three miles after 12 weeks of training.

#### **Jogging Tours—Distance Running**

Fall and spring. A course designed for the intermediate runner who can run an average of 3 miles in 30 minutes. Most tours will be 3–4 miles long and will go through campus and nearby countryside.

#### Triathion

Fall and spring. Designed to acquaint students with the components of, and conditioning for, triathlon (running, swimming, and bicycling).

#### **Wellness and Fitness**

Fall and spring. Fee charged. "Here's to a Healthier You"—a wellness experience for the busy student. This course will assess the student's physical fitness status, blood cholesterol levels, and overall lifestyle health habits. Each student will receive an individual exercise prescription and have access to the Wellness Program fitness room in Helen Newman Hall. Lectures on nutrition and stress management are also presented. This course has been made possible through the generosity of the Bateman family in memory of Ms. Dorothy Bateman, Cornell's first director of women's sports and physical education (1920 to 1962).

#### **Golf Courses**

#### Golf, Introduction to

Fall and spring. Fee charged. A PGA program of instruction is geared to all levels of experience and ability. The objective is to give beginners enough skill to play, and to give more-advanced players direction in their thinking, practice, and play, through a thorough understanding of fundamentals. Equipment is furnished.

#### **Golf, Recreational**

Fall and spring. Limited to students who are experienced golfers. Fee charged. Students must provide their own clubs. A minimum of ten rounds of nine holes each must be played to receive credit. Fee covers a semester's membership.

#### **Gymnastics Courses**

#### **Gymnastics, Introduction to**

Fall and spring. Introduction to gymnastics deals with a majority of the Olympic events. The course will focus upon beginner-level skills and is open to both male and female participants.

#### **Ice Skating Courses**

#### Skating, Introduction to

Fall and spring. For beginning to intermediate skaters. Fee charged.

Students provide their own skates or rent them at Lynah Rink. Course will cover forward and backward skating, turns, and stops.

#### Figure Skating, Beginning, Intermediate, and Advanced Levels

#### Fall and spring. Fee charged.

Instruction and practice in basic figure skating techniques: forward, backward, crossovers, turns, and spirals. Students provide their own skates or rent them at Lynah Rink.

### Martial Arts—Self-Defense Courses

#### Boxing, Introduction to

Fall and spring. Fee charged. The course covers the basic skills of footwork, defensive, and offensive techniques. Skipping rope, shadow boxing, and heavy bag work will be taught as methods for individual aerobic conditioning.

#### **Boxing**, Thai

Fall and spring, Fee charged. A martial art system developed from the unique culture of Thailand is a blend of art, science, and sport.

#### Chi Gong

Fall and spring. Chi Gong, or "the art of breathing", is an ancient Taoist exercise system from China. Like Tai Chi, Chi Gong is an internal martial art that links movement, breathing and visualization to enhance physical strength and mental clarity. In ancient times, this gentle system was used by warriors preparing for battle. They believed it would make their bodies impervious to weapons of the day. The movements used in Chi Gong are generally less complex than those of Tai Chi and can be learned more quickly. Meditation is an important element of the practice.

#### Fencing, Introduction to

Fall and spring. Fee charged. Includes warm-up exercises and offensive and defensive moves. Equipment furnished.

#### Fencing, Intermediate

Spring. Fee charged. Prerequisite: Introduction to Fencing or the equivalent. Interclass competition is stressed. Equipment is furnished.

#### Fencing, Classical

Fall and spring. Fee charged. Classical fencing is a martial art that uses the practice of the sword to cultivate self-mastery.

#### **Renaissance Fencing**

Fall and spring. Prerequisite: Fencing I or with the permission of the instructor. Fee charged.

Focuses on the fundamental techniques of 16th-17th century fencing with an emphasis on safety, balance, line, focus, and distance.

#### Judo, Introduction to

Fall and spring. Fee charged. Conditions and increases suppleness. Continue to develop skills in the two parts of judo: standing techniques (throws and trips) and mat techniques.

#### Judo, Intermediate

Fall and spring. Fee charged. Conditions and increases suppleness. Continue to develop skills in the two parts of judo: standing techniques (throws and trips) and mat techniques.

#### Jun Fan / Jeet Kune Do

Fall and spring. Fee charged. This is a blended system of martial arts. Developed by the late Bruce Leeand taught to his personal apprentice at the time, Dan Inosanto, Jun Fan Gung Fu Is the foundation from which Jeet Kune Do eventually evolved. The system emphasizes footwork and agility, economy of motion, counter ability and strong practical self-defense. This realistic, modern training approach cultivates strong physical, mental, and emotional development in the student.

#### Karate, Introduction to

Fall and spring. Fee charged. A beginning course taught by professional black belt instructors. Involves mastery of basic blocks, kicks, and punches.

#### Karate, Advanced

Fall and spring. Fee charged. Open to those who have taken basic Karate or the equivalent.

#### Kung Fu

Fall and spring. Fee charged. Exploration of conditioning and fitness procedures used in the major martial arts, such as karate or judo. Covers circular movement for generating strong blocks, kicks, and punches.

#### Self-Defense and Empowerment for Women

Fall and spring, Fee charged. Basic methods of physical protection for women.

#### **Tae Kwon Do, Introduction to**

Fall and spring. Fee charged. A Korean martial art distinguished by emphasis on high and powerful kicks. Basic kicking, punching, and blocking emphasized.

#### Tae Kwon Do, Intermediate

Fall and spring. Fee charged. A Korean martial art distinguished by its emphasis on high and powerful kicks. Intermediate-level kicking, punching, and blocking are emphasized.

#### Tae Kwon Do, Advanced

Fall and spring. Fee charged. A Korean martial art distinguished by its emphasis on high and powerful kicks. Advanced-level kicking, punching, and blocking are emphasized.

#### T'ai Chi Chuan, Introduction to, and Intermediate

Fall and spring. Fee charged. Introduction to T'ai Chi, a system of graceful exercises that aim at nurturing relaxation, deep breathing, and improved circulation.

#### Outdoor Education Program

For further information, class schedules, or to register anytime, call 255–6183, or visit us online at www.coe.cornell.edu.

#### **Climbing Courses**

#### **Basic Rock Climbing**

Fall, spring, and summer. Fee charged. Six indoor climbing sessions at the Lindseth climbing wall.

#### **Basic Rock-Climbing, for Women**

Fall, spring. Fee charged. Six indoor climbing sessions at the Lindseth climbing wall taught by and for women.

#### **Basic Rock Climbing, for 24 and Over**

Fall. Fee charged. Non-credit course. Four indoor climbing sessions at the Lindseth climbing wall for people age 24 and older.

#### **High Adventure**

Fall, spring, and summer. Fee charged. Six sessions combining classes at the Lindseth climbing wall and the Hoffman challenge course.

#### Wellness Rock Climbing

Fall. Fee charged. Non-credit course. Seven one-hour climbing sessions at the Lindseth climbing wall for Wellness members only.

#### Intermediate Rock Climbing

Fall, spring. Fee charged. Six indoor sessions at the Lindseth climbing wall that introduce and practice more advanced climbing techniques.

# Introduction to Outdoor Climbing Seminar

Fall, spring. Fee charged. Non-credit course. Introduction to outdoor climbing techniques and equipment. Meets for one evening class and one full weekend day.

#### **Basic Outdoor Rock Climbing**

Fall. Fee charged. Includes fall break trip. Classes and a four-day climbing trip to the Shawangunks will introduce basic safety, techniques, equipment, and methods for outdoor rock climbing.

#### Intermediate Outdoor Rock Climbing

Fall, spring. Fee charged. Classes and two weekend trips to the Shawangunks to learn intermediate level climbing skills and top-rope systems.

#### Shawangunks Rock Climbing

Fall, spring. Fee charged. Four-day advanced climbing camp at the Shawangunks. Introduces advanced climbing techniques and systems for outdoor multipitch rock climbing. Includes fall break or senior week trip.

#### Southwest Advanced Rock Climbing

Spring. Fee charged. Includes spring break trip.

Classes and a one-week advanced rock climbing camp that takes place in the Southwest over spring break.

#### Cascades Mountaineering & Leadership Spring, Fee charged. Includes summer

spring. Fee break trip.

Classes and a three-week mountaineering and leadership expedition in the North Cascades of Washington state.

#### Adirondack Ice Climbing

Spring. Fee charged. Basic top-rope ice climbing instruction including a weekend trip to the Adirondacks.

## High Peaks Expedition

Fall. Fee charged. Includes winter break trip.

Classes and one week winter camping and ice climbing expedition in the Adirondacks.

#### Backpacking Courses

#### Adirondack Winter Camping

Spring. Fee charged. Classes covering basic winter camping

techniques, and two weekend trips in the Adirondacks.

#### Arizona Backpacking

Spring. Fee charged. Includes spring break trip.

Classes and a one-week backpacking trip that takes place in the Arizona desert over spring break.

#### **Adirondack Backpacking**

Fall. Fee charged. Includes winter break trip.

Classes covering basic camping techniques and equipment lead up to a backpacking trip over fall break.

#### **Backpacking in the Finger Lakes**

Fall, spring. Fee charged. Classes lead to two full weekends on local

trails. Focus is on basic skills and equipment.

#### Arizona Backpacking

Spring. Fee charged. Includes spring break trip.

Classes cover basic skills and prepare participants for a spring break trip to the Southwest deserts and canyons.

#### **Trail Maintenance**

Fall. Free with 100% attendence, otherwise fee charged.

Work with the local trails club to support and maintain trail systems.

#### Wilderness Survival Skills

Spring. Fee charged. Primitive living skills taught in two classes and a weekend backpack trip.

#### **Biking Courses**

#### Mountain Biking

Fall, spring. Fee charged. Six afternoons or four full days exploring local trails.

#### **Canoeing Courses**

#### Adirondack Canoe Camping

Fall. Fee charged. Includes fall break trip. Classes on basic canoeing technique. Break trip explores the beauty of the Adirondacks.

#### River Canoeing

Spring. Fee charged.

A sampler of beginning skills and equipment for canoeing.

# PHYSICAL EDUCATION AND ATHLETICS - 2002-2003

#### Whitewater Canceing

Fall. Fee charged. Basic whitewater skills and equipment ending in a full weekend of river paddling.

#### **Caving Courses**

#### Caving

Fall, spring. Fee charged. Learn about the basic safety, techniques, and equipment for caving, finishing with a weekend caving trip.

#### **Caving Seminar**

Fall, spring. Fee charged. Learn about the basic safety, techniques, and equipment for caving, finishing with a daylong caving trip.

#### **Hiking Courses**

#### Day Hiking

Fall, spring. Free with 100% attendence, otherwise fee charged. Six day outings in the Finger Lakes Region.

Gorgeous Gorges Day Hiking

# Fall. Fee charged.

Five weekend outings focusing on the gorgeous gorges in the local area.

#### Trail Running

Fall. Free with 100% attendance, otherwise fee charged.

Seven sessions covering warm-ups, basic trail running technique, and scenic local trails.

#### Snowshoeing

Spring. Free with 100% attendence, otherwise fee charged. Six day outings in the Finger Lakes Region.

## **Kayaking Courses**

#### Whitewater Kayaking

Fall, spring. Fee charged. Basic kayaking technique and equipment culminating in a full weekend of whitewater paddling.

#### **Pool Paddling**

Fall. Fee charged. Seven-session introduction to whitewater

kayaking skills in the Helen Newman pool.

#### **Sea Kayaking Touring** Fall. Fee charged.

Learn basic sea kayaking skills and enjoy two weekend outings.

#### 1,000 Islands Sea Kayaking

Fall. Fee charged. Includes fall break trip. Classes covering basic paddling techniques and equipment lead up to a kayaking trip over fall break.

#### Sea Kayaking the Coast of Maine

Summer. Fee charged. Classes covering basic paddling techniques and equipment lead up to a multi-day kayaking trip.

#### Kayak Rolling Seminar

Fall, spring. Fee charged. Non-credit course.

Learn kayak rolling technique in two evening sessions. Classes take place at the Helen Newman pool.

#### Introduction to Sea Kayaking Seminar Fall, spring. Fee charged. Non-credit

course.

Classes covering basic paddling techniques and equipment lead up to a weekend kayaking trip.

#### Sea Kayaking Bahamas

Spring. Fee charged. Includes spring break trip.

Learn paddling skills, natural history expedition planning, and have fun in the Bahamas!

# Introduction to Slalom Racing Seminar

Spring. Fee charged. Non-credit course. Classes covering basic whitewater techniques and equipment lead up to a weekend river trip.

#### Outdoor Leadership and Teambuilding Courses

#### **Outdoor Leadership**

Fall, spring. Fee charged. Includes fall or spring break trip.

Training course for outdoor education instructors culminating in a spring or fall break trip.

#### **Facilitating the Adventure Experience**

Spring. Free with 100% attendance, otherwise fee charged.

This experiential class challenges participants to explore the concept of facilitation. Each class member has the opportunity to develop their personal leadership style while gaining valuable interpersonal skills. Course time is balanced between indoor group initiatives and outdoor low and high elements at Cornell's Hoffman Challenge Course.

#### **First Aid Courses**

#### **Basic Wilderness Emergency Care**

Fall, spring, summer. Fee charged. Full weekend of wildemess first aid. Includes CPR certification.

#### Wilderness First Responder

Fall, spring. Offered in January, over winter break; offered late May/early June. Fee charged.

Ten days of instruction and practical application of backcountry first aid. Participants earn CPR and Wilderness First Responder certifications. Taught by Wilderness Medical Associates.

# **Skiing Courses**

#### **Cross-Country Skiing**

Spring. Fee charged. Three weekend days learning basic crosscountry skiing skills and exploring trails.

#### Cross-Country Skiing, for 24 and Over Spring. Fee charged. Non-credit course.

Spring. Fee charged. Non-credit course Four sessions learning basic cross-country skiing skills and exploring local trails.

#### **Telemark Skilng**

Spring. Fee charged. Four evenings at Song Mountain Ski Area.

### **Personal Growth Courses**

#### Body-Mind

Fall and spring. Activities are drawn from ancient Eastern practices as well as modern Western psychology, and are designed to give the student first-hand experience of the interaction between their own bodies and minds.

#### Introduction to Meditation

Fall and spring. Fee charged. This course provides the opportunity to explore a variety of ancient and modern methods designed to bring one to the state of meditation. The methods serve to evoke the deep relaxation from which heightened awareness and creativity arise.

#### **Meditation and Guided Imagery**

Fall and spring. Fee charged. The class meets twice a week for a session of guided meditation with imagery. Topics include quiet mind, progressive relaxation, safe space, health and wellness and enhancing learning. Students should have previous experience with meditation.

#### **Living Routines**

Fall and spring. Provides the opportunity to explore a variety of ancient and modern methods designed to bring one to the state of meditation.

## **Relaxation and Stress Management**

Fall and spring. Introduction to basic relaxation techniques for the reduction of everyday stress. Techniques will be taught that can be used in normal everyday living situations.

#### Swedish Massage

Fall, spring, and summer. Fee charged. Learn to give a relaxing, stress-reducing Swedish massage. You will master the basic strokes of Swedish massage and learn about their application to the different parts of the body. Students will use oils and lotions as a part of their training.

#### Introduction to Massage

Fall, spring, and summer. Fee charged. Provides an experiential introduction to several types of massage. Included are Swedish, shiatsu, polarity, and sports massage. Class members will participate in group exercises and practice on each other during class time. All exercises and techniques can be done while wearing street clothing.

#### Weekend Massage Workshop

Fall and spring. Fee charged. This introductory course in massage is taught in an intensive, weekend workshop format. It includes sessions on Friday evening and Saturday and Sunday during the day. Students are introduced to massage skills and techniques and practice on each other in a structured and supervised format. Basics of touch awareness, palpation skills, and techniques from Swedish and oriental (shiatsu) massage are taught. Students learn to massage the back, shoulders, neck, legs, feet, arms and hands to reduce stress. Professional massage tables are used.

#### Shiatsu Massage

Fall and spring. Fee charged. Gain an experimental understanding of your body and learn certain shiatsu massage techniques.

#### Yoga, Introduction to

Fall, spring, and summer (6 weeks). Fee charged.

Fundamentals of hatha-yoga. Covers basic postures, breathing techniques, and deep relaxation. Introduces chanting.

#### **Racquet Sports Courses**

#### **Badminton, Introduction to**

Fall and spring. Helen Newman Hall. Fundamental shots, scoring, and general play.

#### Badminton, Intermediate

Fall and spring. Helen Newman Hall. Review of fundamental shots, scoring, and general play.

#### **Racquetball, Introduction to**

Fall, spring, and summer. Fee charged. Instruction for beginners. Equipment is furnished. Protective eyewear required.

#### Squash, Introduction to

Fall, spring, and summer. Fee charged. Classes for appropriate level of play. Equipment is furnished. Protective eye wear required.

#### Tennis, Introduction to

Fall, spring, and summer. Fee charged. Basic skills taught include forehand, backhand, serve, and volley. Scoring methods taught.

#### Tennis, Intermediate

Fall, spring, and summer. Fee charged. Review basic strokes plus topspin and underspin. Doubles strategy emphasized.

#### Tennis, Advanced

Fall, spring. Fee charged. Advanced strokes and doubles play emphasized. Recommended for tournament players or those with previous team experience.

#### Tennis, Indoor-Recreational

Fall and spring. Fee charged. Play is conducted at the new Reis Tennis Center. Players must have high school or college tournament experience or a rating of 3.5 or higher from the USTA. Matches are played in both doubles and singles. Equipment furnished. NO BLACK-SOLE SHOES ALLOWED ON COURTS!

#### Sailing Courses

#### Small-Boat Sailing, Introduction to

Fall, spring, and summer (6 weeks). Fee charged. Learn basic skills necessary to sail small

sailboats and basic keelboats safely.

#### Small-Boat Sailing, Competitive

Fall and spring. Fee charged. Vanguard 420 sailboat used for the course. USYRA Rules Book used as a text for the course. Fee includes one-year membership in university sailing team program.

#### Water Skiing

Fall only. Fee charged. Introductory course for beginning water skiers. Classes will be conducted from East Shore Marina.

#### Skiing and Snow Boarding

# Downhill Skiing and Snowboarding

Spring. Fee charged. Transportation, instruction, ski-lift fees, and skiing time are offered in a package deal. Greek Peak and Song Mountain personnel are present at registration to explain the program and accept fees. Bus transportation to Greek Peak is provided six afternoons a week for six weeks.

Cross-Country Skling—See Outdoor Program.

#### **Target Shooting Courses**

#### Archery, Introduction to

Fall and spring. Fee charged. Two classes a week.

Instruction in the care of equipment; seven basic steps for shooting; scoring; practice shooting at 20, 30, and 40 yards.

#### Handgun Safety, Introduction to

Fall, spring, and summer (6 weeks). Fee charged.

Instruction in use of pistol in the three modes of 50-foot competitive target shooting—slow fire, timed fire, and rapid fire. Emphasis on safety and responsibility while firing.

#### Riflery

Fall and spring. Fee charged. Instruction and practice in the techniques of target riflery from various shooting positions.

#### **Trap and Skeet**

Fall, spring, and summer (6 weeks). Fee charged.

Includes lectures and shooting at the Tompkins County Rod and Gun Club range. Guns and shells are furnished.

#### **Team Sports Courses**

#### Basketball

Fall and spring. Fundamental drills in passing, shooting, and dribbling. Scrimmages each class session.

#### Ice Hockey, Introduction to

Fall and spring. Prerequisite: basic skating ability. Fee charged.

Stick handling, passing, and shooting are stressed. Some scrimaging. Students provide their own skates and sticks; all other equipment is furnished.

#### Ice Hockey, Intermediate

Fall and spring. Fee charged. Prerequisite: beginning hockey or previous participation in organized hockey.

This course is designed for the intermediate hockey player. Advanced techniques taught include positioning, power play, penalty killing, and offensive and defensive attack. Each session emphasizes game situations and scrimmaging. Skates and hockey sticks must be supplied by the participants.

#### Soccer Soring

Introduction to the game. Includes basic individual skills (passing, trapping, shooting) and team play and strategy.

#### Volleyball, Introduction to

Fall and spring. Fundamentals of ball handling, serves, defensive blocks, and position play are stressed. Classes will scrimmage.

#### Volleyball, Intermediate

Fall and spring. Passing and blocking strategy; scrimmages in class.

#### Volleyball, Advanced

Fall and spring. Offensive and defensive team strategy is emphasized in class scrimmages.

#### Weight Training Courses

#### **Principles of Weight Training**

Fall and spring. Fee charged. Introduces the proper use of olympic weights for improving physical condition and muscular strength. Instruction with focus on the relation between high-rep light weight lifting, low-rep heavy lifting, and the development of bulk, strength, and endurance.

#### Independent Study

#### **Independent Study**

#### Fall and spring.

Independent study is designed for those who have difficulty fitting any of the regularly scheduled courses into their academic program. Class activities will be based on personal fitness programs. A term paper is required. Permission to enter this program must be granted by the program director.

# SCHOOL OF CONTINUING EDUCATION AND SUMMER SESSIONS

Summer Sessions provides a wide variety of educational opportunities beyond the degreegranting programs of the university. These programs serve virtually all age groups in a great variety of formats and time frames. For information about the following programs, write B20 Day Hall, Ithaca, New York 14853–2801; call 255–4987; e-mail cusce@cornell.edu; or fax 255–9697; unless indicated otherwise below. You may also visit us on the web at www.sce.cornell.edu.

# SCHOOL ADMINISTRATION

Glenn C. Altschuler, dean

Charles W. Jermy, Jr., associate dean, and director, Cornell University Summer Session

Diane E. Sheridan, director, finance and administration

#### School Program Directors and Managers

Stuart M. Blumin, director, Cornell in Washington Program

Abby H. Eller, director, Cornell University Summer College

Christine Holmes, special programs manager Ralph Janis, director, Cornell's Adult University

# **School Support Services**

Graham Dobson, manager, information technologies

Carol L. Hall, assistant director, finance and administration

Ann L. Morse, media manager

Cathy M. Pace, registrar

# SPECIAL AND PROFESSIONAL PROGRAMS

Intensive learning experiences are presented year-round both for students and for professionals in many fields. Formats include for-credit courses of one to eight weeks and noncredit weekend and weeklong short courses. Programs can also be designed to respond to the needs and interests of corporations, professional societies, and other groups. These programs take place on the Cornell campus, on site, at other locations worldwide, and via distance learning. For information, call 255–7259; e-mail cusp@cornell.edu; fax 255–9697; or visit www.sce.cornell.edu/sp/.

# SUMMER COLLEGE PROGRAMS FOR HIGH SCHOOL STUDENTS

Talented high school sophomores, juniors, and seniors attend regular university courses through Cornell University Summer College and may earn college credit. They also explore academic and career options in noncredit seminars. Students live in residence halls, become familiar with campus life, and attend seminars describing the college admissions process. The program is designed to help ease the transition from high school to college. For information, call 255–6203; e-mail summer\_college@cornell.edu; fax 255–6665; or visit www.summercollege.cornell.edu.

# CORNELL'S ADULT UNIVERSITY

Cornell's Adult University (CAU) offers weeklong noncredit courses on campus for adults and families during the summer. During the fall, winter, and spring, there are weekend seminars, weeklong domestic programs, and international study tours. Developed and led by distinguished members of the Cornell faculty, all programs are inspired by the belief that learning never ends and that one of the roles of a great university is to provide a bridge between traditional formal education and informal, noncredit study. For information, write Cornell's Adult University, 626B Thurston Avenue, Ithaca, New York 14850-2490; call 255-6260; e-mail cauinfo@cornell.edu; fax 254-4482; or visit www.cau.cornell.edu.

# **DISTANCE LEARNING**

The School of Continuing Education and Summer Sessions offers a range of courses through distance learning. Instructional materials for these courses may be presented on the web, and/or through video tapes, assigned readings, e-mail sessions with course instructors, and CD-ROMs. Students interact with the instructor and other students by phone or e-mail. Courses may be taken from home or elsewhere. Assignments and examinations are completed within a scheduled session, just as in on-campus courses, but students have the option of beginning study prior to the start of the session. For information, visit www.sce.cornell.edu/dl/

**Cybertower** is an exciting, new online program that gives users access to many of Cornell's best teachers at any time and from virtually anywhere. CyberTower features Study Rooms on a wide range of topics. Each room offers video-streamed lectures, links to specially selected web sites, informative reading lists, and a place to chat with faculty and other Cornellians and CyberTower subscribers. Cybertower also features monthly faculty Forums on a variety of timely topics. For more information, visit the web site at cybertower.cornell.edu.

# EXTRAMURAL STUDY

Cornell undergraduate or graduate students whose studies have been interrupted may find it appropriate to resume their studies by taking classes on a part-time basis. Area residents may take courses on a part-time basis by registering as extramural students. Those interested may enroll in almost any course offered in the fall and spring terms if they receive the instructor's written approval. Another offering, the Visitor's Program. allows adults to attend classes in many divisions of the university on a space-available basis at a reduced charge. In this program, no credit is given, and no record is kept of attendance or performance. Visitors are required to obtain written permission from the instructor. For information, write to Extramural Study, B20 Day Hall, Ithaca, NY 14853-2801; call 255-4987; e-mail cusce@cornell.edu; fax 255-9697; or visit www.sce.cornell.edu/exmu/.

# WINTER SESSION

Cornell undergraduate and graduate students, as well as employees and area residents, can earn up to four credits between the fall and spring semesters by enrolling in the winter session. This quiet time on campus allows students to enjoy generally smaller classes and to concentrate on intensive study. Wintersession students may enroll in scheduled courses or design individualized study with a faculty member. For information, write to Winter Session, B20 Day Hall, Ithaca, NY 14853–2801; call 255–4987; e-mail cusce@cornell.edu; fax 255–9697; or visit www.sce.cornell.edu/ws/.

# CONTINUING EDUCATION INFORMATION SERVICE

This service provides free information, counseling, and referral to adults who have been out of school for several years and want to resume their education. It also provides information about short courses, workshops, professional updates, and executive programs offered by the university to people inside and outside Cornell. For information, write to Continuing Education, B20 Day Hall, Ithaca, NY 14853–2801; call 255–4987; e-mail cusce@cornell.edu; or fax 255–9697.

# CORNELL IN WASHINGTON PROGRAM

Cornell in Washington offers undergraduates the opportunity to combine the strengths of Cornell with all of the best parts of living and learning in Washington, D.C. Students take courses for credit, work as externs, and complete substantial research projects, all the while enjoying the rich opportunities available in the nation's capital. For information, write to Cornell in Washington, 311 Caldwell Hall, Ithaca, NY 14853–2602; call 255–4090; e-mail cwash@cornell.edu; or visit www.ciw.comell.edu.

# CORNELL UNIVERSITY SUMMER SESSION

The Cornell University Summer Session provides unique and unusually attractive opportunities for study and recreation at a time when the Cornell campus and the Finger Lakes region of central New York are at their loveliest and the Ithaca weather is at its best. Participants may choose from a wide spectrum of courses scheduled during three-, six-, and eight-week sessions. Although admission is open to persons of all ages, the majority of summer session participants are matriculated Cornell students. Classes meet daily, are generally small, and feature personalized interaction with Cornell faculty members. These courses also provide students with the opportunity to accelerate their degree program, take courses not available during the fall and spring semesters, and delve into areas of special interest. For information call 255– 4987; e-mail cusce@cornell.edu; or visit our web site at www.summer.cornell.edu.

#### **Summer Session Course Roster**

The Cornell University Summer Session offers a wide variety of courses. The list that follows includes those courses that are usually offered every summer. The list is not exhaustive; many new courses or courses offered only occasionally are not listed. For complete information, contact the Summer Session office. Courses are posted to the web (www.summer.cornell.edu) in the fall as the roster is developed. A preliminary course roster is available beginning in late November. If a course is also offered through distance learning, the course title will be followed by **DL**.

# THE COLLEGE

The College of Veterinary Medicine offers a professional program that requires four years of full-time academic and clinical study of the normal and abnormal structure and function of the animal body and the diagnosis, treatment, and prevention of animal disease.

Graduates of the college receive the Doctor of Veterinary Medicine (D.V.M.) degree, which is recognized by licensing boards throughout the world. Graduates generally enter private practice, academia, or become engaged in one of the increasing number of other biomedical activities.

Admission requires a minimum of three years of college work, including specific prerequisite courses and experience. Applications must be filed approximately one year before the proposed matriculation date. The competition for admission is keen, since there are many more qualified applicants than can be admitted.

Graduate programs in veterinary research and postdoctoral training in clinical specialties are open to Doctors of Veterinary Medicine and some highly qualified holders of baccalaureate degrees and lead to the degree of Master of Science or Doctor of Philosophy.

More detailed information is available electronically at the website of the College of Veterinary Medicine, http://zoo.vet.cornell.edu/.

Note: 500- and 600-level courses are open only to veterinary students except by written permission from the instructor.

The College of Veterinary Medicine revised its professional curriculum; course requirements apply to the class that matriculated in the fall of 1993 and to subsequent classes. Courses in the revised professional curriculum are designated with the prefix "VTMED" and

consist of two categories of courses: foundation courses and distribution courses.

# **The Professional Curriculum**

# FOUNDATION COURSES

In foundation courses I, II, III, and IV (VTMED 510, 520, 530, 540), students work in small groups under the guidance of a faculty tutor. Case-based exercises are used to facilitate the understanding of basic science concepts within the context of clinical medicine. On average, three to four 2-hour tutorial sessions are scheduled each week. These are complemented by lectures, laboratories, and discussion sessions or other organized learning opportunities specific to the individual course. Faculty are available to respond to questions that arise as a result of the case-based exercises.

Tutorial sessions and all other organized learning programs are usually scheduled during the mornings, thereby reserving the afternoons for independent study. By situating learning in a clinical context, students are better able to integrate material from the basic and clinical sciences and are encouraged to develop an understanding of the clinical reasoning process from the beginning of the curriculum. The tutorial-based educational format creates an atmosphere that requires students to be involved actively in their learning and allows them to develop skills in communication, information retrieval, and analysis.

Note: Courses listed in brackets [] are approved courses that are not offered during the 2002–2003 academic year.

#### VTMED 510 The Animal Body (Foundation Course I)

Fall. 12 credits. Limited to first-year veterinary students. Letter grades only. J. W. Hermanson and staff.

This course is designed to enable students to understand the principles of veterinary anatomy at the gross, microscopic, and ultrastructural levels. Developmental anatomy is emphasized to the extent that it reflects determination of adult form and species differences. Radiologic and related imaging techniques are used throughout the course to assist in the understanding of normal structural anatomy. Understanding of the anatomic basis of common surgical procedures is achieved during the various dissection procedures. The course is based on tutorials with significant emphasis on practical laboratories. Lectures and modules complement student learning.

#### VTMED 517 Animals, Veterinarians, and Society: Part A (Foundation Course VIIa)

Fall. 1 credit. Limited to first-year veterinary medical students. Letter grades only. A fee is charged for the course guide. J. W. Ludders.

This course complements and augments material learned in VTMED 510 (Block I—The Animal Body). The class is divided into small groups and each group meets for 3–4 hours each week during the first 11 weeks of the fall semester. Using the dog, cat, horse and cow as models for learning how to perform a physical examination, this laboratory course teaches the skills of observation, ausculation, palpation, and percussion, and related basic diagnostic procedures. The body systems are examined sequentially and follow the order of study in Block I.

#### VTMED 520 Genetics and Development (Foundation Course II)

Fall and spring. 8 credits. Limited to firstyear veterinary students. Prerequisite: VTMED 510 The Animal Body. Letter grades only. R. A. Levine and staff.

An appreciation of how gene expression and cell behavior contribute to normal animal development and health is crucial for our understanding of the pathogenesis of disease. Students gain an understanding of the cellular and molecular mechanisms that regulate development and maintain normal structure and function throughout the life of an animal. Emphasis is placed on defining and characterizing normal cellular behaviors and on understanding how mutations in specific genes promote disease. Students become familiar with the common molecular procedures being used to develop new diagnostic and therapeutic tools to maintain health and combat disease. Tutorial sessions are complemented by lectures, laboratories, and class discussions.

#### VTMED 521 Neuroanatomy and Clinical Neurology

Spring. 3 credits. Limited to first-year veterinary students. Letter grades only. A. deLahunta.

Fundamentals of functional neuroanatomy and diseases of the nervous system are taught so that each student is competent in the diagnosis of clinical neurologic disorders of domestic animals. This is a vertically integrated course that includes dissection of the central nervous system of the dog, the anatomic basis for the diagnosis of diseases of the nervous system, and the differential diagnosis of those diseases. Clinical cases with pertinent lesions are demonstrated with each system. Videotapes of clinical patients are used to demonstrate the clinical signs produced by the various diseases. Slides of gross and microscopic lesions are used to emphasize the clinical and neuroanatomic relationships and to stress characteristic features of representative conditions.

#### VTMED 527 Animals, Veterinarians, and Society: Part B (Foundation Course VIIb)

This course begins in the last part of fall semester and finishes at the end of winter session. 1 credit. Limited to first-year veterinary medical students. Prerequisite: VTMED 517 Animals, Veterinarians, and Society: Part A. Letter grades only. A fee is charged for the course guide. The lectures consist of one 2-hour session each week and the laboratories require 10 hours spread throughout the course. J. W. Ludders.

1. W. Ludders. This course consists of both lectures and laboratory sessions. Lectures partially complement materials learned in VTMED 520 (Block II—Genetics and Development), but for the most part focus primarily on veterinary medical ethical issues related to animal use, animal welfare, genetics counseling, and clinical day-to-day ethics. The laboratory portion of the course reviews basic equine and bovine husbandry skills and reviews the small animal physical examination. The lecture consists of one 2-hour session each week, and the laboratories require 10 hours spread throughout the course.

#### VTMED 530 Function and Dysfunction:

**Part I (Foundation Course IIIa)** Spring. 9 credits. Limited to first-year veterinary students. Prerequisite: VTMED 520 Genetics and Development. Letter grades only. R. Rawson and staff.

This course is designed to develop students' understanding of how an animal maintains itself as a functional organism; how this is achieved through the integration of different functional organ systems; how tissue structure relates to tissue function; how injury alters structure and leads to dysfunction, manifested as clinical signs; how organ function can be assessed; and how it can be modulated pharmacologically. The course incorporates aspects of physiology, biochemistry, cell biology, histology, pathology and histopathology, clinical pathology, and pharmacology.

#### VTMED 531 Function and Dysfunction: Part II (Foundation Course IIIb)

Fall. 7 credits. Limited to second-year veterinary students. Prerequisite: VTMED 530 Function and Dysfunction: Part I. Letter grades only. R. Rawson and staff. A continuation of VTMED 530 Function and Dysfunction: Part I.

#### VTMED 537 Animals, Veterinarians, and Society: Part C1 (Foundation Course VIIc1)

Spring. 1.5 credits. Limited to first-year veterinary medical students. Prerequisite: VTMED 527 Animals, Veterinarians, and Society: Part B. Letter grades only. A fee is charged for the course guide. J. W. Ludders.

This course complements aqnd augments material learned in VTMED 530 (Block III-Function and Dysfunction: Part I). The primary focus of this course is to introduce students to the interpersonal skills and techniques necessary for effective communication with clients. In addition, students will be introduced to career opportunities in veterinary medicine, alternative medicine, the human-animal bond, animal death, and grief counseling. This course gives students the opportunity to practice interviewing clients while refreshing their physical exam skills. The opportunity to gain an appreciation of the role of animal husbandry in veterinary medicine will be provided through a milking experience at the college's dairy barn.

#### VTMED 538 Animals, Veterinarians, and Society: Part C2 (Foundation Course VIIc2, continued)

Fall. .5 credit. Limited to second-year veterinary medical students. Prerequisite: VTMED 537 Animals, Veterinarians, and Society: Part C1. Letter grades only. A fee is charged for the course guide. L. W. Ludders.

This course complements and augments material learned in VTMED 531 (Block III— Function and Dysfunction: Part II), and is predominantly a laboratory course that provides a basic introduction to the clinical skills students will need when they enter clinics. There is a brief review of the physical examination of the dog, horse and cow. Clinical procedures include, but are not limited to: ear examination and treatment, injections, SQ fluid administration, diabetic monitoring, naso- and orogastric tube placement, urinary catheterization, and IV catheterization.

#### VTMED 540 Host, Agent, and Defense (Foundation Course IV)

Fall. 12 credits. Limited to second-year veterinary students. Prerequisite: VTMED 531 Function and Dysfunction: Part II. Letter grades only. J. Baines (course leader) and others.

This course is divided into six sections: the host response, intracellular environment, extracellular environment, somatic environment, external environment, and surrounding environment. Using this approach, students develop an understanding of the host response to insult, a familiarity with groups of important pathogens, an understanding of how pathogens manipulate the host and how the host defends itself against attacks, and an understanding of the roles played by the external environment and human intervention in the epidemiology of infectious organisms.

#### VTMED 547 Animals, Veterinarians, and Society: Part D (Foundation Course VIId)

Fall. 1.5 credit. Limited to second-year veterinary medical students. Prerequisite: VTMED 538 Animals, Veterinarians, and Society: Part C2. Letter grades only. A fee is charged for the course guide. J. W. Ludders.

This course complements and augments material learned in VTMED 540 (Block IV— Host, Agent and Defense). The course emphasizes the maintenance of health in individuals and populations, both animal and human, as well as managing and critically reviewing the veterinary medical literature. Topics include animal bites, nosocomial infections, rabies control programs, vaccines and vaccine reactions, zoonotic diseases, and preventative health care programs in large and small animals. The course emphasizes veterinary public health.

#### VTMED 550 Animal Health and Disease: Part I (Foundation Course V)

Spring. 10 credits. Limited to second-year veterinary students. Prerequisite: VTMED 540 Host, Agent, and Defense. Letter grades only. R. Hackett.

This course integrates the clinical sciences of medicine, surgery, anesthesiology, radiology, and theriogenology, which are themselves integrated subjects, with systems pathology and relevant aspects of applied pharmacology. The course is presented on a systems basis moving from clinical signs of alteration in function, to pathophysiology of clinical signs, to strategies for diagnosis and treatment. Specific examples are used to establish a cognitive framework and knowledge of the most important diseases. This course provides a sound foundation for clinical rotations in Foundation Course VI. It builds on the strengths developed in earlier courses by an increased exposure to case examples in a more directed way, taking advantage of the diversity of skills and special knowledge of both faculty and students. A variety of educational techniques are used, including lectures in which interaction is encouraged, laboratories, demonstrations, case discussions, and autotutorials.

#### VTMED 551 Animal Health and Disease: Part II (Foundation Course V, continued)

Fall. 20 credits. Limited to third-year veterinary students. Prerequisite: VTMED 550 Animal Health and Disease: Part I. Letter grades only. R. Hackett and staff.

A continuation of VTMED 550 Animal Health and Disease: Part I.

#### VTMED 557 Animals, Veterinarians and Society: Part E (Foundation Course VIIe1)

Spring. I credit. Limited to second-year veterinary medical students. This course continues in the fall semester as VTMED 558. Prerequisite: VTMED 547 Animals, Veterinarians, and Society: Part D. Letter grade only. A fee is charged for the course guide. J. W. Ludders.

This course complements material learned in VTMED 550 (Block V—Animal Health and Disease). In general, during the spring semester this course explores the topic of professional development while during the fall semester it covers topics concerning governmental regulation of veterinary medicine. More specifically, topics during the spring semester include informed consent, utilizing the veterinary team, reducing work place stress, and personal financial mangement. There is a laboratory component in which students spend a shift in the Intermediate Nursing Care (INC) unit in the Cornell University Hospital for Animals.

#### VTMED 558 Animals, Veterinarians and Society: Part E (Foundation Course VIIe2)

Fall. 1 credit—Class of 2005 ONLY. Limited to third-year veterinary students who have successfully completed Foundation Course VIIe1. Prerequisite: VTMED 557 Animals, Veterinarians, and Society: Part E1. Letter grade only. A fee is charged for the course guide. J. W. Ludders.

This course complements material learned in VTMED 551 (Foundation Course V—Animal

386

Health and Disease). The course examines governmental regulation of the veterinary profession, includng proper drug usage, extra label drug use (FDA), controlled substances (DEA), professional liability and malpractice insurance, professional and unprofessional conduct, hazardous materials in the workplace (OSHA), and environmental issues (EPA). Also included are sessions relating to the control and prevention of the spread of animal diseases and the role of USDA and specifically APHIS in these regulatory functions. The laboratory component consists of two nights in the Large Animal Clinic and a shift with the Small Animal INC team.

#### VTMED 560 Ambulatory and Production Medicine I

Fall, winter, spring and summer. Credit variable (either one or two credits). Required component of Clinical Rotations (Foundation Courses VI). Letter grades only. M. E. White and staff.

A total of 4 weeks of Ambulatory and Production Medicine are required. VTMED 565 is taken during the clinical rotations in the 3rd or 4th year. VTMED 560 is also generally taken during the third or fourth year, however first and second year students are encouraged to take one or two weeks of this course over winter recess or during the summer if slots are available. A lottery is done to assign first or second year students to the available slots. See VTMED 565 for course description.

#### VTMED 561 Community Practice Service—Medicine

Fall, winter, spring and summer. 2 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. W. E. Hornbuckle and staff.

The Community Practice–Medicine Service is structured to provide supervised clinical experience in the practice of small companion animal medicine. The course is conducted in the Small Animal Clinic of the Cornell University Hospital for Animals. Students interact directly with clients presenting their pet for primary medical care. Under the supervision of the clinical faculty and staff, the students are expected to formulate and carry out plans for the diagnostic evaluation and medical management of these patients. After review, students explain their plans to the clients and provide follow-up care and management of these patients.

#### VTMED 562 Surgery III

Fall, winter, spring and summer. 2 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. H. J. Harvey and staff.

Basic principles of anesthesiology and surgery are emphasized in the clinical rotation. Under direct staff supervision, students anesthetize and perform surgical procedures on patients presented to the Small Animal Clinic for neutering and minor elective procedures. Students are responsible for all aspects of patient care during their hospital stay and are expected to fully participate in client communications. Ordinarily, this course will precede Anesthesiology Service and Small Animal Surgery Service (soft tissue component).

#### VTMED 563 Small Animal Medicine

Fall, spring, winter, and summer. 4 credits. Required component of Clinical Rotations (Foundation Courses VI). Letter grades only. S. C. Barr, S. A. Center, J. F. Randolph, K. W. Simpson, and R. Goldstein.

The Small Animal Medicine Service is structured to provide supervised clinical experience in the practice of companion small animal medicine. The course is conducted in the Small Animal Clinic of the Cornell University Hospital for Animals. Students interact directly with clients presenting their pets for primary or referral medical care. Under the supervision of the clinical faculty and staff, the students are expected to formulate and carry out plans for the diagnostic evaluation and medical management of these patients.

#### VTMED 564 Small Animal Surgery Service

Fall, winter, spring, and summer. 4 credits. Required component of Clinical Rotations (Foundation Courses VI). Letter grades only. H. J. Harvey and small animal surgery faculty.

A clinical service rotation, this course exposes the student to the practice of surgery under hospital conditions. Students participate in the diagnostic techniques; planning of therapy; and daily care of dogs, cats, and exotic species under the direction of a faculty veterinarian. Students assist experienced surgeons in the operating room and, with house-officer supervision, are responsible for patients undergoing elective ovariohysterectomy or castration. Client communications and the basics of efficient practice are emphasized.

#### VTMED 565 Ambulatory and Production Medicine II

Fall, winter, spring, and summer. 2 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. M. E. White and staff.

A clinical service rotation in which students accompany ambulatory clinicians on farm and stable calls and learn the skills and procedures necessary for operation of a modern veterinary practice offering primary care to large animal clients. Routine herd health visits are conducted for cattle, horses, sheep, goats, and swine. Reproductive evaluations (including pregnancy and fertility examinations), nutritional evaluation, and disease prevention are stressed. Herd health programs also include vaccinations, parasite control, mastitis prevention, and routine procedures such as castration and dehorning. With appropriate herds, analysis of computerized performance data is conducted and discussed with the owner. In addition to assisting with routine scheduled work, students participate in diagnosis and medical or surgical treatment of ill or injured animals. This includes rotating assignments for night and weekend duty.

#### VTMED 566 Large Animal Medicine Service

Fall, winter, spring, and summer. 3 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. D. Ainsworth, T. Divers, and staff.

Students assigned to this service assist the faculty and house staff of the Large Animal Medicine service in the diagnosis and care of patients. The goal of this course is for students working on this service to acquire knowledge and skills in history taking, physical examination, election and completion of appropriate ancillary tests, diagnosis, treatment, and patient care. Daily rounds and discussions are used to monitor patient progress and further educate students.

#### VTMED 567 Large Animal Surgery Service

Fall, winter, spring, and summer. 4 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. A. J. Nixon and staff.

This clinical rotation is structured to provide supervised clinical experience in the practice of large animal surgery. Under the direction of faculty and house staff, students participate in the diagnosis, surgical treatment, and care of patients presented to the Large Animal Clinic. Training through patient care is supplemented by formal rounds and didactic instruction.

# VTMED 568 Anesthesiology Service

Fall, winter, spring, and summer. 3 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. R. D. Gleed, J. W. Ludders, P. F. Moon, and staff.

This course is designed to provide clinical experience in the use of anesthetics in small companion animals, horses, and some food animals. The students participate in selecting suitable anesthetic techniques for patients in the Cornell University Hospital for Animals and then implement those techniques under the supervision of faculty and residents. The goal is for students to learn the skills and thought processes necessary to perform safe anesthesia in a modern veterinary practice.

#### VTMED 569 Dermatology Service

Fall, winter, spring, and summer. 2 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. W. H. Miller and D. W. Scott.

During this clinical rotation, students participate in the diagnosis and management of skin disorders in small and large animals. Patients are examined by appointment and through consultation with other hospital services.

#### VTMED 570 Ophthalmology Service

Fall, winter, spring, and summer. 2 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. R. C. Riis, T. Kern, and N. Irby.

This course combines clinical experience with beginning skills in diagnostic ophthalmology. Students learn how to apply the ophthalmic diagnostic tests. A competent ocular examination is the goal of this rotation. Confidence in using direct and indirect ophthalmoscopes, slit lamps, tonometers, goniolenses, conjunctival cytology, and surgery comes with the practice provided by this rotation. Students are required to review the introductory orientation videotapes in the Autotutorial Center titled Ocular Examination I and II before the start of the rotation. This rotation provides surgical experience and consultations. A high percentage of the consultations are referral cases that usually challenge the service. Adequate routine case material is presented to prepare most students for practice.

#### VTMED 571 Pathology Service

Fall, winter, spring, and summer. 2 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. S. P. McDonough and staff.

This course involves the hands-on diagnostic necropsies of most mammalian species that are presented to the pathology necropsy room and of avian species that are admitted to the avian and aquatic animal medicine necropsy room. Students work in groups of three to five for the two-week rotation. Necropsies are performed under the guidance of pathology faculty and residents. Students prepare written reports of necropsies performed, review microscopic hematology and cytology slides, perform urinalyses, and discuss case studies.

#### VTMED 572 Radiology Service

Fall, winter, spring, and summer. 2 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. N. L. Dykes and staff.

A two-week clinical experience in the Imaging Section of the Cornell University Hospital for Animals. Students use radiographic, CT, ultrasonographic, and nuclear medicine imaging techniques to evaluate animal patients under treatment in the Hospital. Students obtain and interpret radiographic and ultrasonographic studies with guidance from radiology faculty and technical staff. Two 3hour laboratory sessions are given to allow hands-on experience in patient positioning and radiographic technique. An autotutorial teaching film file is used to familiarize students with radiographic examples of common diseases of large and small animal species. Small-group discussions are scheduled to present and discuss current cases. The safe use of x-ray-producing equipment and radioisotopes is discussed.

#### VTMED 573 Fourth-Year Seminar

Fall and spring. 1 credit. Required component of Clinical Rotations (Foundation Courses VI). First-, second-, and thirdyear students and all staff members are also invited and encouraged to attend. S-U grades only.

F. H. Fox, chair of the Senior Seminar Committee.

The aim of this course is to give the student the responsibility and opportunity of selecting and studying disease entity on the basis of a case or series of cases, or to conduct a shortterm, clinically oriented research project under the direction of a faculty member. In either case, an oral report is presented at a weekly seminar. A written report is also submitted at the time of the seminar. All participants are encouraged to foster an atmosphere in which discussion, exchange of ideas, and the airing of controversial opinions might flourish.

# DISTRIBUTION COURSES

Distribution courses comprise 30 percent of the curriculum and are usually scheduled during the first half of each spring semester. During the first two years, many of the distribution courses are oriented to the basic sciences. During years three and four, students have additional distribution course offerings from which to choose. Some emphasize clinical specialties, whereas others integrate basic science disciplines with clinical medicine and are co-taught by faculty representing both areas. Students from different classes have the opportunity to take many of these courses together.

Grades: Grading options for distribution courses are either letter or S-U.

#### VTMED 601 Anatomy of the Carnivore

Spring. 3 credits. Prerequisite: VTMED 510 The Animal Body or permission of instructor. First-, second-, third-, and fourth-year veterinary students; others by permission. Letter grades only. A. J. Bezuidenhout.

Carnivore anatomy is studied by detailed systematic and regional dissection of the cat, with comparison to the dog. Student dissection is supplemented with prosections, radiographs, and exercises focusing on surgical approaches. There are opportunities to dissect other carnivores, such as the ferret and the fox, depending on availability of specimens. The lectures augment the laboratory dissection and introduce the student to functional morphological comparative features in the Order Carnivore. Students do an independent research project on the carnivore species of their choice and give an oral presentation on this to the class.

VTMED 602 Anatomy of the Horse Spring. 3 credits. Prerequisite: VTMED 510 The Animal Body or permission of instructor. First-, second-, third-, and fourth-year veterinary students; others by permission. Letter grades only. K. Haussler.

This course is organized as a traditional anatomy course that relies primarily on students learning the anatomy of horses through hands-on dissection laboratories augmented by lectures and highlighted by clinical correlations. An understanding of anatomy that provides the foundation for surgery and is directly relevant to clinical practice is emphasized in the regional approach to dissection. Most lectures emphasize structural-functional correlations that are unique or important in the horse. Microscopic anatomy is integrated into the course in selected areas to lay a foundation for the later study of pathology or when it reinforces concepts of structure and function that are difficult to understand by a study of the gross anatomy alone (i.e., hoof). Student dissection cadavers are supplemented by skeletal materials, radiographs, models, preserved predissected specimens, and fresh specimens when they are available.

#### VTMED 603 Anatomy of the Ruminant

Spring. 3 credits. Prerequisite: VTMED 510 The Animal Body or permission of instructor. First-, second-, third-, and fourth-year veterinary students; others by permission. Letter grades only. 1 Hermanson

The regional anatomy of several ruminant species is covered using dissection laboratories, lectures, and large-group discussions. Functional consequences of structural modifications and anatomical features relevant to clinical practice are emphasized. Microscopic anatomy is correlated with gross anatomy when appropriate to relate structure to function and to provide a foundation for later study in pathology. Student dissection material is supplemented by skeletal materials, radiographs, models, predissected specimens, and postmortem specimens. Students are required to complete an independent study project on a relevant subject of their choice. Assessment includes written and practical examination

#### VTMED 605 Comparative Anatomy: Pattern and Function

Spring. 3 credits. Prerequisite: VTMED 510 The Animal Body. First-, second-, third-, or fourth-year veterinary students; others by permission. Letter grades only. L. A. Mizer. The goal of this course is to study anatomical variability among amniote (mammals, birds, and reptiles) and anomniote (amphibian and fish) species. This is accomplished by relating the anatomy of major organ systems in each species to a common basic pattern and considering the differences in a functional perspective. Five major systems are explored (integumentary, locomotory, cardiorespiratory, digestive, and urogenital) in a variety of species as available.

#### VTMED 606 Advanced Clinical Neurology

Spring. 1 credit. Prerequisite: VTMED 521 Neuroanatomy and Clinical Neurology. Third- and fourth-year veterinary students. Letter grades only. A del abunta

Letter grades only. A. deLahunta. The objective of this course is to further the experience and confidence of the student in the diagnosis and understanding of clinical neurological disorders. It continues their correlation of anatomy, physiology, and pathology in the diagnosis of diseases of the nervous system and the understanding of their pathogenesis. Neurological disorders that are not covered in the foundation course are considered here. The course is entirely based on case examples that are presented on videotapes and slides.

#### VTMED 607 The Literature and Subject Matter of Natural History

Spring. 1 credit. Minimum enrollment 10; maximum 20. First-, second-, third-, and fourth-year veterinary students; others by permission. S-U grades only. H. E. Evans.

This course is an introduction to classic and current natural history literature. Materials relating to the earth sciences and the biology of plants and animals from around the world are shown and discussed. Students are required to show and discuss a book that concerns natural history in a country of their choice, and submit a one-page book report for duplication. (A recommended reference text for this course is *The Cambridge Illustrated Dictionary of Natural History* by R. J. Lincoln and G. A. Boxshall, 1990).

#### VTMED 609 Anatomy and Histology of Fish

Spring. 2 credits. Minimum enrollment 4; maximum enrollment 6. First-, second-, third-, and fourth-year veterinary students, others by written permission of instructor. S-U grades optional. P. R. Bowser.

This course provides an overview of the diversity of anatomy and histology of fish. Students participate in lecture, discussion, and laboratory exercises to review the major organ systems. Extensive use of library resources for assigned readings is expected. Each student prepares a term project and makes one oral presentation.

#### [VTMED 610 Veterinary Aspects of Avian Biology

Spring. 1 credit. Minimum enrollment 10; maximum enrollment 60. First-, second-, third-, and fourth-year veterinary students; others by permission. Letter grades only. Offered even-numbered years; next offered spring 2004. G. V. Kollias.

An introduction to avian biology for veterinary students. The course includes lectures and laboratories involving avian evolution,
anatomy, physiology, and ecology. Emphasis is on the development of a strong foundation in avian biology that will be applied in VTMED 616 Diseases of Birds and VTMED 652 Avian Medicine and Surgery.]

### VTMED 611 Fish Health Management

Spring. 1 credit. Minimum enrollment 8; maximum enrollment 16. First-, second-, third-, and fourth-year veterinary students; others by written permission of instructor. S-U grades optional. Offered oddnumbered years. P. R. Bowser.

This course presents a summary of important diseases of fin fishes. Diseases covered are those of importance in commercial aquaculture as well as those encountered by the tropical fish hobbyist. The course is designed to provide the students with a knowledge base and hands-on diagnostic experience in diseases of fish. Each student prepares a term project and makes one oral presentation.

### [VTMED 612 Management of Aquarium Systems

Spring. 1 credit. Minimum enrollment 8; maximum enrollment 16. First-, second-, third-, and fourth-year veterinary students; others by written permission of instructor. S-U grades optional. Offered evennumbered years. P. R. Bowser.

This is a lecture and laboratory course dealing with procedures and practices involved in management of aquarium systems. Topics include water quality, types of aquarium filtration systems, fish health, fish nutrition, and general fish biology. A portion of the course requires independent work in aquarium system management. Each student prepares a term project and makes one oral presentation.]

### VTMED 613 Aquavet I: Introduction to Aquatic Veterinary Medicine

Four weeks of full-time instruction at Woods Hole, Massachusetts, immediately after the spring term. 4 credits. Maximum enrollment 24 students from Cornell University, the University of Pennsylvania, and other U.S. colleges and schools of veterinary medicine. Available, by a competitive application process, to veterinary and graduate students. S-U grades only. Course fee required. P. R. Bowser.

The course is sponsored by Cornell University, the University of Pennsylvania, and three marine science institutions at Woods Hole: the Marine Biological Laboratory, Woods Hole Oceanographic Institution, and Northeast Center of the National Marine Fisheries Service. It is designed to introduce veterinary students to aquatic animal medicine. The marine environment is described and visited on field trips in the Woods Hole area. Specific aspects of the comparative anatomy, physiology, nutrition, microbiology, pathology, and medicine of a variety of marine and freshwater species are discussed. Some emphasis is placed on systems of aquaculture. The specific diseases of a few selected species are presented as examples, including the diseases of a crustacean, a shellfish, a finfish, and marine mammals. The course is taught by an invited faculty of 35 individuals who are leaders in their respective fields of aquatic animal medicine. Students present seminars on appropriate topics.

### VTMED 614 Aquavet II: Comparative Pathology of Aquatic Animals

Two weeks of full-time instruction at Woods Hole, Massachusetts, immediately after the spring term. 2 credits. Prerequisites: formal course work in diseases of aquatic animals or appropriate experience and permission of instructor. Maximum enrollment 18. S-U grades optional. Course fee required. Available, by a competitive application process, to veterinary and graduate students. P. R. Bowser.

This course is sponsored by Cornell University, the University of Pennsylvania, and three marine science institutes at Woods Hole: the Marine Biological Laboratory, Woods Hole Oceanographic Institution, and Northeast Center of the National Marine Fisheries Service. It is an advanced course in the comparative pathology of aquatic invertebrates and vertebrates commonly used as laboratory animals. The material presented consists of discussions of the diseases of aquatic animals as well as extensive use of the microscope to examine the histopathology associated with these diseases. The course is taught by an invited faculty of 12 individuals who are leaders in their respective fields of aquatic animal medicine.

### [VTMED 615 Veterinary Medicine in Developing Nations

Spring. 2 credits. Maximum enrollment 20. First-, second-, third-, and fourth- year veterinary students; others by permission of instructor. S-U grades only. Normally offered odd-numbered years, but not offered in 2003. To be offered spring 2004. K. A. Schat.

Veterinary medicine has an important role to play in developing nations in developing and providing economical sources of animal protecting for human consumption and protecting ecological resources. This seminar course provides interested veterinary students with information on and insight into the multitude of complex issues facing U.S. veterinarians working in developing nations.]

### VTMED 616 Diseases of Birds

Spring. 2 credits. Minimum enrollment 10; maximum enrollment 80. Second-, third-, and fourth-year veterinary students. Letter grades only. G. V. Kollias and N. Abou-Madi.

This course is designed to introduce second-, third-, and fourth-year veterinary students to a basic and practical knowledge of the most common infectious and noninfectious diseases affecting a variety of avian species. The course emphasizes the latest diagnostic and control approaches. The course format is a combination of didactic lectures and discussions.

### [VTMED 620 Molecular Biology and immunology of Host-Parasite Interactions (also VETMI 702)

Spring. 2 credits. First-, second-, third-, and fourth-year veterinary students, others by permission of the instructor. Letter grades

only. Offered even-numbered years. Staff. The primary objective of this lecture course is to make the student aware of the most important areas of research in contemporary parasitology. Lectures focus on a broad range of parasites, with an emphasis on those of medical importance. Recently published research articles and reviews are used as the basis from which to explore the issues of host invasion, evasion of host defense mechanisms by parasites, vaccination against parasitic infections, chemotherapy, drug resistance, vector biology, and molecular diagnosis.]

### VTMED 622 Foreign Infectious Diseases of Animals

Spring. 1 credit. Minimum enrollment 20. Second-, third-, and fourth-year veterinary

students. Letter grades only. D. H. Schlafer. This course describes the etiology, pathogenesis, clinical signs, gross pathology, differential diagnosis, methods of spread, reservoir hosts, and control of foreign animal diseases that present serious economic threats to the United States. The format is student seminar presentations with each student responsible for presenting one seminar. The recent spread of FMD, West Nile and BSE emphasize the importance these diseases have to producers, consumers, and practicing veterinarians. Ordinarily the course also includes presentations by college faculty and research scientists working on foreign infectious diseases.

### VTMED 624 Feline Infectious Diseases

Spring. 1 credit. Minimum enrollment 10; maximum enrollment 80. Second-, thirdand, fourth-year veterinary students. Letter grades only. S. C. Barr.

The course consists of two 50-minute lecture periods a week for eight weeks. The letter grade is obtained entirely from the result of a written examination (usually multiple choice format) given in the final period. The course emphasizes the clinical aspects of feline infectious diseases common to cats in North America and complements knowledge acquired in Blocks IV and V. The overall objective is to provide details about specific infectious diseases a future small animal practitioner may need to know to effectively diagnose and treat diseases. Etiology, epidemiology (prevalence and transmission), pathogenesis, clinical findings, diagnosis, pathologic findings, therapy prevention, and public health considerations are emphasized. Most lectures are presented from a clinician's point of view and therefore the material is oriented towards practical skills in managing clinical cases.

### VTMED 625 Osteoarthritis

Spring. 1 credit. Maximum enrollment 16. Graduate and second-, third-, and fourthyear veterinary students. Letter grades only. G. Lust.

This course provides a basis at the molecular, cellular, and tissue levels for understanding the function of mammalian diarthrodial joints. It includes a description of a diarthrodial joint and the composition and metabolism of articular cartilage, subchondral bone, ligaments, meniscus, capsule, and synovium. The interrelationships of synovium, synovial fluid, articular cartilage, joint lubrication, biomechanical considerations, and enervation are considered. Canine hip dysplasia is a focus during the early class sessions. The osteoarthritis that is associated with canine hip dysplasia serves as a basis for discussion of the etiopathogenesis of the disease. Canine osteoarthritis is emphasized, but the disease in animal models such as mice, guinea pigs, rabbits, and sheep is mentioned. Therapies, such as nonsteroidal anti-inflammatory drugs, glucocorticoids, and others may be discussed.

### VTMED 626 Epidemiology of Infectious Diseases

Spring. 1 credit. Maximum enrollment 8. Second-, third-, and fourth-year veterinary students. Letter grades only. H. Mohammed and staff.

This course introduces the epidemiologic methods used in infectious disease investigations. The importance of surveillance systems in detecting modern epidemics and in the

### VETERINARY MEDICINE - 2 2-2003

development of effective disease prevention and control strategies are also discussed. An emphasis is placed on understanding the relationships between the host, the agent, and the environment as they relate to disease causation. The course explores contemporary epidemiologic methods applicable to old diseases that remain real or potential problems, newly emerging infectious diseases, and nosocomial infections. Selected diseases are discussed to clarify the role of epidemiology in understanding the pathogenesis of infectious processes in individuals and groups of animals. Students have the opportunity to apply the methods learned to actual disease problems and write an epidemiologic report that might lead to a publication in a peerreviewed scientific journal.

### [VTMED 627 Diseases of Antiquity

Spring. 1 credit. Second-, third-, and fourth-year veterinary students. Letter grades only. Not offered 2003. Staff. This is a study of 36 human and animal diseases that have had profound effects on the course of human history from the beginning of recorded time to the present. This course combines aspects of literature, medicine, and history and explores the interactions between demographics, commerce, imperialism, medical care, the environment, and disease. Prevailing superstitions and religious views are considered in context with each illness and simultaneously occurring world events.]

### VTMED 628 Clinical Pathology

Spring. 2 credits. Minimum enrollment 20; maximum enrollment 60. Second-, third-, and fourth-year veterinary students. Letter grades only. Staff.

This six-week course addresses a range of issues related to laboratory medicine and interpretation of laboratory results. General topic areas include hematology, clinical chemistry and immunology, and urinalysis. The primary mode of instruction is studentdriven small-group (untutored) exploration of case materials followed by faculty-moderated large-group discussions. Selected lectures and laboratory sessions supplement and expand on issues generated by the case discussions. This course builds on concepts previously addressed in Block III and IV and also provides additional experiences in practical clinical pathology procedures and microscopy.

### VTMED 630 Clinical Biostatistics for Journal Readers

Spring. 1 credit. Minimum enrollment 4; maximum enrollment 12. First-, second-, third-, and fourth-year veterinary students; others by permission of instructor. Letter grade. H. N. Erb.

Students will become familiar with the statistical methods commonly used in veterinary clinical articles, and able to recognize obvious misuse of those methods, and are taught to interpret the statistical results.

### VTMED 631 Clinical Diagnostic Parasitology

Fall and spring. 0.5 credit. Prerequisite: VTMED 551. Third- and fourth-year veterinary students. S-U grades only. TBA with Dr. Frongillo, D. D. Bowman and M. K. Frongillo.

This course provides a chance to perform diagnostic parasitology methods using samples obtained from ongoing clinic cases. Students attend eight 1-hour sessions as they rotate through the ambulatory, community practice, and pathology rotations. In the ambulatory service (four sessions with students), diagnostics concentrates on the laboratory examination of samples from large animal cases that have been observed during the previous week. In the Community Practice Service, one hour concentrates on the examination of samples from ongoing cases, while a second hour consists of a discussion of the treatment of common endo- and ectoparasites. The two hours spent as part of the pathology rotation examine methods of recovering parasites from pathology specimens, including the examination of wet preparations and the digestion of tissues for parasite recovery. The course is considered to be a logical extension to the foundation course Host, Agent, and Defense and is expected to build on the didactic material presented in Large and Small Animal Parasitology.

### VTMED 632 Senior Seminar

Fall and spring. 1 credit. First-, second-, and third-year veterinary students. S-U grades only. Must be completed in two consecutive terms (either fall to spring or spring to fall). R. O. Gilbert.

Attendance at 14 of the senior seminar sessions presented during the academic year constitutes acceptable completion of this course. This course does *not* fulfill the 1-credit Set VII minimum.

### VTMED 633 Introduction to Nontraditional Companion and Laboratory Animals

Spring. 1 credit. First-, second-, third-, and fourth-year veterinary students. Letter grades only. Staff.

This course is both laboratory and lecture based and deals with a wide variety of nontraditional species, other than dogs or cats, that might be brought into a small-animal practice. These can be either companion or laboratory animals and include rodents, lagomorphs, other small mammals, reptiles, amphibians, birds, fish, goats, sheep, potbellied pigs, primates, and llamas. Instruction in restraint and handling, breeding, husbandry, and general management information is provided for each species. This is followed, where possible, by laboratory sessions for observation, restraint, and physical examination.

### [VTMED 635 Introduction to the Professional Literature

Spring. 1 credit. Minimum enrollment 6; maximum enrollment 20. First-, second-, third-, and fourth-year veterinary students. Letter grades only. Not offered 2003. D. Lee.

This course introduces veterinary students to the professional and biomedical literature, including development of critical reading skills. Students become familiar with the broad range of professional and biomedical literature and are encouraged to develop a rigorous approach to journal and scientific article review. Secondary emphasis is on developing skills in library and bibliographic search techniques, as well as exploring the use of veterinary-related on-line information.]

#### VTMED 637 Introduction to Community Practice Service

Fall, winter, spring, and summer. 1 credit. First- and second-year veterinary students by permission of instructor. S-U grades optional. W. E. Hornbuckle. This course introduces veterinary students to primary care small-animal clinical practice through direct exposure to the Community Practice Service of the Cornell University Hospital for Animals. Students observe and assist with restraint, examination and routine treatment of pets, and communication with clients. Successful completion requires satisfactory participation during 10 half-days of clinical service.

### VTMED 638 Physiological Nutrition Spring. 1 credit. Minimum enrollment 10;

Spring. 1 credit. Minimum enrollment 10; maximum enrollment 90. Second-, third-, and fourth-year veterinary students; others by permission of instructor. Letter grades only. F. A. Kallfelz.

This course provides information on the evaluation and formulation of rations for large and small animals. These concepts are applied in discussion on the nutrition requirements of these animals during maintenance, gestation, lactation, growth, stress, and aging. The course is recommended for all second-year veterinary students who do not have a strong background in ruminant, equine, canine, and feline nutrition. This course, or its equivalent, is necessary for comprehension of clinical nutrition concepts in Foundation Course V.

### VTMED 640 Veterinary Aspects of Captive Wildlife Management

Spring. 2 credits. First-, second-, third-, and fourth-year veterinary students. Letter grades only. G. V. Kollias.

This course concentrates on principles of captive wildlife management, both clinical and nonclinical. Students are challenged to learn and integrate a variety of disciplines that are essential to managing wildlife successfully in a captive or semi-free-ranging environment. These disciplines include but are not limited to: species-specific (1) behavior and behavioral requirements, (2) nutritional requirements and problems, (3) natural history, (4) zoonotic and toxicological problems, (5) manual restraint and anesthesia, (6) preventive medicine, and (7) medical and legal ethics. In even-numbered years the course emphasizes non-North American wildlife species (examples include African, Asian, Australian, and Central and South American species), and in odd-numbered years the course focuses more on the North American (native) wildlife species.

### VTMED 641 Approaches to Problems in Canine Infectious Diseases

Spring. 1 credit. Minimum enrollment 10; maximum enrollment 80. Second-, third-, and fourth-year veterinary students. Letter grades only. S. C. Barr.

The course consists of two 50-minute lecture periods each week for eight weeks. The letter grade is obtained entirely from the result of a written examination (usually multiple choice format) given in the final period. The course emphasizes the clinical aspects of the more common canine infectious diseases. The overall objective is to provide details about specific infectious diseases a future small animal practitioner may need to know to effectively diagnose and treat these diseases. Clinical signs, presentation, clinicopathologic data, diagnostic choices, treatment plans, and prevention are emphasized. Most lectures are presented by clinical faculty and therefore the material is oriented toward practical skills in managing clinical cases.

### VTMED 642 Management of Fluid and Electrolyte Disorders

Spring. 2 credits. Minimum enrollment 20; maximum enrollment 40 per section. Second-, third-, and fourth-year veterinary students. Letter grades only. V. Cook. Students focus on clinical manifestations and the pathophysiologic mechanisms associated with fluid, electrolyte, and metabolic acid base disturbances in domestic animals. The course is divided into segments dealing with salt and water imbalances, potassium abnormalities,

### VTMED 643 Fundamental Aspects of Embryo Transfer

mixed acid-base disturbances.

metabolic acidosis, metabolic alkalosis, and

Spring, 1 credit. Maximum enrollment 16. Enrollment is done by lottery. Third- and fourth-year veterinary students or graduate students by permission of instructor. S-U grades only. Staff.

This course introduces the theory and practice of embryo transfer in domestic animals. Topics include: background, advantages and disadvantages, superovulation, embryo recovery techniques, embryo culture and manipulation, embryo transfer techniques, registration of offspring, import and export, and related topics in assisted reproductive technologies. Students are exposed to practical techniques of embryo transfer in cattle, small ruminants, horses, and swine. The course consists of lectures, demonstrations, and laboratory classes during which students practice techniques of embryo recovery, evaluation, handling, and transfer.

### VTMED 644 Equine Surgical and Anesthetic Techniques

Winter. 1 credit. Prerequisite: VTMED 602 Anatomy of the Horse. Minimum enrollment 3; maximum enrollment 21. Enrollment is done by lottery. Third- and fourth-year veterinary students. S-U grades only. S. L. Fubini (coordinator) and other large-animal surgeons.

This course consists of five laboratories performing surgical procedures on ponies and cadaver specimens. It is the intent of this course not to make the students proficient in these procedures but to familiarize them with some specialized surgical techniques and to make them more enlightened referring practitioners. The course, therefore, is intended for students anticipating equine practice after graduation. This course is offered during a one-week period over winter intersession.

### VTMED 645 Food Animal Surgical and Anesthetic Techniques

Winter. 1 credit. Prerequisite: VTMED 603 Anatomy of the Ruminant. Minimum enrollment 6; maximum enrollment 21. Third- and fourth-year veterinary students. S-U grades only. Enrollment is done by lottery. S. L. Fubini and other large-animal surgeons.

This course consists of five laboratories performing surgical procedures on sheep, calves, cadaver specimens, and adult cattle. It is the intent of this course not to make the students proficient in these procedures but to familiarize them with surgical techniques and to make them more enlightened referring practitioners. The course, therefore, is intended for students anticipating food animal practice after graduation. This course is offered during a one-week period over winter intersession.

### VTMED 646 Liama Tutoriai

Fall, spring, summer. 1 credit. Prerequisite: VTMED 540. Second-semester second-, third-, or fourth-year veterinary students. S-U grades only. Independent study. M. C. Smith.

This autotutorial or group tutorial course covers common problems of llamas and alpacas. Participants are provided with study guides consisting of brief case descriptions and sample study questions. Reference is made to textbooks, journal articles, videotapes, and (if available) a teaching llama or alpaca to assist students in finding the answers to the questions efficiently. Grading is based on an oral exam.

### VTMED 647 Poisonous Plants

Fall. 1 credit. First-, second-, third-, and fourth-year veterinary students; others by permission of instructor. S-U grades only. R. Hillman and M. Smith.

Field trips demonstrate toxic plants growing in natural or cultivated settings. Lectures address economically important poisonous plants native to the United States. Information presented includes plant identification, natural habitat, toxic principles, clinical signs of toxicity, and treatment and prevention of poisoning in animals. Some of the major toxic principles found in plants and considered in detail in the course are nitrates, cyanide, oxalates, photodynamic agents, alkaloids, and mycotoxins.

### VTMED 648 Clinical Management of Native Wildlife

Fall, spring, summer (credit given in fall). 1 credit. Enrollment not to exceed 20 students per semester, 2 students per rotation. First-, second-, third-, and fourthyear veterinary students by permission of instructor. Letter grades only. G. V. Kollias and staff.

This course introduces veterinary students to primary native wildlife care and to wildlife issues that practicing veterinarians face on a daily basis. Students are responsible for the assessment, physical examination, and medical care of native wildlife presented to the Cornell University Hospital for Animals by the public and local wildlife rehabilitators. Student activities are directly supervised and assessed by faculty wildlife clinicians on a daily basis. Successful completion of the course requires 40 hours of satisfactory supervised participation per semester in the clinic. Clinic times are appropriately scheduled throughout the semester. Students are required to submit two case summaries before the end of the semester and a log of their clinical hours.

### VTMED 649 Introduction to Equine Practice

Spring. 0.5 credit. Maximum enrollment 30. First- and second-year veterinary students. Letter grades only. R. Hackett and C. Collyer.

This is an introductory course in equine husbandry intended for students with little or no experience working with horses. Lecture topics include horse breeds and colors, housing facilities and fencing, and overview discussions of the racing, showing, and breeding industries. Laboratories emphasize basic equine handling and restraint as well as feeds and bedding.

### VTMED 652 Avian Medicine and Surgery

Spring. 2 credits. Minimum enrollment 20; maximum enrollment 40. Third- and fourth-year veterinary students. Letter grades only. G. V. Kollias and staff. This course is designed to introduce third- and fourth-year veterinary students to the principles and practice of clinical avian medicine and surgery. The course is taught in a basic didactic lecture and discussion format with laboratories that reinforce concepts presented in the lectures.

### VTMED 653 Advanced Equine Lameness

Spring. 1.5 credits. Minimum enrollment 7; maximum enrollment 21. Third- and fourth-year veterinary students. Enrollment is done by lottery. S-U grades only. N. Ducharme, B. Woodie, and staff.

This course is designed to help students understand the methodology and to develop the manual skills required for lameness examination in horses. Emphasis is on developing diagnostic skills. Specifically, students are expected to develop proficiency in the identification of clinical characteristics associated with recognized lamenesses and to localize the origin of the lameness. Teaching aids include video modules outlining various gait abnormalities. In addition, horses with specific gait abnormalities will be available for physical, radiographic, and ultrasonographic examination.

### VTMED 654 Current Therapy in Equine Reproduction

Spring. Lec, 1 credit; lab, 0.5 credit. Lab minimum enrollment 12; maximum enrollment 24. Laboratory enrollment is done by lottery, if oversubscribed; concurrent enrollment in lecture is required. Third- and fourth-year veterinary students. Letter grades only. D. H. Volkmann.

This course covers advanced aspects of equine reproductive physiology. Reproductive management of mares and stallions using natural and artificial breeding strategies is discussed. Diagnosis, treatment, and prevention of common reproductive disorders are stressed. The laboratory component builds on skills acquired during Foundation Courses and provides experience in techniques important in equine theriogenology.

### VTMED 655 Production Animal Theriogenology

Spring. Lec, 1 credit; lab, 1 credit. Lab, minimum enrollment 12; maximum enrollment 24. Laboratory enrollment is done by lottery. Concurrent enrollment in Production Animal Theriogenology Lecture is required. Third- and fourth-year veterinary students. Letter grades only. Staff.

This course deals with specific reproductive disorders of production animals. Content includes reproductive biology of production animals, pregnancy diagnosis, treatment of infertility, medical, and surgical approaches to management of reproductive disorders. The course also covers related topics in assisted reproductive technologies such as semen freezing, artificial insemination and embryo transfer. Laboratory sessions are tailored to acquisition of specific skills fundamental to the practice of theriogenology of production animals. Emphasis is on dairy cows.

### VETERINARY MEDICINE - 2002-2003

### VTMED 656 Special Problems in Equine Medicine

Spring. 1.5 credits. Minimum enrollment 10; maximum enrollment 30. Enrollment is done by lottery. Third- and fourth-year veterinary students. S-U grades only. T. Divers and staff.

This course is intended for students who plan to or may enter equine practice. In-depth study of important diseases, review of recent literature, health management, and hands-on procedures or demonstrations are the core of this course.

### [VTMED 657 Disorders of Large Animal Neonates

Spring. 1 credit. Minimum enrollment 10; maximum enrollment 100. First-, second-, third-, and fourth-year veterinary students. Letter grades only. D. Ainsworth.

The common medical problems of foals and calves, with emphasis placed on the neonatal period, are discussed. Specific topics examined in detail include disorders affecting the respiratory, gastrointestinal, and musculoskeletal systems. Students also spend several hours in the neonatal intensive care unit providing medical care of hospitalized patients under staff supervision.]

### VTMED 659 Equine Soft Tissue Surgery

Spring. 1 credit. Minimum enrollment 6; maximum enrollment 24. Third- and fourth-year veterinary students. Enrollment is done by lottery. Letter grades only. R. Hackett and staff.

This course, intended for students anticipating equine practice after graduation, builds on material presented in the foundation courses to provide supplemental instruction in surgical disorders of the horse. Lectures are case based and emphasize disorders likely to be encountered in equine practice (colic, traumatic injuries, upper respiratory tract disorders, prepurchase examination). Laboratories emphasize diagnostic and therapeutic procedures in which an entry-level equine practitioner should be competent.

### VTMED 661 Surgical Pathology

Spring, summer, fall. Variable 1–2 credits. Second-, third-, and fourth-year veterinary students with permission of instructor. Letter grades only. S. McDonough.

This one- or two-week course (approximately eight hours per day for one credit per week) provides hands-on experience in the Surgical Pathology Service of the Department of Biomedical Sciences. Working with the attending pathologist, students examine tissue specimens histologically, propose diagnoses, and discuss their interpretations. Students may enroll in this course only through the Office of Student Records within the official add/drop period. All requests to enroll must be accompanied by the Supplemental Enrollment Form indicating Dr. McDonough's approval of the enrollment and the amount of credit to be awarded. Second-year students should not enroll for any term other than summer unless they have actually reserved a January or spring break slot through Dr. McDonough.

### VTMED 665 Medical and Surgical Problems of Dairy Cattle—Emphasis on the Individual Animal

Spring. 1.5 credits. Minimum enrollment 6; maximum enrollment 28. Enrollment is done by lottery. Third- and fourth-year veterinary students. Letter grades only. S. Fubini and staff. This course provides students with a special interest in dairy practice the opportunity for in-depth discussions of special problems in bovine medicine and surgery. Emphasis is on case discussions, physical examination techniques, and ethical and practical matters. The course emphasizes individual cow treatment.

### VTMED 666 Small Animal Clinical Oncology

Spring. 1 credit. Third- and fourth-year veterinary students. Letter grades only. R. L. Page.

This course presents the common cancers affecting small animals. Emphasis is placed on biological behavior and patient management. Surgery, chemotherapy, and radiation therapy as important methods to treat cancers in small animals are discussed. Course format includes lectures.

### VTMED 667 Special Problems in Small Animal Medicine

Spring. 1 credit. Minimum enrollment 10; maximum enrollment 40. Third- and fourth-year veterinary students. S-U grades

only. J. Randolph (coordinator) and staff. During the four-week course, students work through selected problems in small-animal medicine in 2-hour weekly seminars. The focus is on the medical problems associated with cases using historic, clinical, clinical pathologic, and pathologic findings to elucidate basic pathophysiologic principles of disease. The overall objective is to give future small-animal practitioners skills in the approach to clinical problems with specific emphasis placed on history taking, clinical signs and examination skills, assessment of clinical pathology data and diagnostic materials (radiographs, ultrasounds), treatment plans, and prevention. The course expands knowledge gained in Foundation Course V and, under the instruction of a clinical faculty member, is aimed at facilitating the use of that knowledge into the practical skills of managing clinical cases.

### VTMED 668 Practice Management

Spring. 2 credits. Number of sections will be determined by enrollment. Second-, third- and fourth-year veterinary students. S-U grades only. D. Lee.

Course participants form a veterinary group practice that includes the specialties of each person's interest. Topics are presented and discussed in the staff meeting format of the practice. Topics include basic practice organization, leadership styles, career planning, communication skills, facility management, human resource management, maintenance of standards, marketing and merchandising, building and maintaining clients, practice growth, finances, computing systems and information management, money management, legal issues and insurance, professional relations and responsibility, and maintaining an acceptable quality of life, including stress management. Various practitioners and practice managers speak to the group about their very different successful practices, concentrating on management and organizational skills.

### VTMED 669 Sheep and Goat Medicine

Spring. Lec, 1 credit; lab, 0.5 credit. Lab, concurrent enrollment in Sheep and Goat Medicine Lecture is required. Third- and fourth-year veterinary students. S-U grades only. M. Smith.

This course discusses diagnosis, treatment, and prevention of medical and surgical problems of individual small ruminants and of sheep and goat herds. Basic information on breeds, behavior, nutritional requirements, and management systems is supplied. Economically important contagious or metabolic diseases are discussed in depth. The diagnostic evaluation and differential diagnoses for common clinical presentations such as skin disease, neurologic disease, lameness, and mastitis are considered. Herd monitoring of economically important parameters and necropsy diagnosis of abortions and neonatal losses are addressed. Breeding systems, pregnancy diagnosis methods, and correction of dystocias are discussed and demonstrated in optional laboratory sessions.

### VTMED 670 Drug Handling in the Body Spring. 0.5 credit. Maximum enrollment 60.

Spring. 0.5 credit. Maximum enrollment 60 Second-, third-, and fourth-year veterinary students. Letter grades only. R. A. Cerione and G. A. Weiland.

This course provides an in-depth consideration of the pharmacological principles of administration, adsorption, distribution, metabolism, and elimination of drugs. Emphasis is on the conceptual basis of the pharmacokinetic considerations in the therapeutic use of drugs. The course builds on the pharmacological and physiological principles introduced in Foundation Course III

### VTMED 671 Autonomic Pharmacology

Spring. 0.5 credit. Maximum enrollment 80. Second-, third-, and fourth-year veterinary students. Letter grades only. G. A. Weiland. This course provides an in-depth consideration of the pharmacological and physiological principles of autonomic pharmacology. Molecular, cellular, and organ system mechanisms are emphasized. The course explores in more detail the fundamental pharmacological and physiological principles of the effects of drugs on autonomic organs introduced in Foundation Course III.

### VTMED 672 Antimicrobial Drug Therapy in Veterinary Medicine

Spring. 1 credit. Second-, third-, and fourth-year veterinary students. Letter grades only. W. S. Schwark.

The objective of this course is to familiarize students with antimicrobial drugs used in veterinary practice. The course builds on fundamental pharmacological and microbiological principles covered in Foundation Courses III and IV and considers antibacterial, antifungal, antiparasitic, and anticancer drugs from the point of view of unique pharmacokinetic properties, indications for clinical use, and potential toxicities as the basis for rational use.

### VTMED 676 Clinical Ophthalmology

Spring. 0.5 credit. Third- and fourth-year veterinary students. S-U grades only. R. Riis, N. Irby, and T. Kern.

The principles and practice of entry-level veterinary ophthalmology introduced in Block V, Introduction to Veterinary Ophthalmology, are supplemented by lectures and discussions that emphasize species differences, basic surgical decision-making, and recognition of ocular conditions appropriate for referral.

### VTMED 677 Dairy Production Medicine Fall, 2 credits. Minimum enrollment 6: maximum enrollment 14. Third- and fourth-year veterinary students. S-U grades only. C. Guard.

This is an intermediate course in the techniques and procedures used by veterinarians in modern dairy practice. Many of these activities fall outside the traditional boundaries of medicine, surgery, and theriogenology and might include housing, facilities, manure management, and employee education. Data analysis, disease and productivity monitoring, and evaluation of deviations from targeted performance are used to plan cost-effective interventions or corrections, followed by continued surveillance to monitor their effect. Students are introduced to the dominant software currently used in dairy management. Local dairy herds serve as additional laboratories for class projects.

### VTMED 678 Small Animal

**Therlogenology** Spring. 1 credit. Third- and fourth-year veterinary students. Letter grades only. D. H. Volkmann.

This is a distribution course in a lecture-based format designed to complement the knowledge gained in the theriogenology component of Foundation Course V, Animal Health and Disease. Content includes discussion of breeding management, infectious and noninfectious causes of infertility and pathology of the male and female reproductive tracts, their diagnosis and management. The emphasis of the course is on conditions affecting dogs and cats.

### VTMED 679 Clinical Pharmacology

Spring. 0.5 credit. Third- and fourth-year veterinary students. S-U grades only. W. S. Schwark.

This course is offered after Blocks I-V and formal exposure to pharmacology course work is completed. The course is designed to familiarize students with drug use in the clinical setting and uses ongoing cases in the teaching hospital as a teaching tool. Pharmacological concepts are emphasized, with a focus on the rationale for drug choice. alternative drug choices available, pharmacokinetic considerations, and potential drug interactions/toxicities. This course is offered at the time students are about to embark on their clinical rotations. It is designed to emphasize practical aspects of pharmacology in the clinical setting, using basic concepts obtained during formal course work. The onus is placed on the student to explain/rationalize drugs employed in clinical cases in the teaching hospital.

### VTMED 680 Behavior Problems of Horses

Spring. 1 credit. Prerequisite: one semester of veterinary curriculum. First-, second-, third-, and fourth-year veterinary students. S-U grades only. K. A. Houpt.

The goal of this course is to give veterinary students the ability to treat the behavior problems of horses. History-taking, counseling, diagnostic tests, follow-up, the importance of cooperation with the referring veterinarian, prevention of behavior problems, training techniques of value to the practitioner, and socialization of foals are presented.

### VTMED 681 Behavior Problems of Small Animals

Spring, 1 credit. Prerequisite: one semester of veterinary curriculum. First-, second-, third-, and fourth-year veterinary students.

S-U grades only. K. A. Houpt. The goal of this course is to give veterinary students the ability to treat the behavior problems of cats and dogs. History-taking, counseling, and follow-up methods are presented. Each student has the opportunity to participate in three cases. Behavioral and pharmacological treatments for behavior problems are presented.

### VTMED 682 Topics in Veterinary **Emergency and Critical Care** Medicine

Spring. 1 credit. Minimum enrollment 10. Third-, and fourth-year veterinary students, all others need instructor approval. S-U grades optional. N. Dhupa.

This course provides an introduction to emergency and critical care medicine. It is designed to have one to three topics per week. Although most of the lectures are based on small animal cases, the same principles apply to both large animal and small animal situations. Topics that might be covered include: triage, shock, emergency fluid therapy, cardiac and pulmonary emergencies, transfusion medicine, acute renal failure, endocrine emergencies, sepsis, acute abdomen, nutritional support, common toxicology problems, emergency surgical procedures (chest tubes, tracheotomies), and basic and advanced cardiopulmonary resuscitation. When two courses (i.e. section "A" and "C") are offered in the same year, the same topics are covered in each course.

### [VTMED 685 Physiology of Pregnancy

Spring. 2 credits. Maximum enrollment 20. Second-, third-, and fourth-year veterinary students. Letter grades only. P. W. Nathanielsz.

This course is presented in lecture fashion. One major reference per lecture is assigned each week. Subjects covered are placental function, fetal growth, central nervous system development, fetal breathing, biorhythms in maternal and fetal physiology, parturition, and adaptations to newborn life.]

### VTMED 689 Fundamentals of Ruminant **Digestion and Metabolism**

Spring. 0.5 credit. Minimum enrollment 5; maximum enrollment 50. First-, second-, third-, and fourth-year veterinary students; selected graduate students by permission of instructor. Letter grades only. T. R. Houpt.

This course is designed for the student who has little or no previous course work in ruminant digestive physiology. It consists primarily of lectures surveying: the functional aspects of control of feed intake; salivation; reticuloruminal motility, including rumination and eructation; microbial flora and fauna; fermentation in reticulorumen (digestion of carbohydrates, proteins and fats); ruminal gas formation; absorption of short-chained fatty acids; special features of ruminal nitrogen metabolism; passage of nutrients to lower tract: and a brief consideration of the functions of omasum, abomasum, and small and large intestines. Emphasis is on the differences of the ruminant digestive processes from those of the simple-stomached animals.

#### [VTMED 690 Molecular and Genetic **Basis of Inherited Disorders in** Animals and Application to Clinical Medicine

Spring. 2 credits. Minimum enrollment 5; maximum enrollment 15. First-, second-, third,- and fourth-year veterinary students; graduate and undergraduate students also welcome. Letter grades only. Offered evennumbered years. J. Ray.

This course introduces the molecular basis of inherited diseases in domestic animals. Topics include: several inherited metabolic defects causing systematic malfunctions; muscle and bone abnormalities; retinal degeneration; and failure of the immune systems. Techniques to characterize genes and mutations. Use of molecular techniques for diagnosis and prevention. Use of molecular tools for the treatment of inherited disorders.]

### [VTMED 692 Current Concepts in **Reproductive Biology (also BIOAP** 757)

Fall. 3 credits. First-, second-, and thirdyear veterinary students or appropriate undergraduate/graduate training. Letter grades only. Lec, 2 hours each week; disc, 2 hours each week; T R 10:10-12:05. Offered odd-numbered years. J. Fortune, W. R. Butler, and staff.

This is a team-taught survey course in reproductive physiology/endocrinology. Lectures are given by a number of reproductive biologists on various aspects of male reproductive function (endocrine regulation, testis function, spermatogenesis, and sperm physiology/function); female reproductive function (endocrinology, ovarian development and function, oocyte physiology/function); fertilization and early embryo development: pregnancy; parturition; puberty; and reproductive technology. Students participate in the form of discussions and/or presentations.]

#### VTMED 695 Genetic Basis of Eye Diseases

Spring. 1 credit. Minimum enrollment 5; maximum enrollment 14. First-, second-, third-, and fourth-year veterinary students.

Letter grades only. G. Aguirre. This course covers the molecular and genetic basis of inherited eye diseases in domestic and laboratory animals. It is aimed at the professional student in the veterinary curriculum but is open to graduate-level students. The course is given in a combination lecture/seminar format, with students leading and actively participating in discussions. The students are expected to do assigned and independent outside research, both for class discussions and the paper.

### VTMED 696 Fundamental Principles and **Techniques of Small Animal** Anesthesia: Dogs, Cats, and Birds.

Spring. 1 credit. Minimum enrollment 15. Third- and fourth-year veterinary medical students. J. W. Ludders, R. D. Gleed, P. F. Moon, and L. P. Posner.

This course is designed for the veterinary medical student interested in small-animal practice. The course consists of lectures, case discussions, and development of anesthetic protocols for routine and complicated cases. Subjects to be covered include: anesthetic management for elective and emergency surgery, management of the high-risk patient, fluid therapy, drug interactions, pain management, and the management of anesthesia-related complications, cardiopulmonary resuscitation, and post-anesthetic

management. While fundamental concepts and recent advances in anesthesia are discussed, the practical application of anesthetic principles and techniques are a major objective of the course.

394

### [VTMED 697 Fundamental Principles of Large Animal Anesthesia: Equine and Mixed Animal Practice

Spring. 1 credit. Minimum enrollment 15. Third- and fourth-year veterinary medical students. Not offered 2003. R. D. Gleed, J. W. Ludders, P. F. Moon, and L P Posner

This course is designed for the veterinary medical student interested in equine or mixed animal practice. The course consists of lectures, case discussions, and development of anesthetic protocols for routine and complicated cases. Subjects to be covered include: anesthetic management for elective surgery, field anesthesia, management of the high-risk patient, fluid therapy, drug interactions, pain management, and the management of anesthesia-related complications, cardiopulmonary resuscitation, and post-anesthetic management. While fundamental concepts and recent advances in anesthesia are discussed, the practical application of anesthetic principles and techniques is a major objective of the course.]

## VTMED 698 Special Projects in

**Veterinary Medicine** Fall, winter, spring, summer. Variable 1–4 credits. Must be arranged with a College of Veterinary Medicine tenure-track faculty member. S-U grades optional.

This course provides the opportunity for students to work individually with a faculty member to pursue an area of particular interest and, typically, not part of the established curriculum. Specific course objectives and course content are flexible and reflect the scope and academic expertise of the faculty.

### VTMED 699 Research Opportunities in **Veterinary Medicine**

Fall, winter, spring, summer. Variable 1-4 credits. Must be arranged with a College of Veterinary Medicine tenure-track faculty member. S-U grades optional.

This course provides the opportunity for individual students to work in the research environment of faculty involved in veterinary or biomedical research. Specific course objectives and course content are flexible and reflect the specific research environment. Research projects may be arranged to accumulate credit toward requirements in Distribution Sets I, II, III, IV, and V.

### VTMED 700 Large Animal **Theriogenology Service**

Spring. 2 or 4 credits. Prerequisite: VTMED 551. Maximum enrollment 4 per rotation. Third- and fourth-year veterinary students. Letter grades only. D. H. Volkmann and staff.

Two week exposure to clinical procedures in large animal theriogenology as provided by CUHA patient load and augmented by teaching herd(s) (equine and bovine) animals.

### VTMED 701 Cardiology Service

Fall and spring. 2 credits. Prerequisite: VTMED 551. Minimum enrollment 1 per rotation; maximum enrollment 2. Thirdand fourth-year veterinary students. Letter grades only. S. Moise.

The purpose of the cardiology rotation is to provide students with the opportunity to put into practice what they have learned in the foundation years. The management of the most common cardiac diseases is emphasized including congestive heart failure, arrhythmias, and secondary cardiac diseases. All species are examined, large and small, although the majority are small animals. Diagnostics, including cardiovascular physical examination, electrocardiography, radiography, and echocardiography, are taught. The rotation includes clinical work, didactic teaching, and self-initiated digging for information.

### VTMED 702 Laboratory Animal Medicine

Fall and spring. 2 credits. Prerequisite: VTMED 551. Maximum enrollment 4 per rotation. Third- and fourth-year veterinary students. Letter grades only. M. Bailey and staff.

The practice of laboratory animal medicine requires a combination of preventive programs, clinical skills, knowledge of various species' biologies, familiarity with research methodology, and acquaintance with state and federal regulations. This course is offered as a two-week introduction to that specialty. Students accompany laboratory animal veterinarians on clinical rounds of Cornell's research animal housing and participate in laboratory diagnostic work. Review sessions are conducted on the biology, medicine, pathology, and husbandry of rodents, rabbits, and primates and on current legislation regulating the care and use of research animals. The course may include a field trip to the research animal facilities of Rockefeller University, the Cornell University Medical College, Marshall Farms, and the Laboratory of Experimental Medicine and Surgery in **Primates** 

### VTMED 703 Clinical Wildlife, Exotic, and Zoo Animal Medicine

Fall, winter, spring, summer. 2 credits. Prerequisite: VTMED 551. Maximum enrollment 2 per rotation (plus one intern). Third- and fourth-year veterinary students.

Letter grades only. G. V. Kollias and staff. This course introduces students to primary medical care of nontraditional pet species, zoo animals, and native wildlife. Students, directly supervised by the attending clinician, are responsible for the assessment, physical examination, and medical management of exotic animal species presented to the Cornell University Hospital for Animals. Other opportunities available to assist in the development of clinical skills in wildlife, zoo and exotic animal medicine include the wildlife clinic cases, ongoing wildlife research and service projects, and trips to the Rosamond Gifford Zoo. Successful completion of the course requires satisfactory performance during this 14-day clinical rotation.

### VTMED 704 Quality Milk

Fall or spring. 2 credits. Prerequisite: VTMED 551. Third- and fourth-year veterinary students. Letter grades only. R. Gonzalez, Y. Schukken, D. Wilson and staff.

This course covers the causes, diagnosis, treatment, and prevention of bovine mastitis. The role of management practices is stressed. The course includes lectures, readings, discussions, laboratory exercises, and farm visits as part of the Quality Milk Production Services. Participants are expected to complete a case study on a dairy farm with udder health problems and present their

findings to the producer and farm personnel. Grading is on performance during the course and a final exam.

### VTMED 705 Special Opportunities in **Clinical Veterinary Medicine**

Fall, spring, and summer. Prerequisite: VTMED 551. Third- and fourth-year

veterinary students. S-U grades only. This course provides opportunities for students finished with Foundation Course V to explore professional areas not available through the regular curriculum. Blocks of two to four weeks are usually spent at other teaching hospitals, research laboratories, or zoological facilities. Student proposals are submitted to the associate dean for academic programs for review and approval. On-site supervisors of the block act as ex-officio faculty members and are required to evaluate each student formally.

### VTMED 707 Poultry Medicine and **Production Rotation**

Fall. 2 credits. Prerequisite: VTMED 551 and VTMED 616, Diseases of Birds, is recommended. Third- and fourth-year veterinary students. K. A. Schat.

This course is a two-week rotation that takes place at the University of St. Hyacinthe or the University of Guelph in alternating years. The course provides students with an introduction in practical poultry medicine by a combination of lectures, discussions, and laboratory sessions including postmortem examinations. Students also visit hatcheries, broiler, layer, and turkey farms.

### VTMED 708 Clinical Oncology

Fall and spring. 2 credits. Prerequisite: VTMED 551. Maximum enrollment 4 per rotation. Third- and fourth-year veterinary

students. Letter grades only. R. Page. Management and prevention of cancer in companion animals represents a significant component of the practice of veterinary medicine. The focus of this clinical rotation is the development of a comprehensive set of skills necessary for a veterinarian to become an advocate for the client/patient with cancer. These skills include appropriate initial evaluation of animals with cancer, sensitive and effective client and referring veterinarian communication, ability to access relevant information from numerous sources related to cancer management, understand and apply principles of surgical, medical, and radiation oncology as well as techniques specifically related to minimize pain and treatment-related effects in cancer patients.

#### VTMED 720 Issues and Preventive **Medicine in Animal Shelters**

Spring. 1 credit. Prerequisite: VTMED 540. Minimum enrollment 5; maximum enrollment 30. Second-, third-, and fourthyear veterinary students. Letter grades only. J. M. Scarlett and staff from the American Society for Prevention of Cruelty to Animals.

Veterinarians often work for or with animal shelters, serve on shelter boards of directors, are community resources for issues relating to companion animal welfare, participate in spay and neuter programs, and influence the quality of the human-animal bond. This course addresses the history of the humane movement, role of the veterinarian in relation to shelters, preventive and palliative health management (including highlighting diseases of major concern), issues surrounding euthanasia, reasons for relinquishment,

programs for behavior modification, and the legal concerns of shelters. These issues are addressed using lectures and large group discussions.

### VTMED 721 Timely Topics in Veterinary Parasitology: Large Animal

Spring. 0.50 credits. Minimum enrollment 2. Third-, and fourth-year veterinary

students. S-U grades only. D. D. Bowman. This course presents an in-depth look at one or a few parasites of special interest relative to large-animal medicine. The course presents details of taxonomy, biology, epidemiology, clinical presentation, and preventive and curative treatment. Efforts are made to discuss those aspects of the disease as it relates to the practical control of these and in-depth coverage of primary literature relating to the parasite being discussed. Topics vary annually. The course is presented in a lecture/ discussion format.

### VTMED 722 Timely Topics in Veterinary Parasitology: Small Animal

Spring, 0.5 credits. Minimum enrollment 2. Third- and fourth-year veterinary students. S-U grades only. D. D. Bowman.

This course presents an in-depth look at one or a few parasites of special interest relative to small-animal medicine. The course presents details of taxonomy, biology, epidemiology, clinical presentation, and preventive and curative treatment. Efforts are made to discuss those aspects of the disease as it relates to the practical control of these and in-depth coverage of primary literature relating to the parasite being discussed. Topics vary annually. The course is presented in a lecture/ discussion format.

### [VTMED 723 Bacteria and Fungi in Veterinary Medicine

Spring. 2 credits. Minimum enrollment 8; maximum enrollment 80. Second-, third-, and fourth-year veterinary students. Letter grades only. D. P. Debbie.

This course provides an overview and listing of important bacterial and fungal diseases of domestic animals (cow, horse, sheep, pig, goat, dog, cat) in preparation for medicine courses. The etiology, pathogenesis, host response, and prevention are emphasized. Avian, zoonotic, and exotic (foreign animal) bacterial and fungal diseases are covered in less detail because they are covered in other courses. The course also provides insight into diagnostic procedures for bacterial and fungal diseases such as available tests, what samples to take, how to handle samples, and how diagnostic procedures are performed.]

### VTMED 726 Reptile Medicine and Surgery

Spring. 1 credit. Minimum enrollment 10; maximum enrollment 40. Third-, and fourth-year veterinary students. Letter grades only. G. V. Kollias.

This course is designed to introduce third- and potentially fourth-year veterinary students to the principles and practices of reptile medicine and surgery. The course is taught in a basic lecture and discussion format with laboratories (limited) reinforcing concepts presented in the lectures.

### VTMED 730 Vaccines: Theory and Practice

Spring. 1 credit. Prerequisite: introductory course in immunology or VTMED 540 or VETMI 315. Minimum enrollment 10; maximum enrollment 40. Second-, third-, and fourth-year veterinary students and graduate students; others by permission of instructor. Letter grades only. Grades based on a final examination and one term report. Offered odd-numbered years. T. Clark.

This course provides an overview of vaccines used in clinical practice, as well as an in-depth look at vaccine development. Emphasis is placed on the most recent advances in vaccine design and delivery, including the use of recombinant DNA techniques for targeting specific immunological responses. Lectures touch on vaccines commonly used in veterinary practice and address in detail the use of carriers, adjuvants and immunostimulants; attenuated pathogens; synthetic peptides; recombinant subunit vaccines; viral and bacterial vectors for vaccine delivery; synthetic antibodies; and genetic immunization with "naked" DNA.

### VTMED 732 Veterinary Clinical Toxicology

Spring, 1.5 credits. Second-, third-, and fourth-year veterinary students. S-U grades optional. L. Thompson and

K. Earnest-Koons. This course provides the veterinary student with a solid introduction to concepts and principles of toxicology and how they are

principles of toxicology and how they are applied in the clinical setting. Students learn about specific common toxicants, clinical signs in affected animals, and treatment protocols for the toxicants in question. Students also gain an understanding of the clinical approach to suspected or unknown toxicoses, sample collection and handling, and resources available for clinical toxicologic problems. The course is conducted with two 1-hour lectures per week and one hour-long large-group discussion per week. The class meets two days per week, the first day for one hour and the second day for two hours. Grades are based on weekly quizzes, a final exam, a short paper and/or oral participation.

### VTMED 733 Selected Infectious Diseases of Swine

Spring. 1.5 credits. Minimum enrollment 6; maximum enrollment 80. Second-, third-, and fourth-year veterinary students. S-U

grades optional. K. Earnest-Koons. This course provides veterinary students with a solid introduction to concepts and principles of swine infectious diseases and how they are treated in the clinical setting. Students learn about specific infectious diseases, clinical signs in affected animals, and treatment protocols for the diseases in question. Students also gain an understanding of the clinical approach to suspected or unknown infectious agents, sample collection and handling, and resources available for infectious disease diagnosis. The course is conducted with two 1-hour lectures per week and one hour-long large-group discussion per week. The class meets three days per week for one hour each. Grades are based on weekly quizzes, a final exam, a short paper and/or oral presentation.

#### VTMED 735 Special Topics in Ambulatory and Production Animal Medicine

Fall, winter, spring, and summer. Variable 1–2 credits. Prerequisite: VTMED 560. Enrollment is done by lottery. Second-, third-, and fourth-year veterinary students. Letter grades only. M. E. White and staff.

This course provides specialized experiences in the Ambulatory and Production Medicine Service. The course consists of participation in scheduled and emergency farm calls and completion of projects designed to provide experience in herd problem solving, records analysis and implementing herd-health programs. Clinical service assignments are planned to meet individual student goals. Examples of focus areas available include livestock production medicine, dairy reproductive examinations, small-ruminant medicine, and equine ambulatory practice.

### VTMED 736 Veterinary Diagnostic Imaging: Anatomy and Interpretation

Spring. 1.5 credits. Minimum enrollment 20; maximum enrollment 50. First- and second-year veterinary students by permission of instructor. Third- and fourthyear veterinary students. Letter grades only. P. Scrivani.

The course is designed to emphasize the relevance of a solid foundation in veterinary anatomy as it clinically applies to diagnostic imaging. Additionally, the course is designed to provide students with an understanding of the strengths and limitation of diagnostic imaging by discussing interpretation principles, pitfalls and interpretations, and measurements obtained through lectures, laboratory exercises, weekly quizzes, and reading assignments. Integration of these objectives culminates in weekly laboratory exercises where students must make or evaluate decisions regarding patient management based on evaluation of clinical signs and imaging examinations. The "Roentgen-Sign" approach to diagnostic imaging interpretation is used as a model.

### VTMED 737 Principles of Pathology

Spring. 1.5 credits. Minimum enrollment 6; maximum enrollment 40. Second-, third-, and fourth-year veterinary students. Letter grades only. S. McDonough and K. Earnest-Koons.

Principles of Pathology is intended for students who wish to strengthen and broaden their knowledge of the pathologic basis of disease. Fundamental biologic processes as revealed by gross and microscopic pathologic changes are emphasized. Molecular mechanisms are integrated into the discussion where appropriate. General pathologic processes are organized into a logical and uniform system in order to facilitate comprehension and learning with particular attention paid to definition and proper usage of terminology. The course includes two lectures per week and a onehour large-group discussion. The large-group discussion allows students to apply general knowledge gained in lecture to a specific problem. Approximately half of the largegroup discussions are held in the Necropsy Teaching Laboratory using actual diseased organs for illustration of general pathologic principles.

### VTMED 738 Veterinary Parasitology

Spring. 2.5 credits. First-, second-, third-, and fourth-year veterinary students. Letter grades only. D. D. Bowman

This course provides a basic introduction to animal parasites of veterinary importance, concentrating mainly on the biology, control, and diagnosis of protozoan and metazoan parasites. Emphasis is given to parasites representative of significant disease processes or of significant clinical importance to veterinarians. The course elaborates on the biology and pathogenesis of these major pathogens with the ultimate goal being to maximize the recognition of the major disease manifestations induced by the different groups of organisms. Laboratories stress certain aspects of some important parasite groups.

### VTMED 739 Viruses in Veterinary Medicine

Spring, 1.5 credits. Maximum enrollment 90. Second-, third-, and fourth-year veterinary students. Letter grades only. Offered odd-numbered years. C. R. Parrish and J. Baines.

This course is designed to supplement the information provided in the Foundation Courses, particularly courses IV and V. The objective is to provide, in a survey form, an overview of the major groups of viruses which infect animals, and to give a summary of the diseases that they cause. The diseases which are most commonly encountered in veterinary practice are given the greatest amount of the available time, and diseases which are less frequently seen are given less detailed coverage. The properties of the viruses, their general pathogenic mechanisms, diagnostic methods, and some specific examples are covered.

### VTMED 740 Veterinary Perspectives on Pathogen Control in Animal Manure

Spring. 2 credits. Third- and fourth-year veterinary students. Letter grades only. D. D. Bowman.

This course presents an in depth look at the management of pathogens in animal manures. It reviews the pathogens involved, the role of governing agencies, the survival of pathogens in the field, and methods of pathogen destruction. The course discusses commercial methods of manure processing for the control of these pathogens for the protection of other animals and the human population. The course concludes with class discussions with major stakeholders representing the dairy, beef, pork, and poultry industries and their understanding of the problem as it relates to veterinary students.

### VTMED 745 Dynamics of Dairy Herd Health and Management

Spring. 1 credit. First-, second-, third-, and fourth-year veterinary students. Letter grades only. Y. T. Grohn and L. D. Warnick.

Competitive pressure, increasing input costs, and comparatively stagnant milk and salvage values require dairy producers to become more efficient. The current trend of increasing herd size drives changes in management. Dairy cattle are handled in groups, although individual cow health and productivity fundamentally underpin the financial success of the dairy enterprise. Veterinarians are called upon to advise dairy producers not only in matters of herd health but increasingly in matters of productivity and management decision making. Identifying opportunity areas to improve productivity and ultimately profitability requires modern veterinarians to recognize and solve complex and interdependent milk production, reproduction, and health issues. Until the advent of the new

veterinary curriculum, biological systems were often taught in isolation. Yet there are research models that integrate the dynamic nature of dairy production, health, management, and economics through epidemiological and economic modeling. Despite the existence of such advanced research models. they have not been integrated fully into the curriculum. The goal of this course is to teach students the dynamic relationships of herd performance parameters with dairy herd health and management. This is done with a combination of lectures and exercises using two computer simulation models. The following topics are addressed: (1) how often production diseases occur and when, (2) how they are interrelated, (3) the impact of disease on milk production, reproductive performance, and risk of culling, and (4) how to use this information in production medicine. The format of this eight-week course (two days per week) is a lecture one day and hands-on work with computer simulation models on the other day.

### **Biomedical Sciences**

### VTBMS 346 Introductory Animal Physiology (also BIOAP 311) (Undergraduate)

Fall. 3 credits. Prerequisites: BIOG 105, BIOG 106, or BIOG 101, BIOG 102, BIOG 103, BIOG 104, BIOG 107, BIOG 108; CHEM 207, CHEM 208, or CHEM 206, or CHEM 215, CHEM 216; MATH 106, MATH 111 or MATH 191 or AP credit for any of the above; or one year of college-level biology, chemistry, and mathematics. S-U grades optional. E. R. Loew.

A general course in animal physiology emphasizing principles of operation, regulation, and integration common to a broad range of living systems from the cellular to the organismal level. Structure-function relationships are stressed along with underlying physical-chemical mechanisms.

### **VTBMS 600** Special Projects in Anatomy Fall, spring. 1 credit per 2.5-hour period.

Fall, spring. 1 credit per 2.5-hour period. By permission of instructor. S-U grades only. Biomedical science staff.

### VTBMS 628 Graduate Research in Animal Physiology (Graduate) (also BIOAP 719)

Fall, spring. 1–3 credits. By written permission of department chairperson and faculty mentor who will supervise the work and assign the grade. S-U grades optional.

Similar to Biological Sciences 499 but intended for graduate students who are working with faculty members on an individual basis.

### VTBMS 700 Predictions of Form or Phiogeny

Spring. 1 credit. By permission of instructor. S-U grades optional. I. W. Hermanson.

Form and function are often discussed as a correlated entity in biology. This seminar group starts with the question, Does form really predict function? This is addressed initially with respect to the analysis of paleobiology but then encompasses examples of experimental functional morphology. In particular, there is a growing body of experimental data demonstrating that diverse functions can be achieved with nearly identical morphologies, and that the functional diversity may better be explained by behavior or environmental factors. Might these observations refute current theories about the origin of flight in extinct organisms (i.e., the cursorial or ground-up theory of flight versus the arboreal gliding theory of flight evolution)? Specific topics pursued are selected by participants in this course. Participation is open to interested graduate students, advanced undergraduate students, and veterinary students.

### VTBMS 713 Cell Cycle Analysis

Spring. 1 credit. S-U grades only. A. Yen. Current topics in the control of mammalian cell division are discussed, including growth factors and oncogenes.

### VTBMS 720 Special Problems in Physiology (Graduate)

Fall, spring. 1–3 credits. By permission of instructor. Laboratory work, conferences, collateral readings, and reports. Adapted to the needs of students. S-U grades optional.

### VTBMS 788 Seminar in Surgical Pathology

Fall, spring. 1 credit. Intended for residents; third- and fourth-year veterinary students may attend. Letter grades only. B. A. Summers and staff.

The major objective of this discussion and seminar course is to introduce the residents to the discipline of surgical pathology. Selected material from the Surgical Pathology Service is prepared in advance for independent review by the residents. The material is presented in a slide-seminar format by the residents under the review of the faculty. Emphasis is placed on pathogenesis, etiology, and pathologic descriptions of the lesions. In addition, appropriate guest lecturers cover specific areas of interest and special topics not encountered in the departmental service programs.

### VTBMS 811 Advanced Physiology Methods I (also BIO S 811) (Graduate)

Fall. 2 credits. Enrollment limited. Prerequisite: graduate student status or permission of course coordinator. S-U grades only. Lab TBA. J. Ray.

This is a course primarily for graduate students in physiology and related disciplines. Experiments are carried out in the laboratories of physiology faculty members to acquaint students with the latest techniques and methods in physiological research. Three modules are offered each semester by arrangement with the course coordinator.

### VTBMS 812 Advanced Physiology Methods II (also BIO \$ 812) (Graduate)

Spring. 2 credits. Enrollment limited. Prerequisite: graduate student status or permission of course coordinator. S-U grades only. Lab TBA. J. Ray.

This is a course primarily for graduate students in physiology and related disciplines. Experiments are carried out in the laboratories of physiology faculty members to acquaint students with the latest techniques and methods in physiological research. Three modules are offered each semester by arrangement with the course coordinator.

20

### **Clinical Sciences**

### VETCS 299 Research Opportunities in **Clinical Sciences**

Summer. 6 credits. Prerequisites: one year of basic biology (scores of 5 on Biology Advanced Placement Examination of the College Entrance Examination Board or BIO G 100 level). Letter grade only. A minimum of 120 hours of laboratory time is expected per three course credits. Clinical science faculty.

This is a mentored research apprenticeship program, designed to give laboratory experience to qualified unmatriculated high school students (participating in Cornell Summer College). Students will be placed in research laboratory with designated project under the direct supervision of a research associate (upper-level graduate student, postdoc, or faculty member). Students will be graded on preparation, participation in laboratory academic life, and appropriate acquisition of techniques. At the end of the six-week session, he/she will be expected to give a brief (15-20 minute) oral presentation on their work, and submit a manuscript in a form suitable for publication. The faculty director of the laboratory will have ultimate responsibility for evaluating the student's work and assigning the grade.

### [VETCS 700 Pathophysiology of **Gastrointestinal Surgery**

Fall. 1.5 credits. S-U grades only. Offered every third year. Next offered fall 2004. N. G. Ducharme.

Normal anatomy and physiology of the gastrointestinal system in carnivores, herbivores and ruminants is presented initially. This is followed by in-depth discussion of the pathophysiological mechanisms and sequelae of gastrointestinal obstructions including reperfusion injury, peritonitis, adhesions and short bowel syndrome. The emphasis of this course is development of advanced understanding of surgically relevant gastrointestinal problems that lead to appropriate decision making.]

### [VETCS 701 Pathophysiology of **Orthopedic Surgery (Graduate)**

Spring. 1.5 credits. Prerequisites include DVM, MD, or equivalents or approval of instructor. S-U grades only. Offered every third year. Next offered spring 2005. E. J. Trotter.]

### VETCS 702 Pathophysiology of

**Cardiopulmonary Surgery (Graduate)** Fall. 1.5 credits. Prerequisite: DVM degree or equivalent. S-U grades only. Offered every third year. R. P. Hackett, S. L. Fubini, N. G. Ducharme, H. J. Harvey.

Using lectures and group discussions, the objective of this course is to explain the pathophysiology of various cardiovascular diseases (cardiac arrest, cardiac arrhythmia under anesthesia) and airway disease (thoracic and upper airway disease). As a basis for these abnormalities, cardiopulmonary hemodynamics and biomechanical aspects of ventilation are reviewed. The emphasis is placed on understanding these mechanisms and outlining the surgeon's response to them.

### VETCS 703 Surgical Principles and Surgery of the Integumentary System (Graduate)

Spring. 1.5 credits. For graduate DVMs (or equivalent) in residency or graduate training programs. S-U grades only. Offered every third year.

This course is designed for surgery residents and graduate students. It is largely discussion format and examines surgical principles and surgery of the integumentary system.

### [VETCS 704 Pathophysiology of Urogenital Surgery (Graduate)

Fall. For graduate DVMs or equivalent in residency or graduate training programs.

1.5 credits. S-U grades only. Offered every third year. Next offered fall 2003. S. Fubini and V. Cook.

This course is designed to review and discuss urogenital surgical procedures in animals and the rational basis for them. Pathophysiology will be stressed. Some classes will consist of reprints with discussion.]

### [VETCS 705 Animal Pain and Its Control

Spring. 2 credits. By permission of instructor. S-U grades optional. Offered odd-numbered years. R. D. Gleed, J. W. Ludders, P. F. Moon, and L. P. Posner.

This course is open to third- and fourth-year veterinary medical students, interns, residents, graduate students, and postdoctoral associates who are interested in the fundamental and applied concepts of pain in animals. The course emphasizes the physiologic and pathophysiologic mechanisms involved in pain perception by animals, their responses (physiological and behavioral) to pain, and the pharmacologic mechanisms underlying analgesic therapy. The subject material is presented through lectures, group discussions, group readings, and group evaluation of analgesic protocols.]

### [VETCS 706 Pathophysiology of **Neurologic Surgery (Graduate)**

Spring. 1.5 credits. Prerequisite: DVM, MD, or equivalent or approval of instructor. S-U grades only. Offered every third year. Next

offered spring 2004. A. J. Nixon, E. J. Trotter. This course provides specialized training in neurosurgical techniques and application and discusses pathophysiologic implications of neurosurgical and neurologic diseases.]

### VETCS 710 Advanced Veterinary Anesthesiology I

Fall. 1 credit. Prerequisite: VTMED 568 Veterinary Anesthesiology or permission of instructor. Third- and fourth-year veterinary students, graduate students, interns, and residents. S-U grades only. L. P. Posner, R. D. Gleed, J. W. Ludders,

and P. F. Moon.

The content of this course is designed for preparation for the American College of Veterinary Anesthesiology examinations. However, the course is also suitable for interns and for residency training in other areas such as surgery and internal medicine. Speakers are from both inside and outside the college. Topics cover the basic sciences as they apply to anesthesiology such as physics and engineering, applied pharmacology, physiology, and pathology. Clinically oriented lectures are also given concerning specific anesthetic techniques and species-specific differences in response to anesthetic drugs.

### VETCS 711 Advanced Veterinary Anesthesiology II

Spring. 1 credit. Prerequisite: VTMED 568, Veterinary Anesthesiology or permission of instructor. Third- and fourth-year veterinary students, graduate students, interns, and residents. S-U grades only. L. P. Posner, R. D. Gleed, J. W. Ludders, and P. F. Moon.

The content of the course is designed for preparation for the American College of Veterinary Anesthesiology examinations. However, the course is also suitable for interns and for residency training in other areas such as surgery and internal medicine. Speakers are from both inside and outside the college. Topics cover the basic sciences as they apply to anesthesiology such as physics and engineering, applied pharmacology, physiology and pathology. Clinically oriented lectures are also given concerning specific anesthetic techniques and species-specific differences in response to anesthetic drugs.

### Microbiology and Immunology

### VETMI 299 Research Opportunities in **Microbiology and Immunology**

Summer. 6 credits. Prerequisites: one year of basic biology (scores of 5 on Biology Advanced Placement Examination of the College Entrance Examination Board or BIO G 100 level). Letter grade only. A minimum of 120 hours of laboratory time is expected per three course credits. Microbiology and Immunology faculty.

This is a mentored research apprenticeship program, designed to give laboratory experience to qualified unmatriculated high school students (participating in Cornell Summer College). Students will be placed in research laboratory with designated project under the direct supervision of a research associate (upper-level graduate student, postdoc, or faculty member). Students will be graded on preparation, participation in laboratory academic life, and appropriate acquisition of techniques. At the end of the six-week session, he/she will be expected to give a brief (15-20 minute) oral presentation on their work, and submit'a manuscript in a form suitable for publication. The faculty director of the laboratory will have ultimate responsibility for evaluating the student's work and assigning the grade.

#### VETMI 315 Basic Immunology (Undergraduate) (also Biological Sciences 305)

Fall. 3 credits. Strongly recommended: basic courses in microbiology, genetics, and biochemistry. S-U grades optional. I. A. Marsh.

This course is a survey of immunology, with emphasis on the cellular and molecular bases of the immune response. More information is available at the biog305 courseinfo web site.

### [VETMI 320 Principles of Toxicology (Undergraduate) (also Biological Sciences 320 and Toxicology 320)

Spring. 3 credits. Prerequisites: one year each of introductory biology and chemistry, with lab; one semester of organic chemistry lecture or waiver by instructor. S-U grades optional. Not offered 2002-2003. S. Penningroth, R. Dietert, and S. Bloom.

This course is an introduction to the interdisciplinary science of toxicology, drawing on material from biology, chemistry. pharmacology, ecology, earth science, risk analysis, and policy studies. Basic principles of toxicological science are presented and illustrated by case examples, such as pesticide toxicity to wildlife reproduction and human health risk assessment at a Superfund hazardous chemical waste site. Chemical risk management is described as a sociopolitical process involving the integration of scientific, economic, and cultural factors.

Independent student projects include a toxic chemical profile and a team analysis of hypothetical "environmental risk scenarios." Periodic talks by toxicology faculty acquaint students with basic research in this interdisciplinary branch of biological science. This is an introductory-level course in toxicology. Format: lecture supplemented by case examples. One field trip to a hazardous chemical waste site. Appropriate for nonmajors seeking basic literacy in environmental and human toxicology. "Gateway course" for students interested in 400- and 600-level toxicology courses.]

### VETMI 331 General Parasitology (also BIOMI 331; Undergraduate)

Spring. 2 credits. Prerequisites: zoology or biology; any of the following courses: BIOES 261, 264, 267, 274, 275, 278; BIOG 101, 102, 103, 104, 106, 107, 108, 109, 110, 170, 202, 207: BIOMI 192, 290 or equivalent courses. Letter grades only. D. D. Bowman.

An introduction to the basic animal parasites, stressing systematics, taxonomy, general biology, ecological interactions, and behavior of non-medically important groups. Introduces the major animal parasites, protozoan, nematode, platyhelminth, acanthocephalan, annelid, and arthropod.

### VETMI 404 Pathogenic Bacteriology and Mycology (also BIOMI 404)

Spring. 2 or 3 credits (3 credits with lecture and seminar). Prerequisites: BIOMI 290 and 291. Seminar is required of graduate students and open to undergraduates with permission of instructor. Maximum enrollment for seminar portion, 15

students. Letter grades only. D. P. Debbie. This is a course in medical microbiology, presenting the major groups of bacterial and mycotic pathogens important to human and veterinary medicine. The course emphasizes infection and disease pathogenesis. Topics include disease causality; interactions of host, pathogen, and environment, including immunity to bacteria and fungi; and principles of antimicrobial therapy and drug resistance. A companion seminar addresses the current and classic literature related to microbial pathophysiology on the cellular and molecular levels.

### [VETMI 408 Viruses and Diseases I (also Biological Sciences 408)

Spring. 2 credits. Intended primarily for graduate and undergraduate microbiology majors. Prerequisites: Microbiology 290 and 291 (College of Agriculture and Life Sciences). Recommended: VETMI 315, Genetics 281. Letter grades only. Offered even-numbered years. J. W. Casey.

The course covers basic concepts in virology with emphasis primarily on DNA virus-host interactions, strategies for gene regulation, and mechanisms of pathogenicity. Selected viral infections that result in immune dysfunction and neoplasia are highlighted in the context of approaches to prevent or reduce the severity of diseases.]

### VETMI 409 Viruses and Disease II (also BIOMI 409)

Fall. 2 credits. Prerequisites: BIOMI 290 and 291 or permission of instructor. Recommended: BIOMI 408, BIOBM 330– 332, BIOBM 432. Offered even-numbered years. G. Whittaker.

This course is complementary to BIOMI 408, Viruses and Disease I, and emphasizes RNA

viruses. The course is complete in its own right. As such, completion of BIOMI 408 is not a requirement. The course covers the structure and classification of viruses, entry, genome replication, and virus assembly. Particular emphasis is placed on virus-host cell interactions. Vaccinations, chemotherapy, and evolution of viruses are also discussed.

### VETMI 431 Medical Paras]itology (also BIOMI 417; Undergraduate)

Fall. 2 credits. Prerequisites: zoology or biology; any of the following courses: BIOES 261, 263, 264, 267, 274, 275, 278; BIOG 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 170, 202, 207; BIOMI 192, 290, 398 or equivalent course. Letter grades only. D. D. Bowman.

This course is a systematic study of arthropod, protozoan, and helminth parasites of public health importance, with emphasis on epidemiologic, clinical, and zoonotic aspects of these parasitisms.

### VETMI 605 Special Projects in Microbiology (Undergraduate)

Fall, spring. 1–3 credits. By permission of instructor. Prerequisite: a good background in microbiology or immunology. Preferably, students should have background in pathogenic microbiology and immunology. S-U grades only. Microbiology staff.

The course normally provides an opportunity for the student to work in a research laboratory or carry out a special project under supervision.

### [VETMI 700 The Biology of Animal Viruses (Graduate and Upper-level Undergraduate)

Fall. 2 credits. Letter grades only. Offered odd-numbered years. C. R. Parrish and staff. This course examines current topics in studies of animal viruses, including some comparisons with plant viruses where similar mechanisms apply. Selected topics are examined in depth, including the structures of viruses and their components, viral nucleic acids and replication strategies, details of the interactions between viruses and their host cell components and metabolism. Other topics include the evolution and selection of viruses, novel approaches to the prevention of virus infection, and methods for antiviral chemotherapy.]

### [VETMI 702 Molecular Biology and Immunology of Host-Parasite Interactions (Graduate) (also VTMED 620)

Spring, 2 credits. S-U grades optional. Offered even-numbered years. Next term offered to be determined. Faculty. See description for VTMED 620.]

### [VETMI 705 Advanced Immunology (Graduate) (also Biological Sciences 705)

Spring. 3 credits. Prerequisite: VETMI 315 Basic Immunology or permission of instructor. Letter grades only. Offered

even-numbered years. J. Marsh and staff. Coverage at an advanced level of molecular

### and cellular immunology.] VETMI 707 Advanced Work in

### Bacteriology, Virology, and Immunology (Graduate)

Fall, spring. 1–3 credits. By permission of instructor. S-U grades optional. Microbiology staff.

This course is designed primarily for graduate students with a good background in patho-

genic microbiology and immunology. It may be elected by veterinary students who are properly prepared.

### VETMI 708 Selected Topics in Animal Virology

Spring, odd-numbered years. 2 credits. Letter grades only. Microbiology faculty. Principles of animal virus biology with focus on mechanisms in viral pathogenesis.

### VETMI 712 Seminars in Infection and Immunity

Fall, spring. 1 credit. Required of all graduate students in the department of Microbiology and Immunology and the field of Immunology. S-U grades only. D. Russell.

Invited speakers in immunology and infection biology acquaint students with current advances in the field.

#### VETMI 719 Immunology of Infectious Diseases (also Biological Sciences 706) (Graduate)

Spring. 2 credits. Prerequisite: VETMI 315 Basic Immunology or permission of instructor. S-U grades optional. Offered odd-numbered years. E. Y. Denkers and staff.

This graduate level course focuses on molecular and cellular mechanisms underlying the immunity to infectious diseases caused by viral, bacterial, protozoan, and helminth pathogens. Topics include immune response initiation; antigen presentation pathways; Th1 and Th2 cytokines in protection and pathology; mechanisms of cytolysis; immune evasion strategies; vaccines. Lectures are based upon recent advances in the field and are accompanied by relevant readings from the current literature.

### VETMI 737 Advanced Work in Animal Parasitology (Graduate)

Fall, spring. 1–3 credits. For advanced undergraduate, graduate and veterinary students. Letter grades only.

D. D. Bowman and other faculty

This course is intended for advanced undergraduate, graduate and veterinary students with interests in parasitology research.

### [VETMI 770 Advanced Work in Avian Diseases (Graduate)

Fall, spring. 1–3 credits. By arrangement with instructor. Letter grades only. K. A. Schat.]

### VETMI 772 Advanced Work in Aquatic Animal Diseases (Graduate)

Fall, spring. 1–3 credits. By arrangement with instructor. S-U grades only. P. R. Bowser.

### [VETMI 773 Advanced Work in Avian Immunology

Fall, spring. Variable credit. Letter grades only. K. A. Schat.]

### VETMI 783 Seminars in Parasitology (Graduate)

Fall, spring, 1 credit. Open to veterinary students or graduate students; others by permission of instructor. S-U grades only. D. D. Bowman.

This is a seminar series designed to acquaint students with current research in the field of parasitology. The range of topics is determined, in part, by the interests of those participating and may include such topics as the ecology of parasitism, parasite systematics, wildlife parasitology and parasitic diseases of plants and animals, including humans.

398

### DISTRIBUTION COURSES 399

### **Molecular Medicine**

### VETMM 299 Undergraduate Research in Pharmacology

Summer. 3 to 6 credits (3 credits per 120 contact hours). Prerequisites: one year of basic biology (Score of 5 on Biology Advanced Placement Examination of the College Entrance Examination Board or BIOG 100 level.) Letter grades only. R. A. Cerione.

This is a mentored research apprenticeship program, designed to give laboratory experience to qualified unmatriculated high school students (participating in Cornell Summer College) or Cornell underclassmen.

Students are placed in research laboratory with designated project under the direct supervision of a research associate (upperlevel graduate student, post-doc, or faculty member). A minimum of 120 hours of laboratory time is expected per three course credits. Students are graded on preparation, participation in laboratory academic life and appropriate acquisition of techniques. At the end of the six-week session, students are expected to give a brief (15-20 minute) oral presentation of their work and submit a manuscript in a form suitable for publication. The faculty director of the laboratory has ultimate responsibility for evaluating the student's work and assigning the grade.

### VETMM 470 Biophysical Methods (also A&EP 470 and BIONB 470)

Spring. 3 credits. Prerequisite: permission of instructor. Letter grades only. M. Lindau. This course is an overview of the diversity of modern biophysical experimental techniques used in the study of biological systems at the cellular and molecular level found in articles published in the Biophysical journal. Topics covered include methods that examine both structure and function of biological systems: light microscopy, fluorescence microscopy, Fourier optics and image processing, confocal and multiphoton microscopy, phase contrast, electron microscopy, X-ray diffraction and protein structure determination, multidimensional NMR, spectroscopy, chromophores, calcium measurements, resonance energy transfer, membrane biophysics, electrophysiology, ion channels, action potentials, ligandgated channels, fluctuation analysis, patchclamp, molecular biology of ion channels, rapid kinetics, caged compounds, transmitter release, capacitance measurements, amperometry, optical traps and molecular force measurements. The course format includes assigned literature reviews by the students on specific topics and individual students' presentation of these topics. The course is intended for students of the engineering, physics, chemistry and biological disciplines who seek an introduction to modern biophysical experimental methods. Due to the interdisciplinary nature of the course, students have diverse backgrounds. A basic knowledge of and interest in physics and mathematics is expected but strong attempts are made to give an intuitive understanding of the mathematics and physics involved. Some knowledge of physical chemistry, molecular and cell biology, or neurobiology is helpful. Depending on individual backgrounds all students find certain aspects of the course easy and other aspects demanding.

### VETMM 610 Cellular and Molecular Pharmacology

Fall. 2 credits. By permission of the instructors. S-U grades optional. Offered even-numbered years. G. A. Weiland and field of pharmacology faculty.

This graduate-level course surveys the molecular and cellular aspects of receptor mechanisms, signaling pathways and effector systems. Topics include drug-receptor interactions; ligand- and voltage-gated ion channels; G protein pathways; growth factor signaling; lipid signaling; calcium; nutrient and nitric oxide signaling; and mechanisms of receptor-mediated effects on neural excitability, electrical pacemakers, muscle contraction and gene expression.

### [VETMM 611 Systems Pharmacology

Spring. 2 credits. By permission of the instructors. S-U grades optional. Offered even-numbered years. G. A. Weiland and field of pharmacology faculty.

This graduate-level course surveys systemand organ-related aspects of pharmacology. Topics include drug disposition; pharmacokinetics; autonomic pharmacology; central nervous system pharmacology; pharmacology of inflammation, allergy and platelet function; cardiovascular, gastrointestinal and endocrine pharmacology; and chemotherapy, including antimicrobial agents and cancer chemotherapy.]

### [VETMM 672 Protein Kinetics (also CHEM 672)

Spring. 4 credits. Prerequisite: CHEM 288 or 390, BIOBM 331, or permission of

instructor. Letter grades only. B. A. Baird. This course focuses on protein interactions with ligands and consequent changes in structure and activity. Topics include protein structure and dynamics; thermodynamics and kinetics of ligand binding; steady state and transient enzyme kinetics; enzyme catalysis and regulation; and role of cell membrane receptors in regulating cellular activities.]

### VETMM 700 Calcium as a Second Messenger in Cell Activation

Spring. 2 credits. By permission of instructor. Lecture-discussion. S-U grades only. Offered odd-numbered years. C. M. S. Fewtrell.

This course focuses on regulation of intracellular calcium and techniques for studying calcium movements and distribution in cells. Topics include calcium channels and exchangers, calcium-binding proteins and calcium stores; phosphatidylinositol turnover, release of calcium from intracellular stores and activation of calcium influx; calcium gradients and oscillations; mechanisms of exocytosis and the proteins involved. Each topic is introduced with a lecture followed by discussion of recent papers from the literature.

#### VETMM 701 Organ System Toxicology (also TOX 611)

Fall. 1 credit. For graduate students in environmental toxicology. S-U grades only. Offered even-numbered years.

W. S. Schwark.

This is a minicourse on molecular mechanisms involved in chemical toxicity. Specific examples of toxicity in organ systems such as the nervous system, kidney, liver, respiratory tract and cardiovascular system are considered.

### [VETMM 703 Receptor-Ligand Interactions (also BIONB 790-02)

Fall. 2 credits. By permission of the instructors. S-U grades optional. Offered odd-numbered years. G. A. Weiland and R. E. Oswald.

The course covers both the practical and theoretical tools for the study of ligandreceptor interactions, emphasizing the quantitative and physical chemical aspects of receptor theory. Topics discussed are basic methods of radioligand binding assays, including separation and measurement of bound and free ligand; characterization of receptor function; analysis of receptor structure; thermodynamic basis of the binding; methods of analyzing equilibrium binding equilibrium binding for complex binding mechanisms; and kinetics of simple and complex binding mechanisms.]

### VETMM 704 CNS Synaptic Transmission

Fall. 2 credits. Maximum enrollment 20 graduate students and undergraduate seniors by permission of instructor. S-U grades optional. Offered odd-numbered years. L. M. Nowak.

This is a survey course in vertebrate central nervous system physiology and pharmacology, and it focuses on mechanisms of neurotransmitter action at the membrane and cellular levels. Roles of selected neurotransmitters in normal and dysfunctional brains are covered. Topics are introduced in lectures and followed up in discussions of recent journal articles.

### [VETMM 705 Chemistry of Signal Transduction

Fall. 2 credits. S-U grades optional. Offered odd-numbered years. R. A. Cerione. This course focuses on the mechanisms of action of GTP binding proteins. Several receptor-coupled signaling systems are examined, including adenylyl cyclase, vertebrate vision, phosphatidylinositol lipid turnover, receptor systems regulating various ion channels and receptors involved in cell growth regulation.]

### [VETMM 706 Growth Factor-Coupled Signaling (also BIOBM 734)

Fall. 0.5 credits. By permission of the instructor. S-U grades optional. Offered odd-numbered years. R. A. Cerione. The general theme of this course is mitogenic signaling pathways. Receptor tyrosine kinases, src, ras and ras-regulatory proteins are covered.]

### [VETMM 707 Protein NMR Spectroscopy (also BIOBM 730)

Spring. 2 credits. S-U grades optional. Offered even-numbered years.

R. E. Oswald and L. K. Nicholson. The fundamentals of NMR are presented and students acquire the tools necessary to establish an in-depth understanding of multidimensional, multinuclear NMR experiments. Application of the technique to proteins for assignment of resonances, determination of structure and characterization of dynamics are presented. Special approaches for applying solution NMR techniques to large proteins are discussed.]

### VETMM 708 Lipid Second Messengers Spring. 2 credits. Students with a general biology background may enroll by permission of instructor. Lecture-discussion. S-U grades optional. Offered oddnumbered years. H. A. Brown.

This course covers the biochemical pathways involved in the production of lipid second messengers. These pathways function as essential elements of cellular signal transduction cascades. Topics include pathways of phospholipid synthesis, regulation of major mammalian phospholipases by receptors linked through G-proteins and tyrosine kinase receptors to intracellular cascades and subsequent metabolism of lipid products. The roles of lipids in regulating cell processes, such as membrane structure, exocytosis, cell cycle and apoptosis, are topics for discussion following reviews of recent publications. A background in general biochemistry is recommended.

### VETMM 709 Topics in Cancer Cell Biology

Fall and spring. 0.5–1 credit per section. Letter grades only. Course offered in oddnumbered years. Students may select modules (sections) of interest to them. B. Pauli.

### Section 1---Cell Adhesion Molecules, Signaling, and Cancer

Fall. J. Guan.

This one-credit module introduces the role of cell adhesion receptors in cancer. Emphasis is on the integrin and cadherin families of cell adhesion molecules and their roles in signal transduction and cancer. Topics include the structure and function of integrins, integrin interactions with cytoskeleton, intracellular signaling pathways in cell-matrix interactions, integrin-mediated signaling in cell migration, proliferation and survival. changes of integrins in tumors and metastasis, structure and function of cadherins, signaling mechanisms in cell-cell interactions in normal development and cancer.

## Section 2 Cell Cycle Analysis (also TOX 713 and TOX 698)

Spring. A. Yen.

This one-credit module presents: a brief historical review of the cell cycle; a summary of cell cycle regulatory processes; and practical methods for cell cycle analysis, including mathematical representations. Topics include: growth control of bacterial cell cycle including chemostats, mammalian cell tissue culture, cell synchronization, flow cytometry, age-density representation, G1 regulation, labile regulatory protein models, cell transformation, regulation by growth factors and the cytoskeleton, cyclin/E2F/RB regulatory model, practical examples for analysis of cell cycle phase durations, cell cycle phase specific growth factor sensitivity, timing of RB protein phosphorylation within the cell cycle. The objective of the course is to present graduate students with methods for cell cycle analyses that will be useful in their research.

### Section 3—Principles of Metastasis B. U. Pauli.

This one-credit module discusses the following principles: the molecular basis of cancer progression leading to metastasis (clonal evolution of metastatically competent cancer cells: contribution of specific oncogenes and tumor suppressor genes); the routes of metastasic spread; the process of intravasation emphasizing the roles of matrixdegrading proteases (e.g.. tissue metalloproteinases. plasmin. heparatinase, etc.) and angiogenesis; host effect on circulating cancer cells: immunological and hemodynamic considerations; organpreference of metastasis: the roles of tumor cell/endothelial cell adhesion receptor/ligand pairs (e.g., polymeric fibronectin/DPP IV; b4 integrin/CLCA; CD44/hyaluran; cytokineinducible CAMs); chemokines and chemokine receptors; extracellular matrix components; etc.; emergence of micrometastases: the roles of adhesion-and/or chemokine-mediated signaling in intravascular growth promotion of arrested cancer cells; and, animal model of metastasis and anti-metastasis treatment strategies.

#### Section 4—Anglogenesis in Normal Development, Cancer, and Other Diseases B. U. Pauli

Topics discussed in this one-credit module include: vasculogenesis vs. angiogenesis; tumor angiogenesis: the angiogenic switch; molecular and cellular principles of tumor vessel formation; structure and function of tumor vessels (e.g., chaotic architecture and blood flow: high vascular permeability; altered endothelial surface markers; parakrine- and perfusion-driven tumor growth stimulus; role of hematopoietic stem cells in promoting tumor angiogenesis: angiogenesis in nonneoplastic disease: hypoxia-driven pathological angiogenesis and vascular remodeling; inflammation-induced angiogenesis and vascular remodeling (special emphasis: would healing); and, therapeutical perspectives: promises and problems.

### Section 5—Current Topics in Oncogenic Viruses

J. Casey.

### Section 6—Growth Factor-Coupled Signaling (also VETMM 706) Fall. R. Cerione.

The general theme of this 0.5-credit module is mitogenic signaling pathways. Receptor tyrosine kinases, src, ras, and ras-regulatory proteins are covered.

### VETMM 720 Patch Clamp Techniques in Biology

Spring. 2 credits. By arrangement with the instructor. S-U grades only. Taught daily during the second and third weeks of January.

Students learn theoretical background for patch clamp studies in morning lectures. The experimental techniques of conventional and permeabilized patch whole cell recording and single channel recordings in cell attached and excised membrane patches are taught in afternoon laboratory sessions.

### VETMM 730 Graduate Research in Pharmacology or Molecular Medicine

Fall, spring, and summer. 1–12 credits. S-U grades only. This course is offered by individual faculty members in the Department of Molecular Medicine and the Graduate Field of Pharmacology for graduate students undertaking research towards M.S. or Ph.D. degrees. This course cannot be used to fulfill the formal course requirements for the Field of Pharmacology.

### VETMM 740 Special Projects and Research in Pharmacology

Fall, spring, and summer. 1–3 credits each topic. By arrangement with the instructor. Letter grade or S-U option. Field of pharmacology faculty. *This course cannot be used to fulfill the formal course requirements for the Field of Pharmacology*. This course enables students to undertake research in an area related to the research interests of a faculty member in the Graduate Field of Pharmacology. Topics include, but are not limited to: Mechanisms of Growth-Factor Action—R. A. Cerione; The Role of Calcium in Stimulus-Secretion Coupling— C. M. S. Fewtrell; Mechansims of Neurotransmitter Release—M. Lindau; Central Nervous System Neurotransmitters—L. M. Nowak; Structure-Function of the Nicotinic Acetylcholine Receptor—R. E. Oswald.

### VETMM 760 Directed Readings in Pharmacology

Fall, spring, and summer. 1–3 credits each topic. By arrangement with the instructor. Letter grade or S-U option. Reading and discussion. Field of pharmacology faculty. Individual members of the Graduate Field of Pharmacology offer directed readings and discussions on pharmacological topics to small groups or to individual students. Topics include, but are not limited to: Receptor Mechanisms—G. A. Weiland; Biochemical Neuropharmacology—G. A. Weiland; Amino Acid Neurotransmitters—L. M. Nowak; Stimulus-Secretion Coupling— C. M. S. Fewtrell; Cell Calcium—

C. M. S. Fewtrell.

# Population Medicine and Diagnostic Sciences

### VTPMD 299 Undergraduate Research in Epidemiology

Summer. 3 credits. Limited to undergraduate students. Letter grades only. Prerequisites are one year of basic biology (Score of 5 on Biology Advanced Placement Examination of the College Entrance Examination Board or BIOG 100 level). Permission of the instructor can be

submitted for the prerequisite. J. Scarlett. This is a mentored research apprenticeship program designed to give laboratory experience in applied epidemiology to qualified unmatriculated high school students (participating in Cornell Summer College) or Cornell underclassmen.

Students are placed in a research laboratory with a designed project under the direct supervision of a research associate (upperlevel graduate student, post-doc, or faculty member). A minimum of 120 hours of laboratory time is expected per three course credits. Students are graded on preparation participation in laboratory academic life and appropriate acquisition of techniques. At the end of the six-week session, students are expected to give a brief (15-20 minute) oral presentation on their work and submit a manuscript in a form suitable for publication. The faculty director of the laboratory has ultimate responsibility for evaluating each student's work and assigning the grade.

### VTPMD 664 Introduction to Epidemiology (Graduate)

Fall. 3 credits. Prerequisites: Statistics and Biometry 601 (College of Agriculture and Life Sciences) may be taken concurrently or by permission of instructor. S-U grades optional. H. N. Erb.

Lectures and discussion deal with the fundamentals of epidemiology. Topics include outbreak investigation, causal association, data quality, the design and ethical constraints of clinical trials, and infectious-disease epidemiology.

### VTPMD 665 Study Designs (Graduate)

Spring. 2 credits. Prerequisites: VTPMD/ VETCS 664 and Statistics and Biometry 601 (College of Agriculture and Life Sciences). S-U grades optional. H. O. Mohammed. Design and interpretation of cross-sectional, case-control and cohort studies (including controlled clinical trial) are covered. Design issues include sample size, bias and relative advantages and disadvantages.

The course objectives are (1) to know the difference between different epidemiologic study designs and relative advantages and disadvantages of each; (2) given a problem (usually a field situation), be able to design an appropriate epidemiologic study; (3) be able to effectively analyze and criticize published epidemiologic studies.

The course consists of lectures on the principles of epidemiologic study design and related issues (sample size calculations, validity and precision, and identification and minimizing of bias); basic analysis of epidemiologic data; and discussion of published epidemiologic studies. These studies include observational cohort studies (prospective and retrospective), cross-sectional studies, case-control studies and hybrid studies (ambidirectional and other hybrid designs).

### VTPMD 666 Advanced Methods in Epidemiology (Graduate)

Fall. 3 credits. Prerequisites: VTPMD/ VETCS 665 and Statistics and Biometry 602 (College of Agriculture and Life Sciences). S-U grades optional. Y. T. Grohn. Concepts introduced in VTPMD 664 and

VTPMD 665 are further developed, with emphasis on statistical methods. Topics include interaction, effect modification, stratified analysis, matching and multivariate (logistic regression) methods, survival analysis and strategies for the analysis of epidemiologic data.

### VTPMD 700 Special Projects in Diagnostic Endocrinology

Fall, spring. 1-3 credits. Prerequisite: recommended AS 427. By permission of instructor. Letter grades only. Schanbacher and Lamb.

An independent study course. Students have the opportunity to research a particular topic in diagnostic/clinical endocrinology of animals.

### VTPMD 701 Special Projects in Infectious Diseases

Fall, spring. 1-3 credits. By permission of instructor. S-U grades optional. Diagnostic laboratory faculty.

This course provides laboratory experience with attention to specific aspects of infectious disease problems.

### VTPMD 702 Special Topics in Infectious Diseases

Fall, spring. 1-3 credits. By permission of instructor. S-U grades optional. Diagnostic laboratory faculty.

The objective of this course is to offer a broad exposure to various aspects of infectious diseases.

### VTPMD 703 Doctoral-Level Thesis Research (Graduate)

Fall, spring. 6-9 credits. By permission of instructor. S-U grades only. Diagnostic Laboratory faculty. Research leading to a Ph.D. degree.

### VTPMD 704 Master's-Level Thesis

**Research (Graduate)** Fall, spring. 1-3 credits. By permission of instructor. S-U grades only. Diagnostic Laboratory faculty.

Research leading to an M.S. degree.

### **VTPMD 707** Clinical Biostatistics (Graduate)

Spring. 2 credits. For veterinary residents or graduate students. Letter grades only. Offered odd-numbered years. H. N. Erb, Y. T. Grohn, H. O. Mohammed and J. M. Scarlett.

This course explains the theory behind and interpretation of parametric and nonparametric statistical techniques commonly used in research/clinical medicine. Students analyze small data sets using a commercial statistical software package.

### VTPMD 708 Epidemiology Seminar Series (Graduate)

Fall, spring. 1 credit. S-U grades only. Epidemiology faculty.

Advanced theoretical and analytical epidemiologic concepts and techniques are discussed.

### VTPMD 766 Graduate Research (Graduate)

Fall, spring, summer. Credit and hours TBA. Must be registered in masters or Ph.D. program and permission of the graduate faculty member concerned. S-U grades only. Epidemiology faculty.

This course enables students outside the section of Epidemiology to receive graduate research credits for projects with epidemiological components.

### VTPMD 769 Doctoral-Level Thesis Research

Fall, spring, and summer. Credits and hours TBA. Must be registered in masters or Ph.D. program in epidemiology. S-U

grades only. Epidemiology Faculty. This course enables students in the section of epidemiology to receive graduate research

### VTPMD 799 Independent Studies in Epidemiology

credits for their doctoral research.

- Fall, spring. 1-3 credits. H. N. Erb,
- Y. T. Grohn, H. O. Mohammed, and J. M. Scarlett.

The purpose of this course is to investigate an epidemiologic topic with one of the instructors. It provides experience in problem definition, research design, and the analysis of epidemiologic data.

### COLLEGE OF ARTS AND SCIENCES

### **PROGRAM OF STUDY**

### Introduction

The College of Arts and Sciences is a community of about 4,000 undergraduates and 600 faculty members. It is also a graduate school and research center. Altogether it attracts faculty whose research and scholarly and creative work require first-rate academic facilities and who bring to all their students the profound questioning and exciting ideas of current scholarship. Finally, the college exists within a university of other colleges at Cornell-about 19,000 undergraduate and graduate students and 1,500 faculty members. This wider community provides depth and diversity of applied and professional studies beyond what one college of the liberal arts and sciences alone can offer. Students studying the liberal arts and sciences may draw upon the knowledge and facilities of the other colleges at Cornell to complement their studies. Abundant variety and outstanding quality in many fields, including interdisciplinary fields, and emphasis on individual academic freedom and responsibility give the college and the university its distinctive character.

The richness of the college's undergraduate curriculum is extraordinary; there is no course that all students must take, and there are nearly 2,000 from which they may choose. By choosing courses each semester, students design their own education. They develop known interests and explore new subjects. An education in the liberal arts and sciences means honing one's critical and imaginative capacities, learning about oneself in nature and culture, and gaining experience with views of the world radically unlike one's own. All this is highly individual, and the college relies on each student and faculty adviser to design a sensible, challenging, and appropriate course of study.

Yet the faculty believes that each student's education should have certain common qualities. These include familiarity with several different ways of knowing that are reflected in the various disciplines and fields of study. In addition to these general areas of knowledge, students acquire effective writing and quantitative skills, study foreign languages, achieve cultural breadth, and concentrate on one particular field through which they deepen their imaginative and critical thinking as fully as possible. To accomplish these objectives, the college has certain requirements for graduation.

### The College of Arts and Sciences awards one undergraduate degree, the Bachelor of Arts degree

### **Summary of Requirements**

1) First-Year Writing Seminars: two courses. (See John S. Knight Institute for Writing in the Disciplines p. 550.)

- Foreign language: proficiency in one language or qualification in two; zero to four courses, depending on background.
- 3) Distribution: nine courses, three of which are satisfied with a major in humanities or social sciences and four of which are satisfied with a major in sciences.
- Breadth: two courses (may be among courses for distribution, major, or electives).
- 5) Major.
- Electives: four or five courses (at least 15 credits) not used to fulfill other requirements and not in the major field.
- 7) Residence: eight full-time semesters, unless a student can successfully complete all other requirements in fewer than eight semesters and meet the additional criteria to accelerate graduation. (See below under "Acceleration.")
- 8) 34 courses: a three- or four-credit course counts as one course. A two-credit course counts as half a course; a one-credit course does not normally count toward the requirement; a six-credit language course counts as one and one-half courses. (See below under "Courses and Credits" for some one-credit courses in music, dance, and theatre performance that can be cumulated to count as onehalf course and for counting five and six credit courses.
- Credits: a total of 120 academic credits, of which 100 must be taken in the College of Arts and Sciences. (Note "Non-credit courses below.")
- 10) Physical education: completion of the university requirement (passing a swim test and two one-credit non-academic courses). Please note that physical education credit does not count toward graduation or toward the 12-credit minimum required for good academic standing each semester.
- 11) Application to graduate. (See below under "Graduation.")

### **Explanation of Requirements**

### Foreign Language Requirement

The faculty considers competence in a foreign language essential for an educated person. Studying language other than one's own helps students understand the problematics of language, our fundamental intellectual tool, and enables understanding of another culture for exploration. The sooner a student acquires competence, the sooner it will be useful. Hence, work toward the foreign language requirement should be undertaken in the first two years. Courses in foreign languages and/ or literature are taught in the College of Arts and Sciences by the following departments: Africana Studies and Research Center, Asian Studies, Classics, German Studies, Linguistics, Near Eastern Studies, Romance Studies, and Russian Literature.

The language requirement may be satisfied in one of two ways:

- by attaining *proficiency* (competence at the intermediate level) in one language or
- 2) by attaining *qualification* (mastery of an introductory sequence) in two languages.

### Proficiency

Proficiency may be attained in languages by passing an intermediate (usually 200-level) Cornell course (or Chinese or Japanese 161). Introductory courses in some less commonly taught languages are taught at the 200-level or above; (for example, Ancient Egyptian and Welsh); these do not confer proficiency. Proficiency can also be earned by examination. A score of 4 or 5 on an AP literature exam in French, Italian, or Spanish earns proficiency and three credits. A score of 4 or 5 on the AP exam in German earns proficiency and three credits. Students with those scores should also take the Cornell Advanced Standing Examination (CASE), given during orientation week, to see if they can earn three additional credits and to obtain appropriate placement for further language study. A score of 4 or 5 on an AP language exam earns three credits but does not carry with it proficiency However, a student who received a score of 4 or 5 on an AP language exam can earn proficiency and an additional three credits by scoring high enough on the CASE. Students with appropriate scores on Cornell Language Placement tests or SAT II examinations are also eligible to take the CASE (see chart below). Native speakers and writers of a language other than English may earn proficiency and six credits by taking the CASE or an individual exam (if no CASE is available and a qualified examiner is here).

### Qualification

Qualification may be attained in any of the following ways:

- 1) Three years of high school study in any one language gives qualification in that language. No demonstration of competence is necessary. Note, however, that this route to qualification does not guarantee entrance into an intermediate level course. Students who want to continue studying the language must be placed in the appropriate course through an examination. Being placed below the intermediate level does not cancel the qualification.
- Passing the requisite Cornell course, the last course of the introductory sequence. Note: Except in the case of Sanskrit,

completion of language sequences 131– 132 does not constitute qualification.

3) Achieving the requisite score (see chart) on the SAT II taken in high school or a score of 56 or higher on the appropriate Cornell LP (Language Placement) test.

Students may earn a score of 56 on the placement test at the end of a course

### ARTS AND SCIENCES - 2002-2003

numbered 122 (second semester of the introductory sequence) and consequently attain *qualification* without taking 123, the third semester of the introductory sequence.

 By departmental or (when no placement test is available) individual examination at Cornell (if a qualified examiner is here).

### Placement in Language Courses and Advanced Placement Credit

Placement into language courses and advanced placement credit are separate results of examinations.

### Placement

Entering students who have had two or more years of high school study in a language, who have been awarded credit for language work at another college or university, or who are native speakers, bilingual, or have spoken the language at home, may enroll in a course in the same language only after being placed by examination. The placement exam may have been taken in high school (SAT II, taken after the last course, or AP, if the score was 4 or 5) or at Cornell (LP test). Students may, but need not, retake a language test if a year or more has passed since last taking it. Being placed into the first course at an intermediate level course does not earn credit toward the degree. Degree credit is earned only for demonstrated mastery of work equivalent to the first course at an intermediate level at Cornell, and placement into the second intermediate course.

### **Placement Tests and Advanced Placement Credit**

The following language placement and 1) advanced standing tests are scheduled at the beginning of each semester: Chinese, Japanese, and Korean (schedule available from the Department of Asian Studies, 388 Rockefeller Hall); German (schedule available from the Department of German Studies, 183 Goldwin Smith Hall); French, Italian, and Spanish (schedule available from the Department of Romance Studies, 303 Morrill Hall); and Russian (schedule available from the Department of Russian Literature, 226 Morrill Hall). The advanced standing examination in French, German, Italian, Russian, and Spanish, is called the CASE (Cornell Advanced Standing Examination). Eligibility for the CASE may be determined from the placement tables. In Russian only, all students seeking placement take the CASE.

Native speakers of Spanish who have completed their secondary education in a Spanish-speaking country do not take the CASE. For these students, the Spanish program offers a walk-in service, the Native Language Accreditation for Spanish, in the third week of September and the first week of February. Students interested in this service should contact Eleanor Dozier in Morrill Hall. Spanish-English bilinguals who do not fit the definition of "native speakers," and whose test scores make them eligible, should take the CASE.

- Arabic: departmental examination, Department of Near Eastern Studies, 360 Rockefeller Hall.
- Greek, ancient and modern: departmental examination, Department of Classics, 120 Goldwin Smith Hall.

\*Students who have a score of 65 or higher on the LPS, or 690 or higher on the SAT II, or an AP score of 4 or 5 may enroll in Spanish 200, 207, or 209 without taking the CASE.

- 4) Hebrew: departmental examination, Department of Near Eastern Studies, 360 Rockefeller Hall.
- Latin: departmental examination, 5) Department of Classics, 120 Goldwin Smith Hall

### Substitutions to the Language Requirement

Outright waivers of the requirement are never granted. However, rarely and as appropriate, alternatives to language acquisition are approved. Legitimate requests for substitutions require evidence of inability to learn foreign languages in a classroom setting. Most students provide documentation of learning disabilities relating to foreign language acquisition (e.g., an auditory processing problem) to Student Disability Services, 420 Computing and Communications Center, 255-4545. Other students who may never have been tested for a disability reveal it through repeated and dedicated but vain attempts in formal language courses. A poor grade in a Cornell introductory language course or taking the LP exam repeatedly and unsuccessfully is not adequate evidence.

Students who wish to request a substitution for the normal requirement should meet with Dean Walbridge, Office of Undergraduate Admissions and Advising, 172 Goldwin Smith Hall. If Dean Walbridge determines that the request has merit, the student meets with the Language Substitution Review Committee. This committee makes the final decision for or against a substitution. If a substitution is allowed, the committee works with the student to select substitute courses.

### **Distribution Requirements**

In satisfying the distribution requirements, students become acquainted with a broad range of subject matter and points of view among disciplines in the college and explore areas that may be entirely new to them. Or, to look at it the other way, as first-year students explore subjects that interest them, they begin to satisfy distribution requirements. Consequently, first-year students should take courses to prepare for possible majors and to explore subjects new to them and take no course only in order to satisfy a distribution requirement. Although students may complete distribution requirements over eight semesters, they can take advanced courses in subjects they (perhaps unexpectedly) find intriguing only if they have completed the introductory prerequisites. Consequently, students should not postpone satisfying distribution requirements until the last semesters. Once sure of a major, students should consider which distribution requirements are yet unfilled and how to fulfill them with courses that complement their overall program.

Students must take a total of nine courses of three or more credits each for the distribution requirements: four courses from Groups I (science) and II (quantitative reasoning) below, at least two of which are from Group I and at least one of which is from Group II (for example, one chemistry, one physics, one geology, and one mathematics); five courses from Groups III (social science) and IV (humanities and the arts) below, with at least two in each group and two in the same department (for example, one course in sociology, one in history, one in history of art, and two in theater arts). Courses that satisfy distribution requirements are listed and

described in their departmental sections. The Roman numeral-I, II, III, or IV indicates which group they satisfy. If there is no numeral at all, the course satisfies no distribution requirement. Courses in the major may be applied to the distribution requirements (unless prohibited by one of the restrictions noted under restrictions on applying AP credit, transfer credit, and Cornell courses to distribution requirements).

### **Physical and Biological Sciences**

In fulfilling the four courses in science and quantitative reasoning, students must take at least two science courses. At least one of these must be from the primary list of courses in science departments in the College of Arts and Sciences:

### **Primary list:**

(The courses listed individually are all crosslisted in an A&S science department.)

### Animal Science:

427 Fundamentals Endocrinology

### Anthropology:

275 Human Biology and Evolution

371 Human Paleontology

474 Lab and Field Methods in Human Biology

Applied & Engineering Physics:

470 Biophysical Methods

Astronomy: all courses

Biological Sciences: all 3 or 4 credit courses except BIO G 200 and BIO G 499 (unless permission is obtained from the Director of Undergraduate Studies in biology), BIO G 209, BIO G 498, and BIOSM 204, any combination of two from BIO 101-104.

Biological & Environmental Engineering: 456 Biomechanics of Plants

Biology & Society:

214 Biological Basis of Sex

461 Environmental Policy

Chemistry and Chemical Biology: all courses

### Cognitive Studies:

111 Brain, Mind, & Behavior

Computer Science:

321 Numerical Methods in Computational Molecular Biology

Earth and Atmospheric Sciences: all courses except 150, 250

#### Entomology:

- 400 Insect Development
- 452 Herbivores and Plants
- 453 Princ/Pract Historical Biogeography
- 454 Insect Ecology
- 455 Stream Ecology

Feminist, Gender and Sexuality Studies (previously Women's Studies).

214 Biological Basis of Sex

Food

394 Applied and Food Microbiology

History

287 Evolution

Horticulture:

243 Taxonomy of Cultivated Plants Math:

362 Dynamic Models in Biology

Natural Resourses:

275 Human Biology and Evolution 456 Stream Ecology

### Nutritional Science:

475 Mechanisms of Birth Defects

Physics: all courses except 205, 209, 210

#### Plant Pathology:

407 Nature of Sensing and Response

### Psychology:

- 111 Brain, Mind, & Behavior
- 322 Hormones and Behavior
- 323 Biopsychology Laboratory
- 332 Biopsychology of Learning and Memory
- 396 Introduction to Sensory Systems
- 424 Neuroethology 429 Olfaction and Taste: Structure and Function
- 431 Effects of Aging on Sensory and Perception Systems
- 460 Human Neuroanatomy
- 492 Sensory Function

SCAS:

398 Environmental Microbiology

Students may select additional science courses from the following supplementary list:

Animal Science:

- 100 Domestic Animal Biology I
- 150 Domestic Animal Biology II
- 212 Animal Nutrition

Anthropology:

101 Introduction to Anthropology 208 The Evolution of Human Mating 390 Primate Behavior and Ecology

Applied and Engineering Physics:

110 The Laser and its Applications in Science, Technology, and Medicine

Electrical and Computer Engineering: 200 Intro to Info Science & Tech

**Electrical Engineering:** 

430 Lasers and Optical Electronics

- Engineering:
  - 110 The Laser and its Applications in Science, Technology, and Medicine
- Entomology:

212 Insect Biology

Food

200 Introductory Food Science

- Materials Science and Engineering:
  - 281 The Substance of Civilization

Natural Resources:

- 201 Environmental Conservation
  - 210 Introductory Field Biology
  - 301 Forest Ecology
- Nutritional Science:
  - 115 Nutrition and Health
- Psychology
  - 223 Introduction to Biopsychology 326 Evolution of Human Behavior

Theatre

312 The Moving Body: Form and Function

### ARTS AND SCIENCES - 2002-2003

### II. Quantitative and formal reasoning

In completing four courses in science and quantitative reasoning, students must take at least one of the following courses:

### Biometry

301 (formerly 261) Statistical Methods

City and Regional Planning:

223 Introduction to Statistical Reasoning 321 Introduction to Quantitative Methods

#### **Computer Science:**

- 100 Introduction to Computer Programming
- 211 Computers and Programming
- 312 Structure and Interpretation of
- Computer Programs 486 Applied Logic

#### Esservis

- Economics:
  - 319 Introduction to Statistics and Probability
  - 320 Introduction to Econometrics 321 Applied Econometrics

### Industrial & Labor Relations:

210 Statistical Reasoning I 211 Statistical Reasoning II

Mathematics: all courses except 101 and 109

Operations Research & Industrial Engineering: 115 Engineering Applications of OR&JE

Philosophy:

- 231 Introduction to Deductive Logic
- 331 Deductive Logic
- 383 Choice, Chance and Reason
- 431 Mathematical Logic
- 432 Topics in Logic
- 436 Intensional Logic

### Physics

- 205 Reasoning about Luck
- 209 Relativity and Chaos
- 210 Random Classical & Quantum Physics

### Psychology:

350 Statistics and Research Design

#### Sociology:

301 Evaluating Statistical Evidence

If students choose two courses from this list to satisfy part of the distribution requirement, those two courses may not have significant overlap. For example, students may not choose two beginning courses in statistics. Nor may then earn credit toward the degree for overlapping courses: Biometry 301, formerly 261 (Statistical Methods I), CRP 223, (Intro to Statistical Reasoning), ILR 210 (Statistical Reasoning I), MATH 171 (Statistical Theory and Application in the Real World), PSYCH 350 (Statistics Research and Design), SOC 301 (Evaluating Statistical Evidence).

### III. Social sciences and history

The following departments are included in Group III, social sciences and history. Most (although not all) courses in these departments satisfy distribution in this group. Students should consult the departmental listings for options that are noted as satisfying Group III.

Anthropology Economics Government History Linguistics Psychology Sociology

In addition, interdisciplinary departments and programs offer courses in Group III. Again,

students should consult the departmental and program listings and note which courses satisfy Group III.

Africana Studies American Studies Archaeology Asian Studies Biology and Society Cognitive Studies Feminist, Gender & Sexuality Studies Near Eastern Studies Religious Studies Science and Technology Studies

Finally, CRP 100 (The American City) and CRP 101 (Global City) and ENGRG 250 (Technology in Society) and ENGRG 298 (Inventing an Information Society) satisfy dsitribution in Group III.

### IV. Humanities and the arts

The following departments are included in Group IV, humanities (literature and philosophy) and the arts. While language and logic courses do not count for distribution in this group, most (although not all) other courses in these departments do. Students should consult the departmental listings for options that are noted as satisfying Group IV.

Asian Studies Classics Comparative Literature English German Studies History of Art

Music: one course must be in music history, culture, or theory. If a student chooses to satisfy part of the distribution requirement with more than one music course, an acceptable sequence may include four credits (two half courses) in musical performance, organizations, or ensembles combined with theory, history, and culture courses. Students may count performance credits as only one course toward distribution.

Philosophy Romance Studies (French, Italian, and Spanish Literature) Russian Literature Theatre, Film, and Dance

In addition, interdisciplinary departments and programs offer courses in Group IV. Again, students should consult the departmental and program listings to find which courses satisfy Group IV.

Africana Studies American Studies Anthropology Archaeology Asian American Studies Biology and Society Feminist, Gender & Sexuality Studies Near Eastern Studies Religious Studies Science and Technology Studies Visual Studies

### Restrictions on Applying AP Courses and Credit from Other Institutions to the Distribution Requirements

Students may apply up to two courses of approved advanced placement or transfer credit towards distribution requirements in Groups I and II (physical/biological sciences and quantitative/formal reasoning), as long as they take at least one course from the primary list in an Arts and Sciences science department at Cornell. Transfer credit applied to distribution in Group II (quantitative/formal reasoning) must be in mathematics, statistics, or computer science; it may not be in other quantitative subjects. Courses taken at other institutions in mathematics or computer science must be approved for transfer and distribution credit by the Departments of Mathematics or Computer Science respectively. Statistics courses taken at other institutions in social science departments must be approved by the relevant department in Arts and Sciences (e.g., psychology or sociology); statistics courses taken in mathematics or statistics departments must be approved by the Department of Mathematics.

Students may apply no advanced placement or transfer credit from other institutions toward satisfaction of the distribution requirements in Groups III and IV (social sciences/history and humantities/arts).

Students who transfer to the college from another institution or who enter through the Mid-Year Freshman Program are under the above rules for advanced placement credit, but are eligible to have credit for post high school coursework taken during regular semesters (not summer school) at their previous institution count towards all distribution requirements. Transfer students receive a detailed credit evaluation when they are accepted for admission.

### Restrictions on Applying Cornell Courses to the Distribution Requirement

- 1) First-Year Writing Seminars may not count toward any other college requirement.
- 2) No single course may satisfy more than one distribution requirement.
- 3) Students may count courses in their major towards distribution. However, courses offered or cross-listed by their major department may be counted only toward the distribution category of the major department itself. For example, a history major may not count a course cross-listed between history and a literature department toward distribution in the humanities.

### **Breadth Requirements**

Students must include in their undergraduate program at least one Arts and Sciences course that focuses on an area or a people other than those of the United States, Canada, or Europe and one course that focuses on an historical period before the twentieth century. Courses that satisfy the geographic breadth requirement are marked with an @ when described in this catalog. Courses that satisfy the historical breadth requirement are marked with a #. Many courses satisfy both requirements, and students may in fact use the same course to satisfy both. Students may use courses satisfying distribution, major, or elective-but not writing-requirements in satisfaction of either of the breadth requirements. They may also apply Cornell courses conferring proficiency in a non-Western language toward the geographical breadth requirement. They may not apply to either of the breadth requirements (a) advanced placement credit, (b) credit awarded by examination, or (c) if matriculating as freshmen (unless through the Mid-Year Freshman Program), transfer credit.

### The Major

In their last two years, students devote roughly one-half their time to acquiring depth and competence in a major subject. The major does not necessarily define a student's intellect or character or lead directly to a lifetime occupation, although it sometimes does some of each. Through the major, students focus and develop their imaginative and intellectual capacities through a subject they find especially interesting.

Most departments and programs specify certain prerequisites for admission to the major; they are found on the following pages in the descriptions of each department and program.

Students may apply for acceptance into the major as soon as they have completed the prerequisites and are confident of their choice. This may be as early as the second semester of freshman year, and may be no later than second semester of sophomore year. To apply, they take a copy of their transcript to an appointment with the director of undergraduate studies in their prospective major. A department or program may refuse admission into the major if the applicant's performance does not meet established standards. A student without a major at the beginning of the junior year is not making satisfactory progress toward the degree. That student must meet with an advising dean, and may not be allowed to continue in the college.

### Available majors

Majors are offered by each of the departments. There are also majors in American studies, archaeology, biology and society, religious studies, science of earth systems, and women's studies.

Some students want to pursue a subject that cannot be met within an established major. They may plan, with the help of their faculty adviser, an independent major that includes courses from several departments and even colleges. See "Independent Major Program," under "Special Academic Options." Whatever the major—chemistry, math, philosophy, or music—graduates from the College of Arts and Sciences earn the one degree the college awards, a Bachelor of Arts.

### **Double Majors**

Only one major is required for graduation. Some students choose to complete two majors. No special permission or procedure is required; students simply become accepted into both majors and find an adviser in each department. Both majors are posted on the official transcript.

### Electives

Of the 34 courses and 120 credits required for graduation, almost one-third are free electives. How students use these electives frequently makes the difference between an ordinary and a truly interesting course of study. Students must complete at least four courses and at least 15 credits offered outside the major field and not used to fill another requirement except breadth. AP credits not otherwise used may be used to fulfill elective requirements. Students may group electives to complete one of the established interdisciplinary concentrations or may form their own unofficial concentration or "minor" separate from their major. Students may also group electives into a second major. Since only one major is

required, students may count courses in a second major as electives. Some students choose to explore a variety of subjects; some develop a concentration in a department or subject outside Arts and Sciences to gain applied training or specialized knowledge.

### Residence

The College of Arts and Sciences is a residential college for students who devote their energy and spirit to full-time study. The faculty believes that integrated, full-time study for a defined period best promotes intellectual and creative development and best prepares people for citizenship and careers.

Consequently, eight semesters of full-time study in the College of Arts and Sciences are integral to earning the A.B. degree. Even if the minimum requirements can be met in fewer semesters, the faculty of the college expects students to take advantage of the resources of the university for eight full terms and obtain as rich and advanced an education in the liberal arts and sciences as possible. Students may complete their undergraduate degrees with credits earned at other institutions or as part-time or summer students at Cornell only if they have completed their eight full-time semesters of residence or satisfied the criteria listed below under "Part-time study in final semester."

For transfer students from other institutions, each full semester of study at their previous institution counts as one of the eight semesters of residence. However, even if transfer students have completed more than four full semesters at their previous institution, they must spend a minimum of four semesters on the Cornell campus in Ithaca enrolled in the College of Arts and Sciences. Transfers from other colleges at Cornell must spend four semesters on campus in Ithaca as students in the Internal Transfer Division or in the college.

Approved study abroad, SEA Semester, Urban Semester, and Cornell-in-Washington are considered semesters of residence, but not as semesters on the Cornell campus. Students may spend no more than two semesters on such programs and must be on campus during their last semester.

Semesters of extramural study In Cornell's Division of Continuing Education, semesters of study at other institutions while on leave from Cornell, and summer sessions anywhere do not count as semesters of residence.

### Acceleration

Some students decide that they do not need eight semesters of residence to obtain a solid undergraduate education. These students must compress the first four semesters and spend four full semesters in the major. Benefitting from opportunities for advanced, seminar, and independent (sometimes honors) work is what best characterizes undergraduate education in the college. Students considering acceleration should discuss their plans with their major adviser.

Accelerants apply to graduate one semester before their intended new graduation date. They obtain an "Application to Graduate" for this purpose in the Office of Undergraduate Admissions and Advising, 55 or 172 Goldwin Smith Hall.

. Accelerants must meet either condition *a* or *b*:

- a. Complete 60 credits before beginning their last four semesters in the college and complete the prerequisites for admission to the major in time to spend *four* semesters in the major.
- b. Pass 48 credits in College of Arts and Sciences courses numbered "300" and above. Upper-level courses taken in other colleges at Comell University may count as College of Arts and Sciences credit only if approved for the major.
- All accelerants are required to complete 100 credits at Cornell at "C" (not C-) or above. Courses completed with a grade of "S" will count toward the 100 credits. Advanced placement credits do not count toward this requirement.
- 3. Students may not use credits earned while on leave of absence to reduce their terms of residence.
- 4. Accelerants may not finish the degree with credits earned in summer or winter session, through part-time study (unless they meet the guidelines for part-time study), or at an off-campus program, including Cornell-in-Washington, SEA Semester, Urban Semester, or study abroad. That is, they may not exit through any program other than a regular, fulltime Cornell semester in Ithaca.

Students matriculating as freshmen may not compress their undergraduate education into fewer than six semesters of residence. Transfer students, both from other institutions and from other colleges at Cornell, must satisfy the eight semester residence requirement and must spend at least four semesters in the college on campus in Ithaca.

### Ninth term

Students who can graduate in eight semesters should do so. If a worthy academic plan for a full ninth or tenth semester is approved, the student enrolls in the college as a special student for the additional work. Such a status allows enrollment in a full schedule of courses for full tuition and full use of campus resources, but allows financial aid only from loans or outside agencies, not from Cornell funds. Students who need only a part-time schedule of courses in a ninth or tenth term in order to graduate should complete the outstanding courses as part-time students paying prorated tuition. Students may spend a ninth term with Cornell aid only with permission of the Committee on Academic Records. Such permission is normally granted only to:

- Students who have been ill or experienced other untoward circumstances beyond their control.
- 2) Students who were academically underprepared for the curriculum at Cornell and needed to begin with a lighter schedule of courses than normal. (See Dean Turner, Office of Undergraduate Admissions and Advising, 55 Goldwin Smith Hall, about this option.)

### Part-time study

Students in good academic standing may take a personal leave of absence and enroll in the Division of Continuing Education, but such semesters of extramural study do not count as terms of residence and credits from such semesters may not be used to reduce the terms of residence.

### Part-time study in special circumstances

The college and university support students (with financial aid and services) as best they can to make full-time study possible. Occasionally, however, extraordinary but nonfinancial personal, academic, or medical circumstances make becoming a part-time student necessary and appropriate. Students in good academic standing who face extraordinary situations may petition the Committee on Academic Records for part-time status and proration of tuition in the college.

Students requesting part-time status because of documented disabilities that, under the Americans with Disabilities Act, require appropriate accommodations, should discuss their situation with Dean Walbridge. Otherwise, students should meet with a dean of their class.

### Part-time study in final semester

Students may complete their degrees as parttime students paying prorated tuition at Cornell after fewer than eight semesters of full-time residence only if:

- 1) They have completed all requirements by the end of the sixth or seventh term, met the criteria for accelerated graduation, and are remaining to complete study beyond what is required for the degree.
- 2) They are writing an honors thesis in the eighth semester and can complete all degree requirements by taking two courses, one of which is the thesis itself. They must register for the thesis and at least one additional course.

Students must obtain approval of an advising dean and complete the pro-rated tuition form in the semester *prior* to the part-time semester and confirm their status and registration with college registrar Sally O'Hanlon in 55 Goldwin Smith Hall.

### **Courses and Credits**

### **Counting courses and credits**

Students must complete at least 34 courses to graduate-that is, an average of four courses during each of six semesters and five courses during each of two semesters. A three- or four-credit course counts as one course; a two-credit course counts as one-half course. Single-credit courses do not count as part of the 34 except in certain cases when they form a part of a series and two in the same series can be aggregated to count as one-half course (certain offerings in the Departments of Music and of Theatre, Film and Dance fall into this category). Three one-credit courses do not aggregate to count as one course. A six-credit language course counts as 1 1/2 courses, while the summer Falcon Programs in Asian languages count as eight credits and two courses each. Archaeology and geology fieldwork for more than six credits counts as two courses each. BIOGD 281 counts as 1 1/2 courses. Other five- or six-credit courses count as one course. AP exam scores that result in an award of three or four credits count as one course; those in language that result in six credits count as 1 1/2 courses; those in biology that result in six or eight credits count as two courses.

Students must also complete 120 credits, 100 of which must be from courses taken in the

College of Arts and Sciences. Liberal arts courses approved for study abroad during a semester or academic year of full-time study (not summer study) and courses taken in certain off-campus Cornell residential programs may be counted toward the 100 credits required in the college. Advanced placement credits, credits earned in other colleges at Cornell, or credits earned in any subject at institutions other than Cornell do not count as part of the 100. The only exceptions to the above restrictions are for courses (usually no more than three) that certain departments accept from other colleges at Cornell as fulfilling major requirements and for up to two courses that an adviser accepts as part of a completed and formally established cross-college, interdisciplinary concentration.

## Using courses towards more than one requirement

A course may fulfill more than one college requirement in the following situations:

- A course may be used to fulfill a distribution requirement and also a major requirement (except as noted under previous section of restrictions on applying AP credits, transfer credits, and Cornell courses to distribution requirements).
- 2) A one-semester course in foreign literature (not language) that is acceptable for achieving proficiency in that language may also be used as a partial fulfillment of the distribution requirement in the humanities and the arts.
- Courses may count toward breadth requirements and toward any other requirement except First-Year Writing Seminars.
- 4) Courses in a second major may count as electives.

### Auditing

The college encourages its students to take advantage of its rich curriculum by sitting in on courses that interest them but that they prefer not to take for credit. As long as the instructor agrees, students are welcome to visit courses. Small seminars and language courses are sometimes not open to visitors. Audited courses do not appear on the student's schedule or transcript.

### **Repeating courses**

Students occasionally need to repeat courses. If the instructor certifies that the course content has been changed, credit will be granted a second time. If the content has not changed, both grades nontheless will appear on the transcript and be included in any average that is calculated, but credit will be counted toward the degree only once; students considering repeating a course under this circumstance should discuss the matter with their adviser and an advising dean. Students who plan to repeat a course submit a petition to the college registrar, Sally O'Hanlon, 55 Goldwin Smith Hall. If the original course grade was F, no petition is necessary.

## Courses that do not count toward the degree

The college does not grant credit toward the degree for every course offered by the university. Courses in military training, training as emergency medical technician, service as a teaching assistant, physical education,

remedial or developmental reading, precalculus mathematics (including Education 115), supplemental science and mathematics offered by the Learning Strategies Center, English as a second language, keyboarding, and shorthand are among those for which degree credit and credit toward the 12 credits required for good academic standing are not given.

Students enrolled in courses for undergraduate teaching assistants may petition once to have the nondegree credits count towards good academic standing. This would allow continued eligibility for graduating with distinction in all subjects, but would disqualify the student from being on the dean's list that semester.

### Advanced placement credit

See p. 6–11. Advanced placement credit counts as part of the 120 credits and 34 courses required for the degree. It does not count as part of the 100 credits required in Arts and Sciences; its application to distribution requirements is restricted, as explained under "Distribution."

### Summer session credit

A student may earn credit toward the degree by completing courses in Cornell's summer session or by successful petitioning for credit for summer courses at other colleges. Students should consult their advisers regarding summer study plans.

Credit for summer courses not taken at Cornell must be approved by the appropriate Cornell department. Approval forms and information are available on-line, www.arts.cornell.edu, and in the Office of Undergraduate Admissions and Advising, 55 or 172 Goldwin Smith Hall. Transcripts for completed work at other institutions must be sent to Robin Perry, 172 Goldwin Smith Hall. Credit approved for summer courses away from Cornell (including summer or orientation programs abroad) counts toward the 120 credits and 34 courses required for the degree, but does not count toward the 100 credits required in the college. It may be applied to part of the Group I and II distribution requirements, to elective requirements (but not to breadth requirements) and to major requirements (with the approval of the department).

Entering students who want to receive credit toward the degree for courses completed before matriculation in a summer session away from Cornell should obtain approval forms as soon as possible and have transcripts sent to Robin Perry, 172 Goldwin Smith Hall. Credits completed in Cornell summer sessions will be awarded automatically.

Summer session at Cornell or elsewhere does not count toward the eight-semester residence requirement.

### Transferring credit earned away from Cornell while on leave of absence

Students may petition to transfer credits from other accredited institutions for work completed while on leave of absence. Petitions are available in 55 and 172 Goldwin Smith Hall and at www.arts.cornell.edu. The relevant department will decide whether the course is comparable to Cornell courses. Credit approved for transfer counts as part of the 120 required for graduation and as part of the 34 courses. It does not count among the 100 credits required in Arts and Sciences and cannot be used to graduate in fewer than eight semesters. Its application to distribution and breadth requirements is restricted as described under "Distribution."

### Transferring credit (for transfer students from another institution or from another Cornell college)

Transfer students must satisfy all normal requirements for the degree, including eight semesters of full-time study. They may never complete fewer than 60 credits and 16 courses at Cornell nor be in residence in the college for fewer than four regular semesters (summer session does not count toward the residence requirement). The college evaluates credit and residence earned either at another school or college at Cornell University or at another accredited institution of collegiate rank and determines the number of credits and courses the student may apply toward the various requirements for the Bachelor of Arts degree at Cornell. In addition, it reevaluates advanced placement credit allowed by another institution, including another college at Cornell. Evaluations of transfer credits are normally provided when students are notified of their admission.

### SPECIAL ACADEMIC OPTIONS

### **Degree Programs**

The following five programs allow students to alter the regular college or major requirements or to work toward more than one degree.

### **College Scholar Program**

The College Scholar Program frees up to 40 students in each class from the usual college requirements for a degree and allows them to design their own course of study. It is meant to serve students whose interests and talents would benefit from a little more academic freedom than other students have, who demonstrate exceptional promise, and who show the maturity to plan and carry out, with the help of their adviser, a well-designed program of studies. College Scholars design idiosyncratic programs: some pursue diverse interests; others integrate a variety of courses into a coherent subject.

College Scholars must complete 120 credits of course work (100 in the college), 34 courses, and, unless they receive permission from the program to accelerate, eight full terms of undergraduate study. They must also complete the university's physical education requirement. All College Scholars must complete a senior project. They are not required to complete or fulfill the general education requirements, although members of the College Scholar Advisory Board believe that the spirit of those requirements is a good one.

Each applicant to the College Scholar Program is asked to write an essay, which is due the last Wednesday in April of the freshman year. Mid-year freshmen apply by that date in their first spring semester in the college. Students should contact Dean Ken Gabard, Office of Undergraduate Admissions and Advising, 55 Goldwin Smith Hall, for further information.

### **Dual-Degree Program with Other Colleges**

The Dual-Degree Program enables especially ambitious undergraduate students to pursue programs of study in two colleges. Dualdegree candidates may earn both a Bachelor of Arts degree from the College of Arts and Sciences and: (1) a Bachelor of Science degree from the College of Engineering; or (2) a Bachelor of Fine Arts degree from the Department of Art in the College of Architecture, Art, and Planning; or (3) a Bachelor of Science degree in urban and regional studies from the Department of City and Regional Planning in the College of Architecture, Art, and Planning; or (4) a Bachelor of Science degree in architectural history from the Department of Architecture in the College of Architecture, Art, and Planning. Students enter one of these colleges as freshmen or sophomores and begin the Dual-Degree Program with the second college in the second or, in some cases, the third year. The Dual-Degree Program ordinarily takes five years to complete, and students are eligible for ten semesters with financial aid. For further information contact the Office of Undergraduate Admissions and Advising, 172 Goldwin Smith Hall.

### Independent Major Program

The Independent Major Program allows students to design their own interdisciplinary majors and pursue a subject that cannot be found in an established major. Proposals for an independent major must be equivalent in coherence, breadth, and depth to a departmental major, well suited to the student's academic preparation, and consistent with a liberal education. Proposals must also be supported by a faculty adviser and are assessed by a board of faculty members. Independent majors substitute for established majors, but students must still satisfy all the other requirements for the bachelor's degree. Students should contact Dean Lynne Abel, Office of Undergraduate Admissions and Advising, 172 Goldwin Smith Hall, for further information. Deadlines for submitting independent major proposals are listed on the calendar supplement for the College of Arts and Sciences.

### Double Registration with and Early Admission to Professional Schools

Registration in the senior year of the College of Arts and Sciences and the first year of Cornell Law School or the Johnson Graduate School of Management, is occasionally possible. A very few exceptionally wellprepared students who have earned 105 credits before the start of the senior year and have been accepted by one of the abovenamed professional schools may be permitted to register simultaneously in the college and in one or another of these professional schools during the seventh and eighth terms. They earn the A.B. degree after the first year of professional school.

Students with eight or fewer credits and two or fewer courses to complete may apply to enter the Master's of Engineering program during (but no earlier than) their eighth semester; dual-degree students may enter this program no earlier than the ninth semester. They earn the bachelor degree(s) after one semester of graduate school.

Students interested in the joint program with the Law School or the Graduate School of Management, or in early admission to the Master's of Engineering program should apply to the relevant program. All candidates should confirm their eligibility with an advising dean, Office of Undergraduate Admissions and Advising, 172 Goldwin Smith Hall. Double-registered students must, of course, complete all requirements for the A.B. degree, including 100 credits in Arts and Sciences courses.

### **Teacher Education**

Students at Cornell may pursue teaching credentials in agriculture, biology, chemistry, earth science, general science, mathematics, and physics. Cornell students from any college are encouraged to apply for admission to the Cornell Teacher Education Program during their sophomore or junior year. Those who are admitted complete their undergraduate major in an agricultural science, mathematics or one of the sciences, while taking education courses. They are then able to complete a Master of Arts in Teaching (MAT) in one year and earn certification in New York State.

For more information, contact the Program Coordinator at 255–9573.

### Special-Interest Options

The following options enable students to pursue special interests within the usual degree programs.

### Concentrations

Established interdisciplinary concentrations, described in alphabetical order along with departments in the pages following, provide structures for organizing electives. Completed concentrations are noted on the transcript.

### **Informal Minors**

Some students organize electives within a discipline or department in Arts and Science or another college. Such informal minors can be developed with the help of the departmental directors of undergraduate studies. They are not noted on the transcript.

### Independent Study

Independent study affords students the opportunity to pursue special interests or research not treated in regularly scheduled courses. A faculty member, who becomes the student's instructor for the independent course, must approve the proposed study and agree to provide continuing supervision of the work. Students must prepare a proposal for independent study (proposal forms are available on-line at www.arts.cornell.edu and in the Office of Undergraduate Admissions and Advising, 55 and 172 Goldwin Smith Hall). In one semester students may earn up to six credits with one instructor or up to eight credits with more than one instructor.

### **Undergraduate Research Program**

An excellent way to benefit from being an undergraduate at a research university, at Cornell in particular, is to become an apprentice in on-going faculty research. About 400 students participate each year in creating new knowledge and earn independent study credit for what they learn and contribute. They sharpen their critical and creative abilities and test their interest in pursuing a research career. Sometimes they publish their work.

The Undergraduate Research Program gathers information about research opportunities in most disciplines of the liberal arts and sciences, guides students in finding further opportunities—on campus and elsewhere and during the academic year and the summerand helps students prepare for research and presenting themselves as candidates for apprenticeships. Other students locate research opportunities independently through faculty whose courses they have taken, through their major departments, or through published materials.

The Cornell Undergraduate Research Board, an undergraduate organization, conducts an annual open house to help students get started in research and an annual forum at which undergraduates present their work.

Students interested in this program should consult the Office of Undergraduate Admissions and Advising, 172 Goldwin Smith Hall.

### Language Study

### FALCON (Full-Year Asian Language

**Concentration).** FALCON allows students who are interested in the Far East to study Chinese or Japanese exclusively for one year. They gain proficiency in the language and familiarity with the culture. Students who are interested in the Far East should be aware of the opportunities to pursue rapid and thorough beginning studies on campus with the objective of studying abroad in China or Japan. Students interested in this program should contact the Department of Asian Studies, 388 Rockefeller Hall; e-mail: falcon@cornell.edu.

### Language House Program

A complement to classroom cultural and linguistic instruction, the Language House Program combines residential and academic opportunities for developing and practicing conversational skills in French, German, Italian, Japanese, Mandarin Chinese, and Spanish. It helps prepare students who plan to study abroad and helps returning students share their cultural experiences while further increasing their language skills. Students interested in this program should see Academic Administrator Daniel Evett, 136 Goldwin Smith Hall.

### **Prelaw Study**

Law schools seek students with sound training in the liberal arts and sciences; they neither require nor prefer any particular program of study. Students should therefore study what they love and do well. While doing that, they should also develop their powers of precise, analytical thinking and proficiency in writing and speaking. Students in the College of Arts and Sciences who are applying to law school may consult a career adviser in the Office of Arts and Sciences Career Services, 61 Goldwin Smith Hall.

The college offers a concentration in law and society. This program offers a broad scope, complements almost any major, and attracts many students not intending to become lawyers as well as a subset of those intending to.

### **Premedical Study**

The breadth and depth afforded by a liberal arts education are invaluable for students planning medical careers, whether they intend to practice or go into research. Such training has a profound effect on the doctor's understanding of the world and hence usefulness to patients, and it affords the flexibility of mind that is needed for major research undertakings. Medical and dental schools do not prescribe or even prefer a particular major; they do, however, require particular undergraduate courses, and most students are well advised to begin chemistry in their freshman year. Students who are interested in medical careers are urged to visit the Health Careers Office, 203 Barnes Hall.

The adviser for students in the College of Arts and Sciences who are planning careers in medicine is Dean Janice Turner, Office of Undergraduate Admissions and Advising, 55 Goldwin Smith Hall.

### **Off-Campus Programs**

Many students find it important to their majors or to their overall academic programs to study off campus or abroad for one or two semesters. When it makes academic sense, the college encourages its students to pursue such studies and grants credit toward the degree for work satisfactorily completed. It discourages students from participating in more than one off-campus program.

### Study Abroad

Each year about 200 undergraduates in Arts and Sciences include semester- or year-long study abroad as part of their formal undergraduate education. Ideally, study abroad builds on a broad liberal arts background in the early semesters: area studies, language training, and preparation in the proposed field of study are all essential.

Many students go abroad to pursue work in their majors. Focused academic work in an appropriate institution abroad can prepare students for advanced study or honors work in the final semesters back in Ithaca.

The college insists wherever possible on study at foreign institutions alongside their degree candidates rather than study in self-contained programs that offer **courses specially designed for foreigners**. The primary goals of this cultural immersion are to learn firsthand the modes of inquiry, methods of analysis, and educational values of higher education offered to students of another country and to involve students in social relationships with peers who may hold a new and unexpected range of social attitudes.

The college advocates study abroad that enables students to become competent enough in another language to experience daily life, develop social relationships, and accomplish formal course work in that language. Students who intend to study abroad in a country where the host language is not English must demonstrate a serious commitment to learning the language through course work before studying abroad; specific language requirements may vary, but most programs require two semesters of 200level language instruction. At least one area studies course or one course in the history, culture, economics, politics, or social relations of the country of destination must be part of every student's preparation for study abroad.

Students planning to study abroad need solid academic credentials to do so productively and successfully. The college requires a minimum overall grade point average of 3.0 for all Cornell course work and good academic standing in the semester immediately before going abroad. Study abroad is possible during the sophomore and junior years or during the first semester of the senior year. Study abroad in the final semester is rarely approved. Important steps to prepare for study abroad include

- substantial progress with college distribution requirements;
- admission to a major and a faculty adviser in the major;
- clear academic agenda for study abroad;
- appropriate preparatory study of the country or region of destination, especially language study.

Study abroad can earn up to 15 liberal arts and sciences credits per semester of full-time course work as long as the curriculum abroad is consistent with that of the college. A maximum of 10 credits is awarded for each trimester of study. Courses that fall outside the scope of the liberal arts and sciences may earn non-Arts credits. Students must carry a full course-load as defined by the host institution. Students may spend up to two semesters abroad. Only those with compelling academic reasons may study in more than one location over two semesters. The college does not approve study abroad that tours more than one country or that is more touristic than scholarly in content and structure. Students must continue study of the host language while abroad. Only in exceptional circumstances will the college approve programs which, in non-English speaking countries, provide no language training.

Applications to study abroad must have the support of a faculty adviser in the major and the approval of Dean Pat Wasyliw in the Office of Undergraduate Admissions and Advising, 55 Goldwin Smith Hall. Although students investigate options for study abroad and submit final applications through the Cornell Abroad office, Arts and Sciences applicants submit to the college an essay describing the academic rationale for study abroad, an outline of prospective courses to be taken and any other relevant materials.

All courses taken abroad will appear on the Cornell transcript and grades earned are reported in the system of the host institution. Grades earned through course work abroad do not, however, become part of the Cornell grade point average.

Students who transfer to Cornell and must complete at least four semesters of residence on campus in Ithaca may not study abroad as one of those four semesters.

All applicants for study abroad during the academic year must go through the Cornell Abroad Office after being approved by the College of Arts and Sciences. For more information see Dean Wasyliw, 55 Goldwin Smith Hall.

### Summer Residential Programs in Archaeology

During the summer months students may participate in a Cornell-sponsored archaeological project. In recent years the program has organized archaeological projects in Central America, Greece, Israel, Italy, and New York State. Students should contact the Archaeology Program for information about the sites currently available.

### **Marine Science**

Shoals Marine Laboratory is a seasonal field station that offers a variety of courses and experiences designed to introduce undergraduates to the marine sciences. The laboratory is located on Appledore Island, six miles off the Maine/New Hampshire coasts. Students should contact the Shoals Marine Laboratory Office, G14 Stimson Hall, for further information.

### Cornell in Washington

The Cornell in Washington program offers students from all colleges in the university an opportunity to earn full academic credit for a semester in Washington, D.C. Students take courses from Cornell faculty, conduct individual research projects, and work as externs. The Cornell in Washington program offers two study options: (1) studies in public policy, and (2) studies in the American experience. The program also offers unique externship opportunities: students serve as externs in a federal agency, congressional office, or non-governmental organization and take part in a public policy or humanities seminar. They define and carry out individual research projects under the supervision of Cornell faculty. Potential externships are arranged through, and approved by, the Cornell in Washington program. For further information, see p. 20 or inquire at 311 Caldwell Hall, 255–4090. Study in Washington during a final semester of residence is allowed only and unusually by petition. Students should consult with the dean of seniors, Office of Undergraduate Admissions and Advising, 172 Goldwin Smith Hall.

### Fieldwork

Sometimes it is appropriate for students to include fieldwork as part of their major. A three-member faculty committee helps the student plan the project, arranges for ongoing supervision, and evaluates the project at the end of the term. Fieldwork almost always involves writing a long paper or several short ones, as well as practical experience. All proposals for fieldwork must be presented in advance to the college faculty's Committee on Academic Records for approval. A maximum of 15 credits in fieldwork may be earned. For further information students should contact an advising dean in Office of Undergraduate Admissions and Advising, 55 or 172 Goldwin Smith Hall.

### ACADEMIC INTEGRITY

Academic integrity is the heart of intellectual life—both in learning and in research. All members of the university community simply must support each other's efforts to master new material and discover new knowledge by sharing ideas and resources, by respecting each other's contributions, and by being honest about their own work. Otherwise the university will fail to accomplish its most central and important goals.

Cornell's Code of Academic Integrity and policy about acknowledging the work of others are among the documents new students receive. Students should read them carefully and not assume they understand what integrity and cheating are and are not. Academic integrity implies more here at the university than it usually did in high school. The standards of integrity are those that prevail in professional life. This means that students must acknowledge and cite ideas they adopt from others (not just direct quotations) and help they receive from colleagues. With productive emphases on collaborative learning and writing, students must understand the general standards and policies about academic integrity and be sure they understand the expectations in individual courses as well. When in doubt, ask the instructor.

### **ADVISING**

The following advisers and offices provide academic advising, help with problems, and information on college procedures and regulations.

### **Faculty Advisers**

Each new student is assigned a faculty adviser. Advisers help students plan programs of study and advise them about ways to achieve their academic goals. Advisers may also help students with study or personal problems or may direct them to other offices on campus where help is available. Academic difficulties may frequently be solved or avoided if students and advisers recognize and address problems early.

Advisers and new advisees meet first during orientation week to discuss course selection. New students are encouraged to see their advisers again early in the term, before it is too late to drop courses, to discuss their academic progress and to become better acquainted. Advisers and advisees meet at least once each semester to discuss courses for the following term, and more often if advisees wish to discuss academic or personal issues or to petition for an exception to college rules.

### **Student Advisers**

Student advisers pass on lore about the college and life at Cornell and help new students understand requirements and negotiate the university.

### **Major Advisers**

After acceptance into a major, students are assigned a major adviser, a faculty member in the major department, with whom they shape and direct their course of study. The adviser eventually certifies the completion of the major. The major adviser should be consulted by the student about all academic plans, including honors, study abroad, acceleration, and graduate study. The adviser's support is especially important if a student petitions for an exception to the requirements for the degree.

# Office of Undergraduate Admissions and Advising

This office, 55 Goldwin Smith Hall, 255–5004 and 172 Goldwin Smith Hall, 255–4833, is a resource for faculty and student advisers and especially for students themselves and their parents. Advising deans are available to help students define their academic and career goals, to help with special academic options and exceptions to college rules, and to help when problems arise: Lynne S. Abel, associate dean for undergraduate admissions and advising and Independent Major Program—255–3386

Yolanda Clarke, internal transfers and minority students-255-5004

Maria Davidis, first- and second-year students and Dean's Scholars, Cornell Presidential Research Scholars and Mellon Minority Fellows—255–5004

David Devries, juniors and seniors and undergraduate research—255-4833

Daniel Evett—Language House Program— 255–6543

Stephen Friedfeld, mid-year freshman and student ambassadors-255-4833

Ken Gabard, first- and second-year students and College Scholar Program-255-5004

Lisa M. Harris, career services and pre-law advising-255-6926

Irene Komor, career counselling-254-5295

Lawrence Lamphere, internal transfers and minority students-255-4833

Diane J. Miller, career services-255-6924

Sally O'Hanlon, registrar-255-5051

Janice Turner, minority students and pre-med advising-255-9497

Peggy Walbridge, transfer students and students with disabilities—255–4833

Catherine Wagner, juniors and seniors and dual degree students-255-4833

Patricia Wasyliw, first- and second-year students, study abroad and student advisers— 255–5004

# REGISTRATION AND COURSE SCHEDULING

### Enrollment in Courses in the College of Arts and Sciences

### **New Students**

During orientation week, new students attend briefings and other information sessions, meet with faculty advisers, and sign into courses. The college reserves spaces in courses for its in-coming students.

### Continuing Students

Continuing students select and schedule up to five courses of 3 or more credits and as many 1 and 2 credit courses as they would like during the semester prior to the one in which the courses will be taken. Students who do not "pre-enroll" during the designated period must wait until the beginning of the term and may have difficulty securing places in the courses they most want. Before signing into courses, students plan their programs and discuss long-range goals with their faculty advisers. In addition, all students are welcome to discuss programs and plans with an advising dean in the Office of Undergraduate Admissions and Advising, 55 or 172 Goldwin Smith Hall.

At the beginning of each term, students find their schedules and should confirm the accuracy of their records on "Just the Facts."

### Limits on Numbers of Courses and Credits

To meet the 34-course requirement, students must normally take four courses during each of six semesters and five courses during each of two semesters. To meet the 120-credit requirement, students must average 15 credits per semester. (AP credit and/or summer credits may reduce the average numbers of courses and credits required each semester.)

### Minimum number of credits per semester

To maintain good academic standing as a fulltime student, students must complete at least twelve degree credits per semester; if for compelling personal or academic reasons students need to carry fewer than 12 credits, they should consult their faculty adviser and an advising dean. Permission is by petition only; it is freely given for first-semester students.

### Maximum number of credits per semester

First-term freshmen must petition to register for more than 18 credits; other students may register for more than 18 credits if their previous term's average was 3.0 or higher and they are in good academic standing. No more than 22 credits may be taken in a regular semester without permission of the college faculty's Committee on Academic Records. Students who fail to receive approval for excess credits from the committee may count only 18 credits for the semester toward the degree.

### Attendance

Attendance in classes is expected. Absences are a matter between students and their instructors. If a student cannot attend classes because of illness or family crisis, the Office of Undergraduate Admissions and Advising will notify instructors at the request of the student or the family. Nonetheless, the student must arrange to make up examinations or other work with each instructor. A student who will be absent because of religious holidays or athletic competitions must discuss arrangements for making up work with his or her instructors well in advance of the absence. A student who must miss an examination must also consult with the professor in advance. Alternative arrangements are at the discretion of the instructor.

Student athletes should discuss scheduled absences with their instructors at the beginning of the term. Courses vary in their tolerance of absences. Instructors are not obligated to approve absences for purposes of participating in extra-curricular activities, although most will be as flexible as is sensible.

### Adding and Dropping Courses

After course enrollment (also known as preenrollment), students may not adjust their schedules until the new term begins. During the first three weeks of the semester, students may change courses without petitioning. Add/ drop forms are available in the Office of Undergraduate Admissions and Advising, 55 or 172 Goldwin Smith Hall. (Note: the add period for First-Year Writing Seminars is only two weeks.)

After the third week of classes, students must petition to add courses and may normally add them only for a letter grade. They may drop courses through the seventh week of the term, if the department approves and no issue of academic integrity is at stake. Between the seventh and twelfth weeks students may petition to withdraw from courses, if (1) the instructor approves; (2) the adviser approves; (3) an advising dean approves; and (4) no issue of academic integrity is at stake. Students must meet with an advising dean to obtain petition forms.

Courses officially dropped after the seventh week will be noted on the transcript by a "W" where the grade would normally appear. **This** is a matter of record and cannot be petitioned. Petitions to withdraw from courses may not be submitted after the end of the twelfth week in the term. Deadlines for short courses will be adjusted according to the length of the courses.

The effective date of all course changes will be the day the student submits all completed paperwork to the Academic Advising Office.

#### Leaves of Absence

Taking time off from college to gain experiences or funds or to find direction is sometimes useful. Usually, of course, students take leaves at the end of a semester for the following semester. Students in good – academic standing, however, may take a leave as late as the seventh week of a semester, although there are serious financial consequences to taking leaves after a term has begun. Five years is the maximum length of time a student may be on leave and return without special permission. Leaves of absence are of four types:

- Personal leaves impose no conditions concerning reentering the college except for the five-year limit. Readmission is automatic upon written request made at least one month before the beginning of the term in which the student wishes to return.
- 2) Medical leaves, usually for at least six months, are granted by the college only on recommendation by University Health Services. In some cases, students must satisfy the UHS that the condition requiring the leave has been corrected before they may return. The student's academic standing will also be subject to review at the time of the leave and on return.
- 3) Conditional leaves are granted when the student is not in good academic standing or, in unusual circumstances and with the approval of the college faculty's Committee on Academic Records, between the seventh and twelfth weeks of the term. In consultation with the student, an advising dean and the Committee on Academic Records set the conditions for the student's return. Normally students may not return from conditional leaves for at least two terms or until specific and individual conditions, such as completing unfinished work, have been met. Students may be granted conditional leaves after the twelfth week of a term only under extraordinary circumstances and with the approval of the faculty's Committee on Academic Records.
- 4) Required leaves: The Committee on Academic Records may require a leave of absence if a student is not making satisfactory progress toward the degree. See the section "Academic Actions."

Any student who wishes to take a leave of absence should consult an advising dean in the Office of Undergraduate Admissions and Advising, 55 or 172 Goldwin Smith Hall. On readmission, the student's graduation date will be recalculated.

### **Transferring Credits Earned While on Leave**

Students who take courses elsewhere in the United States while on leave may petition to have credits transferred. Approval depends on acceptable grades and the judgment of the relevant departments about the quality of the courses. If approved, these credits may be applied toward the 120 credits and 34 courses needed for graduation, but not toward the 100 credits required in the college. They may be applied to part of Group I and II distribution requirements (not to Group III or IV), to elective requirements (but not to breadth requirements) or to the major as allowed by the department. Credits earned during a leave do not count toward the eight semesters of residence and may not be used to reduce the terms of residence below the required eight. See the section "Residence."

# Study Abroad and International Students on Leave of Absence

Study abroad undertaken during a leave of absence will not receive academic credit. International students on leave of absence from the College of Arts and Sciences may enroll in courses at a college or university in their home country **only**, as such enrollment is not defined as study abroad. They may petition for transfer of credit upon return to Cornell. If approved, the credit will count as described in the previous paragraph.

### Withdrawals

A withdrawal is a permanent severance from the university and from status as a degree candidate. Students planning to withdraw should consult an advising dean. Students not requesting a leave and failing to register for a term will be withdrawn from the college. The college faculty's Committee on Academic Records may require a student to withdraw for a highly unsatisfactory academic record.

### Transferring within Cornell (Internal Transfer)

Internal transfer from one college or school at Cornell into another is attractive for many students whose intellectual interests change (or become more focused). Students who want to transfer should discuss their eligibility with a counselor in the new school or college.

In some cases, students who want to transfer into the College of Arts and Sciences may transfer directly. In other cases, they may be referred to the Internal Transfer Division. During the term immediately preceding transfer into the College of Arts and Sciences, students should complete at least 12 credits of courses in the College of Arts and Sciences with a 3.0 average and without any grades of Incomplete, any S-U grades (unless only S-U grades are offered for that particular course). or any grades below C. Satisfying this minimum requirement does not, however, guarantee admission. Admission to the college is based on consideration of the student's entire record at Cornell and the high school record, not just the work of one semester. It is also based on ability to complete the A.B. degree within a reasonable time. Internal transfers are required to spend four semesters

in Arts and Sciences and thus should initiate the transfer process no later than the second semester of sophomore year. Interested students should see Dean Lamphere, 172 Goldwin Smith Hall or Dean Clarke, 55 Goldwin Smith Hall.

### ACADEMIC STANDING

Students are in good academic standing for the term if they successfully complete at least 12 degree credits by the end of the term and earn no more than one D and no F or U grades. If a student completes only three courses, all grades must be above D. In addition, students are expected to make satisfactory progress toward satisfying requirements for the degree and to earn grades of C (not C–) or better in at least 100 of the 120 credits for the degree. Courses listed under "courses that do not count toward the degree" do not count toward good academic standing in a semester.

### Academic Actions

Students who are not in good academic standing will be considered for academic action by the college faculty's Committee on Academic Records or by one of the advising deans of the college. Students are urged to explain their poor academic performance and submit corroborating documentation. Students may appeal a decision or action of the committee, if they have new relevant information. They must consult an advising dean about appealing.

### Warning

Any student who fails to maintain good academic standing will, at a minimum, be warned. A warning is posted on a student's college record but is not reported to the university registrar and does not appear on official transcripts.

### **Required leave of absence**

A student in serious academic difficulty may be required by the faculty Committee on Academic Records to take a leave of absence, normally for a full year. Usually, but not always or necessarily, the Committee on Academic Records warns students before suspending them. Before being allowed to return and reregister in the college, students must document what they did on leave and how they resolved their problems and submit a plan for completing the degree. In some cases students will be required to furnish evidence that they are ready to return or satisfy other conditions before being allowed to reregister in the college. Students who request to return in less than a year must present to the committee extraordinarily convincing evidence of their readiness to return. "Required leave" and the date are posted on the student's official transcript.

### **Required withdrawal**

The faculty Committee on Academic Records may dismiss a student from the college because of a highly unsatisfactory record for one term or for failure to make satisfactory overall progress in grades, credits, or degree requirements. This action expels the student permanently from the college. "Required withdrawal" and the date are posted on the student's official transcript.

### **Forgery on Forms**

Forging signatures or credentials on college forms is an academic offense; sometimes it constitutes academic fraud. In all cases of forgery on academic forms, the effect of the forged documents shall be negated. Students may then petition properly to do whatever they attempted to do improperly. Such incidents will be recorded in the Academic Integrity Hearing Board's confidential file for forgeries. If a student forges more than once or if the forgery would advance the student's academic standing unfairly or fraudulently, or if for any other reason the situation requires some response in addition to the uniform penalty, the Academic Integrity Hearing Board might recommend further action, such as a notation on the student's transcript, suspension, or dismissal,

### GRADES

### **Letter Grades**

See Grading Guidelines, page 14.

### S-U Grades

The S-U (satisfactory-unsatisfactory) option allows students to explore unfamiliar subjects or take advanced courses in subjects relatively new to them without being under pressure to compete with better prepared students for high grades. Students are expected to devote full effort and commitment to a course and complete all work assigned in a course they take for an S-U grade. The S-U option is contingent upon the instructor's willingness to assign such grades. Students must select their grading option and obtain the instructor's approval for the S-U option during the first three weeks of the term. Virtually no exceptions to this deadline are permitted, and consequently students adding courses after the third week of the term must normally add them for a letter grade. A grade of S is equivalent to a grade of C- or higher, a grade of U, which is equivalent to any grade below C-, is a failing grade equal to an F. S means the student receives the credit specified for the course. U means no credit is given. A few courses in the college are graded exclusively S-U; in that case, the final grade appears on the transcript as SX or UX.

Courses that will count toward satisfaction of major requirements should not be taken for an S-U grade unless the department grants permission. Students may elect the S-U option in courses used to satisfy the distribution, and elective requirements, provided that such courses do not also count toward major requirements or serve as prerequisites for admission to the major. First-year writing seminars and many language courses disallow the S-U option. In any case, students are advised to use the S-U option sparingly, if they intend to apply to graduate school or for transfer to another college. There is no limit on the number of courses each term for which students may elect the S-U grade, but within the 120 credits required for the degree, a minimum of 80 credits must be in courses for which a letter grade was received.

### **Grades of Incomplete**

A grade of incomplete signifies that a course was not completed before the end of the term for reasons beyond the student's control and acceptable to the instructor. Students must have substantial (normally at least 50 percent) equity in the course, be able to complete the remaining work without further registration, and have a passing grade for the completed portion. When a grade of incomplete is reported, the instructor submits a form stating what work must be completed, when it must be completed, and the grade (or "frozen" incomplete) earned if the work is not completed by that date. When a final grade is determined, it is recorded on the official transcript with an asterisk and a footnote explaining that this grade was formerly an incomplete.

Students must resolve (make up or "freeze") any incompletes with their instructors before graduation.

### Note of R

R designates two-semester or year-long courses and students enroll in the course both semesters, each time for the full number of credits for the whole course. The R is recorded on the student's transcript at the end of the first term. The grade recorded at the end of the second term evaluates the student's performance in the course for the entire year.

### **Grade Reports**

Students should periodically check their courses and grades on "Just the Facts" to be sure that they are recorded correctly.

### **Class Rank**

The college does not compute class rank.

### Dean's List

Inclusion on the Dean's List is an academic honor bestowed by the dean of the college semester by semester. Based on grades, the criteria include about the top 30 percent of students and vary with the number of credits the student completes. The criteria are subject to slight changes from semester to semester and are available at www.arts.cornell.edu/stuadv/deans.htm in the Office of Undergraduate Admissions and Advising, 55 Goldwin Smith Hall.

### GRADUATION

### The Degree

The College of Arts and Sciences grants only one degree (no matter what the student's major): the A.B. (or B.A.). A.B. is the abbreviation of the Latin name for the degree, "Artium Baccalarius," or translated into English, B.A., "Bachelor of Arts."

### **Application to Graduate**

In the first semester of their senior year, students attend senior briefings and then complete an application to graduate. The application allows the college to check each student's plan for fulfilling college requirements. This process is intended to help seniors identify problems early enough in the final year to make any necessary changes in course selection to satisfy those requirements. *Nonetheless, meeting graduation requirements is the student's responsibility;* problems that are discovered, even late in the final term, must be resolved by the student before the degree can be granted.

### **Degree Dates**

There are three degree dates in the year: May, August, and January. Students who plan to graduate in August may attend graduation ceremonies in the preceding May. Students graduating in January are invited to a special recognition ceremony in December; they may also attend graduation ceremonies the following May.

### Honors

### **Bachelor of Arts with Honors**

Almost all departments offer honors programs for students who have demonstrated exceptional accomplishment in the major and succeeded in research. The honors programs are described by individual departments. The degree of Bachelor of Arts *cum laude, magna cum laude,* and *summa cum laude* will be conferred upon students who, in addition to having completed the requirements for the degree of Bachelor of Arts, have been recommended for a level of honors by their major department, the Independent Major Program, or the College Scholar Program. Concentrations do not offer honors programs.

### **Bachelor of Arts with Distinction**

The degree of Bachelor of Arts with distinction in all subjects will be conferred on students who have completed the requirements for the degree of Bachelor of Arts, if they have met the following requirements by the end of their final semester:

- completed at least 60 credits while registered in regular sessions at Cornell;
- ranked in the upper 30 percent of their class at the end of the seventh semester, or next-to-last semester for transfers and accelerants;
- received a grade below C- in no more than one course;
- 4) received no failing grade;
- 5) have no frozen *Incompletes* on their records, and
- maintained good academic standing, including completing a full schedule of at least 12 credits, in each of their last four terms.

### CALENDAR SUPPLEMENT

All of the dates in the university calendar at the front of this volume apply to all Cornell students. Listed below are some additional dates that are of importance for students in the College of Arts and Sciences.

	Fall 2002	Spring 2003
Last day for adding courses without petition.	Sept. 20	Feb. 7
Last day for adding a First-Year Writing Seminar.	Sept. 13	Jan. 31
Last day for changing grade option to S-U or letter.	Sept. 20	Feb. 7
First deadline for sub- mitting independent major requests. Go to 172 Goldwin Smith	Sept. 26	Feb. 20

Last day for dropping courses without petition.	Oct. 18	March 7
Last day to petition to withdraw from a course.	Nov. 22	April 18
Second deadline for submitting indepen- dent major requests. Go to the Office of Undergraduate Admissions and Advising, 172 Goldwin Smith Hall, for further information.	Nov. 28	April 3
Deadline for request- ing internal transfer to the College of Arts and Sciences for the following term.	Dec. 6	May 2
Deadline for applying to the College Scholar Program.		April 30
Deadline for applying to study abroad.	See Cornell Abroad 474 Uris Hall	
Course enrollment (preregistration) for the following term.	TBA	TBA

### **ADMINISTRATION**

Philip E. Lewis, dean-255-4146

Jon C. Clardy, senior associate dean-255-4147

Paul Houston, senior associate dean-255-4147

Lynne S. Abel, associate dean of admissions and undergraduate education—255-3386

Jonathan B. Monroe, associate dean and director of writing programs-255-4061

Jane V. Pedersen, associate dean of administration-255-7507

### **AFRIKAANS**

See Department of German Studies (Dutch).

# AFRICANA STUDIES AND RESEARCH CENTER

D. Ohadike, director, (255–0532); A. Adams, N. Assiē-Lumumba, A. Bekerie, L. Edmondson, R. Harris, S. Hassan, A. Mazrui, A. Nanji, J. Turner. Offices: 310 Triphammer Road, 255–4625 or 255–4626.

The Africana Studies and Research Center is concerned with the examination of the history, culture, intellectual development, and social organization of Black people and cultures in the Americas, Africa, and the Caribbean. Its program is structured from an interdisciplinary and comparative perspective and presents a variety of subjects in focal areas of history, literature, social sciences, and African languages. African languages such as Swahili is consistently offered, fall and spring semesters and taught during summer/winter session.

The center offers a unique and specialized program of study that leads to an undergraduate degree through the College of Arts and Sciences and a graduate degree, the Master of Professional Studies (African and African-American), through the university's Graduate School.

A student may major in Africana Studies; however, another attractive alternative is the center's joint major program. This program enables the student to complete a major in any of the other disciplines represented in the college while at the same time fulfilling requirements for a major in Africana Studies. This requires only a few more credits than is usually the case when one completes a single major course of study. Courses offered by the center are open to both majors and nonmajors and may be used to meet a number of college distribution requirements, including historical/ temporal breadth (#) and geographical breadth (@) requirements, such as freshman writing seminars, language (Swahili), expressive arts, humanities, social sciences, and history.

The center also brings distinguished visitors to the campus, sponsors a colloquium series, and houses its own library.

### The Africana Major

The undergraduate major offers interdisciplinary study of the fundamental dimensions of the African-American and African experiences. Because of the comprehensive nature of the program, it is to students' advantage to declare themselves Africana majors as early as possible. The following are prerequisites for admission to the major.

Students should submit:

- a statement of why they want to be an Africana Studies major;
- a tentative outline of the area of study they are considering (African or African-American) for the undergraduate concentration; and
- a full transcript of courses taken and grades received.

The center's undergraduate faculty representative will review the applications and notify students within two weeks of the status of their request.

After acceptance as a major in the Africana Center, a student must maintain a C+ cumulative average in the center's courses while completing the major program. The Africana major must complete 36 credits in courses offered by the center, to include the following four core courses: AS&RC 205, 231, 290, and 422. Beyond the core courses, the student must take eight credits of center courses numbered 200 or above and 15 credits numbered 300 or above. The program of an undergraduate major may have a specifically African focus.

### **Joint Majors**

The center encourages joint majors in the College of Arts and Sciences and in other colleges. Joint majors are individualized programs that must be worked out between the departments concerned. The center's undergraduate faculty representative,

Hall, for further information.

Professor Bekerie, will assist students in the design and coordination of joint major programs. However, in any joint major program, the center will require at least 16 credits be taken in Africana studies courses, including AS&RC 290.

### **Double Majors**

In the case of double majors (as distinct from joint majors) students undertake to carry the full load of stipulated requirements for a major in each of the two departments they have selected.

### **Certificate in African Studies**

In conjunction with the Institute for African Development, the Africana Studies and Research Center administers an undergraduate Certificate in African Studies program. The certificate is offered as a minor concentration available to students in all of the undergraduate colleges at Cornell. Many of the courses in the program might be used to fulfill other course distribution requirements. By pursuing this certificate, students acquire an interdisciplinary understanding of Africa. After developing a foundation of knowledge on the culture, society, and development of Africa in the core course "Africa: The Continent and Its People," students pursue 15 credit hours in a humanities or development studies track or a combination of the two, including an additional core course, either "African Civilizations and Cultures" or "Contemporary African Development Issues." The require-ments for the cetificate are a minimum of 18 credit hours, including the core courses. Students interested in the certificate program must contact Professor Bekerie (the center's undergraduate faculty representative) who will register them in the program and assign them a faculty adviser from their own college. The faculty adviser will be responsible for determining completion of the certificate requirements.

Honors. The honors program offers students the opportunity to complete a library research thesis, a field project in conjunction with a report on the field experience, or a project or experiment designed by the student. The requirements for admission to the honors program for all students-regular majors, joint majors, and double majors-are a Bcumulative average in all courses and a B+ cumulative average in the center's courses. Each student accepted into the honors program will have an honors faculty committee consisting of the student's adviser and one additional faculty member, which is respon-sible for final evaluation of the student's work. The honors committee must approve the thesis or project before May 1 of the student's junior year. The completed thesis or project should be filed with the student's faculty committee by May 10 of the senior year.

### Language Requirement

Courses in Swahili may be used to satisfy the College of Arts and Sciences language requirement. In Swahili, successful completion of AS&RC 131, 132, 133, and 134 provides qualification, and the addition of 202 provides proficiency. AS&RC majors are not required to take an African language, but the center recommends the study of Swahili to complete the language requirement.

### AS&RC 131 Swahili

Fall. 4 credits. Laboratory time TBA. A. Nanji.

Beginner's Swahili. Part 1—Grammar for speaking, reading, and writing. Requires no knowledge of language. Swahili is spoken in the East and Central parts of Africa.

### AS&RC 132 Swahili

Spring. 4 credits. Prerequisite: Swahili 131. A. Nanji.

Continued study of the basic grammatical formation of the language and the introduction of reading material ranging from songs to short stories. A great many drills are used in this course to help develop the student's comprehension of the language. Swahili tapes are utilized during all of these sequences.

### AS&RC 133 Swahill

Fall. 4 credits. Prerequisites: Swahili 131 and 132. Language laboratory time TBA. A. Nanji.

Advanced study in reading and composition.

#### AS&RC 134 Swahili

Spring. 4 credits. *Provides language qualification*. Prerequisite: Swahili 133. A. Nanji.

In this course more emphasis is placed on the development of reading ability and the acquisition of writing skills. Students are expected to read and comprehend selected Swahili stories and write compositions on chosen topics. Ample consideration is given to oral practice in the classroom.

### AS&RC 171 Black Families and the Socialization of Black Children

Fall. 3 credits. Staff.

This course provides an examination of the evolution of the Black family from its roots in Africa, the evolution of family forms, the impact of social policy, and a consideration of the literature stressing family and child wellbeing. Among the major topics considered are male/female relationships, childbearing and parental roles, the extended family, and economic and health issues. The component of the course focusing on youth primarily covers child and adolescent development.

### AS&RC 172 The Education of Black Americans: Historical and Contemporary Issues (III)

Spring. 3 credits. Faculty. This course is devoted to the history of educating Black Americans. Considerable attention is given to contemporary issues. The major topics of focus include an examination of the debates concerning the type of the education needed, public and private schooling efforts, the Africana Studies movement, community control issues, busing, affirmative action, resegregation debates and new initiatives in education including vouchers and charter schools.

### AS&RC 191 Africa: The Continent and Its People @ (III)

Fall. 3 credits. L. Edmondson. An introductory interdisciplinary course focusing on Africa's geographical, ecological, and demographic characteristics; indigenous institutions and values; the triple cultural heritage of Africanity, Islam, and Western civilization; main historical developments and transitions; and contemporary political, economic, social, and cultural change. Africa's ties with the United States (from trans-Atlantic slavery to the present), its impact on the emerging world order, and its contribution to world civilization are also explored.

### AS&RC 202 Swahill Literature @

Fall. 4 credits. Prerequisite: Swahili 134. A. Nanji.

Students gain mastery over spoken Swahili and are introduced to the predominant Swahili literary forms.

### AS&RC 204 History and Politics of Racialisation: A Comparative Study (III)

Spring. 4 credits. A. Bekerie. The primary focus of this course is on the historical and contemporary significance of racialisation in the United States and South Africa with regard to societal development and inter-relations. It includes an analysis of the historical development of racialised barriers as an instrument of power and privilege. The ways with which racialisation is used as an instrument of ideology to social status, cultural hierarchy and economic positions are also examined. Particular emphasis is given to the development and perpetuation of scientific racism in both places. The apparent success against Jim Crow form of racism in the United States and apartheid in South Africa appears to transform racism into subtle and 'scientific' sphere. This transformation and its continued impact in perpetuating social inequality are further analyzed.

### AS&RC 205 African Cultures and Civilizations # @ (III)

Fall. 3 credits. D. Ohadike.

This course is concerned with the peoples of Africa and the development of African cultures and civilizations from the earliest times to the present day. It focuses on the near modern civilizations of Africa south of the Sahara, and the ancient civilizations of Egypt and the Nile Valley, together with their contributions to the development of the major world civilizations. The course also deals with the socio-political organization of African societies, their kinship systems, cross-cutting ties, rites of passage, gender relations, and arts (including music, dance, folklore, architecture, sculpture, painting, and body decoration).

### AS&RC 210 Major Works of Black World Writing (IV)

Fall. 3 credits. A. Adams.

This course surveys classic texts by African American, Caribbean, and African writers. The focus is on literary texts by authors such as Langston Hughes, Toni Morrison, James Baldwin, Maryse Conde, and Chinua Achebe, with a view toward analyzing common experiences, references, themes, and literary strategies across the Black world. The works of fiction, poetry, and drama that constitute the central material of the course are supplemented by essays and biographies from other authors who have influenced the creative vision and the movement of the peoples of Africa and the Diaspora, e.g., W. E. B. DuBois and Marcus Garvey, Nelson and Winnie Mandela.

### AS&RC 231 African-American Social and Political Thought (III) Spring, 3 credits. J. Turner.

This is an introductory course that reviews and analyzes the major theoretical and ideological formulations developed and espoused by African-Americans in the struggle for liberation. We focus specifically on the political philosophy and historical significance of Malcolm X, and the work and movement of Marcus Garvey, as the prime movers of nationalism and pan-Africanism among Black people in this century. Such themes as slave resistance, nationalism, Pan-Africanism, emigration, anti-imperalism, socialism and internal colonialism, and the political and social views of Black women are discussed. Black political thought is viewed in its development as responses to concrete conditions of oppression and expression.

#### AS&RC 271 Introduction to African Development (also CRP and GOVT 271) @ (III)

For description, see CRP 271.

### AS&RC 280 Race, Power, and Privilege in the United States (formerly Racism in American Society) (III)

Spring. 3 credits. D. Barr and J. Turner. This course is a topical treatment of the history and theory of racism in the United States. The course begins with an examination of basic concepts and theories of racism. From there we examine the history of racial groups in America—African Americans, Native Americans, Asian Americans, and the Hispanic groups. Particular attention is paid to the political economy of racism and the sociological and the psychological aspects of race relations in America, with specific reference to the differences and intersections of race, class, gender, and ethnicity.

### [AS&RC 283 History of Resistance Movements in Africa and the Diaspora @ (III)

Fall. 3 credits. Not offered fall 2002. D. Ohadike.

This course deals with the history of resistance and liberation movements in Africa. Brazil, the Caribbean, and the United States. It is concerned with the dialectical relationships between European domination and Black resistance. It examines the methods, strength, and complexity of Black resistance and liberation, together with the rise of revolutionary classes in Africa and the Diaspora. It draws attention to the importance of unity and organization in resistance and then shows similarities, connections, and continuities in Black resistance. Finally, it demonstrates that African background helped shape the nature of struggles for independence and civil liberties in the Caribbean, Brazil, and the United States.]

### AS&RC 290 The Sociology of the African-American Experience (III)

Fall. 3 credits. J. Turner.

This is an introductory course to the field of Africana Studies. It assumes a historical/ sociological approach to the examination of the African-American experience. The course surveys the African beginnings of human kind and the classical role of Black people in world civilization and the making of early culture. The course treats issues in the humanities, social sciences, and history. The course is required for all undergraduate students majoring at the Africana Center.

### AS&RC 304 African American Art (also ART H 377) (IV)

Spring. 3 credits. S. Hassan. This course investigates the different forms of African-American visual artistic traditions in relation to their historical origins and sociocultural context from the early days of slavery to the present time. The course starts with an overview of African art and the experiences of the Middle Passage and slavery in relation to African-American traditions in the decorative arts including: pottery, architecture, ironwork, quiltmaking, and basketry. This is followed by a fine art survey starting with the eighteenth and nineteenth centuries, continuing through the early twentieth-century Harlem Renaissance up to the present. Certain issues related to African-American arts and creativity such as "improvisation," "Black Aesthetic," and "Pan Africanism" are also explored. Slides, films, and film strips are used extensively to illustrate topics discussed. Visits to museums and relevant current exhibitions may be arranged.

### [AS&RC 310 Art in African Culture and Society (also ART H 378) @ (IV) Fall. 3 credits. Not offered fall 2002.

S. Hassan

This course is a survey of the visual art and material cultural traditions of sub-Saharan Africa. It aims at investigating the different forms of visual artistic traditions in relation to their historical and sociocultural context. The symbolism and complexity of traditional African art are explored through the analysis of myth, ritual, and cosmology. In-depth analysis of particular African societies is used to examine the relationship of the arts to indigenous concepts of time, space, color, form, and sociopolitical order. New and contemporary art forms associated with major socioeconomic changes and processes of assimilation and acculturation are also explored. These include tourist art, popular art, and elite art.]

### AS&RC 311 Government and Politics in Africa @ (III)

Fall. 3 credits. A. Mazrui. This course deals with power and political participation in Africa. Topics include: the colonial background and its political consequences; the pre-colonial continuities in the post-colonial politics; ethnicity and allegiance in the African polity; and the monarchical tendency in African political culture. Discussion covers a spectrum of topics from the warrior tradition to the military coup in the post-colonial era; from the elder tradition to presidential gerontocracy; from the sage tradition to intellectual meritocracy. Other major topics include class versus ethnicity in African politics; the one-party versus the multiparty state; socio-cultural versus socio-economic ideologies; the gender question in African politics; the soldier and the state; and the African political experience in a global context.

### AS&RC 332 Twentieth-Century Black Cultural Movements @ (IV)

Fall. 4 credits. A. Adams. This course will examine the major cultural currents of the 20th century in the Black World, Major movements/currents that will be considered include the Harlem Renaissance, Negritude, Indigenismo, Black Arts Movement, Creolite. Basing the study primarily in the reading of literary texts, the artistic/cultural movements will be studied within the historical, social, and political forces that produced or influenced them, e.g., religion, colonialism, social protest, African and Caribbean independence, womanism. Particular attention will be given to comparisons across geographic regions, principally the African continent, North America, and the Caribbean. The reading of the literary texts will be supported by theoretical readings as well as references to other artistic forms, such as visual arts and music.

### AS&RC 352 Pan-Africanism and International Politics (III) Spring. 3 credits. L. Edmondson.

Pan-Africanism addresses the shared experiences and aspirations of African people around the world, focused on a search for greater linkages and unifying measures. Informed by an exploration of the racial factor in international relations, this course examines Pan-African theories, ideologies, and movements, past and present, in their political, socio-economic, and cultural manifestations, focusing mainly on the African continent, the Caribbean, and Black America.

### [AS&RC 362 Global Perspectives on Gender

Spring. 4 credits. Not offered 2002–2003. N. Assié-Lumumba.

The course examines how forms of gender inequality have been shaped by international forces and structured by differences in national histories. The class is taught by a rotating set of two faculty members from different departments. Contingent on the particular faculty member directing the course, the class considers such issues as crosscultural perspectives on gender; the history of work and family life in different societies: the gendered division of labor in local, national, and international economies; the impact of colonialism; the organized efforts of women to define gender relations; and the role of the state in constructing an engendered economy and polity.]

### AS&RC 380 African History: Earliest Times to 1800 # @ (III)

Fall. 3 credits. A. Bekerie. As the second largest continent with vast and varying geographical and sociocultural conditions combined with recently established fact as an original home of human species, Africa provides rich and diverse oral and written early history. The course covers some of the major historical signposts from the origins of human species to 1800. Among the topics for discussion are: Historical Perspectives and Sources, The Nile River Cultural Complex, Berber, Carthage and Maghreb of North Africa, Upper Guinea and Western Sudan of West Africa, Cities of the East African Coast, and Great Zimbabwe and other sites of Southern Africa.

### AS&RC 381 African History, 1800– Present @ (III)

Spring. 3 credits. D. Ohadike. This is a survey of African history in the nineteenth and twentieth centuries. It deals with African revolutions in the nineteenth century; the ending of the slave trade and the politics of the abolition; European scramble and partition of Africa; resistance to European colonial conquest; African societies in the colonial period; the politics of decolonization; Neo-colonialism; the rise and decline of military regimes; African debt crisis; and conflict and reconciliation in Africa.

### AS&RC 404 Afrocentricity: Paradigm and Critical Readings (III)

Fall. 4 credits. A. Bekerie. What is Afrocentricity? It is a theoretical framework designed to study and interpret the histories and cultures of peoples of Africa and African descent by locating them at the center of their experiences. In other words, it is a method of knowing the life experiences of African peoples from the inside out. The course examines—through the writings of Asante, Keto, Clarke, Jean, Myers, Amin,

44

Mazrui, Gates, Appiah, Richards, Schlesinger, and T'hiongo—the conception and depth of the paradigm, its relevance in the production and utilization of knowledge, particularly emancipatory knowledge, the history of the paradigm, and the debate it generates among a wide range of thinkers and scholars.

### AS&RC 410 African American Politics (III)

Spring. 4 credits. J. Turner.

The central thesis of African American politics has been its movements for political change and democratic access and human rights. This development since the seventeenth century is a complex political legacy. This course conducts a close study of African American political practice and theoretical analysis of the American political system. Implications of the political systems for prospects and limitations to participation by Black people are analyzed. Critical historical stages in the process of Black politics are examined. The development of electoral offices in federal and statewide politics, and the significant urban political power bases giving rise to African American mayoralty politics in critical industrial centers, as well as rural hamlets, center the course. Presidential politics-the Jesse Jackson campaigns-and new political formations including Black Republicans/ conservatives constitute the emphasis oncontemporary events. The course reviews the development of the literature in African American politics.

### [AS&RC 420 Public Policy and the African-American Urban Community (III)

Spring. 4 credits. Not offered 2002–2003. J. Turner.

The socioeconomic conditions of the African-American urban community are the central focus of the course. Community development models are explored in relationship to the social needs of the African-American population. The changing configuration of internal organization of the African American community nationally is examined.]

### AS&RC 422 African Literature @ (IV) Spring, 4 credits. A. Adams.

With such great focus, both inside and outside Africa, on issues of Africa's "development," what place does "literature" take? Is African literature influencing or influenced by the mundane realities of daily living faced by African people? Or does African literature concern itself with philosophical ideas and ideals that transcend those realities to embrace the general human condition? Or, does it do both? The texts that we read in this course are approached in terms of these issues of "African development" and "the universal human experience."

### AS&RC 435 African Cinema (also ART H 478 and S HUM 435) @ (IV)

Fall. 4 credits. S. Hassan. This course offers an overview of African cinema and filmmaking. It surveys historically the evolution of African cinema from its early days to the present. Through screening of selected African films, different trends within African cinema are explored, such as "Return to the Sources" and the rediscovery of the precolonial past; the "Social Realist" narrative and critique of post-independence Africa; reconstructing the story of colonialism from the perspective of the colonized; and the entertainment genre. Techniques, styles, and aesthetics of African cinema are also discussed. The course offers a unique opportunity of looking at African culture and society, and at issues of social change, gender, class, tradition, and modernization through African eyes.

### AS&RC 451 Politics and Social Change in the Caribbean @

Fall. 4 credits. L. Edmondson. A study of the historical, geostrategic, political, economic, and social (including racial and cultural) forces affecting the domestic and international experiences of Caribbean societies. Special attention is given to conflicting definitions and perceptions of the Caribbean; contending theories of Caribbean social structure and models of development; the continuing salience of struggles for change and transformation; prospects of regional integration: and Caribbean challenges to the global system, especially with regard to the region's relations with the United States and the region's position in the Third World in the context of the North-South cleavage.

### AS&RC 455 Caribbean Literature @ (IV) Fall. 4 credits. A. Adams.

This course examines the prose literature of the Caribbean islands. Through the reading of several novels and short stories from the various languages and cultural strains that comprise the Caribbean societies, students study the points of commonality and the diversity within this body of literature. The recurrence of certain historical, social, and cultural issues that have formed the multiethnic Caribbean peoples are analyzed in their varying manifestations across the linguistic and other boundaries to uncover the underlying shared experience.

### [AS&RC 459 Education in Africa and the Diaspora @ (III)

Fall. 4 credits. Not offered 2002–2003. N. Assie-Lumumba.

This course deals with educational innovations geared to promoting equal opportunity based on gender, race, and class in Africa and the African diaspora. After an introduction on the concepts of education and innovations and the states of innovation as planned change, the course focuses on concrete historical and contemporary cases of educational innovations. The case studies in the United States include the creation and expansion of historically black institutions such as Lincoln University, Spelman College, Tuskegee Institute (now Tuskegee University), and other schools in the South, and the Westside Preparatory School in Chicago. The African cases studied include African languages for instruction with a focus on a Nigerian case, Ujamaa and education for self-reliance in Tanzania, and the case of Cote d'Ivoire which adopted television as a medium of instruction.]

### AS&RC 468-469 Honors Thesis

Fall, 468; spring, 469. Africana Center faculty.

For senior Africana Studies majors working on honors theses, with selected reading, research projects, etc., under the supervision of a member of the Africana Studies and Research Center faculty. Permission of the AS&RC director of undergraduate studies is required.

### AS&RC 475 Black Leaders and Movements in African-American History (III)

Fall. 4 credits. R. Harris. The course analyzes the personalities, ideas, and activities central to the struggle for African-American liberation from the eighteenth century to the present. It examines theories of leadership and the structure of protest movements with the goal of understanding current leadership needs and trends among African Americans.

### [AS&RC 478 Family and Society in Africa @ (III)

Fall. 4 credits. Not offered fall 2002. N. Assie-Lumumba.]

### [AS&RC 479 Women and Gender Issues in Africa @ (III)

Spring. 4 credits. Not offered spring 2003. N. Assie-Lumumba.

There are two contrasting views of the status and role of women in Africa. One view portrays African women as dominated and exploited by men. According to another view women have a favorable social position in Africa: indigenous ideologies consider women to be the foundation of society, they are economically active and independent and they have an identity independent of men. In this seminar we discuss the status and role of women in Africa historically as well as in the contemporary period. Among the topics covered are: women in non-westernized/precolonial societies; the impact of colonial policies on the status of women; gender and access to schooling, participation in the economy and politics; women and the law; women and health issues; gender issues in southern Africa; womanism and feminism; the United Nations Decade of Women: and the four World Conferences on Women (Mexico 1975, Copenhagen 1986, Nairobi 1985, and Beijing 1995).l

### [AS&RC 483 History of African Political Thought @ # (III)

Fall. 4 credits. Not offered fall 2002. D. Ohadike.]

### AS&RC 484 Politics and Social Change in Southern Africa @ (III)

Spring, 4 credits, L. Edmondson, This course focuses on the legacies of apartheid and the challenges of transformation toward a post-apartheid society in South Africa. Topical emphases include: the rise and decline of apartheid; the historical continuity of Black resistance against racism; women under, against, and after apartheid; South Africa's relations with its neighbors: geopolitical, economic, and racial dimensions of the American connection; politics of negotiation and transition to majority rule; prospects for stability, democracy, and equality; and South Africa's new role in the African continental and global arenas. Instructor's lectures are supplemented by films and class discussions.

### AS&RC 498–499 Independent Study

Fall, 498; spring, 499. Africana Center faculty.

For students working on special topics, with selected reading, research projects, etc., under the supervision of a member of the Africana Studies and Research Center faculty.

### AS&RC 501 Global Africa: Comparative Black Experience

Spring. 4 credits. A. Mazrui. This seminar addresses two diasporas in the Black experience. The diaspora of enslavement concerns slaves and descendants of slaves in both the Western and Eastern Diaspora. The diaspora of colonization concerns demographic dispersal as a result of colonialism. The majority of African- Americans are part of the Diaspora of Enslavement. Recent Algerian immigrants into France are part of the Diaspora of Colonization. Jamaicans and Trinidadians in Britain are part of a double diaspora-products of both enslavement and colonialism. The course addresses these areas of Black comparison: Comparative Slavery-A Triple Heritage; Race and Race Mixture in Four Traditions; Comparative Emancipation from Slavery; Comparative Liberation from Colonialism; Comparative Struggle for Civil Rights; The Gender Question in Global Africa; and Comparative Quest for Global Equality.

### [AS&RC 502 Education and Development in Africa

Spring. 4 credits. Not offered spring 2003. N. Assie-Lumumba.]

### [AS&RC 503 African Aesthetics (also

ART H 571) Fall. 4 credits. Not offered fall 2002. S. Hassan.]

AS&RC 504 Political Change in Africa

Fall. 4 credits. A. Mazrui. The study of Africa can be approached dialectically (focusing on the tension between opposing forces) or thematically (focusing on themes as chapters of experience). This course borrows from both those approaches. In their class assignments and examinations students are free to use either approach. The first approach explores the dialetic between continuity and change; tradition and modernity; dependency and liberation; foreign and indigenous influences; anarchy and order; political decay and political development; democracy and authoritarianism; and socialism and capitalism. The thematic approach examines African Nationalism; race consciousness and Pan-Africanism; political parties and interest groups; executive power; ethnicity in politics; class-formation; civil-military relations; economic and cultural dependency; subregional and continental Pan-Africanism; crisis of the African state; and Africa in World **Politics** 

### [AS&RC 510 Historlography and Sources: The Development of African-American History

Spring. 4 credits. Prerequisite: upperclass or graduate standing or permission of instructor. Not offered 2002–2003. R. Harris.]

### AS&RC 530 Womanist Writing in Africa and the Caribbean

Spring. 4 credits. A. Adams. Theoretical essays on the nature, relevance, and articulation of feminist thought from African and Caribbean writers complement literary texts. Gender issues, as manifested both at home and in emigrant situations abroad are examined in texts by such writers as Sistren, Conde, Dangarembga, Aidoo, Warner-Vieyra, Ba, Emecheta, Kincaid, and W. Mandela. (Francophone works may be read in the original by individuals who so desire.)

### AS&RC 532 Twentieth-Century Black Cultural Movements

Fall. 4 credits. A. Adams. This course will examine the major cultural currents of the 20th Century in the Black World. Major movements/currents that will be considered include the Harlem Renaissance, Negritude, Indigenismo, Black Arts Movement, Creolite. Basing the study primarily in the reading of literary texts, the artistic/cultural movements will be studied within the historical, social, and political forces that produced or influenced them, e.g., religion, colonialism, social protest, African and Caribbean independence, womanism. Particular attention will be given to comparisons across geographic regions, principally the African continent, North America, and the Caribbean. The reading of the literary texts will be supported by theoretical readings as well as references to other artistic forms, such as visual arts and music.

### AS&RC 598-599 Independent Study

Fall, 598; spring, 599. Variable credit. For graduate students.

### AS&RC 601–602 Africana Studies Graduate Seminar

Fall, 601; spring, 602. 4 credits. Africana Studies faculty.

This course, which is conducted as a seminar, is designed for first-year AS&RC graduate students. It id coordinated and supervised by one professor but team-taught by three or four faculty members per semester. Each participating faculty member is responsible for a topical *segment* of the course related to her/his areas of specialization or an area of interest pertaining to theory and methodology of Africana Studies.

### AS&RC 698-699 Thesis

698, fall; 699, spring. Limited to Africana Studies and Research Center graduate students.

### AKKADIAN

See Department of Near Eastern Studies.

### AMERICAN STUDIES

- R. L. Moore, acting director; G. Altschuler, R. Bensel, S. Blumin, T. Borstelmann, M. P. Brady, J. Brumberg, J. Cowie, J. E. Gainor, M. C. Garcia, S. Haenni, R. Harris, M. Jones-Correa, M. Kammen, I. Kramnick, T. J. Lowi, B. Maxwell, D. E. McCall, L. L. Meixner, M. B. Norton, R. Polenberg,
- S. Pond, J. Porte, J. Rabkin, N. Salvatore,
- S. Samuels, M. E. Sanders, V. Santiago-Irizarry,
- M. Seltzer, M. Shefter, J. H. Silbey, H. Spillers,
- M. Washington, S. Wong.

Affiliated faculty: J. E. Bernstock, H. Gottfried, M. Hatch, L. Herrin, J. Jennings, P. McClelland, J. Peraino, P. Sawyer, M. Woods.

Emeritus: J. Silbey

### The Major

The major in American Studies, appropriate for a wide array of future professions, began as a program of coordinated study in the history, literature, and politics of the United States. These remain the core elements, but American Studies aims to be inclusive in its subject matter. Given the nation's diverse population and cultures, the program wants its majors to examine American experience in broad terms, drawing on the materials and methods of a variety of disciplines.

The prerequisites are two courses from the following: AM ST 101, AM ST 102, AM ST 109, AM ST 110, ENGL 240, ENGL 262, ENGL 265, ENGL 275, GOVT 111, HIST 101, HIST 102, HIST 260, HIST 261. Students normally complete the prerequisite courses by the end of their sophomore year, but they may sign up for the major while enrolled in one of the courses. Students with a score of 5 on the AP exam in American history may use that credit to satisfy HIST 102.

Students who contemplate becoming an American Studies major are encouraged to speak with the program director as early as possible to arrange for a major adviser.

In consultation with their advisers, American Studies majors elect, in addition to the prerequisites, nine courses above the 100 level chosen from the American Studies course list (these courses are usually crosslisted with another department). Their work must include courses in all of the three large periods into which the nation's development can be divided (colonial, nineteenth century, and twentieth century). Students must take no fewer than four courses before 1900. At least one of these courses must be in the period before 1800. Each student must also take one of AM ST 430 seminars or, an appropriate substitute seminar at the 400 level. (AM ST 500/501 taught in Washington, DC, does not fulfill the seminar requirement.) Students are given considerable freedom in creating a balanced program, but no more than five courses may be in any one department.

Beyond the basic core requirements for the major, two courses of work in the history or literature of a culture outside the United States are required. Students who study abroad for one semester usually satisfy this requirement.

Students may find courses relevant to American experience that they wish to take but that are not on the American Studies course list. With their adviser's approval, students may count two such courses towards fulfilling the major.

### Honors

Candidates for honors must maintain an average of B+ in courses pertinent to the major and have taken at least one course in which they wrote a research paper. Normally, at the end of the junior year students who wish to write a senior honors essay must approach a member of the American Studies Program faculty and discuss their ideas for a project. With approval from the faculty member students may then register in the fall of their senior year for AM ST 493, the honors essay tutorial. At the end of the fall semester, honors candidates will meet with their adviser and a second member of the American Studies faculty to discuss their progress. If satisfactory, honors students will complete their honors essays in the spring by enrolling in AM ST 494.

# Prerequisite Courses (see also under appropriate departments)

### [AM ST 101 Introduction to American Studies: History and Literature, the Nineteenth Century # (III)

4 credits. Not offered 2002–2003; next offered 2003–2004. G. Altschuler and D. McCall.

In this interdisciplinary course we analyze American values and behavior as the intersection of culture, politics, literature, and society. We do so by examining eight "great" or classic texts written between 1776–1900. The historical context of these texts is explored in lecture and they are treated as literature and historical/cultural documents. Texts include: *Common Sense* by Thomas Paine; *The Blithedale Romance* by Nathaniel Hawthorne; The Lincoln-Douglas Debates; Henry James' *The Bostonians*; Mark Twain's *Huckleberry Finn*; and William Dean Howells' *The Rise of Silas Lapham*.]

### [AM ST 102 Introduction American Studies: History and Literature, the Twentleth Century (III) 4 credits. Not offered 2002–2003; next

4 credits. Not offered 2002–2003; next offered 2003–2004. G. Altschuler and D. McCall.

In this interdisciplinary course we analyze American values and behavior as the intersection of culture, politics, literature, and society. We do so by examining eight "great" or classic texts written between 1900 and the present. Texts include: Ernest Hemingway's A Farewell to Arms; F. Scott Fitzgerald's The Great Gatsby; William Faulkner's Sound and the Fury; Richard Wright's Black Boy; John Updike's Rabbit Run; and Philip Roth's American Pastoral. AM ST 101 is not a prerequisite of AM ST 102.]

### [AM ST 109 Introduction to American Studies: New Approaches to Understanding American Diversity, the Nineteenth Century # (III or IV) Fall. 4 credits. Not offered 2002–2003.

Fall. 4 credits. Not offered 2002–2003. N. Salvatore.

This course examines the first century-andone-half of American national life and asks a series of interrelated questions about the changing meaning of national identity during this time. What did it mean to become an American, a process often urged on new immigrants, in light of the values and perceptions immigrants brought with them? What did democracy, a core element of becoming that American, mean if one were African or Native American? Irish or German? Jewish or Chinese? In what ways did racial and ethnic perceptions help structure political and cultural life during this period; and how does understanding the diverse historical reactions to these perceptions aid us in understanding the complexity of American life? This is an interdisciplinary course in which students analyze historical, literary, and cultural evidence in exploring these and other issues ]

### [AM ST 110 Introduction to American Studies: New Approaches to Understanding American Diversity, the Twentieth Century (also HIST 161, LSP 110) (III or IV)

4 credits. Not offered 2002–2003. M. C. Garcia.

This course examines American national life in the twentieth century and asks questions about the changing meaning of national identity. What does it mean to be an American in the twentieth century? What does it mean to assimilate: can one assimilate structurally and yet maintain a distinct cultural identity? In what ways do racial and ethnic perceptions structure political, economic, and cultural life? This is an interdisciplinary course in which students analyze historical, literary, and cultural evidence in exploring these and other issues.]

### American Studies 430 Seminars AM ST 430.1 The Politics of the American Civil War (also GOVT 408)

Spring. 4 credits. Prerequisite: permission of instructor. R. Bensel.

The Civil War, along with the founding of the nation in the late eighteenth century, is one of the two most important influences on the course of American Political development. Arising out of intense ideological, cultural, and economic competition between the slave South and the free labor North, the conflict created two new national states: a northern Union that replaced the loose federation of the antebellum period and a southern Confederacy that perished at Appomattox. In this course, particular attention is paid to: the political economy and culture of plantation slavery in the antebellum South; the apparent inevitability of collision between the slave and free states and their respective societies; the military, political, and economic strategies that determined, on both sides, the course and duration of the war; the limits and possibilities of reform of southern society during Reconstruction; and the impact of the Civil War on the subsequent development of the United States.

### AM ST 430.2 The Four Seasons Motif in American Culture (also HIST 455)

Fall. 4 credits. Prerequisite: permission of instructor. M. Kammen.

The focus of this seminar is one of the most ubiquitous and pervasive motifs in all of the arts (painting, literature, and music) in the northern hemisphere, both West and East: **The Four Seasons**. We view works of art and films, read fiction, non-fiction, and poetry, and listen to music. Although we must devote serious attentions to the Old World origins, dispersion, and local permutations of this motif, more than half of the seminar is given over to American manifestations and writings about the seasons, with particular attention to changes over time as well as geographical variations.

### AM ST 430.3 Literature as History: The Americas (also ENGL 430)

Spring. 4 credits. Prerequisite: permission of instructor. B. Maxwell.

Beginning with William Carlos Williams's In the American Grain (1925), this course considers modernist innovations in the telling of history by literary means. Responding to what they felt as the "deadness" of conventional historiography, writers such as Williams, Charles Reznikoff, John Sanford, Muriel Rukeyser, Melvin Tolson, and Paul Metcalf produced imaginative American histories that made a new world of historical narration, and in the process found new objects of historical attention. One of these was the plural, transnational America of the hemispheric Americas. This reconfiguration anticipated and in some cases shaped recent revisionist critiques of the European presence on American soil (Eduardo Galeano, Leslie Marmon Silko, David Stannard, Ward

Churchill, Noam Chomsky, Ana Castillo); accordingly students read examples, some polemical, of that later work.

#### AM ST 430.4 Immigrants, Membership and Citizenship (also GOVT 427; LSP 430)

Fall. 4 credits. Prerequisite: permission of instructor. M. Jones-Correa.

Immigrants are increasingly important players in the politics and economies of industrialized societies. However, in many cases despite their residence in these societies, their membership and citizenship status is often in question. At times migrants are undocumented, living and working at the fringes of the protections and regulations afforded by the legal system. Or they may petition to enter as refugees, having to prove their right to stay. Even if residing permanently, immigrants may still not be citizens of their receiving country, or if they are, they may have dual nationality. This course explores the complications of membership and citizenship among migrants, refugees and immigrants, focusing largely on immigration to the United States.

### AM ST 430.5 Love, American Style: Race, Transgender and American Identity

Spring. 4 credits. Prerequisite: permission of instructor. D. Rubenstein.

This seminar will examine the construction of racial, gendered, and ethnic/national identities in relation to law, literature, film, and works of contemporary cultural studies. Topics to be covered include "Passing, Race and the Law," "Blackface Minstrelsy," "Identification and the Masquerade," "Racial Passing and Gender," "Postwar Transgender Narratives," "Captivity Narratives." Literary texts to be addressed include James Weldon Johnson's The Autobiography of an Ex-Coloured Man, Nella Larsen's Passing, Mark Twain's Puddinghead Wilson, Isaac Bashevis Singer's Yentil, the Yeshiva Boy, among others. Court cases included are Plessy v. Ferguson, Loving v. Virginia and Bowers v. Hardwick. We will view the following films: The Jazz Singer, Imitation of Life, The King and I, Yentl, Paris is Burning, Guess Who's Coming to Dinner, Glen or Glenda, Bamboozled.

# Anthropology, Sociology, and Economics

### AM ST 221 Anthropological Representation: Ethnographies of Latino Culture (also ANTHR 221 and LSP 221) (III) Fall. 3 credits. V. Santiago-Irizarry.

Fall. 3 credits. V. Santiago-Irizarry. For description, see ANTHRO 221.

AM ST 323 American Economic History (also ECON 323) # (III) Spring. 4 credits. P. McClelland. For description, see ECON 323.

### [AM ST 377 The United States (also ANTHR 377 and LSP 377) (III)

4 credits. Not offered 2002–2003. V. Santiago-Irizarry. For description, see ANTHRO 377.]

### **Literature and Theatre Arts**

AM ST 215 Comparative American Literature (also COM L 215) (IV) Fall. 4 credits. B. Maxwell. For description, see COM L 215.

### 420 ARTS AND SCIENCES - 2002-2003

[AM ST 240 Survey in U.S. Latino Literature (also ENGL 240) (IV) 4 credits. Not offered 2002–2003. M. P. Brady.

For description, see ENGL 240.]

### [AM ST 252 Twentleth-Century Women Novelist (also ENQL 251) (IV) Spring. 4 credits. Not offered 2002–2003.

S. Samuels. For description, see ENGL 251.]

AM ST 262 Aslan American Literature (also ENGL 262, AAS 262) (IV) Spring. 4 credits. S. Wong.

For description, see ENGL 262.

### [AM ST 268 The Culture of the 1960s (also ENGL 268) (IV)

4 credits. Not offered 2002-2003. P. Sawyer.

This course argues that the 1960s helps define the 1990s, but that as we look back, the 1990s helps define the 1960s. Were the sixties a time of dangerous experimentation with drugs, sex, and alternative lifestyles on the part of a pampered generation that gradually learned to straighten up and join the mainstream? Or was it a time of revolutionary hopefulness, when the civil rights movement and the Vietnam War stimulated an empassioned critique that changed American society? What can the experiences of young "boomers" contribute to a later generation, the last of the twentieth century? The course explores these and other questions by focusing on the topics of racial justice, war, the counterculture, the New Left, and the woman's movement. Texts include The Autobiography of Malcolm X, The Electric Kool-Aid Acid Test, Dispatches, the poems of Allen Ginsburg and Adrienne Rich, films, music, speeches, manifestoes, and memoirs. The term paper explores students' special interests.]

### AM ST 275 The American Literary Tradition (also ENGL 275) (IV)

Fall. 4 credits. N. Waligora-Davis. The problem of an American national literature is explored through the reading, discussion, and close analysis of texts across the range of American literary history. Not a survey, this course focuses on the relations of the texts to each other, the shaping of national identities in those relationships, and the assumptions about history, language, and the self that underlie them.

### [AM ST 276 Literature in the Cold War Culture (also ENGL 276) (IV)

Not offered 2002–2003. B. Maxwell. For description, see ENGL 276.]

[AM ST 291 American 1920s: Literature and Culture (also ENGL 291) (IV) Fall. 4 credits. Not offered 2002–2003. B. Maxwell.

For description, see ENGL 291.]

### [AM ST 318 Queer Theatre (also THETR 320) (IV)

4 credits. Not offered 2002-2003. E. Gainor.

For description, see THETR 320.]

- [AM ST 334 American Drama and Theatre (also THETR 336 and ENGL 336) (IV)
- Fall. 4 credits. Not offered 2002–2003. E. Gainor.

For description, see THETR 336.]

### [AM ST 335 Contemporary American Theatre (also THETR 337 and ENGL 337) (IV) 4 credits. Not offered 2002–2003.

E. Gainor. For description, see THETR 337.]

### [AM ST 338 American Indians and Film (also THETR 338) (IV)

4 credits. Not offered 2002-2003. L. Black. For description, see THETR 338.]

AM ST 361 Early American Literature (also ENGL 361) # (IV) Fall. 4 credits. S. Samuels. For description, see ENGL 361.

### AM ST 382 The American Renaissance (also ENGL 362) (IV) Spring. 4 credits. D. Fried. For description, see ENGL 362.

### AM ST 363 American Fiction at the Turn of the Century (also ENGL 363) Spring. 4 credits. K. McCullough.

For description, see ENGL 363.

### AM ST 365 American Literature Since 1945 (also ENGL 365) (IV)

Fall. 4 credits. B. Maxwell. For description, see ENGL 365.

#### AM ST 366 The Nineteenth-Century American Novel (also ENGL 366) # (IV)

Spring. 4 credits. S. Samuels. For description, see ENGL 366.

### [AM ST 367 The Modern American Novel (also ENGL 367) (IV)

4 credits. Not offered 2002–2003. D. McCall.

For description, see ENGL 367.]

### [AM ST 368 The American Novel Since 1950 (also ENGL 368) (IV) 4 credits. Not offered 2002–2003.

P. Sawyer.

For description, see ENGL 368.]

### [AM ST 369 Survey of African American Literature to 1917 (also ENGL 375) (IV)

4 credits. Not offered 2002–2003. For description, ENGL 375.]

### [AM ST 370 Survey in African American Literature: 1918 to Present (also ENGL 376) (IV)

4 credits. Not offered 2002–2003. H. Spillers.

For description, see ENGL 376.]

### AM ST 372 American Poetry Since 1950 (also ENGL 378)

Spring. 4 credits. R. Gilbert. For description, see ENGL 378.

### [AM ST 374 Nineteenth-Century American Women Writers (also ENGL 374 and WOMNS 378) # (IV)

4 credits. Not offered 2002–2003. Staff. For description, see ENGL 374.]

### [AM ST 395 Policing and Prisons in American Culture (also ENGL 397) (IV) 4 credits. Not offered 2002–2003.

B. Maxwell.

For description, see ENGL 397.]

### [AM ST 403 Studies in American Poetry: Great Books, 1855–1926 (also ENGL 403) (IV) Fall. 4 credits. Not offered 2002–2003.

R. Gilbert. For description, see ENGL 403.]

### AM ST 406 Prestige In American Literary Realism (also S HUM 419) Spring. 4 credits. Limited to 15 students. P. Barrish.

For description, see S HUM 419.

### [AM ST 461 Asian Americans and Popular Culture (also AAS 461, ENGL 461, THETR 461) (IV) 4 credits. Not offered 2002–2003. For description, see AAS 461.]

[AM ST 465 Proseminar in American Studies (also ENGL 465) (IV) 4 credits. Not offered 2002–2003. J. Porte. For description, see ENGL 465.]

[AM ST 469 William Faulkner (also ENGL 469) (IV)

4 credits. Not offered 2002–2003. H. Spillers. For description, see ENGL 469.]

- [AM ST 470 Studies in the Novel: Forms of American Fiction: The Short Story as Novel (also ENGL 470) (IV) 4 credits. Not offered 2002–2003. L. Herrin.
   For description, see ENGL 470.]
- [AM ST 473 American Indian Autobiography (also ENGL 473) (IV) Fall. 4 credits. Not offered 2002–2003. L. Donaldson. For description, see ENGL 473.]
- AM ST 475 Seminar in Cinema I (also FILM 475) (IV) Fall. 4 credits. D. Fredericksen. For description, see FILM 475.

AM ST 476 American Melodrama and Film (also FILM 476) Spring. 4 credits. S. Haenni. For description, see FILM 476.

### AM ST 479 Jewish-American Writing (also ENGL 479 and JWST 478) (IV) Fall. 4 credits. J. Porte.

For description, see ENGL 479.

### Government and Public Policy

GOVT 111 Introduction to American Government and Politics (III) Fall. 3 credits. T. J. Lowi.

An introduction to government through the American experience. Concentration on analysis of the institutions of government and politics as mechanisms of social control.

### [AM ST 302 Social Movement in American Politics (also GOVT 302) (III)

4 credits. Not offered 2002–2003. M. E. Sanders.

For description, see GOVT 302.]

- [AM ST 305 Public Opinion and Political Participation (also GOVT 304) (III) 4 credits. Not offered 2002–2003. I. Cowden.
- For description, see GOVT 305.]

### AM ST 310 Civil Libertles in the United States (also GOVT 327) (III) Fall. 4 credits. Taught in Washington, D.C.

J. Rabkin. For description, see GOVT 327.

[AM ST 313 Minority Politics in the United States (also GOVT 319) 4 credits. Not offered 2002–2003. M. Jones-Correa. For description, see GOVT 319.] AM ST 315 Prisons (also GOVT 314) (III) Fall, 4 credits, M. Katzenstein, For description, see GOVT 314.

### AM ST 316 The American Presidency (also GOVT 316) (III) Fall. 4 credits. M. E. Sanders.

For description, see GOVT 316.

# [AM ST 319 The American Congress (also GOVT 318) (III) 4 credits. Not offered 2002–2003.

M. Shefter.

For description, see GOVT 318.]

### [AM ST 328 Constitutional Politics: The **United States Supreme Court (also** GOVT 328) (III)

4 credits. Not offered 2002-2003. J. Rabkin. For description, see GOVT 328.]

### AM ST 342 The Postmodern Presidency (also GOVT 344)

Fall. 4 credits. D. Rubenstein. This course will examine the presidencies of Reagan, Bush (1 and 2), and Clinton in relation to what scholars have called "the postmodern presidency." While this term has

been used by institutionalist students of the presidency as a periodizing hypothesis, our emphasis will be on the work of cultural critics and historians. We will address the slippage between fact and fiction in cinematic and popular representations of the presidency (biography, novels, television). The construction of gender normativity (especially masculinity) will be an attendant subtheme. The postmodern presidency will be read as a site of political as well as cultural contestation. The Kennedy assassination will serve as a case study in the formation of a national icon. The larger question of this approach to the presidency concerns the relationship between everyday life practices and citizenship as well as the role of national fantasy in American political culture today. We will read novels (Libra; George Bush, Dark Prince of Love); works of popular biography (Dutch), and criticism (Michael Rogin's Ronald Reagan: The Movie). Film and film clips to be shown include Independence Day, Dave, The Contender, JFK, Forrest Gump, Nixon, Dick. There will be a take-home midterm exam and a final paper.º

### [AM ST 350 Atomic Consequences: The Incorporation of Nuclear Weapons in Postwar America (also S&TS 350, GOVT 305) (III)

Spring. 4 credits. Not offered 2002-2003. M. Dennis.

For description, see S&TS 350.]

### [AM ST 353 Feminism Movements and the State (also GOVT 353, WOMNS 353) (111)

4 credits. Not offered 2002-2003. M. Katzenstein. For description, see GOVT 353.]

### AM ST 376 American Political Thought from Madison to Malcolm X (also GOVT 366 and HIST 316) # (III) Fall. 4 credits. I. Kramnick.

For description, see GOVT 366.

### [AM ST 388 Science in the American Polity, 1800–1960 (also S&TS 390, GOVT 308) (III)

Fall. 4 credits. Not offered 2002-2003. M. Dennis

For description, see S&TS 390.]

### AM ST 389 Science in the American Polity, 1960-Now (also S&TS 391, GOVT 309) (III)

Fall. 4 credits. M. Dennis. For description, see S&TS 391.

### [AM ST 409 Racial Prejudice and Political Intolerance (also GOVT 409) (III)

4 credits. Limited to 15 students. Not offered 2002-2003. J. Cowden. For description, see GOVT 409.]

### AM ST 428 Government and Public **Policy: An Introduction to Analysis** and Criticism (also GOVT 428) (III) Fall. 4 credits. T. Lowi,

For description, see GOVT 428.

### AM ST 429 Government and Public **Policy: An Introduction to Analysis** and Criticism (also GOVT 429) (III) Spring. 4 credits. 428 and consent of

instructor are required for 429. T. Lowi. For description, see GOVT 429.

### History

### AM ST 103 Introduction to American History (also HIST 153) # (III)

Fall. 4 credits. F. Dunaway A survey of American history from the beginning through the Civil War. Topics include cultural encounters in the age of Columbus, European colonization, the American Revolution, the early republic, antebellum reform movements, and the coming of the Civil War.

### AM ST 104 Introduction to American History (also HIST 154) (III)

Spring, 4 credits, T. Borstelmann, An introductory survey of the development of the United States since the Civil War.

### AM ST 124 Democracy and its Discontents: Political Traditions in the United States (also HIST 124) (III)

Summer. 3 credits. N. Salvatore. An examination of democracy and its critics. The course explores the evolution of democracy in America, focusing on some of the dramatic and important episodes in American history. It considers the struggles over the emancipation of slaves in the nineteenth century and expanded rights for women and working people in the twentieth century, free-speech issues, the civil-rights movement, religious-based critiques of American culture, and conservative critiques of American liberalism. The course serves as an investigation of the ways in which political expression takes forms in modern American culture. In addition to lectures, the course features several afternoon programs. These programs include guest lecturers and handson instruction in how to use the modern electronic research library.

### AM ST 201 Popular Culture in the United States, 1900-1945 (III or IV)

Fall. 4 credits. G. Altschuler. American Studies 201 deals with American popular culture in the period between 1900 and the end of World War II. As we examine best-sellers, films, sports and television, radio, ads, newspapers, magazines, and music, we try to better understand the ways in which popular culture as "contested terrain," the place where social classes, racial and ethnic groups, women and men, the powerful and the less powerful, seek to "control" images

and themes. Topics for 201 include: the Western; Cultural Heroes and the Cult of Individualism in the 1920s; The Hays Code and the Black Sox scandal: Mae West and the "New Women", Advertising in an Age of Consumption; Gangsters and G-Men; and Jackie Robinson and the American Dilemma.

### AM ST 202 Popular Culture in the United States, 1945-Present (III or IV)

Spring, 4 credits. G. Altschuler. American Studies 202 treats the period from 1945 to the present. As we examine bestsellers, films, sports and television, radio, ads, newspapers, magazines, and music, we try to better understand the ways in which popular culture shapes and/or reflects American values. The course also depicts popular culture as "contested terrain," the place where social classes, racial and ethnic groups, women and men, the powerful and less powerful, seek to "control" images and themes. Topics for 202 include: The "Honeymooners" and 1950s Television, soap operas; 'Gross-out" movies; Elvis; The Beatles, and Guns 'n Roses; Gothic Romances; and People Magazine and USA Today.

# [AM ST 204 Comparative Migration in the Americas (also HIST 202) (III) Spring. 4 credits. Not offered 2002–2003.

M. C. Garcia.

For description, see HIST 202.]

### [AM ST 208 Seminar: Era-Franklin D. Roosevelt (also HIST 208) (III)

4 credits. Not offered 2002-2003.

R. Polenberg.

For description, see HIST 208.]

### [AM ST 210 Civil Rights and Civil Wrongs: The Search for Racial Justice in America, 1945–1970 (III) Fall. 4 credits. Not offered 2002-2003. N. Salvatore.

In this seminar we read a variety of texts that underscore the fierce struggle to define the meaning of civil rights in American society during this era. We explore this from multiple perspectives through readings of historical, legal, political, theological, and literary readings.]

### [AM ST 212 African American Women: Twentieth Century (also HIST 212 and WOMNS 212) (III)

4 credits. Not offered 2002-2003. M. Washington.

For description, see HIST 212.]

### AM ST 213 Introduction to Asian American History (also HIST 264 and AAS 213) Fall. 4 credits. D. Chang.

For description, see HIST 264.

### AM ST 214 Seminar on American Foreign Policy (also HIST 214) (III) Fall. 3 credits. Prerequisite: permission of

instructor. W. LaFeber. For description, see HIST 214.

### AM ST 219 Mexican Immigration to the United States (also HIST 219, LSP 219, LASP 215) (III)

Spring. 4 credits. J. Cardenas. For description, see LSP 219.

#### AM ST 225 The U.S.-Mexico Border: History, Culture, Representation (also HIST 225 and LSP 225) Spring. 4 credits. M. C. Garcia and R. Craib.

For description, see HIST 225.

[AM ST 241 History of Childhood in the United States (also HD 241 and HIST 271) (III)

Spring. 4 credits. Not offered 2002-2003. I. Brumberg.

For description, see HD 241.]

### AM ST 242 Religion and Politics in American History from J. Winthrop to R. Reed (also HIST 242 and RELST 242)

Spring, 4 credits. Prerequisite: permission of instructor. R. L. Moore. For description, see HIST 242.

[AM ST 251 Black Religious Traditions from Slavery to Freedom (also HIST 251 and RELST 251) (III)

4 credits. Not offered 2002-2003. M. Washington. For description, see HIST 251.]

AM ST 257 United States Culture and Mexican Americans, 1848 to Present (also HIST 258, LSP 258) Fall. 4 credits. J. Cardenas.

For description, see HIST 258.

For description, see HD 258.

**IAM ST 259** Introduction to U.S. Latino History, Part I (also HIST 260, LSP 260) (III) 4 credits. Not offered 2002-2003.

M. C. Garcia.

For description, see HIST 260.]

[AM ST 261 Introduction to U.S. Latino History, Part II (also HIST 261, LSP 261) (111) 4 credits. Not offered 2002-2003.

M. C. Garcia. For description, see HIST 261.]

### [AM ST 273 Women in American Society, Past and Present (also HIST 273)

(111) 4 credits. Not offered 2002-2003 M. B. Norton.

For description, see HIST 273.]

AM ST 303 African American Women in Slavery and Freedom (also HIST 303 and WOMNS 307) # (III) Fall. 4 credits. M. Washington.

For description, see HIST 303

[AM ST 304 American Culture in Historical Perspective, 1880-1980 (also HIST 304) (III)

Spring. 4 credits. Not offered 2002-2003. M. Kammen.

For description, see HIST 304.]

AM ST 306 History of American Workers: 1960-90s (also ILRCB 306) Fall. 3 credits. J. Cowie.

For description, see ILRCB 306.

AM ST 308 Working-Class America in **Mass Media and Popular Culture** (also ILRCB 303) Spring. 3 credits. J. Cowie.

For description, see ILRCB 303.

### AM ST 309 The Cinema and the American City (also FILM 342)

Spring. 4 credits. S. Haenni. The emergence of the cinema in the latenineteenth century coincided with the emergence of a new kind of metropolis,

characterized, among other things, by new traffic systems (elevated train, subway, automobile), new racial, ethnic, and sexual regimes, and new urban planning. In this course, we examine how the cinema has participated and intervened in urban transformations by imagining and representing the American city variously as a panorama, a musical symphony, a mystery to be deciphered, a stage for civic theater, a modernist artwork, or a post-apocalyptic wasteland. How does the cinema produce a particularly modern, urban experience? How has it been shaped by urban politics and how, in turn, does it shape the way in which we understand the city? Screenings may include films such as Manhattan, The Crowd, Skyscraper Souls, 42nd Street, Naked City, Asphalt Jungle, Just Another Girl on the I.R.T., Blade Runner, and will be supplemented by readings in film history, as well as urban history and urban theory

### AM ST 314 History of American Foreign Policy, 1912 to the Present (also HIST 314) (III)

Spring. 4 credits. T. Borstelmann. For description, see HIST 314.

### [AM ST 317 American Constitutional Development (also HIST 318) (III) 4 credits. Not offered 2002-2003.

R. Polenberg. For description, see HIST 318.]

### [AM ST 320 Understanding Work in America, 1800–1990 (also HIST 315) (III)

4 credits. Not offered 2002-2003; next offered 2003-2004. N. Salvatore.

This course examines both the experience and the perception of work in American life in the century framed by two fundamental formations: the emergence of a system of industrial capitalism largely nationalistic in its orientation and the development of a more international economic system in more recent times. Among the topics considered are the effects of technological change, its impact on the experience of work across numerous occupational categories, and the changing perceptions of work as reflected in contemporary cultural expression, literature, and commentary across the century.]

### [AM ST 321 Colonial North America to

**1763 (also HIST 321) # (III)** 4 credits. Not offered 2002–2003. M. B. Norton.

For description, see HIST 321.]

### [AM ST 322 Age of the American Revolution, 1763-1815 (also HIST 325) # (111)

4 credits. Not offered 2002-2003. M. B. Norton.

For description, see HIST 325.]

### AM ST 324 Varieties of American Dissent, 1880-1990 (also HIST 324) (111)

Fall. 4 credits. N. Salvatore. The idea of dissent in American society raises a variety of images. Civil rights activists, striking workers, and student radicals of the 1960s are familiar enough symbols of dissent. But might we understand a Pentecostal believer, filled with the spirit of his or her God in critiquing contemporary society, as an example of American dissent? This course explores the varieties of economic, political, and cultural dissent in American between 1880 and 1990, and examines how understanding

dissent in its specific historical context illuminates major aspects of American life and culture.

### [AM ST 332 The Urbanization of American Society, 1600 to 1860 (also HIST 332) # (III)

4 credits. Not offered 2002-2003. S. Blumin. For description, see HIST 332.]

Spring. 4 credits. L. L. Meixner. For description, see ART H 461.

### Honors

Please see description of major for information about registration in these courses.

**AM ST 493–494 Honors Essay Tutorial** 493, fall; 494, spring. Up to 4 credits each semester. See R. L. Moore for appropriate advisers.

### ANTHROPOLOGY

D. Holmberg, chair; K. March, director of graduate students; A. Clark Arcadi, director of undergraduate studies—fall; M. Small, director of undergraduate studies—spring; D. Boyer, J. Fajans, D. Greenwood, J. Henderson, B. Lambert, H. Miyazaki, V. Munasinghe, J. Rigi, A. Riles, N. Russell, P. S. Sangren, V. Santiago-Irizarry, J. Siegel, T. Turner, T. Volman, A. Willford. Emeritus: R. Ascher, B. J. Isbell, J. Murra, R. Smith.

Anthropology is one of the most diverse disciplines in the university. Spanning human evolution, the development and heterogeneity of language and culture, human history, and the diversity of cultures past and present, the field has broad scope, uses a variety of methods, addresses basic issues about human origins and human life, and maintains commitment to understanding social life and using this understanding to improve society. Anthropology is an ideal "liberal arts" major. It also serves as a major that, when well designed by the student with their adviser, prepares students for a wide range of professional careers, e.g., law, medicine, foreign service, human rights, social services, international development, and business, among others.

Courses for nonmajors: Anthropology welcomes nonmajors into many of its courses.

Unless prerequisites are explicitly stated, 200and 300-level courses do not have formal prerequisites and can be taken by students without prior experience in anthropology. Such students are welcome in these upperlevel courses. For additional information to assist nonmajors and students from other colleges in selecting anthropology courses, see the anthropology department web page (falcon.arts.cornell.edu/~anthro/).

### The Major

The range and complexity of the field of Anthropology requires active collaboration between the student and a faculty adviser in developing an individualized program of study. To enter the anthropology major, a student must pass one course in each of the two broad introductory areas of anthropology: "Nature and Culture" and "Culture and History" listed below under the heading "Introductory Courses." Provisional acceptance into the major is possible before completing these courses, with permission from the Director of Undergraduate Studies in anthropology. Students are encouraged to contact the Director of Undergraduate Studies or other faculty members as soon as possible in their studies to discuss their interests and a possible major in anthropology.

Students see the Director of Undergraduate Studies to apply to the major and get an adviser. They prepare a short statement about their interests and goals for the major, then meet with their adviser to develop a course plan reflecting these special interests. This concentration should include at least 32 credits in addition to the two introductory courses used to enter the major. Examples of possible concentrations are myth and ritual; ethnicity and identity; action research; nature and culture in human history; anthropology and literature, or law, or the arts, or medicine; human origins; ethnomusicology; primate and human behavior; prehistory of the Americas, or Europe, or Africa; cultural construction of the person; etc. When warranted, the adviser is free to approve up to two cognate courses from other departments totaling up to eight credit hours to fulfill the 32-credit requirement. Students may revise their program of study in consultation with their adviser as they move through their studies. Our goal is to provide a close and supportive advising relationship and a strong and coherent structure for the student's major.

In the senior year, all Anthropology majors are required to take one of the Anthropology Senior Seminars offered by the department (archaeologically oriented majors may substitute Approaches to Archaeology or Archaeological Research Design). These seminars are designed to provide broad integrating perspectives on the contemporary field of anthropology through the study of principal trends, contemporary issues, history, etc.

### Study abroad and off-campus study

**programs:** the Department of Anthropology encourages students to consider a semester of study abroad or off-campus study developed as an integral part of the student's major concentration. The Director of Undergraduate Studies serves as the Anthropology Study Abroad adviser.

**The Cornell-Nepal Study Program:** the Cornell-Nepal Study Program is a joint program of Cornell University and Tribhuvan University, the national university of Nepal. Qualified juniors, seniors, and first- or secondyear graduate students work with faculty from both universities to prepare for and undertake field research projects in Nepal. Students receive 15 credits per semester; students may enroll for either fall or spring semester, or for the entire year; application is through Cornell Abroad. For further information, consult David Holmberg or Kathryn March in the Department of Anthropology.

Other anthropologically-relevant study abroad options, using existing Cornell Abroad and off-campus options, can be worked out in consultation with the major adviser, the Anthropology Study Abroad adviser, and Cornell Abroad.

### Honors

Honors in anthropology are awarded for excellence in the major, which includes overall grade point average and completion of an honors thesis. Anthropology majors interested in the Honors Program should consult the chair of the Honors Committee in their junior year. To qualify for entrance into the Honors Program, a student must have at least a 3.0 GPA overall and 3.3 GPA in the major, and the consent of a faculty member in anthropology who will guide the honors thesis. After applying to the program and being admitted as a candidate by the Honors Committee, the student conducts research and writes a thesis. This thesis is evaluated by the faculty research adviser and two other faculty members. Honors (i.e., cum laude, magna cum laude, or summa cum laude) are awarded based on the quality of the thesis and the student's overall record. Honors candidates must start this process by consulting their major adviser about the honors program early in their junior year.

In addition, students may enroll in ANTHR 483 (fall or spring) "Honors Thesis Research." To complete the thesis, students must enroll in 491 (fall or spring) "Honors Thesis Write-up." Only ANTHR 483 may count toward hours for completion of the anthropology major requirements. The credit hours for these courses are variable, grades for these courses are given by the faculty research adviser, and they are based on performance during thesis research and writing.

Any honors candidate whose research directly involves working with human subjects must receive approval for the project from the Cornell University Committee on Human Subjects.

### **Special Programs and Facilities**

Collections: the department has an extensive collection of archaeological and ethnological materials housed in the anthropology collections. A limited number of students can make arrangements to serve as interns in the anthropology collections. Olin Library houses some of the most extensive collections of materials on the ethnology of Southeast Asia, South Asia, East Asia, and Latin America to be found anywhere in the United States. The biological anthropology laboratory (McGraw B65) houses an extensive collection of materials for teaching purposes, including (1) human skeletal remains, (2) articulated skeletons and cranial casts of primates, and (3) casts of important fossils in the human lineage.

Independent Study: specialized individual study programs are offered in Anthropology 497, Topics in Anthropology, a course open to a limited number of juniors and seniors who have obtained consent and supervision of a faculty member. Undergraduates should note that many 600-level courses are open to them by consent of the instructor.

Colloquia: the Department of Anthropology holds colloquia almost every week of the semester on Friday at 3:30 in McGraw 215. Faculty members from Cornell and other universities participate in discussions of current research and problems in anthropology. Students are encouraged to attend.

For more complete information about the anthropology major, see the Director of Undergraduate Studies, pick up a copy of the major brochure (which includes descriptions of the courses not offered during 2002–2003), or visit the Anthropology Department web page (falcon.arts.cornell.edu/~anthro/).

### I. Introductory Courses

A. Nature and Culture:

### ANTHR 101 Introduction to Anthropology: Biological Perspectives on the Evolution of Humankind (I Supplementary List)

Fall. 3 credits. Fee for lab usage and maintenance, \$5. A. Arcadi. The evolution of humankind is explored through the fossil record, studies of the biological differences among current human populations, and a comparison with our closest relatives, the primates. This course investigates the roots of human biology and behavior with an evolutionary framework.

### ANTHR 103 The Scope of Anthropology Spring. 1 credit. Prerequisite: concurrent

enrollment in or prior completion of ANTHR 101 or ANTHR 102. S-U grades only. Staff.

This course is intended for majors or prospective majors in anthropology. Each week a different member of the faculty in anthropology at Cornell makes a presentation on the nature of their work within the field and discusses their interests with students. The course is meant to introduce the range of approaches found within anthropology and help students in planning future course work.

### ANTHR 203 Early People: The Archaeological and Fossil Record (also ARKEO 203) # (III)

Spring. 3 credits. T. Volman. A survey of the archaeological and fossil record of human evolution. Contributions by researchers from a variety of disciplines are highlighted, as are the discoveries that have enlivened the study of human evolution for more than a century. Critical evaluation of evidence and interpretation are stressed. Demonstrations and films supplement the lectures.

### ANTHR 211 Nature and Culture @ (III)

Spring, 4 credits. Limited to 15. Sophomore Writing Seminar. S. Sangren. "Nature and Culture" is a sophomore seminar that examines and evaluates contrasting views of how best to understand the interactions of nature and culture in human life. This examination surveys the familiar terrain of "nature" versus "nurture" debates. Beyond these debates, cultural anthropological study of other societies reveals that assumptions about human nature are intrinsically intertwined with the legitimacy of social arrangements (family organization, beliefs about gender and procreation, forms of political authority). This cross-cultural perspective on linkages between ideologies of nature and culture, on the one hand, and socialinstitutional arrangements, on the other, provides a useful critical vantage in a consideration of similar linkages in our own society. In addition, the course takes up current political debates in which ideas about nature and culture divide opinion. The course is premised on a strong claim for the contribution of cultural anthropology to the development of better science and to a reflective understanding of human potential.

### ANTHR 275 Human Biology and Evolution (also BIOEE 275 and NS 275) (I)

Fall. 3 credits. S-U grades optional, with permission of either instructor. Lecs W F 10:10; disc M 10:10, or TBA. Offered alternate years. J. D. Haas, K. A. R. Kennedy.

An introduction to the biology of Homo Sapiens through an examination of human evolution, biological diversity, and modes of adaptation to past and present environments. Evolutionary theory is reviewed in relation to the current evidence from the fossil record and studies of the evolution of human behavior. A survey of human adaptation covers a complex of biological and behavioral responses to environmental stress. Human diversity is examined as the product of longterm evolutionary forces and short-term adaptive responses. Topics such as creationism, the Piltdown fraud, the sociobiology debate, genetic engineering, race and IQ, and racism are presented as examples of current issues in human biology. These topics and others are the focus of the optional one-hour weekly discussions.

B. Culture and History:

### ANTHR 100 Introduction to Archaeology (also ARKEO 100) # @ (III or IV) Fall. 3 credits. J. Henderson.

A broad introduction to archaeology—the study of material remains to answer questions about the human past. Case studies highlight the variability of ancient societies and illustrate the varied methods and interpretive frameworks archaeologists use to reconstruct them. This course can serve as a platform for both archaeology and anthropology undergraduate majors.

### ANTHR 102 Introduction to Anthropology: The Comparison of Cultures @ (III)

Spring. 3 credits. K. March.

An introduction to cultural anthropology through ethnographies, or the descriptive accounts of anthropologists. Through readings and lectures, students acquaint themselves with a number of cultures from several parts of the world. The cultures range in form from those of small-scale tribal societies to those of state societies. Throughout the course, we attempt to make sense of exotic cultures in their own terms. Attention is focused on variation in cultural patterns as they are expressed in social, economic, and ritual practices. In this encounter, the principles of anthropology as a comparative enterprise that pose distinct cultural systems in relief are developed. Fiction, films, and exercises supplement the formal anthropological materials.

424
#### ANTHR 103 The Scope of Anthropology

Spring. 1 credit. Prerequisite: concurrent enrollment in or prior completion of ANTHR 101 or ANTHR 102. S-U grades only. Staff.

For course description, see section I.A, Introductory Courses.

#### ANTHR 200 Cultural Diversity and Contemporary Issues @ (III) Fall. 3 credits. A. Willford.

This course introduces students to the meaning and significance of forms of cultural diversity for understanding contemporary issues. Drawing from films, videos, and selected readings, students are confronted with different representational forms that portray cultures in various parts of the world and they are asked to critically examine their own prejudices as they influence the perception and evaluation of cultural differences. We approach cultures holistically, assuming the inseparability of economies. kinship, religion, and politics, as well as interconnections and dependencies between world areas (e.g., Africa, Latin America, the West). Among the issues considered: "political correctness" and truth; nativism and ecological diversity; race, ethnicity, and sexuality; sin, religion, and war; and global process and cultural integrity.

# [ANTHR 202 Interpretive Archaeology (also ARKEO 202) (III)

Fall. 3 credits. Not offered 2002-2003.]

#### ANTHR 215 Stone Age Art (also ARKEO 215) # (111)

Fall. 3 credits. T. Volman. When did "art", however defined, appear during the human career, how was it produced and for what purposes? These are some of the questions we investigate through a survey of the discovery, validation, analysis and interpretation of the earliest art. The course covers a variety of finds from the Old World, including the well-known cave art of southwestern France and northern Spain, and also consider portable art and decoration. The contributions of new analytical techniques and interpretive approaches are highlighted.

# [ANTHR 240 Old World Prehistory (also **ARKEO 240)** # (III) Fall. 3 credits. Not offered 2002–2003.]

#### II. Honors and Independent Study

# ANTHR 483 Honors Thesis Research

Fall or spring. Credit TBA. Prerequisite: consent of the Honors Committee. Staff. Independent work under the close guidance of a faculty member selected by the student.

#### ANTHR 491 Honors Thesis Write-Up Fall or spring. Credit TBA. Staff.

#### ANTHR 497 Independent Study: **Undergrad I**

Fall or spring. Credit TBA. Intended for undergraduate students only. Staff. Independent reading course in topics not covered in regularly scheduled courses. Students select a topic in consultation with the faculty member who has agreed to supervise the course work

#### **ANTHR 498 Independent Study:** Undergrad II

Fall or spring. Credit and hours TBA. Intended for undergraduate students only. Staff

For course description, see ANTHR 497, section II, Honors and Independent Study.

#### Anthropology Major Senior Ш. Seminars

In the senior year, all Anthropology majors are required to take one of the Anthropology Senior Seminars offered by the department (archaeologically oriented majors may substitute Approaches to Archaeology or Archaeological Research Design). These seminars are designed to provide broad integrating perspectives on the contemporary field of anthropology through the study of principal trends, contemporary issues, history, and so on.

#### ANTHR 429 Anthropology and Psychoanalysis @ (III)

Fall. 4 credits. Limited to 15. S. Sangren. This seminar is premised on the notion that an accommodation between anthropology and psychoanalysis is not only potentially productive, but also conceptually necessary. However, there are good reasons why such an accommodation has yet to develop, and an exploration of these reasons constitutes an important part of the seminar. How can the general or (in some cases) universalizing theories of psychoanalysis address cultural differences? Can understanding of collective institutions be advanced with reference to theories of individual motivation and desire? Conversely, can such understanding be advanced in the absence of reference to individual motivation and desire? The course surveys the history of anthropological engagement with psychoanalysis, but the main focus is a juxtaposition of current psychoanalysis theory (mainly Lancanian) and anthropological treatments of the social production of the person (including interpretivist and structuralist arguments, but with an emphasis on the advantages of a Marxist focus on production).

# ANTHR 444 God(s) and the Market (III)

Spring, 4 credits, H. Mivazaki, One of the oldest and most powerful insights of anthropology is that different domains of society such as religion and economy shape and condition each other. We will discuss a variety of old and new anthropological explorations into the intersections of religion and economy, from Max Weber's classical study of the relationship between Protestantism and the rise of capitalism to recent studies of the work of faith in financial markets. This seminar is intended to bring together students interested in religion and students interested in business and economy.

#### ANTHR 456 Mesoamerican Religion. Science, and History @ # (III)

Fall. 4 credits. Limited to 15. J. Henderson. An introduction to belief systems in ancient Mexico and Central America, emphasizing the blending of religion, astrology, myth, history, and prophecy. Interpreting text and image in pre-Columbian books and inscriptions is a major focus

#### ANTHR 490 Topics in Biological Anthropology

Spring. 4 credits. Limited to 12 students. M. Small.

Current topics in biological anthropology are explored. Topics change each semester. For further information, contact the professor or department office.

# IV. Understanding Cultures and Societies

Anthropologists examine the diversity of human behaviors, social relationships and structures, economies, political and legal orders, worldviews, logics, languages, symbols, myths, and religions among the many other means human beings invent to create and reproduce social life around the world. Anthropologists work from a holistic perspective to account for differences and similarities across cultures. Anthropologists also take small-scale societies and local sociocultural systems as the object of analysis. They collect data primarily through ethnographic fieldwork, that is, months or years of participating in and observing of the societies they study. Anthropologists see inherent linkages between the practical and the meaningful dimensions of human existence.

#### Anthropological Approaches to Economy, Society, Law, and Politics:

The courses below take as their starting point what are usually defined as the social, political, legal, and economic practices and structures of human life and show how they are shaped culturally and how they shape culture

#### ANTHR 307 Comparative Analyses of **Contemporary Muslim Societies** (also NES 352) @ (111)

Spring. 4 credits. C. Robinson. Moving beyond approaches that locate Islam geographically, highlighting its particularities and links to local cultural contexts, this course offers a comparative approach to the examination of central cultural, social, and political practices of contemporary Muslim societies. The course aims to examine the ways in which regional cultural and historical processes intersect with Islam as a religious, legal, cultural, economic, and political system and provide frameworks for understanding Islam as the globalizing phenomena that it is today. Drawing on anthropological theory and on ethnographic studies from South Asia, the Middle East, Southeast and Central Asia, Europe, North America, and the Caribbean, this course explores the following five themes: 1) Islamic State/Muslim Society: Family, Community, Law and Leadership; 2) Shrine and Mosque: Ritual and Religious Authority; 3) Beyond the Veil and the Harem: Constructions of Gender and Sexuality; 4) Submission and Resistance: Conflict and Violence Beyond the State; and 5) Moving Islam: Pilgrimage, Migration, Technology and Media.

#### ANTHR 310 Nationalism and Revivalism (III)

Spring. 4 credits. A. Willford. This course explores the growing phenomenon of religious and ethnic nationalism within modern nation-states. We also examine ways in which religious and ethnic revivalism present alternative models of modernity and group identity, often defined in opposition to state-sponsored nationalist ideologies.

#### ANTHR 313 Topics in the Anthropology of Japan @ (III)

Spring. 4 credits. H. Miyazaki. In this survey course, we seek to understand contemporary Japanese society by focusing on a particular social and cultural issue hotly debated in Japan. The ultimate goal of the course is to appreciate anthropology as a particular form of engagement with contem-

porary issues, distinct from other forms of engagement such as journalism, policyoriented social research and philosophical and ethical contemplation. No prior knowledge of Japan or anthropology is necessary in order to take this course. In 2003, the focus of the course is on conceptions of work and workplace in contemporary Japan.

#### ANTHR 321 Sex and Gender In Cross-**Cultural Perspective (also ANTHR** 621 and WOMNS 321/631) @ (III) Fall, 4 credits, K. March.

An introduction to the study of sex roles cross-culturally and to anthropological theories of sex and gender. The course examines various aspects of the place of the sexes in social, political, economic, ideological, and biological systems to emphasize the diversity in gender and sex-role definitions around the world

#### [ANTHR 323 Kinship and Social Organization (III)

Spring. 4 credits. Not offered 2002-2003. B. Lambert.

Much of this course is a survey of forms of the family, descent groups, and marriage systems. The role of age and sex in the social structure is also considered. The last part of the course is devoted to a history of the British and American family and to its fate in utopian communities.]

#### [ANTHR 326 Economic

Anthropology (III) Fall. 4 credits. Not offered 2002-2003.]

#### [ANTHR 328 Conflict, Dispute **Resolution, and Law in Cultural** Context (III)

Fall. 4 credits. Not offered 2002-2003. V. Santiago-Irizarry.

Rule-making and dispute resolution are integral aspects of social reality in any culture. The ways in which conflict is treated and interpreted-to be then deflected or resolved-articulate with other cultural domains such as religion, politics, and economics as part of the material and symbolic processes that enable sociocultural interaction. At issue then are the formal and processual means that the treatment of conflict takes in different societies. These means constitute frames for the definition of social experience that are used by social factors in the interpretation of events within the terms of an overriding sociocultural logic that is in turn refigured by these interpretive frames.]

# [ANTHR 385 The Anthropology of Intellectuals (III)

Fall. 4 credits. Not offered 2002-2003.

D. Bover.

This course offers a review of anthropological research on intellectuals (or "knowledgespecialists") and on social practices of knowledge-making. The question of how social knowledge is articulated, standardized, and reproduced has become an area of renewed interest across the social sciences since the 1970s. Reflexive social science has been especially interested in understanding how social and cultural knowledges are created, by whom, and for what purposes. These questions actually have a substantial heritage and the course begins with a review of classic sociological and anthropological theories of intellectuals and their role(s) in society. Then the course explores both classic and contemporary ethnographies of knowledge-specialists and knowledge-making with a special focus on the relationship between intellectuals and the creation of cultural order. Finally, the course discusses the possibly changing role of intellectuals in contemporary western "knowledge societies."]

#### ANTHR 388 Masks of Power and **Strategies of Resistance and** Subversion @ (III)

Fall. 4 credits. J. Rigi.

The aim of the course is to provide a broad theoretical and ethnographic orientation on various forms of power relations, strategies of resistance/subversion and the role of human agency in historical change. The course explores various concepts of power on both macro and micro levels, tracing their genealogies and looking comparatively at relevant ethnographies. Although a pillar of the course is the comparative anthropology of state, it also examines power relations in stateless societies. Various forms of state are contrasted to each other on the one hand and to forms of political power in the stateless societies on the other. The course also covers micro processes of power relation related to gender relations and body politics.

#### [ANTHR 422 Anthropology and Environment @ (III)

Fall. 4 credits. Prerequisite: anthropology major or permission of instructor. Not offered 2002-2003. D. Holmberg.]

#### **ANTHR 423** Anthropology of the

University (also SHUM 423) (III) Spring. 4 credits. Limited to 15 students. D. Greenwood.

Turning an anthropological gaze on the contemporary university as a social and cultural system, this seminar involves an examination of the convergences and divergences between the trajectories of the sciences and engineering, the humanities, and the social sciences in contemporary universities and some international comparisons with the trajectories of universities around the world. The overall aim is to link an ethnographic analysis of the microstructures of departmental differentiation, professional hegemonies, and local financing with the larger-scale processes of transformation of universities' place in society under the pressures of corporativization, globalization, and competition from a host of alternative higher education institutions.

# ANTHR 424 Ethnoracial Identity in Anthropology, Language, and Law (also LSP 424) (III) Spring. 4 credits. V. Santiago-Irizarry.

This course examines the role that both law and language, as mutually constitutive mediating systems, occupy in constructing ethnoracial identity in the United States. We approach the law from a critical anthropological perspective, as a signifying and significant sociocultural system rather than as an abstract collection of rules, norms, and procedures, to examine how legal processes and discourses contribute to processes of cultural production and reproduction that contribute to the creation and maintenance of differential power relations. Course material draws on anthropological, linguistic, and critical race theory as well as ethnographic and legal material to guide and document our analyses.

#### [ANTHR 426 Ideology and Social Reproduction (III)

Spring. 4 credits. Not offered 2002-2003 ]

#### ANTHR 429 Anthropology and Psychoanalysis @ (III)

Fall. 4 credits. S. Sangren. For course description, see section III, Anthropology Major Senior Seminars.

#### [ANTHR 440 Ethnographic Approaches to Studying Professionals and Institutions (III)

Spring, 4 credits, Not offered 2002-2003. D. Boyer.]

#### ANTHR 442 Violence, Symbolic Violence, Terror and Trauma in South Asia and the Himalayas (also ANTHR 642) @ (III)

Spring. 4 credits. D. Holmberg. This working seminar will focus on violent conflict in South Asia. Key texts on social, ethnic, religious, and political violence in Sri Lanka, India, Nepal, and Pakistan as well as theoretical literature on violence, trauma, and human rights will provide the basis for a general reassessment of the anthropological study of violence.

#### ANTHR 444 God(s) and the Market (III)

Spring. 4 credits. H. Miyazaki. For course description, see section III, Anthropology Major Senior Seminars.

#### ANTHR 479 Ethnicity and Identity Politics: An Anthropological Perspective (III)

Spring. 4 credits. V. Munasinghe. The most baffling aspect of ethnicity is that while ethnic sentiments and movements gain ground rapidly within the international arena, the claim that ethnicity does not exist in any objective sense is also receiving increasing credence within the academic community How can something thought "not to exist" have such profound consequences in the real world? In lay understandings, ethnicity is believed to be a "natural" disposition of humanity. If so, why does ethnicity mean different "things" in different places? Anthropology has much to contribute to a greater understanding of this perplexing phenomenon. After all, the defining criterion for ethnic groups is that of critical distinctiveness. Through ethnographic case studies, this course examines some of the key anthropological approaches to ethnicity. We explore the relationship of ethnicity to culture, ethnicity to nation, and ethnicity to state to better understand the role ethnicity plays in the identity politics of today.

#### **Interpretive Approaches in Cultural** B. Anthropology:

These courses stress symbolic or textual approaches to human society. They take as their object of analysis structures of meaning in such diverse areas as performance and text, myth and religion, views of the self, gender, and the sociology of knowledge. These same topics arise in many of the area-focused courses as well (Section D), but take center stage in the following courses.

#### [ANTHR 232 Media, Culture, and Society (111)

Spring. 3 credits. Not offered 2002-2003. D. Boyer.

This course provides an introduction to understanding the relationship between media and culture from an anthropological perspective. The primary goal of the course is to help students develop an ethnographic awareness of the complex factors influencing mass media production, representation, and reception. We work toward this goal by studying how media

technologies effect the representation and reproduction of cultural identities, how mass media representations mediate the negotiation of national identities and moralities, how institutional situations and professional practices influence media production, and how state and market forces both create and restrict possibilities of media expression. A wide range of social and historical cases are covered by both readings and lectures. Course materials include print, visual, and electronic media. Course assignments encourage students to engage the contemporary American media both analytically and critically.]

#### ANTHR 250 The Anthropology of Food and Cuisine (III)

Fall. 4 credits. J. Fajans.

You are what you eat! This course examines the way food is produced, prepared, exchanged, presented, and given meaning in cultures around the world. It examines the symbolism of specific foodstuffs. Who prepares food and how it is done? Who feeds whom and how these relations are expressed and valued? In addition to looking at these questions we analyze ideas about commensality; how food is used in public contexts for presentation or exchange, and how food is a marker of gender, class, status, ethnicity, and identity. In addition to looking specifically at food, we analyze cultural ideas about gender, the body, and identity in terms of how these cultural patterns are produced and expressed through concrete activities like eating, fasting, and special diets. In this class we stress critical and comparative thinking about subjects we tend to take for granted.

#### ANTHR 257 American Indians in Film (III)

Spring. 3 credits. F. Gleach. American Indians have been featured in films in a variety of ways over the years, from actors in red-face and portrayals of savagery to over-romanticized nobility; there have also been more accurate views produced, however, and there are Native actors and filmmakers. This course will explore the range of these portrayals, in documentary as well as Hollywood films. Topics to be covered include the ways in which ethnicity is presented on film and the different stereotypes used, the interplay of fiction and nonfiction, and relationships of film and historical events.

#### [ANTHR 291 Filming Other Cultures (also ANTHR 691 and THETR 291/691) @ (III)

Spring, 4 credits. Limited to 20 students. Preference given to students who have taken either ANTHR 102 or THETR 474. Fee for film screening and maintenance, \$35. Not offered 2002–2003. Staff.

Shortly after the first films were screened, their makers saw in motion pictures a promise for greater understanding among peoples. Was the promise fulfilled? In this discussion course, responses to this question are examined through the study of short, representative films and related readings. The discussions are framed and informed by ideas from anthropology and film studies. For example, we consider: aesthetics, ethics, and responsibility in filming, and editing; connections between sound—or lack of it—and image; the implications of film as a product of Euroamerican culture; cultural assumptions in camera movements, film color, and film pace; indigenous people's presentations of themselves and Euroamerican representations of others; and the blurry, ever-changing space that separates fiction from non-fiction film. For one meeting each week, two students, in cooperation with the instructor, are responsible for leading the discussion.]

#### ANTHR 320 Myth, Ritual, and Symbol (also RELST 320) @ (III)

Spring. 4 credits. J. Fajans. This course examines how systems of thought, symbolic forms, and ritual practice are formulated and expressed in primarily non-Western societies. It focuses on anthropological interpretations of space, time, cosmology, myth, classificatory systems (such as color, totems, food, dress, kinship), taboos, sacrifice, witchcraft, sorcery, and rites of passage (birth, initiation, marriage, death). Examines both the roles of specialists (spirit mediums, curers, priests, ascetics, etc.) and nonspecialists in producing these cultural forms.

#### ANTHR 379 Culture, Language, and Thought (III)

Spring. 4 credits. V. Santiago-Irizarry. The relationship among culture, language, and thought has been a core concern in anthropology. Language and culture are commonly defined as processes that are public and shared yet they also operate within and upon subliminal experiential realms. In this course we examine how anthropologists have explored this relationship, which is engendered in the interaction between culture and language as parallel mediating devices for the constitution, interpretation, and expression of human experience.

#### (ANTHR 381 Anthropology and Religion (also RELST 381) @ (III)

Fall. 4 credits. Not offered 2002–2003. A. Willford.

This course approaches the study of religion from an anthropological perspective. The centrality and universality of religion in social life has been fundamental in the development of social and cultural theory. We begin by examining the classic theories of religion in the works of Durkheim, Marx, Weber, and Freud, followed by an exploration of how these theories have been influential in anthropological studies of cosmology, ritual, selfhood, myth, sorcery, witchcraft, and pilgrimage. We conclude by examining the apparent persistence, revival and transformation of religious beliefs and practices within modern and modernizing states. This leads us to ask whether an increasing politicization and globalization of religious ideology poses significant challenges to the anthropological analysis of religion.]

#### [ANTHR 406 The Culture of Lives (also WOMNS 406) @

Spring. 4 credits. Not offered 2002-2003.]

#### [ANTHR 408 Gender Symbolism (also WOMNS 408) @ (IV)

Spring. 4 credits. Not offered 2002-2003.]

#### ANTHR 430 Indians and the Environment (III)

Fall. 4 credits. F. Gleach. From "savages" of the woods to "keepers of the game" to natural conservationists, American Indians have long been constructed as having a special relationship to the environment. This course examines the history of that construction, and its effects on Native people today. Indigenous peoples around the world have been and are being cast in similar dimensions, and global effects, parallels, and relationships will also be considered.

#### ANTHR 433 Censorship and the Production of Knowledge (also S HUM 403) (III)

Spring. 4 credits. Limited to 15 students. D. Bover.

This course seeks to productively expand the definition of censorship as ideological interdiction by exploring psychoanalytic and social-theoretical approaches to censorial practices and actions of self-censorship. We are especially interested in the relationship of censorship to the social formation of knowledge and we explore this relationship through case studies of media control, academic peer review processes, and the commodification of knowledge in corporate "knowledge industries."

#### ANTHR 434 The University as Locus of National Culture (also S HUM 404) (III)

Fall. 4 credits. Limited to 15 students. D. Boyer.

This course focuses on the places of the university as a site for the articulation, negotiation, and dissemination of knowledges of nation. We investigate the university as a public cultural institution and how it both becomes a symbol of the cultural achievement of the nation-state and serves to elaborate and publicize knowledges of national belonging alongside its cultivation of a plurality of specialized fields of knowledge (including critical knowledges of nationhood). These discussions are grounded in a study of the evolution of the modern German research university and its dual role as producer of scientific knowledge and as site for the production of national culture.

#### [ANTHR 453 Visual Anthropology (III) Spring. 4 credits. Not offered 2002–2003.]

#### ANTHR 456 Mesoamerican Religion, Science, and History @ # (III)

Fall. 4 credits. J. Henderson. For course description, see section, III Anthropology Major Senior Seminars.

#### [ANTHR 469 Gender and Age in Archaeology # (iii)

Spring. 4 credits. Not offered 2002-2003.]

#### C. Cultures in Anthropological Perspective:

Anthropology constructs its theories in the comparison of different social and cultural systems and thus depends integrally on knowledge about particular places. The courses below are all focused on the cultures and societies of particular areas of the world and organize knowledge about these areas in reference to key anthropological questions. Students without prior experience in anthropology are welcome in these courses.

#### ANTHR 221 Anthropological Representation: Ethnographies on Latino Culture (also LSP 221 and AM ST 221) (III) Fall. 3 credits. V. Santiago-Irizarry.

Fall. 5 credits. V. Santiago-Irizarry. Representation is basic to anthropology. In translating cultures, anthropologists produce authoritative representations of and about other people's lives. In this course, we examine, with a critical eye, the production of representations about U.S. Latino cultures as these are embodied in anthropological texts. Issues explored include the relation between the ethnographer and the people s/he is studying, the contexts in which ethnographic texts are produced, and the way they may position different cultural groups within the larger national context.

# [ANTHR 224 The French Experience (also FRLIT 224) (iii or IV)

Fall. 3 credits. Not offered 2002-2003. I. Siegel, A. Berger.

An examination of French society, culture, and institutions. What has made French culture so distinctive? Its literature and its revolutions, its gastronomy and fashion, its painting, cathedrals and cinema. Looking attentively at texts, images, and contexts from selected moments in the eighteenth, nineteenth, and twentieth centuries, we attempt to unravel some of the defining enigmas of the French exeperience.]

#### **ANTHR 230 Cultures of Native North** America @ # (III)

Fall. 4 credits. B. Lambert. A survey of the principal Eskimo and American Indian culture areas north of Mexico. Selected cultures are examined to bring out distinctive features of the economy, social organization, religion, and worldview Although the course concentrates on traditional cultures, some lectures and readings deal with changes in native ways of life that have occurred during the period of European-Indian contact.

#### **ANTHR 257** American Indians in Film (III)

Spring. 3 credits. F. Gleach. For course description, see section IVB, Understanding Cultures and Societies.

#### ANTHR 303 Asians in the Americas: A **Comparative Perspective (also AAS** 303) (111)

Spring, 4 credits, V. Munasinghe, The common perception of ethnicity is that it is a "natural" and an inevitable consequence of cultural difference. "Asians" overseas, in particular, have won repute as a people who cling tenaciously to their culture and refuse to assimilate into their host societies and cultures. But, who are the "Asians?" On what basis can we label "Asians" an ethnic group? Although there is a significant Asian presence in the Caribbean, the category "Asian" itself does not exist in the Caribbean. What does this say about the nature of categories that label and demarcate groups of people on the basis of alleged cultural and phenotypical characteristics? This course examines the dynamics behind group identity, namely ethnicity, by comparing and contrasting the multicultural experience of Asian populations in the Caribbean and the United States. Ethnographic case studies focus on the East Indian and Chinese experiences in the Caribbean and the Chinese, Korean, Japanese, Filipino, and Indian experiences in the United States

# **ANTHR 307** Comparative Analyses of **Contemporary Muslim Societies** (also NES 352) @ (III) Spring. 4 credits. C. Robinson.

For course description, see section IVA, Understanding Cultures and Societies.

#### ANTHR 313 Topics in the Anthropology of Japan @ (III)

Spring. 4 credits. H. Miyazaki. For course description, see section IVA, Understanding Cultures and Societies.

#### [ANTHR 316 Power, Society, and Culture in Southeast Asia @ (III)

Spring. 4 credits. Not offered 2002-2003. A. Willford.

Southeast Asia is a region where anthropologists have paid great attention to the symbolic within cultural and social processes. While this intellectual orientation has produced contextually rich accounts of cultural uniqueness, there has been a tendency within "interpretive" ethnographies to downplay the role of power and domination within culture and society. This course aims to utilize the traditional strengths of symbolic anthropology by examining the roles of ritual, art, religion, and "traditional" values within contemporary Southeast Asian societies. In so doing, however, we examine how these practices and ideas can also structure ethnic, class, and gender inequalities. Understanding how "traditional" cultural practices and ideologies fit within contemporary nation-states requires that we also examine the effects of colonialism, war, and nationalism throughout the region. In addition to providing a broad and comparative ethnographic survey of Southeast Asia, this course also investigates how culturally-specific forms of power and domination are reflected in national politics and in local and regional responses to the economic and cultural forces of globalization.]

# [ANTHR 336 Change and Continuity in

the Pacific Islands (III) Fall. 4 credits. Not offered 2002-2003. I. Fajans.

This course provides an introduction to the diverse peoples and cultures of Oceania. which extends from Hawaii to New Zealand and from Easter Island to New Guinea. It surveys the continuities and differences within this vast domain. The primary focus is on cultural diversity, linguistic patterns, history and migration, and ecological constraints and adaptations. The course examines issues confronting the contemporary Pacific nations: colonialism, development, nationalism, the politics of tradition, and how the world system influences events and politics in the region. This course is open to anyone interested in the Pacific region and/or in anthropology.]

# [ANTHR 337 Gender, Identity, and

**Exchange in Melanesia @ (III)** Fall. 4 credits. Not offered 2002–2003.]

# [ANTHR 339 Peoples and Cultures of the Himalayas (also ANTHR 739) @ (III)

Spring, 4 credits. Not offered 2002-2003. K March A comprehensive exploration of the peoples

and cultures of the Himalayas. Ethnographic materials draw on the lifeways of populations living in the Himalayan regions of Bhutan, India, Nepal, and Tibet. Some of the cultural issues to be examined through these sources include images of the Himalayas in the West, forms of social life, ethnic diversity, political and economic history, and religious complexity.]

#### ANTHR 344 Male and Female in Chinese **Culture and Society (also WOMNS** 344) @ (111)

Fall. 4 credits. S. Sangren. This course explores the culture of gender, sex roles, and domestic relations in late traditional and modern Chinese society. Readings and lectures range from ethnographic descriptions of the dynamics of Chinese family life, kin relations, and socialization to representations of male and female in mythologies and ritual activities. The course also considers developments subsequent to political changes in China. Although the course's analytical focus is anthropological, readings will draw from the writings of historians and political scientists as well. A premise of the course is that understanding sex and gender in China is essential to understanding Chinese culture and its most fundamental values. The course also aims to introduce students interested in Chinese to techniques of anthropological analysis.

#### ANTHR 346 The Kayapo of Brazil (also ANTHR 646) @ (III)

Spring. 4 credits. T. Turner. An intensive study of an Amazonian indigenous society, its culture, history and contemporary struggle for coexistence with modern regional, national and global society. The broader theoretical implications of aspects of Kayapo ethnography, such as kinship and family structure, moiety organization, ritual and the ceremonial system, social values, the political system, gender relations, inequality and hierarchy, the social production of bodiliness and the person, the patterning of affects and emotion, cosmology and alienated aspects of social consciousness, myth and history as narrative genres and modes of consciousness, social modes of speech and specialized uses of language, the appropriation and use of video, historical change, contemporary politics and efforts at communal economic development.

#### [ANTHR 355 Ancient Mexico and Central America (also ARKEO 355) @ # (III) Spring. 4 credits. Not offered 2002-2003 ]

#### ANTHR 356 Archaeology of the Andes (also ARKEO 356) @ # (III)

Spring. 4 credits. J. Henderson. A survey of the rise and decline of civilizations in the Andean region of western South America before the European invasion. Key topics include the use of invasion-period and ethnographic information to interpret precolumbian societies, the emergence of settled farming life, and the development of the state

# [ANTHR 377 The United States (also LSP

377 and AM ST 377) (III)

Fall. 4 credits. Not offered 2002-2003. V. Santiago-Irizarry.

The anthropological inquiry into one's own culture is never a neutral exercise. This course explores issues in the cultural construction of the United States as a "pluralistic" society. We look at the ideological context for the production of a cultural profile predicted upon ideas that are intrinsic to American images of identity such as individualism, freedom, and equality and the way these are applied in practice. The course readings include historic documents and accounts, popular writing, and recent ethnographies on the United States.]

#### ANTHR 383 Topics in African **Ethnography: The State and Civil** Society in Colonial and Contemporary Africa @ (III)

Fall. 4 credits. J. Schoss. This course will provide an intensive introduction to Africanist anthropology through an examination of classic works of British social anthropology and current ethnographic materials from 1985 to the present. Taking the state and civil society as its central foci, the course will address their relationship through three lenses: state power

and African popular responses; social change, globalization, and the expansion of Western economic systems into African societies; and the role of education and educational institutions in the transformation of Africa. The course readings will move between colonial and contemporary ethnographic materials to examine how the processes have changed with the passing of the colonial regime and the rise of independent African states. Further, by comparing these two bodies of literature, we will analyze how anthropological approaches to Africa have changed (or not) in their analytical and representational orientation.

#### ANTHR 413 Religion and Politics in Southeast Asia (also ASIAN 413) @ (111)

Spring. 4 credits. A. Willford. This course explores how religious beliefs and practices in Southeast Asia have been transformed by the combined forces of colonialism, nationalism, and globalization. By examining both diversity and resurgence in one of the world's most rapidly modernizing regions, we aim to understand the common economic, social, and political conditions that are contributing to the popularity of contemporary religious movements. At the same time, we also consider the unique ideological, theological, and cultural understandings behind different religions and movements. Through this process we also rethink conceptions of modernity.

#### ANTHR 442 Violence, Symbolic Violence, Terror and Trauma in South Asia and the Himalayas (also ANTHR 642) @ (III)

Spring. 4 credits. D. Holmberg. For course description, see section IVA, Understanding Cultures and Societies.

#### ANTHR 456 Mesoamerican Religion, Science, and History @ # (III)

Fall. 4 credits. J. Henderson. For course description, see section III, Anthropology Major Senior Seminars.

# [ANTHR 477 Ethnology of Island

Southeast Asia @ (III) Fall. 4 credits. Not offered 2002–2003.]

# [ANTHR 493 Seminar in Archaeology (also ARKEO) (III) Fall. 4 credits. Not offered 2002–2003.]

#### V. . Anthropological Thought and Method

As a form of inquiry, anthropology has a long and complex history and utilizes a wide variety of theories and methods. In this section, topics in the history of anthropological thought and numerous anthropological approaches are presented, along with courses focused on the design of anthropological research projects.

#### ANTHR 215 Stone Age Art (also ARKEO 215) # (111)

Fall. 3 credits. T. Volman. For course description, see section IB, Introductory Courses.

#### [ANTHR 291 Filming Other Cultures (also ANTHR 691 and THETR 291/691) @ (III or IV)

Spring. 4 credits. Limited to 20 students. Preference given to students who have taken either ANTHR 102 or THETR 474. Fee for film screening and maintenance, \$35. Not offered 2002-2003. Staff.

For course description, see section IVB, Understanding Cultures and Societies.

#### **[ANTHR 306 Ethnographic** Description (III)

Fall. 4 credits. Not offered 2002-2003.]

# ANTHR 324 Anthropology Amongst the **Disciplines (III)** Fall. 4 credits. J. Siegel.

Ethnography has as one of its aims the comprehension of the 'other' in whose eyes the "I" or the first person is constructed. The history of this idea in Western philosophy and literature has influenced anthropologists' understanding. We look at this history and its inflection in ethnography, particularly in the study of ritual.

#### [ANTHR 362 Democratizing Research: Participation, Action, and Research (also ANTHR 662) (III)

Fall. 4 credits. Not offered 2002-2003. D. I. Greenwood.

This course poses an alternative to distanced, "objectivist" social science by reviewing some of the numerous approaches to socially engaged research. Among the approaches discussed are those centering on the pedagogy of liberation, feminism, the industrial democracy movement, "Southern" participatory action research, action science, and participatory evaluation. There are no prerequisites and undergraduates are welcome.]

#### [ANTHR 368 Marx: An Overview of His Thought (also ANTHR 668) (III)

Spring. 4 credits. Not offered 2002-2003. T. Turner.

A reading and interpretation of Marx's principal writings, emphasizing both the continuities and the changes from his earlier to his later works, with attention given to contemporary developments and controversies in Marxian scholarship.]

#### [ANTHR 372 Hunters and Gatherers (also ANTHR 672) #@(III)

Spring. 4 credits. Not offered 2002-2003.]

# ANTHR 403 The Craft of Anthropology: Ethnographic Field Methods (also ANTHR 603) (III) Fall. 4 credits. V. Santiago-Irizarry.

This course provides students with practical understanding about what anthropologists actually do in the field. We examine problems that emerge in conducting fieldwork which raise ethical, methodological, theoretical, and practical issues in the observation, participation in, recording, and representation of culture(s). Students are expected to develop a semester-long, local research project that allows them to experience fieldwork situations.

#### [ANTHR 405 Archaeology Research Design (also ANTHR 605 and ARKEO 405/605) (111)

Spring. 4 credits. Not offered 2002-2003.]

#### [ANTHR 412 Contemporary Anthropological Theory (III)

Spring. 4 credits. Not offered 2002-2003.]

# **ANTHR 420** Development of Anthropological Thought (also ANTHR 720) (III) Fall. 4 credits. Prerequisite: undergraduates

must have two prior anthropology courses or permission of instructor. J. Fajans. An examination of the history and development of anthropological theory and practice. The course focuses on the differences and

continuities among the various national and historical approaches that have come to be regarded as the schools of anthropology.

[ANTHR 453 Visual Anthropology (IV) Spring. 4 credits. Not offered 2002–2003.]

[ANTHR 458 Archaeological Analysis (also ANTHR 658 and ARKEO 458/ 658) (111) Spring. 4 credits. Not offered 2002-2003.]

# [ANTHR 459 Archaeology of the Household (also ANTHR 659 and ARKEO 459/659) # (III)

Fall. 4 credits. Not offered 2002-2003.]

#### ANTHR 463 Zooarchaeological Method (also ARKEO 463) (III)

Fall. 5 credits. N. Russell.

This is a hands-on laboratory course in zooarchaeological method: the study of animal bones from archaeological sites. It is designed to provide students with a basic grounding in identification of body part and taxon, aging and sexing, pathologies, taphonomy, and human modification. We deal only with mammals larger than squirrels. While we work on animal bones from prehistoric Europe, most of these skills are easily transferable to the fauna of other areas, especially North America. This is an intensive course that emphasizes laboratory skills in a realistic setting. Students analyze an assemblage of actual archaeological bones. It is highly recommended that students also take the course in Zooarchaeological Interpretation (ANTHR/ARKEO 464) offered in the spring.

#### ANTHR 464 Zooarchaeological Interpretation (also ARKEO 464) (111)

Spring. 4 credits. Permission of instructor only. N. Russell.

This course follows from last semester's Zooarchaeological Method. We shift our emphasis here from basic skills to interpretation, although students continue to work with archaeological bones. We begin by examining topics surrounding the basic interpretation of raw faunal data: sampling, quantification, taphonomy, seasonality. We then explore how to use faunal data to reconstruct subsistence patterns, social structure, and human/animal relations

#### (ANTHR 466 Humans and Animals (also ANTHR 666 and ARKEO 466/666) # (111)

Fall. 4 credits. Not offered 2002-2003.]

# [ANTHR 467 Origins of Agriculture (also **ARKEO 467)** # (III) Spring. 4 credits. Not offered 2002–2003.]

# **ANTHR 474 Laboratory and Field** Methods in Human Biology (also **BIOEE 474) (I)** Spring. 5 credits. Limited to 16 students.

Prerequisite: one year of introductory biology or ANTHR 101 or permission of instructor. Recommended: permission of instructor by preregistering in E231 Corson. Independent research project required. Lecs and labs, T R 10:10-12:05; additional hours TBA. Offered alternate years. K. A. R. Kennedy.

Forensic anthropology within the forensic sciences is covered in a broad survey of laboratory and field methods for students with interest in this applied area of biological anthropology. Emphasis upon human skeletal biology, pathology, age and sex determination, and relevant techniques for the archaeologist and forensic anthropologist.

#### [ANTHR 480 Anthropology and **Globalization (also ANTHRO** 680) (III)

Fall. 4 credits. Not offered 2002-2003. A. Willford.

This course examines anthropological perspectives on globalization and assesses the cultural, political, and social implications of contemporary global processes. In exploring the factors that are contributing to the production of diasporic consciousness, the intensity and variety of transnational flows of culture, commodities, corporations, and people are considered in order to assess challenges these processes pose to the modern nation-state. Has culture been liberated from the control of the nation-state through the emergence of new cultural networks created by immigration, electronic media, tourism, and multinational corporations and organization? Or, has the acceleration of global processes within the modern world system created new tools of domination within an increasingly stratified global economy? This course addresses these and related questions utilizing both anthropological theories of and ethnographic studies on globalization, ethnicity, diaspora, and nationalism.]

#### ANTHR 487 Field Research Abroad @ (111)

Fall or spring. Credit TBA. Intended for undergraduate students only. Staff. Field research abroad as part of the Cornell-Nepal Studies Program, the Cornell-Honduras Program, or other departmentally-approved programs. Topics are selected and project proposals prepared by students in consultation with faculty. Fieldwork typically involves extended research (usually four-six weeks) in a foreign setting with faculty supervision, culminating in a major paper or report.

# **ANTHR 494 Seminar in Archaeology: The** Archaeology of Human Origins (also ARKEO 494) (III) Spring. 4 credits. T. Volman.

An exploration of the archaeological record associated with early modern and nearmodern humans as well as their non-modern contemporaries, such as the Neanderthals. Major issues include: what behaviors and capabilities are indicated for various populations, and how and why did these change over the course of the later Pleistocene? To what extent does the archaeological record support the "Out-of-Africa" hypothesis of a recent, African origin for all modern humans?

#### [ANTHR 495 Action Research Practicum

Fall and spring. 2 credits. Prerequisite: student must be holder of Bartels Action Research Undergraduate Fellowship. Not offered 2002-2003. D. Greenwood.

The Henry E. Bartels Undergraduate Action Research Fellowship Program offers opportunities for Cornell University undergraduate students from all colleges, departments, and majors to engage in action research projects in the local community, including the Ithaca area and the Cornell campus community. This is a two-part course.]

# VI. Human History and Archaeology

Archaeology tells the story of human origins, the invention of farming and settled life, the rise of complex social institutions and technologies, and the worldviews of the past,

while also teaching field and laboratory methods for uncovering the human past.

#### ANTHR 203 Early People: The **Archaeological and Fossil Record** (also ARKEO 203) # (III) Spring. 3 credits. T. Volman.

For course description, see section IA, Introductory Courses.

#### ANTHR 215 Stone Age Art (also ARKEO 215) # (III)

Fall. 3 credits. T. Volman. For course description, see section IB, Introductory Courses.

#### [ANTHR 240 Old World Prehistory (also ARKEO 240) # (III)

Fall. 3 credits. Not offered 2002-2003.]

#### ANTHR 242 Early Agriculture @ # (III) Spring. 3 credits. N. Russell.

Throughout most of the human career, people survived by hunting and gathering wild foods. The advent of food production is one of the most profound changes in (pre)history. This course examines the current evidence for the appearance and spread of agriculture (plant and animal domestication) around the world. We consider definitions of agriculture and domestication, the conditions under which it arises, the consequences for those who adopt it, and why it has spread over most of the world.

# ANTHR 317 Stone Age Archaeology (also ARKEO 317) (III) Fall. 4 credits. T. Volman.

A survey of current approaches to the archaeological record of Stone Age peoples, from the earliest sites to those of recent times. Case studies are used to illustrate the nature of archaeological occurrences, excavation procedures, and analytical methods. Multidisciplinary efforts to expand our knowledge of prehistoric lifeways and behaviors are a major concern of the course.

#### [ANTHR 355 Ancient Mexico and Central America (also ARKEO 355) @ # (III) Spring. 4 credits. Not offered 2002-2003.]

ANTHR 356 Archaeology of the Andes

#### (also ARKEO 356) @ # (III) Spring. 4 credits. J. Henderson.

For course description, see section IVC, Understanding Cultures and Societies.

#### [ANTHR 370 Environmental Archaeology (also ANTHR 670 and ARKEO 370/ 670) (111)

Spring. 4 credits. Not offered 2002-2003.]

#### [ANTHR 371 Human Paleontology (also BIOEE 371) # (1)

Fall. 4 credits. Prerequisite: one year of introductory biology or ANTHR 101 or permission of instructor. Lecs, M W F 2:30; lab, 1 hour each week, TBA; occasional field trips. Offered alternate years. Not offered 2002-2003. K. A. R. Kennedy.

A broad survey of the fossil evidence for human evolution with special attention to skeletal and dental anatomy, geological contexts, paleoecology, dating methods, archaeological associations, and current theories of human origins and physical diversity.]

# [ANTHR 372 Hunters and Gatherers (also ANTHR 672) # @ (III) Spring, 4 credits. Not offered 2002–2003.]

Spring. 4 credits. Not offered 2002-2003.]

#### [ANTHR 409 Approaches to Archaeology (also ANTHR 609 and ARKEO 409/ 609) (III)

Fall. 4 credits. Not offered 2002-2003.]

#### ANTHR 456 Mesoamerican Religion, Science, and History @ # (III) Fall. 4 credits. J. Henderson.

For course description, see section III, Anthropology Major Senior Seminars.

#### [ANTHR 458 Archaeological Analysis (also ANTHR 658 and ARKEO 458/ 658) (III)

Spring. 4 credits. Not offered 2002-2003.]

- [ANTHR 459 Archaeology of the Household (also ANTHR 659 and ARKEO 459/659) # (III) Fall. 4 credits. Not offered 2002-2003.]
- ANTHR 463 Zooarchaeological Method (also ARKEO 463) (III)

Fall. 5 credits. N. Russell. For course description, see section V, Anthropological Thought and Method.

#### ANTHR 464 Zooarchaeological Interpretation (also ARKEO 464) (111)

Spring. 4 credits. N. Russell. For course description, see section V, Anthropological Thought and Method.

#### [ANTHR 466 Humans and Animals (also ANTHR 666 and ARKEO 466/666) # (111)

Fall. 4 credits. Not offered 2002-2003.]

# [ANTHR 467 Origins of Agriculture (also

ARKEO 467) # (III) Spring. 4 credits. Not offered 2002–2003.]

#### [ANTHR 469 Gender and Age in Archaeology (also ANTHR 669, ARKEO 469/669) # (III)

Spring. 4 credits. Not offered 2002-2003. N. Russell.

In recent years, feminist theory has begun to have an impact on archaeological thought. It is now recognized that gender is likely to have been a relevant dimension of social organization in past societies. Some archaeologists are also trying to take into account the differing interests and experiences of children, adults of reproductive age, and the elderly. This course is not limited to any period or geographical area, but ranges widely in examining how feminist theory has been applied to archaeological data and models. We consider whether it is necessary to identify women and men, adults and children in the archaeological record in order to take gender and age into account. We also examine the uses of archaeological data by contemporary feminists 1

#### [ANTHR 493 Seminar in Archaeology (also ARKEO 493)

Fall. 4 credits. Not offered 2002-2003.]

# ANTHR 494 Seminar In Archaeology: The Archaeology of Human Origins (also ARKEO 494) (III) Spring. 4 credits. T. Volman.

For course description, see section V, Anthropological Thought and Method.

# VII. Nature and Culture

Thinking about nature and culture and their interaction is central to contemporary anthropology. The courses in this section present a biological and evolutionary perspective on behavior, focus on the interplay between nature and culture, and discuss the controversies surrounding these relationships between these dimensions of human life.

#### [ANTHR 208 The Evolution of Human Mating (III)

Spring. 4 credits. Not offered 2002-2003.]

#### ANTHR 211 Nature and Culture @ (III) Spring. 4 credits. S. Sangren. For course description, see section IA,

Introductory Courses.

#### ANTHR 242 Early Agriculture @ # (III) Spring. 3 credits. N. Russell.

For course description, see section VI, Human History and Archaelogy.

#### ANTHR 344 Male and Female in Chinese Culture and Society (also WOMNS 344) @ (III)

Fall. 4 credits. S. Sangren. For course description, see section IVC, Understanding Cultures and Societies.

#### [ANTHR 370 Environmental Archaeology (also ANTHR 670 and ARKEO 370/ 670) (III)

Spring. 4 credits. Not offered 2002-2003.]

Fall. 3 credits. M. Hatch.

MUSIC 245 Introduction to Indonesia **Through Its Arts** 

Fall and spring. 3 credits. Permission of instructor required. M. Hatch.

#### NS/HD/BSoc 347 Human Growth and **Development: Biological and Social** Interactions

Spring. 3 credits. J. Haas, S. Robertson.

# **VIII. Graduate Seminars**

The graduate program in anthropology is described in much greater detail in the Graduate Program brochure which is available through the Director of Graduate Studies. This document is also found on the anthropology department web page at falcon.arts.comell. edu/~anthro/. The seminars described immediately below pertain to the program in socio-cultural anthropology. For information about graduate study in archaeology and biological anthropology, see the anthropology department web page.

A core set of seminars is required of all graduate students in socio-cultural anthropology: ANTHR 600 and 601. ANTHR 603 is strongly recommended. These courses are open to graduate students from other related fields. This sequence, and the graduate curriculum in general, is premised on the idea that anthropology is best defined as the comparative study of human social life. This definition resists institutional pressures in the academy to distinguish social science from humanistic or cultural studies and scholarly from more worldly applications. Our most important method, ethnography, is at once scientific and humanistic; disciplinary aspirations refuse to view cultural interpretation and analytic explanation as separable values. Furthermore, theory in anthropology is directly related to practice in the world whether in relation to research or more action-oriented pursuits. Consequently, the core sequences as well as most other courses for graduate students are oriented explicitly toward subverting an ideological construction of social life as separable into cultural and social (or political-economic) domains.

#### ANTHR 600 Proseminar: Culture and Symbol

Fall. 6 credits. A. Willford. This course focuses on an appreciation of symbolic, expressive, and representational forms and processes both as producers and products of social activities. Through the study of symbolic anthropology, structuralism, exchange, myth and ritual, religion, gender, personhood, linguistics, semiology, etc., we investigate how identity and meaning are linked to the practical exigencies of social life.

While emphasizing aspects of the discipline generally associated with cultural anthropology, the course endeavors to set the stage for a dialectical understanding of social, political, economic, and symbolic activities as interrelated phenomena. The works of de Saussure, Levi-Strauss, Dumont, Geertz, Victor Turner, Sahlins, among others, as well as contemporary theories are given careful attention.

#### ANTHR 601 Proseminar: Social Organization

Spring. 6 credits. S. Sangren. This course focuses on linkages between culture and social institutions, representations and practices. The nature of these linkages is debated from strongly contesting points of view in social theory (structuralist, poststructuralist, utilitarian, hermeneutic, Marxist). Unlike debates in critical theory where the form of contestation has been mainly philosophical, in anthropology, these issues have developed in ethnographic analyses. The course briefly surveys kinship theory and economic anthropology with a focus on implications for general issues in social theory. Discussion of attempts to develop dialectical syntheses around the motion of "practice" follows. The issues addressed in this section carry over into the next, colonialism and post-colonialism, in which poststructuralist readings of history are counterposed to Marxist ones. Finally, Lacanian and Marxist visions of ideology as they relate to anthropological theory and ethnographic analysis are examined with particular emphasis on the cultural and social production of persons.

# ANTHR 602 The Practices of

Anthropology Fall. 4 credits. Not offered 2002-2003.]

#### ANTHR 603 The Craft of Anthropology (also ANTHRO 403)

Fall. 4 credits. V. Santiago-Irizarry. For course description, see section V Anthropological Thought and Method.

#### [ANTHR 604 Praxis and Culture

Spring. 4 credits. Not offered 2002-2003.]

#### [ANTHR 605 Archaeological Research **Design (also ANTHR 405 and ARKEO** 405/605)

Spring. 4 credits. Not offered 2002-2003.]

#### **ANTHR 606** Professional Ethics for Anthropologists

Spring, 4 credits. Non-anthropology grads with consent of instructor. T. Turner. Anthropological involvement in human rights, cultural, ethnic and indigenous activism, multiculturalism, cultural and political nationalism. Individual and collective ethical responsibilities, the latter involving the Professional Association and its standing committees on ethics and human rights. Rights and protection of informants. Case studies of ethical controversies and human rights cases. Problems of working with governments, development banks, and non-governmental organizations.

#### [ANTHR 609 Approaches to Archaeology (also ANTHR 409 and ARKEO 409/ 6091

Fall. 4 credits. Not offered 2002-2003.]

[ANTHR 610 Language and Myth Fall. 4 credits. Not offered 2002-2003.]

#### [ANTHR 614 Reading in the

**Ethnographic Tradition (1880–1960)** Spring. 4 credits. Not offered 2002–2003. D. Holmberg.

This seminar examines the development of the monographic tradition within American cultural anthropology and British social anthropology. We read "classic" ethnographic texts beginning with Cushing's writings in the late nineteenth century, following with works by anthropologists such as Rivers, Boas, Radcliffe-Brown, Malinowski, Firth, Mead, Bateson, Radin, Redfield, Srinivas, Evans-Pritchard, and Leach. We also read some of the more recent literature assessing ethnographic practice and writing. This seminar alternates from year to year with ANTHR 615.]

#### [ANTHR 615 Reading Contemporary Ethnographies (1960–1990)

Fall. 4 credits. Not offered 2002-2003.]

#### ANTHR 616 Cultural Production of the Person

Spring. 4 credits. J. Fajans.

The course addresses the interdisciplinary nature of the relations between the person and both culture and society. Focusing on the integration of theories of the actor with models of cultural forms and social interaction, the aim is to develop an understanding of the processes and activities that simultaneously produce the cultural subject, the culture, and the society.

#### ANTHR 621 Sex and Gender in Cross-Cultural Perspective (also ANTHR 321 and WOMNS 321/631)

Fall. 4 credits. Prerequisite: concurrent attendance in the lectures and films of ANTHR/WOMNS 321 and permission of instructor. K. March.

For course description, see ANTHR 321, section IVA, Understanding Cultures and Societies.

#### ANTHR 624 Ethnoracial Identity in Anthropology, Language, and Law (also LSP 624)

Spring. 4 credits. V. Santiago-Irizarry. For course description, see section IVA, Understanding Cultures and Societies.

#### ANTHR 628 Social Forms of Violence in Anthropological Perspective

Fall. 4 credits. J. Siegel. The seminar treats war, the feud, and witchcraft with the aim of framing questions in ways amenable to anthropological analysis. We ask why death so frequently prompts sentiments of vengence; we consider witchcraft, asking about its relation to the uncanny and we attempt to reread Evans-Pritchard and others in the light of current theories of violence. We also consider colonial war and the jihad.

#### [ANTHR 629 Chinese Ethnology Spring, 4 credits. Not offered 2002–2003.]

[ANTHR 632 Andean Symbolism Spring. 4 credits. Not offered 2002–2003.]

#### ANTHR 635 Southeast Asia: Readings in Special Problems

Fall or spring. Credit TBA. Staff. Independent reading course on topics not covered in regularly scheduled courses. Students select a topic in consultation with the faculty member who has agreed to supervise the course work.

#### [ANTHR 640 Problems in Himalayan Studies

Fall, spring. 4 credits. Not offered 2002-2003. D. Holmberg.

This working seminar is for students who have research interests in the Nepal Himalayas and related regions. Topics vary but include: nationalism, caste, and ethnicity, including indigenous people's movements and the Dalit movement; land tenure; gender; modern politics, including the people's movement and Maoism; Nepal and the world, including tourism, development, ritual practice, and globalization.]

#### ANTHR 641 South Asia: Readings in Special Problems

Fall or spring. Credit TBA. Staff. Independent reading course in topics not covered in regularly scheduled courses. Students select a topic in consultation with the faculty member who has agreed to supervise the course work.

#### ANTHR 642 Violence, Symbolic Violence, Terror and Trauma in South Asia and the Himalayas (also ANTHR 442)

Spring. 4 credits. D. Holmberg. For course description, see section IVA, Understanding Cultures and Societies.

#### ANTHR 644 Research Design Spring. 4 credits. Staff.

This seminar focuses on preparing a full-scale proposal for anthropological fieldwork for a dissertation. Topics include: identifying appropriate funding sources; defining a researchable problem; selecting and justifying a particular fieldwork site; situating the ethnographic case within appropriate theoretical contexts; selecting and justifying appropriate research methodologies; developing a feasible timetable for field research; ethical considerations and human subjects protection procedures; and preparing appropriate budgets. This is a writing seminar; students complete a proposal suitable for submission to a major funding agency in the social sciences.

#### ANTHR 646 The Kayapo of Brazil (also ANTHR 346)

Spring. 4 credits. T. Turner. For course description, see section IVC, Understanding Cultures and Societies.

#### ANTHR 652 Evidence: Ethnography and Historical Method

Fall. 4 credits. H. Miyazaki.

Is anthropologists' recent turn to history destiny, as Evans-Pritchard once said? Or is it simply a temporary oscillation from an emphasis on systematization to an emphasis on process? Are there any potentially productive incommensurabilities between ethnography and history as two distinct forms of knowledge production? In this seminar, we will explore these questions by examining the uses of archival records as evidence in the two disciplines. We will read some of the most well-known texts in historical anthropology and anthropological history side by side with some influential reflection on the uses of evidence in history and a wide range of recent studies of evidential practices in various sites of knowledge production such as archives, court rooms, and laboratories. The ultimate purpose of the seminar is to carve out a space for a new kind of ethnographic engagement with historical method. Graduate students from programs of study other than anthropology are welcome.

#### ANTHR 655 East Asia: Readings in Special Problems

Fall or spring. Credit TBA. Staff. Independent reading course in topics not covered in regularly scheduled courses. Students select a topic in consultation with the faculty member who has agreed to supervise the course work.

# ANTHR 656 Maya History (also ARKEO 656)

Spring. 4 credits. J. Henderson. An exploration of Maya understandings of their own history, drawing on ethnographic, historical, and archaeological sources. Analysis of hieroglyphic inscriptions from ancient Maya cities is a major focus.

#### [ANTHR 658 Archaeological Analysis (also ANTHR 458 and ARKEO 458/ 658)

Spring. 4 credits. Not offered 2002-2003.]

#### [ANTHR 659 Archaeology of the Household (also ANTHR 459 and ARKEO 459/659)

Fall. 4 credits. Not offered 2002-2003.]

Spring. 4 credits. Not offered 2002-2003.]

#### [ANTHR 662 Democratizing Research: Participation, Action, and Research (also ANTHR 362)

Fall. 4 credits. Not offered 2002–2003. D. J. Greenwood.

For description, see ANTHR 362, Section V, Anthropological Thought and Method.]

#### [ANTHR 663 Action Research

Spring. 4 credits. Not offered 2002–2003. D. Greenwood.

This seminar is a practicum in action research (AR) in which the semester becomes a selfmanaging learning environment for the exploration of the techniques and group processes involved in AR, including cogenerative learning, searching, and AR facilitation. Participation in a seminar-centered LISTSERV on the Internet is expected.]

#### [ANTHR 665 Topics in Native American Societies and Cultures (also AIS 665)

Spring. 4 credits. Not offered 2002–2003. B. Lambert.

This seminar is intended for undergraduate and graduate students in any field who are prepared to undertake independent research in American Indian Studies. I am particularly interested in how materials from Native American cultures can be used to help solve problems of general anthropological significance and in the contributions Native Americans have made to anthropological and sociological knowledge as teachers and researchers. However, students are encouraged to pursue their own interests and are expected to discuss work in progress with other members of the seminar. A reading list is developed to provide a shared background for discussions.]

#### [ANTHR 666 Humans and Animals (also ANTHR 466 and ARKEO 466/666)

Fall. 4 credits. Not offered 2002-2003\_]

#### [ANTHR 667 Contemporary Archaeological Theory (also ARKEO 667)

Spring, 4 credits. Prerequisite: undergraduates with permission of instructor only. Not offered 2002–2003, N. Russell. This course surveys recent developments and current debates in archaeological theory. This includes the processual/postprocessual debate and contrasts between scientific and humanistic approaches more generally, as well as other approaches (Marxist, feminist, etc.). We also discuss ethical concerns and engagements with groups outside archaeology with interests in the past.]

#### [ANTHR 668 Marx: An Overview of His Thought (also ANTHR 368)

Spring. 4 credits. Not offered 2002–2003. T. Turner.

For course description, see section V, Anthropological Thought and Method.]

#### [ANTHR 669 Gender and Age in Archaeology (also ANTHR 469 and ARKEO 469/669)

Spring. 4 credits. Not offered 2002–2003. N. Russell.

For course description, see section VI, Human History and Archaeology.]

[ANTHR 670 Environmental Archaeology (also ANTHR 370 and ARKEO 370/670)

Spring. 4 credits. Not offered 2002-2003.]

#### [ANTHR 671 Palaeoanthropology of South Asia (also BIOEE 671 and ASIAN 620)

Fall. 3 credits. Not offered 2002-2003.]

#### [ANTHR 672 Hunters and Gatherers (also ANTHR 372)

Spring. 4 credits. Not offered 2002-2003.]

#### ANTHR 673 Human Evolution: Concepts, History, and Theory (also BIOEE 673)

Fall. 3 credits. Prerequisite: one year of introductory biology, ANTHR 101, or permission of instructor. Lec, M 2:30; sem and disc, W 7:30–9:30 p.m. Offered alternate years. K. A. R. Kennedy.

A survey of the historical background of present-day concepts of human evolutionary variations and adaptations in space and time. The formation of biological anthropology as an area of scientific inquiry within the social and biological sciences is reviewed. Students select their own topics within a broad range of readings in the history of Western concepts of human origins, diversity, and place in nature.

#### ANTHR 677 The Anthropology of Global Turbulence

Fall. 4 credits. J. Rigi.

The aim of the course is to provide comparative analytical and ethnographic insights on global turbulence, conflicts, violence, and the survival of the dispossessed. The effects of global economic turbulence, the emergence and forms of shadow states, practices of corruption, wars and violence, discourses of human rights, and media representations of global turbulence will be some of the key issues explored. The first half of the course addresses the acute economic and political conditions which have contributed to the present global resurgence of conflicts and violence. Particular attention is paid to various global economic recessions, the corruption of state institutions, and the global rise of poverty. The second on specific wars and conflicts, their consequences in terms of forced displacement, the discourses of human rights and humanitarian intervention, and media representations of war and conflicts. The course concludes (week 12) with a critical reflection on the current global processes which contribute to war and conflict.

#### ANTHR 679 Technocracy: Anthropological Approaches Spring, 4 credits. A. Riles.

In recent years, anthropologists have begun to turn their attention to the character of bureaucratic and technical knowledge at play in diverse contexts, from indigenous activist organizations to scientific laboratories and even the academy. This new turn has brought anthropologists into renewed debate with scholars in science and technology studies, sociology, law, cultural studies, and architecture. Topics of concern to anthropologists include the relationship between aesthetics and politics in the practices of technocracy, the forms of agency that produce and are produced by the technocratic, the temporality of bureaucratic practices, and the nature of innovation. There are methodological questions as well: How should such practices be studied ethnographically? What kinds of interpretive frames should anthropologists deploy where categories such as "the social" or "culture, or oppositions of global to local, or symbolic to material seem already displaced by the subjects of study? What is the relationship of anthropological understanding to critique? This seminar aims to explore these themes as they present themselves in contemporary ethnographic work.

# ARABIC AND ARAMAIC

See under Department of Near Eastern Studies.

# ARCHAEOLOGY

S. Baugher (landscape architecture), R. G. Calkins (history of art), K. M. Clinton, director of graduate studies, (classics), J. E. Coleman (classics), D. Evett (Language House Program), R. T. Farrell (English), K. L. Gleason (landscape architecture), J. S. Henderson (anthropology) chair, K. A. R. Kennedy (ecology and systematics), P. I. Kuniholm (history of art), director of undergraduate studies, D. I. Owen (Near Eastern studies), J. R. Piggott (history), A. Ramage (history of art), N. Russell (anthropology), B. S. Strauss (history), M. A. Tomlan (city and regional planning), T. P. Volman (anthropology), Jeffrey R. Zorm (near eastern studies).

Archaeology is an interdisciplinary field at Cornell, which is one of the few universities in the United States to offer a separate archaeology major and a masters' degree. Program faculty members, affiliated with several departments, coordinate course offerings and help students identify opportunities for fieldwork, graduate study, and professional positions.

#### The Major

Prospective majors must complete Archaeology 100 or one of the basic courses as defined below before they will be admitted to the major. This course will not be counted toward the major requirements.

Because the major draws on the teaching and research interests of faculty from many departments to present a broad view of the archaeological process, interested students should discuss their course of study with a participating faculty member as early as possible. In some areas of specialization, intensive language training should be coordinated with other studies as early as the freshman year.

Once admitted to the major, students must take at least 32 additional credits from the courses listed below, or from related fields selected in consultation with a major adviser of their choosing. The courses chosen should provide exposure to a broad range of cultures known through archaeology and the methods of uncovering and interpreting them. Sixteen of the credit hours should be at the 300 level or above. At least two courses must be taken from each of the following categories: B. Anthropological Archaeology; C. Classical, Near Eastern, and Medieval Archaeology; and D. Methodology and Technology.

Either ARKEO 481 or ARKEO 482 (Honors Thesis, fall and spring) can count toward the major, but not both. In addition to ARKEO 481 or 482, only four credits of ARKEO 300 (Individual Study) or other supervised study can count towards the major.

Courses basic to the discipline of archaeology are marked with the word "Basic" after the number of credit hours. It is recommended that majors who are planning to pursue graduate studies in archaeology take at least two of the basic courses in each category. Further courses in languages and geology are also recommended.

Honors. Honors in archaeology are awarded on the basis of the quality of an honors essay and the student's overall academic record. Prospective honors students should have at least a 3.5 grade point average in the major and a 3.0 grade point overall. They should consult with the director of undergraduate studies before the beginning of the senior year. The honors essay is normally prepared over two semesters in consultation with a faculty adviser during the senior year; students may enroll in Archaeology 481 (fall) or Archaeology 482 (spring) for this purpose.

Fieldwork. Every student should gain some practical experience in archaeological fieldwork on a project authorized by his or her adviser. This requirement may be waived in exceptional circumstances. The Jacob and Hedwig Hirsch bequest provides support for a limited number of students to work at excavations sponsored by Cornell and other approved institutions.

#### The Concentration

Students in Cornell schools and colleges other than Arts and Sciences may elect a concentration in archaeology. To concentrate in archaeology, the student must complete five courses, all with a grade of C or better. The five courses must consist of either (1) Archaeology 100 and four other courses from categories B–D (described above), at least three of which must be basic courses, or (2) five courses from categories B-D, at least four of which must be basic courses. Concentrators are encouraged to gain some fieldwork experience. They are eligible for Hirsch Scholarships in support of fieldwork on the same basis as majors.

#### **First-Year Writing Seminars**

For course descriptions, see the first-year writing seminar brochure.

#### A. Introductory Courses and Independent Study Courses

#### **ARKEO 100** Introduction to Archaeology (also ANTHR 100) #@ (Ill or IV)

Fall. 3 credits. Basic. J. Henderson. A broad introduction to archaeology: the study of material remains to answer questions about the human past. Case studies highlight the variability of ancient societies and illustrate the varied methods and interpretive frameworks archaeologists use to reconstruct them. This course can serve as a platform for both Archaeology and Anthropology undergraduate majors

[ARKEO 201 Lost Tribes and Sunken Continents (also ANTHR 201) @ # Summer only. 3 credits. Not offered 2002-2003. D. Evett.

An examination of popular theories about past highlights, differences among them, and the kinds of explanations offered by archaeologists. Emphasis is on the ways archaeologists interpet the past. Case studies include Atlantis, Stonehenge, Egyptian and Mexican pyramids, and the history of contacts between the Old World and the Americas.]

#### [ARKEO 266 Jerusalem Through the Ages (also NES 266, JWST 266, RELST 266) #@(III)

Fall. 3 credits. Not offered 2002-2003. L Zorn.l

#### ARKEO 300 Individual Study in **Archaeology and Related Fields**

Fall and spring. Credit TBA. Prerequisite: ARKEO 100 or permission of instructor. Students pursue topics of particular interest with the guidance of a faculty member.

#### ARKEO 481-482 Honors Thesis

481, fall; 482, spring. 4 (V) credits. S-U only. Prerequisite: admission to Honors Program.

The student, under faculty direction, prepares a senior thesis.

#### **ARKEO 600** Special Topics in Archaeology

Fall and spring. 4 (V) credits. Students pursue advanced topics of particular interest under the guidance of a faculty member(s).

#### ARKEO 681-682 Master's Thesis

681, fall; 682, spring. 4 (V) credits. S-U only. Limited to students admitted to Master's Program in Archaeology.

Students, working individually with faculty member(s), prepare a Master's Thesis in Archaeology

#### B. Anthropological Archaeology

#### [ARKEO 202 Interpretive Archaeology (also ANTHR 202) (III)

Fall. 3 credits. Limited to 50 students. Not offered 2002-2003. T. P. Volman. For description, see ANTHR 202.]

#### **ARKEO 203 Early People: The** Archaeological and Fossil Record (also ANTHR 203) # (111)

Spring. 3 credits. T. P. Volman. A survey of the archaeological and fossil record of human evolution. Contributions by researchers from a variety of disciplines are highlighted, as are the discoveries that have enlivened the study of human evolution for more than a century. Critical evaluation of evidence and interpretation will be stressed. Demonstrations and films supplement the lecture.

#### [ARKEO 204 Ancient Civilizations (also ANTHR 204) @ # (III)

Fall. 3 (4) V credits. Not offered 2002-2003. J. S. Henderson.]

#### ARKEO 215 Stone Age Art (also ANTHR 215) # (III)

Fall. 3 credits. T. P. Volman. For description, see ANTHR 215.

#### **ARKEO 242 Early Agriculture (also** ANTHR 242) # @ (III)

Spring. 3 credits. N. Russell. Throughout most of the human career, people survived by hunting and gathering wild foods. The advent of food production is one of the most profound changes in (pre)history. This course examines the current evidence for the

appearance and spread of agriculture (plant and animal domestication) around the world. We consider definitions of agriculture and domestication, the conditions under which it arises, the consequences for those who adopt it, and why it has spread over most of the world.

#### ARKEO 255 Great Empires of the Andes (also ANTHR 255) @ # (III)

Summer only. 3 credits. M. Malpass. The Andes region of South America, stretching from northern Colombia to Tierra del Fuego, saw the rise and fall of some of the world's most spectacular societies, from the Moche of the north Peruvian coast to the Incas. Not only were the cultures of this area highly developed, but many of the technologiesmetallurgy, textiles, ceramics, and stonemasonry, to name just four-were unusually sophisticated. The Andean region saw the indigenous domestication of plants and animals as well as the rise of state-level societies. This course introduces students to the cultural developments of this fascinating area, from the earliest times to the fall of the Incas in AD 1543.

# ARKEO 317 Stone Age Archaeology (also ANTHR 317) (III) Fall. 4 credits. T. P. Volman.

[ARKEO 355 Ancient Mexico and Central America (also ANTHR 355) @ # (III) Spring, 4 credits. Basic. Not offered 2002-2003. J. Henderson.

For description, see ANTHR 355.]

#### ARKEO 356 Archaeology of the Andes (also ANTHR 356) # @ (III)

Spring. 4 credits. J. Henderson. A survey of the rise and decline of civilizations in the Andean region of western South America before the European invasion. Key topics include the use of invasion-period and ethnographic information to interpret precolumbian societies, the emergence of settled farming life, and the development of the state

# [ARKEO 409 Approaches to Archaeology (also ARKEO 609 and ANTHR 409/ 609) (III)

Fall. 4 credits. Prerequisite: permission of instructor. Not offered 2002-2003. Staff. For description, see ANTHR 409.]

# [ARKEO 459 Archaeology of the Household (also ARKEO 659 and

Spring. 4 credits. Prerequisite: permission of instructor. Not offered 2002-2003. A. Ramage.

For description, see ART H 427.]

#### ARKEO 520 Seminar in Classical Archaeology (also ART H 520 and CLASS 630)

Spring. 4 credits. P. Kuniholm. Seminar on Greek Archaeology

# [ARKEO 617 Early Medieval Archaeology and Literature (also ARKEO 417, ENGL 417 and 617)

Fall. 4 credits. Not offered 2002-2003. R. T. Farrell.

For description, see ENGL 417.]

# [ARKEO 629 The Prehistoric Aegean (also CLASS 629)

4 credits. For graduate students and advanced undergraduates with permission of instructor. Not offered 2002-2003. L F Coleman

For description, see CLASS 629.]

#### CLASS 220 Introduction to Art History: The Classical World (also ART H 2201

Fall. 4 credits. J. Coleman. For description, see CLASS 220.

# CLASS 240 Greek Art and Archaeology # (IV) Spring. 3 credits. J. Coleman.

Introduction to the material culture of Greece from the Early Iron Age to the coming of the Romans (ca. 1000 BC to 31 BC). The course focuses not only on famous monuments such as the Parthenon, but also on the evidence for daily life and for contact with other civilizations of the Mediterranean. A critical attitude is encouraged toward the interpretation of archaeological remains and toward contemporary uses (and misuses) of the past.

#### CLASS 319 Art in the Daily Life of

Greece and Rome (also ART H 319) Spring. 4 credits. A. Ramage. For description, see ART H 319.

#### [CLASS 322 Greeks and Barbarians (also **ART H 328)**

Fall. 4 credits. Prerequisite: CLASS 220 or 221, or permission of instructor. Not offered 2002-2003. J. Coleman. For description, see CLASS 322.]

#### [CLASS 329 Greek Sculpture (also ART H

329) 4 credits. Not offered 2002-2003. J. E. Coleman.

For description, see CLASS 329.]

#### [CLASS 333 Greek and Roman Mystery Cults and Early Christianity (also **RELST 333)**

Fall. 4 credits. A previous course in Classics (civilization or language) or RELST 101 is recommended. Not offered 2002-2003. K. Clinton.

For description, see CLASS 333.]

#### ART H 322 Arts of the Roman Empire (also CLASS 350)

Fall. 4 credits. A. Ramage. For description, see ART H 322.

(ART H 325 Greek Vase Painting (also **CLASS 325)** 

Fall 4 credits. Not offered 2002-2003. A. Ramage.

For description, see ART H 325.]

#### ART H 327 Greek and Roman Coins (also **CLASS 327)**

Fall. 4 credits. A. Ramage. For description, see ART H 327

#### LA 292 Creating a Second Nature

Spring. 3 credits. Prerequisites: none. ANTHR 100, ARKEO 100, or CLASS/ART H 220 recommended. Offered alternate years. K. Gleason.

For description, see LA 292.

#### (LA 545 The Parks and Fora of Imperial Rome

Spring. 3 credits. Prerequisites: advanced standing in a design field, classics or history of art, or by permission of the instructor. Not offered 2002-2003. K. Gleason. For description, see LA 545.]

#### D. Methodology and Technology

# [ARKEO 256 Practical Archaeology (also CLASS 256) (IV) Spring. 3 credits. Not offered 2002–2003.

I. Coleman.

For description, see CLASS 256.]

#### [ARKEO 262 Laboratory in Landscape Archaeology (also LA 262)

Fall. 3 credits. Not offered 2002-2003. S. Baugher.

For description, see LA 262.]

#### ARKEO 285 Art, Archaeology, and Analysis (also ENGR 185, EAS 200, MS&E 285, ART H 200, and PHYS 200) (I or IV)

Spring. 3 credits. Does not meet liberal studies distribution requirements. Staff. For description, see EAS 200

#### **ARKEO 309 Dendrochronology of the** Aegean (also ART H 309 and CLASS 309) # (IV)

Fall and spring. 4 credits. Limited to 10 students. Letter only. Prerequisite:

permission of instructor. P. I. Kuniholm. Participation in a research project of dating modern and ancient tree-ring samples from the Aegean and Mediterranean. Supervised reading and laboratory work. A possibility exists for summer fieldwork in the Aegean.

#### ARKEO 317 Stone Age Archaeology (also **ANTHR 317)**

Fall. 4 credits. T. Volman. A survey of current approaches to the archaeological record of Stone Age peoples, from the earliest sites to those of recent times. Case studies are used to illustrate the nature of archaeological occurrences, excavation procedures, and analytical methods. Multidisciplinary efforts to expand our knowledge of prehistoric lifeways and behaviors are a major concern of the course.

#### [ARKEO 370 Environmental Archaeology (also ARKEO 670 and ANTHR 370 and 670) (III)

Spring. 4 credits. Prerequisite: 2 previous courses in archaeology or permission of instructor. Not offered 2002-2003. T. P. Volman.

For description, see ANTHR 370.]

# [ARKEO 402 Designing Archaeological Exhibits (also ARKEO 602)

Spring. Variable (letter grade only). Not offered 2002-2003. S. Baugher. Presenting archaeology to the public has become an educational goal for many professional archaeological societies and museums. Class discussions will focus on the theories and techniques of exhibit design. To evaluate different academic approaches to exhibiting objects, the class will visit art and historical museums. Students then design and install an archaeological exhibit using artifacts that have been catalogued in an archaeology laboratory course, ARKEO 262. These artifacts are from archeological excavations completed in an archaeology field methods class, ARKEO 261.1

#### [ARKEO 405 Archaeological Research Design (also ARKEO 605 and ANTHRO 405/605) (111)

Spring. 4 credits. Basic. Prerequisite: permission of instructor. Not offered 2002-2003. J. S. Henderson, T. P. Volman. For description, see ANTHR 405.]

#### ARKEO 423 Ceramics (also ART H 423 and CLASS 423) # (IV)

Spring. 4 credits. Prerequisite: permission of instructor. A. Ramage. For description, see ART H 423.

#### [ARKEO 458 Archaeological Analysis (also ARKEO 658 and ANTHR 458/ 658) (111)

Spring, 4 credits. Prerequisite: 1 course in archaeology or permission of instructor. Enrollment limited to 15 students. Not offered 2002-2003. J. S. Henderson. For description, see ANTHR 458.]

#### ARKEO 463 Zooarchaeological Method (also ANTHR 463) (III)

Fall. 5 credits. N. Russell. This is a hands-on laboratory course in zooarchaeological method: the study of animal bones from archaeological sites. It is designed to provide students with a basic grounding in identification of body part and taxon, aging and sexing, pathologies, taphonomy, and human modification. We deal only with mammals larger than squirrels. While we work on animal bones from prehistoric Europe, most of these skills are easily transferable to the fauna of other areas, especially North America. This is an intensive course that emphassizes laboratory skills in a realistic setting. Students analyze an assemblage of actual archaeological bones. It is highly recommended that students also take the course in Zooarchaeological Interpretation (ARKEO/ANTHR 464) offered in the spring.

#### ARKEO 464 Zooarchaeological Interpretation (also ANTHR 464) (111)

Spring. 4 credits. Prerequisite: ARKEO/ ANTHR 463. Permission of instructor only. N. Russell.

This course follows from last semester's Zooarchaeological Method. We shift our emphasis here from basic skills to interpretation, although students continue to work with archaeological bones. We begin by examining topics surrounding the basic interpretation of raw faunal data: sampling, quantification, taphonomy, seasonality. We then explore how to use faunal data to reconstruct subsistence patterns, social structure, and human/animal relations.

# [ARKEO 467 Origins of Agriculture (also **ANTHR 467) # (III)** Spring. 4 credits. Not offered 2002–2003.]

#### **ARKEO 600** Special Topics in Archaeology

Fall, 4 credits. Staff.

#### ARKEO 601 Graduate Colloquium in Archaeology

Spring. 4 credits. Open to graduate students and advanced undergraduates by permission of instructor. K. Gleason.

Faculty members of the Program in Archaeology and invited speakers present summaries of the different aspects of archaeological analysis. Topics may include: lithics, ceramic typology, petrographic and neutron activation analysis, dendrochronology and other chronological techniques, settlement patterns, inscriptions, human and animal bones.

#### [ARKEO 602 Designing Archaeological Exhibits (also ARKEO 402)

Spring. Variable (letter grade only). Not offered 2002-2003. S. Baugher. Eor description, see ARKEO 402.]

#### [ARKEO 605 Archaeological Research Design (also ARKEO 405 and ANTHR 405/605)

Spring, 4 credits. Basic. Prerequisite: permission of instructor. Not offered 2002–2003. J. S. Henderson, T. P. Volman. For description, see ANTHR 405.]

#### [ARKEO 670 Environmental Archaeology (also ARKEO 370 and ANTHR 370 and 670)

Spring. 4 credits. Prerequisite: 2 previous courses in archaeology or permission of instructor. Not offered 2002-2003. T. P. Volman.

For description, see ANTHR 370.]

#### ANTHR 474 Laboratory and Field Methods in Human Biology (also BIOES 474)

Spring. 5 credits. Prerequisite: 1 year of introductory biology, ANTHR 101, or permission of instructor. K. A. R. Kennedy.

#### **BIO 275 Human Biology and Evolution** (also ANTHR 275)

Fall. 3 credits. K. A. R. Kennedy.

#### [BIOES 371 Human Paleontology (also ANTHR 371)

Fall. 4 credits. Prerequisite: one year of introductory biology, ANTHR 101, or permission of instructor. Not offered 2002-2003. K. A. R. Kennedy. For description, see BIOES 371.]

#### [BIO ES 671 Paleoanthropology of South Asia (also ANTHR 671 and ASIAN 620}

Fall. 3 credits. Not offered 2002-2003. K. A. R. Kennedy.

For description, see BIO ES 671.]

#### (BIO ES 673 Human Evolution: Concepts, History, and Theory (also ANTHR 673)

Fall. 3 credits. Prerequisite: one year of introductory biology or ANTHR 101 or permission of instructor. Not offered 2002-2003. K. A. R. Kennedy. For description, see BIOES 673.]

#### [LA 261 Urban Archaeology (also CRP 261)

Fall. 3 credits. Not offered 2002-2003. S. Baugher.

For description, see LA 261.]

LA 569 Archaeology in Preservation Planning and Design (also CRP 569) Spring. 3 credits. S. Baugher. For description, see LA 569.

The Department of Asian Studies encompasses the geographical areas of East Asia, South Asia, and Southeast Asia and offers courses in most of the disciplines of the social sciences and the humanities. Asian studies courses through the 400 level (ASIAN is the prefix) are taught in English and are open to all students in the university. Some of these courses may be counted toward majors in other departments; others fulfill the humanities distribution requirement. Courses listed under Asian Studies offered through other departments may fulfill distribution requirements in history, social sciences, and arts.

#### The Major

A student majoring in Asian studies normally specializes in the language and culture of one country and often chooses an additional major in a traditional discipline.

Majors complete two courses at the 200 level (a minimum of six credits with a grade of C or better) in one of the Asian languages offered at Cornell. The major consists of at least 30 additional credits (which may include up to six credits of further language study) of courses numbered 200 and above selected by the student in consultation with his or her adviser from among the Asia content courses offered by the Department of Asian Studies and by Asia specialists in other departments.

The applicant for admission to the major in Asian studies must have completed at least two Asia content courses, one of which can be a language course. Students must receive permission for admission to the major from the director of undergraduate studies. The student must have received a minimum grade of C in those courses and in all other courses counted toward the major.

#### Honors

To be eligible for honors in Asian studies, a student must have a cumulative GPA of 3.7 in all Asian studies area courses, exclusive of language study only, and must successfully complete an honors essay during the senior year. Students who wish to be considered for honors should apply to the director of undergraduate studies during the second term of their junior year. The application must include an outline of the proposed project and the endorsement of a supervisor chosen from the Asian studies faculty. During the first term of the senior year the student does research for the essay in conjunction with an appropriate Asian studies course or ASIAN 401. By the end of the first term the student must present a detailed outline of the honors essay or other appropriate written work and have it approved by the project supervisor and the director of undergraduate studies. The student is then eligible for ASIAN 402, the honors course, which entails writing the essay. At the end of the senior year, the student has an oral examination (with at least two faculty members) covering both the honors essay and the student's area of concentration.

#### **Concentration in East Asia Studies**

A candidate for the Bachelor of Arts degree at Cornell may take a concentration in East Asia studies by completing at least 18 credits of course work.

Students normally take five courses in East Asian studies at the 200 level or above from those East Asian courses listed (China, Japan, Korea) either under Asian Studies or Asianrelated courses. Of these, two courses might be Asian language courses at the 200-level or beyond. East Asian graduate courses may also be offered for the concentration, as well as East Asia-related courses with a research paper on an East Asian topic. Appropriate courses taken through Cornell Abroad in East Asia may also be counted toward the concentration. Students concentrating in East Asian studies should select an adviser from the East Asia Program faculty for consultation on their course of study. For more information, contact the Asian Studies Department at 388 Rockefeller Hall, (607) 255-5095.

#### **Concentration in South Asia Studies**

A candidate for the Bachelor of Arts or Science degree at Cornell may take a concentration in South Asian studies by completing at least 18 credits of course work in South Asian studies, including ASIAN 215 (Introduction to South Asia) and four courses or seminars at the intermediate or advanced levels, two of which may be South Asian language courses.

Students taking a concentration in South Asian studies are considered members of the South Asia Program and will have an adviser from the program faculty. (This adviser will be for the student's concentration and is not a substitute for a student's academic adviser in his or her major.)

One South Asian graduate course may be taken for the concentration with consent of both the instructor and the adviser. The same applies for one South Asia-related course with a research paper on a South Asian subject. Additional courses may be added if offered with comparable South Asia content.

#### **Concentration in Southeast Asia** Studies

A candidate for the Bachelor of Arts or Science degree at Cornell may take a concentration in Southeast Asian studies by completing 18 credits of course work. A recommended plan would include ASIAN 208 and four courses at the intermediate or advanced stage, two of which could be a Southeast Asian language. Students taking a concentration in Southeast Asian studies are members of the Southeast Asia Program and are assigned an adviser from the program faculty. Such students are encouraged to commence work on a Southeast Asian language either at the 10-week intensive courses offered by the Southeast Asia Studies Summer Institute (SEASSI) or by studying for one semester at IKIP Malang, Indonesia; Khon Kaen University, Thailand; or Hanoi University, Vietnam; fellowships are available for undergraduates through the Cornell Abroad Program.

#### Intensive Language Program (FALCON)

The FALCON Program offers intensive instruction in Japanese or Chinese. The program is still the only one in the world offering a full year of intensive instruction from the elementary level, except for the exclusive language schools of some government agencies. Students must formally apply to the program, but the application process is simple and admission is open to all students. (Applications available for FALCON from the

administrative assistant, room 125 Rockefeller Hall, or visit our web site www.arts.cornell. edu/asian/falcon.htm and apply online.) Students may take the entire sequence of 160, 161, 162, or any other portion of the program if they have the necessary background (to be determined by a placement test). The courses are full-time intensive language study; the degree of intensity required does not allow students to enroll simultaneously in other courses or to work, except perhaps on weekends. The spring semester of the Chinese program is offered in Beijing at Tsinghua University.

#### Study Abroad

Cornell is a member of the Inter-University Center for Japanese Language Studies in Yokohama, the Inter-University Board for Chinese Language Studies in Beijing (at Tsinghua University), and a member of the Council on International Educational Exchange offering study in China at Beijing University and Nanjing University. These centers offer training in both spoken and written forms of the languages. The Kyoto Center for Japanese Studies (KCJS) is an undergraduate program for students who wish to spend either one or two semesters in Kyoto, Japan studying the Japanese language as well as contemporary and traditional Japanese culture.

Cornell is a class-A member of the American Institute of Indian Studies, which offers fellowships in India for intensive language study in Hindi, Bengali, and Tamil.

Cornell and the central campus of the Nepalese national university-Tribhuvan-at Kirtipur, Kathmandu, cosponsor an academic semester or year in Nepal.

Other opportunities include a junior year abroad at IKIP-Malang, in Indonesia, or at the School of Oriental and African Studies, University of London. Many other options for study in Asia exist, including in Indonesia, Thailand, and Vietnam through the Council for International Educational Exchange. Undergraduates should consult Cornell Abroad: graduate students should inquire at the East Asia Program, the South Asia Program, or the Southeast Asia Program offices.

#### **First-Year Writing Seminars**

See John S. Knight Institute brochure for times, instructor, and descriptions.

# **General Education Courses**

#### ASIAN 125 Introduction to the Urdu Script (also URDU 125)

Spring. 1 credit. Prerequisite: HINDI 101 or permission of instructor. Satisfactory completion of ASIAN 125 fulfills the qualification portion of the language requirement. Staff.

This course provides instruction in the basics of the Urdu script. It is intended primarily for students who have had some exposure to Hindi or Urdu but who have had little or no formal training in the script. The course focuses on mastering the script and pronunciation. It does not provide instruction in grammar.

ASIAN 191 Introduction to Modern Aslan History (also HIST 191) @ (III) Fall. 4 credits. J. Koschmann, E. Tagliacozzo.

See HIST 191 for description.

#### ASIAN 192 Introduction to World Music: Asia (also MUSIC 104) @ (IV)

Fall. 3 credits. M. Hatch. See MUSIC 104 for description.

#### [ASIAN 206 The Occidental Tourist: **Travel Writing and Orientalism in** Southeast Asia (also HIST 207) @ (HI)

Spring. 4 credits. Not offered 2002-2003. T Loos L

#### ASIAN 208 Introduction to Southeast Asia @ (iii or IV)

Spring, 3 credits. T. Chaloemtiarana. This course is for anyone curious about the most diverse part of Asia; it defines Southeast Asia both as the nation-states that have emerged since 1945 (Brunei, Burma, Cambodia, Indonesia, Laos, Malaysia, Philippines, Singapore, Thailand, and Vietnam) and as a larger cultural world extending from southern China to Madagascar and Polynesia. Students find a serious, organized introduction to a variety of disciplinary and topical approaches to this region, including geography, linguistics, history, religion and ideology, anthropology, marriage and family systems, music, literacy and literature, art and architecture, agriculture, industrialization and urbanization, politics and government, warfare and diplomacy, ecological and human degradation, and business and marketing. The course teaches both basic information and different ways of interpreting that information.

#### ASIAN 211 Introduction to Japan: Japanese Texts in History @ # (IV)

Fall, 3 credits, B. deBary An interdisciplinary introduction to Japanese Studies especially designed for nonmajors. The course takes up a diverse series of cultural artifacts and demonstrates how. against the background of simultaneous and successive rises and falls of polities on the Japanese archipelago, the meanings and readings generated by these artifacts have changed dramatically over time. We consider verbal and visual, fictional and historical, canonical and noncanonical texts, including the eighth century Kojiki, the courtly narrative Tale of Genji, eighteenth century puppet theater, modern Ainu autobiography, and films and comic books dealing with themes of nuclear warfare and apocalypse.

#### ASIAN 212 Introduction to China @ # (IV)

Spring. 3 credits. R. McNeal. An interdisciplinary introduction to Chinese culture especially designed for students not majoring in Asian Studies. The class explores literature, history, religion, art and archaeology, and other aspects of China's rich and diverse heritage, from earliest times to the present.

#### ASIAN 215 Introduction to South Asian Civilization @ (IV)

Fall. 3 credits. A. Blackburn. An interdisciplinary introduction to the culture and history shared by India and other states of South Asia. Designed for students not majoring in Asian Studies. Guest lecturers provide the perspective of their disciplines to the general themes of the course: cultural

diversity and the role of tradition in contemporary life.

#### ASIAN 218 Introduction to Korea (also HIST 218) @ (Ill or IV)

Spring. 3 credits. M. Shin. A multi-disciplinary introduction to Korean history, society, and culture. The first part of the course examines sources of Korean "tradition" such as native religions, Buddhism, and Neo-Confucianism by situating them within their historical contexts and comparing them to their modern forms. The second part, on the transition to a modern society, covers the opening to the West, the colonial period, the Liberation period, and the Korean War. The last part is devoted to contemporary society: industrialization, democracy movements, urban life and culture, North Korea and prospects for reunification. There will be both lectures and sections as well as film showings in the evenings.

### Asia—Literature and Religion Courses

The following courses are taught entirely in English and are open to any Cornell student.

#### [ASIAN 220 Buddhism in America (also **RELST 220)**

Winter, 3 credits, Not offered 2002-2003. I. M. Law.

This course focuses on a three fold division of Buddhist communities in America: 1) communities established by Asian teachers with predominantly western community members; 2) communities established to serve the needs of immigrant communities arriving from traditionally Buddhist cultures; and 3) communities established by refugee communities. The class explores how these three different methods of arrival and establishment of Buddhist traditions in North America influence the decisions these communities make as they adapt Buddhism to a new cultural setting. We also look at the writings of several thinkers who deal with the multicultural nature of American religious life, including Buddhism in the community of American religions in the twenty-first century.]

#### ASIAN 241 China's Literary Heritage: An Introduction in Translation @ # (IV)

Fall. 3 credits. D. X. Warner. This is a survey course designed for, though not limited to, non-majors with or without any knowledge of Chinese language, history, or culture. Students will read a broad selection in translation of poems, prose, and narrative writings from the pre-modern period on a variety of themes including the individual and society, man and nature, love and sorrow, fate and faith, life and death. Lectures and guided discussions will explore the interrelation between the Chinese literary tradition and its culture, history, philosophy, religions, and visual art. The goal is to help students toward informed and enjoyable reading of Chinese literature while gaining a deeper understanding of the Chinese cultural heritage.

#### ASIAN 245 Gamelan in Indonesian **History and Cultures (also MUSIC** 245) @ (IV)

Fall or spring. 3 credits. M. Hatch. See MUSIC 245 for description.

#### [ASIAN 249 Peddlers, Pirates and Prostitutes: Subaltern Histories of Southeast Asia, 1800–1900 (also HIST 249/648) © # (III)

Spring. 4 credits. Not offered 2002–2003. E. Tagliacozzo.

See HIST 249 for description.]

#### ASIAN 250 Introduction to Asian Religions (also RELST-250) @ # (IV)

Spring. 3 credits. D. Boucher. This course explores a range of religious traditions in South Asia (Pakistan, India, and Sri Lanka) and East Asia (China and Japan) including Hinduism, Buddhism (South and East Asian), Confucianism, Daoism, and Shinto. We concentrate on these religions in traditional times in order to understand better the historical foundations that have influenced much of what these cultures are today. The course format includes lectures and discussion sections.

#### [ASIAN 277 Meditation in Indian Culture (also RELST 277) @ # (IV) Spring. 3 credits. Not offered 2002–2003.

Next offered 2003-2004. D. Gold. This course probes the truths behind traditional claims of the priority of internal practice in Indian traditions. We examine both practices themselves-techniques of meditation and contemplation, religious ways of using intellect, forms of chant and ritual-and the dynamics through which these have left a wider mark on South Asian civilization. These dynamics include not only the evident reverberations of practice in philosophical reflection and socioreligious institutions, but also wide-ranging processes of stylization, elaboration, and popularization found throughout South Asian culture. In order to get a sense of the experiences treated in classical religious texts, students will be expected to experiment with some basic meditation practices. At least as important for the work of the course (and much more important for the grade) are the ways in which students situate these practices within larger South Asian world views as suggested by doctrines, rituals, iconic forms, and literary texts. To keep the interaction between internal practice and broader world views central, we will examine both Hindu and Buddhist sources, consistently examining the ways in which similar practices are given distinct shapes by the two religious traditions.]

#### [ASIAN 284 Southeast Asia in the World System: Capitalism and Incorporation, 1500-Present (also HIST 284) @ # (III)

Fall. 4 credits. Not offered 2002–2003. E. Tagliacozzo.

See HIST 284 for description.]

#### ASIAN 293 History of China up to Modern Times (also HIST 293) # @ (III) Fall. 4 credits. C. Peterson.

See HIST 293 for description.

#### [ASIAN 294 History of China in Modern Times (also HIST 294) @ (III) Spring. 4 credits. Not offered 2002–2003.

S. Cochran. See HIST 294 for description.]

# [ASIAN 297 Japan Before 1600 (also

HIST 297) @ # (III) Fall. 4 credits. Not offered 2002–2003. J. Piggott.

See HIST 297 for description.]

## ASIAN 298 The U.S.-Vietnam War (also HIST 289) @ (III)

Spring. 3 credits. K. Taylor. This is a survey of events in Vietnam, the US, and elsewhere related to US intervention in Vietnam from the 1940s to 1975. Readings include historical narratives, memoirs, and literature. Alternative ways of understanding this war in the context of Vietnamese and American history will be explored.

#### [ASIAN 299 Buddhism (also RELST 290) @ # (IV)

Fall. 4 credits. Not offered 2002-2003. Next offered fall 2003. D. Boucher. This course explores the Buddhist tradition from its origins in ancient India to its migrations throughout Asia and eventually to the West. The first half of the course deals with Indian Buddhism: the Buddha, the principal teachings and practices of his early followers, and new developments in spiritual orientation. We then turn to the transmission of Buddhism to Central and East Asia, including China, Japan, and Tibet, concentrating on those traditions in traditional times. From there we look at the southern migration to Sri Lanka and Southeast Asia and conclude with an examination of Buddhism in America.]

#### ASIAN 301 Schools of Thought-Ancient China @ # (IV)

Winter. 4 credits. R. McNeal. This course introduces students to China's most important early moral and political philosophers, such as Confucius, Laozi, and Sunzi, through readings in translation. We address the traditional conception of six schools of thought in ancient China as reflected in classical and modern historiography and examine newly discovered texts with an eye toward clarifying the relationships among early schools and their representatives.

# ASIAN 302 Art of War in Ancient China @ # (IV)

Fall. 4 credits. *Also fulfills Humanities* requirement. R. McNeal.

Sun-tzu's Art of War is one of the most widely translated and circulated books of all time. Businessmen in Asia swear by it, professional coaches invoke it when planning strategy, and students of political science plumb its depths for timeless wisdom on how to defeat an enemy without taking to the battlefield. This class examines Sun-tzu's text in its historical context, along with several other early military and strategic works. We treat these works as a genre, and look for characteristic features of the genre that can be better understood by reading these texts not as manuals for modern-day success, but as a record of a complex and sophisticated conceptualization of the role of warfare and all its components in the broader mission of the state.

#### [ASIAN 306 Zen Buddhism (also RELST 306) @ # (IV)

Spring. 4 credits. Prerequisites: any course at the university level in Buddhism or Asian Studies (Religious Studies) 250, or consent of the instructor. Course limited to 15 students. Graduate students can take this course for credit and sign up for an additional credit hour for an extra session. Not offered 2002–2003. J. M. Law.

This course is an explanation of the Zen tradition, with a core focus on central religious, historical, and aesthetic developments in Japan. We rely on both primary sources in translation and secondary sources by scholars in the academic study of religion and Buddhist Studies. The course covers the rise of the Ch'an tradition in China and the development of the Northern and Southern Schools, and the establishment of Zen in the Kamakura period, focusing on the developments of both Rinzai and Soto Zen, and the early transmissions of Chinese texts and practices to Japan through Japanese emissaries. We study the lives and writings of both Eisai (1146-1215) and Dogen (1200-1253), and also explore how their life works and writings influenced later developments in Zen. We also explore the work of the Tokugawa Zen figure Hakuin (1686-1769), Finally, we study how Zen has become implicated in Japanese postwar identity discourses, by focusing on a critical reading of the writings of D. T. Suzuki and others.]

#### [ASIAN 312 Intellectuals in Early Modern Korea @ # (IV)

Fall. 4 credits. Not offered 2002–2003. M. Shin.

An introduction to early modern Korean history (early 19th century to 1945) through a survey of its major intellectuals. The course gives an overview of the political and socioeconomic background that gave rise to these intellectuals and then examines how they commented on and tried to shape the conditions of their times. Topics to be covered include critiques of feudal society, the origins of modern literature and historiography, socialism/communism, liberation movements, Christianity, and feminism. Readings include secondary sources, Korean texts in translation, and works by Korean intellectuals written in English.]

#### [ASIAN 314 Europe and its Others (also COM L 304) (IV)

Fall. 4 credits. Not offered 2002–2003. N. Melas.

See COM L 304 for description.]

#### ASIAN 316 Melodrama, Totalitarianism, and Everyday Life: Japan and China (also COM L 312) @ (IV) Spring. 4 credits. H. Lee.

See COM L 312 for description.

#### ASIAN 322 History of the Samurai (also HIST 322/522) # @ (III)

Fall. 4 credits. ASIAN/HIST 297 recommended. J. Piggott.

See HIST 322 for description.

#### [ASIAN 347 Tantric Traditions (also RELST 349) @ # (IV)

Fall. 4 credits. Not offered 2002–2003. Next offered 2003–2004. D. Gold.

This course treats the development of tantric traditions in the Indian subcontinent and beyond. Philosophical, socio-religious, cultic, and visionary dimensions of tantra are discussed. We study different Hindu and Indo-Tibetan traditions, with some attention also paid to tantric developments in East Asian Buddhism.]

### [ASIAN 348 Indian Devotional Poetry

(also RELST 348) @ # (IV) Spring. 4 credits. Not offered 2002–2003. D. Gold.

A survey of Indian devotional genres, with particular attention to the medieval vernacular literatures. Consideration is given to social and ritual contexts of the texts, the ways in which their literary conventions work, and their contemplative uses. The predominant focus is on Hindu traditions, but some Buddhist and Islamic works are also read. Readings in translation.]

#### ASIAN 351 Indian Religious Worlds (also RELST 351) @ (IV) Fall. 4 credits. D. Gold.

A study of religious traditions as lived today in the Indian subcontinent. Alongside some underlying similarities, attention is paid to differences in piety and practice within alternative environments: urban and rural, male and female, more and less orthodox. In addition to several Hindu traditions, Sikh, Jain, Buddhist, and Muslim traditions may also be treated. Readings include ethnologies and perhaps a novel.

#### ASIAN 354 Indian Buddhism (also RELST 354) @ # (IV)

Fall. 4 credits. D. Boucher.

This course surveys Buddhism in South Asia from its origins in northeast India to its migrations throughout the Indian subcontinent. We spend considerable time dealing with the earliest literature about the Buddha, his teachings, and the principal doctrines and practices of the earliest Buddhist communities. We then look at later developments, including the new spiritual orientations offered by the emergence of the Mahayana and Vajrayana traditions. Finally, we explore the way two very different forms of the Indian Buddhism became entrenched in the adjacent regions of Sri Lanka and Nepal.

#### ASIAN 355 Japanese Religions (also RELST 355) @ (IV)

Spring. 4 credits. J. M. Law

This course addresses the complexity of religion in Japanese history through a focus on the dominant ideological system commonly referred to as Shinto. We focus on methodological issues surrounding tradition formation, invention, continuity, change, and revision and explore the Shinto tradition as follows: 1) how a central corpus of values, tastes, practices, beliefs, and concerns were formulated and how this system interacts with other religious systems; 2) the academic sources contributing to this identity; 3) views of this religious system from those actively shaping its discourse; 4) views of this religious system from those peripheralized by its ideologies; 5) personal cultivation and aesthetic taste; and 6) the relationship between this religious system and imperialism, war, and historical revisionism.

#### ASIAN 356 Theravada Buddhism @ (IV) Fall, 4 credits. A. Blackburn.

Theravada Buddhism dominates the Buddhist world of Sri Lanka and Southeast Asia. Its history in these regions is complex. In this course we will briefly examine the origins of Theravada Buddhism in India and Sri Lanka as well as the ways in which this form of Buddhism was exported from Sri Lanka to Southeast Asia. The primary aim of the course, however, is to explore several specific instances of Theravada Buddhist community organization and practice in historical and contemporary contexts. We will note diverse ways in which Theravada Buddhists have responded to the tradition's threefold imperative to cultivate learning, insight, and proper conduct. In doing so, we will be attentive to the ways in which visions of ideal Buddhist practice vary with period, region, and social location, as well as to the ways in which a shared body of authoritative texts informs quite different interpretations of the dhamma and its practice. The case studies are selected to raise questions related to gender, class, and the consitution of political identities.

#### [ASIAN 357 Chinese Religions (also RELST 357) @ # (IV) Spring. 4 credits. Not offered 2002–2003.

Spring. 4 credits. Not offered 2002–2003. Next offered fall 2004. D. Boucher. This course presents a broad survey of Chinese religions from the earliest historic records through the late imperial and modern periods, from highbrow philosophical movements to local deity cults. Our survey focuses intensively on the great traditions of Confucianism, Taoism, and Buddhism as well as the lesser known practices that often fall through the cracks. Our goal in part is to trace patterns of continuity among competing and sometimes acrimonious voices.]

#### [ASIAN 359 Japanese Buddhism: Texts in Context (also RELST 359) @ # (IV)

Spring. 4 credits. Not offered 2002-2003. Next offered 2003-2004. J. M. Law. This course explores central dynamics of Buddhism as it established itself in Japan, focusing on five figures considered central to the history of Japanese Buddhism: Saicho (767-822), Kukai (774-835), Honen (1133-1212), Nchiren (1222-1282) and Dogen (1200-1253). We study the life of the founder, key writings, core practices and doctrines of schools, and a central religious dynamic that their work and contributions embody: 1) establishment of Mahayana ordination, 2) grounding of esoteric practice in Japan and the accommodation to Japanese understandings of the natural world, 3) the popularization of Buddhist religious practice for commoners through nembetsu recitation and narrative traditions, 4) the uses of Buddhism as a political, proto-nationalist ideology, and 5) establishment of Zen meditation as an iconic "Japanese" form of Buddhism. Readings are primary sources in translation with secondary sources.]

#### [ASIAN 373 Twentieth-Century Chinese Literature @ (IV)

Fall. 4 credits. Not offered 2002–2003. E. Gunn.

A survey of the principal works in English translation, the course introduces fiction, drama, essays, and poetry of China beginning with the Republican era and continuing up to the present in the People's Republic and Taiwan, with attention to social and political issues and literary theory.]

#### ASIAN 374 Chinese Narrative Literature (also COM L 376) @ # (IV) Spring. 4 credits. D. X. Warner.

Spring, 4 credits. D. X. Warner. Selected works in classical Chinese fiction are read in translation. Major novels, such as *The Dream of the Red Chamber* and *Water Margin*, are emphasized.

#### ASIAN 380 Vietnamese Literature in Translation @ # (IV)

Fall. 4 credits. K. Taylor. A survey of Vietnamese literature available in translation from all eras beginning with earliest times to the contemporary period, both poetry and prose, with particular attention to literary forms and considerations of how these forms relate to their ostensible contents. Also addressed is how the idea of a national literature arose and how the substance of this idea was constructed.

#### ASIAN 381 Introduction to the Arts of Japan (also ART H 384) # @ (IV) Fall. 4 credits. A. Pan.

See ART H 384 for description.

#### ASIAN 383 Introduction to the Arts of China (also ART H 380 and ARKEO 380) @ # (IV)

Spring. 4 credits. A. Pan. See ART H 380 for description.

#### [ASIAN 384 Representation and Meaning in Chinese Painting (also ART H 385) @ # (IV)

4 credits. Not offered 2002–2003. A. Pan. See ART H 385 for description.]

#### [ASIAN 385 History of Vietnam (also HIST 388/688) @ # (IV) Spring. 4 credits. Also fulfills Humanities

Spring. 4 credits. Also fulfills Humanities requirement. Not offered 2002–2003. K. Taylor.

This course is a survey of Vietnamese history and culture from earliest times to the present. Graduate students may enroll and attend a seminar section.]

#### [ASIAN 390 The Sanskrit Epics (also CLASS 390) @ # (IV)

Spring. 4 credits. Not offered 2002–2003. C. Minkowski.

Readings in translation from the two Sanskrit epics, the Mahabharata and the Ramayana, supported by a study of the reception of the epics in later Indian imaginative literature. Attention is also given to comparitive theories of the epic in ancient Indo-European languages.]

#### ASIAN 392 Cosmology and Divination in Antiquity (also CLASS 392 and NES 392) @ # (IV)

Fall. 4 credits. C. Minkowski. An historical survey of the cosmological and divinatory systems in Greek, Sanskrit, and Arabic, with special focus on the geocentric world-system and astrology. Some attention to early knowledge systems-Egyptian, Babylonian, Indian, and Chinese-and to the later career of divination and cosmology in medieval Europe and Asia. Topics include: the relevance of various theories of space, time, causation and being to the practice of divination; philosophical and theological arguments for and against divination; the theory and practice of universal, genethliac, and catarchic astrology; the social worlds of astrologers and their clients; and the problems of study that result from the nature of the material and the history of its transmission.

#### ASIAN 394 The House and the World: Architecture of Asia (also ART H 395) @ # (IV)

Spring. 4 credits. K. McGowan. See ART H 395 for description.

#### ASIAN 395 Classical Indian Philosophical Systems (also CLASS 395 and RELST 395) @ # (IV) Spring. 4 credits. Prerequisite: some

background in philosophy or in classical culture. C. Minkowski.

A survey of the traditions of philosophical inquiry in ancient India, especially Nyaya, Sankhya, Mimamsa, and Vedanta. Topics include the origins in and relationships to the Vedas; the formation of distinct positions on such subjects as perception, language, identity, karma, and liberation; the dialogue with Buddhist, Jains, skeptics, materialist, and cynics; and new theistic models, particularly among the Saiva philosophers in Kashmir.

#### ASIAN 396 Southeast Asian History from the Eighteenth Century (also HIST 396) @ (III)

Spring. 4 credits. E. Tagliacozzo. See HIST 396 for description.

# [ASIAN 410 Chinese Performing Arts @ (IV)

Fall. 4 credits. Not offered 2002–2003. E. Gunn.

The course surveys drama, music theater, and film in twentieth-century China. Some material requires knowledge of Chinese.]

#### [ASIAN 411 History of the Japanese

Language (also LING 411) @ # (III) Fall. 4 credits. Not offered 2002–2003. J. Whitman.

See LING 411 for description.]

#### ASIAN 412 Linguistic Structure of Japanese (also LING 404) (III)

Spring. 4 credits. J. Whitman. See LING 404 for description.

#### ASIAN 413 Religion and Politics in Southeast Asia (also ANTHR 413) @ (III)

Spring. 4 credits. A. Willford. See ANTHR 413 for description.

#### ASIAN 414 Second Language Acquisition I (also LING 414) (III)

Fall. 4 credits. Y. Shirai. See LING 414 for description.

#### [ASIAN 415 Virtual Orientalisms (also S HUM 415 and COM L 418) # (IV)

Spring. 4 credits. Enrollment limited to 25 students. Not offered 2002–2003. B, de Barv.

A comparative study of representations of Japan in postwar French, American, and Japanese cultures. The course is particularly concerned with the role of virtual technologies in representations of Japan, as well as with a proliferation of late twentieth-century representations of Japan as a site of utopic or dystopic virtuality. Positing Orientalism as a broadly-based, but definitely not monolithic, ensemble of representational and regulatory practices, we attend to differences in the historical context. Examples include: Roland Barthes' figuring of Japan as a "possibility of difference," or of "the very fissure of the symbolic" in post-1968 France, and Michael Crichton's more recent superimposition of a "Rising Sun" over processes of American racial hybridization, high-tech reproduction and alteration of images, and trade imbalances. Ambiguously represented as a culture of both the "chrysanthemum" (the hyper-aesthetic) and the "sword" (the hyper-phallic), with the advent of what some have called "technoorientalism," Japan has increasingly become a preoccupation of technological and futurological imagination. We consider literary, filmic, and theoretical texts, as well as science fiction, video games, and fanzines.]

#### [ASIAN 416 Undergraduate Seminar on Gender and Sexuality in Southeast Asian History (also HIST 416) (III)

Fall. 4 credits. Not offered 2002–2003. T. Loos.

See HIST 416 for description.]

#### ASIAN 417 Second Language Acquisition II (also LING 415) (III)

Spring. 4 credits. Y. Shirai. See LING 415 for description.

Fall. 4 credits. J. Piggott. See HIST 420 for description.

#### [ASIAN 441 Mahayana Buddhism (also RELST 441) @ # (IV) Spring. 4 credits. Not offered 2002–2003.

Spring. 4 credits. Not offered 2002–2003. Next offered spring 2004. D. Boucher. This course explores the origins and early developments of a movement in Indian Buddhism known as the Mahayana. We intensively examine a small slice of this movement's voluminous literature so as to better understand its call for a new spiritual orientation within Buddhism. Topics of discussion include the career of the bodhisattva, the lay/monk distinction, attitudes of Mahayanists towards women and other Buddhists, and the development of Buddhist utopias and transcendent Buddhas.]

#### ASIAN 445 Japanese Imperialism in East Asia @ (IV)

Fall. 4 credits. Prerequisite: at least one previous course on modern East Asia. Limited to 15 students. M. Shin.

The first part of the course reviews the major theories of imperialism and fascism as well as post-colonial theory. The second part considers their applicability to East Asia through readings of the major monographs on Japanese imperialism and its colonies.

#### ASIAN 449 History and Methods of the Academic Study of Religion (also RELST 449) (III)

Spring. 4 credits. Prerequisite: 1 course satisfying the religious studies major. I. M. Law.

This course provides advanced students in Religious Studies or the humanities familiarity with important methodological issues in the academic study of religion. Following a brief historical outline, we survey major approaches to the academic study of religion currently used and discussed in Religious Studies. We read works from the following approaches to the study of religion: anthropology, philosophical hermeneutics, phenomenology, history of religions, the sociology of religion and critical ideological studies. In the final segment of the class, we focus on recent developments in the field of Religious Studies. We explore how these studies either build upon or react against the nineteenth century assumptions of Religionswissenschaft and how new methodological approaches address twentieth and twenty-first century academic, religious, and theoretical issues.

#### [ASIAN 450 Crime and Diaspora in Southeast Asian History (also HIST 451) @ # (III)

Fall. 4 credits. Not offered 2002–2003. E. Tagliacozzo. See HIST 451 for description.]

#### ASIAN 460 Indian Meditation Texts (also RELST 460) @ # (IV)

Fall. 4 credits. D. Gold.

Because texts that record visionary experience prescribe the practice of contemplation, and present enigmatic utterances are highly valued in Indian tradition, they need to be taken seriously by students of Indian and world civilizations. Yet the special problems of interpretation that they present have often caused meditation texts to be passed over in embarrassed, sometimes reverent silence. In this course we draw on approaches from literary criticism, anthropology, and religious studies to explore a number of the problems to which these texts give rise: in what ways are the apparent differences in experience presented in meditation texts shaped by different cosmologies and ritual practice? Do different literary genres have particular religious implications? What are the relations between convention and experience in the creation of the texts? Readings are drawn from the Upanishads and Tantra, devotional verse in the vernaculars, and the classical meditation manuals of Hinduism and Buddhism. Some attention may be given to Indian Sufi materials. No knowledge of Indian languages is required.

#### [ASIAN 476 Senior Seminar: Comparative Colonial Law and Society (also HIST 476 and WOMNS 476) @ (III)

Fall. 4 credits. Letter grade only. Limited to 15 students. Not offered 2002–2003. T. Loos.

See HIST 476 for description.]

#### [ASIAN 479 Art of the T'ang Dynasty (also ART H 481) # @ (IV)

Spring, 4 credits. Not offered 2002–2003. A. Pan.

See ART H 481 for description.]

# ASIAN 481 Translation and Identities @ (IV)

Spring. 4 credits. N. Sakai. Translation establishes a division of two spheres and thereby marks the limit of what can be expressed in one medium. Broadly understood, translation can take place not only between two national languages but also at a variety of boundaries within a putatively single society. The seminar investigates different economies of translation by which different social and cultural identities are constructed, emphasizing the disappearance of multi-lingualism in modern nation-state and the mutation of translation economies which gave rise to new ways of imagining the organicist unity of the society in eighteenthcentury and twentieth-century Japan. Seminar readings are translations of pre-modern Japanese and Chinese writings, and modern European and Japanese philosophical articles (in English).

#### [ASIAN 482 Seminar: Gender

Adjudicated (also HIST 480) # (III) Fall. 4 credits. Not offered 2002–2003.

T. Loos. See HIST 480 for description.]

# [ASIAN 483 Internationalism,

#### Nationalism, and Modern Japanese Discursive Space @ (III)

Spring. 3 credits. Not offered 2002–2003. N. Sakai.

The late nineteenth century marks an important transitional period; nation-states formed in Britain, France, Japan, Germany, the United States, and elsewhere sought to

become imperial powers; and "internationalism" virtually collapsed. Focusing on Japanese examples, but not excluding other cases, we study the discursive spaces of modern national subjectivity with a view to the problems of ethnicity, colonialism, imperial sexism, violence, historical memory, postcoloniality and academic knowledge. A major critical paper is required.]

#### [ASIAN 486 Ritual and Performance in **Japanese Religions (also RELST** 486) (IV)

Spring. 4 credits. Class size limited to 12. Prerequisites: instructor consent for undergraduates. Ability to read Japanese is not required, but there are optional readings in Japanese. Graduate students may sign up for this as a graduate level course. Not offered 2002-2003. J. M. Law.

In the last fifty years in Japan, there has been a proliferation of revived, restored, invented and newly created folk performing arts throughout the country. This course is an exploration of this phenomenon, and its relationship to Japanese religion. The course begins with an overview of the major theoretical works relating to tradition creation, revitalization and invention, with a focus on ritual performance theory. With this theoretical basis, we explore several paradigmatic cases classified as "folk performing arts" (minzoku geino) which are directly related to overtly religious concerns. Through these cases, we see how both national and local identity discourses are being worked out through public ritual performances. Each student also has an opportunity to conduct in-depth research on one ritual performance tradition, or a given aspect of critical theory relating to ritual studies. This course is recommended for upper level undergraduates with the consent of the instructor or graduate students.]

Fall. 4 credits. Not offered 2002-2003. J. Piggott.

See HIST 597 for description.]

#### Asia-Graduate Seminars

For complete descriptions of courses numbered 600 or above, consult the director of graduate studies.

#### ASIAN 601 Southeast Asia Area Seminar: Philippines

Fall. 4 credits. C. Barry This course offers a critical review of the key texts and themes in the study of the Philippines. The texts are drawn from a range of disciplines: history, anthropology, politics, and literature. Students who wish to join this seminar are expected to read across this range of materials. The emergence of the Philippine nation-state remains the pre-eminent political development of the past century and this fact necessarily influences the shape of intellectual developments well. Students are encouraged to critically evaluate the processes by which a modern nation-state took shape because and in spite of the experiences of colonization: Spanish, American, and Japanese. Students also engage with the social, political and intellectual consequences of colonialism, especially as reflected in social scientific literatures produced by the colonizers and by Filipinos.

#### ASIAN 602 Southeast Asia Seminar Spring. 4 credits. Staff.

#### [ASIAN 603 Southeast Asia Topical Seminar: Sociology of Natural **Resources and Development (also** R SOC 607)

Fall. 4 credits. Not offered 2002-2003. Staff ]

#### ASIAN 604 Southeast Asia Topical Seminar

Spring. 3-4 credits. T. Chaloemtiarana. This course allows students to look at Southeast Asia as a field of study. Beginning graduate students may find this seminar useful. Students attend lectures in ASIAN 208 and meet in a graduate seminar. Discussion topics include Southeast Asia as a field of inquiry, academic disciplines and area studies, art and culture, Colonialism and postcolonialism, nationalism and cold war, economic development, and gender studies.

#### ASIAN 605-606 Master of Arts Seminar in Asian Studies

605, fall; 606, spring. 2-4 credits. Staff.

#### [ASIAN 609 Modern Japanese Studies: The Formation of the Field in History and Literature (also HIST 609)

#### ASIAN 612 Japanese Bibliography and Methodology

Fall. 1 credit. Prerequisite: permission of instructor. Required of honors students and M.A. candidates. F. Kotas.

#### ASIAN 613 Southeast Asian Bibliography and Methodology

Fall. 1 credit. Prerequisite: permission of instructor. A. Riedy

This course is designed to instruct students in methods of identifying and locating resources for the study of Southeast Asia. Emphasis is on the practical aspects of using various types of bibliographical tools to identify both primary and secondary sources in Southeast Asian and Western languages. Electronic databases and online services as well as traditional printed resources are covered. Relevant arcana of library science is explained as necessary. Required of honors students and Master of Arts candidates. No foreign language competence is required but a reading knowledge of at least one Southeast Asian language or other Asian language (especially Chinese or Japanese) and a major European language (especially French, Spanish, or Dutch) is highly desirable.

#### ASIAN 626 The 18th Century and the **Emergence of Literary Modernity**

Spring. 4 credits. N. Sakai, T. Yoda. This course attempts to read texts from pre-Meiji Japan together with European equivalents of the eighteenth century, and seeks to understand the conditions of modernity in what may broadly be referred to as "literature" outside the scope of Eurocentric historicism. It has been argued that it is possible to identify a historically specific form of temporality, which is later called "subject," among some texts produced from the early eighteenth century in areas as diverse as France, Germany, England and Japan. Whether actualized in vernacular dialogues in printed medium, in stories of heterosexual love in essentially homosocial settings, or in the image of an ethno-linguistic community, new types of narration and social imaginary came into existence in the eighteenth century in many parts of the world. We examine how these transformations took place by reading exemplary texts from the old formations as well as from the new ones with particular focus on the following issues: the narrative articulation of inter-personal relations, the intensities of authorial voice, the management of textual production, the economy of textual visibility and invisibility, the claims of reproducibility, and aesthetic senses associated with poetry and calligraphy.

#### [ASIAN 648 Peddlers, Pirates, and **Prostitutes: Subaltern Histories of** Southeast Asia, 1800-1900 (also HIST 249/648)

Spring. 4 credits. Not offered 2002-2003. E. Tagliacozzo.

See HIST 648 for description.]

#### ASIAN 650 Seminar in Asian Religions

Fall. 4 credits. Graduate students only. Limited to 12 Students. J. M. Law.

**Topic Fall 2002: Ritual and Performance in Japanese Religions.** This course, an exploration of ritual performance and its relationship to Japanese religion, begins with an overview of the major theoretical works relating to tradition creation, revitalization and invention, with a focus on ritual performance theory. With this theoretical basis, we explore several paradigmatic cases classified as "folk performing arts" (minzoku geino) which are directly related to overtly religious concerns. Through these cases, we see how both national and local identity discourses are being worked out through public ritual performances.

#### [ASIAN 651 Crime and Diaspora in Southeast Asian History (also HIST 451/650)

Fall. 4 credits. Not offered 2002–2003. E. Tagliacozzo.

See HIST 650 for description.]

#### ASIAN 652 Straddling the Himalayas: the Transmission of Buddhism from Indla to China

Spring. 4 credits. Prerequisites: students do NOT have to have reading knowledge of classical Chinese, although it is helpful. Students with reading knowledge of Chinese will be encouraged to pursue projects in primary sources. All graduate students should have reading knowledge of French OR Japanese. D. Boucher.

This is a graduate seminar designed for students interested in a broad range of related topics: Indian Buddhism, early Chinese Buddhism, Buddhism in Central Asia, problems of cultural transmission and translation, and models of appropriation of religious traditions into new cultural environments. We start with a rapid survey of the state of our knowledge about Buddhism in northwest India and west Central Asia on the eve of its transmission eastward. We explore various theories and models of transmission and look for parallels in other cultural contexts. We also examine in some detail what the Chinese received as "Buddhism", and explore the earliest attempts to make sense of this fundamentally alien tradition.

#### ASIAN 654 Indian Buddhism

Fall. 4 credits. Graduate students attend ASIAN 354 and arrange additional

meetings with instructor. D. Boucher. This course surveys Buddhism in South Asia from its origins in northeast India to its migrations throughout the Indian subcontinent. We spend considerable time dealing with the earliest literature about the Buddha, his teachings, and the principal doctrines and practices of the earliest Buddhist communities. We then look at later developments, including the new spiritual orientations offered by the emergence of the Mahayana and Vajrayana traditions. Finally, we explore the way two very different forms of the Indian Buddhism became entrenched in the adjacent regions of Sri Lanka and Nepal.

#### ASIAN 676 Southeast Asia Reading Seminar: Thai Political Novel Fall, 4 credits, T. Chaloemtiarana.

This seminar examines the relationship between the craft of the novelist and the representation of social, historical and political "reality." We discuss how early Thai novels illuminate the past, affect the course of history and politics, and/or distort our understanding of Thai self-identity. Students read five novels and one short story in Thai written by Kulap Saipradit (1905–1974) and discuss them in the context of Thai sociality, history and politics.

#### [ASIAN 684 Southeast Asia in the World System: Capitalism and Incorporation, 1500-Present (also HIST 284/684)

Fall. 4 credits. Not offered 2002–2003. E. Tagliacozzo.

See HIST 684 for description.]

#### [ASIAN 685 History of Vietnam (also HIST 388/688)

#### ASIAN 701-702 Seminar in East Asian Literature

701, fall; 702, spring. 1-4 credits. Staff. Topic fall 2002: Reconfiguring Asia, Reconstructing the Past. B. de Bary N. Sakai, T. Yoda. A comparative graduate seminar which critically examines the ongoing construction of modern "Asia" while linking it to the historiographical problem of the retrieval of knowledge of the past. As was the case with the modern knowledge practices that preceded them, variants of post-modern theory today are often seen as powerfully "othering," marginalizing, or silencing the premodern and those who would reconstitute knowledge of it. Also familiar from early twentieth century discourses of nostalgia and loss is the association of this loss of knowledge from the past with the loss of cultural particularity, especially in societies subject to colonialism or other forms of modern western expansion. In recent work in sub-altern studies or those proposing "provincializing the west," for example, the conceptual distinction between premodern and modern itself has been questioned and politicized. Our course makes these questions its point of departure. Rather than focusing solely on contemporary theoretical articulations of the problem, however, the majority of our weekly meetings consist of a reading of selected premodern texts, translations of premodern texts, or texts attempting to recover premodern historical, archival, or archaeological knowledge. This year's seminar will include classes dealing with Japan, India, Korea, and Vietnam.

### ASIAN 703-704 Directed Research

703, fall or spring; 704, fall or spring. 1–4 credits. Staff.

ASIAN 899 Master's Thesis Research Fall, spring. 2–4 credits. Staff.

ASIAN 999 Doctoral Dissertation Research

Fall, spring. 2-4 credits. Staff.

# **Honors Courses**

**ASIAN 401 Asian Studies Honors Course** Fall or spring. 4 credits. Intended for seniors who have been admitted to the honors program. Staff.

Supervised reading and research on the problem selected for honors work.

#### ASIAN 402 Asian Studies Honors: Senior Essay

Fall or spring. 4 credits. Prerequisite: admission to the honors program. Staff. The student, under faculty direction, prepares an honors essay.

#### ASIAN 403–404 Asian Studies Supervised Reading

Fall, spring, or both. 1-4 credits. Prerequisite: permission of instructor. Open to

majors and other qualified students. Intensive reading under the direction of a member of the staff.

#### Bengali

#### BENGL 121-122 Elementary Bengali

121, fall; 122, spring. 4 credits each term. BENGL 122 provides language qualification. Prerequisite: for BENGL 122, BENGL 121 or examination. Staff.

The emphasis is on basic grammar, speaking, and comprehension skills; Bengali script is also introduced.

#### BENGL 201-202 Intermediate Bengali Reading

201, fall; 202, spring. 3 credits each term. BENGL 202@ provides language proficiency. Prerequisites: for BENGL 201, BENGL 122 or examination; for BENGL 202, BENGL 201 or examination. Staff. Continuing instruction in grammar with attention to speaking and reading skills.

#### BENGL 203–204 Intermediate Bengali Composition and Conversation

203, fall; 204, spring. 3 credits each term. BENGL 204@ provides language proficiency. Prerequisites: for BENGL 203, BENGL 122 or examination; for BENGL 204, BENGL 203 or examination. Staff. Continuing instruction in grammar with attention to writing skills.

#### BENGL 300 Directed Studies

Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. Staff. Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

#### BENGL 303–304 Bengali Literature I, II

303, fall; 304, spring. 4 credits each term. Prerequisites: BENGL 203–204 or equivalent. Staff.

An introduction to noted Bengali writers. Selections of works by Rabindranath Tagore and Abanindranath Tagore and short stories by Bonophul are covered. The course is devoted to reading these works and developing literary criticism and creative writing in Bengali.

#### Burmese

**NOTE:** Contact S. Tun in Morrill Hall 405 before classes begin for placement or other testing and organizational information.

#### BURM 103–104 Burmese Conversation Practice

103, fall; 104, spring. 2 credits each term. Prerequisites: for BURM 104, BURM 103 and BURM 121. May not be taken alone. Must be taken simultaneously with BURM 121–122. Satisfactory completion of BURM 104/122 fulfills the qualification portion of the language requirement. S. Tun.

Additional drills, practice, and extension of materials covered in BURM 121 and 122. These courses are designed to be attended simultaneously with BURM 121–122 respectively, allowing students to obtain qualification within a year.

#### **BURM 121–122 Elementary Burmese**

121, fall; 122, spring. 4 credits each term. *BURM 122 provides language qualification.* Prerequisite: for BURM 122, BURM 121. May be taken alone or simultaneously with BURM 103–104. Satisfactory completion of BURM 104/122 fulfills the qualification portion of the language requirement. S. Tun.

A thorough grounding is given in all language skills: listening, speaking, reading, and writing.

# BURM 123 Continuing Burmese

Fall. 4 credits. *Provides language qualification*. Prerequisite: BURM 122. Satisfactory completion of BURM 123 fulfills the qualification portion of the language requirement. S. Tun.

Continuing instruction in conversational and reading skills, to prepare students for 200-level courses.

#### BURM 201-202 Intermediate Burmese Reading @

201, fall or spring; 202, fall or spring. 3 credits each term. *BURM 201 provides language proficiency*. Prerequisites: for BURM 201, BURM 123; for BURM 202, BURM 201. S. Tun.

Continuing instruction in Burmese, with emphasis on consolidating and extending conversational skills, and on extending reading ability.

#### BURM 300 Directed Studies

Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. S. Tun.

Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

#### BURM 301–302 Advanced Burmese

301, fall or spring; 302, fall or spring. 3 credits each term. Prerequisites: for BURM 301, BURM 202 or permission of instructor; for BURM 302, BURM 301. S. Tun.

Continuing instruction on conversational and literary skills, but with special emphasis on reading. Students encounter various genres and styles of written Burmese. Readings will include articles on current events, and either several short stories or a novel. Focus is on developing reading skills, particularly on vocabulary development, consolidating and expanding grammar, and appreciating stylistic and cultural differences.

#### BURM 303–304 Advanced Burmese II

303, fall or spring; 304, fall or spring. 3 credits each term. Prerequisite: for BURM 303, BURM 202 or permission of instructor; for BURM 304, BURM 303. S. Tun.

This is a course for students who have good conversational ability in Burmese and some familiarity with Burmese culture, but who need to strengthen reading skills and further enrich their vocabulary. Students in consultation with the instructor, are able to select reading materials. There is also an opportunity for those who need it, to strengthen listening skills, through the study of current films, TV, and radio programs in Burmese.

#### BURM 401–402 Directed Individual Study

401, fall; 402, spring. 2-4 credits variable each term. Prerequisite: permission of instructor. S. Tun.

This course is designed to accommodate the needs of advanced or specialized students, and faculty interests. Topics of reading and discussion are selected on the basis of student need.

#### Cambodian

See Khmer.

# Chinese

**NOTE:** Testing for placement, except for those with near-native abilities (particularly those schooled in a Chinese setting up until the age of about 12), takes place in registration week, before classes begin. Time and place will be posted on the web at www.arts.cornell.edu/ asian/index.html under "Language Programs" and the bulletin board outside Rockefeller 388. Students with some Chinese schooling who want to obtain 3 or 6 credits for their proficiency will be tested at the beginning of the second week of classes. Again, the time and place will be announced.

#### CHIN 101-102 Elementary Standard Chinese ('Mandarin')

101, fall; 102, spring. 6 credits each term. Prerequisite: for CHIN 102, CHIN 101, or equivalent. Letter grades assigned unless student receives exceptional permission from the course coordinator for S-U. You must enroll in lecture and 1 section. Since each section is limited to 10–12 students, students missing the first 2 class meetings without a university excuse are dropped so others may register. No student will be added after the second week of classes. Satisfactory completion of CHIN 102 fulfills the qualification portion of the language requirement. S. Hoare and staff.

A course for beginners only, providing a thorough grounding in conversational and reading skills. Students with some facility in the spoken language (because Chinese is spoken at home) but who do not read characters should take 109–110. Students who read Chinese, but who speak 'dialects,' such as Cantonese or Amoy, should enroll in CHIN 215.

#### CHIN 109–110 Beginning Reading and Writing (Standard Chinese)

109, fall; 110, spring. 4 credits each term. CHIN 110 provides language qualification. Prerequisites: must have permission of instructor to enroll. Students who complete CHIN 110 normally continue with CHIN 209 and 210. Because of high demand for this course, students missing the first 2 meetings without a university excuse are dropped so others may register. Satisfactory completion of CHIN 110 fulfills the qualification portion of the language requirement. F. Lee Mehta.

This course is intended primarily for students who speak some Chinese (e.g., at home), but who have had little or no formal training. The focus is on characters, reading comprehension, basic composition, standard grammar, and reading aloud with standard Chinese ('Mandarin') pronunciation.

#### CHIN 111-112 Elementary Cantonese

111, fall; 112, spring. 4 credits each term. Prerequisite: must have permission of instructor with instructor's signature to complete formal enrollment after preregistration. For CHIN 112, 111, or equivalent. Satisfactory completion of *CHIN 112 provides language qualification.* Since the course is limited to 10–12 students, students missing the first two classes without a University excuse are dropped so others may register. No student will be added after the second week of classes. H. Huang.

A course in standard Cantonese (as spoken in Hong Kong and Canton) for beginners who have no Chinese language skills from heritage or previous training. Students who have a Mandarin background should take CHIN 211. Students with very limited skills in Cantonese oral expressions should consult with instructor before formal enrollment in the class with instructor's signature. The course gives a thorough grounding in conversational and character reading skills in Cantonese.

#### CHIN 201-202 Intermediate Standard Chinese ('Mandarin') @

201, fall or summer; 202, spring or summer. 4 credits each term. *CHIN 201 provides language proficiency*. Prerequisites: for CHIN 201, CHIN 102 with a grade of C+ or above or equivalent; for CHIN 202, CHIN 201 or equivalent. Section 1, Q. Teng; Section 2, Staff.

Continuing instruction in written and spoken Chinese with particular emphasis on consolidating basic conversational skills and improving reading confidence and ability.

#### CHIN 209–210 Intermediate Reading and Writing @

209, fall; 210, spring. 4 credits each term. *CHIN 209 provides language proficiency*. Prerequisites: for CHIN 209, CHIN 110 or equivalent; CHIN 210, CHIN 209. After completing 210, students may only take 400-level courses in Chinese. Staff.

Continuing focus on reading and writing for students with spoken background in standard Chinese; introduction of personal letter writing and other types of composition.

#### CHIN 211-212 Intermediate Cantonese @

211, fall; 212, spring. 4 credits each term. Prerequisite for 211: 112 or equivalent. Prerequisite for 212: 211 or equivalent. *CHIN 211 provides language proficiency*. Prerequisite: completion of CHIN 111/112, or students who have Mandarin speaking, reading and writing background from family heritage or formal training, or students who have some elementary conversational skills in Cantonese from family heritage. H. Huang.

A course that gives comprehensive training in oral and written Cantonese at a higher level than CHIN 111/112 or elementary level in grammar, vocabulary and contents in oral expressions and reading and writing in Cantonese

#### CHIN 213-214 Intermediate Reading and Writing for Cantonese Speakers

213, fall; 214, spring. 4 credits each term. Prerequisite for 214: 213 or equivalent. CHIN 214 provides language proficiency. Prerequisite: Cantonese speakers who have no major problems in oral expressions in Cantonese and have acquired basic skills in characters reading and writing in Cantonese, or students who have equivalent abilities. H. Huang.

A course intended primarily for students who are Cantonese speakers (e.g., at home) or equivalent and have had some basic training in character reading and writing. The focus is on reading and writing Chinese characters.

#### CHIN 215 Mandarin for Cantonese Speakers @

Fall, 4 credits. Prerequisite: Advanced Cantonese. Limited to 15 students. Provides language proficiency. Staff.

#### CHIN 300 Directed Studies

Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. Staff. Taught on a specialized basis to address particular student needs. Times arranged with instructor

#### CHIN 301-302 High Intermediate Chinese

301, fall; 302, spring. 4 credits each term. Prerequisites: for CHIN 301, CHIN 202 or equivalent; for CHIN 302, CHIN 301. F. Lee-Mehta.

Continuing instruction in spoken Chinese and in various genres and styles of written Chinese.

## CHIN 304 Advanced Mandarin

Conversation Spring. 1 credit. Prerequisite: CHIN 202, CHIN 215, or permission of instructor.

Limited to 10 students. Staff.

Conversation and reading practice for students who wish to maintain language skills. Guided conversation and oral composition and translation. Corrective pronunciation drills.

# CHIN 411-412 Advanced Chinese:

Fiction, Reportage, Current Events 411, fall; 412, spring. 4 credits each term. Prerequisites: for CHIN 411, CHIN 302 or equivalent; for CHIN 412, CHIN 411 and permission of instructor required. Q. Teng.

Reading, discussion, and composition at advanced levels.

#### CHIN 425 Special Topics

Fall. 4 credits. Prerequisite: permission of instructor. X. Jiang.

A number of different topics in advanced Chinese language, advertised the previous semester, are offered under this title to accommodate the needs of advanced or specialized students, and take advantage of faculty interests. Topics include: correspondence and composition, excerpts from classical novels, Ch'ing documents, xiesheng comedy routines, etc. May be repeated for credit.

**Topic fall 2002: The Language of Chinese** Periodicals. This course studies the standard usage of language in Chinese newspapers and magazines and the differences with spoken Chinese and other forms of written Chinese. The course is designed to introduce the rules and changing trends of journalistic Chinese to assist students in understanding and writing, as well as reading, journalism.

# **Chinese FALCON (Full-year Asian** Language CONcentration)

For full information, brochures, etc., see the FALCON secretary in 125 Rockefeller Hall e-mail: falcon@cornell.edu or www.arts.comell.edu/asian/falcon.htm.

#### CHIN 160 Introductory Intensive Mandarin

Summer only. 8 credits. Provides language qualification. Completion of 160 fulfills the qualification portion of the language requirement. S. Hoare and staff. Introduction to spoken and written Mandarin. Lectures on linguistic and cultural matters. intensive practice with native speakers, and laboratory work. Students who complete this course with a grade of at least B are normally

#### CHIN 161-162 Intensive Mandarin @

eligible to enroll in CHIN 201.

161, fall; 162, spring. 16 credits each term. Provides language proficiency. Prerequi-sites: for CHIN 161, CHIN 160 or equivalent or permission of instructor; for CHIN 162, CHIN 161 or placement by FALCON staff prior to beginning of spring term. Students must apply formally to the program; application open to all Cornell students and students from other institutions. S. Hoare and staff.

Work on spoken and written Chinese from an intermediate level to an advanced level. This is a full-time program and full academic load; the demands of the program do not normally permit students to take other courses simultaneously. With a sequence of 160, 161, and 162, in only one calendar year a student can complete as much Chinese as would be gained in three or more years of regular study at most academic institutions. This course sequence also serves to fulfill the language requirement for the MA in Asian Studies and the joint MBA/MA in Asian Studies. CHIN 162 is scheduled to be held in Beijing, People's Republic of China. For more information and application forms, please contact the FALCON Program office.

### Literature in Chinese

#### CHLIT 213-214 Introduction to Classical Chinese @#

213, fall; 214, spring. 3 credits each term. Provides language proficiency. Prerequisite: qualification in Chinese or permission of instructor. May be taken concurrently with CHIN 101-102, 201-202, 301-302. R. McNeal, D. X. Warner.

This course is an introduction to the fundamental grammar and vocabulary of classical Chinese. Students analyze and translate short passages in class, and are tested on these skills in regular quizzes and examinations. Students should be competent in usage of the Chinese script and have at least the equivalent of two years of any East Asian language that employs the Chinese writing system (e.g., Mandarin, Cantonese, Japanese).

#### [CHLIT 300 Reading from the Early Masters @#

Spring, 4 credits. Prerequisites: CHLIT 213-214 or permission of instructor. Not offered 2002-2003. R. McNeal.

Students read and discuss several passages from early classical texts, including the Confucian Analects, the Mozi, the Guanzi, and others. Attention is paid to grammar, historical context, and methodology. Students who have not completed one year of classical Chinese at Cornell need permission from the instructor to register.]

# CHLIT 307 Readings in Classical **Chinese Literature** @ # (IV) Fall. 4 credits. Prerequisite: CHLIT 214 or

permission of instructor. D. X. Warner. This is an introduction to classical Chinese literary texts. Students survey a selection of texts from the ancient and medieval periods. Readings are primarily in prose; some poetry is included. Through close reading, students expand their knowledge of the diction, syntax, and nuances of classical Chinese; at the same time, students gain familiarity with the various genres, themes, and literary styles that were foundational for the later Chinese literary tradition.

#### CHLIT 421-422 Directed Study

Fall or spring. 2-4 credits each term. Prerequisite: permission of instructor. Staff. Students choose a faculty member to oversee this independent study. The student and the faculty member work together to develop course content.

# **CHLIT 423 Readings in Chinese** History @ Fall. 4 credits. X. Jiang.

Topic fall 2002: Contemporary Chinese Journalism. Through the selected study and analysis of examples from the most recent journalistic reporting, this course is designed to help students understand the background, events, and characteristic composition of Chinese journalism and recognize particular features of change in its development.

#### CHLIT 435 Chinese Buddhist Texts @ # (IV)

Fall. 4 credits. Prerequisite: 1 year of classical Chinese or permission of the instructor. D. Boucher.

This seminar is designed to introduce students to the idiom of Buddhist Chinese. We start by reading selections from the early translations to gain a grounding in the vocabulary and syntax that came to characterize literary Buddhism in China. From there we survey some of the so-called apocryphal texts (Buddhist "sutras" produced in China) and look at samples from important writers and schools, depending on student interests. This course is open to students in any area of East Asia with an interest in developing skills in Buddhist texts.

# CHLIT 497 Disjuncture: Text and Exegesis @ # (IV)

Spring. 4 credits. Prerequisite: permission of instructor. Students should have completed the equivalent of CHLIT 214 and any CHLIT course at the 300 level. R. McNeal.

This class focuses on developing critical reading strategies to address issues in classical Chinese texts and the commentarial traditions that have grown up around them. Of particular interest will be: identifying disjunctures and discontinuities between early texts and their commentaries; identifying such

disjunctures among parts of a text itself; glimpsing, through the gaps created by such disjunctures, aspects of early Chinese thought, belief, and practice not otherwise easily accessible.

#### [CHLIT 603 Seminar in Chinese Fiction and Drama

Fall. 4 credits. Prerequisite: permission of instructor. Not offered 2002-2003. E. Gunn.]

#### [CHLIT 605 Seminar in Chinese Fiction and Drama

Spring. 4 credits. Prerequisite: permission of instructor. Not offered 2002–2003. Staff.]

#### CHLIT 610 Chinese Cultural Criticism Spring. 4 credits. E. Gunn.

This course develops questions about cultural criticism of China through reading and discussion of modern critiques of Chinese culture, primarily from the late Qing to the post-Mao era, selected from the work of both Chinese and Western critics. Particular emphasis is placed on the role of cultural criticism in producing literature.

# [CHLIT 615 Seminar: Ideas and

Literature of Medieval China Spring. 4 credits. Not offered 2002-2003. D. Warner.

This is a graduate-level seminar that offers study of the language and genres of Medieval Chinese literature in the context of Medieval Chinese intellectual history. Students read from a range of primary works-including poetry, prose, literary treatises, philosophical essays, and historical writings-from the Later Han to the Sui and early Tang, in addition to a selection of modern scholarly essays in the field. Our primary aim is to re-examine the interrelationship between the history of ideas and the formation of a medieval poetics during this period of Chinese literary history.]

# [CHLIT 618 Seminar on Ancient China

Fall. 4 credits. Also fulfills Humanities requirement. Prerequisite: CHLIT 213-214 or permission of instructor. Not offered 2002-2003. R. McNeal.

This seminar provides graduate students and advanced undergraduates with a critical introduction to the most important sources, both textual and archaeological, for the study of ancient China. We cover materials from the earliest historical period, circa 1300 B.C., down to the consolidation of empire in the first century B.C. Outstanding problems and controversies pertaining to this period are covered, and basic methodological tools presently used by historians, textual critics, paleographers, and archaeologists are addressed. Students participate in the seminar by taking responsibility for presenting on certain topics in detail, some of which may include topics related to their own research or interests.]

#### CHLIT 621-622 Advanced Directed Reading: Chinese Historical Syntax

621, fall; 622, spring. 2-4 credits. Prerequisite: permission of instructor. Staff. Students choose a faculty member to oversee this independent study. The student and the faculty member work together to develop class readings.

#### CHLIT 697 Disjuncture: Text and Exegesis

Spring. 4 credits. Prerequisite: permission of instructor. Students should have completed the equivalent of CHLIT 214 and any CHLIT course at the 300 level. R. McNeal.

This class focuses on developing critical reading strategies to address issues in classical Chinese texts and the commentarial traditions that have grown up around them. Of particular interest will be: identifying disjunctures and discontinuities between early texts and their commentaries; identifying such disjunctures among parts of a text itself; glimpsing, through the gaps created by such disjunctures, aspects of early Chinese thought, belief, and practice not otherwise easily accessible.

# Hindi

#### HINDI 101-102 Elementary Hindi-Urdu

101, fall; 102, spring. 6 credits each term. HINDI 102 provides language qualification. Prerequisite: for HINDI 102, HINDI 101 or equivalent. Staff.

This course sequence is meant for those students who have had very little or no exposure to Hindi-Urdu. It is designed to enable such students to read, write and converse in the language with confidence and enjoyment. Hindi and Urdu are sister languages and share an identical grammar and elementary vocabulary. The language presented in the course is colloquial. The Hindi script is taught first and the Urdu script is taught as an additional course in the spring semester. Students who have some experience of Hindi-Urdu or a closely related language are suited for HINDI 109-110, and should check with the instructor.

#### HINDI 109–110 Accelerated Elementary Hindi-Urdu

109, fall; 110, spring. 3 credits each term. HINDI 110 provides language qualification. Prerequisite for HINDI 110: HINDI 109 or equivalent. Staff.

An entry-level sequence for students with some prior exposure to Hindi-Urdu or a closely related language. This course sequence provides a thorough grounding in all the language skills: listening, speaking, reading, and writing. Completion of this sequence, including satisfactory performance on an examination given at the end of HINDI 110, constitutes a level of performance equal to that of the 101-102 sequence, and is thus considered to fulfill qualification for the language requirement plus eligibility for 200level Hindi-Urdu courses. Check with instructor regarding placement.

#### HINDI 201-202 Intermediate HIndi Reading @

201, fall; 202, spring. 3 credits each term. HINDI 201 provides language proficiency. Prerequisites: for HINDI 201, HINDI 102; for HINDI 202, HINDI 201 or permission of instructor. Staff.

### (HINDI 203-204 Intermediate

**Composition and Conversation**@ 203, fall; 204, spring. 3 credits each term. HINDI 203 provides language proficiency. Prerequisites: for HINDI 203, HINDI 102; for HINDI 204, HINDI 203 or permission of instructor. Not offered 2002-2003. Staff

Throughout this course sequence all aspects of language learning are practiced: listening, speaking, reading, and writing. In 203, video materials are used and the emphasis is on the conversational aspect of the language. In 204, the focus shifts to reading skills and the main text used is a popular novel.]

#### HINDI 300 Directed Studies

Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. Staff

Taught on a specialized basis to address particular student needs. Times arranged with instructor.

#### HINDI 301-302 Advanced Readings in **Hindi Literature**

301, fall; 302, spring. 4 credits each term. Prerequisites: for HINDI 301, HINDI 202; for HINDI 302, HINDI 301 or equivalent. Staff

Selected readings in modern Hindi literature.

### Indonesian

For students who have completed INDO 121-122-123 or its equivalent there is the option of a one-semester program in Malang, East Java, during the junior year. The program combines a variety of cultural and artistic options with area course work and advanced language study. Complete information is available through Cornell Abroad.

Students who have completed a minimum of 18 credits or the equivalent are eligible to apply for a summer program in the Advanced Indonesian Abroad Program. Further information is available from the Southeast Asia Program (180 Uris Hall, 255-2378).

INDO 121-122 Elementary Indonesian 121, fall; 122, spring. 4 credits each term. Prerequisite: for INDO 122, INDO 121. T. Savella and staff.

A thorough grounding is given in basic speaking and listening skills with an introduction to reading.

#### INDO 123 Continuing Indonesian

Fall. 4 credits. Provides language qualification. Prerequisite: INDO 122 or equivalent. Satisfactory completion of INDO 123 fulfills the qualification portion of the language requirement. T. Savella and staff.

Improves speaking skills, such as fluency and pronunciation, focusing on verbal communication skills; offers a wide range of readings and sharpens listening skills.

# INDO 203-204 Intermediate Composition

and Conversation @ 203, fall; 204, spring. 3 credits each term. INDO 203 provides language proficiency. Prerequisites: for INDO 203, INDO 123; for INDO 204, INDO 203 or permission of instructor. T. Savella and staff.

Intermediate instruction in spoken and written grammar and reading comprehension.

#### INDO 205-206 Intermediate Indonesian @

205, fall; 206, spring. 3 credits each term. INDO 205 provides language proficiency. Prerequisites: for INDO 205, INDO 123 or equivalent; for INDO 206: INDO 205 or equivalent. Satisfactory completion of INDO 205 fulfills the proficiency portion of the language requirement. T. Savella and staff.

This course develops all four skills: reading, writing, speaking, and comprehension.

#### INDO 300 Directed Studies

Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. Times arranged with instructor. T. Savella and staff.

Taught on a specialized basis to address particular student needs.

#### [INDO 305-306 Directed Individual Study

305, fall; 306, spring. 2–4 credits. Prerequisites: INDO 301–302 and 303–304 or equivalent knowledge of Indonesian or Malay. Not offered 2002–2003. T. Savella and staff.

A practical language course on an advanced level in which the students read materials in their own field of interest, write reports, and meet with the instructor for two hours a week for two credits and twice a week for four credits.]

#### Japanese

#### JAPAN 101-102 Elementary Japanese 101, fall; 102, spring. 6 credits each term.

JAPAN 102 provides language qualification. Prerequisite for JAPAN 102: JAPAN 101 or placement by the instructor during registration period. Intended for beginners or for those who have been placed in the course by examination. You must enroll in lecture and 1 section. R. Sukle, Y. Nakanishi, and staff.

A thorough grounding in all four language skills—speaking, hearing, reading, writing—at the beginning level, but with a special emphasis on oral communication and actual use of the language in social context. Homework for the course is largely work on the skill aspects of language through practice in the language lab with tapes or CD-ROM. The lecture provides explanation, analysis, and cultural background necessary for successful interaction with Japanese people. The sections are conducted entirely in Japanese. Materials covered are not the same as for JAPAN 141–142.

#### JAPAN 141-142 Beginning Japanese at a Moderate Pace

141, fall; 142, spring. 4 credits each term. Prerequisite for JAPAN 142: JAPAN 141 or placement by instructor during registration period. Y. Shirai, Y. Kawasaki, and staff.
Beginning level training in listening, speaking, reading, and writing, with more emphasis on written skills than JAPAN 101–102. Classroom

activities focus on oral communication skills. Homework for the course is largely written exercises. Fewer credits and fewer class contact hours than JAPAN 101–102; the course meets five hours per week (MTWRF). Materials covered are not the same materials as JAPAN 101–102.

#### JAPAN 201-202 Intermediate Japanese Conversation @

201, fall and summer; 202, spring and summer. 4 credits each term. *JAPAN 201 provides language proficiency*. Prerequisites: for JAPAN 201, JAPAN 102 or placement by the instructor during registration; for JAPAN 202, JAPAN 201 and 203 or placement by the instructor during registration. You must enroll in lecture and 1 section. Students enrolled in JAPAN 201 are strongly urged to enroll concurrently in JAPAN 203. Y. Katagiri.

This is a course for students who have learned an elementary level of Japanese and would like to continue to study the structure of the language and to acquire basic oral proficiency.

#### JAPAN 203–204 Intermediate Japanese Reading I @

203, fall; 204, spring. 2 or 3 credits each term. *JAPAN 203 provides language proficiency*. Prerequisites: for JAPAN 203, JAPAN 102, or placement by the instructor during registration; for JAPAN 204, JAPAN 203 or placement by the instructor during registration. You must enroll in lecture and 1 section. N. Nakada.

Reading of elementary texts emphasizing practical materials, with development of writing skills.

#### JAPAN 241-242 Intermediate Japanese at a Moderate Pace

241, fall; 242, spring. 4 credits each term. JAPAN 241 provides language qualification. JAPAN 242@ provides language proficiency. Prerequisites: for JAPAN 241, JAPAN 142 or placement by instructor during registration period; for JAPAN 242, JAPAN 241 or placement by instructor. Y. Kawasaki and K. Selden.

Training in listening, speaking, reading, and writing for those students who have acquired a basic beginning-level command.

#### **JAPAN 300 Directed Studies**

Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. Staff. Taught on a specialized basis to address particular student needs. Times arranged with instructor.

#### JAPAN 301-302 Communicative Competence @

301, fall; 302, spring. 3 credits each term. Prerequisites: for JAPAN 301, JAPAN 202 and placement by the instructor during registration; for JAPAN 302, JAPAN 301 or placement by the instructor during registration. Y. Kawasaki and staff.

This is a course for students who have learned basic Japanese grammar and oral skill and would like to use the language for natural conversation and effective oral communication. The course is intended to: (1) expand vocabulary for daily life use; (2) brush up on knowledge of basic grammar for fluency; and (3) develop communicative skills for varied situations.

#### JAPAN 303–304 Intermediate Japanese Reading II @

303, fall; 304, spring. 4 credits each term. Prerequisites: for JAPAN 303, JAPAN 202 or placement by the instructor during registration; for JAPAN 304, JAPAN 303 or placement by the instructor during registration. Staff.

Reading of selected modern texts with emphasis on expository style.

#### JAPAN 401–402 Oral Narration and Public Speaking

401, fall; 402, spring. 2 credits each term. Prerequisites: for JAPAN 401, JAPAN 302 or placement by the instructor during registration; for JAPAN 402, JAPAN 401 or placement by the instructor during registration. Y. Katagiri.

Instruction in making and delivering socially appropriate and effective speeches, with emphasis on both the construction of discourse and Japanese patterns of oral delivery. Students learn spoken Japanese in formal occasions through discussions, speeches, and debates as well as increase vocabulary and reinforce listening comprehension ability.

#### JAPAN 403–404 Advanced Japanese Reading @

403, fall; 404, spring. 4 credits each term. Prerequisite: JAPAN 304 or permission of instructor.

**Section I:** Area of Humanities. Cannot be used for distribution. Reading of selected modern texts. K. Selden.

**Section II:** Area of Economics and Social Science. Cannot be used for distribution. Y. Kawasaki. Reading of selected modern texts with emphasis on expository style.

#### [JAPAN 410 History of the Japanese Language (also LING 411) @ #

Fall. 4 credits. Prerequisite: permission of instructor. Not offered 2002–2003. I. Whitman.

An overview of the history of the Japanese language followed by intensive examination of issues of interest to the participants.

of issues of interest to the participants. Students should have a reading knowledge of Japanese.]

#### JAPAN 421-422 Directed Readings

421, fall; 422, spring. 1–4 credits. Limited to advanced students. Prerequisite: placement by the instructor during registration. K. Selden.

Topics are selected on the basis of student needs.

# Japanese FALCON (Full-year Asian Language Concentration)

Director: R. Sukle, 123 Rockefeller Hall; FALCON Secretary 125 Rockefeller Hall, 255– 6457, e-mail: falcon@cornell.edu or www.arts.cornell.edu/asian/falcon.htm.

There are three small interactive classes per day conducted entirely in Japanese and one lecture conducted in English and Japanese. The interactive classes are conducted by experienced and highly trained teachers; the lecture is conducted by an expert in Japanese language structure. Two one-hour sessions in the language lab are required daily. Additional preparation time in the language lab is necessary in the evenings. Exposure to the language exceeds that of even students living and studying in Japan, providing over 1,800 hours of exposure throughout the full-year program. The extensive exposure and intensive work on the language allows students to develop a level of fluency, accuracy, and control of the language not achieved in any other type of academic settings. The course is designed to develop 'copability' in the students by bringing them up to the level where they will be able to successfully make further progress in the language on their own even if they do not have further formal instruction. The intensive nature of the program allows graduate students to complete their language work in minimal time and undergraduates, including freshmen, to achieve levels of Japanese that are far beyond what is normally achieved in a four-year program, provided they continue their study of Japanese after FALCON.

#### JAPAN 160 Introductory Intensive Japanese (FALCON)

Summer only. 8 credits. Satisfies language qualification. R. Sukle and staff. This is the first term of the FALCON Program. It is a full-time, intensive, nine-week course which begins at the absolute beginning level, in speaking as well as rudimentary reading

#### ARTS AND SCIENCES - 2002-2003 448

and writing. Formal application must be made to the program, but admission is open to all students, not just those planning to take the full-year program. Students completing this course and planning to continue at Cornell in the fall may continue with the fall and spring terms of FALCON (JAPAN 161 and 162), or they should consult the FALCON Director, Robert Sukle, at 255-0734 or rjs19@cornell.edu, about other options.

#### JAPAN 161-162 Intensive Japanese (FALCON) @

161, fall; 162, spring. 16 credits each term. JAPAN 161 provides language proficiency. Prerequisites: for JAPAN 161, JAPAN 160, or JAPAN 102 at Cornell, or placement by FALCON staff prior to beginning of fall term; for JAPAN 162, JAPAN 161, or placement by FALCON staff prior to beginning of spring term. Students must apply formally to program (see above); application open to all Cornell students and students from other institutions. R. Sukle and staff.

Work on spoken and written Japanese from an intermediate level to an advanced level. This is a full-time program and full academic load; the demands of the program do not normally permit students to take other courses simultaneously. With a sequence of 160-161-162, in only one calendar year a student can complete as much Japanese as would be contained in three or more years of regular study at most academic institutions. This course sequence also serves to fulfill the language requirement for the M.A. in Asian studies and the joint M.B.A./M.A. in Asian studies

#### Literature in Japanese

#### JPLIT 406 Introduction to Classical Japanese @#

Fall. 4 credits. Prerequisite: permission of instructor. K. Selden.

This course is an introduction to the fundamental grammar and vocabulary of classical Japanese.

#### JPLIT 408 Readings in Classical Japanese @#

Spring. 4 credits. Prerequisite: JPLIT 406 or permission of instructor. K. Selden. This course is intended for students who have completed the JAPAN 403/404 sequence or the equivalent. Readings of excerpts and complete brief pieces from representative premodern Japanese literature mostly with the use of standard modern annotated editions. Different selections and themes are introduced each year.

#### JPLIT 421-422 Directed Readings

421, fall; 422, spring. 2-4 credits. Prerequisite: for JPLIT 421, JAPAN 402 or equiva-lent; for JPLIT 422, JAPAN 421 or equivalent. Staff.

Students choose a faculty member to oversee this independent study. The student and the faculty member work together to develop class readings.

#### [JPLIT 613 Seminar in Tokugawa Culture and Thought

Spring. 2-4 credits. Prerequisite: permission of instructor. Not offered 2002-2003. N. Sakai.

This seminar examines a variety of texts written during the Tokugawa period. The topics discussed in these are many: from the conceptualization of the virtue in the Confucian tradition, to the composition of Waka poetry. The texts are not selected from one school or from one teaching but encompass a wide range of intellectual trends including Neo-Confucianism, the Kogaku and the Kokugaku. In addition to the original texts of the Tokugawa period, we are going to read a few works of modern historiography on Tokugawa thought and culture. These works do not necessarily represent the standard of the present-day Tokugawa studies, but they clearly show different approaches. In this seminar, we evaluate critically these works through a careful reading of the original texts of the Tokugawa period.]

#### [JPLIT 614 Seminar in Modern Japanese Literature: Postmodern Thought for Area Studies (also COM L 695)

Spring. 4 credits. Prerequisite: permission of instructor. Not offered 2002-2003. B. de Bary.

How might postmodern debates on language and difference transform our understanding of the project of cross-cultural learning institutionalized in postwar American area studies? Intended as an introductory course for graduate students, this class emphasizes weekly close readings of important primary texts which have grappled with, or attempted to challenge, epistemological assumptions, categories, and processes which have informed modern disciplinary knowledge of cultural others. Readings will include texts by Rey Chow, James Clifford, Jacques Derrida, Gayatri Spivak, and others.]

#### JPLIT 617 Modern Japanese Philosophy Fall. 4 credits. N. Sakai.

Seminar on modern Japanese philosophy. Students are expected to read texts in Japanese and discuss epistemic, historical, and practical issues involved in them. Supplementary reading of European and U.S. philosophical texts is also required.

#### JPLIT 624 Advanced Readings in Modern **Japanese Literature**

Spring. 4 credits. Prerequisite: permission of instructor. Offered alternate years. B. de Bary

Students will read modern Japanese literary texts in the original. This year's thematic focus will be on works dealing with urban life and the relationship between literature and new media.

# **JPLIT 625 Directed Readings**

Fall or spring. 4 credits. Staff. Students choose a faculty member to oversee this independent study. The student and the faculty member work together to develop class readings.

#### [JPLIT 700-701 Seminar: Reading of Historical Materials—Japanese Imperial Nationalism and Its Literature

700, fall; 701, spring. 4 credits. Not offered 2002-2003. N. Sakai.

Research readings for graduate level students ]

# Javanese

#### [JAVA 131-132 Elementary Javanese

131, fall; 132, spring. 3 credits each term. Prerequisite: for JAVA 132, JAVA 131 or equivalent. This language series (131-132) cannot be used to satisfy the language requirement. Not offered 2002-2003 J. Wolff and staff.

An elementary language course for those who have had no previous experience in the language.]

#### [JAVA 133-134 Continuing Javanese

133, fall; 134, spring. 3 credits each term. JAVA 134 provides language qualification. Prerequisites: for JAVA 133, JAVA 132 or equivalent; for JAVA 134, JAVA 133 or equivalent. Satisfactory completion of JAVA 134 fulfills the qualification portion of the language requirement. Not offered 2002-2003. J. Wolff and staff.

An intermediate conversation and reading course.]

#### [JAVA 203-204 Directed Individual Study @

203, fall; 204, spring. 3 credits. JAVA 203 provides language proficiency. Prerequisite: JAVA 134 or equivalent. Not offered 2002-2003. J. Wolff and staff.

This is a practical language course on an intermediate level in which the students work through readings and conversations under the guidance of a native speaker for three contact hours a week l

#### [JAVA 300 Directed Studies

Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. Not offered 2002-2003. J. Wolff.

Taught on a specialized basis to address particular student needs. Times arranged with instructor.]

# Khmer (Cambodian)

KHMER 121-122-123 Elementary Khmer 121, fall; 122, spring; 123 fall. 4 credits each term. Completion of KHMER 123 provides language qualification. Prerequisite: for KHMER 122, KHMER 121; for KHMER 123, KHMER 122. Staff. A course for beginners or those who have

been placed in the course by examination. The course gives a thorough grounding in speaking and reading.

#### KHMER 201–202 Intermediate Khmer Reading @

201, fall; 202, spring. 3 credits each term. KHMER 201 provides language proficiency. Prerequisites: for KHMER 201,

KHMER 102; for KHMER 202, KHMER 201. Staff.

Continuing instruction in spoken and written Khmer.

#### [KHMER 203-204 Intermediate

**Composition and Conversation** @ 203, fall; 204, spring. 3 credits each term. KHMER 203 provides language proficiency. Prerequisites: for KHMER 203, KHMER 102; for KHMER 204, KHMER 203. Not offered 2002-2003. Staff.

Letter writing and other forms of composition.]

#### KHMER 300 Directed Studies

Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. Staff. Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

#### KHMER 301–302 Advanced Khmer

301, 302, fall. 4 credits each term. Prerequisites: for KHMER 301, KHMER 202 or equivalent; for KHMER 302, KHMER 301. Staff.

Continuing instruction in spoken and written Khmer; emphasis on enlarging vocabulary, increasing reading speed, and reading various genres and styles of prose.

#### [KHMER 401–402 Directed Individual Study

401, fall; 402, spring. For advanced students. 2-4 credits each term. Prerequisite: permission of instructor. Not offered 2002-2003. Staff.

Various topics according to need.]

#### Korean

#### KOREA 101-102 Elementary Korean

101, fall; 102, spring. 6 credits each term. KOREA 102 provides language qualification. Satisfactory completion of KOREA 102 fulfills the qualification portion of the language requirement. H. Diffloth and staff

Covers basics of speaking, reading, and writing. Introduces Hangul writing system and grammar

### KOREA 109-110 Elementary Reading

109, fall; 110, spring. 3 credits each term. KOREA 110 provides language qualification. Prerequisite: permission of instructor. Satisfactory completion of KOREA 110 fulfills the qualification portion of the language requirement. H. Diffloth and staff

This course is for students who have spoken some Korean in the home, but whose reading and writing skills are limited or nonexistent. If in doubt about eligibility, see instructor.

KOREA 201–202 Intermediate Korean @

201, fall; 202, spring. 4 credits each term. KOREA 201 provides language proficiency. Prerequisites: for KOREA 201, KOREA 102 or permission of instructor; for KOREA 202, KOREA 201. Satisfactory completion of KOREA 201 fulfills the proficiency portion of the language requirement. H. Diffloth and staff

Covers the basics of speaking, reading, and writing at the intermediate level. Introduces some reading and writing with Chinese characters.

# KOREA 209–210 Intermediate

**Reading** @ 209, fall; 210, spring. 4 credits each term. KOREA 209 provides language proficlency. Prerequisites: for KOREA 209, KOREA 110 or permission of instructor; for KOREA 210, KOREA 209 or permission of instructor. H. Diffloth and staff.

An intermediate level of reading comprehension and writing course for students who have acquired basic oral proficiency. Introduces some reading and writing with Chinese characters. If in doubt about eligibility, see instructor.

#### **KOREA 300 Directed Studies**

Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. H. Diffloth.

Taught on a specialized basis to address particular student needs. Times will be arranged with instructor

#### KOREA 301–302 Advanced Korean

301, fall; 302, spring. 4 credits each term. Prerequisites: for KOREA 301, KOREA 202 or placement by instructor; for KOREA 302, KOREA 301 or placement by instructor. H. Diffloth and staff.

Reading of advanced texts, including newspapers and Chinese character material, together with advanced use of the spoken language.

#### [KOREA 430 Structure of Korean (also LING 430)

Spring. 4 credits. Offered alternate years. I. Whitman.

See description under LING 430.]

#### Literature in Korean

#### KRLIT 305 Modern Korean Literature in Translation @ (IV)

Spring. 4 credits. Prerequisite: ASIAN 218 or its equivalent. M. Shin.

A survey of 20th century Korean literature. The first part of the course focuses on the emergence of modern Korean literature in the early 20th century and colonial period of literature. The second part covers the major South Korean writers such as Hwang Sunwon, Yi Munyol, Pak Wanso, and Yi Ch'ongjun.

#### KRLIT 405 Readings in Korean Literature

Fall. 4 credits. Prerequisite: three years of Korean language study or permission of instructor. M. Shin.

Reading of a variety of prose works in modern Korean. Assignments are chosen from newspapers, magazines, short stories, novels, and academic texts.

# Nepali

#### Study Abroad in Nepal

Cornell and the central campus of the Nepalese national university-Tribhuvan-at Kirtipur, Kathmandu, co-sponsor an academic year in Nepal. North American students study and live with Nepalese students who come from outside the Kathmandu Valley to Tribhuvan University. Students may participate in one or two semesters. Courses are offered both at Tribhuvan University and at the Cornell-Nepal Study Program House adjacent to the university. All courses are officially taught in English. A five-week, in-country orientation program includes classes in intensive Nepali conversation, cultural orientation programs, and a ten-day field trip and trek. Semester course offerings include Nepali language (Tibetan and/or Newari languages also possible), contemporary issues in Nepalese studies, field research design and methods in sociology/anthropology and ecology/environment, and guided field research.

Juniors and seniors in good academic standing from any major field may participate. Students must have a desire to study on the other side of the world, to participate in a multicultural program, and to undertake rigorous field

research. No experience in Nepal is necessary and instruction is in English, but some prior Nepali language study is strongly recommended. Students interested in the study abroad in Nepal program should consult with the Cornell Abroad office (474 Uris Hall) for further information.

### NEPAL 101-102 Elementary Nepali

101, fall; 102, spring. 6 credits each term. NEPAL 102 provides language qualification. Prerequisite: for NEPAL 102, 101 or examination. S. Oja.

Intended for beginners. The emphasis is on basic grammar, speaking, and comprehension skills, using culturally appropriate materials and texts. Devanagari script for reading and writing is also introduced.

#### NEPAL 160 Intensive Nepali

Summer only, 6 credits. Intended for beginners. Offered alternate years. S. Oja. Emphasis is on the spoken language, in dialogues, exercises, and conversation practice. In addition, however, special attention is given to assisting students to develop vocabularies and abilities appropriate to their unique professional needs. Reading and writing practice use both colloquial and scholarly materials in the Nepali (Devanagari) script.

#### NEPAL 201-202 Intermediate Nepali Conversation @

201, fall; 202, spring. 3 credits each term. NEPAL 201 provides language proficiency. Prerequisites: for NEPAL 201, NEPAL 102 or examination; for NEPAL 202, NEPAL 201 or examination. S. Oja.

Intermediate instruction in spoken grammar and verbal comprehension skills, with special attention to developing technical vocabularies and other verbal skills appropriate to students' professional fields.

#### NEPAL 203-204 Intermediate Nepali Composition @

203, fall; 204, spring. 3 credits each term. NEPAL 203 provides language proficiency. Prerequisites: for NEPAL 203, NEPAL 102 or examination; for NEPAL 204, NEPAL 203 or examination. S. Oja.

A systematic review of written grammar and reading comprehension, with special attention to the technical vocabularies, necessary writing skills, and published materials typical of advanced students' professional fields.

#### NEPAL 300 Directed Studies

Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. S. Oja.

Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

#### NEPAL 301-302 Advanced Nepali

301, fall; 302, spring. 3 credits each term. Prerequisite: NEPAL 204 or permission of instructor. S. Oja.

Reading of advanced texts, together with advanced drill on the spoken language.

# Pali

#### [PALI 131-132 Elementary Pali

131, fall; 132, spring. 3 credits each term. This language series cannot be used to satisfy the language requirement. Not offered 2002-2003. Staff.

131 is an introduction to the language of the canonical texts of Theravada Buddhism.

Reading of authentic texts of Theravada Buddhism. Emphasis on both content and grammatical structure. Familiarity with Sanskrit is not required. 132 is a continuation of 131 with further readings.]

### PALI 300 Directed Studies

Fall or spring. 1–4 credits variable. Prerequisite: PALI 132 or two years of Sanskrit. D. Boucher.

Taught on a specialized basis to address particular student needs. Times arranged with instructor.

# Sanskrit

#### [SANSK 131-132 Elementary Sanskrit (also CLASS 131-132 and LING 131-132)

131, fall; 132, spring. 4 credits each term. SANSK 132 provides language qualification. Offered alternate years. Not offered 2002-2003. C. Minkowski.

An introduction to the essentials of Sanskrit grammar. Designed to enable the student to read classical and epic Sanskrit as quickly as possible.]

# SANSK 251-252 Intermediate Sanskrit (also CLASS 251-252 and LING 251-252) @#IV

251, fall; 252, spring. 3 credits each term. SANSK 251 provides language proficiency. Prerequisite: SANSK 132 or equivalent. Offered alternate years. C. Minkowski.

Readings from the literature of classical Sanskrit. Fall: selections from the two Sanskrit epics, the Mahabharata and the Ramayana. Spring: more selections from the epics and selections from either Sanskrit story literature or from Sanskrit dramas.

# Literature in Sanskrit

### [SNLIT 467-468 Reading in Sanskrit Literature: The Vedas @#

Spring. 3 credits. Prerequisite: permission of instructor. Not offered 2002-2003. C. Minkowski.

Readings in translation; readings in the original Vedic. Both courses must be taken as a sequence.]

## Sinhala (Sinhalese)

#### SINHA 101-102 Elementary Sinhala

101, fall; 102, spring. 6 credits each term. SINHA 102 provides language qualification. Prerequisite: for SINHA 102, SINHA 101 or equivalent. Staff.

A semi-intensive course for beginners. A thorough grounding is given in all the language skills; listening, speaking, reading, and writing.

#### SINHA 160 Intensive Sinhala

Summer only. 6 credits. Intended for beginners. Offered alternate years. Emphasis is on the spoken (colloquial) language, the writing system is introduced and used to present all Sinhala materials, with additional reading practice with colloquial materials. A foundation is laid for later study of the written language (literary Sinhala).

#### SINHA 201-202 Intermediate Sinhala Reading @

201, fall; 202, spring. 3 credits each term. SINHA 201 provides language proficiency. Prerequisites: for SINHA 201, SINHA 102: for SINHA 202, SINHA 201 or equivalent. Staff.

# **[SINHA 203-204 Intermediate**

Composition and Conversation @ 203, fall; 204, spring. 3 credits each term. SINHA 203 provides language proficiency. Prerequisites: for SINHA 203, SINHA 102 or permission of instructor; for SINHA 204, SINHA 203 or equivalent. Not offered 2002-2003. Staff.]

### **SINHA 300** Directed Studies

Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. Staff. Taught on a specialized basis to address particular student needs. Times arranged with instructor

#### Southeast Asian Languages

#### [LING 653-654 Seminar in Southeast **Asian Linguistics**

653, fall; 654, spring. 4 credits each term. Prerequisite: permission of instructor. Language 653 isn't a prerequisite for Language 654. Not offered 2002-2003. I Wolff

Languages of mainland Southeast Asia. Topics, chosen according to student interests, may include description, dialectology, typology, comparative reconstruction, and historical studies 1

# [LING 655-656 Seminar in Austronesian

Linguistics (also LING 655-656) 655, fall; 656, spring. 4 credits each term. Prerequisites: for 655, permission of instructor, for 656, Language 655. Not offered 2002-2003. J. Wolff. Descriptive and comparative studies of Malayo-Polynesian languages.]

# Tagalog

#### TAG 121-122 Elementary Tagalog

121, fall; 122, spring. 4 credits each term. Prerequisite: for TAG 122, TAG 121. T. Savella.

A thorough grounding is given in basic speaking and listening skills with an introduction to reading.

#### TAG 123 Continuing Tagalog

Fall. 4 credits. Provides language qualification. Prerequisite: TAG 122 or equivalent. Satisfactory completion of TAG 123 fulfills the qualification portion of the language requirement. T. Savella.

Improves speaking skills, such as fluency and pronunciation, focusing on verbal communication skills; offers a wide range of readings; and sharpens listening skills

#### TAG 205-206 Intermediate Tagalog @

205, fall; 206, spring. 3 credits each term. TAG 205 provides language proficiency. Prerequisites: for TAG 205, TAG 123 or equivalent; for TAG 206, TAG 205 or equivalent. T. Savella.

This course develops all four skills: reading, writing, speaking, and comprehension.

### TAG 300 Directed Studies

Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. T Savella

Taught on a specialized basis to address particular student needs. Times arranged with instructor.

Thai

#### THAI 101-102 Elementary Thai

101, fall; 102, spring. 6 credits each term. THAI 102 provides language qualification. Prerequisite: for THAI 102, THAI 101 or equivalent. Intended for beginners or students placed by examination. N. Jagacinski.

A thorough grounding is given in all the language skills: listening, speaking, reading, and writing.

#### THAI 201-202 Intermediate Thai Reading @

201, fall; 202, spring. 3 credits each term. THAI 201 provides language proficiency. Prerequisites: for THAI 201, THAI 102; for THAI 202, THAI 201 or equivalent. N. Jagacinski.

Continuing instruction in spoken and written Thai.

#### THAI 203-204 Intermediate Composition and Conversation @

203, fall; 204, spring. 3 credits each term. THAI 203 provides language proficiency. Prerequisites: for THAI 203, THAI 102; for THAI 204, THAI 203. N. Jagacinski.

Intermediate instruction in spoken and written grammar and reading comprehension.

#### THAI 301-302 Advanced Thai

301, fall; 302, spring. 4 credits each term. Prerequisite: THAI 202 or equivalent. N. Jagacinski.

Selected readings in Thai writings in various fields.

# THAI 300 Directed Studies

Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. N. Jagacinski.

Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

**THAI 303–304 Thai Literature @** 303, fall; 304, spring. 4 credits each term. Prerequisite: THAI 302 or equivalent. N. Jagacinski.

Reading of significant novels, short stories, and poetry written since 1850.

THAI 401-402 Directed Individual Study 401, fall; 402, spring. 4 credits each term. For advanced students or students with special problems or interests. Prerequisite: permission of instructor. N. Jagacinski.

See listings under HINDI/ASIAN 125.

#### Vietnamese

VIET 101-102 Elementary Vietnamese 101, fall; 102, spring. 6 credits each term. VIET 102 provides language qualification. Prerequisite: for VIET 102, VIET 101 or equivalent. Intended for beginners or

students placed by examination. Satisfactory completion of VIET 102 fulfills the qualification portion of the language requirement. T. Tranviet.

A thorough grounding is given in all language skills: listening, speaking, reading, and writing.

# VIET 201-202 Intermediate Vietnamese @

201, fall; 202, spring. 3 credits each term. VIET 201 provides language proficiency. Prerequisites: for VIET 201, VIET 102 or equivalent; for VIET 202, VIET 201. T. Tranviet.

Continuing instruction in spoken and written Vietnamese.

#### VIET 203-204 Intermediate Vietnamese Composition and Reading @

203, fall; 204, spring. 3 credits each term. VIET 203 provides language proficiency. Prerequisite: permission of instructor only. T. Tranviet.

Designed for students and "native" speakers of Vietnamese whose speaking and listening are at the advanced level, but who still need to improve writing and reading skills.

#### **VIET 300 Directed Studies**

Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. T. Tranviet.

Taught on a specialized basis to address particular student needs. Times arranged with instructor.

#### VIET 301–302 Advanced Vietnamese

301, fall or spring; 302, fall or spring. 3 credits each term. Prerequisites: for VIET 301, VIET 202 or permission of instructor; for VIET 302, VIET 301. T. Tranviet.

Continuing instruction in spoken and written Vietnamese; emphasis on enlarging vocabulary, increasing reading speed, and reading various genres and styles of prose.

#### VIET 401–402 Directed Individual Study

401, fall; 402, spring. 2-4 credits variable each term. Prerequisite: permission of instructor. Intended for advanced students. T. Tranviet.

Various topics according to need.

#### Vietnamese Literature

#### [VTLIT 222-223 Introduction to Classical Vietnamese @#

222, fall; 223, spring. 3 credits. VTLIT 222 provides language proficiency. Prerequisite: qualification in Vietnamese or permission of instructor. Not offered 2002-2003. K. Taylor.

This is a two-semester sequence of courses introducing students to Han (Classical Chinese as used in the Vietnamese language) and Nom (vernacular Vietnamese character writing). Students learn to read Han and Nom texts, mostly from the seventeenth through nineteenth centuries, including historical records, prose writings, and poetry.]

#### [VTLIT 224 Continuing Classical Vietnamese @#

Fall. 3 credits. Not offered 2002-2003. K. Tavlor.

This course continues study for students who have completed VTLIT 222-223 "Introduction to Classical Vietnamese."]

# **Related Courses in Other Departments** and Colleges

Check the primary department section for the offering status of the following courses. Courses in other colleges will count as College of Arts and Sciences credit only for Asian Studies majors.

#### Asia/General Courses

- ANTHRO 374 Human Palaeontology
- AEM 464 Economics of Agricultural Development (also ECON 464)
- AEM 667 Topics in Economic Development (also ECON 770)
- COMM 424/624 Communication in the Developing Nations

# ASIAN AMERICAN STUDIES PROGRAM

The Asian American Studies Program is a university-wide academic program housed administratively within the College of Arts and Sciences. Its aim is to promote teaching, research, and educational activities related to Asian Americans and to serve as a resource to the campus and regional communities. The program's undergraduate courses, offered within the program and cross-listed with departments in various colleges, meet distribution requirements and count toward a concentration in Asian American Studies. The program does not offer a graduate course of study, but students can undertake graduate work in Asian American Studies within selected disciplines of the university.

#### **Undergraduate Concentration**

The program's undergraduate concentration affords students an opportunity to develop a multidisciplinary approach to the study of Asians in the hemispheric Americas. The course of study stresses developments within the United States, but also underscores the transnational and comparative contexts of Asian America and the field's connections with African American, American Indian, Latino, and Women's Studies. Students must work with a faculty adviser from among the program's affiliated faculty and must complete at least 15 units of credits as follows: (a) AAS 110 and two additional courses in Asian American Studies; (b) one course in Africana, American Indian, Latino Studies, or Women's Studies\*; and (c) one course in East Asian. South Asian, or Southeast Asian Studies." (\*These courses must be approved by the student's faculty adviser, and they should address issues of race, gender, or the histories and cultures of Asian peoples.) Students must file an application for the concentration with the Asian American Studies Program.

#### **Resource Center**

The program's Asian American Studies Resource Center provides meeting space for the more than 40 undergraduate student organizations of the Cornell Asian Pacific

Student Union and the graduate student Asian Pacific American Graduate Association. It also holds a modest print collection of books, periodicals, and newspapers; a current news clip file; a comprehensive data base of publications on Asian Americans since 1977 and a sizable collection of videotapes as well as music CDs on the Asian American experience.

#### Research

The program encourages faculty and student research on Asian Americans by sponsoring guest lectures, conferences, film festivals, readings, and exhibits. It also funds research projects and student travel to conferences and research sites. The Asian American Studies Workshop is the program's principal research initiative, engaging Cornell's faculty and students with invited faculty from other universities in a year-long intensive study of selected themes.

#### **Core Faculty**

D. Chang, V. Munasinghe, S. Wong

#### **Advisory Board**

T. Chaloemtiarana (Southeast Asia Program), B. de Bary (Asian studies), S. Han (sociology), V. P. Kayastha (Kroch Library), J. V. Koschmann (history), V. Munasinghe (anthropology), V. Nee (sociology), N. Sakai (Asian studies), S. Samuels (English), A. M. Smith (government), K. W. Taylor (Asian studies), Wai-Kwong Wong (Gannett Health Center), S. Wong, director (English), D. Yeh (vice president student/academic services)

#### Courses

#### AAS 110 Introduction to Asian American Studies (III or IV)

Spring. 3 credits. This course can be used to satisfy either a social science or humanities distribution requirement. D. Chang.

An interdisciplinary, cross-cultural introduction to Asian American Studies focusing on contemporary issues. Major themes include: identity and stereotypes, gender, family community, education, migration and labor, and anti-Asianism. Coverage is given to both Hawaii and the U.S. mainland, and to Chinese, Filipinos, Hawaiians, Japanese, Koreans, South Asians and Southeast Asians.

#### AAS 213 Asian American History (III) Fall. 4 credits.

For description, see HIST 263.

AAS 262 Asian American Literature (IV) Spring. 4 credits. S. Wong.

For description, see ENGL 262.

# AAS 303 Asians in the Americas: A **Comparative Perspective (also** ANTHR 303) (III) Spring. 4 credits. V. Munasinghe.

The common perception of ethnicity is that this is a "natural" and an inevitable consequence of cultural difference. "Asians' overseas, in particular, have won repute as a people who cling tenaciously to their culture and refuse to assimilate into their host societies and cultures. But, who are the "Asians"? On what basis can we label Asians an ethnic group? Although there is a significant Asian presence in the Caribbean, the category "Asian" itself does not exist in the Caribbean. What does this say about the nature of categories that label and demarcate groups of people on the basis of alleged

cultural and phenotypical characteristics? This course examines the dynamics behind group identity, namely ethnicity, by comparing and contrasting the multicultural experience of Asian populations in the Caribbean and the United States. Ethnographic case studies focus on the East Indian and Chinese experiences in the Caribbean and the Chinese, Korean, Japanese, Filipino, and Indian experiences in the United States.

#### [AAS 412 Undergraduate Seminar In Asian American History (also HIST 412) (111)

Spring. 4 credits. Not offered 2002-2003. For description, see HIST 412. A reading and research seminar that covers various topics in Asian American history.]

#### [AAS 438 Immigration and Ethnic Identity (III)

Spring. 4 credits. Not offered 2002-2003. For description, see SOC 438.]

#### [AAS 478 Self and Nation in Asian-American Literature (also ENGL 478) (IV)

4 credits. Not offered 2002-2003. A study of the ways in which Asian American writers have constructed discourses of self and nation. Topics include nationalism, feminism, identity politics, and theories of minority discourse. In our reading of selected works of prose, poetry, and drama by Chinese American, Filipino American, Japanese American, and Korean American writers, we ask questions about the relation of these works to the moment of their production and reception, and the manner in which these textual representations engage with shifting cultural and political struggles. Writers under discussion may include: Carlos Bulosan, Theresa Hak Kyung Cha, Frank Chin, Jessica Hagedorn, and David Henry Hwang, Maxine Hong Kingston, Joy Kogawa, and David Mura.]

#### AAS 453 Twentieth-Century Women Writers of Color

Fall. 4 credits.

This course explores a range of writingnovels, stories, poems, essays-by American women writers of color in the twentieth century. We look at how these writings articulate concerns with language, home, mobility, and memory, and at how the work is informed by the specificities of gender, race, region, and class. Readings may include works by Joy Harjo, Leslie Marmon Silko, Sandra Cisneros, Theresa Hak Kyung Cha, Sigrid Nunez, Jamaica Kincaid, Maxine Hong Kingston, and Gwendolyn Brooks, Ann Petry, CaroLivia Herron, Shani Mooteo, Helena Maria Viramontes.

# AAS 495 Independent Study

Fall or spring. 1-4 credits. Topic and credit hours to be mutually arranged between faculty and student. Independent Study Forms must be approved by Asian American Studies Program Office.

# ASTRONOMY

J. F. Veverka, chair (312 Space Sciences Building, 255–3507); M. P. Haynes, director of undergraduate studies (530 Space Sciences Building 255-0610); J. F. Bell, J. A. Burns, D. B. Campbell, D. F. Chernoff, J. M. Cordes, S. S. Eikenberry, E. E. Flanagan, P. J. Gierasch, R. Giovanelli, P. F. Goldsmith, T. L. Herter,

J. R. Houck, D. Lai, R. V. E. Lovelace,

P. D. Nicholson, C. J. Salter, S. W. Squyres,

G. J. Stacey, Y. Terzian, S. A. Teukolsky,

I. M. Wasserman. Emeritus: T. Gold, T. Hagfors, M. O. Harwit, E. E. Salpeter

Cornell's astronomy faculty, research staff, graduate, and undergraduate students are active in diverse areas of modern astronomy ranging from theoretical astrophysics and general relativity to radio and radar astronomy, infrared and optical astronomy, and the exploration of the solar system. Cornell operates two local optical observatories, the world's largest radio telescope at Arecibo, Puerto Rico, and with two other institutions, the 200-inch optical telescope at Mt. Palomar in California. Several members of the department faculty are also Principal Investigators on major NASA space and planetary exploration missions.

The department offers a number of courses to satisfy a general interest in astronomy. These courses have few or no prerequisites and are not intended for the training of professional astronomers. Among the introductory courses, several choices are available, depending on background and on the requirements to be fulfilled. The 100-level courses are designed primarily for nonscience majors. The alternative introductory sequence Astronomy 211-212 is geared toward sophomore physical science and engineering majors and requires coregistration in beginning calculus. Astronomy 201 and 202 are intended for students with an interest in astronomy but no scientific background; they are topical rather than survey-oriented. Astronomy 332 is designed for physical science and engineering majors as an introduction to astrophysics. Other courses at the 200 and 300 levels may appeal to students of various backgrounds and interests, as indicated in the individual course descriptions.

Courses numbered above 400 are intended for students who have had two to three years of college physics and at least two years of college mathematics. Astronomy 440, Independent Study, permits students to engage in individual research projects under the guidance of a faculty member.

Interested students are encouraged to become members of the undergraduate Cornell Astronomy Club. The club has access to the Fuertes Observatory on campus and conducts regular observing and astrophotography sessions. All students are invited to visit the Space Sciences Building, see the exhibits on display there, and consult faculty members about career plans or choice of courses.

#### The Major

The purpose of the major in astronomy is to provide in-depth knowledge and education about the nature of the universe. Astronomy relies heavily on preparation in physics and mathematics. Consequently, many courses in these fields are included as prerequisites. In preparation for the major, students normally elect the introductory physics sequence PHYS 112-213-214 or 116-217-218 and the complementary pathway in mathematics, MATH 111-122-221-222 or 191-192-293-294 (or equivalent). Students who anticipate undertaking graduate study are urged to elect the honors physics sequence PHYS 116–217– 218–318–327 if possible. The sophomore seminar, ASTRO 233 "Topics in Astronomy and Astrophysics," provides an introduction to current research in astronomy and astrophysics for prospective majors, but is not required of students who elect to major in astronomy after the sophomore year. Students are also urged to acquire computer literacy. ASTRO 234 is designed to give students hands-on experience with the methods of analysis, visualization, and simulation needed in astrophysical research. Acceptance to the major is first considered after completion of three semesters of introductory physics and mathematics and in general requires a GPA of 3.2 in physics and mathematics courses.

The major requirements stress the importance of building a strong preparation in physical science. The following upper level courses are normally required:

PHYS 314 or 318, 316, 323 or 327, 341 and 443

A&EP 321-322 (or equivalent, e.g. MATH 420 and 422)

ASTRO 410, 431, and 432.

Upon consent of the major adviser, students interested in planetary studies may substitute appropriate advanced courses or may pursue an independent major under the program in the Science of Earth Systems. Majors are encouraged to supplement the above courses with any astronomy, physics, or other appropriate courses at or above the 300 level. Advanced seniors can enroll in astronomy graduate courses with the consent of the instructor. Students are also encouraged to work with faculty members on independent study projects under the course ASTRO 440 or to apply to a variety of programs at Cornell, Arecibo, and elsewhere that offer undergraduates summer employment as research assistants. Nearly all undergraduate majors and concentrators become involved in research projects in the junior and senior years.

Students whose interest in astronomy is sparked somewhat late in their undergraduate career are encouraged to discuss possible paths with the Director of Undergraduate Studies in Astronomy.

**Honors.** A student may be granted honors in astronomy upon the recommendation of the Astronomy Advisers Committee of the astronomy faculty.

**Double majors.** A double major in astronomy and another subject is possible in many circumstances. However, the set of courses used to fulfill the requirements for each major must be completely independent.

**Concentration.** The concentration in astronomy for other majors normally requires 12 credits, at least eight of which must be at the 300 level or above. ASTRO 233 and 234 are recommended for sophomores planning to concentrate in astronomy.

#### **Distribution Requirement**

All courses in astronomy, except ASTRO 233 and 234, may be used to fulfill the science distribution requirement in the College of Arts and Sciences.

#### Courses

#### ASTRO 101 The Nature of the Universe (I)

Fall. 4 credits. No prerequisites. Labs limited to 18 students each and discussions limited to 30 students each. T. Herter, labs: G. Stacey. This course introduces students to the cosmos. The birth, evolution, and death of stars, the formation of the chemical elements, and the nature of white dwarfs, neutron stars, and black holes are discussed. An introduction to the theories of special relativity and general relativity is given. The course covers the search for other worlds outside the solar system and the possible existence of life and intelligence elsewhere in the universe. Modern theories of cosmology are presented, and the origin, structure, and fate of the universe are discussed. Most of the course notes as well as sample exams and simulations are made available on the web.

# ASTRO 102 Our Solar System (i)

Spring, 4 credits. Labs limited to 18 students each; discussions limited to 30 students each. J. Bell/S. Squyres; labs: G. Stacey.

The past few decades have seen incredible advances in the exploration of our solar system. In this course students learn about the current state and past evolution of the Sun and its family of planets, moons, asteroids, and comets. The course emphasizes images and other data obtained from current and past NASA space missions and how these data provide insights about the important processes that have shaped the evolution of solar system objects. General astronomical concepts relevant to the study of the solar system are also discussed. Critical focus is on developing an understanding of the Earth as a planetary body and discovering how studies of other planets and satellites influence models of the climatic, geologic, and biologic history of our home world. Other topics covered include impact hazards, the search for life in the solar system, and future missions.

#### ASTRO 103 The Nature of the Universe (I)

Fall. 3 credits. T. Herter.

Identical to ASTRO 101 except for omission of the laboratory (see description above).

#### ASTRO 104 Our Solar System (i)

Spring. 3 credits. J. Bell/S. Squyres. Identical to ASTRO 102 except for omission of the laboratory.

#### ASTRO 105 An Introduction to the Universe (I)

Summer. 3 credits. J. Harrington. How do we measure the size of our galaxy and the size of the universe? Is the universe round or flat? How are the stars born, why do they shine, and how do they die? What are the chemical elements, and how were they formed in stars? What are quasars, pulsars, and black holes? How was the solar system formed? What are the environments of other planets like? What is the basic structure of Earth and the other planets? Will we catastrophically alter the earth? Does life exist elsewhere in the universe? How can we find out? Each student has an opportunity to make observations with small telescopes.

#### ASTRO 106 Essential Ideas in Relativity and Cosmology (I) Summer. 3 credits. Prerequisites: high

Summer. 3 credits. Prerequisites: high school algebra and trigonometry. R. A. Saenz.

An explanation of Einstein's theories of special and general relativity, which brought about a fundamental change in our conceptual understanding of space and time. Correspondence to, and conflicts with, common sense. Applications to various areas in special

relativity space travel, the equivalence of mass and energy, nuclear fission and fusion, and thermonuclear processes in the sun and in general relativity (motion of light and particles in curved space-time, cosmological models, and the question of whether the universe is open or closed).

#### ASTRO 107 An Introduction to the Universe (I)

Summer. 4 credits. J. Harrington. Identical to ASTRO 105 except for the addition of the afternoon laboratory that emphasizes mathematical problem-solving. This option is recommended for potential majors in science and engineering.

# ASTRO 195 Observational

Astronomy (I) Fall. 3 credits. Limited to 24 students. G. Stacey.

This course provides a "hands-on" introduction to observational astronomy intended for liberal arts students at the freshman and sophomore level. High school mathematics is assumed, but otherwise there are no formal prerequisites. The course objective is to teach how we know what we know about the universe. The course is set up with two lectures and one evening laboratory per week. Not all of the evening sessions will be used. Planned exercises include five or six observational labs (star gazing with binoculars and small telescopes, telescopic observations and CCD imaging of star clusters, nebulae, and the planets, solar observations, radio observations of the Milky Way Galaxy), plus a selection of exercises from the following: experiments in navigating by the stars; construction and use of simple instruments such as optical spectroscopes and sun dials; laboratory spectroscopy; experiments in planetary cratering; collection and study of micrometeorites; computer simulations of the orbits of planets and their satellites; and cosmological explorations using data from the Hubble Space Telescope available on the web.

#### ASTRO 201 Our Home in the Universe (I)

Fall. 3 credits. Assumes no scientific background. Course intended for freshmen and sophomores. R. Giovanelli, M. Haynes. A general discussion of our relation to the physical universe and how our view of the universe has changed from ancient to modern times. Several main themes are covered over the course of the semester: the evolution of our view of the sky from that of ancient cultures to that of space telescopes; the death of stars and the formation of black holes; dark matter and the structure of galaxies; and the origin, evolution, and fate of the universe. We present a nonmathematical introduction to these subjects and discuss uncertainties and unresolved issues in our understanding.

#### ASTRO 202 Our Home in the Solar System (I)

Spring. 3 credits. Prerequisite: some background in science is required. Course intended for freshmen and sophomores. J. Veverka.

This writing course is designed to develop an understanding of our home planet as a member of a diverse family of objects in our solar system. Discussion centers on how studies of other planets and satellites have broadened our knowledge and perspective of Earth, and vice versa. We study, debate, and learn to write critically about important issues

in science and public policy that benefit from this perspective. Topics discussed include global warming, the impact threat, the searches for extrasolar planets and extraterrestrial intelligence and the exploration of Mars.

#### ASTRO 211 Astronomy: Stars, Galaxies, and Cosmology (1)

Fall. 4 credits. Intended for engineering and physical sciences freshmen and sophomores. Prerequisite: introductory calculus or coregistration in MATH 111 or 191 or consent of instructor. J. Houck.

The topics to be discussed include the following: the formation and evolution of normal and extreme stars, the structure and evolution of galaxies, and cosmology.

# ASTRO 212 The Solar System: Planets, **Satellites, and Rings (I)** Spring. 4 credits. Intended for first and

second year engineering and physical sciences students. Prerequisite: introductory calculus or coregistration in MATH 111 or 191; some knowledge of classical physics (mechanics and thermodynamics). D. Campbell.

An introduction to the solar system, with emphasis on the application of simple physical principles. Topics include: the Sun, nucleosynthesis of the elements, radioactive dating, seismology and planetary interiors, planetary surfaces and atmospheres including greenhouse models, orbital mechanics and resonances, interrelations between meteorites, asteroids and comets, the Jovian planets, icy moons and ring systems, and the search for extra-solar planets.

#### ASTRO 233 Topics in Astronomy and Astrophysics

Fall. 2 credits. Prerequisites: co-registration in PHYS 213 and MATH 112, 122 or 192 OR permission of instructor. Enrollment is limited to 15 students. Intended for sophomores planning to major in astronomy or related fields. M. Haynes, D. Campbell.

Topics may change yearly. The fall 2002 course will be offered as a Knight sophomore seminar and will explore the theme: "From Planets to Galaxies: The Origin of Cosmic Structures". Emphasis is placed on understanding both the context and the methodology of such issues as the search for extrasolar planets, interstellar chemistry and the influence of environment on galaxy evolution. While not restricted to sophomores, this course is intended to offer students, especially sophomores, an opportunity to work closely with faculty in a seminar environment within a strong interdisciplinary context.

#### ASTRO 234 Modern Astrophysical Techniques

Spring. 2 credits. Prerequisites: 2 semesters of introductory physics and 2 semesters of calculus plus ASTRO 233 or permission of instructor. Some experience with computer programming expected. Intended for sophomores majoring or concentrating in

astronomy or related fields. S. Eikenberry. The course reviews the basic techniques employed in astrophysical research, both observational and theoretical, to explore the universe. Basic methods and strategies of data acquisition and image and signal processing are discussed. Students gain hands-on experience with visualization techniques and methods of error analysis, data fitting, and numerical simulation. Exercises address the processes by which astrophysicists piece

together observations made with today's foremost astronomical instruments to solve questions concerning the origin of planets, stars, galaxies, and the universe itself.

# ASTRO 280 Space Exploration (I)

Fall. 3 credits. S. Squyres. This course provides an overview of space science, with particular emphasis on the solar system, and a detailed examination of a few selected objects, including the planet Mars, the satellites in the outer solar system, and comets. The focus is on methods of collecting information and especially on spacecraft and space missions. Topics include the design and limitations of instruments. Ethical and political questions associated with space exploration are discussed. Intended for students with an interest in science, technology, and associated policy issues. No special background in physical sciences, math, or engineering is assumed.

#### [ASTRO 290 Relativity and **Astrophysics (I)**

Spring. 4 credits. Prerequisites: knowledge of freshman physics, calculus, and geometry. Not offered 2002-2003. I. Wasserman.

This course provides a geometrically based introduction to special and general relativity, followed by consideration of astrophysical applications. Includes discussion of tests of Einstein's theory of space, time, and gravitation: the physics of white dwarfs, neutron stars, and black holes; an introduction to modern cosmology.]

#### ASTRO 299 Search for Life in the Universe (I)

Spring, 4 credits. Prerequisites: 2 courses in any physical science subject or permission of instructors. J. Cordes, Y. Terzian.

The contents of the universe is surveyed. Theories of cosmic and stellar evolution, and of the formation and evolution of planetary systems, planetary atmospheres, and surfaces are reviewed. Questions regarding the evolution of life and the development of technology are discussed. Methods to detect extraterrestrial life with emphasis on radio telescopes and associated instrumentation are presented. Hypothetical communication systems are developed and discussed.

#### ASTRO 310 Planetary Imaging Processing (I)

Fall. 3 credits. Prerequisites: two semesters of introductory physics and some experience with computer programming expected. Intended for sophomores or juniors majoring or concentrating in astronomy or related fields. J. Bell.

This course reviews the basic techniques employed in the collection and processing of spacecraft images of planets, moons, rings, asteroids, and comets, from both the observational and theoretical perspectives. Students gain hands-on experience with digital image manipulation, including visualization, calibration, statistics, and error analysis. Specific examples involve the processing and analysis of imaging data from missions like Voyager, Clementine, Galileo, NEAR, Mars Pathfinder, Mars Global Surveyor, and the Hubble Space Telescope. Exercises encompass the range of techniques used by planetary scientists to acquire and process spacecraft data that are then used to address questions on the geology, composition, and evolution of solar system bodies.

# ASTRO 331 Climate Dynamics (also EAS 331) (I)

Fall. 4 credits. Prerequisite: MATH 112 or 192 or equivalent *or* instructor's approval. K. Cook, P. Gierasch.

Processes that determine climate and contribute to its change are discussed, including atmospheric radiation, ocean circulation, and atmospheric dynamics. Contemporary climate change issues are investigated and discussed in the context of natural variability of the system.

# ASTRO 332 Elements of

Astrophysics (I) Spring. 4 credits. Prerequisites: MATH 112, 122, 192, or equivalent. PHYS 213 or 217. TBA

An introduction to astronomy, with emphasis on the application of physics to the study of the universe. Covers: physical laws of radiation; distance, size, mass, and age of stars, galaxies, and the universe; stellar evolution and nucleosynthesis; supernovae, pulsars, and black holes; galaxies and quasars. Introduction to cosmology. Mainly intended for students of science, engineering, and science education interested in astronomy and astrophysics.

#### ASTRO 342 Atmospheric Dynamics (also EAS 342) (I)

Spring. 3 credits. Prerequisites: one year each of calculus and physics. K. H. Cook, P. J. Gierasch.

An introduction to the basic equations and techniques used to understand motion in the atmosphere, with an emphasis on the space and time scales typical of storm systems (the synoptic scale). The governing equations of atmospheric flow are derived from first principles and applied to middle latitude and tropical meteorology. Topics include balanced flow, atmospheric waves, circulation, and vorticity.

#### ASTRO 410 Experimental Astronomy (I)

Fall. 4 credits. Prerequisites: PHYS 214/8

(or 310 or 360), PHYS 323/7 (or

coregistration) or permission of instructor. J. Houck, S. Eikenberry, J. Cordes.

Observational astrophysics. Major experiments involve techniques in CCD (charge-coupleddevice) imaging, optical photometry, optical spectroscopy, radiometry, radio spectroscopy and radio astronomy. The experiments involve use of the Hartung-Boothroyd Observatory's 24-inch telescope, a laboratory two-element radio interferometer, and a radio telescope mounted on top of the Space Sciences Building. The laboratory covers the fundamentals of using astronomical instrumentation and data analysis as applied to celestial phenomena: asteroids, normal stars, supernova remnants, globular clusters, planetary nebulae, the interstellar medium, OH masers, and galaxies.

#### ASTRO 431 Introduction to Astrophysics and Space Sciences (I)

Fall. 4 credits. Prerequisites: mathematics above the 200 level and physics above the 300 level; PHYS 443 is recommended. I. Wasserman.

A systematic development of modern astrophysical concepts for physical science majors. Stellar structure and evolution, stellar atmospheres, compact objects (white dwarf, neutron star, and black holes), planets, and brown dwarfs. Current research problems in these areas are introduced along the way. The emphasis is on using fundamental physics principles to explain astronomical phenomena. A variety of physics, including elements of general relativity, nuclear physics, solid state physics and fluid mechanics, are introduced or reviewed in a quick, practical fashion and put into use in solving astrophysics puzzles.

#### ASTRO 432 Introduction to Astrophysics and Space Sciences II (I)

Spring. 4 credits. Prerequisite: ASTRO 431

or permission of instructor. D. Chernoff. This course is divided into two broad topics; the astrophysics of the interstellar medium and cosmology. The interstellar medium section covers thermal equilibrium and radiative transport in HII regions, atomic gas regions, and molecular clouds. The cosmology section includes expansion of the universe, metrics, Friedmann equations, dark matter, cosmological tests, the early universe, and the cosmological production of the elements.

#### [ASTRO 434 The Evolution of Planets (I) Spring. 4 credits. Not offered 2002–2003.

Staff 1

#### ASTRO 440 Independent Study in Astronomy

Fall or spring. 2–4 credits. Prerequisite: permission of instructor. Recommended: familiarity with the topics covered in ASTRO 332, 431, or 434.

Individuals work on selected topics. A program of study is devised by the student and instructor. Students need to fill out an independent study form, have it signed by the instructor, and register in the department office, 610 Space Sciences Building.

#### ASTRO 490 Senior Seminar Critical Thinking (I)

Fall. 3 credits. No prerequisites. Y. Terzian. Critical thinking in scientific and nonscientific contexts. Topics include elements of classical logic, including standards of evidence and paradoxes. Case studies include examples of competing hypotheses in the history of science, as well as examples from borderline sciences. Stress will be put on creative generation of alternative hypotheses and their winnowing by critical scrutiny. Topics include the nature and history of the universe, the nature of time, the nature of reality, the possibilities of life on other planets, and artificial intelligence. The course includes debates by the students.

#### ASTRO 509 General Relativity (also PHYS 553)

Fall. 4 credits. Prerequisite: knowledge of special relativity and methods of dynamics at the level of *Classical Mechanics* by Goldstein. J. York.

A systematic introduction to Einstein's theory using both modern and classical methods of computation. Topics include review of special relativity, differential geometry, foundations of general relativity (GR), laws of physics in the presence of gravitational fields, GR as a dynamical theory, experimental tests of GR. At the level of *Gravitation* by Misner, Horne, and Wheeler.

#### ASTRO 510 Applications to General Relativity (also PHYS 554)

Spring. 4 credits. Prerequisite: ASTRO 509. J. York.

A continuation of ASTRO 509 that emphasizes applications to astrophysics and cosmology. Topics include: relativistic stars, gravitational collapse and black holes, gravitational waves and cosmology, use of dynamics to formulate astrophysical and cosmological computations.

#### ASTRO 511 Physics of Black Holes, White Dwarfs, and Neutron Stars (also PHYS 525)

Spring. 4 credits. The minimum prerequisites for this course are all of the physics at the upper division undergraduate level. Compact objects (neutron stars, black holes and white dwarfs) are the endpoints of stellar evolution. They are responsible for some of the most exotic phenomena in the universe including: supernova explosion, radio pulsars, bright X-ray binaries, magnetars, gamma-ray bursts, and so on. Supermassive black holes also lie at the heart of the violent processes in active galactic nuclei and guasars. The study of compact objects allows one to probe physics under extreme conditions (high densities, strong magnetic fields, and gravity). This course surveys the astrophysics of compact stars and related subjects. Emphasis is on the application of diverse theoretical physics tools to various observations of compact stars. There are no astronomy or general relativity prerequisites. At the level of Physics of Black Holes, White Dwarfs, and Neutron Stars by Shapiro and Teukolsky.

#### [ASTRO 516 Galactic Structure and Stellar Dynamics

Fall. 4 credits. Not offered 2002–2003. D. Chernoff.

This course is an introduction to the study of the structure of galaxies via the laws of modern physics. Topics include the observed kinematics and spatial distribution of stars in the vicinity of the Sun, shapes and properties of stellar orbits, the gravitational N-body problem, collisional relaxation in stellar systems, spiral structure, galaxy classification and evolution, and cosmological results in galaxy formation.]

#### [ASTRO 520 Radio Astronomy

Fall. 4 credits. Not offered 2002–2003. D. Campbell, P. Goldsmith.

Covers radio astronomy telescopes and electronics; antenna theory; observing procedures and data analysis; concepts of interferometry and aperture synthesis.]

#### ASTRO 523 Signal Modeling, Statistical Inference, and Data Mining in Astronomy

Spring. 4 credits. J. Cordes. The course aims to provide tools for modeling and detection of various kinds of signals encountered in the physical sciences and engineering. Data mining and statistical inference from large and diverse databases are also covered. Experimental design is to be discussed. Basic topics covered include: probability theory; Fourier analysis of continuous and discrete signals; digital filtering; matched filtering and pattern recognition; spectral analysis; Karhunen-Loeve analysis; wavelets; parameter estimation; optimization techniques; Bayesian statistical inference; deterministic, chaotic, and stochastic processes; image formation and analysis; maximum entropy techniques. Specific applications are chosen from current areas of interest in astronomy, where largescale surveys throughout the electromagnetic spectrum and using non-electromagnetic signals (e.g., neutrinos and gravitational waves) are ongoing and anticipated. Applications are also chosen from topics in geophysics, plasma physics, electronics, artificial intelligence, expert systems, and genetic

programming. The course is self-contained and is intended for students with thorough backgrounds in the physical sciences or engineering.

#### [ASTRO 525 Techniques of Optical/ **Infrared and Submillimeter** Astronomy

Spring, 4 credits. Not offered 2002-2003. T. Herter, G. Stacey. Optical/infrared and submillimeter telescopes

and instrumentation are discussed and related to current research in these fields. The course includes telescope design and general optical design (ray tracing). CCD, photoconductor, photovoltaic, bolometer, impurity band conduction, and heterodyne detection systems are presented. The instrumentation discussion includes general instrument design and specific applications to cameras, spectrographs, and interferometers. Detection limits of various systems, cryogenic techniques, and astronomical data anlaysis techniques are also discussed. Special topics include speckle interferometry and adaptive optics.]

#### **(ASTRO 530 Astrophysical Processes**

Spring. 4 credits. Not offered 2002-2003. D Lai

Thermal and nonthermal radiation processes encountered in studies of stars, the interstellar and intergalactic media, galaxies, and quasars. Fundamentals of radiative transfer, bremsstrahlung, synchrotron radiation, and Compton scattering are covered, as well as spectral line transfer, gas heating and cooling, and topics in atomic and molecular spectroscopy. These topics are discussed within the framework of astrophysical situations, such as star formation, interstellar gas and dust clouds, jets, active galactic nuclei, clusters of galaxies and cosmology.]

#### ASTRO 555 Theory of the Interstellar Medium

Fall. 4 credits. D. Chernoff, P. Goldsmith, J. Cordes, Y. Terzian.

Covers global theories of the interstellar medium-mass and energy exchange between the different phases; the role of shock waves and energic outflows in the thermal equilibrium and ionization state of gas in the galaxy; basic astrophysical fluids and plasmas; galactic dynamics; and observation techiques, current problems and results.

#### ASTRO 560 Theory of Stellar Structure and Evolution (also PHYS 667)

Fall. 4 credits. D. Lai.

This course is intended to provide a systematic development of stellar astrophysics, both theory and observations. Topics include: hydrostatic equilibrium; equation of state; radiation transfer and atmospheres; convection and stellar turbulence; nuclear burning and nucleosythesis; solar neutrinos; star formation; pre-main sequence stars; brown dwarfs; end states of stellar evolution (white dwarfs, neutron stars and black holes); supernovae; interacting binary stars; stellar rotation and magnetic fields; stellar pulsations; winds and outflows. The prerequisites for the course are all undergraduate level physics. Though helpful, no astronomy background is required.

#### [ASTRO 570 Physics of the Planets

Fall. 4 credits. Not offered 2002-2003. P. Nicholson.

An introductory survey of planetary science with an emphasis on the application of physical principles. Planetary dynamics, including satellite orbits, tidal interactions,

resonances, and ring dynamics. An introduction to the theory of planetary interiors, gravitational fields, heat sources, and rotational mechanics. Physics of planetary atmospheres, including radiative transfer, convection, and thermal structure. Important observational results, including those of ground-based optical, infrared, radio, and radar astronomy, as well as those made by spacecraft, are discussed. Intended for graduate students and seniors in astronomy, physics, and engineering.]

#### [ASTRO 571 Mechanics of the Solar System (also T&AM 673)

Spring. 3 credits. Not offered 2002-2003. I. Burns.]

#### [ASTRO 579 Celestial Mechanics

Fall. 3 credits. Not offered 2002-2003. For description, See T&AM 672.]

#### ASTRO 590 Galaxies and the Universe

Spring. 4 credits. R. Giovanelli, T. Herter. The universe, its constituents, its large-scale structure, and its history in the light of the major thrusts of extragalactic research. The morphology, photometry, dynamics, and kinematics of galaxies and their subsystems. Determination of masses, mass-to-light ratios, and the "missing mass." Activity in Seyferts, radio galaxies, and quasars. Binaries, groups, clusters, and superclusters. The extragalactic distance scale. Galaxy formation and evolution. Confrontation of cosmological theories with observational results.

#### [ASTRO 599 Cosmology (also PHYS 599)

Fall. 4 credits. Prerequisites: statistical physics, quantum mechanics and electromagnetic theory. Not offered 2002-2003. I. Wasserman.

This course is intended to provide a detailed theoretical development of current ideas in cosmology. Topics include observational overview; growth of irregularities, galaxy formation, and clustering; big bang cosmology, recombination, nucleosynthesis; very early universe, symmetry breaking, inflationary scenarios. At the level of Peebles, Principles of Physical Cosmology.]

#### [ASTRO 620 Seminar: Advanced Radio Astronomy

Fall. 2 credits. Prerequisites: some background in astronomical spectroscopy suggested. Open to advanced undergraduates by permission of instructor. Not offered 2002-2003.]

#### [ASTRO 621 Seminar: Planetary Radar Astronomy

Spring. 3 credits. Prerequisites: intended for graduate students and upper-level undergraduates in astronomy, engineering, and geology. A good background in undergraduate mathematics and physics is required. Not offered 2002-2003 D. Campbell.

The application of radar to the study of the surfaces of planets, planetary satellites, asteroids, and comets. Topics covered target detectability and the specification of the needed antennas, transmitters, and receiving systems; data processing techniques; imaging techniques including delay-Doppler imaging, synthetic aperture radar (SAR) and interferometric SAR; target characterization from cross section, scattering laws and polarization measurements; results from earth-based and spacecraft radar observations of Mercury, Earth, the Moon, Mars, the satellites of Jupiter, the rings of Saturn, asteroids, and comets.]

#### ASTRO 640 Advanced Study and Research

Fall or spring. Credit TBA. Guided reading and seminars on topics not currently covered in regular courses. Students need to register in the department office, 610 Space Sciences Building.

#### ASTRO 651 Atmospheric Physics (also EAS 651)

Fall. 3 credits. K. Cook, S. Colucci, P. Gierasch. For description, see SCAS 651.

# ASTRO 652 Advanced Atmospheric

Dynamics (also SCAS 652) Spring. 3 credits. S. Colucci, K. Cook, P. Gierasch.

For description, see SCAS 652.

#### [ASTRO 660 Cosmic Electrodynamics (also A&EP 608)

Spring. 2 credits. Not offered 2002-2003.)

#### ASTRO 671 Seminar: Comets

Fall. 3 credits. J. Veverka. Current knowledge of the chemistry and physical state of comets will be reviewed, as well as the role of comets in the evolution of earthlike planets. Emphasis is placed on the science return expected from upcoming missions to comets, including Stardust, CONTOUR, Deep Impact, and Rosetta.

#### [ASTRO 673 Seminar: Planetary Atmospheres

Spring. 2 credits. Not offered 2002-2003. P. Gierasch.

This course deals with motions in planetary atmospheres. Among the topics discussed are the Venus general circulation, dust and water transports on Mars, alternating jets on the outer planets, and compositional layering in the outer planets.]

# [ASTRO 690 Seminar: Computational

**Astrophysics (also PHYS 680)** Spring. 3 credits. Prerequisites: working knowledge of FORTRAN. Not offered 2002-2003. Staff.]

#### **IASTRO 699 Seminar: Problems in Theoretical Astrophysics (also PHYS** 665)

Fall. 2 credits. Not offered 2002-2003. Staff.]

#### [ASTRO 699 Seminar: Observational **High Energy Physics**

Spring. 2 credits. ASTRO 511 (PHYS 525) is strongly recommended as a co- or prerequisite. Not offered 2002-2003. Staff.]

# **BIOLOGICAL SCIENCES**

Biology is a popular subject at many universities for a variety of reasons: it is a science that is in an exciting phase of development; it prepares students for careers in challenging and appealing fields such as human and veterinary medicine, environmental sciences, and biotechnology; and it deals with the inherently interesting questions that arise when we try to understand ourselves and the living world around us. Many of the decisions we face today deal with the opportunities and problems that biology has put before us.

The major in biological sciences at Cornell is available to students enrolled in either the College of Agriculture and Life Sciences or the College of Arts and Sciences. Student services

provided by the Office of Undergraduate Biology, 216 Stimson Hall, are available to students from either college.

The biology major is designed to enable students to acquire the foundations in physical and life sciences necessary to understand modern biology and to pursue advanced studies in a specific area of biology. Programs of study include animal physiology; biochemistry; computational biology; ecology and evolutionary biology; general biology; genetics and development; insect biology; microbiology; molecular and cell biology; neurobiology and behavior; nutrition; plant biology; and systematics and biotic diversity. Students interested in the marine sciences may consult the Cornell Marine Programs Office (G14 Stimson Hall, 255-3717) for academic advice and career counseling. For more details about the biology curriculum, see the section in this catalog on Biological Sciences.

# **BIOLOGY AND SOCIETY MAJOR**

J. V. Reppy, director of undergraduate studies, colleges of Arts and Sciences and Agriculture and Life Sciences and Human Ecology; N. Breen, advising coordinator, College of Human Ecology; D. Gurak, advising coordinator, College of Agriculture and Life Sciences; E. Adkins-Regan, D. Bates, B. Bedford, R. Boyd, T. Brenna, R. Calvo, R. Canfield, S. Ceci, B. Chabot, C. C. Chu, P. Dear, M. Dennis, R. Depue, C. Eberhard, G. W. Feigenson, J. Fortune, C. Geisler, C. Greene, H. Greene, J. Haas, A. Hedge, S. Hilgartner, H. C. Howland, K. A. R. Kennedy, R. Kline, B. Knuth, A. Lemley, D. Levitsky, B. Lewenstein, B. A. Lewis, M. Lynch, H. Mialet, A. Netravali, N. Noy, S. K. Obendorf, L. Palmer, P. Parra, A. Parrot, M. Pfeffer, T. Pinch, A. G. Power, W. Provine, S. Robertson, E. Rodriguez, M. Rossiter, J. Shanahan, M. Small, Utermohlen, E. Wethington. Emeritus: U. Bronfenbrenner, J. Fessenden MacDonald, J. Mueller, D. Pimentel, J. M. Stycos

The Biology & Society major is suited for students who wish to combine training in biology with perspectives from the social sciences and humanities on the social, political, and ethical aspects of modern biology. In addition to providing a foundation in biology, Biology & Society students obtain background in the social dimensions of modern biology and in the biological dimensions of contemporary social issues.

The Biology & Society major, which involves faculty from throughout the university, is offered by the Department of Science & Technology Studies. Students in the College of Arts and Sciences, the College of Human Ecology, and the College of Agriculture and Life Sciences are eligible for the major. The major is coordinated for students in all colleges through the Biology & Society Office. Students can get information, specific course requirements, and application procedures for the major from the Biology & Society office in 275 Clark Hall, 255–6047.

Because the major is multidisciplinary, students must attain a basic understanding of the several disciplines it comprises. The curriculum includes courses in ethics; statistics; history, philosophy, and social studies of science and biology; and basic biology (e.g., genetics and development;

biochemistry and molecular-cell biology; ecology; evolutionary biology), as well as integrative courses offered through Biology & Society. Majors are required to take a core course and must develop a theme, an intellectually coherent grouping of courses representative of their special, interest in biology and society. Recommended themes in the Biology & Society major include biology, behavior, and society; biology and human population; biology and public policy; environment and society; and health and society. Students may also develop their own individually tailored themes (which in recent vears have included topics such as biotechnology and society and agriculture, environment, and society). In consultation with their faculty adviser, students select courses that meet the foundation and core course requirements so as to build a coherent theme. Sample curricula for the recommended themes and for several student-developed themes are available in the Biology & Society office.

There are student advisers and faculty available (according to posted office hours or by appointment) in the Biology & Society offices, 275 Clark Hall or 278 Clark Hall, to answer questions and to provide assistance.

# Admission to the Major

All students should have completed a year of college-level biology before submitting an application during their sophomore year. Juniors are considered on a case-by-case basis. Upper-division applicants should realize the difficulties of completing the major requirements in fewer than two years. Freshmen admitted to the Colleges of Agriculture and Life Sciences and Human Ecology as Biology & Society majors are considered to have been admitted to the major on a provisional basis, contingent on successful completion of the course sequence in introductory biology and submission of the application to the university major. The application includes (1) a one-page statement explaining the student's intellectual interests in the Biology & Society major and why the major is consistent with the student's academic goals and interests; (2) the theme the student wishes to pursue in the major; (3) a tentative plan of courses fulfilling Biology & Society requirements, including courses already taken and those the student plans to take; and (4) a transcript of work completed at Cornell University (and elsewhere, if applicable) current as of the date of application.

Acceptance into the major requires completion of the course sequence in introductory biology. Sophomores in the process of completing this prerequisite may be admitted to the major on a provisional basis. It is the student's responsibility to assure that final acceptance is granted upon satisfactory completion of the introductory biology sequence. Although only introductory biological science is a prerequisite for acceptance, students will find it useful to have completed some of the other requirements (listed below) by the end of their sophomore year, preferably by the end of the first semester. Students who are considering the major may also find it beneficial to take S&TS 201, "What is Science?" in their freshman or sophomore year. Human Ecology students should also consult the current Human Ecology Guide and meet with the college advising coordinator, Nancy Breen, 205 Martha Van Rensselaer Hall, 255-1928.

#### **Major Requirements**

No single course may satisfy more than one major requirement. All courses must be taken for a letter grade.

#### 1) Basic courses

- A. BIO G 101–104 or 105–106 or 107–108 (prerequisite for admission to Biology and Society).
- B. College calculus (one course):\* MATH 106, 111, 112 or any higher level calculus.

Recommended but not required: General chemistry (one year sequence) (prerequisite to biochemistry and other chemistry courses): CHEM 103– 104, 206, 207–208, or 215–216.

 Foundation Courses (should be completed by end of junior year).
 Foundation courses are intended to provide a broad introduction to methodology and theory in their area.

These courses must be above the 100level, at least three credit hours, and taken for a letter grade.

- A. Ethics: one course; B&SOC 205 (also S&TS 205) or B&SOC 206 (also S&TS 206, PHIL 246).\*\*
- B. Social sciences/humanities foundation: two courses; one from any two of the following subject areas: History of Science; Philosophy of Science; Sociology of Science; Politics of Science; and Science Communication.\*\*
- C. Biology foundation (breadth requirement): three courses; one each from three of the following subject areas: Ecology (BIO EE 261); Evolutionary Biology (BIO EE 278); Biochemistry, Molecular and Cell Biology (BIO BM, 330 or 331 or 333 or NS 320); Microbiology (BIO MI 290); Genetics and Development (BIO GD 281 or 282); Neurobiology and Behavior (BIO NB 221 or 222); Botany (BIO PL 241); and Anatomy and Physiology (BIO AP 311 or NS 341 but NOT BIO AP 212).
- D. Biology foundation (Depth requirement): one biology course for which one of the above (2C) is a prerequisite.
- E. Statistics: one course selected from MATH 171, ILRST 210, BTRY 301, AEM 210, SOC 301, PSYCH 350, ECON 319, CRP 223, PAM 210.
- 3) **Core Course\*: (one course).** Should be completed by end of junior year.

B&SOC 301 Biology and Society: The Social Construction of Life (also S&TS 301); or S&TS 286: Science and Human Nature (also PHIL 286).

- 4) **Theme** (five courses that correspond to the theme selected by the student). These courses must be above the 100-level, at least three credit hours, and taken for a letter grade. Choose these courses as follows:
  - A. Natural Science Issues/Biology Elective (two courses). Select from the list of B&SOC approved Natural Science Issues courses or choose course(s) with introductory biology as a prerequisite from: ALS, AN SC, BIOSCI, ENTOM, FOOD, HD, NS, NTRES, PL BR, PL PA, PSYCH, VTMED.

# ARTS AND SCIENCES - 2002-2003

- B. Humanities/social sciences electives\*\* (two courses). Courses from the list of Senior Seminars may be used as theme electives if not used to meet another requirement, or select humanities or social sciences courses in consultation with the faculty adviser.
- C. Senior Seminar\*\* (One course taken senior year). Courses change yearly.
- Students may petition to take a second statistics course (an advanced course, in sequence with the statistics course taken in the foundation) in place of the calculus requirement
- ..... Among the courses taken to meet the social sciences and humanities requirements (2.A, 2.B, 3, 4.B, and 4.C), a minimum of two social science courses and two humanities courses must be chosen. History of science, philosophy of science, and ethics courses may be counted toward the humanities requirement for the major.

#### Independent Study

Projects under the direction of a Biology & Society faculty member are encouraged as part of the program of study in the student's theme area. Applications for research projects are accepted by individual faculty members. Students may enroll for 1-4 credits in B&SOC 375 (Independent Study) with written permission of the faculty supervisor and may elect either the letter grade or the S-U option. Applications and information on faculty research, scholarly activities, and undergraduate opportunities are available in the Biology & Society Office, 275 Clark Hall. Independent study credits may not be used in completion of the major requirements.

#### **The Honors Program**

The honors program is designed to provide independent research opportunities for academically talented undergraduate students whose major is Biology & Society (B&SOC). Students who enroll in the honors program are expected, with faculty guidance, to do independent study and research dealing with issues in biology and society. Students participating in the program should find the experience intellectually stimulating and rewarding whether or not they intend to pursue a research career.

Biology & Society majors are considered for entry into the honors program at the end of the second semester of the junior year. Application forms for the honors program are available in the Biology & Society office, 275 Clark Hall. The honors program is available to Biology & Society majors from the College of Arts and Sciences. Biology & Society majors in the Colleges of Human Ecology and Agriculture and Life Sciences must be selected by an honors committee within their college. To qualify for the Biology & Society honors program, students must have an overall Cornell cumulative grade-point average of at least 3.3, have formulated a research topic, and have found a project supervisor (with an academic appointment at Cornell) and another faculty member willing to serve as their advisers. At least one of these must be a member of the Biology & Society major. Applications will be reviewed by a committee headed by the director of undergraduate studies, who will notify students directly of

the outcome. Students will be permitted to register for the honors program only by permission of the department. Students must enroll for two semesters and may take three to five credits per semester up to a maximum of eight credits in B&SOC 498 and 499. Honors Project I and II. They must attend the honors seminar during the fall semester. More information on the honors program is available in the Biology & Society Office, 275 Clark Hall (255-6047).

Consult the John S. Knight Institute brochure for times, instructors, and descriptions.

#### II. Foundation Courses

A. Etbics (one course)

#### **B&SOC 205** Ethical Issues in Health and Medicine (also S&TS 205) (IV)

Fall. 4 credits. Limited to 150 students. Not open to freshmen. S. Hilgartner. In today's rapidly changing world of health and medicine, complex ethical issues arise in many contexts-from the private, interpersonal interactions between doctor and patient to the broad, mass-mediated controversies that make medicine into headline news. This course examines ethical problems and policy issues that arise in contemporary medicine, health care, and biomedical research. Tools for ethical analysis are applied to a variety of cases and fundamental questions in bioethics. Perspectives from social science, history, and law also inform the course. We explore ethical questions that arise in a number of substantive contexts, including the doctor-patient relationship, medical decision making near the end of life, human experimentation, genetics and reproductive technology, public health, and the allocation of scarce resources.

#### **B&SOC 206** Ethics and the Environment (also S&TS 206, PHIL 246) (IV)

Spring. 4 credits. Limited to 60 students. Open to all undergraduates; permission of instructor required for freshmen. N. Sethi. The aim of this course is to acquaint students with moral issues that arise in the context of the environment and environmental policy. Our concerns about the environment bring to our attention the importance of economic,

epistemological, legal, political and social issues in assessing our moral obligations to other humans and the natural world. Our attempt is then to explore how different factors come into play in defining our responsibilities to the environment and to examine the grounds for our environmental policy decisions. A background in basic ecology or environmental issues or ethics is helpful

Social Sciences/Humanities Foundation (two courses, one from any two areas)

1. History of Science

#### S&TS 233 Agriculture, History, and Society: From Squanto to **Biotechnology** Fall. 3 credits. M. Rossiter.

For description, see S&TS 233.

Fall. 4 credits. R. Boyd. For description, see PHIL 381.

#### 3. Sociology of Science

#### B&SOC 301 Blology and Society: The Social Construction of Life (also S&TS 301) (III)

Fall. 4 credits. May be used to meet the sociology of science requirement if not used to meet the core course requirement. E. Toon.

See Core Courses for description.

#### B&SOC 442 Sociology of Science (also S&TS 442, SOC 442, CRP 442) (III) Spring. 4 credits. H. Mialet.

For description, see S&TS 442.

HD 452 Culture and Human Development Fall. 3 credits. Q. Wang.

For description, see HD 452.

NS 245 Social Science Perspectives on Food and Nutrition

Fall. 3 credits. J. Sobal. For description, see NS 245.

#### **[R SOC 208 Technology and Society** Fall. 3 credits. Not offered 2002–2003. C. Geisler.

For description, see R SOC 208.]

R SOC 220 Sociology of Health and Ethnic Minorities (also LSP 220) Fall. 3 credits. P. Parra.

For description, see R SOC 220.

#### S&TS 201 What Is Science? An Introduction to the Social Studies of Science and Technology (also SOC 210)

Spring. 3 credits. S. Hilgartner. For description, see S&TS 201.

**S&TS 311** The Sociology of Medicine Spring. 4 credits. E. Toon. For description, see S&TS 311.

#### S&TS 411 Knowledge, Technology, and Property

Spring. 4 credits. S. Hilgartner. For description, see S&TS 411.

#### 4. Politics of Science

### B&SOC 406 Biotechnology and Law (also S&TS 406) (III)

Spring. 4 credits. L. Palmer. For description, see S&TS 406.

#### B&SOC 407 Law, Science, and Public Values (also GOVT 407 and S&TS 407) (III)

Spring. 4 credits. M. Lynch. For description, see S&TS 407.

#### **CRP 380 Environmental Politics**

Fall. 4 credits. R. Booth. For description, see CRP 380.

#### **PAM 230 Introduction to Policy Analysis** Fall. 3 credits. R. Avery. For description, see PAM 230.

### S&TS 324 Environment & Society (also R SOC 324, SOC 324)

Spring. 3 credits. C. Caron. For description, see R SOC 324.

#### S&TS 391 Science in the American Polity: 1960–Now (also GOVT 309, AM ST 389) Fall. 4 credits. M. Dennis.

For description, see S&TS 391.

#### S&TS 427 Politics of Environmental Protection in America (also GOVT 427)

Summer. 4 credits. S. Yearley. For description, see S&TS 427. 5. Science Communication

#### COMM 260 Scientific Writing for Public Information

Fall or spring. 3 credits. Limited to 25 nonfreshman or graduate students per section. S. Conroe.

For description and prerequisites, see COMM 260.

#### COMM 421 Communication and the Environment

Spring. 3 credits. May be used in Foundation only if **not** taken as senior seminar. J. Shanahan.

For description, see COMM 421.

#### S&TS 285 Communication in the Life Sciences (also COMM 285)

Spring. 3 credits. B. Lewenstein. For description, see COMM 285.

#### S&TS 352 Science Writing for the Mass Media (also COMM 352)

Spring. 3 credits. B. Lewenstein. For description and prerequisites, see COMM 352.

### [S&TS 466 Communication of Science

**and Technology (also COMM 466)** Fall. 3 credits. Limited to 15 students. May be used in Foundation only if **not** taken as senior seminar. Not offered 2002–2003. B. Lewenstein.

For description and prerequisites, see COMM 466.]

*C. Biology foundation* (breadth requirement): Three courses: one from three of the following subject areas:

#### 1. Biochemistry, Molecular and Cell Biology

#### BIOBM 330 Principles of Biochemistry, Individual Instruction

Fall or spring. 4 credits. J. Blankenship, P. Hinkle, staff.

For description and prerequisites, see BIOBM 330.

#### BIOBM 331 Principles of Biochemistry: Proteins and Metabolism

Fall. 3 credits. May not be taken for credit after BIOBM 330 or 333. G. Feigenson. For description and prerequisites, see BIOBM 331.

#### BIOBM 333 Principles of Biochemistry, Lectures

Summer. 4 credits. H. Nivison. For description and prerequisites, see BIOBM 333.

#### NS 262 Nutrients and Cells

Spring. 3 credits. N. Noy. For description and prerequisites, see NS 262.

#### NS 320 Introduction to Human Biochemistry

Fall. 4 credits. W. Arion, P. Stover. For description and prerequisites, see NS 320.

# 2. Ecology

#### **BIOEE 261 Ecology and the Environment** Fall or summer. 4 credits. Not open to

freshmen. A. Flecker, J. Sparks, A. Vawter. For description and prerequisites, see BIOES 261.

#### 3. Genetics and Development

#### **BIOGD 281** Genetics

Fall, spring, or summer. 5 credits. Not open to freshmen fall semester. Limited to 200 students. M. Goldberg, P. Bruns, T. Fox, R. MacIntyre.

For description and prerequisites, see BIOGD 281.

#### BIOGD 282 Human Genetics

Spring. 2 or 3 credits (2 cr. if taken after BIOGD 281). Must be taken for 3 credits to fulfill Biology & Society requirements. Limited to 25 per discussion group. M. Hamblin.

For description and prerequisites, see BIOGD 282.

#### 4. Evolutionary Biology

BIOEE 278 Evolutionary Blology

Fall or spring. 3 or 4 credits. M. Shulman, staff.

For description, see BIOEE 278.

5. Microbiology

#### BIOMI 290 General Microbiology Lectures

Fall, spring, or summer. 2 or 3 credits.

Must be taken for 3 credits. W. Ghiorse/ S. Winans, S. Merkel/J. Helmann,

B. Batzing.

For description and prerequisites, see BIOMI 290.

#### 6. Neurobiology and Behavior

#### BIONB 221 Neurobiology and Behavior I: Introduction to Behavior

Fall. 3, 4, or 5 credits. A. Reeve. For description and prerequisites, see BIONB 221.

#### BIONB 222 Neurobiology and Behavior II: Introduction to Neurobiology

Spring. 3 or 4 credits. Staff. For description and prerequisites, see BIONB 222.

#### 7. Botany

**BIOPL 241** Introductory Botany

Fall. 3 credits. K. Niklas. For description, see BIOPL 241

8. Physiology and Anatomy

#### BIOAP 311 Introductory Animal Physiology, Lectures (also VET MED 346)

Fall. 3 credits. E. Loew, staff. For description and prerequisites, see BIOAP 311.

NS 341 Human Anatomy and Physiology Spring. 4 credits. Permission only. Must preregister for lab in 309 MVR during CoursEnroll. V. Utermohlen.

For description and prerequisites, see NS 341.

- **D. Biology foundation** (depth requirement): one course for which one of the above breadth requirement courses (2C) is a prerequisite.
- E. Statistics (one course)

301.

#### AEM 210 Introductory Statistics

Fall. 4 credits. C. VanEs. For description and prerequisites, see AEM 210.

BTRY 301 Statistical Methods I

Fall. 4 credits. Formerly BTRY 261. R. Lloyd. For description and prerequisites, see BTRY

# ARTS AND SCIENCES - 2002-2003

[CRP 223 Introduction to Statistical Reasoning for Urban and Regional Analysis

Fall. 3 credits. Not offered 2002–2003. Staff. For description, see CRP 223.]

ECON 319 Introduction to Statistics and Probability

Fall. 4 credits. T. Vogelsang. For description and prerequisites, see ECON 319.

ILRST 210 Statistics: Statistical Reasoning Fall, spring. 3 credits. J. Angelotti,

T. Diiccio. For description, see ILRST 210.

- MATH 171 Statistical Theory and Application in the Real World Fall, spring. 4 credits. Staff.
- For description, see MATH 171. PAM 210 Introduction to Statistics Fall, spring. 4 credits. K. Joyner,

R. Swisher. For description, see PAM 210.

PSYCH 350 Statistics and Research Design

Fall. 4 credits. T. Gilovich. For description, see PSYCH 350.

SOC 301 Evaluating Statistical Evidence (also R SOC 302)

Fall. 4 credits. M. Clarkberg. For description, see SOC 301.

#### III. Core Courses

B&SOC 301 Biology and Society: The Social Construction of Life (also S&TS 301) (iii)

Fall. 4 credits. Prerequisite: 2 semesters of social science or humanities and 1 year of introductory biology or permission of

instructor. Limited to 75 students. E. Toon. Critical thinking about the diverse influences shaping the life sciences. Topics include evolution and natural selection, heredity and genetic determinism, biotechnology, and reproductive interventions. We interpret episodes, past and present, in biology in light of scientists' historical location, economic and political interests, use of language, and ideas about causality and responsibility. Readings, class activities, and written assignments are designed so that students develop interpretive skills and explore their own intellectual and practical responses to controversies in biology and society.

#### S&TS 286 Science and Human Nature (also PHIL 286)

Spring. 4 credits. R. Boyd. For description, see PHIL 286.

#### IV. Themes

A. Natural Science Issues/Biology Elective (two courses). Select from the following list of B&SOC approved Natural Science Issues courses or choose course(s) with intro biology as a prerequisite from: ALS, AN SC, BIOSCI, ENTOM, FOOD, HD, NS, NTRES, PL BR, PL PA, PSYCH, VET MED.

#### B&SOC 214 Biological Basis of Sex Differences (also BIOAP 214 and WOMNS 214) (I) Spring. 3 credits. J. Fortune.

For description, see BIOAP 214.

B&SOC 347 Human Growth and Development: Biological and Behavioral Interactions (also HD 347, NS 347)

Spring. 3 credits. Offered alternate years. J. Haas and S. Robertson.

For description and prerequisites, see HD 347.

BIOEE 275 Human Biology and Evolution (also ANTHR 275 and NS 275)

Fall. 3 credits. K. Kennedy and J. Haas. For description, see BIOEE 275.

#### BIOEE 474 Laboratory and Field Methods in Human Biology (also ANTHR 474)

Spring. 5 credits. K. Kennedy. For description, see BIOEE 474.

#### BIOEE 673 Human Evolution: Concepts, History, and Theory (also ANTHR 673)

Fall. 3 credits. Offered alternate years. K. Kennedy. For description, see BIOEE 673.

# BIOPL 247 Ethnobiology

Fall. 3 credits. D. Bates. For description, see BIOPL 247

#### HD 220 Biological Issues in Human Development: The Human Brain and Mind

Fall. 3 credits. E. Temple. For description, see HD 220.

#### [HD 266 Emotional Functions of the Brain

Fall. 3 credits. Not offered 2002–2003. R. Depue.

For description, see HD 266.]

#### HD 344 Infant Behavior and

**Development** Fall. 3 credits. Not open to freshmen. S. Robertson.

For description and prerequisites, see HD 344.

#### HD 433 Developmental Cognitive Neuroscience

Spring. May be used as depth course if BIONB 221 or 222 is taken as breadth. 3 credits. E. Temple. For description, see HD 433.

#### HD 436 Language Development (also LING 436, PSYCH 436, COGST 436)

Spring. 4 credits. B. Lust. For description, see HD 436.

#### NS 222 Maternal and Child Nutrition

Fall. 3 credits. Limited to 20. C. Garza, P. Brannon.

For description and prerequisites, see NS 222.

#### NS 331 Physiological and Blochemical Bases of Human Nutrition Spring. 4 credits. M. Stipanuk,

C. McCormick. For description and prerequisites, see NS 331.

#### NS 361 Biology of Normal and Abnormal Behavior (also PSYCH 361)

Fall. 3 credits. Limited to juniors and seniors only. B. Strupp. For description and prerequisites, see NS 361.

For description and prefequisites, see 105 501

#### NS 452 Molecular Epidemiology and Dietary Markers of Chronic Disease Spring. 3 credits. P. Cassano.

For description and prerequisites, see NS 452.

#### [NS 475 Molecular Nutrition and Development

Spring. 3 credits. Not offered 2002–2003. P. Stover and D. Noden.

For description and prerequisites, see NS 475.]

#### NTRES 201 Environmental Conservation Spring. 3 credits. T. Fahey. For description, see NTRES 201.

or description, see NTRES 201.

**PSYCH 326 Evolution of Human Behavlor** Spring. 4 credits. B. Johnston. For description and prerequisites, see PSYCH 326.

#### **Examples of biology electives**

#### AN SCI 300 Animal Reproduction and Development

Spring. 3 credits. For description, see AN SCI 300.

#### NS 331 Physiological and Biochemical Bases of Human Nutrition Spring. 4 credits.

For description, see NS 331.

#### B. Humanities/Social Science elective (two courses)

Courses listed earlier as social science/ humanities foundation courses (2B) are particularly appropriate as social science/ humanities electives. However, a single course cannot be used to meet both requirements. Examples of recommended social science or humanities electives are listed below. A more complete list is available in 275 Clark Hall.

**Examples of social science electives** 

#### AEM 464 Economics of Agricultural Development

Spring. 3 credits. R. Christy. For description, see AEM 464.

[ANTHRO 211 Nature and Culture

Spring. 3 credits. Not offered 2002–2003. For description, see ANTHR 211.]

#### B&SOC 403 Environmental Governance (also S&TS 403 and NTRES 403) Fall. 3 credits. S. Wolf.

For description, see NTRES 403.

#### [HD 457 Health and Social Behavior (also SOC 457)

Fall. 3 credits. Not offered 2002–2003. E. Wethington.

For description, see HD 457.]

# NS 450 Public Health Nutrition

Spring. 3 credits. D. Pelletier. For description, see NS 450.

#### NTRES 400 International Environmental Issues

Fall. 4 credits. R. McNeil. For description, see NTRES 400.

#### PAM 303 Ecology and Epidemiology of Health

Spring. 3 credits. E. Rodriguez. For description, see PAM 303.

PAM 380 Human Sexuality Spring. 3 credits. A. Parrot. For description, see PAM 380.

#### [PAM 435 U.S. Health Care System Fall. 3 credits. Not offered 2002–2003. R. Battistella. For description, see PAM 435.]

PAM 437 Economics of Health Policy Spring. 3 credits. K. Simon. For description, see PAM 437.

#### R SOC 205 Rural Sociology and International Development (also SOC 206)

Spring. 3 credits. P. McMichael. For description, see R SOC 205.
**[R SOC 490 Society and Survival** Fall. 3 credits. Not offered 2002–2003. For description, see R SOC 490.]

**SOC 340 Health, Behavior, and Policy** Spring. 4 credits. S. Caldwell. For description, see SOC 340.

**Examples of humanities electives** 

NTRES 407 Religion, Ethics, and the Environment Fall. 4 credits. R. Baer. For description, see NTRES 407.

PHIL 241 Ethics Spring. 4 credits. N. Sturgeon. For description, see PHIL 241.

[PHIL 368 Global Climate and Global Justice (also GOVT 468) Fall. 4 credits. Not offered 2002–2003. For description, see PHIL 368.]

## S&TS 481 Philosophy of Science (also PHIL 481)

Spring. 4 credits. R. Boyd. For description, see PHIL 681.

C. Senior Seminars.

#### [BIOPL 442 Current Topics in Ethnobiology

Fall. If using this course as a senior seminar, B&SOC majors must take it for 4 credits. Not offered 2002–2003. D. Bates, E. Rodriguez.
For description, see BIOPL 442.]

B&SOC 406 Biotechnology and the Law (also S&TS 406) (III) Spring. 4 credits. L. Palmer.

For description, see S&TS 406.

#### B&SOC 407 Law, Science, and Public Values (also GOVT 407, S&TS 407) (III) Spring. 4 credits. M. Lynch.

For description, see S&TS 407.

#### B&SOC 427 Politics of Environmental Protection In America (also S&TS 427 and GOVT 427) (III) Summer. 4 credits. S. Yearley.

For description, see S&TS 427.]

#### B&SOC 447 Seminar in the History of Biology (also BIOEE 467, HIST 415, and S&TS 447) (I or III) Summer (6-week session). 4 credits.

W. Provine. For description, see BIOEE 467.

B&SOC 461 Environmental Policy (also BIOEE 661, ALS 661) (I)

Fall and spring. 3 credits each term. Limited to 12 students. D. Pimentel. For description, see BIOEE 661.

#### COMM 421 Communication and the Environment

Spring. 3 credits. J. Shanahan. For description, see COMM 421.

#### HD 336 Connecting Social, Cognitive and Emotional Development Fall. 3 credits. M. Cassasola.

For description, see HD 336.

#### HD 366 Psychobiology of Temperament and Personality Fall. 3 credits. R. Depue.

For description and prerequisites, see HD 366.

[HD 418 Psychology of Aging

Fall. 3 credits. Not offered 2002–2003. S. Cornelius. For description, see HD 418.] HD 419 Midlife Development Spring. 3 credits. S. Cornelius. For description, see HD 419.

HD 464 Adolescent Sexuality (also WOMNS 467) Spring. 3 credits. R. Savin-Williams.

For description, see HD 464.

#### HD 660 Social Development

Spring. 3 credits. Permission of instructor required for undergraduates. K. Greene. For description, see HD 660.

NTRES 411 Seminar in Environmental

Fall. 3 credits. R. Baer. For description, see NTRES 411.

#### PAM 552 Health Care Services: Consumer and Ethical Perspectives

Fall. 3–4 credits. A. Parrot. If using this course as a senior seminar, B&SOC majors must take it for four credits. For description, see PAM 552.

#### PAM 556 Managed Care

Spring. 3 credits. For undergraduate seniors only by permission of instructor. J. Kuder.

For description, see PAM 556.

#### PAM 559 Epidemiology, Clinical Medicine, and Management Interface Issues Spring. 3 credits. E. Rodriguez.

For description, see PAM 559.

#### **[R SOC 410 Population and Environment** Spring. 3 credits. Not offered 2002–2003. For description, see R SOC 410.]

## R SOC 438 Social Demography (also SOC 437)

Fall. 3 credits. D. Gurak. For description, see R SOC 438.

#### [R SOC 495 Population, Development, and Environment in Sub-Saharan Africa

Fall. 4 credits. Not offered 2002–2003. P. Eloundou-Enyegue. For description, see R SOC 495.]

n description, see it boo 179.

#### S&TS 411 Knowledge, Technology, and Property

Spring, 4 credits, S. Hilgartner. For description and prerequisites, see S&TS 411.

#### S&TS 438 Minds, Machines, and Intelligence (also COG ST 438)

Spring. 4 credits. H. Mialet. For description, see S&TS 438.

#### [S&TS 466 Public Communication of Science and Technology (also COMM 466)

Fall. 3 credits. Offered even fall semesters. Not offered fall 2002. B. Lewenstein. For description and prerequisites, see COMM 466.]

#### [S&TS 490 Integrity of Scientific Practice

Fall. 4 credits. Not offered 2002–2003. S. Hilgartner.

For description, see S&TS 490.]

#### S&TS 491 Disease and Culture

Fall. 4 credits. E. Toon. For description, see S&TS 491.

**[S&TS 492 Politics and the Public Health** Spring, 4 credits. Not offered 2002–2003. E. Toon.

For description, see S&TS 492.]

#### S&TS 645 Genetics: Politics and Society in Comparative Perspective (also GOVT 634)

Fall. 4 credits. S. Hilgartner. For description, see S&TS 645.

#### V. Other Courses

#### B&SOC 375 Independent Study

Fall or spring. 1–4 credits: Prerequisite: must have written permission of faculty supervisor and Biology & Society major.

Projects under the direction of a Biology & Society faculty member are encouraged as part of the program of study within the student's concentration area. Applications for research projects are accepted by individual faculty members. Students may enroll for 1-4 credits in B&SOC 375 (Independent Study) with written permission of the faculty supervisor and may elect either the letter grade or the S-U option. Students may elect to do an independent study project as an alternative to, or in advance of, an honors project. Applications and information on faculty research, scholarly activities, and undergraduate opportunities are available in the Biology & Society Office, 275 Clark Hall. Independent study credits may not be used in completion of the major requirements

#### B&SOC 400 Undergraduate Seminar

Fall or spring. Variable credit. May be repeated for credit.

From time to time different seminars on topics of interest to undergraduates are offered. Topics and instructors are listed in the Biology & Society supplement issued at the beginning of each semester.

#### B&SOC 498/499 Honors Project I & II

Fall and spring. 3–5 credits each term. Open only to Biology & Society students in their senior year by permission of the department. Please apply in 275 Clark Hall.

Students who are admitted to the honors program are required to complete two semesters of honors project research and to write an honors thesis. The project must include substantial research and the completed work should be of wider scope and greater originality than is normal for an upperlevel course.

Students may take three to five credits per semester up to a maximum of eight credits in B&SOC 498 & 499, Honors Projects I & II. Students should note that these courses are to be taken in addition to those courses that meet the regular major requirements. B&SOC 498 includes the fall Honors Seminar. The student and the project supervisor must reach clear agreement at the outset as to work to be completed during the first semester. Minimally, an honors thesis outline, bibliography, and draft introductory chapter should be accomplished. At the end of B&SOC 498, Honors Project I, a letter grade will be assigned and the advisers, in consultation with the Director of Undergraduate Studies, will evaluate whether or not the student should continue working on an honors project. Biology & Society students who do continue in the honors program for the second semester will receive a letter grade at the end of their final term whether or not they complete a thesis and whether or not they are recommended for honors.

Applications and information are available in the Biology & Society Office, 275 Clark Hall.

BURMESE

See Department of Asian Studies.

#### CAMBODIAN

See Department of Asian Studies.

#### CENTER FOR APPLIED MATHEMATICS

The Center for Applied Mathematics administers a broadly based interdepartmental graduate program that provides opportunities for study and research over a wide range of the mathematical sciences. This program is based on a solid foundation in analysis, algebra, and methods of applied mathematics. The remainder of the graduate student's program is designed by the student and his or her Special Committee. For detailed information on opportunities for graduate study in applied mathematics, students should contact the Director of Graduate Studies of the Center for Applied Mathematics, 657 Frank H. T. Rhodes Hall.

There is no special undergraduate degree program in applied mathematics. Undergraduate students interested in an applicationoriented program in mathematics may select an appropriate program in the Department of Mathematics, the Department of Computer Science, or some department of the College of Engineering.

A listing of selected graduate courses in applied mathematics can be found in the description of the center in "Interdisciplinary Centers, Programs, and Studies."

# CENTER FOR INTERNATIONAL STUDIES

See Interdisciplinary Centers, Programs, and Studies.

C. F. Wilcox, P. T. Wolczanski, D. B. Zax
The Department of Chemistry and Chemical Biology offers a full range of courses in physical, organic, inorganic, analytical,

physical, organic, inorganic, analytical, theoretical, bioorganic, and biophysical chemistry. In addition to their teaching interests, Chemistry and Chemical Biology faculty members have active research programs. The link between teaching and research is a vital one in a continuously evolving scientific subject; it ensures that students will be provided with the most advanced information and perspectives, and affords opportunities for students to participate in research.

#### **The Standard Major**

The chemistry major at Cornell provides a great deal of flexibility and prepares students for a large variety of career options. In recent years, chemistry majors have gone on to graduate study in chemistry, medicine, law, and business management, as well as directly into positions with chemical, pharmaceutical, and other industrial companies. A major in chemistry can also provide the basis for work in related areas such as molecular biology, polymer science, chemical physics, geochemistry, chemical engineering, materials science, solid state physics, and secondary education. Nearly all of the required courses for the major can be completed in three years, leaving the senior year open for independent research under the supervision of a professor. Advanced courses in chemistry or courses that will enable the individual to pursue interests in related fields.

The courses are arranged as a progression, with some (including mathematics and physics) prerequisite to those that are more advanced. During the first year, a student should normally register for general chemistry (preferably CHEM 215-216 although CHEM 207-208 or 206-208 is acceptable), mathematics, a freshman writing seminar, a foreign language if necessary, or physics. CHEM 215-216 is aimed at those students with good preparation and a strong interest in chemistry. Students who do not know if their preparation is adequate should consult the instructor. In the second year a student should complete calculus and take physics and organic chemistry (CHEM 359-360 is preferred to CHEM 357-358). The second-year laboratory courses include 300, Analytical Chemistry and 301, Experimental Chemistry I. CHEM 389-390, Physical Chemistry I and II, and CHEM 302-303, Experimental Chemistry II and III, should be completed in the third year. CHEM 410, inorganic chemistry should be completed in the third or fourth year. Advanced work in chemistry and related subjects can be pursued in the fourth year and in the earlier years as well. The opportunity for independent research is also available. All students with questions about the major are encouraged to consult either the director of Undergraduate Studies or the chair of the Department of Chemistry and Chemical Biology. Entering students who are exceptionally well prepared in chemistry may receive advanced placement credit for CHEM 207.

Prerequisites for admission to a major in chemistry are (1) CHEM 215–216, 300; or 207– 208, 300; or 211, 208, 300; or 206, 208, 300; (2) PHYS 207 or 112; and (3) MATH 111 or 191. Students are not encouraged to undertake a major in chemistry unless they have passed those prerequisite courses at a good level of proficiency. The minimum additional courses that must be completed for the standard major in chemistry are listed below.

- CHEM 301-302-303, 359-360 (357-358 may be substituted), 389-390, and 410
- 2) MATH 112, 213; or 122, 221–222; or 192– 293–294

#### 3) PHYS 208

Potential majors electing to take MATH 213 are strongly urged to do so in their sophomore year to avoid scheduling conflicts with CHEM 389 in their junior year.

The sequence described above is a basic program in chemistry that students can extend substantially in whatever direction that suits their own needs and interests. Those going on to do graduate work in chemistry should recognize that these requirements are minimal and should supplement their programs, where possible, with further courses such as CHEM 405, 605, 606, 665, 666, 668, 670, 671, and 681. Even students not planning graduate work in chemistry should consider advanced work in physics and mathematics, courses in the biological sciences, and advanced work in chemistry as possible extensions of the basic program.

Honors. The honors program in chemistry offers superior students in the standard major an opportunity to study independently in seminars and to gain additional experience by engaging in research during the senior year. It is particularly recommended to those who plan graduate work in chemistry. Prospective candidates should complete the introductory organic chemistry and physical chemistry sequences by the end of the junior year, although failure to have completed those courses in the junior year does not in itself disqualify a student from the honors program. Completion of the program at a high level of performance leads to the degree of Bachelor of Arts with honors in chemistry. Students will be admitted to the program by invitation of the department, with selection based on a superior cumulative average, including chemistry grades, and good performance in at least four credits of research at Cornell.

Prospective candidates should discuss their plans with advisers by March 1 of their junior year; participants are notified by early January of their senior year. To be awarded honors, candidates must show outstanding performance in at least eight credits of undergraduate research such as is offered in CHEM 421, 433, 461, or 477. In addition, the writing of a thesis in the honors seminar (CHEM 498) is expected.

#### **The Alternative Major**

The alternative major is a flexible program that provides core coverage of chemistry around which students can design a program to meet their own career goals. Requirements consist of a core program along with four additional courses chosen by the student. One of the four must be in chemistry at the 300 level or above; the other three may be in another field but should represent a cohesive plan should not be at the introductory level, and must be approved by a departmental committee. The prerequisites for admission to the alternative major are the same as those for the standard major.

#### The Core Program for the Alternative Major

 CHEM 215–216, 300 (or 207–208, 300; or 211, 208, 300; or 206, 208, 300); 251, 257, 287, 289, and 410 (CHEM 357–358 or 359– 360 can be substituted for CHEM 257, or CHEM 389–390 can be substituted for CHEM 287, thereby fulfilling the requirement for an additional 300-level chemistry course) 2) MATH 111–112; or 111, 122; or 191–192

3) PHYS 207-208; or 112, 213

#### Additional Courses for the Alternative Major

Possible plans for the remaining three courses might include programs in Biochemistry; Biology; Physics; Computer Science; Polymers; Materials Science; Science, Technology, and Society; History and Philosophy of Science and Technology; Business and Management; Economics: Education: and others.

Premedical students and those interested in pursuing double majors might find the alternative major particularly attractive. Students who select the alternative major are eligible for the honors program only in exceptional cases.

#### **Program for Science Teachers**

Chemistry majors who wish to become teachers will be interested to know that Cornell University offers a certification program for teachers of secondary (grades 7-12) science. Interested students apply to the program during their sophomore or junior years. If accepted, students integrate some course work in Education with the rest of their undergraduate studies. All chemistry majors who enter this program will remain in the College of Arts and Sciences to complete the major.

After earning the bachelor's degree, certification students enter the Graduate Field of Education to complete a fifth year of study at Cornell. Following this fifth year, students are eligible for a master's degree from Cornell and a teaching certificate from New York State. Additional information is available from Susie Slack, 424 Kennedy Hall, 255-9255 or Prof. Deborah Trumbull, 426 Kennedy Hall, 255-3108.

#### Laboratory Course Regulations

Students registered for laboratory courses who do not appear at the first meeting of the laboratory will forfeit their registration in that COUISE

Students and members of the teaching staff are required to wear safety goggles and lab aprons in all chemistry laboratories. Closetoed footwear is required (no sandals). Students are reminded to take their goggles and lab aprons to the first laboratory session. Those who fail to cooperate with the safety program will be asked to leave the laboratories

Students are required to pay for glassware and any other items broken or missing from their laboratory desks at the close of each semester. Students who fail to inventory their desks at the appointed time in the presence of their instructor are charged a \$10 fee in addition to charges for any breakage.

#### Courses

Note: Class meeting times are accurate at the time of publication. If changes are necessary, the department will provide new information as soon as possible.

Preliminary examinations for all courses may be given in the evening.

## [CHEM 105 The Language of

**Chemistry (I)** Fall. 3 credits. This course contributes to satisfying the CALS physical science requirement of one course in chemistry. S-U or letter grades. Lecs, M W F. Prelims: in normal class period. Not offered 2002-2003; next offered fall 2003. Staff. In his autobiography, A. Kornberg (Nobel Laureate in Medicine, 1959) wrote, "much of life can be understood in rational terms if expressed in the language of chemistry. It is an international language, a language for all time, a language that explains where we came from, what we are, and where the physical world will allow us to go." Through careful examination of a few milestone investigations of naturally occurring biologically important compounds (such as the antimalarial quinine, bombykol, and the sperm attractants of algae), the principles of chemistry to which Kornberg refers are developed. Methods of analyzing chemical problems are emphasized, rather than the memorization of specific results or formulas. There is an opportunity for students, working in small groups, to prepare and present short reports on topics of particular current interest at the interface between chemistry and biology.]

CHEM 106 The World of Chemistry (I) Spring. 3 credits. This course contributes to satisfying the CALS physical science requirement of one course in chemistry. S-U or letter grades. Lecs, M W F. Prelims: March 4, April 3. R. Hoffmann.

Chemistry is the art, craft, business, and science of substances and their transformations. Since we've learned to look inside we know that within those substances undergoing change are persistent groupings of atoms called molecules. So chemistry is also played out on the microscopic level. This is a course that looks at the way chemistry enters all aspects of the everyday world and the way it interacts with culture and the economy. We try to gain a feeling for the way science is done and grasp the interplay of chemistry and biology. The teaching is open, there are many demonstrations, as well as excerpts from books, plays, and films.

#### CHEM 206 Introduction to General Chemistry (I)

Fall or summer. 4 credits. Enrollment limited. Recommended for students who have not had high school chemistry and for those needing a less intensive course than CHEM 207. Lecs, M W F; lab, T R or F, or M W or F. Prelims: Oct. 8, Nov. 14. C. F. Wilcox.

An introduction to general chemistry, with emphasis on important principles and facts. CHEM 206 covers much of the same material as CHEM 207 plus the basics of kinetics and chemical equilibrium, but does so at a slower pace.

#### CHEM 207-208 General Chemistry (I)

Fall or summer, 207; spring or summer, 208. 4 credits each term. Recommended for those students who will take further courses in chemistry. Prerequisite for CHEM 207: high school chemistry. Prerequisite for CHEM 208: CHEM 206 or 207. Lecs, T R; lab, T R F M T W R F. Prelims: Oct. 8, Nov. 14, Feb. 25, April 8.

Fall: J. E. McMurry; spring: M. A. Hines. Fundamental chemical principles and descriptive facts are covered, with considerable attention given to the quantitative aspects and to the techniques important for further

work in chemistry. Second-term laboratory includes a systematic study of qualitative analysis.

Note: Entering students exceptionally well prepared in chemistry may receive advanced placement credit for General Chemistry 207 by demonstrating competence in the advanced placement examination of the College Entrance Examination Board or in the departmental examination given at Cornell before classes start in the fall. Taking CHEM 208 after 215 is not recommended and can be done only with the permission of the 208 instructor

#### CHEM 211 Chemistry for the Applied Sciences (I)

Fall or spring. 4 credits. Recommended for those students who intend to take only one term of chemistry. Enrollment limited. Prerequisite: high school chemistry or permission of instructor. Corequisite: a calculus course at the level of MATH 111 or 191. Lecs, M W F. Labs, M T W R F. Prelims: Sept. 24, Oct. 24, Nov. 26, Feb. 13, Mar. 11, Apr. 10. Fall: P. T. Wolczanski; spring: P. J. Chirik.

Important chemical principles and facts are covered with the objective of understanding the role of chemistry in other fields. Emphasis is on topics such as solid-state materials, periodic trends, and specific classes of compounds, such as polymers.

Note: Entering students exceptionally well prepared in chemistry may receive advanced placement credit for General Chemistry by demonstrating competence in the advanced placement examination of the College Entrance Examination Board or in the departmental examination given at Cornell before classes start in the fall.

#### CHEM 215-216 General and Inorganic Chemistry (I)

Fall, 215; spring, 216. 4 credits each term. Recommended for students who intend to specialize in chemistry or in related fields. Enrollment limited. Prerequisites: good performance in high school chemistry, physics, and mathematics. Corequisite: a calculus course at the level of MATH 111 or 191 for students who have not taken high school calculus. Prerequisite for CHEM 216: CHEM 215. Lecs, M W F; lab. M T W R or F. Prelims: Oct. 8, Nov. 14, Feb. 25, Apr. 8. Fall: B. Widom; spring: B. R. Crane.

An intensive systematic study of the laws and concepts of chemistry, with considerable emphasis on quantitative aspects. Second term includes systematics of inorganic chemistry. Laboratory work covers qualitative and quantitative analysis, transition metal chemistry, and spectroscopic techniques.

Note: Taking CHEM 208 after 215 is not recommended and can be done only with the permission of 208 instructor.

#### [CHEM 233 Introduction to Biomolecular Structure

Fall. 2 credits. Limited to 30 students. Prerequisites: CHEM 207-208 or equivalents. Lecs, T R. Not offered 2002-2003. S. E. Ealick.

This course is intended for students with a basic understanding of chemistry who are considering a program of study in biochemistry. The interrelationship of the structure and function of biologically important molecules are explored. Emphasis is placed on understanding the way in which the threedimensional arrangements of atoms determine the biological properties of both small molecules and macromolecules such as proteins and enzymes. The study of molecular structure is aided by interactive computer graphics for visualizing three-dimensional structures of molecules.]

#### CHEM 251 Introduction to Experimental Organic Chemistry

Fall, spring, or summer. 2 credits. Recommended for non-chemistry majors. Enrollment limited. Prerequisites: coregistration in CHEM 257 or 357. Lecs: fall, R or F; spring, R; lab, M T W R or F or T or R. Prelims: fall: Nov. 14; spring: Apr. 15. S. Russo.

Introduction to the synthesis, separation, and handling of materials, including applications of many types of chromatography, simple and fractional distillation, crystallization, extraction, and others.

#### CHEM 252 Elementary Experimental Organic Chemistry

Spring. 2 credits. Recommended for nonchemistry majors. Prerequisite: CHEM 251. Lec, F; lab, T, W. Prelims: Apr. 15. S. Russo. A continuation of CHEM 251.

#### CHEM 257 Introduction to Organic and Biological Chemistry (I)

Spring, 3 credits. Prerequisite: CHEM 206 or 207. Because CHEM 257 is only a 3credit course, it does not provide a practical route to satisfying medical school requirements. Lecs, M W F. Prelims: Feb. 13, March 4, April 8. D. A. Usher.

An introduction to organic chemistry with an emphasis on those structures and reactions of organic compounds having particular relevance to biological chemistry.

#### CHEM 287–288 Introductory Physical Chemistry (I)

Fall, 287; spring, 288. 3 credits each term. Prerequisites: CHEM 208 or 216 and MATH 111–112 and PHYS 208, or permission of instructor. Prerequisite for CHEM 288: CHEM 287 or 389. Lecs, M W F; 287: rec, M or W, T; 288: rec, M or W. Prelims: 287: Oct. 10, Nov. 26. 288: Mar. 6, Apr. 15. Fall: H. D. Abruña; spring: B. A. Baird.

A systematic treatment of the fundamental principles of physical chemistry, focusing in the fall on thermodynamics and an introduction to quantum mechanics. In the spring the course is oriented to the application of physical chemistry to biological systems, including transport, kinetics, electrochemistry, spectroscopy. CHEM 287 satisfies the minimum requirement for physical chemistry in the alternative chemistry major.

#### CHEM 289–290 Introductory Physical Chemistry Laboratory

Fall, 289; spring, 290. 2 credits each term.Lecs: fall, R; spring, R. Lab: fall, M T;spring, M T W R. T. McCarrick.A survey of the methods basic to the

experimental study of physical chemistry, with a focus on the areas of kinetics, equilibrium, calorimetry, and molecular spectroscopy.

#### CHEM 300 Quantitative Chemistry

Fall. 2 credits. Prerequisite: CHEM 208, or CHEM 216 or advanced placement in chemistry. Lec, R; lab, M T W R or T. Prelim: Oct. 24, Nov. 26. J. M. Burlitch. Volumetric, spectrophotometric, and potentiometric methods are emphasized. Techniques are learned by analysis of knowns, and then are used on unknowns. Lectures and problem sets stress the relationship between theory and applications.

#### CHEM 301 Experimental Chemistry I (I) Spring. 4 credits. Prerequisites: CHEM 300, and 357 or 359. Lec, M W F; 2 labs, M W

or T R. G. W. Coates. An introduction to the techniques of synthetic organic chemistry. A representative selection of the most important classes of organic reactions is explored in the first half of the semester, augmented by lectures on the reaction chemistry and the theory of separation and characterization techniques. The second half of the term is devoted to a special project, part of which is designed by the student. An opportunity to use inert atmosphere techniques is included.

#### CHEM 302 Experimental Chemistry II (I)

Fall, 4 credits. Enrollment limited; preference given to chemistry majors. Prerequisite: CHEM 301. Lecs, M W F; 2 labs, M W, T R . F. J. DiSalvo.

Instrumental methods of analysis, including chemical microscopy, visible and infa-red spectroscopies, and gas chromatography. Basic concepts of interfacing will be covered.

#### CHEM 303 Experimental Chemistry III (I)

Spring. 4 credits. Each lab limited to 10 students. Prerequisites: CHEM 302, 389, 390; coregistration in the latter is permissible. Lecs, M W F 9:05; 2 labs, M W, or T R. H. F. Davis.

An introduction to experimental physical chemistry, including topics in calorimetry, spectroscopy, and kinetics. The analysis and numerical simulation of experimental data is stressed.

#### CHEM 357-358 Organic Chemistry for the Life Sciences (I)

Fall or summer, 357; spring or summer, 358. 3 credits each term. Prerequisite for CHEM 357: CHEM 208 or 216 or advanced placement; recommended: concurrent registration in CHEM 251 or 300. Prerequisite for CHEM 358: CHEM 357 or permission of the instructor. Lecs, M W F, optional rec may be offered. Prelims: Sep. 26, Oct. 22, Nov. 19, Feb. 13, Mar. 11, Apr.

10. Fall: B. Ganem; spring: J. Meinwald. A study of the more important classes of carbon compounds—especially those encountered in the biological sciences. Emphasis is placed on their three-dimensional structures, mechanisms of their characteristic reactions, their synthesis in nature and the laboratory, methods of identifying them, and their role in modern science and technology.

*Note:* Because of duplication of material, students who take both CHEM 257 and 357 will receive graduation credit only for CHEM 257.

#### CHEM 359–360 Organic Chemistry I and II (I)

Fall, 359; spring, 360. 4 credits each term. Recommended for students who intend to specialize in chemistry or closely related fields. Enrollment limited. Prerequisites: CHEM 216 with a grade of B or better, CHEM 208 with a grade of A or better, or permission of instructor. Prerequisite for CHEM 360: CHEM 359. Recommended: coregistration in CHEM 300–301–302. Lecs, M W F; dis sec, W; prelims, Sept. 18, Oct. 16, Nov. 13, Spring: Feb. 12, Mar. 12, Apr. 16. Fall: D. A. Usher; spring, D. T. McQuade. A rigorous and systematic study of organic compounds, their structures, the mechanisms of their reactions, and the ways they are synthesized in nature and in the laboratory.

#### CHEM 389–390 Physical Chemistry I and II (I)

Fall, 389; spring, 390. 4 credits each term. Prerequisites: MATH 213 or, ideally, 221– 222; PHYS 208; CHEM 208 or 216 or permission of instructor. Prerequisite for CHEM 390: CHEM 389. Lecs, 389: M W F; rec M or W or T. Lecs, 390: M W F; prelims: 389: Oct. 1, Oct. 29, Nov. 26, 390: Feb. 13, Mar. 11, Apr. 10. Fall: H. F. Davis; spring: 390: R. F. Loring.

The principles of physical chemistry are studied from the standpoint of the laws of thermodynamics, kinetic theory, statistical mechanics, and quantum chemistry.

#### CHEM 391 Physical Chemistry II (also CHEME 391) (I) Spring. 4 credits. Enrollment, limited to

Spring. 4 credits. Enrollment limited to engineering students only. Prerequisites: MATH 293; PHYS 112, 213; CHEM 208 or 216 or permission of instructor. Corequisite: MATH 294. Prerequisite for CHEM 391: CHEM 389. Lecs, M W F; rec M or T. T. M. Duncan.

Course is the study of two topics: (1) Quantum chemistry—the electronic structure of atoms, molecules, and condensed matter; the interaction of electromagnetic radiation with matter for spectroscopy and chemical reaction; and (2) Chemistry kinetics—reaction rate laws from experimental data and reaction mechanisms; approximation methods and applications to polymerization and heterogeneous catalysis.

#### CHEM 404 Entrepreneurship in Chemical Enterprise

Spring. 1 credit. Lecs, T. B. Ganem. Designed to acquaint students with the problems of planning, starting, and managing a new scientifically oriented business venture, the course consists of six weekly 90-minute meetings focusing on case studies and assigned reading, as well as outside lectures by entrepreneurs in the chemical, pharmaceutical, and biotechnology industries. Topics include new technology evaluation and assessment, business formation, resource allocation, management development, as well as manufacturing and sales issues.

#### [CHEM 405 Techniques of Modern Synthetic Chemistry (I)

Spring. 3 or 6 credits. Enrollment limited. Prerequisites: CHEM 302 *and* permission of instructor. To receive 3 credits, students must perform a minimum of three 2-week experiments. 6 credits will be given for 3 additional experiments. Completion of 5 exercises in elementary glass-blowing will count as 1 experiment. Lab time required: 16 hours each week, including at least two 4-hour sessions in 1 section (M W 1:25). Lec, first week only. Not offered 2002– 2003. J. M. Burlitch.]

#### CHEM 410 Inorganic Chemistry (I)

Fall. 4 credits. Prerequisites: CHEM 358 or 360, and 287 or 390. Lecs, M W F. Prelims: Sept. 24, Oct. 24, Nov. 19. R. C. Fay.

A systematic study of the synthesis, structure, bonding, reactivity, and uses of inorganic, organometallic, and solid-state compounds.

#### CHEM 421 Introduction to Inorganic **Chemistry Research**

Fall or spring. 2-4 credits. Prerequisites: CHEM 303 and 389–390, or CHEM 287-288, and CHEM 289-290 with an average of B- or better, or permission of instructor. Selected faculty.

Research in inorganic chemistry involving both laboratory and library work, planned in consultation with a faculty member.

#### CHEM 433 Introduction to Analytical **Chemistry Research**

Fall or spring. 2-4 credits. Prerequisites: CHEM 303 and 390 with an average of Bor better or permission of instructor. Selected faculty.

Research in analytical chemistry involving both laboratory and library work, planned in consultation with a faculty member.

## **CHEM 450** Principles of Chemical

**Biology (I)** Fall. 3 credits. Prerequisites: CHEM 357– 358, CHEM 359-360 or equivalent. Lecs, M W F. T. P. Begley.

This course covers topics at the interface of chemistry and biology with a focus on problems where organic chemistry has made a particularly strong contribution to understanding the mechanism of the biological system at the atomic level. Topics covered include the organic chemistry of carbohydrates, proteins and nucleic acids, strategies for identifying the cellular target of physiologically active natural products, combinatorial chemistry, and chemical aspects of signal transduction, cell division and development.

#### CHEM 461 Introduction to Organic **Chemistry Research**

Fall or spring. 2-4 credits. Prerequisites: CHEM 302 and 358 or 360 with a grade of B- or better or permission of instructor. Selected faculty.

Research in organic chemistry involving both laboratory and library work, planned in consultation with a faculty member.

## CHEM 477 Introduction to Physical **Chemistry Research** Fall or spring. 2–4 credits. Prerequisite:

CHEM 390 with an average of B- or better or permission of instructor. Selected faculty.

Research in physical chemistry involving both laboratory and library work, planned in consultation with a faculty member.

#### CHEM 498 Honors Seminar

Spring. No credit. Admission to standard chemistry majors only by departmental invitation. Additional prerequisites or corequisites: outstanding performance in either (1) two coherent 4-credit units of research in a course such as CHEM 421, 433, 461, or 477; or (2) one 4-credit unit in a course such as CHEM 421, 433, 461, or 477 and summer research equivalent to at least 4 credits in the same subject. W. R. F. Loring.

Informal presentations and discussions of selected topics in which all students participate. Professional issues are discussed, including graduate education, publication, techniques of oral and audiovisual presentation, employment, ethics, chemistry in society, and support of scientific research. Individual research on advanced problems in chemistry or a related subject under the guidance of a faculty member, culminating in a written report.

#### CHEM 600-601 General Chemistry Colloquium

Fall, 600; spring, 601. No credit. R. Staff. A series of talks representative of all fields of current research interest in chemistry given by distinguished visitors and faculty members.

#### CHEM 602 Information Literacy for the **Physical Scientist**

Spring. 1 credit. Primarily for graduate students and undergraduate chemistry

majors doing research. Lec, T. L. Solla. An introduction to physical science information research methods, with hands-on use of traditional and electronic resources. With the continuous information explosion, much time can be wasted and important information missed unless efficient information research strategies is developed. Topic range from property searching to new online and web resources, to managing citations.

#### CHEM 605 Advanced Inorganic Chemistry I: Symmetry, Structure, and Reactivity

Fall. 4 credits. Prerequisite: CHEM 389-390 or equivalent or permission of instructor. Lecs, M W F. P. J. Chirik.

Introduction to chemical bonding and applications of group theory including: hybrid orbitals, molecular orbitals, molecular vibrations and spectroscopy. Application of these models to modern topics in inorganic chemistry, Bishop's Theory and Chemistry.

#### CHEM 606 Advanced Inorganic Chemistry II: Synthesis, Structure, and Reactivity of Coordination Compounds, and Bioinorganic Chemistry

Spring. 4 credits. Lecs, M W F. P. T. Wolczanski.

Synthesis, structure, and reactivity of modern coordination compounds; oxidation and bioinorganic chemistry. Emphasis on bonding models, structure, and reactivity, including the elucidation of mechanisms. Readings at the level of Purcell and Kotz's Inorganic Chemistry, and Jordan's Reaction Mechanisms of Inorganic and Organometallic Systems.

#### CHEM 607 Advanced Inorganic

Chemistry III: Solid-State Chemistry Fall. 4 credits. Prerequisite: CHEM 605 or permission of instructor. Lecs, M W F. . S. Lee.

The third in a three-term sequence. Interdisciplinary approach to solids. Topics include solid-state structure and X-ray diffraction, synthesis methods, defects in solids, phase diagrams, electronic structure, and chemical and physical properties of solids. Text: Solid State Chemistry and Its Applications, by West. Readings from inorganic chemistry and solidstate physics texts.

#### [CHEM 608 Organometallic Chemistry

Spring. 4 credits. M W F. Not offered 2002-2003. P. T. Wolczanski.

Synthesis, structure, and reactivity of organotransition metal complexes. Current literature is emphasized, and background readings are at the level of Collman, Hefedus, Finke, and Norton's Principles and Applications of Organotransition Metal Chemistry.]

#### [CHEM 622 Chemical Communication

Fall. 3 credits. Lecs, M W F. Not offered 2002-2003; next offered fall 2004. J. Meinwald, T. Eisner. For description, see BIONB 623.]

#### CHEM 625 Advanced Analytical Chemistry I

Spring. 4 credits. Prerequisite: CHEM 288 or 390 or equivalent. Lecs, M W F; occasional prelims W. D. B. Zax. The application of molecular spectroscopy to chemical problems. Topics in infrared, NMR.

#### and mass spectroscopy are discussed. [CHEM 627 Advanced Analytical Chemistry II

Spring. 3 credits. Primarily for graduate students. Prerequisite: CHEM 793 or equivalent is preferable. Lecs, M W F. Not offered 2002-2003; next offered spring 2004. D. B. Zax.

Modern techniques in nuclear magnetic resonance. Little overlap is expected with CHEM 625, as this course focuses on more general questions of experimental design. understanding of multipulse experiments, and aspects of coherent averaging theory. Examples taken from both liquid and solidstate NMR. May also be of interest to other coherent spectroscopies.]

#### [CHEM 628 Isotopic and Trace Element Analysis (also NS 690)

Spring. 3 credits. Primarily for graduate students and advanced undergraduates. Prerequisite: CHEM 288 or 390 or 302, or CHEM 208 and PHYS 208, or permission of instructor. Lecs T R. Offered alternate vears. Not offered 2002-2003; next offered spring 2004. J. T. Brenna.

Survey course in modern high precision isotope ratio mass spectrometry (IRMS) techniques and trace/surface methods of analysis. Topics include dual inlet and continuous flow IRMS, thermal ionization MS, inductively coupled plasma MS, atomic spectroscopy, ion and electron microscopies, X-ray and electron spectroscopies, and biological and solid state applications.]

#### [CHEM 629 Electrochemistry

Fall. 4 credits. Primarily for graduate students and junior and senior undergraduates. Prerequisite: CHEM 390 or equivalent (MATH 213 helpful). Lecs, T R.

Not offered 2002–2003. H. D. Abruña. Fundamentals and applications of electrochemistry. Topics include the fundamentals of electrode kinetics, electron transfer theory, the electrical double layer, diffusion, and other modes of transport. A wide range of techniques and their application as well as instrumental aspects are covered.]

#### CHEM 650-651 Organic and

Ogranometallic Chemistry Seminar Fall, 650; spring 651. No credit. Required of all graduate students majoring in organic or bioorganic chemistry. Juniors and seniors are encouraged to attend. M. Staff

A series of talks representative of all fields of current research interest in organic organometallic chemistry, given by research associates, faculty members, and distinguished visitors.

#### CHEM 665 Advanced Organic Chemistry

Fall. 4 credits. Primarily for graduate students and junior and senior undergraduates. Prerequisites: CHEM 358 or 360, and 390 or equivalents or permission of

instructor. Lecs, M W F. D. T. McQuade. CHEM 665 focuses on bonding (covalent and non-covalent), reaction mechanisms, and reactive intermediates, with an emphasis on experimental design and methods. The lecture portion of the course is augmented by both written and oral presentations from the students.

#### CHEM 666 Synthetic Organic Chemistry

Spring. 4 credits. Primarily for graduate students and upperclass undergraduates. Prerequisite: CHEM 665 or permission of instructor. Lecs, T R. D. B. Collum.

Modern techniques of organic synthesis; applications of organic reaction mechanisms and retrosynthetic analysis to the problems encountered in rational multistep synthesis, with particular emphasis on modern developments in synthesis design.

#### CHEM 668 Chemical Aspects of Biological Processes

Fall. 4 credits. Prerequisite: CHEM 360 or equivalent. Lecs, T R. T. P. Begley. A representative selection of the most important classes of enzyme-catalyzed reactions is examined from a mechanistic perspective. Topics discussed include the chemical basis of enzymatic catalysis, techniques for the elucidation of enzyme mechanism, cofactor chemistry, and the biosynthesis of selected natural products. The application of chemical principles to understanding biological processes is emphasized.

#### CHEM 669 Organic and Polymer Synthesis Using Transition Metal Catalysts

Fall. 4 credits. Prerequisite: primarily for graduate students. CHEM 359/360 or equivalent or by permission of the instructor. G. W. Coates.

Transition metal based catalysts are invaluable in both organic and polymer synthesis. This course begins with a brief overview of organometallic chemistry and catalysis. Subsequent modules on organic and polymer synthesis are then presented. Topics of current interest are emphasized.

#### CHEM 670 Fundamental Principles of Polymer Chemistry

Fall. 4 credits. Prerequisite: Physical Chemistry 389/390 and Organic Chemistry 359/360 or equivalent or by permission of instructor. Primarily for graduate students and advanced undergraduates. No previous knowledge of polymers is required. Lecs, T.R. D. Y. Sogah.

This course emphasizes general concepts and fundamental principles of polymer chemistry. The first part of the course deals with general introduction to classes of polymers, molar masses and their distributions, and a brief survey of major methods of polymer synthesis-radical, step growth, ionic, group transfer, Ziegler-Natta, and metathesis polymerization methods-with emphasis on kinetics, mechanisms and stereochemistry rather than on structure. The second part deals with characterization and physical properties. These include: solution properties-solubility and solubility parameters, solution viscosity, molecular weight characterizations [gel permeation chromatography, viscometry, light scattering, osmometry]; bulk properties-thermal and mechanical properties; and structure-property relationships. The discussions will focus on chemistry rather and physics than engineering of polymers

#### CHEM 671 Synthetic Polymer Chemistry (also MS&E 671 and CHEME 675)

Spring. 4 credits. Prerequisites: a minimum of organic chemistry at the level of CHEM 359/360 is essential. Those without this organic chemistry background should see the instructor before registering for the course. Primarily for graduate students and advanced undergraduates. No previous

knowledge of polymer chemistry is required although knowledge of material covered in CHEM 670 or MS&E 452 will be helpful. Lecs, T R. D. Y. Sogah.

This course emphasizes application of organic synthetic methods to the development of new polymerization methods and control of polymer architecture. Emphasis is on modern concepts in synthetic polymer chemistry and topics of current interest: the study of new methods of synthesis, preparation of polymers with reactive end groups, the control of polymer stereochemistry and topology, and the design of polymers tailored for specific uses and properties. Topics on synthesis are selected from the following: step-growth polymerization with emphasis on high performances materials, free radical polymerization and copolymerization, Ziegler-Natta polymerization, recent developments in living free radical, anionic, cationic, group transfer, and ring-opening metathesis polymerizations.

#### [CHEM 672 Kinetics and Regulation of Enzyme Systems

Spring. 4 credits. Primarily for graduate students with interests in biophysical chemistry. Prerequisite: CHEM 288 or 390, BIOBN 331, or equivalents or permission of instructor. Lecs, M W F. Not offered 2002–2003. B. Baird.

Focus is on protein interactions with ligands and consequent changes in structure and activity. Topics include protein structure and dynamics; thermodynamics and kinetics of ligand binding; steady state and transient enzyme kinetics; enzyme catalysis and regulation; and the role of cell membrane receptors in regulating cellular activities.]

#### [CHEM 677 Chemistry of Nucleic Acids

Fall. 4 credits. Primarily for graduate students. Prerequisites: CHEM 358 or 360, and 390 or equivalents. Lecs, M W. Not offered 2002–2003. D. A. Usher.

Structure, properties, synthesis, and reactions of nucleic acids from a chemical point of view. Special topics include antisense and antigene technology, ribozyme reactions (including the ribosome), mutagens, PCR, recent advances in sequencing, DNA as a computer, and alternative genetic materials.]

#### CHEM 678 Statistical Thermodynamics

Fall, 4 credits. Primarily for graduate

students. Prerequisite: CHEM 390 or equivalent. Lecs, M W F. J. Marohn. Course covers the principles of statistical thermodynamics and how they lead to classical thermodynamics. Topics include: ensembles and partition functions; ideal gases and crystals; thermodynamic properties from spectroscopic and structural data; chemical equilibrium; dense gases: virial coefficients; statistical mechanics of solutions, and Bose-Einstein and Fermi-Dirac statistics. At the level of the first twelve chapters of *Statistical Mechanics* by McQuarrie.

#### CHEM 681 Introduction to Quantum Chemistry

Fall. 4 credits. Prerequisites: 1 year of undergraduate physical chemistry, 3 semesters of calculus, 1 year of college physics. Lecs T R. G. S. Ezra.

An introduction to the application of quantum mechanics in chemistry. This course covers many of the topics in CHEM 793–794 at a more descriptive, less mathematical level. The course is designed for advanced undergraduates, chemistry graduate students with a minor in physical chemistry, and graduate students

from related fields with an interest in physical chemistry. At the level of *Quantum Chemistry*, by Levine, or *Molecular Quantum Mechanics* by Atkins.

#### CHEM 686 Physical Chemistry of Proteins

Fall. 4 credits. Primarily for graduate students. Prerequisite: CHEM 288 or 390 or equivalents. Letter grade for undergraduate and graduates. Lecs, M W F. B. Crane.

Physical properties of proteins are presented from a quantitative perspective and related to biological function. Topics include: chemical, structural, thermodynamic, hydrodynamic, electrical and conductive properties of soluble and membrane proteins; conformational transitions, protein stability and folding; photochemistry and spectroscopic properties of proteins; and protein-protein interactions and single molecular studies.

#### CHEM 700 Baker Lectures

Fall, on dates TBA. No credit. Lec, T R. Distinguished scientists who have made significant contributions to chemistry present lectures for approximately six weeks. This year's lecturer: J. M. Saveant, P. D. Diderot.

#### [CHEM 701 Introductory Graduate Seminar

Fall. No credit. Highly recommended for all senior graduate students, in any field of chemistry. Lecs W. Not offered 2002–2003. R. Hoffmann.

A discussion of professional issues facing young chemists as well as life skills: academic and industrial trends, presentations, employment, immigration, publication, research funding, and ethics.]

#### CHEM 716 Introduction to Solid State Organic Chemistry

Spring. 3 credits. Prerequisite: CHEM 607 is recommended or some exposure to (or a course in) solid state chemistry and quantum mechanics. A good undergraduate physical chemistry course may be sufficient for quantum theory, while PHYS 443 or CHEM 793 or CHEM 794 are at a substantially higher level than what is needed. Lecs, M W F. S. Lee.

This course examines some principles of crystallography and also electronic structure theory of solids. We then consider properties such as conduction, superconductivity, ferroelectricity and ferromagnetism. The final portion of this course is concerned with structure-property relations.

#### [CHEM 765 Physical Organic Chemistry I

Fall. 4 credits. Primarily for graduate students. Prerequisite: CHEM 665 or permission of instructor. Lecs, M W F. Not offered 2002–2003. C. F. Wilcox.

Application of computational and experimental techniques to studies of organic reaction mechanisms and the properties of reactive intermediates.]

#### [CHEM 774 Chemistry of Natural Products: Combinatorial Chemistry

Spring. 3 credits. Prerequisites: CHEM 360 and BIOBM 330 or equivalent. Lec, M W F. Not offered 2002–2003. T. P. Begley.

Combinatorial chemistry has revolutionized the way organic chemistry has revolutionized the way organic chemists think about structure function studies on biological systems and the design of inhibitors. This course explores the design, synthesis, screening, and use of natural (i.e., peptide, protein, nucleic acid, carbohydrate) and unnatural (i.e., totally synthetic) libraries.]

#### [CHEM 780 Chemical Kinetics and Molecular Reaction Dynamics

Fall. 4 credits. Prerequisite: CHEM 681 or permission of instructor. Lecs, T R. Not offered 2002–2003. P. L. Houston.

Principles and theories of chemical kinetics and molecular reaction dynamics. Topics include potential energy surfaces, transition state theory, and statistical theories of unimolecular decomposition. Depending on class interest, the course also includes special topics such as surface reactions and photochemistry.]

#### CHEM 787 Modern Methods of Physical Chemistry

Fall. 4 credits. Prerequisites: 1 year of undergraduate physical chemistry, 3 semesters of calculus, 1 year of college physics, (same as for CHEM 681). Lecs, T R. J. H. Freed.

This course provides the methodological background for graduate courses in chemical thermodynamics, kinetics, statistical mechanics, and quantum chemistry. It includes the methods of solution of relevant differential equations; the eigenvalue problem and linear algebra; special functions partial differential equations for diffusion and wave mechanics; integral transforms; functions of a complex variable. At the level of *Mathematical Methods* in *the Physical Sciences, 2nd Edition*, by Boas. There is a midterm and a final exam, and 12 problem sets.

#### CHEM 788 Macromolecular Crystallography (also BIOBM 738)

Fall. 3 credits. S-U grades optional.

Prerequisite: permission of instructor. Lecs, T R. S. E. Ealick.

Lectures cover the fundamentals of x-ray crystallography and focus on methods for determining the three-dimensional structures of macromolecules. Topics include crystallization, data collection, phasing methods, model building, refinement, structure validation and structure interpretation.

#### [CHEM 791 Spectroscopy

Spring. 4 credits. Prerequisite: CHEM 793 or PHYS 443 or equivalent. Lecs, M W F. Not offered 2002–2003. G. S. Ezra.

Principles of molecular rotational, vibrational, and electronic spectroscopy. Topics include interaction of molecules with radiation; Born-Oppenheimer approximation; diatomic molecules; polyatomic molecules; feasible operations and the molecular symmetry group; and spectroscopy, dynamics, and IVR. At the level of Kroto's *Molecular Rotation Spectra*.]

#### [CHEM 792 Molecular Collision Theory Spring. 4 credits. Lecs, T R. Not offered

2002–2003. G. S. Ezra.

The concepts and methods of scattering theory are described with particular emphasis on applications to problems of chemical interest. At the level of Child's *Molecular Collision Theory* and Taylor's *Scattering Theory*.]

#### CHEM 793 Quantum Mechanics I

Fall. 4 credits. Prerequisites: CHEM 390, coregistration in A&EP 321, or CHEM 787 or equivalents or permission of instructor. Lecs, M W F. D. B. Zax.

Course topics include: Schrodinger's equation, wave packets, uncertainty principle, matrix mechanics, orbital and spin angular momentum, exclusion principle, perturbation theory, and the variational principle. At the level of Cohen-Tannoudji's *Quantum Mechanics*.

#### CHEM 794 Quantum Mechanics II

Spring. 4 credits. Prerequisites: CHEM 793 or equivalent and the equivalent of or coregistration in A&EP 322, or permission of instructor. Lecs, M W F. G. S. Ezra.

Topics include: WKB theory; density matrix; time-dependent perturbation theory; molecule-field interaction and spectroscopy; group theory; angular momentum theory; scattering theory; Born-Oppenheimer appoximation and molecular vibrations; molecular electronic structure.

#### **CHEM 796** Statistical Mechanics

Spring. 4 credits. Prerequisite: CHEM 678 and 793 or equivalent. Lecs, T R. Staff. Statistical mechanics of systems of interacting molecules. Structure and thermodynamics of molecular liquids. Phase transitions and critical phenomena. Computer simulation methods Nonequilibrium statistical mechanics, with application to reactive and nonreactive dynamics in the liquid state.

#### CHEM 798 Bonding in Molecules

Fall. 4 credits. Prerequisite: some exposure to quantum mechanics; a good undergraduate physical chemistry course may be sufficient, or CHEM 681. Physics 433 or CHEM 793–794 are at a substantially higher level than what is needed. Consults instructor if in doubt. Lecs, T R. R. Hoffmann.

The aim is to build a qualitative picture of bonding in all molecules, including organic, inorganic, organometallic systems and extended structures (polymer, surfaces, and three-dimensional materials). The approach uses molecular orbital theory to shape a language of orbital interactions. Some basic quantum mechanics is needed, more will be taught along the way. The course is directed at organic, inorganic, and polymer chemists who are not theoreticians; it is useful for physical chemists, engineers and physicists as well.

FALCON Program (Chinese)

See Department of Asian Studies.

#### **CLASSICS**

- H. Pelliccia (chair), L. S. Abel, F. M. Ahl,
- C. Brittain (director of undergraduate studies),
- K. Clinton, J. E. Coleman, G. Fine,
- J. R. Ginsburg, G. Holst-Warhaft, T. Irwin,
- G. M. Kirkwood (emeritus), D. Mankin,
- A. Nussbaum, P. Pucci, H. R. Rawlings III, J. Rusten, D. R. Shanzer (director of graduate
- studies), C. Sogno, B. Strauss

Cornell University has long recognized the importance of studying the civilizations of ancient Greece and Rome. Particularly in an age of increasing specialization, study of the Classics is widely viewed as an excellent means of acquiring a liberal education; at Cornell, we are deeply interested in the continuing humanistic values contained in the literature of the ancient world and in gaining a fuller understanding of these important cultures and their imprint on subsequent ages.

The Classics department at Cornell is one of the oldest and largest in the country. With twenty-seven faculty members—including professors with related interests in the departments of History, Philosophy, Comparative Literature, History of Art, Modern Languages, Linguistics, and Near Eastern Studies, and in the Archaeology, Medieval Studies, and Religious Studies programs—the range of instruction is broad. The department embraces both the traditional core studies of ancient language, literature, philosophy, art, and history, and the different approaches to its material yielded by comparative study of Mediterranean civilizations, peace studies, and feminist and literary theory.

The department offers a wide variety of Classical Civilization courses and seminars in English on such subjects as Greek mythology, ancient mystery religions, early Christianity, and Greek and Roman society; ancient epic, lyric, tragedy, comedy, satire, novels, and love-poetry; Periclean Athens, Republican Rome, the Roman Empire, Goths, Vandals and Huns, and Byzantine history; and Plato, Aristotle, and Hellenistic philosophy. These courses are designed to introduce aspects of Classical antiquity to the students with very divergent primary interests. Other Classical civilization courses with a wide appeal are those on art and archaeology, and dendrochronology (the study of tree-rings to determine the date of ancient artifacts). These courses make use of the university's large collections of ancient coins, and of reproductions of sculptures, inscriptions, and other ancient objects. Students who wish to gain first-hand archeological experience may also join one of several summer Cornell-sponsored field-projects in Greece and Turkey.

The study of language is a vital part of Classics. The department offers courses ranging from 100-level classes designed to further the understanding of English and modern scientific terminology through the study of the Latin and Greek sources of much of its vocabulary, to courses in linguistics on the morphology and syntax of the ancient languages, comparative grammar, and Indo-European (the reconstructed source of the family of languages that includes Greek, Latin, Sanskrit and most modern European languages). The core function of the department is the study of ancient Greek and Latin. Elementary Greek and Latin are taught in both two-semester courses and intensive summer or one-semester courses. (For students whose Latin is a bit rusty, the department also offers a rapid, one-semester review class.) Students with a more advanced knowledge of Greek or Latin can take advantage of a wide selection of courses, from intermediate language classes at the 200-level, which brush up and broaden knowledge of syntax and vocabulary, to graduate and faculty reading groups. All of these courses use exciting literary texts, whether the poems of Catullus and Virgil, or the dialogues of Plato and Xenophon, at the 200-level, or, in the reading groups, the latest papryological discoveries, such as the 'new' fragments of Empedocles' cosmic poem or the 'new' epigrams of Posidippus.

The primary purpose of language-instruction is to enable the study at first-hand of the extraordinary range of powerful and challenging texts in Greek and Latin. The department offers undergraduate and graduate seminars on literary, linguistic, historical, and philosophical topics, studied through the Greek and Latin works of authors from Homer (probably from the 8th Century BCE) to

Boethius (6th Century CE), and occasionally from later writers such as Dante, Petrarch, or Milton. The department strives to adapt its program to the needs of individual students from all disciplines. If you are interested in studying a Classical text or period that is not offered in the Courses of Study, please contact the directors of graduate or undergraduate studies.

#### **Majors in Classics**

The Department of Classics offers majors in Classics, Greek, Latin, and Classical Civilization

#### Classics

The Classics major has two requirements: (i) seven courses in Greek and Latin numbered 201 or above; and (ii) 3 courses in related subjects selected in consultation with the student's departmental advisor (see below). Classics majors are required to take a minimum of one 300-level course in one language and two 300-level courses in the other.

Students who are considering the option of undertaking graduate study in Classics are strongly advised to complete the Classics major.

#### Greek

The Greek major has three requirements: (i) Classics 201; (ii) 5 courses in Greek numbered 203 and above; and (iii) 3 courses in related subjects selected in consultation with the student's departmental advisor (see below). The courses in Greek must include at least 3 at the 300-level.

#### Latin

The Latin major has three requirements: (i) Classics 205; (ii) 5 courses in Latin numbered 207 and above; and (iii) 3 courses in related subjects selected in consultation with the student's departmental advisor (see below). The courses in Latin must include at least 3 at the 300-level.

#### **Classical Civilization**

The Classical Civilization major has four requirements: (i) qualification in Latin and Greek or proficiency in either; (ii) Classics 211 or History 265, Classics 212 or History 268, and Classics 220; (iii) 5 courses selected from those listed under Classical civilization. Classical archaeology, Ancient Philosophy, Latin (numbered 206 and above), and Greek (numbered 201 and above); and (iv) 3 courses in related subjects selected in consultation with the student's departmental advisor (see below).

With the permission of the DUS, other survey courses may be substituted for the those listed in (ii).

#### **Related Subjects**

Classics is an interdisciplinary field concerned with the study of Mediterranean civilizations from the 15th century BCE to the 6th century CE. Subjects in the field include Greek and Latin language, literature and linguistics; ancient philosophy, history, archaeology and art history; papyrology, epigraphy, and numismatics. In addition to the required courses in language and literature, the majors include a requirement for related courses intended to give breadth and exposure to the

other disciplines within the field and to enrich the student's study of Classical languages and literature. Since the influence of the Greek and Roman world extended far beyond antiquity, a related course may focus on some aspect of the classical tradition in a later period. Students select related courses in consultation with their departmental advisors or the DUS.

#### Honors

Candidates for the degree of Bachelor of Arts with honors in Classics, Greek, Latin, or Classical civilization must fulfill the requirements of the appropriate major and complete the two-semester honors course, Classics 472. (Credit for the honors course may be included in the credits required for the major.) Candidates for honors must have a cumulative average grade of B, and an average of B+ in their major. Students choose an honors advisor by the end of their sixth semester, in consultation with the departmental Honors Committee or the DUS. By the second week of their seventh semester, they submit an outline of their proposed research to their advisor and the Committee. The thesis is written in the second semester of the course. under the supervision of the student's honors advisor. The level of honors is determined by the Committee, in consultation with students' advisors. Copies of successful honors theses are filed with the department.

#### Independent Study

Independent study at the 300 level may be undertaken by undergraduates upon completion of one semester of work at the 300 level. 200-level independent study may be undertaken only in the case of documented schedule conflict and with the permission of the DUS.

#### Study Abroad

Cornelf is associated with four programs that provide opportunities for summer, semester, or year-long study abroad in Greece and Italy. The American School of Classical Studies at Athens offers a Summer Program for graduate students and qualified undergraduates; College Year in Athens offers semester-long courses (consult Cornell Abroad for details) The Intercollegiate Center for Classical Studies in Rome provides semester-long courses in Latin, Greek, ancient history, art, archaeology, and Italian; the American Academy in Rome offers both full-year and summer programs for qualified graduate students. The Classics Department awards several travel grants each year for graduate students from the Townsend Memorial Fund; undergraduates are eligible for the Caplan Fellowships (see 'awards' below). Detailed information on these programs is available in the Classics Office, 120 Goldwin Smith Hall.

#### Summer Support for Language Study

The Department of Classics has at its disposal a number of endowments established to assist with the tuition of students who wish to enroll in Intensive Latin or Greek in the Cornell summer session. These courses are designed to enable students to enter second-year Latin or Greek the following fall. Preference is given to Classics undergraduate majors, and other students needing Latin or Greek for completion of their majors; dyslexic students are accorded additional preference. Applications are due to the chair of the Department of Classics by March 31st. See also under "Awards" below.

#### Placement, qualification, and proficiency in Latin, Ancient Greek, and Modern Greek

Placement of first-year students in Latin and ancient Greek courses is determined by an examination given by the Department of Classics during orientation week. Oualification and proficiency in Latin and Ancient Greek may be achieved by passing the relevant language courses or by special examination. Special examinations are offered only in the first week of each semester. For details concerning these examinations and qualification or proficiency in Modern Greek, contact the director of undergraduate studies.

#### **Freshman Writing Seminars**

The department offers freshman writing seminars on a wide range of Classical and Medieval topics. Consult John S. Knight Writing Seminar Program brochures for times, instructors, and descriptions.

#### Awards

Departmental majors are eligible for several awards administered by the Classics department. The Kanders-Townsend Prize Fellowships are awarded annually to three or four freshmen or sophomores for summer study of Intensive Greek or Latin at Cornell and provide tuition and a stipend to cover living expenses. The Harry Caplan Fellowships are awarded annually to one or two outstanding juniors by the College of Arts and Sciences for travel in Europe or the Near East.

#### **Classical Civilization**

#### [CLASS 100 Word Power: Greek and Latin Elements in the English Language

Spring. 3 credits. Not offered 2002-2003. This course gives the student with no knowledge of the classical languages an understanding of how the Greek and Latin elements that make up over half our English vocabulary operate in both literary and scientific English usage. Attention is paid to how words acquire their meaning and to enlarging each student's working knowledge of vocabulary and grammar.]

#### CLASS 109 English Words: Histories and Mysteries (also LING 109) # (III)

Fall. 3 credits. M. Weiss. For description, see LING 109.

CLASS 211 The Greek Experience # (IV) Fall. 3 credits. Limited to 50 students. F. Ahl.

An introduction to the literature and thought of ancient Greece. Topics include epic and lyric poetry, tragedy and comedy, and historical, political, philosophical, and scientific writings. Some attention is also given to the daily life of ordinary citizens, supplemented by slides of ancient art and architecture.

## CLASS 212 The Roman Experience # (IV)

Spring, 3 credits. Staff. An introduction to the civilization of the Romans as expressed in their literature, religion, and social and political institutions.

#### CLASS 217 Initiation to Greek Culture # (IV)

Fall. 4 credits. Limited to 18 students. This course is intended especially for freshmen (a few exceptionally motivated sophomores or upperclass students may be accepted). Apply in writing to the Chair, Department of Classics, 120 Goldwin Smith Hall. P. Pucci and L. Abel.

Knowledge of Greek or Latin is not necessary, since all texts are in translation. What is necessary is the willingness to participate in three one-hour seminars each week and also a supplementary one- or two-hour session, during which the class participates in workshops with specially invited guests.

This course covers a wide range of Greek literary and philosophical works, as well as modern critical and philosophical writings on the Greeks. Our focus throughout is on the status of language, the many forms of discourse that appear in the literature, and the attempts the Greeks themselves made to overcome the perceived inadequacies and difficulties inherent in language as the medium of poetry and philosophy.

We inquire into the development of philosophy in the context of a culture infused with traditional, mythological accounts of the cosmos. We ask how poetic forms such as tragedy responded to and made an accommodation with philosophical discourse while creating a most emotional effect on the audience; how the first historians, using literary and philosophical discourse, created space for their own inquiry; and we discuss how these issues persist and are formulated in our own thinking.

#### [CLASS 218 Initiation to the Classical Tradition # (IV)

Spring. 4 credits. See CLASS 217 front matter. Not offered 2002–2003.]

#### [CLASS 222 Ancient Fiction # (IV) Fall. 3 credits. All readings are in English.

Not offered 2002-2003. Ancient fiction blended ideal romance, fantastic adventure, and social realism into new literary forms that would have a lasting impact on the medieval and modern imagination, from early Christian and Renaissance literature to opera and film. This course surveys major works of fiction by Greek and Roman authors in translation, including the novels by Achilles Tatius, Apuleius, Chariton, Heliodorus, Longus, and Petronius and a selection of shorter pieces from related genres such as satire, biography, and travel accounts. Lecture and discussion address the development of several defining features: the central themes of love and death, the design and involution of narrative structure, the play of intertextuality, the drawing of imaginary landscapes, the portrayal of ethnic and social identity, and the labile classification of truth, or historicity, and falsehood, or fictionality. Students also evaluate several theoretical approaches to the interpretation of ancient fiction and consider the influence of the ancient novels on their successors.]

#### CLASS 223 The Comic Theater (also COM L 223 and THETR 223) # (IV)

Fall. 3 credits. J. Rusten. The origins of comic drama in ancient Greece and Rome, and its subsequent incarnations especially in the Italian renaissance (*Commedia erudita* and *Commedia dell'arte*), Elizabethan England, seventeenth-century France, the English Restoration, and Hollywood in the thirties and forties. Chief topics include: the growth of the comic theatrical tradition and conventions; techniques and themes of comic plots (trickster, parody, farce, caricature); and the role of comedy in society. All readings in English.

#### [CLASS 229 War and Peace in Greece and Rome (also HIST 228) # (III or IV)

Fall. 4 credits. Not offered 2002–2003. B. Strauss.

For description, see HIST 228.]

#### CLASS 231 Ancient Philosophy (also PHIL 211) # (IV) Fall. 4 credits. G. Fine.

Fall. 4 credits. G. Fine. For description, see PHIL 211.

#### [CLASS 234 Seminar: Eyewitness to War in the Ancient World (also HIST 232) # (III or IV)

Spring. 3 credits. Not offered 2002–2003. B. Strauss.

A study of ancient soldier-historians who participated in the campaigns about which they later wrote. Topics include historicity, autobiography, propaganda, prose style. Readings include selections from Thucydides, Xenophon, Julius Caesar, Josephus, Ammianus Marcellinus as well as, for comparative purposes, modern soldier-historians.]

#### CLASS 236 Greek Mythology (also COM L 236) # (IV)

Fall 2002 and summer 2003. 3 credits. Limited to 200 students. D. Mankin.

A survey of the Greek myths, with emphasis on the content and significance of the myths in Mediterranean society, including the place of myth in Greek life and consciousness; the factors and influences involved in the creation of myths; and the use of myths for our understanding of Greek literature, religion, and moral and political concepts.

#### [CLASS 237 Greek Religion and Mystery Cuits (also RELST 237) # (IV) Spring. 3 credits. Not offered 2002–2003.

K. Clinton.

Greek religion constitutes one of the essential features of ancient Greek civilization and distinguishes it from later Western civilization. Since religion permeates Greek culture, including the major art forms (epic poetry, tragedy, comedy, architecture, painting, and sculpture), the course investigates the interaction of religion with these forms-an investigation that is fruitful both for the understanding of Greek religion and the forms themselves, some of which, like tragedy, originated in cult. A representative variety of cults and their history are studied with special emphasis on mystery cults, such as the Eleusinian mysteries of Demeter and Persephone, the Kabiroi, the Great Gods of Samothrace, and Bacchic rites.]

#### CLASS 238 The Ancient Epic and Beyond # (IV)

Spring. 3 credits. K. Clinton. We move, Odysseus-like, to the West: beginning with Homer's *Iliad* and *Odyssey*, we continue in the Hellenistic and Augustan eras with Apollonius of Rhodes' Argonautica and Virgil's Aeneid. A shift in space and time has us conclude with two New World maritime epics: Herman Melville's Moby Dick and Derek Walcott's Omeros.

#### CLASS 244 Psyche, Ego, and Self # (IV)

Fall. 4 credits. C. Brittain and H. Pelliccia. It is often claimed that the ancient Greeks lacked the "modern Western conception of the self," and its subsequent development was partly a result of the emergence of more instrospective literary genres, such as autobiography (e.g. Augustine's Confessions). We examine the evidence for these claims in a variety of philosophical, literary, and psychological sources. Our starting point is the ancient Greek conceptions of soul or psyche, especially as these conceptions manifest themselves in decision-making. We move from Herodotus and Plato (5th-4th C. BCE) to St. Augustine 4th-to 5th C. CE), and end with early modern European (especially Cartesian) conceptions of the ego. Special attention is paid to the influence of a work's literary genre upon the representation of self in it, and to self-preservation as a function of rhetoric. Selected readings come from Herodotus, Euripides, Plato, Aristotle, Augustine, Descartes, and a variety of contemporary authors (philosophical, anthropological, and psychological).

Note: This is a sophomore writing seminar sponsored by the John S. Knight Institute. While not restricted to sophomores, they will be given priority since the course is intended to offer them (especially those considering Classics or Philosophy majors) an opportunity to develop their writing by working closely with faculty in an interdisciplinary cotext. We occasionally meet together with PHIL 216 whose reading list overlaps significantly with our own.

#### CLASS 258 Periclean Athens # (IV)

Spring. 4 credits. H. R. Rawlings III and J. Rusten.

The first five weeks provide a synoptic view of Athens' historical and cultural achievement in the middle of the fifth century B.c.--the traditional pinnacle of "The Glory that was Greece." Readings are taken from Greek historians, philosophers, poets, and documentary texts. At least two of the (75-minute) lectures are devoted to art history and delivered by a guest speaker. The next 7-8 weeks follow the course of the Peloponnesian War to its end; readings from Thucydides are interwoven with contemporaneous texts composed by the dramatists (Sophocles, Euripides, and Aristophanes) and the sophists (supplemented with readings from Plato). The remaining classes consider the fate of Socrates and a few other fourth-century developments. The basic aim of the course is to approach an understanding of how and why a vital and creative society came unglued. There are weekly discussion sections.

#### [CLASS 260 Conceptions of the Self in Classical Antiquity # (IV)

Spring. 4 credits. There are no prerequisites for this course; all readings are in

English. Not offered 2002–2009. C. Brittain. The idea of a person or a 'self' seems to be something determined by nature: we each have one mind, a unique personality, and the capacity to act as moral agents. But the way in which we conceive of ourselves also depends on our beliefs about human nature, rationality, freedom, luck, and society. This course examines a variety of very different conceptions of the self from the period 700 BCE to 400 CE, using a range of texts from Greek and Roman literature (including epic and tragedy), medical theory, and philosophy (both pagan and Christian).]

#### [CLASS 265 Ancient Greece from Homer to Alexander the Great (also HIST 265) # (III)

4 credits. Open to freshmen. Not offered 2002–2003. B. Strauss. For description, see HIST 265.]

#### CLASS 268 A History of Rome from Republic to Principate (also HIST 268) # (III)

Spring. 4 credits. Open to freshmen. J. Ginsburg. For description, see HIST 268.

#### [CLASS 291 Classical Indian Narrative (also ASIAN 291) @ # (IV) Spring. 3 credits. Not offered 2002–2003. C. Minkowski.]

CLASS 303–304 Independent Study in Classical Civilization, Undergraduate

Level

303, fall; 304, spring. Up to 4 credits.

#### CLASS 318 Aristotle (also PHIL 310)

Spring. 4 credits. J.Whiting. Aristotle's practical and productive works (his *Ethics, Politics, Rhetoric,* and *Poetics*), with attention to their grounding in his theoretical works.

#### [CLASS 324 Translation for the Theatre (also THETR 423/623 and COM L 446/ 646) # (IV)

Spring. 4 credits. Prerequisites: proficiency in language other then English; coursework in dramatic literature, directing, or playwriting. Not offered 2002–2003. J. E. Gainor.

For description, see THETR 423/623.]

#### [CLASS 331 Goths, Vandals, Franks, and Romans # (IV)

Fall. 4 credits. Not offered 2002–2003. D. Shanzer.

Contemporary views of the Visigothic Sack of Rome by Alaric in 410 are followed by three different case-studies for co-existence of Roman and barbarian in Late Antiquity: the Vandal kingdom (North Africa), the Ostrogothic kingdom (Italy), and finally the one that lasted, the Frankish kingdom (Gaul). Readings include contemporary primary works as well as modern historiography.]

#### [CLASS 333 Greek and Roman Mystery Cults and Early Christianity (also RELST 333) # (IV)

Fall. 4 credits. A previous course in Classics (civilization or language) or Religious Studies 101 is recommended. Not offered 2002–2003. K. Clinton.

A study of the controversial question of religious continuity between paganism and early Christianity. After a brief survey of classical mystery cults and Hellenistic religion, the course focuses on such Hellenistic and Roman cults as the mystery cults of Isis, Bacchus, Mithras, and Attis and the Great Mother and on the distinctive features that contributed to their success. Discussion of Christian liturgy and beliefs to determine what Christianity owed to its pagan predecessors and to isolate the factors that contributed to its triumph over the "rival" pagan cults of late antiquity.]

#### [CLASS 339 Plato (also PHIL 309) # (IV) Fall. 4 credits. Prerequisite: at least 1 previous course in philosophy. Not offered 2002–2003. G. Fine.

For description, see PHIL 309.]

#### CLASS 345 The Tragic Theater (also

**COM L 344 and THETR 345) # (IV)** Spring. 4 credits. Limited to 40 students. F. Ahl.

Tragedy and its audiences from ancient Greece to modern theater and film. Topics: origins of theatrical conventions; Shakespeare and Seneca; tragedy in modern theater and film. Works studied will include: Aeschylus' Agamemnon; Sophocles' Oedipus Tyrannus, Philoctetes; Euripides' Alcestis, Helen, Iphigeneia in Aulis, Orestes; Seneca's Thyestes, Trojan Women; Shakespeare's Julius Caesar, Titus Andronicus, Othello; Strindberg's The Father, Dürrenmatt's The Visit; Bergman's Seventh Seal; Cacoyannis' Iphigeneia.

#### [CLASS 382 Greeks, Romans, and

Victorians (also COM L 382) # (IV) Spring. 4 credits. Not offered 2002–2003. F. Ahl.

This course explores how nineteenth-century (and especially Victorian English and Irish) poets, dramatists, and to a lesser extent, novelists, present Greco-Roman antiquity. The varied influences of Vergil and Homer, Seneca and Sophocles, Plautus and Aristophanes, Horace, and Greek lyric poetry are discussed in selected works of Thomas More, Shelley, Byron, Swinburne, W. S. Gilbert, Oscar Wilde, and the pre-Raphaelites and Victorian poets.]

#### [CLASS 390 The Sanskrit Epics (also ASIAN 390) @ # (IV)

4 credits. Not offered 2002–2003. C. Minkowski.

For description, see ASIAN 390.]

#### [CLASS 395 Classical Indian Philosophical Systems (also ASIAN 395 and RELST 395) @ # (IV)

Spring, 4 credits. Prerequisite: some background in philosophy or in classical Indian culture. Not offered 2002–2003. C. Minkowski.

For description, see ASIAN 395.]

#### CLASS 413 Topics in Ancient Philosophy (also PHIL 413)

Fall. 4 credits. J. Whiting. Mind, self, and psychopathology in ancient philosophy.

#### [CLASS 445 Classic Modern Historiography of Ancient Greece (also HIST 435) (III)

Fall. 4 credits. Prerequisite: an introductory course in ancient Greek history or civilization or permission of the instructor. Not offered 2002–2003. B. Strauss.

This upper-level seminar is an introduction to some of the main themes, directions, and controversies in modern research on ancient Greece. We read selections from the leading works of scholarship on ancient Greece from the nineteenth and twentieth century, including such authors as Grote, Burckhardt, Cornford, Glotz, Momigliano, M. I. Finley, Ste. Croix, Vernant, Vidal-Naquet, and the current crop of scholars.]

#### [CLASS 450 The Peloponnesian War (also CLASS 632 and HIST 450/ 630) # (III)

Fall. 4 credits. Prerequisites: CLASS 211 or 217, HIST 265, or permission of instructor. Not offered 2002–2003. B. Strauss. For description, see HIST 450.]

#### [CLASS 463 Gender and Politics in the Roman World (also HIST 463 and WOMNS 464) # (III or IV) Spring. 4 credits. Not offered 2002–2003.

Spring. 4 credits. Not offered 2002–2003. J. Ginsburg.

An undergraduate seminar examining the relationship between gender and politics in the late Roman Republic and early Empire. Among the questions this course addresses are: was politics the exclusive domain of men in Roman society (as is generally assumed) or does a broader definition of politics and an understanding of the various forms political activity in ancient Rome might have taken allow a place for women in Roman political life? What role did gender have in Roman political discourse and ideology? Why did issues such as family, marriage, and sexuality become subjects of political debate and legislation?]

#### [CLASS 469 Equality and inequality in Ancient Greece (also HIST 469) # (III or IV)

Fall. 4 credits. Prerequisite: HIST 265, CLASS 211 or 217, or written permission of the instructor. Not offered 2002–2003. B. Strauss.

For description, see HIST 469.]

#### [CLASS 480 Roman Society and Politics under the Julio-Claudians (also HIST 473) # (III or IV)

Spring. 4 credits. Prerequisite: CLASS 212, HIST 268, or permission of instructor. Not offered 2002–2003. J. Ginsburg.

This course examines several of the important social and political changes in Roman society under Augustus and his successors, the Julio-Claudians. Topics to be investigated include Augustus's consolidation of power through political and social revolution, the Augustan attempt to regulate family life and social relations by legislation, the relation of the emperor Tiberius with the members of the old ruling class, the growth of the imperial bureaucracy and the new opportunities for social mobility, the political opposition to Claudius and Nero, Nero's cultural and provincial policy, and the manipulation of the imperial cult. All readings will be in English.]

#### CLASS 700 Doctoral Dissertation Research

Fall, spring. Letter grade only (0 credit). Staff.

#### CLASS 711-712 Independent Study for Graduate Students in Classical Civilization

711, fall; 712, spring. Up to 4 credits.

#### Greek

#### **CLASS 101 Elementary Ancient Greek I** Fall. 4 credits. K. Clinton.

Introduction to Attic Greek. Designed to enable the student to read the ancient authors as soon as possible.

**CLASS 103 Elementary Ancient Greek II** Spring. 4 credits. *Provides language qualification*. Prerequisite: 101 or equivalent. Staff. A continuation of CLASS 101, prepares students for CLASS 201.

#### [CLASS 104 Intensive Greek

Summer. 6 credits. *Provides language qualification*. Not offered 2002–2003. Staff. An intensive introduction combining the fundamentals of ancient Greek grammar with readings from a variety of classical authors in the original Greek. Prepares students in a single semester for CLASS 201.]

#### CLASS 201 Intermediate Ancient Greek # (IV)

Fall. 3 credits. Prerequisite: CLASS 103 or 104 or equivalent. C. Brittain. Selected readings from Greek prose.

#### CLASS 203 Homer # (IV)

Spring. 3 credits. Prerequisite: CLASS 201. J. Coleman. Readings in the Homeric epic.

Readings in the Homene epic.

[CLASS 210 Attic Prose # (IV) 3 credits. Prerequisite: CLASS 201. Not offered 2002–2003.]

#### CLASS 225-226 Independent Study In

**Groek, Undergraduate Level** 225, fall; 226, spring. Up to 4 credits. Only by permission of the DUS in the case of documented schedule conflict. Staff.

#### [CLASS 305 The Greek New Testament and Early Christian Literature # (IV)

Fall. 4 credits. Prerequisite: CLASS 201 or equivalent, or permission of instructor. Not offered 2002–2003. D. Shanzer.

More advanced readings from the Acts of the Apostles and some exercises on the Gospels are followed by readings from Early Christian Greek literature. The latter may include theological tracts and hagiographical texts, e.g. martyr-acts, such as the Passion of Pionius or the Passion of Perpetua.]

#### CLASS 307–308 Independent Study in Greek, Undergraduate Level

307, fall; 308, spring. Up to 4 credits. Staff.

#### CLASS 310 Greek Undergraduate Seminar # (IV)

Fall and spring. 4 credits. Prerequisite: two 200-level courses in Greek or permission of instructor. Fall topic: Euripides and Aristophanes. P. Pucci. Spring topic: Homer. K. Clinton.

#### CLASS 342 Greek Prose Composition (IV)

Fall. 4 credits. Prerequisite: CLASS 201 or permission of instructor. A. Nussbaum.

CLASS 417 Advanced Readings in Greek: Thucydides (also ENGL 417, ENGL 617) # (IV)

Fall. 4 credits. J. Rusten.

#### CLASS 419 Advanced Greek

**Composition (IV)** Spring. 4 credits. Prerequisite: CLASS 342 or equivalent. J. Rusten.

#### CLASS 421 Greek Comparative Grammar (also LING 451) (III)

Fall. 4 credits. A. Nussbaum.

The prehistory and evolution of the sounds and forms of ancient Greek as reconstructed by comparison with the other Indo-European languages.

#### CLASS 427 Homeric Philology (also LING 457) (III)

Spring. 4 credits. A. Nussbaum. The language of the Homeric epics: dialect background, archaisms, modernizations. The notion of a Kunstsprache: its constitution, use, and internal consistency. The phonological and morphological aspects of epic compositional technique.

#### CLASS 511 Greek Philosophical Texts (also PHIL 411)

Fall and spring: up to 4 credits. Prerequisites: knowledge of Greek and permission of instructor. Staff.

Readings of Greek philosophical texts in the original.

#### **CLASS 545 Graduate TA Training**

Fall and spring. 1 credit. H. Pelliccia and F. Ahl.

Pedagogical instruction and course coordination. Required for all graduate student teachers of CLASS (Latin) 105–106 and Classics First-Year Writing Seminars.

#### [CLASS 555 Graduate Proseminar

Fall. 1 credit. Not offered 2002–2003. Staff. Graduate students are introduced to the tools, techniques, and methods of classical scholarship.]

#### [CLASS 605–606 Graduate Survey of Greek Literature

605, fall; 606, spring. 4 credits each term. Prerequisite: linguistic proficiency to be determined by instructor. Not offered 2002–2003.

A survey of Greek literature in two semesters. CLASS 605: Greek literature from Homer to the mid-fifth century. CLASS 606: Greek literature from the late fifth century to the Empire.l

#### [CLASS 632 Topics in Ancient History

**(also CLASS 450 and HIST 450/630)** Fall. 4 credits. Not offered 2002–2003. B. Strauss.

For description, see HIST 630.]

#### CLASS 671 Graduate Seminar in Greek: Pindar

Fall. 4 credits. H. Pelliccia.

#### CLASS 672 Graduate Seminar in Greek: Odyssey

Spring. 4 credits. P. Pucci.

CLASS 701–702 Independent Study for Graduate Students in Greek 701, fall; 702, spring. Up to 4 credits.

#### Latin

#### CLASS 105 Elementary Latin I Fall. 4 credits. Staff.

An introductory course designed to prepare students to start reading Latin prose at the end of a year. The class moves swiftly and meets daily. Work includes extensive memorization of vocabulary and paradigms; study of Latin syntax; and written homework, quizzes, tests, and oral drills.

#### CLASS 106 Elementary Latin II

Spring. 4 credits. *Provides language qualification*. Prerequisite: 105 or equivalent. Staff.

A continuation of CLASS 105, using readings from various authors; prepares students for CLASS 205.

#### CLASS 107 Intensive Latin

Spring and summer. 6 credits. *Provides language qualification*. A. Nussbaum.

An intensive introduction that lays down the essentials of Latin grammar before progressing rapidly to readings from selected authors in the original Latin. Prepares students in a single semester for CLASS 205.

#### CLASS 108 Latin in Review

Fall. 4 credits. *Provides language qualification*. Prerequisite: placement by

departmental examination. F. Ahl. This course is designed to accommodate students who have had some Latin, but are insufficiently prepared to take 106. It begins with review of some material covered in 105 and then continues with second-term Latin material (106). The class moves swiftly and meets daily. Work includes extensive memorization of vocabulary and paradigms; study of Latin syntax; and written homework, quizzes, tests, and oral drills. Students should be ready for CLASS 205 by the end of the course.

#### CLASS 205 Intermediate Latin # (IV)

Fall and spring. 3 credits. *Provides language proficiency*. Prerequisite: CLASS 106, 107, 108, or placement by departmental examination. Fall: J. Ginsburg; spring: staff.

Readings in Latin prose.

#### CLASS 207 Catulius # (IV)

Spring. 3 credits. Prerequisite: CLASS 205. P. Pucci.

[CLASS 208 Roman Drama # (IV) 3 credits. Prerequisite: CLASS 205. Not offered 2002–2003. Staff.]

CLASS 216 Vergli # (IV) Fall, 3 credits. Prerequisite: CLASS 205. K. Clinton.

#### CLASS 227–228 Independent Study in Latin, Undergraduate Level

227, fall; 228, spring. Up to 4 credits. Only by permission of the DUS in the case of documented schedule conflict. Staff.

#### CLASS 312 Latin Undergraduate Seminar # (IV) Fall and spring, 4 credits. Prerequisite:

Fall and spring. 4 credits. Prerequisite: 2 terms of 200-level Latin or permission of instructor. Fall topic: Roman Drama. D. Mankin. Spring topic: Suetonius and Tacitus. J. Ginsburg.

- [CLASS 314 The Augustan Age # (IV) 4 credits. Prerequisite: 2 terms of 200-level Latin or permission of instructor. Not offered 2002–2003. Staff.]
- CLASS 315-316 Independent Study in Latin, Undergraduate Level 315, fall; 316, spring. Up to 4 credits. Staff.
- [CLASS 317 Roman Historiography # (III or IV)

4 credits. Prerequisite: 1 term of 300-level Latin or permission of instructor. Not offered 2002–2003. J. Ginsburg.]

[CLASS 341 Latin Prose Composition # 4 credits. Prerequisite: 1 term of 200-level Latin or permission of instructor. Not offered 2002–2003. K. Clinton.]

#### [CLASS 369 Intensive Medieval Latin Reading # (IV)

Summer only. 4 credits. Not offered 2002-2003. D. Shanzer.

Web site: www.arts.cornell.edu/classics/ Classes/Classics 369/Med\_Latin.html] **CLASS 411 Advanced Readings in Latin** Literature: Tacitus, Dialogus and Germania # (IV) Fall. 4 credits. J. Ginsburg.

**CLASS 412 Advanced Readings in Latin** Literature # (IV) Spring, 4 credits. D. Shanzer.

#### [CLASS 420 Plautus # (IV)

4 credits. Prerequisite: at least one 300level Latin course or permission of instructor. Not offered 2002-2003. A. Nussbaum.l

## [CLASS 422 Latin Comparative Grammar (also LING 452) (III)

Not offered 2002-2003

The prehistory and evolution of the sounds and forms of Classical Latin as reconstructed by comparison with the other Indo-European languages.]

#### [CLASS 441 Advanced Latin Prose Composition

Spring. 4 credits. For graduate students. Only those undergraduates who have completed CLASS 341 and have permission of the instructor may enroll. Not offered 2002-2003. Staff.]

#### [CLASS 555 Graduate Proseminar

Fall, 1 credit, Not offered 2002-2003, Staff, Graduate students are introduced to the tools, techniques, and methods of Classical scholarship.]

#### [CLASS 603 Later Latin Literature: Late **Antique and Medieval Hagiography**

Spring. 4 credits. Not offered 2002-2003. D. Shanzer.]

#### CLASS 625-626 Graduate Survey of Latin Literature

625 fall; 626 spring. 4 credits each term. Prerequisite: linguistic proficiency to be determined by instructor. Fall, C. Sogno; spring, F. Ahl.

A survey of Latin literature in two semesters.

#### [CLASS 679 Graduate Seminar in Latin: The Flavians

Fall. 4 credits. Not offered 2002-2003. F. Ahl.]

#### **[CLASS 680 Graduate Seminar in Latin** Spring. 4 credits. Not offered 2002-2003.]

#### CLASS 751-752 Independent Study for **Graduate Students in Latin**

751, fall; 752, spring. Up to 4 credits. Staff.

#### **Classical Art and Archaeology**

#### [CLASS 220 Introduction to Art History: The Classical World (also ART H 220) # (IV)

Spring. 4 credits. Each student must enroll in a section. Not offered 2002-2003. A. Ramage

An overview of the art and archaeology of the Greek and Roman world. The sculpture, vase painting, and architecture of the ancient Greeks from the Geometric period through the Hellenistic, and the art of the Romans from the early Republic to the time of Constantine the Great.]

#### CLASS 221 Minoan-Mycenaean Art and Archaeology (also ARKEO 221 and ART H 221) # (IV) Fall. 3 credits. J. Coleman.

The birth of civilization in Greece and the Aegean islands during the Bronze Age. The main focus is on the rise and fall of Minoan Crete and Mycenaean Greece, with consideration given to the nature and significance of Aegean interactions with Egypt, the Near East, and Anatolia.

#### **ICLASS 232** Archaeology in Action I (also ARKEO 232 and ART H 224) # (IV)

3 credits. Prerequisite: permission of instructor. Not offered 2002-2003. P. I. Kuniholm.]

#### [CLASS 233 Archaeology in Action II (also ARKEO 233 and ART H 225) (IV)

3 credits. Prerequisite: permission of instructor. Not offered 2002-2003. P. I. Kuniholm.

For description, see ART H 225.]

#### **CLASS 240** Greek Art and Archaeology # (IV) Spring. 3 credits. J. Coleman.

Introduction to the material culture of Greece from the Early Iron Age to the coming of the Romans (ca. 1000 BC to 31 BC). The course focuses not only on famous monuments such as the Parthenon, but also on the evidence for daily life and for contact with other civilizations of the Mediterranean. A critical attitude is encouraged toward the interpretation of archeological remains and toward contemporary uses (and misuses) of the past.

#### [CLASS 256 Practical Archaeology (also ARKEO 256) (III or IV)

Spring. 3 credits. Not offered 2002-2003. J. Coleman.

An introduction to the aims and methods of field archaeology. Topics covered include: remote sensing (satellite images and aerial photos); surface survey; subsurface investigations by magnetometer, ground penetrating radar, etc.; the layout and development of a land excavation; underwater excavations; the collection, description, illustration, and analysis of artifacts and data, such as pottery, lithics, botanical samples, and radiocarbon samples. Hands-on experience with potsherds and other artifacts from prehistoric and Classical Greece and Cyprus in the university's collections is intended to prepare students for work in the field.]

#### **CLASS 309 Dendrochronology of the** Aegean (also ARKEO 309 and ART H 309) # (IV)

Fall and spring. 4 credits. Prerequisite: permission of instructor. Letter grade only. Limited to 10 students. P. I. Kuniholm. For description, see ART H 309.

#### CLASS 319 Art in the Daily Life of Greece and Rome (also ART H

319) # (IV) Spring. 4 credits. A Ramage.

For description, see ART H 319

#### [CLASS 320 The Archaeology of **Classical Greece (also ART H** 320) # (IV)

4 credits. Not offered 2002-2003. A. Ramage.]

#### [CLASS 321 Mycenae and Homer (also ARKEO 321 and ART H 321) # (IV)

Fall. 4 credits. Prerequisite: at least 1 previous course in archaeology, classics, or history of art. Not offered 2002-2003. I Coleman

Study of the relationship between the Mycenaean period of Greece (known primarily from archaeology) and the Homeric Iliad and Odyssey. Topics include Mycenaean architecture, burial customs, kingship, and military activities; the reasons for the collapse of the Bronze Age palatial economies; the archaeological evidence for society in the "Dark Ages" that followed; the writing systems of Mycenaean Greece (Linear B) and the Iron Age (the Semitic/Greek alphabet); the nature of the Homeric poems and their value as historical sources.]

#### [CLASS 322 Greeks and Barbarians (also ART H 328) # (IV)

Fall. 4 credits. Prerequisite: CLASS 220 or 221, or permission of instructor. Not offered 2002-2003. J. Coleman.

A study of the archaeological and other evidence for the interaction between Greek civilization and the peoples of the eastern and western Mediterranean from the thirteenth to the fourth centuries B.C.E. The course focuses on Greek relationships with Egypt, Phoenicia, Cyprus, Anatolia, and Italy in the post-Bronze Age period.]

#### [CLASS 323 Painting in the Greek and Roman World (also ART H 323) # (IV)

4 credits. Not offered 2002-2003.

A. Ramage.]

## [CLASS 325 Greek Vase Painting (also

**ART H 325) # (IV)** Fall. 4 credits. Not offered 2002–2003. A. Ramage.

For description, see ART H 325.]

#### CLASS 327 Greek and Roman Coins (also ART H 327) # (IV)

4 credits. A. Ramage For description, see ART H 327.

#### [CLASS 329 Greek Sculpture (also ART H 329) # (IV)

4 credits. Not offered 2002-2003. J. Coleman.

An examination of ancient Greek sculpture, both three-dimensional and two-dimensional, from the Archaic to the Hellenistic period. Aspects of the works studied include: technological advances, changing ideology of the sculptors, regionalism of styles, and taste of individual patrons.]

#### CLASS 350 Arts of the Roman Empire (also ART H 322) # (IV)

Fall. 4 credits. A. Ramage For description, see ART H 322.

721, fall; 722, spring. Up to 4 credits. Staff.

#### **Greek and Latin Linguistics**

#### CLASS 421 Greek Comparative Grammar (also LING 451) (III)

Spring, 4 credits. Prerequisite: thorough familiarity with the morphology of classical Greek. A. Nussbaum.

The prehistory and evolution of the sounds and forms of ancient Greek as reconstructed by comparison with the other Indo-European languages.

#### [CLASS 422 Latin Comparative Grammar (also LING 452) (III)

4 credits. Prerequisite: thorough familiarity with the morphology of classical Latin. Not offered 2002–2003. A. Nussbaum.

The prehistory and evolution of the sounds and forms of Classical Latin as reconstructed by comparison with the other Indo-European languages.]

#### [CLASS 424 Italic Dialects (also LING 454) (III)

4 credits. Not offered 2002–2003. A. Nussbaum.]

#### [CLASS 425 Greek Dialects (also LING 455) (III)

Fall. 4 credits. Not offered 2002–2003. A. Nussbaum.]

## [CLASS 426 Archaic Latin (also LING 456) (III)

Spring. 4 credits. Prerequisite: reading knowledge of Latin. Not offered 2002– 2003. A. Nussbaum.

Reading of epigraphic and literary pre-Classical texts with special attention to archaic and dialectal features. The position of Latin among the Indo-European languages of ancient Italy, the rudiments of Latin historical grammar, and aspects of the development of the literary language.]

#### CLASS 427 Homeric Philology (also LING 457) (III)

Spring, 4 credits. Prerequisite: ability to read Homeric Greek. A. Nussbaum. The language of the Homeric epics: dialect background, archaisms, modernizations. The

background, archaisms, modernizations. The notion of a *Kunstsprache:* its constitution, use, and internal consistency. The phonological and morphological aspects of epic compositional technique.

#### [CLASS 429 Mycenaean Greek (also LING 459) (III)

Spring, 4 credits. Prerequisite: thorough familiarity with the morphology of Classical Greek. Not offered 2002–2003. A. Nussbaum.]

#### Sanskrit

#### [CLASS 131-132 Elementary Sanskrit (also LING 131-132 and SANSK 131-132)

131, fall; 132, spring. 4 credits each term. *CLASS 132 provides language qualification.* Not offered 2002–2003. C. Minkowski.

An introduction to the essentials of Sanskrit grammar. Designed to enable the student to read classical and epic Sanskrit as quickly as possible.]

#### CLASS 251-252 Intermediate Sanskrit (also LING 251-252 and SANSK 251-252) @ # (IV)

251, fall; 252, spring. 3 credits each term. *CLASS 251 provides language proficiency.* Prerequisite: CLASS 132 or equivalent. C. Minkowski.

Readings from the literature of Classical Sanskrit. Fall: selections from the two Sanskrit epics, the *Mahabharata* and the *Ramayana*. Spring: more selections from the epics, and from either Sanskrit story literature or from Sanskrit dramas.

#### CLASS 403–404 Independent Study in Sanskrit, Undergraduate Level 403, fall; 404, spring. Up to 4 credits. Staff.

CLASS 703–704 Independent Study for Graduate Students in Sanskrit

703, fall; 704, spring. Up to 4 credits. Staff.

Also see CLASS 291, 390, and 395 (Classical Civilization listings).

#### **Honors Courses**

**CLASS 472 Honors Course: Senior Essay** Fall and spring. 8 credits. An adviser must be chosen by the end of the student's sixth semester. Topics must be approved by the Standing Committee on Honors by the beginning of the seventh semester.

beginning of the seventh semester. See "Honors," Classics front matter.

- E. Adkins Regan, M. Spivey (psychology);
- H. Mialet (science and technology studies);
- M. Macy (sociology). S. Hertz (associate member).

Cognitive studies is comprised of a number of disciplines that are linked by a major concern with fundamental capacities of the mind, such as perception, memory, reasoning, language, the organization of motor action, and their neural correlates. In the College of Arts and Sciences these disciplines are represented in the departments of Computer Science, Economics, Linguistics, Mathematics, Neurobiology and Behavior, Philosophy, Psychology, Science & Technology Studies, and Sociology. Elsewhere in the university they are represented in the Departments of Computer Science, Mechanical and Computer Engineering, and Mechanical and Aerospace Engineering (College of Engineering), the Departments of Design and Environmental Analysis and Human Development (College of Human Ecology), the Departments of Communication and Education (College of Agriculture and Life Sciences), and the Johnson Graduate School of Management.

The issues addressed in cognitive studies arise at several levels. At the broadest level are problems of characterizing such basic notions as "mind," "knowledge," "information," and "meaning." At a more specific level are questions regarding the abstract operating principles of individual components of the mind, such as those underlying visual perception, language ability, and understanding of concepts. These principles concern the organization and behavior of the components and how they are biologically represented in the brain. At the most specific level are questions about the properties of the elementary computational structures and processes that constitute these components.

Important insights into issues of these kinds have been achieved in recent years as a result of the various cognitive studies disciplines converging in their theoretical and methodological approaches. It is this convergence, in fact, that warrants grouping the disciplines together under the single term "cognitive studies." Even greater progress can be expected in the future as a consequence of increasing cooperation among the disciplines.

#### Undergraduate Concentration

An interdisciplinary undergraduate concentration in Cognitive Studies is available to Cornell University undergraduates in the College of Arts and Sciences. Students from other colleges who seek such a concentration should discuss such possibilities with the Cognitive Studies office, which will provide information and contacts concerning such concentrations

The undergraduate concentration in Cognitive Studies is designed to enable students to engage in a structured program directly related to the scientific study of cognition and the mind. The concentration provides a framework for the design of structured, supervised programs of study in this growing interdisciplinary field. Such programs of study serve as complements to coursework in a single discipline as represented by an individual department. It is considered crucial that students gain a strong background in their major, independent of their work in the concentration. Independent majors and college scholars may also apply. Colleges vary in their procedures for formal recognition of this concentration (contact the Cognitive Studies office for details). The Cognitive Studies Program faculty have designed five structured "tracks" that offer students different ways of satisfying the concentration. In addition, students are always able to construct their own programs of study subject to approval by their concentration adviser. The courses listed under each track are program suggestions. The student should consult with his/her Cognitive Studies adviser to develop a more customized curriculum. In some cases, students may want to combine or cross tracks.

In general, it is expected that students in the concentration will take COGST 101, a lab course such as COGST 201, and three courses at the 300 or 400 level in at least two departments. Even though only five courses are required to complete the concentration, we expect that students interested in cognitive studies will often end up taking more, and we encourage them to do an independent research project (COGST 470) and a research workshop such as COGST 471.

The five typical tracks are as follows. The first track involves a particular approach to the study of cognition. The other four tracks are structured around specific content domains and consist of sets of suggested course clusters. Please note that many of these courses have substantial prerequisites.

Cognitive Studies in Context: The 1. Workplace, the Classroom, and Everyday Life

Foundational issues in cognitive science are intimately relevant to real world settings. The Cognitive Studies in Context track offers students the opportunity to learn and independently explore how theory and research on the mind can help us better understand how we use

information in much of our daily activities, whether it be the workplace, the classroom, or any other aspect of everyday life. Students will come to better understand the cognitive ergonomics of such diverse settings as an aircraft cockpit, a quality control station on an assembly line, or an anesthesia station in a surgical suite. They will come to better understand the perceptual constraints that help tailor the nature of visual communication systems, or the linguistic constraints that help tailor text-based communication. They will come to see how the functional architecture of human memory guides the presentation and use of information in a wide array of settings. They will also learn how design constraints on computer hardware and software interact with human capacities and biases.

- COGST 101/COM S 101/LING 170/PHIL 191/PSYCH 102, Introduction to **Cognitive Science**
- COGŠT 201/COM S 201/PSYCH 201, Cognitive Science in Context Laboratory
- COGST 342/PSYCH 342, Human Perception: Applications to Computer Graphics, Arts, and Visual Display COGST 416/PSYCH 416, Modeling
  - Perception and Cognition

In addition, three more upper-level approved courses in Cognitive Studies areas will normally be expected.

2. Perception and Cognition

This track focuses on psychological, computational, and neurobiological approaches to the interface between perception and cognition. Students will develop a grasp of the continuum between sensory impressions and complex thought.

- COGST 101/COM S 101/LING 170/PHIL 191/PSYCH 102, Introduction to **Cognitive Science**

A Cognitive Studies undergraduate laboratory and computer facility is available for all students in a Cognitive Studies concentration. This facility will help link resources from different laboratories across the Cornell campus as well as providing a central location for developing and conducting experimental research in cognitive studies.

Students who complete the concentration requirements will have their concentration in Cognitive Studies officially represented on their transcript. In addition, students who have made very substantial progress towards completing the requirements for the concentration will be eligible for enrollment in the graduate courses in Cognitive Studies during their senior year.

**Concentration Application Procedures.** Initial inquiries concerning the undergraduate concentration should be made to the Cognitive Studies Program coordinator, Linda LeVan, cogst@cornell.edu, 255–6431, who will provide application materials and set up a meeting with a relevant member of the Undergraduate Concentration Committee. This Committee will assist the student with selection of a concentration adviser with expertise in the student's main area of interest.

To formally initiate the concentration in Cognitive Studies, a student must gain approval for a selection of courses from a concentration adviser (one of the program faculty). The courses selected must form a coherent cluster that makes sense to both the adviser and the student. To be admitted to the concentration, the student must submit this plan of study to the Cognitive Studies undergraduate faculty committee for final approval.

In addition to assisting in and approving the student's selection of courses, the concentration adviser serves as a general source of information about the field of cognitive studies, relevant resources around the university, and job and graduate school opportunities. Often, the adviser can help the student develop independent research experience.

**Independent Research.** The concentration encourages each student to be involved in independent research that bears on research issues in cognitive studies, if possible. COGST 470 is available for this purpose. It is recommended that students report on their research activities in an annual undergraduate forum. The Undergraduate Concentration Committee is committed to helping students find an appropriate research placement when needed.

The Committee for Undergraduate Concentration in Cognitive Studies consists of: Bart Selman, computer science, 5–5643, 4144 Upson Hall, selman@cs.cornell.edu; Draga Zec, linguistics, 5–0728, 217 Morrill Hall, DZ17@cornell.edu; Zoltān Szabō, philosophy, 5–6824, 218 Goldwin Smith, ZS15@cornell.edu; Michael Owren, psychology, 5–3835, 224 Uris Hall, MJO9@cornell.edu. The current Director of Undergraduate Studies is Draga Zec.

#### **Graduate Minor**

Entering graduate students, as well as advanced undergraduates, who are interested in cognition and in the cognitive sciences are advised to take the 4-credit course COGST 501, Cognition, in Fall semester. To obtain the full four credits, a student will have to enroll concurrently in PSYCH 214/COGST 214 or in COGST 101; alternatively, COGST101 may be taken earlier as a prerequisite.

Graduate students minoring in Cognitive Studies should take COGST 531, Topics in Cognitive Studies, at some point after taking COGST 501. This is a "topics" course, which focuses on different issues each spring semester, and also is open to advanced . undergraduate students.

For more information, consult the program office (282 Uris Hall, 255–6431, cogst@cornell.edu) or the director of graduate studies, Shimon Edelman, 255–6365; se37@cornell.edu.

#### Courses

#### **Cognitive Studies**

#### [COGST 101 Introduction to Cognitive Science (also COM S 101, LING 170, PHIL 191, and PSYCH 102) (III)

Fall. 3 or 4 credits (the 4-credit option involves a writing section instead of taking exams). Not offered 2002–2003. M. Spivey.

This course surveys the study of how the mind/brain works. We examine how intelligent information processing can arise from biological and artificial systems. The course draws primarily from five disciplines that make major contributions to cognitive science: philosophy, psychology, neuroscience, linguistics, and computer science. The first part of the course introduces the roles played by these disciplines in cognitive science. The second part of the course focuses on how each of these disciplines contributes to the study of five topics in cognitive science: language, vision, learning and memory, action, and artificial intelligence.]

#### [COGST 111 Brain, Mind, and Behavior (also BIONB 111 and PSYCH 111) (I)

Spring, 3 credits. Letter grade only. Intended for freshman and sophomores in the humanities and social sciences; seniors not allowed. Not recommended for psychology majors; biology majors may not use the course for credit toward the major. Not offered 2002–2003. R. Hoy and E. Adkins Regan. Understanding how the brain creates complex human behavior and mental life is a great scientific frontier of the next century. This course enables students with little scientific background from any college or major to appreciate the excitement. What are the interesting and important questions? How are researchers trying to answer them? What are they discovering? Why did the brain evolve this remarkable capacity?]

#### COGST 172 Computation, Information, and Intelligence (also COM S 172 and ENGRI 172)

Fall. 3 credits. Prerequisite: some knowledge of calculus. L. Lee.

An introduction to computer science using methods and examples from the field of artificial intelligence. Topics include game playing, search techniques, learning theory, computer-intensive methods, data mining, information retrieval, the web, natural language processing, machine translation, and the Turing test. This is not a programming course; rather, "pencil and paper" problem sets will be assigned. Not open to students who have completed the equivalent of COM S 100.

#### [COGST 201 Cognitive Science in Context Laboratory (also COM S 201 and PSYCH 201) (III)

Spring. 4 credits. Prerequisite: "Introduction to Cognitive Science" COGST 101/ COM S 101/LING 170/PHIL 191/PSYCH 102. Knowledge of programming languages is not assumed. Limited to 24 students. Not offered 2002–2003. D. Field and staff.

A laboratory course that explores the theories of cognitive science and provides direct experience with the techniques of cognitive science, in relation to the full range of both present and anticipated future activities in the workplace, the classroom, and in everyday life. Discussions of laboratory exercise results, supplementation of laboratory topics, and analyses of challenging primary research literature are done in meetings of the entire class. Laboratory exercises, which are done on an individual or small group basis, include both pre-planned investigations and studentdeveloped experiments. Use of digital computers as well as the Internet, e-mail, and web sites are integral components of the course.

The focus is on human-computer interactions that are intended to permit effective and efficient exchange of information and control of functions or operations. This approach is applied to real life settings. Students are expected to come to each discussion meeting having read and thought about assigned materials, and to come to scheduled laboratory meetings fully prepared to perform the laboratory exercises. Laboratory facilities are available to students at all times so that statistical analysis of data, preparation of laboratory reports, and collection of experimental data will be facilitated.]

#### COGST 214 Cognitive Psychology (also PSYCH 214 and 614) (III) Fall. 3 or 4 credits. The 4-credit option

Fall. 3 or 4 credits. The 4-credit option involves some participation in COGST 501 or PSYCH 614. Sophomore standing required. Limited to 150 students. S. Edelman.

The course serves as a broad overview of problems arising in the study of cognition and of the information-processing, or computational, approaches to solving these problems, in natural and artificial cognitive systems. Theoretical and experimental challenges posed by the understanding of perception, attention and consciousness, memory, thinking, and language are discussed and analyzed. Participants acquire conceptual tools essential for following the current debates on the nature of mind and its relationship to the brain.

#### COGST 215 Psychology of Language (also LING 215/715 and PSYCH 215/ 715) (III)

Spring. 3 credits. Limited to sophomores, juniors, and seniors. Prerequisite: any one course in Psychology or Human Development. M. Christiansen.

This course provides an introduction to the psychology of language. The purpose of the course is to introduce students to the scientific study of psycholinguistic phenomena. It covers a broad range of topics from psycholinguistics, including the origin of language, the different components of language (phonology, morphology, syntax, and semantics), processes involved in reading, computational modeling of language processes, the acquisition of language (both under normal and special circumstances), and the brain bases of language.

#### COGST 220 The Human Brain and Mind: Biological Issues in Human Development (also HD 220)

Fall. 3 credits. Prerequisite: HD 115, or permission of instructor. E. Temple. What do we know about the biology of the mind? As long ago as the 1600s, when the philosopher, Descartes, speculated on how the mind and body interact, humans have been fascinated by how the chunk of tissue we call the brain can give rise to all the complexity that is human behavior. This course is designed as an introduction to the biology underlying human behavior. After studying basic concepts in neurobiology and neuroanatomy, the course will explore a variety of topics, such as how the brain reacts to drugs and hormones, and what brain mechanisms underlie seeing, hearing, thinking, talking, feeling emotions and desires, and dreaming. We will try to understand what is understood (and what is not yet understood) about the biological mechanisms underlying the human experience. In addition, we will discuss the biology of clinical disorders throughout. This course will give background necessary for other courses in HD that focus on biological mechanisms of human development and serves as a prerequisite for many of them.

## COGST 230 Cognitive Development (also HD 230)

Spring. 3 credits. Prerequisite: HD 115 or PSYCH 101. Q. Wang.

This course is designed to help students develop a broad understanding of the mechanisms, processes, and current issues in cognitive development and learn to do critical, in-depth analyses of developmental research. We will discuss how children's thinking changes over the course of development and evaluate psychological theories and research on various aspects of cognitive development. Topics include perception, representation and concepts, reasoning and problem solving, social cognition, memory, metacognition, language and thought, and academic skills. Students will also have hands-on research experiences with "real" kids.

#### [COGST 264 Language, Mind, and Brain (also LING 264) (III)

Spring. 4 credits. Not offered 2002–2003. J. Bowers.

An introductory course that emphasizes the formal structure of natural language in the Minimalist framework. The following topics are covered: the formal representation of linguistic knowledge, principles, and parameters of Universal Grammar, the basic biology of language, mechanisms of linguistic performance, the modularity hypothesis, and language and cognition. The course is especially suited for majors in fields such as psychology, philosophy, computer science, and linguistics (and also for those enrolled in the concentration in cognitive studies) who want to take a one-semester introduction to linguistics that concentrates on the formal principles that govern linguistic knowledge. along with some discussion of their biological realization and their use in perception and production.]

#### [COGST 270 Truth and Interpretation (also LING 270 and PHIL 270) (III or IV)

Spring. 4 credits. Not offered 2002-2003.]

#### COGST 330 Introduction to Computational Neuroscience (also BIONB 330 and PSYCH 330)

Fall. 3 credits. Limited to 25 students. Prerequisites: BIONB 222 or permission of instructor. Offered alternate years. C. Linster.

This course covers the basic ideas and techniques involved in computational neuroscience. The course surveys diverse topics including: neural dynamics of small networks of cells, neural coding, learning in neural networks and in brain structures, memory models of the hippocampus, sensory coding and others.

#### [COGST 333 Problems in Semantics— Quantification in Natural Language (also LING 333 and PHIL 333) (III or IV)

Spring. 4 credits. Prerequisites: a previous course in formal semantics (e.g., LING 421) or logic (e.g., PHIL 231) or permission of instructor. Not offered 2002–2003.

S. McConnell-Ginet and Z. G. Szabó. This course looks at problems in the semantic analysis of natural languages, critically examining work in linguistics and philosophy on particular topics of current interest. The focus is on quantification. Languages offer a variety of resources for expressing generalizations: some, every, no, many, and other quantifying expressions that appear inside noun phrases; always, never, occasionally, and other adverbial quantifying expressions not associated with particular nominals; constructional resources of various kinds (e.g., English free relatives like unhatever she cooks). How different are these resources and what might they imply about basic cognitive and linguistic capacities?]

#### COGST 342 Human Perception: Applications to Computer Graphics, Art, and Visual Display (also PSYCH 342 and 642) (III)

Fall. 3 or 4 credits. The 4-credit option involves a term paper. Prerequisite: PSYCH 101 or permission of instructor. PSYCH 205 strongly recommended. D. Field.

Our present technology allows us to transmit and display information through a variety of media. To make the most of these media channels, it is important to consider the limitations and abilities of the human observer. The course considers a number of applied aspects of human perception with an emphasis on the display of visual information. Topics covered include: "three-dimensional" display systems, color theory, spatial and temporal limitations of the visual systems, attempts at subliminal communication, and "visual" effects in film and television.

#### COGST 414 Comparative Cognition (also PSYCH 414 and 714) (III)

Spring. 3 or 4 credits. The 4-credit option involves an annotated bibliography or creating a relevant web site. Prerequisites: PSYCH 205, 209, 214, 223, 292, or

permission of instructor. M. Owren. This course examines some of the conceptual and empirical work resulting from and fueling the recent surge of interest in animals' thinking. Specific topics may include whether nonhumans behave intentionally; whether they show concept and category learning, memory, and abstract thinking similar to that of humans; the role of social cognition in the evolution of intelligence; and whether animals are conscious or self-aware. Evidence from communication studies in which animal signals provide a "window on the mind" plays a strong role in the deliberations, including studies of naturally occurring signaling in various species and experiments in which nonhumans are trained in human-like language behavior. Cognition in nonhuman primates is a specific focus throughout. The course is a mix of lecture and discussion, emphasizing the latter as much as possible.

#### [COGST 416 Modeling Perception and Cognition (also PSYCH 416 and 616) (III)

Spring, 4 credits. Prerequisites: PSYCH 205, 209, 214, or 215, or permission of instructor. Not offered 2002–2003. M. Spivey.

This course offers a survey of several computational approaches to understanding perception and cognition. We explore linear systems analysis, connectionist models, dynamical systems, and production systems, to name a few. Emphasis is placed on how complex sensory information gets represented in these models, as well as how it gets processed. This course covers computational accounts of language processing, language acquisition, visual perception, and visual development, among other topics. Students complete a final project that applies a computational model to some perceptual/ cognitive phenomena.]

#### [COGST 424 Computational Linguistics

(also COM S 324 and LING 424) (III) Spring. 4 credits. Prerequisite: LING 203. Labs involve work in the Unix environment; COM S 114 is recommended. Not offered 2002–2003. M. Rooth.

Steady progress in formalisms, algorithms, linguistic knowledge, and computer technology is bringing computational mastery of the syntax, morphology, and phonology of natural languages within reach. The course introduces methods for "doing a language" computationally, with an emphasis on approaches which combine linguistic knowledge with powerful computational formalisms. Topics include: computational grammars, parsing, representation of syntactic analyses; finite state morphology; weighted grammars; feature constraint formalisms for syntax; treebank and other markup methodology; robust low-level syntax and semantics;

476

and experimental-modeling methodology using large data samples.]

#### COGST 428 Connectionist Psycholinguistics (also PSYCH 428/ 628)

Fall, 3 credits. Prerequisites: senior standing or permission of instructor. Offered alternate years. M. Christiansen. Connectionist psycholinguistics involves using (artificial) 'neural' networks, which are inspired by brain architecture, to model empirical data on the acquisition and processing of language. As such, connectionist psycholinguistics has had a far-reaching impact on language research. In this course, we will survey the state of the art of connectionist psycholinguistics, ranging from speech processing and word recognition, to inflectional morphology, sentence processing, language production and reading. An important focus of discussion will be the methodological and theoretical issues related to computational modeling of psychological data. We will furthermore discuss the broader implications of connectionist models of language, not only for psycholinguistics, but also for computational and linguistic perspectives on language.

#### COGST 433 Developmental Cognitive Neuroscience (also HD 433)

Spring. 3 credits. Prerequisite: HD 115 or PSYCH 101 and 1 semester of biology. Enrollment limit of 25. E. Temple.

What are the brain mechanisms underlying human behavior and cognition? How do those underlying brain mechanisms develop? These are the questions that we will explore in this course through both lecture and reading and discussion of primary literature. The first weeks of class will cover basics of developmental neurobiology and neuroanatomy and methods used in the field of cognitive neuroscience (especially neuroimaging techniques). After the introductory and methods information is covered we will change to a weekly format where there will be lecture and discussion of current research papers. Each week we will focus on a particular cognitive ability like language, memory, attention, inhibitory control, etc. For each topic we will explore what is known about the brain mechanisms that underlie that particular function, how those brain mechanisms develop over the life span, and where possible, the brain mechanisms underlying disorders of that particular cognitive function.

#### COGST 435 Mind, Self, and Emotion: Research Seminar (also HD 435)

Fall. 3 credits. Offered to upperclass undergraduate and graduate students. Limited to 20 students. Letter grade only. Q. Wang.

This course examines current data and theory concerning memory, self, and emotion from a variety of perspectives and at multiple levels of analysis, particularly focusing on the interconnections among these fields of inquiry. A special emphasis is given to crosscultural studies on memory development, selfconstrual, and conception of emotion.

#### COGST 436 Language Development (also HD 436, LING 436, and PSYCH 436) (III)

Spring, 4 credits. Open to undergraduate and graduate students. Graduate students should also enroll in HD 633, LING 700, or PSYCH 600, a supplemental graduate seminar. Prerequisite: at least one course in developmental psychology, cognitive psychology, cognitive development, or

linguistics. S-U grades optional. B. Lust. This course surveys basic issues, methods, and research in the study of first-language acquisition. Major theoretical positions in the field are considered in the light of experimental studies in first-language acquisition of phonology, syntax, and semantics from infancy on. The fundamental linguistic issues of "Universal Grammar" and the biological foundations for acquisition are discussed, as are the issues of relations between language and thought. The acquisition of communication systems in nonhuman species such as chimpanzees is addressed, but major emphasis is on the child. An optional lab course supplement is available (see COGST 450/HD 437/LING 450/PSYCH 437).

#### COGST 437 Thinking and Reasoning (also HD 438)

Fall. 3 credits. Prerequisite: HD 115 or PSYCH 101. B. Koslowski.

The course examines problem solving and transfer, pre-causal thinking, logical thinking, practical syllogisms, causal reasoning, scientific reasoning, theories of evidence, expert vs. novice differences, and nonrational reasoning. Two general issues run through the course: the extent to which children and adults approximate the sorts of reasoning that are described by various types of models, and the extent to which various models accurately describe the kind of thinking that is required by the types of problems and issues that arise and must be dealt with in the real world.

#### COGST 438 Minds, Machines, and Intelligence (also S&TS 438) (III)

Spring. 4 credits. H. Mialet. Do machines think? Do they have minds? Are they intelligent? What can humans do that machines can't do and vice versa? How do humans use machines and how do machines use humans? In this course we focus on how philosophers such as Turing, Searle, Dreyfus etc. have dealt with these questions. At the same time, however, we are also concerned with trying to rethink the themes raised by these thinkers in light of social scientists who have studied how people and machines interact in specific (local) contexts, as for example, in a plane's cockpit or on the Internet. Topics may also include virtual surgery, speech recognition, and expert systems in medicine.

#### [COGST 439 Cognitive Development: Infancy through Adolescence (also HD 439)

Spring. 3 credits. Prerequisite: HD 115 or PSYCH 101. Letter grade only. Not offered 2002–2003. B. Koslowski.

The course will be an overview of current and classic issues and research in cognitive development. Central topics of both "hard cognition" (e.g., information processing and neuropsychological functioning) and "soft cognition" (e.g., problem solving, concepts, and categories) will be covered. Selected topics will be linked to methodological issues and to important social issues such as crosscultural cognitive development and putative racial and social class differences.]

#### COGST 450 Lab Course: Language Development (also HD 437, LING 450, and PSYCH 437)

Spring, 2 credits. In conjunction with COGST/HD/LING/PSYCH 436, Language Development. B. Lust.

This laboratory course is an optional supplement to the survey course, Language Development (COGST/HD/LING/PSYCH 436). The lab course provides students with a hands-on introduction to scientific research, including design and methods, in the area of first language acquisition.

#### COGST 452 Culture and Human Development (also HD 452)

Fall. 3 credits. Prerequisite: HD 115 or PSYCH 101. Limited to 30 students. O. Wang.

The course takes an interdisciplinary approach to address the central role of culture in human development. It draws on diverse theoretical perspectives, including psychology, anthropology, education, ethnography, and linguistics, to understand human difference, experience, and complexity. Empirical reflections are taken upon major developmental topics such as cultural aspects of physical growth and development; culture and cognition; culture and language; culture, self, and personality; cultural construction of emotion; culture issues of sex and gender; and cultural differences in pathology.

#### COGST 465 Topics in High-Level Vision (also COM S 392 and PSYCH 465/ 665) (III)

Spring. 4 credits. Offered alternate years. S. Edelman.

High-level vision is a field of study concerned with functions such as visual object recognition and categorization, scene understanding, and reasoning about visual structure. It is an essentially cross-disciplinary endeavor, drawing on concepts and methods from neuroanatomy and neurophysiology, cognitive psychology, applied mathematics, computer science, and philosophy. The course concentrates on a critical examination of a collection of research publications, linked by a common thread, from the diverse perspectives offered by the different disciplines. Students write bi-weekly commentaries on the assigned papers, and a term paper integrating the material covered in class.

#### COGST 470 Undergraduate Research in Cognitive Studies

Fall or spring. 1–4 credits. S-U grades optional. Prerequisite: permission of major adviser; written permission of Cognitive Studies faculty member who will supervise the research and assign the grade. Cognitive Studies faculty.

Experience in planning, conducting, and reporting independent laboratory, field, and/ or library research in an interdisciplinary area relevant to cognitive studies.

#### COGST 471 Cognitive Studies Research Workshop

Fall or spring. Credits variable. Prerequisites: student must be enrolled in an independent research course (either in Cognitive Studies, e.g., COGST 470, or in a related department), or in honors thesis research in one of the departments relevant to Cognitive Studies. Staff. (Interdisciplinary faculty from Cognitive Studies Program).

This course provides a research workshop in which undergraduate students who are engaged in research in a particular area relevant to cognitive science can meet across disciplines to learn and practice the essentials of research, using interdisciplinary approaches. In this workshop, students critique and discuss the existing literature in a field of inquiry, individual students present their research designs, methods, and results from their independent research studies, debate the interpretation of their research results, and participate in the generation of new research hypotheses and designs, in a peer group of other undergraduate students involved in related research.

#### COGST 474 Introduction to Natural Language Processing (also COM S 474 and LING 474) (III) Fall. 4 credits. M. Rooth.

The course presents formalisms, algorithms, and methodology for manipulating natural languages computationally. It emphasizes parts of natural language (syntax and morphology, but not semantics) where algorithms and scientific understanding make it possible for us to create and implement approximately complete accounts of linguistic phenomena and also manipulate large samples of language use (a million or a billion words). Most of the methods are not only useful for engineering applications but also advance our scientific understanding of human languages.

COGST 476-477 Decision Theory (also COGST 676/677, COM S 576/577, ECON 476/477, and ECON 676/677)

Fall and spring. 4 credits each semester. This is a two-semester course. In the fall semester the course is lecture based. Students will be required to complete several problem sets and there will a final exam. In the spring semester there will be additional lectures as well as visiting speakers. Students will be required to read the speakers' papers and participate in discussions. In the spring semester students will be required to complete a research project. L. Blume, D. Easley, and J. Halpern.

Research on decision theory resides in a variety of disciplines including computer science, economics, game theory, philosophy and psychology. This new course attempts to integrate these various approaches. The course will be taught jointly by two economists/game theorists and a computer scientist. The course has several objectives. First, we will cover basic decision theory. This theory, sometimes known as "rational choice theory," is part of the foundation for the disciplines listed above. It applies to decisions made by individuals or by machines. Second, we will cover the limitations of and problems with this theory. Issues to be discussed here include decision theory paradoxes revealed by experiments, cognitive and knowledge limitations, and computational issues. Third, we will cover new research designed in response to these difficulties. Issues to be covered here include alternative approaches to the foundations of decision theory, adaptive behavior, and shaping the individual decisions by aggregate/evolutionary forces.

#### COGST 491 Research Methods in Psychology (also COGST 691 and PSYCH 491/691)

Spring. 4 credits. Enrollment limited to 15 students. Recommended: permission of instructor, PSYCH 350, experience in upper-division psychology courses, or graduate standing. Graduate students, see COGST 691. D. Dunning.

An intensive examination of the basic research methods used in social, personality, cognitive, and developmental psychology. The course focuses on designing and conducting

experiments, i.e., how to turn vague theories into concrete and testable notions, evaluate studies, avoid common pitfalls, and, finally, remain ethical. Beyond learning methods of "correct" and rigorous experimentation, we also discuss what makes a research study actually interesting. The course, in addition, covers test construction, survey methods, and "quasi experiments." Students concentrate on completing a small research project in which they conduct an experiment, interpret its data, and write up the results.

#### **Computer Science**

[COM S 101 Introduction to Cognitive Science (also COGST 101, LING 170, PHIL 191, and PSYCH 102)

Fall. 3 or 4 credits. Not offered 2002-2003. M. Spivev.]

- COM S 172 Computation, Information, and Intelligence (also COGST 172 and ENGRI 172) Fall. 3 credits. L. Lee
- [COM S 201 Cognitive Science in **Context Laboratory (also COGST 201** and PSYCH 201)

Spring. 4 credits. Not offered 2002-2003. D. Field and staff.]

- **COM S 211** Computers and Programming Fall, spring, or summer. 3 credits.
- COM \$ 312 Structure and Interpretation of Computer Programs Fall or spring. 4 credits.
- [COM S 324 Computational Linguistics (also COGST 424 and LING 424) Spring. 4 credits. Not offered 2002-2003. M. Rooth.]
- COM S 381 Introduction to Theory of Computing Fall or summer. 4 credits
- COM S 392 Topics in High-Level Vision (also COGST 465 and PSYCH 465/ 6651 Spring. 4 credits. Offered alternate years.

S. Edelman.

COM S 411 Programming Languages and Logics

Fall. 4 credits. Not offered every year.

- **COM S 472** Foundations of Artificial Intelligence Fall. 3 credits
- **COM S 473** Practicum in Artificial Intelligence Fall. 2 credits.
- COM \$ 474 Introduction to Natural Language Processing (also COGST 474 and LING 474) Fall. 4 credits. M. Rooth.
- COM \$ 478 Machine Learning Spring. 3 credits.
- COM S 481 Introduction to Theory of Computing Fall. 4 credits
- COM S 486 Applied Logic (also MATH 486) Spring. 4 credits.

**Education (College of Agriculture and Life** Sciences)

EDUC 411 Educational Psychology Fall. 3 credits. D. Schrader.

#### Human Development (College of Human Ecology)

HD 115 Human Development Fall or summer. 3 credits.

- HD 220 The Human Brain and Mind: **Biological Issues in Human Development (also COGST 220)** Fall. 3 credits. E. Temple.
- HD 230 Cognitive Development (also **COGST 230)** Spring. 3 credits. O. Wang.
- [HD 266 Emotional Functions of the Brain

Spring. 3 credits. Not offerd 2002-2003.]

- HD 344 Infant Behavior and **Development** Fall. 3 credits, S. Robertson.
- HD 347 Human Growth and **Development: Biological and Behavioral Interactions (also B&SOC** 347 and NS 347) Spring. 3 credits. S. Robertson and J. Haas.
- [HD 362 Human Bonding Fall. 3 credits. Not offered 2002-2003.]
- HD 433 Developmental Cognitive Neuroscience (also COGST 433) Spring. 3 credits. E. Temple.
- HD 435 Mind, Self, and Emotion: Research Seminar (also COGST 435) Fall. 3 credits. Q. Wang.
- HD 436 Language Development (also COGST 436, LING 436, and PSYCH 4361 Spring. 4 credits. B. Lust.

- HD 437 Lab Course: Language Development (also COGST 450, LING 450, and PSYCH 437) Spring. 2 credits. In conjunction with COGST/HD/LING/PSYCH 436, Language Development. B. Lust.
- HD 438 Thinking and Reasoning (also COGST 437)

Fall. 3 credits. B. Koslowski.

[HD 439 Cognitive Development: Infancy through Adolescence (also COGST 439)

Spring. 3 credits. Not offered 2002-2003. B. Koslowski.]

HD 452 Culture and Human Development (also COGST 452) Fall. 3 credits. Q. Wang.

#### Linquistics

LING 101 Introduction to Linguistics Fall or spring. 4 credits. Fall, C. Collins; spring, W. Harbert.

- [LING 170 Introduction to Cognitive Science (also COGST 101, COM S 101, PHIL 191, and PSYCH 102) Fall. 3 or 4 credits. Not offered 2002-2003. M. Spivey.]

- PSYCH 431 Effects of Aging on Sensory and Perceptual Systems (also BIONB 421 and PSYCH 631) Fall. 3 or 4 credits. B. Halpern.
- PSYCH 436 Language Development (also COGST 436, HD 436, and LING 436) Spring. 4 credits. B. Lust.
- PSYCH 437 Lab Course: Language Development (also COGST 450, HD 437, and LING 450) Spring. 2 credits. In conjunction with

COGST/HD/LING/PSYCH 436, Language Development. B. Lust.

**PSYCH 465 Topics in High-Level Vision** (also COGST 465, COM S 392, and **PSYCH 665)** 

Spring. 4 credits. Offered alternate years. S. Edelman.

**PSYCH 491 Research Methods in** Psychology (also COGST 491/691 and PSYCH 691) Spring. 4 credits. D. Dunning.

**PSYCH 492 Sensory Function (also** BIONB 492 and PSYCH 692) Spring. 4 credits. B. Halpern and H. Howland.

#### **Graduate Courses and Seminars**

The following courses and seminars are generally for graduate students only. However, some may be appropriate for advanced undergraduates. The director of the concentration must approve an undergraduate's use of any of these for satisfying the concentration requirements.

#### COGST 501 Cognition

Fall. 4 credits. Concurrent or prior registration in COGST 101 (also COM S 101, LING 170, PHIL 191, and PSYCH 102) Introduction to Cognitive Science, or COGST/PSYCH 214, Cognitive Psychology, is required. Co-meets with PSYCH 614, Cognitive Psychology. S. Edelman. This course introduces graduate students interested in cognition (especially those who plan to pursue the Cognitive Studies minor) to the central issues in computational cognitive

psychology. It consists of a series of advanced-level discussions of selected examples from the material covered in COGST 101 (also COM S 101, LING 170, PHIL 191, and PSYCH 102) and COGST 214 (also PSYCH 214/614). The material from those courses includes perception, attention and consciousness. memory, thinking, and language. The course focuses on the development of skills required for critical evaluation of research in cognitive sciences, backed by an in-depth understanding of the relevant concepts and theories.

#### COGST 530 Representation of Structure in Vision and Language (also LING 530 and PSYCH 530)

Spring, 4 credits, Graduate seminar, Enrollment limited to 20 graduate students (or undergraduates with permission of instructor). Prerequisites: a course each in cognitive psychology, linguistics, and computer science, or permission of instructor. Offered alternate years. S. Edelman.

The seminar concentrates on the nature of the representation of visual objects and scenes in the brain and compares it with the structural framework that serves as the main explanatory tool in current theories of language processing. Data and ideas are drawn from visual psychophysics, neurophysiology, psycholinguistics, computational vision and linguistics, and philosophy. Students present published research papers and preprints, which are then discussed and critiqued

#### COGST 531 Topics in Cognitive Studies: Mind and Reality in Science Fiction (also LING 531 and PSYCH 531)

Spring. 4 credits. Prerequisites: COGST 501, PSYCH 614 or permission of instructor. Open to advanced undergraduates. S. Edelman and H. Segal.

What does it mean to be a mind? How is a mind affected by its embodiment? by the body's immersion in the world? by not having a body in the first place, or not any longer? Is the world out there what it seems? is there a world out there? Profound thinking about, and sometimes disturbing insights into, the nature of the human mind and its relationship to reality are found in the writings of a handful of visionaries to be discussed in this course. Readings are selected from the works of Jorge Luis Borges, Philip K. Dick, Greg Egan, Ursula LeGuin, Stanislaw Lem, Richard Powers, Arkady and Boris Strugatzky, Vernor Vinge, Connie Willis, and others. For more information, see http://kybele.psych.cornell.edu/ ~edelman/Cog-531-Spring-2003.

#### [COGST 550 Special Topics in Cognitive Science (also PSYCH 550)

Fall or spring. 4 credits. Topics and schedule available in the Psychology Department main office just prior to the start of classes each semester. Not offered 2002-2003. M. Spivey.]

#### COGST 633 Language Acquisition

Seminar (also HD 633 and LING 633) Fall. 1-4 credits. Prerequisite: COGST/HD/ LING/PSYCH 436 or equivalent, or

permission of instructor. B. Lust.

This seminar reviews and critiques current theoretical and experimental studies of firstlanguage acquisition, with a concentration on insights gained by cross-linguistic study of this area. Attention is also given to the development of research proposals.

#### [COGST 671 Introduction to Automated Reasoning (also COM S 671)

Spring. 4 credits. Prerequisite: (COM S 611 and graduate standing) or permission of instructor. Not offered 2002–2003. R. Constable.

Topics in modern logic needed to understand and use automated reasoning systems such as HOL, Nuprl, and PVS. Special emphasis is on type theory and logic and on tactic-oriented theorem proving.]

#### COGST 676-677 Decision Theory (also COGST 476/477, COM S 576/577, ECON 476/477, and ECON 676/677)

Fall and spring. 4 credits each semester. This is a two-semester course. In the fall semester the course is lecture based. Students will be required to complete several problem sets and there will a final exam. In the spring semester there will be additional lectures as well as visiting speakers. Students will be required to read the speakers papers and participate in discussions. In the spring semester students will be required to complete a research project. L. Blume, D. Easley, and J. Halpern.

Research on decision theory resides in a variety of disciplines including computer science, economics, game theory, philosophy, and psychology. This new course attempts to integrate these various approaches. The course has several objectives. First, we will cover basic decision theory. This theory, sometimes known as "rational choice theory," is part of the foundation for the disciplines listed above. It applies to decisions made by individuals or by machines. Second, we will cover the limitations of and problems with this theory. Issues to be discussed here include decision theory paradoxes revealed by experiments, cognitive and knowledge limitations, and computational issues. Third, we will cover new research designed in response to these difficulties. Issues to be covered here include alternative approaches to the foundations of decision theory, adaptive behavior, and shaping the individual decisions by aggregate/evolutionary forces.

#### COGST 691 Research Methods in Psychology (also COGST 491 and PSYCH 491/691)

Spring. 4 credits. Enrollment limited to 15 students. D. Dunning.

An intensive examination of the basic research methods used in social, personality, cognitive, and developmental psychology. The course focuses on designing and conducting experiments, i.e., how to turn vague theories into concrete and testable notions, evaluate studies, avoid common pitfalls, and, finally, remain ethical. The course, in addition, covers test construction, survey methods, and "quasi experiments." Students concentrate on completing a small research project in which they conduct an experiment, interpret its data, and write up the results.

**COM S 664 Machine Vision** Spring. 4 credits.

#### [COM S 671 Introduction to Automated Reasoning (also COGST 671) Spring. 4 credits. Not offered 2002–2003. R. Constable.]

COM S 672 Advanced Artificial Intelligence Spring, 4 credits, Prerequisite: COM S 472.

- **COM S 674** Natural Language Processing Spring, 4 credits. Prerequisite: COM S 472.
- **[COM S 676 Reasoning about Knowledge** Fall. 4 credits. Prerequisites: mathematical maturity and an acquaintance with propositional logic. Not offered 2002–2003. J. Y. Halpern.]
- [COM \$ 677 Reasoning about Uncertainty Fall. 4 credits. Prerequisites: mathematical maturity and an acquaintance with propositional logic. Not offered 2002–2003. J. Y. Halpern.]
- [COM S 772 Seminar in Artificial Intelligence Fall and spring. 2 credits. B. Selman.]
- COM S 775 Seminar in Natural Language Understanding
  - Fall and spring. 2 credits.
- **EDUC 611 Educational Psychology** Fall. 3 credits. Undergraduates admitted with permission from instructor. R. Ripple
- EDUC 614 Gender, Context, and Epistemological Development (also WOMNS 624)

Fall. 3 credits. D. Schrader.

- EDUC 714 Moral Development and Education Spring, 3 credits. Offered alternate years. D. Schrader.
- HD 600/700 Graduate Seminars

#### LING 530 Representation of Structure in Vision and Language (also COGST 530 and PSYCH 530)

Spring. 4 credits. Offered alternate years. S. Edelman.

- LING 531 Topics in Cognitive Studies: Mind and Reality in Science Fiction (also COST 531 and PSYCH 531) Spring. 4 credits. S. Edelman and H. Segal.
- [LING 609 Second Language Acquisition and the Asian Languages (also ASIAN 610)

Fall. 4 credits. Prerequisite: LING 414-415. Not offered 2002-2003. Y. Shirai.]

- LING 633 Language Acquisition Seminar (also COGST 633 and HD 633) Fall. 1–4 credits. Prerequisite: COGST/HD/ LING/PSYCH 436 or equivalent. B. Lust.
- LING 700 Graduate Seminars

#### MATH 681 Logic Spring. 4 credits.

- **MATH 781–782** Seminar in Logic Fall and spring, 4 credits each.
- MATH 788 Topics in Applied Logic Fall. 4 credits.
- NBA 663 Managerial Decision Making Fall. 3 credits. J. Russo.
- PHIL 633 Philosophy of Language Linguistic Convention Spring. 4 credits. Z. Szabó.
- [PHIL 662 Philosophy of Mind Fall. 4 credits. Not offered 2002–2003. Z. Szabő.]

#### PHIL 700 Graduate Seminars

**PSYCH 521 Psychobiology** (Developmental Seminar) Fall and spring. 4 credits each. S. Johnson.

- PSYCH 530 Representation of Structure in Vision and Language (also COGST 530 and LING 530) Spring. 4 credits. Offered alternate years. S. Edelman.
- PSYCH 531 Topics in Cognitive Studies: Mind and Reality in Science Fiction (also COGST 531 and LING 531) Spring. 4 credits. S. Edelman and H. Segal.
- [PSYCH 550 Special Topics in Cognitive Science (also COGST 550) Spring. 4 credits. Not offered 2002–2003. M. Spivey.]
- [PSYCH 601 Computational Models of Language Spring, 4 credits. Prerequisite: consent of

instructor. Not offered 2002–2003. M. Spivey.]

- PSYCH 614 Cognitive Psychology (also COGST 214 and PSYCH 214) Fall. 4 credits. Co-meets with COGST 501, Cognition. S. Edelman.
- [PSYCH 616 Modeling Perception and Cognition (also COGST 416 and PSYCH 416) Spring. 4 credits. Not offered 2002–2003. M. Spivev.]
- PSYCH 618 Psychology of Music (also PSYCH 418)

Spring. 4 credits. C. Krumhansl.

- PSYCH 628 Connectionist Psycholinguistics (also COGST 428, LING 428, and PSYCH 428) Fall. 3 credits. M. Christiansen.
- PSYCH 631 Effects of Aging on Sensory and Perceptual Systems (also BIONB 421 and PSYCH 431) Fall. 3 or 4 credits. B. Halpern.
- PSYCH 665 Topics in High-Level Vision (also COMS 392, COGST 465, and PSYCH 465)

Spring. 4 credits. Offered alternate years. S. Edelman.

- PSYCH 691 Research Methods in Psychology (also COGST 491/691 and PSYCH 491) Spring. 4 credits. D. Dunning.
- PSYCH 714 Comparative Cognition (also COGST 414 and PSYCH 414) Spring. 3 or 4 credits. M. Owren.
- [PSYCH 716 Auditory Perception (also PSYCH 316)

Fall. 4 credits. Not offered 2002–2003. C. Krumhansl.)

#### COLLEGE SCHOLAR PROGRAM

K. Gabard, director, 55 Goldwin Hall, 255–5792

The College Scholar Program is described in the introductory section of Arts and Sciences.

**COLLS 397 Independent Study** Fall or spring. 1–4 credits. Prerequisite: permission of program office.

**COLLS 499 Honors Research** 

Fall or spring. 1–8 credits; a maximum of 8 credits may be earned for honors research. Prerequisite: permission of program director. Each participant must submit a brief proposal approved by the honors committee.

#### COMPARATIVE LITERATURE

N. Saccamano, chairman (247 Goldwin Smith), C. Chase, director of Undergraduate Studies, (247 Goldwin Smith); N. Melas, director of Graduate Studies (247 Goldwin Smith); A. Adams, F. Ahl, C. Arroyo, A. Caputi (Emeritus), C. Carmichael, D. Castillo, W. Cohen, J. Culler, B. deBary, S. Donatelli, D. Grossvogel (Emeritus), P. Hohendahl, W. Holdheim (Emeritus), W. J. Kennedy, B. Maxwell, J. Monroe, T. Murray, J. Resina, E. Rosenberg (Emeritus), N. Sakai, J. Stark, L. Waugh (Emeritus), W. Wetherbee.

Also cooperating: S. Buck-Morss, P. Carden,

- H. Deinert, C. Dhavernas, S. Donatelli,
- E. Hanson, B. Jeyifo, P. Kamuf, C. Kaske,
- H. Lee, K. P. Long, D. Mankin, B. Maxwell, T. McNulty, E. Rottenberg, J. Rusten,
- R. Schneider, D. Schwarz, S. Senderovich, D. Starr, M. Steinberg, J. Williams, E. Winet.

The Department of Comparative Literature provides a broad range of courses in European as well as non-European literature. Courses stress significant authors, themes, problems, styles, genres, historical periods, and theoretical perspectives. In cooperation with related departments in the humanities, the departmental offerings reflect current interdisciplinary approaches to literary study: hermeneutics, semiotics, deconstruction, cultural criticism, Marxism, reception aesthetics, feminism, and psychoanalysis.

#### The Major

The major enables students to develop an integrated knowledge of Western literature, to strengthen their reading and writing abilities, and to prepare for careers demanding analytical, interpretive, and evaluative skills. Prospective majors should consult with the director of undergraduate studies. After declaring a major, a student chooses an adviser from the department's faculty. The requirements for the major are designed to allow each student to follow a course of study that combines intellectual rigor with the pursuit of personal interests. The specific contours of such a program are worked out in consultation with the student's adviser.

#### **Requirements for the Major**

- 1) Five courses in Comparative Literature at the 200 level and above, including the core course listed below. A student may include up to two literature courses from other departments.
- One core course in Comparative Literature 2) (for 2001-2002 COM L 365 [fall]), COM L 370 [spring], to be taken by all majors in their junior or senior year. At the discretion of the department, students may enroll in core courses in both their junior and senior years.
- Five courses in literature and other areas 3) of the humanities at the 200 level or higher, to be taken in one or more foreign language and literature departments. Texts must be read in the original language. A student may offer one language course (conversation, composition, etc.) towards fulfilling this requirement.
- 4) An honor's essay (COM L 493) of roughly 50 pages is optional. It is to be written during the senior year under the direction of a faculty member, preferably from

within the department, who has agreed to work in close cooperation with the student. Students are urged to begin research on their thesis topic during the summer preceding their senior year. In lieu of a Senior Honors Essay, students may take one course at the 400–600 level.

The department also encourages:

1) a program that includes broad historical coverage (e.g., COM L 201-202: Great Books); intensive study of a single genre (e.g., COM L 363-364: The European Novel, COM L 365: Contemporary Fiction); analysis of problems in literary theory (e.g., COM L 302: Literature and Theory). The department also offers a number of strongly recommended 200level courses designed to acquaint undergraduates with the discipline: COM L 203: "Introduction to Comparative Literature," as well as broadranging introductory courses in Global Fictions (COM L 204).

#### Honors

A student who completes the requirements for the major is eligible for the degree of Bachelor of Arts with honors in comparative literature. The department bases its decision on the students achieving grades of at least B+ on the senior essay, in course work for the major, and in their overall academic performance at Cornell.

#### **First-Year Writing Seminars**

Most 100-level courses may be used toward satisfying the freshman writing seminar requirements. See "John S. Knight Institute for Writing in the Disciplines" for a full description of the first-year seminar program.

#### Courses

- COM L 201 Great Books # (IV)
- Fall. 4 credits. COM L 201 and 202 may be taken independently of each other. S. Donatelli.

A reading of seminal texts that represent and have shaped Western culture and hence form an essential part of the student's intellectual equipment. By evaluating and interpreting selections from the Bible, Homer, Virgil, Dante, Shakespeare, and others, students will develop critical reading and writing abilities.

#### COM L 202 Great Books (IV)

Spring. 4 credits. B. Maxwell. World literature of the last 300 years, emphasizing the response to European worldwide expansion first in the colonizing countries, then in the colonized. The persistence of certain themes (such as slavery, monstrosity, overreaching, coercion, and vengeance) are a central concern in many of the texts studied. A certain amount of attention is given to an examination of differing ideological perspectives on the notion of "Great Books." Readings chosen from texts by Shakespeare, Montaigne, Defoe, Goethe, Mary Shelley, Poe, Melville, Marx, Conrad, Kipling, Brecht, Woolf, Cesaire, Tutuola, Brathwaite, and Sebald.

#### COM L 203 Introduction to Comparative Literature (also ASIAN 203) (IV) Fall. 4 credits. J. Stark.

The course is intended to answer the question persistently asked by undergraduates: "What is Comparative Literature, anyway?" The format

of the course is designed to acquaint students with the range and variety of the field by having members of the department present those aspects which reflect their areas of expertise and their methods of teaching. Of the three meetings each week, the first generally takes the form of a lecture; the second and third are a discussion of the assigned text. Topics considered include uses and methods of comparison, the role of theory in literary criticism, and connections between literary study and other disciplines, including history, visual and film studies, and political and economic theory. Authors studied range from Aeschylus to Ammons, Baudelaire to Borges, Cervantes to Cesaire. All readings in English translation. Open to majors and prospective majors as well as students intending majors other than Comparative Literature.

#### COM L 204 Global Fictions (IV) Spring. 4 credits. N. Melas.

This course is an introduction and an inquiry into global perspectives on fiction. Can the reading of fiction point us towards becoming citizens of the world? How might we know this world? How might we imagine it? We consider the condition of the stranger in this global era as well as construct a geography of reading. Readings are drawn mainly but not only from the contemporary period and outside Europe. Readings change depending on instructor, but may include works of Rushdie, Marquez, Conde, Munif, Castellanos, Oe, Ngugi, Wolf, Kincaid, and Homer.

#### [COM L 208 Shakespeare and the **Twentieth Century (also ENGL** 208) (IV)

Spring. 4 credits. Next offered 2003-2004. W. J. Kennedy.

What is the relationship between the plays of Shakespeare in their own time and the various ways they have functioned in modern culture? We compare selected works of Shakespeare with their adaptations in fiction, theater, film, the educational system, government, and popular culture. The discussion of each play is organized around one or more critical approaches. The course as a whole attempts to provide a systematic introduction to the contemporary study of literature and culture.]

#### COM L 211 The Comic Road to Wisdom (also THETR 214) (IV)

Spring. 4 credits. S. Donatelli. An appreciation of comedy as a literary mode, as a symbolic attitude, and as an essential aspect of human experience. A reading of premodern and modern texts, mostly narrative, provides valuable orientation for humanists in an increasingly rationalistic and technological age. Seminal works by Plato, Erasmus, Cervantes, Samuel Beckett, George Schuyler, and Witold Gombrowicz. Prominent theoretical approaches to the comic by Freud, Bakhtin, Langer, and others, with background on related sub-topics such as the carnival, the fool, and laughter. The course considers the philosophical inclinations of comedy and will invite a speculative critical response.

#### COM L 215 Comparative American Literatures (also AM ST 215) (IV)

Fall, 4 credits. B. Maxwell. Twentieth-century writing from Canada, the United States, the Caribbean, and Latin America. A hemispheric American Studies perspective encourage thinking about and across cultural, linguistic, and national

demarcations. This course proposes that a question put by the poet William Carlos Williams-"History, history! What do we fools know or care?"-finds its counter-statement in words from Africa, passed on by the novelist Paule Marshall: "Once a great wrong has been done, it never dies. People speak the words of peace, but their hearts do not forgive. Generations perform ceremonies of reconciliation but there is no end." Countering the literature of amnesia and baseless optimism, the works that we read cannot forget, and decline to forgive, the historical traumas that so bitterly flavor them. Our concern largely is with understanding the aesthetic means and strategies that certain writers use to perform ceremonies not bent on reconciliation. Readings (in English) chosen from Joy Kogawa, Obasan, Sheila Watson, The Double Hook; Hubert Aquin, The Antiphonary; William Faulkner, Absalom, Absalom!; Kamau Brathwaite, Trench Town Rock; Rosario Castellanos, The Nine Guardians, Juan Rulfo, Pedro Paramo; Gabriel Garcia Marquez, One Hundred Years of Solitude; Jose Donoso, Curfew; Eduardo Galeano, The Book of Embraces and Francisco Goldman, The Ordinary Seaman.

#### [COM L 220 Thinking Surrealisms (IV) Spring. 4 credits. Not offered 2002-2003. B. Maxwell.

Borrowing its title from a formulation of the Marxist philosopher Ernst Bloch and beginning from the "forays of demoralization" instigated by the Dadas, who bequeathed to surrealism the precious gift of unreconciliation to the given, this course ranges over the protean expressiveness of several surrealist moments of the last century. The inception of surrealist precept and practice in Paris in the mid-1920s is a consideration, perhaps only slightly more central to the course than the explicitly anti-fascist political phase of the 1930s and '40s; the supplementation of Parisian surrealism by Caribbean, Mexican, African American, Quebecois, and Mauritian writers and artists; the renegade practice of Hans Bellmer and the unschooled surreality of Eugene Atget; the reflections of and on surrealism by Walter Benjamin, Ernst Bloch, and Theodor W. Adorno; the relations of surrealism to the Situationist International; and the recent critiques of surrealism in fiction (Milan Kundera) and scholarship (Hal Foster). Throughout, the course asks what the proliferation of "thinking surrealisms" meant to twentieth-century culture and politics. All readings in English.]

#### COM L 223 The Comic Theatre (also CLASS 223, THETR 223)

Fall. 3 credits. J. Rusten. See CLASS 223 for full course description.

#### [COM L 225 Poetry and Poetics of

Difference (also ENGL 225) (IV) Spring. 4 credits. Limited to 15 students. While not restricted to sophomores, this course is intended to offer sophomores especially an opportunity to work closely with faculty in a seminar environment in a strong interdisciplinary context. Not offered 2002-2003. J. Monroe.

What is the relationship between the diverse pleasures we experience in poetry and contemporary ethical concerns? In what ways does poetry encourage us to understand and engage, in particular, questions of difference and otherness? In exploring these and related questions, this course begins with a constellation of influential examples from poetry of the past two centuries, then moves to recent discussions from a cross-section of fields including anthropology, philosophy, linguistics, and cultural studies. The latter half of the course explores the role such questions have played across a range of contemporary poetic practices within the United States and abroad over the past two decades, with particular emphasis on the period since 1989. Readings include works by Edgar Allen Poe, Gertrude Stein, Andre Breton, Adrienne Rich, June Jordan, Kamau Brathwaite, Aime Cesaire, Hans Magnus Enzensberger, Joy Harjo, Rosmarie Waldrop, Charles Bernstein, Michael Palmer, Leslie Scalapino, and Susan Howe.]

#### COM L 236 Greek Mythology (also CLASS 236) # (IV)

Fall. 3 credits. Limited to 200. D. Mankin. See CLASS 236 for a full description.

#### COM L 245 Jews and Arabs in Contact and Conflict (also NES 235, JWST 235) @ (III or IV) Spring. 3 credits. D. Starr.

See NES 235 for full course description.

COM L 276 Desire (also ENGL 276) (IV)

Spring. 4 credits. E. Hanson. See ENGL 276 for full course description.

#### COM L 279 Russian Connection 1830-1867 (also RUSSL 279) # (IV)

Fall. 4 credits. P. Carden. See RUSSL 279 for full course description.

#### COM L 280 Russian Connection 1870-1960 (also RUSSL 280) (IV)

Spring. 4 credits. P. Carden. See RUSSL 280 for full course description.

#### COM L 302 Literature and Theory (also COM L 622 and ENGL 302/602) (IV) Fall. 4 credits. J. Culler.

Study of issues in contemporary theoretical debates, with particular attention to structuralism, deconstruction, psychoanalysis, and feminism. Readings from Barthes, Derrida, Foucault, J. Butler, B. Johnson, and others. No previous knowlege of literary theory is assumed.

#### COM L 304 Europe and Its Others: An Introduction to the Literature of Colonialism @ (IV)

Fall. 4 credits. Limited to 15. Core course for majors. N. Melas.

Through an examination of selected works from the early twentieth century to the present from France, England, Africa, and the Caribbean, this course provides an introduction to the literature written alongside and against the historical phenomenon that has arguably had the most far reaching impact in modern history: European colonialism. How was culture instrumental in the political project of domination? How have writers of the postcolonial period attempted to write back? What problems and possibilities does colonialism present for cultural identity and cultural resistance? In addition to close reading of texts and a consideration of historical background we also examine visual representations of colonialism, particularly film. Authors include Conrad, Ngugi, Nandy, Conde, Duras, Salih, Fanon, Memmi, Djebar, Resnais, and Pontecorvo. All readings available in English.

#### [COM L 311 Modern European Literature and Culture (also FRLIT 315) (IV)

Spring. 4 credits. Not offered 2002-2003. Staff.

We concern ourselves with European culture as embracing the area from Russia to the Atlantic Ocean, not as divided into Western, Eastern, or Central. European culture crosses the old East-West political boundaries. Case studies: Ireland, France, Czech Republic, Russia.

This course is designed for those interested both in the artistic, imaginative side of European literature and in the ways in which culture expresses some of the most significant concerns of our age. The conceptual links include issues of national identity and social justice, as well as concerns of private emotions and individual personality. Popular culture, film, TV, and theatre are integrated with the reading and class discussion. Some authors who are read: Flaubert, Charlotte Bronte (Villette), Karl Marx, Dostoevsky, Mayakovsky, Yeats, Malraux, Camus, Joyce, Solzhenitsyn, Kundera, and others.]

#### COM L 312 Melodrama, Totalitarianism, and Everyday Life: Japan and China (also ASIAN 316) @ (IV)

Spring. 4 credits. H. Lee. Peter Brooks characterizes melodrama as the quintessential revolutionary genre and the enduring artistic form created by the French Revolution. Uncannily, twentieth-century totalitarian states have found an ally in the melodramatic form-in its penchant for the grandiose and spectacular and its symbolic economy of good and evil, love and hate, justice and revenge. This course explores the relationship between melodrama as an aesthetic form and totalitarianism as a political ideology. We first read the theoretical writings of Peter Brooks. Hannah Arendt and others, and then move to case studies of the imbrication of politics, culture, and everyday life in the Japanese and Chinese contexts. These studies are supplemented by primary sources ranging from personal narratives to a variety of visual materials.

#### COM L 315 Love and Its Vicissitudes (IV)

Spring. 4 credits. E. Rottenberg. This is a course about love. We explore the concept of love from a variety of perspectives (literary, philosophical, and psychoanalytic) with particular emphasis on the French nineteenth and twentieth centuries. Discussions focus on love's intimate association with problems of hate, jealousy, and ambivalence.

#### COM L 320 In Search of the Origin of Language (also FRLIT 327) (IV)

Spring, 4 credits. T. McNulty. See FRLIT 327 for full course description.

#### COM L 326 Christianity and Judaism (also RELST 326) # (IV)

Spring. 4 credits. C. Carmichael. A study of the New Testament as a product of the First Century Palestinian and Hellenistic Judaism. Other text (also in translation): The Passover Haggadah.

#### COM L 328 Literature of the Old Testament (also RELST 328) @# (IV)

Fall. 4 credits. C. M. Carmichael. Analysis of small sections of well-known material for in-depth discussion.

#### COM L 335 Modern Western Drama, **Modern Western Theater: Theory and** Practice (also THETR 335) (IV) Fall. 4 credits. Staff.

See THETR 335 for full course description.

#### COM L 342 Literature and Culture after Auschwitz (IV)

Spring. 4 credits. Core course for major. Open to non-majors. Limited to 15 Students. J. Stark.

Examines how post-WWII artists and writers have sought to understand the impact of the Holocaust and the challenges of living in its aftermath. From Theodor Adorno's claim that "to write poetry after Auschwitz is barbaric" to recent efforts to memorialize the Holocaust through museums and monuments, we focus on debates about how the Holocaust can. cannot, should, or should not be represented, and examine various ways of understanding its cultural significance. Along with philosophical and historiographical discussions, we study the testimony of survivors (Amery, Levi, Fink, video testimonies), several films and the debates surrounding them (Resnais' Night and Fog, Lanzmann's Shoah, Spielberg's Schindler's List), and art and writing by members of the post-war generations (Kiefer, Spiegelman, Raczymow). All texts in English translation, but may of course be read in the original by students with command of the pertinent language.

#### [COM L 343 Contemporary Mass Culture in Japan and in the U.S. (also ASIAN 363) (IV)

Spring, 4 credits. Enrollment limited to 25. Not offered 2002-2003. B. deBary. See ASIAN 363 for full course description.]

#### [COM L 344 Tragic Theatre (also CLASS 345) (IV)

Spring. 4 credits. Not offered 2002-2003. F Ahl

See CLASS 345 for full course description.]

#### COM L 350 Education and Philosophical Fantasies (also RUSSL 350) # (IV) Fall. 4 credits. P. Carden.

See RUSSL 350 for full course description.

#### COM L 352 European Cultural History 1815-1870 (also HIST 362) # (III or IV)

Fall. 4 credits. M. Steinberg. See HIST 362 for full course description.

#### COM L 355 Decadence (also ENGL 355) (IV)

Fall. 4 credits, E. Hanson. See ENGL 355 for full course description.

#### [COM L 356 Renaissance Literature (IV) Spring. 4 credits. Not offered 2002-2003

W. J. Kennedy. An introduction to Renaissance literary texts with some attention to cultural backgrounds and intellectual history. Readings from Machiavelli, Erasmus, Rabelais, Shakespeare, Cervantes, and others.]

#### COM L 362 The Culture of the Renaissance II (also ENGL 325, HIST 364, MUSIC 390, ART H 351, FRLIT 362 and RELST 362) # (III or IV)

Fall. 4 credits. (Friday required sections.) C. Kaske, K. P. Long.

Members of various departments lecture on Luther, Michelangelo, Edmund Spenser, Cervantes, Copernicus, Galileo, and Monteverdi. Guest lectures include Peter Dear, History; Esther Dotson, History of Art; and Rebecca Harris-Warrick, Music. Lectures and discussions introduce different methods of interpretation and of historical analysis.

#### COM L 363 The European Novel # (IV) Fall. 4 credits. J. Stark.

The European novel from its origins to the early nineteenth century. The course is discussion-based and focuses on detailed consideration of character and narrative technique in conjunction with analysis of the historical, philosophical, and aesthetic significance of the genre. Texts to include Lazarillo de Tormes, Cervantes' Don Quixote, Defoe's Robinson Crusoe, Goethe's The Sorrows of Young Werther, Austen's Emma, and Stendhal's The Red and the Black. All texts in English translation, but may of course be read in the original by students with command of the pertinent language. May be taken independently of COM L 364.

#### COM L 364 The European Novel # (IV) Spring, 4 credits, J. Stark.

The nineteenth- and twentieth-century European novel from realism to postmodern experimentation. Discussions focus on the role of fiction in understanding, troubling, or shaping modern culture and identity, with particular attention to the ways that major novelistic themes and forms reflect and participate in modern European social and intellectual history. Authors studied could include Balzac, Dickens, Flaubert, Dostoevsky, Woolf, Kafka, Calvino, and Nabokov. All texts in English translation, but may of course be read in the original by students with command of the pertinent language. May be taken independently of COM L 363.

#### [COM L 365 Contemporary Fiction @ (IV) Fall. 4 credits. Limited to 15 students. Not

offered 2002-2003. B. Maxwell.

A study of European fiction and drama largely drawing on texts from the first half of the twentieth century. We pay particular attention to the making of literary types and characters; to traces of utopian and messianic elements; to the relations between memory and political revolution; and to the motive of ressentiment. Readings (in translation) chosen from the following: Robert Walser, Snowwhite and The Walk; Franz Kafka, The Trial; Thomas Mann, Death in Venice; Bertolt Brecht, The Rise and Fall of the City of Mahagony; Joseph Roth, Hotel Savoy; Alfred Doblin, Berlin Alexanderplatz; Christa Wolf, The Quest for Christa T.; Louis Aragon, Paris Peasant; Louis-Ferdinand Celine, Death on the Installment Plan; Elio Vittorini, In Sicily; Natalia Ginzburg, stories; and Isaac Babel, stories. Collateral theoretical readings by Georg Lukacs, Ernst Bloch, Bertolt Brecht, Walter Benjamin, Siegfried Kracauer, Gershom Scholem, Elias Canetti, and Christa Wolf.]

#### **ICOM L 370** Literature and Ethics (IV)

Spring. 4 credits. Limited to 15 students. Not offered 2002-2003, J. Stark. Recent literary criticism has renewed the fraught question of how literature relates to ethics. This question arises most dramatically when incompatible modes of interpreting or representing experience confront each other and consequently destabilize accepted definitions of the law, of moral value, and of historical truth.]

#### [COM L 382 Greeks, Romans, and

Victorians (also CLASS 382) # (IV) Spring. 4 credits. Not offered 2002-2003. F. Ahl.

See CLASS 382 for full course description.]

#### COM L 387 Twentieth-Century Black **Cultural Movements (also COM L** 690, ASRC 332/532) @ (IV) Fall. 4 credits. A. Adams.

See ASRC 332/532 for full course description.

#### COM L 401 Narratives of the University (also S HUM 408) (IV) Fall. 4 credits. J. Williams.

See SHUM 408 for full course description.

#### COM L 406 Cosmopolitan Alexandria (also \$ HUM 411) @ (IV)

Fall. 4 credits. D. Starr. See SHUM 411 for full course description.

#### COM L 407 Reading Practices of the University (also S HUM 412) (IV) Fall. 4 credits. P. Kamuf.

See SHUM 412 for full course description.

#### COM L 408 Moving Beyond the

Readymade (also S HUM 418) (IV) Spring. 4 credits. C. Dhavernas. See S HUM 418 for full course description.

#### [COM L 413 Death, Culture, and the Literary Monument (IV)

Fall. 4 credits. Next offered 2003-2004. N. Melas.

Beginning with Homer's Iliad, this course inquires into the monumental transformation of death into immortality in the literary composition. How do death's negations become fiction's triumph? We pay particular attention to the fate of this procedure when its subjects are no longer heroic warriors but slaves and women. How do colonial domination and gender difference alter the aesthetic procedures and assumptions underlying commemoration and literary immortality? In addition to death and language, we consider such themes as the relation of antiquity to the present, of identity to its dissolution and of politics to culture. Readings of literary texts drawn from a variety of languages and traditions are attended by selected readings in critical theory and a glance at visual culture, particularly surrounding monuments commemorating the emancipation of slaves and the holocaust. Authors include Homer, Derek Walcott, Simone Schwartz-Bart, Virginia Woolf, Krista Wolf, Tayeb Salih, Maurice Blanchot, Hegel, Orlando Patterson, and Walter Benjamin.]

#### COM L 417 Faust (also GERST 417) # (IV)

Spring. 4 credits. H. Deinert. See GERST 417 for full course description.

#### [COM L 418 Virtual Orientalisms (also ASIAN 415) # (IV)

Fall. 4 credits. Limited to 15 students. Not offered 2002-2003. B. deBary See ASIAN 415 for a full course description.]

#### COMPARATIVE LITERATURE 485

#### COM L 419-420 Independent Study

419, fall; 420, spring. Variable credit. COM L 419 and 420 may be taken independently of each other. Applications available in 247 G.S.

#### COM L 421 The Map of Tenderness: The Sentimental Subject in Cross-Cultural Perspective (also ASIAN 420) (IV)

Fall. 4 credits. Limited to 15 students. H. Lee.

Eighteenth-century Europe and China, though worlds apart, were both proudly awash in sentimental tears. If emotions, as philosophers tell us, embody thoughts and judgments, what kinds of ideas and values were being expressed as fictional characters, authors, and readers jointly celebrated the virtue of tears? In this course, we begin with the cult of sensibility and the affective formulations of self and community at the threshold of modernity. We then explore nineteenthcentury Romanticism and the process of crosshybridization and contestation in the colonial encounters. Finally, we reflect on the status of love under the postmodern condition characterized by global capitalism and the transnational production of desires and fantasies. Readings include works by Charles Taylor, Rousseau, Goethe, Dumas fils, Flaubert, Shelley, Cao Xuegin, Wu Woyao, Zhang Ailing, and Wei Hui. (All texts read in English).

#### COM L 426 New Testament Seminar (also RELST 426) # (IV)

Spring. 4 credits. Limited to 20 students. C. Carmichael.

Identification and discussion of problems in the New Testament.

## COM L 428 Biblical Seminar (also RELST 427) # @ (IV)

Fall. 4 credits. Limited to 15 students. C. Carmichael.

A study of how biblical ethical and legal rules (in Exodus, Leviticus, and Deuteronomy) comment on incidents in the biblical narratives (Genesis-2 Kings). The link between law and narrative enables us to observe in detail how ancient thinkers evaluate ethical and legal problems of perennial interest.

#### COM L 431 Literature and Evil (IV)

Fall. 4 credits. Limited to 15 students. E. Rottenberg.

This course examines the problem of evil from a variety of disciplinary perspectives

from a variety of disciplinary perspectives. Beginning with the conceptual breakthroughs of Kant's critical idealism and Schellings's metaphysics of evil in the late eighteenth and early nineteenth centuries, we explore the ways in which the notion of evil has unsettled our concepts of experience, time, memory, and language and how it has affected the theories and practice of literature today. We discuss works from the both the nineteenth and twentieth centuries in an attempt to articulate the disastrous responsibility that is our heritage at the dawn of a new millennium.

#### COM L 437 A Moralist and a Pornographer (also RUSSL 437) (IV)

Spring. 4 credits. S. Senderovich. See RUSSL 437 for full course description.

#### [COM L 450 Renaissance Poetry (also COM L 650, ENGL 622, ITALL 450/ 650) (IV)

Spring. 4 credits. Not offered 2002–2003. W. J. Kennedy. A reading and discussion of key texts in lyric poetry from Italian, French, English, and other European literatures of the Renaissance.]

#### [COM L 451 Renaissance Narrative (IV)

Spring. 4 credits. Not offered 2002–2003. W. J. Kennedy.

A reading and discussion of key texts in narrative epic and chivalric romance from Italian, French, English, and other European literatures of the Renaissance.]

#### [COM L 452 Renalssance Humanism (also COM L 652) # (IV)

Fall. 4 credits. Enrollment limited to 15. Not offered 2002–2003. W. J. Kennedy. A reading and discussion of key texts by Renaissance humanists in Italian, French, English and other European literatures from the fourteenth to seventeenth centuries.}

#### [COM L 467 Poetry and Rhetoric (also COM L 667, ENGL 483/683, FRLIT 437/637) (IV)

Fall. 4 credits. Not offered 2002–2003. C. Chase.

In present-day common usage, "poetry" means emotion or beauty, and "rhetoric" means deceptive, decorative language. These incompatible meanings cover over a history of close connection between poetry and rhetoric. Historically, if poetry and rhetoric at times have been seen as opposite, incompatible kinds of language, they also have been identified with each other and strongly distinguished from philosophy and science. Where rhetoric belongs turns out to raise issues of politics and philosophy, not only of literary history and language. Such questions and issues have been intently pursued in modern poetry beginning with the Romantics.]

#### COM L 476 Libertine Literature (also FRLIT 476) (IV) Spring. 4 credits. T. McNulty.

Spring. 4 credits. T. McNulty. See FRLIT 476 for full course description.

#### COM L 479 Femininity, Ethics and Aesthetics (also FRLIT 491/691,

**COM L 679) (IV)** Fall. 4 credits. T. McNulty.

See FRLIT 491/691 for full course description.

#### [COM L 480 Baudelaire in Context (also COM L 680, FRLIT 488/688) # (IV)

Spring. 4 credits. Prerequisite: reading knowledge of French required. Not offered 2002–2003. J. Culler.

A reading of *Les Fleurs du Mal* and *Les Petits* poemes en prose, in conjunction with major twentieth-century critical treatments of them, so as to grasp what has been at stake in discussions of Baudelaire. Critics to be read include Benjamin, Bersani, de Man, Friedrich, Jakobson, Jauss, Johnson, and Sartre.]

#### COM L 482 Latin American Women Writers (also SPANL 492, WOMNS 481) (IV)

Fall. 4 credits. D. Castillo. See SPANL 492 for full course description.

#### COM L 483 Imagining the Holocaust (also ENGL 458/658, JWST 458/658, COM L 683, GERST 483) (IV) Spring. 4 credits. D. Schwarz.

See ENGL 458 for a full course description.

#### COM L 487 Contemporary Poetry and Culture (also COM L 674, ENGL 488/ 697, GERST 674, SPANL 674) (IV)

Spring. 4 credits. J. Monroe. The redrawing of cultural and political boundaries underway since the late 1980s has made it possible to conceive of the poetry of the Cold War era with a degree of closure unimaginable only a few years ago. In light of this changed situation, we focus on the secondhalf of the post-1945 period-the 30 years extending from 1968 to the present-with particular attention to the past two decades. Exploring issues of emerging and evolving importance for a poetry of the present moment in light of the recent past, we consider dominant modes as well as alternative practices; canon formation, gender, and multiculturalism; the roles of the publishing industry, popular culture, creative writing programs, and new computer technologies in shaping reading habits and writing communities.

#### COM L 489 Seminar in Comparative Twentleth Century Anglophone Drama (also ENGL 483) (IV)

Spring. 4 credits. B. Jeyifo. See ENGL 483 for full course description.

#### COM L 493 Senior Essay

Fall and spring. 8 credits. Hours TBA individually in consultation with the director of the Senior Essay Colloquium. Approximately 50 pages to be written over the course of two semesters in the student's senior year under the direction of the student's adviser. An "R" grade is assigned on the basis of research and a preliminary draft completed in the first semester. A letter grade is awarded on completion of the second semester.

#### [COM L 495 The Cultural Theory of the Frankfurt School (also GERST 495, COVT (21) (III or IV)

**GOVT 471) (III or IV)** Fall. 4 credits. Not offered 2002–2003. P. Hohendahl.

See GERST 495 for full course description.]

#### [COM L 496 Theorizing the Public Sphere (also GERST 496, GOVT 464) (ill or IV)

Fall. 4 credits. Not offered 2002–2003. P. Hohendahl.

See GERST 496 for full course description.]

#### [COM L 604 Translation and the Global Marketplace

Fall. 4 credits. Not offered 2002–2003. N. Melas.}

#### COM L 605 Russian Analytical Approaches to Literature (also RUSS L 605)

Fall. 4 credits. S. Senderovich. See RUSS L 605 for full course description.

#### [COM L 609 Comparison and Cultural Difference

Fall. 4 credits. Not offered 2002–2003. N. Melas.

This course is a wide-ranging investigation of the pitfalls and possibilities for cross-cultural comparison. We examine the structure and mechanisms of comparison, both as a disciplinary method and as a concept or practice: to what extent and in what circumstance can comparison produce cultural difference, consolidate it, dissolve it, erect borders, inhabit borderlands, propose a global ecumene? With particular attention to colonialism and globalization, we inquire into the relation between various modes of comparison and broader contexts and ideologies. Though focused on the humanities and on theoretical texts, readings include incursions into the social sciences and selected poetry and film. Authors may include Lyotard, Foucault, Fanon, Tilley, Gilroy, Clifford, Appadurai, Bhabha, Lanser, Kincaid, Walcott.]

[COM L 610 Modern Japanese Studies: The Formation of the Field in History and Literature (also ASIAN 609) Spring. 4 credits. Not offered 2002-2003. B. deBary, N. Sakai, J. Koschmann.

See ASIAN 609 for full course description.]

#### COM L 619-620 Independent Study

619, fall; 620, spring. Variable credit. COM L 619 and 620 may be taken independently of each other. Applications available in 247 G.S.

#### COM L 622 Literature and Theory (also COM L 302 and ENGL 302/602) Fall. 4 credits. J. Culler.

See COM L 302 for full course description.

#### [COM L 630 Aesthetics in the Eighteenth Century (also ENGL 630)

Fall. 4 credits. Not offered 2002-2003. N. Saccamano.

See ENGL 630 for a full course description.]

[COM L 631 Politics and the Passions: Hobbes to Rousseau (also ENGL 631)

Spring. 4 credits. Not offered 2002-2003. N. Saccamano.

See ENGL 631 for full course description.]

#### COM L 636 Comparative Modernisms/ **Alternative Modernities**

Fall. 4 credits. Limited to 15 students. N Melas

The cultural movements or "style" that go under the name of modernism are international in scope. Modernism's broad comparative dimensions, however, when they are considered at all, are usually read from the centers of Western culture, especially Paris and London, out towards peripheral or marginal regions. This course reverses this critical itinerary and in the process inquire into the geographical coordinates that alternately relay and obscure the relation between modernism as an aesthetic movement and modernity as a world-historical and politicaleconomic project. Central emphasis falls on colonialism and its particular inflection of the temporality of modernist aesthetics and on the progress of modernity in the two regions that are our focus: the French Caribbean and Mediterranean Egypt. While including canonical theoretical texts on Western modernity, modernism and postcolonial theory, readings are focussed on the multiple and intersecting influences around two central figures, Martinican poet Aime Cesaire (Baudelaire, surrealism, African literature and anthropology, decolonization, Fanon, Glissant) and the modern Greek Alexandrian poet, Constantine Cavafy, (Browning, Forster, T. S. Eliot, Durrell, Tsirkas, Al-Kharrat, Shaheen). All readings available in translation.

#### COM L 644 Judaism and Modernism (also ENGL 683)

Spring. 4 credits. W. Cohen. Emphasis on the centrality of Jewish writers and characters to modernist fiction, especially of the 1920s, in relation to European literary history, the nature of modernism, the rise of anti-Semitism, and, more generally, racial and imperial discourse. Readings from Babel, Joyce, Kafka, Proust, Stein, and Svevo, with possible attention to such writers as Borges, Celine, Dublin, Eliot, Hemingway, Mann, Nabokov, and Pound. Texts available in English.

#### [COM L 650 Renaissance Poetry (also COM L 450, ENGL 622, ITALL 450/ 650)

Spring. 4 credits. Not offered 2002-2003. W. J. Kennedy.

See COM L 450 for full course description.]

#### [COM L 652 Renaissance Humanism (also COM L 452)

Fall. 4 credits. Limited to 15 students. Not offered 2002-2003. W. J. Kennedy. See COM L 452 for full course description.]

#### COM L 657 Seminar in Dramatic Theory (THETR 637)

Fall, 4 credits. Permission of instructor. E Winet

See THETR 637 for full course description.

#### [COM L 665 The Literature of Empire in

the Renaissance (also ENGL 626) Spring. 4 credits. Not offered 2002-2003. W. Cohen.

Literary responses to the first age of European global expansion, viewed in the context of the category of the Renaissance and the ongoing process of the self-definition of European literature and Western civilization. Emphasis on the interplay between Mediterranean and oceanic imperialism, and on the relationship between ideology and literary form. Readings from lyric poetry, Ariosto, Bacon, Camoes, Campanella, Marlowe, Montaigne, More, Rabelais, Shakespeare, Spenser, Tasso, and especially Cervantes. Readings available in English.]

#### [COM L 667 Poetry and Rhetoric (also COM L 467, ENGL 4483/683, FRLIT 437/637)

Fall. 4 credits. Not offered 2002-2003. C. Chase.

See COM L 467 for full course description.]

#### [COM L 671 Transnational Imaginaries: **Globalization and Culture**

Spring. 4 credits. Limited to 15 students, advanced undergraduates and graduates. Not offered 2002-2003. N. Melas.

The term 'globalization' has become ubiquitous in recent years as the primary conceptual frame and material basis for understanding contemporary transnationalism. It evokes a brave new borderless world in which politics, culture and social formations are no longer necessarily congruent with nor primarily beholden to national boundaries. It triumphantly or despairingly announces the end of history when space precedes time as the measure of human experience, and that experience exceeds the grasp of modernity's autonomous subject. Globalization thus challenges many aspects of our experience of culture-both in its ethnographic and humanist guises-and of the categories through which we apprehend and analyze it.]

#### COM L 674 Contemporary Poetry and Culture (also COM L 487, ENGL 488/ 697, GERST 674, SPANL 674)

Spring. 4 credits. J. Monroe. See COM L 487 for full course description.

#### [COM L 675 After the Divide: German **Critical Theory of the Seventies and** Eightles (also GERST 675 and HIST 675)

Fall. 4 credits. Not offered 2002-2003 P. Hohendahl.

See GERST 675 for a full course description.]

#### COM L 679 Femininity, Ethics and Aesthetics (also FRLIT 491/691, COM L 479)

Fall. 4 credits. T. McNulty. See FRLIT 491/691 for full course description.

#### [COM L 680 Baudelaire in Context (also

COM L 480, FRLIT 488/688) Spring. 4 credits. Not offered 2002-2003. J. Culler.

For course description, please see COM L 4801

#### COM L 683 Imagining the Holocaust (also COM L 483, ENGL 458/658, JWST 458/658, GERST 483)

Spring. 4 credits. D. Schwarz. See ENGL 458 for full course description.

#### COM L 684 Hopkins and Baudelaire (also ENGL 682)

Spring. 4 credits. J. Culler. See ENGL 682 for full course description.

#### [COM L 689 Adorno's Aesthetic Theory (also GERST 689)

Fall. 4 credits. Not offered 2002-2003. P. Hohendahl.

See GERST 689 for full course description.]

#### COM L 690 Twentieth-Century Black Cultural Movements (also COM L 387, ASRC 332/532) Fall. 4 credits. A. Adams

See ASRC 332/532 for full course description.

#### [COM L 695 Post-Modern Thought and Area Studies (also JPLIT 614) Fall. 4 credits. Not offered 2002-2003.

B. deBarv See IPLIT 614 for full course description.]

#### COMPUTER SCIENCE

- C. Van Loan, chair; B. Arms, G. Bailey,
- K. Birman, C. Cardie, R. Caruana, T. Coleman,
- R. L. Constable, A. Demers, R. Elber, D. Fan,
- J. Gehrke, D. Greenberg, J. Halpern,
- J. E. Hopcroft, D. Huttenlocher, T. Joachims,
- J. Kleinberg, D. Kozen, L. Lee, J. Matthews,
- G. Morrisett, A. Myers, K. Pingali, R. Rugina,
- F. B. Schneider, D. Schwartz, B. Selman,
- J. Shanmugasundaram, D. Shmoys, E. G. Sirer,

E. Tardos, R. Teitelbaum, S. Vavasis, G. Yona, R. Zabih

The Department of Computer Science is affiliated with both the College of Arts and Sciences and the College of Engineering. Students in either college may major in computer science. For details, visit our web site at www.cs.cornell.edu/ugrad.

#### The Major

.

CS majors take courses in algorithms, data structures, logic, programming languages, scientific computing, systems, and theory. Electives in artificial intelligence, computer graphics, computer vision, databases, multimedia, and networks are also possible. Requirements include:

- four semesters of calculus (MATH 111-122 (or 112)-221-222 or 191-192-293-294)
- two semesters of introductory computer programming (COM S 100 and 211)
- a one-credit project (COM S 212)
- a seven-course computer science core (COM S 280, 312, 314, 321 or 322 or 421, 381, 414, and 482)

- two 400+ computer science electives, totaling at least six credits
- a computer science project course (COM S 413, 415, 418, 433, 473, 501, 514, 519, or 664)
- a mathematical elective course (ENGRD 270, MATH 300+, T&AM 310, etc.)
- two 300+ courses that are technical in nature and total at least six credits
- a three-course specialization in a topic area other than computer science. These courses must be numbered 300 level or greater.

Note: All of the field electives described above must be courses of three or more credit hours with the exception of the COM S project course, which is two credits or more.

The program is broad and rigorous, but it is structured in a way that supports in-depth study of outside areas. Intelligent course selection can set the stage for graduate study and employment in any technical area and any professional area such as business, law, or medicine. With the adviser, the computer science major is expected to put together a coherent program of study that supports career objectives and is true to the aims of liberal education.

#### Admission

All potential affiliates are reviewed on a caseby-case basis relative to the following criteria:

- 1) Completion of MATH 293 (or MATH 221), COM S 211, COM S 212, and COM S 280.
- A grade of C or better in COM S 211, 212, and 280 with the overall average of all COM S courses above COM S 100 being 2.7 or better.
- 3) A grade of C or better in all required math courses beyond introductory calculus (i.e., MATH 111, 121, 191, or 193), with the overall average of these courses being 2.7 or better.
- 4) An overall GPA of not less than 2.0 (2.5 or better recommended).

Courses used in the affiliation GPA computations may be repeated if the original course grade was below a C. The most recent grade will be used for all repeated courses. Qualifying courses must be taken at Cornell.

Note: Students who do not meet these requirements are discouraged from attempting affiliation with the major. The COM S major can be exceptionally rigorous for students who are not suitably prepared for the academic requirements of the program and are unlikely to be admitted to the major if they do not meet the admissions standards listed above.

**Honors.** To qualify for departmental honors a student must have:

- maintained a cumulative GPA greater than or equal to 3.5
- completed eight credit hours of COM S course work at or above the 500 level (graded courses only; no seminars or twocredit project courses.)
- completed six credit hours of COM S 490 research with a COM S faculty member, spread over at least two semesters and with grades of A- or better.

Note: Honors courses may not be used to satisfy the COM S 400+ elective requirement, the COM S project requirement, the math elective, or the specialization. See the COM S undergraduate web site for more information on eligibility: www.cs.cornell.edu/ugrad.

#### Courses

For complete course descriptions, see the computer science listing in the College of Engineering section.

#### COM S 099 Fundamental Programming Concepts

Fall, summer. 2 credits. S-U grades only. No prerequisites. Freshman only.

#### COM S 100 Introduction to Computer Programming (II)

Fall, spring, summer. 4 credits. During the fall semester, two versions of COM S 100 (COM S 100M and COM S 100J) are available as described in the computer science listing in the College of Engineering.

#### [COM \$ 101 Introduction to Cognitive Science (also COGST 101, LING 170, and PSYCH 102) (III)

Fall, summer. 3 credits. Not offered 2002–2003.]

#### COM \$ 113 Introduction to C

Fall, spring. 1 credit. Usually weeks 1–4. Prerequisite: COM S 100 or equivalent programming experience. Credit is granted for both COM S 113 and 213 only if 113 is taken first. S-U grades only.

#### COM S 114 Unix Tools

Fall. 1 credit. Usually weeks 5–8. Prerequisite: COM S 100 or equivalent programming experience. S-U grades only.

#### COM S 130 Introductory Web Programming (also CIS 130)

Fall, summer. 3 credits. No prerequisites.

#### COM S 172 Computation, Information, and Intelligence (also ENGRI 172) Fall. 3 credits. Prerequisites: some knowledge of calculus.

# COM S 191 Media Arts Studio I (also ART 391, CIS 191, THETR 391) Fall. 3 credits. Prerequisites: one of the following courses: ART 171, THETR 277, 377, MUSIC 120, or equivalent. Also must be a junior and have permission of instructor. Lab fee \$50.

For description, see ART 391.

#### [COM S 201 Cognitive Science In Context Laboratory (also COGST 201 and PSYCH 201) (III)

Fall or spring. 4 credits. Concurrent or prior registration in "Introduction to Cognitive Science" PSYCH 102/COGST 101/COM S 101/LING 170/PHIL 191 is suggested but not required. Knowledge of programming languages is not assumed. Limited to 24 students. Not offered 2002– 2003. Fall, B. Halpern and staff; spring, D. Field and staff.]

#### COM S 211 Computers and Programming (also ENGRD 211) (II)

Fall, spring, summer. 3 credits. Prerequisite: COM S 100 or an equivalent course in Java or C++.

#### COM S 212 Java Practicum

Fall, spring, summer. 1 credit. Letter grade only. Pre- or corequisite: COM S/ENGRD 211.

#### COM S 213 C++ Programming

Fall, spring. 2 credits. Prerequisite: COM S 100 or equivalent programming experience. Students who plan to take COM S 113 and 213 must take 113 first. S-U grades only.

#### COMS 214 Advanced UNIX Programming and Tools

Spring. 1 credit. S-U grade only. Prerequisite: COM S 114 or equivalent.

#### COM \$ 230 Intermediate Web Design

(also CIS 230) Spring. 3 credits. Prerequisite: COM S 130. Not offered every year; may be offered spring 2002.

#### COM S 280 Discrete Structures

Fall, spring. 4 credits. Pre- or corequisite: COM S 211 or permission of instructor.

#### COM S 312 Data Structures and

**Functional Programming (II)** Fall, spring. 4 credits. Prerequisite: COM S 211/212 or equivalent programming experience. Should not be taken concurrently with COM S 314.

#### COM S 314 Computer Organization (also ECE 314)

Fall, spring. 4 credits. Prerequisite: COM S 211; COM S 312 or ENGRD 231/ECE 232 recommended, but not required. Should not be taken concurrently with COM S 312.

#### COM S 321 Numerical Methods in Computational Molecular Biology (also BIOBM 321 and ENGRD 321) (I)

Fall. 3 credits. Prerequisites: at least one course in calculus such as MATH 106, 111, or 191 and a course in linear algebra such as MATH 221 or 294 or BTRY 417. COM S 100 or equivalent and some familiarity with iteration, arrays, and procedures. COM S majors may use only one of the following toward their degree: COM S 321, 322, or 421.

#### COM S 322 Introduction to Scientific Computation (also ENGRD 322) Spring, summer. 3 credits. Prerequisites: COM S 100 and (MATH 222 or 294). COM S majors may use only one of the following toward their degree: COM S 321, 322, or 421.

#### [COM S 324 Computational Linguistics (also COGST 424, LING 424) (III)

Spring. 4 credits. Prerequisites: LING 203; Labs involve work in the UNIX environment; COM S 114 recommended. Not offered 2002–2003. For description, see LING 424.]

#### COM S 330 Applied Database Systems

(also CIS 330) Spring. 3 credits. Prerequisites: COM S 130, COM S 211/ENGRD 211, and COM S 230.

#### COM S 381 Introduction to Theory of Computing

Fall, summer. 4 credits. Prerequisite: COM S 280 or permission of instructor. Credit will not be granted for both COM S 381 and 481.

#### COM \$ 392 Topics in High-level Vision (also COGST 465, PSYCH 465) (III) Spring. 4 credits.

For description, see PSYCH 465.

COM \$ 401 Introduction to Applied Scientific Computing with MATLAB (also CIS 401)

Fall. 1 credit. Usually weeks 2-5. Prerequisite: COM \$ 100 or equivalent programming experience. S-U grades only

#### **COM S 402** Scientific Visualization with MATLAB (also CIS 402)

Spring. 1 credit. Usually weeks 2-5 Prerequisites: COM S 100 or equivalent programming experience; COM S 401/CIS 401 recommended, but not required. S-U grades only.

#### **COM S 403 Development of Scientific Computing Programs (also CIS 403)** Fall. 1 credit. Usually weeks 2-5. Prerequisite: COM S 100 or equivalent programming experience. S-U grades only.

#### COM \$ 404 Survey and Use of Software Libraries for Scientific Computing (also CIS 404)

Spring, 1 credit. Usually weeks 2-5. Prerequisites: COM S 100 or equivalent programming experience; COM S 403/CIS 403 recommended, but not required. S-U grades only.

#### COM \$ 409 Data Structures and **Algorithms for Computational** Science (also CIS 409)

Spring. 4 credits. This course is not open to COM S majors. Prerequisite: COM S 211 or equivalent programming experience. Not offered every year.

#### COM S 411 Programming Languages and Logics

Fall or spring. 4 credits. Prerequisites: COM S 312 or permission of instructor. Not offered every year; semester TBA.

#### **COM S 412** Introduction to Compilers

Spring. 3 credits. Prerequisites: COM S 312 (or permission of instructor) and 314. Corequisite: COM S 413.

#### COM \$ 413 Practicum in Compilers

Spring. 2 credits. Corequisite: COM S 412. A compiler implementation project related to COM S 412.

#### **COM S 414 Systems Programming and Operating Systems**

Fall, spring, summer. 3 credits. Prerequi-site: COM S 211, 212, 312 (or permission of instructor), and 314. Corequisite: COM S 415 in spring only

#### **COM \$ 415** Practicum in Operating **Systems**

Fall, spring. 2 credits. Corequisite: COM S 414.

#### COM S 417 Introduction to Computer Graphics (also ARCH 374)

Fall. 3 credits. Prerequisite: COM S 211. Corequisite: COM S 418 or permission of instructor

#### **COM S 418 Practicum in Computer** Graphics (also ARCH 375)

Fall. 2 credits. Enrollment limited. Prerequisite: COM S 212 and permission of instructor. Recommended: COM S 314. Corequisite: COM S 417.

#### **COM S 421 Numerical Analysis**

Fall. 4 credits. Prerequisites: MATH 294 or equivalent, one additional mathematics course numbered 300 or above, and knowledge of programming. COM S majors may use only one of the following toward their degree: COM S 321, 322, or 421

#### COM \$ 430 Information Discovery (also CIS 430)

Fall. 3 credits. Prerequisite: COM S 211 or equivalent.

#### COM S 432 Introduction to Database Systems

Fall. 3 credits. Prerequisites: COM S 312 or 211, 212, and permission of instructor. Recommended: COM S 213 and strong programming skills in C or C++

#### **COM S 433** Practicum in Database Systems

Fall. 2 credits. Corequisite: COM S 432.

#### COM S 472 Foundations of Artificial Intelligence

Fall. 3 credits. Prerequisites: COM S 211 and 280 (or equivalent).

#### COM S 473 Practicum in Artificial Intelligence

Fall. 2 credits. Corequisite: COM S 472.

#### COM S 474 Introduction to Natural Language Processing (also COGST 474, LING 474)

Fall. 4 credits. Prerequisites: COM S 211.

#### COM \$ 478 Machine Learning

Spring. 4 credits. Prerequisites: COM S 280, 312, and basic knowledge of linear algebra and probability theory

#### COM S 481 Introduction to Theory of Computing

Fall. 4 credits. Prerequisite: COM S 280 or permission of instructor. Credit will not be granted for both COM S 381 and 481.

A faster-moving and deeper version of COM S 381. Corrective transfers between COM S 481 and 381 (in either direction) are encouraged during the first few weeks of instruction.

#### COM S 482 Introduction to Analysis of Algorithms

Spring, summer. 4 credits. Prerequisites: COM S 280, 312, and either 381 or 481, or permission of instructor.

#### COM S 483 Quantum Computation (also PHYS 481, 681)

Spring. 2 credits. Prerequisite: familiarity with the theory of vector spaces over the complex numbers.

#### COM \$ 486 Applied Logic (also MATH 486) (II)

Fall or spring. 4 credits. Prerequisites: MATH 222 or 294, COM S 280 or equivalent (such as MATH 332, 432, 434, 481), and some course in mathematics or theoretical computer science.

#### COM \$ 490 Independent Reading and Research

Fall, spring. 1-4 credits.

COM \$ 501 Software Engineering Spring. 4 credits. Prerequisite: COM S 211 or equivalent experience programming in Java or C++.

#### COM S 502 Web Information Systems (also CIS 502)

Spring. 3 credits. Prerequisite: COM S 211 and some familiarity with the technology of web sites.

#### **COM S 504 Applied Systems Engineering** I (also CEE 504, ECE 512, M&AE 591, OR&IE 512)

Fall. 3 credits. Prerequisites: senior or graduate standing in an engineering field; concurrent or recent (past two years)

enrollment in a group-based project with a strong system design component that is approved by a course instructor.

#### COM S 505 Applied Systems Engineering II (also CEE 505, ECE 513, M&AE 592, OR& [E 513]

Spring. 3 credits. Prerequisite: Applied Systems Engineering I.

#### COM S 513 System Security

Fall. 4 credits. Prerequisites: COM S 414 or 519 and familiarity with JAVA programming language.

#### COM \$ 514 Intermediate Computer Systems

Fall or spring. 4 credits. Prerequisites: COM S 414 or permission of instructor.

#### COM S 515 Practicum in Systems

Fall or spring. 1-2 credits. Corerequisite: COM S 514.

#### COM S 517 Advanced Rendering

Spring. 3 credits. Prerequisite: COM S 417 or permission of instructor.

#### COM S 519 Computer Networks

Spring. 4 credits. Prerequisites: COM S 314 or permission of instructor. Not offered everv year.

#### COM \$ 522 Computational Tools and **Methods for Finance**

Spring. 4 credits. Prerequisites: programming experience (e.g. C FORTRAN, or MATLAB) and some knowledge of numerical methods, especially numerical linear algebra. Not offered every year.

#### COM S 572 Heuristic Methods for **Optimization (also CEE 509)**

Spring. 3 or 4 credits. Prerequisite: COM S/ ENGRD 211 or 322 or CEE/ENGRD 241, or graduate standing, or permission of instructor. Not offered every year.

#### COM S 574 Language Technologies

Fall. 3 credits. Prerequisites: COM S 472 or 478 or 578 or the equivalent.

#### COM \$ 576 Decision Theory I (also CIS 576, ECON 476, 676)

Fall. 4 credits. Prerequisites: mathematical sophistication.

#### COM S 577 Decision Theory II (also CIS 577, ECON 477, 677)

Spring. 4 credits. Prerequisites: mathematical sophistication.

#### COM S 578 Empirical Methods in

Machine Learning and Data Mining Fall. 3 credits. Prerequisites: COM S 280 and 312 or equivalent.

#### **COM S 601 System Concepts** Fall. 3 credits. Prerequisite: open to

students enrolled in the COM S Ph.D. program

#### COM \$ 611 Advanced Programming Languages

Fall. 4 credits. Prerequisites: graduate standing or permission of instructor.

#### COM S 612 Compiler Design for High-**Performance Architectures**

Spring. 4 credits. Prerequisites: COM S 314 and 412 or permission of instructor.

COM S 613 Concurrent Programming Spring. 4 credits. Prerequisites: COM S 414 or permission of instructor. Not offered

every year; semester TBA.

COM S 614 Advanced Systems

Spring. 4 credits. Prerequisite: COM S 414 or permission of instructor.

- COM S 615 Adaptive Systems Fall. 4 credits. Prerequisites: COM S 614 recommended.
- **COM S 621 Matrix Computations** Fall. 4 credits. Prerequisites: MATH 411 and 431 or permission of instructor.
- COM S 622 Numerical Optimization and Nonlinear Algebraic Equations Spring, 4 credits, Prerequisite: COM S 621.

Offered in odd-numbered years.

[COM S 624 Numerical Solution of Differential Equations Spring. 4 credits. Prerequisite: previous exposure to numerical analysis (e.g.

COM S 421 or 621) to differential equations, and knowledge of MATLAB. Offered in even-numbered years.}

#### COM S 626 Computational Molecular Biology

Spring, 4 credits. Prerequisites: familiarity with linear programming, numerical solutions of ordinary differential equations and nonlinear optimization methods.

#### **COM S 632 Advanced Database Systems** Spring. 4 credits. Prerequisite: COM S 432/ 433 or permission of instructor.

COM S 664 Machine Vision

Fall or spring. 4 credits. Prerequisites: undergraduate-level understanding of algorithms and MATH 221 or equivalent.

[COM S 671 Introduction to Automated Reasoning

Fall. 4 credits. Prerequisite: COM S 611 and graduate standing or permission of instructor. Not offered 2002–2003.]

#### COM S 672 Advanced Artificial Intelligence

Spring. 4 credits. Prerequisites: COM S 472 or permission of instructor.

#### COM S 674 Natural Language Processing

Spring. 3 credits. Prerequisites: COM S 472 or permission of instructor. COM S 474 is *not* a prerequisite. Not offered every year; semester TBA.

#### [COM S 676 Reasoning about Knowledge

Fall. 4 credits. Prerequisites: mathematical maturity and an acquaintance with propositional logic. Offered in even-numbered years. Not offered 2002–2003.]

#### [COM S 677 Reasoning about Uncertainty

Fall. 4 credits. Prerequisites: mathematical maturity and an acquaintance with propositional logic. Offered in odd-numbered years. Not offered 2002–2003.]

#### COM S 678 Advanced Topics in Machine Learning

Spring. 4 credits. Prerequisites: COM S 478 or equivalent, or COM S 578 or equivalent, or permission of instructor.

#### **COM S 681** Analysis of Algorithms Fall. 4 credits. Prerequisite: COM S 482 or graduate standing.

**COM S 682 Theory of Computing** Spring. 4 credits. Prerequisite: (COM S 381 or 481) and (COM S 482 or 681) or permission of instructor. **COM S 683 Advanced Design and Analysis of Algorithms** Spring. 4 credits. Prerequisites: COM S 681 or permission of instructor.

#### COM S 684 Approximation and Network Algorithms

Fall. 4 credits. Prerequisites: COM S 681 or permission of instructor.

#### COM S 685 The Structure of Information Networks (also CIS 685)

Fall. 4 credits. Prerequisite: COM S 482.

**COM S 686 Logics of Programs** Spring. 4 credits. Prerequisites: COM S 481, 682, and (MATH 481 or MATH/COM S 486).

#### COM \$ 709 Computer Science

**Colloquium** Fall, spring. 1 credit. S-U grades only. For staff, visitors, and graduate students interested in computer science.

#### COM S 711 Seminar in Advanced Programming Languages

Fall or spring. 3 credits.

#### COM S 713 Seminar in Systems and Methodology

Fall, spring. 4 credits. Prerequisites: a graduate course employing formal reasoning, such as COM S 611, 613, 671, a logic course, or permission of instructor. Not offered every year; semester TBA.

#### COM S 715 Seminar in Programming Refinement Logics

Fall, spring. 4 credits. Prerequisite: permission of instructor.

#### COM S 717 Topics in Parallel Architectures

Fall. 4 credits. Prerequisite: COM S 612 or permission of instructor. Not offered every year; semester TBA.

#### COM S 719 Seminar in Programming Languages

Fall, spring. 4 credits. Prerequisite: COM S 611 or permission of instructor. S-U grades only.

#### **COM S 721 Topics in Numerical Analysis** Fall, spring. 4 credits. Prerequisite: COM S 621 or 622 or permission of instructor. Not

621 or 622 or permission of instructor. Not offered every year; semester TBA.

#### COM S 726 Problems and Perspectives in Computational Molecular Biology (also PL BR 726)

Fall, spring. 1 credit. S-U grades only.

#### COM S 732 Seminar in Database Systems

Fall, spring. 4 credits. S-U grades only.

COM \$ 750 Evolutionary Computation and Design Automation (also M&AE 650)

Fall. 4 credits. Prerequisite: programming experience or permission of instructor.

#### COM S 751 Media Research and Critical Design (also CIS 751)

Fall. 4 credits. Prerequisites: graduate standing in COM S or equivalent ability to read technical research papers. Contact instructor if unsure of qualifications.

#### COM S 752 Seminar on Scholarly Information Architecture

Fall. 3 credits. Prerequisite: concurrent enrollment in COM S 502 or equivalent experience. S-U grades only.

#### **COM S 754 Systems Research Seminar** Fall, spring. 1 credit. S-U grades only.

COM S 772 Seminar in Artificial Intelligence

Fall, spring. 4 credits. Prerequisite: permission of instructor. S-U grades only.

#### COM S 775 Seminar in Natural Language Understanding

Fall, spring. 2 credits.

#### COM S 786 Introduction to Kleene Algebra

Spring. 4 credits. Prerequisites: COM S 481 required; COM S 482 or 681, COM S 682, elementary logic (MATH 481 or 681), algebra (MATH 432) recommended.

#### COM S 789 Seminar in Theory of Algorithms and Computing

Fall, spring. 4 credits. Prerequisite: permission of instructor. S-U grades only.

#### COM S 790 Special Investigations in Computer Science

Fall, spring. Prerequisite: permission of a computer science adviser. Letter grade only. Independent research or Master of Engineering project.

#### COM S 890 Special Investigations in Computer Science

Fall, spring. Prerequisite: permission of a computer science adviser. S-U grades only. Master of Science degree research.

#### COM S 990 Special Investigations in Computer Science

Fall, spring. Prerequisite: permission of a computer science adviser. S-U grades only. Doctoral research.

# COMPUTING AND INFORMATION SCIENCE

## Faculty of Computing and Information Administration

Robert L. Constable, dean for Computing and Information Science

John Abowd, Industrial and Labor Relations

Kenneth Birman, Computer Science

Claire Cardie, Computer Science

Terrence Fine, Electrical and Computer Engineering

Geri Gay, Communication

Donald Greenberg, Architecture, Johnson School of Management

John Kleinberg, Computer Science

Stephen Pope, Mechanical and Aerospace Engineering

Fred Schneider, Computer Science

David Shalloway, Molecular Biology and Genetics

Stan Taft, Art

Ken Torrance, Mechanical and Aerospace Engineering

Charles Van Loan, Computer Science

Stephen Wicker, Electrical and Computer Engineering

#### Mission

The Faculty of Computing and Information (FCI) presents courses and programs in computing and information science across campus. The professors associated with its programs have appointments in the Department of Computer Science or as FCI professors in other academic units. The FCI has three areas of interest: information science, computational science and engineering, and digital arts and graphics. Each area is at a different stage of development.

#### **Information Science**

Information Science at Cornell is a new interdisciplinary program that considers information systems in their human context and integrates the study of three aspects of information. First, Information Science studies computing systems that provide people with information content; this study overlaps with parts of computer science stressing the design, construction, and use of large information systems such as the World Wide Web, the National Digital Library for science education, and other global information resources. The second aspect of Information Science examines how people engage these information resources and how information systems can be designed to be integrated into everyday life-human-computer interaction (HCI). This area is also called "humancentered systems," because it is concerned with systems that hundreds of millions of people will use in daily life. The third aspect is the study of social systems and how they interact with computer systems. This area of Information Science deals with understanding how information systems are situated in social, economic, and historical contexts. It explores the economic value of information, the legal constraints on systems, their social impact, and the cultural aspects of their construction. These are synergistic topics, and the next generation of scientists, scholars, business leaders, and government workers will need to understand them and how they relate.

Specific topics emphasized in the Information Science program include information networks; information discovery; knowledge organization; interaction design; interface design and evaluation; collaboration within and across groups, communities, organizations, and society; computational linguistics; computational techniques in the collection, archiving, and analysis of social-science data; information privacy; methods of collecting, preserving, and distributing information; information system design; cognition and learning; social informatics; and cultural studies of computation.

## Computational Science and Engineering

Another FCI area of activity is computational science and engineering. Numerous courses are taught throughout the university. Topics include numerical methods, modeling and simulation, and real-time computing and control. The FCI itself sponsors several "tool-based" short courses for graduate students who anticipate that their studies will have a strong computational component (CIS 401, 402, 403, 404). A course on data structures for computational science (CIS 409) also is offered.

#### **Digital Arts and Graphics**

The FCI is working to develop research programs and curriculum in the digital arts. Several courses already exist in this area (ART 372, ART 391, MUSIC 120, COM S 417–18) and more can be expected in the near future.

#### **Relationship with Computer Science**

FCI programs have connections to computer science, the study of computation in all of its forms. Computation is both abstract and physical, both artificial and natural, and its study is a unique combination of fundamental science, applied science, and enabling technology. The curriculum covers the theory of algorithms and computing and its many applications in science, engineering, and business. Students learn the algorithmic method of thinking and how to bring it to bear on a wide range of problems. They also study the elements of computing and information technology such as system design, problem specification, programming, system analysis and evaluation, and complex modeling. Research areas include programming languages, compilers, computing systems, artificial intelligence, natural language processing, computer graphics, computer vision, databases, networks, bioinformatics, the theory of algorithms, scientific computing, and computational logic.

Undergraduate majors in Computer Science are offered in the College of Engineering and the College of Arts and Sciences. A minor in Computer Science is available to undergraduates in the College of Engineering. These programs are administered by the Department of Computer Science, whose professors are members of both the College of Engineering and the College of Arts and Sciences.

There is also a one-year Master of Engineering Program in Computer Science and a Ph.D. program in Computer Science. These degree programs are administered by the Graduate Field of Computer Science.

#### The Information Science Concentration /Minor

A minor in Information Science is available to students in the College of Engineering, the College of Arts and Sciences, and the College of Agriculture and Life Sciences. (Minors are referred to as "concentrations" in the College of Arts and Sciences.) The program has three main areas: information systems, humancentered systems, and social systems. The area of information systems studies the computer science problems of representing, storing, manipulating, and using digital information. Human-centered systems investigates the relationship between humans and information, drawing from human-computer interaction and cognitive science. Social systems examines the economic, legal, political, cultural and social context. The concentration/ minor has been designed to ensure that students have substantial grounding in all three of these areas and in statistics.

Courses to fulfill the requirements for the Information Science concentration/minor are selected from the following categories:

#### statistics

ENGRD 270 Basic Engineering Probability and Statistics

CEE 304 Uncertainty Analysis in Engineering

- ECE 310 Introduction To Probability and Random Signals MATH 171 Statistical Theory and Application in the Real World BTRY 261 Statistical Methods I (also STBTRY 261) LRST 312 Applied Regression Methods CEE 304 Uncertainty Analysis in Engineering ECE 310 Introduction To Probability and **Random Signals** Information Systems COM S 130 Creating Web Documents COM S 230 Intermediate Web Design COM S 330 Applied Databases COM S 430 Information Discovery COM S 432 Introduction to Database Systems COM S 474 Introduction to Natural Language Processing COM S 478 Machine Learning COM S 502 Architecture of Web Information Systems COM S 515 Public Policy and Security ECE 562 Fundamental Information Theory COM S 752 Seminar on Scholarly Informa tion Architecture Human-Centered Systems PSYCH 214 Cognitive Psychology (also **COGST 214**) PSYCH 342 Human Perception: Applications to Computer Graphics, Art, and Visual Display (also COGST 342) PSYCH 347 Psychology of Visual Communi cations PSYCH 413 Information Processing: Conscious and Unconscious COMM 439 Designing for Human-Computer Interaction COMM 440 Computer Mediated Communication Social Systems S&TS 250 Technology in Society (also ENGR 250, HIST 250 and ECE 250) S&TS 292 Inventing an Information Society (also ENGR 298 and ECE 298) S&TS 387 The Automatic Lifestyle: Consumer Culture and Technology
  - S&TS 411 Knowledge, Technology, and Property
  - **OR&IE 480 Information Technology**
  - COMM 428 Communication Law
  - LAW 410 Limits on and Protection of Creative Expression—Copyright Law and Its Close Neighbors

#### The concentration/minor requires:

- One statistics course. (For Engineering students it must be ENGRD 270, ECE 310, or CEE 304, because these courses assume some knowledge of calculus.)
- Two courses in information systems. (For Engineering students, COM S 130 cannot be used.)
- One course in human-centered systems.
- One course in social systems.

 One or two elective courses. (For Engineering students, one elective chosen from the human-centered system category or the social system category. For all other students, two elective courses, at least one of which must be from the humancentered system category.)

These programs are administered by the Department of Computer Science. Visit http://www.fci.cornell.edu/infoscience/undergraduate.html or Upson 330 for more information.

#### **CIS Courses**

Courses offered under the CIS rubric are of particular interest to students in the computing and information sciences.

#### CIS 130 Introductory Web Programming (also COM S 130)

Fall, summer. 3 credits. No prerequisites. See COM S 130 for description.

#### [CIS 191 Media Arts Studio I (also ART 391, THETR 391)

Fall. 3 credits. Prerequisite: one of the following courses: ART 171, THETR 277, 377, MUSIC 120, or equivalent; must be a junior and have permission of the instructor. Lab fee \$50. Not offered 2002–2003. Staff.

See ART 391 for description.]

#### CIS 230 Intermediate Web Design (also COM S 230)

Spring. 3 credits. Prerequisite: COM S 130 or equivalent. See COM S 230 for description.

see com 3 230 for description.

#### CIS 330 Applied Database Systems (also COM S 330)

Spring. 3 credits. Prerequisites: COM S 130, COM S 211/ENGRD 211, and COM S 230. See COM S 330 for description.

#### CIS 401 Introduction to Applied Scientific Computing with MATLAB (also COM \$ 401)

Fall. 1 credit. Usually weeks 1–4. Prerequisite: COM S 100 or equivalent programming experience. S-U grades only.

An introduction to the use of MATLAB as an aid to scientific research. The course introduces the basic syntax and features of MATLAB and develops the background necessary for the more specialized courses. The course covers basic MATLAB programming and vectorized operations, data input/ output, and simple visualization. The course emphasizes applied issues such as managing large data sets, simulation, and visualization, but also introduces fundamental ideas in scientific computing such as floating point arithmetic and algorithm efficiency. Although the course uses MATLAB, the ideas and concepts covered are common to many computational environments.

#### CIS 402 Scientific Visualization with MATLAB (also COM S 402)

Fall. 1 credit. Usually weeks 1–4. Prerequisites: COM S 100 or equivalent programming experience; COM S 401/CIS 401 recommended, but not required. S-U grades only.

A survey of the advanced visualization features in MATLAB. The course covers MATLAB's "handle graphics" paradigm, specialized graphics routines for vectors and fields, and introduces color mapping, lighting, and new features for controlling object transparency. Although the course is meant to introduce students to the capabilities of the MATLAB system, it also emphasizes the basic goal of visualization: producing an image that effectively communicates a scientific result.

#### CIS 403 Development of Scientific Computing Programs (also COM S 403)

Spring. 1 credit. Usually weeks 1–4. Prerequisite: COM S 100 or equivalent programming experience. S-U grades only. This course is designed for graduate students who, in their research, will develop computer programs to solve scientific or engineering problems (e.g., in Fortran, C, or Java). Approaches and tools are presented which facilitate the development of good software. The course emphasizes the tools available in UNIX and Windows environments. Topics covered include compilers, debuggers, software design, and project management.

#### CIS 404 Survey and Use of Software Libraries for Scientific Computing (also COM S 404)

Spring. 1 credit. Usually weeks 1–4. Prerequisites: COM S 100 or equivalent programming experience; COM S 403/CIS 403 recommended, but not required. S-U grades only.

Many software packages and code libraries have been developed for the solution of standard problems in scientific computing. Examples of such libraries are LAPACK, IMSL, Numerical Recipes routines, MATLAB functions, and routines available in online repositories such as Netlib. This course discusses how to link to or compile standard library formats and considers the legal and ethical aspects of using other people's code (or having them use yours). The course also surveys some of the standard problems and the available libraries and discusses the issues that arise in their use (e.g., accuracy, robustness, and generality).

#### CIS 409 Data Structures and Algorithms for Computational Science (also COM \$ 409)

Spring. 4 credits. Prerequisite: COM S 211 or equivalent programming experience. This course is not open to COM S majors. Not offered every year.

See COM S 409 for description.

#### CIS 430 Information Discovery (also COM S 430)

Fall. 3 credits. Prerequisite: COM S 211 or equivalent.

See COM S 430 for description.

#### **CIS 490 Independent Reading and**

**Research** Fall, spring. 1–4 credits. Independent reading and research for undergraduates.

## CIS 502 Web Information Systems (also COM S 502)

Spring. 3 credits. Prerequisites: COM S 211 and some familiarity with the technology of web sites.

See COM S 502 for description.

#### CIS 576 Decision Theory I (also COM S 576, ECON 476, 676)

Fall. 4 credits. Prerequisites: mathematical sophistication.

See ECON 476 for description.

#### CIS 577 Decision Theory II (also COM S 577, ECON 477, 677)

Spring. 4 credits. Prerequisites: Mathematical sophistication. See ECON 476 for description.

CIS 685 The Structure of Information

#### Networks (also COM S 685)

Fall. 4 credits. Prerequisite: COM S 482. See COM S 685 for description.

#### CIS 750 Evolutionary Computation and Design Automation (also COM S 750, M&AE 650)

Fall. 4 credits. Prerequisite: programming experience or permission of instructor. Covers advanced topics in evolutionary algorithms and their application to computational design. The course provides insight into a variety of evolutionary computation paradigms, as well as governing dynamics of co-evolution, arms races, and symbiosis. Topics include artificial life, evolutionary robotics, and applications in a variety of domains in engineering, science, and art. The course is suitable for students interested in computational techniques for addressing open-ended design problems using computational models of evolutionary discovery. The course will be comprised of lectures, paper readings, and discussions. Grading based on critical paper reviews and individual projects.

#### CIS 751 Media Research and Critical Design (also COM S 751)

Fall. 4 credits. Prerequisites: graduate standing in COM S or equivalent ability to read technical research papers. Contact instructor if unsure of qualifications.

This course studies media research practices that incorporate cultural criticism into technology design. Topics include tangible media, ubiquitous computing, speculative design, and interactive narrative. Computer science content draws on interactive art, cultural studies, and interaction design.

#### CIS 752 Seminar on Scholarly Information Architecture (also COM S 752)

Fall. 3 credits. Prerequisite: concurrent enrollment in COM S 502 or equivalent experience. S-U grades only.

This seminar examines on-line information systems designed for scholarly usage, covering ongoing trends and highlighting current problems and new research directions. Topics include techniques for rendering, indexing, and linking scholarly information, and formats and protocols for querying, accessing, mining, and transmitting the information. An objective is to identify the components necessary for an idealized system and to lay the basis for future research projects resulting in their design and implementation. Examples include automated classification systems, real-time closeness measures, authoring tools, and nextgeneration document formats to facilitate efficient data mining and long-term archival stability. Some of the nontechnical obstacles to realization of ideal systems-sociological, legal, financial, and political-will also be examined

# EARTH AND ATMOSPHERIC SCIENCES

B. L. Isacks, chair; S. J. Riha, associate chair; directors of undergraduate studies: K. H. Cook (science of earth systems), R. W. Kay (geological sciences), and S. J. Colucci (atmospheric science); R. W. Allmendinger, W. D. Allmon, M. Barazangi, J. M. Bird, L. D. Brown, L. M. Cathles, J. L. Cisne, A. T. DeGaetano, L. A. Derry, P. J. Gierasch, C. H. Greene, D. L. Hysell, T. E. Jordan, S. Mahlburg Kay, M. C. Kelley, F. H. T. Rhodes, D. L. Turcotte, W. M. White, D. S. Wilks, M. W. Wysocki
The new Department of Earth and Atmo-

The new Department of Earth and Atmospheric Sciences joins faculty in the geological sciences with faculty in atmospheric sciences to cover the breadth of modern earth sciences. We live on a planet with finite resources and a finite capacity to recover quickly from human-induced environmental stresses. It is also a powerful planet, with geologic hazards such as earthquakes and volcanic eruptions that alter the course of history with little prior warning. As the human population grows, understanding the earth and its resources becomes progressively more important for both future policymakers and ordinary citizens.

The new department is the home department for three majors: geological sciences, atmospheric sciences, and science of earth systems (SES). Geological sciences emphasizes the solid earth and its history, atmospheric sciences emphasizes basic understanding of modern climate and weather, while the science of earth systems major covers the new disciplines which study the interactions among rock, water, air, and life in our planet's operation. The geological sciences and SES majors are available for students in the College of Arts and Sciences. The geological sciences major is described below, and the SES major is described in the section, "Special Programs and Interdisciplinary Studies. Atmospheric sciences has been proposed as a new major in the College of Arts and Sciences. If approved, the new major would commence during 2002-2003. The goal is to have the breadth of earth sciences available to students in the Colleges of Arts and Sciences, Engineering, and Agriculture and Life Sciences. The community of majors in these inter-collegiate programs share a common interest in a rigorous scientific understanding of how our planet works.

For the latest information about these programs, please consult our web site at www.eas.cornell.edu.

#### The Geological Sciences Major

The geological sciences major reveals Earth's turbulent history from the formation of our solar system to the plate tectonic cycles that dominate Earth's present behavior. That

history is highlighted by the co-evolution of life and the Earth system, a dramatic story that starts with the origin of life in our sun's planetary system and leads to the modern interglacial phase of our planet's latest ice age during which our species has emerged to play a major role in the planetary system. Topics of study also include the fundamental processes responsible for the concentration of mineral and energy resources that have enabled our technological evolution, and include natural hazards such as earthquakes, volcanic eruptions, floods, and landslides which pose dangers to our increasingly vulnerable cities and infrastructure.

The geological sciences major prepares students in geology, geophysics, geochemistry, and geobiology for careers in mineral and petroleum exploration, environmental geology, and academic and government research enterprises. Many of these career tracks involve graduate study, for which the major is excellent preparation. Alternatively, it is a valuable major for a pre-law or pre-med program or in preparation for a career in K-12 education.

In addition to course work, students learn by outdoor fieldwork and involvement in the vigorous research programs of the department. Facilities include equipment for processing seismic signals and satellite images of the Earth's surface using extensive libraries of earthquake records, satellite images, and exploration seismic records, and instruments for highly precise chemical and physical analyses of earth materials, including instruments of the Cornell Center for Material Research, Ward Laboratory and the Cornell High Energy Synchotron Source (CHESS) Undergraduates have served as field assistants for faculty members and graduate students in Argentina, Mexico, British Columbia, the Aleutian Islands and southeastern Alaska, Scotland, Switzerland, Tibet, and the Barbados. Undergraduates are encouraged to participate in research activities, frequently as paid assistants.

For admission to the geological sciences major, a student should have made substantial progress toward completing the following basic science requirements for the major: MATH 111-112 or MATH 191-192, PHYS 207-208 or PHYS 112-113, CHEM 207 or 211. Freshmen and sophomores should take an introductory EAS course (or courses), normally EAS 101 or EAS 201, or EAS 102 or EAS 104. Juniors with a strong foundation in mathematics and science may be accepted into the major without an introductory course. Majors take EAS 210, the five 300-level core courses listed below, six credits of additional course work from earth and atmospheric sciences courses numbered 300, 400, or 600, plus an additional course in either computer science or biological science or an intermediate-level course in biological science, mathematics, chemistry, or physics. In addition, a requirement for an advanced outdoor field experience may be met by completing one of the following four-credit options: (a) EAS 417 (Field Mapping in Argentina, 3 credits) and EAS 491 or 492 (based on field observations) for a combined four-credit minimum; (b) EAS 437 (Geophysical Field Methods, 3 credits) plus at least one credit of EAS 491 or 492 using geophysical techniques from EAS 437; (c) EAS 491-492 (Undergraduate Research, 2 credits each) with a significant component of field work; or (d) an approved outdoor field

course taught by another college or university (4-credit minimum).

Core Courses

- EAS 326 Structural Geology
- EAS 355 Mineralogy
- EAS 356 Petrology and Geochemistry
- EAS 375 Sedimentology and Stratigraphy
- EAS 388 Geophysics and Geotectonics

Prospective majors should contact R. W. Kay as early as possible for advice in planning a program. Students majoring in geological sciences may attend the departmental seminars and take advantage of cruises, field trips, and conferences offered through the Department of Earth and Atmospheric Sciences.

Courses offered at the 100 and 200 level are open to all students. Certain 300- and 400level courses in earth and atmospheric sciences may be of particular interest to students of chemistry, biology, and physics. Students are encouraged to inquire about courses that interest them at the department office in 2122 Snee Hall.

**Honors.** An honors program is offered by the Department of Earth and Atmospheric Sciences for superior students. Candidates for honors must maintain an overall 3.0 gradepoint average, a cumulative average of 3.5 in the major, and complete an honors thesis (EAS 491 or 492). Students interested in applying should contact the director of undergraduate studies during the second semester of the junior year.

#### Courses

#### EAS 101 Introductory Geological Sciences (I)

Fall, spring. 3 credits. A. Moore. Designed to enhance an appreciation of the physical world. Emphasizes natural environments, surface temperatures, and dynamic processes such as mountain belts, volcanoes, earthquakes, glaciers, and river systems. Interactions of the atmosphere, hydrosphere, biosphere, and lithosphere (earth system science). Water, mineral, and fuel resources; environmental concerns. Field trips in the Ithaca region.

#### EAS 102 Evolution of the Earth and Life (also BIO G 170) (I) Spring. 3 credits. J. L. Cisne.

Course topics include: Earth systems and their evolution; Earth history's astronomical context; plate tectonics, continental drift, and their implications for climate and life; co-evolution of life and the atmosphere; precedents for ongoing global change; and dinosaurs, mass extinctions, and human ancestry. Includes laboratories on reconstructing geological history and mapping ancient geography. Fossil collecting on field trips.

## [EAS 105 Writing on Rocks (Freshman Seminar)

Fall, spring. 3 credits. Not offered 2002-2003. J. Chiment.

See Freshman Seminar Handbook for description.]

#### EAS 106 Vertebrate Fossil Preparation

Fall, spring. 1 credit. Prerequisite: 1 introductory geology course or concurrent

enrollment, class size is limited. J. Chiment. A laboratory-oriented course that exposes students to techniques of vertebrate fossil preparation. Roughing-out and fine preparation of large specimens in solid matrix are covered, as well as screen washing and microscope techniques for the recovery of micro-vertebrate remains. Specialized scanning techniques are discussed.

The class meets for one hour each week for the first three weeks of the semester. Students are assigned to an individual or group project requiring three hours of participation each week for the remainder of the semester.

#### EAS 107 How the Earth Works

Fall. 1 credit. J. L. Cisne. A user-friendly introduction to the workings and interactions of solid earth, ocean, atmosphere, and life as they relate to understanding ongoing global change.

#### EAS 109 Dinosaurs

Fall. 1 credit. J. L. Cisne.

An introductory survey course for anyone interested in dinosaurs. Lectures examine the fossil evidence and illustrate how various geological and biological disciplines contribute to understanding dinosaurs and their world.

#### EAS 111 To Know the Earth and Build a Habitable Planet (i)

Fall. 3 credits. J. M. Bird.

Acquaints the nonscientist with Earth. Course topics include: major features and how Earth has evolved; Earth system science and building a habitable planet; effects of human activity on geologic environments, mitigating environment damage, living with natural hazards; and mineral resource use in the twenty-first century and an environmentally sound fuel-minerals cycle.

#### EAS 122 Earthquake! (also ENGRI 122) (I)

Spring. 3 credits. L. D. Brown. The science of natural hazards and strategic resources is explored. Techniques for locating and characterizing earthquakes and assessing the damage they cause; methods of using sound waves to image the earth's interior to search for strategic minerals; the historical importance of such resources. Seismic experiments on campus to probe for groundwater, the new critical environmental resource.

#### EAS 131 Basic Principles of Meteorology (I) Fall. 3 credits. M. W. Wysocki.

Fall. 3 credits. M. W. Wysocki. A simplified treatment of the structure of the atmosphere: heat balance of the Earth; general and secondary circulations; air masses, fronts, and cyclones; and hurricanes, thunderstorms, tornadoes, and atmospheric condensation. In the laboratory, emphasis is on techniques of analysis of weather systems.

#### EAS 150 Introduction to Fortran Programming

Fall. 3 credits. M. W. Wysocki. An introduction to the elements of computer programming using Fortran. Exercises involve mainly meteorological problems.

#### EAS 154 The Sea: An Introduction to Oceanography, Lecture (also offered as BIOEE 154) (I)

Spring, summer. 3 credits. C. H. Greene, W. M. White.

A survey of the physics, chemistry, geology, and biology of the oceans for both science and nonscience majors. Topics include: seafloor spreading and plate tectonics, marine sedimentation, chemistry of seawater, ocean currents and circulation, the oceans and climate change, ocean ecology, and coastal processes. The optional one-credit laboratory for this course is offered as EAS 155/BIOEE 155.

#### EAS 155 The Sea: An Introduction to Oceanography, Laboratory (also offered as BIOEE 155)

Spring. 1 credit. C. H. Greene,

W. M. White. Prerequisite: concurrent enrollment in EAS 154.

Laboratory course covering topics presented in EAS 154.

#### EAS 200 Art, Archaeology, and Analysis (also ARKEO 285, ART H 200, ENGRI 185, PHYS 200) (I or IV) Spring. 3 credits. R. W. Kay.

Spring. 3 credits. R. W. Kay. An interdepartmental course on the use of techniques of science and engineering in cultural research. Applications of physical and physiological principles to the study of archaeological artifacts and works of art. Historical and technical aspects of artistic creation. Analyses by modern methods to deduce geographic origins and for exploration, dating, and authentication of cultural objects. Does not meet liberal studies distribution requirement for engineering.

#### EAS 201 Introduction to the Physics and Chemistry of the Earth (also ENGRD 201) (I)

Fall. 3 credits. Prerequisites: PHYS 112 or 207. L. M. Cathles.

Course topics include: formation of the solar system: accretion and evolution of the earth; the rock cycle: radioactive isotopes and the geological time scale, plate tectonics, rock and minerals, earth dynamics, mantle plumes; the hydrologic cycle: runoff, floods and sedimentation, groundwater flow, and contaminant transport; and the weathering cycle: chemical cycles,  $CO_2$  (weathering), rock cycle, controls on global temperature ( $CO_2$  or ocean currents), oil, and mineral resources.

#### EAS 202 Environmental Geology (I) Summer. 3 credits. W. R. Brice.

In-depth introduction to geologic processes that affect or are affected by human society, including stream behavior and floods, earthquakes, land stability and mass wasting, and volcanic hazards. This material provides an application of geology to engineering, natural resources, and land-use planning. Local examples are discussed and visited on short field trips. This course can be taken as an introduction to geology or as a continuation of EAS 101.

#### [EAS 203 Natural Hazards and the Science of Complexity (I) Fall. 3 credits. Prerequisites: 1 calculus

Fall. 3 credits. Prerequisites: 1 calculus course. Not offered 2002–2003. D. L. Turcotte.

Studies of natural hazards; earthquakes, volcanic eruptions, floods, hurricanes, tornadoes, severe storms, wildfires, meteor impacts. Applications of the science of complexity to natural hazards: fractals, chaos, and self-organized criticality.]

#### EAS 210 Introduction to Field Methods in Geological Sciences (I)

Fall. 3 credits. 1 lecture, Saturday field trips. Prerequisites: EAS 101 (or 201) or permis-

sion of instructor. R. W. Allmendinger. Course covers the methods by which rocks are used as a geological database. Topics include field methods used in the construction of geological maps and cross sections; systematic description of stratigraphic sections. There are field and laboratory sessions on Saturdays until Thanksgiving. There is one additional lecture during most of these weeks. Course includes one weekend field trip to eastern New York.

#### EAS 213 Marine and Coastal Geology

Summer. 2 credits. Prerequisite: an introductory course in geology or permission of instructor. Staff.

A special one-week course offered at Cornell's Shoals Marine Laboratory (SML) on an island near Portsmouth, New Hampshire. For more details and an application, consult the SML office, G14 Stimson Hall. Estimated cost for 2002 (including tuition, room, board, and ferry transportation) is \$1,100.

#### EAS 250 Meteorological Observations and Instruments

Spring. 3 credits. Prerequisite: EAS 131. Lab fee \$50. M. W. Wysocki.

Methods and principles of meteorological measurements and observations including surface, free-air, and remote systems. Topics include: instrument siting, mounting, and protection; instrument response characteristics, calibration, and standardization; and recorders and data logging systems. Includes laboratory exercises in observation and data analysis. Intended to serve as preparation for Observers Examination.

#### **EAS 260 Soil Science (also CSS 260) (1)** Fall. 4 credits. S-U grades optional.

S. J. Riha.

Designed for students interested in a comprehensive introduction to soil science from both an environmental and plant management perspective, this course is divided into three units. A unit on soil information introduces students to soil characterization, testing, mapping, classification, GIS, and land evaluation. A soil management unit addresses fertility, pest management, water, and microclimate, as well as erosion, conservation, pollution, and soil health. The unit on the role of soils in ecosystems considers topics such as biodiversity, soils as sinks and sources of greenhouse gases, and the impact of soils on land use. Labs are initially field-oriented with an emphasis on learning practical skills needed to evaluate and manage soils. Subsequent labs focus on accessing, interpreting, and applying soil information.

#### EAS 268 Climate and Global Warming (I)

Spring. 3 credits. Prerequisite: basic college math. A. T. DeGaetano.

Students from a range of disciplines become familiarized with such contemporary issues in climatology as global warming and El Niño. Introductions to the natural greenhouse effect, past climates, observed and projected climate changes and impacts. Also natural climate variations and their consequences and predictability. Weekly student-led discussions of issues appearing in journals such as *Nature*.

#### EAS 296 Forecast Competition

Fall and spring. 1 credit. S-U grades only. Prerequisites: sophomore undergraduate standing in atmospheric science or

permission of instructor. D. S. Wilks. This two-semester course provides daily exercise in probabilistic weather forecasting, in which students compete to forecast local weather most skillfully. Enroll for two consecutive semesters, with credit awarded after the second semester. May be repeated for credit

#### EAS 302 Evolution of the Earth System (I)

Spring. 4 credits, Prerequisites: MATH 112 or 192 and CHEM 207 or equivalent. W. M. White, W. D. Allmon, and B. L. Isacks.

Course covers the co-evolution of life and the earth system: Earth's early history; plate tectonics, continental drift, and climate changes during the past billion years; mountain building, ice ages, and our own emergence during the past ten million years. Serves as an introduction to methods of interpreting information preserved in the rock record.

#### EAS 315 Geomorphology (I)

Fall. 4 credits. Prerequisite: a 3-credit EAS course. B. L. Isacks.

A study of the processes that sculpt the Earth's landscapes (above and below sea level) and the nature of those landforms. Landforms constructed by Earth's internal processes are the point of departure as we examine their modification by physical interaction with the atmosphere and oceans. Also treated are depositional landforms that are generated by accumulations of grains or sediment. Laboratory exercises include both field examination of landforms of the Finger Lakes area and computer analysis of satellite images and Digital Elevation Models of examples from around the globe. Includes two Saturday field trips.

#### EAS 321 Introduction to **Biogeochemistry (also NTRES** 321) (I)

Fall. 4 credits. Prerequisites: CHEM 207, MATH 112, plus a course in biology and/ or geology. L. A. Derry, J. Yavitt. Control and function of the Earth's global biogeochemical cycles. The course begins with a review of the basic inorganic and organic chemistry of biologically significant elements, and then considers the biogeochemical cycling of carbon, nutrients, and metals that take place in soil, sediments, rivers, and the oceans. Topics include weathering, acid-base chemistry, biological redox processes, nutrient cycling, trace gas fluxes, bio-active metals, the use of isotopic tracers, and mathematical models. Interactions between global biogeochemical cycles and other components of the Earth system are discussed.

#### EAS 326 Structural Geology (I)

Spring. 4 credits. Prerequisite: MATH 112, EAS 101 or 201, or permission of instruc-tor. One weekend field trip. R. W. Allmendinger.

Nature and origin of deformed rocks at microscopic to macroscopic scales, with emphasis on structural geometry and kinematics. Topics include stress, strain, rheology, deformation mechanisms, minor structures, faulting, folding, and structural families.

#### EAS 331 Climate Dynamics (also ASTRO 331) (I)

Fall. 4 credits. Prerequisites: MATH 112 or 192 or equivalent. K. H. Cook, P. J. Gierasch.

Processes that determine climate and contribute to its change are discussed, including atmospheric radiation, ocean circulation, and atmospheric dynamics.

Contemporary climate change issues are investigated and discussed in the context of natural variability of the system.

#### [EAS 334 Microclimatology (I)

Spring. 3 credits. Prerequisite: a course in physics. Offered alternate years. Not offered 2002-2003. D. S. Wilks.

Considers the relationships of radiant energy, temperature, wind, and moisture in the atmosphere near the ground. The interplay between physical processes of the atmosphere, plant canopies, and soil is examined with emphasis on the energy balance.]

#### EAS 341 Atmospheric Thermodynamics and Hydrostatics (I)

Fall. 3 credits. Prerequisites: 1 year of calculus and 1 semester of physics. A. T. DeGaetano.

Introduction to the thermodynamics and hydrostatics of the atmosphere and to the methods of description and quantitative analysis used in meteorology. Topics covered include thermodynamic processes of dry air, water vapor, and moist air and concepts of hydrostatics and stability.

#### EAS 342 Atmospheric Dynamics (also ASTRO 342) (I)

Spring. 3 credits. Prerequisites: 1 year each of calculus and physics. K. H. Cook and P. I. Gierasch.

An introduction to the basic equations and techniques used to understand motion in the atmosphere, with an emphasis on the space and time scales typical of storm systems (the synoptic scale). The governing equations of atmospheric flow are derived from first principles and applied to middle latitude and tropical meteorology. Topics include balanced flow, atmospheric waves, circulation, and vorticity. Text used is Holton's An Introduction to Dynamic Meteorology.

#### EAS 350 Dynamics of Marine Ecosystems (I)

Fall. 3 credits. Prerequisites: 1 year of calculus and a semester of oceanography (i.e., EAS 154), or instructor's permission. C. H. Greene.

This lecture course covers the interactions of physical and biological processes in marine ecosystems. It begins by looking at these processes on a global scale and works down to the scales relevant to individual organisms. Topics include: global patterns of ocean circulation; global patterns of ocean production; climate variability and the role of the ocean in global climate change; the El Nino/ Southern Oscillation; ecosystem dynamics of the open ocean and coastal environments.

#### EAS 352 Synoptic Meteorology (I)

Spring. 3 credits. Prerequisites: EAS 341 and concurrent enrollment in EAS 342. M. W. Wysocki.

Weather map analysis and forecasting techniques are studied by applying the principles of fluid and heat flow. This course strengthens previously introduced meteoro-logical concepts which are applied to forecasting midlatitude synoptic scale weather systems, such as cyclones, anticyclones, jet streams, fronts, and waves.

#### EAS 355 Mineralogy (I)

Fall. 4 credits. Prerequisites: EAS 101 or 201 and CHEM 207 or permission of instructor. S. Mahlburg Kay.

The course covers chemical and physical properties and identification of minerals with emphasis on the rock forming minerals that

are the principal constituents of the Earth and other planets. Topics include internal and external crystallography, crystal chemistry, introductions to x-ray crystallography and optical mineralogy, and a systematic examination of the structures, chemistry, and occurrence of the rock forming minerals. Independent project includes use of electron microprobe and x-ray facilities.

#### EAS 356 Petrology and Geochemistry (I)

Spring. 4 credits. Prerequisite: EAS 355. R. W. Kay.

Principles of phase equilibrium as applied to igneous and metamorphic systems. Description, classification, chemistry, origin, regional distribution, and dating of igneous and metamorphic rocks. Geochemical distribution of trace elements and isotopes in igneous and metamorphic systems. The petrological evolution of the planets.

## EAS 375 Sedimentology and

**Stratigraphy (I)** Fall. 4 credits. Prerequisite: EAS 101 or 201. J. L. Cisne.

Course covers: the formation of sedimentary rocks; depositional processes and environments; correlation of strata in relation to time and environment; petrology of sandstone and limestone; geological age determination; reconstruction of paleogeography and interpretation of earth history from stratigraphic evidence; and organization of strata in stratigraphic sequences.

## EAS 388 Geophysics and

Geotectonics (I) Spring, 4 credits. Prerequisites: MATH 192 (or 112) and PHYS 208 or 213. B. L. Isacks. Covers global tectonics and the deep structure of the solid earth as revealed by investigations of earthquakes, earthquake waves, the earth's gravitational and magnetic fields, and heat flow

#### EAS 417 Field Mapping in Argentina (I)

Summer. 3 credits. Prerequisites: EAS 210 and 326; Spanish desirable, but not required. S. Mahlburg Kay.

Covers modern techniques of geological mapping applied in the region of San Juan, Argentina, including folded and faulted sedimentary rock units of the Andean Precordillera (San Juan River section), intensely deformed Precambrian metamorphic rocks of the Pampean Ranges (Pie de Palo), and shallow-level silicic intrusives (Cerro Blanco-Ullun).

#### EAS 434 Reflection Seismology (I)

Fall. 3 credits. Prerequisites: MATH 192 and PHYS 208, 213, or equivalent. L. D. Brown.

Fundamentals of subsurface imaging by multichannel seismic reflection techniques as used in oil exploration and geohydrological investigations. Covers survey design, acquisition, analysis, processing, and interpretation in both 2-D and 3-D. Includes discussion of related techniques such as seismic refraction analysis, tomographic inversion, vertical seismic profiling, shear wave exploration, and ground penetrating radar. Lab is keyed to state-of-the-art seismic processing, modeling and interpretation software from LandMark.

#### EAS 435 Statistical Methods in

Meteorology and Climatology (I) Fall. 3 credits. Prerequisites: an introductory course in statistics (e.g., AEM 210) and calculus. D. S. Wilks.

Covers: statistical methods used in climatology, operational weather forecasting, and selected meteorological research applications; some statistical characteristics of meteorological data, including probability distributions and correlation structures; operational forecasts derived from multiple regression models, including the MOS system; forecast verification techniques and scoring rules; and time series analysis, EOFs, and other research topics as time permits.

#### EAS 437 Geophysical Field Methods (I)

Fall. 3 credits. Prerequisite: PHYS 213 or 208, or permission of instructor. L. D. Brown.

Introduction to field methods of geophysical exploration, especially as applied to environmental issues. Emphasis is on seismic, ground penetrating radar, gravity, and magnetic techniques. Field surveys carried out at the beginning of the semester are analyzed and interpreted.

#### [EAS 447 Physical Meteorology (I)

Fall. 3 credits. Prerequisites: 1 year each of calculus and physics. Offered alternate years. Not offered 2002-2003. A. T. DeGaetano.

Primarily a survey of natural phenomena of the atmosphere, with emphasis on their underlying physical principles. Topics include composition and structure of the atmosphere, atmospheric optics, acoustics and electricity, microphysical cloud processes, and principles of radar probing of the atmosphere.]

#### EAS 451 Synoptic Meteorology II (I)

Fall. 3 credits. Prerequisites: EAS 341 and 342. S. J. Colucci.

Structure and dynamics of large-scale, midlatitude weather systems, such as cyclones, anticyclones, and waves, with consideration of processes that contribute to temperature changes and precipitation are covered. Laboratory sessions involve real-time weather forecasting and the computer application of a numerical model of the atmosphere to study selected large-scale, mid-latitude weather events.

## [EAS 453 Advanced Petrology (I) Fall. 3 credits. Prerequisite: EAS 356

Offered alternate years. Not offered 2002-2003. R. W. Kay.

Course topics include: magmas and metamorphism in the context of plate tectonics; major and trace element chemistry and phase petrology as monitors of the creation and modification of igneous rocks; and temperature and stress in the crust and mantle and their influence on reaction rates and textures of metamorphic rocks. Application of experimental studies to natural systems.]

EAS 454 Advanced Mineralogy (I) Spring. 3 credits. Prerequisite: EAS 355 or permission of instructor. Offered alternate years. S. Mahlburg Kay.

Course covers: crystallography and crystal chemistry of minerals and the methods of their study. Includes X-ray diffraction, optical methods, computer simulation of crystal structures. Emphasis is on effects of high pressures and temperatures with implications for understanding the Earth's interior.

#### [EAS 455 Geochemistry (I)

Fall. 4 credits. Prerequisites: CHEM 207 and MATH 192 or equivalent. Recommended: EAS 356. Offered alternate years. Not offered 2002-2003. W. M. White.

Looks at the Earth from a chemical perspective. Covers: the formation of the elements; cosmochemistry; chemical evidence regarding the formation of the Earth and solar system; trace-element geochemistry; isotope geochemistry; geochemical thermodynamics and kinetics; chemical evolution of the crust, mantle, and core; weathering and the chemistry of natural waters; chemistry of rivers and the oceans; hydrothermal systems and ore deposition.]

**[EAS 456 Mesoscale Meteorology (J)** Spring. 3 credits. Prerequisites: EAS 341 and 342 or permission of instructor. Offered alternate years. Not offered 2002-2003. S. J. Colucci.

Covers the structure and dynamics of midlatitude mesoscale weather systems such as fronts, jets, squall lines, convective complexes, precipitation bands, downslope windstorms, mountain breezes, sea breeze circulations, and lake effect snowstorms. The course also considers tropical weather systems and mesoscale modeling.]

#### EAS 457 Atmospheric Air Pollution (I)

Fall. 3 credits. Prerequisites: EAS 341 or 1 course in thermodynamics, and 1 semester of chemistry, or permission of instructor. Offered alternate years. M. W. Wysocki. Course examines sources, effects, transport, measurement, and controls of air pollution. The basic principles in each area are discussed with an emphasis on their local, regional, and global impacts.

#### EAS 458 Volcanology (I)

Fall. 3 credits. Prerequisite: EAS 356 or equivalent. Offered alternate years. R. W. Kay and W. M. White.

Considers the causes of volcanism, melting in the Earth, and the origin of magmas. Topics include: physical volcanology, nature and types of volcanic eruptions and associated deposits, eruption mechanisms; volcanic plumbing systems, magma chamber processes, evolution of magma; volcanism and impact phenomena in the solar system; volcanic hazard assessment and volcano monitoring; and ore deposits associated with volcanism.

#### EAS 462 Marine Ecology (also BIOEE 462) (1)

Spring. 3 credits. Limited to 75 students. Prerequisite: BIOEE 261. Offered alternate years. C. D. Harvell, C. H. Greene.

Lectures and discussion focus on current research in broad areas of marine ecology with an emphasis on processes unique to marine systems. A synthetic treatment of multiple levels of organization in marine systems including organismal, population, community, ecosystems, and evolutionary biology. Examples are drawn from all types of marine habitats including polar seas, temperate coastal waters, and tropical coral reefs.

#### EAS 475 Special Topics in Oceanography

Fall, spring, summer. 2-6 var. credits. Prerequisites: one semester of oceanography, and permission of instructor. C. H. Greene.

Undergraduate instruction and participation in advanced areas of oceanographic research.

Topics change from term to term. Contact instructor for further information.

#### EAS 476 Sedimentary Basins: Tectonics and Mechanics (I)

Fall. 3 credits. Prerequisite: EAS 375 or permission of instructor. Offered alternate years. T. E. Jordan.

Covers subsidence of sedimentary basins from the point of view of plate tectonics and geomechanics. Topics include: interactions of subsidence, sediment supply, and environmental characteristics in development of stratigraphic sequences; stratigraphic characteristics of active-margin, passivemargin, and cratonic basins; and geophysical and stratigraphic modeling; sequence stratigraphy. Modern and ancient examples are used.

#### [EAS 478 Advanced Stratigraphy (I)

Fall. 3 credits. Prerequisite: EAS 375 or permission of instructor. Offered alternate years. Not offerd 2002-2003. T. E. Jordan. Modern improvements on traditional methods of the study of ages and genetic relations among sedimentary rocks, emphasizing 3-D relationships. Techniques and applications of sequence stratigraphy at scales ranging from beds to entire basins. Physical correlation, dating techniques, and time resolution in sedimentary rocks. Physical controls on the stratigraphic record. Numerical modeling.]

#### EAS 479 Paleobiology (also BIOEE 479) (1)

Fall. 4 credits. Prerequisites: 1 year of introductory biology and either BIOEE 274, 373, EAS 375, or permission of instructor. Offered alternate years; not offered 2002-2003. W. Allmon.

A survey of the major groups of organisms and their evolutionary histories. Intended to fill out the biological backgrounds of earth and atmospheric sciences students concerning the nature and significance of the fossil record for their respective studies.]

#### EAS 481 Senior Survey of Earth Systems (I)

Spring. 3 credits. Limited to seniors majoring in geological science. J. M. Bird. Survey course that integrates undergraduate course work, intended to enhance overall understanding of geological sciences. Emphasis on current models of earth's dynamic systems (e.g., global climate change; mantle evolution). Includes guest lecturers; synthesis and review literature; scientific literature readings; discussions; student presentations.

#### EAS 483 Environmental Biophysics (also CSS 483) (I)

Spring. 3 credits. Prerequisites: EAS/CSS 260 or equivalent, or permission of instructor. Offered alternate years. S. J. Riha.

Introduction to basic principles of energy and mass transfer and storage in soil-plant systems. Topics include: energy budgets, soil heat flow, water movement in saturated and unsaturated soils, evapotranspiration, water, gas, and nutrient dynamics in the soil-plant-atmosphere continuum. Applications to agronomic and environmental problems and instrument design and use are considered through discussion and problem sets.

#### EAS 487 Introduction to Radar and Remote Sensing (also ECE 487)

Fall. 3 credits. Prerequisites: PHYS 208 or 213 or equivalent. D. L. Hysell. Course on the fundamentals of radar, antennas, and remote sensing. Students are exposed to the principles underlying the analysis and design of antennas used for communication and for radar-related applications. They also encounter both a mathematical and a practical description of how radars function, how their performance can be optimized for different applications and how signals acquired by them can be processed. The objective is to familiarize students with a wide variety of radars rather than turn them into practicing radar engineers. Each topic is developed from basic principles so students with a wide variety of backgrounds will be able to take the course. Emphasis is placed on radar applications in geophysics, meteorology and atmospheric sciences, astronomy and space sciences. Radar remote sensing of the Earth from spacecraft receives special attention.

#### EAS 491–492 Undergraduate Research

Fall, spring. 1-4 credits. Staff. (R. W. Kay, coordinator.)

Introduction to the techniques and philosophy of research in the earth sciences and an opportunity for undergraduates to participate in current staff research projects. Topics chosen in consultation with, and guided by, a staff member. A short written report is required, and outstanding projects are prepared for publication.

#### EAS 496 Internship experience Fall or spring. 1-2 credits. S-U grades only.

#### EAS 497 Individual Study in Atmospheric Science

Fall or spring. 1-6 credits. S-U grades optional. Students must register with an Independent Study form.

Topics are arranged at the beginning of the term for individual study or for group discussions

#### EAS 498 Teaching Experience

Fall or spring. 1-5 credits. S-U grades only. Students must register with an Independent Study form.

Teaching experience is obtained by assisting in the instruction of an atmospheric science course.

#### EAS 499 Undergraduate Research in **Atmospheric Science**

Fall or spring. Credit by arrangement. S-U grades only. Students must register with an Independent Study form.

Independent research on current problems in atmospheric science.

#### EAS 500 Design Project in Geohydrology

Fall, spring. 3-12 credits. An alternative to an industrial project for M.Eng. students choosing the geohydrology option. May continue over 2 or more semesters. L. M. Cathles.

The project may address one of the many aspects of groundwater flow and contamination and must involve a significant geological component and lead to concrete recommendations or conclusions of an engineering nature. Results are presented orally and in a professional report.

#### EAS 502 Case Histories in Groundwater **Analysis**

Spring. 4 credits. L. M. Cathles.

Groundwater flow in a specific area, such as a proposed nuclear-waste disposal site, is analyzed in depth. Geological and resource data on the area are presented early in the course. Then the material is analyzed by students working as an engineering analysis team. Each student makes a weekly progress report and writes part of a final report. Results are presented in a half-day seminar at the end of term.

#### [EAS 622 Advanced Structural Geology I

Spring, 3 credits. Prerequisites: EAS 326 and permission of instructor. Offered alternate years. Not offered 2002-2003. R. W. Allmendinger.

Stress-strain theory and application. Advanced techniques of structural analysis. Topics include finite and incremental strain measurement; microstructure, preferred orientation, and TEM analysis; pressure solution and cleavage development; and experimental deformation. Applications to deformation of unconsolidated sediments, brittle and brittleductile deformation of supracrustal strata, and ductile deformation of high-grade metamorphic rocks. Kinematic analysis of shear zones and folds in these regimes.]

#### EAS 624 Advanced Structural Geology II

Spring. 3 credits. Prerequisites: EAS 326 and permission of instructor. Offered alternate years. R. W. Allmendinger. Geometry, kinematics, and mechanics of structural provinces. Concentration on thrust belts, rift provinces, or strike-slip provinces. Techniques of balanced cross sections.

#### EAS 628 Geology of Orogenic Belts

Spring. 3 credits. Prerequisite: permission of instructor. J. M. Bird.

A seminar course in which students study specific geologic topics of an orogenic belt selected for study during the term. The course is intended to complement EAS 681.

#### EAS 634 Advanced Geophysics I: Fractals and Chaos in Geology and Geophysics

Fall. 3 credits. Prerequisite: EAS 388 or permission of instructor. Offered alternate years. D. L. Turcotte.

Topics include: definitions of fractal sets and statistical fractals, scale invariance, self-affine fractals, multifractals, applications to fragmentation, seismicity and tectonics, petroleum distribution and reserves, ore grade and tonnage, drainage networks and landforms, and floods and droughts. Definitions of chaos and self-organized criticality, renormalization groups, diffusion limited aggregation and percolation clusters, wavelet transforms, applications to mantle convection, the earth's dynamo, and distributed seismicity.

#### [EAS 636 Advanced Geophysics II: **Quantitative Geodynamics**

Spring. 3 credits. Prerequisite: EAS 388 or permission of instructor. Offered alternate years. Next offered 2003-2004. D. L. Turcotte.

Stress and strain in the earth, elasticity and flexure, heat transfer, gravity, fluid mechanics, rock rheology, faulting, chemical geodynamics, flow in porous media.]

#### EAS 641 Analysis of Biogeochemical Systems

Spring. 3 credits. Prerequisite: MATH 293 or permission of instructor. Offered alternate years. L. A. Derry.

Dynamics of biogeochemical systems. Kinetic treatment of biogeochemical cycles. Box

models, residence time, response time. Analytical and numerical solutions of model systems. Eigen-analysis of linear systems. Feedback and nonlinear cases, problems of uncertainties in natural systems. Modeling software such as Stella II and Matlab; applications to current research of participants or from recent literature.

#### EAS 651 Atmospheric Physics (also ASTRO 651)

Fall. 3 credits. Prerequisite: a good background in undergraduate calculus and physics is required. Offered alternate years. K. H. Cook, P. J. Gierasch, S. J. Colucci.

A survey of the fundamental physical processes in atmospheres. Topics include thermodynamics of atmospheric gases, moist effects, hydrostatics, convective instability, atmospheric radiation and radiative heating, radiative-convective equilibrium, clouds, cloud microphysics, and precipitation processes. Thermal structure and greenhouse effects on the Earth and other planets are discussed. The course is taught at the level of Fundamentals of Atmospheric Physics by Salby.

#### EAS 652 Advanced Atmospheric Dynamics (also ASTRO 652)

Spring. 3 credits. Prerequisites: EAS 341 and 342 or permission of instructor. Offered alternate years. S. J. Colucci, P. J. Gierasch.

Course topics include: quasigeostrophic theory, atmospheric waves, hydrodynamic instability, the general circulation of the atmosphere, and topics selected from among numerical weather prediction and tropical, mesoscale, and middle atmosphere processes according to student interest.

EAS 656 Isotope Geochemistry Spring. 3 credits. Open to undergraduates. Prerequisite: EAS 455 or permission of instructor. Offered alternate years. W. M. White.

Course topics include: nucleosynthetic processes and the isotopic abundances of the elements: geochronology and cosmochronology using radioactive decay schemes, including U-Pb. Rb-Sr, Sm-Nd, K-Ar, U-series isotopes, and cosmogenic isotopes such as <sup>14</sup>C and <sup>36</sup>Cl; use of radiogenic and stable isotopes in petrology and their application to study of the evolution of the crust and mantle; isotopic evidence regarding the formation of the Earth and the solar system; and stable isotopes and their use in geothermometry, ore petrogenesis, paleontology, and the global climate system.

#### EAS 666 Applied Multivariate Statistics

Spring. 3 credits. Prerequisites: multivariate calculus, matrix algebra, and two previous courses in statistics. Offered alternate years. D. S. Wilks.

Statistical techniques for multivariable data. Topics include multivariate EDA, the multivariate normal distribution, parametric and nonparametric inference about multivariate means, principal component analysis, canonical correlation analysis, discriminant analysis and cluster analysis. Geophysical applications are emphasized, using primarily atmospheric and oceanographic data as examples, but the development is general enough to be of broader interest.
#### [EAS 675 Modeling the Soil-Plant-Atmosphere System (also CSS 675)

Spring. 3 credits. Prerequisites: EAS/CSS 483 or equivalent. Offered alternate years. Not offered 2002–2003. S. J. Riha.

Introduction to the structure and use of soilplant-atmosphere models. Topics covered include modeling plant physiology, morphology, and development; potential crop production and crop production limited by moisture and nutrient availability; plant-plant competition; and land surface processes as well as model data requirements, validation, and scale. Use of soil-plant-atmosphere models for teaching, research, extension, and policy formation is discussed.]

#### EAS 692 Special Topics in Atmospheric Science

Fall or spring. 1-6 credits. S-U grades optional.

Study of topics in atmospheric science that are more specialized or different from other courses. Special topics covered depend on staff and student interests.

#### EAS 695 Computer Methods in Geological Sciences

Fall, spring. 3 credits. L. Brown, B. L. Isacks.

Independent research projects using state-ofthe-art computational resources in the Department of Earth and Atmospheric Sciences. Possibilities include image and seismic processing, seismic and geomechanical modeling, GIS, use of interpretational workshops for 3-D seismic and satellite imagery, modeling fluid flow through complex media.

## EAS 700-799 Seminars and Special Work

Fall, spring. 1-3 credits. Prerequisite:

permission of instructor. Staff. Advanced work on original investigations in earth and atmospheric sciences. Topics change from term to term. Contact appropriate professor for more information.

#### EAS 711 Upper Atmospheric and Space Physics

D. L. Hysell.

EAS 722 Advanced Topics in Structural Geology

R. W. Allmendinger.

EAS 731 Plate Tectonics and Geology J. M. Bird.

EAS 733 Fractals and Chaos— Independent Studies D. L. Turcotte.

#### [EAS 737 Climate Dynamics of the Tropics

Fall. 2 credits. Prerequisites: coursework in atmospheric dynamics at the graduate level. Not offered 2002–2003. K. H. Cook.]

EAS 751 Petrology and Geochemistry R. W. Kay.

- EAS 755 Advanced Topics in Petrology and Tectonics J. M. Bird.
- EAS 757 Current Research in Petrology and Geochemistry S. Mahlburg Kay.
- EAS 762 Advanced Topics in Paleobiology
  - W. D. Allmon.

- EAS 771 Advanced Topics in Sedimentology and Stratigraphy T. E. Jordan.
- EAS 773 Paleobiology J. L. Cisne.
- EAS 775 Advanced Topics in Oceanography Spring, C. H. Greene.
- EAS 780 Earthquake Record Reading Fall. M. Barazangi.
- EAS 781 Advanced Topics in Exploration Geophysics
  - L. D. DIOWII.
- EAS 783 Advanced Topics in Geophysics B. L. Isacks.
- EAS 769 Advanced Topics in Seismology L. D. Brown.

**EAS 793 Andes-Himalayas Seminar** S. Mahlburg Kay, R. W. Allmendinger, B. L. Isacks, T. E. Jordan.

- EAS 795 Low Temperature Geochemistry L. A. Derry.
- EAS 796 Geochemistry of the Solid Earth W. M. White.
- EAS 797 Fluid-Rock Interactions L. M. Cathles.
- EAS 799 Soil, Water, and Geology Seminar

L. M. Cathles, T. S. Steenhuis.

EAS 850 Master's-Level Thesis Research in Atmospheric Science

Fall or spring. Credit by arrangement. S-U grades only. Hours by arrangement. Graduate faculty.

Limited to students specifically in the master's program in atmospheric science.

#### EAS 950 Graduate-Level Dissertation Research in Atmospheric Science

Fall or spring. Credit by arrangement. S-U grades optional. Hours by arrangement. Graduate faculty.

Limited to students in the atmospheric science Ph.D. program *only before* the "A" exam has been passed.

#### EAS 951 Doctoral-Level Dissertation Research in Atmospheric Science

Fall or spring. Credit by arrangement. S-U grades optional. Hours by arrangement. Graduate faculty.

Limited to students admitted to candidacy in the atmospheric science Ph.D. program *after* the "A" exam has been passed.

## EAST ASIA PROGRAM

## 140 Uris Hall

J. Whitman, director; D. Boucher, M. Brinton, R. Bullock, A. Carlson, P. Chi, S. G. Cochran, B. de Bary, G. Fields, E. M. Gunn, T. Hahn, S. Hoare, P. J. Katzenstein, J. V. Koschmann, F. Kotas, J. M. Law, T. P. Lyons, R. McNeal, V. Nee, A. Pan, C. A. Peterson, J. R. Piggott, N. Sakai, P. S. Sangren, M. Shin, Y. Shirai, V. B. Shue, J. J. Suh, R. J. Sukle, K. W. Taylor, H. Wan, D. X. Warner, T. Yoda, Emeritus: R. Barker, K. W. Brazell, E. H. Jorden, L. C. Lee, J. McCoy, T. L. Mei, R. J. Smith, M. W. Young

The East Asia Program draws together faculty from departments and fields throughout the university who participate in a program of research and teaching on the civilizations and cultures of East Asia. Courses are offered through departments in the humanities and social sciences, as well as in the fields of business, city and regional planning, international and comparative labor relations. and rural sociology. The Department of Asian Studies offers language courses in Mandarin, Cantonese, Korean, and Japanese, in addition to the Full-year Asian Language Concentration (FALCON) in Japanese and Mandarin. Undergraduates major in the Department of Asian Studies and concentrate on the language and culture of one East Asian country, while graduate students may work toward an M.A. in East Asian studies, a dual M.B.A./M.A. or an M.A./Ph.D. in a discipline such as agricultural economics, anthropology, city and regional planning, government, history, history of art, linguistics, literature, rural sociology, or sociology. Graduate students concentrating on East Asia may apply for a variety of fellowships and travel grants offered by the East Asia Program. The formal program of study is enriched by numerous events and extracurricular activities, including films, workshops, art exhibits, lectures, symposia, and cultural and artistic performances on East Asia. With over a half million holdings in Chinese, Japanese, Korean, and western languages, the Wason Collection in Kroch Library is a major national resource for research on East Asia. A 5.000 piece collection representing the full range of Chinese, Japanese, and Korean art may be seen at the George and Mary Rockwell Galleries in the Herbert F. Johnson Museum of Art

## ECONOMICS

V. Possen, chair; R. Masson, graduate field representative; T. Lyons, director of undergraduate studies; K. Basu, L. Blume,

- R. Burkhauser, S. Coate, T. E. Davis,
- D. Easley, R. Ehrenberg, G. Fields, R. Frank,
- G. Hay, Y. Hong, R. Kanbur, N. Kiefer,
- T. Lyons, P. D. McClelland, M. Majumdar,
- O. Melnikov, T. Mitra, T. O'Donoghue,

S. Ortigueira, K. Park, A. Razin, D. Sahn,

R. E. Schuler, K. Shell, G. Staller,

S. Subramanian, M. Urquiola, T. Vogelsang, H. Y. Wan, Jr., Y. Wen, J. Wissink, T. Zhu. Emeritus: W. Isard, A. Kahn, E. Thorbecke, J. Vanek

The study of economics provides an understanding of the way economies operate and an insight into public issues. The department offers a broad range of undergraduate courses in such fields as money and banking; international and comparative economics; econometrics; theory; history; growth and development; and the organization, performance, and control of industry.

# Social Science Distribution Requirement

- The microeconomics distribution requirement can be fulfilled with any of the following: ECON 101, ECON 301, or ECON 313.
- The macroeconomics distribution requirement can be satisfied with any of the following: ECON 102, ECON 302, or ECON 314.

#### The Major Prerequisites

ECON 101 and 102 and MATH 111 (or equivalents, with approval of the director of undergraduate studies), all with grades of C or better.

ECON 301 with a grade of C or better substitutes for 101; ECON 302 with a grade of C or better substitutes for 102.

#### Requirements

Eight courses listed by the Department of Economics at the 300 level or above, or approved by the student's major adviser, all with grades of C- or better. (S-U grade option is not allowed.)

These eight courses must include:

- (1) ECON 313 and 314
- (2) ECON 321, or ECON 319 and 320
- (3) at least three courses from the following: 318, 320, 322-99, 467

ECON 301 with a grade of B or better substitutes for both 101 and 313; ECON 302 with a grade of B or better substitutes for both 102 and 314.

If ECON 321 is applied toward the major, neither 319 nor 320 can be applied.

ECON 498 and 499 cannot be counted toward the eight-course requirement.

If ECON 313 is applied to the major, ECON 301 cannot be.

If ECON 314 is applied to the major, ECON 302 cannot be.

An honors program is currently being offered. Students should consult the director of undergraduate studies before May of their junior year for more information.

Students planning graduate work in Economics should select ECON 319-320 rather than 321 and should consider including some of the following courses in their majors:

ECON 416, Intertemporal Economics

- ECON 419, Economic Decisions under Uncertainty
- ECON 445-446, Topics in Microeconomic and Macroeconomic Analysis

ECON 467, Game Theory

Students planing careers in business management should consider including some of the following courses in their majors:

ECON 333, Financial Economics

- ECON 351 or 352, Industrial Organization
- ECON 361-362, International Trade and Finance
- ECON 440-41, Analysis of Agricultural Markets and Commodity Futures Markets.

ECON 443, Personnel Economics for Managers

In addition to completing the Economics major, such students should also consider courses in accounting and subjects such as finance, marketing, entrepreneurship, business administration, and business law. Courses in these subjects are offered by the Department of Applied Economics and Management; the School of Hotel Administration; and the Johnson Graduate School of Management.

Students planning to attend Law School should consider including some of the following courses in their majors:

ECON 351 or 352, Industrial Organization

ECON 361-362, International Trade and Finance

ECON 404, Economics and the Law.

In addition to completing the Economics major, such students should inquire at Career Services, College of Arts and Sciences, concerning recommended courses offered by other departments.

### Courses

#### ECON 101 Introductory Microeconomics (III)

Fall, spring, winter, and summer. 3 credits. ECON 101 is not a prerequisite for 102. Explanation and evaluation of how the price system operates in determining what goods are produced, how goods are produced, who receives income, and how the price system is modified and influenced by private organizations and government policy.

#### ECON 102 Introductory Macroeconomics (III)

Fall, spring, winter, and summer. 3 credits. ECON 101 is not a prerequisite for 102. Analysis of aggregate economic activity in relation to the level, stability, and growth of national income. Topics discussed may include the determination and effects of unemployment, inflation, balance of payments, deficits, and economic development, and how these may be influenced by monetary, fiscal, and other policies.

#### ECON 230 International Trade and Finance (III)

For description, see AEM 230.

#### ECON 301 Microeconomics (III)

Fall. 4 credits. Prerequisite: calculus. Intended for students with strong analytical skills who have not taken ECON 101, 102. Can be used to replace both ECON 101 and 313. (Can replace 313 only with grade of B or better.) This course covers the topics taught in ECON 101 and 313. An introduction to the theory of consumer and producer behavior and to the functioning of the price system.

#### ECON 302 Macroeconomics (III)

Spring. 4 credits. Prerequisite: ECON 301. Intended for students with strong analytical skills who have not taken ECON 101, 102. Can be used to replace both ECON 102 and 314. This course covers the topics taught in ECON 102 and 314. (Can replace 314 only with grade of B or better.) An introduction to the theory of national income determination, unemployment, growth, and inflation.

#### ECON 307 Introduction to Peace Science (also CRP 495.18) (III)

Winter session. 4 credits. Prerequisites: ECON 101-102 or permission of instructor. Introduction to the theories of and research on conflict resolution. Topics include conflict, its role and impact on society; theories of aggression and altruism; causes of war; game theory; conflict management procedures and other analytical tools and methods of peace science; and alternatives to war.

#### ECON 313 Intermediate Microeconomic Theory (III)

Fall, spring, and summer. 4 credits. Prerequisites: ECON 101-102 and calculus. The pricing processes in a private enterprise economy are analyzed under varying competitive conditions, and their role in the

allocation of resources and the functional distribution of national income is considered.

#### ECON 314 Intermediate Macroeconomic Theory (III)

Fall, spring, and summer. 4 credits. Prerequisites: ECON 101-102 and calculus. The theory of national income and determination and economic growth in alternative models of the national economy is introduced. The interaction and relation of these models to empirical aggregate economic data is examined.

# ECON 319 Introduction to Statistics and

Probability (II) Fall. 4 credits. Prerequisites: ECON 101– 102 and MATH 111–112.

This course provides an introduction to statistical inference and to principles of probability. It includes descriptive statistics, principles of probability, discrete and continuous distributions, and hypothesis testing (of sample means, proportions, variance). Regression analysis and correlation are introduced.

#### ECON 320 Introduction to Econometrics (II)

Spring. 4 credits. Prerequisites: ECON 101-102, 319, or equivalent.

Introduction to the theory and application of econometric techniques. How econometric models are formulated, estimated, used to test hypotheses, and used to forecast; understanding economists' results in studies using regression model, multiple regression model, and introduction to simultaneous equation models.

## ECON 321 Applied Econometrics (II)

Fall and spring. 4 credits. Prerequisites: ECON 101-102 and calculus.

This course provides an introduction to statistical methods and principles of probability. Topics covered include analysis of data, probability concepts and distributions, estimation and hypothesis testing, regression, correlation and time series analysis. Applications from economics are used to illustrate the methods covered in the course.

#### ECON 322 World Economic History # (111)

Spring. 4 credits. Prerequisites: ECON 101 and 102 or the equivalent.

An economist's perspective on the comparative evolution of selected economic and social institutions, with emphasis on trade, finance, population growth and technological change.

#### ECON 323 American Economic History # (III)

Fall. 4 credits. Prerequisites: ECON 101-102 or equivalent.

Problems in American economic history from the first settlements to early industrialization are surveyed.

#### ECON 324 American Economic History # (III)

Spring. 4 credits. Prerequisites: ECON 101-102 or equivalent.

A survey of problems in American economic history from the Civil War to World War I.

#### ECON 331 Money and Credit (III)

Fall. 4 credits. Prerequisites: ECON 101-102 and 314.

A systematic treatment of the determinants of the money supply and the volume of credit. Economic analysis of credit markets and financial institutions in the United States.

#### **ECON 333 Financial Economics (III)** Spring, 4 credits. Prerequisites: ECON 313

and 314. The theory and decision making in the

presence of uncertainty and the practical aspects of particular asset markets are examined.

#### ECON 335 Public Finance: The Microeconomics of Government (III)

Fall. 4 credits. Prerequisites: ECON 101– 102 and 313, or their equivalent, and one semester of calculus.

The role of government in a free market economy is analyzed. Topics covered include public goods, market failures, allocation mechanisms, optimal taxation, effects of taxation, and benefit-cost analysis. Current topics of an applied nature vary from term to term.

#### ECON 336 Public Finance: Resource Allocation and Fiscal Policy (III)

Spring, 4 credits. Prerequisites: ECON 101– 102, 313 or their equivalent and 1 semester of calculus.

This course covers the revenue side of public finance and special topics. Subjects covered include the federal debt, the budget, and government regulation and transfers, as well as problems like local public goods, health care, education, the hierarchy of governmental structure, plus a variety of applied problems.

#### ECON 339 State and Local Public Finance (III)

Spring. 4 credits. Prerequisites: ECON 313. This course examines the role of subnational governments and jurisdictions in the economy. Among the broad questions addressed are: what tasks are optimally assigned to local governments? What impact can such assignment have on efficiency and equity? How do inter-government financial relations affect these outcomes? The theory and evidence on these issues are analyzed, with frequent application to current issues, like debates surrounding local, school district-based provision of education.

#### ECON 341 Economics of Wages and Employment II (III)

For description, see ILRLE 440.

#### ECON 351 Industrial Organization I (III) Fall. 4 credits. Prerequisite: ECON 313 or

its equivalent. This course examines markets with only a few firms (i.e., oligopolies), and the primary focus is the strategic interactions between firms. Topics include static competition in oligopolies, cartels and other forms of collusive behavior, competition between firms producing differentiated products, entry behavior, R&D behavior, and government interventions in oligopoly industries (e.g., antitrust laws).

## ECON 352 Industrial Organization II (III)

Spring. 4 credits. Prerequisite: ECON 313 or its equivalent.

This course primarily focuses on the pricing decisions of firms. The course does not consider the strategic response of other firms to these pricing decisions. The pricing decisions include price discrimination, commodity bundling, pricing a product line and pricing a durable good. In addition to pricing decisions, the course considers topics associated with private information such as adverse selection, signaling, and moral hazard.

Numerous theoretical models are presented and empirical results are discussed.

## ECON 354 The Economics of

**Regulation (III)** Fall. 4 credits. Prerequisite: ECON 313 or equivalent.

Regulation constrains individual and institutional behavior. These interfaces between the private and public sectors are explored in terms of their rationale, efficacy, and economic consequences. Regulation is examined as a system of incentives that guides the development and efficient functioning of markets, that moulds the behavior of regulated industries like utilities and that elicits socially desirable levels of pollution, congestion, risk and benefits from externalitygenerating activities. How the various professions (law, accounting and engineering) view and address these challenges are examined in light of their economic effects.

#### ECON 361 International Trade Theory and Policy (III)

Fall. 4 credits. Prerequisites: ECON 101-102 and 313.

This course surveys the sources of comparative advantage. It studies commerical policy and analyzes the welfare economics of trade between countries. Some attention is paid to the institutional aspects of the world trading system.

#### ECON 362 International Monetary Theory and Policy (III)

Spring and summer. 4 credits. Prerequisites: ECON 101-102 and 314.

sites: ECON 101–102 and 514. This course surveys the determination of exchange rates and theories of balance of payments adjustments. It also explores open economy macroeconomics, and it analyzes some of the institutional details of foreign exchange markets, balance of payments accounting, and the international monetary system.

## ECON 367 Game Theoretic

Methods (III)

Spring. 4 credits. Prerequisites: ECON 101 or equivalent.

This course introduces students to the use of game-theoretic methods for the social sciences. This leads to an analysis of the social and political foundations of economics which prepares students to think strategically on social and economic matters and thus serve as a background for more advanced courses in economics, game theory, and related social sciences.

#### ECON 371 Economic Development (III)

Fall. 4 credits. Prerequisites: ECON 313 or equivalent.

Study of the problem of sustaining accelerated economic growth in less-developed countries. Trade-offs between growth, welfare, and equity; the legacy of colonialism; relevance of history and economic theory; problems of capital formation, economic planning and international specialization; and the interaction of industrialization, agricultural development, and population change are emphasized.

#### ECON 372 Applied Economic

**Development (III)** Spring. 4 credits. Prerequisite: ECON 101–102

This course examines several special topics in the economics of developing countries. Among the topics covered recently are the concepts of development and underdevelopment, the debate over development economics, the peasant household and its place in the world economy, the debt crisis, the state vs. market debate and the role of the state in economic development, and the question of sustainable development.

#### ECON 404 Economics and the Law (ill)

Fall. 4 credits. Prerequisite: ECON 101. An examination, through the lens of economic analysis, of legal principles drawn from various branches of law, including contracts, torts, and property. Cases are assigned for class discussion; in addition, there are several writing assignments.

#### ECON 408 Production Economics and Policy (III)

For description, see AEM 608.

## ECON 409 Environmental

**Economics (III)** For description, see AEM 451.

**ECON 415 Price Analysis (III)** For description, see AEM 415.

#### ECON 416 Intertemporal Economics (III)

Spring. 4 credits. Prerequisites: ECON 313. Not offered 2002–2003.

This course is intended for advanced economics majors who are especially interested in economic theory. Topics covered: (1) review of the one good Ramsey model of optimal savings and accumulation; conditions for intertemporal efficiency in production; comparative dynamics and sensitivity analysis; (2) some earlier models of capital accumulation; the roles of present value and internal rate of return in guiding investment decisions; (3) growth, exhaustible resources; pollution and conservation: discussion of the trade-offs facing a society.]

#### ECON 417 History of Economic Analysis # (III)

Fall or spring. 4 credits. Prerequisites: ECON 101-102 or permission of instructor. Covers early writings in economics and their relationship to current economic analysis and policy issues. Examples inclulde: ancient and medieval philosophers on justice in exchange; mercantilist arguments for trade protection; early theories about the effect of monetary expansion (D. Hume); the role of the entrepreneur (Cantillon); and general competitive equilibrium (the Physiocrats). The most recent reading assignment in this course is Adam Smith's Wealth of Nations but the emphasis is on the relationship between the precursors of Adam Smith and his Wealth of Nations to modern economics analysis and current efforts to answer some of the questions raised in the early writing on economics.

#### ECON 419 Economic Decisions under Uncertainty (III)

Fall. 4 credits. Prerequisites: ECON 313 and 319. Not offered 2002-2003.

This course provides an introduction to the theory of decision making under uncertainty with emphasis on economic applications of the theory.]

#### ECON 420 Economics of Family Policy— Adults

ECON 420 and 421 together, count as 1 course for the Economics major. For description, see PAM 320.

#### ECON 421 Economics of Family Policy— Children

ECON 420 and 421 together, count as one course for the Economics major. For description, see PAM 321.

#### ECON 425 Economic History of Latin America @ # (III)

Spring. 4 credits.

A survey of changing economic institutions and policies from pre-Columbian to modern times.

#### ECON 430 Policy Analysis: Welfare Theory, Agriculture, and Trade (III)

For description, see AEM 630.

#### ECON 440 Analysis of Agricultural Markets

ECON 440 and 441 together, count as one course for the Economics major. For description, see AEM 640.

#### ECON 441 Commodity Futures Markets

ECON 440 and 441 together, count as one course for the Economics major. For description, see AEM 641.

#### ECON 443 Personnel Economics for Managers

For description, see ILRLE 433.

#### ECON 444 Modern European Economic History

For description, see ILRLE 444.

#### ECON 445 Topics in Microeconomic Analysis—Markets and Planning (III)

Fall. 4 credits. Prerequisites: ECON 313. This is a course of economic theory designed for upperclass undergraduates. Course contents may vary from year to year. Issues that may be examined include: How can economic activities be efficiently organized through the market mechanism? Why is the presence of many traders essential to efficiency? What can be done if the indivisibility in production processes becomes an important hindrance to competitive pricing? How can economic planning be decentralized efficiently? This course serves two purposes: to introduce concepts that are novel to undergraduates and relevant to public policy but require only a modicum of analytic tooling up, and to illustrate the deductive approach of modern economic analysis-how to define concepts unambiguously, how to form propositions in clear-cut fashion, and how to follow up logical implications sequentially to the conclusion.

#### [ECON 446 Topics in Macroeconomic Analysis—Is Keynesianism Dead? (III)

Fall or spring. 4 credits. Prerequisites: ECON 314. Not offered 2002–2003. The coverage of this course may vary from term to term. Presently, the content of the course deals with the range of criticisms against Keynesian theory by the New Classical Economics, alias the Equilibrium School, alias the Rational Expectations School. Despite the fact that almost all intermediate macroeconomic textbooks are Keynesian in perspective, clearly Keynesian economics is currently at bay. We review critically critiques to Keynesian theory.]

## ECON 447 Economics of Social Security (III)

For description, see CEH 346.

**ECON 450 Resource Economics (III)** For description, see ARME 450.

**ECON 451 Economic Security (III)** For description, see ILRLE 340.

ECON 453 The Economics of Unemployment (III) For description, see ILRLE 348.

ECON 454 Special Topics in Labor Economics

For description, see ILRLE 440.

**ECON 455 Income Distribution (III)** For description, see ILRLE 441.

ECON 456 The Economics of Employee Benefits (III) For description, see ILRLE 442.

**ECON 457 Women in the Economy (III)** For description, see ILRLE 445.

ECON 458 Topics in Twentieth-Century Economic History (III) For description, see ILRLE 448.

ECON 459 Economic History of British Labor 1750–1940 (III) For description, see ILRLE 446.

ECON 460 Economic Analysis of the Welfare State (III)

For description, see ILRLE 642.

#### ECON 461 The Economics of Occupational Safety and Health (III)

For description, see ILRLE 644.

ECON 464 Economics of Agricultural Development (III) For description, see AEM 464.

#### ECON 465 Food and Nutrition Policy (III)

For description, see AEM 665.

## ECON 467 Game Theory (III)

Fall. 4 credits. Prerequisites: ECON 313 and 319.

This course studies mathematical models of conflict and cooperation in situations of uncertainty (about nature and about decision makers).

#### ECON 468 Economic Problems of Latin America @ (III)

Spring. 4 credits. Prerequisites: ECON 101-102.

Current topics include, international debt, capital flight, economic integration, stabilization programs, etc.

#### ECON 469 China's Economy under Mao and Deng @ (III)

Fall. 4 credits. Prerequisites: ECON 101-102 or permission of instructor.

Examines the development of the Chinese economy and the evolution of China's economic system between 1949 and the early 1990s.

#### ECON 471 The Economies of the Former Soviet Union and of Central Europe: From Central Planning to Markets (III)

Fall. 4 credits. Prerequisites: ECON 101, 102.

The course introduces first the basic features of a centrally planned economy and proceeds to consider the most important example: the rise and fall of the Soviet Union. Secondly, the analysis extends to what used to be known as "Eastern Europe" (e.g., Czechoslovakia, Hungary, Poland). From this necessary historical background, the course proceeds to current attempts to move away from Socialist central planning and its legacies to market economy, privatization, and independence.

#### ECON 472 Comparative Economic Systems: East and West (III) Fall. 4 credits. Prerequisites: ECON 101–

102.

The course develops first a framework for studying economic systems and national economies and presents three simple stylized systemic models: capitalist market, socialist market, and central planning. Secondly, the course considers economic goals to be achieved (such as growth, stability, and productivity) and introduces quantitative measures used in the evaluation of the performance. Thirdly, comparative studies of selected national economies representing the models are carried out.

#### ECON 473 Economics of Export-Led Development @ (III)

Spring. 4 credits. Prerequisites: ECON 313, 314, or their equivalent.

This course examines the phenomenon of export-led development from both the theoretical and empirical points of view. Concentration is on experiences within the West Pacific Rim.

#### ECON 474 National and International Food Economics (III) For description, see NS 457.

ECON 475 The Economy of India @ (III) Fall. 4 credits. Prerequisite: ECON 101–102 or equivalent background.

This course presents the major economics and development problems of contemporary India and examines the country's future economic prospects. It is, however, our aim to discuss these problems in their proper historical perspectives. Hence, the course starts with a brief outline of the social and political history of India. It then turns to a more detailed account of the economic history of India in two stages.

## ECON 476 Decision Theory I (also ECON 676 and CIS 576) (III)

Fall, 4 credits. Research on decision theory resides in a variety of disciplines including computer science, economics, game theory, philosophy, and psychology. This course attempts to integrate these various approaches. The course is taught jointly by two economists/ game theorists and a computer scientist. The course has several objectives. First, we cover basic decision theory. This theory, sometimes known as "rational choice theory", is part of the foundation for the disciplines listed above. It applies to decisions made by individuals or by machines. Second, we cover the limitations of and problems with this theory. Issues discussed here include decision theory paradoxes revealed by experiments, cognitive and knowledge limitations, and computational issues. Third, we cover new research designed in response to these difficulties. Issues covered include alternative approaches to the foundations of decision theory, adaptive behavior and shaping the individual decisions by aggregate/evolutionary forces. This is a two-semester course. In the fall semester the course is lecture based. Students will be required to complete several problem sets and there will a final exam. In the spring semester there will be additional lectures as well as visiting speakers. Students will be required to

read the speakers papers and participate in discussions. In the spring semester students will be required to complete a research project.

# ECON 477 Decision Theory II (also ECON 677, CIS 577) (III)

Spring, 4 credits. Prerequisite: ECON 476 or 676 or CIS 576. For description, see ECON 476.

#### ECON 498 Independent Study in Economics

Fall or spring. Variable credit. Independent study.

#### ECON 499 Honors Program

Fall and spring. 8 credits. Prerequisites: ECON 313, 314, 321 (or 319–320). Consult the Director of Undergraduate Studies for details. Interested students should apply to the program in the spring semester of their junior year.

#### **Graduate Courses and Seminars**

#### ECON 609 Microeconomic Theory I Fall. 4 credits.

Topics in consumer and producer theory.

#### ECON 610 Microeconomic Theory II Spring. 4 credits.

Topics in consumer and producer theory, equilibrium models and their application, externalities and public goods, intertemporal choice, simple dynamic models and resource depletion, choice under uncertainty.

#### ECON 611 Microeconomic Theory III

Spring. 4 credits. Prerequisites: ECON 609 and 610.

This class is a part of a three semester sequence in microeconomic theory. It provides a rigorous underpinning of partial equilibrium competitive analysis and reviews theories of non-competitive markets, including Bertrand, Cournot, and monopolistic competition. It covers the classical sources of market failure (public goods, externalities, and natural monopoly) and discusses market failures stemming from informational asymmetries. It also provides an introduction to contract theory, bargaining theory, social choice theory, and the theory of mechanism design.

#### ECON 613 Macroeconomic Theory I Fall. 4 credits.

Course covers the following topics: static general equilibrium; intertemporal general equilibrium: infinitely lived agents models and overlapping generations models; welfare theorems; equivalence between sequential markets and Arrow-Debreu Markets; Ricardian proposition; Modigliani-Miller theorem; asset pricing; recursive competitive equilibrium; the Neoclassical Growth Model; calibration; and introduction to dynamic programming.

#### ECON 614 Macroeconomic Theory II Spring. 4 credits.

Course covers the following topics: dynamic programming; stochastic growth; search models; cash-in-advance models; real business-cycle models; labor indivisibilities and lotteries; heterogeneous agents models; optimal fiscal and monetary policy; sustainable plans; and endogenous growth.

#### ECON 617 Intermediate Mathematical Economics I

Fall. 4 credits. Prerequisites: Calculus II and intermediate linear algebra.

The course covers selected topics in Matrix algebra (vector spaces, matrices, simultaneous linear equations, characteristic value problem), calculus of several variables (elementary real analysis, partial differentiation, convex analysis), classical optimization theory (unconstrained maximization, constrained maximization).

#### [ECON 618 Intermediate Mathematical Economics II

Spring. 4 credits. Not offered 2002–2003. A continuation of ECON 617, the course develops additional mathematical techniques for applications in economics. Topics covered may include study of dynamic systems (linear and nonlinear difference equations, differential equation, chaotic behavior), dynamic optimization methods (optimal control theory, nonstochastic and stochastic dynamic programming), and game theory (repeated dynamic and evolutionary games).]

#### ECON 619 Econometrics I

Fall. 4 credits. Prerequisites: ECON 319-

320 or permission of instructor. This course gives the probabilistic and statistical background for meaningful application of econometric techniques. Topics covered include: probability theory: probability spaces, random variables, distributions, moments, transformations, conditional distributions, distribution theory and the multivariate normal distribution, convergence concepts, laws of large numbers, central limit theorems, Monte Carlo simulation; statistics: sample statistics, sufficiency, exponential families of distributions. Further topics in statistics are considered in ECON 620.

#### ECON 620 Econometrics II

Spring. 4 credits. Prerequisite: ECON 619. This course is a continuation of ECON 619 (Econometrics I) covering statistics: estimation theory, least squares methods, method of maximum likelihood, generalized method of moments, theory of hypothesis testing, asymptotic test theory, and nonnested hypothesis testing; and econometrics: the general linear model, generalized least squares, specification tests, instrumental variables, dynamic regression models, linear simultaneous equation models, nonlinear models, and applications.

# ECON 639 Public Political Economy (also CEE 528)

Spring. 4 credits. Prerequisites: ECON 313 or equivalent.

Topics covered include the intrinsic nature of goods and services, decreasing cost of production, externalities and congestion, attributes and government regulation essential for an effective market, the efficient role of government in non-market resource allocation methods, methods for inferring the demand for public goods, efficient public decisionmaking, the supply of public services and raising revenue through taxes and user-fees. Particular emphasis is placed on the intersection between fairness and efficiency in resolving conflicts over public good provision, including defining jurisdictions for the provision of particular services. Examples emphasize the proper provision of infrastructure services: physical (transportation, utilities, tele-information); human-capital (education and R&D); and biological (renewable resources, species diversity and the environment.

**ECON 676 Decision Theory I (also CIS 576)** For description, see ECON 476.

## ECON 677 Decision Theory II (also CIS 577)

For description, see ECON 477.

#### **ECON 699 Readings in Economics** Fall or spring. Variable credit. Independent study.

#### ECON 703 Seminar in Peace Science Fall. 4 credits.

Among the topics covered at an advanced level are game theory are: coalition theory, bargaining and negotiation processes, cooperative procedures, microbehavior models, macrosocial processes, and general systems analysis.

#### ECON 710 Stochastic Economics: Concepts and Techniques

Spring. 4 credits. Prerequisites: ECON 609, 610, 613, 614, 619, and 620.

This course reviews a number of techniques that have been useful in developing stochastic models of economic behavior. These include: discrete-time Markov processes, dynamic programming under uncertainty, and continuous-time diffusion processes. Examples of economic models are drawn from recent literature on optimal capital accumulation and optimal savings and portfolio selection problems; permanent income hypothesis; dynamic models of price adjustment, etc. Advanced graduate students contemplating work in economic theory and econometric theory gain exposure to current research.

#### ECON 712 Advanced Macroeconomics

4 credits. Prerequisites: ECON 613, 614. The purpose of this course is to introduce students to some of the topics and analytic techniques of current macroeconomic research. The course falls into three parts: dynamic programming, new Keynesian economics, and recent theories of economic growth. The dynamic programming section includes models of consumption, investment, and real business cycles. The new Keynesian section covers models of wage and price rigidity, coordination failure, and credit markets. The section on endogenous growth looks at recent efforts to add nonconvexities to models of optimal growth. These topics are intended to complement the material on overlapping generations covered elsewhere

#### ECON 713 Advanced Macroeconomics II Spring. 4 credits. Prerequisites: ECON 613, 614.

This course reveiws the most recent research in endogenous growth theory. This theory is little more than a decade old, but it has produced a large number of both empirical and theoretical results that have substantially reshaped the general field of macroeconomics. It is perhaps no exaggeration to say that most of the work at the frontier of today's macroeconomics belongs to this field. An increasing number of papers have been touching important issues such as; learning by doing, R&D investment, market structure, private and public organization of R&D, education financing, human capital accumulation, technological unemployment, growth and business cycles, inequality and growth, political equilibrium, democracy and growth, instability, social conflict, capital accumulation, intergenerational and vested interests and barriers to technology adoption, international transfers of technologies, sustainable development, etc.

This course aims to orient the student in this large and variegated literature consisting of recently published articles and working papers. Understanding this literature is a sound training in the analytical methods used at the frontier of theoretical research, but it also provides a number of empirical results at the center of the economic debate.

#### ECON 717 Mathematical Economics

4 credits. Prerequisites: ECON 609–610 (or equivalent training in micro theory) and MATH 413–414 (or equivalent training in analysis).

The primary theme of this course is to explore the role of prices in achieving an efficient allocation of resources in dynamic economies. Some of the classical results on static equilibrium theory and welfare economics on attaining optimal allocation through decentralized organizations are examined through an axiomatic approach. Some basic issues on capital theory are also analyzed.

#### [ECON 718 Topics in Mathematical Economics

4 credits. Not offered 2002-2003.]

#### ECON 719 Advanced Topics in Econometrics I

Fall. 4 credits. Prerequisites: ECON 619–620 or permission of instructor.

Covers advanced topics in econometrics, such as asymptotic estimation and test theory, robust estimation, Bayesian inference, advanced topics in time-series analysis, errors in variable and latent variable models, qualitative and limited dependent variables, aggregation, panel data, and duration models.

#### ECON 720 Advanced Topics in Econometrics II

Spring. 4 credits. Prerequisites: ECON 619– 620 or permission of instructor. For description see ECON 719.

#### ECON 721 Time Series Econometrics

Spring. 4 credits. Prerequisites: ECON 619-620 or permission of instructor. This course covers traditional and current time series techniques that are widely used in econometrics. Topics include: the theory of stationary stochastic processes including univariate ARMA(p,q) models, spectral density analysis, and vector autoregressive models; parametric and semi-parametric estimation; current developments in distributional theory; and estimation and testing in models with integrated regressors including, unit root tests, cointegration, and permanent vs. transitory components.

#### ECON 731 Monetary Economics

Spring. 4 credits. Prerequisites: ECON 614 or permission of the instructor.

Covers advanced topics in monetary economics, macroeconomics, and economic growth such as overlapping-generations, taxes and transfers denominated in money, transactions demand for money, multi-asset accumulation, exchange rates, and financial intermediation.

#### ECON 732 Monetary Economics

Fall. 4 credits. Prerequisites: ECON 731 or permission of the instructor.

Covers advanced topics in monetary economics, macroeconomics, and economic growth such as economic volatility, the "burden" of government debt, restrictions on government borrowing, dynamic optimization, endogenous growth theory, technological evolution, financial market frictions, and cyclical fluctuations.

#### [ECON 735 Public Finance: Resource Allocation and Fiscal Policy (also AEM 735)

Spring. 4 credits. Not offered 2002-2003. This course develops a mathematical and highly analytical understanding of the role of government in market economies and the fundamentals of public economics and related issues. Topics covered include: generalizations and extensions of the fundamental theorems of welfare economics, in-depth analysis of social choice theory and the theory on implementation in economic environments, public goods and externalities and other forms of market failure associated with asymmetric information. The theoretical foundation for optimal direct and indirect taxation is also introduced along with the development of various consumer surplus measures and an application to benefit cost analysis. Topics of an applied nature vary from semester to semester depending on faculty research interests.]

#### ECON 736 Public Finance: Resource Allocation and Fiscal Policy Fall. 4 credits.

This course spends a large part of the semester covering the revenue side of public finance. Topics include the impact of various types of taxes as well as the determination of optimal taxation. The impact of taxation on labor supply, savings, company finance and investment behavior, risk bearing, and portfolio choice are explored. Other topics include the interaction of taxation and inflation, tax evasion, tax incidence, social security, unemployment insurance, deficits, and interactions between different levels of government.

#### [ECON 737 Location Theory and Regional Analysis

Fall. 4 credits. Prerequisites: ECON 609, 617, and Econometrics. Not offered 2002–2003.

Covers economic principles influencing the location of economic activity, its spatial equilibrium structure, and dynamic forces. Topics include spatial pricing policies, price competition, and relocation by firms; residential location patterns; patterns of regional growth and decline; and patterns of urbanization.]

#### ECON 738 Public Choice

Spring. 4 credits. Prerequisites: ECON 609, 610.

This class has two parts. It begins with an introduction to economic theories of political decision making. We review the theory of voting, theories of political parties and party competition, theories of legislative decision making and interest group influence. We also discuss empirical evidence concerning the validity of these theories. The second part uses these theories to address a number of issues in Public Economics. We develop the theory of political failure, analyze the performance of alternative political systems and discuss the problem of doing policy analysis which takes into account political constraints.

#### ECON 739 Advanced Topics in State and Local Public Finance

Spring. 4 credits. Prerequisites: ECON 609, 620.

This course provides an in-depth examination of microeconomic theory surrounding the role of subnational governments and jurisdictions in the economy. Among the broad questions address are: What tasks are optimally assigned to local governments? What impact can such assignment have on efficiency and equity? In addition to the theoretical foundations on these issues, the course explores recent empirical evidence in this area, with particular attention to the research designs and data used in relevant papers.

**ECON 741 Seminar in Labor Economics** For description see ILRLE 744.

#### **ECON 742 Seminar in Labor Economics** For description see ILRLE 745.

#### ECON 751 Industrial Organization and Regulation

Fall. 4 credits. Prerequisites: ECON 609, 610.

This course focuses primarily on recent theoretical advances in the study of industrial organization. Topics covered include: market structure, nonlinear pricing, quality, durability, location selection, repeated games, collusion, entry deterrence, managerial incentives, switching costs, government intervention, and R&D/Patents. These topics are discussed in a game-theoretic context.

#### ECON 752 Industrial Organization and Regulation

Spring. 4 credits. Prerequisites: ECON 609, 610, 751.

This course rounds out some topics in the Theory of Industrial Organization with the specific intent of addressing the empirical implications of the theory. The course reviews empirical literature in the SCP paradigm and in the NEIO paradigm.

#### [ECON 753 Public Policy Issues for Industrial Organizations

Spring. 4 credits. Prerequisites: ECON 609, 610, and 751. Not offered 2002–2003. The course takes an in-depth view of the interaction between the government and business. Methods of business control, including antitrust, price regulation, entry regulation, and safety regulation. Emphasis will be not only on the economic effects on business, but on the economics of selecting and evolving the method of control.]

## ECON 756 Noncooperative Game Theory

Fall. 4 credits. Prerequisites: ECON 609-610 and 619.

This course surveys equilibrium concepts for noncooperative games. We cover Nash equilibrium and a variety of equilibrium refinements, including perfect equilibrium, proper equilibrium, sequential equilibrium and more! We pay attention to important special classes of games, including bargaining games, signalling games, and games of incomplete information. Most of our analysis is from the strict decision-theoretic point of view, but we also survey some models of bounded rationality in games, including games played by automata.

#### ECON 757 Economics of Imperfect Information

Spring, 4 credits. Prerequisites: ECON 609-610 and 619.

The purpose of this course is to consider some major topics in the economics of uncertain information. Although the precise topics considered vary from year to year, subjects such as markets with asymmetric information, signalling theory, sequential choice theory, and record theory are discussed.

#### ECON 758 Psychology and Economic Theory

Fall, spring. 4 credits. Prerequisites: grad core or instructors permission. This course explores the ways in which insights from psychology can be integrated into economic theory. Evidence is presented on how human behavior systematically departs from the standard assumptions of Economics and how this can be incorporated into modeling techniques.

## ECON 760 Topics in Political Economy

Fall. 4 credits. Prerequisite: Economics graduate core or instructor's permission. This course develops critiques and extensions of economic theory, taking into account the political and social moorings of economic activity and equilibria. The formation and persistence of social norms; the meaning and emergence of property rights; the role of policy advice in influencing economic outcomes: and the effect of political power and ideology on economic variables are studied. While these topics were popular in the classic works of political economy, recent advances in game theory and, more generally, game-theoretic thinking allows us to approach these topics from a new perspective. Hence, the course begins by devoting some lectures to elementary ideas in game-theory and strategic analysis.

#### ECON 761 International Economics: Trade Theory and Policy

Fall. 4 credits. Prerequisites: ECON 609, 610.

This course surveys the sources of comparative advantage. It analyzes simple general equilibrium models to illustrate the direction, volume, and welfare effects of trade. Topics in game theory and econometrics as applied to international economics may be covered.

#### ECON 762 International Economics: International Finance and Open Economy Macroeconomics

Spring, 4 credits. Prerequisite: ECON 761. This course surveys the determination of exchange rates and theories of balance of payment adjustments. It explores open economy macroeconomics by analyzing models of monetary economies. Topics in monetary economics and econometrics as applied to international economics are covered.

#### [ECON 770 Topics in Economic Development

Not offered 2002–2003. For description, see AEM 667.]

#### ECON 771 Empirical Methods for the Analysis of Household Survey Data: Applications to Nutrition, Health, and Poverty

Spring. 4 credits. Prerequisites: ECON grad core.

This course is focused on empirical methods for the analysis of household survey data. It explores the hands-on use of such data to address policies issues related to welfare outcomes, particularly nutrition, health, education, and poverty. The course covers empirical methods as they apply to a series of measurement and modeling issues, as well as the valuation of interventions. While we briefly review underlying theory, the course attempts to bridge the gap between theory and practice, addressing issues such as model identification, functional form, estimation techniques to control for endogeneity and heterogeneity, and so forth. The course grade is based primarily on two empirical exercises, and related write-up, as well as class participation. Students are given actual household data sets and software with which to conduct exercises. These data enable students to apply analytical techniques discussed. Data sets are provided from African, Asian, and Latin American countries.

### ECON 772 Economics of Development

Spring, 4 credits. Prerequisites: first-year graduate economic theory and econometrics.

Analytical approaches to the economic problems of developing nations. Topics to be covered include: some old and new directions in development economics thinking, the welfare economics of poverty and inequality, empirical evidence on who benefits from economic development, labor market models, project analysis with application to the economics of education, and development policy.

#### ECON 773 Economic Development

Fall. 4 credits. Prerequisites: ECON 609 and 620.

The course is concerned with theoretical and applied works that seek to explain economic development, or lack thereof, in countries at low-income levels. Specific topics vary each semester.

## ECON 774 Economic Systems

Spring. 4 credits.

The course deals with economic systems, formerly centrally planned economies, and economies in transition.

#### ECON 784 Seminars in Advanced Economics

Fall and spring. 4 credits.

## ENGLISH

L. Brown, chair; B. Correll, director of undergraduate studies (255-3492); R. Gilbert, director of graduate studies (255-7989); H. S. McMillin, director of honors program; J. Adams, A. Boehm, F. Bishop, J. Blackall, A. Caputi, D. Eddy, R. Elias, M. Jacobus, A. Lurie, P. Marcus, J. McConkey, D. Mermin, S. Parrish, M. Radzinowicz, E. Rosenberg, S. C. Strout.

The Department of English offers a wide range of courses in English, American, and Anglophone literature as well as in creative writing, expository writing, and film analysis. Literature courses focus variously on close reading of texts, study of particular authors and genres, questions of critical theory and method, and the relationship of literary works to their historical contexts and to other disciplines. Writing courses typically employ the workshop method in which students develop their skills by responding to the criticism of their work by their classmates as well as their instructors. Many students supplement their formal course work in English by attending public lectures and poetry readings sponsored by the department or by writing for campus literary magazines. The department seeks not only to foster critical analysis and lucid writing but also to teach students to think about the nature of language and to be alert to both the rigors and the pleasures of reading texts of many sorts.

#### **First-Year Writing Seminars**

As part of the university-wide First-Year Writing Seminars program administered by the John S. Knight Institute for Writing in the Disciplines, the department offers many onesemester courses dealing with various forms of writing (e.g. narrative, autobiographical, and expository), with the study of specific areas in English and American literature, and with the relation of literature to culture. Students may apply any of these courses to their First-Year Writing Seminar requirement. Detailed course descriptions may be found in the First-Year Writing Seminars program listings, available from college registrars in August for the fall term and in November for the spring term.

Freshmen interested in majoring in English are encouraged to take at least one of the department's 200-level First-Year Writing Seminars: "The Reading of Fiction" (ENGL 270), "The Reading of Poetry" (ENGL 271), and "Introduction to Drama" (ENGL 272). These courses are open to all second-term freshmen. They are also open, as space permits, to first-term freshmen with scores of 700 or above on the CEEB College Placement Tests in English composition or literature, or 4 or 5 on the CEEB Advanced Placement Examination in English, as well as to students who have completed another First-Year Writing Seminar.

#### **Courses for Nonmajors**

For students majoring in fields other than English, the department provides a variety of courses at all levels. A number of courses at the 200 level are open to qualified freshmen, and all are open to sophomores. Courses at the 300 level are open to all sophomores, juniors, and seniors; they are also open to freshmen who have received the instructor's prior permission. The suitability of courses at the 400 level for nonmajors depends in part on the course topics, which are subject to change from year to year. Permission of the instructor is sometimes required; prior consultation is always in order and strongly advised.

#### The Major in English

Students who major in English develop their own programs of study in consultation with their major advisers. Some choose to focus on a particular historical period or literary genre or to combine sustained work in creative writing with the study of literature. Others pursue interests in such areas as women's literature, African-American literature, literature and the visual arts, or critical theory.

The department recommends that students prepare themselves for the English major by taking one or more of its preparatory courses, such as "The Reading of Fiction" (ENGL 270), "The Reading of Poetry" (ENGL 271), or

"Introduction to Drama" (ENGL 272). (The "ENGL" prefix identifies courses sponsored by the Department of English, all of which appear in the English section of Courses of Study or the department's supplementary lists of courses; it also identifies courses sponsored and taught by other academic units and crosslisted with English.) These courses concentrate on the skills basic to the English major and to much other academic work-responsive, sensitive reading and lucid, strong writing. As First-Year Writing Seminars, any one of them will satisfy one-half the College of Arts and Science's First-Year writing requirement. ENGL 280, 281, 288, and 289 are also suitable preparations for the major and are open to students who have completed their First-Year Writing Seminar requirement. ENGL 201 and 202, which together constitute a two-semester survey of major British writers, though not required are strongly recommended for majors and prospective majors. ENGL 201 and 202 (unlike ENGL 280, 281, 288, and 289) are also "approved for the major" in the special sense of that phrase explained below

To graduate with a major in English, a student must complete with passing letter grades 10 courses (40 credit hours) approved for the English major. All ENGL courses numbered 300 and above are approved for the major. In addition, with the exception of First-Year Writing Seminars (ENGL 270, 271, and 272), 200-level courses in creative and expository writing (ENGL 280, 281, 288, and 289), and courses designated for nonmajors, all 200-level ENGL courses are also approved for the major. Courses used to meet requirements for the English major may also be used to meet the "Humanities and the Arts" distribution requirement of the College of Arts and Sciences. Many of these courses may be used to meet the college's "historical breadth" requirement as well.

Of the 40 credits required to complete the major, 8 credits (two courses) must be at the 400 level or above; 12 credits (three courses) must be from courses in which 50 percent or more of the material consists of literature originally written in English before 1800; and another 12 credits (three courses) must form an intellectually coherent "concentration." The 400-level and pre-1800 requirements may be satisfied only with ENGL courses, and ENGL 493-494, the Honors Essay Tutorial, may not be used to satisfy either one. Courses that satisfy the pre-1800 requirement are so designated in Courses of Study. Many English majors use ENGL 201 to begin meeting this requirement since it provides an overview of earlier periods of British literature and so enables them to make more informed choices of additional pre-1800 courses. ENGL 202, however, does not qualify as a pre-1800 course. Neither do courses offered by other departments unless they are cross-listed with English. Although advanced courses in foreign literature read in the original languages may not be used to fulfill the pre-1800 requirement, they may be used for English major credit provided they are included within the 12-credit limit described below. The threecourse concentration requirement may be satisfied with any courses approved for the major. The department's "Guide to the English Major" contains suggested areas of concentration and lists of courses that fall within the areas proposed, but majors are expected to define their own concentrations in consultation with their advisers.

As many as 12 credits in courses offered by departments and programs other than English may under certain conditions be used to satisfy English major requirements. Courses in literature and creative writing offered by academic units representing neighboring or allied disciplines (German Studies, Romance Studies, Russian, Asian Studies, Classics, Comparative Literature, Africana Studies, the Society for the Humanities, American Studies, Women's Studies, Religious Studies, Asian American Studies, Latino Studies, and Theatre, Film, & Dance) are routinely counted toward the 40 hours of major credit provided they are appropriate for juniors or seniors, as are most courses at the 300 level and above. English majors who are double majors may exercise this option even if all 12 credits are applied to their second major. All English majors are urged to take courses in which they read foreign works of literature in the original language, and for that reason 200-level literature courses for which qualification is a prerequisite (as well as more advanced foreign literature courses taught in the original language) may be counted toward the English major. Credit from other non-ENGL courses may be included within the 12 credits of nondepartmental courses approved for the major only when the student is able to demonstrate to the adviser's satisfaction their relevance to his or her individual program of study.

#### The Major in English with Honors

Second-term sophomores who have done superior work in English and related subjects are encouraged to seek admission to the department's program leading to the degree of Bachelor of Arts with Honors in English. Following an interview with the chair of the Honors Committee, qualified students will be admitted provisionally to the program. During their junior year these students must complete at least one Honors Seminar (ENGL 491 or 492); they are encouraged to take an additional 400-level English course in the field in which they plan to concentrate. On the basis of work in these and other English courses, a provisional Honors candidate is expected to select a thesis topic and secure a thesis adviser by the end of the junior year. A student who has been accepted by a thesis adviser becomes a candidate for Honors rather than a provisional candidate.

During the senior year, each candidate for Honors in English enrolls in a year-long tutorial (ENGL 493–494) with the faculty member who has agreed to serve as the student's thesis adviser. The year's work culminates in the submission of a substantial scholarly or critical essay to be judged by at least two members of the faculty. More information about the Honors Program may be found in a leaflet available in the English offices.

## First-Year Writing Seminars Recommended for Prospective Majors

#### ENGL 270 The Reading of Fiction

Fall, spring, summer. 3 credits. Each section limited to 17 students. Recom-

mended for prospective majors in English. This course examines modern fiction, with an emphasis on the short story and novella. Students write critical essays on authors who flourished between 1870 and the present, such as James, Joyce, Woolf, Hurston, Lawrence, Fitzgerald, Hemingway, Faulkner, Rhys, Welty, Salinger, and Morrison. Reading lists vary from section to section, and some may include a novel, but close, attentive, imaginative reading and writing are central to all. *This course does not satisfy requirements for the English major*.

#### ENGL 271 The Reading of Poetry

Fall, spring. 3 credits. Each section limited to 17 students. Recommended for

prospective majors in English. How can we become more appreciative, alert readers of poetry, and at the same time better writers of prose? This course attends to the rich variety of poems written in English, drawing on the works of poets from William Shakespeare to Sylvia Plath, John Keats to Li-Young Lee, Emily Dickinson to A. R. Ammons. We may read songs, sonnets, odes, villanelles, even limericks. By engaging in thorough discussions and varied writing assignments, we explore some of the major periods, modes, and genres of English poetry, and in the process expand the possibilities of

## requirements for the English major. ENGL 272 Introduction to Drama

our own writing. This course does not satisfy

Fall, spring. 3 credits. Each section limited to 17 students. Recommended for prospective majors in English. *This course does not satisfy requirements for the English major*.

Students in this seminar study plays, older and newer, in a variety of dramatic idioms and cultural traditions. Plays being performed by the theatre department will be included, if possible. A typical reading list might include works by Sophocles, Shakespeare, Chekhov, Brecht, Miller, Beckett, and Shange. Course work consists of writing and discussion and the occasional viewing of live or filmed performances.

## **Expository Writing**

- ENGL 288-289 Expository Writing (IV)
  - Fall, spring, summer, winter. 3 credits. Each section limited to 16 students. Students must have completed their colleges' first-year writing requirements or have the permission of the instructor. S. Davis and staff.

ENGL 288-289 offers guidance and an audience for students who wish to gain skill in expository writing. Each section provides a context for writing defined by a form of exposition, a disciplinary area, a practice, or a topic intimately related to the written medium. Course members read in relevant published material and write and revise their own work regularly, while reviewing and responding to each other's. Since these seminar-sized courses depend on members' full participation, regular attendance and submission of written work are required. Students and instructors confer individually throughout the term. For more information please see the following web site: http/

instruct1.cit.cornell.edu/Courses/engl288-89/.

Topics for fall sections include:

Section 1—S. Serrell—The "I" in Nature

Section 2-R. Roensch-The Essay: Personal to Public

Section 3—C. Harwood--Free Speech under the First Amendment

Section 4—B. LeGendre—Issues and Audiences

Section 5-S. Davis-Making the News

See English department Course Offerings for full fall and spring section descriptions.

This course does not satisfy requirements for the English major.

[ENGL 381 Reading as Writing (IV) Next offered 2003-2004.]

[ENGL 386 Philosophic Fictions (IV) Next offered 2003-2004.]

[ENGL 387 Autobiography: Theory and Practice (IV) 4 credits. Next offered 2003-2004.]

## ENGL 388 The Art of the Essay (IV)

Fall, 4 credits. Limited to 15 students. Interested students should submit one or more pieces of recent writing (prose) to the instructor before the beginning of the term, preferably at preregistration. L. Fakundiny.

For both English majors and nonmajors who have done distinguished work in first-year writing seminars and in such courses as ENGL 280-281 and 288-289, and who desire intensive practice in writing essays as a kind of creative nonfiction. The course assumes a high degree of self-motivation, a capacity for independent work, and critical interest in the work of other writers; it aims for a portfolio of conceptually rich and stylistically polished writing.

## **Creative Writing**

Students usually begin their work in Creative Writing with ENGL 280 or 281, and only after completion of the First-Year Writing Seminar requirement. Please note that either ENGL 280 or ENGL 281 is the recommended prerequisite for 300-level creative writing courses. ENGL 280 and 281 may satisfy a distribution requirement in your college (please check with your college adviser). ENGL 382-383, 384-385, and 480-481 are approved for the English major.

#### ENGL 280-281 Creative Writing (IV) Fall, spring, summer, winter. 3 credits. Prerequisites: completion of the Freshman Seminar requirement. Limited to 18 students

Majors and prospective majors, please note. Although recommended for prospective English majors, ENGL 280-281 cannot be counted towards the 40 credits required for completion of the English major. It is a prerequisite for 300-level courses in creative writing, which count towards the major. ENGL 280 is not a prerequisite for ENGL 281.

An introductory course in the theory, practice, and reading of prose, poetry, and allied forms. Students are given the opportunity to try both prose and verse writing and may specialize in one or the other. Many of the class meetings are conducted as workshops.

ENGL 382–383 Narrative Writing (IV) Fall, 382; spring, 383. 4 credits each term. Each section limited to 15 students. Previous enrollment in ENGL 280 or 281 recommended. Prerequisite: permission of instructor, normally on the basis of a manuscript. Fall: Sec. 1, R. Morgan; sec. 2, M. McCoy; sec. 3, H. Viramontes. Spring: H. Viramontes, M. Koch, M. McCoy. The writing of fiction; study of models;

analysis of students' work.

## ENGL 384-385 Verse Writing (IV)

Fall or summer, 384; spring, 385. 4 credits each term. Each section limited to 15 students. Prerequisites: ENGL 280 or 281. or permission of instructor. Fall: A. Fulton, K. McClane, Spring: K. McClane, staff.

The writing of poetry; study of models; analysis of students' poems; personal conferences.

ENGL 480-481 Seminar in Writing (IV) Fall, 480; spring 481. 4 credits each term. Each section limited to 15 students. Prerequisite: permission of instructor, normally on the basis of a manuscript. The manuscript should be submitted to the instructor no later than the first day of class. Previous enrollment in ENGL 280 or 281 and at least one 300-level writing course recommended. Successful completion of one half of the 480-481 sequence does not guarantee enrollment in the other half; students must receive permission of the instructor to enroll in the second course. Fall: Sec. 1, P. Janowitz, sec. 2, R. Morgan. Spring: L. Herrin, M. McCov

Intended for those writers who have already gained a basic mastery of technique. Although ENGL 480 is not a prerequisite for ENGL 481, students normally enroll for both terms and should be capable of a major project-a collection of stories or poems, a group of personal essays, or perhaps a novel-to be completed by the end of the second semester. Seminars are used for discussion of the students' manuscripts and published works that individual members have found of exceptional value.

#### **Courses for Freshmen and Sophomores**

These courses have no prerequisites and are open to freshmen and nonmajors as well as majors and prospective majors.

#### Introductions to Literary Studies

#### ENGL 201-202 The English Literary Tradition # (IV)

201: fall. 4 credits. ENGL 201 is not a prerequisite for 202. This course may be used as one of the three pre-1800 courses required of English majors. D. Fried. An introduction to the study of English literature, examining its historical development and some of its achievements from its beginnings in the 8th century through the 17th century. Some of the works we read, discuss, and write about across this thousand-year span are Beowulf; Sir Gawain and the Green Knight; selections from Chaucer's Canterbury Tales and Spenser's Faerie Queene; Shakespeare's sonnets and King Lear, poems by Sidney, Jonson, Donne, Herbert, Herrick, and Marvell; and selections from Milton's Paradise Lost. Emphasis will be on the close analysis of individual works, and on questions of language and literary form. Lectures twice a week, plus small weekly discussion sections.

202: spring. 4 credits. D. Fried. An introductory survey of English literature from the late seventeenth century to the start of the twentieth century. We begin with the satires of the Restoration and eighteenth century (Pope, The Rape of the Lock; Swift, Gulliver's Travels; Johnson's poems and essays), move to the poetry of the Romantic era (Blake's illuminated books Songs of

Innocence and Songs of Experience); prose selections and poems by Wordsworth, Coleridge, Shelley, and Keats, and a novel by Jane Austen (Persuasion), and end with dramatic monologues and other lyrics from the Victorian era (Tennyson, Browning, Amold, Hopkins), plus one play (Wilde, The Importance of Being Earnest). Lectures are supplemented by small discussion groups once a week. Short creative exercises will introduce techniques of close reading and approaches to literary language and style.

## ENGL 207 Introduction to Modern **Poetry (IV)** Fall. 4 credits. No prior study of poetry

necessary. D. Mao.

An introduction to the exhilaratingly diverse forms, purposes, and themes of poetry of the last hundred years. The course focuses on about a dozen U. S. and British poets, chosen not only for the ways in which they enlarged the formal possibilities of verse but also for the subtlety or bravura with which they evoke the anxiety, perversity, joy, and complexity of modern life. Key developments in non-English-language poetry also receive some attention, as do precursors and polemics of modernism, questions of avant-gardism and tradition in other genres and arts, and the changing role of poetry in the age of radio, film, television, and internet. Assignments include exercises in the writing of poetry and analyses of poets' specific dictional, metrical, and syntactic choices, as well as broader interpretive essays. Focal poets may include William Carlos Williams, T. S. Eliot, Gertrude Stein, Marianne Moore, Langston Hughes, W. H. Auden, Dylan Thomas, Elizabeth Bishop, Frank O'Hara, Susan Howe, Don Paterson, and Louise Gluck.

ENGL 227 Shakespeare # (IV)

Spring, summer, and winter. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. W. Wetherbee.

Careful study of 10 of Shakespeare's major plays.

#### **Major Genres and Areas**

[ENGL 203 Major Poets (IV) Next offered 2003-2004.]

#### [ENGL 209 Introduction to Cultural Studies (IV)

4 credits. Next offered 2003-2004.]

#### ENGL 251 Twentieth-Century Women Novelists (also WOMNS 251) (IV)

Fall. 4 credits. E. DeLoughrey. This course will be particularly concerned with questions about women's experience and perspective and will explore intersections of gender, ethnicity, race, sexuality, and other vectors of identity. Readings might include novels by Jamaica Kincaid, Dorothy Allison, Louise Erdrich, Toni Morrison, Helena María Viramontes, Fae Ng, Cristina Garcia, and others. Assignments include two papers, a research project, and a number of short inclass writings.

#### ENGL 255 African Literature @ (IV) Fall. 4 credts. B. Jeyifo.

An introduction to major African writers and literary traditions. Authors to be studied may include Wole Soyinka, Chinua Achebe, Bessie Head, Ayi Kwei Armah, Ama Ata Aidoo, Tayeb Salih, and Ousmane Sembene.

#### ENGL 262 Asian American Literature (also AAS 262 and AM ST 262) (IV)

Spring. 4 credits. S. Wong. This course introduces both a variety of writings by Asian North American authors and some critical issues concerning the production and reception of Asian American texts. Working primarily with novels, we ask questions about the relation between literary forms and the sociohistorical context within which they take on their meanings, and about the historical formation of Asian American identities.

#### ENGL 274 Scottish Literature and Culture # (IV)

Fall. 3 or 4 credits. The course may be taken for 3 or 4 credits; those taking it for 4 credits will complete an additional writing project. If taken for four credits, it counts toward the English major, but non-majors are welcome. This course may be used as one of the three pre-1800 courses required of English majors. T. Hill and H. Shaw.

Scotland was an independent kingdom during most of its history. Although it is now politically united with England, it preserves a cultural distinctiveness. This course provides an introduction to Scottish literature and its cultural context. We will focus on important Scottish literary texts, with special emphasis on the medieval period and the eighteenth through the twentieth centuries. The course should appeal to those who wish to learn more about their Scottish heritage, to those who wish to view in a new perspective works normally considered monuments of "English" literature, and to those who simply wish to know more about a remarkable culture and the literature it produced. Some of the texts are read in Scots, but no familiarity with Scots or earlier English is presumed. Authors studied include Henryson, Dunbar, Anonymous (the Scottish Ballads), Hume, Burns, Scott, Stevenson, Grassic Gibbon, Spark, and some twentieth-century writers of short stories. Students will view the film, The Prime of Miss Iean Brodie.

#### ENGL 275 The American Literary Tradition (also AM ST 275) (IV)

Fall. 4 credits. N. Waligora-Davis. The problem of an American national literature is explored through the reading, discussion, and close analysis of texts across the range of American literary history. Not a survey, this course focuses on the relations of the texts to each other, the shaping of national identities in those relationships, and the assumptions about history, language, and the self that underlie them.

#### ENGL 276 Desire (also COM L 276, WOMNS 276) (IV) Spring. 4 credits. E. Hanson.

Spring. 4 credits. E. Hanson. Sexuality is a series of scripted performances, a set of stories we tell ourselves about ourselves. Through a critical discussion of "these pleasures which we lightly call physical," to borrow a phrase from the French novelist Colette, we might discover a deeper appreciation for the strange narrative of someone else's sexual desire, and perhaps even the strange narrative of our own. We begin with the theory that sexual desire has a history, even a literary history, and we examine classic texts in some of its most influential modes: Platonic, Christian, romantic, decadent, psychoanalytic, feminist, and queer. This course is an introductory survey of dramatic literature from Ancient Greece to the present, from Plato and William Shakespeare to Caryl Churchill and Tony Kushner; and it is also a survey of the most influential trends in modern sexual theory and sexual politics, including the work of Freud, Foucault, and various feminists and queer theorists. Topics for discussion include Greek pederasty, sublimation, hysteria, sadomasochism, homosexuality, pornography, cybersex, feminism, and other literary and performative pleasures, and the focus is always on expanding our critical vocabulary for considering sex and sexual desire as a field of intellectual inquiry.

## [ENGL 278 Queer Fiction (also WOMNS

**278) (IV)** 4 credits. Next offered 2003–2004.]

#### ENGL 279 Introduction to Lesbian Fiction (also WOMNS 280) (IV)

Fall. 4 credits. K. McCullough. This course tracks the modern lesbian in American and British literature, from her early appearances in the nineteenth century as monster or invert through her twentiethcentury reappearance in fiction by selfidentified lesbian authors. We begin by querying the category of "lesbian fiction, asking what exactly constitutes lesbian fiction and examining a variety of answers posited by literary critics. We then explore, among other things, the relationship between historical context and representational possibilities, the constraining or enabling impact of "community," the class and racial inflections of "lesbian" identity, and, last but not least, the benefits and dangers (for a marginalized group) of being put into/reclaiming a representational space. Authors under consideration may include Dorothy Allison, June Arnold, Marusya Bociurkiw, Beth Brant, Michelle Cliff, Terri de la Peña, Leslie Feinberg, Jewelle Gomez, Radclyffe Hall. Audre Lorde, Achy Obejas, and Jeanette Winterson, among others.

[ENGL 295 The Essay in English # (IV) 4 credits. Prerequisite: completion of the First-Year Writing Seminar requirement. This course may be used as one of the three pre-1800 courses required of English majors. Next offered 2003–2004. L. Fakundiny.]

#### **Special Topics**

# ENGL 210 Medieval Romance: Voyage to the Otherworld # (IV)

Spring. 3 credits. This course may not be used as one of the three pre-1800 courses required of English majors. T. Hill. The course surveys some medieval narratives concerned with representative voyages to the otherworld or with the impinging of the otherworld upon ordinary experience. The syllabus normally includes some representative Old Irish otherworld literature: selections from The Mabinogion; selections from the Lays of Marie de France: Chretian de Trove's Erec, Yvain, and Lancelot; and the Middle English Sir Gawain and the Green Knight. We finish by looking at a few later otherworld romances, such as selections from J.R.R. Tolkein. All readings are in modern English. Requirements: three brief (two to three typed pages) papers and a final exam designed to test the students' reading.

#### ENGL 217 History of the English Language (also LING 217) (III or IV)

Fall. 4 credits. W. Harbert. See LING 217 for full course description.

## [ENGL 220 The Idea of the Pet in

**Literature and History (IV)** Spring. 4 credits. Enrollment is limited to 15 students. While not restricted to sophomores this course is intended to offer sophomores especially an opportunity to work closely with faculty in a seminar environment within a strong interdisciplinary context. Next offered 2003–2004. L. Brown.]

#### [ENGL 221 The Ethics of Imagining the Holocaust (IV)

Fall. 4 credits. Enrollment is limited to 15 students. While not restricted to sophomores this course is intended to offer sophomores especially an opportunity to work closely with faculty in a seminar environment within a strong interdisciplinary context. Next offered 2003–2004. D. Schwarz.]

#### ENGL 235 Rewriting the Classics; Stories of Travels and Encounters (also WOMNS 235) (IV)

Fall. 4 credits. E. DeLoughrey. This course examines the way particular narratives travel across time and space. We read canonical works of literature produced during the era of the British empire, such as The Tempest, Robinson Crusoe, Jane Eyre, and Heart of Darkness and position them in relation to novels that rewrite, contest, and mitigate the depiction of contact between Europeans and others. We not only interrogate the relationship between writers from the colonies (in Africa, India, and the Caribbean) and those from Great Britain, but also examine the ways in which these British texts were revisions of earlier travel narratives and legends. Requirements: active class participation, student presentations, a few short essays and a final paper.

#### [ENGL 263 Interpreting Hitchcock (also THETR 263) (IV)

Spring. 4 credits. Lab fee. Enrollment limited to 20. Next offered 2003–2004. L. Bogel.]

#### [ENGL 268 Politics and Culture in the 1960s (also AM ST 268) (IV) Spring. 4 credits. Next offered 2003–2004.

Spring. 4 credits. Next offered 2003–2004. P. Sawyer.]

#### ENGL 273 Children's Literature (IV) Fall. 4 credits. J. Adams.

An historical study of children's literature from the seventeenth century to the present, principally in Europe and America, which explores changing literary forms in relation to the social history of childhood. Ranging from oral folktale to contemporary novelistic realism (with some glances at film narrative), major figures may include Perrault, Newbery, the Grimms, Andersen, Carroll, Alcott, Stevenson, Burnett, Kipling, the Disney studio, E. B. White, C. S. Lewis, Sendak, Silverstein, Mildred Taylor, and Bette Greene. We also encounter a variety of critical modelspsychoanalytic, materialist, feminist, structuralist-that scholars have employed to explain the variety and importance of children's literature

#### [ENGL 291 The American 1920s: Literature and Culture (also AM ST 291) (IV)

4 credits. Next offered 2003–2004. B. Maxwell.]

#### ENGL 292 Introduction to Visual Studies (IV)

Spring. 4 credits. T. Murray. See VSST 200 for full course description.

#### ENGL 296 Linguistic Theory and Poetic Structure (also ENGL 585 and LING 285/585) (III or IV)

Fall. 4 credits. J. Bowers. See LING 585 for full course description.

#### Courses for Sophomores, Juniors, and Seniors

Courses at the 300 level are open to sophomores, juniors, and seniors and to others with the permission of the instructor.

#### ENGL 302 Literature and Theory (also ENGL 602 and COM L 302 and 622) (IV)

Fail. 4 credits. J. Culler.

Study of issues in contemporary theoretical debates, with particular attention to structuralism, deconstruction, psychoanalysis, and feminism. Readings by Roland Barthes, Judith Butler, Jacques Derrida, Michel Foucault, Barbara Johnson, Jacques Lacan, and others. No previous knowledge of literary theory is assumed.

## [ENGL 308 Icelandic Family Saga # (IV)

Fall. 4 credits. This course may **not** be used as one of the three pre-1800 courses required of all English majors. Next offered 2003–2004. T. Hill.]

# ENGL 310 Old English in Translation # (IV)

Fall. 4 credits. T. Hill.

This course may be used as one of the three pre-1800 courses required of English majors. Cultural backgrounds, reading, and critical analysis of Anglo-Saxon poetry in translation, pagan and Christian epic, elegy, heroic legend, and other forms. Attention is given to the relations of this literature to that of later periods.

#### ENGL 311 Old English (also ENGL 611) # (IV)

Fall. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. T. Hill.

This course provides a grounding in the Old English language, which precedes the reading of some major texts in poetry, such as *The Wanderer* and The *Battle of Maldon*. No previous knowledge of Old or Middle English is required or expected. There is both a midterm and a final, plus oral reports. Students are encouraged to follow their own interests. Graduate students are expected to do a substantial paper, or other research exercise.

# ENGL 312 Beowulf (also ENGL 612) # (IV)

Spring. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. R. Farrell.

A close reading of *Beowulf*. Attention is given to relevant literary, cultural, and linguistic issues. One semester's study of Old English, or the equivalent, is recommended.

#### ENGL 313 The Structure of English (also LING 311) (III or IV) Fall. 4 credits. M. Suner.

See LING 313 for full course description.

## ENGL 319 Chaucer # (IV)

Fall. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. R. Farrell. This course will begin with the study of the major Canterbury Tales and some of Chaucer's minor works, such as The Book of the Duchess. If time permits, we will read at least part of his great epic romance Troilus and Criseyde. All works will be read in Middle English, but ample time will be devoted to learning the language, for it is impossible to read Chaucer as a poet without Middle English. There will be lectures on Chaucer's life and society and his literary and religious content. There will be take-home, mid-, and end-of-term exams and student presentations.

#### [ENGL 321 Spenser and Malory (also RELST 319) # (IV) Spring. 4 credits. This course may be used

Spring. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. Informal lecture and discussion. Two papers, no exams. Next offered 2003–2004. C. Kaske.]

#### ENGL 325 Culture of the Renaissance (also COM L 362, HIST 364, RELST 362, MUSIC 390, ARTH 351) # (III or IV)

Fall. 4 credits. C. Kaske, K. Perry Long. For course description, see COML 362.

#### [ENGL 327 Shakespeare: Gender and Power (also WOMNS 327) # (IV)

4 credits. This course may be used as one of the three pre-1800 courses required of English majors. Next offered 2003–2004.]

## ENGL 328 The Bible as Literature # (IV)

Spring. 4 credits. L. Donaldson. This course provides students with an introduction to the Bible, one of English literature's most important influences, and approaches it as an anthology of literary and religious genres, themes and issues in both the Hebrew and Christian testaments. In addition to narrative, legal, historical, apocalyptic and prophetic texts, we also examine biblical poetry (for example, the Song of Songs) and its relation to other ancient poetic forms. Students are also introduced to various critical approaches to reading the Bible such as narrative, feminist, rhetorical, and ideological criticism. Other topics covered include the historical contexts of various biblical texts and the trajectory of powerful prophetic, narrative, and apocalyptic images within the literary imagination of various cultures.

#### [ENGL 329 Milton # (IV)

Fall. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. Next offered 2003–2004.]

#### ENGL 330 Restoration and Eighteenth-Century Literature # (IV)

Spring. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. F. Bogel.

Close reading of texts in a variety of genres (poetry, fiction, drama, autobiography) will be guided by such topics as: the nature of satire, irony, and mock-forms; the languages of the ridiculous and the sublime; the politics of gender and sexuality; the authority and fallibility of human knowledge; connections among melancholy, madness, and imagination. Works by such writers as Rochester, Behn, Finch, Dryden, Swift, Gay, Defoe, Johnson, Boswell, Sterne, and Cowper.

#### ENGL 333 The Eighteenth-Century English Novel # (IV)

Fall. 4 credits. This course may be used as one of the three pre-1800 courses required of English motors. N. Secondardo

of English majors. N. Saccamano. A study of form and theme in the British novel tradition. The course focuses on representative novels mostly from the eighteenth century, paying close attention to language and structure but also to cultural contexts and to the development of the novel form itself. We explore such topics as truth and fiction; romance, realism, satire, and the gothic; heroic and mock-heroic modes; sentiment, sensibility, and sexuality; race and gender; and the forms and uses of narrative. Readings may include Behn's Oroonoko, Defoe's Moll Flanders, Richardson's Clarissa, Fielding's Tom Jones, Johnson's Rasselas, Sterne's A Sentimental Journey, and Austen's Emma.

## ENGL 345 Victorian Controversies # (IV)

Fall. 4 credits. S. Siegel. Economic, political, and technological changes transformed the nineteenth century. We consider some of the controversies these transformations provoked in England and Ireland. Our readings are selected chiefly from leading nineteenth-century periodicals and from essays that contributed greatly to shaping public opinion. We explore the social problems Victorian critics and artists identified, the various solutions they proposed, and their contrasting visions of their nation and its colonies. The men and women who contributed to the periodical press and who anticipated new cultural forms were preoccupied with urgent questions about themselves: Was their century marked by progress or by decline? Would machines degrade or ennoble workers? Did aesthetic experience complement or compete with religious doctrine? Were art and science dependent upon or opposed to each other? Should all forms of expression be permitted or should certain forms be censored? Should the colonies be permitted to rule themselves or remain dependent on England? Would prestige be gained if institutions of higher learning awarded degrees to women? Was "manliness" revealed through "character" or through "behavior"? In addition to these intellectual conflicts we are attentive to the emergence of new visual forms that participated in and provoked controversy. Accordingly, we view photographs and descriptions of England's great Crystal Palace Exhibition of 1851, the objections such displays aroused, as well as the emergence of new and controversial fashions in painting, in clothing, in interior design, and in home furnishings. Authors include Arnold, Browning, Eliot, Morris, Pater, the Rossettis, Ruskin, Shaw, Swinburne, Wilde, and Yeats. Classes are by lecture and discussion. Examinations include in-class and take home exercises.

#### ENGL 348 Studies in Women's Fiction: Louise Erdrich and Leslie Marmon Silko (also WOMNS 348) (IV)

Spring. 4 credits. L. Donaldson. Louise Erdrich (Ojibwa) and Leslie Marmon Silko (Laguna Pueblo) are two of the most important and popular writers of the past 25 years. Each has privileged the novel as their artistic form of choice—although both are also

talented poets---and each has developed a powerful tradition of resistance literature. In their own distinct styles, each addresses such issues as the conquest of the Americas, the role of women and women's cultural production in indigenous and Euro-American societies, the relation between history and art, and the survival of American Indian traditions. This course spends half the semester on Erdrich and half on Silko. We read their fiction and some of their poetry as well as their autobiographical and critical writings. Texts include Tracks, The Last Report of Miracle at Little No Horse, Jacklight, and The Birchbark House by Louise Erdrich, and Sacred Water, Storyteller, Almanac of the Dead, and Yellow Woman: A Beauty of Spirit by Leslie Marmon Silko. Students write a paper on each author and the class is conducted seminar-style.

#### [ENGL 350 The Modern Tradition I: 1890-1930 (IV)

4 credits. Next offered 2003-2004. D. Schwarz.]

#### ENGL 353 The Modern Indian Novel @ (IV)

Spring. 4 credits. S. Mohanty.

A survey of the modern Indian novel, from its origins in the latter part of the 19th century to the present. An attempt is made to read the novels as responses to colonialism and to the challenges of a postcolonial society. Texts (mainly novels, but also a few short stories) are drawn from a variety of Indian languages as well as English, including works by such authors as U. R. Ananthamurthy, Rabindranath Tagore, Salman Rushdie, Gopinath Mohanty, Anita Desai, Fakir Mohan Senapati, Ambai, Prem Chand, Arundhati Roy, and R. K. Narayan. Two papers (5-6 pp. and 12-14 pp.) and a journal.

#### ENGL 355 Decadence (also COML 355 and WOMNS 355) (IV)

Fall. 4 credits. E. Hanson.

"My existence is a scandal," Oscar Wilde once wrote, summing up in an epigram the effect of his carefully cultivated style of perversity and paradox. Through their valorization of aestheticism and all that was considered artificial, unnatural, or perverse, the so-called "decadent" writers of the late-nineteenth century sought to free the pleasures of beauty, spirituality, and sexual desire from their more conventional ethical moorings. We discuss the most important texts through which "decadence" was defined as a literary style, including works by Charles Baudelaire, J.-K. Huysmans, Leopold von Sacher-Masoch, A. C. Swinburne, and Walter Pater, with a particular focus on Oscar Wilde. Topics for discussion include aestheticism and the cult of "art for art's sake," theories of cultural and linguistic degeneration, homophobia and sexual encoding, androgyny and sexual inversion, hysteria and paranoia, masochism and mysticism, chastity and sublimation, Catholicism and Hellenism, and dandyism. Students may read French and German texts in the original or in translation.

[ENGL 356 Postmodernist Fiction (IV) 4 credits. Next offered 2003-2004.]

#### ENGL 361 Early American Literature (also AM ST 361) # (IV)

Fall. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. S. Samuels. An exploration of national identities in the formative British colonial period, including the

relation of sexualities, religions, narrative practices, and encounters with other cultures to the contested formulations of destiny and free will in determining and explaining an American national character. Moving from early contact narratives through the conflicts that led to the American Revolution and beyond, this course considers American writing from the 1630s to the 1830s; among other sources, we read sermons, diaries, journals and poetry of the Puritans, captivity and emancipation narratives, autobiographical writings by Jonathan Edwards and Benjamin Franklin, political writings by Crevecoeur, Paine, and Jefferson, fiction by Brockden Brown, Irving, Sedgwick, Child, and Cooper and the early work of Poe, Hawthorne, and Emerson.

#### ENGL 362 The American Renaissance (also AM ST 362) (IV)

Spring, 4 credits, D. Fried, A survey of literary culture in New England and elsewhere from about 1820 to about 1870. Readings from Poe's tales and poetry, Hawthome's historical romances. Emerson's essays and poems. Fuller's Woman in the Nineteenth Century, Douglass's autobiographical writings, Thoreau's Walden, Whitman's poetry and Civil War journals, Melville's fictions, Dickinson's poems and letters, and early tales by James. As time permits we may also look into Lincoln's speeches and poems by Lowell, Longfellow, Whittier, and others, Close analysis of individual works within the context of literary and cultural history, with occasional glances at the visual arts of the period.

#### ENGL 363 American Fiction at the Turn of the Twentieth Century (also AM ST 363) (IV)

Spring. 4 credits. K. McCullough. Literary history tells us that various literary genres-regionalism, realism and naturalism, among others-jockeyed for place in American fiction at the turn of the 19th century. Cultural histories of the era tell us that social ideals about what constituted the "real" as well as the "American" were debated by Americans in this period, a period that witnessed such sweeping changes as, for instance, the rise and consolidation of Jim Crow, the widespread implementation of the policy of Manifest Destiny, the rise of women's movements, and multiple effects of the growth of the industrial economy and the shift from rural to urban life. This course puts these two accounts-the literary and the historical-into conversation in order both to examine the varied styles and issues that comprised American literature at the turn of the 19th century and to query the larger question of fiction's impact on society Authors under consideration may include: Charles Chesnutt, Stephen Crane, Henry James, Sarah Orne Jewett, Maria Amparo Ruiz de Burton, Sui Sin Far, Mark Twain, Edith Wharton, Sarah Winnemuca, and Zitkala-Sa

## [ENGL 364 American Literature Between the Wars (also AM ST 364) (IV) 4 credits. Next offered 2003–2004.]

#### ENGL 365 American Literature Since 1945 (also AM ST 365) (IV)

Fall. 4 credits. B. Maxwell. An American Studies approach to the literature of 1945-1960, the early Cold War period of "perpetual crisis and the garrison-prison state" (Harold Lasswell). Themes include fear, glamour, domestic life, integration, the "white

negro," addiction, loyalty, bureaucracy, and the disposition in the United States of the legacies of the Depression and of World War II. Fiction by Saul Bellow, Nelson Algren, Ann Petry, Ralph Ellison, Tillie Olsen, and Jack Kerouac (among others); collateral readings in memoir (Hellman), sociology (Mills), social psychology (Erickson; Adorno and Horkheimer), history (Hofstadter), aesthetics (Greenberg), politics (Kennan; Arendt), feminism (Friedan), and self-advertisement (Mailer). Some attention to bop, poetry, painting, film noir, political speeches, standup comedy, and magazine culture.

#### ENGL 366 Nineteenth Century American Novel (also AM ST 366) # (IV)

Spring. 4 credits, S. Samuels, Reading carefully some of the most fascinating novelists in the nineteenth century United States, we examine patterns of social and political awareness in these writers. In particular, we think about the relations among stylistic concerns in fiction and the construction of identities formed by national, racial, gendered, and sexual allegiances. Writers may include: Mark Twain, Charles Chesnutt, Nathaniel Hawthorne, Henry James, Edith Wharton, Pauline Hopkins, Harriet Wilson, Herman Melville, E.D.E.N. Southworth, and Stephen Crane.

- [ENGL 367 The Modern American Novel (also AM ST 367) (IV) Spring. 4 credits. Next offered 2003-2004. D. McCall.]
- [ENGL 368 American Novel Since 1950 (also AM ST 368) (IV) Fall. 4 credits. Next offered 2003-2004.

P. Sawyer.]

#### [ENGL 369 Fast Talking Dames and Sad Ladies (also WOMNS 369 and THETR 367) (IV)

Fall. 4 credits. Enrollment limited to 15. Regular critical readings, frequent viewing questions, two longer essays, no exam. Students must be free to attend Monday and/or Tuesday late-afternoon screenings. \$20 lab fee. Next offered 2003-2004. L. Bogel]

#### ENGL 370 The Nineteenth Century Novel # (IV)

Spring. 4 credits. J. Adams. A survey of representative works by major British novelists from Austen to Hardy. As great writers in a realistic mode, these novelists explore the interplay of self and society, particularly the clash between traditional social orders-class, gender, marriage-and new forms of mobility and self-determination in the world's first industrial nation. We are especially interested in the novel's preoccupation with domestic life, and reshapings of the familiar "marriage plot" in a world of great social and sexual anxiety. In short: love and money. Readings include works by Austen, Thackeray, Dickens, C. Bronte, Braddon, George Eliot, and Hardy.

## ENGL 372 Medieval and Renaissance

Drama (also ENGL 677) # (IV) Spring. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. A. Galloway. After the collapse of Rome, western European drama was re-created from a combination of sources: formal debate, popular festival, civic celebration, and, especially, religious liturgy. By the 17th century it had grown in England to be one of the most polished forms of English

508

literary art (but also at times one of the sleaziest). This long span of drama history allows us to consider drama's origins and changing cultural meanings. Using selected highlights, this course traces the residue of Roman drama and the beginnings of European and English drama from the 10th to the 13th centuries: then examine more fully some of the richness of late medieval drama in English; then finally read some of the writers in the age of authorship and London dominance-usually known as the Age of Shakespeare, although Shakespeare appears there only as one part among others, including Marlowe, Kyd, Jonson, Middleton, and Marston. The course format is lecture and discussion, and lecturers and discussion leaders may occasionally be drawn from graduate students pursuing the courseand possibly also from undergraduate students who endeavor to present the staging and style of some of the works we consider.

#### [ENGL 373 English Drama from 1700 to the Present (also THETR 373) # (IV)

4 credits. Next offered 2003-2004. S. McMillin.]

#### [ENGL 376 Survey in African American Literature: 1918 to present (IV)

Spring. 4 credits. Next offered 2003-2004. H. Spillers.]

## ENGL 378 American Poetry Since 1950 (also AM ST 372) (IV) Spring. 4 credits. R. Gilbert.

The second half of the 20th century has been a remarkably rich and diverse period in American poetry, characterized by constant innovations in form and technique, and restless exploration of new areas of language and experience. In this course we focus on a series of representative figures born between 1911 and 1950. These may include some or all of the following: Elizabeth Bishop, Robert Lowell, Gwendolyn Brooks, John Berryman, Robert Creeley, Allen Ginsberg, Frank O'Hara, W. S. Merwin, James Wright, A. R. Ammons, John Ashbery, James Merrill, Sylvia Plath, and Adrienne Rich.

[ENGL 381 Reading as Writing (IV) Next offered 2003-2004.]

ENGL 382-383 Narrative Writing (IV) See complete course description in section headed Creative Writing.

#### ENGL 384-385 Verse Writing (IV)

See complete course description in section headed Creative Writing.

[ENGL 386 Philosophic Fictions (IV) Next offered 2003-2004.]

ENGL 388 The Art of the Essay (IV) See complete course description in section headed Expository Writing.

[ENGL 395 Video: Art, Theory, and Politics (also THETR 395) (IV) 4 credits. Next offered 2003-2004. T. Murray.]

[ENGL 396 Introduction to Global Women's Literature (also WOMNS 396) @ (IV)

4 credits. Next offered 2003-2004. E. DeLoughrey.]

[ENGL 397 Policing and Prisons in American Culture (also AM ST 395) (IV)

4 credits. Next offered 2003-2004. B Maxwell ]

#### ENGL 398 Latina/o Cultural Practices (also LSP 398) (IV)

Spring, 4 credits. U.S. Latino/a history is strongly recommended as a prerequisite, but not required. M. P. Brady.

This course explorew Latino/a cultural work ranging from 'zines to comic books, architecture to film, music to sculpture, musicals to spoken word, theater to internet sites. We consider how this work emerges in the context of U.S. engagements with Latin America and in the context of struggles for social and economic equality among ethnoracial groups in the U.S. We consider therefore the production of stereotypes (particularly in the nineteenth century) and the ongoing efforts of contemporary artists to dispel such stereotypes, to work along side them and to rework them. We also consider the relationship between cultural production, representation, and public policy.

#### **Courses for Advanced Undergraduates**

Courses at the 400 level are open to juniors and seniors and to others by permission of instructor unless other prerequisites are noted.

#### ENGL 402 Literature as Moral Inquiry (IV)

Fall. 4 credits. S. Mohanty. What can literary works, especially novels and short stories, tell us about moral issues? Should they be seen as suggesting a form of moral inquiry similar to the kind of philosophical discussion we get in, say, Aristotle's Nicomachean Ethics? Do they deal with the same range of issues? Can reading philosophical works in ethics together with novels that deal with similar themes help us understand these themes better? This course is an attempt to answer these questions. We read selections from key texts in moral philosophy, including works by Aristotle, Kant, Marx, Nietzsche. Our attempt is to use these works to help us understand the nature of moral debate and inquiry in novels like Eliot's Middlemarch, James's Portrait of a Lady, Morrison's Beloved, Woolf's Mrs. Dalloway, Conrad's Heart of Darkness, and Achebe's Things Fall Apart. Other writers we will probably read include Nadine Gordimer, Doris Lessing, and Kazuo Ishiguro. The emphasis is on close reading, with particular attention to the relationship between formal elements (such as the use of narrative techniques) and the moral questions the texts organize and explore. Assignments include two papers and a journal.

#### **IENGL 403** Studies in American Poetry: Great Books, 1855-1926 (also AM ST 403) (IV)

4 credits. Next offered 2003-2004. R. Gilbert.]

## **(ENGL 404 History Into Fiction: Nazis** and the Literary Imagination (also COM L 404 and GERST 414) (IV) 4 credits. Two papers; no exam. Next

offered 2003-2004. E. Rosenberg.]

#### ENGL 408 Narratives of the University (also ENGL 608, S HUM 408) (IV) Fall. 4 credits. J. Williams.

For course description, see S HUM 408.

[ENGL 413 Middle English (also ENGL 613) # (IV)

Fall. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. Next offered 2003-2004.]

#### ENGL 414 Bodies of the Middle Ages: **Embodiment, Incamation** Performance # (IV)

Spring, 4 credits. This course may be used as one of the three pre-1800 courses

required of English majors. M. Raskolnikov. To study the Middle Ages is to study the writings of people centuries dead. We reach back in time and find only disembodied words. And yet, these words speak to us about the very stuff of embodied life: love, sex, hunger, dirt, death, decay. In this course, we read a number of significant Middle English works that represent the body in a variety of ways, as well as contemporary critical theory about the meaning of embodiment, and about how the suffering body can represent "the real" both in its own time and to contemporary readers. Reading both the theoretical and the Middle English materials critically and closely, we will begin, morbidly enough, by examining the literature of death. We read several plays about the incarnation and suffering of Christ, and some debates between dead bodies and those that have come to taunt them in their extreme state. We go on to read some of the masterpieces of fourteenth-century literature, including some tales of Chaucer that are particularly concerned with the body, and some significant works of Chaucer's time (including Sir Gawain and the Green Knight), thinking about how these works respond to the gender and class politics of their time. Particular attention is paid to the many and contradictory representations of women's bodies (bodies which often stand in for sinful embodiment in general) through reading several kinds of writings for and by religious women. The goal of this course is to gain a new and critical understanding of medieval literature, the history of the body, and a new and critical understanding of contemporary critical thought about the meaning, politics and aesthetics of embodiment.

Though not a survey in the strict sense of the term, this course is designed to expose students to a wide range of medieval genres and authors. Knowledge of Middle English is not a prerequisite, and the books ordered have facing-page translations. Nevertheless, some thinking about the specificity and richness of Middle English words is incorporated into class discussions and written assignments.

# [ENGL 416 Chaucer and the Politics of Love # (IV)

Spring. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. Next offered 2003-2004.1

#### ENGL 417 Early Medieval Archaeology and Literature (also ENGL 617 and ARKEO 417 and 617) # (IV)

Fall. 4 credits. Prerequisite: permission of instructor. This course may be used as one of the three pre-1800 courses required of English majors. R. Farrell.

This course is intended to provide an overview of the early middle ages in what is now called Great Britain. A massive amount of evidence on the material culture has come to light in the past 50 years, evidence which permits us a far better comprehension of written sources. We start with a reading of the great Old English epic Beowulf and a close study of the material culture of a society in transition from pagan Germanic to cosmopolitan Christian culture. Our next focus is Bede's

*Ecclesiastical History of the English People* and the material evidence for the complex cultural developments in England, Ireland, Scandinavia, and the continent. There are frequent student oral reports, a take-home midterm, and a take-home final OR extended research paper. Graduate students are expected to do more detailed oral reports and research papers.

#### ENGL 419 Prestige in American Literary Realism (also ENGL 606, S HUM 419) (IV)

Spring. 4 credits. P. Barrish. For course description, see S HUM 419.

#### ENGL 423 Renaissance Lyric (also ENGL 625) # (IV)

Spring, 4 credits, B. Correll, This course may be used as one of the three pre-1800 courses required of English majors. The study of sixteenth- and seventeenthcentury English poets, major and minor, male and female, secular and religious, and the questions such study raises: What is the connection between lyric poetry and the conditions and conflicts of the early modern period? How did the writing and publication of poetry change? What do women writers contribute to lyric poetry? What is at stakefor poetics, for a cultural poetics-in reading love lyric? As our readings and seminar discussions show, Renaissance poets are both products and producers of their culture. We also read and discuss recent critical work on lvric.

## [ENGL 424 Spenser (also ENGL 624) # (IV)

4 credits. Next offered 2003-2004 C. Kaske.]

#### ENGL 428 Close Reading and Critical Debate (IV)

Spring. 4 credits. F. Bogel.

This course may be used as one of the three pre-1800 courses required of English majors. In the course of literary history, a number of extremely interesting English and American poems have generated long-standingsometimes dramatic-controversy, much of it still unresolved. We study closely a variety of these poems and their "problems," paying attention to the texts themselves, to the sources of the disagreements, and to what criticism can tell us about how those disagreements have been produced and addressed (some short, supplementary readings in criticism and theory are made available). We also ask what these controversies can tell us about poetic meaning, about the procedures of criticism, and about the ways history and culture shape our understanding of literary texts. Poems-mostly short lyrics-are drawn from a wide range of authors and periods. Authors may include Shakespeare, Jonson, Marvell, Rochester, Swift, Egerton, Pope, Gray, Wordsworth, Coleridge, Keats, Robert Browning, Dickinson, Christina Rossetti, Lawrence, Williams, Millay, Campbell, Roethke, Bishop, Larkin, Plath, and others. This is an appropriate course for anyone interested in poetry and different ways of reading it.

[ENGL 429 Adam's Rib and Other Divine Signs: Reading Biblical Narrative (also RELST 429) # (IV)

4 credits. Next offered 2003–2004. L. Donaldson.]

#### ENGL 430 Literature As History: The Americas (also AM ST 430.03) (IV)

Spring. 4 credits. B. Maxwell. See AM ST 430.03 for full course description.

# ENGL 433 Electronic Innovations (also VISST 433) (IV)

Fall. 4 credits. Requirements: two medium length papers (7–8 pages), collaborative online project (with students in Australia), seminar presentation. Some advanced knowledge of digital or installation art is helpful. Permission of instructor. T. Murray.

A pilot course in the Innovation for the Teaching with Technology Initiative, the course will examine recent experimentation in electronic and digital art, with an emphasis on web art, CD-Rom art and interactive installation, as well as the theorization of digital art and culture. The seminar will be offered in tandem with a course on "Digital Culture" at the University of Technology, Sydney, Australia. The professor at UTS, Norie Neumark, is a leading international figure in digital installation art who will co-teach the course and combine her expertise with that of Professor Murray who curates and writes on digital art. Technological innovation will permit both seminars to communicate in real time (we will meet on Thursday evening at the same moment the UTS group will meet on Friday morning). With the likelihood of patching into digital installations at leading international art centers, the course will emphasize questions of cultural identity and national specificity in the context of global cyberspace. Cornell students will work in collaboration with UTS students on critical projects to be developed and shared online with the aim of fostering international dialogue among the first generation of "cyberthinkers." Some of the artists to be studied can be previewed at: http:// contactzones.cit.comell.edu/ and http:// ctheorymultimedia.cornell.edu.

#### [ENGL 434 Electronic Art and

Culture (IV) 4 credits. Next offered 2003–2004. T. Murray.}

#### [ENGL 437 Fiction(s) of Race, Fact(s) of Racism: Perspectives from South African and Afro-American Literatures @ (IV)

4 credits. Next offered 2003–2004. B. Jeyifo.]

# ENGL 443 The Dandy in London and Dublin

Spring. 4 credits. S. Siegel. The emergence of the figure of the dandy constituted a new cultural form. Our readings, drawn from novels and plays, memoirs, anecdotes, reviews, and graphic representations in the periodical press, will be guided by four questions: How does the word "dandy" behave in different temporal and geographical contexts? How and why does the form change? From whom were "dandies" thought to differ? How are we to understand the politics of this literary legend and of this cultural form? Changing perceptions of "gender" and "sexuality" will claim our attention throughout the semester. Readings will include Baudelaire, Beerbohm, Bulwer, Byron, Carlyle, Chesterfield, Brummell, Lover, Pater, Sheridan, Stein, Wilde, and Woolf.

Some familiarity with the history of England, with Anglo-Irish and Anglo-French relations, and a reading knowledge of French would be helpful. There are, however, no prerequisites and students across the disciplines are welcome. Discussion, seminar presentations, and one paper.

[ENGL 446 Victorian Poetry # (IV) 4 credits. Next offered 2003–2004.]

## [ENGL 448 The American Short Story (IV)

Fall, spring, or summer. 4 credits. Next offered 2003–2004.]

ENGL 452 Wilde and Woolf (also ENGL 652) (IV)

Spring. 4 credits. S. Siegel.

This seminar considers the question of style: what does the word mean; why has it claimed attention; how has it behaved in the work of two authors whose writings among their contemporaries marked distinctive departures? We explore Oscar Wilde and Virginia Woolf as readers of literary and social texts. Along the way, we direct our attention to the implicit expectations we bring to our understanding of "Victorians" and "Modernists." Selections are drawn from the full range of Wilde's and Woolf's work. Our principal texts, however, are limited to a few essays by each author.

#### ENGL 453 Twentieth Century Women Writers of Color (also AAS 253, WOMNS 453) (IV)

Fall. 4 credits. Course requirements include class presentations, short responses to the readings, and a longer research essay. S. Wong.

In this course, we read literature—primarily novels—produced by hemispheric American women writers of the mid- to late twentiethcentury. We look at how these writings articulate concerns with language, home, mobility, and memory, and at how the work is informed by the specificities of gender, race, region and class. Readings may include work by Leslie Marmon Silko, Sandra Cisneros, Theresa Hak Kyung Cha, Jamaica Kincaid, Gwendolyn Brooks, Ann Petry, Fae Myenne Ng, Carolivia Herron, Helena Maria Viramontes, and Shani Mootoo.

#### [ENGL 454 American Musical Theatre (also MUSIC 490 and THETR 454) (IV)

4 credits. Prerequisite: ENGL 272 or THETR 240–241 plus some ability to read music. Limited to 15 students. Next offered 2003– 2004. S. McMillin.]

#### [ENGL 456 Postmodern Novel (also ENGL 656) (IV)

4 credits. Next offered 2003-2004. M. Hite.]

#### ENGL 458 Imagining the Holocaust (also ENGL 658, JWST 458 and 658, COM L 483 and 683) (IV)

Spring. 4 credits. D. Schwarz. What is the role of the literary imagination in keeping the memory of the Holocaust alive for our culture? We examine major and widely read Holocaust narratives which have shaped the way we understand and respond to the Holocaust. As we move further away from the original events, why do the kinds of narratives with which authors render the Holocaust horror evolve to include fantasy and parable? Employing both a chronological overview and a synchronic approach—which conceives of the authors having a conversation with one another—we discover recurring themes and structural patterns in the works we read.

We begin with first-person reminiscences— Wiesel's Night, Levi's Survival at Auschwitz, and *The Diary of Anne Frank*—before turning to searingly realistic fictions such as Hersey's *The Wall*, Kosinski's *The Painted Bird*, and Ozick's "The Shawl." In later weeks, we explore diverse kinds of fictions and discuss the mythopoeic vision of Schwarz-Bart's *The Last of the Just*, the illuminating distortions of Epstein's *King of the Jews*, the Kafkaesque parable of Appelfeld's *Badenbeim 1939*, and the fantastic cartoons of Spiegelman's *Maus* books. We shall also include Kineally's *Schindler's List*, which was the source of Spielberg's academy award-winning film, and compare the book with the film.

#### ENGL 459 Contemporary British Drama (IV)

Spring. 4 credits. S. McMillin. English theatre in the second half of the twentieth century, with special attention to Tom Stoppard (*Arcadia, Rosencrantz and Guilderstern are Dead*), Harold Pinter (*The Homecoming, Mountain Language, Moonlight*), and Caryl Churchill (*Cloud Nine, Top Girls*), along with plays by Sarah Kane, David Edgar, Michael Frayn, Edward Bond, and Peter Shaffer. The importance of the Royal Court Theatre, the effect of The National Theatre and The Royal Shakespeare Company, the role played by the Fringe, and the political impact of Thatcherism and its aftermath are important considerations.

[ENGL 460 Riddles of Rhythm (IV) 4 credits. Next offered 2003–2004. D. Fried.]

[ENGL 462 Between Aztian and Queens: Latina Culture and the Making of Space (also LSP 462) (IV) 4 credits. Next offered 2003–2004. M. P. Brady.]

- [ENGL 464 Emerson and Poe (IV) 4 credits. Next offered 2003–2004. R. Morgan.]
- [ENGL 466 James on Film (IV) 4 credits. Next offered 2003–2004. D. Fried.]

#### ENGL 467 Black Manhattan

Spring, 4 credits, N. Waligora-Davis. This course examines the key figures, political movements, and the literary, cinematic, and musical traditions that emerge during the period of intense black artistic innovation known as the Harlem Renaissance. We will study black artistic productions of the 1920s and 1930s against the twinned impulses of Negrophobia and Negrophilia. Reading the work of DuBois, Hughes, Larsen, Cullen, McKay, Locke, Hurston, Toomer, Johnson, and Garvey alongside black cinematic and musical (jazz and blues) productions, we will take up the political and social implications of the "new Negro" and a distinctly African American modernist aesthetic. The course will examine the relationships among these artistic productions and emerging black nationalisms, black revolutionary tendencies, and radical black political philosophies. We will also be critical of the concept of "Harlem," a place around which myths and utopic desires of black possibility were configured, and a cityspace simultaneously transforming into a "ghetto." There will be two exams and a final research project.

[ENGL 468 Baldwin, Brooks, and Baraka (IV) 4 credits. Next offered 2003–2004.

K. McClane.]

#### [ENGL 469 Faulkner (also AM ST 469) (IV)

4 credits. Next offered 2003–2004. H. Spillers.]

#### ENGL 470 Studies in the Novel: Experimental Novels by Twentieth Century Women (also WOMNS 470) (IV)

Fall. 4 credits. M. Hite. Innovative (strange, difficult) prose narratives by Dorothy Richardson, Virginia Woolf, H. D. (Hilda Doolittle), Doris Lessing, Toni Morrison, Margaret Atwood, Angela Carter and Joanna Russ, along with some critical and theoretical readings. Seminar participants do a weekly e-mail assignment, and two class presentations—the first forming the basis for a 5–7 page midsemester paper, and a final paper of 15+ pages.

#### ENGL 471 Humor in Literature (IV) Fall, 4 credits. A. Lurie.

Why do we laugh, and at what? Why do some works seem funny at certain periods and in certain social contexts? This course looks at different ways of answering these questions, and at different kinds of literary humor: romantic comedy, black comedy, farce, satire, parody, and nonsense. Among works that may be read are humorous folktales, comic verse, *A Midsummer Night's Dream, The Way of the World, Gulliver's Travels, Alice in Wonderland, The Importance of Being Earnest, Patience, Waiting for Godot, and stories by James Thurber, Flannery O'Connor, Grace Paley, Philip Roth, Donald Barthelme, and Garrison Keillor.* 

#### ENGL 473 Sondheim and Musical Theatre (also MUSIC 495, THETR 472) (IV)

Fall. 4 credits. Limited to 15 students. S. McMillin.

A seminar on the plays, lyrics, and music of Stephen Sondheim. The course takes up all of Sondheim's major works, with particular attention to Company, Follies, A Little Night Music, The Frogs, Pacific Overtures, Sweeney Todd, Sunday in the Park with George, and Into the Woods. Collateral assignments in Aristophanes, Rodgers and Hammerstein, Bergman's film Smiles of a Summer Night, Chekhov, Shaw, Shakespeare, Kabuki Theatre, Victorian Melodrama, and other topics which are at the basis of Sondheim's musicals. There is a focus on the formal differences between musical theatre and what is often called "legitimate" theatre. Prerequisite: ENGL 454, American Musical Theatre (also listed as THETR 454 and MUSIC 490), or similar background. Students must be able to read music and must be familiar with dramatic literature as a genre. Also open to graduate students who have a special reason to study Sondheim.

#### [ENGL 475 Studies in the Twentleth Century: Writers' Writers in Twentleth-Century Literature (IV)

4 credits. Limited to 20 students. Next offered 2003–2004. L. Herrin.]

#### ENGL 476 Global Women's Liteature (also WOMNS 476) (IV)

Spring. 4 credits. Requirements: active class participation, student presentations, a few short essays, and a final paper. E. DeLoughrey.

This course focuses on contemporary women's writing in English from "postcolonial" regions such as the Pacific, Caribbean, India and Africa. During the semester we look at how women from these regions depict the process of migration from within the nation (from rural to urban spaces) or from the "postcolony" to metropoles such as England. As women are generally associated with private, domestic space, this course explores the motifs of exile and border crossing and sketch out the ways in which gender, nation, and class inform "traveling theory." We read novels/poetry by Joan Riley, Merle Hodge, Patricia Grace, Miriama Ba, Anita Desai, and Grace Nichols, and align these texts with the theoretical works of James Clifford, Caren Kaplan, Paul Gilroy, and M. Nourbese Philip.

#### ENGL 479 Jewish-American Writing (also AM ST 479, JWST 478) (IV)

Fall. 4 credits. J. Porte. A study of American writing from about 1895 to the present that is concerned with the Jewish experience in the New World. Some topics covered: immigrant life, gender issues, the conflict between religious and secular outlooks, political affiliation, the Great Depression, the Group Theater, anti-Semitism, Jewish life in the suburbs, the impact of the Holocaust, the "renewal" of Yiddish culture and religious interest. Authors to be studied will probably include: Abraham Cahan, Anzia Yezierska, Fannie Hurst, Henry Roth, Clifford Odets, Karl Shapiro, Alfred Kazin, Saul Bellow, Bernard Malamud, Philip Roth, Adrienne Rich, Ruth Whitman, and Cynthia Ozick. There will be opportunities for research in secondary sources and we may view some films on Jewish subjects.

#### ENGL 480-481 Seminar in Writing (IV)

Fall, 480; spring 481. 4 credits. See complete description in section headed Creative Writing.

#### ENGL 483 Seminar in Comparative Twentieth-Century Anglophone Drama (IV)

Spring. 4 credits. B. Jeyifo.

The course explores 20th century Anglophone drama in diverse areas of the English-speaking world. Through works of Irish, African, Caribbean, and U.S. playwrights like Friel, Soyinka, Fugard, Walcott and Shange, the seminar is organized around two principal issues: the use of folk, ritual, vernacular and carnivalesque performance idioms to transform the received genre of Western *literary* drama; and, themes of empire, colony and postcolony in the making of the modern world. Some knowledge of classical and avant garde theories of drama and theatre is useful, but is not a prerequisite for this course.

#### ENGL 486 American Indian Women's Literature (also ENGL 686, AIS 486/ 686) (IV)

Fall. 4 credits. L. Donaldson. This course surveys the origins and issues pertinent to the development of women's literatures in a number of different American Indian cultures. It considers traditional modes of expression such as women's songmaking, weaving, basketmaking and storytelling as well as the influence and appropriation of European literary forms such as the novel. The course is loosely chronological, although we spend the first part of the semester attending to Native paradigms of cultural production. We read a diverse range of materials, including novels, autobiography, poetry, and short stories. By the end of the course, students should be able to identify and articulate not only the pressing historical and

literary/cultural issues pertaining to American Indian women's writing but also the major figures of this field. Students have the opportunity to read one work of their own choosing. Course texts include Betty Louise Bell (Cherokee), Faces in the Moon; Louise Erdrich (Chippewa), Tracks; Luci Tapahonso (Navajo), Saaniii Dahataal/ The Women Are Singing: Poems and Stories; Linda Hogan (Chickasaw), Solar Storms; Mourning Dove (Salish), Cogawea: The Halfblood; Wendy Rose (Hopi/Miwok), Bone Dance: Selected Poems: Leslie Marmon Silko (Laguna Pueblo), Yellow Woman (ed. Melody Graulich); Elizabeth Woody (Yakama/Warm Springs), Seven Hands, Seven Hearts: Prose and Poetry; and Joy Harjo (Muscogee), The Woman Who Fell From The Sky.

#### ENGL 487 Writing About Literature (IV) Fall. 4 credits. F. Bogel.

Why do we write about literature and "interpret" it instead of just "reading" it? Are some interpretations better than others? Truer? If there are many different modes of criticism, does the field of "English" have a coherent identity? This course does not conduct a broad survey of theories but investigate a few critical approaches and attempt to apply them practically to a small selection of literary texts. The aim is less an acquaintance with theory than an enlargement of critical possibilities and a reflection on the undertaking of literary interpretation itself. The critical schools explored include a few of the following: New Criticism (American Formalism), structuralism, deconstruction, feminism, and New Historicism. Literary texts will likely include a Shakespeare play, a variety of poems by authors including Donne, Shakespeare, Herrick, Pope, Coleridge, Dickinson, Plath, Lowell, Roethke, and Ammons and several short works of fiction, including Conrad's Heart of Darkness.

#### ENGL 488 Contemporary Poetry and Poetics (also ENGL 697, COM L 674, GERST 674, SPANL 674) (IV) Spring. 4 credits. J. Monroe.

For course description, see COM L 674.

#### [ENGL 490 Literatures of the Archipelagoes: Carlbbean and Pacific "Tidalectics" @ (IV) 4 credits. Next offered 2003–2004. E. DeLoughrey.]

**ENGL 491 Honors Seminar I** Fall. 4 credits. Open to students in the

Honors Program in English or related fields, or by permission of instructor. S. McMillin.

Shakespeare: Problem Plays, Hamlet, Troilus, Measure for Measure, and others. Close reading of a group of Shakespeare's plays which have always puzzled people for their abnormality. Measure for Measure, Hamlet, and Troilus and Cressida are central. Coriolanus and Cymbeline are possibilities, and Tbe Rape of Lucrece will certainly be worked in. The main critical and theoretical approaches are reviewed, and students work up to a long term paper.

#### ENGL 492 Honors Seminar II

Spring. 4 credits. Open to students in the Honors Program in English or related fields, or by permission of instructor. Course requirements include, in addition to rigorous reading, two shorter papers and one lengthy term paper.

# Section I: Progenitors of Frankenstein C. Chase.

A study of the original *Frankenstein*, Mary Wollstonecraft Shelley's novel written in 1818. We read some of the works that loomed large in Mary Shelley's reading or belong to the novel's intellectual and psychological background, such as her mother Mary Wollstonecraft's *A Vindication of the Rights of Woman*, Godwin's *Memoirs of the Author of A Vindication of the Rights of Woman*, parts of Jean-Jacques Rousseau's *Confessions* and a novel about education, and work by Percy Bysshe Shelley. The seminar centers, however, on *Frankenstein* itself.

#### Section II: Experimental Long Novel M. P. Brady.

This course examines a selection of capacious, experimental novels. Beginning with one of the more famous examples of this genre, Herman Melville's *Moby-Dick; or, The Whale,* and moving to contemporary texts (perhaps including novels by Ralph Ellison, Leslie Marmon Silko, Don DeLillo, Gayl Jones) we explore the narrative experimentation, stylistic shifts, and challenges that the long novel uniquely offers. We also use this course as the occasion to study the history of the novel and narrative theory more generally (including work by Hutcheon, Bahktin, Barthes, Chambers).

#### ENGL 493 Honors Essay Tutorial I

Fall or spring. 4 credits. Prerequisites: senior standing and permission of director of the Honors Program.

**ENGL 494 Honors Essay Tutorial II** Fall or spring. 4 credits. Prerequisites: ENGL 493 and permission of director of the Honors Program.

**ENGL 495** Independent Study Fall or spring. 2–4 credits. Prerequisites: permission of departmental adviser and director of undergraduate studies.
