# Courses Primarily for Graduate Students

Permission of the instructor is a prerequisite for admission to courses numbered in the 600s. These are intended primarily for graduate students, although qualified undergraduates are sometimes admitted. Undergraduates seeking admission to a 600level course should consult the instructor. The list of courses given below is illustrative only; a definitive list, together with course descriptions and class meeting times, is published in a separate department brochure before course enrollment each term.

#### Graduate English Courses for 2002–2003 Fall

ENGL 585 Linguistic Theory and Poetic Structure (also ENGL 296, LING 285/ 585)

J. Bowers.

ENGL 600 Colloquium for Entering Students R. Gilbert.

R. Gilbert.

ENGL 602 Literature and Theory (also ENGL 302, COM L 302/622) J. Culler.

#### ENGL 603 The Roman de la Rose and Its Tradition

- W. Wetherbee.
- ENGL 608 Narratives of the University (also ENGL 407, S HUM 408) J. Williams.
- ENGL 611 Old English (also ENGL 311) T. Hill.
- ENGL 617 Early Medieval Archaeology and Literature (also ENGL 417, ARKEO 417/617) R. Farrell.
- ENGL 627 Shakespeare: The Greek and Roman Plays B. Correll

ENGL 632 Studies in Eighteenth-Century Literature: Colonialism and Eighteenth-Century Literature L. Brown.

- ENGL 639 Studies in Romantic Literature: Writers of the 1790s R. Parker.
- ENGL 645 England and the Empire: 1830–1900 P. Sawyer.
- ENGL 650 Modernism: Theory and Practice D. Mao.

ENGL 651 The Sexual Child (also WOMNS 651) E. Hanson.

ENGL 681 Prosody D. Fried.

- ENGL 686 American Indian Women's Literature (also ENGL 486, AIS 486/ 686)
  - L. Donaldson.
- ENGL 693 Gender, Globalization, and Latina/o Literature (also LSP 693) M. P. Brady.
- ENGL 695 Theories of Identity S. Mohanty.
- ENGL 759 Virginia Woolf M. Hite.
- ENGL 780.01 MFA: Poetry Seminar P. Janowitz.
- ENGL 780.02 MFA: Fiction Seminar S. Vaughn.
- ENGL 785 Reading for Writers: Poetry A. Fulton.

#### Spring

- ENGL 606 Prestige in American Literary Realism (also ENGL 419, SHUM 419) P. Barrish.
- ENGL 612 Beowulf R. Farrell.

ENGL 615 Piers Plowman T. Hill.

- ENGL 616 The Development of Print Cultures N. Saccamano.
- ENGL 625 Renaissance Lyric (also ENGL 423) B. Correll.
- ENGL 643 Secrecy and Scandal J. Adams.

ENGL 652 Wilde and Woolf (also ENGL 452)

S. Siegel.

ENGL 658 Imagining the Holocaust (also ENGL 458, JWST 458/658, COM L 483/683, and GERST 457/657)

D. Schwarz

ENGL 659 Women, Fiction, and the **Imperial Enterprise** K. McCullough

- ENGL 662 American Violence S. Samuels.
- ENGL 670 Joyce's Ulysses and the **Modern Tradition**

D. Schwarz

- ENGL 677 Medieval and Renaissance Drama (also ENGL 372, THETR 372) A. Galloway.
- ENGL 682 Hopkins and Baudelaire (also COM L 684) I. Culler

ENGL 683 Judaism and Modernism (also COM L 644) W. Cohen.

- ENGL 687 Race Matters N. Waligora-Davis.
- ENGL 689 Asian American Literature S. Wong.
- ENGL 696 Digital Bodies, Virtual Identities T. Murray.
- ENGL 697 Contemporary Poetry and Poetics (also ENGL 488, COM L 674, **SPANL 674, GERST 674)** I. Monroe.
- ENGL 781.01 MFA: Poetry Seminar Staff
- ENGL 781.02 MFA: Fiction Seminar D. McCall.

## ENGLISH AS A SECOND LANGUAGE

See English for Academic Purposes. See Intensive English Program.

## **ENGLISH FOR ACADEMIC** PURPOSES

D. Campbell, director; S. Schaffzin, I. Arnesen, fall; F-H Yap, spring

Note: Courses and credits do not count toward the B.A. degree.

#### ENGLF 205 English as a Second Language

Fall. 4 credits. Prerequisite: placement by examination. S. Schaffzin.

An all-skills course emphasizing listening and speaking, with some writing practice. Students also meet individually with the instructor.

#### ENGLF 206 English as a Second Language

Spring. 3 credits. Prerequisite: ENGLF 205 or placement by examination. S. Schaffzin. A writing class for those who have completed ENGLF 205 and need further practice, or for those who place into the course. Individual conferences are also included.

#### ENGLF 209 English as a Second Language

Fall or spring. 1 credit. Prerequisite: permission of instructor. S. Schaffzin. Practice in classroom speaking and in informal conversational English techniques for gaining information. Students also practice giving informal presentations. Individual conferences with the instructor supplement class work.

#### ENGLF 210 English as a Second Language

Spring. 1 credit. Prerequisite: permission of instructor. S. Schaffzin.

Practice in academic speaking. Formal classroom discussion techniques and presentation of information to a group. Presentations are videotaped and reviewed with the instructor. Individual conferences supplement class work.

#### ENGLF 211 English as a Second Language

Fall, spring, or summer. 3 credits. Prerequisite: placement by examination. D. Campbell.

Academic writing with emphasis on improving organization, grammar, vocabulary, and style through the writing and revision of short papers relevant to students' fields. Frequent individual conferences supplement class work.

#### ENGLF 212 English as a Second Language

Spring. 3 credits. Prerequisite: permission of instructor. Enrollment is restricted to 12 on a first-come, first-served basis. D. Campbell.

Research paper writing. For the major writing assignment of this course, the students must have a real project that is required for their graduate work. This can be a thesis proposal; a pre-thesis; part of a thesis, such as the literature review or discussion section; a paper for another course or a series of shorter papers (with permission of the other instructor); or a paper for publication. Time limitations make it difficult to deal with work over 20 pages in length. Course work involves practice in paraphrase, summary, the production of cohesive, coherent prose, vocabulary use, and grammatical structure. Frequent individual conferences are a necessary part of the course. Separate sections for Social Sciences/Humanities and for Science/Technology

#### ENGLF 213 Written English for Non-**Native Speakers**

Spring. 3 credits. Prerequisite: permission of instructor. S. Schaffzin.

Designed for those whose writing fluency is sufficient for them to carry on regular academic work but who want to refine and develop their ability to express themselves clearly and effectively. Individual conferences supplement class work.

### **First-Year Writing Seminar**

#### ENGLB 115-116 English for Later Bilinguals

For description, see first-year writing seminar brochure

## FALCON PROGRAM (INDONESIAN)

See Department of Asian Studies.

## FEMINIST. GENDER & SEXUALITY STUDIES

- Core Faculty: K. Abrams, S. Bem, L. Beneria,
- L. Bogel, J. Brumberg, D. Castillo, I. DeVault,
- S. Feldman, M. Fineman. J. Fortune, N. Furman, J. E. Gainor, J. Ginsburg,
- E. Hanson, N. Hirschmann, M. Katzenstein,
- K. March, C. A. Martin, S. McConnell-Ginet,
- K. McCullough, M. B. Norton, D. Reese,
- S. Samuels, D. Schrader, A. M. Smith,
- A. Villerajo, R. Weil

Cross-listing Faculty: A. Adams, D. Bem,

- A. Berger, J. Bernstock, F. Blau, M. Brinton, L. Brown, L. Carrillo, C. Chase, M. Clarkberg,
- B. Correll, E. DeLoughrey, M. Evangelista,
- J. Farley, K. Graubart, K. Haines-Eitzen.
- M. Hite, P. Hymans, J. Jennings, C. Lazzaro,
- T. Loos, T. McNulty L. Meixner, J. Peraino,
- G. Rendsburg, M. Rossiter, N. Russell,
- S. Sangren, R. Savin-Williams, R. Schneider, L. Shapiro, M. Steinberg, S. Szelenvi,
- M. Warner, M. Washington, B. Wejnert,
- J. Whiting, L. Williams, M. Woods, S. Wong

## Introduction to the Program

The Feminist, Gender & Sexuality Studies Program is an interdisciplinary program in the College of Arts & Sciences that seeks to deepen our understanding of how gender and sexuality are ubiquitously intertwined with structures of power and inequality. Central to the curriculum are the following overarching assumptions:

That definitions of sex, gender, and sexuality are neither universal nor immutable, but are instead social constructions that vary across time and place, serve political ends, and have ideological underpinnings;

That gender and sexuality are best understood when examined in relation to one another, in relation to the oppression of women and sexual minorities (e.g., lesbians, gays, bisexuals, transgendered and transsexual people), and in relation to other structures of privilege and oppression, especially racism and class exploitation; and

That even the most current knowledge derived from the humanities, social sciences, and natural sciences is not as impartial, objective, or neutral as has traditionally been thought, but emerges instead out of particular historical and political contexts. A historical footnote: Established in 1972 as one of the byproducts of the Women's Liberation Movement, the Cornell Feminist, Gender & Sexuality Studies Program was initially called Women's Studies so as to explicitly name the group rendered invisible by (what was then almost always referred to as) the "patriarchy"-and also so as to highlight that it would be speaking from the perspective of the traditionally marginalized Other rather than from the perspective of the group presumed by the dominant paradigm to neutrally represent humankind (i.e., men). But the name quickly became controversial, not only because it suggested that the objects of study, as well as those undertaking the studies, were exclusively women, but also because it did nothing to discourage the common assumption that the women in question were white. middle-class, and heterosexual. To expand and institutionalize the sexuality component of the Program, a minor in Lesbian Bisexual and Gay Studies was established at both the graduate and undergraduate levels in the early 1990s. To shift the emphasis of the program

even further toward the intertwining of gender and sexuality with structures of power and inequality, in 2002 the program changed its name from Women's Studies to Feminist, Gender & Sexuality Studies.

## **Program Offerings**

The Feminist, Gender & Sexuality Studies Program (FGSS) will begin to offer a muchrevised undergraduate major and concentration as soon as these are approved by the state of New York. These new offerings have already been approved by the College of Arts and Sciences. Very briefly, the new FGSS major requires 36 credits including 201 (Intro to FGSS), 202 (Intro to FGS Theories), and 400 (Sr. Seminar in FGSS), plus additional FGSS courses with a significant focus on each of the following: (a) LBG Studies: (b) Intersecting Structures of Oppression-Race, Ethnicity, and/or Class; and (c) Global Perspectives: Africa, Asia, Latin America, or Middle East, by itself or in a comparative or transnational framework. Contact the FGSS office (255-6480) for more detailed descriptions of these new offerings and for updated information about their approval status. Until these new offerings are approved, FGSS will continue to offer both a Women's Studies major and a Women's Studies concentration, as described below. Students already majoring or concentrating in Women's Studies when the new FGSS major and concentration go into effect will be able to complete their Women's Studies program as planned or switch to an FGSS program if they prefer.

#### The Undergraduate Major: Women's Studies

The questions posed by feminist inquiry cannot be answered from within any single discipline or even from a simple combination of two or more disciplines. For that reason, the women's studies major provides students with a basic groundwork in the interdisciplinary field of women's studies and then requires each student to construct an advanced and individually tailored program of study on a topic, in a discipline, or in a combination of disciplines of special interest to the student alone.

Rather than specifying a particular sequence of required courses for each and every student, the women's studies major gives students a starting point in women's studies, an active advisory structure to help them shape a curriculum, and an ongoing impetus to reflection about their entire program of undergraduate study.

In designing their major, students should keep in mind that there are comparatively few graduate programs offering a degree in women's studies itself. Accordingly, undergraduates wishing to major in women's studies should talk at length with their faculty adviser about how to design a program of study that will best qualify them for entry into either a job or a postgraduate degree program when they leave Cornell. Undergraduates who might want to do graduate study within a discipline will need to develop a certain level of disciplinary specialization at the undergraduate level. This can be done either by supplementing the women's studies major with a carefully selected cluster of courses in that discipline or by pursuing a double major. Students wishing to apply their interest in Women's Studies to other professional arenas may similarly select focused coursework in their fields or consider supplementing their studies through internships or other work experiences.

#### **Requirements for a Women's Studies Major**

- 1. Prerequisite courses: before applying to the major, the student must complete any two Women's Studies courses with a grade of B- or better. Suggested entrylevel courses for **2002–2003** include: any class at the 200 level, especially 210 and 211. These courses would count both as prerequisites and as part of the women's studies major. First-Year writing seminars, in contrast, would count as prerequisite courses but not as part of the major.
- 2. Required course work:
  - a. A minimum of 36 credits in women's studies is required for the major. No course in which the student has earned less than a C- can count toward these 36 credits. Although there is no single women's studies course that is required of all students, every major must complete a program of study that is both graduated in difficulty and interdisciplinary in scope-a program, in other words, that reflects both the breadth and the depth of women's studies scholarship. This program of study should be developed in consultation with the director of undergraduate studies and must include advanced work at the 300 level or above.
  - b. Students may count up to three courses outside women's studies toward the major **if** those courses are approved by the director of undergraduate studies as constituting a meaningful component of the student's women's studies curriculum. To facilitate the coordination of a women's studies major with other majors in the college, students may also count toward the major up to three women's studies courses that are simultaneously being counted toward a second major.
- 3. The Honors Program: to graduate with honors, the major in women's studies must complete a senior thesis under the supervision of a women's studies faculty member and defend that thesis orally before an honors committee. To be eligible for honors, students must have at least a cumulative grade point average of 3.0 in all coursework and a 3.3 average in all courses applying to their women's studies major. Students interested in the Honors Program should consult the Director of Undergraduate Studies (DUS) late in the spring semester of their junior year or very early in the fall semester of their senior year. For more information about the Honors Program, see WOMNS 400 and the "Guidelines For a Senior Honors Thesis" available in the Women's Studies Program office.

#### The Women's Studies Concentration

Undergraduate students in any college at Cornell can concentrate in Women's Studies in conjunction with a major defined elsewhere in the university. The concentration consists of four courses in Women's Studies completed with a grade of C- or above, no more than two of which can come from a single discipline and none of which should overlap with the major. In rare cases, the DUS may allow one class from within a student's major to count toward the requirements for the concentration. Students should not assume the waiver will be granted, and they must petition the DUS with this request before the beginning of their final semester of study. Freshman writing seminars cannot be included within the four required courses. Students wishing to concentrate in Women's Studies should see the DUS.

#### The LBG Concentration

Women's Studies serves as home to the Lesbian, Bisexual, and Gay Studies Program, which offers an undergraduate concentration as well as a graduate minor. The LBG undergraduate concentration consists of four courses. For a complete listing of all courses that will fulfill this concentration please see the LBG Studies portion of this catalog.

#### I. First-Year Writing Seminars

#### WOMNS 106 FWS: Women and Writing (also ENGL 105)

Fall and spring. 3 credits. Staff. For description, see ENGL 105.

WOMNS 120 FWS: Butches, Bitches, and Buggers: A Survey of Queer Drama (also THETR 120) Fall, spring. 3 credits. M. Gualtieri.

For description, see THETR 120

WOMNS 178 FWS: Queer Theory (also ENGL 178 and FILM 178) Spring. 3 credits. E. Hanson.

For description, see ENGL 178.

## II. Courses

#### WOMNS 108 Social Inequality (also SOC 108)

Fall. 3 credits. M. Brinton. For description, see SOC 108.

#### WOMNS 206 Gender and Society (also R SOC 206)

Spring. 3 credits. B. Wejnert. For description, see R SOC 206.

#### WOMNS 210 Introduction to Feminist Theory (IV)

Fall. 4 credits. A. Villarejo. This course introduces students to critical approaches in feminist scholarship to the cultural, socioeconomic, and political situation(s) of women. Particular attention is paid to the conceptual challenges and dangers posed by attempts to study women without taking account of relations between race, class, and gender in ideological and social formations. Readings draw on work in various disciplines and include literary texts and visual images.

#### WOMNS 211 Introduction to Women's Studies (III or IV)

Fall. 3 credits. K. McCollough. Introduction to Women's Studies is a multidisciplinary approach to understanding the experiences, historical conditions, and concerns of women, both in the present and the past. As the academic manifestation of feminism, women's studies offers a range of perspectives (from liberal to radical) but focuses, in general, on understanding the sources of women's oppression in order to eliminate these sources.

#### [WOMNS 212 African American Women: Twentieth Century (also HIST 212 and AM ST 212)

4 credits. Not offered 2002–2003. M. Washington.] WOMNS 214 Biological Basis of Sex Differences (also BIOAP 214 and B&SOC 214) Spring 3 credits 1 Fortune

Spring. 3 credits. J. Fortune. For description, see BIOAP 214.

- WOMNS 234 Gender in Early Modern Europe (also HIST 234) Fall. 4 credits. R. Weil. For description, see HIST 234.
- WOMNS 241 New York Women (also HIST 241) Spring. 3 credits. M. Rossiter. For description, see HIST 241.
- WOMNS 244 Language and Gender Relations (also LING 244) Fall. 4 credits. S. McConnell-Ginet. For description, see LING 244.
- WOMNS 246 Contemporary Narratives by Latina Writers (also SPANL 246 and LSP 246) Fall. 3 credits. L. Carrillo.

For description, see SPANL 246.

- WOMNS 249 Feminism and Philosophy (also PHIL 249) Fall. 4 credits. N. Sethi. For description, see PHIL 249.
- WOMNS 251 Twentieth-Century Women Novelists (also ENGL 251) Fall. 4 credits. E. Deloughrey. For description, see ENGL 251.
- [WOMNS 253 Gender and the Life Course (also HD 253) 3 credits. Not offered 2002–2003.

P. Palmieri.] [WOMNS 262 Introduction to Asian

- American Literature (also ENGL 262, ASIAN 262, AM ST 262) 4 credits. Not offered 2002–2003. S. Wong.]
- [WOMNS 273 Women In American Society, Past and Present (also HIST 273) 4 credits. Not offered 2002–2003.

M. B. Norton.]

- [WOMNS 277 Social Construction of Gender (also PSYCH 277) 3 credits. Not offered 2002–2003. S. Bem.]
- [WOMNS 279 Queer Fiction (also ENGL 278 ) 4 credits. Not offered 2002–2003.

E. Hanson.]

- WOMNS 280 Introduction to Lesbian Fiction (also ENGL 279) Fall. 4 credits. K. McCullough. For description, see ENGL 279.
- WOMNS 285 Gender and Sexual Minorities (also HD 284)

Fall. 3 credits. R. Savin-Williams. For description, see HD 284.

WOMNS 307 African-American Women in Slavery and Freedom (also HIST 303 and AS&RC 307) Fall. 4 credits. M. Washington.

For description, see HIST 303.

WOMNS 309/509 The Sociology of Marriage (also SOC 309/509) Spring. 3 credits. M. Clarkberg, For description, see SOC 309/509.

[WOMNS 314/514 Gender and Work (also SOC 314/514) 4 credits. Not offered 2002–2003.

M. Brinton.]

WOMNS 316 Gender Inequality (also SOC 316) Fall. 3 credits. S. Szeleyi. For description, see SOC 316.

[WOMNS 320 Queer Theater (also FILM 320) 4 credits. Not offered 2002–2003. J. E. Gainor.]

- WOMNS 321/631 Sex and Gender in Cross-Cultural Perspective (also ANTHR 321/621) Fall. 4 credits. K. March. For description, see ANTHR 321/621.
- WOMNS 322 Women in the Hebrew Bible (also NES 320 and JWST 320) Spring. 3 credits. G. Rendsburg. For description, see NES 320.
- [WOMNS 326 Women in the Hebrew Bible-Seminar (also NES 326 and JWST 326) 1 credit. Not offered 2002–2003. G. Rendsburg.]
- [WOMNS 327 Shakespeare: Gender and Power (also ENGL 327) 4 credits. Not offered 2002–2003. B. Correll.]
- WOMNS 344 Male and Female in Chinese Culture and Society (also ANTHRO 344) Fall, 4 credits, S. Sangren,

For description, see ANTHRO 344.

WOMNS 348 Studies in Women's Fiction (also ENGL 348) Spring. 4 credits. L. Brown. For description, see ENGL 348.

[WOMNS 353 Feminism: State and Public Policy (also GOVT 353) 4 credits. Not offered 2002–2003. M. Katzenstein.]

WOMNS 355 Decadence (also ENGL 355 and COM L 355) Fall. 4 credits. E. Hanson.

For description, see ENGL 355.

#### [WOMNS 359 Introduction to Political Feminist Thought (also GOVT 369) 4 credits. Not offered 2002–2003.

N. Hirschmann.]

#### WOMNS 360 Gender and Globalization (III)

Fall. 3 credits. L. Beneria This course will invite students to think globally about gender issues and to trace the connections between global, national, and local perspectives. Emphasis is given to: a) understanding processes of globalization (economic, political, cultural); b) discussing the ways in which these processes interact with the dynamics of gender differentiation; c) understanding how globalization has affected women's and men's paid and unpaid work; d) discussing the significance of women's location in global markets; e) looking at the importance of culture and the social construction of gender in shaping the ways in which globalization affects people's lives and gender relations; f) introducing regional differences and similarities; g) discussing the gender dimensions in the debates on "the clash of civilizations;" h) introducing questions of global governance and examining specific cases that illustrate women's role in the shaping of international debates. The course combines theoretical and empirical readings/ discussions

WOMNS 361 Impressionism in Society (also ART H 362) Spring. 4 credits. L. Meixner. For description, see ART H 362.

- [WOMNS 366 Women at Work (also IILHR 366) 3 or 4 credits. Not offered 2002–2003. L Earley 1
- [WOMNS 368 Marriage and Sexuality in Medieval Europe (also HIST 368 and RELST)
  - 4 credits. Not offered 2002–2003. P. Hyams.
- [WOMNS 369 Studies in Film Analysis: Fast-Talking Dames and Sad Ladies (also ENGL 369 and FILM 367)

3 credits. Not offered 2002-2003. L. Bogel.]

[WOMNS 370 Nineteenth-Century Novel (also ENGL 370) 4 credits. Not offered 2002–2003. E Hasson 1

- WOMNS 377 Concepts of Race and Racism (also GOVT 377) Spring. 4 credits. A. M. Smith. For description, see GOVT 377.
- WOMNS 378 Topics in U.S. Women's History (also HIST 378 and AM ST 378) Fall. 4 credits. M. B. Norton.

For description, see HIST 378.

WOMNS 384 History of Women and Unions (also ILRCB 384) Spring, 4 credits. I. DeVault. For description, see ILRCB 384.

WOMNS 391 Fictions of Self (also FRLIT

**391)** Fall. 4 credits. T. McNulty. For description, see FRLIT 391.

[WOMNS 394 Gender and Sexuality in Early Christianity (also NES 394 and RELST 394) 4 credits. Not offered 2002–2003.

4 credits. Not offered 2002–200 K. Haines-Eitzen.]

- [WOMNS 396 Introduction to Global Women's Literature (also ENGL 396) 4 credits. Not offered 2002–2003.
- E. DeLoughrey.]
- WOMNS 400 Senior Honors Thesis Fall and spring, 2–8 credits. For Women's Studies seniors only. Permission of Women's Studies faculty member required. Student must carry a GPA of 3.0 in all subjects and a 3.3 in Women's Studies. Staff.

Both the form of theses, and the nature and extent of contact between student and adviser, will depend on mutual agreement between the two. In one common scenario, the student will write an essay of approximately 50 pages in length, drafted and revised in a series of carefully planned stages over the course of two semesters, with an outline expected on approximately Sept. 15 and a draft of the first chapter on approximately November 15. An "R" grade will be assigned at the end of the fall semester and a letter grade on completion of the project at the end of the spring semester.

#### [WOMNS 401 New Women in the 'New' New York (also S HUM 405 and ARCH 690)

4 credits. Not offered 2002-2003; next offered fall 2003. M. Woods.]

WOMNS 403 Love, Sex, and Song in the Middle Ages (also MUSIC 494)

Fall. 4 credits. J. Peraino. For description, see MUSIC 494.

## [WOMNS 404 Women Artists (also ART H

4 credits. Not offered 2002–2003. L Bernstock.

#### [WOMN\$ 405/605 Domestic Television 4 credits. Not offered 2002–2003.

A Villareio

This course is a seminar on television as technology and cultural form, focusing on the "domestic" as a synonym for gendered valuecoding, an axis of the international division of labor (and questions of television's dissemination and circulation), and a site for historical exploration. The course balances readings in television and cultural theory (Spigel, Dienst, Merck, Williams, Feuer, Modleski, Mellencamp, Shattuc, Spivak, and others) with close analysis of television as information, entertainment, furniture, technology, text, genre, flow, channel, and circuit of production of the commodity audience. Students may enroll in either undergraduate or graduate level with graduate students submitting a longer paper and doing supplementary readings.]

#### [WOMNS 406 The Culture of Lives (also ANTHR 406)

4 credits. Not offered 2002–2003; next offered spring 2004. K. March.]

[WOMNS 408 Gender Symbolism (also ANTHR 408)

4 credits. Not offered 2002–2003; next offered spring 2004. K. March.]

[WOMNS 416 Gender and Sex in South East Asia (also HIST 416)

4 credits. Not offered 2002-2003. T. Loos.]

[WOMNS 427 Shakespeare: Gender, Sexuality, Cultural Politics (also ENGL 427 and FILM 427) 4 credits. Not offered 2002–2003. B. Correll.]

- [WOMNS 433 The Female Dramatic Tradition (also FILM 436) 4 credits. Not offered 2002–2003.

J. E. Gainor.]

#### [WOMNS 438 Female Adolescence in Historical Perspective, 1815–1960 (also HD 417, HIST 458 and AM ST 417)

3 credits. Not offered 2002–2003. J. Brumberg.]

[WOMNS 441 Theatre of Commodities: Feminism, Advertising, T. V., and Performance (also THETR 439) 4 credits. Not offered 2002–2003.

R. Schneider.]

[WOMNS 443 The Novels of George Ellot (also ENGL 444) 4 credits. Not offered 2002–2003; next offered 2005. C. Chase.]

[WOMNS 444 Historical Issues of Gender and Science (also S&TS 444) 4 credits. Not offered 2002–2003. M. Rossiter.]

WOMNS 446 Women in the Economy (also ILRLE 445 and ECON 457) Fall. 4 credits. F. Blau. For dewscription, see ILRLE 445. WOMNS 450/650 Gender and Clinical Psychology (also PSYCH 450/650)

Fall. 4 credits. S. Bem. For description, see PSYCH 450/650.

#### [WOMNS 451 Women in Italian Renaissance Art (also ART H 450)

4 credits. Not offered 2002–2003. C. Lazzaro.]

#### [WOMNS 454 Opera, History, Politics, Gender (also HIST 456, S HUM 459, COM L 459, and ITAL 456) 4 credits. Not offered 2002–2003.

M. Steinberg, S. Stewart.] [WOMNS 463 The Politics of

#### Contemporary Feminist Theory (also GOVT 463) 4 credits. Not offered 2002–2003.

4 credits. Not offered 2002–2003; next offered spring 2004. J. Ginsburg.]

#### WOMNS 465 Feminist Theory/Lesbian Theory (also COM L 465 and GERST 465)

Spring. 4 credits. A. Villarejo. This seminar explores developments in feminist theory, primarily in the United States from the 1950s through the mid-1990s. We also trace the changing status of "lesbianism" in feminist theories over that same time period and examine its status in current constructions of "queer theory." What happens to the relationship between feminist theory and lesbian thought when "queer theory" emerges? The purpose of the course is to encourage critical, historically informed readings of what could be considered canonical texts and crucial junctures in Second Wave feminist thought, many of which remain unfamiliar even to Women's Studies students.

## WOMNS 499 Directed Study

Fall and spring. Variable credit. Prerequisites: 1 course in women's studies and permission of a faculty member of the Women's Studies Program Board. Staff.

#### [WOMNS 600 Special Topics in Feminist Theory: An Interdisciplinary Graduate Course in Women's Studies

4 credits. This course is open to graduate students and undergraduate seniors who have obtained permission of instructor. Not offered 2002–2003. Staff.

The purpose of this course is to expose graduate students to interdisciplinary approaches in Women's Studies and feminist theory to a variety of topics or questions. While many of our graduate courses train students in highly specialized areas of feminist theory, this course aims to teach students how to find common intellectual ground around a single topic from interdisciplinary perspectives without sacrificing the complexity of any disciplinary approach. The course is designed for graduate minors in Women's Studies and students with a specialized interest in feminist theory. Although it is not required, the course is strongly recommended for students obtaining a graduate minor in Women's Studies.1

#### [WOMNS 608 African-American Women (also HIST 608)

4 credits. Not offered 2002–2003. M. Washington.]

#### [WOMNS 610 Sexuality and the Politics of Representation

4 credits. Not offered 2002–2003. A. Villarejo.

The seminar explores contexts for critical work on sexuality and film/video. Beginning with the texts of Foucault, Freud, Lacan, Jacqueline Rose, and Jeffrey Weeks, the course examines the uses and abuses of psychoanalytic theory, as well as the regulation of sexuality in the past century. "Sexuality" is not, however, a simple abstraction, and its coherence is put to the test through the dual lenses of Marxism and poststructuralism throughout the second half of the course, with readings from Gramsci, Deleuze and Guattari, Lyotard, and others. Films include Blonde Venus, Trash, The Night Porter, Ali: Fear Eats the Soul, Written on the Wind, and others.]

#### WOMNS 612 Population and Development in Asia (also R SOC 612)

Spring. 3 credits. L. Williams. For description, see R SOC 612.

## **GERMAN STUDIES**

L. Adelson, P. Gilgen, A. Schwarz, acting chair; D. Bathrick, M. Briggs (Dutch), B. Buettner, H. Deinert, I. Ezergailis (Emerita), A. Groos, acting director of graduate studies; P. U. Hohendahl, G. Lischke, acting director of undergraduate studies; B. Martin, U. Maschke, D. Reese, L. Trancik (Swedish), G. Waite

The Department of German Studies offers students a wide variety of opportunities to explore the literature and culture of Germanspeaking countries, whether as part of their general education, a major in German Studies, or a double major involving another discipline, or as preparation for graduate school or an international professional career. Courses are offered in German as well as in English translation; subjects range from medieval to contemporary literature and from film and visual culture to intellectual history, music, history of psychology, and women's studies.

The department's offerings in English begin with a series of First-Year Writing Seminars introducing various aspects of German literature (for example, the fairytale and romantic consciousness or twentieth-century writers such as Kafka, Hesse, Mann, Brecht), theorists such as Marx, Nietzsche and Freud, issues in mass culture and modernity, problems of German national identity/ies, and cinema and society. Courses in English translation at the 300 and 400 levels explore such topics as the Faust legend, aesthetics from Kant to Heidegger, Freud and his legacy, opera from Mozart to Strauss, the German novel, political theory and cinema, the Frankfurt School, and feminist theory. It may be possible to arrange a German section for courses taught in English, either informally or formally (for credit). Students are encouraged to discuss this possibility with instructors.

Students wishing to begin German language at Cornell enroll in GERST 121-122, 123 (elementary language level). Students then continue with intermediate level courses, which provide further grounding in the language as well as introduce German literature and cultural studies. The sequence GERST 205-206 provides language instruction for business German leading to certification. On the advanced level (300 level or above), we offer thematically oriented courses that include intensive grammar review (301, 302); literature and culture study courses in German, including the Senior Seminar; and seminars of interdisciplinary interest taught in English. Addressing a broad spectrum of topics in German culture, our courses at the advanced level appeal to German majors and other qualified students alike.

#### Sequence of courses

Courses in German:

Elementary level: GERST 121–122, after completion, placement into GERST 123 or 200, 205

Intermediate level: GERST 200, 202, 204, and 205-206

Advanced level: GERST 301, 302, 307, 410.

Courses in German or English: Further 300and 400-level literature and culture courses (see course descriptions)

### **Advanced Standing**

Students with an AP score of 4 or better are automatically granted three credits in German. Students with an AP score of 4 or better, an LPG score of 65 or higher, or an SAT II score of 680 or higher must take the CASE examination for placement in courses above GERST 200. Students coming to Cornell with advanced standing in German and/or another subject are encouraged to consider a double major and to discuss the options with the director of undergraduate studies as early as possible.

#### The Majors

The department offers two options for the major: German literature and culture, and German area studies. The latter is a more broadly defined sequence that includes work in related disciplines. The course of study in either major is designed to give students proficiency in reading, speaking, and writing in German, to acquaint them with German culture, and to help them develop skills in reading, analyzing, and discussing German texts in relevant disciplines. For both majors, there is a wide variety of courses cosponsored with other departments (Comparative Literature; Government; History; Music; Theatre, Film, and Dance; Women's Studies).

The department encourages double majors and makes every effort to accommodate

prospective majors with a late start in German. Students interested in a major should consult the acting director of undergraduate studies, Gunhild Lischke, G75 Goldwin Smith Hall.

### German (Literature and Culture)

Although the emphasis of this track is on literature, majors may also pursue individual interests in courses on film and visual culture, theater and performing arts, music, intellectual and political history, and women's studies that have a substantial German component. Please consult with the director of undergraduate studies.

Admission: By the end of their sophomore year, prospective majors should have successfully completed GERST 202, 220, 204, or 206.

To complete the major, a student must:

- 1. Demonstrate competence in the German language by successful completion of two 300-level courses with intensive language work (GERST 301, 302) or the equivalent.
- 2. Complete six courses in German Studies at the 300 level or above. One of these must be the Senior Seminar (GERST 410).

#### **German Area Studies**

Students select courses from the Department of German Studies as well as courses with a substantial German component from other departments, such as Comparative Literature; Government; History; Music; Theatre, Film, and Dance; and Women's Studies.

Admission: By the end of their sophomore year, prospective majors should have successfully completed GERST 202, 220, 204, or 206.

To complete the major, a student must:

- Demonstrate competence in the German language by successful completion of two 300-level courses with intensive language work (GERST 301, 302) or the equivalent.
- 2. Complete six courses with a substantial German component at the 300 level or above. Three of these must be in German Studies, including the Senior Seminar (GERST 410).
- 3. Select a committee of one or more faculty advisers to help formulate a coherent program of study. One of the advisers must be from the Department of German Studies.

## **Study Abroad in Germany**

German Studies strongly supports Study Abroad as an opportunity for students to put their German to use by living and studying in the German cultural context. The experience of living abroad promotes enduring personal growth, provides new intellectual perspectives through cultural immersion, and opens up academic and professional opportunities.

Students interested in studying abroad are encouraged to consider the Berlin Consortium, of which Cornell is an associate member. The program is run in conjunction with the Free University of Berlin and is of very high caliber. Six weeks of an intensive language practicum held at the center of the consortium are followed by one or two semesters of study at the university. Participants enroll in regular courses at the university. Academic-year students have been assisted in finding internships between semesters. Prerequisite for participating in the program is five semesters of German language study, of which the last course must be on the 300 level.

Students interested in this or other study abroad options in Germany, Austria, or Switzerland should consult Gunhild Lischke (G75 Goldwin Smith; 255–0725; gl15@cornell.edu) as soon as possible.

#### Honors

**Eligibility:** A student wishing to receive honors in German Studies must have a GPA of 3.5 in all courses relevant to the major.

**Committee:** Candidates for honors form an advisory committee consisting of an adviser from German Studies and at least one additional faculty member.

Honors essay: During the first term of their senior year, students determine the focus of their honors essay through an appropriate course, GERST 453, under the direction of their advisers. During the second term they complete an honors essay, GERST 454, which will be evaluated by the committee.

**Determination of honors:** An oral examination concludes the process. Honors is determined by the essay, the exam, and grades in the major.

## **First-Year Writing Seminars**

Consult the John S. Knight Institute brochure for course times, instructors, and descriptions.

#### **Courses Offered in German**

GERST 121 Introductory German I Fall or spring. 4 credits. Intended for students with no prior experience in German or with a language placement test (LPG) score below 37, or an SAT II score below 370. G. Lischke, U. Maschke and staff.

Students develop basic abilities in listening, reading, writing, and speaking German in meaningful contexts through interaction in small group activities. Course materials including videos, short articles, poems, and songs provide students with varied perspectives on German language, culture, and society.

#### **GERST 122** Introductory German II

Fall or spring. 4 credits. Prerequisite: GERST 121, LPG score 37–44, or SAT II 370–450. Students who obtain an LPG score of 56 or above after GERST 122 attain qualification and may enter a 200level course; otherwise successful completion of GERST 123 is required for qualification. G. Lischke, U. Maschke and staff.

Students build on their basic knowledge of German by engaging in intense and more sustained interaction in the language. Students learn more advanced language structures allowing them to express more complex ideas in German. Discussions, videos, and group activities address topics of relevance to the contemporary Germanspeaking world.

## GERST 123 Continuing German

Fall or spring. 4 credits. *Provides language qualification*. Limited to students who have previously studied German and have an LPG score 45–55 or

SAT II 460–570. U. Maschke and staff. Students continue to develop their language skills by discussing a variety of cultural topics and themes in the German-speaking world. The focus of the course is on expanding vocabulary, reviewing major grammar topics, developing effective reading strategies, improving listening comprehension, and working on writing skills. Work in small groups increases each student's opportunity to speak in German and provides for greater feedback and individual help.

#### **GERST 200** Contemporary Germany (IV)

Fall or spring. 3 credits. *Provides language proficiency*. Prerequisite: qualification in German (GERST 123 or LPG score of 56–64 or SAT II score of 580–670) or placement by examination. B. Buettner and staff.

A content-based language course on the intermediate level. Students examine important aspects of present-day German culture while expanding and strengthening their reading, writing, and speaking skills in German. Materials for each topic are selected from a variety of sources (fiction, newspapers, magazines, and the Internet). Units address a variety of topics including studying at a German university, modern literature, Germany online, and Germany at the turn of the century. Oral and written work and individual and group presentations emphasize accurate and idiomatic expression in German. Successful completion of the course enables students to continue with more advanced courses in language, literature, and culture.

#### GERST 202 Exploring German Literature (IV)

Fall or spring. 3 credits. Prerequisite:

GERST 200 or equivalent or permission of instructor. Taught in German. B. Buettner and staff.

In this intermediate course, we read and discuss a number of works belonging to different literary genres by major Germanspeaking authors such as Kafka, Walser, Brecht, Mann, Frisch, Dürrenmatt, Bachmann, and others. We explore questions of subjectivity and identity in modern society, of human existence as existence in language, and of the representation of history in literary texts. Activities and assignments in this course focuses on the development of reading competency in different literary genres, the use of accurate and idiomatic expressions, the expansion of students' German vocabulary, and the systematic review of select topics in German grammar.

#### GERST 204 Intermediate Conversation and Composition

Fall or spring. 3 credits. Prerequisite: GERST 200 or GERST 201 or GERST 205 or placement by examination (placement

score and CASE). U. Maschke. Emphasis is on improving oral and written expression of idiomatic German. Enrichment of vocabulary and appropriate use of language in different conversational contexts and written genres. Material consists of readings in contemporary prose, articles on current events, videos, and group projects. Topics include awareness of culture, dependence of meaning on perspective, interviews with native German speakers, German news broadcasts, reading German newspapers on the Internet.

#### **GERST 205 Business German I**

Fall. 3 credits. GERST 205 provides language proficiency. Prerequisite: qualification in German (GERST 123, or an LPG score of 56-64, or an SAT II score between 580-670). Staff.

Learn German and understand German business culture at the same time. This is a German language course that examines the German economic structure and its major components: industry, trade, the banking system, and the government. Participants learn about the business culture in Germany and how to be effective in a work environment, Germany's role within the European Union, the dual education system, the importance of trade and globalization, and current economic issues in Germany. The materials consist of authentic documents from the German business world, TV footage, and a Business German textbook.

#### GERST 206 Business German II

Spring. 3 credits. Prerequisite: proficiency in German (GERST 205, 200, or placement by examination [placement score and CASE]). G. Lischke.

This course is a continuation of GERST 205; however students without previous knowledge of Business German are welcome. This is a German language course that examines the German economic structure and its major components: industry, trade unions, the banking system, and the government. Participants learn about the business culture in Germany and how to be effective in a work environment, Germany's role within the European Union, the role of the European Central Bank, the importance of trade and globalization, and current economic issues in Germany. The materials consist of authentic documents from the German business world, TV footage, and a Business German textbook. At the end of the course, the external Goethe Institut exam "Deutsch fur den Beruf" will be offered

[GERST 220 Was ist Deutsch? (IV) *Provides language proficiency*. Not offered 2002–2003. B. Buettner.]

GERST 301 Scenes of the Crime: German Mystery and Detective Fiction (IV)

Fall. 4 credits. Prerequisite: GERST 202, 220, 204, 206 or equivalent, or permission of instructor. Taught in German. This course may be counted towards the requirement for 300-level language work in the major. P. Gilgen. An exploration of German crime, detective,

and mystery writing in texts ranging from the early nineteenth century to contemporary fiction. Authors to be studied may include: Kleist, E. T. A. Hoffmann, Dürrenmatt, Schatten, Süskind, Handke, Ören and Georg Klein. In addition to exercising hermeneutic skills (and, by extension, that gray matter of which Sherlock Holmes and Hercule Poirot were so fond), this course aims at improving proficiency in aural and reading comprehension, as well as speaking and writing skills. with emphasis on vocabulary expansion, advanced grammar review, and stylistic development. Recommended to students interested in a combined introduction to literature and high-level language training. The follow-up course, GERST 302, Youth/ Adolescence, is taught in the spring only.

# GERST 302 Youth Culture: Adolescence In German Fiction (IV)

Spring. 4 credits. Prerequisite: GERST 301 or equivalent or permission of instructor. Taught in German. B. Buettner.

Examination of literary and cultural ap proaches to childhood, youth, and adolescence in texts ranging from the late eighteenth century to the present. Thse include longer works by Bernhard, Musil, Zweig, von Horvath, Mann and Schlink and a variety of shorter texts. Aimed at further improving students' proficiency in aural and reading comprehension, as well as in speaking and composition skills. Focus on high-level grammar review, stylistic and expository refinement and vocabulary expansion. Recommended for students wishing to combine intensive language training with reading and discussion of short fiction.

#### [GERST 306 German Media Not offered 2002-2003.1

[GERST 307 After the Fires: Divided Germany 1945-1989 (IV) Not offered 2002-2003. L. Adelson.]

## **GERST 310 Berlin: Where the Wild**

Things Are (IV) Spring, 4 credits. Prerequisite: GERST 202, 204, 206, or 220, or equivalent or permission of instructor. Taught in German. U. Maschke.

Berlin has recently been declared the city of the world: Berlin as the place to be for politicians and profit-seekers, architects and artists, the rich and famous, but also for those seeking new thrills. Is this new Berlin pulsing once again with the vibrant energy of the 1920s or overwhelmed by the historical legacy of fascism and the divisions of the Cold War? With a focus on a wide variety of media, such as literature, film, architecture, music, political documents, the Internet, and MIT's hypermedia program Berliner Seben, this course investigates the emergence and life of contemporary Berlin in the context of its history as the capital of Germany. Differing and sometimes contradictory representations of this unique city form the thematic core of this course, which stresses the refinement of critical reading skills in German in addition to advanced writing, listening, and speaking skills in German. Especially suitable for students interested in study abroad, this course is open to all qualified students interested in high-level development of their German-language skills in the context of cultural studies.

[GERST 392 Minority Literature in the Federal Republic (IV) Not offered 2002–2003. L. Adelson.]

GERST 395 Rilke: The Duino Elegies and Sonnets to Orpheus (IV) Fall. 4 credits. In English translation. We use a bilingual edition for the benefit of those who know German and will arrange an optional weekly discussion section in

German for interested students. H. Deinert. In 1922, the same year that saw the publication of Joyce's Ulysses, Eliot's Waste Land, and Valery's Charmes, Rilke's Duino Elegies, more than ten years in the making, and Sonnets to Orpheus, were finally completed in a burst of creative energy that astonished even the poet. One of Germany's greatest lyrical poets along with Klopstock, Goethe and Hölderlin, Rilke attempts nothing less than the creation of a modern myth, a secular religiosity in which the relationship between God and humans is replaced by one between man and Angel, the latter, like Nietzsche's Superman, but a projection of human possibilities and aspirations. A member of a generation still numbed by the destruction and social and political upheaval wrought by World War I, Rilke defines the role of humans in terms of preservation and conservation, of exuberant service to what is transitory, be they natural or cultural phenomena: transient, they look to us for deliverance, us, the most transient of all (IX. Elegy). We discuss the ten elegies and fifty-five sonnets both as documents of their time and in the context of intellectual history.

[GERST 403 The Afro-Europeans (IV) Not offered 2002-2003.]

#### GERST 405 Introduction to Medieval German Literature I # (IV)

Fall. 4 credits. Prerequisites: reading knowledge of German. A. Groos. After a brief introduction to basic aspects of the medieval universe, ranging from cosmology to psychology, reading focuses on introductory texts of late twelfth-century

courtly culture. Using the predominant genres of aristocratic self-representation, the heroic epic (Nibelungenlied), Arthurian romance (Hartmann's Iwein), and Minnesang, discussions investigate the court as the locus of conflicting forces in the rise of the secular culture in Germany, examining such issues as the first vernacular construction of social and sexual identity, generational conflicts within the communal-dynastic order, the rise of individualism (the knightly quest), and subjectivity (the love lyric).

#### **GERST 406** Introduction to Medieval German Literature II # (IV)

Spring, 4 credits, Prerequisite: GERST 405 or permission of instructor. This is the anchor course for the medieval period. A. Groos

Political lyrics by Walther von der Vogelweide introduce agendas of conflict in thirteenthcentury German culture, ranging from civil war to the crusades. Against this background, we examine the utopian quest for the Holy Grail in Wolfram von Eschenbach's Parzival and trace the representation of gender in the love lyric across emerging class differences, the increasing complexity of self, and instabilities of the performance text. Concluding topics may include the destabilization of order in Gottfried von Strassburg's Tristan und Isolde, women mystics and late medieval narratives of socio-sexual violence, anti-Semitism, and urban Angst.

#### **GERST 407 Teaching German as a** Foreign Language

Fall. 4 credits. G. Lischke

This course has been designed to familiarize students with current ways of thinking in the field of applied linguistics and language pedagogy. It introduces different concepts of foreign language methodology as well as presents and discusses various techniques as they can be implemented in the foreign language classroom. Special consideration is given to topics such as planning syllabi, writing classroom tests, and evaluating student's performance. Participants conduct an action research project.

[GERST 408 Uncanny Communities (IV) Not offered 2002-2003.]

# [GERST 409 Spinoza and New Spinozism (also COM L 442) (IV) Not offered 2002–2003. G. Waite.]

## **GERST 410 Senior Seminar**

Fall. 4 credits. Open to all students with an adequate command of German. Prerequisite: any German course at the 300-level or equivalent or permission of instructor. Readings and discussions in German. A. Schwarz.

Topic: The Poetics of Realism Survey of 19th-century prose, drama and poetry with special focus on the literary program of "Poetic Realism." In addition to discussing concepts such as "mimesis", the "real" and "imitation," the seminar will examine narrative strategies that aim at reconciling the "poetic realm of literature and the "prosaic" realm of the everyday. We will investigate how literary texts attempt to glorify work, the city and industrialization by relocating the plot to the realms of love, the domestic, adventure, suburbia, gardens or America. Further attention will be paid to artistic developments that anticipate literary periods such as Naturalism, Expressionism and the Avantgarde, Authors include: Hegel, Vischer,

Tieck, Keller, Freytag, Stifter, Fontane, Raaheand Storm

#### **GERST 417 Faust: Transformations of a** Myth (also COM L 417) # (IV)

Spring, 4 credits, Taught in English. H. Deinert.

Few legends have so engaged the imagination as that of the man who signed a pact with the devil to obtain pleasure, power, and knowledge. While the myth itself is timeless, the modern version takes its cue from one real Georg Faust, a figure of dubious character, half scholar, half quack, during the time of the German Reformation. The German Volksbuch depicting his adventures was almost immediately translated into English and became the inspiration for Marlowe's Tragical History of Doktor Faust. Goethe devoted some 60 years to his Faust, completing it only months before his death in 1832. While Marlowe's Faust deserves eternal damnation for his hubris, Goethe's protagonist finds favor with God for the same reason. We look at various representations of the myth from the late sixteenth century through the early nineteenth. The Faust Book, Marlowe, and Goethe are our main texts. We listen to some of the music they have inspired: Schubert, Schumann, Berlioz, Gounod, Mahler; and look at related mythical figures like Lucifer, Prometheus, Don Juan, Ahasverus, Schlemiehl, and others. Time permitting, we discuss selections from several recent versions: Bulgakov's The Master and Margarita (1938). Valery's Mon Faust (1940), and Thomas Mann's Doktor Faustus (1947).

#### GERST 623 Aesthetic Turns: The Fin-desiècle

Spring. 4 credits. Anchor course. Prerequisite: graduate standing or permission of instructor. Readings in German; discussion either in German or English. A. Schwarz.

Interdisciplinary examination of the fin-desiecle as a crucial turning point in literature, art, architecture, psychoanalysis and cultural criticism. Comparative study of differing projects of Modernity within the European context; examining the conditions for the emergence of avant-garde movements; analyzing ambivalent attitudes towards tradition and heritage (Realism and Naturalism) and changing attitudes toward literary concepts such as "minnesis," "montage," "description," "narrative," and "temporality." Focus on the interrelationship between psychoanalysis, literature and cultural critique; between literature and architecture (the city as the site of artistic production), between aesthetics and politics and youth culture and artistic innovation. Authors include: Fontane, Nietzsche, Bahr, Mach, Freud, Schlaf, Holz, Broch, Benn, Benjamin, Schnitzler, Musil, Hofmannsthal, Simmel, George, Kraus, Mann, Lasker-Schueler et al.

#### **GERST 624** Seminar in Medieval German Literature

Fall. 4 credits. Prerequisite: GERST 405 or equivalent. A. Groos.

Topic: Minnesang. Originally a variety of songs practiced by the feudal aristocracy of the late twelfth and thirteenth centuries, is transmitted only in manuscripts written a century later. The transformation from song to book, and the variability-even incompatibility-of texts in different manuscripts, poses vexing questions for understanding the Middle High German love lyric: Were they conceived as both songs and poems, performed and/or read in private? To what extent can the performativity of the songs be recovered from the texts? Were the songs performed at court as part of the self-representation of feudal lords? Or are they stagings of subjectformation, even author-formation, vis-a-vis a community? What is the significance of their foregrounding of gender relationships for the emergence of secular culture? Readings focus on poems of the three major Minnesinger around 1200, Heinrich von Morungen, Reinmar der Alte, and Walther von der Vogelweide.

#### [GERST 626 Nuremberg Not offered 2002-2003.]

[GERST 627 Baroque (also COM L 626) Not offered 2002-2003.]

**IGERST 629** The Enlightenment Not offered 2002-2003, P. U. Hohendahl,]

#### **GERST 630** Classicism and Idealism

Fall, 4 credits, Texts in German, Anchor course, P. U. Hohendahl.

An introduction to some of the major poetic and philosophical texts generally considered to be part of the period of German Classicism (1785-1805), while at the same time giving reasons to call into question notions of periodization and the canon, particularly as they have excluded women and lower social classes. In addition to the basic problem of the appropriation of classic antiquity at a time marked by the transition to bourgeois modernity, special consideration is given to the emergence of modern aesthetic theory as well as its impact on literary production and reception. Specifically the seminar focuses on the problem of subject formation in the context of modernity as it is expressed in the concept of Bildung. Special emphasis is placed on the gendering of this concept. Readings are taken from the works of Goethe, Herder, Humboldt, Kant, Moritz, and Schiller among others. While the main focus of the seminar is on primary texts, we also consider contemporary criticism of the concept of Classicism and its problems.

#### GERST 631-632 Academic German I and II

631, fall; 632, spring. 3 credits each term. Limited to graduate students. Prerequisite: for GERST 632, GERST 631 or equivalent. Staff.

Intended primarily for beginners with little or no previous German knowledge. Emphasis in 631 on acquiring basic German reading skills. Emphasis in 632 on development of the specialized vocabulary of student's field of study

#### **IGERST 634** German Romanticism Not offered 2002-2003, G. Waite.]

#### [GERST 635 The Gates to Modernity: From Karlsbad to the 1848 Revolution

Not offered 2002-2003, P. U. Hohendahl,1

#### GERST 636 Kleist and Kafka: Prose Works

Fall. 4 credits. Prerequisite: graduate standing or permission of instructor. D Reese

Reading Kleist and Kafka together, we endeavor to strike upon our own vocabulary for describing the peculiar temporal qualities of their narratives and short prose works. Rather than beginning with a particular understanding of narratology, we attempt to elaborate one by attending to what might be called narrative speed-an attention to the significance of lapses and accelerations in the art of storytelling. How is the description of space conditioned by the becoming of the description in time? How, in turn, is this reconstellation of space within the temporal development of the narrative related to the arrival of judgment? We pay close attention to the variation between the random detail, what might be called narrative caprice, and recuperative, retrospective assertions of necessity-between the absurd and the demonstrable. Of particular concern is the persistent dislocation of epistemological certainty in the unfolding of the texts and how it bears on issues of law. In keeping with this, we consider the density of the bodies which cross the thresholds of judgment, swallow prophesies, move through border patrols and

succumb to or exceed the narrative logic which brings them forth. Selected prose works by Kleist and Kafka are read alongside writings by Barthes, Benjamin, Bloch, Freud, and Nietzsche.

#### GERST 753–754 Tutorial in German Literature

Fall and spring. 1-4 credits per term. Prerequisite: permission of instructor.

#### Dutch

#### DUTCH 121-122 Elementary Dutch

121, fall; 122, spring. 4 credits each term. *DUTCH 122 provides language qualification.* Prerequisite: permission of instructor. M. Briggs.

Intensive practice in listening, speaking, reading, and writing basic Dutch in meaningful contexts. The course also offers insight into Dutch language, culture, and society.

#### DUTCH 203 Intermediate Composition and Conversation

Fall. 3 credits. Prerequisite: qualification in Dutch or permission of instructor. *Provides language proficiency*. M. Briggs.

Improved control of Dutch grammatical structures and vocabulary through guided conversation, discussions, compositions, reading, and film, drawing on all Dutchspeaking cultures. Taught in Dutch.

#### DUTCH 204 Intermediate Composition and Conversation

Spring. 3 credits. Prerequisite: DUTCH 203 or permission of instructor. M. Briggs. This course emphasizes written and oral application of accurate, idiomatic Dutch. Reading of authentic material such as newspapers, web-based texts, literature, history and film, with emphasis on the students' interests and specializations. Taught in Dutch.

#### DUTCH 300 Directed Studies

Fall or spring, 1–4 credits variable. Prerequisite: proficiency in Dutch or permission of instructor. M. Briggs. Individualized advanced Dutch studies. This course provides students with individualized programs which can be anything from advanced mastery in any or all skills to the mastery of Dutch for research, literature, and history in support of all disciplines. Taught in Dutch. Topic for fall or spring: Afrikaans.

#### Swedish

#### SWED 121-122 Elementary Swedish

121, fall; 122, spring. 4 credits each term. Prerequisite: for SWED 122, SWED 121 or equivalent. L. Trancik.

Students in the course develop abilities in listening, speaking, reading, and writing within Sweden's cultural context. Work on the Internet and interactive computer programs are used in these courses.

#### SWED 123 Continuing Swedish

Fall. 4 credits. *Provides language qualification*. Prerequisite: SWED 122 or equivalent. L. Trancik.

Development of skills in spoken and written Swedish within Sweden's cultural context.

#### SWED 203 Intermediate Swedish

Fall. 3 credits. *Provides language* proficiency. Prerequisite: SWED 123 or permission of instructor. L. Trancik. Intermediate to advanced-level instruction using audio-visual material and text to enhance language comprehension.

#### SWED 204 Advanced Swedish

Spring. 3 credits. Prerequisite: SWED 203 or permission of instructor. Taught in Swedish. L. Trancik.

Emphasis on improving oral and written expression of Swedish, including vocabulary, readings in contemporary prose, treatment of specific problems in grammar, and presentation of videos and films.

#### SWED 300 Directed Studies

Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. L. Trancik.

Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

## GOVERNMENT

- V. Bunce, chair; R. Bensel, S. Buck-Morss,
- A. Carlson, M. Evangelista, R. Herring,
- N. Hirschmann, M. Jones-Correa,
- M. Katzenstein, P. Katzenstein, J. Kirshner,
- I. Kramnick, T. J. Lowi, W. Mebane,
- K. O'Neill, J. Pontusson, J. Rabkin, L. Ryter,
- E. Sanders, H. Schamis, M. Shefter, V. Shue,
- A. M. Smith, J. J. Suh, S. G. Tarrow, N. T. Uphoff, C. Way
- N. I. Uphon, C. way

Government is what Cornell calls a department that elsewhere might be termed political science. The focus of this discipline is power applied to public purposes. Some faculty concentrate on purposes, some on applications. Some engage in the close reading of great texts of political philosophy, while others analyze the behavior of power-wielders and publics in this and other societies. Government is divided into four subfields: U. S. political theory (philosophy), and international relations (transactions between nations).

To accommodate new courses or course changes, a supplementary announcement is prepared by the department. Before enrolling in courses or registering each term, students are requested to consult the current supplement listing courses in government, available in 125 McGraw Hall.

#### The Major

To be admitted to the major, a student must pass two government courses.

#### To complete the major, a student must:

- (1) pass two of the introductory government courses (GOVT 111, 131, 161, 181);
- (2) pass an additional course in one of the remaining subfields (American government, comparative government, political theory, or international relations). This course may be any course offered in the government department, including introductory courses, upper-level courses or seminars. Students are strongly advised to take at least one course in each of the four subfields;
- (3) accumulate an additional 28 credits of government course work at the 200-level or above;
- (4) complete at least one seminar-style course in government which may be applied toward the 28 credits. These courses include those numbered 400.XX to which students are admitted by application only;
- (5) accumulate 12 credits in upper-level courses in related fields (such as anthropology, economics, history, science and technology studies, psychology, and sociology). Upper-level courses are usually courses numbered at the 300 level or above (200-level courses are not considered upper-level). Students should consult with their major adviser to choose appropriate courses. All choices of related courses must be approved by the major adviser or the director of undergraduate studies;
- (6) all courses used to fulfill a government major must be passed with a letter grade.

To summarize, a total of 10 government courses and three additional courses (12 credits) of upper-level related courses are required to complete the major. For more information about the Government major, please visit our website: (http:// falcon.arts.comell.edu)

**Cornell-in-Washington Program.** Government majors may apply to the Cornell-in-Washington program to take courses and undertake a closely supervised externship during a fall or spring semester.

#### European Studies Concentration.

Government majors may elect to group some of their required and optional courses in the area of European studies, drawing from a wide variety of courses in relevant departments. Students are invited to consult Professors P. Katzenstein, J. Pontusson, and S. G. Tarrow for advice on course selection and foreign study programs.

Model European Community Simulation. Undergraduates with an interest in the European Union, public affairs, or debating may participate in an annual European Union simulation held, on an alternating basis, in April at SUNY Brockport or in January in Brussels. The simulation provides an opportunity for participants, representing politicians from the members states, to discuss issues and resolutions of current concern to the European Union.

To prepare for the simulation, a two-credit course is offered by the Government department each year (GOVT 431 or GOVT 432). Participation in the simulation is open only to those who register for this course. Anyone interested in participating or finding out more information should contact the Institute for European Studies at 120 Uris Hall, 255-7592

International Relations Concentration. See the description under "Special Programs and Interdisciplinary Studies.

Honors. Application to the honors program is made in the early spring of the junior year. For more information about the Honors Program and an application form, please visit our website: (http://falcon.arts.cornell.edu/ Govt)

#### **Introductory Courses**

Students registering for introductory courses should register for the lecture only. Sections are assigned during the first week of class. Introductory courses are also offered during summer session.

#### **GOVT 111** Introduction to American Government and Politics (III)

Fall and summer. 3 credits. T. J. Lowi. An introduction to government through the American experience. Concentration on analysis of the institutions of government and politics as mechanisms of social control.

## **GOVT 131 Introduction to Comparative**

Government and Politics (III) Spring and summer. 3 credits.

I. Pontusson.

This course provides a survey of the institutions, political processes, and policies of contemporary states. It focuses on the conditions for and workings of democracy. Looking at Western Europe, we analyze institutional variations among liberal democracies, and their political implications. We then probe the origins of democracy in Western societies and the reasons why communism and other forms of authoritarian rule have prevailed elsewhere. Finally, we explore the impetus behind and the obstacles to democratization in the Third World and the erstwhile Communist Bloc. Throughout this survey, problems of democracy are related to problems of economic development, efficiency, and equality.

## **GOVT 161** Introduction to Political Philosophy # (III) Spring. 3 credits. N. Hirschmann.

A survey of the development of Western political theory from Plato to the present. Readings from the works of the major theorists. An examination of the relevance of their ideas to contemporary politics.

#### **GOVT 181** Introduction to International Relations (III)

Fall and summer. 3 credits. J. Kirshner. An introduction to the basic concepts and practice of international politics.

## **First-Year Writing Seminars**

Consult the John S. Knight Institute brochure for times, instructors, and descriptions.

## **Major Seminars**

#### GOVT 400 Major Seminars Fall or spring. 4 credits.

These seminars, emphasizing important controversies in the discipline, cap the majors' experience. Thus preference in admission is given to majors over nonmajors and seniors over juniors. Topics and instructors change each semester. To apply, students should pick up an application in 125 McGraw Hall during the course selection period the semester before the seminar is given.

The following courses are open to sophomores, juniors, and seniors without prerequisites unless otherwise indicated.

#### American Government and Institutions

GOVT 111 is recommended.

#### [GOVT 302 Social Movements in **American Politics (also AM ST** 302) (III)

Not offered 2002-2003.]

**IGOVT 303** Introduction to American Political Parties (III) Not offered 2002-2003.]

#### [GOVT 305 Atomic Consequences: The Incorporation of Nuclear Weapons In Post-War America (III) 4 credits. Not offered 2002-2003.1

#### [GOVT 308 Science in the American Polity 1800-1960 (also S&TS 390) (111)

Not offered 2002-2003. See S&TS 390 for description.]

#### **GOVT 309 Science In the American** Polity (also S&TS 391) (iii)

Fall. 4 credits. M. Dennis. This course reviews the changing political relations between science, technology and the state in America from 1960 to the present. It focuses on the politics of choices involving science and technology in a variety of institutional settings, from Congress to courts and regulatory agencies. The tensions and contradictions between the concepts of science as an autonomous republic and as just another special interest provide the central theme for the course. Topics addressed include research funding, technological controversies, scientific advice, citizen participation in science policy, and the use of experts in courts.

## GOVT 311 Urban Politics (III)

Fall. 4 credits. M. Shefter. Covers the major political actors, institutions, and political styles in large American cities: mayors, city councils, bureaucracies, ethnic and racial minorities, urban machine politics, and the municipal reform movement. Considers the implications of these political forces for policies pertaining to urban poverty, homelessness, and criminal justice.

## **GOVT 313** The Nature, Functions, and Limits of Law (III) Spring. 4 credits. Undergraduates only.

R: Hillman.

A general education course for students at the sophomore and higher levels. Law is presented not as a body of rules but as a set of varied techniques for resolving conflicts and dealing with social problems. The roles of courts, legislatures, and administrative

agencies in the legal process is analyzed, considering also the constitutional limits on their power and practical limits of their effectiveness. Assigned readings consist mainly of judicial and administrative decisions, statutes and rules, and commentaries on the legal process. Students are expected to read assigned materials before each class and to be prepared for participation in class discussion.

#### GOVT 314 Prisons (III)

Fall. 4 credits. M. Katzenstein. This seminar looks at the politics of incarceration. Why is prison construction a growth industry? What is the role of public policy and of the law in this process of prison expansion? How does race and racism in American society figure in this? Are women's prisons designed to respond to the needs of a "generic-male" prisoner or are they organized around women's needs? Are there "spaces" within the prison (educational programs, libraries, chaplain's offices) which alleviate the grim realities of prison life. We devote a section of the course to reading about and discussing different forms of political activism on behalf of prison reform. Seminar members should plan on an occasional extra class time, likely to be on a Wednesday or Thursday evening, to hear guest speakers and see films.

## GOVT 316 The American **Presidency (III)** Fall. 4 credits. E. Sanders.

Analysis of the politics of the presidency and the executive branch with emphasis on executive-legislative relations, executive branch policymaking, and the problems of the modern presidency.

## GOVT 317 Campaigns and Elections (III) Fall. 4 credits. W. Mebane.

This course examines campaigns and elections, focusing primarily on national elections in the United States. Topics include the relationship between elections and the economy, the weakness of the American party system, voter turnout, individual voting decisions, negative campaigning, and the noncompetitiveness of congressional elections. We examine several theories that explain these phenomena, including in particular the theory of rational choice. Course requirements include one or two papers based on original analysis of election survey data.

[GOVT 318 The American Congress (III) Not offered 2002-2003.]

#### [GOVT 319 Minority Politics in the US (also LSP 319) (III) Not offered 2002-2003.]

[GOVT 320 Public Opinion and Public Choice (III) Not offered 2002–2003.]

#### [GOVT 324 Legal Reasoning and Legal **Adaptation: A Comparison of** American and Talmudic Law (III) Not offered 2002-2003.]

#### GOVT 327 Civil Liberties in the United States (also AM ST 310) (III) Fall. 4 credits. Course will be taught in Washington, D.C. J. Rabkin.

An analysis of contemporary issues in civil liberties and civil rights, with emphasis on Supreme Court decisions. Cases are analyzed in terms of democratic theory and the social and political context in which they arose.

#### [GOVT 353 Feminism Movements and the State (also WOMNS 353) (III) 4 credits. Not offered 2002-2003.]

#### **GOVT 402 New York Politics** Fall. 4 credits. M. Luster.

New York is arguably the most politically, economically, socially, ethnically and demographically diverse state in the nation. How its government manages to operate at all is sometimes a wonder. This course examines the structure, traditions, tensions, and processes of its political institutions, with a particular focus on the legislature, in an effort to understand how a contentious, partisan, and historically brutal political climate has often produced great leaders and positive results. With the "devolution revolution" still underway, the course will help students better understand the role of state government and how it functions in the turbulent world of New York politics.

#### [GOVT 404 American Political **Development in the 20th Century** (co-taught with GOVT 612) (III) Not offered 2002-2003.]

#### **GOVT 408** Politics of the American Civil War (also AM ST 430) # (iii)

Spring. 4 credits. R. Bensel. The Civil War, along with the Founding of the nation in the late eighteenth century, is one of the two most important influences on the course of American political development. Arising out of intense ideological, cultural, and economic competition between the slave South and the free labor North, the conflict created two new national states: a northern Union that replaced the loose federation of the antebellum period and a southern Confederacy that perished at Appomattox. In this course, particular attention is paid to: the political economy and culture of plantation slavery in the antebellum South; the apparent inevitability of collision between the slave and free states and their respective societies; the military, political, and economic strategies that determined, on both sides, the course and duration of the war; the limits and possibilities of reform of southern society during Reconstruction; and the impact of the Civil War on the subsequent development of the United States.

#### **[GOVT 412 American Political Parties** and Elections (III)

4 credits. Not offered 2002-2003.]

#### [GOVT 413/613 Finance, Federalism, and Politics (III)

4 credits. Not offered 2002-2003.]

#### GOVT 427 Immigrants, Membership, and Citizenship (also LSP 430 and AM ST 430.4) (111)

Fall. 4 credits. M. Jones-Correa. Immigrants are increasingly important players in the politics and economies of industrialized societies. However, in many cases despite their residence in these societies, their membership and citizenship status is often in question. At times migrants are undocumented, living and working at the fringes of the protections and regulations afforded by the legal system. Or they may petition to enter as refugees, having to prove their right to stay. Even if residing permanently, immigrants may still not be citizens of their receiving country, or if they are, they may have dual nationality. This course explores the complications of membership and citizenship among migrants,

refugees and immigrants, focusing largely on immigration to the United States.

## GOVT 428/728 Government and Public Policy: An Introduction to Analysis and Criticism (III)

Fall. 4 credits. T. J. Lowi. GOVT 428 concentrates on history and criticism of U.S. policies and the politics associated with them. Particular attention is given to the origins and character of the regulatory state and the welfare system.

#### **GOVT 429** Government and Public **Policy: An Introduction to Analysis** and Criticism (III)

Spring. Open to undergraduates. 428 and consent of instructor are required for 429. T. I. Lowi.

GOVT 429 is an opportunity to pursue further the research begun in 428.

## **Comparative Government**

GOVT 131 is recommended.

## [GOVT 326 Building a Better Democracy (III) Not offered 2002–2003.]

#### GOVT 330 Europe, the US, and Japan in the Global Economy (also ILRIC 333) (111)

Fall. 4 credits. L. Turner. For a description, see ILRIC 333.

#### GOVT 332 Modern European Politics (III)

Fall. 4 credits. D. Schirmer. The course gives an introduction to politics and political systems in Western Europe. It starts with a brief history of the formation of the nation state and the establishment of democratic rule. It continues with the modes and structures of political conflict and explores political cultures, party and electoral systems, the roles of interest groups and social movements, and the mass media. It then turns to a discussion of parliament and government. The main countries studied include Britain, France, Germany, and Italy. The main dimensions guiding the comparison are conflict vs. consent, federalism vs. centralism, parliamentary vs. presidential systems, and majority vs. proportional representation. The course concludes with a discussion of minority-majority relations and the problem of democratic inclusion.

#### **[GOVT 333 Government and Politics of** the Former Soviet Union (III) Not offered 2002-2003.]

#### [GOVT 334 Political Economy of East Asia @(III)

Not offered 2002-2003.]

#### [GOVT 335 America in the World # (III) Not offered 2002-2003 ]

#### **GOVT 336** Postcommunist Transitions (III)

Spring. 4 credits. V. Bunce. This course compares economic and political developments since the collapse of communism in Eastern Europe and the former Soviet Union. Primary emphasis is placed on the relationship between democratization and the transition to capitalism, with some attention paid as well to nationalism and (for the new states in the region) state-building. Cases examined in greatest detail vary by year, but are always multiple so as to encourage comparative observations and generalizations.

#### **GOVT 338** Comparative Political Economy (III)

Spring. 4 credits. C. Way.

This course examines the juncture of politics and the economy in the advanced industrial democracies. Why do some countries have large, inclusive welfare states while others have minimal social programs? Is the welfare state in decline, and if so why? Does it really make any difference for the economy whether parties of the left or right govern? Do strong unions have negative effects on the economy, or can they actually boost economic performance? What does increasing globalization of the world economy mean for the constraints and opportunities facing governments in managing the economy and providing social welfare? How will the Euro and increasing European integration change the world? Are all market economies pretty much the same, or are there varieties of capitalism that differ in important ways? We use a variety of theoretical perspective to provide some insight into these and other questions, paying particular attention to evaluating the theoretical arguments with both systematic and historical evidence.

#### **GOVT 340 Latin American Politics** @ (111)

Spring. 4 credits. H. Schamis. This course is an introductory lecture on the politics of Latin America. The main purpose is to view the region in a conceptual and comparative perspective. Country cases are introduced in order to understand the fundamental historical processes as well as to explain the significance of competing theoretical frameworks that have shaped the debate in the field. The course focuses on the political economies of the region in order to analyze the role of groups and classes under different political regimes and contrasting strategies of development.

#### GOVT 341 Modern European Society and Politics (also SOC 341) (III)

Spring. 4 credits. S. Tarrow Since the French and industrial revolutions, modern Europe has been the major source of innovation and stability, freedom and imperialism, war and peace, capitalism and socialism, rule of law and state terror, and modernity and its critics. Even the 50-year division of the continent by the Cold War could not destroy its common, but contradictory heritage. This interdisciplinary core course in Modern European Studies serves as an introduction to European society and politics. Topics include European statebuilding and capitalism, nationalism and socialism, cycles of revolution and reaction, stratification and mobility, law and violence, and war and democracy. The course ends with an introduction to the European Union and its conflicts. May be taken separately, or in combination with GOVT 342, The New Europe, which focuses on contemporary Europe. If qualified student interest permits, a section may be offered in French or German.

#### [GOVT 342 United Germany in the New Europe (III)

Not offered 2002-2003.]

#### (GOVT 343 The Politics of European Integration (III) Not offered 2002-2003.]

**GOVT 344** Government and Politics of Southeast Asia (III) Fall. 4 credits. L. Ryter.

The course focuses on the comparative analysis of the nature and origins of political conflict in selected Southeast Asian nationstates. Particular attention is given to nationalism/ethnicity, religion, and class, as well as to the differential impact of colonial nile

#### [GOVT 346 Modern Japanese Politics @ (111)

Not offered 2002-2003.]

# GOVT 347 Government and Politics of China @ (III)

Fall. 4 credits. Staff.

An introduction to the main currents in China's domestic politics over the last 60 years. Topics include the revolutionary rise of communism; Maoism, in theory and in practice; the politics of bitterness during the 'Cultural Revolution"; the evolving roles of the party and the military, and of peasants, workers, and intellectuals in the polity; the prospects for democracy, perceived social inequality, violence, corruption, and other pressing problems that have emerged with the reforms under Deng Xiaoping.

# GOVT 354 Capitalism, Competition, and Conflict in the Global Economy (III) Fall. 4 credits. P. Katzenstein.

Unemployed autoworkers in Detroit and the wood stoves in New England signal an important change in America's relation to the world economy. This course characterizes these changes in a number of fields (trade, money, energy, technology), explains them as the result of the political choices of a declining imperial power that differs substantially for the choices of other states (Japan, Germany, Britain, France, the small European states, and Korea), and examines their consequences for America and international politics.

## [GOVT 356 Enlarging the New Europe: Labor, Business, and Politics (also ILRIC 337) (III) Not offered 2002-2003.]

#### **GOVT 357** American Indian Politics and Policy (also AIS 367 and R SOC 367) (IH)

Fall. 3 credits. Enrollment limited to 20. B. Baker

This course addresses the Constitutional basis of the Federal-Indian Relationship through an examination of treaties, Supreme Court decisions, and Congressional law/policy. The effects of European and American forms of governance on traditional American Indian political structures are detailed and contrasted with contemporary tribal governments and political organizations. Issues relating to sovereignty and self-governance with respect to American Indian tribal governments are addressed relative to state and federal governments.

#### [GOVT 358 Imagining the Modern Middle East (also NES 294, JWST 294) @ (111)

Not offered 2002-2003 1

#### [GOVT 415 Race, Gender, and **Organization (III)** Not offered 2002-2003.]

#### [GOVT 432 Model European Union II (III) Not offered 2002-2003.]

#### **GOVT 433 The Politics of Economic** Liberalization in the Developing World @ (111)

Fall. 4 credits. H. Schamis. What drives the current processes of economic liberalization taking place in most of the developing world? What kinds of constraints and opportunities do governments embarked upon such policy reforms face? What types of factors account for their success or failure? What is the relationship between the international dimension of this phenomenon and the domestic political conditions? This seminar addresses these questions by examining the interplay of domestic and international ideas, local and foreign actors, and national and transnational institutions which take part in these processes. The course focuses extensively on, but is not limited to, Latin America.

## [GOVT 436 Environmental Politics and Policy (III) Not offered 2002–2003.]

#### GOVT 437 Contemporary China: Society and Politics @ (III) Spring. 4 credits. Staff.

Selected reading and in-class discussion of some of the central dilemmas that have been posed by the rapidly escalating processes of social change taking place under conditions of continuing political authoritarianism in China today. Topics include broad changes in demographic and social structure; rising tensions in family and gender relations; the enduring salience of community and workplace; the resurgence of Chinese nationalism, of ethnic nationalisms, of regionalism, and of popular religious movements; the significance of rising rates of crime and of political corruption; the growing crisis of social welfare delivery; and the limits on political dissent and on the development of civil society.

#### [GOVT 438 Contemporary China: Political Economy @ (III) 4 credits. Not offered 2002-2003.]

#### [GOVT 439 Japan in International Politics @ (III)

4 credits. Not offered 2002-2003.]

#### [GOVT 440 The Political Economy of Market Reform (also GOVT 630) (III) 4 credits. Not offered 2002-2003.]

#### **GOVT 448 The Quality of Democracy in** Latin America @ (III)

Fall. 4 credits. K. O'Neill. This course explores major issues affecting the quality of democracy in Latin America. We begin by trying to capture the many meanings of the term "democracy" and by thinking through how it is possible to measure changes in the quality of democracy over time. The course examines both institutional bases for Latin America's level of democracy-whether the quality of democracy is affected by government structures in the region-and also specific topics that impact the region's democracies. These subjects include ethnic mobilization, guerrilla insurgencies, civil wars and peace processes, human rights violations, rising poverty rates, income inequality, and economic globalization.

#### [GOVT 456 Poor People's Movements (III)

4 credits. Not offered 2002-2003.]

#### [GOVT 458 Comparative **Democratization (III)**

4 credits. Not offered 2002-2003.]

#### **Political Theory**

GOVT 161 is recommended.

**[GOVT 260 Social and Political Philosophy** (also PHIL 260) (III or IV) 4 credits. Not offered 2002-2003.]

#### GOVT 293 Inequality, Diversity, and Justice (III or IV)

Fall. 4 credits. R. Miller. See PHIL 193 for description.

## GOVT 360 Ideology (III)

Fall. 4 credits. D. Rubenstein. This course focuses on critical approaches to the study of ideology in order to understand the role of ideology in political subject formation. After an initial exploratory presentation of key Marxist (Marx, Gramsci, Althusser, Hebdige), structuralist/semiotic (Barthes, Eco) and psychoanalytic models (Freud, Lacan), we focus on specific ideologies of race, technology and gender. Students are required to write a 7–8 page take-home examination and a longer 10-12 page (double spaced) paper related to the issues addressed by the course material. A recommended bibliography is available to assist in the selection of the final paper topic.

#### GOVT 364 The Selfish Individual in the Modern World (III)

Spring. 4 credits. Enrollment limited. N. Hirschmann.

Michael Milken and Ivan Boesky broke the law: but did they really do anything wrong? Is acting selfishly simply human nature, or its perversion? Do we have natural obligations to others, or is everyone out for themselves? This course considers these questions through the lens of modern political theory from Hobbes to contemporary times. We consider the relation of the individual to society to examine different understandings of "the individual." and how they change over time. In the process, we examine how these understandings affect the meaning of concepts such as freedom, equality, and justice, as well as the form and role of government. This course follows a seminar format and rely heavily on class discussion.

#### **GOVT 366 American Political Thought** from Madison to Malcolm X (also HIST 316 and AM ST 366) # (III) Fall. 4 credits. I. Kramnick.

A survey of American political thought from the eighteenth century to the present. Particular attention is devoted to the persistence of liberal individualism in the American tradition. Politicians, pamphleteers, and poets provide the reading. Insightful historical and social context is offered.

#### [GOVT 369 Introduction to Feminist **Political Thought (also WOMNS** 359) (111)

Not offered 2002-2003.]

#### GOVT 370 Political Theory and Cinema (also GERST 330, COM L 330, THETR 330) (III or IV) Fall. 4 credits. G. Waite.

For description, see GERST 330.

#### GOVT 375 Visual Culture and Social Theory (also ART H 370 and COM L 368) (III or IV)

Spring, 4 credits. S. Buck-Morss. Introduction to critical concepts for the analysis of visual culture in specific sociohistorical contexts.

#### GOVT 377 Concepts of Race and Racism (III)

Spring. 4 credits. A. M. Smith. This course examines race and racism from a political theory perspective. We discuss the different types of racism: traditional racism, "new racism" or cultural racism, scientific racism and contemporary hybrid racism. We then examine the politically ambiguous "ethnicity theory." In the second half of the course, we consider the works by Marable on African American political economy; women of color feminist theorists; native American theorists: Takaki on Asian American labor history; and Hero on Latinos/Latinas and American politics. Although we discuss American multicultural history in some detail, our primary focus is on an investigation of these works' theoretical foundations.

#### GOVT 462 Modern Political Philosophy (also PHIL 346) (III or IV)

Fall. 4 credits. R. Miller. See PHIL 346 for description.

#### GOVT 464 Theorizing the Public Sphere (also GERST 496, COM L 496) (III or IV)

Fall. 4 credits. P. U. Hohendahl. For description, see GERST 496.

## GOVT 465 Reconceiving Liberalism (also

PHIL 447) (III or IV) Spring. 4 credits. R. Miller. For description, see PHIL 447.

#### GOVT 466 Topics Pol Phil: Islamism (III)

Fall, 4 credits. Open to graduate students and juniors and seniors who have taken GOVT 161 or 300-level course in political theory. S. Buck-Morss.

Topics vary, but all analyze texts written by non-European and non-U.S.theorists who have inspired modern political and social movements. Attention is given to the political and theoretical presuppositions embedded in the very conception of the "West," the hegemony of its political discourses, and how these figure into the meanings of "modernity, "progress," "universal rights," and "liberation." In fall 2002 the topic will be Islamism. We will read philosophical texts by Ayatollah Ruhallah Khomeini, Hassan al-Banna, Muhammad Igbal, Ustadh Mahmoud, Savyid Qutb, and Ali Shariati, and commentaries by academic scholars: Mohammed Arkoun, Talal Asad, Saba Mahmood, Bobby Sayyid, Azzam Tamini, Bassam Tibi, as well as historical and socialscientific analyses of political events influenced by Islamism. (In alternate years, Latin American and Caribbean writers and social movements are the focus.)

#### GOVT 467 Radical Democratic Feminisms (III)

Spring. 4 credits. A. M. Smith. Radical Democratic Feminisms is an advanced feminist theory seminar. We focus on contemporary political discourses that are influenced by socialist feminism, radical democratic pluralism, critical race theory, and radical anti-racist and anti-heterosexist multiculturalism. The reading list includes works by Sheila Rowbotham, Joan Scott, Michele Barrett, Lynne Segal, Zillah Eisenstein, Frances Fox Piven, Barbara Ehrenreich, Jacqui Alexander, Chandra Talpade Mohanty, Judith Butler, Anne McClintock, Angela Davis, Alice Echols, Lisa Duggan, Nan Hunter, Renata Salecl, Patricia J. Williams, Gayatri Spivak, and bell hooks. Students should have completed at least one course in feminist theory and at least one course in social theory or political theory before taking this course.

[GOVT 469 Limiting War (also PHIL 369) (III or IV)

4 credits. Not offered 2002-2003.]

[GOVT 471 The Cultural Theory of the Frankfurt School (also GERST 495, COM L 495) (III or IV) 4 credits. Not offered 2002–2003.]

[GOVT 473 Marx, Nietzsche, Freud (also GERST 415) (III or IV) 4 credits. Not offered 2002–2003.]

[GOVT 474 Community, Nation, and Morality (also PHIL 446) (III or IV) 4 credits. Not offered 2002–2003.]

## **International Relations**

GOVT 181 is recommended.

[GOVT 380 The Politics of Modern Germany (III)

4 credits. Not offered 2002-2003.]

#### [GOVT 382 International Relations of East Asia @ (III) 4 credits. Not offered 2002–2003.]

#### GOVT 384 Contemporary International Conflicts (III)

Fall. 4 credits. J. J. Suh. This is a survey of contemporary international conflicts. After a brief review of theoretical literature on the causes of conflict/war, we address some of the more salient international security issues such as proliferation of weapons of mass destruction, missile defense, civil wars, and ethnic conflicts. We also critically evaluate whether the use of force or outside intervention is helpful in mitigating the contemporary conflicts.

## GOVT 385 American Foreign Policy (III)

Fall. 4 credits. R. McDermott. This course provides an overview of the history of American foreign policy, concentrating on the period between 1914 and the present. Various theoretical approaches to the study of American foreign policy are covered, including international, domestic, and individual levels of analysis. These interpretations are used to examine events including: the First World War and the League of Nations; the rise of American hegemony; various crises of the Cold War, including the U-2 crisis, the Suez and Berlin crises, and the Cuban missile crisis; and the Korean, Vietnamese, and Gulf Wars. Emphasis is placed on security as opposed to economic foreign policy issues.

#### [GOVT 386 The Causes of War (III) Not offered 2002–2003.]

#### GOVT 387 Political Psychology in International Relations (III)

Spring. 4 credits. R. McDermott. This course provides a survey of how social and cognitive psychology are used in the study of international relations. This course covers various methodologies, including psychobiography and experimental and survey research. It also covers several theoretical approaches, including recent work in neuroscience and evolutionary psychology. These theories and methods are applied to topics including risk taking, leadership, group dynamics, and the influence strategies of the media. Particular attention is placed on the interaction of emotion, cognition, and behavior in processes of judgment and decision making.

#### [GOVT 388 International Political Economy (III)

4 credits. Not offered 2002-2003.]

#### GOVT 389 International Law (III) Spring. 4 credits. J. Rabkin.

Is international law a pious delusion, helpless in the face of real power? Or is public policy becoming so entangled in international standards that international law is now eroding national sovereignty? This course surveys the theoretical foundations and general history of international law since the 17th Century in order to highlight what is new in the doctrines and institutions by which it operates in the contemporary world. The course gives special attention to the relation between international and U.S. law and to the workings of international law in particular fields-including environmental and human rights protection, trade regulation, and control of terrorism.

#### [GOVT 390 International Relations and Film Theory (III) Not offered 2002–2003.]

Not oncice 2002-2003.

#### [GOVT 391 Chinese Foreign Policy @ (III)

Not offered 2002-2003.]

[GOVT 392 International Relations of the Middle East (also NES 395) @ (III) 4 credits. Not offered 2002–2003.]

#### [GOVT 393 Introduction to Peace Studies (also SOC 310) (III) Not offered 2002–2003.]

#### GOVT 395 New Forces (Actors and Issues) in International Politics (III) Spring, 4 credits, A. Carlson.

How important are regional groupings, nongovernmental organizations, narco-terrorists, ethnic groups, and transnational environmental issues, within international politics? These forces seem to be occupying an increasingly central position in the international arena, yet the factors that have caused their rise, and the degree to which they have transformed the face of international politics, are still poorly understood. In this course we address such issues through exploring how students of international politics have described and explained the emergence of these new forces in the international system during the post-Cold War period. In short, the course focuses on determining the extent to which we are witnessing a transformation of the international political system, and why such a change is (or is not) taking place.

#### [GOVT 475 The Politics of International Monetary and Financial Relations (III)

4 credits. Not offered 2002-2003.]

**GOVT 476** The Politics of Disease (III) Spring. 4 credits. Enrollment limited to 15 students. R. McDermott.

This course covers several specific aspects of public health policy. First, the effect of diseases like AIDS on the economic, political, and cultural institutions in the United States and Africa are examined. Second, the way in which the United States government has responded to various epidemics and disease outbreaks is explored. Why is it that some diseases receive more funding than others? How has the public health system responded to the outbreak of epidemics, both historically and currently? What are the politics behind the development and marketing of new drugs? In the final section of the class we discuss bioterrorism. How does it work? What responses can we put in place to defend against it?

#### [GOVT 477 Rational Choice Approaches to International Relations (III) 4 credits. Not offered 2002–2003.]

[GOVT 478 Decision Making (III) 4 credits. Not offered 2002–2003.]

[GOVT 479 Sovereignty and International Relations (III)

4 credits. Not offered 2002-2003.]

#### GOVT 481 Democracies in the International System (III)

Fall. 4 credits.

Now offered as GOVT 400.02.

## GOVT 482 Uniting China, Integrating with the World (III)

Fall. 4 credits. Enrollment by permission of the instructor. A. Carlson.

This seminar is intended to examine the increasingly complex relationship that has evolved between China and the rest of the international system during the 1980s and 1990s. In it, emphasis is placed upon the inter-related, yet often contradictory, challenges facing Beijing in regards to the task of furthering the cause and interdependence with the global economy. More specifically, we delve into the ongoing controversies within China over Tibet and Taiwan's international status, membership in the WTO, and the rise of Chinese nationalism. Exploration of these issues is framed within a consideration of the broader literature in international relations theory and comparative politics

#### [GOVT 483 The Military and New Technology (also S&TS 483) (III) Not offered 2002–2003.]

[GOVT 486 Gender, Nationalism, and Conflict (III) 4 credits. Not offered 2002–2003.]

#### GOVT 487 Asian Security (also GOVT 687) (III)

Spring. 4 credits. A. Carlson, J. J. Suh. Throughout the 1990s it has been part of the conventional wisdom of international relations scholarship that Asia was, in the words of Aaron Friedberg, "ripe for rivalry." In this seminar we explore the accuracy of such an assessment through studying Asia's historical and contemporary security situation. Such an examination is oriented toward introducing students to the main security issues confronting Asia, alongside an exploration of the extent to which competing explanations drawn from different strands of IR theory and the security field can explain such issues. In addition, we ask students to challenge the limitations of traditional security studies through considering the importance of new actors and issue areas within the region. In short, while the seminar has a regional focus on east Asia, it is framed within the broader literature of the field.

#### GOVT 490 International Institutions (also GOVT 690) (III) Fall. 4 credits. J. J. Suh.

This is a study of the ways in which units in the international system are constituted and how their interactions are institutionalized. We examine not only formal international organizations that have formal decisionmaking rules and palpable entities, but also "settled practices" the legitimize certain actions and de-legitimize others. We develop our theoretical understanding of international institutions by analyzing such issue areas as decolonization, human rights, the environment and communications

#### GOVT 491 Conflict, Cooperation, and Norm: Ethical Issues in International Affairs (also GOVT 691) (III)

Spring. 4 credits. M. Evangelista. This course examines current and historical issues in international relations from the perspective of international law, norms, and ethics.We develop general principles and concepts, such as "just war," "national interest," and "human rights," and apply them to real-world situations. Most of the focus of the course is on particular cases that involve legal and ethical issues: violations of human rights and genocide; war crimes; military intervention; economic sanctions; environmental degradation; economic injustice. The first part of the course examines these issues using examples from 20th century international affairs, including recent events. The second part focuses on current issues that pose ethical problems for the foreign policy of the United States: internal violence and human rights abuses in the former Yugoslavia and former Soviet Union; indigenous uprisings in Mexico and their relation to U.S. foreign economic policy; the appropriate U.S. response to situations in countries such as Haiti, Nigeria, and China.

#### **Honors Courses**

#### GOVT 493 Studying Politics: The Junior Honors Seminar

Fall and spring. 4 credits. Fall, H. Schamis; spring, M. Evangelista. The seminar meets twice weekly under the supervision of a senior faculty member with

supervision of a senior faculty member with numerous classes being led by other members of the department faculty. The seminar surveys the broad range of what we mean by "the study of politics" and the various methods we enlist to carry out the study. The seminar is writing intensive, requiring at least five papers.

#### GOVT 494 Honors Seminar: Thesis Clarification and Research

Fall. 4 credits. A. M. Smith. A seminar designed to support thesis writers in the Honors Program during the early stages of their research projects. Limited to students who have been accepted into the Honors program.

#### GOVT 495 Honors Thesis: Research and Writing

Spring. 4 credits. Limited to students who have successfully completed GOVT 494.

## **Independent Study**

Independent study, GOVT 499, is a one-onone tutorial which is arranged by the student with a faculty member of their choosing. GOVT 499 is open to government majors doing superior work, and it is the responsibility of the student to establish the research proposal and to find a faculty sponsor. Applicants for independent study must present a well-defined program of study that cannot be satisfied by pursuing courses in the regularly scheduled curriculum. No more than four credits of independent study may count toward fulfillment of the major. Students who elect to continue taking this course for more than one semester must select a new theme or subject each semester. Credit can be given only for work that results in a satisfactory amount of writing. Emphasis is on the capacity to subject a body of related readings to analysis and criticism. Keep in mind that independent study cannot be used to fulfill the seminar requirement. The application form for Independent Study is available in 125 McGraw Hall and must be completed at the beginning of the semester in which the course is being taken.

#### **GOVT 499 Readings**

Fall or spring. 1-4 credits.

## **Graduate Seminars**

Qualified undergraduates are encouraged to apply for seminars listed with 600 course numbers but may only register with the permission of the instructor. Students may consult the supplement that lists graduate courses, available in the department office.

#### **Field Seminars**

#### GOVT 603 Field Seminar in American Politics

Fall. 4 credits. E. Sanders and W. Mebane. The basic issues and institutions of American government and the various subfields of American politics are introduced. The focus is on substantive information and theoretical analysis and problems of teaching and research.

#### GOVT 606 Field Seminar in International Relations

Fall. 4 credits. A. Carlson, P. Katzenstein. A general survey of the literature and propositions of the international relations field. Criteria are developed for judging theoretical propositions and are applied to the major findings. Participants are expected to do extensive reading in the literature as well as research.

#### GOVT 607 The Western Political Tradition: A Survey

Spring. 4 credits. N. Hirschmann. An introduction to political theory through a reading of selected classics in political thought from Plato to Marx.

#### Methodology

- [GOVT 601 Scope and Methods of Political Analysis Not offered 2002–2003.]
- [GOVT 602 Seminar in Political Methodology Not offered 2002–2003.]

#### **GOVT 605** Comparative Methods

Fall. 4 credits. J. Pontusson and K. O'Neill. This seminar provides a survey of different methodological approaches to the study of comparative politics: single case studies, comparative case studies based on Millian logic, qualitative comparative analysis, and a variety of quantitative methods. Substantive works are used to illustrate each approach. Throughout, the discussion emphasizes methodological issues that are common to all forms of comparative inquiry.

#### **[GOVT 707 Game Theory for Political** Science

Not offered 2002-2003.]

#### **American Government and Institutions** GOVT 610 Political Identity: Race, Ethnicity, and Nationalism (also LSP 610)

Fall. 4 credits. M. Jones-Correa. The social sciences generally treat ethnicity, nationalism, and race as descriptive categories or variables, while avoiding actually defining these categories, or thinking about how they should be used. The course seeks answers to the following questions: How should we go about describing ethnicity, nationalism, and race? Should we treat them as primordial or as social constructions? Much of the recent literature suggests the latter. If constructed, by whom are they constructed (or by what)? What constrains/structures these constructions? What purposes do these constructions serve? Whom do they serve? Are some constructions better representations of identity than others, and what does this mean? How should we go about applying these categories in political analysis

#### **GOVT 611** The Political Economy of American Development, 1860-1900 Fall. 4 credits. R. Bensel.

This course traces and describes the political economy of national state formation from the last decades of the antebellum period, through the Civil War and Reconstruction eras, and end with the transition to a more industrial society during the late nineteenth and early twentieth centuries. Using a broad survey of the historical literature on these periods, the course investigates: (1) the connection between slavery and the emergence of southern separatism; (2) the impact of conflict between the plantation South and industrializing North on American state formation; (3) the failure of post-Civil War attempts to remold the southern political economy; (4) the role of finance capital markets in industrial and western agrarian expansion and the consequent emergence of monetary issues in national politics; and (5) the political economic basis of possible developmental trajectories other than the high-tariff, goldstandard one actually followed.

## [GOVT 612 American Political Development in the 20th Century (co-taught with GOVT 404) Not offered 2002-2003.]

[GOVT 613/413 Finance, Federalism, and **Politics** 

4 credits. Not offered 2002-2003.]

(GOVT 615 State and Economy in **Comparative Perspective** 4 credits. Not offered 2002-2003.]

#### **GOVT 620** The United States Congress Spring. 4 credits. R. Bensel.

The United States Congress is examined: first, as a "closed system" in which institutional arrangements decisively apportion political power; and, second, as the product of electoral and social forces outside the institution. Emphasis is placed on the historical relationship between institutional growth and state formation, parliamentary rules as both arrangements within which the "rational choices" of legislators are played out and as deliberate, constructions and allocations of political influence, and the use of legislative behavior as evidence in the analysis of fundamental principles of politics. Because the literature on the lower chamber is generally more rich, the House of Representatives receives greater attention than the Senate.

#### **[GOVT 623 The Politics of Courts** Not offered 2002-2003.1

### **GOVT 703** Political Economy

Fall, spring. 4 credits. J. Kirshner. This course undertakes a general survey of the classical and modern theories of political economy. The works of Smith, List, Marx, Weber, Keynes, Shumpeter, Hayek, and Friedman, among others, are studied and placed within the context of the history and evolution of the thought, practice, and method of the field.

#### **GOVT 728 Government and Public Policy** Fall, 4 credits, T. J. Lowi.

For description, see GOVT 428.

#### **Comparative Government**

#### **IGOVT 630** The Political Economy of **Market Reform**

Spring. 4 credits. Not offered 2002-2003.1

#### **[GOVT 632 Politics and Society in** Western Europe

4 credits. Not offered 2002-2003.]

#### IGOVT 638 Latin American Political Economy

4 credits. Not offered 2002-2003.]

#### **IGOVT 639** Studying Political Culture Not offered 2002-2003.]

#### GOVT 641 Revitalizing Labor: A **Comparative Perspective (also ILRIC**

632) Fall. 4 credits. L. Turner.

For description, see ILRIC 632.

#### [GOVT 642 Comparative Political **Economy: East and Southeast Asia** 4 credits. Not offered 2002-2003.]

**[GOVT 645 Chinese Politics** Not offered 2002-2003.]

## **GOVT 647** Criminality and the State

Spring. 4 credits. L. Ryter. Criminality has been approached in the social sciences from a variety of angles. Sociologists following Durkheim have viewed crime as a social anomie. Critical theorists following Foucault have understood criminality as an integral and functional part of the social system. Comparative politics has tended to approach criminality from above, viewing it, for instance, as an inverse measure of the relative degree of institutionalization of legal systems. Meanwhile, empirical studies of postcolonial states (in particular but not exclusively) suggest a problematic indeterminacy between state authorities and criminals. State

officials and institutions may act criminally with impunity (corruption) while criminals may act on behalf of state officials (contracted extra-judicial political violence). This seminar explores the relationship between criminality and the state, mostly in post-colonial contexts, drawing from interdisciplinary theoretical literatures as well as area-specific empirical studies, literature, and film. Although we focus largely on cases in Southeast Asia, where there is an emerging literature on criminality and the state as well as empirical studies, graduate students with other area knowledge are encouraged to bring their materials to the seminar discussions.

#### **IGOVT 653 The Plural Society Revisited** (also ASIAN 607)

4 credits. Not offered 2002-2003.]

## **GOVT 656** Comparative Political

Economy

Fall, 4 credits. C. Way. While exploring selected topics in the comparative political economy of advanced industrial societies, this seminar seeks to delineate "political economy" as a subfield of political science. At the level of theory, our goal is to bridge two research traditions, one concerned with micro-economic issues (industrial organization, industrial policy, competitiveness) and the other concerned with macro-economic issues (wage bargaining, fiscal and monetary policy), and to explore what a synthesis of these research traditions might look like. At the level of methodology, we seek to bridge and integrate qualitative and quantitative approaches to comparative political economy. Students are expected to have some prior exposure to quantitative analysis (e.g., GOVT 601).

# **GOVT 657 Comparative Democratization** Spring, 4 credits. V. Bunce.

This course focuses on the transition from authoritarian to liberal politics in Eastern Europe and in Latin America. Particular attention is paid to Poland, Hungary, Russia as well as Argentina, Brazil, and the notnecessarily-transitional Mexico. During the course, we also bring in a variety of other cases of recent democratization-in particular, Spain, Portugal, Italy, and Greece. Our focus is equally divided between the empirics of these transitions and theoretical understandings of transitions to democracy.

#### **GOVT 660** States and Social Movements (also SOC 660)

Fall. 4 credits. S. Tarrow

Two traditions run parallel in political sociology and comparative politics: the study of statebuilding and state transformation and the study of social movements and contentious politics. In the 1960s and 1970s, they converged in the work of scholars like Charles Tilly, who advanced both fields of study, which then ran along parallel but largely independent tracks. This course seeks to synthesize the two traditions, drawing on both historical and contemporary materials from Europe and the Third World, and searching for the key mechanisms and processes that link forms of contention to processes of statebuilding and state transformation.

#### GOVT 692 The Administration of **Agricultural and Rural Development** Spring. 4 credits. N. Uphoff.

For description, see INTAG 603.

[GOVT 731 Political Ecology 4 credits. Not offered 2002–2003.]

[GOVT 732 Postsocialist Transformations 4 credits. Not offered 2002–2003.]

[GOVT 735 Politics of South Asia 4 credits. Not offered 2002–2003.]

#### **Political Theory**

- [GOVT 663 Political Theories of Power 4 credits. Not offered 2002–2003.]
- [GOVT 665 American Political Thought: From Madison to Malcolm X 4 credits. Not offered 2002–2003.]

[GOVT 667 Major Figures in Modern Political Theory

4 credits. Not offered 2002-2003.]

[GOVT 668 Major Figures in Modern Political Theory II: Freedom Not offered 2002–2003.]

### GOVT 669 Modern Social Theory

Fall. 4 credits. S. Buck-Morss. Readings vary, but topics are drawn from the traditions of Marx, Weber, Durkheim, the Frankfurt School, and Freud. They include political economy, the transformation to "modernity," ideology as the legitimation of power, and social institutions as social constraints. The methods of critical theory, structuralism, poststructuralism, and feminism are considered.

#### [GOVT 670 Modern Social Theory II (also GERST 670)

4 credits. Not offered 2002-2003.]

[GOVT 671 Graduate Seminar in Feminist Political Theory Not offered 2002–2003.]

#### [GOVT 673 Republicanism and Liberalism

4 credits. Not offered 2002-2003.]

#### GOVT 674 Theory and Practice of Nationalism

Spring. 4 credits. D. Schirmer. This course is devoted to the comparative study of the rise and transformation of nationalism, according to different theoretical and philosophical traditions. The relationship of nationalism to questions of race, gender, class, and time is also discussed on the basis of both theoretical and empirical studies.

#### [GOVT 675 Gramsci and Cultural Politics (also GERST 685)

4 credits. Not offered 2002-2003.]

#### [GOVT 760 Theoretical Approaches to Ideology

4 credits. Not offered 2002-2003.]

#### [GOVT 761 "The Sign of History": Kant and Lyotard (also GERST 693) 4 credits. Not offered 2002–2003.]

#### [GOVT 762 Sexuality and the Law Seminar (also WOMNS 762) Not offered 2002–2003.]

#### **International Relations**

#### [GOVT 680 Sovereignty and International Politics

Not offered 2002-2003.]

#### GOVT 681 Politics of Transnationalism (also SOC 661)

Fall, 4 credits, S. Tarrow Between the realism of traditional international relations and the constructivism of its critics, a new school of transnational politics has developed. Ranging from sociological institutionalists who examine transnational normative diffusion to students of international institutions who focus on non-state authority, to students of globalization and its discontents, scholars in this tradition examine the responses of actors in civil society to a globalizing world through their interactions with one another, with states, and with international institutions. The course traces the development of this area of research from its origins in the "old" transnational politics of the 1970s; examines critically the contributions of constructivism, sociological institutionalism, and global civil society; and proposes a model of the international system in which transnational actors-claiming to act as proxies for civil society groups-interact with states and international institutions. Particular attention is paid to the formation of transnational coalitions among social movements, transnational advocacy networks, state actors and agents of international institutions.

#### [GOVT 684 Strategies of Inquiry for International and Comparative Politics

4 credits. Not offered 2002-2003.]

#### GOVT 685 International Political Economy

Spring. 4 credits. C. Way. An exploration into a range of contemporary theories and research topics in the field of international political economy. The seminar covers different theoretical perspectives and a number of substantive problems.

# GOVT 687 Asian Security (also GOVT 487)

Spring. 4 credits. A. Carlson, J. J. Suh. For description, see GOVT 487.

#### [GOVT 688 Political Economy and National Security Not offered 2002–2003 1

Not offered 2002-2003.j

#### **GOVT 689 International Security Politics** Fall, 4 credits. R. McDermott.

This course provides an overview of theoretical and research topics in the area of international security policy. The course covers several theoretical perspectives, including rational choice and psychological approaches to the study of security issues. These perspectives are used to examine various substantive topics including war and deterrence, balance of power, alliance politics, domestic constraints on foreign policy and military strategy. Less attention is paid to issues involving economic cooperation and sanctions.

#### GOVT 691 Conflict, Cooperation, and Norm: Ethical Issues in International Affairs (also GOVT 491)

Spring. 4 credits. M. Evangelista For description, see GOVT 491.

## **Independent Study**

This course is *NOT* open to undergraduates. Undergraduates wishing to conduct supervised study should register for GOVT 499.

## GOVT 799 Independent Study

Fall or spring. 4 credits. GOVT 799 is a course of individualized readings and research for graduate students. Topics, readings, and writing requirements are designed through consultation between the student and the instructor. Graduate students in government who are looking to use this as an option to fulfill their course requirements should check with their chairs to be certain that the program of study is acceptable for this purpose. Applications must be completed and signed by the instructor and by the chairs of their special committees. They are available from, and must be returned to, the graduate assistant in 125 McGraw Hall.

- R. Polenberg, W. B. Provine, M. J. Roldan,
- M. Steinberg, B. Strauss, E. Tagliacozzo,
- M. Washington, R. Weil, J. H. Weiss

Emeritus: D. A. Baugh, J. J. John, W. M. Pintner, J. H. Silbey, F. Somkin, B. Tierney, D. Wyatt

The popularity of history among Cornell students is due to its usefulness as preparation for graduate, professional, or law school and for any career that requires critical thinking and good writing; the reputation of the faculty for scholarship, teaching, and advising; and most of all, the intrinsic interest of the discipline. A wide variety of introductory and advanced courses is offered. The department is particularly strong in ancient, medieval, and modern European history; in American, Latin American, and Asian history; and in the history of science.

# Advanced Placement and International Baccalaureate

Advanced placement and International Baccalaureate credit awarded by the College of Arts and Sciences counts towards the 120 credits needed for graduation, but does not count toward completion of the history major. Students earning a 4 or 5 in the Advanced Placement Examination or a 6 or 7 in the International Baccalaureate history examinations are urged to enroll in intermediate or advanced history classes. Students who are unsure about their qualification should consult the instructor.

#### The Major

To complete the history major, a student must fulfill the requirements listed below:

Entry requirement: completion of *any* two History courses excluding First-Year Writing Seminars.

- Take nine history department courses (for either 3 or 4 credits each), completing all of them with a grade of C or better. (Courses taken for entry may count towards fulfilling the major.)
- 2) Of the total nine courses:
  - a) four must be outside of American history and
  - b) three must be in history before 1800.

Courses used to fulfill requirement (1) above may also be used to fulfill Requirement (2), in respect both to (a) and (b) if applicable. A course in American history before 1800 may be used to fulfill Requirement (2b). A course before 1800 in a field other than American history can be used toward fulfillment of both Requirements (2a) and (2b).

3) Of the total nine courses, one must be a 400-level seminar. HIST 400 may be used to fulfill this requirement. Appropriate 400-level seminars may be used to fulfill Requirements (2a) and (2b).

#### Honors

The history department offers an honors program for students who wish to research and write a thesis during their senior year. In addition to writing the thesis, honors students must maintain a 3.5 average in their history courses, take the Honors Proseminar (History 400) plus an additional 400-level seminar, preferably during their junior year, and complete 10 courses in history (for 3 or 4 credits each). During the second term of the sophomore year or early in the junior year, interested students should speak to a faculty member or faculty adviser about the honors program.

Before the beginning of the senior year, the candidate presents, in conversation or in writing, a thesis proposal to an appropriate member of the faculty. The faculty member who approves the proposal ordinarily becomes the thesis supervisor. If for any reason it is necessary to change supervisors, this arrangement should be confirmed no later than the fourth week after the beginning of the candidate's senior year.

Honors candidates should register in HIST 401. Honors Research, with their supervisors. Any exceptions to this must be approved by the Honors Committee. HIST 401 is a four-credit course that permits honors candidates to conduct research and to begin writing the honors essay. At the end of the first semester of the senior year, as part of the requirements for HIST 401, the student submits to the supervisor a 10- to 15-page overview, or, alternatively, a preliminary draft of some part of the thesis along with an outline of the whole and meets with a committee consisting of the student's supervisor and one other department member who will eventually serve as a reader of the

thesis. That committee then recommends whether the student may proceed to enroll in HIST 402, Honors Thesis, during the final semester of the senior year. HIST 402 is a four-credit course that permits honors candidates to complete the honors essay and to demonstrate their understanding of the ways in which the themes explored in the thesis fit into a larger historical context.

The completed thesis is evaluated by three readers, including the two faculty members who administered the preliminary oral interview in December.

The text of the honors essay may not exceed 60 pages except by permission of the chair of the honors committee and the student's supervisor. Two copies are due during the third or fourth week of April. In May each honors candidate is given an oral examination administered by the supervisor; examination focuses on the essay as well as the specific subfield of history in which the student has conducted research (e.g., Periclean Athens, seventeenth-century science, nineteenthcentury American politics).

To qualify for a bachelor of arts degree with honors in history, a student must (1) sustain at least a 3.5 cumulative average in all history courses and (2) earn at least a cum laude grade on the honors essay and on the oral examination.

**Cornell-in-Washington Program.** History majors may apply to the Cornell-in-Washington program to take courses and undertake a closely supervised externship during a fall or spring semester.

#### **Course Offerings**

- Comparative history
- History of science
- American history
- Latin American history
- African history
- Asian history
- Near Eastern history
- Ancient European history
- Medieval, Renaissance, and early modern European history
- Modern European history Honors and research courses

#### **Course Numbering System**

100-level courses are very general introductory courses (like 151–152, 190–191) and freshman writing seminars.

200-level courses come in two kinds: seminars or lecture courses. Neither kind has prerequisites and both admit freshmen.

200–249-level seminars (which are identified by the name "seminar" in the title) are similar to first-year writing seminars, except that there is greater emphasis on subject matter and less on writing.

250–299-level lecture courses cover a relatively broad geographical area, period of time, or subject.

300–399-level courses may have specified prerequisites or deal with more-specialized subjects than do those numbered 250–299. Admission of freshmen varies from course to course and is indicated in the course descriptions. 400–499 are upper level undergraduate courses.

600-699 and 800-899 are graduate level courses.

#### **Comparative History**

#### [HIST 274 Foodways: A Social History of Food and Eating # (III)

Fall, 4 credits. Not offered 2002–2003. S. L. Kaplan.

An interdisciplinary examination of the validity of the adage "man is what he eats." Among the topics: food and nutrition, food and social structure, the politics of food control, food and modernization, taste making, and food in religion and literature. Cases are drawn widely across space and time, from Pharaoh's Egypt to the 1990s.]

#### [HIST 360 Early Warfare, East and West # (III)

Fall. 4 credits. Not offered 2002–2003. C. Peterson.

A study of the principal modes of warfare found both in the East and the West from ancient times up to the eighteenth century. Tactical evolution and the impact of innovations are stressed, but attention is also paid to the general social and cultural background and the role of nonmilitary factors.]

#### [HIST 380 Social History of Western Technology # (III) 4 credits. Not offered 2002–2003. J. Weiss.

4 credits. Not offered 2002–2003. J. Weiss. For description, see History of Science.]

#### [HIST 393 Images of Humanity in Medieval China (also ASIAN 393) @# (III)

Fall. 4 credits. Prerequisite: any course on premodern China or Chinese religions, or permission. Not offered 2002–2003. C. Peterson.]

#### HIST 409 Seminar on Work in Europe and America # (III)

Fall. 4 credits. S. L. Kaplan.

A comparative study of the meaning of work in different societies from premodern times to the present. Emphasis is on the "representations" of work of the actors themselves who worked, as well as of those, who for various critical reasons, did not work. The seminar examines not only ideology but also the organization, practice, and physical place of work. It explores theory as well as "cases," and draw on anthropological and sociological as well as historical materials.

#### HIST 428 Narratives of the University (also S HUM 408) (III)

Fall. 4 credits. Limited to 15 students. J. Williams.

What is the university—this institution in which we find ourselves, and to which we've committed considerable time, money, and effort—for? The typical way to answer this is to look at the tradition of "the idea of the university." In this seminar, we examine some of those key "ideas," from Kant through Newman to Readings. But we also focus on other ideas of the university, as represented in histories of the university, "academic" novels and popular films of "college life," and statements such as media reports and university memoranda, from the eighteenth century to the present.

530

#### [HIST 432 The City in History: Europe and America # (III)

Spring, 4 credits. Prerequisite: permission of instructor. Not offered 2002–2003. S. Blumin.

Reading and discussion of significant interpretations of the rise, role, and character of cities in medieval and early modern Europe and in modern Europe and America. Individual research projects.]

#### [HIST 454 The Herodotean Moment: The Uses and Abuses of "Western Civilization" (also GOVT 454) # (III)

Spring. 4 credits. Limited to 20 students. Prerequisite: permission of instructor. Not offered 2002–2003. J. Najemy, M. Bernal.]

#### HIST 467 Humanities and the Modern University (also SHUM 420) (III) Spring. 4 credits. Limited to 15 students.

P. Rosenberg.

The seminar studies conceptions of the place of the humanities in university education from the Renaissance to the present. We examine debates about the content and purpose of a liberal humanistic education; and place these debates in the context of changing views of the social functions of the university. Readings are in both primary and secondary sources; principally in intellectual history but with occasional forays into social history. Major topics in the course include Renaissance humanism, the Scientific Revolution, the Enlightenment, the 19th century German universities, the growth of professionalism and academic specialization in 20th century America, and recent debates about postmodernism and the academic canon. All readings are in English.

#### **History of Science**

#### HIST 250 Technology in Society (also ENGRG 250, ECE 250, and S&TS 250) (III)

Fall. 3 credits. R. Kline. For description, see ENGRG 250.

#### HIST 280 The Sciences in the Twentleth Century (also S&TS 283) (III)

Fall. 4 credits. M. A. Dennis. Science emerged as a powerful source of social, economic, and political power during the twentieth century. Through an examination of the development of the sciencesphysical and biomedical-during the twentieth century, students learn about the reciprocal relations between science and society. Topics covered may include the rise and development of quantum mechanics; the emergence of Big Science; the history of the sciences in totalitarian nations, especially the former Soviet Union, Nazi Germany, and Communist China; the evolutionary synthesis; the rise and fall of molecular biology; the multiple forms of eugenics; the changing character of the social sciences; the role of new technologies in scientific change, especially computer and communication technology; the growth of science as a profession; and the development of science in non-Western cultures.

#### HIST 281 Science in Western Civilization (also S&TS 281) # (III)

Fall. 4 credits. HIST 281 is not a prerequisite to 282. P. R. Dear.

This course aims to make comprehensible both to science majors and to students of the humanities the historical structure and development of modern science and to show science as a cultural phenomenon. Changing perceptions of nature and human knowledge from Greek Antiquity to the twentieth century form the framework for current Western views of the world, while the roots of the presentday dominance of "science" as a symbol of progress and modernity lie in an alliance between knowledge of nature and power over nature that took shape in the nineteenth century after a long period of emergence. 281 runs chronologically up to the death of Isaac Newton and focuses on the cultural traditions of Christian Europe and its selective appropriation of a Greek heritage.

#### HIST 282 Science in Western Clvilization (also S&TS 282) # (III)

Spring. 4 credits. HIST 281 is not a prerequisite to 282. P. Dear.

This course aims to make comprehensible both to science majors and to students of the humanities the historical structure and development of modern science and to show sciences as a cultural phenomenon. Changing perceptions of nature and human knowledge from Greek Antiquity to the twentieth century form the framework for current Western views of the world, while the roots of the presentday dominance of "science" as a symbol of progress and modernity lie in an alliance between knowledge of nature and power over nature that took shape in the nineteenth century after a long period of emergence. This course covers the eighteenth, nineteenth, and early twentieth centuries.

#### HIST 287 Evolution (also BIO EE 207, S&TS 287) (I or III)

Fall or summer. 3 credits. W. Provine. For description, see BIO G 207.

#### HIST 292 Inventing an Information Society (also ENGRG 298, ECE 298, and S&TS 292) (I or III)

Spring. 3 credits. R. Kline. For description, see ENGRG 298.

## [HIST 380 Social History of Western

**Technology # (III)** Spring. 4 credits. Not offered 2002–2003. J. Weiss.

Studies in the interaction between technological changes and social changes in Western Europe and America since the eighteenth century. Readings and lectures deal both with instances of social transformation that accompanied technological changes and with the role of technology in social thought and cultural expression. Special attention is paid to three periods: Britain during the Industrial Revolution, America in the nineteenth century, and America during the Vietnam War.]

#### HIST 415 Seminar in the History of Biology (also BIO G 467, B&SOC 447, S&TS 447) (I or III)

Summer (6-week session). 4 credits. W. Provine.

Specific topic changes each year.

#### [HIST 471 Knowledge and Politics in Seventeenth Century England (also S&TS 473) # (III) Spring, 4 credits. Limited to 15 students.

Spring. 4 credits. Limited to 15 students. Not offered 2002–2003. P. Dear and R. Weil.

England in the 17th century was a revolutionary ferment of political, religious, and philosophical conflict. This course examines the conflicts and arguments, and the means explored for their apparent resolution. These affected ideas of God and worship, the meanings of gender, conceptions of the natural world and its scientific appropriation, and the legitimacy and proper form of political power. The course focuses on the close study of primary source readings by many of the principal players in all these areas, including Francis Bacon, Thomas Hobbes, the Duchess of Newcastle, and John Locke.]

#### [HIST 525 Seminar in the History of Technology (also S&TS 525)

Fall. 4 credits. Not offered 2002–2003. R. Kline.

For description, see S&TS 525.]

#### [HIST 616 Enlightened Science (also S&TS 416)

Fall. 4 credits. Not offered 2002–2003. P. R. Dear and M. A. Dennis.

"Science" is a term that is often associated with "rationality." The idea that "reason." rather than "faith" or "tradition" should be the pre-eminent guide to practical action has deep roots in the thought of eighteenth-century Europe, the period known as the Enlightenment. The practice and image of science in the Enlightenment shows how this ideal was developed and understood, and what its meanings and implications were. Those meanings, and their associated values, remain strongly with us today. This course investigates our current scholarly understanding of many themes and issues relating to "enlightened science," and studies writings of the period itself in a variety of topical areas, from political economy to astronomy and natural history, in several national contexts including Scotland, France, and Germany. We attempt to view these materials from the perspective both of developments from earlier periods and in relation to the later consequences of this ideology.]

#### [HIST 680 Seminar in Historiographical Approaches to Science (also S&TS 680)

Fall. 4 credits. Not offered 2002–2003. P. R. Dear.

Examines philosophical, sociological, and methodological dimensions of recent historiography of science.]

#### HIST 682 Topics in the Scientific Revolution (also S&TS 682)

Spring. 4 credits. P. R. Dear. This is a graduate seminar devoted to investigation of recent scholarship and issues in sixteenth- and seventeenth-century European knowledge of nature. Students are expected to produce a substantial paper focused on the study of primary source documents. Topics include: credibility and social status; the academic environment; philosophy and court culture; and the situated

# meaning of experiment.

#### HIST 711 Introduction to Science and Technology Studies (also S&TS 711)

Fall. 4 credits. T. Pinch. For description, see S&TS 711.

#### HIST 713 Issues in History of Technology

Spring. 3 credits. R. Kline. For description, see S&TS 700.3.

#### **American History**

HIST 153 Introduction to American History (also AM ST 103) # (III) Summer and fall. 4 credits. 101 is not a prerequisite for 102. F. Dunaway.

A survey of American history from the beginnings through the Civil War. Topics include cultural encounters in the age of Columbus, European colonization, the American Revolution, the early republic, antebellum reform movements, and the coming of the Civil War.

#### HIST 154 Introduction to American History (also AM ST 104) (III)

Summer and spring. 4 credits. 101 is not a prerequisite for 102. T. Borstelmann. An introductory survey of the development of the United States since the Civil War

#### [HIST 200 Seminar: Immigration and **Ethnicity in Twentieth-Century** U.S. (III)

Spring. 4 credits. Seminar designed for underclassmen but open to all students. Enrollment limited to 15 students Prerequisite: permission of instructor. Not offered 2002-2003. M. C. Garcia.]

#### (HIST 202 Comparative Migration in the Americas (also AM ST 204 and LSP 203) @ (111)

Spring. 4 credits. Letter grade only. Not offered 2002-2003. M. C. Garcia. A seminar examining migration both within and to the Americas in the nineteenth and twentieth centuries. Topics to be discussed are the reasons for population movements; immigration policies; social, economic, and political accommodation; nativist and restrictionist responses; women and migration; remittances and transnationalism. Among the immigrant-receiving nations studied are Argentina, Brazil, Canada, Cuba, Mexico, and the United States.]

#### [HIST 208 Seminar: The Era of Franklin D. Roosevelt (also AM ST 208) (III)

Fall. 4 credits. Seminar designed for underclass students but open to all students. Enrollment limited to 15 students. Prerequisite: permission of instructor. Not offered 2002-2003. R. Polenberg.

The impact of the Great Depression and World War II on American politics, law, and culture.]

#### [HIST 212 African-American Women In the Twentieth Century (also AM ST 212 and WOMNS 212) (III)

Spring. 4 credits. Sophomore seminar. Not offered 2002-2003. M. Washington.

An examination of twentieth-century themes significant in the historical experience of Black women. Major emphasis is on race, gender, community, art, and politics in post World War II America. Specific topics include African-American women's involvement in such areas as political activism at the electoral and grass-root levels; socio-economic issues affecting women and the community; religion; representation and participation of Black women in art and entertainment; and issues specific to gender cross-racially as well as intra-racially.]

#### HIST 214 Seminar on American Foreign Policy (also AM ST 214) (III)

Fall. 3 credits. Prerequisite: permission of instructor. W. LaFeber.

Topic for fall 2002: U.S. Presidential power and foreign relations since the 1890s.

#### HIST 225 The U.S.-Mexico Border: History, Culture, Representation (also LSP 225) (III)

Spring. 4 credits. Sophomore seminar. Limited to 15 students. R. Craib, M. C. Garcia.

A writing-intensive, interdisciplinary sophomore seminar on the U.S.-Mexico border. The study of borders, and specifically of the U.S.-Mexico border, requires us to cross the disciplinary and methodological borders of academe itself. The proliferation of provocative writings on the border in recent years bears this assumption out: in no other filed of study has the literature been so remarkably interdisciplinary; so methodologically eclectic; nor so theoretically provocative. This seminar intends to tap that literature to help students analyze and understand the histories, cultures, and representations of the border that are so important to contemporary self-fashioning and policy-making in the United States and Mexico. Readings include works of fiction, literary and cultural theory, history, science studies, and postcolonial criticism. Students can expect to write several papers of varying lengths that will develop their skills in historical research and textual criticism.

#### [HIST 238 History of Women in the Professions, 1800 to the Present (also AM ST 258, WOMNS 238, and HD 258) (III)

Spring. 3 credits. Not offered 2002-2003. I. Brumberg.

For description, see HD 258.]

#### **HIST 242 Religion and Politics in** American History: From J. Winthrop to R. Reed (also AM ST 242 and RELST 242) (III)

Spring. 4 credits. Sophomore seminar. R. L. Moore.

A reading and research seminar concerned with popular culture in nineteenth-century America (publications, performances, and audiences).

## HIST 246 New York Women (also WOMNS 241) (III) Spring. 4 credits. Limited to 15 students.

M. Rossiter.

Over the centuries New York State has been the site of activity for a great many women of consequence. This course is a one-semester survey of the past and present activities and contributions of rural and urban women in a variety of fields of interest to Cornell students-politics, medicine, science, the law, education, business (including hotels), entertainment, communications, government, labor, religion, athletics, the arts and other areas. Weekly readings and discussion and a paper, possibly using local or university archives.

#### [HIST 251 Black Religious Traditions from Slavery to Freedom (also AM ST 251, RELST 251) (III)

Fall. 4 credits. Sophomore seminar. Letter only. Not offered 2002-2003. Next offered 2003-2004. M. Washington.

A survey on the black religious and spiritual traditions during bondage and the early years of freedom. The course examines slave religion, the rise of black churches in the North, the formation of black churches after the Civil War, the independent church movement and the churches' role in social protest.]

#### [HIST 260 Introduction to U. S. Latino History, Part I (also LSP 260 and AM ST 259) (III)

Spring. 4 credits. Not offered 2002-2003. Next offered 2003-2004. M. C. Garcia. This course introduces students to the history of Latinos in the United States. We focus specifically on the history of Chicanos

(Mexican Americans) and Central Americans. Part II of this course, History 261, focuses on the history of Puerto Ricans, Cubans, and Dominicans in the U.S. (students are not required to take both courses). Among the topics addressed are: historical immigration patterns and the "push/pull" factors that compelled migration to the United States; the social and political events that shaped the evolution of these Latino communities; and the role of cultural identity, race, class, and gender in shaping experience; and the role of foreign policy in formulating immigration policy.]

#### [HIST 261 Introduction to U.S. Latino History, Part II (also LSP 261 and AM ST 261) (III)

Spring. 4 credits. Not offered 2002-2003. Next offered 2003-2004. M. C. Garcia. This survey discusses the history of Latinos from the Caribbean: the Puerto Ricans, Cubans, and Dominicans. Students are introduced to some of the most important historical and theoretical works in this field. Topics discussed include the push-pull/ historical-stuctural factors that influenced migration to the United States; the historical evolution of these communities; the role of cultural identity, as well as race, class, and gender in shaping experience; and the intersection of foreign policy and immigration policy.]

#### HIST 264 Introduction to Asian American History (also AAS 213 and AM ST 213) (III)

Fall. 4 credits. D. Chang.

An introductory history of Chinese, Japanese, Asian Indians, Filipinos, and Koreans in the United States from the mid-nineteenth century to the 1990s. Major themes include racism and resistance, labor migration, community formation, imperialism, and struggles for equality.

#### HIST 266 Introduction to Asian American Studies (also AAS 110) (III or IV) Spring. 4 credits. D. Chang.

An interdisciplinary, cross-cultural introduction to Asian American Studies focusing on contemporary issues. Major themes include: identity and stereotypes, gender, family, community, education, migration and labor, and anti-Asianism. Coverage is given to both Hawaii and the U.S. mainland, and to Asian Indians, Chinese Filipinos, Hawaiians, Japanese, Koreans, and South Asians.

## **HIST 272 The Atlantic World from Conquest to Revolution # (III)** Spring. 4 credits, R. J. Weil, K. Graubart

and M. B. Norton.

After Europeans first crossed the Atlantic in the late fifteenth century, the ocean became a vast highway linking the European powers---Spain, France, Britain, and the Netherlandswith their colonial outposts in America. This seminar explores the Atlantic world through reading such primary sources as the log of Christopher Columbus and the autobiography of Olaudah Equiano, an Anglo-African sailor, and recent scholarly examinations of the slave trade and other aspects of the Atlantic economy. Intended primarily for sophomore prospective history majors; open to others by permission of instructors.

#### [HIST 273 Women in American Society, Past and Present (also WOMNS 273) # (111)

Spring. 4 credits. Not offered 2002-2003. Next offered 2003-2004. M. B. Norton.
A survey of women's experiences in America from the seventeenth century to the present. Among the topics discussed are women's familial roles, the changing nature of household work, the women's rights movement, employment of women outside the home, racial and ethnic differences in women's experiences, and contemporary feminism.]

#### HIST 303 African-American Women in Slavery and Freedom (also WOMNS 307 and AM ST 303) # (III) Fall. 4 credits. Letter only. M. Washington.

Fall. 4 credits. Letter only. M. Washington. Historical exploration of African-American women from a sociopolitical perspective. Topics include women in Africa, slavery and freedom, sexuality, labor, the family, and gender crossracially beginning with the African background and ending at 1900.

#### [HIST 304 American Culture in Historical Perspective, 1880–1980 (also AM ST 304) (III)

Spring, 4 credits. Not offered 2002–2003. Next offered 2003–2004. M. Kammen. An introduction to the study of modern American culture. Emphasis is on the role of culture in the quest for national identity; the

culture in the quest for national identity; the function of cultural myths and myth making; the advent of modernism; relationships between mass culture, popular culture, and high culture; and the question of American exceptionalism (distinctiveness). Special attention is also paid to the situation of subcultures and regions, to the changing role of entertainment in relation to leisure, the media, ethnicity (pluralism), and the decorative and popular arts.]

#### [HIST 311 The Structure of American Political History (also AM ST 311) # (III)

Fall. 4 credits. Not offered 2002–2003. Next offered 2003–2004. Staff.

Examines the course of American politics from the eighteenth century to the Gilded Age, focusing on the development of American political culture, the nature of decision making, and the role of social conflict, mass behavior, political parties, and political elites in shaping our political history.]

#### [HIST 312 The Structure of American Political History (also AM ST 312) (III)

Spring. 4 credits. Not offered 2002–2003. Next offered 2003–2004. Staff.

A continuation of HIST 311 but can be taken independently. Examines the course of American politics from the 1890s to the present, focusing on the massive transformation of American political life in the late nineteenth and twentieth centuries in response to industrialism and urbanization, the depression, and the international crises from the 1930s to the 1990s.]

#### HIST 313 U.S. Foreign Relations, 1750-1912 # (III)

Fall. 4 credits. W. LaFeber. Examines the development of the U.S. continental and global empires by analyzing policy and policymakers from Benjamin Franklin to Willard Straight. Emphasis is placed on domestic events that shaped foreign policy. In conjunction with HIST 313, a special course, 201, for discussion and guided research is offered.

#### HIST 314 History of American Foreign Policy, 1912 to the Present (also AM ST 314) (III)

Spring and summer. 4 credits. T. Borstelmann.

Students examine the emergence of the United States as a world power in the twentieth century. The course focuses on the domestic sources of foreign policy and the assumptions of the major policymakers (Wilson through Clinton). Important themes include the American response to a revolutionary world since 1912, the Cold War, the Third World, and the increasingly dominant role of the president in the making of U.S. foreign policy.

#### HIST 316 American Political Thought: From Madison to Malcolm X (also AM ST 376 and GOVT 366) # (III)

Fall. 4 credits. I. Kramnick. For description, see GOVT 366.

#### [HIST 318 American Constitutional

**Development (also AM ST 317) (III)** Fall. 4 credits. Not open to freshmen. Not offered 2002–2003. Next offered 2003– 2004. R. Polenberg.

Major issues in constitutional history. Topics include: the drafting of the Constitution; the Bill of Rights; the Marshall era; the crises caused by slavery and emancipation; the rise of substantive due process; Holmes, Brandeis, and freedom of speech; the Roosevelt "revolution"; civil liberties and civil rights in modern America; the right of privacy; the contemporary Supreme Court.]

#### [HIST 321 Colonial North America to 1763 # (III)

Fall. 4 credits. Not offered 2002–2003. M. B. Norton.

A survey of European settlement in North America and the Caribbean, emphasizing the interactions of Europeans, Indians, and Africans; economic development; gender relations; religious and political change; and the impact on the colonies of internal and external conflicts.]

#### HIST 324 Varieties of American Dissent, 1880–1900 (also AM ST 324) (III)

Fall. 4 credits. N. Salvatore. The idea of dissent in American society raises a variety of images. Civil rights activists, striking workers, and student radicals of the 1960s are familiar symbols of dissent. But might we understand a Pentecostal believer, filled with the spirit of his or her God in critiquing contemporary society, as an example of American dissent? This course explores the varieties of economic, political, and cultural dissent in America between 1880 and 1990, and examines how understanding dissent in its specific historical context illuminates major aspects of American life and culture.

#### [HIST 325 Age of the American Revolution, 1754–1815 (also AM ST 322) # (III)

Spring. 4 credits. Not offered 2002–2003. M. B. Norton.

An examination of the process by which the 13 English colonies became an independent and united nation, with emphasis on political thought and practice, social and economic change, and cultural development. Attention is paid to the impact of the American Revolution on women, Blacks, Indians, and white males.]

#### [HIST 330 The Age of Jackson, 1815– 1850 (also AM ST 330) # (III) 4 credits. Not offered 2002–2003. Staff.]

[HIST 331 The American Civil War and Reconstruction 1850–1877 (also

**AM ST 331) # (III)** 4 credits. Not offered 2002–2003. Staff. An analysis of the factors leading up to the breakup of the Union, the impact of the war in North and South, and the problems of restoration and reconstruction of the seceded states 1

#### [HIST 332 The Urbanization of American Society: 1600–1860 (also AM ST 332) # (III)

Fall. 4 credits. Not offered 2002–2003. S. Blumin.

America was born in the country and moved to the city. This course examines the transformation of America from a rural to a rapidly urbanizing society and culture, from the first European settlements to the era of the Civil War. It is also a history of the city itself, as a human community, and as a crucible of cultural contact and change.]

#### [HIST 333 The Urbanization of American Society: 1860–2000 (also AM ST 333) (III)

Spring. 4 credits. 332 is not a prerequisite to 333. Not offered 2002–2003. S. Blumin. America was born in the country and moved to the city. This course examines the transformation of America from the urbanizing society and culture of the mid-nineteenth century to the thoroughly metropolitan nation of the present. It is also a history of the city itself, as a human community, a crucible of cultural contact and change, and a focus of public policy.]

#### [HIST 335 African-American History from Slavery to Freedom # (III)

Fall. 4 credits. Letter only. Not offered 2002–2003. M. Washington.

Introductory course on African-Americans from 1619 to 1865. Emphasis is on life in bondage, the free black communities, and racism. Other topics include African cultural heritage, the slave trade, religion, the family, and the black freedom struggle.]

#### [HIST 336 Capitalism and Society in Developing America, 1607–1877 (also AM ST 336) # (III)

Fall. 4 credits. Not offered 2002–2003. S. Blumin.

An examination of American society in the context of capitalist development, and of capitalism as a social phenomenon. The transformation of pre-industrial colonies into an industrializing nation; the development of social classes; the emerging ethos of free enterprise.]

#### [HIST 337 Entrepreneurialism and Organization in the Age of the Corporation: Capitalism and Society in Modern America, 1840–2000 (also AM ST 337) (III)

Spring. 4 credits. Not offered 2002–2003. S. Blumin.

An examination of American society in the context of capitalist development and of capitalism as a social phenomenon. The rise of corporate capitalism; class, "mass", and the ethos of enterprise in twentieth-century American society.]

### ARTS AND SCIENCES - 2002-2003

#### [HIST 340 Recent American History, 1925-1960 (also AM ST 340) (III)

Spring. 4 credits. Not open to freshmen. Not offered 2002-2003. R. Polenberg. Topics include the Sacco-Vanzetti case; radicalism and reform in the New Deal; Franklin Roosevelt and World War II: the Holocaust and the atomic age; the Cold War and civil liberties; individualism and conformity in the 1950s.]

#### [HIST 341 Recent American History, 1960 to the Present (also AM ST 341) (III)

Summer and fall. 4 credits. Not open to freshmen. Not offered 2002-2003. R. Polenberg.

Topics include the Supreme Court and civil rights; Kennedy, Johnson, and social reform; the Vietnam War and Watergate; politics and the presidency from Carter to Clinton; and class, race, and ethnicity in modern America.]

#### [HIST 345 The Intellectual and Cultural Life of Nineteenth-Century Americans (also AM ST 345 and RELST 345) # (III)

Spring. 4 credits. Not offered 2002-2003. R. L. Moore.

An examination of the development of cultural and intellectual diversity in the United States. Particular emphasis is placed on religious pluralism.]

#### HIST 346 The Modernization of the American Mind (also AM ST 346) (111)

Fall. 4 credits. R. L. Moore.

American thought and culture from 1890 to the present. Emphasizes the intellectual impact of major political and economic events and the adaptation of social ideas and values to new conditions.

#### **HIST 347 American Environmental** History (also AM ST 347) (III)

Spring. 4 credits. F. Dunaway This course provides an introduction to American environmental history, an exciting and relatively new field of scholarship. Ranging from the colonial period to the present, we explore how different groups of Americans have interacted with the natural world.

#### [HIST 359 American Families In **Historical Perspective (also AM ST** 359, HD 359, and WOMNS 357) (III)

Spring. 3 credits. Prerequisite: HD 150 or one 200-level social science or history course. S-U grades optional. Human ecology students must register for HD 359. Not offered 2002-2003. J. Brumberg. For description, see HD 359.]

#### [HIST 375 The African-American Workers, 1865–1910: The Rural and **Urban Experience (also ILRCB** 385) # (111)

Fall. 3 credits. Prerequisite: juniors and seniors, or permission of instructor. Not offered 2002-2003. N. Salvatore. For description, see ILRCB 385.]

### [HIST 376 The African-American Workers, 1910-the present: Race, Work, and the City (III) Not offered 2002–2003. N. Salvatore.

For description, see ILRCB 386.]

#### HIST 378 Topics in U.S. Women's History (also AM ST 378 and WOMNS 378) (III)

Fall. 4 credits. Preference given to students who have taken HIST/WOMNS 273, HIST/ WOMNS 303, or HIST/WOMNS 238. Others: by permission of instructor only M. B. Norton.

Topic for 2003: Gender and Sexuality in America. A colloquium course, limited to 20 students. Students read and discuss some of the new scholarly work on gender and sexuality in American history. They also prepare several written and oral presentations based on their analyses of primary sources in the Cornell Human Sexuality collection and elsewhere.

#### (HIST 411 Undergraduate Seminar in American Political History (also AM ST 411) (III)

Spring. 4 credits. Prerequisite: permission of instructor. Not offered 2002-2003. I. Silbey.]

#### [HIST 414 Motivations of American Foreign Policy (III)

Fall. 4 credits. Prerequisite: permission of instructor. Not offered 2002-2003. W LaFeber ]

[HIST 418 Undergraduate Seminar in the History of the American South (III) 4 credits. Not offered 2002-2003. J. Silbey.]

#### [HIST 419 Seminar in American Social History (also AM ST 419) (III)

Spring. 4 credits. Not offered 2002-2003. S. Blumin.

Topic for 2002: Race, class and the American city in the nineteenth and twentieth centuries. Offered in Cornell-in-Washington program.]

#### [HIST 421 Undergraduate Seminar in Cultural History (also AM ST 421) (III)

4 credits. Prerequisite: permission of instructor. Not offered 2002-2003. M. Kammen.]

#### [HIST 426 Undergraduate Seminar in

Early American History # (III) Spring. 4 credits. Not offered 2002-2003. M. B. Norton.]

#### HIST 428 Race and Ethnicity in Nineteenth-Century America (III)

Spring. 4 credits. D. Chang. This course explores the significance of race and ethnicity in America from colonial legacies to legal segregation and immigration restriction in the late-nineteenth century. Major themes include processes of categorization, construction, and oppression; identity; community formation and resistance; and struggles for equality.

#### [HIST 430 America in the Camera's Eye (III or IV)

Fall. 4 credits. Not offered 2002-2003. Next offered 2003-2004. R. L. Moore. Photographs and films have become archives for historical research. From the era of Matthew Brady's Civil War images, the United States has been recorded by documentary photographers who have called attention to the country's progress and it's poverty. Hollywood filmmakers have also recorded endless images of the American landscape and placed against that landscape fictionalized accounts of the country's history and its social problems. What can we learn from these images? What is their relation to written texts and to other documents that tell us about the

past? How truthful is documentary? How misleading is Hollywood? One key text is James Agee's and Walker Evans' Let Us Now Praise Famous Men. The seminar meets once each week for discussion and periodically during the semester to view films.]

#### [HIST 432 The City in History: Europe and America # (III)

Spring, 4 credits. Prerequisite: permission of instructor. Not offered 2002-2003. S. Blumin.

Reading and discussion of significant interpretations of the rise, role, and character of cities in medieval and early modern Europe, and in modern Europe and America. Individual research projects.]

#### **(HIST 439 Reconstruction and the New** South (also AM ST 439) # (III)

Fall. 4 credits. Limited to 15 students. Not offered 2002-2003. M. Washington. This course focuses on the American South in the nineteenth century as it made the transition from Reconstruction to new forms of social organization and patterns of race relations. Reconstruction is considered from a sociopolitical perspective, concentrating on the experiences of the freed-people. The New South emphasis includes topics on labor relations, economic and political changes, new cultural alliances, the rise of agrarianism, and legalization of Jim Crow.]

#### HIST 440 Undergraduate Seminar in Recent American History (also AM ST 440) (III)

Fall. 4 credits. Prerequisite: permission of instructor. R. Polenberg.

Topic: freedom of speech, censorship, and the Supreme Court.

#### HIST 455 The Four Seasons Motif in American Culture (also AM ST 430.2) (III)

Fall. 4 credits. Limited to 15 students. Permission of instructor required. M. Kammen.

The focus of this seminar is one of the most ubiquitous and pervasive motifs in all of the arts (painting, literature, and music) in the northern hemisphere, both West and East: The Four Seasons. We view works of art and films, read fiction, non-fiction, and poetry, and listen to music. Although we must devote serious attentions to the Old World origins, dispersion, and local permutations of this motif, more than half of the seminar given over to American manifestations and writings about the seasons, with particular attention to changes over time as well as geographical variations

#### [HIST 458 Female Adolescence in **Historical Perspective (also WOMNS** 438 and HD 417) # (III)

Spring. 3 credits. Limited to juniors and seniors. Prerequisite: permission of instructor. Not offered 2002-2003. J. Brumberg.

For description, see HD 417.]

### [HIST 484 Seminar in the History of American Labor: Race, Work, and the City (also ILR 304) (III)

Fall. 4 credits. Open to juniors and seniors only with the permission of the instructor. Not offered 2002-2003. N. Salvatore. For description, see ILRCB 304.]

HIST 486 Seminar on the 1960s (also AM ST 486) (III) Fall. 4 credits. T. Borstelmann.

This course explores the issues and developments of the most turbulent and significant decade in recent U.S. history. Major topics include the civil rights movement, the Kennedy and Johnson administrations, the Vietnam War, the anti-war movement, the counterculture, the women's liberation movement, and the Nixon administration. A substantial research paper is required.

#### HIST 500 Undergraduate Research Seminar (also AM ST 500)

Fall and spring. 8 credits each term. S. Jackson.

Offered in Cornell-in-Washington Program. An intensive research and writing experience utilizing the extensive resources of Washington, D.C.

#### [HIST 521 Seminar in American Cultural Studies (also AM ST 521)

Fall. 4 credits. Not offered 2002–2003. M. Kammen.

The focus is the relationship between government and culture in historical perspective. After three contextual sessions devoted to nineteenth-century background, we are mainly concerned with the period from the 1930s to the present. Several comparative sessions are devoted to government as a patron of culture in other societies. A research paper is required.]

#### [HIST 607 Writing Seminar on African-American Women

Fall. 4 credits. Prerequisite: permission of instructor. Not offered 2002–2003. M. Washington.

This course is designed for students actively engaged in a writing project on African-American women's history. Students must have already done the research and most of the reading for their papers prior to enrollment. Reading and class discussion focus on style, methodology, and theory. An extensive research paper is due at the end of the semester.]

#### [HIST 608 African-American Women

Spring. 4 credits. Prerequisite: permission of instructor. Letter only. Not offered 2002– 2003. M. Washington.

A reading and discussion topics seminar focusing on the experiences of African-American women in nineteenth- and twentieth-century America, including the Caribbean.]

#### HIST 610 Afro-American Historiography

Fall. 4 credits. Letter only. M. Washington. Reading and discussion course focusing on the way historians write and interpret the Black experience in America. Students will be concerned with individual historians, various schools of thought, and historical approaches.

#### [HIST 613 Seminar on American Diplomatic History

Fall. 4 credits. Not offered 2002–2003. T. Borstelmann.

A reading and research seminar in twentiethcentury American diplomatic history, emphasizing the Cold War period and interpretive approaches to U.S. foreign policy. A research paper is required.]

#### [HIST 617 Seminar in American Cultural History

4 credits. Not offered 2002–2003. Semester TBA. R. L. Moore.]

#### [HIST 618 Seminar In American Cultural History

Spring. 4 credits. Not offered 2002–2003. R. L. Moore.

A reading and research seminar concerning selected topics in nineteenth century America.]

#### [HIST 621 Graduate Seminar in American Cultural History

Fall. 4 credits. Not offered 2002–2003. M. Kammen.]

#### HIST 626 Graduate Seminar in the History of American Women (also WOMNS 626)

Fall. 4 credits. M. B. Norton.

A reading and research seminar intended primarily for graduate students. Major works in American women's history and carefully scrutinized, and each student prepares a lengthy research paper.

#### [HIST 627 Graduate Seminar in Early American History

Fall. 4 credits. Prerequisite: permission of instructor. Graduate students only. M. B. Norton.]

### [HIST 633 Seminar in Nineteenth-

**Century American History** 4 credits. Prerequisite: permission of instructor. Not offered 2002–2003. Staff.]

#### [HIST 634 Seminar in Nineteenth-Century American History

Spring. 4 credits. Not offered 2002–2003. Staff.

A research seminar intended primarily for graduate students exploring society, culture, and politics of the United States between 1815 and 1896.]

#### [HIST 640 Graduate Seminar in Recent American History

Fall. 4 credits. Prerequisite: permission of instructor. Not offered 2002–2003. T. Borstelmann.

A graduate research seminar that will examine American political and social history since 1945.]

#### [HIST 683 Seminar in American Labor History (also ILRCB 783)

Fall. 3 credits. Prerequisites: graduate students only. Not offered 2002–2003. N. Salvatore.

For description, see ILRCB 783.]

#### [HIST 710 Colloquium in American History

Spring. 4 credits. Required of all first-year graduate students in United States history. M. B. Norton.

Examination of major approaches, periods, issues, and modes of interpreting American history. Readings include recent "classics" of American scholarship from diverse subfields and genres.]

#### Latin American History

## HIST 195 Colonial Latin America #@ (III)

Fall. 4 credits. K. Graubart. This course examines the "encounter" between Spain and the New World which began in 1492. Topics include the cultural hybridity that preceded as well as developed from colonialism, the production of ethnicity and race, slavery and economic stratification, intellectual currents and daily life, rebellion, and independence.

#### HIST 196 Modern Latin America @ (III) Spring. 4 credits. R. Craib.

An introductory survey of Latin American history from the early nineteenth century to the present with particular emphasis on processes of nation-state formation and the development of capitalist economies. Prominent themes include U.S.-Latin American Relations; neocolonialism; and radicalism and revolutionary movements, explored through a variety of primary and secondary sources.

#### [HIST 206 Modern Mexico @ (III)

Fall. 4 credits. Not offered 2002–2003. R. Craib.

A survey of Mexico's history from the early nineteenth century to the present. The course covers social, cultural and economic trends and their relationship to political movements. Topics include rural and urban movements; U.S.-Mexican relations; the Revolution of 1910; indigenismo; popular culture; NAFTA; and the Zapatistas.]

#### HIST 216 Gender and Colonization in Latin America @ (III)

Spring. 4 credits. K. Graubart. This seminar examines colonization as a gendered process. We look at men's and women's lives in terms of sexuality, marriage, labor roles, ethnicity, and spirituality. Other important topics could include witchcrafts, honor, law, and masculinity.

#### HIST 219 Mexican Immigration to the United States (also LSP 219, AM ST 219) (III)

Spring. 4 credits. J. Cardenas. For description, see LSP 219.

#### HIST 225 The U.S.-Mexico Border: History, Culture, Representation (also LSP 225) (III)

Spring. 4 credits. Sophomore seminar. Limited to 15 students. R. Craib, M. C. Garcia.

A writing-intensive, interdisciplinary sophomore seminar on the U.S.-Mexico border. The study of borders, and specifically of the U.S.-Mexico border, requires us to cross the disciplinary and methodological borders of academe itself. The proliferation of provocative writings on the border in recent years bears this assumption out: in no other filed of study has the literature been so remarkably interdisciplinary; so methodologically eclectic; nor so theoretically provocative. This seminar intends to tap that literature to help students analyze and understand the histories, cultures, and representations of the border that are so important to contemporary self-fashioning and policy-making in the United States and Mexico. Readings include works of fiction, literary and cultural theory, history, science studies, and postcolonial criticism. Students can expect to write several papers of varying lengths that will develop their skills in historical research and textual criticism.

#### HIST 245 Drugs: People, Policies, Politics @ (III)

Fall. 4 credits. Sophomore seminar. Previous course in Latin American history

would be helpful. M. Roldan. This seminar uses the narcotics trade to examine a variety of issues in historical perspective: migration, human rights, smuggling, international trade and foreign policy. The temporal focus is the period between the 1920s and the present.

#### HIST 258 U.S. Culture and Mexican Americans, 1848-Present (also LSP 229, AM ST 229) (III)

Fall. 4 credits. J. Cardenas.

This course explores the different political and cultural interactions between dominant ideologies of nationalism, race, and ethnicity in the United States, and Mexican Americans. We explore these questions of national identities in conjunction to gender, class, and political discourses, and use both primary sources and secondary sources in the course.

#### HIST 272 Atlantic World: From Conquest to Revolution # (III)

Spring. 4 credits. Intended primarily for sophomore prospective history majors; open to others by permission of instructors. K. Graubart, M. B. Norton, R. Weil. After Europeans first crossed the Atlantic in the late fifteenth century, the ocean became a vast highway linking the European powers-Spain, France, Britain, and the Netherlandswith their colonial outposts in America. This seminar explores the Atlantic world through reading such primary sources as the log of Christopher Columbus and the autobiography of Olaudah Equiano, an Anglo-African sailor, and recent scholarly examinations of slave trade and other aspects of the Atlantic economy.

#### HIST 306 Modern Mexico: From Independence to the Zapatistas (III)

Fall. 4 credits. R. Craib.

A survey of Mexico's history from the early 19th century to the present. The course covers social, cultural and economic trends and their relationship to political movements. Special emphasis is given to the ways in which "common people" participated in and influenced politics; to the important regional. class, ethnic, and gender differences that have figured prominently in Mexico's history; and to the politics of history-making.

# HIST 404 Ethnicity, Race and Indegeneity in Latin America @ (III)

Fall. 4 credits. Permission of instructor required. Limited to 15 students. K. Graubart.

This seminar examines the invention of ethnicity in the colonial period, the development of a theory of race within Latin American as well as European societies, and the politics of "indignity" in the 20th century. Students should have a basic knowledge of Latin American history prior to this course.

### (HIST 418 Agrarian History (III)

Fall. 4 credits. Not offered 2002-2003. R. Craib.

A comparative, interdisciplinary examination of agrarian life from a broad temporal and geographical perspective. Strong emphasis on recent historiography, methodology and theory. Major themes include rural rebellion. resistance, and crime: capitalist transformation of the countryside; agrarian custom and practice; and the way in which rural life has been romanticized, denigrated, and essentialized. Readings include works of history, fiction, literary theory, anthropology, and geography.]

#### [HIST 423 Chronicles of the Conquest of Latin America @ (III)

Spring, 4 credits, Not offered 2002-2003. K. Graubart.

In this seminar we examine the writings of participants in the conquest and colonization of Latin America. Readings include writings by European conquistadors, Amerindian elites, and non-alphabetic materials from the early colonial period. In particular we investigate how the history of the conquest itself and of the societies that existed prior to this contact were produced by its participants, with special attention to questions of ethnicity, gender, and class ]

#### HIST 424 Art and Politics in 20th Century Latin America @ (III)

Fall. 4 credits. Permission of instructor required. M. Roldan.

This seminar examines how the intersection of art and politics shaped culture, ideology, and identity in Latin America from the Mexican Revolution to the dictatorships of the late twentieth century. Topics may include muralism and the Mexican Revolution: the artist as muse and activist (Frida Kahlo); working class and immigrant culture in Argentina and the tango; samba as social and political protest in Brazil; gender and politics in exiled women's literature; the appropriation of public spaces as artistic forum and mean of communication under authoritarian regimes.

#### [HIST 438 History's Margins: Frontiers and Borders in Comparative Perspective (III)

Spring. 4 credits. Not offered 2002-2003. R. Craib.

A comparative seminar on borders and frontiers. Primary emphasis is on the Mexican-U.S. border. Central themes include the historical transformation of frontiers into borders; colonialism and imperialism; and immigration and nation-state formation. Attention is also given to situating the revived interest in borders in relationship to contemporary economic, political, and social changes. Readings include works of fiction, literary theory, history, science studies, and postcolonial criticism.]

#### **[HIST 445 Prostitutes and Patriots: Urban Culture and the Construction** of Citizenship in Latin America. 1880-1950 (also HIST 645) @ (III)

Fall. 4 credits. Prerequisites: HIST 295 and/ or 296 suggested. Permission of instructor required. Enrollment limited to 15. Not offered 2002-2003. M. Roldan.]

#### HIST 459 Radicals and Revolutionaries in Modern Latin America (also HIST 659) @ (III)

Fall. 4 credits. HIST 296, or permission. Limited to 15 students. R. Craib. This course examines radicalism in Modern Latin America, mostly in the 20th century. Primary emphasis is on the various processes-industrialization, capitalist development, urbanization, among others---that gave rise to radical movements, especially among peasants, urban workers, priests, and students. Particular attention is given to the relationship between experience and ideology through close readings of memoirs, testimonials, diaries, poetry, song lyrics, and the like. Graduate students who are interested in this course should enroll in HIST 659.

#### [HIST 649 Seminar in Latin American History

Fall. 4 credits. Not offered 2002-2003. M. Roldan.

A graduate-level seminar focusing on changing topics in Latin American history (politics, labor; race/ethnicity; violence; social movements, agrarian society, etc.). In addition to weekly meetings to discuss readings, students are expected to conduct original

research culminating in a final 25- to 30-page paper.]

#### HIST 659 Radicals and Revolutionaries in Modern Latin America (also HIST 459)

Fall. 4 credits. HIST 296, or permission. Limited to 15 students. R. Craib. This course examines radicalism in Modern Latin America, mostly in the 20th century. Primary emphasis is on the various processes-industrialization, capitalist development, urbanization, among others-that gave rise to radical movements, especially among peasants, urban workers, priests, and students. Particular attention is given to the relationship between experience and ideology through close readings of memoirs, testimonials, diaries, poetry, song lyrics, and the like. Undergraduates who are interested in this course should enroll in HIST 459.

### **African History**

#### HIST 155 The Past and Present of Precolonial Africa @ (III)

Fall. 4 credits. S. Greene. How has Africa's pre-colonial past influenced current events in Africa and elsewhere? To answer this question, this course explore the pre-19th century histories of four different cultural areas in Africa (e.g. Ancient Egypt, the West African coast.) Using both ancient and more recent oral traditions, travelers' accounts and visual images, we link these histories to current debates about the role of history in contemporary politics, the significance of race, class and gender in times past and present, and the role of Africa in world affairs.

#### HIST 241 Sophomore Seminar: Riot and **Revolution in Nineteenth-Century** Africa: The Birth of the Modern @# am

Spring. 4 credits. S. Greene. The beginning of the nineteenth century witnessed the rapid and often times forceful expansion of Islam in West Africa, the transformation of the Zulu from a small, inconsequential people to the largest and most powerful ethnic group in South Africa, and a major riot by enslaved peoples in east Africa. This course explores these revolutionary changes and upheavals as Africa remade itself to face the modern era. Lectures, readings and discussions focus on the causes and consequences of these events and their significance for understanding contemporary Africa.

### HIST 443 The European as Other @ (III)

Spring. 4 credits. Permission of instructor required. Limited to 15 students. S. Greene. Much has been written about European images of African men, African women, and African cultural practices during the 18th, 19th, and 20th century, but how did Africans view Europeans during these periods? How did these images influence the ways Africans saw themselves and how did these images change over time? These questions and others are explored by examining a variety of historical, literary, artistic and anthropological texts. Additional readings on how other peoples of color viewed Europeans are read for

#### [HIST 604 The Colonial Encounter

comparative purposes.

Fall. 4 credits. Prerequisite: permission of instructor. Not offered 2002-2003. S. Greene and T. Loos.

The course examines the way colonizer and colonized influenced the culture, history, and identity of the other. Emphasis is on exploring the colonial encounter as a phenomenon in itself. We consider both sides of the unequal equation that linked specific European countries (for example, France, England, Germany, the Netherlands) with the states they colonized in Africa and Asia. This linkage challenged, at different times and in different places, pre-existing understandings of self, country, and culture, and notions about the other.]

#### **Asian History**

# [HIST 190 Introduction to Asian

Civilizations @ # (III) Spring. 4 credits. Not offered 2002–2003. Next offered 2003-2004. J. Piggott and staff

An introduction to the distinctive cultures of China, India, Japan, and Southeast Asia that features an intensive examination of selected topics and periods of particular significance in the history of each.]

#### HIST 191 Introduction to Modern Asian History (also ASIAN 191) @ (III)

Fall. 4 credits. V. Koschmann and E. Tagliacozzo.

The history of Asia-Pacific from the nineteenth century to the present, focusing on relations of China, Japan, and Southeast Asia with each other and with the West.

#### [HIST 203 War and Diplomacy in Korea @ (III)

Spring. 4 credits. Not offered 2002-2003. B. Strauss ]

#### [HIST 207 The Occidental Tourist: Travel Writing and Orientalism in Southeast Asia (also ASIAN 206 and HIST 507) @ (111)

Spring. 4 credits. Letter grade only. Not offered 2002-2003. Next offered 2003-2004. T. Loos.

Students read travel literature about Southeast Asia in the nineteenth and early twentieth centuries and travel accounts written by Southeast Asians living abroad. The seminar emphasizes themes of race, orientalism, transculturation, and authenticity. We critically assess the transformative potential of the Internet on (virtual) tourism. Graduate students should register for HIST 507 and are expected to participate in the HIST 207 seminar. Preference is given to students with Internet experience.]

#### HIST 218 Introduction to Korea (also ASIAN 218) @ (III or IV)

Spring. 3 credits. Staff. For description see ASIAN 218.

#### HIST 230 Seminar in History and Memory: The Asia-Pacific War @ (111)

Fall. 4 credits. Seminar designed for underclassmen but open to all students. Enrollment limited to 15 students. I. V. Koschmann.

This seminar examines what is at stake when the fighting between Japan and its former enemies in the Pacific during World War II is remembered, memorialized, and (re)constructed as historical narrative. By exploring the legacies of such events and processes as the Nanking Massacre, systems of sexual slavery, mistreatment of POWs, and bombings of civilians, the seminar will offer

an opportunity to reflect on war crimes, public memory, and responsibility.

#### [HIST 243 Seminar: China and the West before Imperialism @ # (III) Spring. 3 credits. Seminar designed for underclassmen but open to all students. Enrollment limited to 15 students. Prerequisite: permission of instructor. Not offered 2002-2003. C. Peterson.]

### [HIST 249 Peddlers, Pirates, and **Prostitutes: Subaltern Histories of** Southeast Asia, 1800–1900 (also HIST 648 and ASIA 249/648) @ # (110)

Spring. 4 credits. Not offered 2002-2003. Next offered 2003-2004. E. Tagliacozzo. This course examines Southeast Asian history "from below" over the course of a single century, 1800-1900. Laboring histories, the history of piracy and prostitution, and the pasts of people usually considered "marginal" to the state are all discussed. How do we look for clues to these peoples' lives? Were there similarities in experience across disparate geographies? What did it mean to be an outlaw, "deviant," or poor in colonial Southeast Asia? This course attempts to answer these questions.]

#### INIST 284 Southeast Asia in the World System: Capitalism and Incorporation, 1500-Present (also HIST 684 and ASIAN 284/684) @ # (111)

Fall. 4 credits. Graduate students should enroll in HIST 684. Not offered 2002-2003. E. Tagliacozzo.

This course examines the history of Southeast Asia in conjunction with what theorists have called the emerging "World System." The expanding reach of capitalism is traced through the region's Early Modern "Age of Commerce"; through the age of great European merchant companies; through the coercive capitalism of the imperial age; and into our own times. Throughout, attention is paid to similar (or dissimilar) trends in the rest of global history, spanning Europe, Africa, Middle East, and the Americas. Open to students with an interest in Southeast Asian history, as well as the shaping forces of capitalism on the modern world.]

#### HIST 289 The U.S.-Vietnam War (also ASIAN 298) @ (III)

Spring. 3 credits. K. Taylor. This is a survey of events in Vietnam, the U.S., and elsewhere related to U.S. intervention in Vietnam from the 1940s to 1975. Readings include historical narratives, memoirs, and literature. Alternative ways of understanding this war in context of Vietnamese and American history are explored.

#### HIST 293 History of China up to Modern Times (also ASIAN 293) @ # (III)

Fall. 4 credits. C. A. Peterson. A survey of the principal developments in the history of China from the earliest times to the eighteenth century that also undertakes a topical introduction to Chinese culture and civilization, in part by the use of visual materials.

### [HIST 294 History of China in Modern

Times (also ASIAN 294) @ (III) Spring. 4 credits. Not offered 2002-2003. S. Cochran.

A survey that concentrates on the rise of the last imperial dynasty in the seventeenth and eighteenth centuries, the upheavals resulting

from domestic rebellions and foreign imperialism in the nineteenth century, and the twentieth-century efforts to achieve social mobilization, political unity, and commercial expansion 1

### (HIST 297 Japan Before 1600 (also HIST

597 and ASIAN 297/597) @ # (111) Fall. 4 credits. Not offered 2002-2003.

J. Piggott. This course explores Japan before 1600 from a variety of perspectives. Analysis of primary sources, including literary and archaeological artifacts, is emphasized. HIST 297 is a good introduction to issues of premodern historical study and to the study of East Asia. (Graduate students or more advanced undergraduates who would like to do a research project should register for HIST 597).]

#### HIST 319 Introduction to South Asia's **Environmental History (also ASIAN** 319) @ (III)

Spring. 4 credits. M. Rangarajan. The course aims to be an introduction to key themes in the environmental history of South Asia, a region with diverse ecologies and cultures, differing environmental traditions, and lively debates about alternative futures. These have given rise to controversies, many of which are relevant beyond the subcontinent. The course sharply focuses on the colonial period and its aftermath, but seeks to place these events in perspective. The subsequent emergence of independent nationstates in the twentieth century and their record forms a major part of the course. Selections from a rich corpus of original sources including travel writings, pictorial books, and memoirs add variety to the study of the region.

#### HIST 322 History of Samurai # @ (III) Fall. 4 credits. J. Piggott.

This course explores the role of the samurai at various epochal moments, and the effects samurai-centered governance has had on society and culture up to the early modern era. This is very much a hands-on course in which analysis and writing are emphasized. Recommended: HIST 297. Graduate students are welcome but they should register for HIST 522 after consultation with the instructor.

#### [HIST 326 History of the Samurai II @ # am

Fall. 4 credits. Prerequisite: HIST 322. Not offered 2002-2003. J. Piggott.

We continue study of themes and issues introduced in HIST 322, wherein the origins of the samurai from eighth-century roots through the era of the first warrior government during early medieval times are traced. This course covers the samurai through 1600.]

#### [HIST 328 State, Society, and Culture in Modern Japan @ (III)

Spring. 4 credits. Not offered 2002-2003. Next offered 2003-2004. J. V. Koschmann. A survey of Japan from early-nineteenth century to the present, which attempts to connect the political, socio-economic, and imaginative realms of modern Japanese life so as to achieve a complex view of modern Japanese society. Pays particular attention to the changing situation of women and women's movements, Japan's relations with Asia and the United States, and problems of historical representation and consciousness. Readings include Japanese works in translation as well as secondary sources.]

### HIST 330 Japan from War to **Prosperity @ (III)** Spring. 4 credits. V. Koschmann.

An interpretation of Japanese history from the late-1920s to present, emphasizing mobilization for total war and its continuing legacies, technology and organized capitalism, relations with the U.S. and Asian neighbors, social integration and exclusion, historical representation and consciousness, and political dynamics.

#### [HIST 360 Early Warfare, East and West # (III)

Fall. 4 credits. Not offered 2002-2003 C. A. Peterson.

For description see Comparative History.]

#### (HIST 388 Vietnamese Histories (also HIST 688 and ASIAN 385/685) @ # am

Fall. 3 credits. Not offered 2002-2003. K. Taylor.

For description see ASIAN 385.]

#### [HIST 393 Images of Humanity in Medieval China (also ASIAN 393) @ # (111)

Fall. 4 credits. Permission required. Not offered 2002-2003. C. A. Peterson.]

#### **HIST 396 Southeast Asian History from** the Eighteenth Century (also HIST 696 and ASIAN 396/696) @ (III) Spring. 4 credits. S-U option.

E. Tagliacozzo.

Surveys the modern history of Southeast Asia with special attention to colonialism, the Chinese diaspora, and socio-cultural institutions. Considers global transformations that brought "the West" into people's lives in Southeast Asia. Focuses on the development of the modern nation-state, but also questions the narrative by incorporating groups that are typically excluded. Assigns primary texts in translation.

#### [HIST 416 Undergraduate Seminar on Gender and Sexuality in Southeast Asia (also ASIAN 416 and WOMNS 416) @ (111)

Spring. 4 credits. Letter grade only. Not offered 2002-2003. T. Loos.

Students consider the relationships among colonialism and gender and sexual identity formation in Southeast Asia. Using material from a wide range of fields including anthropology and literature, the course complicates a simplistic East/West and male/ female binary.]

#### HIST 420 Japan in the Year 1000: The Tale of Genji in Historical Perspective @ # (III)

Fall. 4 credits. Prerequisite: permission of instructor. J. Piggott.

The Tale of Genji is a classic of premodern Japanese literature that provides readers a broad view into Japan's courtly society at a time when many of the elements of Japan's classical tradition were taking form. Those interested in premodern Japan, Comparative Literature, and courtly societies will find the seminar of great interest. Previous study of premodern Japan is advised.

#### [HIST 448 Family and Gender Relations in Premodern Japan #@(III)

Spring. 4 credits. Prerequisite: permission of instructor. Not offered 2002-2003. J. Piggott.

An inquiry into structures of family and gender relations in the classical and medieval periods. Themes will include kinship and

family organization, state formation, and gender construction. Those interested in comparative perspectives are encouraged to enroll. Breadth reading, primary source materials, and comparative reading placing Japan in an East Asian context are emphasized. Previous study of premodern Japan and East Asia is recommended.]

#### [HIST 451 Crime and Diaspora in Southeast Asian History, 1750-1950 (also HIST 650 and ASIAN 450/ 651) @ # (111)

Fall. 4 credits. Not offered 2002-2003. E. Tagliacozzo.

During the last two centuries, the mass movement of people in Southeast Asia has increased to an unparalleled scale. This course examines the diasporas of various Asian peoples in this time frame, and asks how these movements have intersected with notions (and actions) of "criminality" in the region. Historical sources, period literature, and anthropological writings are used to analyze the growth of migration, smuggling syndicates, and "illicit" behavior in Southeast Asia. Open to students with an interest in Southeast Asian history and the region's links to the wider Asian orbit.]

### [HIST 466 Kings and Shoguns: the Taiheiki Age @ # (III) Spring. 4 credits. Not offered 2002–2003.

Next offered 2003-2004. J. Piggott. The turn of the fourteenth century witnessed epochal changes in Japan as structures of monarchy, court-Bakufu relations, landholding, judiciary, international relations, and popular culture were deeply affected by the failure of Go-Daigo Tenno's royal restoration. Core readings of the seminar include portions of the martial epic, the Taiheiki, and other materials from which insights into these transformations can be drawn. Previous study of Japanese history, especially HIST 322, is highly recommended.]

#### [HIST 476 Senior Seminar: Comparative **Colonial Law and Society (also** ASIAN 476) @ (III)

Fall. 4 credits. Letter grade only. Limited to 15 students. Not offered 2002-2003. T. Loos.

Students explore topics including: hybrid jurisprudence, notions of public and private, religious codes, family, and national identity that resulted from colonial policies. Most readings focus on law, society in colonial Southeast Asia. Readings may include theoretical material on law and society and historical material about jurisprudence in Europe that informed colonial categories of law in the colonies. Relevant comparative readings outside the scope of Southeast Asia are also included.]

#### [HIST 480 Senior Seminar: Gender Adjudicated (also WOMNS 480 and ASIAN 482) @ # (III)

Fall. 4 credits. Letter grade only. Limited to 15 students. Not offered 2002-2003. T. Loos

Students explore the intersections among jurisprudence, religious codes, gender, family, and national identity in Southeast Asia from the colonial period to the present.]

### [HIST 489 Seminar in Modern Japanese **History @ (III)** Fall. 4 credits. Prerequisites: HIST 298 or

equivalent knowledge of modern Japanese history. Not offered 2002-2003. J. V. Koschmann.]

#### [HIST 490 Tales of the Helke (also ASIAN 490/690 and HIST 690) @ # (111)

Fall. 4 credits. Prerequisite: previous study of pre-1600 Japan or permission of instructor. Limited to 15 students. Not offered 2002-2003. J. Piggott.

Medieval Japan was crisscrossed by an assortment of minstrel monks who sang the heroic exploits of fighting men-samurai-in the late twelfth century. The resulting Tale of the Heike (Heike Monogatari) was later compiled in its current form by the master chanter Kakuichi during the 14th century. It has been called "Japan's first national epic," because listening to it, enjoying it, and identifying with it brought people of all strata and regions together as nothing had done before. In this seminar we will investigate the Tale of the Heike from various historical and literary perspectives.]

#### HIST 492 Undergraduate Seminar in Medieval Chinese History (also ASIAN 492) @ # (111)

Fall. 4 credits. Prerequisite: HIST 190, 293, 360, or permission of instructor.

C. A. Peterson.

Topic for fall 2002: East meets West-Marco Polo and the Mongol Conquest.

#### [HIST 493 Problems in Modern Chinese History (also HIST 693) @ (III)

Fall. 4 credits. Prerequisite: HIST 294 or permission of instructor. Not offered 2002-2003. S. Cochran.

Conflicting interpretations of Chinese history during the late imperial period and the first half of the twentieth century.]

#### HIST 494 Theories of Civilization (also ASIAN 425) # @ (III or IV)

Spring. 4 credits. K. Taylor. See ASIAN 425 for description.

#### [HIST 495 Kings and States: Asian Models @#(III)

Spring. 4 credits. Prerequisite: previous coursework in East Asian history and permission of instructor. Not offered 2002-2003. J. Piggott.

The seminar explores kingship and state formation in comparative perspective. In addition to participating in discussions focused on core readings, seminar members undertake research projects targeting a society of their choice. Students interested in the history of preindustrial societies, political and cultural anthropology, political science, and religion will find the seminar of interest.]

#### HIST 496 Conservation, Politics, and History: Seminar on Comparative Perspectives on Colonialism (III)

Spring. 4 credits. M. Rangarajan. This course examines the social history and background of nature conservation in the Indian Ocean region in a comparative light. It begins with an introduction to wider themes in ecological history and environmental debates. It will then move on to specific themes, drawing out contrasts and comparisons between imperial powers and colonized countries and more so, between different experiences, mainly of South Asia with southern Africa. To enable clear focus, the contrasts are normally with Anglophone southern Africa and South Asia. Occasionally, the course may bring in wider themes. It also examines the emergence of new forms of knowledge, agendas of environmental control or repair, and alternative currents. Original

works are extensively used with secondary readings serving as a guide to the subject.

#### [HIST 499 Problems in Modern Chinese History (also HIST 694 and ASIAN 499/694) @ (III)

Spring. 4 credits. Prerequisite: HIST 294 or permission of instructor. Not offered 2002– 2003. S. Cochran.

This course gives each student an opportunity to select one research topic and work on it throughout the semester. Knowledge of Chinese is not required, but background in Chinese studies is needed.]

#### [HIST 507 Graduate Seminar: The Occidental Tourist

Spring. 4 credits. Not offered 2002–2003. T. Loos.

For description see HIST 207.]

#### [HIST 588 Proseminar in Modern Korean History

Spring. 4 credits. Prerequisite: a course on East Asian history or equivalent. Not offered 2002–2003. J. V. Koschmann.]

#### [HIST 597 Colloquium in Premodern Japanese History

Fall. 4 credits. For advanced undergraduates or graduates. Not offered 2002–2003. J. Piggott.

This colloquium explores the premodern civilization of Japan from a variety of historical perspectives. Students must attend HIST 297 lectures and participate in a special weekly colloquium.]

#### [HIST 598 Colloquium in Modern Japanese History

Spring. 4 credits. Not offered 2002–2003. J. V. Koschmann.

For graduate students only. Students attend lectures and do the reading for HIST 298, participate in a special weekly colloquium, and write a seminar paper.]

#### [HIST 604 The Colonial Encounter

Fall. 4 credits. Not offered 2002–2003. S. Greene and T. Loos.

This course examines the way colonizer and colonized influenced the culture, history, and identity of the other. Emphasis is on exploring the colonial encounter as a phenomenon in itself. We consider both sides of the unequal equation that linked specific European countries (for example, France, England, Germany, and the Netherlands) with the states they colonized in Africa and Asia. We discuss how this linkage challenged, at different times and in different places, pre-existing understandings of self, country, culture and notions about the other.]

#### [HIST 609 Modern Japan Studies: The Formation of the Field in History and Literature (also ASIAN 609)

Fall. 4 credits. Not offered 2002-2003.

J. V. Koschmann and N. Sakai.]

#### [HIST 631 Seminar in Medieval Chinese History

Fall. 4 credits. Prerequisite: permission of instructor. Not offered 2002–2003. C. A. Peterson.]

#### [HIST 632 Seminar in Medieval Chinese History

Spring. 4 credits. Prerequisite: permission of instructor. Not offered 2002–2003. C. A. Peterson.]

#### [HIST 635 Seminar in Modern Southeast Asian History

Fall. 4 credits. Permission of the instructor. Not offered 2002–2003.]

#### HIST 299 Introduction to Christian History (also NES 295, JWST 295, RELST 295) # (III or IV)

Spring. 3 credits. K. Haines-Eitzen. This course offers an introduction to the history of Christianity from the apostle Paul through the seventeenth century, with an emphasis on the diversity of Christian traditions, beliefs, and practices. We explore the origins of Christianity in the eastern Mediterranean world, the spread of Christianity, the development of ecclesiastical institutions, the rise and establishment of monasticism, and the various controversies that occupied the church throughout its history. This course draws upon primary literary sources (from biblical literature to council proceedings, monastic rules, sermons, theological treatises, and biographies) as well as Christian art, inscriptions, music, and manuscripts.

#### [HIST 317 Islamic History: The Age of Ibn Khaldun (also NES 356) @ # (III) Spring. 4 credits. Prerequisite: NES 257 or

For description, see NES 351.

#### HIST 390 The Safavid Dynasty of Iran, 1501–1722 (also NES 391) # @ (III) Fall. 4 credits. C. Mitchell.

This seminar focuses intensely on the premodern dynasty of the Safavids in "Greater Iran." We will examine how this gunpowder empire grew from a millenarian mystical movement to become a major Muslim political entity in the early sixteenth century. Particular focus will be placed on discussing the founding of the Safavid empire by Shah Isma'il (r. 1501–24) and the degree with which he was committed to establishing a proper Perso-Islamic state. Considerable attention will be given to the promulgation and enforcement of Twelver Shi'ism as the state religion by Shah Isma'il and his successor, Shah Tahmasp (r. 1524–76). The empire culminated with the reign of Shah 'Abbas the Great (r. 1589–1629), and we will debate the various political, administrative, economic, social, and religious reforms instituted during this period; this will be examined in conjunction with 'Abbas's dealing with the encroaching European powers of Portugal, England, and Holland. We will also allot time to discuss the decline of the Safavids, and the legacy of this dynasty to later 19th-and-20th-century developments in Iran.

#### HIST 398 Persia in Early Modern European Scholarship and Imagination (also NES 398) # (III or IV)

Spring. 4 credits. C. Mitchell. For description see NES 398.

#### HIST 429 The Cross and the Crescent: Early Modern Christian Contacts with Islam (also SPANL 446 and NES 437) @ # (III)

Fall. 4 credits. M. A. Garces. Under the Medieval caliphate, and under the Persian and Turkish dynasties, the empire of Islam was the richest, most powerful, most creative, most enlightened region in the world. Tenth-century Cordoba in al-Andalus was in the pinnacle of its glory, giving rise to such poets and philosophers as Ibn Hazm and Ibn Rushd, better known as Averroes. Christendom was on the defensive: In the Iberian Peninsula, the Reconquista advanced, fueling an inbuilt hostility against Islam. In 1492, the Catholic monarchs Ferdinand and Isabella conquered the Moorish kingdom of Granada and unified Spain under Christianity. But in the southeastern Europe, where the Ottoman Sultan assaulted first the Byzantine Emperor and then the Holy Roman Empire of Charles V, Muslim power continued to prevail, particularly in the early modern Mediterranean wars against Spain. This course traces the development of these encounters in medieval and early modern Spain through the study of historical and literary texts from Ibn Hazm of Cordoba to the sixteenth-century Iberian obsession with Morrish motifs, represented by the Abencerraje and the Romancero, to the depiction of the conflicts between Christianity and Islam in works by Leo Africanus, Lopez de Gomara, Hurtado de Mendoza, Perez de Hita, Cervantes, and Antoni de Sosa, among others. Particular attention is paid to the construction of a Spanish national identity, created through Christian-Islamic confrontations. The course is conducted in Spanish.

#### [HIST 461 Seminar in Islamic History 600–750 (also HIST 671, NES 451 and 650, and RELST 451) @ # (III)

Spring. 4 credits. Enrollment is limited to 25 students. Not offered 2002–2003. D. Powers.

For description, see NES 451.]

#### HIST 652 Introduction to Islamic Law (also HIST 372, NES 351/651, RELST 350)

#### [HIST 671 Seminar in Islamic History (also HIST 461, NES 451, and 650, and RELST 451)

Spring. 4 credits. Not offered 2002–2003. D. Powers.

For description, see NES 451.]

### **Ancient European History**

#### HIST 151 Introduction to Western Civilization # (III)

Summer and fall. 4 credits. S. Pohl. A survey of European history from Antiquity to the Renaissance and Reformation. Important themes include the influence of ancient culture on medieval society, the development of and conflict between secular and ecclesiastical governments, European encounters with the non-Europeans, the culture and role of minority groups within European society, and the roles of women.

#### [HIST 228 War and Peace in Greece and Rome # (III or IV)

Fall. 4 credits. No prerequisites. Open to freshmen. Not offered 2002–2003. Next offered 2003–2004. B. Strauss.

In ancient Greece and Rome, government did little besides wage war and raise taxes; culture focused on war, warriors gloried in battle, and civilians tried to get out of the way. This course surveys the impact of war and the rarity of peace in the ancient world. Topics include: Why war?; the face of battle; leadership; strategy, operations, and tactics; women and war; intelligence and information gathering; diplomacy and peace-making; militarism; war and slavery; and the archaeology of warfare. Readings in translation include selections from Homer, Herodotus, Thucydides, Xenophon, Caesar, Livy, Tacitus, Josephus, and Ammianus Marcellinus.]

#### [HIST 232 Sophomore Seminar: Eyewitness to War in the Ancient World (also CLASS 234) # (III or IV) Spring. 4 credits. Not offered 2002–2003.

B. Strauss. A study of ancient soldier-historians who

participated in the campaigns about which they later wrote. Topics include historicity, autobiography, propaganda, and prose style. Readings include selections from Thucydides, Xenophon, Julius Caesar, Josephus, Ammianus Marcellinus, as well as, for comparative purposes, modern soldier-historians.]

#### [HIST 265 Ancient Greece from Homer to Alexander the Great (also CLASS 265) # (III)

Fall. 4 credits. Open to freshmen. Not offered 2002–2003. B. Strauss.

A survey of Greece from the earliest times to the end of the Classical period in the late fourth century B.C. The course focuses on the Greek genius: its causes, its greatness, its defects, and its legacy. The Heroic Age, the city-state, ancient democracy, and the intellectual ferment of the Greek Enlightenment are the main topics of study. Readings in translation from Homer, Aristophanes, Sophocles, Herodotus, Thucydides, Plato, Aristotle, and from the evidence of ancient inscriptions, coins, art, and architecture.]

#### HIST 268 A History of Rome from Republic to Principate (also CLASS 268) # (III)

Summer and spring. 4 credits. Open to freshmen. J. Ginsburg.

A survey of Rome and its empire. This course explores the formation of Rome's Mediterranean empire and its political, social, and economic consequences; the constitutional and social struggles of the late Republic; the transition from Republic to Principate; society and state under the Caesars; the nature and limits of governing a world empire; and the interaction of pagans, Christians, and Jews in the Roman world.

#### [HIST 435 Modern Classics in the Historiography of Ancient Greece (also CLASS 435) (III)

Fall. 4 credits. Prerequisite: an introductory course in ancient Greek history or civilization or permission of the instructor.

Not offered 2002–2003. B. Strauss. This upper-level seminar is an introduction to some of the main themes, directions and controversies in modern research on ancient Greece. We read selections from the leading works of scholarship on ancient Greece from the nineteenth and twentieth century, including such authors as Grote, Burckhardt, Cornford, Glotz, Momigliano, M. I. Finley, Ste. Croix, Vernant, Vidal-Naquet, and the current crop of scholars.]

#### [HIST 450 The Peloponnesian War (also HIST 630 and CLASS 450/632) # (III)

Fall. 4 credits. Prerequisites: HIST 265, CLASS 211 or 217, or permission of instructor. Not offered 2002–2003. Next offered 2003–2004. B. Strauss.

Famous as the subject matter of one of the most important books ever written about war—Thucydides' history—the Peloponnesian War (431–404 B.C.) remains today the focus of study by historians, classicists, and political scientists. This course looks at the results of intensive and ongoing study by ancient historians and considers areas of future research. Topics include strategy, operations, and tactics; battle on land and sea; alliance politics; war and psychology; if the Peloponnesian War was really a historic turning point; war and ethics; Thucydides as a historian; and sources other than Thucydides. Graduate students should enroll in HIST 630.]

#### [HIST 452 The Tragedy of Classical Athens, 462–404 B.C. # (III)

Spring, 4 credits. Prerequisite: permission of instructor. Not offered 2002–2003. B. Strauss.]

#### [HIST 453 Crisis of the Greek City-State, 415–336 B.C. # (III)

Fall. 4 credits. Prerequisite: permission of instructor. Not offered 2002–2003. B. Strauss.]

#### [HIST 463 Gender and Politics in the Roman World (also CLASS 463 and WOMNS 464) # (III or IV)

Spring, 4 credits. Prerequisite: HIST 268, CLASS 212, or permission of the instructor. Not offered 2002–2003. J. Ginsburg.]

#### [HIST 469 Equality and Inequality in Ancient Greece (also CLASS 469) (III or IV)

Fall. 4 credits. Prerequisite: HIST 265, CLASS 211 or 217, or written permission of the instructor. Not offered 2002–2003. Next offered 2003–2004. B. Strauss.

We examine equality and inequality in Archaic and Classical Greek city-states ca. 650–400 B.C., with an eye toward politics, society and economics, culture, and gender relations. The course focuses on concepts and institutions such as ancient democracy, tyranny, oligarchy, "middling" ideology, and slavery, as well as theories of equality. All readings in English.]

#### [HIST 473 Roman Society and Politics under the Julio-Claudians (also CLASS 480) # (III or IV)

Spring. 4 credits. Prerequisite: CLASS 212, HIST 268, or permission of instructor. Not offered 2002–2003. J. Ginsburg. For description, see CLASS 480.]

#### [HIST 630 Topics in Ancient History (also CLASS 632)

Fall. 4 credits. Not offered 2002–2003. B. Strauss.]

### Medieval, Renaissance, and Early Modern European History

#### HIST 151 Introduction to Western Civilization # (III)

Fall and summer. 4 credits. S. Pohl. For description, see Ancient European History.

#### HIST 152 Introduction to Western Civilization # (III)

Summer and spring. 4 credits. R. L. Moore and M. Steinberg.

For description, see Modern European History.

#### [HIST 204 Seminar: Age of Atlantic Revolution # (III)

Fall. 4 credits. Seminar designed for underclassmen but open to all students. Enrollment limited to 15 students. Prerequisite: permission of instructor. Not offered 2002–2003. Next offered 2003– 2004. R. Weil.

"All the Atlantic Mountains shook," wrote the poet William Blake of the revolutions which toppled regimes across Europe and the Americas at the end of the eighteenth century. This course explores the ideas, outcomes, and connections among events in America, France, Haiti, and Britain, through literary and philosophical texts: Wordsworth, Rousseau, Jefferson, Paine, Burke, Godwin, Tocqueville, and even Jane Austen.]

#### HIST 210 The Government of God # (III) Spring. 4 credits. O. Falk.

The most efficient and powerful system of government in the West during the high Middle Ages was centred at Rome and headed by the papacy. Yet, paradoxically, the Pope commanded no divisions and identified himself as the "servant of the servants of God." This course introduces students to key aspects of medieval institutional and religious history through an examination of this mighty papal apparatus, relying chiefly on reading of primary sources (in translation). We will trace the structure and methods by which the papal hierarchy established its sovereignty, comparing and contrasting them to those used by other medieval rulers, and ponder the ideologies that played a role in animating this enterprise

#### [HIST 211 Specters, Demons, and the Dead in European Society, 1200– 1800 # (III)

Spring. 4 credits. Not offered 2002–2003. S. Pohl

Premodern Europeans believed that they could interact with supernatural apparitions in a variety of ways. The dead could return to admonish the living, demons might possess men and women, houses could be haunted by specters and poltergeists. What can we learn from a study of these beliefs about the ways in which Europeans regarded sin, punishment, the afterlife, and the role of the devil in their lives? What was the impact of the Reformation or the scientific revolution on these beliefs?]

#### HIST 234 Seminar: Gender in Early Modern Europe (also WOMNS 234) # (III)

Fall. 4 credits. Seminar designed for underclassmen but open to all students. Enrollment limited to 15 students. Prerequisite: permission of instructor. R. Weil.

Course serves as an inquiry into how masculinity and femininity were defined in early modern Europe. Questions to be explored include: What purpose did gender distinctions serve in this particular society? To what extent were men and women able to shape and redefine the meaning of their gender? How was their ability to do so affected by such events as the Reformation and the French Revolution?

#### [HIST 257 English History from Anglo-Saxon Times to 1485 # (III)

Fall. 4 credits. Not offered 2002–2003. P. Hyams.]

#### [HIST 259 The Crusades #@(III)

Fall. 4 credits. Not offered 2002–2003. Next offered 2003–2004. P. Hyams.

A lecture course examining the Crusading Movement and the States it produced from the eleventh century to the fall of the mainland Kingdom of Jerusalem in 1292. The historical themes this generates are almost unlimited. The course treats the Christianity and Chivalry of the Medieval West, the confrontation of this culture with those of the Mediterranean and Islam, and what is perhaps the cradle of Western Colonialism. The very concept of "Crusade" itself is problematic today and will continue to cast its shadow on U.S. dealings with the Middle East. The readings allow students to choose from a very wide range of paper topics, and enjoy an excellent introduction to every aspect of the long-gone world of the Middle Ages.]

#### HIST 262 The Middle Ages: Introduction and Sampler (also RELST 265) # (III)

Fall. 4 credits. P. Hyams.

As a single-semester introduction to the period, this survey aims to convey what was significant in that area of the "West" that was to become Europe, between the end of the Roman Empire in the West and the Renaissance, from 395 to 1400. It takes a critical look at a formative period of Western Civilization. The course is organized into modules, the first of which surveys in five weeks the main public developments in Political and Church History over the period. Other modules focus in some depth on select aspects, such as technology, music, material resources, and religions, to other choice samples from the best of medieval culture. Emphasis is on students finding their own ways to win credit.

#### [HIST 264 The High Middle Ages # (III)

Fall. 4 credits. Not offered 2002–2003. P. Hyams.

A survey of medieval civilization 1100–1400, dealing with political, economic, religious, and intellectual developments in Western Europe. Special attention is paid to the interaction of different kinds of history and to the historian's understanding of literature and its use as a primary source. Lectures and class discussions.]

#### HIST 269 The Early Middle Ages # (III) Spring. 4 credits. O. Falk.

Spanning the period ca. 300 to 1100 AD, this course offers a brief survey of European history between the twilight of Classical

antiquity and the dawn of the second millennium. Although we will focus primarily on what would later become Western Europe, we shall also pay close attention to the neighbors of Latin Christendom, Byzantium, and the Muslim world. Emphases will be placed on social, cultural, and institutional developments during the period, as well as on the variety of historical methodologies used to study the early Middle Ages.

#### HIST 272 Atlantic World: From Conquest to Revolution # (III)

Spring. 4 credits. Intended primarily for sophomore prospective history majors; open to others by permission of instructors. K. Graubart, M. B. Norton, R. Weil. After Europeans first crossed the Atlantic in

After Europeans first crossed the Atlantic fir the late fifteenth century, the ocean became a vast highway linking the European powers— Spain, France, Britain, and the Netherlands with their colonial outposts in America. This seminar explores the Atlantic world through reading such primary sources as the log of Christopher Columbus and the autobiography of Olaudah Equiano, an Anglo-African sailor, and recent scholarly examinations of slave trade and other aspects of the Atlantic economy.

#### HIST 275 Authority and Resistance in Europe, 1400–1600 # (III)

Spring. 4 credits. S. Pohl. A lecture course examining the political, cultural, and social transformations during the Reformation era through an exploration of aspects of state formation and ecclesiastical order, social and religious protest, and deviant behavior. Specific topics covered include the Protestant Reformations and the emergence of confessional churches, law and crime, the peasant rebellions and the early modern witch hunts.

#### HIST 305 Britain, 1660-1815 # (III)

Fall. 4 credits. R. Weil. Course covers the British Isles from the Restoration of Charles II through the Napoleonic wars. We consider the domestic effects of war and Empire; luxury, commerce, and the public sphere; continuing conflicts over religious toleration, popular politics, and the relation of England to Ireland and Scotland. Readings include works by John Locke, Jonathan Swift, Adam Smith, Thomas Paine, Edmund Burke, and Jane Austen.

#### [HIST 310 Life, Literature, and Power in Medieval England (also ENGL 314) # (III or IV)

Fall. 4 credits. No prerequisites. Not offered 2002–2003. P. Hyams and A. Galloway.

This course explores key issues and key texts from the English literature of the period 1100-1500. It aims to survey and introduce the Age of Middle English-its history, its language, and its literature-to majors in English and History and others who seek something more than a bare acquaintance with the Canterbury Tales and Wars of the Roses. The instructors, coming from two different disciplines, expect to educate themselves as well as the class on the contributions that history and literature can each make to the understanding of the other. Lectures are designed to provide context for the class's central feature: close reading of texts, some in the original Middle English, some in translation of Middle English, French, and Latin, ranging from literary masterpieces to chronicle narratives, from dream visions to social satire.]

#### HIST 320 The Viking Age # (III) Fall. 4 credits. O. Falk.

This course aims to familiarize students with the history of Scandinavia, ca. 800–1100 AD. Although well known as a dramatic chapter in medieval history, this period remains enigmatic and often misunderstood. Our goal will be to set Norse history within its European context, observing similarities with processes elsewhere in the medieval world, the better to perceive what makes the Norse unique. We will examine the social, economic and political activities of the Norsemen in continental Scandinavia, in Western and Eastern Europe, and in the North Atlantic.

#### [HIST 349 Early Modern England # (III) Fall. 4 credits. Not offered 2002–2003. R. Weil

This course explores the crises of political, religious, and epistemological authority that plagued England in the sixteenth and seventeenth centuries. We examine the political and cultural impact of the Protestant Reformation, the nature of Tudor despotism and Stuart absolutism, the construction of a rhetoric of political dissent around issues of sexuality and corruption, competing understandings of the social order and social control, the Puritan Revolution, and the invention of liberalism. Emphasis is on close reading of contemporary sources, from autobiography and drama to political theory.]

#### HIST 350 The Italian Renaissance (also ITALL 221) # (III or IV)

Spring. 4 credits. J. Najemy. An exploration of intellectual, cultural, religious, and political developments in Italy from the political thought of Dante and Marsilius in the age of the communes, through the several stages of Humanism from Petrarch to Alberti to Pico, down to the crisis of Italian liberty in the generation of Machiavelli, Guicciardini, and Castiglione. The course seeks to problematize the notion of a "Renaissance" in the period's ambivalent attitudes toward history, politics, learning, culture, gender, language, and the role of intellectuals in politics and society. Emphasis is placed on the close reading of primary sources and on issues of interpretation.

#### [HIST 351 Machiavelli (also ITALL 351) # (III or IV)

Fall. 4 credits. Not offered 2002–2003. J. Najemy.

This course presents Machiavelli in a variety of historical and interpretive contexts: European and Italian politics in the early sixteenth century; the decline of the Florentine republic and the rise of the Medicean principate; Machiavelli's own career in government and his, and the republic's, crisis in 1512-13; the intellectual traditions of Renaissance humanism, political thought, and the revival of antiquity; vernacular literary currents and popular culture; and the political figures, writers, and theorists with whom Machiavelli associated and corresponded. Emphasis is placed on a close reading of the major works (including the letters, The Prince, the Discourses, Mandragola, and selections from The Art of War and the Florentine Histories, all in translation) and a critical examination, in the light of that reading, of some major modern interpretations of Machiavelli 1

#### HIST 364 The Culture of the Renaissance II (also COM L 362, ENGL 325, FRLIT 362, RELST 362, MUSIC 390) # (III or IV)

Fall. 4 credits. Open to freshmen with permission. K. P. Long, W. Kennedy. For description, see COM L 362.

#### [HIST 368 Marriage and Sexuality in Medieval Europe (also RELST 368, WOMNS 368) # (III) Spring. 4 credits. No formal prerequisite,

Spring. 4 credits. No formal prerequisite, though some prior knowledge of medieval European history is desirable. Not offered 2002–2003. Next offered 2003–2004. P. Hyams.

Few topics generate heat so readily as gender relations and sexuality. Behind the current controversies lie decisions made in the first Christian centuries, and firmed up in the course of the Middle Ages; these still affect all of us, believers and unbelievers alike. This course studies Western attempts to deal with the problem of sexuality up to about 1500. The class first clarifies the church's normative rules of law and theology. Armed with this framework, we then turn to more specific topics, including homosexuality, prostitution, rape/abduction, and sexuality in medieval literature. The goal is to be able to compare the ideal model with the reality, and thus to assess the product the medieval church passed on to Western culture and to ourselves l

#### [HIST 369 The History of Florence in the Time of the Republic, 1250–1530 (also ITALL 369) # (III or IV)

Spring. 4 credits. Not offered 2002–2003. J. Najemy.

Florentine politics and society from the communal period through the age of Dante, the rise and decline of the guild republic, the age of civic humanism, and the rise of the Medici, to the crisis of the republic in the time of Machiavelli. Social classes and conflicts, the elite families, economic structures, the working classes, guilds, family history, women, and political and historical ideas are considered in the context of the emergence and transformation of republican government.]

#### [HIST 408 Feudalism and Chivalry: Secular Culture in Medieval France, 1000–1300 # (III)

Fall. 4 credits. No prerequisites; HIST 262, 263 or 264 suggested. Not offered 2002-

2003. Next offered 2003–2004. P. Hyams. An upper-level seminar on the main currents of noble lay culture in France, which led European fashions in love, warfare, entertainment, and environment through most of the period. There is heavy emphasis on contemporary sources (in English), including lively and complete readings from epic literature (the Song of Roland), lives, and chronicles.]

#### HIST 409 Seminar on Work in Europe and America # (III)

Fall. 4 credits. S. Kaplan. For description, see Comparative History.

#### [HIST 436 Conflict Resolution in Medieval Europe # (III)

Spring. 4 credits. Not offered 2002–2003. P. Hyams.

This seminar concentrates on a time (late ninth to thirteenth centuries) when much of Europe lacked formal systems of justice, and so handled questions of social control quite largely by extra-legal means. Its subject is in one sense political history upside-down, as viewed by individuals rather than their rulers. We examine ways in which anthropology and some recent approaches to law can assist: the readings are partly anthropology, partly translated medieval accounts of actual conflicts, with samples of recent interpretation. The topics covered should be of interest to law students and majors in anthropology and other modern social sciences.]

#### [HIST 444 Seminar: Witchcraft, Magic, and the Occult in Europe, 1400-1700 # (III)

Spring, 4 credits. Enrollment limited to 15 students. Prerequisite: permission of instructor. Not offered 2002–2003. Next offered 2003–2004. S. Pohl.

A study of attitudes toward magic, witchcraft, astrology, specters, and demons in late medieval and early modern Europe and what they reveal to us about religious beliefs, concepts of community, and gender relations. Special' attention is given to the role the Christian Church claimed in defining the occult: which aspects it legitimated and which it condemned. Other topics include the influence of humanism, the Reformation, and the Scientific Revolution on attitudes toward the occult. We also undertake an analysis of the historiographical model which opposes "elite" to "popular" ideas. The course emphasizes close analyses of primary works, including literary and visual sources.]

#### HIST 446 Law, Crime and Society in Europe, 1400–1700 # (III)

Spring. 4 credits. Prerequisite: permission of instructor. S. Pohl.

This comparative study focuses on Germany, England, France, and Italy and concentrates mainly on the social and legal treatment of crimes of violence. Throughout the course, we consider the differences and similarities between English common law and continental legal systems. Major issues covered include the role of criminal justice, the fate of customary methods of conflict resolution in a time of increasing legal centralization, and the relationship between cultural and legal change. We approach these issues by examining, among other things, the development of criminal procedure, the role of lawyers, contested notions of criminal responsibility, and the self-presentation of defendants. The course emphasizes close readings of primary works, including trial documents and literary sources.

#### [HIST 447 Crusaders and Chroniclers # @ (III)

Fall. 4 credits. Not offered 2002–2003. P. Hyams.

An intensive reading seminar offering a natural progression from HIST 259 The Crusades. It examines contemporary accounts of the crusading movement in English translation. The twin goals are to follow select themes of crusading history to a deeper level than is possible in HIST 259 and to study medieval historiography through whole chronicles and other primary sources.]

#### [HIST 464 Murder, Warfare, and the State: Violence in Europe, 1300– 1800 # (III)

Fall. 4 credits. Permission of instructor. Not offered 2002–2003. Next offered 2003–2004. S. Pohl.

An inquiry into forms of and attitudes toward violence in late medieval and early modern Europe. Questions to be explored include: How violent was premodern Europe compared to modern Europe? How did the various cultural legitimations of violence change over time? We examine these questions by analyzing forms of interpersonal violence as well as violence orchestrated by the state, such as warfare and capital punishment.]

#### [HIST 468 Love and Sex in the Italian Renaissance (also ITALL 468) # (III or IV)

Spring. 4 credits. Not offered 2002–2003. J. Najemy.

An exploration of the representation of love, sex, and eros in Italian Renaissance literature and the attempts by secular governments and the Church to manage, discipline, and punish sexual transgression. Primary texts include Boccaccio's *Decameron*, fifteenth-century *novelle*, plays by Machiavelli (*Mandragola*, *Clizia*) and Bibbiena (*Calandria*), and Aretino's *Dialogues*. Secondary readings include studies of sexual crime, love across social boundaries, prostitution, homosexuality, and lesbianism.]

#### [HIST 471 Knowledge and Politics in Seventeenth Century England (also S&TS 473) # (III)

Spring, 4 credits. Limited to 15 students. Not offered 2002–2003. P. Dear and R. Weil.

England in the 17th century was a revolutionary ferment of political, religious, and philosophical conflict. This course examines the conflicts and arguments, and the means explored for their apparent resolution. These affected ideas of God and worship, the meanings of gender, conceptions of the natural world and its scientific appropriation, and the legitimacy and proper form of political power. The course focuses on the close study of primary source readings by many of the principal players in all these areas, including Francis Bacon, Thomas Hobbes, the Duchess of Newcastle, and John Locke.]

#### [HIST 472 Politics and Culture in Eighteenth-Century England # (III) Spring, 4 credits. Not offered 2002–2003. R. Weil.

Between 1660 and 1800 England experienced imperial and economic expansion, the Enlightenment, and the threat of Revolution abroad and at home. How in this context did people interpret and imagine the nature of the social order, political authority, and the family? We consider the changing and fiercely contested notions of property, politeness, crime and punishment, sexuality, Empire, slavery, and the market.]

# HIST 479 Patronage and the Medici # (III)

Spring. 4 credits. J. Najemy. Between the early fifteenth and sixteenth centuries, the Medici family of Florence rose from the ranks of the city's merchant bankers to become virtual rulers of the republic, cardinals and popes in Rome, and eventually hereditary grand dukes of Tuscany. Much of the family's power and fame derived from two kinds of patronage: the social and political patronage that established their political influence; and the artistic and cultural patronage central to the fashioning of their image and the realization of their princely ambitions. This seminar explores the connections between the two kinds of patronage with a focus on works of art and architecture and recent historical and art historical scholarship.

#### [HIST 481 The English Revolution # (III) Fall. 4 credits. Not offered 2002–2003. Next

offered 2003–2004. R. Weil. Between 1640 and 1660, England experienced two decades of civil war and revolution and embarked on a fascinating series of attempts to reorganize political and religious life. Women and the lower classes emerged as actors on the political stage, radical religious sects flourished, and the nature of authority was questioned in both the family and the state. This course explores the political, cultural, religious, and social dimensions of the English Revolution, using mostly primary sources.]

#### HIST 491 Approaches to Medieval Violence (also HIST 692) # (III) Fall, 4 credits, O. Falk.

"Violence" has become an unavoidable-and urgently troubling-buzzword in contemporary Western culture. We worry about its manifestations and representations in our own civilization, we scan foreign societies with which we interact for any sign of it, we fantasize about consummating it or construct our utopias around its absence. This course is intended as an opportunity for students working on a variety of topics, periods, and areas in medieval Europe to investigate its relevance to their own studies. Through an examination of readings on violence in particular historical contexts, from Late Antiquity to the Early Modern period, we will seek to elicit reflection on what is meant by the concept, to prompt consideration of distinctions among forms of violence, and to sample a variety of analytical approaches and tools. Graduate students should sign up for HIST 692.

#### [HIST 496 Theorizing the Public Sphere (also COM L 496 and GERST 496) (III or IV)

Fall. 4 credits. Not offered 2002–2003. P. Hohendahl.

For description, see GERST 496.]

#### [HIST 651 Old English Literature in Its Historical Context (also ENGL 710)

Spring. 4 credits. Not offered 2002–2003. P. Hyams, T. D. Hill.

This graduate course, cross-listed with ENGL 710, might equally be known as "Anglo-Saxon England: History and Literary Context." It studies the written sources for major questions of Anglo-Saxon history in their literary and cultural context. It concentrates on important texts extant in both Latin and Old English. Comparison can illuminate the resources and intentions of writers, compilers, and copyists, the literary and linguistic culture of England, and the ways in which historians might most fruitfully study such texts. Bede's Ecclesiastical History and Battle of Maldon, Aelfric's Collequies, selections from the Anglo-Saxon chronicle, Beowulf, laws, homilies, and wisdom literature are all likely to come under scrutiny. One goal is to reclaim for European religious history a corpus of material that historians neglect because it is in Old English.]

# [HIST 653 England—Britain—Europe in the Middle Ages

Spring. 4 credits. Not offered 2002–2003. Next offered 2003–2004. P. Hyams. This graduate seminar tentatively explores the coming move from the study of medieval English history to that of the British Isles and its inhabitants within the wider context of Europe and Western Christendom. Readings are mostly representative original sources. The precise texts and topics studied depend on the interests (and especially future teaching plans) of participants, but certainly allow for a critical examination of existing literature on the general and cultural history of England, Scotland, Ireland, and Wales.]

#### [HIST 663 Graduate Seminar in

**Renaissance History** Fall. 4 credits. Not offered 2002–2003. J. Najemy.

Topic for 2001: The Medicean principate.]

#### [HIST 669 Politics, Power, and Culture in Early Modern England

Fall. 4 credits. Not offered 2002–2003. R. Weil.]

#### HIST 692 Approaches to Medieval Violence (also HIST 491)

Fall. 4 credits. O. Falk "Violence" has become an unavoidable-and urgently troubling-buzzword in contemporary Western culture. We worry about its manifestations and representations in our own civilization, we scan foreign societies with which we interact for any sign of it, we fantasize about consummating it or construct our utopias around its absence. This course is intended as an opportunity for students working on a variety of topics, periods, and areas in medieval Europe to investigate its relevance to their own studies. Through an examination of readings on violence in particular historical contexts, from Late Antiquity to the Early Modern period, we will seek to elicit reflection on what is meant by the concept, to prompt consideration of distinctions among forms of violence, and to sample a variety of analytical approaches and tools. Undergraduates should sign up for HIST 491.

#### Modern European History

#### HIST 152 Introduction to Western Civilization (1600 to the End of World War II) # (III)

Spring. 4 credits. R. L. Moore and M. Steinberg.

This course offers a comparative perspective on the development of modern states, societies, and cultures in Europe and North America. Topics include: religious and scientific revolutions in early modern Europe; European expansion and conquest; Enlightenment and revolution; liberalism, capitalism, and communism; the politics of race, slavery, and the new imperialism; the World Wars and the Holocaust; the Cold War; and the modern and the post-modern in European and American culture.

#### HIST 233 Soviet Society and Family Life During WWII: Perspectives from Culture (also Russ Lit 233 and JWST 233) (III)

Fall. 4 credits. Sophomore seminar. Limited to 15 students. P. Holquist.

A sophomore seminar constructed around Vasilii Grossman's novel *Life and Fate* as well as other literary and cultural works (films, music).

#### [HIST 235 Antisemitism and Crisis Modernity (also JWST 254) (III)

Spring. 4 credits. Not offered 2002–2003. V. Caron.

This course examines the role of antisemitism in nineteenth and twentieth century European ideological, political, and socioeconomic developments. Attention is paid to the way in which antisemitism illuminates the underside of European history, allowing us to see how anti-Jewish intolerance and prejudice became embedded in the worldviews of significant sectors of the European populations, culminating in the Holocaust. Topics include: the Christian roots of antisemitism and the extent to which modern antisemitism marks a break with the medieval past; the politicization of antisemitism by both Left and Right; the role of antisemitism in socioeconomic conflicts linked to the rise of capitalism; Jewish responses to antisemitism; antisemitism in the Nazi and Fascist revolutions; and contemporary interpretations of antisemitism.]

#### HIST 267 History of Zionism and the Birth of Israel (also JWST 290, NES 290) @ (III)

Spring. 4 credits. V. Caron. This course examines the history of Zionism as an ideology and political movement from its origins in the nineteenth century to the present. Attention is paid to situating Zionism within the context of modern Jewish, European, and Middle Eastern History. Topics include: the ideological foundations of Zionism; the role of Theodor Herzl and the rise of political Zionism; the Balfour Declaration; the development of the Yishuv; Zionism as a cultural identity for Diaspora Jewry; the British mandate; the Arab-Zionist encounter; Zionist responses to the Holocaust; and Zionism and contemporary Israeli society.

#### HIST 270 The French Experience (also FRLIT 224 and ANTHRO 224) (III or IV)

Fall. 4 credits. N. Furman, J. Weiss. We look ethnographically and through literature at tastes and at class as they function and are discussed in France. We examine speech in its practice and as it is reflected upon; and we look at views from France, from America, and other countries. As we emphasize differences, the French experience emerges.

# [HIST 283 Europe in the Technological Age (III)

Spring. 4 credits. Not offered 2002–2003. J. Weiss.]

#### HIST 285 From Medievalism to Modernity: The History of Jews in Early Modern Europe, 1492–1789 (also NES 245, JWST 253) # (III) Fall. 4 credits. V. Caron.

This course examines the history of European Jewry during the centuries of transition from the Middle Ages to the Modern Era. We examine the extent to which traditional Jewish life began to break down during this period and thus paved the way for the emergence of modern Jewry. Topics include the impact of the Spanish Expulsion of 1492; religious, intellectual, and socioeconomic dimensions of the Marrano dispersion, including Lurianic Kabbalah and the messianic movement of Shabbetai Zevi; the establishment of Jewish communities in the West; the end of the "Golden Age" of Polish Jewry and the rise of Hasidism; the changing economic and political role of Jews in the seventeenth and eighteenth centuries; and the impact of the Enlightenment.

#### HIST 290 Twentleth-Century Russia and the Soviet Union (III)

Fall. 4 credits. P. Holquist. An introductory lecture course spanning the lifetime of the USSR (1917–1991), but covering the last years of the Russian Empire and the first years of the post-communist present as well. Geographically, it focuses on the Russian heartland and the non-Russian areas of the Soviet Union. The course explores the roots and consequences of the Russian Revolution; the nature and evolution of Leninism, Stalinism, and Soviet communism; the entrenchment of reform of the post-Stalinist system; and the legacy of communism for the region's new regimes. Students are introduced to a wide variety of historical materials, including documents, essays, memoirs, literature, and film.

#### [HIST 291 Modern European Jewish History, 1789–1948 (also JWST 252) (III)

Fall. 4 credits. Not offered 2002–2003. V. Caron.

Jewish life in Europe experienced a profound transformation as a result of the process of Jewish emancipation which began at the end of the eighteenth century. While emancipation offered Jews unprecedented social, economic, and political opportunities, it also posed serious challenges to traditional Jewish life and values by making available new avenues of integration. This course examines the ways in which Jewish and non-Jewish society responded to these new developments from the eighteenth century Enlightenment to the post-World War II era. Topics include Jewish responses to emancipation, including assimilation and new varieties of religious accommodation; the development of modern antisemitism; the rise of Zionism and the creation of the state of Israel; the modernization of Eastern European Jewry; the impact of mass immigration; and the Nazi era.]

#### HIST 295 Intro to the History, Language, and Culture of the Balkans (III)

Spring. 4 credits. W. Browne, J. Weiss. Cultural and linguistic factors interacted with political events to form present-day Slovenia, Croatia, Bosnia-Hercegovina, Serbia, Montenegro, Romania, Bulgaria, Macedonia, Albania, and Greece. The course traces these relationships from the end of the medieval period to the present.

#### [HIST 355 The Old Regime: France in the Seventeenth and Eighteenth Centuries # (III)

Fall. 4 credits. Not offered 2002–2003. S. Kaplan.

A systematic examination of the social structure, economic life, political organization, and collective mentalities of a society that eclipsed all others in its time and then, brutally and irreversibly, began to age. France, in European perspective, from the wars of religion through the age of Voltaire.]

#### HIST 356 The Era of the French Revolution and Napoleon # (III) Fall. 4 credits. S. Kaplan.

A study of the failure of the traditional system, its dismantling and replacement in France, and the international consequences. Focus is on the meaning of the revolutionary experience, the tension between the desires to destroy and to create, and the implications of the Revolution for the modern world.

#### [HIST 357 Survey of German History, 1648–1890 # (III) Fall. 4 credits. Open to freshmen with

Fall. 4 credits. Open to freshmen with permission of instructor. Not offered 2002–2003. I. Hull.

An examination of the social, political, intellectual, and diplomatic history of the German states from the devastation of the Thirty Years' War, through absolutism, the bourgeois revolutions of 1848, the struggle for unification, to the beginning of the modern industrial state.]

#### HIST 358 Survey of German History, 1890 to the Present (III)

Fall. 4 credits. Open to freshmen with permission of instructor. I. Hull. An examination of the "German problem," that is the political, cultural, economic, and other causes of modern Germany's extreme violence and volatility from 1890 through 1945, and of the consequences thereof on the divided Germany of 1945 to 1989 and on the new German state since 1989.

#### HIST 362 European Cultural History, 1750–1870 (also COM L 352) # (III or IV)

Fall. 4 credits. M. Steinberg. The course focuses on the making of middleclass culture, society, and imagination from the Enlightenment through the French Second Empire. There are three units with national and thematic foci: Germany in the period of Enlightenment, emancipation, and the burgeoning of national consciousness; questions of law, property, gender, and sexuality in early nineteenth-century England; modernism and urbanism in Second Empire France. Primary readings (including novels, paintings, and operas) are considered along with contemporary historical and theoretical readings.

#### [HIST 363 European Cultural History, 1870–1945 (also COM L 353) (III or IV)

Spring. 4 credits. Not offered 2002–2003. M. Steinberg.

This course focuses on problems of modernity, identity, and ideology in comparative European contexts. We address the politics and culture of German nationalism, French urbanism and religious revival, the cultural origins of psychoanalysis, technological culture (including film), and the cultural origins and dynamics of fascism. As in 362, primary materials (including Wagner, Nietzsche, George Eliot, Freud, Benjamin, and Alfred Hitchcock) are considered along with recent theoretical work.]

# HIST 370 History of the Holocaust (also JWST 353) (III)

Fall. 4 credits. Each student must enroll in a section. V. Caron.

This course analyzes the meaning of the Holocaust from three vantage points: European history; Jewish history; and that of those states and religious institutions that shared responsibility by having stood by in silence. Topics include: the evolution of modern anti-Semitism; the role of anti-Semitism in the Nazi ideology and program; the bureaucratization of death; Jewish life in ghettos and concentration camps; the fate of Jews in occupied Europe and the question collaboration; Jewish political behavior under duress; the responses of the Western allies and the Churches; and contemporary interpretations of the Holocaust and the meaning of evil.

### HIST 371 World War II in Europe (III)

Fall. 4 credits. J. Weiss. The Second World War remains the single most important set of events shaping the contemporary world. The course deals with both the events of World War II as they shaped European and world history and the way those events were remembered and commemorated in postwar years. Lectures, screenings, and readings examine: the role of wartime political leaders and military commanders; the experience of war and occupation for soldiers and civilians, including Resistance movements and collaborators; Nazi genocide; intellectual and cultural changes during the war, including the impact on literature and philosophy; strategic questions about the origins and conduct of the war; the concluding phases involving the Nuremberg Trials, the Yalta and Potsdam conferences, and the launching of the Cold War; and the representation of the war in subsequent films, literature, and political culture.

#### HIST 379 The First World War: Causes, Conduct, Consequences (III)

Spring, 4 credits. Open to freshmen with permission of instructor. P. Holquist and I. Hull.

This course examines the long-term and immediate political, social, and cultural causes of World War I, its catastrophic prosecution, and its revolutionary consequences. Recurring themes are: the building of nation-states, the diplomatic and military systems of the nineteenth and twentieth centuries, mass mobilization, the development of mass violence, and the emergence of millenarian visions of the future.

#### [HIST 380 Social History of Western Technology # (III)

Spring. 4 credits. Not offered 2002–2003. J. Weiss.

For description, see History of Science.]

#### [HIST 383 Europe, 1900–1945 (III) Spring, 4 credits. Not offered 2002–2003.

I. Weiss.

An investigation of the major developments in European politics between 1900 and the end of the Second World War. Emphasis is on the rise and fall of democratic political systems and their alternatives. Topics include the reorientation of liberalism and socialism, the transforming effects of war and depression, the dynamics and diplomacy of fascism, the European response to the economic and ideological influence of America and the Soviet Union, the changes in Eastern Europe during the interwar years, and the interaction between politics and social structure.]

#### [HIST 384 Europe, 1945-1968 (III)

Fall. 4 credits. Not offered 2002–2003. Next offered 2003–2004. J. Weiss.

A political and social history of Europe between the fall of fascism and the political crises of 1968. Emphasis is on the comparative study of the elaboration of democratic institutions and ideologies. Topics include the origins and course of the Cold War in Western and Eastern Europe, Gaullism and Christian Democracy, the emergence of welfare states, liberal-democratic and Communist culture, the end of colonial empires in the West, opposition movements in Eastern Europe, and the general upheaval of 1968.]

#### [HIST 385 Europe in the Twentieth Century: 1968–1990 (III)

Spring. 4 credits. Not offered 2002–2003. Next offered 2003–2004. J. Weiss. The major political developments in Europe between the upheavals of 1968 and the collapse of Communist regimes. Topics include the effects of economic turndown in 1973–1974; the response to terrorism; regionalist movements; new ethnic minorities and their opponents; Socialist governments in southern Europe; the arrival of democracy in Spain, Portugal, and Greece; new dynamics in the European Community; the rise of Thatcherism; the war scare of the 1980s; and the final phase of the Cold War.]

#### [HIST 405 Jewish Culture and Modernity (also SOC HUM 408, JWST 408, GERST 420) (III or IV)

Fall. 4 credits. Limited to 15 students. Not offered 2002-2003. M. Steinberg. With emphasis on Germany but with materials drawn also from England, France, and the United States, this seminar will analyze the intersections and mutual production of modern Jewish culture and general structures and discourses of modernity. It takes up the category of "Jewish culture" as distinct from "Judaism." The focus is less on a religious tradition than on a cultural and historical identification whose sacred/secular boundaries are fluid and contestable. Thus, the boundaries between sacred and secular become a central debate both within Jewish culture and its multiple, mutual refractions with the non-Jewish world, which may itself

#### ties, as Christian, secular, or anti-Semitic.] [HIST 406 The People in the French Revolution # (III)

be constituted in terms of modern nationali-

**Revolution # (III)** Fall. 4 credits. Not offered 2002–2003. Next offered 2003–2004. S. Kaplan.

The French Revolution was nothing if not a mass event. Mass action played a critical part in shaping its course. The "re-invention" of France affected the population down to each village and demanded decisions from virtually every adult. This course focuses on the people as actors: their collective memory, their ideologies, their repertoire of intervention, the formation of a popular political culture. It examines the encounters between the people (in their multiple incarnations) and the revolutionary elites who sought to articulate and appropriate the Revolution. A major theme is the tension between the ambitions to achieve liberty and equality.]

#### HIST 409 Seminar on Work in Europe and America # (III)

Fall. 4 credits. S. L. Kaplan.

For description, see Comparative History.

### [HIST 410 Russia in the Age of

**Revolution and Total War (III)** Spring, 4 credits. Not offered 2002–2003. P. Holquist.

This seminar examines the years of 1905-1945, a period of unparalleled violence and transformation in Russian history, encompassing several revolutions, two world wars and one civil war. Out of Russia's "second time of troubles" (1905-1921), a Soviet state emerged propagating an alternative model for politics and society, a model of society that would be explicitly challenged in the cataclysmic confrontation between the Soviet Union and Nazi Germany. This course examines the links between revolution, total war, and the emergence of the welfare state in Russia and situate the revolutionary Soviet experience in its European and global context. Students read both historical treatments and analyze documents in translation. Knowledge of foreign languages is not required but some background in European history is desirable.]

HIST 413 Culture, Freedom, and the University (also SHUM 416) # (IV) Spring. 4 credits. Limited to 15 students. P. Hohendahl. The seminar addresses the rise and the eventual decline of the classical German research university between 1810 and the present. The concept of the university as a semi-autonomous community based on freedom of teaching and research determined the development of German education during the 19th and 20th century. The modernization of the German university occurred in close proximity with the emergence of idealism in German philosophy and it's emphasis on Bildung. The seminar focuses on the intersection between the innovative idea of the university and the actual development of the institution. Readings are taken from the works of Kant, Fichte, Schleiermacher, Schelling, Nietzsche, Weber, Jaspers, and Habermas.

#### [HIST 417 History of Jews in Modern France (also JWST 446, FRLIT 413) (III or IV)

Fall. 4 credits. Prerequisite: permission of instructor. Not offered 2002–2003. V. Caron.

This course explores the integration of Jews into French society from the French Revolution to the present. Topics include: the debate over Jewish emancipation during the Enlightenment, the French Revolution, and the Napoleonic era; the processes of religious and social assimilation; the rise of anti-Semitism and the Dreyfus Affair; Jewish responses to anti-Semitism; the immigrant challenge and refugee crisis of the 1930s; the Vichy era and Jewish resistance during World War II; and the reconstruction of the French Jewish community since 1945.]

#### HIST 433 History of Modern German Jewry: From the Enlightenment to the post-1945 Era (also GERST 433 and JWST 433) (III)

Spring, 4 credits. Limited to 15 students. V. Caron.

Although the fate of Jews in Germany ended in tragedy during the Holocaust, the German-Jewish interacting during the modern period was also characterized by immense creativity. Modern German Jewry stood at the forefront of innovative religious and ideological movements, and their history therefore offers a lens through which we can focus on the opportunities and challenges that faced modern European Jews more generally. Topics include: debates about Jewish emancipation; the processes of anti-Semitism; the encounter with East European Jewish immigrants; Jews in Weimar culture; Jewish responses to the rise of Nazism; and post-1945 German reflections on the Holocaust

#### [HIST 435 Collective Action and Politics in Modern Europe (III)

Not offered 2002–2003. S. Kaplan. S. Tarrow.

For description, see GOVT 435.]

#### [HIST 441 Seminar in the European Enlightenment # (III)

4 credits. Prerequisite: permission of instructor. Not offered 2002–2003. 1. Hull.]

#### HIST 456 Seminar in European Cultural History (III)

Spring. 4 credits. M. Steinberg.

#### [HIST 457 Seminar in European Fascism (III)

4 credits. Prerequisite: permission of instructor. Not offered 2002–2003. Semester TBA. I. Hull.]

#### [HIST 460 Opera, History, Politics, Gender (also WOMNS 454, COM L 459, S HUM 459, ITALL 456, MUSIC 474) (III or IV)

Spring. 4 credits. Not offered 2002–2003. Next offered 2003–2004. M. Steinberg and S. Stewart.

The will to social order and the desire to transgress it: this basic conflict in modern culture was negotiated in many places, but nowhere more dramatically than in the world of opera. Body and mind; the visceral and the mannered; authority and subversion: these themes are integral to operatic works and culture. This seminar examines the works and contexts of Mozart, Beethoven, Wagner, Verdi, and Puccini alongside issues of German and Italian nationbuilding, liberalism, the continuities of patriarchy, and patterns of cultural identity and cultural difference in modern Europe. We analyze opera videos in class, and if possible we arrange an excursion to the Metropolitan Opera in New York City. No technical competence is required, but the seminar should be most interesting to those seeking an upper-level course in cultural history and/or cultural studies.]

#### [HIST 462 Popular Culture in European History (III)

Fall. 4 credits. Not offered 2002–2003. Next offered 2003–2004. S. L. Kaplan.

An examination of the origins, practices, and meanings of popular culture throughout Europe from the Middle Ages to the era of the French Revolution. After considering the various ways in which "culture" and "popular" can be construed, the seminar focuses on the specific manifestations of popular culture, its various languages and gestures, and its complex relations with the dominant/elite cultures.]

#### [HIST 467 Seminar in Modern European Political History (III)

Fall. 4 credits. Permission of instructor required. Not offered 2002–2003. J. Weiss.]

#### [HIST 474 Topics in Modern European Intellectual and Cultural History (also COM L 474) (III or IV)

Fall. 4 credits. Prerequisite: permission of the instructor. Not offered 2002–2003. D. LaCapra.]

#### [HIST 477 Seminar on the Politics of the Enlightenment # (III)

Fall. 4 credits. Not offered 2002–2003. S. Kaplan.

An inquiry into the historical origins of European (especially French) political, social, and economic thought, beginning in the 1680s, at the zenith of Louis XIV's absolutism, and culminating in the French Revolution a century later. Emphasis is on the relation of criticism and theory to actual social, economic, religious, and political conditions. An effort is made to assess the impact of enlightened thought on the eighteenth-century world and to weigh its implications for modern political discourse. Readings in translation from such authors as Bayle, Montesquieu, Voltaire, Rousseau, Diderot, and others as well as from modern scholarly and polemical literature.]

#### [HIST 478 Stalinism as Civilization (III) Fall. 4 credits. Not offered 2002–2003. Next

offered 2003–2004. P. Holquist. The collapse of the Soviet Union provides an opportunity to reconsider the entire Stalinist experience, both on the basis of newly accessible documents and from fresh perspectives. This course approaches Stalinism as an entire system, examining the links between high politics, foreign relations, culture, and everyday political strategies. Readings include historical studies as well as newly available primary materials. Knowledge of Russian not required.]

#### [HIST 482 The Aesthetic and Cultural Theory of the Frankfurt School (also GERST 495) (III or IV)

**GERST 495) (III or IV)** Fall. 4 credits. Not offered 2002–2003. P. Hohnedahl.]

#### [HIST 488 Seminar in Late Nineteenth-Century European Imperialism (III)

Spring. 4 credits. Prerequisite: permission of instructor. Not offered 2002–2003. Next offered 2003–2004. I. Hull.

This seminar examines the theories of the "second wave" of European imperialism, and then compares the imperial experiences of Great Britain, France, and Germany. It focuses on the imperialist powers, and on the (often unintended) consequences of their colonial involvement on them. Of special concern are the transformation of nationalism into imperialism, and the effects on the European powers themselves of their experiences of applied racism and the commission of mass violence in their colonies.]

#### HIST 601 European History Colloquium

Fall and spring. 4 credits, each term. Graubart, Pohl (fall); Dear, Weil (spring). A research colloquium designed for European history graduate students. The colloquium offers a forum for students to present papers and to discuss the work of visiting scholars.

### [HIST 605 Graduate Seminar in European

**Cultural and Intellectual History** Fall. 4 credits. Not offered 2002–2003. M. Steinberg.

The topic is "Cultural History, Cultural Memory, Cultural Analysis." We will focus on the epistemological claims and metaphors of cultural historical practice, in particular those of memory and cultural analysis. What are the stakes, advantages, and problems of identifying history with memory or cultural analysis? Readings include works of Freud, Warburg, Benjamin, Yerushalmi, Mieke Bal, and other contemporary sources.]

#### [HIST 635 The Gates to Modernity: From Karlsbad to the 1848 Revolution (also GERST 635)

4 credits. Anchor course. Not offered 2002–2003. P. Hohendahl. For description, see GERST 635.]

#### [HIST 661 Graduate Seminar in Twentieth-Century German History

4 credits. Prerequisite: permission of instructor. Not offered 2002–2003. Semester TBA. I. Hull.]

#### [HIST 672 Seminar in European Intellectual History

Fall. 4 credits. Not offered 2002–2003. D. LaCapra.]

#### [HIST 673 Seminar in European Intellectual History Spring. 4 credits. Not offered 2002–2003.

Spring. 4 credits. Not offered 2002–2003 D. LaCapra.]

#### [HIST 674 Graduate Seminar in German History, 1770–1918 Fall. 4 credits. Not offered 2002–2003. Semester TBA, I. Hull.]

#### [HIST 675 After the Divide: German Critical Theory of the Seventies and Eighties (also COM L 675 and GERST 675)

Fall. 4 credits. Not offered 2002–2003. P. Hohendahl.

For description, see GERST 675.]

#### [HIST 678 Seminar in Modern European Social History

Spring. 4 credits. Permission of instructor required. Not offered 2002–2003. J. Weiss.]

### **Honors and Research Courses**

Note: HIST 201–302 are not regular courses for which students may sign up at will. They are personal arrangements between an instructor and a particular student. Students must first gain the consent of a particular instructor to work with them.

#### HIST 201 Supervised Reading

Fall or spring. 2 credits. Open only to juniors and seniors. Prerequisite: permission of instructor. Staff.

### HIST 302 Supervised Research

Fall or spring. 3 or 4 credits. Open only to upperclass students. Prerequisite: permission of instructor. Staff.

#### HIST 400 Honors Proseminar

Fall and spring. 4 credits. Limited to 15 students. For prospective honors candidates in history. Prerequisite: permission of a member of the Honors Committee is required to register. E. Tagliacozzo.

An exploration of major approaches to historical inquiry, analysis, and presentation. Ways of thinking about history along with research methods and organization of the results are considered by reading and discussing a variety of historical works. Substantive readings are drawn from several time periods and diverse geographical areas. There is one short paper during the semester, and a longer final paper which explores the work of a major historian or school of historical writing.

#### HIST 401 Honors Guidance

Fall. 4 credits. Prerequisites: HIST 400 and permission of instructor. I. Hull.

#### HIST 402 Honors Research

Spring. 4 credits. Prerequisites: HIST 400 and permission of instructor. I. Hull.

#### HIST 709 Introduction to the Graduate Study of History

Fall. 4 credits. Required of all first-year graduate students. P. Dear and T. Borstelmann

The course is designed to introduce entering graduate students to crucial issues and problems in historical methodology that cut across various areas of specialization.

#### HIST 803-804 Supervised Reading

703, fall; 704, spring. 4 credits each term. Limited to graduate students. Prerequisite: permission of instructor. Staff.

### HISTORY OF ART

S. Hassan, chair; J. E. Bernstock, M. Fernandez, C. Lazzaro, K. McGowan, L. L. Meixner, A. Pan, A. Ramage, R. Schneider

The Department of the History of Art provides a broad range of introductory and advanced courses in Western art (European and North American) and non-Western art (East and Southeast Asian, African), from antiquity to the present.

#### The Major

Department majors acquire a broad understanding of the history of art in several chronological and geographical areas: ancient, medieval, Renaissance, modem (Europe and North America), Southeast Asia, China, Japan, and Africa. Additionally, majors practice a range of art historical methods and interpretive strategies, including connoisseurship, dendrochronology, feminism, iconography, semiotics, and social history. Majors are encouraged to locate the history of art within allied humanities fields and the applied arts by taking courses in history, literature, history of architecture, and fine arts. The study of foreign languages is strongly encouraged.

#### **Requirements for the Major**

Prospective majors should consult the director of undergraduate studies. Students wishing to declare a major in the history of art should complete two courses at Cornell in the department by the end of their sophomore year. These courses should reflect the diversity of the departmental offerings. One must be at the 200 level, and one-but not both-must emphasize material either predominantly before 1800 or outside Europe/North America. These two courses are prerequisites for the major and a grade of C or above is required for admission; courses must be taken for a letter grade. These courses do count toward the total 44 credits. The major in the history of art requires 44 credits, 30 at the 300 level or above. The core requirements are: proseminar; one 400-level area seminar; two courses in art outside Europe/North America; and three courses in art predating 1800 (ancient, medieval, or Renaissance/Baroque). Majors must choose at least two courses from different categories. In addition to the 44 credits, majors are required to take two courses, approved by their advisers, in areas related to the history of art.

#### Honors

To become a candidate for the degree of Bachelor of Arts with honors in the history of art, a student must have a cumulative average of B+ for all courses taken in the department and in all arts and sciences courses. Application to write an honors thesis should be made to the director of undergraduate studies during the second term of the junior year. The application must include a summary of the proposed project, an endorsement by a faculty sponsor, and a copy of the student's transcript. In the senior year the honors candidate will include in his/her course load, History of Art 600 and 601. These courses address the research and writing of the senior thesis under the direction of the student's project adviser.

#### **Course Numbering System**

100-level courses are freshman writing seminars.

200-level courses are introductions to the major subdivisions of Western art and art outside the West.

300-level courses are intermediary courses addressing more specialized topics or epochs.

400-level courses are seminars primarily for advanced undergraduates and graduate students.

500-level courses are seminars primarily for graduate students.

### **First-Year Writing Seminars**

For First-Year Writing Seminar offerings in the History of Art, consult the John S. Knight Institute brochure for times, instructors, and descriptions. These courses may be used as freshman electives but not to satisfy the distribution requirement.

#### Courses

#### ART H 200 Art, Archaeology, and Analysis (also ARKEO 285, MS&E 285, ENGRI 185, EAS 200, PHYS 200) (I or IV)

Spring. 3 credits. Staff. For description see EAS 200.

#### ART H 202 Survey of European Art: Renaissance to Modern # (IV)

Summer only. 3 credits. D. Royce-Roll. The major traditions and movements in western European art from the Renaissance to the modern period. Painting, sculpture, and architecture with an emphasis on painting. Each Friday class meets at the Johnson Museum of Art with gallery talks and viewing of relevant works that supplement the previous four days of classroom lectures.

#### [ART H 220 Introduction to Art History: The Classical World (also CLASS 220) # (IV)

Fall. 4 credits. Each student must enroll in a section. Not offered 2002–2003. A. Ramage.

An overview of the art and archaeology of the Greek and Roman world. The sculpture, vase painting, and architecture of the ancient Greeks from the Geometric period through the Hellenistic, and the art of the Romans from the early Republic to the time of \_\_\_\_\_\_ Constantine the Great.]

#### ART H 221 Minoan-Mycenaean Art and Archaeology (also CLASS 221 and ARKEO 221) # (IV)

Fall. 3 credits. J. Coleman. For description, see CLASS 221.

#### ART H 222 Greek Art and Archaeology # (IV) Spring. 3 credits. J. Coleman.

Spring. 3 credits. J. Coleman For description, see CLASS 240.

#### [ART H 224 Archaeology in Action I (also CLASS 232 and ARKEO 232) # (IV)

3 credits. Prerequisite: permission of instructor. Not offered 2002–2003. P. I. Kuniholm.

For description, see ARKEO 232.]

#### [ART H 225 Archaeology in Action II (also CLASS 233 and ARKEO 233) # (IV)

3 credits. Prerequisite: permission of instructor. Not offered 2002–2003. P. I. Kuniholm.

For description, see ARKEO 233.]

#### ART H 230 Introduction to Art History: Monuments of Medieval Art (also RELST 230) # (IV)

Fall. 4 credits. Each student must enroll in a section. P. Morrin.

An introduction to the approaches to art history through a study of selected works of art from the Middle Ages: architecture, sculpture, painting, manuscript illumination, metalwork, and ivory.

#### ART H 245 Introduction to Art History: Renaissance and Baroque Art # (IV)

Fall. 4 credits. Each student must enroll in a section. S. Benson.

A survey of major works of European painting, sculpture, and architecture from 1400 to 1700. The focus is on preeminent artists, workshop methods, style, meaning, patronage, and the function of art in a range of social contexts. The course also covers the methods of art history currently practiced in Renaissance and Baroque studies. Weekly section meetings are required.

#### ART H 260 Introduction to Art History: The Modern Era (IV)

Spring. 4 credits. Not open to students who have taken ART H 261. Each student must enroll in a section. J. E. Bernstock.

must enroll in a section. J. E. Bernstock. A discussion of the most important developments in art from 1780 to the present in a socio-political, historical context. The emphasis is on major movements and artists: Neo-Classicism (David), Romanticism (Delacroix), Realism (Courbet), Impressionism (Monet), Post-Impressionism (Van Gogh), Cubism (Picasso), Fauvism (Matisse), Surrealism (Miro), Abstract Expressionism (Pollock), and Pop Art (Warhol). Different critical approaches are examined.

#### [ART H 261 Introduction to Art History: Modern Art (IV)

3 credits. Not offered 2002–2003. Staff. An introduction to early modern art as it developed between the French Revolution and World War I. Both European and American movements are examined, including Romanticism, Impressionism, and Cubism. Units are organized around central figures such as Mary Cassatt, Edgar Degas, Thomas Eakins, and Vincent van Gogh. Lectures are supplemented with discussions of methods of inquiry, including social history and feminism, fundamental to interpreting works of art.]

#### [ART H 270 Mapping America (also AM ST 270) # (IV)

4 credits. Each student must enroll in a section. Not offered 2002–2003. L. Meixner. An introduction to American art from colonial mercantilism through the Great Depression. Through a variety of sources including maps, paintings, street festivals, political cartoons, photographs, and advertisements, we explore the social and economic factors that shaped American identities. Emphasis is on the representation of race, class, and ethnicity.]

#### [ART H 280 Introduction to Art History: Approaches to Asian Art @ # (IV) Fall. 3 credits. Not offered 2002–2003.

K McGowan

Arranged according to selective focus and emphasis rather than broad chronological survey, this course introduces students to the varied responses of the Asian artist in diverse social, geographical, and historical contexts. Indian miniature paintings, Japanese prints, high-fired ceramics from Thailand and Vietnam, Indonesian textiles and jewelry,

Javanese shadow-puppet theater, and Balinese ritual and performance traditions are explored. A number of class sessions meet in the Herbert F. Johnson Museum of Art.]

#### ART H 309 Dendrochronology of the Aegean (also CLASS 309 and ARKEO 309) # (IV)

Fall and spring. 4 credits. Prerequisite: permission of instructor. Limited to 10 students. P. I. Kuniholm, For description, see ARKEO 309.

#### ART H 319 Art in the Daily Life of Greece and Rome (also CLASS 319) # (IV) Spring. 4 credits. A. Ramage.

Classical art is well reflected in the small items of daily life that are neglected frequently in the standard histories. This course looks at the making and decorating of household items in Greece and Rome in a variety of materials from clay to metal. The links between the commissions of the state and the tastes of the people are examined through their material culture.

### [ART H 320 The Archaeology of Classical

Greece (also CLASS 320) # (IV) 4 credits. Not offered 2002-2003.

A. Ramage.]

#### (ART H 321 Mycenae and Homer (also CLASS 321 and ARKEO 321) # (IV)

4 credits. Not offered 2002-2003. I. Coleman.

For description, see CLASS 321.]

#### ART H 322 Arts of the Roman Empire (also CLASS 350) # (IV)

Fall. 4 credits. A. Ramage The visual arts in the service of the first world state. The course starts with the architecture, painting, and sculpture of the Etruscan and Republican period but concentrates on monuments of the Imperial era in Italy and the provinces until the time of Constantine. Art made for private patrons is considered. along with the official presentations of the emperors

#### [ART H 323 Painting in the Greek and Roman World (also CLASS 323) # (IV)

4 credits. Not offered 2002-2003. A. Ramage.]

### [ART H 325 Greek Vase Painting (also **CLASS 325) # (IV)** Fall. 4 credits. Not offered 2002–2003.

A. Ramage

A stylistic and iconographical approach to an art in which the Greeks excelled. The course is arranged chronologically from the early (eleventh century B.C.), anonymous beginnings to the "personal" hands of identifiable masters of the fifth and fourth centuries B.C. Styles of cities other than Athens are stressed ]

#### [ART H 326 Greek Cities and Towns (also CLASS 326) # (IV)

4 credits. Prerequisite: CLASS/ART H 220 or permission of instructor. Not offered 2002-2003. J. Coleman.]

### ART H 327 Greek and Roman Coins (also CLASS 327) # (IV) Fall. 4 credits. A. Ramage

The varied issues of Greek cities and the Roman state are examined. Coins are considered as art objects as well as economic and historical documents. The changes in design, value, and metals from the origins of coinage to the late Roman period are studied. Lectures, student presentations, and work with the actual examples.

#### [ART H 328 Greeks and Barbarians (also CLASS 322) # (IV)

Fall. 4 credits. Not offered 2002-2003. I. Coleman.

For description, see CLASS 322.1

#### [ART H 329 Greek Sculpture (also CLASS 329) # (IV)

4 credits. Not offered 2002-2003. J. Coleman.

For description, see CLASS 329.]

#### ART H 338 Modern Western Drama, Modern Western Theater: Theory and Practice (also COM L 335 and THETR 335) (IV)

Fall. 4 credits. Staff. A study of drama and the culture contexts of its performances from the mid-nineteenth century to the mid-twentieth century in Europe and America. We move from symbolism and naturalism through to constructivism, expressionism, Dadaism, futurism, surrealism and on the Brecht, Artaud and a few of their more contemporary descendants. Students engage in performance projects as well as text analysis.

#### [ART H 343 Italian Renaissance of the Fifteenth Century # (IV)

4 credits. Not offered 2002-2003. C. Lazzaro

This course examines the artistic production of the fifteenth century in its social and cultural context. The new style, which was developed in Florence in the early century and spread to other city-states in Italy, is examined in the context of the new educated class, the increased wealth of the mercantile, urban class, and the new role of family in society.]

#### [ART H 344 Italian Renaissance of the Sixteenth Century: Leonardo, Michelangelo, and Raphael # (IV)

Spring. 4 credits. Not offered 2002-2003. C. Lazzaro.

This course focuses on the three great artists of the late fifteenth and sixteenth centuries. Leonardo, Michelangelo, and Raphael. It examines each as a thinker as well as an artist, through their own writings together with their works of painting, sculpture, and architecture. It also analyses the contemporary constructions of the artist as genius and as courtier in the biographies and other writings about them.]

#### [ART H 345 Rome, Florence, and Venice in the Sixteenth Century # (IV)

4 credits. Not offered 2002-2003. C. Lazzaro.

This course examines the distinctive cultural identities of Rome, Florence, and Venice, and how art, architecture, and urban planning served to create the myths and self-images of these cities, their rulers, and society. Topics include the centers of power, relationship of church and state, and private patronage and collections.]

#### ART H 348 Destination Rome: From **Medieval Pilgrimage to Eighteenth-**Century Grand Tour # (IV)

Spring. 4 credits. S. Benson. As seat of the Catholic Church and center of the ancient Roman empire, the city of Rome was both a spiritual and cultural capital in medieval and early modern Europe. This class will investigate the fascination of Rome for early modern Europeans and consider how

popes, patrons, and visitors shaped the planning of the city. Objects of study will include the development of the built environment, the display of ancient objects, sacred rituals, secular festivals, and souvenir images and artifacts created for pilgrims and tourists.

#### ART H 351 The Culture of the Renaissance II (also COM L 362, HIST 364, MUSIC 390, RELST 362, ENGL 325 ) # (III or IV)

Fall. 4 credits. K. Long, C. Kaske. For description, see COM L 362.

# [ART H 360 Painting Nineteenth-Century America (also AM ST 360) # (IV)

Spring. 4 credits. Not offered 2002-2003. L. L. Meixner.

This course is an interdisciplinary view of art and life in nineteenth-century America from the colonial era through the Gilded Age. We will consider definitions of democratic culture through topical units including the following: New England portraiture and commodity culture; the art museum in the new republic; genre painting in the Jacksonian era; Hudson River landscape and railroad expansion; photography and the rising middle class; images of African Americans and Reconstruction; images of Native Americans, Manifest Destiny, and the frontier myth; cosmopolitain taste and robber barons in the Gilded Age. Alongside key paintings, we look at print culture including daguerreotypes, postcards, political prints, photographs, and advertisments. Major artists include: John S. Copley, George Caleb Bingham, Winslow Homer, Thomas Eakins, Mary Cassat, and John Singer Sargent. We address their relationship to major writers including Walt Whitman, Henry James, Stephen Crane, and Edith Wharton.]

#### ART H 362 Impressionism in Society (also WOMNS 361) # (IV)

Spring. 4 credits. L. L. Meixner. This course discusses French Impressionist art as products of nineteenth-century public life. By relating Impressionism to state culture, including Universal Expositions, we trace subversive themes such as criminality, cafe and brothel societies, clandestine prostitution, and class-regulated leisure. We consider images of Parisian spectacle and commodity culture (Manet, Cassat, Degas, Toulouse-Lautrec) as well as French landscapes (Monet, Van Gogh, Pissarro). Special topics include artists' relationships to novelists (Zola), poets, and the avant garde theatre as well as the construction of the artist and courtesan in Puccini's "La Boheme" and Verdi's "La Traviata." Images include postcards, playbills, medical photographs, and posters. Organizing our historical units is the theme of power and vision, with attention to the female gaze, voyeurism, surveillance, and scopophilia,

#### ART H 365 U.S. Art from FDR to Reagan (also AM ST 355) (IV)

Fall. 4 credits. Prerequisite: each student must enroll in a section. J. E. Bernstock. This course covers major artists and movements in the U.S. starting with the Depression era through the late 1980's. A few of the developments on which the course focuses are: Abstract Expressionism, Pop Art, Earth Art, and Feminist Art. Much attention is devoted to the critical reception that the artists received.

#### ART H 366 Contemporary Art and Technology (IV)

Fall. 4 credits. M. Fernandez.

In this course students will examine the role of mechanical, electronic, and digital technologies in the arts of the late 20th and 21st centuries with emphasis on Europe and North America. Beginning with kinetic art and the cybernetically inspired work of the late sixties, we will explore early uses of computer technology, including early work in synthetic video in the 1970s. An overview of pre-Internet telematic experiments will lead to an investigation of net art. The ongoing development of behavioral art forms including interactive art and interactive installation will be a central theme. Critical evaluation of various attitudes concerning technology will be encouraged.

### ART H 367 Conceptual Art (IV)

Spring, 4 credits. M. Fernandez. This lecture course examines the histories, theories, and social contexts of the Conceptual Art movement with emphasis on Europe and the American continents (North, South, and Central America). Artists studied include Joseph Kosuth, Adrian Piper, Helio Oiticica, Lygia Clark, Art and Language, Dan Graham, Martha Rosler, and Hans Haacke.

#### ART H 370 Visual Culture and Social Theory (also GOVT 375 and COM L 368) (III or IV)

Spring. 4 credits. S. Buck-Morss. For description, see GOVT 375.

#### ART H 371 Architectural History of Washington, D.C. # (IV) Fall or spring. Variable credit. Only for

Fall or spring. Variable credit. Only for students in the Cornell-in-Washington program. Only for non-architects. P. Scott.

A historical and critical survey of the architecture of Washington. Attention is given to the periods, styles, architects, and clients—public and private—of the notable buildings and to the urbanscape of the nation's capital. The vocabulary of architectural analysis and criticism is taught. Field trips required.

#### ART H 377 African American Art (also AS&RC 304) (IV) Spring. 3 credits. S. Hassan.

Spring. 3 credits. S. Hassan. For description, see AS&RC 304.

#### [ART H 378 Art in African Culture and Society (also AS&RC 310) @ (IV)

Fall. 3 credits. Not offered 2002–2003. S. Hassan.

For description, see AS&RC 310.]

#### ART H 380 Introduction to the Arts of China (also ARKEO 380 and ASIAN 383) @ # (IV)

Spring. 4 credits. A. Pan.

This course offers a survey of the art and culture of China, from the Neolithic period to the twentieth century. We begin with an inquiry into the meaning of national boundaries and the controversy of the Han Chinese people, which helps us identify the scope of Chinese culture. Pre-dynastic (or prehistoric) Chinese culture is presented through both legends about the origins of the Chinese, and scientifically excavated artifacts. Art of the dynastic and modern periods is presented in light of contemporaneous social, political, geographical, philosophical and religious contexts. Students work directly with objects in the Herbert F. Johnson Museum of Art.

#### ART H 384 Introduction to the Arts of Japan @ # (IV) Fall. 4 credits. A. Pan.

As an island nation east of the Asian continent, Japan developed a unique culture that reflects both continental and indigenous characteristics. This course examines pre-and post-contact with continental culture and the process of artistic acculturation and assimilation in successive periods of Japanese art history.

### [ART H 385 Representation and Meaning in Chinese Painting (also ASIAN 384) @ # (IV) 4 credits. Not offered 2002–2003. A. Pan.

4 credits. Not offered 2002–2003. A. Pan. Using major monuments of art, this course introduces various genres of Chinese painting through socio-political and religious history. The focus is on understanding the aesthetic criteria, artistic movements, stylistic transformations, and agendas of different social classes. Weekly sections will meet at the Herbert F. Johnson Museum so that students can gain first-hand experience examining and handling Chinese paintings.]

#### ART H 395 The House and the World: Architecture of Asia (also ASIAN 394) @ # (IV)

Spring. 4 credits. K. McGowan. In many Asian societies, houses are regarded as having a life force or a vitality of their own. This course examines the role of the house as a living organism in Asia, a symbol of the cosmos encapsulated. Houses also function in many societies as storehouses for material and immaterial wealth; artifacts such as textiles, jewelry, sculptures, and masks function within the house as ancestral heirlooms, conveying their own currents of life force, the power from which serving to blend with the vitality of the house. This accumulation of energy can be conferred on the inhabitants, or it may exist as a quiet reservoir of power, distinct from its occupants. The indigenous architectural traditions of India, Vietnam, Thailand, Indonesia, and the Philippines are examined. By studying the inhabited spaces of others, divining their technologies of construction and their applied symbologies, students are provided with powerful tools for examining the visual skills and sensibilities of other cultures. "The House and the World" serves as the metaphor for these discoveries.

#### [ART H 396 The Arts of Southeast Asia @ # (IV)

4 credits. Not offered 2002–2003. K. McGowan.

The arts of Southeast Asia are studied in their social context, since art plays a role in most of the salient occasions in life in traditional societies. Special emphasis is devoted to developments in Indonesia, Thailand, and Cambodia. Among topics covered are the shadow puppet theater of Java, textiles, architecture, sculpture, and Bali's performance tradition.]

#### Seminars

Courses at the 400 and 500 level are open to juniors and seniors, majors, and graduate students. All seminars involve the writing and presentation of research papers. Enrollment is limited to 15 students, and *permission of the instructor is required*. Students may repeat courses that cover a different topic each semester.

#### ART H 400 Proseminar for Art History Majors: The History and Practice of Art History (IV) Fall. 4 credits. Prerequisite: History of Art

Fall. 4 credits. Prerequisite: History of Art majors only. Enrollment is limited. K. McGowan.

Works of art have always engendered political, social, and cultural meanings. This seminar presents an introduction to the methods which art historians have engaged in studying the objects and ideas which constitute the historiography of their discipline. Challenged and enlarged by cultural debates over issues of class, ethnicity, nationality, sexual orientation, and gender, the field of art history is expanding to incorporate problems of assessing quality of intention and reception along with authorship, of artistic production in place of artistic creation, and of Western-oriented attitudes to race in reference to orientalism and colonialism. Readings focus on historically situating methods used to situate art historically, and on the implications of their cross-cultural application. Papers encourage students to put methods into practice, realizing in the process that subject matter is not an isolated choice to which methods are applied, but something which profoundly affects the approach which the researcher brings to the writing of art history.

### [ART H 400 Proseminar

Fall. 4 credits. Prerequisite: History of Art majors only. Enrollment is limited. Not offered 2002–2003. K. McGowan.

#### ART H 401 Independent Study

Fall or spring. 2–4 credits. May be repeated for credit. Prerequisite: permission of a department faculty member.

Individual investigation and discussion of special topics not covered in the regular course offerings, by arrangement with a member of the department.

#### **ART H 402 Independent Study**

member of the department.

Fall or spring. 2–4 credits. May be repeated for credit. Prerequisite: permission of a department faculty member. Individual investigation and discussion of special topics not covered in the regular course offerings, by arrangement with a

#### ART H 403 Ritual, Play, Spectacle, Act: Performing Culture (also THETR 403 and 603) (IV)

Spring. 4 credits. R. Schneider. For description, see THETR 403.

#### ART H 407 The Museum and the Object (IV)

Fall. 4 credits. Prerequisite: permission of instructor. All classes meet in the Johnson Art Museum Study Gallery. A. Pan. This seminar focuses on museum careers and offers advanced students in ART History the opportunity to work directly with objects. Weekly meetings at the Herbert F. Johnson Museum enable students to study aspects of curatorial, administrative, outreach, and public programs, as well as issues related to collecting, the politics of display, and the ever-changing role of art museums in modern society. Through weekly readings and discussion, participants will formulate ideas and conduct a research project of a (or a group of) museum object(s) for final class presentation.

#### ART H 423 Ceramics (also CLASS 423 and ARKEO 423) # (IV)

Spring. 4 credits. A. Ramage. Bronze Age, Greek, and Roman pottery specimens from Near-Eastern and Mediterranean sites are studied to provide direct experience of one of the basic prerequisites of archaeological excavation-the identification and dating of pottery types. Reports, delivered in class, concern ancient ceramic materials or particular types and periods of ceramics. Practical experience in making and decorating pottery is encouraged.

#### [ART H 424 Sardis and the Cities of Asia Minor (also ARKEO 432 and CLASS 432) # (IV)

4 credits. Not offered 2002-2003. A. Ramage.]

#### [ART H 425 Seminar on the Bronze Age Architecture of Asia Minor (also CLASS 430 and ARKEO 425) # (IV) Spring. 4 credits. Prerequisite: permission

of instructor. Not offered 2002-2003. P. I. Kuniholm

For description, see ARKEO 425.]

#### [ART H 427 Seminar on Roman Art and Archaeology (also CLASS 435 and ARKEO 435) # (IV)

Spring. 4 credits. Not open to freshmen or sophomores without permission of instructor. Not offered 2002-2003. A. Ramage.

Topic: The Afterlife of Roman and Classical Art.]

#### [ART H 430 America in the Camera's Eye (also HIST 430 and AM ST 430.2) (ill or IV)

Fall. 4 credits. Not offered 2002-2003. R. L. Moore.

For description, see HIST 430.]

### [ART H 434 The Rise of Classical Greece (also ARKEO 434 and CLASS 434) # (IV)

Spring. 4 credits. Recommended: CLASS 220 or ART H 220, CLASS 221 or ART H 221, or permission of instructor. Not offered 2002-2003. P. I. Kuniholm. For description, see ARKEO 434.]

#### ART H 446 European Art in the Age of Exploration, 1492-1700 # (IV)

Spring, 4 credits, Prerequisite; permission of instructor. S. Benson.

#### Between the 15th and 18th centuries, Europeans were engaged in exploring the world both physically and intellectually. From voyages to Asia and the Americas to Galileo's first observation of the moon through a telescope, Europeans encountered lands, peoples, and natural phenomena that they had never seen before. Central to these enterprises were the visual arts, through which new ideas and information were spread. Images and objects that this course will examine include optical devices like telescopes and microscopes, scientific images, maps, trade goods, and illustrated travel books. We will consider the connections among the visual arts, global exploration, and scientific revolution, focusing on the crosscultural nature of the arts in this period. Rather than merely assuming the Europeans to be colonizers of nature and of other cultures. we will see what the arts can show us of how European thought was also influenced and transformed by these encounters.

#### [ART H 447 Aesthetic Theory: End of Art (also GERST 656 and COM L 656)

Fall. 4 credits. Permission of instructor. Not offered 2002-2003. P. Gilgen. For description, see GERST 656.]

#### ART H 448 Studies in Sixteenth-Century European Art # (IV)

4 credits. Not offered 2002-2003. C. Lazzaro.

Topic: Constructing the Self in the Sixteenth Century. This seminar examines portraits, selfportraits, autobiographies, and biographies, as well as treatises on etiquette and behavior. In this society, "civility," the mark of class and education, was conveyed through bearing, gesture, manners, and speech, as well as social organization and artistic interests, all of which are evident in both visual and verbal representations of individuals.]

#### **IART H 450** Women in Italian Renaissance Art (also WOMNS 451) # (IV)

Spring. 4 credits. Prerequisite: permission of instructor. Not offered 2002-2003. C. Lazzaro.

This seminar examines representations of the Madonna and Child from the fourteenth and fifteenth centuries, the narrative scenes painted on chests and other domestic furniture, biblical and historical heroines such as Judith and Lucretia, portraits of patrician women and courtesans, and violence to women in a political context. It investigates the contemporary ideas about motherhood, beauty, sexuality, social presentation, and gender roles in society that inform these representations. We discuss the existing critical frameworks for interpreting them in feminst art history and theory (particularly in Renaissance studies). We are concerned especially with how visual images are encoded with meaning, what kind of relationship can be established with their historical context, and how they convey social constructs as ideology.]

#### [ART H 451 Prints of the Fifteenth through the Seventeenth Century (IV)

4 credits. Prerequisite: permission of instructor. Not offered 2002-2003. C. Lazzaro.

This seminar has several aims: to introduce students to prints-the techniques, styles, and issues of connoisseurship-and to the major printmakers of the period, including Marcantonio Raimondi, Dürer, and Rembrandt: to give students first-hand experience with works of art in the Herbert F. Johnson Museum; and to consider the social and cultural issues raised in the medium of prints and through their unique visual language. These issues include the social hierarchies of class and gender (including witches), moral concerns and religious devotion, the construction and transmission of notions of antiquity and classicism, and the representation of the urban and rural environment. Students give brief presentations on prints in the collection and longer ones of their own research projects on these and related topics.]

#### ART H 452 The Printed Image; the World on Paper # (IV)

Fall. 4 credits. Prerequisite: not open to freshman or sophomores without

permission of instructor. S. Benson. The printing of images was a new artistic medium for Renaissance Europe, and this course traces the stylistic and technical development of prints, their uses, and their effects on other aspects of life in early modern Europe. Topics include printing and the changing status of the artist, the new availability of private devotional images, erotic art, and the virtual collecting of antiquities and natural curiosities. Both in class and in individual projects, students have the opportunity to engage directly with printed images and books in the Herbert F. Johnson Museum and Rare Book collection of the Kroch library.

### ART H 461 Art and Social Histories (also AM ST 463) (IV) Spring. 4 credits. Prerequisite: permission

of instructor. L. Meixner.

Topic for spring 2003: American Art and the Machine. This seminar examines early modernism in America with a particular emphasis on the machine and mechanical reproduction. We define "machine" in the broadest sense to mean the artist, the city, the camera, and its consumer byproducts including pictorial monthlies such as Life, advertisements, and comics. We also consider film, with views toward urban surveillance and the mechanized laboring body. Key artists include the Urban Realists, cartoonists at The Masses, Stieglitz, Steichen, Riis, Hine, and the Precisionists.

#### [ART H 462 Topics in Early Modernism (IV)

4 credits. Prerequisite: permission of instructor. Auditing is not permitted. Not open to freshmen or sophomores. Not offered 2002-2003. L. L. Meixner.

Early Modernism in America. Using the Armory Show (1913) as its center, this interdisciplinary seminar examines the varied expressions of American modernism prior to World War II. Against the backdrop of post-World War I social politics and the Jazz Age, we examine: the machine aesthetic and kinetic poetry, icons such as the Brooklyn Bridge, O'Keefe, Stieglitz, and the rise of photography at "291," American Dada, the Harlem Renaissance, and the introduction of homoerotic imagery. Aside from major artists, key figures include Gertrude Stein, Dos Passos, Hart Crane, and Ernest Hemmingway.]

#### ART H 463 Studies in Modern Art (IV)

Fall. 4 credits. Prerequisite: not open to freshman or sophomores without permission of Instructor. Auditing is not permitted. J. E. Bernstock.

Topic for fall 2002: An Analysis of Abstract Art in Europe (1910–1920). Various reasons have been cited for the emergence of abstract art in Europe between 1910 and 1920. This seminar considers the historical context, the philosophical literature, and the developments in art criticism that had a bearing on the evolution of abstract art in the Netherlands, Germany, and Russia.

#### ART H 464 Studies in Modern Art (IV)

Spring, 4 credits. Prerequisite: permission of instructor. Auditing is not permitted. J. E. Bernstock.

Topic for spring 2003: American Art of the Fifties. This class examines closely art that emerged in the United States as a reaction against the emphasis on consensus culture. Civil rights protests, the birth of rock 'n' roll, and the beat generation are some of the phenomena considered as essential to the development of avant-garde art during this period.

# [ART H 466 Women Artists (also WOMNS 404) (IV)

Fall. 4 credits. Prerequisite: permission of instructor. Not offered 2002–2003.

This seminar studies the work of women artists from antiquity to the present. We consider the works of the most prominent women artists from each period in relation to the changing roles of women in society. The artists covered include Jennifer Bartlett, Artemisia Gentileschi, Elizabeth Vigee-Lebrun, Mary Cassatt, Käthe Kollwitz, Georgia O'Keeffe, Louise Nevelson, Joan Mitchell, Judy Chicago, and Barbara Kruger. Different critical approaches to feminist art are discussed.]

#### [ART H 476 Seminar in American Art (IV)

4 credits. Not offered 2002–2003. L. L. Meixner.]

#### ART H 478 African Cinema (also AS&RC 435 and S HUM 435) @ (IV)

Fall. 4 credits. S. Hassan. For description, see AS&RC 435.

#### [ART H 481 Art of the Tang Dynasty (618–907) (also ASIAN 479) @ # (IV)

Spring. 4 credits. Prerequisite: ART H 383 or a course in Chinese history or Chinese literature and permission of instructor

required. Not offered 2002–2003. A. Pan. This seminar explores art and culture of the Tang dynasty, China's "golden age," by focusing on new discoveries and museum objects representing court, secular, and Buddhist art. We examine how imperial taste, patronage, and aesthetics influenced painting, calligraphy, gold and silver wares, ceramics, and important architectural and cave-temple sites.]

#### ART H 483 Arts of the Song Dynasty, with Focus on Tea Cultures in East Asia #@ (IV)

Spring. 4 credits. Prerequisite: permission of instructor. A. Pan.

Topic for spring 2003 is Tea Ceremony and its diaspora. This seminar focuses on the cultural phenomena of tea cultures in East Asia, namely China, Korea, and Japan. Social, economic, and aesthetic concerns pertaining to tea cultures will be addressed in our

weekly discussion. As part of the Freeman Foundation Asian Artist in Residence Program, this seminar will incorporate the expertise of the renowned Taiwanese potter Ah Leon in our regular class meetings. Additional guest lectures will be arranged to provide students the opportunity to work with scholars specializing in various aspects of tea culture in the three Asian countries.

#### [ART H 490 Art and Collecting: East and West (also ASIAN 491) @# (IV)

Spring. 4 credits. Not offered 2002–2003. K. McGowan.

This course examines the social life of things, focusing in particular on the collection as an organizing metaphor for cross-cultural exploration. By examining biographies of objects, and the extent of their influence, it is possible to observe the transformation of gifts or heirlooms into commodities and vice versa as constellations of cultures appropriate objects and ideas across vast distances, East and West. India, Europe, China, America, Japan, and Mainland and Island Southeast Asia are examined at different points historically where dynamic convergences occur in the traffic of culture.]

#### ART H 520 Seminar in Classical Archaeology (also CLASS 630 and ARKEO 520)

Spring, 4 credits. Prerequisite: permission of instructor. P. Kuniholm. For description, see ARKEO 520.

#### ART H 531 Leon Battista Alberti: 1404– 1472

Spring, 4 credits. Prerequisite: not open to freshman or sophomores without permission of instructor. P. Morrin. This seminar explores selected aspects of the literary and built works of Leon Battista Alberti. Alberti's work reverberates with the voices of other texts and edifices. This class investigates the work of Alberti in relation to these literary and architectural precedents. The seminar combines weekly lectures on selected themes with student individual research studies. Themes include the construction of architectural identity, the Renaissance quest for fame, aesthetic theory and its origins in classical rhetoric, the literary origins of artistic method, society and space. Students will become familiar with all of Alberti's works, both built and written.

#### [ART H 540 Seminar In Renaissance Art

4 credits. Prerequisite: permission of instructor. Not offered 2002–2003. C. Lazzaro.

Topic: Nature, Cultural Landscape, and Gardens in Early Modern Italy. This seminar examines cultural understandings of nature, the paired concepts of nature and culture, and the representations of nature in gardens. We consider the "second nature"-human interventions in the natural world, and the resulting "cultural landscape"-in both the actuality and painted representations of the countryside. The cultural significance of plants and plant foods and of animals, the revived literary genre of the pastoral, and collections of nature are all examined. Reflecting on the flourishing gardens from the sixteenth century we discuss how these cultural concepts of nature are manifested in garden design, planting and ornamentation.]

#### [ART H 549 Problems in Interpretation in Italian Renaissance Art

4 credits. Prerequisite: permission of instructor. Not offered 2002–2003. C. Lazzaro.

This seminar examines assumptions about meaning and how meaning is produced in Renaissance art. Various interpretative strategies are examined, among them iconographic, semiotic, feminist, and psychoanalytic, within a specifically Renaissance literary, intellectual, and social context. Texts by Panofsky and critical discussions of them, Baxandall, Bryson, and others are read and discussed with reference to particular works of art. The seminar is intended primarily for graduate students in all areas of the history of art and those in other disciplines with an interest in the Italian Renaissance. Senior History of Art majors with background in the Italian Renaissance are also welcome.]

#### ART H 570 Theory Seminar II: Representation

Fall. 4 credits. Prerequisite: graduate students only. M. Fernandez. This seminar examines select bodies of theory influential to scholars' and artists' understanding of visual representation during the last forty years. The goal of the course is to familiarize students with diverse theoretical approaches and to critically evaluate the assumption that the advent of new media precipitated the end of representation. Aspects of semiotics, deconstruction, feminism, queer theory, cybertheory, and phenomenology will be included.

#### [ART H 571 African Aesthetics (also AS&RC 503)

Fall. 4 credits. Not offered 2002–2003. S. Hassan.

For description, see AS&RC 503.]

#### ART H 572 Theory Seminar III: Mimesis Spring. 4 credits. Prerequisite: graduate

students only. M. Fernandez. This seminar explores the significance of the concept of mimesis to selected aspects of contemporary art practice, including digital representations, genetic and bio-tech art, feminist art, and various forms of art activism. Relevant theoretical perspectives will be addressed.

#### ART H 580 Dancing the Stone: Body, Memory, and Architecture (also ASIAN 580 and THETR 580)

Spring. 4 credits. Prerequisite: permission of Instructor. K. McGowan.

This course examines the role of temples and their sculptural programs in South and Southeast Asia as creative stimuli for performative reenactments. Choreographic encounters between imagination and memory are mapped as they occur at various points historically and politically in Java, Bali, Cambodia, and India. Since architectural choreography implies the human body's inhabitation and experience of place, the nature of ritualized behavior and its relationship to performance and politics is explored spatially, both in organizing experience and defining or redefining identity on colonial, national, and diasporic margins. Bringing back the haptic sense (i.e. of feeling and doing at the same time) students have the unique opportunity to balance the demands of learning a Javanese traditional dance and/or its musical accompaniment, taught by visiting artists Linangkung Nurwijayanti and Raharja, while exploring performance traditions in historical perspective.

### ARTS AND SCIENCES - 2002-2003

#### ART H 591-592 Supervised Reading

591, fall; 592, spring. 4 credits. May be repeated for credit. Limited to graduate students.

#### ART H 600 Honors Work

Fall or spring. 8 credits. Intended for senior art history majors who have been admitted to the honors program.

Basic methods of art historical research are discussed and individual readings assigned, leading to the selection of an appropriate thesis topic.

#### ART H 601 Honors Work

Fall or spring. 8 credits. Prerequisite: ART H 600.

The student under faculty direction prepares a senior thesis.

### HUMAN BIOLOGY PROGRAM

J. Haas (nutritional sciences), director, 127 Savage Hall, 255–8001; B. Finlay (psychology), J. Fortune (physiology/women's studies), E. Frongillo (nutritional sciences), R. Johnston (psychology), K. A. R. Kennedy (ecology and systematics/anthropology), D. Levitsky (nutritional sciences), D. L. Pelletier (nutritional sciences), W. Provine (ecology and systematics/history), S. Robertson (human development), R. Savin-Williams (human development), M. Small (anthropology)

Human biology integrates the methods and theories of many disciplines, such as biological anthropology, nutrition, neurobiology, physiology, psychology, demography, ecology, genetics, and paleontology into a comprehensive study of biological diversity in Homo sapiens. A central focus of this interdisciplinary approach to the study of the human organism is an understanding of evolutionary processes that explain our biological variation through space and time. The curriculum of study seeks to educate future biological scientists to address the concerns of a society that is becoming more demanding of the scientific community to place its specialized biological knowledge in a broad context. The human biology curriculum is of particular relevance to undergraduate students in premedical and predentistry programs, biological anthropology, nutrition, human development, ecology and evolutionary biology, psychology, physiology, genetics, and the health-related sciences. It serves to bring together students with a common interest in humankind as defined from these diverse fields and to provide a forum for student-faculty interaction on various topics relating to human evolution and biological diversity. Human biology is not a major but a curriculum of study that provides majors in various departments with a program for selecting elective courses that deal with the biology of the human species. Students in their junior year may develop a program of study in human biology while majoring in a number of different departmental fields.

#### **Basic Requirements**

The requirements for a program of study in human biology are designed to ensure sufficient background in physical sciences and mathematics to enable the student to pursue a wide range of interests in the fields of modern biological sciences, anthropology, and fields related to the evolution and physical diversity of the human species. Adjustments may be made in these requirements, depending on the student's academic background and affiliation with colleges and schools within the university.

The basic requirements are one year of introductory biology (BIO S 101-103 plus 102-104 or 105-106 or BIO S 107-108 offered during the eight-week Cornell Summer Session); one year of general chemistry (CHEM 207-208 or 215-216); one year of college mathematics (MATH 111-112 or 105-106 or 111-105); one course in genetics (BIO S 281 or 282); one course in biochemistry (BIO S 330, 331, 332, or 333 or NS 320). It is recommended that students planning graduate study in biological anthropology, psychology, and related fields in the medical and nutritional sciences take a course in statistics. Students should consult their faculty adviser in human biology for help in selecting appropriate courses.

Elective courses should be taken that will enable the student to acquire breadth in the subject matter of human biology outside of their departmental major. Therefore only 6 of the 15 human biology elective credits may also fulfill requirements for the major. Courses should be selected that also provide sufficient exposure to the integration of basic anatomical and physiological sciences with the behavior of individuals and groups within the context of evolutionary theory and ecology. The courses listed below are representative of the offerings in human biology and are included to assist the student in organizing a curriculum of study. They are organized into three groups that reflect the three levels of integration noted above: (1) human anatomy and physiology, (2) human behavior, and (3) human evolution and ecology. Students should choose at least one course from each of these areas of integration. It is anticipated that the student will include in a program of study at least one of the laboratory courses offered. It is expected that a student will take a minimum of 15 credits from among these courses.

There is no foreign language requirement for human biology beyond what is dictated by specific departments and colleges. The requirements for the human biology curriculum are set alongside requirements of the undergraduate majors as these are defined by different departments. Students with independent majors may design their own programs of study under the guidelines provided by their college. Although a student may indicate an interest in human biology in the freshman year and be able to obtain early guidance from a faculty adviser representing the curriculum of study, it is more usual for students to establish their course programs in the first semester of the junior year. The student may request one of the faculty advisers in his or her department who is listed as faculty in human biology to be their principal adviser, or he or she may have an adviser in the department of the major and seek the advice of a human biology faculty adviser in matters pertaining to satisfaction of the requirements. In certain cases a faculty adviser may represent both the major and the curriculum of study in human biology.

#### Courses

### Human Anatomy and Physiology

BIO AP 214 Biological Basis of Sex Differences (also B&SOC 214 and WOMNS 214) Fall. 3 credits.

BIO AP 311 Introductory Animal Physiology, Lectures (also VET BMS 346) Fall. 4 credits.

BIO AP 319 Animal Physiology Experimentation Fall 4 credits

BIO AP 458 Mammalian Physiology Spring. 3 credits.

- BIO BM 434 Application of Molecular Biology to Medicine, Agriculture, and Industry Fall. 3 credits.
- BIO BM 439 Molecular Basis of Human Disease Fall 2 credits

all. 2 credits.

- BIO EE 274 The Vertebrates: Structure, Function, and Evolution Spring. 4 credits.
- BIO EE 474 Laboratory and Field Methods in Human Biology (also ANTHR 474) Spring. 5 credits.
- BIO MI 431 Medical Parasitology (also VETMI 431) Fall 2 credits

NS 115 Nutrition and Health: Concepts and Controversies Fall. 3 credits.

- NS 222 Maternal and Child Nutrition Fall. 3 credits.
- NS 262 Nutrients and Cells Spring. 3 credits.

NS 315 Obesity and the Regulation of Body Weight Fall 3 credits

- NS 331 Physiological and Biochemical Bases of Human Nutrition Spring, 4 credits.
- NS 341 Human Anatomy and Physiology Spring. 4 credits.
- NS 361 Biology of Normal and Abnormal Behavior (also PSYCH 361) Fall. 3 credits.
- NS 421 Nutrition and Exercise Spring. 3 credits.

NS 431 Mineral Nutrition and Chronic Disease Fall, 3 credits.

NS 441 Nutrition and Disease

Fall. 4 credits. NS 475 Molecular Nutrition and Development

Spring. 3 credits.

- PSYCH 322 Hormones and Behavior (also BIONB 322) Fall. 3 or 4 credits.
- **PSYCH 425 Cognitive Neuroscience** Fall. 3 or 4 credits.

**PSYCH 460 Human Neuroanatomy (also BIONB 420)** Spring. 3 or 4 credits.

### **Human Behavior**

- ANTHR 390 Primate Behavior and Ecology Spring. 4 credits.
- ANTHR 490 Topics on Primates and **Evolution: The Evolution of** Language Spring. 4 credits.
- B&SOC 301 Biology and Society I: The Social Construction of Life (also S&TS 401) Fall. 4 credits
- BIO NB 392 Drugs and the Brain Spring. 4 credits.
- **BIO NB 421 Effects of Aging on Sensory** and Perceptual Systems (also PSYCH 431) Fall. 3 or 4 credits.
- **BIO NB 422 Modeling Behavioral Evolution** Spring. 4 credits.
- **BIO NB 427 Animal Social Behavior** Spring, 4 credits
- DEA 325 Human Factors: Ergonomics-Anthropometrics Fall 3 credits
- HD 266 Emotional Functions of the Brain Fall. 3 credits
- HD 344 Infant Behavior and Development Fall, 3 credits.
- HD 366 Psychobiology of Temperment and Personality Spring. 3 credits.
- **PAM 380 Human Sexuality** Spring. 3 credits.
- NS 245 Social Science Perspectives on **Food and Nutrition** Fall. 3 credits.
- NS 347 Human Growth and **Development: Biological and Behavioral Interactions (also HD 347** and B&SOC 347) Spring. 3 credits.
- NS 361 Biology of Normal and Abnormal **Behavior** Fall. 3 credits
- **PSYCH 223** Introduction to Biopsychology Fall, 3 credits
- **PSYCH 326 Evolution of Human Behavior** Spring. 4 credits.
- **PSYCH 422** Developmental Biopsychology Fall, 4 credits
- **PSYCH 425 Cognitive Neuroscience** Fall 3 or 4 credits

Human Evolution and Ecology

**ANTHR 101** Introduction to **Anthropology: Biological Perspectives on the Evolution of** Humankind Fall. 3 credits.

- ANTHR 203 Early People: The **Archaeological and Fossil Record** (also ARKEO 203) Spring. 3 credits.
- ANTHR 375 Evolutionary Theory and **Human Behavior** Spring. 4 credits.
- ANTHR 390 Primate Behavior and Ecology Spring. 4 credits.
- ANTHR 490 Topics on Primates and **Evolution: Evolutionary Medicine** 
  - Spring, 4 credits.
- **BIO EE 261 Ecology and the Environment** Fall or summer, 4 credits
- **BIO EE 275 Human Biology and Evolution** (also ANTHR 275 and NS 275) Fall. 3 credits.
- **BIO EE 278 Evolutionary Biology** Fall or spring. 3 or 4 credits.
- **BIO EE 371 Human Paleontology (also ANTHR 371)** Fall. 4 credits.
- **BIO EE 464** Macroevolution Spring, 4 credits
- BIO EE 469 Food, Agriculture, and Society (also B&SOC 469 and S&TS 4691 Spring. 3 credits.
- **BIO EE 673 Human Evolution: Concepts,** History, and Theory (also ANTHR 673) Fall. 3 credits.
- BIO G 207 Evolution (also HIST 287, and S&TS 287) Fall or summer. 3 credits.
- **BIO GD 481** Population Genetics Fall. 4 credits.
- **BIO GD 482** Human Genetics and Society Fall, 4 credits.
- **BIO GD 484 Molecular Evolution** Spring. 3 credits.
- B&SOC 447 Seminar in the History of **Biology (also HIST 415)** Fall. 4 credits.
- NS 306 Nutritional Problems of **Developing Nations** Fall 3 credits.
- NS 450 Public Health Nutrition Spring. 3 credits.
- NS 451 Epidemiology and Health of **Human Communities** Fall, 3 credits
- NS 452 Molecular Epidemiology and **Dietary Markers of Chronic Disease** Spring. 3 credits.
- PAM 303 Ecology and Epidemiology of Health
- Spring. 3 credits.
- PSYCH 326 Evolution of Human Behavior Spring. 4 credits.
- **R SOC 201** Population Dynamics (also SOC 2021 Spring. 3 credits.
- VET MI 431 Medical Parasitology (also **BIO MI 417)** Fall. 2 credits.

VTPMD 664 Introduction to Epidemiology (enroll in VET CS 664) Fall 3 credits

### HUNGARIAN

See Departments of Linguistics and Russian.

### INDEPENDENT MAJOR PROGRAM

L. Abel, director, 172 Goldwin Smith Hall, 255-3386.

The Independent Major Program is described in the introductory section of Arts and Sciences

#### IM 351 Independent Study

Fall or spring, 1-4 credits. Prerequisite: permission of the program office.

#### IM 499 Honors Research

Fall or spring. 1-8 credits; a maximum of 8 credits may be earned for honors research. Prerequisite: permission of program director. Each participant must submit a brief proposal approved by the honors committee.

### INDONESIAN

See Department of Asian Studies.

### INEQUALITY CONCENTRATION

Office: 363 Uris HallURL:

http://www.inequality.cornell.edu

Telephone: 254-8674

The study of inequality lies at the heart of current debates about welfare reform, affirmative action, the "glass ceiling," globalization, and any number of other contemporary policy issues. In recent years, public and scholarly interest in issues of inequality has intensified, not merely because of historic increases in income inequality in the United States and other advanced industrial countries, but also because inequalities of race, ethnicity, and gender are evolving in equally dramatic and complicated ways

The Inequality Concentration allows undergraduate students to supplement their studies for their major with a coherent program of courses oriented toward the study of inequality. Although Cornell University is a leading center of scholarship on poverty and inequality, this strength is necessarily distributed across many departments and colleges; and an interdisciplinary concentration thus allows students to combine these resources into an integrated program of study. The institutional home for the Inequality Concentration is the Center for the Study of Inequality (located at 363 Uris Hall and at www.inequality.cornell.edu).

The Inequality Concentration is appropriate for students interested in government service, policy work, and related jobs in nongovernmental organizations (NGOs) as well as students who wish to pursue post-graduate education in such fields as public policy, economics, government, law, history,

### 554 ARTS AND SCIENCES - 2002-2003

psychology, sociology, anthropology, literature, and philosophy. In many of these fields, the study of inequality is becoming increasingly central and fundamental, and the Inequality Concentration can therefore provide students with a valuable and unique foundation for further study.

The Inequality Concentration is not a major, but rather is an interdisciplinary program that should be completed in conjunction with a major. The Concentration is open to students enrolled in any of the seven Cornell undergraduate colleges. If the requirements of the Concentration are met, a special notation to this effect will be recorded on the transcript.

#### **Concentration Requirements**

The Inequality Concentration exposes students to the breadth of approaches, methods, and topic areas on offer while also allowing them to tailor a program to their particular interests. The requirements are as follows:

#### A. Overview Course

The required overview course may be selected from any of the eight courses listed, below. When possible, the overview course should be completed early in the program, as it serves to define the field and to expose students to areas and topics that might be explored in future coursework.

- Income Distribution (ILRLE 441)
- Inequality, Diversity, and Justice (PHIL 193, CRP 293, GOVT 293, and SOC 293)
- Power and Poverty in America (GOVT 310)
- Social Inequality (SOC 208 and R SOC 209)
- Comparative Social Stratification (R SOC 370 and SOC 371)
- Social Inequality: Contemporary Theories, Debates, and Models (SOC 518)
- Introduction to Social Inequality (SOC 108)
- Inequality and Social Science (SOC 221)

#### **B. Controversies About Inequality**

(SOC 222, PAM 222, ECON 222, ILRLE 222, PHIL 195, R SOC 222, and GOVT 222)

This seminar (taken for 1–3 credits) introduces students to other concentrators and to faculty at Cornell University carrying out relevant research. In weekly meetings, students are exposed to research on inequality underway at Cornell, and they also participate in debates staged between faculty who take opposing positions on pressing inequality-relevant issues (e.g., welfare reform, school vouchers, immigration policy, affirmative action). Because it introduces concentrators to potential advisers and lines of study, this course is best taken early in the program.

#### **C. Electives**

In addition to the overview course and seminar, students must select four electives from the list of qualified courses. This list is available from Jessica Henning (363 Uris Hall) or can viewed on the website for the Center for the Study of Inequality, see www.inequality.comell.edu. Although students may tailor their programs to match their interests, the electives and overview course must be distributed across at least three departments (thereby ensuring breadth in the analytic approaches that are represented).

#### **D. Lectures and Seminars**

The Center for the Study of Inequality hosts occasional lectures and symposia, and concentrators are expected to attend them when possible. These events will be announced via email and are also listed on the Center website www.inequality.com.

#### **Enrolling in the Concentration**

The website for the Center for the Study of Inequality, www.inequality.com, provides current information on the Inequality Concentration (see listing under the heading "Academic Training"). For students considering the Concentration, it may be useful to schedule a meeting with the Executive Administrator of CSI, Jessica Henning (inequality@cornell.edu). Once a decision is made to enroll, a faculty adviser should be chosen to help design a program of study that combines effectively with the major, that is intellectually coherent, and that serves future career and professional interests well.

#### **Research and Internship Opportunities**

The Center for the Study of Inequality serves as a clearinghouse for internship opportunities in the areas of poverty and inequality (see CSI website under "Finding an Internship"). Additionally, the CSI can assist students who wish to become involved in research by matching them to faculty projects of interest, and by providing small research grants for student-initiated research (see CSI website under "Student Research Grants").

### **Advisers**

The Inequality Concentration is governed by a Director and Executive Board. Although all members of the Board (including the Director) may serve as student advisers, some members are not currently taking on new advisees. The listing of available advisors can be obtained from Jessica Henning at inequality@cornell.edu.

*Director:* David Grusky, Professor, Sociology; Director, Center for the Study of Inequality

Executive Board: N'Dri Assie-Lumumba, Associate Professor, Dept. of Education and Africana Studies; Kaushik Basu, C. Marks Professor of International Studies and Professor, Dept. of Economics; David Dunning, Professor, Dept. of Psychology; Gary Fields, Professor, School of Industrial and Labor Relations: Maria Cristina Garcia, Director, Latino Studies Program and Associate Professor, Dept. of History; Davydd Greenwood, Goldwin Smith Professor of Anthropology and Director, Institute for European Studies; Douglas Gurak, Director, Population and Development Program and Professor, Rural Sociology; Michael Jones-Correa, Associate Professor, Dept. of Government; Ravi Kanbur, T.H. Lee Professor of World Affairs, Dept. of Applied Economics and Management; Mary Katzenstein, Professor, Dept. of Government; Richard Miller, Professor, Dept. of Philosophy; Satya Mohanty, Professor, Dept. of English; Elizabeth Peters, Professor and Director of Graduate Studies, Dept. of Policy Analysis and Management; Jonas Pontusson, Professor, Dept. of Government; Szonja Szelenyi, Associate Professor, Sociology.

#### **Sample Programs**

The Inequality Concentration allows students considerable flexibility in devising programs that reflect their interests. As examples of possible programs, we have listed below ten sample tracks, each comprising a different set of possible electives. The first program listed below is a general track that provides an overview of the field, while the remaining nine programs are more specialized and focus on particular issues within the field. This sampling of programs is obviously illustrative and does not cover the entire wide range of interests that may be addressed within the Concentration. It is important for students and advisers to work together to formulate an individualized program of study that may draw only partially, if at all, from the programs listed below.

#### **General Track**

The objective of the general track is to provide a broad foundation that addresses both the many forms of inequality (e.g., class, gender, ethnic) as well as the various approaches and perspectives (e.g., economic, sociological, historical) that have been brought to bear on these forms. The sample schedule outlined below is just one of many possible programs that meets this generalist objective.

- I. Overview Course (choose any one)
- *II. Controversies About Inequality* (SOC 222, PAM 222, ECON 222, ILRLE 222, PHIL 195, and GOVT 222)
- III. Possible Electives:

Economics of Hunger and Malnutrition (ECON 474 and NS 457)

Race, Power, and Privilege in the United States (AS&RC 280)

Gender Inequality (SOC 316)

Social Welfare as a Social Institution (PAM 383)

#### **Globalization and Inequality**

As a global economy takes hold, there has been increasing concern that economic inequalities will grow apace, especially North-South inequalities between rich and poor countries. The countervailing "optimistic view" is that between-country disparities will in the long run wither away and render inequality an entirely internal, within-country affair. These and related lines of argumentation can be explored in courses that address such topics as trends in income inequality, theories of economic development, emerging patterns of international migration, and globalization and gender.

- I. Overview Course (choose any one)
- *II. Controversies About Inequality* (SOC 222, PAM 222, ECON 222, ILRLE 222, PHIL 195, and GOVT 222)

III. Possible Electives (choose any four):

International Development (R SOC 205 and SOC 206)

Economic Development (ECON 371)

Labor Markets and Income Distribution in Developing Countries (ILRIC 635)

Globalization and Inequality (SOC 320)

Indigenous Peoples and Globalization (R SOC 325)

Comparative Ethnic Stratification: Demographic Perspectives (R SOC 431 and R SOC 631)

Global Perspectives on Gender (AS&RC 362)

Sex and Gender in Cross-Cultural Perspective (ANTHR 321/621 and WOMNS 321/631)

Human Migration: Internal and International (R SOC 430)

Gender and International Development (WOMNS 614 and CRP 614)

Politics of Transnationalism (GOVT 681)

#### Social Policy and Inequality

In the modern period, inequalities generated in the market and through other social institutions are typically regarded as excessive, and the state is seen as the main tool for redistribution, discrimination abatement, equalization of life chances, and related forms of amelioration. The social policy and inequality track explores the role of the state in generating and reducing inequalities of various kinds.

- I. Overview Course (choose any one)
- II. Controversies About Inequality (SOC 222, PAM 222, ECON 222, ILRLE 222, PHIL 195, and GOVT 222)

III. Possible Electives (choose any four):

Organizations and Social Inequality (SOC 322 and ILROB 626)

The Sociology of Markets (SOC 217)

Sociology of Markets (ILROB 622 and SOC 622)

Economic Security (ILRLE 340 and ECON 451)

Employment Discrimination and the Law (ILRCB 684)

Human Resource Economics and Public Policy (ILRHR 360)

Employee Relations and Diversity (ILRHR 463)

Social Welfare as a Social Institution (PAM 383)

Applied Public Finance (PAM 204)

Introduction to Policy Analysis (PAM 230)

Critical Perspectives (PAM 240)

Introduction to Policy Management (PAM 320) Intermediate Policy Analysis (PAM 330)

Demography and Family Policy (PAM 371)

Social Policy (SOC 326 and SOC 526)

Social Policy (PAM 473)

Social Policy and Social Welfare (CRP 448 and CRP 548)

Policy Analysis: Welfare Theory, Agriculture, and Trade (ECON 430 and AEM 630)

Economic Analysis of the Welfare State (ILRLE 642 and ECON 460)

Families and Social Policy (HD 456)

Health and Social Behavior (HD 457 and SOC 457)

Public Policy and the African-American Urban Community (AS&RC 420)

Seminar: Beliefs, Attitudes, and Ideologies (PSYCH 489 and WOMNS 488)

Feminist Jurisprudence (LAW 646)

Political Economy of Education (EDUC 378)

Research on Education Reform and Human Resource Policy (ILRHR 653)

#### **The Ethics of Inequality**

Charges of social injustice are often charges of excessive inequality. What are the political, philosophical, and legal debates that are relevant to such judgements? Under what conditions should rich countries assist poor ones? At what point should governments step in and redistribute income? When should parents pass on their wealth to their children? The ethics of inequality track examines the conditions under which inequalities might be deemed legitimate or illegitimate, evaluates prevailing inequalities and social policy as against this yardstick, and explores the larger role of values in popular and scholarly judgements about inequality.

- I. Overview Course: Inequality, Diversity, and Justice (PHIL 193, SOC 293, CRP 293, and GOVT 293)
- II. Controversies About Inequality (SOC 222, PAM 222, ECON 222, ILRLE 222, PHIL 195, and GOVT 222)
- III. Possible Electives:

#### A. Ethics Courses (choose two)

Values in Law, Economics, and Industrial Relations (ILRCB 607)

Appropriation and Alienation (PHIL 142)

Global Thinking (PHIL 194 and GOVT 294) Modern Political Philosophy (PHIL 346 and

GOVT 462)

Contemporary Political Philosophy (PHIL 447 and GOVT 465)

International Justice (PHIL 448 and GOVT 492)

Feminism and Philosophy (PHIL 249 and WOMNS 249)

Marx (PHIL 219)

Marx: An Overview of His Thought (ANTHR 368)

#### B. Social Science Classes (choose two)

Select courses in consultation with adviser (see list of electives below).

#### Literature, Postmodernism, and Inequality

This program juxtaposes literary and social scientific approaches to the understanding of inequality. Although considerations of power and inequality have long been fundamental to social scientific analysis and are increasingly central to literary analysis, these two traditions of scholarly inquiry have not always adequately informed one another. This program of study allows students to combine these two traditions in potentially creative ways.

- I. Overview Course (choose any one)
- II. Controversies About Inequality (SOC 222, PAM 222, ECON 222, ILRLE 222, PHIL 195, and GOVT 222)
- III. Possible Electives:

#### A. Literature Classes (choose two)

Introduction to Cultural Studies (ENGL 209)

Poetry and Poetics of Difference (COM L 225 and ENGL 225)

Rewriting the Classics: Stories of Travels and Encounters (ENGL 235)

Twentieth Century Women Novelists (ENGL 251, WOMNS 251, and AM ST 252)

Politics and Culture in the 1960s (ENGL 268 and AM ST 268)

Shakespeare: Gender and Power (ENGL 327 and WOMNS 327)

Introduction to Global Women's Literature (ENGL 396 and WOMNS 396)

Global Women's Literature (ENGL 476 and WOMNS 476)

Literatures of the Archipelagoes: Caribbean and Pacific "tidalectics" (ENGL 490)

Europe and Its Others: An Introduction to the Literature of Colonialism (COM L 304)

Feminist Theory/Lesbian Theory (WOMNS 465, COM L 465, and GERST 465)

Virtual Orientalisms (ASIAN 415, S HUM 415, and COM L 418)

Language, Religion, and Politics in Modern South Asia (ASIAN 431)

Internationalism, Nationalism, and Modern Japanese Discursive Space (ASIAN 483)

Political Theory and Cinema (GERST 330, COM L 330, GOVT 370, and THETR 329)

Reading Freud: Gender, Race, and Psychoanalysis (GERST 447, COM L 447, WOMNS 447)

Minority Literature in the Federal Republic (GERST 392)

The Afro-Europeans (GERST 403)

Women Around Freud (GERST 413, COM L 412, and WOMNS 413)

Marx, Nietzsche, Freud (GERST 415, COM L 425, and GOVT 473)

The Cultural Theory of the Frankfurt School (GERST 495, COM L 495, and GOVT 471)

Gender and Society in the Muslim Middle East (NES 281, RELST 281, and WOMNS 212)

May '68 and its Consequences (FRLIT 326)

Contemporary Narratives by Latina Writers (SPANL 246, LSP 246, and WOMNS 246)

Hispanic Caribbean Culture and Literature (SPANL 346)

#### B. Social Science Classes (choose two)

Select courses in consultation with adviser (see list of electives below).

#### **Poverty and Economic Development**

Over the last century, rich countries have of course become yet richer, while less developed countries remain burdened with massive poverty. The courses listed below examine the sources and causes of world poverty, the rise of global anti-inequality social movements, and the types of policy interventions that might stimulate economic development and reduce poverty.

- . Overview Course (choose any one)
- *II. Controversies About Inequality* (SOC 222, PAM 222, ECON 222, ILRLE 222, PHIL 195, and GOVT 222)
- III. Possible Electives (choose any four):

Economic Development (ECON 371)

### ARTS AND SCIENCES - 2002-2003

Population and Development (R SOC 438 and SOC 437)

International Justice (PHIL 448 and GOVT 492)

Economics of Development (ECON 466 and AEM 666)

Land Reform Old and New (R SOC 643)

Issues in African Development (CRP 477 and CRP 677)

Labor Markets and Income Distribution in Developing Countries (ILRIC 635)

Global Perspectives on Gender (AS&RC 362)

Population, Environment, and Development in Sub-Saharan Africa (R SOC 495)

Gender and International Development (WOMNS 614 and CRP 614)

Politics of Transnationalism (GOVT 681)

Economics of Malnutrition and Hunger (NS 457 and ECON 474)

#### Social Movements and Inequality

The history of modern society may be seen in large part as a history of anti-inequality social movements (e.g., the Enlightenment, socialism, the union movement, the civil rights movement, feminism) interspersed with occasional inequality-inducing reactions (e.g., the post-socialist transition). The social movements track examines the causes, effects, and likely future of such social movements and the reactions they spawn.

I. Overview Course (choose any one)

II. Controversies About Inequality (SOC 222, PAM 222, ECON 222, ILRLE 222, PHIL 195, and GOVT 222)

III. Possible Electives (choose any four):

Utopia in Theory and Practice (SOC 115)

Social Movements (R SOC 311)

Social Movements in American Politics (GOVT 302 and AM ST 302)

Poor People's Movements (GOVT 456)

Group Conflict and the Nation-State (SOC 531)

Social Movements (SOC 660 and GOVT 660)

Politics of Transnationalism (GOVT 681)

Feminism Movements and the State (GOVT 353 and WOMNS 353)

Comparative Labor Movements in Latin America (ILRIC 631)

Union Organizing (ILRCB 400)

Theories of Industrial Relations Systems (ILRCB 606)

Revitalizing the Labor Movement: A Comparative Perspective (ILRIC 632)

Women and Unions (ILRCB 384 and WOMNS 384)

History of Resistance Movements in Africa and the Diaspora (AS&RC 283)

Latina Activism Feminist Theory (LSP 300)

Prisons (GOVT 314)

### Education and the Reproduction of Inequality

In the contemporary period, the study of inequality has increasingly turned on the study of formal education, as schools have become the main institutional locus for training and credentialing workers and for signaling potential employers about (putative) worker quality. The inequality and education track examines educational institutions and how they are organized, how they generate equality and inequality, and how possible institutional changes (e.g., vouchers, required testing) might affect the reproduction of inequalities.

- I. Overview Course (choose any one)
- II. Controversies About Inequality (SOC 222, PAM 222, ECON 222, ILRLE 222, PHIL 195, and GOVT 222)
- III. Possible Electives (choose any four):
- Introduction to Education (EDUC 101)

Sociology of Education (EDUC 271)

Education, Inequality, and Development (R SOC 305)

Schooling and Society (SOC 357)

Issues in Educational Policy (EDUC 370)

Political Economy of Education (EDUC 378)

The Politics of Education (GOVT 406)

Research on Education Reform and Human Resource Policy (ILRHR 653)

Education, Technology, and Productivity (ILRHR 695)

Educational Finance (EDUC 664)

Education in Africa and the Diaspora (AS&RC 459 and EDUC 459)

Education and Development in Africa (AS&RC 502)

#### **Race and Ethnicity in Comparative Perspective**

This program of study examines the many forms of racial and ethnic inequality as revealed across different times and places. When race and ethnicity are examined from an explicitly comparative perspective, it becomes possible to identify regularities and better understand the forces of competition, conflict, and subordination among ethnic and racial groups. The courses listed below address such issues as the causes of discrimination, the implications of residential segregation for inequality, the sources of ethnic and racial differences in income, the effects of anti-inequality reform efforts (e.g., affirmative action), and the possible futures of ethnic and racial stratification.

- I. Overview Course (choose any one)
- II. Controversies About Inequality (SOC 222, PAM 222, ECON 222, ILRLE 222, PHIL 195, and GOVT 222)
- III. Possible Electives (choose any four):

#### **A. General Courses**

Introduction to American Studies: New Approaches to Understanding American Diversity, the Twentieth Century (AM ST 110 and LSP 110)

Race and Ethnic Relations (SOC 204)

Race, Power, and Privilege in the United States (AS&RC 280)

History and Politics of Racialisation: A Comparative Study (AS&RC 204)

Sociology of Health and Ethnic Minorities (LSP 220 and R SOC 220)  $\,$ 

Prisons (GOVT 314)

Minority Politics in the U.S. (GOVT 319 and LSP 319)

Concepts of Race and Racism (GOVT 377)

Comparative Ethnic Stratification: Demographic Perspectives (R SOC 431 and R SOC 631)

Race, Gender, and Organization (GOVT 415 and WOMNS 415)

Employee Relations and Diversity (ILRHR 463)

Ethnicity and Identity Politics: An Anthropological Perspective (ANTHR 479)

Political Identity: Race, Ethnicity, and Nationalism (GOVT 610 and LSP 610)

#### B. Immigration and Ethnicity

Comparative Migration to the Americas (LSP 203, HIST 202, and AM ST 204)

Strangers and Citizens: Immigration and Labor in U.S. History (ILRCB 302)

Immigration and Ethnic Identity (SOC 438 and AAS 438)

Human Migration: Internal and International (R SOC 430)

The Immigrant City: 1900-2000 (LSP 406, S HUM 406, AM ST 406, and HIST 412)

Immigration and the American Labor Force (ILRHR 469)

Immigration and Ethnicity in Twentieth-Century U.S. (HIST 201)

Immigration and Refugee Law (LAW 731)

#### **C. Case Studies**

African-American Social and Political Thought (AS&RC 231)

African-American Women in the Twentieth Century (HIST 212, AM ST 212, and WOMNS 212)

African-American History from Slavery to Freedom (HIST 335)

The African-American Workers, 1865-1910: The Rural and Urban Experience (HIST 375 and ILRCB 385)

The African-American Workers, 1910-The Present: Race, Work, and the City (HIST 376 and ILRCB 386)

African-American Women in Slavery and Freedom (HIST 303, WOMNS 307, and AM ST 303)

Public Policy and the African-American Urban Community (AS&RC 420)

Politics and Social Change in Southern Africa (AS&RC 484)

Global Africa: Comparative Black Experience (AS&RC 501)

Afro-American Historiography (HIST 610)

African-American Women (HIST 608)

Latinos in the United States (SOC 265, R SOC 265, and LSP 201)

Introduction to U.S. Latino History, Part I (LSP 260, HIST 260, and AM ST 259)

Introduction to U.S. Latino History, Part II (LSP 261, HIST 261, and AM ST 261)  $\,$ 

Latina Activism Feminist Theory (LSP 300)

Latino Politics in the United States (LSP 306 and GOVT 306)

Introduction to Asian American Studies (AAS 110)

Asian American History (AAS 213 and HIST 213)

Asians in the Americas: A Comparative Perspective (AAS 303 and ANTHR 303)

Introduction to American Indian Studies (AIS 100 and R SOC 100)

Indian America in the Twentieth Century (AIS 175 and R SOC 175)

Indians, Settlers, and Slaves in the Early South (AIS 329 and HIST 329)

Antisemitism and the Crisis of Modernity: From the Enlightenment to the Holocaust (HIST 459 and JWST 459)

#### The Family and Inequality

Although workers in modern labor markets are often analytically treated as independent individuals, they of course typically belong to families that pool the labor supply of their members, consume goods jointly, and serve in some circumstances as units of collective production. It might therefore be asked how the modern labor market has adapted to and evolved in the context of the family (and, obversely, how the family has responded to the market). The courses within this track explore such issues as the causes and consequences of the intra-familial division of labor, the effects of marriage and family structure on careers, and the transmission of socioeconomic advantage from one generation to the next.

I. Overview Course (choose any one)

II. Controversies About Inequality (SOC 222, PAM 222, ECON 222, ILRLE 222, PHIL 195, and GOVT 222)

III. Possible Electives (choose any four):

Work and Family (SOC 203 and WOMNS 203)

Demography and Family Policy (PAM 371)

Families and Social Policy (HD 456)

Families and the Life Course (SOC 251 and HD 250)

Parent-Child Development in African-American Families (HD 458)

The Sociology of Marriage (SOC 309 and WOMNS 309)

Seminar in Family Studies and the Life Course (HD 655)

Contemporary Family Theory and Research (HD 650)

Economics of Household Behavior (PAM 605)

### INTENSIVE ENGLISH PROGRAM 105 Morrill Hall

J. M. Mancusi, director; R. L. Feldman, K. U. Golkowska, M. Johns, M. T. Lovell,

J. G. Luks, L. Porterfield, S. L. Vann, S. Yates

This noncredit, nondegree program provides full-time intensive English as a second language instruction as well as academic, social, and cultural orientation to the United States and its institutions. The aim of the program is for participants to acquire proficiency in the language in order to pursue goals in English for academic, business, professional, or personal purposes.

Programs are offered both fall and spring semesters and in the six-week summer session (from late June to early August). Participants receive a minimum of 20 hours of classroom instruction weekly in speaking, listening, reading, writing, and grammar, which are taught at all levels from low intermediate through very-high advanced. Applicants must be at least 17 years of age, hold the equivalent of a high school diploma, and have had some previous study of English. Participants receive a Certificate of Eligibility (Form I-20) to obtain an F-1 visa.

Students who have gained full admission to or who are already registered in degree-granting programs at Cornell should consult the section "English for Academic Purposes" (series ENGLF).

The Intensive English Program is coordinated by the director, Jeanette Mancusi. Information and application materials are available directly from the program at: Cornell University, Intensive English Program, Morrill Hall, Ithaca, NY 14853–4701, U.S.A.: tel. 607/255–4863; fax 607/255–7491; e-mail CUIEP@cornell.edu; web page: http://languagecenter.cornell.edu/iep/

# INTERNATIONAL RELATIONS CONCENTRATION

Office: 156 Uris Hall, 254-5004, www.einaudi.cornell.edu/about/irc.asp

Faculty Advisory Board: M. Cook (ILR); M. Evangelista (Government); S.Feldman (Rural Sociology); D. Lee (AEM); J. Reppy (S&TS); H. Shue (Ethics and Public Policy); B. Strauss (History); B. Szekely (Associate Director, Cornell Abroad)

### Objective

The International Relations Concentration is an interdisciplinary program for undergraduate students enrolled in any of the seven Cornell undergraduate colleges. The International Relations Concentration provides a structured yet flexible program for undergraduates to take advantage of the vast resources available at the university for studying the politics, economics, history, languages, and cultures of the countries and regions of the world.

Graduates of the program have gone on to pursue further education in fields such as political science and anthropology and to successful careers in international law, economics, agriculture, trade, finance, and government service, among others. They have gone on to work in international and nongovernmental organizations, in cross-cultural affairs, in journalism, and in education.

The International Relations Concentration is not a major or a department, but rather a program offering a selection of courses reaching across colleges and departments. Students pursue the International Relations Concentration in addition to their regular degree. International Relations Concentrators have majored in fields ranging from anthropology, city and regional planning, communications, economics, government, and history to natural resources, industrial and labor relations, and computer science. International coursework and language study add a global and cross-cultural dimension to those majors. Some students even design an independent major in some aspect of international relations or comparative social or cultural studies. Spending a semester or year of study abroad can contribute to meeting the course

requirements of the IR Concentration, including the language requirement.

#### **Course Requirements**

These requirements are designed to expose students to a broad range of perspectives in international relations while allowing them to tailor their course selections to specific interests. Courses throughout the university are grouped into four subject areas including:

- International Economics and Development;
- 2) World Politics and Foreign Policy;
- 3) Transnational Processes and Policies;
- 4) Cultural Studies.

Within these four subject areas, courses are also identified as "core" or "elective". Starting with the Class of 2003 and for current students who have not been enrolled in the program by the end of spring 1999, students must complete altogether eight courses from the four groups according to one of two strategies. Option A emphasizes the politics and economics of international relations. Option B puts greater stress on culture. In choosing either option, students should ensure that they acquire familiarity with more than one geographic region or country. All courses used to fulfill the concentration requirements must be taken for a letter grade. Courses can count both toward a major and the International Relations Concentration.

Option A:—One core course from Groups 1, 2, 3, and 4—One elective from Groups 1, 2, 3, and 4

Option B:—One core course from Groups 1, 2, 3, and 4—One elective from either Group 1 or Group 2—One elective from Group 3 and 4, and one additional elective from either Group 3 and Group 4

Prior to pre-registration a course list for the following semester (as well as lists for the current and previous semesters) can be obtained from the administrative coordinator, Hyeok Yong Kwon, hyk1@cornell.edu, 156 Uris Hall, as well as from the website. Students should take note that these lists are not necessarily complete. Other courses throughout the university can qualify for the International Relations Concentration by arrangement.

#### **Course List for Fail 2002**

(For course list for spring 2003, contact IRC program in fall of 2002. Courses with the brackets are core courses for each group but not offered in fall 2002.)

# Group 1: International Economics and Development

#### Core:

ECON 361 International Trade Theory

[ECON 230/AEM 230 International Trade and Finance]

[ECON 263/AEM 430 International Trade Policy]

[ECON 362 International Monetary Theory and Policy]

#### Electives:

ECON 371 Economic Development

ECON 425 Economic History of Latin America

### Language Requirement

IR Concentrators are expected to complete additional language study beyond the College of Arts and Sciences degree requirement. This study can be accomplished in one of two ways: 1) two years of one foreign language (proficiency plus one course) 2) two languages at proficiency.

### Study Abroad

IR Concentrators are strongly encouraged to study abroad to bring a practical dimension to their expertise in international issues. Those who choose this option will find the requirements for the concentration highly compatible with courses taken abroad. Students are encouraged to contact the Administrative Coordinator prior to departure.

### Completion

Transcripts will reflect successful completion of the requirements for the concentration. In addition, students will receive a special certificate and a letter of confirmation signed by the director of the international relations concentration.

### Enrollment

To obtain course lists, to enroll and for all further information, please contact: \*Administrative Coordinator: Hyeok Yong Kwon, the Mario Einaudi Center for International Studies, 156 Uris Hall, hyk1@cornell.edu, Tel: 254-5004.

### ITAI IAN

See Department of Romance Studies.

**JAPANESE** See Department of Asian Studies.

### JAVANESE

See Department of Asian Studies.

### PROGRAM OF JEWISH STUDIES

D. I. Owen, director (Assyriology, Ancient Near Eastern History and Archaeology), L. Adelson (German-Jewish Literature and Culture), G. Altschuler (American-Jewish History and Culture), D. Bathrick (Holocaust Film Studies), R. Brann (Judeo-Arabic Studies), V. Caron (Modern French and European-Jewish History), M. Diesing (Yiddish Language and Linguistics), N. Furman (French Holocaust Literature), K. Haines-Eitzen (New Testament and Early Christianity), R. Hoffmann (Holocaust Studies), P. Hyams (Medieval Jewish History), D. LaCapra (Holocaust Studies), M. Migiel (Italian Literature), R. Polenberg (American-Jewish History), J. Porte (American-Jewish Writers), D. S. Powers (Arabic and Islamic Studies), G. Rendsburg (Biblical and Semitic Studies), E. Rosenberg (Holocaust Studies), N. Scharf (Hebrew Language), D. Schwarz (Anglo-Jewish Literature), G. Shapiro (Russian-Jewish Literature), S. Shoer (Hebrew Language), D. Starr (Modern Hebrew and Arabic Literature and Culture), M. Steinberg (German-Jewish History and Culture), Y. Szekely (Judaica Bibliography), S. Toorawa (Minorities in Islamic Lands), J. Zorn (Biblical Archaeology)

The Program of Jewish Studies was founded as an extension of the Department of Semitic Languages and Literatures, now the Department of Near Eastern Studies, in 1973 and attained status as an intercollegiate program in 1976.

The program has grown out of the conviction that Judaic civilization merits its own comprehensive and thorough treatment and that proper understanding of any culture is inconceivable without adequate knowledge of the language, literature, and history of the people that created it. Accordingly, the offerings in the areas of Jewish languages and literatures have been considerably expanded, and courses in ancient, medieval, and especially modern Jewish history and culture have been added to the program.

It is a broadly based, interdisciplinary program, bringing together faculty from various Cornell departments and colleges.

The Program of Jewish Studies supports teaching and research in the many areas of Jewish Studies. It is a secular, academic program, whose interests are diverse and cross-cultural. The program recognizes its special relationship to teaching and research in classical Judaica and Hebraica pursued by the members of the Department of Near Eastern Studies, with particular emphasis on the interrelationship between Judaism, Christianity, and Islam.

It presently enables students to obtain basic instruction and specialization in the fields of Semitic languages; the Hebrew Bible; medieval and modern Hebrew literature; ancient, medieval, and modern European and Middle Eastern Jewish history; and Holocaust studies. In some of these fields students may take courses on both graduate and undergraduate levels. Faculty throughout the university provide breadth to the program by offering courses in related areas of study.

#### Courses Offered

JWST 105–106 Elementary Modern Hebrew I and II (also NES 101-102) 105 fall; 106 spring. 6 credits. S. Shoer. For description, see NES 101-102.

JWST 201-202 Intermediate Modern Hebrew I and II (also NES 201-202) 201, fall; 202@, spring. 4 credits. N. Scharf. For description, see NES 201-202.

JWST 229 Introduction to the New Testament (also RELST 229, NES 2291

Fall. 3 credits. K. Haines-Eitzen. For description, see NES 229.

JWST 233 Soviet Soclety and Family Life During WWII: Perspectives from Culture (also HIST 233) Fall. 4 credits. P. Holquist. For description, see HIST 233

JWST 235 Jews and Arabs in Contact and Conflict: The Modern Period (also COM L 245 and NES 235) Spring. 3 credits. D. Starr. For description, see NES 235

JWST 244 Introduction to Ancient Judaism (also NES 244, RELST 244) Fall. 3credits. G. Rendsburg. For description, see NES 244

JWST 251 Judaism, Christianity and Islam (also NES 251, RELST 251) Fall. 3 credits. K. Haines-Eitzen. For description, see NES 251.

[JWST 252 Modern European Jewish History, 1789-1948 (also HIST 291) Fall. 4 credits. Not offered 2002-2003. V. Caron. For description, see HIST 291.]

JWST 253 From Medievalism to Modernity: The History of Jews in E. Modern Europe, 1492-1789 (also NES 245, HIST 285) Fall. 4 credits. V. Caron.

For description, see HIST 285.

#### [JWST 254 Anti-Semitism and the Crisis of Modernity: From the **Enlightenment to the Holocaust** (also HIST 235)

Spring. 4 credits. Not offered 2002-2003. V. Caron.

For description, see HIST 235.]

[JWST 256 Introduction to the Qur'an (also RELST 256, NES 256) Spring. 3 credits. Not offered 2002-2003. S. Toorawa.

For description, see NES 256.]

JWST 257 Ethics of Imagining Holocaust (also GERST 221, ENGL 221) Fall. 4 credits. D. Schwartz. For description, see ENGL 221

#### JWST 263 Introduction to Biblical **History and Archaeology (also** RELST 264, ARKEO 263, and NES 263)

Spring. 3 credits. J. Zorn. For description, see NES 263.

JWST 266 Jerusalem Through the Ages (also RELST 266, NES 266, and **ARKEO 266)** Fall. 3 credits. J. Zorn.

For description, see NES 266.

### 560 ARTS AND SCIENCES - 2002-2003

JWST 290 History of Zionism and the Birth of Israel (also NES 290, HIST 267)

Spring. 4 credits. V. Caron. For description, see HIST 267.

JWST 295 Introduction to Christian History (also RELST 295, NES 295, HIST 299) Spring. 3 credits. K. Haines-Eitzen.

For description, see NES 295.

- JWST 301-302 Advanced Modern Hebrew I and II (also NES 301-302) 301, fall; 302, spring. 4 credits. N. Scharf. For description, see NES 301–302.
- JWST 320 Women in the Hebrew Bible (also NES 320, RELST 316, WOMNS 322)

Spring. 4 credits. G. Rendsburg. For description, see NES 320.

JWST 326 Seminar-Women in the Hebrew Bible (also NES 326) Spring. 1 credit. G. Rendsburg. For description, see NES 326.

JWST 328 Readings in Ancient Jewish Texts (also NES 328, RELST 317) Fall. 1 credit. G. Rendsburg. For description, see NES 328.

[JWST 339 Islamic Spain: Culture and Society (also RELST 334, SPANL 339, COM L 334, NES 339) Fall. 4 credits. Not offered 2002–2003.

R. Brann. For description, see NES 339.]

JWST 353 History of the Holocaust (also HIST 370) Fall. 4 credits. V. Caron.

For description, see HIST 370.

[JWST 360 Origins of Mesopotamian Civilization (also NES 360, ARKEO 360)

Fall. 4 credits. Not offered 2002–2003. D. I. Owen.

For description, see NES 360.]

[JWST 361 Sumerian Language and Culture (also NES 361, ARKEO 361) Spring. 4 credits. Not offered 2002–2003. D. I. Owen.

For description, see NES 361.]

[JWST 394 Gender, Sexuality, and the Body in Early Christianity (also NES 394, WOMNS 394, RELST 394) Spring. 3 credits. Not offered 2002–2003. K Hanes-Eitzen.

For description, see NES 394.]

JWST 397 The Arab-Israeli Conflict in Historical and Critical Perspective (also NES 397 and GOVT 397) Fall. 4 credits, R. Brann.

For description, see NES 397.

JWST 400 Seminar in Advanced Hebrew (also NES 400) Fall. 4 credits. Enrollment limited to 15 students. N. Scharf.

For description, see NES 400.

[JWST 401 Topics in Modern Hebrew Literature (also JWST 401) Spring, 4 credits. Not offered 2002–2003. D. Starr

For description, see NES 401.]

- [JWST 409 Season of Migration (also SOC H 409, RELST 409) Fall. 4 credits. Not offered 2002–2003. S. Toorawa. For description, see SOC H 409.]
- JWST 414 History into Fiction: Nazis and the Literary Imagination (also ENGL 404, COM L 404, GERST 414) Fall. 4 credits. E. Rosenberg.

For description, see ENGL 404.

- JWST 420 Readings in Biblical Hebrew Prose (also NES 420, RELST 420) Fall. 4 credits. G. Rendsburg. For description, see NES 420.
- JWST 422 Dead Sea Scrolls (also RELST 422, NES 422)

Spring. 4 credits. G. Rendsburg. For description, see NES 422.

**[JWST 446 History of Jews in Modern France (also HIST 417, FRLIT 413)** Fall. 4 credits. Not offered 2002–2003. V. Caron. For description, see HIST 417.]

JWST 453 History of Modern German

Jewry: From the Enlightenment to the Post-1945 Era (also HIST 433, GERST 433) Spring. 4 credits. V. Caron.

For description, see HIST 433.

JWST 458 Imagining the Holocaust (also JWST 658, ENGL 458/658, GERST 457/657)

Spring. 4 credits. D. Schwarz. For description, see ENGL 458.

- [JWST 474 Topics in Modern Europe: Intellectual and Cultural History (also HIST 474, COM L 474) Fall. 4 credits. Not offered 2002–2003. D. LaCapra. For description, see HIST 474.]
- JWST 478 Jewish-American Writing (also AM ST 473, ENGL 479) Fall. 4 credits. J. Porte.
- For description, see ENGL 479
- JWST 491-492 Independent Study-Undergraduate

Fall and spring. Variable credit. Staff.

JWST 493 Cosmopolitan Alexandria (also S HUM 411, NES 493, COM L 406) Fall. 4 credits. D. Starr.

For description, see NES 493.

- **JWST 499 Independent Study—Honors** Fall and spring. Variable credit. Staff.
- JWST 658 Imagining the Holocaust (also JWST 458, ENGL 458/658) Spring. 4 credits. D. Schwarz.

For description, see ENGL 458/658.

### Courses not offered 2002-2003.

- JWST 197 Introduction to the Near Eastern Civilization (also NES 197 and RELST 197)
- JWST 123–124 Elementary Biblical Hebrew I & II (also NES 123–124, RELST 123–124)
- JWST 223 Introduction to the Bible (also NES 223 and RELST 223)
- JWST 224 Introduction to the Bible II (also NES 224, RELST 224)

- JWST 694 Joyce's Ulysses and the Modern Tradition (also ENGL 670)

### JOHN S. KNIGHT INSTITUTE FOR WRITING IN THE DISCIPLINES

The director of the John S. Knight Institute is Jonathan Monroe, associate dean of the College of Arts and Sciences, professor in the Department of Comparative Literature, and George Elliott Reed Professor of Writing and Rhetoric. Katherine Gottschalk, senior lecturer in the Department of English, is the Walter C. Teagle Director of First-Year Writing Seminars. The Institute's offices are in 159 Goldwin Smith Hall, 255–4061.

M. Gilliland (Writing Workshop), K. Hjortshoj (Writing in the Majors), S. Donatelli (Sophomore Writing Seminars), B. LeGendre (Writing Workshop), J. Martin (Writing Workshop), J. Pierpont (Writing Workshop), E. Shapiro, (Writing Workshop).

The John S. Knight Institute helps to coordinate the teaching of writing for undergraduates in six of the university's schools and colleges (the School of Industrial and Labor Relations and the colleges of Agriculture and Life Sciences; Architecture, Art, and Planning; Arts and Sciences; Engineering; and Human Ecology). The program administers writing seminars for first-year and upperclass students, tutorial writing classes, and seminars in the teaching of writing. More than thirty academic departments and programs participate in the program.

### **First-Year Writing Seminars**

For first-year students the Institute offers the first-year writing seminars—more than 125 different courses in the humanities, social sciences, expressive arts, and sciences. Through introductory work in a particular field of study, seminars help students write good English expository prose—prose that, at its best, is characterized by clarity, coherence, intellectual force, and stylistic control. All , seminars pursue this common aim through small classes, with a maximum of 17 students, and adherence to a program-wide set of guidelines:

- Seminars require at least six—and at most 12—formal essays on new topics. (While these assignments should total about 30 pages, some of the 30-page total may include major drafts which receive commentary from the instructor and are later significantly revised.) Assignments form a logical sequence.
- At least three of the 6–12 required essays are developed through several stages of revised drafts under the instructor's guidance. Guidance may include, in addition to written commentary on drafts, individual conferences, in-class group work, peer commentary, reading responses, journals, and so on.
- Ample classroom time is spent on work directly related to writing.
- Reading assignments in the course subject are kept under 75 pages per week to permit regular, concentrated work on writing.
- All students meet in at least two individual conferences with the instructor.

Offerings change from semester to semester. Each term's first-year writing seminars are described in a brochure available from college registrars in the fall and on the web in the spring.

To ensure that students will enjoy the benefits of small writing classes, first-year writing seminars are limited to no more than 17 students. Instead of pre-enrolling in their writing courses, students request placement in one of five writing seminars by filling out ballots available from their college registrars in the fall and on the web in the spring. Over 90 percent receive one of their top three choices. Students may change their writing seminars each semester at the First-Year Writing Seminar Exchange. Changes can also be made at special First-Year Writing Seminar add/drop sessions held during the first two weeks of each semester. The colleges and the school served by the Institute accept first-year writing seminars in fulfillment of their individual graduation requirements in categories referred to variously as "first-year writing," "oral and written expression," and the like. The Institute does not decide whether students may graduate: it makes courses available. Individual colleges and schools administer their own graduation requirements.

Currently, most undergraduate students are required to take two first-year writing seminars. Architecture majors, however, need only one. Hotel students fulfill their requirement through H ADM 165, which should be taken with H ADM 265 during the first two semesters at Cornell. Agriculture and Life Sciences students can take first-year writing seminars or choose from among a variety of other courses to fulfill their requirement.

All students who score "4" or "5" on the Princeton Advanced Placement Examination in English receive three credits. Such credits are awarded automatically; no application to the John S. Knight Institute or the Department of English is necessary. How these credits may be applied to first-year writing or other distribution requirements depends on the student's college and score. All students who score "5," except Architecture majors, may apply their three credits towards the writing requirements of their college. Of students who score "4," only Agriculture and Life Sciences students and Industrial and Labor Relations students may apply their three credits toward the writing requirements of their college. Students should always consult their college registrars to be certain that they understand their writing requirements.

Students who have already taken a first-year writing seminar, or who score "4" or "5" on the Princeton AP exam, or "700" or better on the English Composition or CEEB tests, may enroll, space permitting, in the following upper-level first-year writing seminars: ENGL 270, 271, or 272.

Although there are no exemptions from college writing requirements, some students may fulfill all or part of their college's writing requirement through transfer credits or writing-course substitutions.

For work done at other institutions to be accepted as equivalent to first-year writing seminars, students should demonstrate that they have done a reasonably equivalent amount of writing in a formal course. (It is not sufficient to write, for example, one 30-page term paper.) Students in the College of Engineering and the College of Arts and Sciences must file an "application for transfer evaluation" to request writing credit for such courses; students in other colleges should consult their college registrars.

In unusual circumstances, upper-level students may petition to use a Cornell writing course other than a first-year writing seminar to satisfy part of their writing requirement. The John S. Knight Institute must approve all such petitions in advance.

For information about the requirements for first-year writing seminars and descriptions of seminar offerings, consult the John S. Knight Institute brochure, available from college registrars in August for the fall term and on the web in late October for the spring term.

#### English 288–289: Expository Writing

English 288-289, "Expository Writing," helps students write with more confidence and skill in all disciplines. Open to Cornell sophomores, juniors, and seniors, ENGL 288-289 courses explore themes shaped by a genre or use of expository writing, by the common concerns of several disciplines, or by an interdisciplinary topic intimately related to the written medium. Although English department instructors make up roughly half the staff, the Knight Institute's involvement enables the course to extend and diversify its offerings in separately defined, 16-member sections that appeal to the varied interests and needs of students in many areas of study. Students may choose among a variety of sections focusing on such themes as "Minding the Body," "The Essay: Personal to Public," "Issues, Audiences, and Ourselves," "Reading the News, Understanding the Media," and "Myths of the City. All staff are selected because their special interests and their training and experience in First-Year Writing Seminars promise original course design and superior performance.

#### Sophomore Seminars

In fall 2001, the Knight Institute launched the first set of courses in its Sophomore Seminars initiative, a distinctive new tier of electives sponsored by the Institute that involve a wide range of disciplines across the Arts College and the University. Building on the introductory exposure to discipline-specific approaches to writing gained by students in their two required First-Year Writing Seminars, Sophomore Seminars will offer students the opportunity to benefit from early mentoring experiences in small, faculty-taught classes that will help them prepare for the more advanced, increasingly specialized work in which they will be engaged in their chosen fields as juniors and seniors. With a limited enrollment of 15 students per class, each Sophomore Seminar is intended to serve as a gateway course to a particular major within an expressly interdisciplinary context. The first six Sophomore Seminars were offered in academic year 2001-2002. Additional seminars will be offered each year, with a total of 30 seminars annually by 2006.

### Writing in the Majors

Spanning the humanities, social sciences, and sciences, the Knight Institute's upper-level, Writing in the Majors courses do not satisfy formal writing requirements, and faculty participation is entirely voluntary. While all Writing in the Majors courses include extensive writing, usually with guided revision, they also emphasize other forms of active, interactive learning essential to scholarship and careers in the disciplines. Writing in the Majors initiatives have included individual and collaborative research projects. collaborative writing, oral presentations, group oral exams, field studies, authentic studentdesigned laboratory experiments, debates, analytical and critical reading exercises, topical symposia, conversation groups, student-led discussions, poster sessions, and many kinds of informal writing, including online exchanges. Varying radically in design and size, from enrollments of fewer than 10 students to more than 300, Writing in the Majors courses over the past thirteen years have involved collaboration with 100 faculty members and more than 150 graduate teaching assistants to enrich learning in 63 upper-level courses offered in 22 departments.

#### **Teaching Writing**

Each summer and fall, the Institute offers instruction in the teaching of writing to new staff members in the first-year writing seminars and other interested instructors. Teaching Writing, offered in the summer or fall, is primarily a course for graduate students. The program also sponsors a summer apprenticeship program for a limited number of graduate students, and a summer seminar for faculty members interested in the teaching of writing.

#### WRIT 700 Teaching Writing

Summer and fall. 1 credit. S-U grade only. Teaching Writing introduces new instructors of Cornell's First-Year Writing Seminars to the challenges of teaching writing in courses that both introduce students to particular fields of study and develop the sophisticated writing skills students will need throughout their undergraduate careers and beyond. An overview of methodologies involved in the teaching of writing within a disciplinary context is provided by readings representing a range of pedagogical theories and practices, seminar discussions, and presentations of faculty, visiting scholars in the field, and experienced TAs. Participants in the course prepare written assignments designed to prepare them for the actual work of their First-Year Writing Seminars. In addition, written critiques and explanatory rationales of those assignments provide an opportunity for reflection on the methods chosen and on the principles underlying them.

### Writing Workshop

The John S. Knight Institute offers "An Introduction to Writing in the University" for first-year students (or transfer students needing writing credit) through the Writing Workshop. This course is designed for students who have had little training in composition or who have serious difficulty with writing assignments.

WRIT 137 and 138 are graded S-U only, and students receiving a grade of S are granted credit toward their college writing requirements. Students who think this course might be appropriate, including non-native speakers of English scoring less than 600 on the Test of English as a Foreign Language (TOEFL), should attend the assessment sessions offered by the Writing Workshop during orientation week each fall. The Workshop also offers a Walk-In Service (see below) to help students work on writing assignments. The director is Joe Martin, senior lecturer in the Writing Workshop. The Workshop offices are in 174 Rockefeller Hall, 255–6349.

### The Walk-In Service

Through the Walk-In Service, the Writing Workshop offers tutoring assistance in writing to any student who needs help with a writing project. The Walk-In Service has tutors available during the academic year in 174 Rockefeller and north- and west-campus residential areas. The director is Mary Gilliland. For information contact the Writing Workshop, 174 Rockefeller Hall, 255–6349.

#### WRIT 137–138, 134 An Introduction to Writing in the University

137, fall; 138, spring; 134, summer. 3 credits each term. Each section limited to 12 students in the fall and spring, 6 students in the summer. S-U grades only. Prerequisite: permission of instructor. This writing seminar is designed for students who need more focused attention to master the expectations of academic writing. The course emphasizes the analytic and argumentative writing and critical reading essential for university-level work. With small classes and weekly student/teacher conferences, each section is shaped to respond to the needs of students in that particular class.

#### WRIT 139-239 Special Topics in Writing

Fall, spring. 139, undergraduate students only; 239, graduate students only. 3 credits. S-U grades only. Cannot fulfill any writing or distribution requirements.

Prerequisite: permission of instructor. These courses allow students the opportunity to resolve significant writing challenges that have interfered with their academic progress. Students must have ongoing writing projects on which to work. Instruction is in weekly tutorials. Interested students should come to 174 Rockefeller for more information.

The Latin American Studies Program encourages and coordinates faculty and student interests in Latin America. A variety of special lectures, films, and seminars supplement the regular course offerings. Graduate students may pursue a minor in Latin American Studies, while majoring in the field of their choice.

#### **Undergraduate Concentration**

Undergraduate students may fulfill a Latin American Studies Concentration by completing a minimum of 15 credits in Latin American Studies courses combined with language proficiency in Quechua, Spanish, or Portuguese. Latin American courses are offered in the College of Agriculture and Life Sciences; the College of Architecture, Art, and Planning; the College of Arts and Sciences; the College of Human Ecology; the School of Hotel Administration; and the School of Industrial and Labor Relations.

For further information and a current course listing, students should contact the program office at 255–3345, or visit 190 Uris Hall.

#### Latin American Studies Core Courses

It is strongly recommended that undergraduate concentrators take the interdisciplinary core course, SPANL 320/LASP 301/ANTHR 340 Perspectives on Latin America.

Particular attention is drawn to the following courses that students have taken in the past to complete requirements for the undergraduate concentration or the graduate minor. Other courses may be substituted with the approval of the adviser.

### ANTHR

204	Ancient Civilizations
333	Ethnology of the Andean Region
340	Perspectives on Latin America
355	Archaeology of Mexico and Central America
382	Latin America: An Anthropological Perspective
433	Andean Ethnology Thought and Culture
456	Mesoamerican Religion, Science, and History
485/685	Mothers, Priests, Rebels and Indian Chiefs: New Social Movements in Latin America
487	Field Research Abroad—Cornell- Honduras Program

### LATINO STUDIES PROGRAM

#### 434 Rockefeller Hall

The Latino Studies Program is an interdisciplinary academic program that focuses on the contributions, concerns, and welfare of those persons of Latino origin who reside in the United States. It includes support for historical, linguistic, literary, social, economic, and political studies of this diverse group of Americans. To this end the program objectives are (1) to expand the available course curriculum by providing both undergraduate and graduate courses pertaining to Latino subject matters; (2) to enlarge the size of the Latino faculty at Cornell through permanent appointments visiting scholars, and postdoctoral fellowships; and (3) to enhance the academic environment on campus through support of such activities as lectures, conferences, seminars, exhibits, and research activities.

#### **Undergraduate Concentration**

The Latino Studies Program offers an undergraduate concentration in Latino Studies which consists of an interdisciplinary course of study primarily in history, sociology, anthropology, literature and language. To complete the concentration, students must take at least five courses (minimum total of 15 credits) in Latino Studies, including "Latinos in the United States" (LSP 201/SOC 265) offered each spring semester. Students are required to include at least two courses at the 300 or 400 levels. Students who are interested in the concentration must meet with the LSP adviser, senior lecturer Loretta Carrillo, and file an application with the Latino Studies Program office by the beginning of their junior year. A maximum of one independent study, which requires the approval of the LSP adviser, will be accepted to fulfill the requirements of the concentration. The FWS does not count towards fulfilling concentration requirements. Courses must be completed with a letter grade of C or above.

#### **Graduate Minor**

Students wishing to complete a graduate minor in Latino Studies need to formally register with the Latino Studies Program office, take an upper level seminar (400/600) tentatively entitled "Introduction to Latino Studies: History and Methodologies," and work intensively with a faculty member outside of their major field. Over the course of their study they will be expected to take two other Latino Studies graduate or advanced undergraduate courses outside of their major field. In lieu of available courses, the student and his or her minor field adviser may design a special project that culminates in a paper given at a conference or presented for publication. Each special project requires the approval of the director of graduate studies for the minor field. In addition, graduate students will participate in the annual Latino Studies Colloquium. Upon completion of the minor, students receive a Certificate from the program. Students wishing to pursue the Graduate Minor Field in Latino Studies must file an application at the Latino Studies Program, 434 Rockefeller Hall.

#### Library

The Latino Studies Program Resource Center in 432 Rockefeller Hall serves Cornell students, faculty, staff, and the wider local community. The Resource Center maintains print and media material pertinent to U.S. Latino issues and also provides a meeting space for more than 25 Latino student organizations.

#### Courses

#### LSP 100 Introduction to World Music: Africa and the Americas (also MUSIC .103)

Spring. 3 credits. 1 hour discussion. M W 10:10–11:00. S. Pond.

Exploration of folk, popular, and traditional genres of the Western Hemisphere, particularly the African diaspora. The course examines both the elements of musical styles and the features of society that influence music. Listening assignments are major components of the course.

#### [LSP 110 Introduction to American Studies: New Approaches to Understanding American Diversity: The Twentleth Century (also AM ST 110 And HIST 111)

4 credits. Not offered 2002–2003. M. C. Garcia.

This course examines American national life in the twentieth-century and asks questions about the changing meaning of national identity. What does it mean to be an American in the twentieth century? What does it mean to assimilate? Can on assimilate structurally and yet maintain a distinct cultural identity? In what ways do racial and ethnic perceptions structure political, economic, and cultural life? This is a team-taught interdisciplinary course in which students analyze historical, literary, and cultural evidence in exploring these and other issues.]

#### LSP 201 Latinos in the United States (also SOC 265 and RSOC 265)

Spring. 4 credits variable. T R 2:55-4:10. H. Velez.

Exploration and analysis of the Hispanic experience in the United States. An examination of sociohistorical background and economic, psychological, and political factors that converge to shape a Latino group identity in the United States. Perspectives are suggested and developed for understanding Hispanic migrations, the plight of Latinos in urban and rural areas, and the unique problems faced by the diverse Latino groups. Groups studied include Mexican Americans, Dominicans, Cubans, and Puerto Ricans.

#### LSP 202 Spanish for English/Spanish Bilinguals (also SPANR 200)

Fall and spring. 3 credits. T R 11:40–12:55. N. Maldonado-Mendez.

A course designed to expand bilingual student's knowledge of Spanish providing them with ample opportunities to develop and improve each of the basic language skills.

#### [LSP 203 Comparative Migration to the Americas (also HIST 202 and AM ST 204)

4 credits. Not offered 2002-2003. M. C. Garcia.

This seminar examines migration both within and to the Americas in the nineteenth and twentieth centuries. Topics discussed include the reasons for population movements; immigration policies; social, economic, and political accommodation; nativist and restictionist responses; and women and migration, remittances, and transnationalism. Among the immigrant-receiving nations studied are Argentina, Brazil, Canada, Cuba, Mexico, and the United States.]

#### LSP 219 Mexican Immigration to the United States (also HIST 219, AM ST 219, LASP 215)

Spring. 4 credits. T-R 11:25-2:40. J. Cardenas.

This seminar course explores the historical and contemporary conditions and expressions of Mexican immigrants in the twentiethcentury. We discuss issues such as: the history of the Southwest; historical ideologies and theories of immigration and national identity; socio-economic conditions; cultural displays of identity; the politics of Mexican immigration and activism; adaptation and resistance of Mexican immigrants and their children to "mainstream" culture; economic and social policies and their effects upon the Mexican immigrant communities; and trans-national identities and globalization.

#### LSP 220 Sociology of Health and Ethnic Minorities (also R SOC 220)

Fall. 3 credits. T-R 10:10–11:25. P. Parra. Discusses the health status of minorities in the United States. Specifically, we explore intragroup diversity such as migration, economic status, and the influence of culture and the environment on health status and access to health care. Although special attention is given to Latino populations, discussion encompasses other minorities who face similar problems.

#### LSP 221 Anthropological Representation: Ethnographies on Latino Culture (also AM ST 221, ANTHRO 221)

Fall. 3 credits. T R 11:40–12:55. V. Santiago-Irizarry.

Representation is basic to anthropology. In translating cultures, anthropologists produce authoritative representations of and about other people's lives. In this course, we examine with a critical eye, the production of representations about U.S. Latino cultures, as they are embodied in anthropological texts. Issues explored include the relation between the ethnographer and the people he or she is studying, the contexts in which ethnographic texts are produced, and the way they may position different cultural groups within the larger national context.

#### LSP 225 The U.S.-Mexico Border: History, Culture, Representation (also HIST 225)

Spring. 4 credits. T R 1:25–2:40. R. Craib, M. C. Garcia.

A writing-intensive, interdisciplinary sophomore seminar on the U.S.-Mexico border. The study of borders, and specifically of the U.S.-Mexico border, requires us to cross the disciplinary and methodological borders of academe itself. The proliferation of provocative writings on the border in recent years bears this assumption out: in no other field of study has the literature been so remarkably interdisciplinary, so methodologically eclectic, nor so theoretically provocative. This seminar intends to tap that literature to help students analyze and understand the histories, cultures and representations of the border that are so important to contemporary self-fashioning and policy-making in the United States and Mexico. Readings include works of fiction. literary and cultural theory, history, science studies, and postcolonial criticism. Students can expect to write several papers of varying lengths that develop their skills in historical research and textual criticism.

#### [LSP 240 Survey in U.S. Latino Literature (also ENGL 240)

4 credits. Not offered 2002–2003. M. P. Brady.]

#### LSP 246 Contemporary Narratives by Latina Writers (also SPANL 246, WOMNS 246)

Fall. 3 credits. T-TH 1:25-2:40. L. Carrillo. This course offers a survey of narratives by representative Latina writers of various Latino ethnic groups in the United States including Chicana, Chilean, Cuban, Dominican, and Puerto Rican. We investigate the parallel development of a Latina perspective on personal, social and cultural issues alongside that of the U.S. ethnic liberation/revitalization movements of the 1960s through to contemporary feminist activism and women of color movements. We investigate these works as artistic attempts to deal with such issues as culture, language and bilingualism, family, gender, sexuality, and domesticity. We account for regional distinctions and contributions. Readings include works by Julia Alvarez, Gloria Anzaldúa, Elena Castedo, Ana Castillo, Denise Chavez, Sandra Cisneros, Judith Ortiz Cofer, Cristina García, Nora Glickman, Nicholasa Mohr, Cherrie Moraga, Archy Obejas, Esmeralda Santiago, Ana Lydia Vega, and Helena María Viramontes.

#### LSP 258 U.S. Culture and Mexican Americans, 1848-Present (also HIST 258, AM ST 257)

Fall. 4 credits. T R 1:25–2:40. J. Cardenas. This course explores the different political and cultural interactions between dominant ideologies of nationalism, race, and ethnicity in the United States, and Mexican Americans. We explore these questions of national identities in conjunction to gender, class, and political discourses, and use both primary sources and secondary sources in our course.

#### [LSP 260 Introduction to U.S. Latino History, Part I (also HIST 260, AM ST 259)

4 credits. Not offered 2002–2003. M. C. Garcia.]

#### [LSP 261 Introduction to U.S. Latino History, Part II (also HIST/AM ST 261)

4 credits. Not offered 2002–2003. M. C. Garcia.

This course, part II of a two-semester sequence, introduces students to the history of Latinos in the United States. In LSP/HIST/AM ST 261 we focus on Puerto Ricans, Cubans, and the Dominicans in the United States. (LSP/HIST 260; AM ST 259 focuses on Mexican Americans/Chicanos and Central Americans). Among the topics addressed are: historical immigration patterns and reasons for migration; the social and political events that shaped the evolution of these communities; the role of cultural identity, race, class, and gender in shaping experience; and the intersection of U.S. foreign policy and immigration policy.]

#### [LSP 319 Minority Politics in the United States (also GOVT 319)

4 credits. Not offered 2002-2003.

M. Jones-Correa.

In 1965 the landscape of American politics changed dramatically with the passage of the Voting Rights Act. That same year, Congress passed the Immigration Reform Act, which though little heralded at the time, arguably has had equally profound effects. This course provides a general survey of minority politics in the United States, focusing on the effects of these two key pieces of legislation. The course highlights the relationships between immigrants and minorities, electoral politics and protest politics, and between cooperation and competition within and among minority groups. The purpose of the course is not only to pinpoint the similarities and differences in the agendas and strategies adopted by minority groups, but to indicate the interaction between "minority" politics and American politics as a whole.]

#### [LSP 366 Spanish in the United States (also LING 366 and SPANR 366)

4 credits. Prerequisite: some knowledge of Spanish. Not offered 2002–2003. M. Suner. This course provides an examination of major Spanish dialects in the United States from a linguistic perspective. Contrast is made to the standard language. Topics include borrowing, interference, and code switching. Special emphasis is on syntactic, morphological, and phonological characteristics.]

#### [LSP 377 The United States (also ANTHR/AM ST 377)

4 credits. Not offered 2002–2003. V. Santiago-Irizarry.

The anthropological inquiry into one's culture is never a neutral exercise. This course explores issues in the cultural construction of the United States as a "pluralistic" society. We look at the ideological context for the production of a cultural profile predicated upon ideas that are intrinsic to American images of identity such as individualism, freedom, and equality and the way these are applied in practice. The course readings include historic documents and accounts, popular writings, and recent ethnographies on the United States.]

#### LSP 386 Third Cinema (also FILM 386)

Spring. 4 credits. Prerequisite: previous course in film history or anlaysis helpful, though not mandatory. Time/day TBA. A. Villareio.

This course explores postcolonial film and video through the rubric of "third cinema." We investigate the diverse historical, national, political, and generic commitments of films from Africa, South Asia, U.S. Latino, Latin America, and the United Kingdom. Readings in film and poscolonial theory guide our critical analyses of the film.

#### [LSP 396 U.S. Latino Prose Fiction (also SPANL 396)

4 credits. Conducted in Spanish. Not offered 2002–2003. D. Castillo.]

# LSP 398 Latino/a Cultural Practices (also ENGL 398)

Spring. 4 credits. M W 2:55-4:10. M. P. Brady.

This course explores Latino/a cultural work ranging from 'zines to comic books, architecture to film, music to sculpture, musicals to spoken word, theater to Internet sites. We consider how this work emerges in the context of U.S. engagements with Latin America and in the context of struggles for social and economic equality among ethnoracial groups in the U.S. We consider therefore the production of stereotypes (particularly in the nineteenth century) and the ongoing efforts of contemporary artists to dispel such stereotypes, to work along side them and to rework them. We also consider the relationship between cultural production, representation, and public policy. U.S. Latino/ a history is strongly recommended as a prerequisite, but not required.

# [LSP 403 After Immigration (also S HUM 403, SPAN L 403)

4 credits. Not offered 2002–2003. D. Castillo.

Beginning with a close reading of Michael Jones-Correa's seminal study of Latinos in New York, Between Two Nations, we focus class discussion on recent Latin American immigration to the United States through two complementary perspectives and mediations on the immigrant experience: that of the individuals who have arrived in the U.S., and that of individuals who have chosen to remain in the countries of origin. The class studies films like Neuva Yol and Jardin de Eden, Latin American authors like Carlos Fuentes, Ana Lydia Vega, and Ariel Dorfman, and U.S. Latinos like Julia Alvarez, Francisco Goldman, and Cristina Garcia. Students are encouraged to do individually-tailored research projects that may include autobiographical or ethnographic elements as well as literary analysis and theoretical inquiries.]

#### [LSP 406 The Immigrant City: 1900–2000 (also S HUM 406, AM ST 406, HIST 412)

4 credits. Not offered 2002–2003. M. C. Garcia.]

#### LSP 420/421 Undergraduate Independent Study

Fall and spring. 2–4 credits. Permission of instructor.

Guided independent study.

#### LSP 424/624 Ethnoracial Identity in Anthropology, Language, and Law (also ANTHR 424/624)

Spring, 4 credits. Time/day TBA. V. Santiago-Irizarry.

This course will examine the role that both law and language, as mutually constitutive mediating systems, occupy in constructing ethnoracial identity in the United States. We will approach the law from a critical anthropollogical perspective, as a signifying and significant sociocultural system rather than as an abstract collection of rules, norms, and cultural production and reproduction that contribute to the creation and maintenance of differential power relations. Coruse material will draw on anthrpological, lilnguistic, and critical race theory as well as ethnographic and legal material to guide and document our analyses.

#### LSP 430 Immigrants, Membership and Citizenship (also GOVT 427, AM ST 430.4)

Fall. 4 credits. T 10:10-12:05.

M. Jones-Correa.

Immigrants are increasingly important players in the politics and economies of industrialized societies. However, in many cases despite their residence in these societies, their membership and citizenship status is often in question. At times migrants are undocumented, living and working at the fringes of the protections and regulations afforded by the legal system. Or they may petition to enter as refugees, having to prove their right to stay. Even if residing permanently, immigrants may still not be citizens of their receiving country, or if they are, they may have dual nationality. This course explores the complications of membership and citizenship among migrants, refugees and immigrants, focusing largely on immigration to the United States.

ILSP 462 Between Aztian and Queens: Latina Culture in the Making of Space (also ENGL 462) 4 credits. Not offered 2002-2003

M. P. Brady.

How do cultural practices like music and film produce space? What do freeways, zoning laws, advertising codes, and hiking trails have to do with literature? How have changing urban demographics and immigration shaped, even "Latinoized," cities, and how have these changes been reflected or restricted in Latino cultural production? How does paying attention to space change our reading practices? This interdisciplinary course examines these questions and explores how place and space shape Latina cultures and how Latina cultures shape place and space. We draw from scholarship in fields such as urban planning, law, architecture, geography, anthropology, literature, and history. Students should plan to do extensive reading, write two to three papers, and produce a substantial research paper.]

#### [LSP 610 Political Identity: Race, **Ethnicity, and Nationalism (also GOVT 610**

4 credits. Not offered 2002-2003 M. Jones-Correa.

The social sciences generally treat ethnicity, nationalism and race as descriptive categories or variables, while avoiding actually defining these categories, or thinking about how they should be used. How should we go about describing ethnicity, nationalism, and race? Should we treat them as primordial or as social constructions? Much of the recent literature suggests the latter. If constructed, by whom are they constructed (or by what)? What constrains/structures these constructions? What purposes do these constructions serve? Whom do they serve? Are some constructions better representations of identity than others, and what does this mean? How should we go about applying these categories in political analysis?]

#### LSP 620/621 Graduate Independent Study

Fall, spring. 2 to 4 credits. Permission of instructor

Guided independent study.

# [LSP 660 Latino Languages, Ideology, and Practice (also ANTHR 660)

4 credits. Not offered 2002-2003. V. Santiago-Irizarry

Cultural identity and citizenship in the United States have often been organized around linguistic difference and the issues this raises in an English-dominant society. Drawing from anthropological theories on language, this course looks at the place of language as a signifying practice in the United States by focusing on the experience of Latino communities. Topics explored include linguistic diversity and change, accomodation and resistance, language maintenance and shift, linguistic ideologies, the production of language hierarchies, and institutional applications of language.]

#### LSP 693 Gender, Globalization and Latino/a Literature (also ENGL 693)

Fall. 4 credits. M 1:25-3:20. M. P. Brady. It is customary to date globalization as beginning at the end of World War II with the ensuing rapidity of international "development" and "modernization," the proliferation of transnational corporations, the end of the Cold War, and the crafting of the "geopolitical control model" as Venezuelan Sociologist Rosa del Olmo terms it. Alternatively, globalization might be dated to the development of a mercantile system centered upon slavery. Such a contrapuntal account offers a reminder that what Anthony Giddens calls global capitalism's "emerging world market in labour" or what Rhacel Parrenas refers to as the new "international division of reproductive labor" has perhaps a longer history. This definition also has the advantage of drawing into the conversation about globalization a broader spectrum of public intellectuals including Phyllis Wheatley, Herman Melville, José Martí, Maria Amparo Ruiz de Burton, Ignacio Bonilla, and other nineteenth century thinkers. This course begins by studying their insights into the production of (racialized) gender within a world-labor-market system and then narrow its focus to concentrate on the particular analysis provided by Latino/a writers and artists including Denise Chavez, Hector Tobar, Francisco Goldman, Reinaldo Arenas, Alma Lopez, Ana Mendieta, Dianne Gamboa, and Laura Alvarez. Each offers a critique of socio-economic change through the lens of gender by complicating the notions of flexible citizenship and cosmopolitanism championed by many theorists of globalization (whom we also study, including Ong, Sassen, Castells, Giddens, Massey, Cheah, Sub. Marcos, and others). Put differently, this course analyzes how many Latina/o authors, and their precursors, illustrate the fissures and faultlines of a neoliberalism emerging as a new form of civilization.

### LAW AND SOCIETY

M. Fineman, co-director, 208 Myron Taylor Hall, 255-2622, fineman@law.mail.cornell.edu; Anna Marie Smith, co-director, 161 McGraw Hall, 255-2708, ams3@cornell.edu, D. A. Dunning (psychology), G. Hay (economics), P. Hyams (history), R. Lieberwitz (ILR), R. Miller (philosophy), M. B. Norton (history), R. Polenberg (history), D. Powers (Near Eastern studies), J. Rabkin (government), V. Santiago-Irizarry (anthropology), P. Sawyer (english), H. Shue (ethics and public life)

The Law and Society Program offers an interdisciplinary concentration for undergraduates who are interested in the law from the perspectives of the social sciences and the humanities: anthropology, comparative literature, economics, government, history, philosophy, psychology, science and technology studies, and sociology. Students who wish to graduate with a concentration in law and society are strongly encouraged to apply in the fall of their junior year to allow ample time to fulfill the event attendance requirement. Applications will not be accepted after the fall semester of a student's senior vear

Upon submission of a completed application, each student will receive email confirmation of their acceptance into the concentration and a Law and Society Advisor will be assigned. Advisors help to plan a coherent program of study made up of four of the approved courses. At least two of the courses should fall outside the student's major and only two can be within the same subject area. Particular attention is drawn to GOVT 313 and PSYCH 265, which past students have often taken.

Courses not currently on the list may be substituted with approval of the advisor.

All students must attend at least four Law and Society sponsored events. Each student in the program will be added to an email list through which event announcements and other pertinent information will be circulated. The Law and Society Program is an activity of the Program on Ethics and Public Life. Inquiries can be directed to: the EPL Administrative Assistant, 240 Goldwin Smith Hall, 255-8515, epl@comell.edu.

# LESBIAN, BISEXUAL, AND GAY STUDIES

- D. Bem, S. Bem, A. Berger, M. P. Brady,
- B. Correll, J. Culler, I. DeVault, N. Furman,
- J. E. Gainor, I. V. Hull, M. Jacobus, K. Jones,
- M. Katzenstein, T. Loos, K. March,
- S. McConnell-Ginet, K. McCullough,
- T. Murray, M. B. Norton, J. Peraino, J. Piedra, R. Savin-Williams, R. Schneider, A. M. Smith,
- A. Villarejo, R. Weil, A. Wilford

The field of Lesbian, Bisexual, and Gay Studies is devoted to the interdisciplinary study of the social construction of sexuality. LBG Studies is founded on the premise that the social organization of sexuality is best studied from the perspectives offered by those positions that have been excluded from established cultural norms.

In addition to offering a graduate minor, the field of LBG Studies offers an undergraduate concentration, which is administered under the auspices of the Women's Studies Program and which consists of four courses from the list below. Although most of the courses in LBG Studies (including those on men) generally fall under the aegis of the Women's Studies Program and are hence crosslisted with it, not all of the courses in Women's Studies are sufficiently focused enough on the social construction of sexuality per se to be part of the LBG Studies concentration. In order to qualify for the concentration, courses must devote a significant portion of their time to sexuality and to questioning the cultural and historical institution of exclusive heterosexuality. Students selecting their four courses from the LBG Studies subset must identify their concentration as either LBG Studies or Women's Studies; they cannot

same courses for both concentrations. Students interested in the LBG Studies

concentration should contact the Lesbian, Bisexual, and Gay Studies Office in 379 Uris Hall.

#### Courses

ANTHR 200 Cultural Diversity and Contemporary Issues Fall. 3 credits. A. Wilford. For description, see ANTHR 200.

ANTHR 321/621 Sex and Gender in Cross-Cultural Perspective (also WOMNS 321/631) Fall. 4 credits. K. March.

For descriptions, see ANTHR 321/621.

- ENGL 178 FWS: Queer Theory (also WOMNS 178) Spring. 3 credits. E. Hanson. For description, see ENGL 178.
- **ENGL 276 Desire (also WOMNS 276)** Spring. 4 credits. E. Hanson. For description, see ENGL 276.
- [ENGL 278 Queer Fiction (also WOMNS 279)
- Not offered 2002–2003. E. Hanson.] IENGL 327 Shakespeare: Gender and
- Society (also WOMNS 327) Not offered 2002–2003. B. Correll.]

**ENGL 355 Decadence (also WOMNS 355)** Fall. 4 credits. E. Hanson. For description, see ENGL 355.

[ENGL 395 Video: Art, Theory, Politics (also THETR 395) Not offered 2002–2003. T. Murray.]

[ENGL 424 Studies in Renaissance Lyric Not offered 2002–2003. B. Correll.]

[ENGL 608 Seminar in Cultural Studies: Race, Drugs and Gender Not offered 2002–2003. M. P. Brady.]

ENGL 651 The Sexual Child (also WOMNS 651) Fall. 4 credits. E. Hanson.

For description, see ENGL 651.

[ENGL 654 Queer Theory (also WOMNS 654 and COM L 654) Not offered 2002–2003. E. Hanson.]

- [ENGL 655 Decadence (also WOMNS 656 and COM L 655) Not offered 2002–2003. E. Hanson.]
- [ENGL 660 Cinematic Desire (also AM ST 662 and WOMNS 661) Not offered 2002–2003. E. Hanson.]
- [ENGL 703 Theorizing Film: Race, Nation, and Psychoanalysis (also FRLIT 695) Not offered 2002–2003. T. Murray.]
- [FRLIT 493 French Feminisms (also wOMNS 493) Not offered 2002–2003. N. Furman.]
- [GERST 413 The Women around Freud Not offered 2002–2003. B. Martin.]
- [GERST 614 Gender at the Fin-de-siècle Not offered 2002–2003. B. Martin.]

[GOVT 353 Feminist Movements and the State (also WOMNS 353) Not offered 2002–2003. M. Katzenstein.]

### 568 ARTS AND SCIENCES - 2002-2003

[GOVT 415 Race, Gender, and Organization (also WOMNS 415) Not offered 2002–2003. M. Katzenstein and J. Reppy.]

GOVT 467 Radical Democratic Feminisms (also WOMNS 468) Spring. 4 credits. A. M. Smith. For description, see GOVT 467.

[GOVT 762 Sexuality and the Law (also WOMNS 762) Not offered 2002–2003. A. M. Smith.]

HD 284 Introduction to Sexual Minorities (also WOMNS 285) Fall. 3 credits. R. Savin-Williams. For description, see HD 284.

HD 464 Sexual Minorities and Human Development (also WOMNS 467) Spring. 4 credits. R. Savin-Williams. For description, see HD 464.

HIST 378 Topics in U.S. Women's History (also WOMNS 378) Fall. 4 credits. M. B. Norton.

For description, see HIST 378.

[HIST 480 Gender Adjudicated (also ASIAN 488 and WOMNS 480) 4 credits. Not offered 2002–2003. T. Loos.]

HIST 626 American Women's History (also WOMNS 626) Fall, 4 credits, M. B. Norton.

For description, see HIST 606.

LING 244 Language and Gender (also WOMNS 244)

Fall. 4 credits. S. McConnell-Ginet. For description, see LING 244.

[MUSIC 492 Music and Queer Identity

(also WOMNS 494) 4 credits. Not offered 2002–2003.

J. Peraino.]

[PSYCH 277 Social Construction of Gender (also WOMNS 277) 3 credits, Not offered 2002–2003, S. Bem.]

PSYCH 450/650 Gender and Clinical Psychology (also WOMNS 450/650) Fall. 4 credits.

For description, see PSYCH 450/650.

[SPAN L 384 Literature and Revolution Not offered 2002–2003. J. Piedra.]

[SPAN L 400 Maricoteoría/Queer Theory Not offered 2002–2003. J. Piedra.]

[THETR 320 Queer Theatre Not offered 2002–2003. J. E. Gainor and D. Matson.]

[THETR 336 American Drama and Theatre (also ENGL 336) Not offered 2002–2003. J. E. Gainor.]

**THETR 339** Theorles and Techniques of Twentieth-Century Western Theatre Spring. 3 credits. R. Schneider. For description, see THETR 339.

[THETR 436 The Female Dramatic Tradition (also WOMNS 433) Not offered 2002–2003. J. E. Gainor.]

[THETR 637 Seminar in Dramatic Theory Not offered 2002–2003. R. Schneider.]

#### WOMNS 211 Introduction to Feminist Theory

Fall. 4 credits. K. McCullough. For description, see WOMNS 211.

[WOMNS 405/605 Domestic Television 4 credits. Not offered 2002–2003. A. Villarejo.]

WOMNS 465 Feminist Theory/Lesblan Theory (also GERST 465 and COM L 465) Spring. 4 credits. A. Villarejo.

For description, see WOMNS 465.

[WOMNS 610 Sexuality and the Politics of Representation (also THETR 610) Not offered 2002–2003. A. Villarejo.]

[WOMNS 621 Lesbian, Gay, Bisexual Studies (also GERST 621) Not offered 2002–2003. B. Martin.]

### LINGUISTICS

S. McConnell-Ginet, acting chair—fall (206 Morrill Hall); J. Bowers, acting chair—spring (214 Morrill Hall); D. Zec, director of graduate studies (219 Morrill Hall); W. Harbert, director of undergraduate studies (210 Morrill Hall); D. Abusch, W. Browne, A. Cohn, C. Collins, M. Diesing, S. Hertz, A. Miller-Ockhuizen, A. Nussbaum, M. Rooth, C. Rosen, M. Suner, M. Weiss, J. Whitman, J. Wolff. Visiting: R. Kim, B. Moren.

Linguistics, the systematic study of human language, lies at the crossroads of the humanities and the social sciences, and much of its appeal derives from the special combination of intuition and rigor that the analysis of language demands. The interests of the members of the Department of Linguistics and linguistic colleagues in other departments span most of the major subfields of linguistics: phonetics and phonology, the study of speech sounds; syntax, the study of how words are combined; semantics, the study of meaning; historical linguistics, the study of language change over time; and sociolinguistics, the study of language's role in social and cultural interactions

Studying linguistics is not a matter of studying many languages. Linguistics is a theoretical discipline with ties to such areas as cognitive psychology, philosophy, logic, computer science, and anthropology. Nonetheless, knowing particular languages (e.g., Spanish or Japanese) in some depth can enhance understanding of the general properties of human language. Not surprisingly, then, many students of linguistics owe their initial interest to a period of exposure to a foreign language, and those who come to linguistics by some other route find their knowledge about languages enriched and are often stimulated to embark on further foreign language study.

Students interested in learning more about linguistics and its relationship to other disciplines in the humanities and social sciences are encouraged to take Linguistics 101, a general overview, which is a prerequisite for most other courses in the field, or one of the first-year writing seminars offered in linguistics (on topics such as metaphor and the science of language). Linguistics 101 and other introductory courses fulfill the social science distribution requirement. Most 100and 200-level courses have no prerequisites and cover various topics in linguistics (e.g., LING 170, Introduction to Cognitive Science; LING 285, Linguistic Theory and Poetic Structure) or focus on the linguistics of a particular geographic region or historical development of particular languages (e.g., LING 217, History of the English Language; LING 239, The Celtic Languages). Some of these courses also fulfill the breadth requirements.

Talks and discussions about linguistics are offered through the Undergraduate Linguistics Forum and the Linguistics Colloquium (sponsored by the department and the Cornell Linguistic Circle). These meetings are open to the university public and anyone wishing to learn more about linguistics is most welcome to attend.

#### The Major

For questions regarding the linguistics major, contact Professor Wayne Harbert (210 Morrill Hall, 255–8441, weh2@cornell.edu).

The prerequisite for a major in linguistics is the completion of LING 101 and either LING 201 or 203. The major has its own language requirement, which should be completed as early as possible: qualification in two languages other than English, one of which must be either non-European or non-Indo-European. With approval of the department's director of undergraduate studies, this requirement may be waived (i.e., reduced to the normal arts college language requirement) for students taking the cognitive studies concentration or a double major.

The other standard requirements for the linguistics major are as follows:

- LING 201 (Introduction to Phonetics and Phonology) or LING 203 (Introduction to Syntax and Semantics), whichever one was not taken as a prerequisite to the major
- 2) LING 314 (Historical)
- 3) Three of the following five courses, one of which must be either Phonology I or Syntax I:

LING 301 (Phonology I)

LING 303 (Syntax I)

LING 309 (Morphology)

LING 319 (Phonetics I)

LING 421 (Semantics I)

- A course at or beyond the 300 level in the structure of English or some other language, or a typological or comparative structure course such as Linguistics 401 or Field Methods (LING 300)
- One additional linguistics course for at least four credit hours, which may be a course with significant linguistic content in a related field.

Some substitutions to these standard requirements are possible after consultation with your adviser and approval by the DUS.

#### Honors

Applications for honors should be made during the junior year or by the start of fall term of the senior year. For further information, please contact the DUS. Candidates for admission must have a 3.0 (B) average overall and should have a 3.2 average in linguistics courses. In addition to the regular requirements of the major, the candidate for honors
will complete an honors thesis and take a final oral examination in defense of it. The thesis is usually written during the senior year but may be started in the second term of the junior year when the student's program so warrants. The oral examination will be conducted by the honors committee, consisting of the thesis adviser and at least one other faculty member in linguistics. Members of other departments may serve as additional members if the topic makes this advisable. LING 493 and 494 may be taken in conjunction with thesis research and writing but are not required.

## **First-Year Writing Seminars**

For descriptions, consult the John S. Knight brochure for times, instructors, and descriptions

## Courses

#### LING 101 Introduction to Linguistics (III)

Fall or spring. 4 credits each term. Fall,

C. Collins; spring, W. Harbert. An introductory course designed to provide an overview of the science of language, especially its theoretical underpinnings, methodology, and major findings. The course focuses on the basic analytic methods of several subfields of linguistics including phonetics, phonology, morphology, syntax, semantics, language variation, language change, and psycholinguistics.

#### LING 109 English Words: Histories and Mysteries (also CLASS 109) # (III) Fall. 3 credits. M. Weiss.

Where do the words we use come from? This course examines the history and structure of the English vocabulary from its distant Indo-European roots to the latest in technical jargon and slang. Topics to be discussed include formal and semantic change, taboo and euphemism, borrowing, new words from old, "learned" English loans from Greek and Latin, slang, and society.

#### [LING 131-132 Elementary Sanskrit (also CLASS 131-132 and SANSK 131-132) Not offered 2002-2003

For description, see SANSK 131-132.]

#### [LING 170 Introduction to Cognitive Science (also COGST 101, COM S 101, PHIL 102, and PSYCH 102)

Not offered 2002-2003 For description, see COGST 101.]

## LING 201 Introduction to Phonetics and Phonology (III) Spring. 4 credits. Prerequisite: LING 101 or

equivalent or permission of instructor. A. Miller-Ockhuizen, B. Moren.

An introduction to the study of human speech sounds and how they pattern in languages. The first part of the course focuses on phonetics: the production, acoustics, and perception of speech, with attention to both the common and the less common sounds of the world's languages. The second part of the course focuses on phonology: how human speech sounds pattern within and across languages, with an emphasis on the rules that govern these patterns and their possible representation.

#### LING 203 Introduction to Syntax and Semantics (III)

Fall. 4 credits. Prerequisite: LING 101 or equivalent or permission of instructor. M. Diesing.

This course focuses on language as a system of knowledge that enables native speakers to create and interpret the structures of their language. Part of the course considers issues of syntactic structure, such as the order of constituents, the hierarchical organization of grammars, and syntactic universals. The other part of the course focuses on meaning and interpretation, addressing such issues as the role of context, how information is structured, and how it is encoded in the syntax.

## [LING 212 Language and Culture (III)

Spring. 3 credits. Not offered 2002-2003; next offered 2003-2004. J. Whitman. We often assume that there is a close relationship between differences in language and cultural variation. This course focuses on that relationship, beginning with an examination of the linguistic relativity hypothesis, which posits a link between basic properties of languages and crosscultural differences in world view. We also examine potential cultural determinants of variation in language: pronouns and honorific systems, systems of ritual and taboo in language, and the impact of narrative organization on grammar. Special attention is paid to 'extreme' forms of language: invented languages from Esperanto to Klingon; glossolalia and trance languages; language games and secret languages.]

## LING 215/715 Psychology of Language (also PSYCH 215) (III)

For description, see PSYCH 215

#### LING 217 History of the English Language (also ENGL 217) # (III or 1V)

Fall. 4 credits. W. Harbert. This course explores the development of the English language from its Indo-European beginnings to the present. Topics covered include changes in sound, vocabulary and grammatical structure, external influences, Old English, Middle English, Standard English, dialects, and World Englishes.

## [LING 236 Introduction to Gaelic

Spring. 3 credits. Not offered 2002-2003. W. Harbert.

This course is an introduction to the history, structure, and current status of the Scottish Gaelic language, oriented around elementary Gaelic texts.]

## [LING 237 The Germanic

Languages (III) Fall. 4 credits. Not offered 2002–2003. W. Harbert, M. Diesing.

This course surveys the history, structure, and use of the modern Germanic languages (English, German, Dutch, Afrikaans, Swedish, Danish, Icelandic, Norwegian, Faroese, and Yiddish).]

#### [LING 238 Introduction to Weish

Fall. 3 credits. Not offered 2002-2003. W. Harbert.

This course surveys the history, structure, cultural, and political situation of the Welsh language. It includes several sessions of elementary language instruction and a brief introduction to Welsh literature.]

## [LING 239/539 The Celtic

Languages (III)

Fall. 4 credits. Graduate students register under LING 539. Not offered 2002-2003. W Harbert.

This course surveys the history, structure, and political and social situation of the Celtic languages (Welsh, Scottish Gaelic, Irish Gaelic, Breton, Cornish, and Manx). The course includes a few days of introductory language instruction in some of these languages.]

## [LING 241 Yiddish Linguistics (also JWST 271) (III)

Fall. 3 credits variable. Not offered 2002-2003; next offered 2003-2004. M. Diesing. This course covers a wide variety of topics relating to the Yiddish language and Yiddish culture, including the structure of Yiddish, the history of the Yiddish language, Yiddish in America (the Yiddish revival, the role of the Yiddish press, etc.), Yiddish as a minority/ dying language, and the influence of Yiddish on present-day American English. No previous knowledge of Yiddish required.]

#### [LING 242 Diversity in American English (III)

Spring. 3 credits. Not offered 2002-2003; next offered 2003-2004. C. Collins. This course is a basic introduction to the regional dialects of English spoken in the United States. It is linguistically oriented, introducing the relevant aspects of phonetics, phonology, morphology, and syntax where appropriate. There is an emphasis on the students discovering what features characterize their own dialects (if they speak American English). The class is also of use as an introduction to American English dialects for nonnative speakers of English.]

# LING 244 Language and Gender (also WOMNS 244) (III)

Fall. 4 credits. For nonmajors or majors. S. McConnell-Ginet.

This course explores connections between language (use) and gender/sex systems, addressing such questions as the following: How do sex and gender affect the ways we speak, the ways we interpret and evaluate speech? How do sociocultural differences in women's and men's roles affect their language use, their relation to language change? What is meant by sexist language? How does conversation structure the social worlds of women and men? Readings draw from work in linguistics, anthropology, philosophy, psychology, literature, and general women's studies and feminist theory.

## LING 246/546 Minority Languages and **Linguistics (III)** Fall. 4 credits. Graduate students register

under LING 546, W. Harbert.

This course examines minority languages from linguistic, social, and political perspectives. Topics discussed include language death (according to some projections, the majority of the world's languages are in danger of becoming extinct by the end of this century), language maintenance efforts and the reasons they succeed or fail, bilingualism, language contact, official languages, linguistic rights, and related issues. A range of specific case studies are introduced, and each student is expected to research and report on aspects of the history, current situation, and future prospects of a minority language of his or her choosing

#### LING 251-252 Intermediate Sanskrit (also CLASS 251-252 and SANSK 251-252) @#

Satisfies language proficiency. For description, see SANSK 251--252

# [LING 264 Language, Mind, and Brain (also COGST 264) (III)

Spring. 4 credits. For nonmajors or majors. Prerequisite: a basic course in linguistics and/or psychology is desirable. Not offered 2002-2003. J. Bowers.

An introductory course that emphasizes the formal structure of natural language and its biological basis. The following topics are covered: the formal representation of linguistic knowledge, principles and parameters of universal grammar, the basic biology of language, mechanisms of linguistic performance, the modularity hypothesis, and language and cognition. This course is especially suited for majors in fields such as psychology, philosophy, computer science, and linguistics (and also for those enrolled in the concentration in cognitive studies) who want to take a one-semester introduction to linguistics that concentrates on the formal principles that govern linguistic knowledge, along with some discussion of their biological realization and their use in perception and production.]

#### [LING 270 Truth and Interpretation (also COGST 270 and PHIL 270) (III)

Not offered 2002-2003. For description, see PHIL 270.]

#### LING 285/585 Linguistic Theory and Poetic Structure (also ENGL 296/ 585) (III or IV)

Fall. 4 credits. Graduate students register under LING 585. J. Bowers.

Poems are among the most highly structured linguistic objects that human beings produce. While some of the devices used in poetry are arbitrary and purely conventional, most are natural extensions of structural properties inherent in natural language itself. The aim of this course is to reveal the ways poetry is structured at every level, from rhyme to metaphor, and to show how certain results of modern linguistics can usefully be applied to the analysis and interpretation of poetry. After introducing some of the basic concepts of modern phonology, syntax, and semantics, it is shown how literary notions such as rhyme, meter, enjambment, and metaphor can be formally defined in linguistic terms. These results are then applied to the analysis of particular poems and shown to yield novel and interesting insights into both their structure and interpretation.

#### [LING 300 Field Methods (III)

Spring. 4 credits. Prerequisites: LING 201 and 203 or permission of instructor. Not offered 2002-2003. Staff.

Elicitation, recording, and analysis of data from a native speaker of a non-Western language not generally known to students.]

#### LING 301-302 Phonology I, II (III)

301, fall; 302, spring. 4 credits each term. Prerequisites: for LING 301, LING 201 or equivalent; for LING 302, LING 301 or permission of instructor. Fall, D. Zec; spring, B. Morén.

301 provides a basic introduction to phonological theory. The first half of the course focuses on basic principles of phonology, patterns of sounds, and their representations. In the second half, the nature of syllable structure and feature representations are explored. 302 provides further refinement of the issues investigated in 301, focusing in particular on metrical theory, Lexical Phonology, autosegmental phonology, and Prosodic Morphology.

## LING 303-304 Syntax I, II (III)

303, fall; 304, spring. 4 credits each term. Prerequisites: for LING 303, LING 203; for LING 304, LING 303 or permission of instructor. C. Collins.

303 is an advanced introduction to syntactic theory within the Principles and Parameters/ Minimalist frameworks. The topics covered include phrase structure, argument structure (unaccusative verbs, unergative verbs, double object constructions), principles of word order, and the binding theory. 304 is a continuation of 303, focusing on syntactic dependencies, including the theory of control, an examination of locality constraints on movement, covert versus overt movement, and the syntax of quantification. The purpose of the course is to develop the background needed for independent syntactic research.

## LING 308 Readings in Celtic Languages

Fall or spring, depending on demand. 2 credits. Prerequisite: permission of instructor. W. Harbert.

Reading/discussion groups in Welsh or Scottish Gaelic.

## LING 309 Morphology (III)

Fall. 4 credits. Prerequisite: LING 101 or equivalent or permission of instructor. B. Moren.

This course addresses the basic issues in the study of words and their structures. It provides an introduction to different types of morphological structures with examples from a wide range of languages. Special emphasis is given to current theoretical approaches to morphological theory.

#### LING 311 The Structure of English: Demystifying English Grammar (also ENGL 313) (III or IV)

Fall. 4 credits. M. Suñer.

Do you suffer from grammatical insecurity? In foreign language classrooms, do you find yourself at a loss because you don't know how grammatical terminology applies to English? This course makes English grammar accessible and comprehensible to native speakers who want to understand how the language they use so easily works. In addition to standard grammatical notions, the course considers dialectal variation, matters of style, how sentence structure conveys viewpoint, and other discourse phenomena.

#### LING 314 Introduction to Historical Linguistics # (III)

Spring. 4 credits. Prerequisite: LING 201 or permission of instructor. M. Weiss. A survey of the basic mechanisms of linguistic change, with examples from a variety of languages.

## LING 315-316 Old Norse

315, fall; 316, spring. 4 credits each term. J. Sigtryggsson.

Old Norse is a collective term for the earliest North Germanic literary languages: Old Icelandic, Old Norwegian, Old Danish, and Old Swedish. The richly documented Old Icelandic is the center of attention, and the purpose is twofold: the students gain knowledge of an ancient North Germanic language, important from a linguistic point of view, and gain access to the medieval Icelandic (and Scandinavian) literature. 315: The structure of Old Norse (Old Icelandic), phonology, and morphology, with reading of selections from the Prose-Edda, a thirteenthcentury narrative based on the Eddaic poetry. 316: Extensive reading of Old Norse texts, among them selections from some of the

major Icelandic family sagas: Njals saga, Grettis saga, and Egils saga, as well as the whole Hrafnkels saga.

#### LING 319 Phonetics I (III)

Fall. 4 credits. Prerequisite: LING 201 or permission of instructor. A. Miller-Ockhuizen.

This course provides a basic introduction to the study of phonetics. Topics covered include anatomy and physiology of the speech production apparatus, transcription and production of some of the world's sounds, basic acoustics, computerized methods of speech analysis, acoustic characteristics of sounds, speech perception, speech synthesis, and stress and intonation.

#### LING 320 Phonetics II (III)

Spring. 4 credits. Prerequisite: LING 319. A. Miller-Ockhuizen.

This course is a continuation of Phonetics I and provides a more detailed survey of some areas in acoustic and articulatory phonetics. Topics include feature theory, vocal tract acoustics, quantal theory, speaker normalization, theories of speech perception, coarticulation, theories of speech production, and prosody. In addition, a number of "handson" projects are part of the course.

# [LING 321#-322 History of the Romance Languages (also ROMS 321) (III)

321, fall; 322, spring. 4 credits each term. Prerequisites: LING 101 or equivalent and qualification in any Romance language. Offered alternate years. Not offered 2002-2003. C. Rosen.

321: Course covers: popular Latin; Pan-Romance trends in phonology, morphology, syntax, and the lexicon; regional divergence; non-Latin influences; and medieval diglossia and emergence of Romance standards. 322: French, Italian, and Spanish from 850 to 1250 A.D. Analysis of texts. Overview of other languages to the present day. Elements of dialectology.]

# [LING 323 Comparative Romance Syntax (also ROM S 323) (III)

Spring. 4 credits. Prerequisites: LING 101, or equivalent and qualification in any romance language. Offered alternate years. Not offered 2002-2003. C. Rosen.

Concise survey of romance syntax, covering the salient constructions in six languages with equal attention to their historical evolution and their current state. Grammatical innovation and divergence in a typological perspective.]

#### LING 332 Philosophy of Language (also PHIL 332) (IV)

For description, see PHIL 332.

[LING 333 Problems in Semantics (also PHIL 333 and COGST 333) (III or IV) Spring. 4 credits. Prerequisite: logic or semantics course or permission of instructor. Not offered 2002-2003; next offered 2003-2004. S. McConnell-Ginet,

Z. Gendler Szabo. This course looks at problems in the semantic analysis of natural languages, critically examining work in linguistics and philosophy on particular topics of current interest. The focus is on quantification. Languages offer a variety of resources for expressing generalizations: some, every, no, many, and other quantifying expressions that appear inside noun phrases; always, never, occasionally, and other adverbial quantifying expressions not associated with particular nominals;

constructional resources of various kinds (e.g., English free relatives like *whatever she cooks*). How different are these resources and what might they imply about basic cognitive and linguistic capacities?]

#### [LING 347 Topics in the History of English (III)

Spring. 4 credits. Prerequisite: LING 217, 314, a course in Old or Middle English, or permission of instructor. Not offered 2002–

2003; next offered 2003–2004. W. Harbert. The course will treat specific topics in the linguistic history of the English language, selected on the basis of the particular interests of the students and the instructor. The topic area for 2000–2001 was morphological and syntactic change during the Early Middle English period—a period crucial to the development of the distinctive syntactic properties of Modern English.]

## [LING 366 Spanish in the United States

(also SPANR 366 and LSP 366) (III) Fall. 4 credits. Prerequisite: some knowledge of Spanish. Not offered 2002–2003. M. Suner.

Examination of major Spanish dialects in the United States from a linguistic perspective. Contrast with the standard language. Borrowing, interference, and code switching. Syntactic, morphological, and phonological characteristics.]

## LING 390 Independent Study in

**Linguistics** Fall or spring. 1–4 credits variable. Prerequisite: LING 101 or permission of instructor. Staff.

Independent study of linguistics topics not covered in regular curriculum for undergrads.

## LING 401 Language Typology (III)

Spring. 4 credits. Prerequisite: LING 101 or equivalent. J. Whitman.

Study of a basic question of contemporary linguistics: in what ways do languages differ, and in what ways are they all alike? Efforts to formalize universals of syntax and to characterize the total repertory of constructions available to natural languages. Common morphological devices and their syntactic correlates. Emphasis is on systems of case, agreement, and voice.

#### [LING 403 Applied Linguistics and Second Language Learning (III)

Fall. 4 credits. Prerequisite: at least one course in applied linguistics, linguistics, psychology, anthropology, communication, cognitive studies, education, or literary analysis; or permission of instructor. Not offered 2002–2003; next offered 2003– 2004. Staff.

This course is an introduction to the field of applied linguistics with focus on different domains of language research as they come to bear on the matter of second language learning. Thus, topics include developmental and experimental psychology of language, textual and discourse analysis, literacy, cognitive consequences of bilingualism, corpora and language teaching, and contact between first and second language communities.]

#### LING 404 Linguistic Structure of Japanese (also ASIAN 412) (III)

Spring. 4 credits. Prerequisites: JAPAN 102 or permission of instructor and LING 101 or equivalent introductory course in linguistics. Offered alternate years. J. Whitman. Introduction to the linguistic study of Japanese, with an emphasis on morphology and syntax.

#### LING 405 Sociolinguistics (III)

Spring. 4 credits. Prerequisite: LING 101 or permission of instructor. R. Kim. The principal work of linguistics is to describe, analyze, and understand the regularities of language systems. How, then, are we to deal with irregularities and variability when they are observed in language? This course introduces and discusses the most significant issues in the

language? This course introduces and discusses the most significant issues in the study of language variation, and it examines some of the methodologies that have been developed to study variation in language use. We consider the observable interactions between linguistic variables and social factors (e.g., age, sex, ethnicity) and review the main generalizations about these factors that sociolinguistics has arrived at in the last three decades. Some of the problems associated with the quantification and measurement of nonlinguistic variables are discussed and we evaluate the various ways researchers have dealt with these problems.

## [LING 406 Ethnolinguistics (III)

Spring. 4 credits. Prerequisite: LING 101 or permission of instructor. Not offered 2002–

2003; next offered 2003–2004. Staff. This course is an introduction to the study of pidgin and creole languages and the issues surrounding them both in and beyond linguistics. Topics covered include: genesis of pidgins and creoles; classification of pidgins and creoles; creoles and language universals; creoles and sociolinguistic variation; a module on Saramaccan Creole English; educational and language planning issues; sociohistorical issues; Black English.]

#### LING 407 Grammatical Structure of Spanish I (also SPANR 407) (III)

Fall. 4 credits. Prerequisite: proficiency in Spanish or permission of instructor. M. Suner.

This course seeks to equip the advanced student or the future language professional with practical insights into problem areas for foreign language learners with the aid of linguistic descriptions. The intent is to narrow the gap known to exist between the knowledge that a native speaker has and the incomplete one that a foreign language learner possesses.

#### [LING 408 Grammatical Structure of Spanish II (also SPANR 408) (III)

Spring. 4 credits. Prerequisites: LING 101 and proficiency in Spanish or permission of instructor. Offered alternate years. Not offered 2002–2003; next offered 2003– 2004. M. Suñer.

Survey of Spanish morpho-syntax using contemporary theoretical models to highlight hidden patterns and generalizations. Topics may vary according to students' interests, but may include major clause types, word order possibilities, negation, agreement, and null categories.]

## [LING 409 Structure of Italian (III)

Fall. 4 credits. Prerequisites: LING 101 or equivalent and qualification in any Romance language. Offered alternate years. Not offered 2002–2003; next offered 2003–2004. C. Rosen.

Survey of Italian syntax, using simple theoretical tools to bring hidden regularities to light. Topics include auxiliaries, modals, clitics, reflexive constructions, agreement, impersonal constructions, causatives.]

#### [LING 410 History of the Italian Language (III)

Spring. 4 credits. Prerequisites: LING 321 and either ITAL 201, 203, or equivalent. Offered alternate years. Not offered 2002– 2003; next offered 2003–2004. C. Rosen. Overview of Italian and its dialects from the earliest texts to the present day. Emergence of the standard language. External history and sociolinguistic circumstances.]

## [LING 411 History of the Japanese Language (also ASIAN 411) @ (III)

Language (also ASIAN 411) @ (III) Fall. 4 credits. Prerequisite: permission of instructor. Offered alternate years. Not offered 2002–2003. J. Whitman.

An overview of the history of the Japanese language followed by intensive examination of issues of interest to the participants. Students should have a reading knowledge of Japanese.]

#### [LING 413 Topics in Historical Linguistics

Fall. 4 credits. Prerequisite: LING 314 or permission of instructor. Not offered 2002– 2003. W. Harbert, C. Rosen.

Examines a selection of recent research illustrating a variety of productive and innovative approaches to problems in historical linguistics. Readings center on phonological and morphological evolution in the Romance and Germanic families. Students carry out guided research projects.]

#### LING 414 Second Language Acquisition I (also ASIAN 414) (III)

Fall. 4 credits. Prerequisite: permission of instructor. Y. Shirai.

A survey of the quantitative and qualitative research literature on the acquisition of second and additional languages among the adult population. Research carried out in both experimental and natural settings is considered. Topics include: learner errors and errors analysis; contrastive analysis hypothesis; developmental and variability patterns in the acquisition of syntax, phonology and morphology, including the potential effects of typological and formal universals; pragmatics and discourse; the lexicon, social and cognitive factors in acquisition, communication, and learning strategies; theories of second language acquisition.

#### LING 415 Second Language Acquisition II (also ASIAN 417) (III)

Spring. 4 credits. Prerequisite: permission of instructor. Y. Shirai.

This course examines various issues in second language acquisition research that is particularly relevant to foreign language teaching and learning. Topics covered include: the role of input (listening/reading) vs. output (speaking/ writing); implicit vs. explicit learning; negative vs. positive evidence (including the role of error correction); affective factors (motivation, anxiety); individual differences; teachability hypothesis and syllabus construction; the structure of second language proficiency.

#### [LING 417-418 History of the Russian Language (also RUSSA 401-402) (III)

**402)** (**III**) 417, fall; 418, spring. 4 credits each term. Prerequisites: for LING 417, permission of instructor; for LING 418, LING 417 or equivalent. Offered alternate years. Not offered 2002–2003; next offered 2003– 2004. W. Browne. Phonological, morphological, and syntactic developments from Old Russian to modern Russian.]

#### LING 421 Semantics | (III)

Spring. 4 credits. Prerequisite: LING 203. M. Diesing.

This course introduces methods for theorizing about meaning within generative grammar. These techniques allow us to create grammars that pair syntactic structures with meanings. We look at several empirical areas in detail, among them complementation (combining heads with their arguments), modification, conjunction, definite descriptions, relative clauses, traces, bound pronouns and quantification. An introduction to logical and mathematical concepts used in linguistic semantics (such as set theory, functions and their types, and the lambda notation for naming linguistic meanings) is included in the course

#### LING 422 Semantics II (III)

Fall. 4 credits. Prerequisite: LING 421 or permission of instructor. D. Abusch. The course uses the techniques introduced in Semantics I to analyze linguistic phenomena including quantifier scope, ellipsis, and referential pronouns. Temporal and possible worlds semantics are introduced and used in the analysis of modality, tense, and belief sentences. The phenomena of presupposition, indefinite descriptions, and anaphora are analyzed in a dynamic compositional framework that formalizes the idea that sentence meaning effects a change in an information state.

#### **[LING 424 Computational Linguistics** (also COGST 424 and COM S 424) (111)

Spring. 4 credits. Prerequisite: LING 203 or permission of instructor; COM S 114 is also recommended. Not offered 2002-2003. M. Rooth.

Steady progress in formalisms, algorithms, linguistic knowledge, and computer technology is bringing computational mastery of the syntax, morphology, and phonology of natural languages within reach. The course introduces methods for "doing a language" computationally, with an emphasis on approaches which combine linguistic knowledge with powerful computational formalisms. Topics: computational grammars. parsing, representation of syntactic analyses; finite state morphology; weighted grammars; feature constraint formalisms for syntax; treebank and other markup methodology; robust low-level syntax and semantics; and experimental-modeling methodology using large data samples.]

#### LING 425 Pragmatics (also PHIL 334) (III or IV)

Fall. 4 credits. Prerequisite: LING 201 or PHIL 231 or permission of instructor. D. Abusch.

An introduction to aspects of linguistic meaning which have to do with context and with the use of language. Topics include context change semantics and pragmatics, presupposition and accommodation, conversational implicature, speech acts, and the pragmatics of definite descriptions and quantifiers.

[LING 427 Structure of Hungarian (III) Fall. 4 credits. Prerequisite: LING 101 or equivalent. Offered alternate years. Not offered 2002-2003; next offered 2003-2004. W. Browne.

Survey of phonology, morphology, and syntax of this non-Indo-European language. Topics to be stressed include vowel harmony, consonant assimilation; definite and indefinite conjugations, possessives, verb prefixes, causatives; and focus, word order, clause types, movement, intonation.]

#### [LING 430 Structure of Korean (also ASIAN 430) (III)

Spring. 4 credits. Offered alternate years. Not offered 2002-2003. J. Whitman. Intensive examination of the syntax and phonology of a non-Indo-European language with the objective of testing principles of current linguistic theory. No previous knowledge of Korean required.]

#### [LING 431 Structure of an African Language (III)

Spring. 4 credits. Prerequisite: LING 101 or permission of the instructor. Offered alternate years. Not offered 2002-2003; next offered 2003-2004. C. Collins.

A survey of the grammar of an African language in light of current linguistic theory.]

#### [LING 433 The Lesser-Known Romance Languages (also ROM \$ 433)

Fall. 4 credits. Prerequisites: LING 101 or equivalent and qualification in any Romance language. Not offered 2002-2003. C. Rosen.

The course surveys three or four Romance languages or dialects, examining their sound systems, grammars, and historical evolution from Latin. Includes some native speaker demonstrations. Readings represent both the modern languages and their earliest attested stages. Topics for fall 2001: Catalan, Romanian, a Northern Italian dialect, and a Rheto-Romance language.]

#### LING 436 Language Development (also COGST 436, HD 436, and PSYCH 436) (111)

Spring. 4 credits. Open to undergraduate and graduate students. Graduate students should also enroll in HD 633/LING 700/ PSYCH 600, a supplemental graduate seminar. Prerequisite: at least 1 course in developmental psychology, cognitive psychology, cognitive development, biology, neurobiology, or linguistics. B. Lust.

This course surveys basic issues, methods, and research in the study of first-language acquisition. Major theoretical positions in the field are considered in light of experimental studies in first-language acquisition of phonology, syntax, and semantics from infancy on. The fundamental issues of relationships between language and thought are discussed, as are the fundamental linguistic issues of Universal Grammar and the biological foundations for language acquisition. The acquisition of communication systems in nonhuman species such as chimpanzees is addressed, but major emphasis is on the child. An optional lab course supplement is available (see COGST 450/LING 450/PSYCH 437).

#### [LING 437 Celtic Linguistic Structures (III)

Spring. 4 credits. Prerequisite: LING 303. Not offered 2002-2003; next offered 2003-2004. W. Harbert.

This course treats selected topics in the syntax and morphosyntax of the modern Celtic languages.]

#### [LING 441 Introduction to Germanic Linguistics (also GERST 441) (III)

Fall. 4 credits. Prerequisite: LING 101 or permission of instructor. Not offered 2002-2003. W. Harbert.

Survey of major issues in historical Germanic linguistics.]

#### [LING 443-444 Linguistic Structure of Russian (also RUSSA 403-404) (III)

443, fall; 444, spring. 4 credits each term. Prerequisites: for LING 443, LING 101 and permission of instructor; for LING 444, LING 443 or equivalent. Offered alternate years; next offered 2003-2004. W. Browne.

A synchronic analysis of the structure of modern Russian. LING 443 deals primarily with phonology and its relation to syntax and 444 with syntax and word order. Topics covered include case theory, the functions of word order, voice, agreement, impersonal constructions, negation, nonuniversal categories, and the relation between morphology and syntax.]

#### LING 450 Lab Course: Language Development (also COGST 450 and PSYCH 4371

Spring. 2 credits. Prerequisite: COGST/HD/ LING/PSYCH 436. B. Lust.

This laboratory course provides undergraduates with an introduction to hands-on research experience in the Cognitive Studies research labs and meets once a week in group format. It includes several structured modules dealing with topics covered in the survey course, COGST/HD/LING/PSYCH 436, Language Development. They include training in how to study and analyze original child language data, including the use of selected portions of a large database of child language data from many languages in the Cornell Language Acquisition Lab (CLAL), and training necessary to the collection and analysis of new child language data. Emphasis is placed on developing research methods in order to test hypotheses.

## LING 451 Greek Comparative Grammar (also CLASS 421) (III) Fall. 4 credits. Prerequisite: thorough

familiarity with classical Greek morphol-

ogy. A. Nussbaum.

The prehistory and evolution of the sounds and forms of ancient Greek as reconstructed by comparison with the other Indo-European languages.

#### [LING 452 Latin Comparative Grammar (also CLASS 422) (III)

Fall. 4 credits. Prerequisite: thorough

familiarity with classical Latin morphology. Not offered 2002-2003. A. Nussbaum. The prehistory and evolution of the sounds and forms of classical Latin as reconstructed by comparison with the other Indo-European languages.]

#### [LING 454 Italic Dialects (also CLASS 424) (111)

Fall. 4 credits. Prerequisite: thorough familiarity with classical Latin morphology. Not offered 2002-2003; next offered 2003-2004. A. Nussbaum.

The phonology and morphology of Faliscan, Oscan, and Umbrian studied through the reading of epigraphical texts. Attention to the relations of these languages to Latin and the question of proto-Italic.]

#### [LING 455 Greek Dialects (also CLASS 425) (111)

Fall. 4 credits. Prerequisite: basic familiarity with classical Greek morphology. Not offered 2002-2003; next offered 2003-2004. A. Nussbaum.

A survey of the dialects of ancient Greek through the reading and analysis of representative epigraphical and literary texts.]

#### [LING 456 Archaic Latin (also CLASS 426) (111)

Spring. 4 credits. Prerequisite: reading knowledge of Latin. Not offered 2002-2003. A. Nussbaum.

Reading of epigraphic and literary preclassical texts with special attention to archaic and dialectal features. The position of Latin among the Indo-European languages of ancient Italy the rudiments of Latin historical grammar, and aspects of the development of the literary language.]

#### LING 457 Homeric Philology (also CLASS 427) (111)

Spring, 4 credits. Prerequisite: ability to read Homeric Greek. A. Nussbaum. The language of the Homeric epics: dialect background, archaisms, modernizations. The notion of a Kunstsprache: its constitution, use, and internal consistency. The phonological and morphological aspects of epic compositional technique.

#### [LING 459 Mycenaean Greek (also CLASS 429) (III)

4 credits. Prerequisite: thorough familiarity with classical Greek morphology. Not offered 2002-2003; next offered 2003-2004. A. Nussbaum.

An introduction to the epigraphy, language, and content of the Linear B tablets with special attention to their implications for Greek historical grammar and dialectology.]

#### [LING 460 Sanskrit Comparative Grammar (III or IV)

Spring. 4 credits. Prerequisite: reasonable familiarity with classical Sanskrit morphology. Not offered 2002-2003; next offered 2003-2004. A. Nussbaum.

A survey of the historical phonology and morphology of Sanskrit in relation to the Indo-Iranian and Indo-European comparative evidence.]

## LING 474 Introduction to Natural Language Processing (also COGST 474 and COM S 474) (III) For description, see COM S 474.

#### LING 485 Topics in Computational Linguistics (also COM S 485) (III)

Fall. 4 credits. Prerequisite: LING 424 or LING/COM S 474. M. Rooth.

This laboratory course is concerned with broad-coverage computational grammars, computational methodology for addressing linguistic questions, and programming and experimental environments for computational linguistics. Course work includes an experimental project.

#### LING 493 Honors Thesis Research Fall, 4 credits, Staff,

May be taken before or after LING 494, or may be taken independently

#### LING 494 Honors Thesis Research Spring. 4 credits. Staff.

May be taken as a continuation of, or before, LING 493.

## LING 531 Topics in Cognitive Studies (also BIO NB 531, COGST 531, COM S 531, PHIL 531, PSYCH 531)

For description, see COGST 531.

#### LING 601 Topics in Phonological Theory

Fall. 4 credits variable. Prerequisites: LING 301 and 1 higher-level course in phonology. B. Moren.

Selected topics in current phonological theory.

## [LING 602 Topics in Morphology

Fall. 4 credits. Prerequisites: LING 301 or 303 or permission of instructor. Not offered 2002-2003. D. Zec.

Selected topics in current morphological theory.]

#### LING 604 Research Workshop

Fall. 2 credits. S-U grade only. Required of third-year linguistics graduate students. S. McConnell-Ginet.

This course provides a forum for presentation and discussion of ongoing research, and development of professional skills. Participants must enroll in a concurrent independent study with a special committee member, or a relevant workshop.

#### [LING 606 Historical Syntax

Fall. 4 credits. Prerequisite: LING 303. Not offered 2002-2003; next offered 2003-2004. C. Rosen.

A course on change in language structure, beginning with an overview of widely attested types of syntactic change and proceeding to an introduction of current theoretical treatments. Topics covered include grammaticalization, word order change, and the interplay between morphological and syntactic change. Assumes a basic background in syntax.]

#### [LING 609 SLA and the Asian Languages (also ASIAN 610)

Fall. 4 credits. Prerequisite: LING 414-415 or permission of instructor. Not offered 2002-2003. Y. Shirai.

This course surveys the literature on the acquisition of Asian languages both in first and second language. We mainly focus on Japanese, Korean, Chinese (Mandarin/ Cantonese), but other languages (Thai, Malay, Vietnamese, Burmese, Tagalog, etc.) may be dealt with, depending on faculty/student interest.]

#### LING 616 Topics in Syntactic Theory

Fall. 4 credits variable. Prerequisite: LING

304 or permission of instructor. M. Diesing. An examination of recent developments in syntactic theory, including "minimalist" approaches to phrase structure, derivations/ representations and the nature of economy conditions, and parametric differences.

#### [LING 617-618 Hittite

617, fall; 618, spring. 4 credits each term. Prerequisites: for LING 617, permission of instructor; for LING 618, LING 617 or permission of instructor. Not offered 2002-2003. Staff.

An introduction to the cuneiform writing system and the grammar of Hittite, followed by the reading of selected texts.]

#### [LING 619 Rigveda

Fall. 4 credits. Prerequisite: permission of instructor. Not offered 2002-2003. C. Minkowski.

Reading and linguistic analysis of selected Vedic hymns.]

#### [LING 620 Comparative Grammar of Anatolian (also NES 623)

Spring. 4 credits. Prerequisite: LING 617. Not offered 2002-2003. M. Weiss. Introduction to the historical phonology and morphology of the Anatolian languages.

Knowledge of Hittite and Luvian recommended but not required.]

#### [LING 621 Avestan and Old Persian (also NES 621)

Fall. 4 credits. Prerequisite: a basic knowledge of Sanskrit forms and

- morphology syntax. Not offered 2002-
- 2003. M. Weiss.

Linguistically-oriented readings of Old Persian and Avestan.]

#### [LING 623-624 Old Irish I, II

623, fall; 624, spring. 4 credits each term. Prerequisite for LING 624: LING 623 or permission of instructor. Not offered 2002-2003. Staff.

An introduction to "classical" Old Irish for students with no previous experience with the language.]

#### LING 625 Middle Welsh

Spring, 4 credits. Prerequisite: permission of instructor. W. Harbert.

Students develop a reading knowledge of Middle Welsh through translating selections from prose and poetry. Emphasis is on the prose tales, including the Mabinogi. No familiarity with Welsh is assumed.

#### [LING 627 Advanced Old Irish]

## [LING 629 Old Avestan (also NES 622)

Fall. 4 credits. Prerequisite: LING 621. Not offered 2002-2003. M. Weiss.

Linguistically and philologically oriented reading of the Gathas of Zarathustra and the Yasna Haptanhaiti. Some knowledge of Sanskrit required.]

#### [LING 631 Comparative Indo-European Linguistics

Fall. 4 credits. Prerequisite: permission of instructor. Not offered 2002-2003. Staff. An introduction to the comparative grammar of the Indo-European languages.]

#### LING 633 Language Acquisition Seminar (also COGST 633 and HD 633)

Fall. 1-4 credits. Prerequisite: LING 436 or equivalent or permission of instructor. B. Lust.

This seminar reviews and critiques current theoretical and experimental studies of firstlanguage acquisition, with a concentration on insights gained by cross-linguistic study of this area. Attention is also given to the development of research proposals.

#### LING [635]-636 Indo-European Workshop

[635, fall]; 636, spring. 4 credits each term. Prerequisite: permission of instructor. 635 not offered 2002–2003. M. Weiss.

An assortment of subjects intended for students with previous training in Indo-European linguistics: problems in the reconstruction of Proto Indo-European, topics in the historical grammars of the various IE languages, reading and historical linguistic analysis of texts, and grammatical sketches of "minor" IE languages.

## ARTS AND SCIENCES - 2002-2003

#### LING 637 Introduction to Tocharian

Fall. 4 credits. Prerequisite: knowlege of other ancient IE language and historical linguistics methods. M. Weiss.

Introduction to the grammar of Tocharian A and B.

#### LING 638 Comparative Grammar of Tocharian

Spring. 4 credits. Prerequisite: LING 637. R. Kim.

Introduction to the historical phonoloyg and morpholoyg of Tocharian A and B.

#### [LING 643 Topics in Historical Germanic Phonology

Spring. 4 credits. Prerequisite: LING 441. Not offered 2002-2003. W. Harbert.

The development of the sound system from Proto-Germanic to its daughter languages.]

#### [LING 644 Topics in Historical Germanic **Syntax**

Fall. 4 credits. Prerequisite: LING 441. Not offered 2002-2003. W. Harbert.

A diachronic and comparative investigation of syntactic processes in the older Germanic languages.]

## LING 645 Gothic

Fall. 4 credits. Prerequisite: LING 101. Offered alternate years. W. Harbert. Linguistic structure of Gothic, with extensive readings of Gothic texts.

#### [LING 646 Old High German, Old Saxon (also GERST 658)

Spring. 4 credits. Prerequisite: LING 101. Offered alternate years. Not offered 2002-2003. W. Harbert.

This course combines a survey of the linguistic history and structure of Old High German and Old Saxon with extensive readings from the major documents in which they are recorded. Reading knowledge of Modern German is highly recommended.]

#### [LING 648 Speech Synthesis by Rule

Spring. 4 credits. Prerequisite: LING 301, 319, or permission of instructor. Offered alternate years. Not offered 2002-2003; next offered 2003-2004. S. Hertz.

Investigates the nature of the acoustic structure of speech synthesis, using speech as a tool for exploring this structure. A particular acoustic model is proposed, developed, and motivated by considering the relationship between phonological and acoustic structure, speech timing, phonetic universals, coarticulation, and speech perception. The primary tool for investigation will be the Delta System, a powerful software system for investigating phonology and phonetics through speech synthesis. The course is meant for graduate students and advanced undergraduate students in linguistics, but may also be of interest to students in psychology psycholinguistics, computer science, and cognitive studies.]

## [LING 649 Structure of Old English

Spring. 4 credits. Prerequisite: LING 441. Offered alternate years. Not offered 2002-2003. W. Harbert.

Linguistic overview of Old English, with emphasis on phonology and syntax.]

#### [LING 653-654 Seminar in Southeast **Asian Linguistics**

653, fall; 654, spring. 4 credits each term. Prerequisite: LING 303 or permission of instructor. LING 653 is not a prerequisite for 654. Not offered 2002-2003. J. Wolff.

Languages of mainland Southeast Asia. Topics, chosen according to student interests, may include description, dialectology, typology, comparative reconstruction, and historical studies.]

#### [LING 655–656 Seminar In Austronesian Linguistics

655, fall; 656, spring. 4 credits each term. Prerequisites: for LING 655, LING 101 and permission of instructor; for LING 656, LING 655. Not offered 2002-2003. J. Wolff.

Descriptive and comparative studies of Malayo-Polynesian languages.]

#### [LING 659 Seminar in Vedic Philology (also ASIAN 659 and CLASS 659)

Not offered 2002-2003. For description, see ASIAN 659.]

#### [LING 661 Old Church Slavonic (also RUSSA 601)

Fall. 4 credits. Prerequisite: students must know a Slavic or Indo-European language. This course is prerequisite to LING 662 and LING 671. Offered alternate years. Not

offered 2002-2003. W. Browne. Grammar and reading of basic texts.]

#### [LING 662 Old Russian Texts (also **RUSSA 602)**

Spring. 4 credits. Prerequisite: LING 661. Offered alternate years. Not offered 2002-2003. W. Browne.

Grammatical analysis and close reading of Old Russian texts.]

## [LING 671-672 Comparative Slavic

Linguistics (also RUSSA 651-652) Fall, 671; spring, 672. 4 credits each term. Prerequisites: for LING 672, LING 661 taken previously or simultaneously or permission of instructor. Offered alternate years. Not offered 2002-2003. W. Browne.

Sounds and forms of the Slavic languages and of prehistoric common Slavic; main historical developments leading to the modern languages.]

## LING 700 Seminar

Fall or spring, according to demand. Credit to be arranged.

Seminars are offered according to faculty interest and student demand. Topics in recent years have included subject and topic, Montague grammar, speech synthesis, lexicography, classical and autonomous phonology, Japanese sociolinguistics, relational grammar, semantics and semiotics, and others.

#### LING 701-702 Directed Research

701, fall; 702, spring. 1-4 credits. Hours to be arranged. Staff.

H. West, J. West, M. Yakimov, D. Zaffran (Emeritus: J. Bramble, R. Farrell, H. Kesten, G. R. Livesay, L. E. Payne, A. Rosenberg, M. Sweedler)

Mathematics is the language of modern science; basic training in the discipline is essential for those who want to understand, as well as for those who want to take part in, the important scientific developments of our time. Acquaintance with mathematics is also extremely useful for students in the social sciences and valuable for anyone interested in the full range of human culture and the ways of knowing the universe in which we live.

The Department of Mathematics faculty has strong groups specializing in algebra, number theory, combinatorics, real and complex analysis, Lie groups, topology and geometry, logic, probability and statistics, mathematical physics, and applied mathematics. Related departments at Cornell have specialists in computer science, operations research, linear programming, and game theory, and courses in these topics can be integrated readily into the mathematics major.

The department offers a rich variety of undergraduate courses, and many of its beginning graduate courses are suitable for advanced undergraduates as well. Under some conditions, a student may carry out an independent reading and research project for college credit under the supervision of a faculty member.

Members of the department are available to discuss with students the appropriate course for their levels of ability and interest, and students are urged to avail themselves of this help.

Students who want to take any of the courses numbered 300 or above are invited to confer, before registering, with the instructor concerned. The level of a course is indicated by the first digit of the course number: roughly, 1, 2, indicate underclass courses; 3, 4, upperclass courses; 5, professional level and mathematics education courses; 6, 7, graduate courses. The subject matter of courses is often indicated by the second digit: 0, general; 1, 2, analysis; 3, 4, algebra and combinatorics; 5, 6, topology and geometry; 7, probability and statistics; 8, logic; 9, other.

Midterm grades, when required, will be S or U only, except in special circumstances. In courses with numbers below 700, students will receive letter grades, with the exception of nonmathematics majors who have requested an S-U grade.

## Advanced Placement

Secondary school students are strongly urged to take one of the two advanced placement examinations of the College Entrance Examination Board in their senior year. Freshmen who have had some calculus but who have not taken an advanced placement examination should take the placement examination in mathematics offered at Cornell just before the beginning of classes in the fall. It is most important that anyone with any knowledge of calculus carefully read "Advanced Placement," p. 6-11.

## The Major

The mathematics major adapts to a number of purposes. It can emphasize the theoretical or the applied. It can be appropriate for professionals and nonprofessionals alike, and can be broad or narrow. It can also be combined easily with serious study in another subject in the physical, biological, or social sciences by means of a double major and/or concentration. For example, a double major in mathematics and computer science is facilitated by the concentration in computer science (requirement 4, option b) described below. This concentration permits a student to use certain computer science courses to satisfy the requirements of both majors. Questions concerning the major should be brought to a departmental representative.

#### Prerequisites

The traditional prerequisites are MATH 221–222, 223–224, or 293–294. A unit on infinite series is required. Such a unit is offered in MATH 112, 122 and 192. Normally students will be admitted to the major only when they have grades of B– or better in all 200-level mathematics courses taken. Alternative prerequisites are MATH 213 and 231, normally with grades of B+ or better.

### Requirements

There are five requirements for the major:

- 1. COM S 100. Students are urged to take this course before the end of their sophomore year.
- 2. Two courses in algebra. Eligible courses are

MATH 431 or 433

MATH 432 or 434

MATH 332 or 336

(Credit for both MATH 332 and MATH 336 will be granted only if both were taken during or before spring 2002 or by a mathematics major graduating in or before spring 2003.)

- 3. Two courses in analysis. Eligible courses are MATH 311, 321, 323, 413, 414, 418, 420, 422, 424, 425, 427, 428. (MATH 411 has been discontinued and replaced by MATH 311. Students may not receive credit for MATH 311 if they have received credit for MATH 411.)
- 4. Further high-level mathematical courses. Any one of (a), (b), (c), (d), (e) below is sufficient. The five alternatives below do not exhaust the possibilities. A mathematics major interested in a concentration in a subject different from those below may develop a suitable individual program in consultation with his/her major adviser.
  - (a) Four additional Mathematics courses numbered 300 or above

(b) Concentration in Computer Science: Five additional courses from (i) and (ii) below, of which at least one is from (i) and three are from (ii)

- (i) Mathematics courses numbered 300 or above
- (ii) Computer Science courses numbered 300 or above

(c) **Concentration in Operations Research:** Five additional courses from (iii) and (iv) below, of which at least one is from (iii) and three are from (iv)  $% \left( {{{\rm{i}}{\rm{i}}{\rm{i}}{\rm{i}}{\rm{i}}} \right)$ 

- (iii) Mathematics courses numbered 300 or above
- (iv) Courses in Operations Research and Industrial Engineering in which the primary focus involves mathematical techniques. Undergraduate courses include OR&IE 320– 462 excluding OR&IE 350, 414, and 416. Many Operations Research graduate courses are also allowed. Students should consult with their advisers.
- (d) **Concentration in Economics:** Five additional courses from (v), (vi), and (vii) below, as follows: one course from (v), three courses from (vi), and a fifth course from any of (v), (vi), or (vii). However, Mathematics 472 and Economics 319 cannot **both** be used to satisfy these requirements.
  - (v) Mathematics courses numbered 300 or above
  - (vi) Economics courses with significant mathematical content. Eligible courses are ECON 318, 319, 320, 416, 419, 450 (also ARME 450), 467, 609, 610, 613, 614, 619, 620, 717, 756.
  - (vii) Courses in Operations Research with significant mathematical content and dealing with material of interest in economics; e.g., OR&IE 320, 321, 432, 435, and the sequence 475– 476. However, the student may, with the adviser's approval, select an OR&IE course that satisfies the basic intent of the requirement but is not in this list.
- (e) **Concentration in Mathematical Physics:** Five additional courses from (viii) and (ix) below, of which at least one is from (viii) and three are from (ix).
  - (viii) Mathematics courses in analysis, geometry, algebra and combinatorics, probability and statistics, and mathematical logic. Eligible courses are MATH 311, 321, 323, 401, 413, 414, 420, 418 or 422, 423, 424, 425, 427, 428, 431 or 433, 432 or 434, 436, 441, 442, 451, 452, 453, 454, 455, 471, 472, 474, 481, 482, 483, 486.
  - (ix) Physics courses that make significant use of advanced mathematics. Eligible courses are PHYS 316, 317, 318, 327, 341, 443, 444, 454, 455, 480.
- 5. One course dealing with mathematical models. Any course from outside mathematics with serious mathematical content and dealing with scientific matters. This course cannot be used to satisfy any of the other requirements for the major. Serious mathematical content includes, but is not limited to, extensive use of calculus or linear algebra. Even if the Physics concentration has been selected, PHYS 116, 208, 213, or 217 may

be used to satisfy the modeling requirement, but no other 100-level Physics course, nor PHYS 207 or 209 may be used. COM S 211 satisfies the modeling requirement provided the Computer Science concentration has not been selected. Any course from another department that would satisfy one of the concentrations requirements may be used to fulfill the modeling requirement, provided the course is not also used to fulfill the concentration requirement. Some courses in biology, chemistry and other fields can fulfill the modeling requirement. Students should consult with their advisers.

A course may be counted toward the mathematics major only if a grade of C– or better is received for that course.

Major advisers can alter these requirements upon request from an advisee, provided the intent of the requirements is met.

#### **Honors Program**

The Department of Mathematics awards honors (cum laude) and high honors (magna cum laude and summa cum laude) to graduating mathematics majors who have demonstrated outstanding ability in the major program.

The awards are determined by the Mathematics Major Committee in the latter part of the semester prior to graduation. The committee will primarily be looking for excellent performance in mathematics courses, particularly in challenging courses at the 400 level or beyond. Participation in the Honors Seminar (MATH 401) for one semester, or independent study at a high performance level can also contribute to honors. Students interested in honors should consult their major advisors concerning suitable courses.

One route through which a student may earn high honors is to write a senior thesis and present it orally. This project is carried out during the senior year under the supervision of a member of the Mathematics Department faculty. Outstanding performance in graduate classes can also contribute to high honors. Students interested in high honors should consult their major advisors and the chair of the department's Mathematics Major Committee during the second semester of their junior year.

#### **Teacher Education in Mathematics**

Students at Cornell may pursue teaching credentials in biology, chemistry, earth science, general science, mathematics, and physics. CTE (Cornell Teacher Education) is a program situated in the Department of Education. Most CTE students enroll in a fiveyear program, which combines an undergraduate major in mathematics or one of the sciences with a one-year Master of Arts in Teaching (MAT). Students from any college at Cornell are eligible to apply to the program as undergraduates. Students completing the graduate program will earn the master's degree required for permanent certification in New York and most other states.

Mathematics students in CTE must complete all the requirements for a mathematics major (or its equivalent) including MATH 403, 408, 451, 507, and a probability/statistics course. There are a number of education courses required. Some of the required mathematics and education courses will be taken in the graduate fifth year. For more information, contact the CTE Student Support Specialist at 255-9255 or Avery Solomon (Mathematics, aps5@cornell.edu), or David Henderson (Mathematics, dwh2@comell.edu).

## Studying Mathematics Outside the Major

The College of Arts and Sciences and the Department of Mathematics offer no minor in mathematics; however, some other scientific departments in the college offer, within their own majors, concentrations in mathematics and mathematics-related fields. A student interested in such a concentration should consult the Director of Undergraduate Studies of his/her major department.

The Engineering College offers a minor in applied mathematics that is open to any undergraduate in that college. The minor is sponsored jointly by the Department of Mathematics and the Department of Theoretical and Applied Mechanics, and is administered by the latter department. Engineering students interested in this minor should contact Professor Richard Rand of the Department of Theoretical and Applied Mechanics (255-7145; rhr2@cornell.edu). Information about the minor is also available at www.math.comell.edu

The Mathematics Department welcomes into its upper-level courses students from all colleges, schools, and departments at Cornell. In particular, undergraduates who wish to pursue serious study of mathematics, whether within or to complement their own major fields, are encouraged to consult with the department. The department's Director of Undergraduate Studies and other faculty can provide assistance in selecting appropriate areas of study and individual courses.

## **Distribution Requirement**

The mathematics courses that can be used to satisfy the Group II (Quantitative and Formal Reasoning) part of the Arts College distribution requirements are indicated by the symbol "(II)" next to the title of the course.

## **Basic Sequences**

#### Precalculus

Description		Courses	
1)	Algebra and trigonometry to prepare students for calculus	MATH 109* or EDUC 005°	
2)	Algebra, analytic geometry, elements of calculus	EDUC 115*	

\*MATH 109, EDUC 005, and EDUC 115 do not carry credit for graduation in the Arts College.

Students who want a second semester of mathematics after EDUC 115 may take MATH 105 or, if they need more calculus, MATH 106 or 111.

#### Calculus

De:	scription	Mathematics Courses
1)	Standard three-semester sequence for students who do not expect to take advanced courses in mathematics	111–112–213

2) Calculus for engineers (also taken by some physical science majors) 190/191-192-293-294

3) Prospective mathematics majors and others who expect to take advanced courses in mathematics: many sequences are possible. For example, 111-112-221-222; or 121-122-221-222; or 121-122-223-224; or the engineering sequence 190/191-192-293-294; or a mix of the above. There is no specifically "approved" basic sequence for mathematics majors. Students should consult with their advisers for each individual case

MATH 190 or 191 may be substituted for 111 in sequences 1 and 3. Sequences 2 and 3 are two-year sequences that include some linear algebra.

Students who take the 3-semester sequence may learn some linear algebra by taking Mathematics 231.

#### **Special-Purpose Sequences**

De	scription	Mathematics Courses	
1)	Finite mathematics and calculus for life and social science majors	105–106	
2)	Other possible finite mathematics and calculus sequence	105–111	
3)	Calculus and statistics sequences	106 <b>–</b> 171 111–171	

Students who want to take two semesters of calculus are advised to take the first two semesters of one of the three calculus sequences. Students with excellent performance in MATH 106 may follow that course with MATH 112 or 122. The courses in each of the calculus and statistics sequences may be taken in either order, since no calculus background is required for MATH 171. Each of the sequences listed here satisfies the mathematics requirement for most medical schools.

Switching between calculus sequences is often difficult, especially at the 200 level. Students should not attempt such a switch without consulting the Director of Undergraduate Studies.

## **Courses with Overlapping Content**

Because the department offers many courses with overlapping content, students must choose their courses carefully to ensure that they will receive credit for each course they take. Listed below are groups of courses with similar content. Students will receive credit for only one of the courses in each group.

106, 111, 121, 190, 191 112, 122, 192 213, 222, 224, 293 221, 231, 294 332 and 336\* 336 and 436 411 and 413 431 and 433 432 and 434

\*Credit for both MATH 332 and MATH 336 will be granted only if both were taken during or before spring 2002 or by a mathematics major graduating in or before spring 2003.

#### Fees

In some courses there may be a small fee for computer lab use or for photocopying materials to be handed out to students.

### Summer Courses

A list of mathematics courses usually offered every summer can be found in the School of Continuing Education and Summer Sessions section of this catalog. Students interested in taking summer courses in mathematics should consult the Mathematics Department website (www.math.cornell.edu). A tentative summer listing may be available as early as October.

## **Undergraduate Course Offerings**

Please visit www.math.cornell.edu for further information and up-to-the-minute corrections.

Foundation courses: 105, 106, 109, 111, 112, 121, 122, 190, 191, 192, 213, 221, 222, 223, 224, 231, 293, 294

Mathematics Education: 408, 451

History of Mathematics: 403

General and Liberal Arts Courses: 103, 171, 401, 402, 408

Analysis: 311, 413, 414, 418

Algebra and Number Theory: 332, 336, 431, 432, 433, 434, 436

Combinatorics: 441, 442

Geometry and Topology: 356, 451, 452, 453, 454, 455

Probability and Statistics: 171, 471, 472

Mathematical Logic: 281, 384, 481, 482, 483, 486

Applied Analysis and Differential Equations: 321, 323, 420, 422, 424, 425, 427, 428

#### MATH 103 Mathematical Explorations (II)

Fall, spring, summer. 3 credits. This course may be used to satisfy the distribution requirement in mathematics.

This course is for students who wish to experience how mathematical ideas naturally evolve. The homework consists of the students actively investigating mathematical ideas. The course emphasizes ideas and imagination as opposed to techniques and calculations. Topics vary depending on the instructor and are announced (www.math.cornell.edu) several weeks before the semester begins. Some assessment is done through writing assignments.

#### MATH 105 Finite Mathematics for the Life and Social Sciences (II)

Fall. 3 credits. Prerequisite: 3 years of high school mathematics, including trigonometry and logarithms.

This course is an introduction to linear algebra, probability, and Markov chains which develops the parts of the theory most relevant for applications. Specific topics include: equations of lines, the method of least squares, solutions of linear systems, matrices; basic concepts of probability, permutations, combinations, binomial distribution, mean and variance, and the normal approximation to the binomial. Examples from biology and the social sciences are used.

#### MATH 106 Calculus for the Life and Social Sciences (II)

Spring. 3 credits. Prerequisite: readiness for calculus, such as can be obtained from 3 years of high school mathematics

(including trigonometry and logarithms) or any of the following Cornell courses: MATH 105, MATH 109, or EDUC 115. MATH 111, rather than 106, is recommended for those planning to take 112.\*

Course serves as an introduction to differential and integral calculus, partial derivatives, elementary differential equations. Examples from biology and the social sciences are used.

## MATH 109 Precalculus Mathematics

Summer. 3 transcript credits only; cannot be used toward graduation. This course is designed to prepare students

for MATH 111. Algebra, trigonometry, logarithms, and exponentials are reviewed.

## MATH 111-112 Calculus

Calculus is the study of functions and processes from the point of view of how they are changing. What can we know of a function from the rate at which it changes? What is the cumulative effect of infinitely many infinitesimal changes? MATH 111 and 112 aim to provide, to students with little or no prior exposure to calculus, the knowledge that calculus is useful, in that its applications to the physical, biological, and social sciences have shaped our world, and beautiful, in that it represents a breathtaking attempt of the human mind to capture the infinitely large and the infinitely small. These courses seek to provide basic understanding, technical skills, and sample applications in various fields for the very broad range of students who take them. Topics are studied (as appropriate) by analytic, numerical, and graphical methods. These courses sometimes offer one or more sections with small-group projects. (See the Supplement to the Course and Room Roster.)

## MATH 111 Calculus I (II)

Fall, spring, summer. 4 credits. Prerequisite: MATH 109 or 3 years of high school mathematics, including trigonometry and logarithms.\*

Course topics include: functions and graphs, limits and continuity, differentiation and integration of algebraic, trigonometric, inverse trig, logarithmic, and exponential functions; applications of differentiation, including graphing, max-min problems, tangent line approximation, implicit differentiation, and applications to the sciences; the mean value theorem; and antiderivatives, definite and indefinite integrals, the fundamental theorem of calculus, substitution in integration, the area under a curve. Graphing calculators are used, and their pitfalls are discussed, as applicable to the above topics.

MATH 111 can serve as a one-semester introduction to calculus or as part of a two-semester sequence in which it is followed by MATH 112 or 122.

#### MATH 112 Calculus II (II)

Fall, spring, summer. 4 credits. Prerequisite: MATH 111 with a grade of C or better or excellent performance in MATH 106. Those who do well in MATH 111 and expect to major in mathematics or a strongly mathematics-related field should take 122 instead of 112.\*

Course focus is on integration: applications, including volumes and arc length; techniques of integration, approximate integration with error estimates, improper integrals, differential equations (separation of variables, initial conditions, systems, some applications). Also covered are infinite sequences and series: definition and tests for convergence, power series, Taylor series with remainder, and parametric equations.

#### MATH 121 Honors Calculus (II)

Fall. 4 credits. Prerequisite: 3 years of high school mathematics with average grade of A- or better, or permission of the department.\*

This is a first-semester course in calculus intended for students who have been quite successful in their previous mathematics courses. The syllabus for the course is quite similar to that of MATH 111; however, the approach is more theoretical and the material is covered in greater depth.

#### MATH 122 Honors Calculus (II)

Fall, spring. 4 credits. Prerequisite: 1 semester of calculus with a high performance or permission of the department. Students planning to continue with MATH 213 are advised to take 112 instead of this course.\*

Topics covered include: differentiation and integration of elementary transcendental functions, techniques of integration, applications, polar coordinates, infinite series, and complex numbers, as well as an introduction to proving theorems. The approach is more theoretical than in MATH 112.

#### MATH 171 Statistical Theory and Application in the Real World (II)

Fall, spring, summer. 4 credits. Prerequisite: high school mathematics.

This introductory statistics course discusses techniques for analyzing data occurring in the real world and the mathematical and philosophical justification for these techniques. Topics include: population and sample distributions, central limit theorem. statistical theories of point estimation, confidence intervals, testing hypotheses, the linear model, and the least squares estimator. The course concludes with a discussion of tests and estimates for regression and analysis of variance (if time permits). The computer is used to demonstrate some aspects of the theory, such as sampling distributions and the Central Limit Theorem. In the lab portion of the course, students learn and use computerbased methods for implementing the statistical methodology presented in the lectures. (No previous familiarity with computers is presumed.)

#### MATH 190 Calculus for Engineers (II)

Fall. 4 credits. Prerequisite: 3 years of high school mathematics, including trigonometry and logarithms.\*

Course topics include: plane analytic geometry, differential and integral calculus, and applications. This course is restricted to engineering students who have had no previous successful experience with calculus. Students who have had such experience but wish a first-semester calculus course should take MATH 191.

#### MATH 191 Calculus for Engineers (II)

Fall, spring, summer. 4 credits. Prerequisite: 3 years of high school mathematics including trigonometry and logarithms,

plus some knowledge of calculus."

Course topics include: plane analytic geometry, differential and integral calculus,

\*See the list of courses with overlapping content at the end of the introduction.

and applications. MATH 191 covers essentially the same topics as 190, but is designed for students with some previous successful experience with calculus.

## MATH 192 Calculus for Engineers (II)

Fall, spring, summer. 4 credits. Prerequisite: MATH 190 or 191.\*

Course topics include: polar coordinates, infinite series, and power series. Also covered are: vectors and calculus of functions of several variables through double and triple integrals.

#### MATH 213 Calculus III (II)

Fall, spring. 4 credits. Prerequisite: MATH 112, 122, or 192\*

Course topics include: vectors and vectorvalued functions; multivariable and vector calculus including multiple and line integrals; first- and second-order differential equations with applications; systems of differential equations: and elementary partial differential equations. This course is designed for students who wish to master the basic techniques of calculus, but whose major will not require a substantial amount of mathematics. The course may emphasize different topics in the syllabus in different semesters.

#### MATH 221 Linear Algebra and Differential Equations (II)

Fall, spring. 4 credits. Prerequisite: 2

semesters of calculus with high performance or permission of the department.\* Course covers linear algebra and differential equations. Topics include: vector algebra, linear transformations, matrices, and linear differential equations, as well as an introduction to proving theorems. This course is especially recommended for students who plan to major in mathematics or in a strongly related field.

## MATH 222 Multivariable Calculus (II)

Fall, spring. 4 credits. Prerequisite: MATH 221.\*

Course topics include: multivariable and vector differential and integral calculus, including multiple, line, and surface integrals. This course is especially recommended for students who plan to major in mathematics or in a strongly related field.

#### MATH 223 Theoretical Linear Algebra and Calculus (II)

Fall. 4 credits. Prerequisite: 2 semesters of calculus with a grade of A- or better, or permission of instructor.\*

Course topics include: vectors, matrices, and linear transformations; differential calculus of functions of several variables; inverse and implicit function theorems: quadratic forms, extrema, and manifolds; multiple and iterated integrals. MATH 223–224 provides an integrated treatment of linear algebra and multivariable calculus designed for students who have been highly successful in their previous calculus courses.

#### MATH 224 Theoretical Linear Algebra and Calculus (II) Spring. 4 credits. Prerequisite: MATH 223.\*

Spring. 4 credits. Prerequisite: MATH 223.\* Course topics include: vector fields: line integrals: differential forms and exterior derivative; work, flux, and density forms; integration of forms over parametrized domains; and Green's. Stoke's, and divergence theorems.

\*See the list of courses with overlapping content at the end of the introduction.

<sup>\*</sup>See the list of courses with overlapping content at the end of the introduction.

### MATH 231 Linear Algebra (II)

Spring. 3 credits. Prerequisite: MATH 111 or equivalent.\*

Course topics include: vectors, matrices, and linear transformations, affine and Euclidean spaces, transformation of matrices, and eigenvalues.

#### MATH 281 Deductive Logic (also PHIL 331) (II) Spring. 4 credits.

For description, see PHIL 331.

#### MATH 293 Engineering Mathematics (II)

Fall, spring, summer. 4 credits. Prerequisite: MATH 192.\*

The conclusion of vector calculus, including line integrals, vector fields, Green's theorem, Stokes' theorem, and the divergence theorem; followed by an introduction to ordinary and partial differential equations, including Fourier series and boundary value problems. May include computer use in solving problems.

#### MATH 294 Engineering Mathematics (II)

Fall, spring, summer. 4 credits. Prerequisite: MATH 192.\*

Linear algebra and its applications. Topics include matrices, determinants, vector spaces, eigenvalues and eigenvectors, orthogonality and inner product spaces; applications include brief introductions to difference equations, Markov chains, and systems of linear ordinary differential equations. May include computer use in solving problems.

#### MATH 311 Introduction to Analysis (II) Spring. 4 credits. Prerequisites: MATH 221–

222 or 293-294

Provides a transition from calculus to real analysis. Topics include: rigorous treatment of fundamental concepts in calculus: including limits and convergence of sequences and series, compact sets; continuity, uniform continuity and differentiability of functions. Emphasis will be placed upon understanding and constructing mathematical proofs.

#### MATH 321 Manifolds and Differential Forms (II)

Fall. 4 credits. Prerequisites: multivariable calculus and linear algebra as taught in MATH 221–222 or 293–294.

Topics for this course include: differential forms, exterior derivative, implicit function theorem, manifolds, orientation, boundaries, integration of forms, generalized Stokes' theorem, Hodge star operator, Laplace operator, basics of de Rham cohomology. We reexamine the integral theorems of vector calculus (Green, Gauss, and Stokes) in the light of the exterior differential calculus and apply differential forms to problems in partial differential equations, fluid mechanics and electromagnetism.

#### MATH 323 Introduction to Differential Equations (II)

Fall. 4 credits. Prerequisites: multivariable calculus and linear algebra as taught in MATH 221–222 or 293–294, or permission of instructor.

This course is intended for students who want a brief one-semester introduction to the theory of and techniques in both ordinary and partial differential equations. (Fuller introductions are given in MATH 427 and 428.) Topics for ordinary differential equations may include: initial-value and two-point boundary value problems, the basic existence and uniqueness theorems, continuous dependence on data, stability of fix-points, numerical methods, special functions. Topics for partial differential equations may include: the Poisson, heat and wave equations, boundary and initialboundary value problems, maximum principles, continuous dependence on data, separation of variables, Fourier series, Green's functions, numerical methods, transform methods.

#### MATH 332 Algebra and Number Theory (II)

Fall, summer. 4 credits. Prerequisite: MATH 221, 223, 231 or 294.\*

Course covers various topics from number theory and modern algebra, usually including most of the following: Primes and factorization, Diophantine equations, congruences, quadratic reciprocity, continued fractions, rings and fields, finite groups, and an introduction to the arithmetic of the Gaussian integers and quadratic fields. Motivation and examples for the concepts of abstract algebra are derived primarily from number theory and geometry.

#### MATH 336 Applicable Algebra (II)

Spring, summer. 4 credits. Prerequisite: MATH 221, 223, 231 or 294.\*

An introduction to the concepts and methods of abstract algebra and number theory that are of interest in applications. Covers: basic theory of groups, rings and fields and their applications to such areas as public-key cryptography, error-correcting codes, parallel computing, and experimental designs. Also covers: elementary number theory, Euclidean algorithm, prime factorization, congruences, theorems of Fermat and Euler, elementary group theory, Chinese remainder theorem, factorization in the ring of polynomials, and classification of finite fields. Applications include the RSA cryptosystem and use of finite fields to construct error-correcting codes and Latin squares.

#### MATH 356 Groups and Geometry (II)

Spring. 4 credits. Prerequisite: MATH 221, 223, 231 or 294.

Groups were introduced in the nineteenth century as the sets of symmetries of algebraic or geometric objects. This viewpoint has become central in modern mathematics. This course studies the geometry of the plane and of patterns in the plane in terms of the group of symmetries ("isometries") of the plane. Prior knowledge of group theory is not a prerequisite. The purpose of the course is to prepare students for the 400-level courses in several ways. On one hand, the course offers experience in modern algebra and geometry (including the geometry of complex numbers). It presents some very beautiful and important topics and a sense of the unity of mathematics. On the other hand, special care is taken to initiate the student into the writing of proofs and the language of mathematics. Topics include: symmetries, groups of transformations, subgroups and cosets. Homomorphisms and isomorphisms. Orbits and fixed points. Frieze groups, wallpaper groups ("2dimensional crystallographic groups") and the associated tesselations of the Euclidean plane.

\*See the list of courses with overlapping content at the end of the introduction.

#### [MATH 362 Dynamic Models in Biology (also BIOEE 362) (II)

Spring. 3 credits. Prerequisite: two semesters of introductory biology (BIO G 101–102, 105–106, 107–108, 109–110, or equivalent) and completion of the mathematics requirement for the Biological Sciences major or equivalent. Not offered 2002–2003.

For description, see BIOEE 362.]

#### MATH 401 Honors Seminar: Topics in Modern Mathematics (II)

Spring. 4 credits. Prerequisite: 2 courses in mathematics numbered 300 or higher or permission of instructor.

This course is a participatory seminar primarily aimed at introducing senior and junior mathematics majors to some of the challenging problems and areas of modern mathematics. The seminar helps students develop research and expository skills in mathematics, which is important for careers in any field that makes significant use of the mathematical sciences (i.e., pure or applied mathematics, physical or biological sciences, business and industry, medicine). The content varies from year to year.

#### [MATH 402 Smorgasbord Seminar

Fall. 1 credit. Prerequisite: 2 courses in mathematics numbered 300 or higher. S-U only. Recommended for mathematics majors. A student may only receive credit for this course once. Not offered 2002– 2003.

A lecture series by members of the Mathematics Department about current research topics, to give students a little taste of many different areas in mathematics. This course is valuable for students looking for a topic for a senior thesis and for students thinking about graduate work in the mathematical sciences.]

#### MATH 403 History of Mathematics # (II)

Spring. 4 credits. Prerequisite: 2 courses in mathematics above 300, or permission of instructor.

Survey of the development of mathematics from antiquity to the present, with an emphasis on the achievements, problems, and mathematical viewpoints of each historical period and the evolution of such basic concepts as number, geometry, construction, and proof. Readings from original sources in translation. Students are required to give oral and written reports.

## MATH 408 Mathematics in

**Perspective (II)** Spring. 4 credits. Prerequisite: consent of instructor.

The purpose of this course is for students to step back and form an overview of the mathematics they have learned. The course is intended for junior and senior mathematics majors and other undergraduates with strong backgrounds in mathematics.

#### MATH 413–414 Honors Introduction to Analysis (II)

413, fall; 414, spring. 4 credits each. Prerequisite for 413: a high level of performance in MATH 221–222, 223–224 or 293–294. Prerequisite for MATH 414: MATH 413.\*

This sequence, designed for honors students, provides an introduction to the theory of functions of real variables, stressing a rigorous

\*See the list of courses with overlapping content at the end of the introduction.

<sup>\*</sup>See the list of courses with overlapping content at the end of the introduction.

logical development of the subject rather than applications. Topics include: metric spaces, the real number system, continuous and differentiable functions, uniform convergence and approximation theorems, Fourier series, Riemann and Lebesgue integrals, calculus in several variables, and differential forms.

#### MATH 418 Introduction to the Theory of **Functions of One Complex** Variable (II)

Spring. 4 credits. Prerequisite: MATH 223-224, 311, 411 or 413 or permission of instructor.

A theoretical and rigorous introduction to complex variable theory. Topics include: complex numbers, differential and integral calculus for functions of a complex variable including Cauchy's theorem and the calculus of residues, elements of conformal mapping. Students interested in the applications of complex analysis should consider MATH 422.

#### MATH 420 Differential Equations and Dynamical Systems (II)

Fall, spring. 4 credits. Prerequisite: high level of performance in MATH 293-294, 221-222, 223-224, or permission of instructor.

Course covers ordinary differential equations in one and higher dimensions: qualitative, analytic, and numerical methods. Emphasis is on differential equations as models and the implications of the theory for the behavior of the system being modeled and includes an introduction to bifurcations.

#### MATH 422 Applied Complex Analysis (II)

Spring. 4 credits. Prerequisite: MATH 221–222, 223–224, 293–294, or 213 and 231. Course covers complex variables, Fourier transforms, Laplace transforms and applications to partial differential equations. Additional topics may include an introduction to generalized functions.

#### MATH 424 Wavelets and Fourier Series (II)

Spring, 4 credits. Prerequisite: MATH 221-222, 223-224, 293-294, or permission of instructor

Both Fourier series and wavelets provide methods to represent or approximate general functions in terms of simple building blocks. Such representations have important consequences, both for pure mathematics and for applications. Fourier series use natural sinusoidal building blocks and may be used to help solve differential equations. Wavelets use artificial building blocks that have the advantage of localization in space. A full understanding of both topics requires a background involving Lebesgue integration theory and functional analysis. This course presents as much as possible on both topics without such formidable prerequisites. The emphasis is on clear statements of results and key ideas of proofs, working out examples, and applications. Related topics that may be included in the course: Fourier transforms, Heisenberg uncertainty principle, Shannon sampling theorem, and Poisson summation formula.

#### [MATH 425 Numerical Solutions of **Differential Equations (II)**

Fall. 4 credits. Prerequisite: MATH 221-222, 223-224, or 293-294 and one course numbered 300 or higher in mathematics, or permission of instructor. Generally offered every two years. Not offered 2002-2003

Emphasis may be on numerical approximation of initial-value or two-point boundary value problems for ordinary differential equations, or on partial differential equations. A major component in the course is writing (or using) computer code to illustrate the theoretical concepts introduced.]

#### MATH 427 Introduction to Ordinary **Differential Equations (II)**

Fall. 4 credits. Prerequisite: MATH 221-222, 223-224, or 293-294 or permission of instructor.

Covers the basic existence, uniqueness, and stability theory together with methods of solution and methods of approximation. Topics include: singular points, series solutions, Sturm-Liouville theory, transform methods, approximation methods, and application to physical problems.

#### MATH 428 Introduction to Partial **Differential Equations (II)**

Spring. 4 credits. Prerequisite: MATH 221-222, 223-224, or 293-294 or permission of instructor.

Topics selected from first-order quasilinear equations, classification of second-order equations, with emphasis on maximum principles, existence, uniqueness, stability, Fourier series methods, approximation methods.

## MATH 431 Linear Algebra (II)

Fall. 4 credits. Prerequisite: MATH 221, 223, 231, or 294. Undergraduates who plan to attend graduate school in mathematics should take MATH 433-434.\*

An introduction to linear algebra, including: the study of vector spaces, linear transformations, matrices, and systems of linear equations; quadratic forms and inner product spaces; canonical forms for various classes of matrices and linear transformations.

#### MATH 432 Introduction to Algebra (II)

Spring. 4 credits. Prerequisite: MATH 332, 336, 431 or 433, or permission of instructor. Undergraduates who plan to attend graduate school in mathematics should take MATH 433-434.\*

An introduction to various topics in abstract algebra, including: groups, rings, fields, factorization of polynomials and integers, congruences, and the structure of finitely generated abelian groups. Optional topics: modules over Euclidean domains, Sylow theorems.

#### MATH 433–434 Honors Introduction to Algebra (II)

433, fall; 434, spring. 4 credits each. Prerequisite: a high level of performance in MATH 221, 223, 231, or 294. Prerequisite for MATH 434: MATH 433 or permission of instructor.

Honors version of MATH 431-432. MATH 433-434 is more theoretical and rigorous than 431-432 and includes additional material such as multilinear and exterior algebra.

#### [MATH 436 Applications of Abstract Algebra (II)

Spring. 4 credits. Prerequisites: Linear algebra (MATH 221, 223, 231, or 294 or higher). Familiarity with elementary algebra or number theory such as MATH 332 would also be helpful.\* Not offered 2002-2003.

\*See the list of courses with overlapping content at the end of the introduction.

The course is intended for students who would like to learn modern algebra and its applications outside of mathematics. There is at least as much emphasis on applications as the relevant modern algebra. Frequently the applications involve or were made possible by the advent of computers. Students who already know the modern algebra covered in the course may still find the applications of interest. Specific topics are chosen by the instructor. The algebra typically includes items drawn from: elementary number theory, polynomials and ring theory, monoids and group theory, real closed fields, algebraic combinatorics, Groebner bases, algebraic geometry, and field theory. The applications and related topics typically include items drawn from: complexity theory, coding theory, encryption, discrete and fast Fourier transform, primality testing, factoring integers and polynomials, root counting and isolation, solving systems of polynomial equations, formal language theory, and automata.

MATH 336 and 436 may overlap in choice of material. Where they overlap, the coverage in MATH 436 is of greater depth appropriate to a 400-level course. Students cannot get credit for both MATH 336 and MATH 436.]

#### MATH 441 Introduction to Combinatorics (II)

Fall. 4 credits. Prerequisite: MATH 221, 223, 231, or 294. Generally offered every two years.

Course covers enumerative combinatorics: permutation enumeration, Stirling and Bell numbers, generating functions, exponential formula, Lagrange inversion, recurrences, basic asymptotic methods, rational generating functions. Also covers basic graph theory: trees and Cayley's theorem, chromatic polynomial, eigenvalues and their application. Also considers matching theory: equivalences, marriage theorem, flow problems, totally unimodular matrices. Also considers Polya theory: action of a group on a set, Burnside lemma, DeBruijn's method, applications to graphical enumeration and algorithms.

#### [MATH 442 Introduction to Combinatorics (II)

Spring. 4 credits. Prerequisite: MATH 221, 223, 231, or 294. Generally offered every two years. Not offered 2002-2003

Course topics include: Sieves and Mobius Inversion: inclusion/exclusion and its application to enumeration and number theory; partially ordered sets, abstract Mobius inversion, rudiments of lattice theory; matroids and combinatorial geometry: rank function, circuits, bases, application to graph theory and geometry; combinatorial design: Fisher's inequality, Latin squares, Hadamard matrices, Wilson's theorem on t-designs, application to statistical design; nonconstructive methods: Ramsey's theorem, Lovasz's local lemma, random graphs, application to coding theory; and extremal set theory: Sperner's lemma, Kruskal-Katona and Erdos-Ko-Rado theorems.]

## MATH 451 Euclidean and Spherical

Geometry (11) Fall. 4 credits. Prerequisite: MATH 221, 223, 231, or 294, or permission of instructor.

Covers topics from Euclidean and spherical (non-Euclidean) geometry. A nonlecture, seminar-style course organized around student participation.

## MATH 452 Classical Geometries (II)

Spring. 4 credits. Prerequisite: MATH 221, 223, 231, or 294, or permission of instructor.

This is an introduction to hyperbolic and projective geometry-the classical geometries that developed as Euclidean geometry was better understood. For example, the historical problem of the independence of Euclid's fifth postulate is understood when the existence of the hyperbolic plane is realized. Straightedge (and compass) constructions and stereographic projection in Euclidean geometry can be understood within the structure of projective geometry. Topics in hyperbolic geometry include: models of the hyperbolic plane and relations to spherical geometry. Topics in projective geometry include: homogeneous coordinates and the classical theorems about conics and configurations of points and lines. Optional topics include: principles of perspective drawing, finite projective planes, orthogonal Latin squares, and the cross ratio.

## MATH 453 Introduction to Topology (II)

Fall. 4 credits. Prerequisite: MATH 311, 411 or 413, or permission of instructor. Course covers basic point set topology, connectedness, compactness, metric spaces, fundamental group. Application of these concepts to surfaces such as the torus, the Klein bottle, and the Moebius band.

#### MATH 454 Introduction to Differential Geometry (II)

Spring. 4 credits. Prerequisites: MATH 221–222, 223–224, or 293–294, plus at least one mathematics course numbered 300 or

above. MATH 453 is not a prerequisite. Course covers differential geometry of curves and surfaces. Also covers curvature, geodesics, and differential forms. Serves as an introduction to n-dimensional Riemannian manifolds. This material provides some background for the study of general relativity; connections with the latter are indicated.

#### [MATH 455 Applicable Geometry (II)

Fall. 4 credits. Prerequisite: a good introduction to linear algebra (such as in MATH 221, 223, 231, or 294) or permission of the instructor. It is not assumed that students know what any of the words in the following description mean. Generally offered every two years. Not offered 2002– 2003.

An introduction to the theory of n-dimensional convex polytopes and polyhedra and some of its applications, with an in-depth treatment of the case of 3-dimensions. We discuss both combinatorial properties (such as face counts) as well as metric properties (such as rigidity). Covers theorems of Euler, Cauchy, and Steinitz, Voronoi diagrams and triangulations, convex hulls, cyclic polytopes, shellability and the upper-bound theorem. We relate these ideas to applications in tiling, linear inequalities and linear programming, structural rigidity, computational geometry, hyperplane arrangements and zonotopes.]

## MATH 471 Basic Probability (II)

Fall. 4 credits. Prerequisite: MATH 221, 223, 231, or 294. May be used as a terminal course in basic probability. Topics include: combinations, important probability laws, expectations, moments, moment-generating functions, limit theorems. Emphasis is on diverse applications and on development of use in statistical applications. See also the description of MATH 671.

#### MATH 472 Statistics (II)

Spring, 4 credits. Prerequisites: MATH 471 and knowledge of linear algebra such as taught in MATH 221. Some knowledge of multivariable calculus helpful but not necessary.

Statistics have proved to be an important research tool in nearly all of the physical, biological, and social sciences. This course serves as an introduction to statistics for students who already have some background in calculus, linear algebra, and probability theory. Topics covered in the course include parameter estimation, hypothesis testing, and linear regression. The course emphasizes both the mathematical theory of statistics as well as techniques for data analysis that are useful in solving scientific problems.

#### MATH 481 Mathematical Logic (also PHIL 431) (II)

Spring. 4 credits. Generally offered every two years.

Course covers: propositional and predicate logic; classical proof procedures; completeness and compactness; decidability and undecidability; the Godel incompleteness theorem; and elements of set theory.

#### MATH 482 Topics in Logic (also PHIL 432) (II)

Fall. 4 credits. Prerequisite: 1 logic course from the Mathematics Department at the 200 level or higher, 1 logic course from the Philosophy Department at the 300 level or higher, or permission of the instructor. For description, see PHIL 432.

#### [MATH 483 Intensional Logic (also PHIL 436) (II)

Spring, 4 credits. Prerequisite: 1 logic course at the 200 level or higher from the Philosophy Department or the Mathematics Department, or permission of instructor. Not offered 2002–2003.

For description, see PHIL 436.]

#### MATH 486 Applied Logic (also COM S 486) (II)

Spring. 4 credits. Prerequisites: MATH 221–222, 223–224, or 293–294; COM S 280 or equivalent (such as MATH 332, 336, 432, 434, 436, or 481); and some additional course in mathematics or theoretical computer science.

Course covers: propositional and predicate logic; compactness and completeness by tableaux, natural deduction, and resolution. Other possible topics include: equational logic; Herbrand Universes and unification; rewrite rules and equational logic, Knuth-Bendix method and the congruence-closure algorithm and lambda-calculus reduction strategies; topics in Prolog, LISP, ML, or Nuprl; and applications to expert systems and program verification.

#### MATH 490 Supervised Reading and Research

Fall, spring. 1–6 credits. Supervised reading and research by arrangement with individual professors. Not for material currently available in regularly scheduled courses.

## Professional Level and Mathematics Education Courses

#### MATH 500 College Teaching

Fall, meets alternate weeks. 1 credit. Prerequisite: graduate student standing or permission of instructor. Among the topics covered: basic topics about teaching, such as how to plan recitations, how to prepare lesson plans for lectures, exam design and grading, syllabus planning. Also discussed: the structure of colleges and universities, jobs and tenure, professionalism, alternative teaching strategies.

#### [MATH 505 Educational Issues in Undergraduate Mathematics

Spring. 4 credits. Prerequisite: graduate standing or permission of the instructor. Generally offered every two years. Not offered 2002–2003.

This course examines various educational issues in undergraduate mathematics and the relationship of these issues to the mathematics itself. The precise choice of topics varies, but the intent is that a balance of different views be presented and discussed. There are extensive readings in the course and occasional guest lectures. Possible topics include: nature of proof and how and when to teach it, calculus "reform," teaching mathematics to school teachers, using writing, using history, alternative assessments, alternatives to lecturing, equity issues, effective uses of technology, what is mathematical understanding and how do we recognize it, what should every mathematics major know, and research in undergraduate mathematics.]

#### MATH 507 Teaching Secondary Mathematics: Theory and Practices Spring, 4 credits.

This course provides direct experience of new approaches, curricula and standards in mathematics education. Discussion of articles, activities for the secondary classroom and videotape of classroom teaching is tied to inclass exploration of math problems. Experience in the computer lab, examining software environments and their use in the mathematics classroom is included. Participants are expected to write short papers, share ideas in class and present their opinions on issues.

#### MATH 508 Mathematics for Secondary School Teachers

Fall, spring. 1–6 credits. Prerequisite: secondary school mathematics teacher, or permission of instructor. May not be taught every semester.

An examination of the principles underlying the content of the secondary school mathematics curriculum, including connections with the history of mathematics and current mathematics research.

#### **Graduate Courses**

Many of our graduate courses are topics courses for which descriptions are not included here; however, during each preenrollment period a schedule of graduate courses to be offered the following semester is posted at www.math.cornell.edu/Courses/ courses.html. This schedule includes course descriptions that are often more detailed than those included here, as well as a means for interested students to participate in the process of selecting meeting times.

#### MATH 611-612 Real and Complex Analysis

611, fall; 612, spring. 4 credits each. 611 covers: measure and integration and functional analysis. 612 covers: complex analysis, Fourier analysis, and distribution theory.

#### MATH 613–614 Topics in Analysis 613, fall; 614, spring. 4 credits each.

MATH 615 Mathematical Methods in

## Physics

Fall. 4 credits. Intended for graduate students in physics or related fields who have had a strong advanced calculus course and at least 2 years of general physics. A knowledge of the elements of finite dimensional vector space theory, complex variables, separation of variables in partial differential equations, and Fourier series is assumed. Undergraduates are admitted only with permission of instructor.

Topics are designed to give a working knowledge of the principal mathematical methods used in advanced physics. Course covers: Hilbert space, generalized functions, Fourier transform, Sturm-Liouville problem in ODE, Green's functions, and asymptotic expansions.

#### [MATH 617 Dynamical Systems

Fall. 4 credits. Generally offered every two years. Not offered 2002–2003.

Topics include: existence and uniqueness theorems for ODEs; Poincarê-Bendixon theorem and global properties of two dimensional flows; limit sets, nonwandering sets, chain recurrence, pseudo-orbits and structural stability; linearization at equilibrium points: stable manifold theorem and the Hartman-Grobman theorem; and generic properties: transversality theorem and the Kupka-Smale theorem. Examples include: expanding maps and Anosov

diffeomorphisms; hyperbolicity: the horseshoe and the Birkhoff-Smale theorem on transversal homoclinic orbits; rotation numbers; Herman's theorem; and characterization of structurally stable systems.]

## MATH 618 Smooth Ergodic Theory

Spring, 4 credits. Generally offered every two years.

Topics include: invariant measures; entropy; Hausdorff dimension and related concepts; hyperbolic invariant sets: stable manifolds, Markov partitions and symbolic dynamics; ergodic theorems; Pesin theory: stable manifolds of nonhyperbolic systems; Liapunov exponents; and relations between entropy, exponents, and dimensions.

#### [MATH 619–620 Partial Differential Equations

619, fall; 620, spring. 4 credits each. Generally offered every two years. Not offered 2002–2003. Course covers basic theory of partial differential equations.]

#### MATH 621 Measure Theory and Lebesgue Integration

Fall. 4 credits.

Course covers measure theory, integration, and Lp spaces.

## MATH 622 Applied Functional Analysis

Spring. 4 credits. Not offered every year. Course covers basic theory of Hilbert and Banach spaces and operations on them. Applications.

## [MATH 628 Complex Dynamical Systems

Fall. 4 credits. Prerequisite: MATH 418. Not offered every year. Not offered 2002–2003. Various topics in the dynamics of analytic mappings in one complex variable, such as: Julia and Fatou sets, the Mandelbrot set, Mañe-Sad-Sullivan's theorem on structural stability. Also covers: local theory, including repulsive cycles and the Yoccoz inequality, parabolic points and Ecalle-Voronin invarients, Siegel disks and Yoccoz's proof of the Siegel Brjuno theorem; quasi-conformal mappings and surgery: Sullivan's theorem on nonwandering domains, polynomial-like mappings and renormalization, Shishikura's constructin of Hermann rings; puzzles, tableaux and local connectivity problems; and Thurston's topological characterization of rational functions, the spider algorithm, and mating of polynomials.]

#### MATH 631-632-[634] Algebra

631, fall; 632, spring; 634, spring. 4 credits each. 632 and 634 offered in alternate years. 634 not offered 2002–2003.

631 covers: finite groups, field extensions, Galois theory, rings and algebras, and tensor and exterior algebra. 632 covers: Wedderburn structure theorem, Brauer group, and group cohomology. 634 covers: Dedekind domains, primary decomposition, Hilbert basis theorem, and local rings.

## MATH 649 Lie Algebras

Fall. 4 credits. Generally offered every two years.

Topics include: nilpotent, solvable and reductive Lie algebras; enveloping algebras; root systems; Coxeter groups; and classification of simple algebras.

#### [MATH 650 Lie Groups

Spring. 4 credits. Generally offered every two years. Not offered 2002–2003. Course topics include: topological groups, Lie groups; relation between Lie groups and Lie algebras; exponential map, homogeneous manifolds; and invariant differential operators.]

#### MATH 651 Introductory Algebraic Topology

## Spring. 4 credits.

Course covers fundamental group and covering spaces, and homology theories for complexes and spaces.

#### MATH 652 Differentiable Manifolds I

Fall. 4 credits. Prerequisites: advanced calculus, linear algebra (MATH 431), point-set topology (MATH 453).

This is an introduction to differential geometry and differential topology at the level of a beginning graduate student. Topics include: smooth manifolds, embeddings, tangent bundles, tensors, vector bundles, vector fields, and Frobenius' theorem. Further topics chosen by instructor from other major areas such as fibre bundles, Lie groups, connections, curvature, geodesics, Riemannian manifolds, differential forms, and de Rham cohomology.

## MATH 653 Differentiable Manifolds II

Spring, Prerequisites: MATH 652 or equivalent. Generally offered every 3–4 vears.

Advanced topics from differential geometry and differential topology selected by instructor. Examples of eligible topics include: transversality, cobordism, Morse theory, classification of vector bundles and principal bundles, characteristic classes, microlocal analysis, conformal geometry, geometric analysis and partial differential equations, and Atiyah-Singer index theorem.

## MATH 661 Geometric Topology

Fall. 4 credits.

An introduction to some of the more geometric aspects of topology and its

connections with group theory. Possible topics include: surface theory, 3-manifolds, knot theory, geometric and combinatorial group theory, hyperbolic groups, and hyperbolic manifolds.

#### [MATH 662 Riemannian Geometry

Spring. 4 credits. Generally offered every two years. Not offered 2002–2003. Course topics include: linear connections, Riemannian metrics and parallel translation; covariant differentiation and curvature tensors; the exponential map, the Gauss Lemma and completeness of the metric; isometries and space forms, Jacobi fields and the theorem of Cartan-Hadamard; the first and second variation formulas; the index form of Morse and the theorem of Bonnet-Myers; the Rauch, Hessian, and Laplacian comparison theorems; the Morse index theorem; the conjugate and cut loci; and submanifolds and the Second Fundamental form.]

## MATH 671-672 Probability Theory

671, fall; 672, spring. 4 credits each. Prerequisite: a knowledge of Lebesgue integration theory, at least on the real line. Students can learn this material by taking parts of MATH 413-414 or 621. Prerequisite for MATH 672: MATH 671.

Course topics include: properties and examples of probability spaces; sample space, random variables, and distribution functions; expectation and moments; independence, Borel-Cantelli lemma, zero-one law; convergence of random variables, probability measures, and characteristic functions; law of large numbers; selected limit theorems for sums of independent random variables; Markov chains, recurrent events; ergodic and renewal theorems; Martingale theory; and Brownian motion and processes with independent increments.

#### MATH 674 Introduction to Mathematical Statistics

Spring. 4 credits. Prerequisites: MATH 671 and OR&IE 670 or permission of instructor Topics include: an introduction to the theory of point estimation, hypothesis testing and confidence intervals, consistency, efficiency, sufficiency, and the method of maximum likelihood. Basic concepts of decision theory are discussed; asymptotic methods are introduced and developed in detail. The course is coordinated with OR&IE 670 to form the second part of a one-year course in mathematical statistics.

#### MATH 681 Logic

## Spring. 4 credits.

Course covers basic topics in mathematical logic, including propositional and predicate calculus; formal number theory and recursive functions; completeness and incompleteness theorems. Other topics as time permits.

#### [MATH 703 Topics in the History of Mathematics

Spring, 4 credits. Prerequisites: undergraduate algebra and analysis. Generally offered every two years. Not offered 2002– 2003.

Topics in the history of modern mathematics at the level of F. Klein's *Evolution of Mathematics in the 19th Century*, J. Dieudonne's *Abrege D'Histoire Des Mathematiques 1700-1900*, and G. Birkhoff's *Source Book of Classical Analysis.*]

#### MATH [711]-712 Seminar in Analysis 711, fall; 712, spring. 4 credits each. 711

not offered 2002-2003.

#### MATH 713 Functional Analysis Spring. 4 credits.

Course covers: topological vector spaces, Banach and Hilbert spaces, and Banach algebras. Additional topics selected by instructor

#### [MATH 715 Fourier Analysis

Fall. 4 credits. Generally offered every two years. Not offered 2002-2003.]

## [MATH 717 Applied Dynamical Systems (also T&AM 776)

Spring. 4 credits. Suggested prerequisite: T&AM 675, MATH 617, or equivalent. Generally offered every two years. Not offered 2002-2003.

Course topics include: review of planar (single-degree-of-freedom) systems; local and global analysis; structural stability and bifurcations in planar systems; center manifolds and normal forms; the averaging theorem and perturbation methods; Melnikov's method; discrete dynamical systems, maps and difference equations, homoclinic and heteroclinic motions, the Smale Horseshoe and other complex invariant sets; global bifurcations, strange attractors, and chaos in free and forced oscillator equations; and applications to problems in solid and fluid mechanics.]

## MATH 722 Topics in Complex Analysis

Fall. 4 credits. Not offered every year. Selections of advanced topics from complex analysis, such as Riemann surfaces, complex dynamics, and conformal and quasiconformal mapping. Course content varies.

#### MATH 728 Seminar in Partial Differential Equations

Fall, spring. 4 credits. Generally offered every two years.

## MATH 731-732 Seminar in Algebra

731, fall; 732, spring. 4 credits each.

#### MATH 735 Topics in Algebra Fall. 4 credits.

Selection of advanced topics from algebra, algebraic number theory, and algebraic geometry. Course content varies.

#### [MATH 737 Algebraic Number Theory Fall. 4 credits. Not offered 2002-2003 ]

#### MATH 739 Topics in Algebra Spring. 4 credits.

Selection of advanced topics from algebra, algebraic number theory, and algebraic geometry. Course content varies.

#### MATH 740 Homological Algebra Spring. 4 credits.

#### MATH 751-752 Seminar in Topology 751, fall; 752, spring. 4 credits each.

#### MATH 753 Algebraic Topology Fall. 4 credits.

The continuation of 651. The standard topics covered in this course most years are cohomology, cup products, Poincare duality, and homotopy groups. Other possible topics include fiber bundles, fibrations, vector bundles, and characteristic classes. The course may sometimes be taught from a differential forms viewpoint.

## [MATH 754 Topics In Algebraic Topology

Spring. 4 credits. Prerequisite: MATH 753 Generally offered every 3-4 years. Not offered 2002-2003.

A selection of more advanced topics from algebraic topology, such as spectral se-quences, K-theory, Bott periodicity, cobordism, or stable homotopy theory.]

## MATH 755-756 Topology and Geometric Group Theory Seminar

755, fall; 756, spring. 4 credits each.

## MATH 757-758 Topics in Topology

757, fall; 758, spring. 4 credits each. Selection of advanced topics from modern algebraic, differential, and geometric topology. Course content varies.

## MATH 761–762 Seminar in Geometry

761, fall; 762, spring. 4 credits each. Either 761 or 762 generally offered every year.

#### MATH 767 Algebraic Geometry Spring. 4 credits.

#### MATH 771-772 Seminar in Probability and Statistics

771, fall; 772, spring. 4 credits each.

## [MATH 774 Asymptotic Statistics

Fall. 4 credits. Prerequisites: probability theory (MATH 671-672 or equivalent, containing stochastic processes) and statistics (MATH 472 or MATH 674). Not offered 2002-2003.

Introduction to asymptotic statistical decision theory and to empirical stochastic processes. Course covers: the notion of experiment, reduction by sufficiency, equivalence classes, the Le Cam delta distance, local asymptotic normality and minimaxity, optimal rates of convergence, white noise models, the Pinsker bound, and Gaussian approximation of nonparametric experiments. Topics in empirical processes include coupling theorems, some probability metrics, entropy conditions, functional limit theorems, and Hungarian constructions.]

#### MATH 777-778 Stochastic Processes 777, fall; 778, spring. 4 credits each.

#### MATH 781-782 Seminar in Logic 781, fall; 782, spring. 4 credits each.

#### [MATH 783 Model Theory

Spring, 4 credits. Generally offered every two years. Not offered 2002-2003. An introduction to model theory at the level of the books by Hodges or Chang and Keisler.]

## MATH 784 Recursion Theory

Fall. 4 credits. Course covers: theory of effectively computable functions; classification of recursively enumerable sets; degrees of recursive unsolvability; applications to logic; hierarchies; recursive functions of ordinals and higher type objects; generalized recursion theory.

#### MATH 787 Set Theory

Spring. 4 credits. Generally offered every two years.

A first course in axiomatic set theory at the level of the book by Kunen.

## [MATH 788 Topics in Applied Logic

Fall. 4 credits. Not offered 2002-2003. This course covers applications of the results and methods of mathematical logic to other areas of mathematics and science. Topics vary each year; some recent examples are; automatic theorem proving, formal semantics of programming and specification languages,

linear logic, constructivism (intuitionism). nonstandard analysis. Students are expected to be familiar with the standard results in graduate level mathematical logic.]

MATH 790 Supervised Reading and Research

Fall, spring. 1-6 credits.

## MEDIEVAL STUDIES

- P. R. Hyams, director; F. M. Ahl, C. M. Arroyo, R. Brann, K. W. Brazell, C. Brittain,
- E. W. Browne, O. Falk, R. T. Farrell,
- A. S. Galloway, A. B. Groos, W. E. Harbert, T. D. Hill, C. V. Kaske, W. J. Kennedy,
- S. MacDonald, M. Migiel, J. M. Najemy,

- D. S. Powers, S. Senderovich, D. R. Shanzer,
- S. M. Toorawa, W. Wetherbee (emeriti:
- R. G. Calkins, A. M. Colby-Hall, J. J. John)

## Undergraduate Study in Medieval Studies

Coursework in Medieval Studies enhances the student's enjoyment and understanding of the artistic and material relics of the Middle Ages: Gregorian chant, manuscripts and stained glass windows, Gothic cathedrals, Crusader castles, and picturesque towns cramped within ancient walls. Students discover the serious realities involved in, and shaped by, Arthurian tales of brave knights and fair ladies, dungeons, dragons, and other marvels. Students can analyze and appreciate the horrors of the Black Death, triumphs in courtly love and pitched battle, swords and scimitars, caliphs and popes, fear of demons and djinns, and the reassuring presence of angels. You can study all this and more very well in English, but see below for how to acquire the medieval languages that so enhance the experience.

The period saw many of the foundational choices that have, for good and ill, made the world what it is today. Many of our current challenges in the fields of law, human rights, attitudes toward power, authority, gender relations, and sexual mores derive from the ways in which these and other questions were formulated a millennium ago. It actually makes good sense to think out your positions on today's world through study of the less complicated but intriguing medieval West, with whose successes and failures we must still contend. Serious investigation of exotic materials marks this concentration out as a unique addition to Cornell's training. The Medieval Studies Program houses a lively undergraduate association, Quodlibet, that arranges frequent lectures on medieval topics and an annual celebratory Reading of prose and poetry in many medieval languages.

The "middle" in "Middle Ages" comes from its position between antiquity and the "modern" period, in a schema created for European and Western conditions. Our concentration, however, is more properly inclusive and treats a time span from roughly the fifth century into the sixteenth and ranges from Western Europe and the Mediterranean to China and Japan. To discover the vibrant state of medieval studies today, look at the extraordinary range of scholarly, but accessible, web sites that have sprung up all over the Internet. (You can start from Cornucopia noted below.) Cornell possesses a wealth of resources to introduce students to every corner of the field.

While this concentration provides strong interdisciplinary breadth to many majors (e.g., classics, all modern languages, history, music, philosophy), and is excellent preparation for graduate study in a medieval field, science majors do well too. Many students feel bound to choose their majors with an eye to future careers and earning potential. The program provides encouragement, guidance, and an avenue for intelligent appreciation of an important part of all our pasts.

Undergraduates who wish to undertake an independent major or concentration in Medieval Studies should consult the director of the program, 259 Goldwin Smith Hall, 255–8545, medievalst@cornell.edu.

The Undergraduate Concentration in Medieval Studies shall consist of five medieval courses (at the 200 level or above) in at least two different disciplines, of which up to two may also count towards the major, and one must come from our list of approved "core courses," which are marked below with an asterisk (\*).

#### Medieval Languages

Medieval texts (like all others) become most lively and informative when read in the original, and Cornell fortunately offers many courses for students interested in acquiring the relevant skills: Classical Arabic, Medieval Hebrew, Medieval Latin, Classical Chinese, Classical Japanese, Old English, Middle English, Gothic, Old Saxon, Old High German, Middle High German, Old Norse-Icelandic, Old Irish, Middle Welsh, Old Occitan (Provençal), Old French, Medieval Spanish, Medieval Italian, Old Russian, and Old Church Slavonic.

Some medieval languages require study of a modern language (e.g., French for Old Occitan and Old French) or a classical language (Classical Latin for Medieval Latin) as background. Students interested in a concentration in Medieval Studies should begin the study of a medieval language as early as possible, so that they may be able to study texts in the original before they graduate. Students are advised to consult the sponsoring departments for information about the prerequisites for various medieval languages.

## **Graduate Study**

The Medieval Studies Program offers both an interdisciplinary and a literary comparative Ph.D. in Medieval Studies. Disciplinary fields of concentration offered within the Field of Medieval Studies are: Medieval Archaeology, Medieval History, Medieval History of Art, Medieval Literature, Medieval Music, Medieval Philology and Linguistics, and Medieval Philosophy. Information about the graduate program in Medieval Studies is contained in the catalog of the Graduate School, in a brochure on Medieval Studies available from the field coordinator, and at *Cornucopia*, the program's web site, www.arts.cornell.edu/

# Medieval Studies Courses: Graduate and Undergraduate

Courses in various aspects of Medieval Studies are offered every year in several cooperating departments, including Art History, Asian Studies, Classics, Comparative Literature, English, German Studies, History, Linguistics, Music, Near Eastern Studies, Philosophy, Romance Studies, Russian Literature, and by the Society for the Humanities. The current year's offerings are:

\*ART H 230 Monuments of Medieval Art (also RELST 230) Fall. 4 credits. P. Morin.

- CHLIT 213 Classical Chinese Fall. 3 credits. R. McNeal.
- CHLIT 307 Readings in Classical Chinese Literature Fall. 4 credits. D. Warner.
- **CLASS 244 Psyche, Ego and Self** Fall. 4 credits. C. Brittain and H. Pelliccia.
- CLASS 369 Intensive Medieval Latin Reading Summer. 4 credits. D. R. Shanzer.
- CLASS 403/703 Independent Study-Sanskrit Fall. Variable credit. C. Minkowski.
- CLASS 412 Advanced Readings in Latin Literature Spring. 4 credits. D. Shanzer.
- \*ENGL 210 Medieval Romance: Voyage to the Otherworld Spring. 3 credits. T. Hill.
- **ENGL 274** Scottish Literature Fall. 3 or 4 credits. T. Hill and H. Shaw.
- \*ENGL 310 Old English in Translation Fall. 4 credits. T. Hill.
- \*ENGL 311/611 Old English Fall. 4 credits. T. Hill.
- \*ENGL 319 Chaucer Fall. 4 credits. R. Farrell.
- ENGL 325 Culture of the Renaissance II (also ART H 351, COM L 362, FRLIT 362)

Fall. 4 credits. C. Kaske and K. Long.

- \*ENGL 372/677 Medieval and Renalssance Drama Spring. 4 credits. A. Galloway.
- \*ENGL 417/617 Early Modioval Archaeology and Literature (also ARKEO 417) Fall. 4 credits. R. Farrell.
- ENGL 603 The Roman de la Rose and its Tradition Fall, 4 credits. W. Wetherbee.
- ENGL 615 Piers Plowman Spring. 4 credits. T. Hill.
- \*FRLIT 447 Medieval Literature Spring. 4 credits. A. Colby-Hall.
- \*GERST 405 Introduction to Medieval German Literature I Fall, 4 credits. A. Groos.
- \*GERST 406 Introduction to Medieval German Literature II Spring. 4 credits. A. Groos.
- GERST 624 Seminar in Medieval German Literature: Minnesang Fall, 4 credits, A. Groos.
- \*HIST 262 The Middle Ages—An Introduction (also RELST 265) Fall. 4 credits. P. Hyams.
- HIST 322/522 History of the Samurai Fall. 4 credits. J. Piggott.

- \*HIST 350 The Italian Renaissance Spring. 4 credits. J. Najemy.
- HIST 420 Tale of the Genji in Historical Perspective Fall, 4 credits. J. Piggott.
- HIST 479 Renaissance Patronage and the Medici Spring. 4 credits. J. Najemy.
- HIST 492 Undergraduate Seminar: Medieval Chinese History (also ASIAN 492) Fall. 4 credits. C. A. Peterson.
- \*ITALL 445/645 Boccaccio Spring. 4 credits. M. Migiel.
- JPLIT 406 Introduction to Classical Japanese Fall. 4 credits. K. Selden.
- JPLIT 408 Readings in Classical Japanese Spring. 4 credits. K. Selden.
- LING 217 History of the English Language (also ENGL 217) Fall. 4 credits. W. Harbert.
- LING 315-316 Old Norse 315, fall; 316, spring. 4 credits each term. J. Sigtryggsson.
- LING 645 Gothic Fall. 4 credits. W. Harbert.
- \*MUSIC 494 Love, Sex and Song in Medieval France Fall. 4 credits. J. Peraino.
- NES 133 Introduction to Qur'anic and Classical Arabic (also RELST 133) Fall. 4 credits. R. Brann.
- NES 134 Introduction to Qur'anic and Classical Arabic II (also RELST 134) Spring. 4 credits. S. Toorawa.
- \*NES 251 Judaism, Christianity and Islam (also JWST 251, RELST 251) Fall. 3 credits. R. Brann and K. Haines-Eitzen.
- \*NES 255 Introduction to Islamic Civilization (also HIST 253, RELST 255) Fall. 3 credits. D. Powers.
- NES 313 Classical Arabic Texts (also RELST 313)
  - Spring. 4 credits. D. Powers.
- NES 314 Qur'an and Commentary (also RELST 314) Fall. 4 credits. D. Powers.
- NES 315/615 1001 Nights and Arabic

Writing Fall. 4 credits. S. Toorawa.

NES 351/651 Law, Society and Culture in the Middle East 1200-1400 (also HIST 372/652, RELST 350) Spring. 4 credits. D. Powers.

PHIL 344 History of Ethics: Ancient and Medieval Fall. 4 credits. T. Irwin.

- **PHIL 410 Latin Philosophical Texts** Spring. 4 credits. S. MacDonald.
- PHIL 612 Medieval Philosophy Spring. 4 credits. S. MacDonald.

## SANSK 251 Intermediate Sanskrit (also CLASS 251, LING 251)

Fall. 3 credits. C. Minkowski.

**SPANL 440 Medieval Spanish Literature** Fall. 4 credits. C. Arroyo.

SPANL 446 The Cross and the Crescent: Early Modern Christian Contacts with Islam (also HIST 429, NES 437) Fall. 4 credits. M. A. Garcés.

# MODERN EUROPEAN STUDIES CONCENTRATION

#### Susan Tarrow, coordinator

Students from any college may choose an undergraduate concentration in Modern European Studies to complement any major in any college. The purpose of the concentration is to provide a coherent structure for students with an interest in interdisciplinary study in the field of European studies.

The concentration has three tracks: European politics, economics, and society; modern European history; and European culture. The requirements for the concentration are:

- Competence in at least one modern European language, Romance, Germanic, or Slavic (i.e., completion of a 300-level course or equivalent with a grade of at least B-, or demonstration of an advanced level of competence in an oral proficiency interview test where available).
- 2) Completion of two interdisciplinary core courses:

#### GOVT 341/SOC 341: Modern European Society and Politics

Spring 2003. 4 credits. S. G. Tarrow.

## COM L 352/HIST 362: European Cultural History 1750–1870

Fall 2002. 4 credits. M. Steinberg.

Under certain conditions, students may be permitted to substitute other courses for those listed above.

- 3) Completion of one course in modern (post-1789) European history.
- Two additional courses in any of the three areas, which may include a senior seminar (400 level).
  - a) Courses in European and comparative politics, anthropology, sociology, women's studies, and related courses in the School of Hotel Administration, the College of Agriculture and Life Sciences, and the School of Industrial and Labor Relations.
  - b) Courses in modern European history (post-1789).
  - c) Courses in (post-1789) English and European literatures, comparative literature, semiotics, fine arts, architecture, music, philosophy, film and theatre arts, and women's studies.

Only two courses may be used to satisfy requirements for both the major and the concentration. Courses satisfying the breadth and distribution requirements in the College of Arts and Sciences, however, *may* be applied to the concentration. Students interested in completing a research project under the European Summer Research Program may apply for The Wood Fellowship in their junior year. All concentrators are encouraged to participate in the Language House Program, and to spend a semester or more in a program of study in Europe. Courses taken abroad may be applied to the concentration if they are approved for Cornell credit.

Undergraduates in the College of Arts and Sciences can major in European Studies through the Independent Major or College Scholar programs.

Departmental advisers include: D. Greenwood (anthropology); C. Otto (architecture); L. Abel (College Scholars, Independent Majors); S. Christopherson (CRP); G. Fields (economics); D. Schwarz (English); A. Schwarz (German studies); J. Pontusson (government); J. Weiss (history); C. Rosen (linguistics); M. Suñer (linguistics); N. Zaslaw (music); S. Tarrow (romance studies); G. Shapiro (Russian literature); S. G. Tarrow (sociology); D. Bathrick (theatre, film, dance)

For a list of relevant courses and seminars, and any further information, contact Susan Tarrow, coordinator of the Modern European Studies Concentration, at the Institute for European Studies, 120 Uris Hall (telephone 255–7592, e-mail SRT2@cornell.edu).

## MUSIC

R. Harris-Warrick, chair, S. Pond, director of undergraduate studies (120 Lincoln Hall, 255– 2916); L. Coral, director of graduate studies (216B Lincoln Hall, 255–7126); M. Bilson,
X. Bjerken, D. Borden, D. Conn, L. Coral,
M. Hatch, H. Hoffman, J. Hsu, J. Kellock,
P. Merrill, J. Peraino, S. Pond, A. Richards,
R. Riley, R. Sierra, S. Stucky, K. Taavola,
K. Tan, J. Webster, D. Yearsley, N. Zaslaw

Emeritus: K. Husa, S. Monosoff, R. Palmer, T. Sokol, M. Stith.

Department office: 255-4097.

Department web site: www.arts.cornell.edu/ music/

## **Musical Performance and Concerts**

Musical performance is an integral part of Cornell's cultural life and an essential part of its undergraduate academic programs in music. The department encourages music making through its offerings in individual instruction and through musical organizations and ensembles that are directed and trained by members of the faculty. Students from all colleges and departments of the university join with music majors in all of these ensembles:

Vocal ensembles Cornell Chamber Singers Cornell Chorale Cornell University Chorus Cornell University Glee Club Sage Chapel Choir

Instrumental ensembles Chamber Music Ensembles Cornell Chamber Orchestra Cornell Experimental Lab Ensemble Cornell Gamelan Cornell Jazz Ensembles Cornell Symphony Orchestra Cornell University Chamber Winds Cornell University Symphonic Band Cornell University Wind Ensemble Cornell University Wind Ensemble Cornell University Wind Symphony Information about requirements, rehearsal hours, and conditions for academic credit can be found in the following listings for the Department of Music. Announcements of auditions are posted during registration each fall term and, where appropriate, each spring term as well.

The university is also home to many studentrun musical organizations, including the Big Red Marching Band and Big Red Pep Band, the Cornell Savoyards, and several a cappella groups. Information about these groups, too, is available through the Department of Music office, 101 Lincoln Hall (255–4097).

The Department of Music and the Faculty Committee on Music sponsor more than 100 formal and informal concerts each year by Cornell's ensembles, faculty, and students and by distinguished visiting artists. The great majority of concerts are free and open to the public. Lectures and concerts are listed on the web (www.arts.cornell.edu./music/). Additional information is available through the events office (255–4760).

## **Nonmajors**

In addition to its performing, instructional, and concert activities, the department offers numerous courses for nonmajors, many of which carry no prerequisites and presuppose no previous formal training in music. Consult the following course listings, and for further information consult the department office, 101 Lincoln Hall (255–4097), or the director of undergraduate studies (255–2916).

## The Major

The major carries the study of music to an advanced level through the integration of performance, music theory, and music history. It is designed to accommodate both students who are oriented toward eventual graduate or professional work in music and those who wish to take a more general approach, often in conjunction with a major in another department.

Students contemplating a major in music should arrange for placement examinations and advising in the department as early as possible, usually during the freshman orientation period. Information is available from the director of undergraduate studies. Prerequisites for admission to the major are completion of MUSIC 152 and 154, at the latest by the end of the sophomore year (the freshman year is preferable), with an overall grade of B- or better in each course. In consultation with the director of undergraduate studies, students are expected to have chosen an adviser from among the department faculty before acceptance into the major; admission to the major is decided by the faculty as a whole. Students majoring in music then design their course of study with their adviser

Music majors must complete the Core Curriculum plus at least two electives. The Core Curriculum serves as the basis for focus in specific areas, such as composition, performance, jazz studies, vernacular music, Western art music, and Asian music. Students may, however, choose electives that reflect a more broadly-based study. Those intending to pursue graduate study or professional work in music are advised to take further courses in addition to the two required electives. The Core Curriculum is comprised of:

- 1) in music theory: MUSIC 251, 252, 253, 254
- in music history: MUSIC 207, 208, 300, 400
- in performance: four semesters of participation in a musical organization or ensemble sponsored by the department of music (MUSIC 331 through 346 and 421 through 448)

Electives: at least two from the following:

- 1) in music theory: MUSIC 451-457
- 2) in music history: All courses above and including MUSIC 374
- 3) in performance: MUSIC 321, 322, 323, 324

Honors. The honors program in music is intended to provide special distinction for the department's ablest undergraduate majors. Qualified students are invited to become candidates by the faculty early in the second semester of their junior year. As soon as possible thereafter, the student forms a committee of three or more faculty members to guide and evaluate the honors work. In their senior year, candidates enroll in MUSIC 401-402 with the chair of the honors committee as instructor. Candidates are encouraged to formulate programs that allow them to demonstrate their musical and scholarly abilities, culminating in an honors thesis, composition, or recital, to be presented not later than April 1 of the senior year. A comprehensive examination administered by the candidate's committee is held not later than May 1. The level of honors conferred is based primarily on the candidate's performance in the honors program, and secondarily on the candidate's overall record in departmental courses and activities.

## **Distribution Requirement**

College of Arts and Sciences students may apply either one or two Music Department courses toward the distribution requirement in Group 4 (humanities and the arts). Neither freshman seminars nor advanced placement credit count toward this requirement.

If one music course is counted for distribution, it must carry at least three credits, and it may not be in musical performance (MUSIC 321–322, 323–324) or in organizations and ensembles (MUSIC 331 through 346 and 421 through 448).

If two music courses are counted for distribution, they must total at least six credits, and at least one of the courses must be academic, not performance-oriented. The second "course," however, may comprise **either** up to four credits earned in performance (MUSIC 321–322, 323–324) **or** up to four credits earned in organizations and ensembles (MUSIC 331 through 346 and 421 through 448), but not both.

## Facilities

**Music Library.** The Sidney Cox Library of Music and Dance in Lincoln Hall has an excellent collection of standard research tools. Its holdings consist of approximately 130,000 books, periodicals, and scores and 55,000 sound and video recordings. Particularly noteworthy are the collections of opera from all periods; twentieth-century scores and recordings; a large microfilm collection of Renaissance sources, both theoretical and musical; and a collection of eighteenth-century chamber music. In addition, the Department of Rare Books, in the Kroch Library, houses a collection of early printed books on music and musical manuscripts.

**Concert Halls.** The Department of Music sponsors more than 100 concerts annually. Cornell's principal concert halls are Bailey Hall Auditorium (about 2,000), Alice Statler Auditorium (about 900), Sage Chapel (about 800) and Barnes Hall Auditorium (about 280).

Rchearsal Spaces. The orchestras and bands rehearse in Lincoln Hall, Bailey Hall, Barnes Hall, and Barton Hall; the Jazz Ensembles, Gamelan, and Chamber Ensembles rehearse in Lincoln Hall; and the choral ensembles are primarily quartered in Sage Chapel. Practice studios in Lincoln Hall are available for individual practice by pianists, vocalists, and instumentalists.

Thirty-five grand pianos and 22 upright or studio pianos are housed in Cornell's offices, classrooms, and rehearsal spaces. In addition, our Center for Keyboard Studies includes two concert grand pianos (Steinway and Mason & Hamlin), two eighteenth-century fortepiano replicas (copies of Johann Andreas Stein and Anton Walter), an original Broadwood grand piano from 1827, an 1824 Conrad Graf fortepiano replica, one Dowd and one Hubbard harpsichord, and a Challis clavichord.

Two chapels on campus house three distinctive organs that are available to qualified individuals for lessons and practice. These instruments include: a small Italian organ (1746); a two-manual mechanical action instrument (1972); and a three-manual symphonic organ (1941).

Digital/Electronic Equipment. A Macintosh Master studio is available for graduate student use (hours TBA) and occasional independent study use. The software used is Digital Performer, Finale, Peak, and eMagic editor/ librarians. The instruments include a Yamaha KX88 MIDI Controller keyboard, a Yamaha TX802 FM synthesizer, an E-Mu Proteus XR, a Casio FZ 10M sampler and various other synthesizers. In addition, there are four MIDI work stations with additional instruments, including a Korg M1 synthesizer and an Akai S900 sampler.

## **Introductory Courses**

Note: Class meeting times are accurate at the time of publication. If changes are necessary, the department will provide new information as soon as possible.

#### **MUSIC 100 Elements of Musical Notation**

Fall or spring, weeks 2–5. 1 credit. Prerequisite: concurrent enrollment in any 3-credit course in music and permission of instructor. D. Conn.

This four-week course, given at the beginning of each term, fulfills the requirement of basic pitch and rhythm and reading skills needed for some introductory courses and 200-level courses with prerequisites.

#### [MUSIC 101 Popular Music in America: A Historical Survey (also AM ST 105) # (IV)

Spring. 3 credits. 1-hour disc TBA. Not offered 2002–2003. S. Pond.

A survey of the history and diverse streams of popular music in America. Elementary vocabulary and techniques for describing, analyzing, and evaluating music. Covers the relationships between mainstream musics, tributaries, and side-streams, and between folk, art, and popular music.]

#### MUSIC 103 Intro to World Music I: Africa and the Americas (also LSP 100) @ (IV)

Spring. 3 credits. 1-hour disc TBA. No previous training in music required. S. Pond.

Exploration of folk, popular, and traditional musical genres of the Western Hemisphere, particularly the African diaspora. The course examines both the elements of musical styles and the features of society that influence music. Listening assignments are major components of the course.

#### MUSIC 104 Intro to World Music II: Asia @ (IV)

Fall. 3 credits. 1-hour disc to be arranged. No previous training in music required. M. Hatch.

Exploration of folk, popular, and traditional musical genres from South, Southeast, and East Asia. The course examines both the elements of musical styles and the features of society that influence music. Listening assignments are major components of the course.

#### MUSIC 105 Introduction to Music Theory (IV)

Fall, spring, or summer. 3 credits. Plus 2 hours TBA. Experience in reading music is recommended. D. Conn.

An elementary, self-contained introduction to music theory emphasizing fundamental musical techniques, theoretical concepts, and their application. Intervals, scales, triads; basic concepts of tonality; extensive listening to music in various styles; analysis of representative works of Bach, Mozart, Haydn, and Beethoven.

## [MUSIC 107 Hildegard to Handel # (IV)

Fall. 3 credits. Prerequisite: ability to read music or concurrent enrollment in MUSIC 100. Not offered 2002–2003. N. Zaslaw,

The music of Western Europe from the Middle Ages through the Baroque period. Starting from Gregorian chant and the monophonic works of Hildegard von Bingen, this course surveys composers and repertoires such as the troubadors, the Notre Dame School. Renaissance sacred polyphony, madrigals, the dance suite, concertos, cantatas, and ends in the early eighteenth century with works by Vivaldi, Bach, and Handel.]

#### MUSIC 108 Mozart to Minimalism (IV)

Spring. 3 credits. Prerequisite: ability to read music or concurrent enrollment in MUSIC 100. N. Zaslaw.

A survey of Western art music in many genres from the second half of the eighteenth century to the present. Composers whose music is studied include Haydn, Mozart, Beethoven, Schumann, Mendelssohn, Berlioz, Chopin, Wagner, Verdi, Liszt, Brahms, Mahler, Debussy, Strauss, Stravinsky, Bartok, Ives, Webern, Messiaen, Copland, Bernstein, Carter. Stucky, and Sierra.

#### MUSIC 112 Popular Song Writing (IV) Spring. 3 credits. D. Conn.

Spring, 5 creatis. D. Conn. This course is designed for those with previous song writing experience and ability to sing and perform on guitar or piano. Methods of writing and producing original material are explored and original songs composed and performed weekly. Styles of popular song writing including Rock, Pop, Country, Rhythm and Blues, and Folk are also studied and performed.

## **Music Theory**

Students contemplating the music major are strongly advised to take MUSIC 151, 152, 153, and 154 in the freshman year; in any case MUSIC 152 and 154 must be completed no later than the end of the sophomore year.

#### MUSIC 151 Tonal Theory I (IV)

Fall. 3 credits. Prerequisites: admission by departmental placement exam and concurrent enrollment in or previous credit for MUSIC 153, or equivalent. Intended for students expecting to major in music and other qualified students. K. Taavola.

Detailed study of the fundamental elements of tonal music: rhythm, scales, intervals, triads; melodic principles and 2-part counterpoint; diatonic harmony and 4-part voice leading in root position and first inversion; and analysis of phrase and period structure.

## MUSIC 152 Tonal Theory II (IV)

Spring. 3 credits. Prerequisites: MUSIC 151 and 153 or equivalent, and concurrent enrollment in or previous credit for MUSIC 154. Intended for students expecting to major in music and other qualified students. A grade of B- or better in MUSIC 152 is required for admission to the music major. K. Taavola.

Continued study of voice leading and harmonic progression, including diatonic modulation; analysis of binary and ternary forms.

#### MUSIC 153 Musicianship I

Fall. 2 credits. Prerequisite: concurrent enrollment in or previous credit for MUSIC 151. Intended for students expecting to major in music and other qualified students. 3 hrs. K. Taavola.

Sight singing: diatonic melodies in treble, alto, and bass clefs. Keyboard: scales, triads, seventh chords, short diatonic chord progressions. Dictation: intervals, rhythms; short diatonic melodies; short diatonic chorale phrases. Score reading: 2 parts using treble, alto, and bass clefs. Musical terms: tempo markings and rhythmic terminology.

#### MUSIC 154 Musicianship II

Spring. 2 credits. Prerequisite: concurrent enrollment in or previous credit for MUSIC 152. Intended for students expecting to major in music and other qualified students. A grade of B- or better in MUSIC 154, and failure in none of the individual musicianship components of the course, are required for admission to the music major. 3 hrs. K. Taavola.

Sight singing: longer melodies in 3 clefs, including diatonic modulation. Keyboard: diatonic chord progressions and sequences. Dictation: intervals, rhythms; longer melodies; chorale phrases with diatonic modulation. Score reading: 3 parts using treble, alto, and bass clefs. Musical terms: nuance and expression marks.

#### MUSIC 251 Tonal Theory III (IV)

Fall. 3 credits. Prerequisites: MUSIC 152 and 154 or equivalent, and concurrent enrollment in MUSIC 253. K. Tan. Continuation of diatonic and introduction to chromatic harmony; species counterpoint; composition in small forms.

## MUSIC 252 Tonal Theory IV (IV)

Spring. 3 credits. Prerequisites: MUSIC 251 and 253 or equivalent, and concurrent

enrollment in MUSIC 254. J. Webster. Study of and composition in larger forms, including sonata form; systematic study of chromatic harmony, voice-leading, and modulation; composition in chromatic style.

#### MUSIC 253 Musicianship III

Fall. 2 credits. Prerequisite: concurrent enrollment in or previous credit for MUSIC 251. 2 hours TBA. K. Tan.

Sight singing: melodies with chromaticism in treble, alto, tenor, and bass clefs. Keyboard: diatonic modulation, chromatic chords. Dictation: melodies with modulation; chorale phrases with secondary dominants and other chromatic chords. Score reading: 4 parts using treble, alto, tenor, and bass clefs. Musical terms: orchestral ranges, terms, clefs, and transpositions.

#### MUSIC 254 Musicianship IV

Spring. 2 credits. Prerequisite: concurrent enrollment in or previous credit for MUSIC

252. 2 hours TBA. J. Webster. Sight singing: melodies in 4 clefs, including modality and chromatic modulation. Keyboard: chromatic sequences, chromatic modulations, improvised modulations employing diatonic pivot chords. Dictation: intervals, rhythms, short melodies, and short, diatonic chorale phrases. Score reading: 4 parts, including transposing instruments. Musical terms: other terms in French, German, and Italian.

#### [MUSIC 451 Counterpoint

Spring. 4 credits. Prerequisite: MUSIC 251 or permission of instructor. Not offered 2002–2003. S. Stucky.

Composition in the polyphonic vocal style of the late Renaissance.]

#### MUSIC 452 Topics in Music Analysis (also MUSIC 602)

Spring. 4 credits. Prerequisite: MUSIC 251 or permission of instructor. J. Webster. A survey of important analytical approaches to tonal music, including thematic-motivic relations, phrase-rhythm, large-scale paragraph construction, structural-tonal voice-leading, and relations among the movements in a multimovement work.

#### **MUSIC 453 Improvisational Theory**

Spring. 4 credits. Prerequisite: MUSIC 251 or permission of instructor. P. Merrill.

or permission of instructor. P. Mernii. Study of tonal concepts in jazz improvisation including: major and minor modes, rhythmic motive development, swing feel, even eighthnote feel, phrase construction, chordal style, linear style, and ear development through performance, analysis, keyboard skill, transcription and composition.

### [MUSIC 454 Composition (IV)

Fall. 4 credits. Prerequisite: MUSIC 251 or permission of instructor. Not offered 2002– 2003. R. Sierra.

Study of music composition through the use of traditional forms such as variation and sonata. The student is required to write original pieces for solo and chamber ensembles.]

#### [MUSIC 455 Conducting (IV)

Spring. 4 credits. Prerequisite: MUSIC 251 or permission of instructor. Not offered 2002–2003. S. Tucker.

Covers fundamentals of score reading, score analysis, rehearsal procedures and conducting technique; instrumental and choral contexts.]

#### **MUSIC 456** Orchestration (IV)

Spring. 4 credits. Prerequisite: MUSIC 251 or permission of instructor. R. Sierra. Orchestration based on nineteenth- and twentieth-century models.

## MUSIC 457 20th-Century Musical Languages (IV)

Fall. 4 credits. Prerequisite: MUSIC 252 and MUSIC 254. K. Taavola.

This course examines the diverse compositional structures and styles of the Twentieth Century, developing student's skills through listening, analysis, improvisation, and short compositional assignments, as well as supplementary readings. Beginning with the expanded tonal languages of Wagner, Prokofiev, and Liszt, the course covers the modal, atonal, and serial techniques developed in the first half of the century by Debussy, Bartok, Schoenberg, Varese, Stravinsky, and others. Post-1945 use of these compositional styles will be compared and contrasted with such musical trends as minimalism, experimentalism, and aleatoric and microtonal approaches.

## **Music in History and Culture**

## MUSIC 221 History of Rock Music (also AM ST 223) (IV)

Spring. 3 credits. No previous training in music required. J. Peraino.

This course examines the development and cultural significance of rock music from its origins in blues, gospel, and Tin Pan Alley up to present-day genres of alternative rock and hip hop.

#### MUSIC 222 A Survey of Jazz (also AM ST 222) (IV)

Fall. 3 credits. Enrollment limited. S. Pond. This course addresses jazz from two perspectives: the various sounds of jazz, as well as the historical streams-musical and culturalwhich have contributed to its development. The historical focus locates jazz as an expression of culture. We investigate how jazz affects and is affected by notions of ethnicity, class, nationalism, gender, art, and genre. We examine what has changed over time and try to understand why. Throughout we focus our inquiry through listening to recordings, studying writings about music by musicians and nonmusicians, learning to listen with new ears, experiencing jazz hands-on, and collaborating to add to the body of literature on jazz.

#### MUSIC 245 Gamelan in Indonesian History and Cultures @ (IV)

Fall or spring. 3 credits. Permission of instructor. No previous knowledge of musical notation or performance experience necessary. M. Hatch.

An introduction to Indonesia through its art. Elementary techniques of performance on the Javanese gamelan; a general introduction to Indonesian history and cultures, and the socio-cultural contexts for the arts there. Several short papers and one longer research report are required.

## [MUSIC 261 Bach and Handel # (IV)

Fall. 3 credits. Prerequisite: any 3-credit course in music or permission of instructor. Not offered 2002–2003. D. Yearsley.
Bach's music, product of a provincial life, and Handel's music, product of a cosmopolitan life, are compared. Genres studied include works for keyboard instruments, chamber music, concertos, cantatas, operas, oratorios, anthems, and esoterica.]

#### [MUSIC 262 Haydn and Mozart # (IV)

Spring. 3 credits. Prerequisite: any 3-credit course in music or permission of instructor. Not offered 2002–2003. J. Webster. Music for courts, theaters, churches, concerts, dancing, marching, public and private ceremonies, and domestic use by two extraordinarily different musical personalities who were friends, is explored in its historical and socio-cultural contexts.]

#### MUSIC 263 Beethoven # (IV)

Spring. 3 credits. Prerequisite: any 3-credit course in music or permission of instructor. J. Webster.

A survey of Beethoven's life, works, and influence. While the primary focus is his musical style and its development, the course also covers social-cultural factors and the psychology and reception of genius.

#### [MUSIC 264 Musical Romantics # (IV)

Spring. 3 credits. Prerequisite: any 3-credit course in music or permission of instructor. Not offered 2002–2003. D. Rosen. This survey of music from 1815 to 1900 is divided into five segments focusing on five composers (Schubert, Berlioz, Verdi, Wagner,

and Mahler) and two or three segments on broader topics, such as musical nationalism in Russia, fin de siècle Vienna, the art song, and the history of the piano and its music.]

## MUSIC 274 Opera # (IV)

Fall. 3 credits. R. Harris-Warrick. An introduction to major works of the operatic repertory, with discussion of texts and theatrical performances as well as music. Video recordings are an integral part of the course; trips to live performances are scheduled where possible.

#### [MUSIC 275 Choral Sounds # (IV)

Spring. 3 credits. Prerequisite: ability to read music or concurrent enrollment in MUSIC 100. Not offered 2002–2003. R. Harris-Warrick.

This course examines representative works composed for group singing, primarily from the Western choral tradition, but also including folk and popular styles, from the Middle Ages to the twentieth century. Class includes discussion of performance practices as well as historical and stylistic issues, and is integrated with local concert offerings.]

## [MUSIC 276 The Orchestra and Its Music # (IV)

Spring. 3 credits. Prerequisite: any 3-credit music course or permission of instructor. Not offered 2002–2003. N. Zaslaw.

The music of, and the social structures supporting, large instrumental ensembles in the Western world, including: Italian court festivals of the sixteenth century, string bands of the seventeenth century, Lully's ascendency at Paris and Versailles, and music of Purcell, Corelli, Vivaldi, Bach, Handel, Haydn, Mozart, Beethoven, Schubert, Schumann, Mendelssohn, Berlioz, Liszt, Wagner, Brahms, Tchaikovsky, Bruckner, Mahler, Strauss, Stravinsky, Schoenberg, Webern, Bartők, Shostakovich, Messiaen, Copland, Carter, Tower, Stucky, Sierra, and others.]

## [MUSIC 277 The Piano and Its Music (IV)

Fall or spring. 3 credits. Prerequisite: 1 semester of music theory (MUSIC 105, an equivalent course, or equivalent experience) or permission of the instructors. Not offered 2002–2003. D. Rosen and M. Bilson.

Representative masterpieces of the piano repertoire from J. S. Bach to the present, placed in the context of the instruments for which they were written and the social structures mediating their production. Thus three different historical approaches are interwoven: (1) the history of music written for the piano and its predecessors, the harpsichord and clavichord; (2) the development of the piano from these predecessors, through Mozart's Stein piano, the pianos of Beethoven, Chopin, Liszt, and Brahms, up to today's Steinway; and (3) the social history of the piano.]

#### MUSIC 372 Mind and Memory (also ENGL 301, \$ HUM 301, and THETR 301) (IV)

Spring. 4 credits. J. Morgenroth. See THETR 301 for description.

## Music History Courses for Majors and Qualified Nonmajors

#### MUSIC 207 Survey of Western Music I # (IV)

Fall. 3 credits. Prerequisite: MUSIC 151/ 153, concurrent enrollment in 151/153, or permission of instructor. J. Peraino.

A survey of Western music and its social contexts from the beginning of notation (circa 900) to 1700. Topics include sacred chant, secular song, polyphony, madrigals, early opera, and the development of independent instrumental music. The course emphasizes listening and comprehension of genres and styles, and is intended for music majors and qualified non-majors.

#### MUSIC 208 Survey of Western Music II # (IV)

Spring. 3 credits. Prerequisite: MUSIC 152/ 154, concurrent enrollment in 152/154, or

permission of instructor. A. Richards. A survey of Western music and its social contexts from 1700 to the present. Topics include the decline of church music, the rise of public concerts and opera, the evolution of domestic music-making, and the influence of electronic media upon acoustical traditions. The course, which emphasizes listening and comprehension of genres and styles, is intended for music majors and qualified nonmajors.

#### MUSIC 300 Proseminar in Musicology (IV)

Spring. 4 credits. N. Zaslaw. Introduction to methods in musicology, including historiography, criticism, approaches to vernacular and non-western musics, and gender studies.

#### [MUSIC 374 Opera and Culture (also GERST 374 and ITALA 374) (IV)

Spring. 4 credits. Prerequisite: any 3-credit music course or proficiency in German or Italian. Not offered 2002–2003. A. Groos.

See GERST 374 for description.]

#### [MUSIC 381 Music in Western Europe to 1700 # (IV)

Fall. 4 credits. Prerquisite: MUSIC 152 or permission of instructor. Not offered 2002– 2003. J. Peraino.

Western European music from the Middle Ages to the early Baroque, including Gregorian chant, secular monophony, the development of polyphony, the birth of opera, and the rise of independent instrumental music.

#### [MUSIC 382 Music of the Eighteenth Century # (IV)

Spring, 4 credits. Prerequisite: MUSIC 152 or permission of instructor. Not offered 2002–2003. J. Webster.

Music in Western and Central Europe and North America from Bach, Handel, and Vivaldi to Haydn and Mozart, including comic and serious opera, church music, concert music, and social music.]

#### MUSIC 383 Music of the Nineteenth Century # (IV)

Spring. 4 credits. Prerequisite: MUSIC 152 or permission of instructor. S. Stucky. A chronological survey of nineteenth-century music from Beethoven through Puccini including reference to its cultural and historical context.

#### [MUSIC 384 Music of the Twentieth Century (IV)

Spring. 4 credits. Prerequisite: MUSIC 152 or permission of instructor. Not offered 2002–2003. S. Stucky.

Covers movements, schools, and styles in "classical" music from the turn of the century to the present. Includes extensive listening and reading assignments for historical breadth; detailed attention to representative works for analytical depth.]

#### MUSIC 386 Topics in Popular Music and Jazz (IV)

Spring. 4 credits. Prerequisite: MUSIC 152/ 154, S. Pond.

Topic: Post-Bebop Jazz to 1970. This course examines a cluster of jazz developments in the aftermath of the Bebop Revolution, from the late 1940s to the mid-1960s, from historical, cultural, and analytical viewpoints. A special focus is the complex of styles known as Hard Bop. The course also discusses the negotiation in jazz of Western European- and Africanbased aesthetics, key personalities of the time, compositional and improvisational developments, the music industry, and cultural politics of this rich period of jazz history. Throughout, we are attentive to the myriad musical streams that grew out of this time, and assess the historical importance this period has assumed in retrospect.

#### [MUSIC 388 Historical Performance Practicum # (IV)

Spring, 4 credits. Prerequisite: MUSIC 152 or permission of instructor. Not offered 2002–2003. M. Bilson.

The study of eighteenth- and nineteenthcentury instrumental performance practices, with special emphasis on the string quartets of Haydn and the piano trios of Schubert. Open to qualified performers.]

#### MUSIC 390 Culture of Renaissance II (also COM L 362, ENGL 325, HIST 364 ART H 351) # (III or IV) Fall. 4 credits. Plus discussion section.

Fall. 4 credits. Plus discussion section. C. Kaske and K. P. Long. See COM L 362 for description.

#### MUSIC 398–399 Independent Study in Music History

398, fall; 399, spring. 4 credits. Prerequisite: MUSIC 152 and permission of instructor. Staff.

Advanced study of various topics in music history. Students enrolling in MUSIC 398–399 participate in, but do not register for, an approved 200-level music history course and, in addition, pursue independent research and writing projects.

#### [MUSIC 400 Senior Seminar 4 credits. Not offered 2002–2003. Staff.]

## [MUSIC 410 Music and Monstrous

Imaginings # (IV) Fall. 4 credits. Not offered 2002–2003. A. Richards.

This seminar explores the limits of the imaginary in the eighteenth- and nineteenthcentury culture, from theories of fantasy, unreason, and "monstrous imagining" to freak shows, virtuosi, and illusionists. Focusing on visual, literary, and musical phantasmagoria, we investigate the performance of the uncanny (Paganini and devilish technical feats, Mesmer and the glass harmonica), the gendered imagination and artistic creation (pregnancy and invention), technologies of death and its representation (the guillotine and wax museum, magic lantern shows and automata). Novels by Radcliffe, Lewis, Shelley; instrumental music by C. P. E. Bach, Beethoven, Mendelssohn, Berlioz; opera by Mozart, Weber, Meyerbeer; critical texts from Addison and Steele to Freud and Foucault.1

#### MUSIC 411 The Organ in Western Culture # (IV)

Fall. 4 credits. Prerequisite: permission of instructor. A. Richards and D. Yearsley.
The oldest Western musical instrument, the organ, has the longest and richest repertory and has played a vital role in European culture for more than a millennium. This course traces the changing musical, technological, social, and political significance of the organ from Antiquity to the present day, from the Roman Coliseum to Yankee Stadium, from J. S. Bach to Jimmy Smith.

#### [MUSIC 474 Opera, History, Politics, Gender (also HIST 460, WOMNS 454, COM L 459, S HUM 459, ITALA 456) (III or IV)

Spring. 4 credits. Not offered 2002–2003. M. Steinberg and S. Stewart. See HIST 460 for description.]

#### [MUSIC 490 American Musical Theatre (also ENGL 454) (IV)

Spring. 4 credits. Not offered 2002–2003. S. McMillin.

See ENGL 454 for description.]

#### [MUSIC 492 Music and Queer Identity (IV)

Spring. 4 credits. Prerequisite: MUSIC 152 or permission of instructor. Not offered 2002–2003. J. Peraino.

Throughout history music has been associated with "otherness" in Western cultures. Appropriately, lesbian and gay individuals and communities have turned to music as a means of expressing and negotiating their "queer" identity within status-quo culture. This course examines how and why music encodes "queemess" by focusing on various musical genres (such as opera, disco, women's music, country) and composer/musicians (such as Franz Schubert, Judy Garland, David Bowie) that have become significant for various lesbian and gay communities. The course also examines the reasons behind the general popularity of queer-coded but "straightidentified" performers such as Elvis Presley, Prince, and Michael Jackson.]

#### MUSIC 493 Women and Music (also WOMNS 496) (IV)

Spring. 4 credits. Prerequisite: MUSIC 152 or permission of instructor. J. Peraino. This course introduces the students to a critical examination of women's participation in Western European and American musical traditions. The course focuses on the various subject positions and critical perspectives that women hold in examples of music and writings about music. Of primary importance are the concepts of "objective" vs. "subjective" approaches to the topic of the week. Topics include approaches to history and criticism, women composers, women performers, women as objects, women's music, drag and androgyny, and women as listeners. Students are asked to keep a journal of their reactions to the readings, listening assignments, and class discussions, and to write "objective" and "subjective" formal papers.

#### MUSIC 494 Love, Sex, and Song in Medieval France (also WOMNS 403) (IV)

Fall. 4 credits. J. Peraino. This course explores the cult of courtly love and its inextricable relationship with singing. We focus on secular music and poetry and relevant narratives of Southern and Northern France from the twelfth and thirteenth centuries, and consider issues such as constructions of gender and gender relations, music and sexuality in the Middle Ages, medieval misogyny, women's voices in courtly love lyric, the relationship of words and music, performance context, and reconstruction.

#### MUSIC 495 Sondheim & Musical Theatre (also ENGL 473, THETR 472) (IV)

Fall. 4 credits. S. McMillin. See ENGL 473 for prerequisite and description.

## **Independent Study**

#### MUSIC 301–302 Independent Study in Music

301, fall; 302, spring. Credit TBA. Prerequisite: departmental approval. Presupposes experience in the proposed area of study. Staff.

## **Honors Program**

#### MUSIC 401-402 Honors in Music

401, fall; 402, spring. 4 credits each term. Limited to honors candidates in their senior year. Staff.

## **Digital Music and New Media**

MUSIC 120 Learning Music through Digital Technology (IV) Fall or spring. 3 credits. Enrollment limited.

Fall or spring. 3 credits. Enrollment limited Prerequisite: permission of instructor. D. Borden. This course uses selected commercially available technological resources to produce live music. The student is expected to master the Macintosh computer, several music software programs, and several synthesizers using MIDI. The ability to read music is helpful but not necessary. There are no papers to write; homework is presented in three classroom concerts. The final is a live presentation of the student's final project in a concert open to the public.

#### [MUSIC 220 Learning Counterpoint through Digital Technology

Spring. 3 credits. Enrollment limited. Prerequisite: MUSIC 152 and permission of instructor. Not offered 2002–2003. D. Borden

This course is a study of traditional contrapuntal techniques from the fourteenth century to the present, with emphasis on invention and fugue. Synthesizers, samplers, MIDI, and music software are covered. There are three classroom concerts, some analysis and a final public concert.]

#### MUSIC 320 Scoring the Moving Image Using Digital Technology (IV)

Spring. 4 credits. Prerequisite: MUSIC 120 with a grade of B or higher and MUSIC 251. D. Borden.

Students learn sound design and music composition using MIDI and Digital Audio to enhance images in motion. The course is at least partially collaborative, involving students taking courses in computer animation, film, and dance. In addition, to learn techniques involving synchronizing sound to image, film clips from various sources are used as practice exercises. The final project is a public showing of film computer animation and/or dance performance using the sounds and music provided by the students in this course.

#### [MUSIC 420 Introduction to MIDI Techniques

Spring. 4 credits. Permission of instructor. Not offered 2002–2003. D. Borden. This course is an introduction to MIDI for students who are already at an advanced level in music composition. Three composition projects are completed in collaboration with film, dance, and computer animation students.]

## **Musical Performance**

Cornell faculty members offer individual instruction in voice, organ, harpsichord, piano and fortepiano, violin, viola, cello, and some brass and woodwind instruments *to those students advanced enough to do college-level work in these instruments*. Lessons are available by audition only. They may be taken either without credit or, through MUSIC 321– 322, with credit. Other instruments may sometimes be studied for credit outside Cornell, but also by audition only (see MUSIC 321h–322h).

**Lessons for beginners**. The Music Department can recommend outside teachers for those who wish to begin studying voice or an instrument. No credit is available for beginning instruction.

**Auditions**. Auditions are held at the beginning of each term for lessons for advanced students. Contact the Department of Music office (101 Lincoln Hall) for information.

Fees. The fee for a one-half hour lesson weekly, *without credit*, is \$150 per term. For a one-hour lesson (or two half-hour lessons) weekly, *without credit*, the fee is \$300. The fee in MUSIC 321–322 for a one-hour lesson (or two half-hour lessons) for credit is \$225 per term. All fees are nonrefundable once lessons begin, *even if the course is subsequently dropped*.

Scholarships. Music majors receive a scholarship of up to \$225 per term. Members of department-sponsored organizations and ensembles may, with the permission of the director of the organization, receive a scholarship of up to \$100 of the Cornell fee for the type of lessons chosen during the term. All scholarships are intended only for lessons in the student's primary performing medium. Scholarship forms, available in the Music Department office, are to be returned to the office within the first three weeks of classes.

**Practice rooms.** Practice-room fees for a room with a **grand piano** are \$75 per term for up to 10 hours weekly, with a charge of \$10 for each additional hour. A \$25 cash deposit must be made for a key to the grand piano practice rooms, \$20 of which is refunded upon return of the key. Fees for a room with either an **upright piano** or **drum set** are \$60 per term for up to 10 hours weekly, with a charge of \$8 for each additional hour, and fees for a room **without a piano** are \$25 per term for up to 10 hours weekly. The fee for use of the **pipe organs** is \$60 per term for up to 10 hours weekly. All fees are non-refundable and are not prorated.

**Earning credit for lessons**. For every four credits earned in MUSIC 321–322, the student must have earned, or currently be earning, at least three credits in another music course (excluding freshman seminars, MUSIC 321–322, 323–324, 331–343, or 421 through 448). These three credits must be earned prior to, or simultaneously with the first two credits in 321–322; they cannot be applied retroactively. Transfer credit for appropriate music courses already taken elsewhere may be used to satisfy this requirement with the approval of the department chair.

Lessons taken outside Cornell. Under certain conditions, advanced students may earn credit for lessons taken outside Cornell. An audition is required, and no credit can be granted for beginning instruction. For further information, read the description of Music 321h–322h and contact the Music Department office.

#### MUSIC 321-322 Individual Instruction in Voice, Organ, Harpsichord, Piano, Strings, Woodwinds, and Brass

Prerequisite: advanced students may register only after a successful audition with the instructor, usually scheduled during the first week of classes, and will receive credit only as described under "Earning credit". Students may register for

this course in successive years. Students, at the sole discretion of the instructor, earn two credits each term for a one-hour lesson (or two half-hour lessons) weekly accompanied by an appropriate practice schedule.

#### MUSIC 321a-322a Individual Instruction in Voice

321a, fall; 322a, spring. 2 credits each term. Prerequisite: successful audition. Limited enrollment. Attendance at weekly studio class required for *all* credit students. J. Kellock.

#### MUSIC 321b-322b Individual Instruction in Organ

321b, fall; 322b, spring. 2 credits each term. Prerequisite: successful audition. A. Richards.

#### MUSIC 321c-322c Individual Instruction in Piano

321c fall; 322c, spring. 2 credits each term. Prerequisite: successful audition. X. Bjerken, M. Bilson.

## MUSIC 321d-322d Individual Instruction in Harpsichord

321d, fall; 322d, spring. 2 credits each term. Prerequisite: successful audition. A. Richards.

#### MUSIC 321e-322e Individual Instruction in Violin or Viola

321e, fall; 322e, spring. 2 credits each term. Prerequisite: successful audition. K. Tan.

#### MUSIC 321f-322f Individual Instruction in Cello

321f, fall; 322f, spring. 2 credits each term. Prerequisite: successful audition. H. Hoffman.

#### MUSIC 321g-322g Individual Instruction in Brass

321g, fall; 322g, spring. 2 credits each term. Prerequisite: successful audition. Staff.

#### MUSIC 321h-322h Individual Instruction Outside Cornell

321h, fall; 322h, spring. 2 credits each term. Prerequisite: successful audition. All the standard orchestral and band instruments, keyboard instruments, guitar and voice may, under certain conditions, be studied for credit with outside teachers. This course is available primarily for the study of instruments not taught at Cornell and when there is limited enrollment in MUSIC 321-322. Prior approval and audition by a member of the faculty in the department is required, and credit may be earned only as described under "Earning credit," above. Additionally, a departmental petition must be completed by the end of the third week of classes. For information and a list of approved teachers, consult the department office, 101 Lincoln Hall

#### MUSIC 321i-322i Individual Instruction in Woodwinds

321i, fall; 322i, spring. 2 credits each term. Prerequisite: successful audition. D. Conn.

#### MUSIC 323–324 Advanced Individual Instruction

323, fall; 324, spring. 4 credits each term. Open only to juniors and seniors majoring in music and to graduate students. Majors whose lessons must be taken outside Cornell may apply to the department for financial assistance toward the cost of lessons; \$225 per semester is normally awarded to such students.

## **Musical Organizations and Ensembles**

Students may participate in musical organizations and ensembles throughout the year. Permission of the instructor is required, and admission is by audition only (usually at the beginning of each semester), except that the Sage Chapel Choir and the Cornell Gamelan Ensemble are open to all students without prior audition. Registration is permitted in two of these courses simultaneously and students may register in successive years, but no student may earn more than eight credits in these courses. Membership in these musical organizations and ensembles is also open to qualified students who wish to participate without earning credit.

#### MUSIC 331-332 Sage Chapel Choir

331, fall or summer; 332, spring. 1 credit. No audition for admission. R. Riley. Open to all students and members of the university. Varied and demanding repertoire. The Sage Chapel Choir sings regularly in the Sunday Service of Worship which is broadcast on 870 WHCU-AM radio, and on special occasions throughout the year.

#### MUSIC 333-334 Cornell Chorus

333, fall; 334, spring. 1 credit. Prerequisite: permission of instructor. Staff.

A treble-voice chorus specializing in music for women's voices and in mixed-voice repertory.

#### MUSIC 335–336 Cornell University Glee Club

335, fall; 336, spring. 1 credit. Prerequisite: permission of instructor. T. Sokol.A male-voice chorus specializing in music for men's voices and in mixed-voice repertory.

#### MUSIC 337 Wind Symphony

Fall. 1 credit. Prerequisite: permission of instructor. D. Conn.

#### MUSIC 338 Symphonic Band

Spring. 1 credit. Prerequisite: permission of instructor. D. Conn.

#### MUSIC 339–340 Jazz Lab Ensemble

339, fall; 340, spring. 1 credit. Prerequisite: permission of instructor. P. Merrill. Study and performance of classic and contemporary big band literature.

#### **MUSIC 342 Wind Ensemble**

Spring, 1 credit. Prerequisite: permission of instructor. D. Conn.

#### MUSIC 343–344 Cornell Symphony Orchestra

343, fall; 344, spring. 1 credit. Prerequisite: permission of instructor. J. Hsu.

#### MUSIC 345–346 Introduction to the Gamelan

345 fall; 346 spring. 1 credit. Enrollment limited. Prerequisite: permission of instructor. M. Hatch.

Concentrated instruction for students in advanced techniques of performance on the Indonesian *gamelan*.

## MUSIC 421-422 Cornell Chamber

**Orchestra** 421, fall; 422 spring. 1 credit. Prerequisite: permission of instructor. X. Bjerken. Study and performance of the chamber symphonies of Haydn, Mozart, and their

## MUSIC 437-438 Chamber Winds

contemporaries.

437, fall; 438, spring. 1 credit each term. Prerequisites: enrollment in Symphonic Band, Wind Symphony or Wind Ensemble in the same semester as this course AND

permission of instructor only. D. Conn. Flexible instrumentation ensembles perform original woodwind, brass, and percussion music from Gabrieli brass choirs and Mozart serenades through more contemporary works such as Stravinsky's Octet and new music premieres. The ensembles participate in Wind Symphony, Symphonic Band, and Wind Ensemble concerts in addition to several chamber concerts throughout the year.

#### MUSIC 439–440 Jazz Ensemble

439, fall; 440, spring. 1 credit. Prerequisite: permission of instructor. P. Merrill. Study and performance of classic and contemporary big band literature.

#### MUSIC 441–442 Chamber Music Ensemble

441, fall; 442, spring. 1 credit. Prerequisite: permission of instructor. Coordinator: K. Tan.

Study and perform chamber music works from duos to octets for pianists, string, and wind players.

#### MUSIC 443-444 Chorale

443, fall; 444, spring. 1 credit each term. Prerequisite: permission of instructor. Staff. Study and performance of selected choral music for mixed voices.

#### MUSIC 445-446 Cornell Gamelan Ensemble

445, fall; 446, spring. 1 credit each term. Enrollment limited. Prerequisite: permission of instructor. M. Hatch.

Advanced performance on the Javanese *gamelan*. Tape recordings of *gamelan* and elementary number notation are provided. Some instruction by Indonesian musicians is offered in most years.

#### MUSIC 447-448 Chamber Singers

447, fall; 448, spring. 1 credit each term. Prerequisite: permission of instructor. Plus 2 hours TBA. Staff.

A mixed-voice chamber choir specializing in Renaissance and twentieth-century music.

## **Graduate Courses**

Open to qualified undergraduates with permission of instructor.

#### MUSIC 601 Introduction to Bibliography and Research

Fall. 4 credits. L. Coral.

This course explores the nature of the discipline and introduces the many types of bibliographic tools, both printed and electronic, needed to pursue research in music.

#### MUSIC 602 Analytical Technique (also MUSIC 452)

Spring. 4 credits. J. Webster. A critical survey of various analyical methods in current use. Frequent analytical assignments and class presentations.

[MUSIC 603 Editorial Practice Spring. 4 credits. Not offered 2002–2003.]

#### MUSIC 604 Ethnomusicology: Areas of Study and Methods of Analysis

Spring. 4 credits. Open to graduate students in anthropology, linguistics, psychology, sociology, and other cognate fields with permission of instructor. S. Pond.

Topic: current issues in ethnomusicology.

#### MUSIC 622 Historical Performance Practicum

Spring. 4 credits. M. Bilson. The study of eighteenth- and nineteenthcentury instrumental performance practices, with special emphasis on the string quartets of Haydn and the piano trios of Schubert. Open to qualified performers.

#### [MUSIC 653 Topics in Tonal Theory and Analysis

Spring. 4 credits. Not offered 2002–2003. J. Webster.]

#### [MUSIC 654 Topics in Post-Tonal Theory and Analysis

Spring. 4 credits. Not offered 2002-2003.]

#### MUSIC 657–658 Composition

657, fall; 658, spring. 4 credits each term. F 1:25–4:00 p.m. plus 1 hour TBA. R. Sierra, S. Stucky.

## [MUSIC 674 German Opera (also GERST 672)

Spring. 4 credits. Not offered 2002–2003. A. Groos.

See GERST 672 for description.]

#### [MUSIC 677 Mozart: His Life, Works, and Times (also GERST 757)

Spring. 4 credits. Not offered 2002–2003. N. Zaslaw.]

#### [MUSIC 680 Topics in Ethnomusicology Spring. 4 credits. Not offered 2002–2003. S. Pond.]

## [MUSIC 681 Seminar in Medieval Music

Fall. 4 credits. Not offered 2002–2003. J. Peraino.

Topic: Medieval Music and Notation.]

## [MUSIC 683 Music and Postmodern

**Critical Theory** Fall. 4 credits. Not offered 2002–2003.

J. Peraino. This course surveys the many critical theories that have been included under the umbrella of "postmodernism," and that have fueled the debate between "old" and "new" styles of musicology. Readings focus on structuralism and poststructuralism, feminist literary criticism, queer theory, and postmodern and postcolonialism, and their application in musicology and ethnomusicology. A broad spectrum of music is examined along with the readings.]

## [MUSIC 684 Seminar in Renaissance

Fall. 4 credits. Not offered 2002–2003. R. Harris-Warrick.]

#### MUSIC 686 Seminar In Baroque Music Spring. 4 credits. R. Harris-Warrick.

Topic: French opera from Lully to Gluck.

#### [MUSIC 688 Seminar in Classical Music Fall. 4 credits. Not offered 2002–2003. J. Webster.Topic: Haydn.]

#### MUSIC 689 Seminar in Music of the Romantic Era

Fall. 4 credits. J. Webster. Topic: Instrumental music in the larger forms.

#### MUSIC 690 Seminar in Music of the Twentieth Century

Fall. 4 credits. S. Stucky. Topic: Lutoslawski.

Topic. Eurosiaws

#### MUSIC 691-692 Historical Performance

691, fall; 692, spring. 4 credits each term. Prerequisite: permission of instructor. M. Bilson.

Lessons on the major instrument with supplementary study and research on related subjects.

#### [MUSIC 693 Seminar in Performance Practice

Spring. 4 credits. Not offered 2002–2003. N. Zaslaw.

String bands, orchestral discipline, and orchestral repertories in Paris and Versailles in the seventeenth century and their dissemination in Western Europe. Special emphasis on the music and prefaces of Georg Muffat.]

#### MUSIC 697–698 Independent Study and Research

697, fall; 698, spring. Credit TBA. Staff.

[MUSIC 785-786 History of Music Theory 785, fall; 786, spring. 4 credits each term. Not offered 2002–2003.]

## [MUSIC 787 History and Criticism

Spring. 4 credits. Not offered 2002–2003. A. Richards.

Topic: 18th and early 19th-century aesthetics and criticism of fantasy. Fantasy, in European musical thought in the late 18th century, is a conflicted and troubled concept. Both celebrated for its freedoms, and castigated for its potential lack of coherence, the fantasy occupies a privileged place in the composed repertoire, and in the performance practice of the period. This seminar explores music by C. P. E. Bach, Mozart, Haydn, and Beethoven in the context of German and English criticism by such writers as Avison, Cramer, Forkel, Burney, Schubart, and Schlegel. Our aim is to explore the ways in which the fantasy and its attendant criticism both shaped and were shaped by broader aesthetic theory, and can function as a vehicle for reflections on the sublime, beautiful, and picturesque in music.]

#### [MUSIC 789 Liturgical Chant in the West

Spring. 4 credits. Not offered 2002-2003.]

#### MUSIC 901-902 Thesis Research

901, fall; 902, spring. Up to 6 credits each term, TBA. Offered for S-U only. Limited to doctoral students in music who have passed the Admission-to-Candidacy Exam.

## NEAR EASTERN STUDIES

R. Brann, (chair); W. T. Dickens, K. Haines-Eitzen (director of Undergraduate Studies), C. Mitchell, D. I. Owen, (director of the Program of Jewish Studies); D. Powers, A. Rahmouni, G. Rendsburg, N. Scharf, S. Shoer, D. Starr, S. Toorawa (director of Graduate Studies), M. Younes, J. Zorn Joint faculty: M. Bernal (Emeritus)

#### The Department

The Department of Near Eastern Studies (360 Rockefeller Hall, 255–6275) offers courses in Near Eastern civilization including archaeology, history, religions, languages, and literatures. These course offerings treat the Near East from the dawn of history to the present and emphasize methods of historical, cultural, and literary analysis. Students are encouraged to take an interdisciplinary approach to the religions and cultures of the region and their articulation during antique, late antique, medieval, and modern times.

#### **Distribution Requirements**

Any two Near Eastern Studies history or archaeology courses at the 200, 300, or 400 level that form a reasonable sequence or combination satisfy the distribution requirement in the social sciences/history. Any two Near Eastern Studies civilization or literature courses at the 200, 300, or 400 level that form a reasonable sequence or combination satisfy the distribution requirement in the humanities. NES 197 or NES 251 plus any other Near Eastern studies course will constitute a sequence to fulfill the distribution requirement in either social sciences/history or humanities, depending on the second course used in combination with 197 or 251. All 200- or 300level language courses may fulfill the humanities requirement.

## The Major

The precise sequence and combination of courses chosen to fulfill the major is selected in consultation with the student's adviser. All majors must satisfy the following requirements (no course may be used to satisfy two requirements; S-U options not permitted):

- A. Qualification in two Near Eastern languages or proficiency in one.
- B. Nine three- or four-credit NES courses, which must include the following:
  - 1. NES 197 or 251.
  - 2. Two 200-level NES survey courses, one whose chronological parameters fall within the period 3000 B.C.E to 600 C.E., and one whose chronological parameters fall within the period 600 C.E. to the present. The following are examples (a complete list can be obtained in the department office):

3000 B.C.E to 600 C.E.

NES 223, Introduction to the Hebrew Bible

NES 261, Ancient Seafaring

NES 229, Introduction to the New Testament

NES 295, Introduction to Christian History

600 C.E. to the present

NES 235, Jews and Arabs in Contact and Conflict: The Modern Period

NES 250, Muhammad and Mystics in the Literatures of the Islamic World

NES 258, Islamic History 1258-1914

NES 294, Modern History of the Near East

3. At least two NES courses at the 300 level or above (one of which may be NES 301, 302, 311, or 312).

Prospective majors should discuss their plans with the director of undergraduate studies before formally enrolling in the department. To qualify as a major, a cumulative grade average of C or better is required.

**Honors.** Candidates for the degree of Bachelor of Arts with honors in Near Eastern Studies must fulfill the requirements of the appropriate major study and enroll in the honors course, NES 499, in the fall and spring semesters of their senior year. For admission to the honors program, candidates must have a cumulative average of B+ or better and have demonstrated superior performance overall in Near Eastern Studies courses. After consulting their major adviser, candidates should submit a proposal to their committee members and the Director of Undergraduate Studies **during the second semester of their junior year**. The Near Eastern Studies main office has more specific guidelines for the honors thesis.

**Study abroad.** Near Eastern Studies majors may choose to study in the Near East during their junior year. There are various academic programs in the countries of the Near East that are recognized by the Department of Near Eastern Studies and that allow for the transfer of credit. Archaeological field work on Cornell-sponsored projects in the Near East may also qualify for course credit.

## **First-Year Writing Seminars**

For descriptions, consult the John S. Knight Institute brochure for times, instructors, and descriptions.

## Language Courses

#### NES 101–102 Elementary Modern Hebrew I and II (also JWST 105–106)

101, fall; 102, spring. 6 credits each term. *NES 102 satisfies the language qualification.* Prerequisite for NES 102: 101 or permission of instructor. Enrollment limited

to 17 students in each section. S. Shoer. Intended for beginners. This course provides a thorough grounding in reading, writing, grammar, oral comprehension, and speaking. Students who complete the course are able to function in basic situations in a Hebrewspeaking environment.

#### NES 105–106 Elementary Hindi-Urdu (also HINDI 101–102)

Fall, spring. 6 credits each term. M. Farooqi.

For description, see HINDI 101-102.

#### NES 107 Introduction to Urdu Script (also HINDI 125)

Spring. 1 credit. M. Farooqi. For description, see ASIAN 125.

#### NES 111–112 Elementary Arabic I and II 111, fall; 112, spring. Enrollment limited to 17 in each session. 6 credits each term. *NES 112 provides language qualification.* NES 111 is prerequisite for 112, or

permission of instructor, M. Younes The course provides a thorough grounding in all language skills: listening, speaking, reading, and writing. It starts with spoken Arabic and gradually integrates Modern Standard Arabic in the form of listening and reading texts. Emphasis is on learning the language through using it in meaningful contexts. Students who successfully completes the two-semester sequence are able to: (1) understand and actively participate in simple conversations involving basic practical and social situations (introductions, greetings, school, home and family, work, simple instructions, etc.); (2) read Arabic material of limited complexity and variety (simple narrative and descriptive texts, directions, etc.); (3) write notes and short letters describing an event or a personal experience. An important objective of the course is to familiarize students with basic facts about the geography, history, and culture of the Arab world.

#### [NES 123–124 Elementary Biblical Hebrew I and II (also JWST 123–124, RELST 123–124)

123, fall; 124, spring. 3 credits each term. *NES 124 provides language qualification.* Enrollment limited to 17 students. Not offered 2002–2003. Staff.

The course is intended to develop basic proficiency in reading the Hebrew Bible. The first semester emphasizes introductory grammar and vocabulary. The second semester focuses on reading selected passages in the Hebrew Bible, with further development of vocabulary and grammar.]

#### NES 133–134 Introduction to Qur'anic and Classical Arabic (also RELST 133–134)

133, fall, R. Brann; 134, spring, S. Toorawa. 4 credits each semester. *NES 134 provides language qualification*.

This course is designed for students who are interested in reading the language of the Qur'an and Hadiths (Sayings of the Prophet) with accuracy and understanding. Authentic texts in the form of chapters from the Our'an and Hadiths are presented and analyzed, and basic grammatical structures are discussed, explained, and practiced systematically. Interested students are encouraged to memorize excerpts from the texts. At the end of the two-semester sequence, the successful student has mastered a working vocabulary of over 1,000 words, correct pronunciation, and the most commonly used grammatical structures. In addition, the course provides the student with a firm foundation on which to build an advanced study of Classical Arabic.

#### NES 201-202 Intermediate Modern Hebrew I and II (also JWST 201-202) @

201, fall; 202, spring. Enrollment limited to 15 students in each section. 4 credits each term. *NES 201 provides language proficiency*. Prerequisites for NES 201, 102 or permission of instructor; for NES 202, 201 or permission of instructor. N. Scharf.

A sequel to NES 101–102. Continued development of reading, writing, grammar, oral comprehension, and speaking skills. The course introduces Hebrew literature and Israeli culture through the use of texts and audio-visual materials.

## NES 211-212 Intermediate Arabic I and

211, fall; 212, spring. Enrollment limited to 15 students in each section. 4 credits each term. *NES 211 provides language proficiency*. Prerequisites: for NES 211, one year of Arabic or permission of instructor; for NES 212, 211 or permission of instructor. M. Younes.

A sequel to NES 111–112. Continued development of the four language skills through extensive use of graded materials on a wide variety of topics. Increasing attention is given to developing native-like pronunciation and grammatical accuracy, but the main focus is on developing communication skills. The student who successfully completes 212 is able to: (1) understand and express himself or herself in Arabic in situations beyond the basic needs; (2) read and comprehend written Arabic of average difficulty; (3) write a letter, a summary of a report, or a reading selection. An appreciation of Arabic literature and culture is sought through the use of authentic materials.

#### NES 301-302 Advanced Modern Hebrew I and II (also JWST 301-302) @ (IV)

301, fall; 302, spring. Limited to 15 students. 4 credits each term. Prerequisite for NES 301: 202 or equivalent, with permission of instructor. Prerequisite for NES 302: 301 or equivalent, with permission of instructor. This sequence may be used to fulfill the humanities distribution requirement in literature. N. Scharf.

Advanced study of Hebrew through the analysis of literary texts and expository prose. This course employs a double perspective: language is viewed through literature and literature through language. Students develop composition skills by studying language structures, idioms, and various registers of style.

#### NES 311 Advanced Intermediate Arabic I @ (IV)

Fall. 4 credits. Prerequisite: NES 212 or permission of instructor. Limited to 15 students. S. Toorawa.

Students are introduced to authentic, unedited Arabic language materials ranging from poems, short stories, and plays to newspaper articles dealing with social, political, and cultural issues. Emphasis is on consolidation of reading and writing skills.

#### **NES 312 Advanced Intermediate Arabic** II @ (IV)

Spring, 4 credits. Limited to 15 students. Prerequisite: NES 311, or permission of instructor. D. Starr.

Students are introduced to authentic, unedited Arabic language materials ranging from poems, short stories, and plays to newspaper articles dealing with social, political, and cultural issues. Emphasis will be on developing fluency in oral expression through discussions of issues presented in the reading selections. A primary objective of the course is the development of writing skills through free composition exercises in topics of interest to individual students.

## NES 313 Classical Arabic Texts (also RELST 313) # @ (IV) Spring. 4 credits. Prerequisite: NES 212 or

equivalent. D. Powers.

This course will introduce students to different genres of literary Arabic. We read, translate and discuss selected texts written in classical and modern standard Arabic. Review of morphology and grammar.

## NES 314 Qur'an and Commentary (also **RELST 314) #@(IV)** Fall. 4 credits. D. Powers.

This course is an advanced study of classical Arabic through a close reading of selected chapters of the Qur'an, together with the Our'anic commentary (tafsir) and other relevant literature. Special attention is given to grammar, syntax, and lexicography.

#### [NES 330-331 Hieroglyphic Egyptian I and II (IV)

330 fall: 331 spring@ #. 4 credits. NES 331 provides language qualification. Not offered 2002-2003. Staff.]

#### NES 333-334 Elementary Akkadian I & II (also NES 633-634) (IV)

333, fall: 334, spring. 4 credits each term. Prerequisite for NES 334: 333 or permission of instructor. Prerequisite for NES 634: 633 or permission of instuctor. A. Rahmouni.

An introduction to the Semitic language of the Akkadians and Babylonians of ancient Mesopotamia. Utilizing the inductive method, students are rapidly introduced to the grammar and the cuneiform writing system of Akkadian through selected readings in the Code of Hammurapi, the Descent of Ishtar, and the Annals of Sennacherib. Secondary readings in comparative Semitic linguistics, the position of Akkadian in the family of Semitic languages and on the history and culture of Mesopotamia provide a background for study of the language. Knowledge of another Semitic language is helpful but not essential.

#### [NES 337-338 Ugaritic I & II (also NES 637-638) @ # (IV)

337, fall; 338, spring. 4 credits. Prerequisite: knowledge of another Semitic language (preferably Hebrew). Not offered 2002-2003. G. Rendsburg.

Study of the language and literature of ancient Ugarit, an important site in northern Canaan. Special attention is paid to the relationships between Ugaritic and Hebrew and between Canaanite literature and the Bible.]

#### NES 420 Readings in the Biblical Hebrew Prose (also JWST 420, RELST 420) @ # (IV)

Fall. 4 credits. Provides language proficiency. Prerequisite: 1 year of biblical or modern Hebrew. Course may be repeated for credit. G. Rendsburg. An advanced course in reading selected

portions of the Hebrew Bible. Emphasis is placed on the philological method, with attention to literary, historical, and comparative concerns.

#### [NES 433 Introductory Sumerian I (also NES 631) @ # (IV)

Fall. 4 credits each semester. Prerequisite: permission of instructor. Not offered 2002-2003. D. I. Owen.]

#### [NES 434 Introductory Sumerian II (also NES 632) @ # (IV)

Spring, 4 credits each semester. Provides language qualification. Prerequisite: NES 433/631. Not offered 2002-2003. D. I. Owen

Continued study of Sumerian grammar and syntax; further readings in selected Sumerian economic, legal, and historical inscriptions of the late third millennium B.C.E.; additional discussion of Sumerian civilization and culture.]

#### [NES 435 Aramaic 1 @ # (IV)

Fall, 4 credits. Prerequisite: knowledge of Hebrew. Enrollment limited to 15 students. Not offered 2002-2003. G. Rendsburg.

A panoply of Aramaic materials is read during the course, including selections from ancient Aramaic inscriptions, the biblical books of Ezra and Daniel, Qumran texts, and the Targumim. Explanations of grammar, syntax, and vocabulary are based on the linguistic data which occur in the readings.]

## NES 625 West Semitic Inscriptions

Fall. 4 credits. G. Rendsburg. A study of the major inscriptions of the West Semitic languages of the Iron Age. These include texts in Hebrew, Aramaic, Phoenician. Ammonite, Moabite, and Edomite.

#### [NES 631 Introductory Sumerian I (also **NES 4331**

Fall. 4 credits. Prerequisite: permission of instructor. Not offered 2002-2003. D I Owen

For description, see NES 433 under Near Eastern Languages.]

#### **[NES 632 Introductory Sumerian II (also NES 434)**

Spring. 4 credits. Prerequisite: permission of instructor. Not offered 2002-2003. D. I. Owen.

For description, see NES 434 under Near Eastern Languages.]

#### NES 633-634 Elementary Akkadian I and II (also NES 333-334)

633, fall; 634, spring. 4 credits each term. Prerequisite for NES 634: 633 or permission of instructor. A. Rahmouni.

An introduction to the Semitic language of the Akkadians and Babylonians of ancient Mesopotamia. Utilizing the inductive method, students are rapidly introduced to the grammar and the cuneiform writing system of Akkadian through selected readings in the

Code of Hammurapi, the Descent of Ishtar, and the Annals of Sennacherib. Secondary readings in comparative Semitic linguistics, the position of Akkadian in the family of Semitic languages and on the history and culture of Mesopotamia provide the background for the study of the language. Knowledge of another Semitic language helpful but not essential.

#### INES 637-638 Ugaritic I and II (also NES 337-3381

637, fall; 638, spring. 4 credits. Prerequisite: knowledge of another Semitic language (preferably Hebrew). Not offered

2002-2003. G. Rendsburg. Study of the language and literature of ancient Ugarit, an important site in northern Canaan. Special attention is paid to the relationships between Ugaritic and Hebrew and between Canaanite literature and the Bible.]

## Archaeology

#### [NES 261 Ancient Seafaring (also ARKEO 275, JWST 261) @ # (III)

Fall, 3 credits. Enrollment limited to 80 Students. Not offered 2002-2003. D. I. Owen.]

#### NES 263 Introduction to Biblical History and Archaeology (also ARKEO 263, JWST 263, and RELST 264) @ # (III) Spring. 3 credits. J. Zorn.

A survey of the principal archaeological developments in Canaan/Israel from the Neolithic period (ca 9000 B.C.E.) to the Babylonian Exile (586 B.C.E.). Includes an introduction to archaeological methodology used in the reconstruction of ancient cultures. as well as the basic bibliography of the field. Emphasis is placed on the use of archaeological data for understanding major problems in Israelite history and archaeology: such as the dating of the cultural milieu of the patriarchs, the dating and geographical setting of the Exodus and the Israelite conquest, and the origin and history of the Philistines. Special lectures are devoted to topics such as: warfare, cult, food production and storage, writing, and water systems. Recommended for students planning to participate in excavations in Israel.

#### **NES 266** Jerusalem Through the Ages (also JWST 266, ARKEO 266, and RELST 266) # @ (III)

Fall. 3 credits. J. Zorn.

Jerusalem is a holy city to the adherents of the three great monotheistic faiths: Judaism, Christianity, and Islam. For most of its existence it has also been a national capital or major provincial center for the many states and empires that vied for control of the vital land bridge connecting Africa, Europe, and Asia. Thus many of the pivotal events that shaped western civilization were played out in the streets and structures of Jerusalem. This class will explore the history, archaeology, and natural topography of Jerusalem throughout its long life, from its earliest remains in the Chalcolithic period (ca. 4000 B.C.E.) to the 19th century, including Jebusite Jerusalem, Jerusalem as the capital of the Davidic dynasty, the Roman era city of Herod and Jesus, the Crusaders and medieval Jerusalem, and Ottoman Jerusalem as the city entered the modern era. Students will examine the original historical sources (e.g., the Bible, Josephus, the Madeba map, etc.) which pertain to Jerusalem. Slides and videos will be used to illustrate the natural features, manmade monuments, and artifacts that flesh out the textual material providing a fuller image of the world's most prominent spiritual and secular capital.

#### [NES 360 The Origins of Mesopotamian Civilization (also JWST 360, ARKEO 360) @ # (III or IV)

Fall. 4 credits. Not offered 2002–2003. D. I. Owen.

An introduction to the language, literature, history, culture and archaeology of Syro-Mesopotamia in the fourth and third millennia B.C.E. The course focuses on Sumerian civilization from its emergence in the archaeological record in the fourth millennium until its disappearance around 2000 B.C.E. In addition, it emphasizes the parallel development of the Semitic peoples in Syria (Eblaites) and upper Mesopotamia (Akkadians). A special feature of the course will be a basic introduction to the Sumerian language utilizing original cuneiform tablets in the collection of the Department of Near Eastern Studies.]

#### [NES 361 Sumerian Language and Culture (also JWST 361, ARKEO 361) @ # (IV)

Spring. 4 credits. Not offered 2002–2003. D. I. Owen.

A continuation of NES 360, the course focuses on a more intense introduction to Sumerian language and grammar with additional readings in literature in translation. Particular emphasis is placed on the reading and interpretation of original texts from the Cornell collection and their use in the reconstruction of Mesopotamian history and culture in the third millennium.]

#### [NES 366 The History and Archaeology of the Ancient Near East (also ARKEO 366, JWST 366) @ # (III or IV)

Fall. 4 credits. Prerequisite: ARKEO 100 or permission of instructor. Not offered 2002– 2003. D. I. Owen.]

## **Civilization**

#### [NES 197 Introduction to Near Eastern Civilization (also JWST 197 and RELST 197) @ # (IV)

Fall. 3 credits each term. Not offered 2002–2003. D. I. Owen.]

#### NES 244 Introduction to Ancient Judaism (also JWST 244 and RELST 244) @ # (III or IV)

Fall. 3 credits. G. Rendsburg. This course focuses on the development of Judaism as a religion and as a civilization in antiquity, with particular emphasis on its beliefs and practices. Topics discussed include the development of monotheism, the role of the covenant, law and society, sacrifice and prayer as modes of worship, holidays, Sabbath, circumcision, dietary laws, etc Jewish civilization is placed within the context of ancient civilizations (Canaan, Egypt, Babylon, Persia, Greece, Rome). We also focus on the rise of Jewish sects (Pharisees, Sadducees, Essenes, Zealots, etc.) in late antiquity. Texts studied include selections from the Bible, the Apocrypha, the Dead Sea Scrolls, Josephus, and the Mishnah. All readings in English translation. In addition, there is a one-credit option for reading the texts in Hebrew (NES 328).

#### NES 251 Judaism, Christianity, and Islam (also JWST 251, RELST 251) @ # (IV)

Fall. 3 credits. K. Haines-Eitzen. For description, see NES 251 under Near Eastern History.

#### NES 255 Introduction to Islamic Civilization (also HIST 253, RELST 255) @ # (III or IV)

Fall. 3 credits. D. Powers. We consider the major themes of Islamic civilization as they developed from the lifetime of Muhammad until the twentieth century. While the readings provide the student with the chronology of Islamic History, lectures are devoted to an analysis of thematic units, such as art and architecture, science and cities. The class meets three times weekly, and the classroom format is that of a lecture/discussion in which students are encouraged to participate actively. Lectures are accompanied by slide presentations, when appropriate.

#### [NES 281 Gender and Society in the Muslim Middle East (also RELST 281, WOMNS 281) @ (III)

Spring. 3 credits. Not offered 2002–2003. Staff.]

[NES 291 Arab Society and Culture (III)

Fall. 3 credits. Enrollment limited to 25 students. Not offered 2002–2003. M. Younes.]

## NES 298 Issues in Catholic Thought (also RELST 201) (IV)

Fall. 4 credits. W. T. Dickens. Issues in Catholic Thought: addressing primarily developments since the Second Vatican Council (1962–1965), this course familiarizes students with some of the principal contemporary forms of Roman Catholic thought and practice. We begin by situating these developments against the backdrop of the transformations in Catholicism's responses to modernity since the late sixteenth century. Our principal interest at this stage lies in examining how Catholic leaders sought to meet the challenges posed by modernity's emphasis on individual rights and freedoms, religious and cultural pluralism, and the rise of modern sciences and feminisms. This prepares the ground for a more focused examination of the following topics: medical ethics; sexuality, marriage, and the family; social justice; evolution; biblical interpretation; sacraments; Catholic spirituality; Mary: Catholic feminism: and inter-religious dialogue. Our sources include, among others, social scientific studies, official Church documents, and the writings of influential Catholic social activists (Dorothy Day and Mother Teresa), mystics (Thomas Merton), feminists (Rosemary Radford Ruether), and theologians (Hans Urs von Balthasar, Gustavo Gutierrez, Karl Rahner, Oscar Romero, and Pierre Teilhard de Chardin), Although our energies are directed primarily to understanding the situation in Europe and the Americas, we also examine recent work done by Catholics in South Asia and Africa.

#### NES 328 Readings in Ancient Jewish Texts (also RELST 317, JWST 328)

Fall. 1 credit. G. Rendsburg. This course is a one-credit add-on to NES 244 Introduction to Ancient Judaism. Students enrolled in NES 244, who wish to read a selection of the texts to be discussed in that class in the Hebrew original, should enroll in this one-credit seminar NES 328. Texts read include selections from the Bible, the Dead Sea Scrolls, and the Mishnah.

#### [NES 339 Islamic Spain: Culture and Society (also JWST 339, COM L 334, RELST 334, SPAN L 339/699, NES 639) @ # (IV)

Fall. 4 credits. Not offered 2002–2003. R. Brann.

This course examines the culture and society of al-Andalus (Islamic Spain) from 711, when Islam arrived in Iberia, until 1492 and the demise of Nasrid Granada. Through extensive discussion and analysis of Arabic, Latin, and Hebrew primary documents and literary texts of various genres (in translation), the course challenges ideological bases of conventional thinking regarding the social, political, and cultural identity of medieval "Spain." Among other things, the class investigates the origins of lyric poetry, the relationships among the various confessional and ethnic communities in al-Andalus and the problems involved in Mozarabic Christian and Andalusi Jewish subcultural adaptations of Andalusi Arabo-Islamic culture.]

#### NES 351 Law, Society, and Culture in the Middle East, 1200–1500 (also NES 651, RELST 350, HIST 372/652) @ # (III)

Spring. 4 credits. Enrollment limited to 25 students. D. Powers.

After surveying the historical development of Islamic Law, the seminar focuses on the structure and function of the Islamic legal system in the thirteenth, fourteenth, and fifteenth centuries, using legal documents, judicial opinions, and court cases (all in English translation) to elicit major themes and issues; (e.g., the Marital regime, women and property, social hierarchies, law, and the public sphere).

#### [NES 357 Islamic Law and Society (also RELST 356) @ # (III)

Spring. 4 credits. Not offered 2002–2003. D. Powers.

The Shari'ah, or sacred law of Islam, embodies the totality of God's commands that regulate the life of every Muslim in all its aspects. The Shari'ab comprises on an equal basis ordinances regarding worship and ritual as well as political and, in Western terms, strictly legal rules. This course examines the relationship between the Shari'ah and the major social, economic, and political institutions of Islamic society. Topics discussed include the status of women, slaves, and non-Muslims; attitudes toward the economy and the arts; the significance of jihad (holy war); the nature of the Muslim city; and the relationship between the religious establishment and the government. Attention is given to the function of the Shari'ah in the modern world, with special reference to the problems and challenges of legal reform.]

#### [NES 363 Society and Law in the Ancient Near East (also JWST 363) @ # (III)

Fall. 4 credits. Not offered 2002–2003. Staff.]

#### [NES 371 A Mediterranean Society, and Its Culture: The Jews and Judaism under Classical Islam (also JWST 371, RELST 371, COM L 371) @ # (IV)

Spring. 4 credits. Not offered 2002–2003. R. Brann.]

#### NES 392 Cosmology and Divination in Antiquity (also ASIAN 392, CLASS 392) # @ (IV)

Fall. 4 credits. C. Minkowski. An historical survey of the cosmological and divinatory systems in Greek, Sanskrit, and Arabic, with special focus on the geocentric world-system and astrology. Some attention to early knowledge systems Egyptian, Babylonian, Indian, and Chinese and to the later career of divination and cosmology in medieval Europe and Asia. Topics include: the relevance of various theories of space, time, causation, and being to the practice of divination; philosophical and theological arguments for and against divination; the theory and practice of universal, genethliac, catarchic astrology; the social worlds of astrologers and their clients; and the problems of study that result from the nature of the material and the history of its transmission.

#### NES 496 Religion and Science (also RELST 496) (IV)

Spring. 4 credits. W. T. Dickens. A seminar examining the encounter between religion and the natural, social, and historical sciences in western civilization. We begin by clarifying what we mean by "religion" and "science," noting the variety of definitions of both and the effect one's definitions will have on one's views of how they relate. We then examine four basic forms these relations tend to take: religion and science are in conflict; they are distinct, yet complementary; religious beliefs are reconcilable with scientific discoveries; and religious beliefs inform scientific inquiry. We use this fourfold framework to analyze and assess the debates that occur within eight areas of engagement: scientific knowledge and religious belief, the origin of the cosmos, evolution and creationism, natural laws and miracles, religion and the mind-body problem, psychology and religion, anthropology and religion, and the historical-critical study of religious texts. Finally, the writings of E. O. Wilson and A. R. Peacocke provide us with case studies of two different answers to the question whether it is intellectually defensible to be a religious scientist

#### [NES 639 Islamic Spain: Culture and Society (also NES 339, JWST 339, COM L 334, RELST 334, SPAN L 339/ 699)

Fall. 4 credits. Not offered 2002–2003. R. Brann.

For description, see NES 339.]

#### NES 651 Law, Society and Culture in the Middle East, 1200–1500 (also NES 351, RELST 350, HIST 372/652)

Spring. 4 credits. Limited to 25 students. D. Powers.

For description, see NES 351.

## History

#### NES 235 Jews and Arabs in Contact and Conflict: The Modern Period (also COM L 245 and JWST 235) @ (III or IV)

Spring. 3 credits. D. Starr.

This course traces the history and representations of Arab-Jewish relations from the late 19th Century to the present. The majority of class time is devoted to discussing literary works and films by Jews from Arab countries, Israelis from a variety of backgrounds, Palestinians including Palestinians in Israel, under Israeli occupation, and in the diaspora and Arabs representing a variety of other nationalities. Primary source documents and critical studies provide the historical, cultural, and political frameworks for our discussions. Topics covered include: Zionism, Arab nationalism, minority relations, establishment of the State of Israel, Palestinian dispersion, Arab-Israeli wars, terrorism, peace negotiations, establishment of the Palestinian Authority, post-Zionism, and normalization.

#### [NES 239 Cultural History of the Jews of Spain (also JWST 239, COM L 239, RELST 239, SPAN L 239) # (IV)

Spring. 3 credits. Not offered 2002–2003. Staff.

A survey of the cultural history of the Jews in Spain from the late Visigothic period until the converso crisis of the fourteenth and fifteenth centuries and the Expulsion, focusing on the interaction of Jewish with Muslim and Christian cultures and the stable yet evolving sense of a "Sefardi" identity. The course establishes historical and literary-critical frames for reading primary sources in translation, including secular and synagogal poetry, philosophy and kabbalah, biblical hermeneutics, historiography, polemics, and other genres.]

#### NES 245 From Medievalism to Modernity: The History of Jews in E. Modern Europe, 1492-1789 (also JWST 253, HIST 285) # (III) Fall, 4 credits, V. Caron.

This course examines the history of European Jewry during the centuries of transition from the Middle Ages to the Modern Era. We examine the extent to which traditional Jewish life began to break down during this period and thus paved the way for the emergence of modern Jewry. Topics include the Spanish Expulsion of 1492, religious, intellectual, and socio-economic dimensions of the Marrano dispersion, including Lurianic Kabbalah and the messianic movement of Shabbetai Zevi; the establishment of Jewish communities in the West; the end of the "Golden Age" of Polish Jewry and the rise of Hasidism; the changing economic and political role of Jews in the seventeenth and eighteenth centuries; and the impact of the Enlightenment.

#### NES 251 Judaism, Christianity and Islam (also JWST 251, RELST 251) # @ (IV)

Fall. 3 credits. K. Haines-Eitzen. Have you ever wondered how Jews, Christians, and Muslims can worship the same universal deity, yet find themselves in conflict with one another, often to the point of demonizing adherents of another tradition? How can Jews consider Abraham the first Jew, Christians regard him as the first Christian, and Muslims look upon him as the first Muslim? How each can put forth exclusive claims to truth, to what is required of women and men, and to control of sacred sites such as Jerusalem? This course explores the ways in which communities of Jews, Christians, and Muslims came to define themselves and by extension those outside their religious community through the production and subsequent interpretation of "authoritative texts," including the Hebrew Bible, The (Christian) Bible, and the Arabic Qur'an.

After we undertake a historical overview of the emergence of Judaism, Christianity, and Islam, and established a comparative approach to monotheistic religious culture, we examine some of the provocative ways (in text, image, and film) in which Jews, Christians, and Muslims imagined both each other as well as other members of their own traditions in late antiquity, the Middle Ages, and in more recent times. For example: polemics among Jews and Christians in late antiquity and the Middle Ages, images of Muslims in American cinema, and the modern political situation in and over Jerusalem, particularly as it relates to shared and parallel traditions about "holy places."

The approach is comparative, analyzing literary and historical aspects of shared and parallel narrative traditions and textual hermeneutics. The class also discusses the religious concepts of revelation, prophecy, and community, attitudes toward gender, and notions of history, the "End of Days," and messianism set forth in the respective scriptures and in the Jewish, Christian, and Islamic literatures which followed. The problematic nature of revealed scripture in monotheistic religion will be discussed. In addition we study why the idea of "influence" should be replaced with the concept of "dialogue" between religious communities in the Near Eastern context.

#### [NES 261 Ancient Seafaring (also JWST 261, ARKEO 275) @ # (III)

Fall. 3 credits. Not offered 2002–2003. D. I. Owen.]

#### NES 263 Introduction to Biblical History and Archaeology (also ARKEO 263, JWST 263, RELST 264) @ # (III) Spring. 3 credits. J. Zorn.

For description, see NES 263 under Near Eastern Archaeology.

#### NES 266 Jerusalem through the Ages (also JWST 266, ARKEO 266, RELST 266) @ # (III)

Fall. 3 credits. J. Zorn.

For description, see NES 266 under Archaeology.

#### NES 290 History of Zionism and the Birth of Israel (also JWST 290, HIST 267) @ (III)

Spring. 4 credits. V. Caron. For description, see HIST 267.

#### NES 295 Introduction to Christian History (also JWST 295, RELST 295, HIST 299) # (III or IV)

Spring. 3 credits. K. Haines-Eitzen. This course offers an introduction of Christianity from the apostle Paul through the seventeenth century, with an emphasis on the diversity of Christian traditions, beliefs, and practices. We explore the origins of Christianity within Judaism in the eastern Mediterranean world, the spread of Christianity, the development of ecclesiastical institutions, the rise and establishment of monasticism, and the vairous controversies that occupied the church throughout its history. The course draws on primary literary sources (from biblical literature to council proceedings, monastic rules, sermons, theological treatises, and biographies) as well as Christian art, inscriptions, music, and manuscripts.

#### NES 296 Sophomore Seminar: Jesus in History, Tradition and Cultural Imagination (also HIST 296, RELST 296) @ # (III or IV)

Spring. 4 credits. K. Haines-Eitzen. Who was Jesus? How do we reconstruct Jesus in history? What did he teach? Believe? Why was he executed? Why was his identity so vehemently contested throughout the early

centuries (and beyond) of Christianity? How did non-Christians, especially Jews and Muslims, understand and imagine the figure of Jesus? How has the figure of Jesus come to be imagined and re-imagined in music, art, and literature? These are the questions at the fore of this course, which offer an interdisciplinary approach to the study of the figure of Jesus. Beginning with our earliest materials (canonical and non-canonical early Christian texts) we explore the historical figure of Jesus, his life, context, worldview, the reasons for his death, and so forth. Here we raise issues of historical methodology. The second phase of the course moves us from the reconstruction of this historical Jesus to the Jesus Christ imagined by various Christians, Jews, and Muslims. Here we look closely at the chirstological controversies that occupied much of Christian history. In the third part of the course, we take art constructions and imaginings about Jesus even further to look at the Jesus of art, music, film, and literature. The materials here are, of course, vast; but we select representatives from each of these fields that demonstrate the presence and use of the figure of Jesus in the cultural imagination.

#### [NES 321 Heresy and Orthodoxy in Early Christianity (also RELST 321) # (IV)

Spring. 4 credits. Limited to 17 students. Not offered 2002-2003. K. Haines-Eitzen. In this course we explore the varieties of Christian thought and practice from the first through the fourth centuries. In its earliest centuries, Christianity consisted of a diverse range of movements, each of which was considered "heretical" by its opponents, one of which came to dominate all the others and so earned for itself the designation "orthodoxy." The "heresies" we study include Adoptionism, Marcionism, Gnosticism, Montanism, Arianism, and Donatism. Consideration is also given to the ways in which charges of "heresy" intersected with competing views about women in the early Church, the relationship between Judaism and Christianity, the construction of authority, and the content, function, and sacredness of early Christian books.]

#### NES 351 Law, Society, and Culture in the Middle East, 1200–1500 (also NES 651, RELST 350, HIST 372/652) @ # (iii)

Spring. 4 credits. Enrollment limited to 25 students. D. Powers.

After surveying the historical development of Islamic Law, the seminar focuses on the structure and function of the Islamic legal system in the thirteenth, fourteenth, and fifteenth centuries, using legal documents, judicial opinions, and court cases (all in English translation) to elicit major themes and issues; (e.g., the Marital regime, women and property, social hierarchies, law, and the public sphere).

#### [NES 356 Islamic History: The Age of Ibn Khaldun (also HIST 317) @ # (III)

Spring. 4 credits. Enrollment limited to 15 students. Prerequisite: NES 257 or equivalent. Not offered 2002–2003. D. Powers.]

#### [NES 366 The History and Archaeology of the Ancient Near East (also ARKEO 366, JWST 366) @ # (III or IV)

Fall. 4 credits. Prerequisite: ARKEO 100 or permission of instructor. Not offered 2002– 2003. D. I. Owen. For description, see Near Eastern Archaeology.]

#### NES 391 The Sword and the Pen: The Safavid Dynasty of Iran, 1501-1722 (also HIST 390) @ # (IIII or IV) Fall. 4 credits. C. Mitchell.

This seminar focuses intensely on the premodern dynasty of the Safavids in 'Greater Iran'. We examine how this gunpowder empire grew form a millennium mystical movement to become a major Muslim political entity in the early sixteenth century. Particular focus is placed on discussing the founding of the Safavid empire by Shah Isma'il (r. 1501-24) and the degree with which he was committed to establishing a proper Perso-Islamic state. Considerable attention is also given to the promulgation and enforcement of Twelver Shi'ism as the state religion by Shah Isma'il and his successor, Shah Tahmasp (r. 1524-76). The Empire culminated with the reign of Shah 'Abbas the Great (r. 1589-1629), and we debate the various political, administrative, economic, social, and religious reforms instituted during this period; this is examined in conjunction with 'Abbas's dealing with the encroaching European powers of Portugal, England, and Holland. We allot time to discuss the decline of the Safavids, and the legacy of this dynasty to later 19th and 20th century development in Iran.

#### [NES 393 Religion and Politics in the Middle East (also RELST 393) @ (III) Fall. 4 credits. Enrollment limited to 25

students. Not offered 2002–2003.]

#### [NES 395 International Relations of the Middle East (also GOVT 392) @ (III) Fall. 4 credits. Not offered 2002–2003.]

#### NES 397 The Arab-Israell Conflict in Historical and Critical Perspective (also GOVT 397, JWST 397) (iii)

Fall. 4 credits. R. Brann. This course examines the history of the conflict between two peoples with claims to the same land (Palestine/Israel), from the rise of their national movements at the turn of the 20th century and their eventual clash down to the present crisis. We will investigate the various stable and shifting elements in the evolution of the conflict including conflicting Israeli and Palestinian narratives and mythologies about the nature of the conflict. Among many issues to be addressed are the relationship of this conflict to the history of European colonialism in the Middle East, the emergence of Pan-Arabism and Islamism, the various currents in Zionism and its relationship to Judaism, the implication of great power rivalry in the Middle East, the different causes and political repercussions of the four Arab-Israeli wars, efforts at peacemaking including Oslo and Camp David, and the significance of the two Palestinian uprisings.

#### NES 398 Persia in the Medieval and Early Modern European Imagination (also HIST 398) # (III or IV)

Spring. 4 credits. C. Mitchell. The seminar focuses on the changing European perceptions of Persia (Iran) from the Middle Ages to the Enlightenment. Thanks to treatments by Herodotus, Arrian, and other authors of Classical antiquity, Persia and the legacy of the Achaemenid, Sasanian, and Hellenistic empires continued to exist as subjects of historical interest throughout the early modern era. We explore the manner in which Europeans were influenced by the Humanist resuscitation of and fondness for the ancient world, while at the same having their perceptions of Persia being framed by fear and awe at an ever-expanding heretical Islamic faith. Were Renaissance Europeans able to reconcile their respect for the oncegreat glory of ancient Persia, nemesis of the Athenian Greeks, with prevalent disdain for the Muslim Orient?

With the advent of print culture and the subsequent rise in popularity of travel literature, Persia and other Oriental phenomena became subjects of more pedestrian levels of inquiry. By the seventeenth century, the perception of Persia initially imbued by Humanist scholars was now intermeshed with fantastic and often fictional accounts provided by European travelers abroad. To what extent were travelers in Persia influenced by everchanging understandings of the 'Orient'? Is the current historiography of medieval Persia influenced by existing incongruities in these accounts? We also discuss how Persia and topics associated with Persia became established in European culture-art, drama, literature-during the Enlightenment. Here, we begin to contemplate the work of Said, White, Anderson, Greenblatt, Subramani, and Clifford, as well as the relationship between European self-definition and the depiction of 'Other.' Did Persia, either as an ancient classical empire or as a form of Oriental Muslim despotism, serve explicit interest for the Europeans and their own views of authority?

#### [NES 418 Seminar in Islamic History: 600–750 (also HIST 460, NES 618, RELST 418) @ # (III)

Spring. 4 credits. Knowledge of Arabic is desirable, but not required. Not offered 2002–2003. D. Powers.

An examination of Islamic history from 600-750, with special attention to interpretive issues relating to the career of the Prophet Muhammad; the Arab conquests, the emergence of the Caliphate, conversion to Islam, and the Abbasid revolution. Students read primary sources in English translation, especially *The History of Tabari*.]

#### NES 651 Law, Society, and Culture in the Middle East, 1200–1500 (also NES 351, RELST 350, HIST 372/652)

Spring, 4 credits. Enrollment limited to 25 students. D. Powers.

For description, see NES 351.

## Literature

#### [NES 223 Introduction to the Hebrew Bible I (also JWST 223, RELST 223) @ # (IV)

Fall. 3 credits. Next time offered will be 2003–2004. G. Rendsburg.

This is the first course of a two-semester sequence. The main goal is to introduce students to the literature of the Hebrew Bible, which is accomplished by concentrating on the Torah and the historical material in Joshua through Samuel, that is, the material which covers the period from Israel's origins through King David. Emphasis is placed on literary, historical, and theological matters. Special use is made of the numerous archaeological discoveries that have advanced our knowledge of ancient Israel. As such, the Bible is studied against the backdrop of ancient Near Eastern literature, history, religion, mythology, and law.]

#### [NES 224 Introduction to the Hebrew Bible II (also JWST 224, RELST 224) @ # (IV)

Spring. 3 credits. Next time offered will be 2003–2004. G. Rendsburg.

This is the second of a two-semester sequence, but one does not need to take NES 223 in order to take this course. The main goal is to introduce students to the literature of the Hebrew Bible. This is accomplished by concentrating on the historical material in Kings, the books of the Prophets, and the book of Job, that is, the material which covers the period from King Solomon through the end of the biblical era. Emphasis is placed on literary, historical, and theological matters. Special use is made of the numerous archaeological discoveries that have advanced our knowledge of ancient Israel. As such, the Bible is studied against the backdrop of ancient Near Eastern literature, history, religion, and mythology. (Note: students who have taken NES 227, Introduction to the Prophets are ineligible to take this course; NES 224 is intended to replace NES 227). Students interested in a one-credit option, reading the texts covered in class in the original Hebrew, should also enroll in NES 325.]

#### [NES 227 The Bible and the Literature of the Ancient Near East (also JWST 227 and RELST 227) @ # (IV) Spring. 3 credits. Not offered 2002–2003. I. Zorn.]

NES 229 Introduction to the New Testament (also RELST 229 and

JWST 229) @ # (IV) Fall. 3 credits. K. Haines-Eitzen. This course provides a literary and historical introduction to the earliest Christian writings, most of which eventually came to be included in the New Testament. Through the lens of the gospel narratives and earliest Christian letters, especially those of Paul, the course explores the rich diversity of the early Christian movement, from its Jewish roots in first century Palestine through its development and spread to Asia Minor and beyond. Careful consideration is given to the political, economic, social, cultural, and religious circumstances that gave rise to the Jesus movement, as well as those that facilitated the emergence of various manifestations of early Christian beliefs and practices. (Students who have had at least one year of Greek and would like to participate in a one-credit, New Testament Greek reading weekly seminar should also enroll in NES 329).

[NES 236 Israel: Literature and Society (also JWST 236, COM L 246) @ (IV) Fall. 3 credits. Not offered 2002–2003. Staff.]

#### [NES 250 Muhammad and Mystics in the Literatures of the Islamic World (also RELST 254, COM L 250) # @ (IV)

Spring. 3 credits. Not offered 2002–2003. S. Toorawa.

The life of the Prophet Muhammad and the teachings of Muslim mystics (sufis) have provided material and inspiration for numerous writers of the Islamic world. We use our readings, in English translation, of works in Arabic, Malay, Panjabi, Persian, Swahili, Turkish, and Urdu, to help us interrogate the ways in which Muhammad, mystics, and mysticism have shaped religion, literature, and society.]

#### [NES 256 Introduction to the Qur'an (also COM L 256, RELST 213 and JWST 256) @ # (IV)

Spring. 3 credits. Not offered 2002–2003. S. Toorawa.

In 7th century Arabia, a merchant by the name of Muhammad shared with his followers the Book of God as revealed to him through the archangel Gabriel. That book is now a source of spiritual guidance and law for over a billion people the world over. In this course, a literary, historical and religious introduction to the Qur'an, we explore: the circumstances of the Our'an's revelation; its written compilation: its narrative structure: its major themes: its connections to and departures from the Hebrew Bible and the New Testament: Our'anic commentary; translation and the problems associated with it; the impact of the Qur'an on political and religious thought; and the influence of the Qur'an on literature.]

#### [NES 299 Hebrew Bible and Arabic Qur'an in Comparative Perspective (also RELST 299, COM L 299, JWST 299) @ # (IV)

Spring. 3 credits. Not offered 2002–2003. R. Brann.]

#### NES 313 Classical Arabic Texts (also RELST 313) @ # (IV)

Spring. 4 credits. Prerequisite: NES 212 or equivalent. D. Powers.

For description see NES 313 under Language Courses.

#### NES 315 1001 Nights and Other Arabic Writing (also NES 615) # @ (IV) Fall. 4 credits. S. Toorawa.

In this course, we read major examples of classical and medieval Arabic literature in translation. In addition to the *Thousand and One* (or *Arabian*) *Nights*, we explore works such as al-Jahiz's *Book of Misers*, the *Maqamat* of al-Hariri and al-Hamadhani, the Arabic biographical and autobiographical traditions, encyclopedic writing by al-Mas'udi, and the travel accounts of Ibn Battuta. We also complement our readings of early narrative with contemporary interventions, e.g. the work(s) of Djebar, Kilito, Wannus, and others. We pay special attention to gender, tradition, satire, and irony.

#### [NES 319 Crime and Conflict in the Modern Arabic Novel (also COM L 319) @ (IV)

Fall. 4 credits. Not offered 2002–2003. S. Toorawa.

In this course we read seven modern Arabic novels in translation in which the themes of crime and conflict are uppermost, including Nobel Laureate Naguib Mahfouz's *The Thief and the Dogs*, Nawal El Saadawi's *Woman at Point Zero*, and Rachid El Daif's *Dear Mister Kawabata*. We complement the readings with three films.]

#### NES 320 Women in the Hebrew Bible (also JWST 320, RELST 316, and WOMNS 322) @ # (IV) Spring. 3 credits. G. Rendsburg.

Spring. 3 credits. G. Rendsburg. This course features stories about women in the Hebrew Bible. Through literary readings of these texts, we attempt to understand the role of narrative in the promotion of ancient Israelite ideology. We ask such questions as why do women appear so prominently in the Bible's stories, and what do these women represent in the larger picture of ancient Israelite culture. We look at different literary types (foreign woman, prostitute, seductress, widow, etc.), and we discuss the social and historical reality behind the literary representation of women. All texts in English translation. In addition there is a one-credit option for reading the texts in Hebrew (NES 326).

#### [NES 323 Reinventing Biblical Narrative (also JWST 323, RELST 323) @ # (IV)

Spring. 4 credits. Next time offered will be 2003–2004. K. Haines-Eitzen.]

#### [NES 325 Introduction to the Hebrew Bible—Seminar (also JWST 325, RELST 318)

Fall. 1 credit. Not offered 2002–2003. G. Rendsburg.

This is a one-credit option for students who wish to meet one day each week to read the texts covered in class in the original Hebrew. Must be concurrently enrolled in NES 223 or NES 224.]

## NES 326 Women in the Hebrew Bible— Seminar (also JWST 326, WOMNS 326)

Spring. 1 credit. G. Rendsburg. This is a one-credit option for students who wish to meet one hour each week to read the texts in the Hebrew original. Must be concurrently enrolled in NES 320.

## NES 329 Intro to the New Testament—

**Seminar (also JWST 329, RELST 329)** Fall. 1 credit. Prerequisite: concurrent enrollment (or past enrollment) in NES 229 and 1 year of ancient Greek. K. Haines-Eitzen.

A weekly seminar that may be taken in

addition to NES 229. The seminar provides an opportunity to read portions of the New Testament and other early Christian writings in Greek. We work on grammatical and textual issues as well as other problems related to translations.

#### [NES 339 Islamic Spain: Culture and Society (also JWST 339, COM L 334, RELST 334, SPAN L 339/699) @ # (IV)

Fall. 4 credits. Not offered 2002–2003. R. Brann.

For description, see NES Civilization.]

#### [NES 394 Gender, Sexuality, and the Body in Early Christianity (also RELST 394, WOMNS 394, JWST 394) # (IV)

Spring. 4 credits. Not offered 2002-2003. K. Haines-Eitzen.

Beliefs about gender, sexuality, and the human body were remarkably interwoven with political, religious, and cultural disputes in early Christianity. In this course we explore the construction and representation of gender, sexuality, and the body in various forms of Christianity from the first century through the fourth. Asceticism and celibacy, veiling and unveiling, cross-dressing and Gnostic androgyny, marriage and childbirth, and homosexuality are among the topics considered, and our sources range from the New Testament, early Christian apocrypha, martyrologies, and patristic writings to Greek medical texts, Jewish midrash, Roman inscriptions, and Egyptian erotic and magical spells. Current interdisciplinary and theoretical studies on gender, ideology, sexuality, and power aid us in developing our analytical approaches to the ancient materials.]

#### NES 399 Catholic Rituals, the Formation of Community, and Biblical Interpretation (also RELST 399) (IV)

Spring. 4 credits. W. T. Dickens. A seminar exploring the roles that the Catholic Church's rituals play in forming and transforming communal identities and, therewith, shaping the ways Catholics interpret biblical texts. In the first part of the course, we rely on cultural anthropologists, sociologists of religion, cultural critics, and specialists in ritual studies to develop working definitions of "culture," "community," "symbol," "text," and "ritual." We then examine various interpretive methods (historical-critical, literary-critical, reader response, and authorial discourse) so as to appreciate, among other things, the influence one's interpretive purposes have on the meanings one derives from a given text. Finally, we examine several rituals in order to discern their consequences for interpreting the Bible. We give particular attention in this part to magisterial authority, dissent within the Catholic Church, and the cultural diversity of liturgical practices and understandings. Our sources in this final section include Church documents and works by liturgical and feminist theologians.

## NES 400 Seminar in Advanced Hebrew (also JWST 400) @

Fall. 4 credits. Prerequisite: NES 302/JWST 302 or permission of instructor. Enrollment limited to 15 students. The course may be repeated for credit with permission of instructor. N. Scharf.

Continuation of work done in NES/JWST 302, with less emphasis on the study of grammar. We will read and discuss texts of cultural relevance, using articles published in Israeli newspapers and works by authors in each of the three principal genres: poetry, theater, and novels.

#### [NES 401 Topics in Modern Hebrew Literature

Spring. 4 credits. Not offered 2002–2003. D. Starr.

For description, see department.]

## [NES 409 Seasons of Migration (also

**JWST 409, RELST 409)** @ # (IV) Fall. 4 credits. Not offered 2002–2003. S. Toorawa.

For description, see S HUM 409.]

#### NES 420 Readings in Biblical Hebrew Prose (also JWST 420 and RELST 420) @ # (IV)

Fall. 4 credits. Prerequisite: 1 year of biblical or modern Hebrew. Course may be repeated for credit. G. Rendsburg.

An advanced course in reading selected portions of the Hebrew Bible. Emphasis is placed on the philological method, with attention to literary, historical, and comparative concerns.

#### [NES 421 Readings in Biblical Hebrew Poetry (also JWST 421, RELST 421) © # (IV)

Fall. 4 credits. Prerequisite for NES 421: 1 year of Biblical or Modern Hebrew. Course may be repeated for credit. Not offered 2002–2003. G. Rendsburg.

Advanced course in reading selected poems of the Hebrew Bible. Chapters studied include various Psalms, parts of the Book of Job, various prophetic speeches, and early compositions such as Genesis 49 and Judges 5. Emphasis is placed on the philological method, with attention to literary, historical, and comparative concerns as well.]

## NES 422 Dead Sea Scrolls (also RELST 422, JWST 422) # @ (IV)

Spring. 4 credits. Prerequisite: two years of Modern Hebrew or one year of Biblical Hebrew, or the equivalent. G. Rendsburg. The Dead Sea Scrolls comprise a corpus of Hebrew religious documents written by an ancient Jewish sect (most likely the Essenes) c. 150 BCE-c. 50 CE. Since their discovery in the late 1940s and 1950s, the texts have revolutionized our understanding of both early Judaism and early Christianity. Included among the scrolls are the oldest Bible manuscripts in our possession, along with previously unknown texts. We read mainly the legal texts and Bible commentaries authored by the sect, but we also take the opportunity to discuss the Bible manuscripts. Students with a background in rabbinic texts (Mishna, Gemara, etc.) and/or students who have taken NES 244 Introduction to Ancient Judaism will especially benefit from this course, but the course is open to all with the requisite knowledge of Hebrew.

## NES 437 The Cross and the Crescent (also HIST 429, SPANL 446) # @ (III)

Fall. 4 credits. M. A. Garces. For description, see SPANL 446.

#### NES 453 Non-Western Political Philosophy: Islamism (also GOVT 466) @ (III)

Fall. 4 credits. S. Buck-Morss. Topics vary, but all analyze texts written by non-European and non-U.S. theorists who have inspired modern political and social movements. Attention is given to the political and theoretical presuppositions embedded in the very conception of the "West," the hegemony of its political discourses, and how these figure into the meanings of "modernity," "progress," "universal rights," and "liberation." In fall 2002 the topic will be Islamism. We will read philosophical texts by Ayatollah Ruhallah Khomeini, Hassan al-Banna, Muhammad Iqbal, Ustadh Mahmoud, Sayyid Qutb, and Ali Shariati, and commentaries by academic scholars: Mohammed Arkoun, Talal Asad, Saba Mahmood, Bobby Sayyid, Azzam Tamini, Bassam Tibi, as well as historical and socialscientific analyses of political events influenced by Islamism. (In alternate years, Latin American and Caribbean writers and social movements will be the focus.) Open to graduates, and to juniors and seniors with prerequisite of GOVT 165 or 300-level course in theory.

#### NES 493 Cosmopolitan Alexandria (Also S HUM 411, JWST 493, COM L 406) @ (IV)

Fall. 4 credits. D. Starr.

In the first half of the twentieth century the Mediterranean port city of Alexandria supported a multi-lingual, cosmopolitan culture. This course explores the discursive and theoretical potential offered by this unique cosmopolitan space-time, and the literary and artistic legacy it spawned. We discuss works by Aciman, Cavafy, Chahine, Durrell, al-Kharrat, and Tsalas, among others.

#### NES 615 1001 Nights and Other Arabic Writing (also NES 315) Fall. 4 credits. S. Toorawa.

In this course, we read major examples of classical and medieval Arabic literature in translation. In addition to the *Thousand and One* (or *Arabian*) *Nights*, we explore works such as al-Jahiz's *Book of Misers*, the *Maqamat* of al-Hariri and al-Hamadhani, the Arabic

biographical and autobiographical traditions, encyclopedic writing by al-Mas'udi, and the travel accounts of Ibn Battuta. We also complement our readings of early narrative with contemporary interventions, e.g. the work(s) of Djebar, Kilito, Wannus, and others. We pay special attention to gender, tradition, satire, and irony.

#### [NES 639 Islamic Spain: Culture and Society (also NES 339, JWST 339, COM L 334, RELST 334, SPAN L 339/ 699)

Fall. 4 credits. Not offered 2002–2003. R. Brann.

This course examines the culture and society of al-Andalus (Islamic Spain) from 711, when Islam arrived in Iberia, until 1492 and the demise of Nasrid Granada. Through extensive discussion and analysis of Arabic, Latin, and Hebrew primary documents and literary texts of various genres (in translation), the course challenges ideological bases of conventional thinking regarding the social, political, and cultural identity of medieval "Spain." Among other things, the class investigates the origins of lyric poetry, the relationships among the various confessional and ethnic communities in al-Andalus and the problems involved in Mozarabic Christian and Andalusi Jewish subcultural adaptations of Andalusi Arabo-Islamic culture.]

## PHILOSOPHY

Gail Fine (chair), R.N. Boyd, M. Fara, G. Fine, D. Graff (on leave fall 2002), B. Hellie, H. Hodes, T. Irwin, K. Jones, S. MacDonald (on leave fall 2002), R. W. Miller, M. Moody-Adams, F. Neuhouser, S. Shoemaker, H. Shue (on leave 2002-2003), N. Sturgeon, Z. Szabó and J. Whiting. Emeritus: C. A. Ginet.

The study of philosophy provides students with an opportunity to become familiar with some of the ideas and texts in the history of thought while developing analytical skills that are valuable in practical as well as academic affairs. It affords the excitement and satisfaction that come from understanding and working toward solutions of intellectual problems. The curriculum includes offerings in the history of philosophy, logic, philosophy of science, ethics, social and political philosophy, metaphysics, and theory of knowledge. Any philosophy course numbered in the 100s or 200s is suitable for beginning study in the field. Sections of Philosophy 100 are part of the freshman writing seminar program; they are taught by various members of the staff on a variety of philosophical topics, and because of their small size (seventeen students at most) they provide ample opportunity for discussion. Students who want a broad introduction to philosophy may take Philosophy 101, but many students with special interests may find that the best introduction to philosophy is a 200-level course in some particular area of philosophy; such courses have no prerequisites and are usually open to first year students.

## The Major

Students expecting to major in philosophy should begin their study of it in their freshman or sophomore year. Admission to the major is granted by the director of undergraduate studies of the department on the basis of a student's work during the first two years. Normally the student must have completed two philosophy courses with grades of B or better. Eight philosophy courses are required for the major. They must include at least one course in ancient philosophy (Philosophy 210 or 211, or a course with a large component on Plato or Aristotle), at least one course in classical modern metaphysics and epistemology from Descartes through Kant (e.g., Philosophy 212 or a course on the empiricists. the rationalists, or Kant), and a minimum of three courses numbered above 300. Students admitted to the major (after fall 1996) are required to take a minimum of six philosophy courses numbered above 200, and may not count more than one section of Philosophy 100 toward the major. A course in formal logic (e.g., PHIL 231), while not required, is especially recommended for majors or prospective majors. Courses numbered 191-199 do not count toward the major.

Philosophy majors must also complete at least eight credits of course work in related subjects approved by their major advisers. Occasionally majors may serve as teaching or research aides, working with faculty members familiar with their work

Honors. A candidate for honors in philosophy must be a philosophy major with an average of B- or better for all work in the College of Arts and Sciences and an average of B+ or better for all work in philosophy. In either or both terms of the senior year a candidate for honors enrolls in PHIL 490 and undertakes research leading to the writing of an honors essay by the end of the final term. Honors students normally need to take PHIL 490 both terms of their senior year in order to write a satisfactory bonors essay. PHIL 490 does not count toward the eight philosophy courses required for the major. Prospective candidates should apply at the philosophy department office, 218 Goldwin Smith Hall.

#### Fees

In some courses there may be a small fee for photocopying materials to be handed out to students

## **Introductory Courses**

These courses have no prerequisites; all are open to freshmen.

## Freshman Writing Seminars in Philosophy

Fall and spring. 3 credits. Consult the John S. Knight Institute brochure for times, instructors, and descriptions.

#### PHIL 101 Introduction to Philosophy (IV)

3 credits. The course has no prerequisites. Fall: Z. Szabo, spring: B. Hellie. Fall: We discuss four central questions from four different areas of philosophy. Each is relevant to what many have thought is the central question of philosophy: What is human nature? Our first topic is illusions and dreams. What, if anything, distinguishes these from experiences we regard as reliable guides to how things are around us? When can we trust what we see, or what we seem to see? And when we can, what exactly makes this trust rational? The second issue is that of minds and machines. Is it really true that computers could be thinkers, or must their apparent intelligence be always a deceptive illusion? And assuming there is something about human intelligence that can be replicated in silicon, isn't there something else about us that cannot be captured in this way? Next, we turn to the relationship between selfinterest and morality. Is morality telling us to act against what is in our best interest? If so, what compels us to follow its orders? Or is it that morality requires rational egoism of us, because acting from enlightened self-interest is the very best thing we can do? Our final topic is determinism and free will. It seems that every physical event has its physical cause, and the event is determined by its cause. But then how is it possible that some of our actions are free? Should we give up our intuitions about causation or about freedom? Is there a way out of this conundrum?

Spring: We talk about some big questions that make the mind boggle: why is there something rather than nothing? What makes some acts right and others wrong? Is there a meaning to life, and if so what is it? Do we have free will? And we be talk about some zippy questions: can I travel back in time and kill my grandfather as a baby? Can an

omnipotent being make a stone so heavy he can't lift it? If removing one hair from a hairy man doesn't make him not hairy, why can't I remove the hairs one at a time until he's hairless, and leave him hairy? Don't expect for me to tell you conclusive answers to these questions (although I have opinions that I might share). Do expect to deal with abstractions on a regular basis, and to get used to chopping things up and organizing them in a precise way: otherwise things get out of control pretty quickly.

[PHIL 131 Logic, Evidence and Argument Not offered 2002-2003.]

#### [PHIL 142 Appropriation and Alienation (IV) Not offered 2002-2003.]

#### PHIL 145 Contemporary Moral issues (IV)

Spring. 3 credits. T. J. Berry. In this course, we will examine some central moral issues in American politics, including abortion, cloning, physician-assisted suicide, gun control, reparations for slavery, and world hunger. Students will learn to distinguish consequentialist and deontological approaches to moral questions. At least one class meeting per week will be devoted to student discussion. Written work will consist in four or five very short (2 pp.) opinion pieces, one of which will be developed into a fuller (6 pp.) essay. There will also be several quizzes and a final exam.

## PHIL 151 Philosophy of Sport (IV)

Spring. 3 credits. T. J. Berry This course examines philosophical issues that arise in sport. The course is divided into three parts. In the first part, we consider the nature of sport and how we can demarcate sport from other human pursuits. Do high altitude mountaineering, Olympic figure skating, and track and field share some feature(s) that an activity like chess lacks? The second part concerns ethical issues that arise in sport. Is winning everything in sport? Ought one to seek competitive advantage by violating the rules? Ought one to accept competitive advantage resulting from errors by judging officials? In the third part, we consider issues concerning the integration of sport into society. Ought there to be gender equity in sport, and if so, how ought we to judge that such equity has been achieved? What does the academic mission of institutions of higher education imply about the proper role of athletics within those institutions?

## [PHIL 181 Introduction to the Philosophy of Science (IV) Not offered 2002–2003.]

## [PHIL 191 Introduction to Cognitive Science (also COGST 101 and **PSYCH 102) (III)** Not offered 2002–2003.]

#### PHIL 193 Inequality, Diversity, and Justice (also CRP 293, GOVT 293, SOC 293) (III or IV)

Fall. 4 credits. No prerequisites. Intended primarily for freshmen and sophomores. M W F. The class will meet as a whole, for a lecture, F, 8/30; thereafter, lectures will be given M W, disc secs will be F. R. Miller.

An interdisciplinary discussion of the nature and moral significance of social inequality, diversity and poverty and of the search for just responses to them. How unequal are economic opportunities in the United States

today? How many people are in genuine poverty? What are the typical causes of poverty? To what extent, if any, does justice require government action to reduce current economic inequalities? Does race have special significance as a source of inequality? Does gender? Is affirmative action justified, as a response to such inequalities? How does membership in an ethnic group shape people's lives, and how should it? How should governments deal with religious diversity and other differences in ultimate values (which give rise, for example, to radically different attitudes toward abortion, school prayer, and sexuality)? Do people in per-capita rich countries have a duty to help the foreign poor? Moral argument, investigations of social causes, and legal reasoning interact in the search for answers to these questions. To provide these resources, the course is taught by leading faculty researchers in philosophy, political theory, the social sciences, and law.

# [PHIL 194 Global Thinking (also GOVT 294) @ (III or IV)

Not offered 2002-2003.]

#### PHIL 195 Controversies About Inequality (also SOC 222, PAM 222, ECON 222, ILRLE 222, and GOVT 2221

Spring. 1-3 credits. D. Grusky. This course introduces students to contemporary debates and controversies about the underlying structure of inequality, the processes by which it is generated and maintained, the mechanisms through which it comes to be viewed as legitimate, natural, or inevitable, and the forces making for change and stability in inequality regimes. These topics are addressed through readings, class discussion, lectures from visiting distinguished scholars of inequality, and debates staged between faculty members who take opposing positions on pressing inequality-relevant issues (e.g., welfare reform, school vouchers, immigration policy, affirmative action). Although this course is required for students in the Inequality Concentration, it is also open to other students who have completed prior coursework relevant to issues of inequality. It does not count toward the Philosophy major or toward the Humanities Distribution Requirement in Philosophy.

## PHIL 211 Ancient Philosophy (also CLASS 231) # (IV) Fall. 4 credits. This course has no

prerequisites. It is open to freshmen. G. Fine.

This course examines the origin and development of Western philosophy in Ancient Greece and Rome. We study some of the central ideas of the Pre-Socratics, Socrates, Plato, Aristotle, and the Hellenistic philosophers (Epicureans, Stoics, and Sceptics). Questions considered include: What are the nature and limits of knowledge? Is knowledge even possible? How reliable is perception? What are the basic entities in the universe: atoms, Platonic Forms or Aristotelian substances? Is moral knowledge possible? What is the nature of happiness and what sort of life will make people happy? Do human beings have free will? Ought we to fear death? Among the fundamental works we read is Plato's Republic.

PHIL 212 Modern Philosophy # (IV) Spring. 4 credits. The course has no

prerequisites. Z. Szabo. This course is about the rise of modern philosophical thought in the 17th and 18th centuries in Europe. We focus on four philosophers: Descartes, Berkeley, Leibniz, and Hume. Our main interest is the theory of ideas and the way this theory underlies metaphysics. What are ideas and how do we come to have them? Why are ideas necessary for knowledge about the external world? What is the connection between the structure of ideas and the structure of reality? The course emphasizes close reading of original texts (or translations of original texts) and critical assessment of philosophical arguments.

#### [PHIL 213 Existentialism (IV) Not offered 2002-2003.]

PHIL 216 Self, Ego, Psyche # (IV) Fall. 4 credit. Note: this is a sophomore writing seminar sponsored by the John S. Knight Institute. While not restricted to sophomores, they will be given priority since the course is intended to offer them (especially those considering the philosophy major) an opportunity to develop their writing by working closely with faculty in an interdisciplinary context. We shall occasionally even meet together with those in CLASS 244 ("Psyche, Ego, Self"), whose reading list will overlap significantly with our own. J. Whiting.

It is often claimed that the ancient Greeks, either for better or for worse, lacked the socalled "modern Western conception of the self," and that this conception arose only later, perhaps even partly as a result of the emergence of more introspective literary genres, such as we find in Augustine's Confessions. We examine these claims drawing on a variety of philosophical, literary, and psychological sources, starting with the conceptions of soul or 'psyche' among ancient Greeks, and proceeding through early modern European (especially Cartesian) conceptions of the ego, on to contemporary conceptions of the self, some of which question the unity traditionally ascribed to the self. Special attention is paid to the relationship between self and literary genres. And some attention will be paid to non-Western ideas, such as the Buddhist idea that the self is an illusion, and to so-called "pathologies" of self, such as "multiple personality disorder". Selected readings from Homer, Herodotus, Euripides, Plato, Aristotle, Augustine, Descartes, Locke, Hume, and a variety of contemporary sources (philosophical, anthropological, and psychological).

#### PHIL 231 Introduction to Deductive

Logic (II)

Fall, spring. 4 credits. Fall, H. Hodes; spring, D. Graff.

Fall: The logic of truth-functional connectives and the universal and existential quantifiers: analysis of English-statements in terms of a formal language; evaluation of deductive reasoning in terms of such an analysis.

Spring: The course covers the basics of propositional and first-order logic with a special emphasis on the problem of translating English sentences into the formal language of these logics. We use a textbook accompanied by a software package (Barwise and Etchemendy, Language, Proof, and Logic), which makes it easier to learn the skills necessary for doing formal proofs.

#### PHIL 241 Ethics (IV)

Spring. 4 credits. (By petition for breadth requirement). N. Sturgeon.

An introduction to the philosophical study of moral theories and moral arguments. Ethical relativism, ethical egoism, ethical skepticism, utilitarianism and deontological theories; some application to controversial contemporary issues.

#### PHIL 242 Social and Political Philosophy (also GOVT 260) (III or IV)

Spring. 4 credits. F. Neuhouser. An introduction to the foundational texts of modern political theory, including Hobbes, Locke, Rousseau, and Rawls. Topics include the source of political legitimacy, why individuals are obligated to obey just laws, the limits of legitimate political authority, and the nature of human freedom. Special attention is paid to the justificatory role the social contract plays in political philosophy.

#### [PHIL 243 Aesthetics (IV) Not offered 2002-2003.]

#### [PHIL 244 Philosophy and Literature (IV) Not offered 2002-2003.]

#### PHIL 245 Ethics and Health Care (IV) Fall. 4 credits. T. J. Berry.

This course is an introduction to the ethical issues associated with contemporary medicine. No previous study of philosophy is presupposed. The course has two lectures and one discussion section per week. Topics to be covered include: the professional-patient relationship (including informed consent, medical confidentiality, medical paternalism, and trust); contemporary problems such as abortion and euthanasia-beginning from these practical moral problems we investigate concepts such as illness, death, autonomy, quality of life and personhood; and health care in a just society. We consider competing conceptions of justice and arguments for entitlement to health care. Does justice require that all have access to basic health care? Does it require that all have access to approximately the same level of health care? What are the implications for access to health care resources by the requirement that we not discriminate on the basis of race or gender? In the course of investigating these topics, there questions emerge about what ethics is, and whether or not ethical judgments can be objective. Thus, in addition to learning how to arrive at and defend ethical positions, we reflect on the techniques and methods we use.

#### PHIL 246 Ethics and the Environment (also \$&T\$ 206) (IV)

Spring. 4 credits. Open to all undergraduates; permission of instructor required for freshmen. T R. N. Sethi.

The aim of this course is to acquaint students with moral issues that arise in the context of the environment and environmental policy. Our concerns about the environment bring to our attention the importance of economic, epistemological, legal, political, and social issues in assessing our moral obligations to other humans and the natural world. Our attempt then is to explore how different factors come into play in defining our responsibilities to the environment and to examine the grounds for our environmental policy decisions.

## PHIL 247 Ethics and Public Life (IV)

Fall. 4 credits. T R. M. Moody-Adams. What kind of public life is worth having? This course examines the efforts of philosophers, social theorists, theologians, and others to understand the ethical dimensions of our lives as citizens of complex social and political communities. We consider several questions of pressing concern. To what moral standards should we hold those, such as politicians and journalists, whose professions involve service to the public? What moral obligations do citizens themselves have to those with whom they share a public life? What does morality tell us about how to draw the line between "public" and "private," for the purposes of public policy? Is it ever morally permissible (or even required) to opt out of demands that underwrite a stable public life-in civil disobedience, for instance, or in conscientious objection to some public policy?

#### PHIL 249 Feminism and Philosophy (also WOMNS 249) (IV) Fall. 4 credits. N. Sethi.

An introduction using a variety of texts (philosophical, historical, literary, legal, and political) to feminist thought. Special attention is paid to sexual difference and the social construction of gender, and to how we frame various issues (e.g., whether pornography is primarily an issue about freedom of expression or about equal protection).

#### PHIL 261 Knowledge and Reality (IV) Spring. 4 credits. M. Fara.

This course provides an introduction to some central philosophical questions about the nature of the universe and our knowledge of it. Ouestions addressed include: What is the relation between mind and matter? What reason do we have to believe in the predictions of science? How do you know you're not dreaming right now? What is the nature of human freedom? Don't expect the course to answer these questions once and for all. Instead, expect to learn how to go about thinking about them, and how to distinguish a good philosophical argument from a bad one.

#### PHIL 262 Philosophy of Mind (IV) Fall. 4 credits. B. Hellie.

We discuss such issues as: what is a person? How do the first-person and third-person perspectives differ? What is a belief? An intention? What is consciousness? In what ways is the mind like, or unlike, a computer? What does the mind do, and how does it do what it does? How did it come to do that?

#### PHIL 263 Religion and Reason (also **RELST 262) (IV)**

Spring. 4 credits. M W F. S. MacDonald. What must (or could) God be like, and what reasons do we have for thinking that a being of that sort actually exists? What difference would (or could) the existence of God make to our lives? This course examines the idea. common to several major world religions, that God must be an absolutely perfect being. What attributes must a perfect being have? Must it have a mind, be a person, care for human beings? Is the concept of a perfect being coherent? Is the existence of a perfect being compatible with the presence of evil in the world and the existence of human freedom? Does human morality depend in any important way on the nature or will of a perfect being? Is a perfect being among the things that actually inhabit our universe? The course approaches these questions with the tools and methods of philosophical reason

and through readings drawn from both classic texts and contemporary philosophical discussion

#### PHIL 286 Science and Human Nature (also S&TS 286) (IV) Spring. 4 credits.

Topic for 2002-2003: Darwin, Social Darwinism, and Human Sociobiology. An examination of attempts in the biological and social sciences to offer scientific theories of human nature and human potential and to apply such theories to explain important social and psychological phenomena.

## Intermediate or Advanced Courses

Some of these courses have prerequisites.

#### [PHIL 309 Plato (also CLASS 339) # (IV) Not offered 2002-2003.]

#### PHIL 310 Aristotle (also Class 310) Spring. 4 credits. J. Whiting.

Special topic: rational animals and their characteristic activities, primarily as discussed in Aristotle's practical and productive works (i.e., his Ethics, Politics, Rhetoric and Poetics).

#### PHIL 312 Modern Empiricism # (IV)

Fall. 4 credits. S. Shoemaker. This course examines the epistemological and metaphysical views of David Hume and Thomas Reid. We read Book I of Hume's Treatise, Reid's Inquiry, and parts of Reid's Essay on the Intellectual Powers of Man. Topics include skepticism, our knowledge of external things, perception, causation, the nature of mind, and personal identity.

#### PHIL 314 Ancient Philosophy # (IV) 4 credits. Spring. V. Harte.

Topic: Ancient Epistemology This course focuses on epistemological questions as they arise in the works of Plato, Aristotle, the Epicureans, Stoics & Sceptics, Topics discussed include: the acquisition of knowledge; knowledge & belief; the nature of perception; the criterion of truth; empiricism vs rationalism; scepticism.

#### [PHIL 315 Medieval Philosophy # (IV) Not offered 2002-2003.]

[PHIL 316 Kant # (IV) Not offered 2002-2003.]

## PHIL 317 Hegel # (IV)

Fall, 4 credits. Prerequisite: PHIL 212, 311, or 316 (316 highly recommended). F. Neuhouser.

An introduction to the major themes of Hegel's philosophy, with an emphasis on his social and political thought. Topics include Hegel's critique of Kant, the possibility of metaphysics, the master-slave dialectic, and the role of freedom in Hegel's account of rational social institutions. Readings from Fichte help to explain how Hegel's project develops out of Kant's transcendental idealism. Some knowledge of Kant's Critique of Pure Reason is presupposed.

## PHIL 318 Origins of Twentieth-Century **Philosophy (IV)** Fall. 4 credits. B. Hellie.

Frege, Russell, and contemporaries on knowledge and meaning.

[PHIL 319 Post-War Analytic Philosophy (IV) Not offered 2002-2003.]

#### [PHIL 320 17th Century Women Philosophers (also WOMNS 319) # (IV)

Not offered 2002-2003 1

#### PHIL 331 Deductive Logic (also MATH 281) (II)

Spring, 4 credits. Prerequisite: PHIL 231 or equivalent, or permission of instructor. M. Fara.

This course provides an introduction to some metatheoretical results in mathematical logic. Topics covered include: some very basic set theory; computability and recursive functions; decidability and undecidability; soundness and completeness; compactness and the Lowenheim-Skolem theorem; representability in arithmetic; definability and Godel's First Incompleteness Theorem; provability and Godel's Second Incompleteness Theorem.

#### PHIL 332 Philosophy of Language (IV) Spring. 4 credits. D. Graff.

This course is an introduction to 20th century philosophy of language. The three main topics of the course are: (i) Reference and Descriptions, (ii) Naming, Necessity and Externalism. and (iii) Propositional Attitudes. We begin the semester with Frege's 1892 paper "On Sense and Reference." We then continue with the debate about the semantics of descriptions, reading papers from Russell, Strawson, Donnellan and Kripke. The next unit of the course begins with Quine's "Three Grades of Modal Involvement," then focuses on Kripke's Naming and Necessity and its aftermath (papers by Evans, Dummett, Putnam and Burge). For the final unit of the course, we study classic papers on propositional attitudes (and their ascriptions) by Frege, Quine, Kaplan, Kripke and Perry.

#### [PHIL 334 Pragmatics (also LING 325) (III or IV)

Not offered 2002-2003.]

#### PHIL 341 Ethical Theory (IV) Fall. 4 credits. N. Sturgeon.

Topic for 2002: Consequentialism and Its Critics. A historical and systematic investigation of one of the deepest divides in philosophical debate about ethics, between those who think the moral evaluation of acts, character traits and social institutions depends solely on their good or bad consequences, and critics who find this approach fundamentally misguided.

#### [PHIL 343 Resistance and Responsibility (also LAW 676) (IV)

4 credits. Not offered 2002-2003.]

#### PHIL 344 History of Ethics: Ancient and Medieval # (IV) Fall, 4 credits, T. H. Irwin.

The development of moral theory in Greek, Roman, and medieval philosophers. Topics include: Socrates and his questions about morality; the different answers of Plato, Aristotle, and the Stoics; and the influence of Christian thought. Main questions: happiness, welfare, and the human good; the virtues; selfinterest and the interests of others; love, friendship and morality; theories of human nature and their relevance to ethics; comparisons and contrasts with modern moral theory. Readings mainly from Plato, Aristotle, the Stoics, St. Augustine, St. Thomas Aquinas.

#### PHIL 345 History of Ethics: Modern # (IV)

Spring. 4 credits. 344 not prerequisite to 345. T. H. Irwin.

A continuation of PHIL 344. Hobbes's challenge to Greek and Christian ethics, responses to Hobbes, self-interest and the interests of others, the place of reason and sentiment in ethics, the objectivity of ethics, different conceptions of the right and the good, utilitarianism and its critics, and radical critiques of morality. Readings mainly from Hobbes, Butler, Hume, Kant, Sidgwick, Nietzsche, Bradley, and Rawls.

### PHIL 346 Modern Political Philosophy (also GOVT 462) (III or IV)

Fall. 4 credits. R. Miller.

A study of the leading contemporary theories of justice, including the work of Rawls, Nozick, Gauthier, and Scanlon. We discuss rival views of the moral significance of economic inequality, the kinds of freedom that governments ought to protect, the kinds of values and convictions that are a proper basis for laws (as opposed to being private matters), the tension between unequal political influence and democratic rights, and the roles of community, virtue, and group-loyalty in political justification. We are largely concerned with the conceptions of freedom, equality, obligation, and community underlying competing theories. We also consider implications for specific political controversies, e.g., over abortion, welfare programs, and pornography.

#### PHIL 348 Philosophy and Literature (IV) Spring, 4 credits. J. Whiting.

What is philosophy? What is literature? And how are they related? Are there certain forms of thought and/or experience that can be expressed either only or best in certain modes (e.g., in a novel or a poem as opposed to a treatise or a proof)? Special attention is paid to (1) questions of literary and philosophical genre (to why, e.g., so many philosophers have written dialogues, either explicit, like Plato's, or implicit, like Descartes' and Wittgenstein's); (2) the relations between genre (such as autobiography) and forms of subjectivity (such as "modern" individualism); (3) points of view (characters', readers' and authors'); and (4) the relations between thought, feeling, and imagination. Readings from philosophical and literary sources, both ancient and modern. Possible sources include: Plato, Aristotle, Hume, J. S. Mill, H. Bergson, Sartre, M. Nussbaum, S. Cavell, and A. Nehamas; Sophocles, Euripides, Shakespeare, George Eliot, Tolstoy, Dostoevsky, Proust, and Woolf.

#### PHIL 349 Feminism and Philosophy (IV) Spring, 4 credits. Prerequisite: one course

in philosophy. M. Moody-Adams. This course explores some of the major contributions of feminist reflection to the central concerns of philosophy. Topics include feminist accounts of human nature, gender and the self; feminist approaches to the critical examination of science, and to understanding the nature and limits of human knowledge more generally; influential feminist theories in moral and political philosophy; and controversies about the proper methods and assumptions of feminist philosophy itself.

#### [PHIL 361 Epistemology (IV) Not offered 2002–2003.]

#### PHIL 364 Metaphysics (IV) Fall. 4 credits. Z. Szabó.

The topic of this course is truth. In analytic philosophy during the last century questions about realism and objectivity have been intertwined with questions about the nature of truth. Towards the end of the century, with the rise in popularity of the so-called deflationary theories about truth, this association has been widely called into question. We are going to try to ascertain whether truth is a deep and philosophically central concept or a shallow and utterly unproblematic one. In the first part of the course, we read classic papers by Frege, Moore, Russell, Ramsey, Tarski and Davidson along with some secondary literature. In the second part, we glance at contemporary debates, involving Blackburn, Field, Horwich, Putnam, Soames, and Wright. The course assumes familiarity with the basic concepts of logic (PHIL 231, or equivalent).

#### PHIL 381 Philosophy of Science: Knowledge and Objectivity (also S&TS 381) (IV)

Fall. 4 credits. R. Boyd. An examination of central epistemological and metaphysical issues raised by scientific theorizing: the nature of evidence; scientific objectivity; the nature of theories, models, and paradigms; and the character of scientific revolutions.

#### [PHIL 382 Philosophy and Bayabalagy (IV)

**Psychology (IV)** 4 credits. Not offered 2002–2003.]

#### PHIL 383 Choice, Chance and Reason (IV)

Spring. 4 credits. Prerequisite: a course in logic or a course in mathematics that involves proofs, or instructor's permission. H. Hodes.

The mathematical theory of instrumental rationality and philosophical issues that it raises: preference orderings, choice functions and constraints on rational choice; strict uncertainty (ignorance) and probabilistic uncertainty (risk); basic of probability theory; value functions and the concept of utility; the expected utility theorem; multi-attribute decision theory. Time permitting we'll consider one of the following further topics: social choice; Jeffrey and Bolker's approach to decision theory; Newcomb's paradox and causal decision theory; basic game theory.

## PHIL 390 Informal Study

Fall or spring. Credit TBA. To be taken only in exceptional circumstances. Must be arranged by the student with his or her adviser and the faculty member who has agreed to direct the study.

#### Advanced Courses and Seminars

These courses are offered primarily for majors and graduate students.

## [PHIL 409 German Philosophical

Texts (IV) Not offered 2002–2003.]

## PHIL 410 Latin Philosophical Texts #

Spring. Variable credit. Prerequisites: knowledge of Latin and permission of

instructor. S. MacDonald. Reading of philosophical texts in the original Latin.

#### PHIL 411 Greek Philosophical Texts (also CLASS 311) # (IV)

Fall and spring. Variable credit. Prerequisites: knowledge of Greek and permission

of instructor. T. Irwin and C. Brittain. Reading of philosophical texts in the original Greek.

#### PHIL 413 Topics in Ancient Philosophy (also CLASS 413)

Fall. 4 credits. J. Whiting. Mind, self, and psychopathology in ancient philosophy.

#### [PHIL 414 German Philosophy after Kant (IV)

Not offered 2002-2003.1

#### PHIL 415 Special Topics in the History of Philosophy (IV)

Fall. 4 credits. Prerequisites: PHIL 316, 317, or permission of instructor. F. Neuhouser. This course examines the idea of *recognition* (the acknowledgment of one subject's value or worth by another) and its importance for the social philosophy of several thinkers in the Continental tradition. Figures studied include Rousseau, Kant, Fichte, and Hegel.

## PHIL 416 Modern Philosophy # (IV)

Spring. 4 credits. Prerequisites: at least two previous courses in philosophy, at or above the 200 level; or permission of the instructor. G. Fine.

We study the epistemology and metaphysics of the Rationalists, especially Descartes.

# PHIL 432 Topics in Logic (also MATH 482) (II)

Fall. 4 credits. H. Hodes.

Part I: formalizations of first-order logic (axiomatization, natural deduction, sequent calculi); models (classical and Kripke); soundness and completeness for classical and intuitionistic logics; relations between classical and intuitionistic logic. Part II: topics to be announced.

#### PHIL 433 Philosophy of Logic (IV)

Spring. 4 credits. Prerequisite: a course on logic. H. Hodes.

Philosophical issues concerning truth and inference.

#### PHIL 435 Pragmatics (also LING 425) (III)

Fall. 4 credits. Prerequisite: LING 201 or PHIL 231 or permission of the instructor. D. Abusch.

An introduction to aspects of linguistic meaning which have to do with context and with the use of language. Topics include context change semantics and pragmatics, presupposition and accommodation, conversational implicature, speech acts, and the pragmatics of definite descriptions and quantifiers.

#### [PHIL 436 Intensional Logic (II) Not offered 2002–2003.]

[PHIL 441 Contemporary Ethical Theory (IV)

Not offered 2002-2003.]

#### PHIL 447 Contemporary Political Philosophy (also GOVT 465) (III or IV)

Not offered 2002-2003.]

#### PHIL 448 International Justice (also GOVT 492) (III or IV)

Spring. 4 credits. R. Miller.

An investigation of leading current controversies over the demands of international justice. What duties, if any, do people in per-capita rich countries have to aid the foreign poor? When are international economic processes exploitive or unfair? When and in what respects does a government have a sovereign right to freedom from external interference? Are there duties of humanitarian intervention

## ARTS AND SCIENCES - 2002-2003

to end foreign injustice? What standards of justice should guide U.S. conduct in the "war against terrorism"? In what ways should the realities of international power, including the political and economic dominance of the United States, affect the moral assessment of governments' conduct? What is the just response to demands for national selfdetermination, including secession? To what extent are patriotism, nationalism and cosmopolitianism defensible as political perspectives or personal attitudes? Readings include work by political philosophers and political theorists and relevant case studies.

[PHIL 460 Epistemology (IV) Not offered 2002–2003\_]

#### PHIL 462 Philosophy of Mind (IV)

Spring. 4 credits. S. Shoemaker. This course is about the nature of personal identity, with special attention to the relation of persons to their bodies. Readings are from classical and contemporary sources.

#### PHIL 481 Problems in the Philosophy of Science (IV)

Spring. 4 credits. R. Boyd. Topic for 2003: Objectivity in science: alternative approaches from philosophy, science studies, feminist theory and radical critiques of science.

#### PHIL 490 Special Studies in Philosophy (IV)

Fall and spring. 4 credits. Open only to honors students in their senior year. See Honors description at the beginning of Philosophy section.

#### PHIL 611 Ancient Philosophy (also CLASS 671)

Spring. 4 credits. V. Harte.

This course focuses on Plato's *Philebus*, which considers the question of what is the best life. Issues explored en route to answering this question include: the nature of pleasure and of knowledge and their competing claims to be the good; true and false pleasures; the psychology of desire; philosophical methodology.

#### PHIL 612 Medieval Philosophy

Spring. 4 credits. S. MacDonald. Topic for spring 2003: Aquinas's Ethics and Moral Psychology.

## PHIL 633 Philosophy of Language

Spring. 4 credits. Z. Szabo. The topic of this course is an old but recently somewhat neglected question: 'Wherein is language conventional?' Before reflection, we seem to have inconsistent views on the matter fluctuating between the view that language is entirely the product of human contrivance and the view that abstracting from its most superficial features, language is part of our genetic endowment. To adequately address the issue, we need on the one hand to clarify certain conceptual issues about the nature of norms and rules, and on the other hand, to pay some attention to what linguists and psychologists have recently learned about the variation of human languages. We also discuss how debates about linguistic conventions relate to wider questions of relativism.

## PHIL 641 Ethics and Value Theory

Fall. 4 credits. N. Sturgeon. Topic for Fall 2002: Relativism, Realism, Skepticism, and Noncognitivism in Ethics.

### [PHIL 642 Moral Psychology Fall. 4 credits. Not offered 2002–2003.]

[PHIL 662 Philosophy of Mind Not offered 2002–2003.]

[PHIL 664 Metaphysics Not offered 2002–2003.]

#### PHIL 665 Metaphysics

Fall, spring. 4 credits. Prerequisite: this class is intended for graduate students in the philosophy department. Others may attend only with permission of the instructor. Fall, M. Fara; spring, B. Hellie.

Fall-Topic: Possible Worlds. This seminar provides an advanced-level survey of some topics falling under the broad heading of "possible worlds". The class will be divided into three components, all inter-related: (i) possible worlds semantics (including counterpart theory and multiple-indexed semantics); (ii) applications of possible worlds semantics to some questions in metaphysics and philosophy of language (including the interpretation of conditionals, mental and linguistic content, attributions of knowledge and belief, various essentialist doctrines): and (iii) metaphysical questions about the nature of possible worlds (e.g. What are they? Do they actually exist? Can an object be located in more than one world?).

**Spring**—**Predication and related issues**: its psychological significance; the semantics (and some syntax) of nominalizations; quantification into predicate position; the metaphysics of properties; the unity of the proposition; truth.

#### [PHIL 681 Philosophy of Science Not offered 2002–2003.]

## PHIL 700 Informal Study

Fall or spring. Credit TBA. To be taken by graduate students only in exceptional circumstances and by arrangement made by the student with his or her Special Committee and the faculty member who has agreed to direct the study.

## PHYSICS

G. P. Lepage, chair (109 Clark Hall, 255-6016); R. S. Galik, acting director of undergraduate studies (101 Clark Hall, 255-8158, physicsdus-mailbox@cornell.edu); J. P. Alexander, V. Ambegaokar, P. C. Argyres, T. A. Arias, N. W. Ashcroft, K. Berkelman, E. Bodenschatz, P. Brouwer, D. G. Cassel, C. Csaki, G. F. Dugan, V. Elser, D. B. Fitchen, E. E. Flanagan, C. P. Franck, R. S. Galik, L. K. Gibbons, P. Ginsparg, B. Gittelman, B. Greene, S. M. Gruner, L. N. Hand, D. L. Hartill, C. L. Henley, A. LeClair, D. M. Lee, P. L. McEuen, N. D. Mermin, N. Mistry, M. Neubert, H. Padamsee, J. M. Parpia, J. R. Patterson, R. O. Pohl, D. C. Ralph, J. D. Reppy, R. C. Richardson, J. Rogers, D. L. Rubin, J. P. Sethna, A. J. Sievers, E. Siggia, P. C. Stein, R. M. Talman, S. A. Teukolsky, R. Thorne, H. Tye, M. D. Wang, I. Wasserman, T-M. Yan, I. York

The Department of Physics offers a full range of university-level work in physics, from general education courses for nonscientists to doctoral-level independent research. Major research facilities are operated by two component organizations, the Laboratory of Atomic and Solid State Physics (LASSP) and the Laboratory of Nuclear Studies (LNS). LASSP carries out extensive research efforts in condensed-matter physics and biophysics. LNS operates a major high-energy particle physics research facility at Wilson Laboratory, the Cornell electron-positron storage ring (CESR). Theoretical work is carried out in many fields of physics, including astrophysics. There is a full schedule of weekly research-oriented seminars and colloquia. Students will find many opportunities for research participation and summer employment.

Introductory physics sequences are: 101-102, 207-208, and 112-213-214, or its honors version 116-217-218. In addition, there is a group of general-education courses, PHYS 200-206, 209, 210. PHYS 101-102, a self-paced autotutorial course, is designed for students who do not intend to take further physics courses and who do not have preparation in calculus. PHYS 112 and 207 both require calculus (MATH 190 or 191 or 111), and additional mathematics is required for subsequent courses in the sequence. PHYS 101-102 or 207-208 may be taken as terminal physics sequences. The three-term sequence 112-213-214 or its honors version, 116-217-218, is recommended for engineers and physics majors.

Courses beyond the introductory level that might be of interest to nonmajors include. PHYS 316 (Modern Physics I); PHYS 330 (Modern Experimental Optics); and PHYS 360 (Electronic Circuits).

Advanced placement and credit are offered as outlined in "Advanced Placement of Freshmen," or students may consult the director of undergraduate studies, as should students requesting transfer credit for physics courses taken at another college.

## The Major

The major program is constructed to accommodate students who wish to prepare for professional or graduate work in physics as well as those who wish to complete their major program in the field of physics but have other post-graduation goals.

Students who wish to major in physics are advised to start the physics sequence in the first term of their freshman year. (Note that students who have had contact with introductory calculus may take PHYS 112 with coregistration in MATH 190 or 191.) The major program can still be completed with a secondterm start, but flexibility in future course scheduling is reduced.

Prospective majors are urged to make an early appointment at the physics office for advice in program planning. Acceptance into the major program is normally granted upon completion of a year of physics and mathematics courses at Cornell with all course grades at the Blevel or higher. The department office will give advice in the matter of selecting a major faculty adviser. Details of the major course program are worked out in consultation between the student and major adviser.

## **Physics Core**

Common to all major programs is a requirement to complete a core of physics courses. In addition to the three-term introductory sequence (PHYS 112–213–214 or PHYS 116– 217–218), the core includes five upper-level courses—(a) the two-course sequence in modern physics (PHYS 316–317), (b) at least three semester hours of laboratory work selected from PHYS 310, 330, 360, 410, Astronomy 410, (c) an intermediate course in classical mechanics, and (d) an intermediate course in electromagnetism.

Accompanying these physics courses should be work in mathematics through at least MATH 222 or 294. Students following the professional/graduate school channel are expected to complete at least one additional year of applicable mathematics (A&EP 321– 322 or MATH 321/420–422).

In *addition* to the core, each physics major must complete 15 semester hours of credit in an area of concentration which has been agreed on by the student and major faculty adviser.

## **Concentration within Physics**

A student who wishes to pursue professional or graduate work in physics or a closely related field should follow a concentration within the field of physics. For those students with a strong secondary school preparation, the sequence PHYS 116-217-218 is encouraged. Students are strongly encouraged to start the sequence with PHYS 116, even if they qualify for advanced placement credit for PHYS 112. Core courses in mechanics and electromagnetism will normally be PHYS 318 and PHYS 327, respectively. The minimum 15 hours beyond the core must be composed of physics courses with numbers greater than 300 and must include the senior laboratory course PHYS 410. This means a physics concentration needs a minimum of 7 credit hours of laboratory work to complete the requirements. The accompanying table shows several typical course sequences by means of which the major requirements may be completed. The primary distinction among students who may follow the different sequences is the amount and level of precollege work in calculus and in physics. Changes in these typical patterns will be common, as agreed on between student and major faculty adviser. Research work is encouraged of all majors. If this work is done as an independent project, PHYS 490, up to eight credits can be applied to the concentration.

## **Concentration outside Physics**

The concentration will reflect the student's interest in some area related to physics. The array of courses that comprise the concentration must have internal coherence. The array will normally be worked out in conference with the major faculty adviser and must be approved by the adviser. Of the required 15 hours credit beyond the core, at least eight credits must be in courses numbered above 300. Students have chosen to concentrate in such topics as chemical physics, astrophysics, natural sciences, history and philosophy of science, computer science, meteorology, or econometrics. A combined biology-chemistry concentration is appropriate for pre-medical students or those who wish to prepare for work in biophysics.

For students with concentrations outside physics, the core requirements in mechanics and electromagnetism can be appropriately met with PHYS 314 and PHYS 323, respectively.

Students with an astronomy concentration who might continue in that field in graduate school should use ASTRO 410, 431, 432 as part of the concentration; they are encouraged to use PHYS 318 and 327 to satisfy the core requirements in mechanics and electromagnetism.

## Honors

A student may be granted honors in physics upon the recommendation of the Physics Advisers Committee of the physics faculty. There is no particular course structure or thesis requirement for honors.

## **Double Majors**

Double majors including physics are possible and not at all uncommon. It should be noted, however, that any course used to satisfy a requirement of another major may be used in satisfaction of physics major requirements only if the student's concentration is *within* physics.

## **Courses with Overlapping Content**

Because the department offers several courses with overlapping content, students should select courses carefully to meet the needs of their academic programs and to ensure credit for each course they take. Listed below are groups of courses with largely similar content. In general, students may receive credit for only one of the courses in each group.

PHYS 101, 112, 116, 207 PHYS 102, 208, 213, 217 PHYS 214, 218 PHYS 314, 318 PHYS 323, 327 PHYS 116, 216 In addition, students with credit for PHYS 101, 112, 116, or 207, or an advanced placement equivalent who wish to enroll in PHYS 200–206, 209, or 210 should obtain written permission from the instructor and the director of undergraduate studies in physics.

## **Course Prerequisites**

Prerequisites are specified in physics course descriptions to illustrate the materials that students should have mastered. Students who wish to plan programs different from those suggested by the prerequisite ordering are urged to discuss their preparation and background with a physics adviser or with the instructor in the course. In many cases an appropriate individual program can be worked out without exact adherence to the stated prerequisites.

#### Courses

Listed days and times are not definite but are unlikely to change. Days and times are not listed for 600-level courses.

#### PHYS 101 General Physics I (I)

Fall, summer 4-week or 8-week session. 4 credits. General introductory physics for nonphysics majors. Prerequisites: 3 years of high school mathematics, including some trigonometry. A student without high school physics should allow extra time for PHYS 101. Includes less mathematical analysis than PHYS 207, but more than PHYS 200–206, 209, 210. Enrollment may be limited. Fall introductory lec. R Aug. 29 or M Sept. 2. D. Fitchen.

PHYS 101 emphasizes quantitative and conceptual understanding of the topics of introductory physics developed without use of calculus. The course is mostly self-paced in a mastery-oriented format including eight subject units and a final retention (review) unit. Most instruction occurs in the learning

## Typical Physics Course Sequences (other sequences are also possible)

Semester	No AP math or physics	1 year AP calculus and good HS physics	Outside concentrators	Outside concentrators (alternate)
1st – Fall	112	116	112	
2nd - Spring	213	217	213	112
3rd – Fall	214	218	214	213
4th – Spring	316, 3x0	316, 3x0	3x0	214
5th – Fall	317, 327, 3x0	317, 327, 3x0	316	3x0, 316
6th – Spring	314/318, 443	318, 443	314	314, 3x0
7th – Fall	341, 410	341, 410	317, 323	317, 323
8th - Spring	Elective(s)	Elective(s)		

•For majors with concentrations outside physics, there will be wide variation in individual programs, arranged to best match the field of concentration.

• Crossovers between the two sequences 112–113–214 and 116–217–218 are possible, although the combinations 112–217–218 and 112–213–218 are difficult. PHYS 207 may be substituted for PHYS 112. Students taking 217 after 112 must coregister for 216.

•Students taking the honors sequence 116–217–218 are strongly encouraged to start with PHYS 116. Exceptionally well-prepared students may be able to begin work at Cornell with PHYS 217. Such students should come to the department office for advice in planning a course program.

•Physics electives for the major include 360, 444, 454, 455, 480, 490, 525, 553, 561, 572, the senior seminars 481–489, ASTRO 332 or 431–432, and A&EP 434.

•One semester of intermediate laboratory, listed here as 3x0, is required.

 $\bullet$  Well-prepared sophomores wishing to take PHYS 318 should consult the instructor before registering.

center using video-taped lectures, personal tutoring by staff, assigned laboratory exercises, and solutions of sample test questions at our web site. Unit testing is designed to measure mastery with a limit of three test tries taken at the time of the student's choice. Major topics for 101: kinematics, forces and dynamics, momentum, energy, fluid mechanics, waves and sound, thermal physics, kinetic theory, and thermodynamics.

#### PHYS 102 General Physics II (I)

Spring, summer 4-week or 8-week session. 4 credits. Prerequisite for PHYS 102: PHYS 101 or 112 or 207. Includes less mathematical analysis than PHYS 208, but more than PHYS 200–206, 209, 210. Enrollment may be limited. Spring introductory lec, M Jan. 20. Staff.

PHYS 101-102 emphasizes quantitative and conceptual understanding of the topics of introductory physics developed without use of calculus. The course is mostly self-paced in a mastery-oriented format including eight subject units and a final retention (review) unit each term. Most instruction occurs in the learning center using video-taped lectures, personal tutoring by staff, assigned laboratory exercises, and solutions of sample test questions at our web site. Unit testing is designed to measure mastery with a limit of three test tries taken at the time of the student's choice. Major topics for 102: electricity and magnetism, optics, relativity, atomic, quantum, and nuclear physics. At the level of Physics 5th edition by Cutnell and Johnson.

#### PHYS 103 General Physics (I)

Summer. 4 credits. Prerequisite: 3 years of high school mathematics, including trigonometry. A student without high school physics should allow extra time for PHYS 103. PHYS 103 is a more traditional version of PHYS 101. PHYS 103 is not appropriate for students majoring in physics or engineering; it is primarily for students majoring in the life sciences. Lectures and discussions: M-F; laboratories M W.

Basic principles treated quantitatively but without calculus. Topics include: kinematics; forces and fields; momentum, angular momentum, and energy; thermal physics and fluid mechanics; sound waves. Text at the level of *Physics, 5th edition,* by Cutnell and Johnson.

PHYS 112 Physics I: Mechanics (I) Fall, spring, summer 6-week session. 4 credits. Primarily for students of engineering and for prospective physics majors. Prerequisite: coregistration in MATH 192 (or 194 or 112), or substantial previous contact with introductory calculus combined with coregistration in MATH 111 or 191. Lec, M W F. Two rec. and one lab session approximately every other week. Evening exams. Fall, P. McEuen; spring, staff.

Course covers the mechanics of particles with focus on: kinematics, dynamics, conservation laws, central force fields, periodic motion. Mechanics of many-particle systems: center of mass, rotational mechanics of a rigid body, and static equilibrium. At the level of *University Physics, Vol. 1*, by Young and Freedman.

#### PHYS 116 Physics I: Mechanics and Special Relativity (I) Fall, spring. 4 credits. More analytic than

Fall, spring. 4 credits. More analytic than PHYS 112, intended for students who will be comfortable with a deeper, somewhat more abstract approach. Intended mainly but not exclusively for prospective physics majors, astronomy majors, or applied and engineering physics majors. Prerequisites: a good secondary school physics course, familiarity with basic calculus, and enjoyment of puzzle-solving. Corrective transfers between PHYS 116 and PHYS 112 (in either direction) are encouraged during the first several weeks of instruction. Two recitations each week and six 2-hour labs. Lec M W F. Fall, K. Berkelman; spring, staff.

A more rigorous version of PHYS 112, covering similar topics at the level of *An Introduction to Mechanics*, by Kleppner and Kolenkow.

#### PHYS 117 Concepts of Modern Physics

Fall. 1 credit. S-U only. Enrollment may be limited. Coregistration in PHYS 112 or 116 or 213 or 217 is required. For freshmen who plan to major in physics, applied and engineering physics, or astronomy. Lec, W. A. Sadoff.

This course is intended for freshmen who plan to major in physics or a closely related field (i.e., applied and engineering physics or astronomy) and would like to learn about the concepts of modern physics early in their physics education. Possible topics of discussion are methodology, symmetry and conservation laws, quantum theory, the unification of forces and matter, and big-bang cosmology.

#### PHYS 190 Supplemental Introductory Laboratory

Fall, spring. 1 credit. Times by arrangement with instructor. S-U only. Enrollment limited to students who have **all** of the following; (1) 3 transfer credits for introductory physics lecture material; (2) a degree requirement for the laboratory component of that introductory course; (3) approval of the director of undergraduate studies; and (4) permission of the lecturer of that course at Cornell. Enrollment limited.

A PHYS 190 Permission Form must be filed in 121 Clark Hall with the physics department course coordinator. Students perform the laboratory component of one of the introductory courses (PHYS 112, 207, 208, 213, 214) to complement the lecture-related course credit acquired elsewhere. Those wishing to take the equivalent of one of these introductory courses at another institution should receive prior approval from the director of undergraduate studies.

#### PHYS 200 Art, Archaeology, and Analysis (also EAS 200, ENGRI 185, MS&E 285, ARKEO 285, and ART H 200) (I or IV)

For description, see EAS 200.

#### PHYS 201 Why the Sky is Blue: Aspects of the Physical World (I)

Fall. 3 credits. Lec, T R, rec, W. A. Sadoff. This is a descriptive physics course aimed specifically at the nonscience student. There is an emphasis on the ideas of modern physics where the approach is both historical and thematic. The methodology of science and the nature of evidence is emphasized. An overriding theme is the character of physical laws as shown through the great principles of symmetry and conservation. While there are a few computational problems assigned, the purpose is to help students to understand the concepts rather than to master problemsolving techniques. At the level of *Physics Concepts and Connections* by Hobson.

## PHYS 202 Energy (I)

Fall. 3 credits. For non-science majors. No specific prerequisites, but competence in high school level mathematics needed. Some high school level science (chemistry, physics or earth science) desirable. T R 2:55–4:10. D. Holcomb.

The course will cover (1) the basic science of different kinds of energy (mechanical, electrical, chemical, thermal, gravitational, solar, nuclear) and (2) the energy conversion processes, which power twenty-first century society. Some related ecological, economic, social and political issues would be touched upon. Weekly assigned problems, based on weekly study assignments, will be used as classroom study materials. In the latter part of the course, students will be invited to divide into groups to investigate more deeply particular energy sources or energy conversion processes.

## PHYS 203 Physics of the Heavens and the Earth—A Synthesis (I)

Spring. 3 credits. Prerequisite: none; uses high school algebra and geometry. For nonscience majors. Lec T R; sec W. H. Padamsee.

This course shows how the unification of apparently distinct areas of physics leads to an explosion in the growth of our knowledge and understanding. The material is divided into three parts: the physics of motion on earth and motion in the heavens, showing how the two evolved separately, from the ideas of the ancient Greeks to the dynamics and telescopic discoveries of Galileo; the final melding of these two topics with Newton's Universal Gravitation; and Einstein's theories of relativity followed by an exploration of this "new" physics and its impact. There is an emphasis throughout on "how do we know the laws?" These are the stories of breakthrough discoveries and brilliant insights made by fascinating people, offering a humanistic perspective.

**[PHYS 204 Physics of Musical Sound (I)** Spring. 3 credits. Intended for nonscientists; does not serve as a prerequisite for further science course. Lec, M W F 9:05– 9:55. Not offered 2002–2003.]

**(PHYS 205 Reasoning about Luck (I or II)** Fall. 3 credits. Intended for nonscientists; does not serve as a prerequisite for further science courses and cannot be taken for credit by anyone who has taken a collegelevel physics course. Not offered 2002– 2003.]

#### PHYS 206 Physics in the News (I)

Spring. 3 credits. Prerequisite: high school algebra. Intended for non-science majors. Does not serve as a prerequisite for further science courses. Lec T R. One rec. each week. V. Sahakian.

"Physics in the News" examines the physics concepts behind the everyday news headlines. Typical topics include space exploration, global warming, medical imaging, magnetic levitation trains and electric cars, asteroid impacts, and other interesting headlines that may occur during the semester. This course is

604
intended for non-science majors and is mainly descriptive. Our tools for understanding these topics are some of the most basic principles of physics, illustrated using algebra at the high school level. Detailed lecture notes are provided on the web. Readings are from the scientific press at the level of Scientific American and the text by Hobson listed below. Students are encouraged to explore the social and environmental aspects of some of the more debatable topics through articles and webpages. At the level of, Physics, Concepts and Connections, 2nd edition, by Art Hobson.

**PHYS 207 Fundamentals of Physics I (I)** Fall. 4 credits. Prerequisites: high school physics plus MATH 111 or 191, or substantial previous contact with introductory calculus, combined with coregistration in a math course approved by instructor. Lec, M W F; two rec. and one lab each week. Evening exams. D. Fitchen.

PHYS 207–208 is a two-semester introduction to physics, intended for students majoring in an analytically oriented biological science, a physical science, or mathematics with emphasis on applications and on quantitative tools generally applicable to the sciences.

Course covers: mechanics, conservation laws, waves, and topics from thermal physics, fluids, acoustics, and properties of matter. At the level of *Fundamentals of Physics*, Vol. I, 6th edition, by Halliday, Resnick, and Walker.

PHYS 208 Fundamentals of Physics II (I) Spring. 4 credits. Prerequisites for PHYS 208: PHYS 207 or 112 or 101 and at least coregistration in MATH 112 or 192. PHYS 207–208 is a two-semester introduction to physics with emphasis on tools generally applicable in the sciences, intended for students majoring in a physical science, mathematics, or an analytically oriented biological science. Lec, M W F; two rec.

and one lab each week. Evening exams.

Staff. Course covers electricity and magnetism, and topics from physical and geometrical optics, quantum and nuclear physics. At the level of *Fundamentals of Physics*, Vol II, 6th edition, by Halliday, Resnick, and Walker.

## [PHYS 209 Relativity and Chaos (I or II)

Spring. 3 credits. Intended for nonscientists; does not serve as a prerequisite for further science courses. Assumes no scientific background but uses high school algebra. Lec, T R; rec, M. Not offered 2002–2003.]

### PHYS 213 Physics II: Heat/ Electromagnetism (I)

Fall, spring, (summer 6-week session). 4 credits. Primarily for students of engineering and for prospective physics majors. Prerequisites: PHYS 112 and coregistration in the continuation of the mathematics sequence required for PHYS 112. Lec, T R, two rec. each week and six 2-hour labs. Evening exams. Fall, J. Rogers; spring, staff.

Course topics include: temperature, heat, thermal energy, electrostatics, behavior of matter in electric fields, DC circuits, magnetic fields, Faraday's law, Maxwell's equations, and electromagnetic oscillations. At the level of

University Physics/Vol. 1&2, by Young and Freedman. Laboratory covers electrical measurements, circuits, and some aspects of heat transfer.

### PHYS 214 Physics III: Optics, Waves, and Particles (I)

Fall, spring, (summer, 6 week session). 4 credits. Primarily for students of engineering and for prospective physics majors. Prerequisites: PHYS 213 and completion of a course in differential equations. Two rec. each week and one 3-hour lab alternate weeks. Evening exams. Lec, T R. Fall, E. Bodenschatz; spring, staff.

Physics of wave phenomena, electromagnetic waves, interference and diffraction effects, wave properties of particles and introduction to quantum physics. Course includes computer use in solving problems and labs. At the level of *University Physics, Vol. 1 & 2*, by Young and Freedman.

#### PHYS 216 Introduction to Special Relativity

Fall, spring, based on preregistration. 1 credit. S-U only. Enrollment may be limited. Course is completed within first 4 to 6 weeks of term. Coregistration in this course is a requirement for registration in PHYS 217, unless the student has taken a relativity course at the level of PHYS 116 or ASTRO 106. Prerequisites: PHYS 112 or PHYS 207 or permission of instructor. Lec,

T R. Fall, P. Lepage; spring, staff. Introduction to Einstein's Theory of Special Relativity including: Galilean and Lorentz transformations, the concept of simultaneity, time dilation and Lorentz contraction, the relativistic transformations of velocity, momentum and energy, and relativistic invariance in the laws of physics. At the level of *An Introduction to Mechanics* by Kleppner and Kolenkow.

## PHYS 217 Physics II: Electricity and Magnetism (also A&EP 217) (I)

Fall, spring. 4 credits. Enrollment may be limited. Intended for students who have done very well in PHYS 112 or 116 and in mathematics and who desire a more analytic treatment than that of PHYS 213. Prospective physics majors are encouraged to select PHYS 217. Prerequisites: approval of student's adviser and permission from the instructor. A placement quiz may be given early in the semester, permitting those students who find PHYS 217 too abstract or analytical to transfer into PHYS 213, which they can do without difficulty at that time. Vector calculus is taught in this course, but previous contact, especially with the operations grad, div, and curl, is helpful. It is assumed the student has seen Special Relativity at the level of PHYS 116 or is currently enrolled in PHYS 216. It is also assumed that the student has covered the material of MATH 192 and is coregistered in MATH 293 or the equivalent. Lec, M W F. Fall, A. Sievers; spring, R. Buhrman.

At the level of *Electricity and Magnetism*, by Purcell (Vol. 2, Berkeley Physics Series).

#### PHYS 218 Physics III: Waves and Thermodynamics (I)

Fall, spring. 4 credits. Enrollment may be limited. Intended for students who have done very well in PHYS 116 and 217 and in mathematics, and who desire a more analytic treatment than that of PHYS 214. Prospective physics majors are encouraged to select PHYS 218. Prerequisites: PHYS 217 (with a grade of B or higher) and completion of a course in differential equations or permission of instructor. Lec, M W F. Fall, J. Sethna; spring, E. Bodenschatz. The first part of the course gives a thorough discussion of wave equations, including traveling waves, standing waves, energy, momentum, power, reflection and transmission, interference and diffraction. We will derive wave equations on strings, for sound and light, and in elastic media. We'll cover Fourier series and linear partial differential equations. In some semesters, elasticity theory and tensor calculus may be introduced. In the second part of the course, we introduce thermodynamics and statistical mechanics, including heat engines, the Carnot cycle, and the concepts of temperature and entropy. In some semesters random walks and diffusion may be introduced. Evening exams may be scheduled. At the level of Physics of Waves by Elmore and Heald.

## PHYS 310 Intermediate Experimental Physics (I)

Spring. 3 credits. Enrollment may be limited. Prerequisite: PHYS 208 or 213. Labs T R.

Students select from a variety of experiments. An individual, independent approach is encouraged. Facilities of the PHYS 410 lab are available for some experiments.

## PHYS 314 Intermediate Mechanics (I)

Spring. 4 credits. Prerequisites: PHYS 208 or 214 (or equivalent) and MATH 294 (or equivalent); Intended for physics majors with concentration outside of physics or astronomy; PHYS 318 covers similar material at a more analytical level. Lec. M W F, rec. F. C. Franck.

Likely topics include: Lagrangian mechanics; Newtonian mechanics based on a variational principle; conservation laws from symmetries; two-body orbits due to a central force; analysis of scattering experiments; small amplitude oscillating systems including normal mode analysis; parametrically driven systems; rigid body motion; motion in non-inertial reference frames; and nonlinear behavior including bistability and chaos. Students not only become more familiar with analytic methods for solving problems in mechanics but also gain experience with computer tools. At the level of *Classical Dynamics* by Marion and Thorton.

## PHYS 316 Modern Physics I (I)

Fall, spring. 3 credits. Prerequisites: PHYS 214 or 218 and coregistration in at least MATH 294 or equivalent. It is assumed that majors registering in PHYS 316 will continue with PHYS 317. Lec, M W F; rec, R. D. Rubin.

Course topics include: breakdown of classical concepts in microphysics; light quanta and matter waves; Schrödinger equation and solutions in 1 and 3 dimensions; and the hydrogen atom, exclusion principle, and spin and magnetic moments. At the level of *An Introduction to Quantum Physics* by French and Taylor.

## PHYS 317 Modern Physics II (I)

Fall. 3 credits. Prerequisite: PHYS 316. Lec, M W F, rec, T. G. Dugan.

Course topics include: an investigation of quantum phenomena; atomic physics; classical and quantum statistical mechanics; molecules; solid state physics; nuclear physics and radioactivity; and elementary particle physics. At the level of *Modern Physics* by Serway.

## PHYS 318 Analytical Mechanics (I)

Spring, 4 credits. Prerequisites: PHYS 116 or permission of instructor; A&EP 321 or MATH 420. Intended for junior physics majors concentrating in physics or astronomy. PHYS 314 covers similar material at a less demanding level. Lec, M W F; rec, F. M. Neubert.

Newtonian mechanics of particles and systems of particles, including rigid bodies; oscillating systems; gravitation and planetary motion; moving coordinate systems; Euler's equations; Lagrange and Hamilton formulations; normal modes and small vibrations: introduction to chaos. At the level of Classical Mechanics by Goldstein, Classical Dynamics by Marion and Thorton, and Analytical Mechanics by Hand and Finch. Supplementary reading is assigned.

#### **PHYS 323 Intermediate Electricity and** Magnetism (I)

Fall. 4 credits. Prerequisites: PHYS 208 or 213/214 (or equivalent) and MATH 293/ 294 (or equivalent); coregistration in A&EP 321 or MATH 420 recommended. Intended for physics majors with a concentration outside of physics or astronomy; PHYS 327 covers similar material at a more analytical level. Lec, M W F, rec, F. C. Franck.

Course topics include: electro/magnetostatics, boundary value problems, dielectric and magnetic media, Maxwell's Equations, electromagnetic waves, and sources of electromagnetic radiation. At the level of Introduction to Electrodynamics by Griffiths.

#### **PHYS 327 Advanced Electricity and** Magnetism (I)

Fall. 4 credits. Prerequisites: PHYS 217/218 or permission of instructor; coregistration in A&EP 321 or MATH 420. Intended for physics majors concentrating in physics or astronomy. PHYS 323 covers similar material at a less demanding level. N.B.: PHYS 327 assumes knowledge of the material at the level of PHYS 217, and makes extensive use of Fourier transforms. Lec, M W F; rec, F. L. Hand.

Course covers: electro/magneto-statics, vector and scalar potentials, Laplace's Equation and boundary value problems, multipoles; radiation-solutions to Maxwell's Equations, energy-momentum of radiation; electrodynamics in media; and special relativity-transformations, four vectors, particle kinematics and dynamics, relativistic electrodynamics. At the level of Classical Electromagnetic Radiation, by Heald and Marion.

## PHYS 330 Modern Experimental Optics (also A&EP 330) (I)

Fall. 4 credits. Enrollment limited.

Prerequisite: PHYS 214 or equivalent. Lec, W; lab, M T. M. Wang.

A practical laboratory course in basic and modern optics. The six projects cover a wide range of topics from geometrical optics to classical wave properties such as interference. diffraction, and polarization. Each experimental setup is equipped with standard, off-theshelf optics and opto-mechanical components to provide the students with hands-on experience in practical laboratory techniques currently employed in physics, chemistry, biology, and engineering. Students are also introduced to digital imaging and image processing techniques. At the level of Optics by Hecht.

## PHYS 341 Thermodynamics and Statistical Physics (I)

Fall. 4 credits. Prerequisites: PHYS 214, 316, and MATH 294. Lec, M W F; rec, R. P. Brouwer.

Course covers: statistical physics, developing both thermodynamics and statistical mechanics simultaneously. Also covers concepts of temperature, laws of thermodynamics, entropy, thermodynamic relations, and free energy. Applications to phase equilibrium, multicomponent systems, chemical reactions, and thermodynamic cycles. Application of statistical mechanics to physical systems, and introduction to treatment of Maxwell-Boltzmann, Bose-Einstein, and Fermi-Dirac statistics with applications. Elementary transport theory. At the level of Fundamentals of Statistical and Thermal Physics, by Reif, or Introduction to Statistical Mechanics by Betts.

## PHYS 360 Electronic Circuits (also A&EP 363) (1)

Fall, spring. 4 credits. S-U grade option available by permission of the instructor for students who do not require this course for their major. Prerequisites: undergraduate course in electricity and magnetism (e.g., PHYS 208, 213, or 217) or permission of the instructor. No previous electronics experience is assumed, although the course moves quickly through introductory topics such as basic dc circuits. Fall term usually has a smaller enrollment. Lec, M. Labs T R or W F; evening labs M W spring. Fall, E. Kirkland; spring, R. Thorne.

Practical electronics as encountered in a scientific or engineering research/development environment. Analyze, design, build, and test circuits using discrete components and integrated circuits. Analog circuits: resistors, capacitors, filters, operational amplifiers, feedback amplifiers, oscillators, comparators, passive and active filters, diodes and transistor switches and amplifiers. Digital circuits: combinational and sequential logic (gates, flipflops, registers, counters, timers), analog to digital (ADC) and digital to analog (DAC) conversion, signal averaging, computer architecture and interfacing. Additional topics may include analog and digital signal processing, light wave communications, transducers, and noise reduction techniques. At the level of Art of Electronics by Horowitz and Hill.

## PHYS 400 Informal Advanced Laboratory

Fall, spring. Variable to 3 credits. Prerequisites: 2 years of physics or permission of instructor. Lab T W. D. Hartill Experiments of widely varying difficulty in one or more areas, as listed under PHYS 410, may be done to fill the student's special requirements.

## PHYS 410 Advanced Experimental **Physics**

Fall, spring. 4 credits. Limited to seniors except by special permission. Prerequisites: PHYS 214 (or 310 or 360) plus 318 and 327, or permission of instructor. Lec, M; lab T W. D. Hartill.

Selected topics in experimental concepts and techniques. About 60 different experiments are available in acoustics, optics, spectroscopy, electrical circuits, electronics and ionics, magnetic resonance, X-rays, low temperature, solid state, cosmic rays, and nuclear physics. The student performs three to six diverse experiments, depending on difficulty, selected to meet individual needs and interests.

Independent work is stressed. Lectures are on experimental techniques used in experiments in the laboratory and on current research topics.

## PHYS 443 Introductory Quantum Mechanics (I)

Spring. 4 credits. Prerequisites: PHYS 327 or 323; and PHYS 316 and A&EP 321 or MATH 420; coregistration in PHYS 314 or 318; or permission of instructor. Lec, M W F, rec, R. S. Teukolsky.

This course provides an introduction to concepts and techniques of quantum mechanics, at the level of An Introduction to Quantum Mechanics, by Griffiths.

## PHYS 444 Nuclear and High-Energy Particle Physics (I)

Spring. 4 credits. Prerequisite: PHYS 443 or permission of instructor. Lec, M W F; rec, F. Behavior of high-energy particles and radiation; elementary particles; basic properties of accelerators and detectors; general symmetries and conservation laws. At the level of *Introduction to Elementary Particles* by Griffiths or *Modern Elementary Particle* Physics by Kane.

## **PHYS 451 Classical Mechanics**, Nonlinear Dynamics, and Chaos

(also PHYS 551) (I) Spring. 3 credits. Only students with a strong performance in PHYS 318 or the equivalent will be admitted to the course. Biweekly two-hour seminar to be scheduled. Lec, T R.

This course provides an introduction to advanced topics in modern classical mechanics: methods of formulating both discrete and continuum Hamiltonian dynamics, classical field theory, canonical transformations, actionangle variables, the Hamilton-Jacobi equation. connection between classical and quantum mechanics, solvable, integrable, and nonintegrable systems, and KAM tori. Includes analytic techniques in nonlinear dynamics with examples chosen from a variety of systems of physical interest, phase-locking and fractional order resonances, and classification of bifurcations. Also covers dissipative and Hamiltonian chaos: logistic and standard maps, renormalization, KAM theorem, and quantum chaos. Some fluid dynamics and Sturm-Liouville theory included as time permits. The first part of the course is at the level of Theoretical Mechanics of Particles and Continua, by Fetter and Walecka; the second part is at the level of Regular and Chaotic Dynamics, 2nd edition, by Lichtenberg and Lieberman.

#### PHYS 454 Introductory Solid-State Physics (also A&EP 450) (I)

Fall. 4 credits. Prerequisite: PHYS 443, A&EP 361, or CHEM 793 is highly desirable but not required. Lec, M W F. Computer lab: W or R. J. Brock.

An introduction to modern solid-state physics, including crystal structure, lattice vibrations, electron theory of metals and semiconductors, and selected topics from magnetic properties, optical properties, superconductivity, and defects. At the level of Introduction to Solid State Physics, by Kittel, and Solid State Physics, by Ashcroft and Mermin.

#### [PHY\$ 455 Geometrical Concepts in Physics (I)

Spring. 4 credits. Prerequisite: PHYS 323 or equivalent and at least coregistration in PHYS 318 or permission of instructor. Usually offered every other spring. Lec, T R. Not offered 2002–2003.]

#### [PHYS 456 Introduction to Accelerator Physics and Technology (also PHYS 656) (I)

Fall. 3 credits. Prerequisites: Intermediate E&M (PHYS 323 or 327) and Classical Mechanics (PHYS 314 or 318). Lec, T R. Not offered 2002–2003.

Fundamental physical principles of particle accelerators and enabling technologies, with a focus on circular high energy colliders, such as the Cornell Electron Storage Ring (CESR).]

#### [PHYS 457 The Storage Ring as a Source of Synchrotron Radiation (also PHYS 657) (I)

Spring. 3 credits. Prerequisites: intermediate level mechanics (PHYS 314 or 327) and E&M (PHYS 323 or 327) or permission of instructor. Previous completion of PHYS 456/656 is not required. Lec, T R. Not offered 2002–2003. S. Gruner and R. Talman.

This course covers physics of synchrotron radiation with a focus on characteristics of radiation from dipole magnets, electron beam properties that influence radiation characteristics, issues of flux, brightness, emittance, brilliance, beam stability, and beam lifetime.]

### PHYS 480 Computational Physics (also PHYS 680 and ASTRO 690) (I)

Spring. 3 credits. S-U grades only. The course assumes familiarity with the standard mathematical methods for the physical sciences and engineering, differential equations and linear algebra in particular and with computer programming

(e.g., Fortan or C). Lec, T R. T. Arias. This course covers numerical methods for ordinary and partial differential equations. linear algebra and eigenvalue problems, nonlinear equations, and fast Fourier transforms from the hands-on perspective of how they are used in modern computational research in the era of open software and the web. The computer assignments which teach the material are designed also to achieve a larger goal: In the end, each student has developed his or her own working ab initio computer program for calculating the properties of molecules and materials with the methods which won Walter Kohn and John Pople the Nobel prize in Chemistry in 1998.

#### PHYS 481 Quantum Information Processing (also PHYS 681 and COM S 483)

Spring. 2 credits. S-U only. The only essential prerequisite is familiarity with the theory of finite-dimensional vector spaces over the complex numbers. Lec, T R. N. David Mermin.

A technology that successfully exploits fundamental principles of quantum physics can spectacularly alter both the nature of computation and the means available for the transmission of information. Though implementation will be extremely difficult to achieve, the theory of quantum computation offers striking new perspectives on computation and information, as well as on the quantum theory itself. This course is intended both for physicists, unfamiliar with computational complexity theory, and computer scientists and mathematicians, unfamiliar with the principles of quantum mechanics. Topics are likely to include an introduction to the relevant principles of quantum physics, a survey of elementary quantum computational magic, Shor's factoring algorithm, Grover's search algorithm, quantum error correction, quantum crytography, and the teleportation of quantum states.

#### [PHYS 487 Selected Topics in Accelerator Technology (also PHYS 687)

Fall. 2 credits. S-U only. Prerequisites: intermediate E&M (PHYS 323 or 327). Lec, T R. Not offered 2002–2003.

Fundamentals of accelerator technology. This course consists of a series of topical seminars covering the principal elements of accelerator technology.]

#### [PHYS 488 Introduction to Accelerator Physics and Technology (also PHYS 688) (I)

Fall. 3 credits. Prerequisites: Intermediate E&M (PHYS 323 or PHYS 327) and Classical Mechanics (PHYS 314 or PHYS

318). Lec, T R. Not offered 2002–2003. Course covers fundamental physical principles of particle accelerators and enabling technologies.]

## PHYS 490 Independent Study in Physics

Fall or spring. Variable to 4 credits. Students can apply a maximum of eight PHYS 490 credits to the physics major. Prerequisite: permission required of professor who will direct proposed work. A copy of the Request for Independent Study form must be filed with physics department course coordinator, 121 Clark Hall. Individual project work (reading or laboratory) in any branch of physics.

## PHYS 500 Informal Graduate Laboratory

Fall, spring; summer. Variable to 2 credits. By permission of instructor. Experiments of widely varying difficulty in one or more areas, as listed under PHYS 510, may be done to fill student's special requirements. D. Hartill.

### PHYS 510 Advanced Experimental Physics

Fall, spring. 3 credits. Lab, T W. An optional lecture associated with PHYS 410, M is available. D. Hartill.

About 60 different experiments are available in acoustics, optics, spectroscopy, electrical circuits, electronics and ionics, magnetic resonance, X-rays, low temperature, solid state, cosmic rays, and nuclear physics. Students perform four to eight experiments selected to meet individual needs. Independent work is stressed. Lectures include techniques used in experiments in the advanced laboratory and on current research topics.

## PHYS 520 Projects in Experimental Physics

Fall, spring, summer. Variable to 3 credits. To be supervised by faculty member. Students must advise department course coordinator of faculty member responsible

for their project. Prerequisite: PHYS 510. Projects of modern topical interest that involve some independent development work by student. Opportunity for more initiative in experimental work than is possible in PHYS 510.

#### PHYS 525 Physics of Black Holes, White Dwarfs, and Neutron Stars (also ASTRO 511)

Spring. 4 credits. No astronomy or general relativity prerequisites. D. Lai.

This course covers the formation of compact objects: neutrino and gravitational radiation from supernova collapse and neutron stars; equilibrium configurations, equations of state, stability criteria, and mass limits; the influence of rotation and magnetic fields, pulsar phenomena, mass flow in binary systems; spherical and disk accretion; high-temperature radiation processes, compact X-ray sources; Gamma-Ray bursts; and high energy processes near supermassive blackholes, Quasars, and active galactic nuclei. Emphasis is on the application of fundamental physical principles to compact objects. Topics in diverse areas of physics are discussed including: solid-state physics, nuclear physics, relativity, fluid dynamics, and high-energy physics.

### PHYS 551 Classical Mechanics, Nonlinear Dynamics, and Chaos (also PHYS 451)

Spring. 3 credits. For description, see PHYS 451.

#### PHYS 553–554 General Relativity (also ASTRO 509–510)

553, fall; 554, spring. 4 credits. Prerequisite: knowledge of special relativity and methods of dynamics at the level of Classical Mechanics, by Goldstein. Lec, T R. I. York.

A systematic introduction to Einstein's theory using both modern and classical methods of computation. Topics include review of special relativity, differential geometry, foundations of general relativity (GR), laws of physics in the presence of a gravitational fields, GR as a dynamical theory, experimental tests of GR. At the level of *Gravitation*, by Misner, Thorne, and Wheeler. PHYS 554 is a continuation of 553 that emphasizes applications to astrophysics and cosmology. Topics include relativistic stars, gravitational collapse and black holes, gravitational waves, and cosmology, use of dynamics to formulate astrophysical and cosmological computations.

## **PHYS 561 Classical Electrodynamics**

Fall. 3 credits. S. Teukolsky. Course covers Maxwell's equations, electromagnetic potentials, electrodynamics of continuous media (selected topics), special relativity, and radiation theory. At the level of *Classical Electrodynamics*, by Jackson.

## PHYS 562 Statistical Physics

Spring. 4 credits. Primarily for graduate students. Prerequisites: a good knowledge of quantum mechanics, classical mechanics, and an undergraduate-level thermodyanmics or statistical mechanics class will be expected. Lec M W F. J. Sethna.

The course starts with the fundamental concepts of temperature, entropy, and free energy, defining the microcanonical, canonical, and grand canonical ensembles. We touch upon Markov chains, random walks, diffusion equations, and the fluctuation-dissipation theorem. We cover Bose-Einstein and Fermi statistics, black-body radiation, Bose condensation, superfluidity metals, and white dwarves. We discuss fundamental descriptions of phases, and introduce Landau theory, topological order parameters, and the homotopy classification of defects. We briefly study first order phase transitions and critical droplet theory, and

## ARTS AND SCIENCES - 2002-2003

conclude with a discussion of critical phenomena, scaling, universality, and the renormalization group. At the level of Statistical Mechanics (2nd edition) by Pathria and Statistical Mechanics of Phase Transition by Yeomans.

## PHYS 572 Quantum Mechanics I

Fall. 4 credits. Lec, M W F. T. M. Yan. Course covers the general principles of quantum mechanics, formulated in the language of Dirac. Covers systems with few degrees of freedom: hydrogen atom, including fine and hyperfine structure; the deuteron; and atomic transitions. Theory of angular momentum, symmetries, perturbations and collisions are developed to analyze phenomena displayed by these systems. At the level of Modern Quantum Mechanics by Sakurai. A knowledge of the subject at the level of PHYS 443 is assumed, but the course is selfcontained.

## PHYS 574 Quantum Mechanics II

Spring, 4 credits, Lec, M W F. E. Flanagan. Course covers systems with many degrees of freedom. Topics include: quantization of the electromagnetic field; interaction of light with matter; many electron atoms; second quantization for fermions; quantum liquids; scattering of complex systems; and an introduction to the Dirac equation. A knowledge of the concepts and techniques covered in PHYS 561 and 572 is assumed.

## PHYS 599 Cosmology (also ASTRO 599) For description, see ASTRO 599.

## PHYS 635 Solid State Physics I

Fall. 3 credits. Prerequisites: a good undergraduate solid-state physics course, such as PHYS 454, as well as familiarity with graduate-level quantum mechanics. N. Ashcroft

A survey of the physics of solids: crystal structures, x-ray diffraction, phonons, and electrons. Selected topics from semiconductors, magnetism, superconductivity, disordered materials, dielectric properties, and mesoscopic physics. At the level of Solid State Physics by Ashcroft and Mermin.

## PHYS 636 Solid-State Physics II

Spring. 3 credits. Prerequisite: PHYS 635. P. Brouwer

A continuation of PHYS 635. Topics covered include: Fermi Liquid Theory. magnetism, superconductivity, broken symmetries, elementary excitations, and other topics in quantum condensed matter physics not covered in Solid State Physics by Ashcroft and Mermin. These topics include: topological defects, superfluids, the quantum Hall effect, mesoscopic quantum transport theory disordered systems. Anderson localization, and other metal insulator transitions.

### [PHYS 645 High-Energy Particle Physics

Fall. 3 credits. Not offered 2002-2003. Course serves as an introduction to physics of baryons, mesons, and leptons.]

## [PHYS 646 High-Energy Particle Physics

Spring. 3 credits. Not offered 2002-2003. This course covers: topics of current interest, such as high-energy electron and neutrino interactions, electron positron annihilation, and high-energy hadronic reactions.]

## PHYS 651 Relativistic Quantum Field Theory I

Fall. 3 credits. S-U grades only. M. Neubert.

Topics covered include consequences of causality and Lorentz invariance, field quantization, perturbation theory, calculation of cross sections and decay rates, and an introduction to radiative corrections and renormalization with applications to electromagnetic and weak interactions.

#### PHYS 652 Relativistic Quantum Field **Theory II**

Spring. 3 credits. S-U grades only. H. Tye. This course is a continuation of PHYS 651 and introduces more advanced methods and concepts in quantum field theory. Topics include functional integral methods, quantization of non-abelian gauge theories, the renormalization group, and spontaneous symmetry breaking. Topics in cosmology, supersymmetry or superstring may be introduced. Applications to the electroweak theory and quantum chromodynamics are emphasized. At the level of An Introduction to Quantum Field Theory by Peskin and Schroeder.

## **PHYS 653 Statistical Physics**

Fall. 3 credits. Normally taken by graduate students in their second or later years. Prerequisites: competence in the basic principles of quantum mechanics, statistical physics at the level of PHYS 562, and

thermodynamics. S-U grades only. V. Elser. Survey of topics in modern statistical physics selected from: dynamical statistical physics (kinetic theory, Boltzmann equation, hydrodynamics); theory of simple fluids; scaling theories and the renormalization group; phase transitions in disordered systems; and pattern formation in nonlinear systems, percolation theory.

#### **PHYS 654 Theory of Many-Particle** Systems

Spring. 3 credits. Prerequisites: PHYS 562, 574, 635, 636, and 653 or permission of instructor. S-U grades only. Staff. Equilibrium and transport properties of microscopic systems of many particles studied at zero and finite temperatures. Formalisms such as thermodynamic Green's functions are introduced and applied to such topics as normal and superconducting Fermi systems, superfluidity, magnetism, insulating crystals.

#### [PHYS 656 Introduction to Accelerator **Physics and Technology (also PHYS** 456)

Not offered 2002-2003. See PHYS 456 for description.]

#### [PHYS 657 The Storage Ring as a Source of Synchrotron Radiation (also PHYS 457)

Not offered 2002-2003. See PHYS 457 for description.]

#### PHYS 661 Advanced Topics in High **Energy Particle Theory**

Fall. 3 credits. Prerequisites: PHYS 652. S-U grades only. C. Csaki.

This course presents advanced topics of current research interest. Subject matter varies from year to year. Some likely topics are twodimensional conformal field theory with applications to string theory and condensed matter physics, applications of the electroweak theory, lattice gauge theory, mathematical methods (e.g. group theory), perturbative quantum chromodynamics, anomalies and geometry, supersymmetry, current algebra, heavy quark physics, heavy quark symmetry, and phenomenological issues beyond the standard model.

#### PHYS 667 Theory of Stellar Structure and Evolution (also ASTRO 560) For description, see ASTRO 560,

[PHYS 670 Instrumentation Seminar

Spring. 2 credits. S-U grades only. Not offered 2002-2003. J. Alexander. Course covers conception, design, and performance of innovative instrumentation in condensed matter and elementary particle physics ]

## PHYS 680 Computational Physics (also

PHYS 480 and ASTRO 690) For description, see PHYS 480.

## PHYS 681-689 Special Topics

Offerings are announced each term. Typical topics are group theory, analyticity in particle physics, weak interactions, superfluids, stellar evolution, surface physics, Monte Carlo methods, low-temperature physics, magnetic resonance, phase transitions, and the renormalization group.

#### PHYS 681 Quantum Information Processing (also PHYS 481 and COM S 453)

See PHYS 481 for description.

[PHYS 687 Selected Topics in Accelerator Technology (also PHYS 487) See PHYS 487 for description. Not offered 2002-2003.]

#### [PHYS 688 Introduction to Accelerator **Physics and Technology (also PHYS** 488)

Fall. 3 credits. Not offered 2002-2003. For description, see PHYS 488.]

## PHYS 690 Independent Study in Physics

Fall or spring. Variable to 4 credits. Students must advise department course coordinator, 121 Clark Hall, of faculty member responsible for grading their project. S-U grades only. Special graduate study in some branch of physics, either theoretical or experimental, under the direction of any professorial member of the staff.

## POLISH

See Department of Russian.

## PORTUGUESE

See Department of Romance Studies.

## **PSYCHOLOGY**

D. J. Bem, S. L. Bem, U. Bronfenbrenner,

- M. Christiansen, J. E. Cutting, R. B. Darlington, T. J. DeVoogd, D. A. Dunning, S. Edelman.
- M. Ferguson, D. J. Field, B. L. Finlay,
- E. J. Gibson, T. D. Gilovich, B. P. Halpern,
- A. M. Isen, S. J. Johnson, R. E. Johnston,
- C. L. Krumhansl, W. W. Lambert,
- D. A. Levitsky, J. B. Maas, U. Neisser, M. Owren, H. S. Porte, D. T. Regan,
- E. A. Regan, H. Segal, M. Spivey, B. J. Strupp

The major areas of psychology represented in the department are perceptual and cognitive psychology, biopsychology, and personality and social psychology. These areas are very broadly defined, and the courses are quite diverse. Biopsychology includes such things

as animal learning, neuropsychology, interactions between hormones, other biochemical processes, and behavior. Perceptual and cognitive psychology includes such courses as cognition, perception, memory, and psycholinguistics. Personality and social psychology is represented by courses in social psychology and personality (such as Psychology and Law, Judgment and Decision Making, and Social Construction of Gender), as well as courses in fieldwork and psychopathology. In addition to the three major areas mentioned above, the department also emphasizes the statistical and logical analysis of psychological data and problems.

## **The Major**

Admission to the major is usually granted to any student in good standing in the college who has passed three or more psychology courses with grades of C+ or better. Provisional admission requires two such courses. To apply to the major and receive an adviser, a major application form may be obtained from the department office (211 Uris Hall) and should be completed and taken to one of the faculty members whose name is listed on the form.

Requirements for the major are:

- a total of 40 credits in psychology (including prerequisites), from which students majoring in psychology are expected to choose, in consultation with their advisers, a range of courses that covers the basic processes in psychology (laboratory and/or field experience is recommended); and
- demonstration of proficiency in statistics before the beginning of the senior year. (See the section below on the statistics requirement.)

Normally it is expected that all undergraduate psychology majors will take at least one course in each of the following three areas of psychology:

- 1) Perceptual and cognitive psychology
- 2) Biopsychology
- 3) Social, personality, and abnormal psychology

The following classification of Department of Psychology offerings is intended to help students and their advisers choose courses that will ensure that such breadth is achieved.

- 1) **Perceptual and cognitive psychology:** PSYCH 205, 209, 214, 215, 292, 305, 311, 316, 342, 412, 413, 414, 415, 416, 417, 418, 419, 436, 492.
- Biopsychology: PSYCH 223, 307, 322, 324, 326, 332, 361, 396, 420, 422, 424, 425, 429, 431, 440, 492.
- 3) Social, personality, and abnormal psychology: PSYCH 128, 265, 275, 277, 280, 281, 325, 327, 328, 402, 404, 450, 481, 489, 491.
- Other courses: PSYCH 101, 199, 347, 350, 410, 440, 441, 470, 471, 472, 473, 475, 478, 479. The major adviser determines to which group, if any, these courses may be applied.

With the permission of the adviser, courses in other departments may be accepted toward the major requirements.

**Fieldwork, independent study, and teaching.** The department requires students to observe the following limits on fieldwork, independent study, and teaching.

- Undergraduates may not serve as teaching assistants for psychology courses if they are serving as teaching assistants for any other course during the same semester.
- An undergraduate psychology major cannot apply more than 12 of the credits earned in independent study (including honors work) and fieldwork toward the 40 credits required by the major.

**Statistics requirement.** Proficiency in statistics can be demonstrated in any one of the several ways listed below.

- 1) Passing PSYCH 350.
- 2) Passing an approved course or course sequence in statistics in some other department at Cornell. The approved list of courses and sequences may change. It has usually included SOC 301 and ILR 210 and 211. Requests that a particular course be added to this list may be made to Professor Gilovich.
- 3) Passing a course or course sequence in statistics at some other college, university, or college-level summer school. The course or sequence must be equivalent to at least six semester credits. The description of the course from the college catalog and the title and author of the textbook used must be submitted to Professor Gilovich for approval.
- 4) Passing an exemption examination. This examination can be given at virtually any time during the academic year if the student gives notice at least one week before. Students who have completed a theoretical statistics course in a department of mathematics or engineering and who wish to demonstrate competence in applied statistics usually find this option the easiest. Students planning this option should discuss it in advance with Professor Gilovich.

Concentration in biopsychology. Psychology majors interested in psychology as a biological science can elect to specialize in biopsychology. Students in this concentration must meet all of the general requirements for the major in psychology and must also demonstrate a solid background in biology; the physical sciences, including at least introductory chemistry; and mathematics. Students will design with their advisers an integrated program in biopsychology built around courses on physiological, chemical, anatomical, and ecological determinants of human and nonhuman behavior offered by the Department of Psychology. Additional courses in physiology, anatomy, biochemistry, neurochemistry, neurobiology, and behavioral biology may be designated as part of the psychology major after consultation between the student and his or her biopsychology adviser.

**Concentration in personality and social psychology.** Psychology majors who wish to specialize in social psychology are expected to meet the general requirements set by their department, including statistics. To ensure a solid interdisciplinary grounding, students in the concentration will be permitted to include some major courses in sociology and related fields. Advisers will assist students in the selection of a coherent set of courses from social organization, cultural anthropology, experimental psychology, social methodology, and several aspects of personality and social psychology. Seniors in the concentration may elect advanced and graduate seminars, with the permission of the instructor.

Undergraduate honors program. The honors program is designed for those exceptionally able students who wish to pursue an intensive and independent program of research in psychology. Successful participation in this program serves as evidence of the student's facility in the two most important skills of an academic psychologist: the capacity to acquire and integrate a substantial body of theoretical and factual material and the ability to engage in creative research activity. All qualified students planning on a graduate education in psychology or other academic fields should consider the honors program seriously. The program offers most students the closest contact and consultation with faculty that they will receive during their time at Cornell.

The core of the honors program is a research project that the student carries out in close collaboration with a faculty member in the field of psychology. It is assumed that most students will do so while enrolled in PSYCH 470 (Undergraduate Research in Psychology). A written report of the research is to be given to the chair of the honors committee (currently Professor Owren) toward the end of the last semester of the student's senior year. An oral defense of the thesis is then given before a committee of three faculty members, and the student presents his or her work in a public forum. Final honors standing (summa cum laude, magna cum laude, cum laude) is indicated on the student's diploma. The T. A. Ryan Award, accompanied by a cash prize, is awarded to the student who conducts the best honors project in a given year.

A student may formally apply to the honors program at any time during the senior year provided that she or he is actively engaged in independent research. However, students must do so by the second week of November. Applications should be given to Professor Owren and should be made directly by the student.

## **Distribution Requirement**

The distribution requirement in the social sciences is satisfied by any two courses in psychology with the exception of PSYCH 223, 307, 322, 324, 326, 332, 350, 361, 396, 410, 420, 422, 424, 425, 429, 431, 440, 441, 470, 471, 472, 473, 475, 478, 479, 491, 492.

Note: The Department of Psychology has listed all days and times for each course that we offer. If there should be changes in the days, times, or semester that a course is offered, we will post the necessary changes throughout the department and in the supplements of the Course and Time and Course and Room Rosters. Changes are also available on the web site, comp9.psych.cornell.edu.

## Courses

#### PSYCH 101 Introduction to Psychology: The Frontiers of Psychological Inquiry (III)

Fall. 3 credits. Students who would like to take a discussion seminar should also enroll in PSYCH 103. M W F. J. B. Maas.

The study of human behavior. Topics include brain functioning and mind control, psychophysiology of sleep and dreaming, psychological testing, perception, learning, cognition, memory, language, motivation, personality, abnormal behavior, psychotherapy, social psychology, and other aspects of applied psychology. Emphasis is on developing skills to critically evaluate claims made about human behavior.

#### [PSYCH 102 Introduction to Cognitive Science (also COGST 101, COMS 101, LING 170, PHIL 191) (III)

Fall. 3 or 4 credits (the four-credit option involves a writing section instead of taking exams). T R. Not offered 2002–2003. M. Spivey.

This course surveys the study of how the mind/brain works. We examine how intelligent information processing can arise from biological and artificial systems. The course draws primarily from five disciplines that make major contributions to cognitive science: philosophy, psychology, neuroscience, linguistics, and computer science. The first part of the course introduces the roles played by these disciplines in cognitive science. The second part of the course focuses on how each of these disciplines contributes to the study of five topics in cognitive science: language, vision, learning and memory, action, and artificial intelligence.]

## PSYCH 103 Introductory Psychology Seminars

Fall. 1 credit. Limited to 300 students. Prerequisite: concurrent enrollment in PSYCH 101. 12 different time options. J. B. Maas and staff.

A weekly seminar that may be taken in addition to PSYCH 101 to provide an in-depth exploration of selected areas in the field of psychology. Involves extensive discussion and a term paper related to the seminar topic. Choice of seminar topics and meeting times are available at the second lecture of PSYCH 101.

## [PSYCH 111 Brain Mind and Behavior (also BIONB 111 and COGST 111) (I)

Spring 3 credits. Letter grades only. No prerequisites. Intended for freshman and sophomores in the humanities and social sciences; seniors not allowed. Not recommended for psychology majors; biology majors may not use the course for credit toward the major. M W F. Not offered 2002–2003. E. Adkins Regan and R. Hov.

Understanding how the brain creates complex human behavior and mental life is a great scientific frontier of the next century. This course enables students with little scientific background from any college or major to appreciate the excitement. What are the interesting and important questions? How are researchers trying to answer them? What are they discovering? Why did the brain evolve this remarkable capacity?]

## [PSYCH 201 Cognitive Science in Context Laboratory (also COGST 201 and COM S 201) (III)

Spring. 4 credits. Prerequisite: PSYCH 102/ COG ST 101/COM S 101/LING 170/PHIL 191, Introduction to Cognitive Science. Knowledge of programming languages is not assumed. Limited to 24 students. Disc and demos, M W; lab, M W, plus additional hours TBA. Uris Hall 259. Not offered 2002–2003. D. Field and staff.

A laboratory course that explores the theories of cognitive science and provides direct experience with the techniques of cognitive science, in relation to the full range of both present and anticipated future activities in the workplace, the classroom, and in everyday life. Discussions of laboratory exercise results, supplementation of laboratory topics, and analyses of challenging primary research literature are done in meetings of the entire class. Laboratory exercises, which are done on an individual or small group basis, include both pre-planned investigations and studentdeveloped experiments. Use of digital computers as well as the Internet, electronic mail, and web sites are integral components of the course.

The focus is on human-computer interactions that are intended to permit effective and efficient exchange of information and control of functions or operations. This approach is applied to real life settings. Students are expected to come to each discussion meeting having read and thought about assigned materials, and to come to scheduled laboratory meetings fully prepared to perform the laboratory exercises. Laboratory facilities are available to students at all times so that statistical analysis of data, preparation of laboratory reports, and collection of experimental data is facilitated.]

## **PSYCH 205** Perception (III)

Spring. 3 credits. Open to all students. Graduate students, see PSYCH 605. T R. J. E. Cutting.

One of four introductory courses in cognitive psychology. Basic perceptual concepts and phenomena are discussed with emphasis on stimulus variables and sensory mechanisms. All sensory modalities are considered. Visual and auditory perception are discussed in detail.

## PSYCH 209 Developmental Psychology (III)

Spring. 4 credits. Graduate students, see PSYCH 709. M W. S. Johnson. One of four introductory courses in cognition and perception. A comprehensive introduction

and perception. A comprehensive introduction to current thinking and research in developmental psychology that approaches problems primarily from a cognitive perspective. The course focuses on the development of perception, action, cognition, language and social understanding in infancy and early childhood.

## PSYCH 214 Cognitive Psychology (also COGST 214) (III)

Fall. 3 or 4 credits (the 4-credit option involves some participation in COGST 501/ PSYCH 614). Sophomore standing required. Limited to 150 students. Graduate students, see PSYCH 614. M W F. S. Edelman.

The course serves as a broad overview of problems arising in the study of cognition and of the information-processing, or computational, approaches to solving these problems, in natural and artificial cognitive systems. Theoretical and experimental challenges posed by the understanding of perception, attention and consciousness, memory, thinking, and language are discussed and analyzed. Participants acquire conceptual tools essential for following the current debates on the nature of mind and its relationship to the brain.

### PSYCH 215 Psychology of Language (also COGST 215, LING 215) (III)

Spring. 3 credits. Limited to sophomores, juniors, and seniors. Prerequisites: any one course in Psychology or Human Development. Graduate students, see PSYCH 715. T R. M. Christiansen.

This course provides an introduction to the psychology of language. The purpose of the course is to introduce students to the scientific study of psycholinguistic phenomena. It covers a broad range of topics from psycholinguistics, including the origin of language, the different components of language (phonology, morphology, syntax, and semantics), processes involved in reading, computational modeling of language processes, the acquisition of language (both under normal and special circumstances), and the brain bases of language.

## PSYCH 223 Introduction to

**Biopsychology (I:supplementary list)** Fall. 3 credits. M W F 10:10. No prerequisites. Can be used to satisfy the psychology major breadth requirement and as an alternative prerequisite for upper-level biopsychology courses. M. J. Owren.

An introduction to psychology from a biological perspective, including both evolutionary and physiological approaches to behavior. Topics include the structure and function of the nervous system, genetic and biochemical models of behavior, hormones and behavior, biological bases of learning, cognition, communication, and language, and the evolution of social organization.

Introductory courses in social and

**personality psychology.** Each of the following four courses (265, 275, 277, 280) provides an introduction to a major area of study within social and personality psychology. These courses are independent of one another, and none have any prerequisites. Students may take any one of the courses or any combination of them (including all four). Courses may be taken in any order or simultaneously.

## PSYCH 265 Psychology and Law (III)

Fall. 3 credits. M W F. D. A. Dunning. This course examines the implications of psychological theory and methods for law and the criminal justice system. We concentrate on psychological research on legal topics (e.g., confession, eyewitness testimony, jury decision making, homicide, aggression, the prison system), social issues (e.g., death penalty, affirmative action), and on psychologists as participants in the legal system (e.g., assessing insanity and dangerousness and for expert testimony).

### PSYCH 275 Introduction to Personality Psychology (also HD 260) (III)

Spring. 3 credits. Recommended: introductory course in psychology or human development. T R. C. Hazan.

This course is designed as an introduction to theory and research in the area of personality psychology, with special emphasis on personality development. It covers the major influences including genetic, environmental, and gene-environment interactions, and involves in-depth study of the major theories. The assumptions and models of human behavior that form the basis of each theoretical orientation are examined and compared, and the relevant empirical evidence reviewed and evaluated. In addition, basic psychometric concepts and the methods for measuring and assessing personality are covered, as will the major related debates and controversies.

## [PSYCH 277 Social Construction of Gender (also WOMNS 277) (III)

Fall. 3 credits. Limited to 180 students. T R. Not offered 2002-2003. S. L. Bem.

PSYCH/WOMNS 277 is an interdisciplinary course that addresses two broad questions: How an individual's gender and sexuality constructed? And how are hidden assumptions or "lenses" embedded in our social institutions, cultural discourses, and individual psyches perpetuate male power and oppress women and sexual minorities? Three lenses in particular are emphasized: androcentrism, gender polarization, and biological essentialism. A fundamental assumption of the course is that social science has worried too much about difference per se and too little about how even our most neutral-looking institutions invisibly transform difference into disadvantage. Although some attention is given to biological perspectives, the course emphasizes the cultural and psychological processes whereby the historically contingent comes to appear as the natural. Among some of the many topics discussed are the importance of looking at biology in context, the parental "instinct," androcentrism in law, sexual orientation cross-culturally, egalitarian relationships, gender-liberated child-rearing, and homophobia.]

## **PSYCH 280 Introduction to Social Psychology (III)** Fall. 3 credits. T R. T. D. Gilovich and

D. T. Regan.

An introduction to research and theory in social psychology. Topics include social influence, persuasion, and attitude change; social interaction and group phenomena; altruism and aggression; stereotyping and prejudice; and everyday reasoning and judgment.

#### [PSYCH 282 Community Outreach (also HD 282)

Fall and spring. 2 credits. Prerequisites: PSYCH 101 or HD 115. Students may not concurrently register with PSYCH 327 or PSYCH 328. Not offered 2002-2003. T. H. Segal.

This course provides students with information and perspectives essential to volunteer field work with human and social service programs in the community. To gain a practical understanding of what mental health professionals do in the workplace, students examine problems that emerge in fieldwork settings which raise ethical, methodological. theoretical, and practical issues in the observation or treatment of clients or patients. Although students are not required to volunteer at a local agency, the instructor will assist students in finding sites that may provide appropriate learning opportunities. A paper, relating current research to issues relevant to community mental health, is due at the end of the course.]

## [PSYCH 292 Intelligence (III)

Spring. 4 credits. Prerequisites: one 200level course in psychology. M W. Section meetings on Friday. Not offered 2002-2003. U. Neisser.

A scientific overview of the controversial issues that surround intelligence tests and what they measure. Topics include the history of testing, correlates of test scores, alternative approaches to mental ability, genetic and environmental contributions to diversity in

intelligence, effects of schooling, worldwide IQ gains, cultural factors, and group differences.]

## **PSYCH 305** Visual Perception (also VISST 305) (III) Fall. 4 credits. Limited to 25 students.

Prerequisite: PSYCH 205 or permission of instructor. M W F. J. E. Cutting. A detailed examination of pictures and their comparison to the real world. Linear perspective in Renaissance art, photography, cinema, and video are discussed in light of contemporary research in perception and cognition.

## [PSYCH 311 Introduction to Human **Memory (III)** Spring. 3 credits. Limited to 40 students.

Some familiarity with statistical methods and experimental design and with the study of cognition is desirable. Graduate students, see PSYCH 611. T R. Not offered 2002-2003. Staff.

This course offers an overview of experimental findings and theoretical issues in the study of human memory. Coverage includes topics such as the nature of memory, various memory systems, coding and retrieval processes, practice and habit acquisition, organization for learning and memory, interference and forgetting, models of memory, and memory dysfunction and its relation to normal memory.]

## **PSYCH 313** Problematic Behavior in

Adolescence (also HD 313) (III) Fall. 3 credits. Prerequisite: HD 115 or PSYCH 101; HD 216 recommended. M W. J. Haugaard.

This course explores several problematic behaviors of adolescence, including depression, drug abuse, eating disorders, and delinquency. Various psychological, sociological, and biological explanations for the behaviors are presented. Appropriate research is reviewed; treatment and prevention strategies are explored. An optional discussion section is available to students who would like an opportunity to discuss readings and lectures in greater depth.

## [PSYCH 316 Auditory Perception (III)

Fall. 3 or 4 credits; the 4-credit option involves a laboratory project or paper. Prerequisite: PSYCH 205, 209, 214 (other psychology, linguistics, or biology courses could serve as prerequisite with permission of the instructor). Limited to 30 students. Graduate students, see PSYCH 716. M W. Not offered 2002-2003. C. L. Krumhansl.

A course that covers the major topics in auditory perception including: physics of sound; structure and function of the auditory system; perception of loudness, pitch, and spatial location, with applications to speech production and perception; and music and environmental sounds.]

## **PSYCH 322** Hormones and Behavior (also BIONB 322) (I)

Fall. 3 credits. Two lectures plus a section in which students read and discuss original papers in the field, give an oral presentation, and write a term paper. Limited to juniors and seniors. Prerequisites: any one of the following: (a) PSYCH 223, (b) BIONB 221, (c) BIONB 222, or (d) one year of introductory biology plus a course in psychology. Letter grade only. Graduate students see PSYCH 722. M W F. E. Adkins Regan.

The major focuses of the course are comparative and evolutionary approaches to the study of the relationship between reproductive hormones and sexual behavior in vertebrates, including humans. Also included are hormonal contributions to parental behavior, aggression, stress, learning and memory, and biological rhythms.

## PSYCH 324 Biopsychology Laboratory (also BIONB 324) (I) Fall. 4 credits. Limited to 20 juniors and

seniors. Prerequisites: PSYCH 223 or BIONB 221 or 222, and permission of instructor. T R. T. J. DeVoogd.

Experiments designed to provide experience in animal behavior (including learning) and its neural and hormonal mechanisms. A variety of techniques, species, and behavior patterns are included.

# [PSYCH 325 Adult Psychopathology (also HD 370) (III)

Spring. 3 credits. Limited to sophomores, juniors, and seniors. Prerequisites: any one course in Psychology or Human Develop-ment. M W. Not offered 2002–2003. Staff.

A research-based introduction to the biological, psychological, and social (including cultural and historical) aspects of adult psychopathology. The major mental illnesses are covered, including (among others) schizophrenia, mood disorders, anxiety disorders, and personality disorders. Childhood disorders are not covered.]

## PSYCH 326 Evolution of Human

**Behavior (I:supplementary list)** Spring. 4 credits. Prerequisite: PSYCH 223, or an introductory biology course, or an introductory anthropology course. Graduate students, see PSYCH 626. T R. R. E. Johnston.

A broad comparative approach to the behavior of animals and humans with special emphasis on the evolution of human behavior. Topics covered vary but include some of the following: human evolution, evolutionary and sociobiological theory, animal communication, nonverbal communication, language, cognitive capacities, social behavior and organization, cooperation and altruism, sexual behavior, mating and marriage systems, aggression, and warfare.

## PSYCH 327 Field Practicum I (also HD 327) (111)

Fall only. 3 credits. Prerequisites: PSYCH 325 or HD 370 (or taken concurrently), and permission of instructor. No S-U grades. Enrollment is limited to 30 students. Fee: \$25 each semester. Enrolled students must commit to taking PSYCH 328 in the spring semester. No S-U option. M W. H. Segal.

This course is composed of three components which form an intensive undergraduate field practicum. First, students spend three to six hours a week at local mental health agencies, schools, or nursing facilities working directly with children, adolescents, or adults; supervision is provided by host agency staff. Second, Cornell faculty provide additional weekly educational supervision for each student. Third, seminar meetings cover issues of adult and developmental psychopathology, clinical technique, case studies, and current research issues. Students write two short papers, two final take-home exams, and present an account of their field experience in class.

# PSYCH 328 Field Practicum II (also HD 328) (III)

Spring, 3 credits. Prerequisites: PSYCH 327 taken the previous term, PSYCH 325 or HD 370 (or taken concurrently), permission of instructor. No S-U grades. Enrollment is limited to 30 students. Fee: \$25 each semester. M W. H. Segal.

This course continues the field practicum experience from PSYCH 327. Students spend three to six hours a week at local mental health agencies, schools, or skilled nursing facilities working directly with children, adolescents, or adults; supervision is provided by host agency staff.

#### PSYCH 330 Introduction to Computational Neuroscience (also BioNB 330)

Fall. 3 credits. Limited to 25 students. Prerequisites: BIONB 222 or permission of instructor. S-U Grades Optional. Lecs T R 2:55–4:10. Offered alternate years. C. Linster.

This course will cover the basic ideas and techniques involved in computational neuroscience. The course surveys diverse topics including: neural dynamics of small networks of cells, neural coding, learning in neural networks and in brain structures, memory models of the hippocampus, sensory coding and others.

## PSYCH 332 Biopsychology of Learning and Memory (also BIONB 328) (I)

Spring. 3 credits. Prerequisites: 1 year of biology and either a biopsychology class or BIONB 222. Limited to 60 students. Graduate students, see PSYCH 632. M W F. T. J. DeVoogd.

This course surveys the approaches that have been or are currently being used in order to understand the biological bases for learning and memory. Topics include invertebrate, "simple system" approaches, imprinting, avian song learning, hippocampal and cerebellar function, and human pathology. Many of the readings are from primary literature.

## **PSYCH 340** Autobiographical Memory

Spring. 3 credits. Limited to 20 students. Prerequisites: any one course in psychology or human development. M W. U. Neisser.

Much recent research has focused on people's ability to remember—and often to misremember-their own life experiences. This course will review that research, including such topics as "flashbulb" memories, "childhood amnesia," the development of memory in children, cultural differences, the "false memory syndrome," eyewitness testimony, prospective memory, sex differences, recall of school learning, the amnesic syndrome, and the relation between memory and self.

### PSYCH 342 Human Perception: Applications to Computer Graphics, Art, and Visual Display (also COGST 342 and VISST 342) (III)

Fall. 3 or 4 credits. The 4-credit option involves a term paper. Prerequisite: PSYCH 101 or permission of instructor. PSYCH 205 strongly recommended. Graduate students, see PSYCH 642. T R. D. J. Field.

Our present technology allows us to transmit and display information through a variety of media. To make the most of these media channels, it is important to consider the limitations and abilities of the human observer. The course considers a number of applied aspects of human perception with an emphasis on the display of visual information. Topics covered include: "three-dimensional" display systems, color theory, spatial and temporal limitations of the visual systems, attempts at subliminal communication, and "visual" effects in film and television.

#### PSYCH 347 Psychology of Visual Communications (also VISST 347) (111)

Spring. 3 credits. Limited to 15 students. Prerequisites: PSYCH 101 and permission of instructor. R. J. B. Maas.

An exploration of theories of education, communication, perception, attitude, and behavior change as they relate to the effectiveness of visually based communication systems. Emphasis is on the use of photography and computer graphics to deliver educational messages.

## PSYCH 350 Statistics and Research Design (II)

Fall. 4 credits. Limited to 120 students. M W F. T. D. Gilovich.

Acquaints the student with the elements of statistical description (measures of average, variation, correlation, etc.) and, more important, develops an understanding of statistical inference. Emphasis is placed on those statistical methods of principal relevance to psychology and related behavioral sciences.

## PSYCH 361 Biopsychology of Normal and

Abnormal Behavior (also NS 361) Fall. 3 credits. Limited to 50 students in psychology and 50 students in nutritional sciences. Prerequisites: an introductory biology course and an introductory psychology course, or permission of instructor. S-U grades optional. Juniors and seniors only. M W F. B. J. Strupp.

A critical evaluation of factors thought to underlie normal and abnormal behavior and/ or cognitive functioning. Psychological, biological, and societal influences are integrated. Topics include: the psychobiology of learning and memory; nutritional influences on behavior/cognition (e.g., sugar, food additives, choline); cognitive dysfunction (e.g., amnesia, Alzheimer's disease); developmental exposure to environmental toxins and drugs of abuse; and psychiatric disorders (depression, eating disorders).

## PSYCH 380 Social Cognition (III)

Fall. 4 credits. Limited to juniors and seniors. Prerequisites: PSYCH 280. M W F. M. Ferguson.

What are the causes and consequences of our own and other's judgments, feelings, attitudes, and behaviors? This course introduces students to social cognition, which is a research perspective that uses both cognitive and social psychological theories and methodologies to explain such social phenomena.

### [PSYCH 396 Introduction to Sensory Systems (also BIONB 396) (I)

Spring. 4 credits. Limited to 25 students. Prerequisites: an introductory course in biology or biopsychology, plus a second course in behavior, biopsychology, cognitive science, neuroscience, or perception. Students are expected to have a knowledge of elementary physics, chemistry, and behavior. S-U grades optional. Offered alternate years, not offered 2002–2003. Class meetings, M W F. B. P. Halpern.

This course covers both those characteristics of sensory systems that are common across living organisms and those sensory properties that represent adaptations of animals to particular habitats, environments, or niches. The principles and limitations of major methods used to examine sensory systems are considered. Emphasis is on somesthetic, visual, and auditory systems. This course will be taught using the Socratic method, in which the instructor asks questions of the students. Students are assigned original literature in the form of printed or electronic journal articles or reviews and are expected to come to each class having read, thought about, and prepared to discuss the assigned readings and other assigned information resources. A course packet of reproduced articles, textbooks, a course web site, and Internet sites are used. Students submit brief analyses of, and comments and questions on, all assignments by email to the course's electronic mailing list a day before each class meeting. The mailing list distributes submissions to all members of the class and to the instructor. In addition to these brief tri-weekly written exercises, a web site or a term paper on a topic germane to the course is required. All examinations are in take-home format. At the level of From Sound to Synapse by C. D. Geisler; The Retina, by J. E. Dowling. courseinfo.cit.cornell.edu/courses/ psych\_nbb\_396/.]

## [PSYCH 401 Theoretical Approaches to Psychopathology and

**Treatment (III)** Fall. 3 credits. Limited to 20 students. Prerequisites: PSYCH 281 or 325. TBA. Not offered 2002–2003. Staff.

This course is designed to provide students with an overview of theoretical approaches to psychopathology and psychotherapy. It also aims to develop students' capacities to think in theoretical terms about psychological practice. We examine the theoretical and pragmatic features of major contemporary models of psychotherapy and explore the conceptual traditions on which they draw. Observation of the work of children and adolescents, audio-visual demonstrations, case presentations and discussions are included to advance students' understanding of the application of theory to practice. At the end of the course, students should be prepared to take a particular case and discuss the theoretical, practice, and research issues it raises, including intervention strategies. This course is not intended to provide students simply with an understanding of methods. It is organized around theory, research, and practice relevant to the treatment of several of the Disorders of Infancy and Childhood as well as specific disorders of Adults on Axis I and Axis II of DSM IV. Special attention is given to the work of: Daniel Stern, M.D. and Otto Kernberg, M.D.-Psychoanalytic revisionists; Lorna Benjamin, Ph.D.-Interpersonal Theory; Aaron Beck, M.D.-Cognitive Theory; and Marsha Linehan, Ph D .--- Behavioral and Cognitive-Behavioral Treatment.]

## [PSYCH 402 Current Research on Psychopathology: Depression (iii)

Spring, 4 credits. Limited to 20 students. Prerequisite: PSYCH 325 or HD 370 and permission of the instructor. M. Not offered 2002–2003. Staff.

Current research and theory on the nature and etiology of depression. Approaches from

various perspectives (biological, psychological, socio-cultural) are considered. Minimal attention given to psychotherapy and symptomatology.]

#### [PSYCH 404 Psychopathology and the Family (III)

Spring. 4 credits. Limited to 20 students. Prerequisite: PSYCH 325 or HD 370 and permission of the instructor. M. Not offered 2002–2003. Staff.

This course explores familial influences on the development of abnormal behavior. It examines how psychological, biological, and cultural factors in a family might contribute to such disorders as anorexia nervosa, depression, psychopathy, and psychosomatic illnesses. Emphasis is placed on early childhood experiences in the family and their impact on the development of later psychopathology. The course also discusses how the evolution of family structures in more recent times (e.g., the rise in day care and divorce) influences the individual. Family therapy approaches and techniques are also examined.]

## PSYCH 410 Undergraduate Seminar in Psychology

Fall or spring. 2 credits. Nonmajors may be admitted, but psychology majors are given priority. Staff.

Information on specific sections for each term, including instructor, prerequisites, and time and place, may be obtained from the Department of Psychology office, 211 Uris Hall.

## [PSYCH 412 Laboratory in Cognition and Perception (III)

Spring. 4 credits. Limited to 15 students. Prerequisite: statistics and 1 course in cognition or perception is recommended. Graduate students, see PSYCH 612. Not offered 2002–2003. M W. D. J. Field.

A laboratory course is designed to introduce students to experimental methods in perception and cognitive psychology. Students take part in a number of classic experiments and develop at least one independent project. Computers are available and used in many of the experiments although computer literacy is not required. Projects are selected from the areas of visual perception, pattern recognition, memory, and concept learning.]

## [PSYCH 413 Information Processing:

**Conscious and Nonconscious (III)** Spring. 4 credits. Prerequisites: at least 1 course in human experimental and permission of instructor; PSYCH 350 or equivalent will be useful for evaluating empirical articles. R. Not offered 2002– 2003. Staff.

In the past decade, a not-so-quiet revolution has been taking place in the field of cognition regarding the problem of conscious mental computation. Data have come from patients with striking neuropsychological syndromes, i.e., the phenomenon of "blindsight" and the "amnesic" syndrome. This signature of independent mental computations has also been amply demonstrated in normal individuals in laboratory settings. We critically evaluate the theoretical worth and empirical justification of the distinction between "conscious" and "nonconscious" mental computations in normal and patient populations. Weekly readings are from, but not limited to, topics such as visual processes, face recognition, explicit and implicit memory, language processing and social cognition. Students are

required to: lead and partake in advanced level discussions of classic and current papers; submit weekly summaries of the assigned readings; and write a term paper on a topic of their interest. Students should be prepared to read extensively.]

## PSYCH 414 Comparative Cognition (also COGST 414) (III) Spring. 3 or 4 credits. The 4-credit option

Spring. 3 or 4 credits. The 4-credit option involves an annotated bibliography or creating a relevant web site. Prerequisites: PSYCH 205, 209, 214, 223, 292 or permission of instructor. Graduate students, see PSYCH 714. T R. M. J. Owren.

This course examines some of the conceptual and empirical work resulting from and fueling the recent surge of interest in animals' thinking. Specific topics may include whether nonhumans behave intentionally; whether they show concept and category learning, memory, and abstract thinking similar to that of humans; the role of social cognition in the evolution of intelligence; and whether animals are conscious or self-aware. Evidence from communication studies in which animal signals provide a "window on the mind" plays a strong role in the deliberations, including studies of naturally occurring signaling in various species and experiments in which nonhumans are trained in human-like language behavior. Cognition in nonhuman primates is a specific focus throughout. The course is a mix of lecture and discussion, emphasizing the latter as much as possible.

## [PSYCH 415 Concepts, Categories, and Word Meanings (III)

Fall. 4 credits. Prerequisites: PSYCH 205, 209, 214, or 215, or permission of instructor. Graduate students, see PSYCH

615. M. Not offered 2002-2003. Staff. A consideration of what types of categories are psychologically important, how they are represented and used through concepts, and how concept structure and semantic structure are interrelated. Different models of concept structure and categorization processes are evaluated, as are models of conceptual change and concept acquisition. Other topics include: relations between concepts and broader knowledge representation systems such as scripts, mental models, and intuitive theories; relative roles of associative information and beliefs in concept structure; categorization in other species; neuropsychological studies of categorization; comparisons of categorization systems across cultures; and comparisons of concept structures across different types of categories.]

### [PSYCH 416 Modeling Perception and Cognition (also COGST 416) (III)

Spring. 4 credits. Prerequisites: PSYCH 205, 209, 214, or 215, or permission of instructor. Graduate students, see PSYCH 616. M W F. Not offered 2002–2003. M. Spivey.

This course offers a survey of several computational approaches to understanding perception and cognition. We explore linear systems analysis, connectionist models, dynamical systems, and production systems, to name a few. Emphasis is placed on how complex sensory information gets represented in these models, as well as how it gets processed. This course covers computational accounts of language processing, language acquisition, visual perception, and visual development, among other topics. Students complete a final project that applies a computational model to some perceptual/ cognitive phenomena.]

## [PSYCH 417 The Origins of Thought and Knowledge (III)

Fall. 4 credits. Prerequisite: permission of instructor. Graduate students, see PSYCH 717. M W. Not offered 2002–2003. S. Johnson.

An in-depth analysis of current theories concerning the growth of thought and knowledge in infancy and early childhood. This course addresses the following questions: How do infants come to understand the objects and events they experience? What are the best methods for assessing development of perception, cognition, and language? How do developing perceptual, cognitive, and language skills constrain object perception? What are the applications of research on early perceptual and cognitive development to such fields as robotics and artificial intelligence?]

## PSYCH 418 Psychology of Music (III)

Spring. 3 or 4 credits, depending on whether student elects to do an independent project. The course is intended for upper-level students in music, psychology, engineering, computer science, linguistics, physics, anthropology, biology, and related disciplines. Some music background is desirable but no specific musical skills (e.g. reading music) are required. Graduate students, see PSYCH 618. M W. C. L. Krumhansl.

A course that covers the major topics in the psychology of music treated from a scientific perspective. It reviews recent developments in the cognitive science of music, beginning with music acoustics and synthesis, and extending to music and its emotional and social effects.

## [PSYCH 419 Neural Networks Laboratory

Spring. 4 credits. Prerequisites: at least 1 course in biology or biological psychology, 1 year of calculus, and permission of instructor. Limited to 15 students. Graduate students, see PSYCH 619. T R. Not offered 2002–2003. D. J. Field.

The course takes a hands-on approach to understanding the limitations and successful applications of neural networks to problems in cognitive and biological psychology. A variety of neural network architectures are discussed and explored using computer simulations. Applications of networks to perceptual recognition and representation are emphasized. We consider the class of problems that different networks can solve and consider the accuracy with which they model real nervous systems. Students complete weekly lab reports and develop one independent project demonstrating the application of a neural network to a problem discussed in the course.]

#### [PSYCH 422 Developmental Biopsychology

Fall. 4 credits. Prerequisites: a course in introductory biology and a course in biopsychology or neurobiology (such as PSYCH 223 or BIONB 221). Graduate students, see PSYCH 622. M W F. Not offered 2002–2003. B. L. Finlay.

We discuss the relationship of the development and evolution of the brain to the development of behavior. Topics include: how neurons are generated, finding targets, and establishing connections; the emergence of reflexive and complex behavior; how experience affects the developing brain; evolutionary perspectives on the development of perception, memory, and communication systems; and abnormal development.]

# [PSYCH 424 Neuroethology (also BIONB 424) (I)

Spring, 4 credits. Prerequisites: BIONB 221 or 222 or BIOG 101–102 and permission of instructor. S-U grades optional. M W F; disc, 1 hour each week. Not offered 2002– 2003. C. D. Hopkins.

Neuroethologists take a comparative and evolutionary approach to study the nervous system. They ask, how do brains of animals compare and how did they come about through the process of evolution? How are neural circuits adapted to species-typical behavior? What is the hope and interest in the study of a large diversity of animals, compared to a specialized look at just a few mammalian species? Can we hope to understand how animals with specialized behaviors have specialized nervous systems? What is the sensory world of a real animal and how does it vary from species to species? These and other questions drive this introductory survey of neuroethology: exituc senses; amazing motor programs; surprising integration.]

## [PSYCH 425 Cognitive Neuroscience

Fall. 4 credits. Prerequisites: a course in introductory biology and a course in biopsychology or neurobiology (such as PSYCH 223 or BIONB 221). Graduate students, see PSYCH 625. M W F. Not offered 2002–2003. B. L. Finlay.

We study the relation between structure and function in the central nervous system. The importance of evolutionary and mechanistic approaches for understanding the human behavior and cognition is stressed. The course focuses on issues in cognitive neuroscience including: mechanisms of perception, particularly vision, and the neuropsychology of everyday acts involving complex cognitive skills such as recognition of individuals, navigation in the world, language, memory, social interaction and consciousness.]

#### PSYCH 428 Connectionist Psycholinguistics (also COGST 428) (III)

Fall. 3 credits. Seniors status or permission of instructor. Graduate students see PSYCH 628. W. M. Christiansen.

Connectionist psycholinguistics involves using (artificial) 'neural' networks, which are inspired by brain architecture, to model empirical data on the acquisition and processing of language. As such, connectionist psycholinguistics has had a far-reaching impact on language research. In this course, we survey the state of the art of connectionist psycholinguistics, ranging from speech processing and word recognition, to inflectional morphology, sentence processing, language production and reading. An important focus of discussion is the methodological and theoretical issues related to computational modeling of psychological data. We furthermore discuss the broader implications of connectionist models of language, not only for psycholinguistics, but also for computational and linguistic perspectives on language.

#### [PSYCH 429 Olfaction and Taste: Structure and Function (also BIONB 429) (I)

Fall. 3 or 4 credits (4-credit option requires a term paper or research project. The research project can, but does not need to, study nonhuman vertebrates). Preference given to junior and senior psychology and biology majors and graduate students. Prerequisite: one 300-level course in biopsychology or equivalent. Graduate students, see PSYCH 629. T R. Not offered 2002–2003. B. P. Halpern.

The structural and functional characteristics of olfaction and taste are explored by reading and discussing current literature in these areas. Structure is examined at the light levels of electron microscopes as well as at the molecular level. Function is primarily neurophysiological and biochemical aspects. The emphasis is on vertebrates, especially airbreathing vertebrates in the case of olfaction, but there is some coverage of invertebrate forms. At the level of *Smell and Taste in Healtb and Disease*, edited by T. V. Getchell, R. L. Doty, L. M. Bartoshuk, and J. B. Snow; *The Neurobiology of Taste and Smell*, edited by T. E. Finger and W. L. Silver.]

#### PSYCH 431 Effects of Aging on Sensory and Perceptual Systems (also BIONB 421) (I)

Fall. 3 or 4 credits. The 4-credit option involves a term paper or creation of a relevant web site. Limited to 25 students. Prerequisites: an introductory course in biology or psychology, plus a second course in perception, neurobiology, cognitive science, or biopsychology. T R. B. P. Halpern.

A literature-based examination of postmaturation changes in the perceptual, structural, and physiological characteristics of somesthetic, visual, auditory, and chemosensory systems. Emphasis is on human data, with nonhuman information included when especially relevant. Quality of Life issues are included. Current developments in human sensory prosthetic devices, and in regeneration or replacement of receptor structures or organs are examined. Brief written statements by e-mail of questions and problems related to each set of assigned readings are required in advance of each class meeting and are automatically distributed to all members of the class. This course is taught using the Socratic Method, in which the instructor asks questions of the students. Students read, analyze, and discuss in class difficult original literature dealing with the subject matter of the course. Readings are from the Course Info site, courseinfo.cit.cornell.edu/courses/ psych431\_nbb421/, from Internet sites, from a course packet, and from materials on reserve. Students are expected to come to each class having already done and thought about the assigned readings, and to take an active part in every class. All examinations are takehome

## [PSYCH 435 Olfaction, Pheromones, and Behavior (III)

Fall. 4 credits. Prerequisites: an introduction course in biology and one in neurobiology and behavior or biopsychology or a 300-level course in biopsychology or permission of instructor. Not offered 2002–2003. R. Johnston.

This course covers chemical signals, olfaction, and behavior in vertebrates (including humans), as well as the neurobiology of olfaction and odor-mediated behaviors. Behavioral topics may vary from year to year but include evaluation of and advertisement for mates, aggression and territorial behavior, parental-young interactions, social recognition (species, sex, individual, kin reproductive state, status), memory for odors, odor and endocrine interactions, imprinting, and homing and navigation. Basic aspects of the structure and function of the olfactory system and also covered, including the molecular biology of chemo-reception, olfactory coding, and higher-order processing in the central nervous system. The format includes lectures, discussions, and student presentations.]

#### PSYCH 436 Language Development (also COGST 436, HD 436, and LING 436) (III)

Spring. 4 credits. Open to undergraduate and graduate students. Graduate students should also enroll under HD 633/LING 700/PSYCH 600, a supplemental graduate seminar. Prerequisite: at least 1 course in developmental psychology, cognitive psychology, cognitive development, or linguistics. S-U grades optional. T R. B. Lust.

This course surveys basic issues, methods, and research in the study of first-language acquisition. Major theoretical positions in the field are considered in the light of experimental studies in first-language acquisition of phonology, syntax, and semantics from infancy on. The fundamental linguistic issues of "Universal Grammar" and the biological foundations for acquisition are discussed, as are the issues of relations between language and thought. The acquisition of communication systems in nonhuman species such as chimpanzees is addressed, but major emphasis is on the child. An optional lab course supplement is available. (See COGST 450/ LING 450 and PSYCH 437.)

#### PSYCH 437 Lab Course: Language Development (also COGST 450, HD 437, and LING 450) (in conjunction with COGST/HD/LING 436, Language Development)

Spring. 2 credits. R. B. Lust. This laboratory course is an optional supplement to the survey course, Language Development (HD/COGST/PSYCH/LING 436). The lab course provides students with a hands-on introduction to scientific research, including design and methods, in the area of first language acquisition.

## PSYCH 440 The Brain and Sleep

Fall. 4 credits. Prerequisites: at least PSYCH 223 or BIONB 221. An additional course in biology, biopsychology or neurobiology is recommended. S-U grades optional. Graduate students, see PSYCH 640. M W. H. S. Porte.

Taking a comparative evolutionary perspective, this course examines the neural events that instigate, maintain, and disturb the states and rhythms of sleep in various species. Emphasizing human data where possible, special topics include sleep deprivation and the biological functions of sleep; sleep's putative role in learning and memory; biologically interesting deviations from normal sleep; and the cognitive neuroscience of sleep.

## PSYCH 441 Laboratory in Sleep Research

Spring, 4 credits. Prerequisite: permission of the instructor during preregistration. Laboratory fee: \$50. Graduate students, see PSYCH 641. W. H. S. Porte.

Emphasizing the neurobiology of sleep state, the course introduces students to the laboratory study of human sleep and its psychological correlates. Serving as both experimenter and subject, each student learns the physical rationale and techniques of electroencephalography and other bioelectric measures of behavioral state. Using computerized data analysis, students complete weekly laboratory reports and a collaborative term project. Sleep recordings are done during the day or evening when possible. In addition, overnight recording sessions are required.

#### [PSYCH 450 Gender and Clinical Psychology (also PSYCH 650, WOMNS 450, WOMNS 650) (III)

Fall. 4 credits. Limited to 15 juniors, seniors, and graduate students. Prerequisites: (1) junior, senior or graduate standing, with preference given to psychology majors and women's studies majors; (2) a prior course related to psychopathology (preferably PSYCH 325/ HD 370); and (3) a prior course related to gender and/or sexuality. Permission of instructor required through an application process during the preceding spring semester. Graduate students, see PSYCH 650/WOMNS 650. Letter grade only. W. Not offered 2002–2003. S. L. Bem.

This advanced undergraduate/graduate seminar takes up several interrelated topics at the intersection of clinical psychology and gender/sexuality. Possible topics include, among others, trauma, personality disorders, and psychiatry's troubled history in the domain of gender/sexuality. Course requirements generally include weekly informal written commentaries on the readings, a final essay examination, and your choice of either a term paper or a class presentation.]

### PSYCH 460 Human Neuroanatomy (also BIONB 420, sec 02) (I or III)

Spring. 3 or 4 credits (4 credits with one discussion/lab per week in which students dissect sheep brains, read original research papers and write a term paper). Prerequisites: PSYCH 223, or BIONB 222, or permission of the instructor. Permission required for 4-credit option. Limited to juniors, seniors and graduate students. S-U grades and auditing not permitted. Lecs, M W F; discussion section to be arranged. S. Newman.

Neuroanatomy is the substrate for the functional organization of the human nervous system. This course introduces the brain nuclei and major connecting pathways of functional neural systems: sensory, motor, and integrative. Our understanding of the functions of these systems is based in part on their dysfunction, on the symptoms of neurological and psychiatric diseases that damage or inactivate selected pathways. This course highlights neuroanatomical pathways and networks that are known, or hypothesized, to be dysfunctional in a variety of nervous system disorders.

#### PSYCH 465 Topics in High-Level Vision (also COGST 465 and COM S 392) (III)

Spring. 4 credits. Graduate students see PSYCH 665. Offered alternate years. S. Edelman. High-level vision is a field of study concerned with functions such as visual object recognition and categorization, scene understanding, and reasoning about visual structure. It is an essentially cross-disciplinary endeavor, drawing on concepts and methods from neuroanatomy and neurophysiology, cognitive psychology, applied mathematics, computer science, and philosophy. The course concentrates on a critical examination of a collection of research publications, linked by a common thread, from the diverse perspectives offered by the different disciplines. Students write bi-weekly commentaries on the assigned papers and a term paper integrating the material covered in class.

#### PSYCH 470 Undergraduate Research in Psychology

Fall or spring, 1–4 credits. S-U grades optional. Written permission from the staff member who will supervise the work and assign the grade must be included with the course enrollment material. Students should enroll in the section listed for that staff member. A section list is available from the Department of Psychology. Staff.

Practice in planning, conducting, and reporting independent laboratory, field, and/ or library research.

## PSYCH 471 Advanced Undergraduate Research in Psychology

Fall or spring, 1–4 credits. S-U grades optional. Written permission of the staff member who will supervise the work and assign the grade must be included with the course enrollment material. Students should enroll in the section listed for that staff member. A section list is available

from the Department of Psychology. Staff. Advanced experience in planning, conducting, and reporting independent laboratory, field, and/or library research. One, and preferably two, semesters of PSYCH 470 is required. The research should be more independent and/or involve more demanding technical skills than that carried out in PSYCH 470.

## PSYCH 472 Multiple Regression

Spring, weeks 1–7. 2 credits. Prerequisite: 1 solid semester of introductory statistics. Analysis of variance is helpful but not required. M W F. R. B. Darlington. Course covers uses and pitfalls of multiple regression in causal analysis, path analysis, and prediction. Emphasis is on analyzing data collected under uncontrolled conditions. Includes colinearity, indicator variables, sets, adjusted and shrunken R<sup>2</sup>, suppressors, hierarchical analysis, overcontrol, and experimental design. Students may use the Mystat, Minitab, SPSS, or Systat statistics packages.

## PSYCH 473 General Linear Model

Spring, weeks 8–14. 2 credits. Prerequisite: PSYCH 472 or equivalent. M W F. R. B. Darlington.

Course topics include multicategorical variables, corrections for multiple tests, diagnostic methods, nonlinear relationships, interaction, main and simple effects, and basic power analysis. Student may use Mystat, Minitab, SPSS or Systat.

## [PSYCH 475 Multivariate Analysis of Psychological Data

Fall. 2 credits. Prerequisite: PSYCH 473 or permission of instructor. R. Not offered 2002–2003. R. B. Darlington.

Students vote on topics to cover, choosing among time series, cluster analysis, multidimensional scaling, component analysis, factor analysis, MANOVA, canonical correlation, repeated measures, logistic regression, loglinear models, ANOVA with empty cells, metaanalysis, and other topics. First class sketches all these topics before vote.]

#### PSYCH 481 Advanced Social Psychology (III) Fall. 4 credits. Limited to 15 students, by

Fall. 4 credits. Limited to 15 students, by application. Senior psychology majors have priority. Graduate students, see PSYCH 681. T R. D. T. Regan.

Selected topics in social psychology are examined in depth with an emphasis on the relationship between experimental research and the development of theory. Readings are mostly primary sources. Among the theoretical approaches to social behavior we may discuss are social comparison theory, cognitive dissonance, attribution processes and social judgment, dramaturgy and impression management, and evolutionary perspectives.

## PSYCH 489 Seminar: Beliefs, Attitudes, and Ideologies (also PSYCH 689/ WOMNS 488/688) (III)

Fall. 4 credits. Prerequisites: admission is by application during the spring preregistration period for the fall semester. Seniors and graduate students are given priority. M. D. J. Bem.

This course in cultural analysis examines the properties of beliefs and attitudes, how they are formed and changed, the psychological functions they serve, and how they get organized into ideologies. Several specific issues involved in America's "culture wars" are examined, such as abortion, gender, sexual orientation, and affirmative action. Other topics include the culture of childhood, deaf culture, and the ideologies of science. Participants write weekly commentaries on the readings and a term paper examining a particular ideology.

## PSYCH 491 Research Methods in Psychology

Spring. 4 credits. Enrollment limited to 20 students. Recommended: permission of instructor, PSYCH 350, experience in upper-division psychology courses, or graduate standing. Graduate students, see

PSYCH 691. T R. D. A. Dunning. An intensive examination of the basic research methods used in social, personality, cognitive, and developmental psychology. The course focuses on designing and conducting experiments, i.e., how to turn vague theories into concrete and testable notions, evaluate studies, avoid common pitfalls, and, finally, remain ethical. Beyond learning methods of "correct" and rigorous experimentation, we also discuss what makes a research study actually interesting. The course in addition, covers test construction, survey methods, and "quasi experiments." Students concentrate on completing a small research project in which they conduct an experiment, interpret its data, and write up the results.

## PSYCH 492 Sensory Function (also BIONB 492, VISST 492) (I)

Spring. 4 credits. Limited to 25 students. Prerequisite: a 300-level course in biopsychology, or BIONB 222 or BIOAP 311, or equivalent. Students are expected to have a knowledge of elementary physics, chemistry, and behavior. S-U grades optional. Graduate students, see PSYCH 692. Offered alternate years. M W F. B. P. Halpern and H. C. Howland.

In general, this course has covered classical topics in sensory function such as vision, hearing, touch, and balance, as well as some more modern topics like sensory processing, location of stimulus sources in space, the development of sensory system, and nonclassical topics such as electroreception and internal chemoreceptors.

## **Advanced Courses and Seminars**

Advanced seminars are primarily for graduate students, but with the permission of the instructor they may be taken by qualified undergraduates. The selection of seminars to be offered each term is determined by the needs of the students.

A supplement describing these advanced seminars is available at the beginning of each semester and can be obtained from the department office (211 Uris Hall). The following courses may be offered either term and carry four credits unless otherwise indicated.

## **PSYCH 510–511** Perception

**PSYCH 512–514** Visual Perception

**PSYCH 518 Topics in Psycholinguistics** 

**PSYCH 519–520** Cognition

**PSYCH 521** Psychobiology (Developmental Seminar)

**PSYCH 522** Topics in Perception and Cognition

**PSYCH 523 Hormones and Behavior** 

**PSYCH 527 Topics in Biopsychology** 

#### **PSYCH 530 Representation of Structure** in Vision and Language (also COGST 530 and LING 530)

Spring. 4 credits. Graduate seminar. Prerequisites: a course each in cognitive psychology, linguistics, computer science, or permission of instructor. Enrollment limited to 20 graduate students. Offered alternate years. S. Edelman.

The seminar concentrates on the nature of the representation of visual objects and scenes in the brain and compare it with the structural framework that serves as the main explanatory tool in current theories of language processing. Data and ideas are drawn from visual psychophysics, neurophysiology, psycholinguistics, computational vision and linguistics, and philosophy. Students present published research papers and preprints, which are then discussed and critiqued.

## **PSYCH 531 Topics in Cognitive Sciences** (also COGST 531 and LING 531)

Spring. 4 credits. S. Edelman and H. Segal. Spring 2003: Mind and Reality in Science Fiction. What does it mean to be a mind? How is a mind affected by its embodiment? by the body's immersion in the world? by not having a body in the first place, or not any longer? Is the world out there what it seems?

Is there a world out there? Profound thinking about, and sometimes disturbing insights into, the nature of the human mind and its relationship to reality are found in the writings of a handful of visionaries to be discussed in this course. Readings will be selected from the works of Jorge Luis Borges, Philip K. Dick, Greg Egan, Ursula LeGuin, Stanislaw Lem, Richard Powers, Arkady and Boris Strugatzky, Vernor Vinge, Connie Willis, and others. For more information, see http://kybele.psych. cornell.edu/~edelman/Cog-531-Spring-2003.

## **PSYCH 535 Evolutionary Perspectives on** Behavior

## **PSYCH 541** Statistics in Current **Psychological Research**

**PSYCH 550 Special Topics in Cognitive** Science

Spring. 4 credits. Not offered 2002-2003. M. Spivey.]

**PSYCH 580** Experimental Social Psychology

**PSYCH 600 General Research Seminar** Fall or spring. No credit.

#### [PSYCH 601 Computational Models of Language

Spring. 4 credits. Prerequisites: consent of instructor. R. Not offered 2002-2003. M. Spivey.

This seminar involves in-depth discussion of a range of computational approaches to language representation, processing, and acquisition. We cover pharse-structure grammars, context-free grammars, connectionist models, statistical natural language processing, and dynamical systems, to name just a few. There is also some handson experience writing models in a computer lab using the MATLAB programming environment.]

## PSYCH 605 Perception (also PSYCH 205) Spring. 4 credits. Non-arts graduate

students only. T R. J. E. Cutting.

## **[PSYCH 607 Chemosensory Perception** (also PSYCH 307)

Fall. 4 credits. T R. Not offered 2002-2003. B. P. Halpern.]

#### [PSYCH 611 Introduction to Human Memory (also PSYCH 311) Spring. 4 credits. T R. Not offered 2002-2003. Staff.]

[PSYCH 612 Laboratory in Cognition and Perception (also PSYCH 412) Spring. 4 credits. M W. Not offered 2002-2003. D. J. Field.]

#### PSYCH 613 Obesity and the Regulation of Body Weight (also NS 315)

Spring. 3 credits. Limited to 30 students. Prerequisites: 1 course in psychology and 1 course in nutrition. Undergraduate students may register with permission of instructor. S-U grades optional. Offered alternate years. T R. D. A. Levitsky. This course is a multidisciplinary discussion of the causes, effects, and treatments of human obesity. Topics include the biopsychology of eating behavior, the genetics of obesity, the role of activity and energy metabolism, psychosocial determinants of obesity, anorexia nervosa, therapy and its effectiveness, and social discrimination.

PSYCH 614 Cognitive Psychology (also **PSYCH 214**)

Fall. 4 credits. M W F. S. Edelman.

[PSYCH 615 Concepts, Categories, and Word Meaning (also PSYCH 415) Fall. 4 credits. M. Not offered 2002-2003. Staff.]

## [PSYCH 616 Modeling Perception and Cognition (also PSYCH 416 and **COGST 416**)

Spring. 4 credits. Not offered 2002-2003. M. Spivey.]

PSYCH 618 Psychology of Music (also **PSYCH 418)** Spring. 4 credits. M W. C. Krumhansl.

[PSYCH 619 Neural Networks Laboratory

(also PSYCH 419) Spring. 4 credits. T R. Not offered 2002-2003. D. J. Field.]

- [PSYCH 622 Developmental **Biopsychology (also PSYCH 422)** Fall. 4 credits. M W F. Not offered 2002-2003. B. L. Finlay.]
- [PSYCH 625 Cognitive Neuroscience (also PSYCH 425)

Fall. 4 credits. M W F. Not offered 2002-2003. B. L. Finlay.]

- **PSYCH 626 Evolution of Human Behavior** (also PSYCH 326) Spring. 4 credits. T R. R. E. Johnston.
- **PSYCH 628** Connectionist **Psycholinguistics (also PSYCH 428)** Fall. 4 credits. W. M. Christiansen.
- **IPSYCH 629** Olfaction and Taste: Structure and Function (also PSYCH 429 and BIONB 429) Spring. 4 credits. T R. Not offered 2002-
- 2003. B. P. Halpern.] PSYCH 631 Effects of Aging on Sensory and Perceptual Systems (also PSYCH 431 and BIONB 421)

Fall. 4 credits. T R. B. P. Halpern

**PSYCH 632 Biopsychology of Learning** and Memory (also PSYCH 332 and **BIONB 328)** 

Spring. 4 credits. M W F. T. J. DeVoogd.

PSYCH 640 The Brain and Sleep (also PSYCH 440)

Fall. 4 credits. M W. H. S. Porte.

- **PSYCH 641** Laboratory in Sleep **Research (also PSYCH 441)** Spring. 4 credits. W. H. S. Porte.
- **PSYCH 642 Human Perception: Applications to Computer Graphics,** Art, and Visual Display (also PSYCH 342 and COGST 342) Fall. T R. D. J. Field.
- **PSYCH 650 Gender and Clinical** Psychology (also PSYCH 450 and WOMNS 450 and 650) Fall, 4 credits, W. S. L. Bem.

**PSYCH 665 Topics In High-Level Vision** (also PSYCH 465, COGST 465, and COM \$ 392) Spring. 4 credits. S. Edelman.

**PSYCH 681** Advanced Social Psychology (also PSYCH 481) Fall. 4 credits. T R. D. T. Regan.

- **PSYCH 689 Seminar: Beliefs, Attitudes,** and Ideologies (also PSYCH 489) Fall. 4 credits. M. D. J. Bem.
- **PSYCH 691** Research Methods in Psychology (also PSYCH 491) Spring. 4 credits. T R. D. A. Dunning.

PSYCH 692 Sensory Function (also PSYCH 492 and BIONB 492) Spring. 4 credits. M W F. B. P. Halpern and H. C. Howland.

#### **IPSYCH 696** Introduction to Sensory Systems (also PSYCH 396 and **BIONB 396)**

Spring. 4 credits. M W F. Not offered 2002-2003. B. P. Halpern.]

## **PSYCH 700** Research in Biopsychology

**PSYCH 709 Developmental Psychology** (also PSYCH 209)

Spring. 4 credits. M W. S. Johnson.

**PSYCH 710** Research in Human **Experimental Psychology** 

**PSYCH 713 Information Processing: Conscious and Nonconscious (also** PSYCH 413) Spring. 4 credits. R. Staff.

- **PSYCH 714 Comparative Cognition (also** PSYCH 414 and COGST 414) Spring. 4 credits. T R. M. J. Owren
- PSYCH 715 Psychology of Language (also PSYCH 215) Spring. 4 credits. T R. M. Christiansen.

**[PSYCH 716 Auditory Perception (also PSYCH 316)** Fall. 4 credits. M W. Not offered 2002-2003. C. L. Krumhansl.]

[PSYCH 717 The Origins of Thought and Knowledge (also PSYCH 417) Fall. 4 credits. M W. Not offered 2002-2003. S. Johnson.]

## **PSYCH 720 Research in Social Psychology and Personality**

**PSYCH 722** Hormones and Behavior (also PSYCH 322 and BIONB 322) Fall. 4 credits. M W F. E. A. Regan

## **PSYCH 775** Proseminar in Social **Psychology** I

Fall. 2 credits. Limited to 10 graduate students in social psychology. Prerequisite: permission of instructors. D. A. Dunning, T. D. Gilovich, and D. T. Regan.

This is the first term of a year-long discussionseminar course intended to give graduate students an in-depth understanding of current research and theory in social psychology. The course will emphasizes social cognition, but other topics, such as group dynamics, social influence, the social psychology of language, and emotional experience, etc., are covered.

## **PSYCH 776** Proseminar in Social **Psychology II**

Spring. 2 credits. Limited to 10 graduate students in social psychology. Prerequisite: permission of instructors. D. A. Dunning, T. D. Gilovich, and D. T. Regan.

This is the second half of a year-long discussion-seminar course intended to give graduate students an in-depth understanding of current research and theory in social psychology. The course emphasizes social cognition, but other topics, such as group dynamics, social influence, the social

psychology of language, and emotional experience are covered.

- **PSYCH 900 Doctoral Thesis Research in** Biopsychology
- **PSYCH 910** Doctoral Thesis Research in Human Experimental Psychology
- **PSYCH 920** Doctoral Thesis Research in Social Psychology and Personality

## Summer Session Courses

The following courses are also frequently offered in the summer session, though not necessarily by the same instructor as during the academic year. Not all of these courses are offered in a particular summer. Information regarding these courses and additional summer session offerings in psychology is available from the department before the end of the fall semester.

PSYCH 101 Frontie	Introduction to Psychology: The rs of Psychological Inquiry
PSYCH 102	Introduction to Cognitive Science
PSYCH 128 Introduction to Psychology: Personality and Social Behavior	
PSYCH 199	Sports Psychology
PSYCH 223	Introduction to Biopsychology
PSYCH 280	Introduction to Social Psychology
PSYCH 350	Statistics and Research Design

## QUECHUA

See Romance Studies.

## **RELIGIOUS STUDIES MAJOR**

J. M. Law, director; B. Adams, C. M. Arroyo, D. Boucher, R. Brann, R. G. Calkins, C. M. Carmichael, K. Clinton, W. T. Dickens, Fajans, D. Fredericksen, D. Gold, S. Greene, K. Haines-Eitzen, J. S. Henderson, T. D. Hill, D. Holmberg, P. R. Hyams, J. J. John, C. V. Kaske, W. J. Kennedy, S. MacDonald, D. Mankin, K. S. March, C. Minkowski, R. L. Moore, D. I. Owen, J. R. Piggott, D. S. Powers, G. Rendsburg, J. S. Rusten, P. S. Sangren, D. R. Shanzer, S. Toorawa, M. Washington The Religious Studies Program, an academic

unit providing a major in the scholarly study of religion through the College of Arts and Sciences, offers a wide variety of courses. In addition to courses addressing with various approaches to and topics in the study of religion, we have integrated curricula within our program for in-depth studies of Judaism, Christianity, the Hindu tradition, and Buddhism. We also offer an increasing number of courses on Islam.

The Religious Studies Program is designed to meet the needs of three classes of students: (1) students planning to pursue advanced degrees in the academic study of religion or allied disciplines or subdisciplines (history of religions, religion and literature, religion and psychology, ethics, theology, area studies, etc.); (2) students seeking courses on topics relating to religion to fulfill distribution requirements; and (3) those students desiring a more systematic exposure to the academic

study of religion as a significant component of their liberal arts experience. To all students, our program offers an excellent opportunity to develop a deeper understanding and appreciation of the complex ways in which religious traditions, with their individual. communal, and doctrinal dimensions inform human thought and behavior. The courses offered through our program are built on the established scholarly tradition of the study of religion as an academic, as opposed to confessional, pursuit. Religious traditions are explored in all of their complexity through comparative, contextual (in specific historical or cultural contexts), and thematic studies.

The program also hosts lecture series, conferences, symposia, and periodic social gatherings for faculty and students throughout the academic year to foster a sense of intellectual community among our students and faculty.

## The Major in Religious Studies

Signing into the major: To sign into the major in Religious Studies, a student must have completed at least one course in Religious Studies prior to scheduling an appointment with the program director. Here is the process:

- 1) Schedule an appointment with Professor Jane-Marie Law, Director of Religious Studies: please contact her by e-mail: iml16@cornell.edu.
- In addition to a copy of your current 2) Cornell transcript (the informal one you regularly receive is acceptable), please bring to your meeting with Professor Law all of these forms, which are available in the Religious Studies office:
  - a completed Religious Studies Major Application Form (available in Rockefeller 182)
  - a proposed "Course of Study," which b) will be used as a guide in your conversation with the director and revised for formal submission to the program upon your entrance as a major
  - a College of Arts & Sciences Adviser/ c) Major form which will be signed by the director and your adviser.

Advising in the Religious Studies Program: Upon entering the major in Religious Studies, a student is assigned a faculty adviser whose area of expertise most closely matches the proposed interest of the student. An up-todate approved adviser list is available in the Religious Studies office. Please note that not all faculty who cross-list courses with RELST can serve as an RELST adviser. Working closely with one's RELST adviser when selecting courses is an important component of this program, enabling students to fulfill the requirements for the major while creating an integrated and coherent course of study out of our large number of multidisciplinary course offerings

To graduate as a major in Religious Studies, a student must (1) complete with letter grades the program's three core courses, RELST 250 "Introduction to Asian Religions," RELST 251 "Introduction to Judaism, Christianity and Islam," and RELST 449 "History and Methods of the Academic Study of Religion"; and (2) complete with letter grades seven additional courses approved for the major, at least four

of them at the 300 level or above. The following specifications of this second requirement are designed to promote breadth (2a) and depth (2b) of study.

(2a) At least four of a major's seven additional courses are to be selected to ensure some familiarity with two or more different religions, religious traditions, or religious phenomena. These courses may be at the introductory or advanced levels. For example, "Introduction to Asian Religions" (RELST 250, also ASIAN 250) might lead a student to take "Tibetan Buddhism" (RELST 400, also ASIAN 400), and then to combine these with two courses on Judaism, "Introduction to Ancient Judaism" (RELST 244, also NES 244/JWST 244) and "Hebrew Bible and Arabic Our'an in Comparative Perspective" (RELST 299 also NES 299/JWST 299/COML 299). Or a student might take four unrelated courses such as "Introduction to Christian History" (RELST 295 also NES 295/JWST 295/HIST 299), "Religion and Reason" (RELST 262 also PHIL 263), "Myth, Ritual, and Symbol" (RELST 320 also ANTHR 320), and "Muhammad and the Mystics" (RELST 254 also NES 250/COML 250) to gain a sense of the range of intellectual activity associated with the academic study of religious traditions and religious practices.

(2b) At least two of these seven additional courses are to be selected to ensure depth of coverage in one religion or one group of closely related religions, religious traditions, or religious phenomena. In the first illustrative case described above, the student might combine "The Religious Traditions of India" (RELST 351 also ASIAN 351) with "Tantric Traditions" (RELST 347, also ASIAN 347) or "Classical Indian Philosophical Systems" (RELST 395 also ASIAN 395/CLASS 395) to acquire a measure of specialist strength in the religions of India. Alternatively, that student might combine "Introduction to Asian Religions" with one or more courses dealing with Buddhism, such as "Indian Buddhism" (RELST 354 also ASIAN 354) or "Japanese Buddhism" (RELST 359 also ASIAN 359), to develop an appropriate depth along a different dimension.

No more than one of the courses chosen to meet requirement 2a may be used to satisfy 2b

To engage in the kind of focused study envisioned under 2b, a student will be expected to attain proficiency in a language other than English to gain access to relevant sources, primary or secondary. For example, a knowledge of Greek or Latin might be required for the study of Christianity (as well as Greek or Roman religions); of Hebrew or Aramaic for Judaism; of Arabic for Islam; of Sanskrit or Hindi for Hinduism; of Pali or Chinese or Japanese for Buddhism. Religious phenomena like shamanism or totemism, though less firmly rooted in literary traditions, have generated substantial bodies of important scholarship in French and German, and an undergraduate major concentrating in this area of Religious Studies should be equipped to make independent use of such material. Courses used to satisfy this foreign language proficiency requirement may not be applied to the course requirements described under 2a and 2b. Choice of language to fulfill this requirement is determined by the student in consultation with his or her adviser and is decided at the time the student enters the major.

Most courses approved for the major are offered by cooperating departments within the College of Arts and Sciences; a comprehensive up-to-date list of these courses is maintained at the office of the Religious Studies Program. 182 Rockefeller Hall.

## Graduating with Honors in Religious Studies:

GENERAL INFORMATION

- Eligibility. 3.0 cumulative average and 3.5 average inside the major with no grade in the major below B-. Program Director notifies eligible candidates during the spring semester of the junior year, or prior to commencement of final year.
- 2 Honors Courses. Candidates must sign into RELST 495 (Senior Honors Essay) for up to eight credits (two courses) for two semesters with variable credit. This twosemester sequence is recommended but not required. After the first term, an R in the transcript indicates that this course (usually for 8 credits) is a yearlong course. When the project is completed at the end of the second semester, the grade recorded counts for all eight credits. (The eight-credit limit is the result of the conviction/belief that earning more than eight credits for a single "piece" of your undergraduate education is unwise.)

You submit your honors proposal (with and according to the program's instruction/cover sheet) to the Religious Studies administrator before the end of the spring term of your junior year, or not later than Sept. 15 of the final year. She/he then approves your signing into the honors courses

- Honors Committee-three faculty 3. members. While you are required to have three faculty members on your committee at the time of the submission of the final draft, we only require that two of them be identified when you submit your proposal. In the event the adviser is on leave, the program will assign a committee member from the list of approved RELST advisers. The three members should be:
  - a. The professor who has agreed to work closely with you over the year and to be the supervisor/grader of your project is chair of the committee.
  - b. Your Religious Studies major adviser (not optional)
  - c. Another knowledgeable faculty member

Sometimes your adviser is the supervisor/ chair. If that is the case, you need two additional knowledgeable professors for your committee of three.

## **Courses Approved for the Major** Sponsored by Religious Studies

[RELST 123-124 Elementary Biblical Hebrew I and II (also NES 123-124, JWST 123-124)

123, fall; 124, spring. 3 credits. Enrollment limited to 17 students. Not offered 2002-2003. Staff.

For description, see NES 123-124.]

Fall. 4 credits. Not offered 2002–2003. S. Sangren.]

### RELST 449 History and Methods of the Academic Study of Religion (also ASIAN 449)

Spring. 4 credits. Required of Religious Studies majors. J. M. Law. For description, see ASIAN 449. RELST 460 Indian Meditation Texts (also ASIAN 460) Fall. 4 credits. D. Gold.

For description, see ASIAN 460.

## RELST 490-491 Directed Study

490, fall; 491, spring. 2–4 credits each term. For majors in Religious Studies; permission of director required. Staff.

**RELST 495 Senior Honors Essay** Fall and spring. Variable up to 8 credits. Required for honors in Religious Studies. Staff.

## RELST 496 Seminar: Religion and Science (also NES 496)

Spring. 1 credit. W. Dickens. For description, see NES 496.

[RELST 531 Problems in Medieval Art and Architecture (also ART H 531) Spring. 4 credits. Not offered 2002–2003. R. G. Calkins.]

### RELST 650 Seminar on Asian Religions (also ASIAN 650)

Fall. 4 credits. J. M. Law. For description, see ASIAN 650.

RELST 652 Straddling the Himalayas (also ASIAN 652) Spring. 4 credits. D. Boucher. For description, see ASIAN 652.

## RELST 654 Indian Buddhism (also RELST 354, ASIAN 354/654)

Fall. 3 credits. D. Boucher. For description, see ASIAN 354.

Additional courses offered by cooperating departments may also be approved through petition for the major in Religious Studies. For details see the program director, Jane Marie Law, 125 Rockefeller Hall or e-mail her at jml16@cornell.edu.

## ROMANCE STUDIES

The Department of Romance Studies (Mitchell Greenberg, chair) offers courses in the following areas: French, Italian, and Spanish literature; French, Italian, Portuguese, Quechua, and Spanish language; Francophone, Italian, and Hispanic culture; and linguistics and semiotics. Through its course offerings and opportunities for independent study, the department seeks to encourage study of the interactions of the Romance literatures among themselves, with other literatures, and with other fields of inquiry.

## French

A. Berger, J. Coursil (visiting), N. Furman,

- A. Grandjean-Levy, M. Greenberg (chair),
- R. Klein, P. Lewis, S. LoBello, K. Long,
- T. McNulty, C. Porter (visiting), K. Proux,
- C. Sparfel, S. Tun, M. C. Vallois (director of
- undergraduate studies), C. Waldron. Emeriti: J. Bereaud, A. Colby-Hall, D. I. Grossvogel,
- A. Seznec. Adjunct Associate Professor:
- S. Tarrow.

## The Major

The major in French is divided into two options: French Area Studies and French Literature. While prospective majors should try to plan their programs as far ahead as possible, especially if they intend to study abroad, no student will be refused admission merely because of a late start. Please see Professor M. C. Vallois, mv46@cornell.edu, the Director of Undergraduate Studies, in 310 Morill Hall. This consultation is especially important for finding out what sequence of courses will follow the current choice of courses.

Students interested in majoring in French linguistics should contact the Department of Linguistics.

Honors. The honors program encourages well-qualified students majoring in French linguistics to do independent work in French outside the structure of courses. The preparation of the senior honors essay, generally spread over two terms, provides a unique learning opportunity, since it allows for wide reading and extensive rewriting to a degree not practically possible in the case of course papers.

No special seminars or courses are required of honors students, but they have regular meetings with faculty advisers who have agreed to supervise their work. They may receive course credit by enrolling in FRLIT 429–430, but these independent study courses must be taken in addition to the courses that meet the minimum requirements for the major. At the end of the senior year each honors student is examined orally on the honors student is examined orally on the faculty adviser and two other faculty members. The awarding of honors is determined by the student's grades in the major and the quality of the honors essay.

## **The Literature Option**

The major in French, literature option, is designed to give students proficiency in the oral and written language, to acquaint them with French literature and culture, and to develop skills in literary analysis.

## Admission

To be admitted to the major, students should have completed FRLIT 201, 220, or 221 plus 222 and FRROM 219 (formerly 213) or its equivalent by the end of their sophomore year.

# For completion of the major, a student must:

- acquire a sound degree of competence in French language. This competence is demonstrated by the successful completion of FRROM 301–312 or their equivalents, such as properly accredited study abroad or the passing of a special language test (the CASE examination) or the permission of the adviser (this option applies only to 312).
- 2) take six courses in French literature or civilization at the 300 level or above. These courses, selected in consultation with the student's major adviser, will include at least two pre-19th-century courses and at least one 400-level course.
- 3) take two connected courses in one of the following related areas: literature, linguistics, comparative literature, history, history of art, visual studies, music, government, or another relevant discipline with a significant French component. Students who are double majors are exempted from this last requirement.

## The French Area Studies Option Admission

To be admitted to the major, students should have completed FRLIT 201, 220, 221, or 224 plus 219 (formerly 213) or its equivalent by the end of their sophomore year.

# For completion of the major, a student must:

- acquire a sound degree of competence in the French language. This competence is demonstrated by the successful completion of FRROM 301–312 or their equivalents, such as properly accredited study abroad or the passing of a special language test (the CASE examination) or the permission of the adviser (this option applies only to 312).
- take two courses in Romance Studies (literature or civilization) at the 300 level or above.
- 3) take six courses at the 300 level or above in no more than three areas of interest such as—but not limited to—Africana studies, anthropology, comparative literature, French literature, economics, government, history, history of art, linguistics, music, theater arts, women's studies, and visual studies. Each area must be represented by at least two courses, and each course must have a significant French component. At least one of these six courses should be at the 400 level.

## **Administration of French Area Studies**

Students are admitted to the major by the director of undergraduate studies in the French section of the Department of Romance Studies but are guided by their individual advisers. A copy of each student's program is given to the director of undergraduate studies for approval and safe-keeping.

## **Study Abroad in France**

French majors or other interested students may study in France for one or two semesters during their junior year. Opting for one of several study-abroad plans recognized by the Departments of Romance Studies and Linguistics facilitates the transfer of credit. Information about these plans is available from the director of undergraduate studies.

Students must be Cornell undergraduates with a strong academic record. The minimum French preparation is the completion of FRROM 219 (formerly 213) or its equivalent in advanced credit or placement by the Cornell CASE examination. The taking of FRROM 301 and/or 312 is, however, strongly recommended.

Students interested in studying in France are encouraged to consider the special benefits offered by EDUCO, the program in Paris cosponsored by Cornell and by Emory University, and Duke University. EDUCO offers advanced students a challenging course of study and the experience of total immersion in French life and culture in Paris. Participants in this program spend the year or semester as fully matriculated students at the University of Paris VII and other institutions of higher learning in Paris, including the Institut d'Etudes Politiques (Sciences Po), selecting courses in many fields from the regular university course offerings. Students begin the academic year with an intensive three-week orientation in French history, society and daily life. While it is possible to enroll in the EDUCO Program for one semester, admission will be given first to students planning to study abroad for the full academic year.

EDUCO maintains a center in Paris with appropriate support staff. The resident director, chosen annually from the Comell, Emory, and Duke faculties, teaches a special seminar each semester, provides academic advice, and helps ensure the quality of the courses. The center, which includes a small library and word-processing facilities, is regularly used by students for special tutorials, seminars, and lectures, as well as informal gatherings.

**Honors.** The honors program encourages well-qualified students majoring in French literature and culture to do independent work in French outside the structure of courses. The preparation of the senior honors essay, generally spread over two terms, provides a unique learning opportunity, since it allows for wide reading and extensive rewriting to a degree not possible in the case of course papers.

To be eligible for Honors, students must have a general grade point average of at least 3.00 and a grade point average of at least 3.5 in their French major.

No special seminars or courses are required of honors students, but they will have regular meetings with the faculty advisers who have agreed to supervise their work. They may receive course credit by enrolling in French 429-430, but these independent study courses must be taken in addition to the courses that meet the minimum requirements for the major. At the end of the senior year, each honors student is examined orally on the honors essay by a jury consisting of his or her faculty adviser and two other faculty members. The senior essay is to be made available for reading by the jury on or before April 15. The awarding of honors is determined by the student's grades in the major and the quality of the honors essay.

## Language

Enrollment in a language course is conditional upon the student's eligibility for the particular level and on attendance of the first scheduled class session. Further, a student who fails to attend the first three days of class will be automatically dropped from the course in order to accommodate those on the waiting lists.

All French language courses are offered by the Department of Romance Studies and French linguistics courses are offered by the Department of Linguistics.

Note: Students placed in the 200-level courses bave the option of taking language and/or literature courses, see listings under "Literature" for descriptions of the literature courses, some of which may be taken concurrently with FRROM 206, 209, or 219 or H ADM 266.

#### FRROM 112 Elementary French: Review and Continuation

Fall. 4 credits. Prerequisite: LPF score 37–44 or SAT II 410–480, or FRROM 121. S. Tun. This course is designed for students who have taken some French and who have a placement score of 37–44 or SAT II 410–480. It provides a basic review and then moves on to cover new material for the remainder of the term. Students who have taken FRROM 121 may enroll for this course. As part of the final exam, students take the LPF and, according to their score, may place into FRROM 123 (score below 56), or receive qualification (56 or above) and place into the 200-level courses.

## FRROM 121-122 Elementary French

121, fall; 122, spring. 4 credits each term. Prerequisite for 121: this course is intended for students with no experience in French. Students who have previously studied French must have an LPF score lower than 37, or SAT II lower than 410, to be eligible for FRROM 121. Prerequisite for 122: FRROM 121. FRROM 112 (fall only) is recommended for students who didn't take FRROM 121 but scored 37–44 on the LPF or 410–480 on the SAT II. Fall: C. Sparfel (course coordinator) and staff; spring: C. Sparfel (course coordinator), S. Tun, and staff.

The goal of FRROM 121–122 is to provide a thorough grounding in the language and insights into French language and francophone cultures so that students can function in basic situations in a French-speaking culture. Small classes provide intensive, context-specific practice in speaking, reading, writing, and listening comprehension.

## FRROM 123 Continuing French

Fall, spring. 4 credits. *Provides language qualification*. Prerequisite: LPF score 45–55 or SAT II 490–590. Recommended courses after FRROM 123: FRROM 206 or 209 or FRLIT 201. The S-U option is not available to undergraduates, and is available to graduate students only by exceptional permission from the course coordinator. Fall: K. Proux (course coordinator) and staff: spring: K. Proux.

FRROM 123 is an all-skills course designed to improve pronunciation, oral communication, and reading ability; to establish a groundwork for correct writing; and to provide a substantial grammar review. The approach in the course encourages the student to see the language within the context of its culture.

## FRROM 206 French Intermediate Reading and Writing

Fall, spring. 3 credits. *Provides language proficiency.* Prerequisite: FRROM 123, LPF score 56–64, or SAT II 600–680. Conducted in French. Recommended courses after FRROM 206: FRROM 219, FRLIT 220 or FRLIT 221. The S-U option is not available to undergraduates, and is available to graduate students only by exceptional permission from the course coordinator. Fall: S. LoBello; spring: C. Sparfel.

This language course is designed for students who want to focus on their reading and writing skills. Emphasis is placed on grammar review and expansion, vocabulary development, and appreciation of different styles of language. Diverse text types are used, including a contemporary novel and studentselected material.

## FRROM 209 French Intermediate Composition and Conversation I

Fall, spring, summer. 3 credits. *Provides language proficiency*. Prerequisite: FRROM 123, LPF score 56–64, or SAT II 600–680. Recommended courses after FRROM 209: FRROM 219, FRLIT 220 or 221. FRROM 219 may be taken concurrently with either FRLIT 220 or FRLIT 221. The S-U option is not available to undergraduates, and is available to graduate students only by exceptional permission from the course coordinator. Fall: A. Grandjean-Levy (course coordinator) and staff; spring:

A. Grandjean-Levy (course coordinator), C. Waldron and staff; summer: C. Waldron.

The course is designed to strengthen grammar skills, to improve reading, speaking and writing ability; and help students become independent learners. For more information go to: http://courseinfo.cit.cornell.edu/ courses/FRROM209/.

#### FRROM 219 French Intermediate Composition and Conversation II

Fall, spring. 4 credits. Prerequisite: FRROM 206 or 209, or permission of instructor, or Q+ on the Cornell Advanced Standing Examination (CASE). For admission to the Cornell Abroad Program, students are required to take either this course, or have completed an equivalent level of study. Taught in French. Recommended courses after FRROM 219: FRLIT 220 or 221, FRROM 301 or 305. Fall: S. LoBello (course coordinator), A. Grandjean-Levy and staff; spring: S. LoBello (course coordinator), A. Grandjean-Levy and staff.

The emphasis of this course is on improving grammatical accuracy and on enriching vocabulary in oral and written expression of French. Varied types of reading including newspaper articles, short videos, films, and presentations by students, provide the basis for writing assignments and class discussions. Themes and emphases may vary from section to section.

## FRROM 300 Directed Studies

Fall, spring. 1–4 credits variable. Prerequisite: permission of instructor. Times arranged with instructor. Staff. Taught on a specialized basis to address

particular student needs.

## FRROM 301 Advanced French I

Fall, spring. 4 credits. Prerequisite: FRROM 219, or Q++ on the Cornell Advanced Standing Examination (CASE). Recommended courses after FRROM 301: FRROM 312. FRLIT 220, or FRLIT 221 may be taken concurrently with 301. Fall: N. Furman and staff; spring: S. LoBello and staff.

Class discussions based on reading contemporary texts: half short stories, half articles on current events taken from French magazines or newspapers. All texts are chosen for thematic or cultural interest and linguistic quality. Special attention is given to accuracy in French through grammar review and weekly papers (essays or translations). Each student gives one or more oral presentations in class. Course required of French majors.

## FRROM 305 French through Film

Fall, spring. 4 credits. Prerequisite: FRROM 219, or Q++ on the Cornell Advanced Standing Examination (CASE). Recommended courses after FRROM 305: FRROM 301, 312, FRLIT 220, or 221. FRLIT 220 or 221 may also be taken concurrently with FRROM 305. The S-U option is not available to undergraduates, and is available to graduate students only by exceptional permission from the course coordinator. C. Waldron.

Analysis of French contemporary films and related readings. Used as a means of studying the language. Particular emphasis is on the culture and historical context as it relates to French contemporary society. Additionally, guest speakers provide enrichment on selected topics.

## FRROM 312 Advanced French II

Fall, spring. 4 credits. Limited to 15 students. Prerequisite: FRROM 301 or with permission of instructor, or placement by the Cornell Advanced Standing Examination (CASE). T. Alkire.

Continuation of work done in FRROM 301. The objective of FRROM 301 is to teach students to speak and write correct French; in FRROM 312 students are expected to have a richer, more idiomatic and hopefully elegant command of the language. Formal study of grammar is discontinued, and more attention is devoted to the examination of the stylistics and rhetorical characteristics of texts and to oral presentations by students. Weekly papers as in FRROM 301.

## FRROM 313 French in the News

Fall. 4 credits. Prerequisite: FRROM 301, or FRROM 305, or placement by the Cornell Advanced Standing Examination (CASE). A. Grandjean-Levy.

Studying French televised news broadcasts and other media, places students at the heart of today's France. Flexible approach allows students to perfect their language skills.

## FRROM 315 Translating From French-Translating From Spanish

Fall. 4 credits. Prerequisite: FRROM 312 or SPANR 312 or permission of the instructors. C. Porter and J. Routier-Pucci.

This seminar-type experiment, open to students who have successfully passed the highest 300-level language course offered in either Spanish or French, focuses on translating from the SL (source language) into the TL (target language, i.e. English). The objective of the course is to learn and practice the skill of translating from one of the SLs into English, and in so doing, investigate the various technical, stylistic, and cultural difficulties encountered in the process. To attain this objective, the students are exposed to a series of translation tasks, conducted individually or in groups: they are asked to justify their translations, compare different translations of the same passage, work on different types of texts, and edit each other's translations.

## FRROM 630 French for Reading-Graduate Students

Spring. 3 credits. Limited to graduate students. T. Alkire.

Designed for those with little or no background in French, this course's primary aim is to develop skill in reading French. Grammar basics, extensive vocabulary, and strategies for reading in a foreign language are covered. Some flexibility in selecting texts according to fields of interest is offered.

## Literature

## FRLIT 201 Introduction to Techniques of Reading French Literature

Fall. 3 credits. *Provides language proficiency*. Prerequisites: SAT II score of 600, LPF score of 56, or FRROM 123. Students with an SAT II score of 640 or an LPF score of 60 or more, should take FRLIT 221. M. C. Vallois and staff.

Designed for students interested in improving their written and oral skills in French and also their literary proficiency. Texts have been chosen both for their literary merit and their manageable linguistic difficulty. Close scrutiny of the works and active class discussions sharpen students' critical and analytical abilities. The reading list may include authors such as Baudelaire, Beckett, Ionesco, Camus, Rimbaud, Sartre, and Duras.

## FRLIT 220 French and Francophone Culture @ (IV) Fall, spring. 3 credits. Prerequisite: SAT II

Fall, spring. 3 credits. Prerequisite: SAT II score of 640 and above, or LPF score of 60 or FRROM 206 or 209. Conducted in French. J. Coursil and staff.

This course serves as an introduction to French Area Studies. It provides an overview of Francophone culture and society from 1945 to the present. Readings include a selection of articles dealing with issues of current concern in France; works by French and Maghrebi or African writers; poetry or drama; two films are also discussed.

# FRLIT 221 Modern French Literature # (IV)

Fall, spring. 3 credits. Prerequisites: SAT II score of 640 and above, or LPF score of 60, or FRROM 206 or 209. Conducted in French. Fall: A. Berger and staff; spring: K. P. Long and staff.

This course is intended as an introduction to French literature of the modern period. Texts are chosen because of their centrality to the traditional literary canon and with an eye to experimentation. The course considers literary genres (poetry, drama, the novel) as solicitations to read texts differently, at different speeds, with diverse claims on our attention. One test may include French script. The course is designed to satisfy a general interest in modern French literature as well as to prepare students to pursue a French major in literature. Readings include works by Baudelaire, Mallarmé, Beckett, Camus, Proust, Duras, and Assia Djebar.

## FRLIT 222 Early Modern French Literature # (IV)

Spring. 3 credits. Prerequisite: FRLIT 220, 221, or permission of the instructor. Conducted in French. M. C. Vallois. Study of the classic literature of seventeenthcentury France (Corneille, Racine, Molière, Mme de Lafayette, La Fontaine) and of eighteenth-century Enlightenment literature (Voltaire, Rousseau, Diderot, Beaumarchais). Special attention is paid to the ways in which these various works represent or deal with the shift from an aristocratic cultural code of values to modern bourgeois ideology and aesthetics. The course also invites reflection on the status and centrality of female characters in classical and neo-classical French literature. Theater being central to this period, the course gives special attention to major plays of the classical period. It traces the evolution from the classical tragic heroine to more modern (but no less problematic) representations of women.

#### FRLIT 224 The French Experience (also HIST 240) (III or IV) Fall. 3 credits. Conducted in English.

Fall. 3 credits. Conducted in English. Readings available both in French and in English translation. N. Furman and J. Weiss.

We look ethnographically and through literature at tastes and at class as they function and are discussed in France. We examine speech in its practice and as it is reflected upon; and we look at views from France, from America, and other countries. As we emphasize differences, the French experience emerges.

Note: Prerequisite for all 300-level courses in French literature: FRLIT 220, 221 or the equivalent.

#### FRLIT 327 In Search of the Origin of Language (also COM L 320) (IV) Spring, 4 credits. Conducted in English.

T. McNulty.

Where does language come from, and what does it respond to? What is the relationship between the origin of language and the creation of the world, or between language and myth? What distinguishes human language from the structures of communication common to all animals? What is the relationship of language to sexual difference, the death drive, and the prohibition of incest? What do poetry, mathematics and computer science tell us about the function of writing? Why have so many thinkers across history associated language with the virus or with logics of contamination? This course is interdisciplinary in scope, drawing on works of philosophy, anthropology, psychoanalysis, religion, and the biological sciences, in addition to literature and film. Readings include texts from the Bible, Plato, Descartes, Pascal, Rousseau, Shelley, Freud, Saussure, Artaud, Levi-Strauss, Burroughs, and Derrida. Students may read texts in the original languages or in translation.

#### FRLIT 333 Contemporary French Thought (IV)

Fall. 4 credits. Conducted in French. R. Klein.

This course surveys the major contemporary post structuralist, psychoanalytic, and deconstructive theorists in French thought today: Lacan, Foucault, Derrida, Barthes, Bourdieu, Baudrillard and Wittig. Particular emphasis is on the contribution of these theorists to the analysis of sexuality and pedagogy.

## FRLIT 356 Renaissance France # (IV) Spring. 4 credits, Conducted in French. K. P. Long.

This course traces the importance of a number of movements/crises/events for the evolution of France as a nation and a culture, as well as the impact of these movements on the origins of modern thought. We consider the ongoing debate over the status of women, known as the querelle des femmes; the discovery of the "New World," and its subsequent colonization; the Reformation, which led eventually to a separation of religious and national interests; and the rise of modernization and scientific disciplines. These areas of inquiry are studied by means of various texts: the works of Marguerite de Navarre, Louise Labé, François Rabelais, Joachim du Bellay, Pierre de Ronsard, Ambroise Pare, and Michel de Montaigne, among others. Texts and discussions are in French.

#### FRLIT 362 Culture of the Renaissance II (also COM L 362, ENGL 325, HIST 364, RELST 362, MUS 390, ART H 351) # (III or IV)

Fall. 4 credits. K. P. Long and C. Kaske. For description see COM L 362.

## FRLIT 370 The French Enlightenment and the Modern Citizen # (IV)

Fall. 4 credits. M. C. Vallois. Through a reading of various works of the French 18th century (by Montesquieu, Voltaire, Diderot, Rousseau, as well by other less canonical authors ) we study the emergence of new literary discourses and practices aiming at a "secularization" of the literary field, in conjunction with the ideological and epistemological changes which took place under the name of Enlightenment. One of the most important of those changes is often seen as the production of the modern citizen.

#### FRLIT 381 Nineteenth-Century French Women Writers (also WOMNS 381) # (IV)

Spring. 4 credits. Conducted in French. M. C. Vallois.

While situating the works read within their specific historical and literary context, this course attempts to address two sets of questions: 1) How does the inscription of literature as a Public Institution within a phallocentric cultural order effect women authors' status and writing strategies? 2) To what extent and at what levels does being a women inform or shape the text produced? In what ways is literary writing concerned with sexual difference? Writers include Mme. de Staēl, George Sand, Flora Tristan, Rachilde, and others.

### FRLIT 382 Literature and Science in the Nineteenth Century

Spring. 4 credits. Conducted in French. N. Furman.

From medicine to physics, from biology to mechanics, the major scientific discoveries of the nineteenth century held the promise of either a better or a more frightful future. Literature reflects these hopes and fears. We study the nineteenth-century obsessive interest in science in the works of Balzac, Flaubert, Zola, Maupassant, Verne, and Villiers de L'Isle-Adam.

## FRLIT 391 Fictions of the Self (also WOMNS 391)

Fall. 4 credits. Prerequisite: FRLIT 221 or permission of the instructor. Conducted in French. T. McNulty.

This course examines the relationship between the "self" and fiction, or between personhood and the literary *personnage*. How does autobiography, as a "writing of one's own life," shape the relationship between the self and the written word? What is the relationship between the person and the *persona* (or "mask") from which it derives etymologically? To what extent is the self a fiction? Works by 20th century authors (Gide, Leiris, Bataille, Khatibi, Duras, Tournier, Artaud, Jabes, Blanchot) are supplemented by readings from Augustine, Rousseau, Nietzsche, and Freud.

## FRLIT 412 Poetry and Poverty: 19th Century French Lyricism and the Times of Indigence (also FRLIT 617) @ (IV)

Fall. 4 credits. A. Berger.

From Pauvres Gens (Hugo) to the "pauvre Lelian" (Verlaine), from Baudelaire's Poor to Rimbaud's scum, French poetry takes up the poor's claim. But poverty as a social phenomenon doesn't simply become a poetical theme by striking lyricism's sentimental chord. If poverty is the main issue of the century, as French 19th century political and social thinkers agree, and if the question of the modern times is indeed the question of poverty ("la misere"), as Michelet and Heidegger suggest in various ways, then the lyrical treatment of poverty raises the question of poverty's relation to modernity, and more specifically to the economy which defines it. Through a close examination of poems by Hugo, Baudelaire, Rimbaud, Verlaine, Mallarme and Jehan-Rictus, read along with Michelet, Benjamin and Heidegger among others, we address the question of poetry's

relations to the modern experience of lack and need, as well as to the poor as a figure of the outcast. How poetry can give (itself), and what can it give in times of want, that is, in times of the retreat of the gift?

## FRLIT 419–420 Special Topics in French Literature

419, fall; 420, spring. 2–4 credits each term. Prerequisite: permission of instructor. Staff. Guided independent study of special topics.

## FRLIT 428 Oulipo: Forms of Potential Literature (IV)

Fall. 4 credits. R. Klein.

"Oulipo (Ouvroir de litterature potentielle)" is a relatively small circle of writers and mathematicians that has been conducting radical experiments in literary form since its beginnings in 1960. Its members are largely but not exclusively French, and its meetings are held in Paris. Its aim is to identify and analyze older, even ancient experiments in literary form and to elaborate new forms or textual principles based on novel combinatories or permutations, including computer algorithms. Its founding and continuing members include some of the most prominent contemporary French writers, poets and novelists, including Raymond Queneau, Jacques Roubaud, Georges Perec, as well as the Italian writer, Italo Calvino, and the American, Harry Matthews. The course aims principally to examine the theoretical claims of Oulipo, its hostility to surrealism, its voluntarism, its preference for formal constraints, its exemplification of rhetorical and literary procedures (lipograms, palindromes, rhopalic verse, holorhymes, Boolian haikus, etc.). At the same time, close readings of selected texts are encouraged.

FRLIT 429-430 Honors Work in French 429, fall; 430, spring. 8 credits year-long course, R grade fall semester, letter grade spring semester, with permission of the adviser. Open to juniors and seniors. Consult the director of the honors program. M. C. Vallois and staff.

**FRLIT 447 Medieval Literature # (IV)** Spring. 4 credits. Prerequisite: FRLIT 221 or permission of instructor. Conducted in English. A. Colby-Hall.

This course is designed to give students facility in reading Old French and an appreciation of two major genres of medieval French literature: the epic and the theater.

## FRLIT 466 Proust and his Critics (also FRLIT 666)

Spring. 4 credits. R. Klein. This course is intended for advanced students of French literature, who already have some acquaintance with the work of Marcel Proust. It aims to encourage students to have read the entire *Recherche* (2401 pages in the Quarto Gallimard edition) by the end of the semester, but that is not a requirement. Rather the course enters into the work through the perspectives offered by several of the leading, modern critics of Proust, including Deleuze, Genette, Poulet, DeMan, Benjamin, Kristeva, Girard, Compagnon, McDonald, and others.

## FRLIT 476 Libertine Literature (also COM L 476) (IV)

Spring. 4 credits. Conducted in English. T. McNulty.

In France, the emergence of libertine literature as a distinct genre coincides with political and philosophical debates about universalism, the rights of man, and equality. What do the first

libertine writers have to tell us about the nature of the human subject and its relationship to the law or to the universal? What are their insights into human eroticism, the relation between the sexes, violence and power? How does libertine literature deal with the female subject, and how, if at all, does the genre change in the hands of female authors? These questions lead to a theoretical examination of the relationship between libertine and the psychic structure of perversion (sadism, masochism, fetishism), understood as a contestation of the law or signifier and its castrating effects. Works by Sade, Casanova, Lautreamont, Sacher-Masoch, Rachilde, Reage, Bataille, Gombrowicz, Pasolini, and Acker will be read alongside critical texts by Freud, Lacan, Deleuze, Butler, Barthes, and others.

## FRLIT 491 Femininity, Ethics and Aesthetics (also FRLIT 691 and WOMNS 491/691 and COM L 479/ 679) (IV)

Fall, 4 credits. Conducted in English. T. McNulty.

This course serves as a theoretical introduction to psychoanalytic treatments of femininity, especially in Freud and Lacan. The structure of femininity, distinct from biological sex or social gender, is understood as a particular ethical response to the death drive and to the signifier or law that seeks to limit its insistence. The first half of the course explores the logic of femininity, its difference from masculinity, and its contestation of the phallic signifier; the second half focuses on the stakes of aesthetics in femininity, as a possible solution to the impasses of the signifier. We examine other important formulations of femininity and aesthetics (Kant, Cixous, Deleuze, Woolf), as well as writings and artwork by Marguerite Duras; Yayoi Kusama, Teresa of Avila, Daniel Paul Schreber, Sophie Calle, Stendhal, Sade, and others. Students are encouraged to give presentations on other writers and artists, male or female, who might contribute to our understanding of feminine ethics and/or aesthetics.

## FRLIT 607-608 Proseminar

607, fall; 608, spring. 2 credits each term. M. Greenberg.

The pro-seminar is the place for sustained exchanges between graduate students, faculty, and visiting lecturers. Activities include reading and discussion of seminal texts, chapters from dissertations and works in-progress, and articles and essays from visiting lecturers.

#### FRLIT 617 Poetry and Poverty: 19th Century French Lyricism and the Times of Indigence (also FRLIT 412)

Fall. 4 credits. A. Berger. For description see FRLIT 412.

## FRLIT 631 Seminar on Edouard Glissant

Fall. 4 credits. J. Coursil. Introduction to francophone postcolonial literature through the study of one of its major crises, the work of Edouard Glissant. The seminar proposes analyses of the thematic break effected by Edouard Glissant in postcolonial francophone literature. The work of Edouard Glissant (from 1955 on, poetry, novel, theatre, essay) represents the most important rethinking of postcolonial francophone literature since its start in 1930 by the poets of Negritude L. S. Senghor and A. Cesaire. This renewal upends and transforms traditional questions of domain and, in time, displaces and renews its stakes. The analyses of Edouard Glissant's break in the tradition and thought of African Antilles Negritude concentrates and allows a reordering of all the big questions about postcolonial francophone literature: questions of culture (races, culture, identity), politics (history of the colonial world, of the West, and of globalization), philosophy (postmodern criticism of rationalism, paradigm, chaos) and psychoanalysis (alienated memory, language). The seminar will thus be a general introduction to this domain through a new kind of reading.

## FRLIT 632 Seminar on Movements of Identity

Spring. 4 credits. J. Coursil. Creole-ness through a critical reading of Caribbean African and Magreb works. We will explore postcolonial francophone identity in its necessity as well as in its faults and limits. The works studied have for the most part received international acclaim and been frequently translated. This confirms the social expectation of a literature of cultural identity. We will emphasize recurring questions that mark all francophone postcolonial tendencies, in particular that of the subject's place in the history of the world (theme of alienated memory) and that of its place in language (theme of the interrupted word). We will study more specifically the movement of Creole-ness (Caribbean), from its birth to its present distribution, as a brilliant moment of literary history grappling with questions of time and space. Our questions will bear on the double aspect of identity: cultural and political relevance in actual society, and subjectivity (literary creativity). This study represents an introduction to some postmodern critiques bearing on language and the unconscious.

## FRLIT 639–640 Special Topics in French Literature

639, fall; 640, spring. 2-4 credits each term. Staff.

Guided independent study for graduate students.

# FRLIT 666 Proust and his Critics (also FRLIT 466)

Spring. 4 credits. R. Klein. For description, see FRLIT 466.

FRLIT 674 Les critiques littéraires Spring. 4 credits. N. Furman.

## FRLIT 691 "Femininity, Ethics and Aesthetics" (also WOMNS 491/691, COM L 479/679 and FRLIT 491)

Fall. 4 credits. Conducted in English. T. McNulty.

For description, see FRLIT 491.

#### FRLIT 693 [Un] Romantic Sexualities Fall. 4 credits. Conducted in French. M. C. Vallois.

From the exotic and incestuous loves of Chateaubriand's Renë and Atala and the scandalous affairs of George Sand, Musset, and Chopin to the more discreet sentimental relationships between Flaubert, Louise Colet, and later Sand, love—be it fictive or real—has been the focus of numerous theories, definitions and debates during the Romantic Era. Through the close reading of the fictions and correspondence of selected authors of this period—Sand, Alfred et Paul de Musset, Colet, Fourier—this course proposes to reexamine the myths, theories and practices of romantic love and other romantic relationships. In the first part of the course, we

consider briefly the origins and some traditional figures of so-called "romantic" love (The Song of Songs, and the poems of the Troubadours, "Tristan and Iseult," the lais of Marie de France) from a historical point of view (Denis de Rougemont, Duby, Flandrin, Sole) as well as from a philosophical, ideological and psychoanalytical point of view (Julia Kristeva, Luce Irigaray, Michel Foucault.) The second part of the course is devoted to close readings of literary texts. Although the central case-study could be Sand-Musset, this part of the class is organized according to the specialization and specific interests of the participants in the seminar. Please let me know what is your particular area or author of interest as soon as possible.

## Italian

Faculty: M. Migiel (director of undergraduate studies), T. Alkire, K. Bättig von Wittelsbach, T. Campbell, F. Cervesi-McCobb, S. Stewart-Steinberg, P. Swenson. Emeriti: A. Grossvogel

#### The Major

The major in Italian is designed for students who: 1) wish to study Italian language, literature, and culture through the works of writers, artists, and cultural figures who have developed rich and varied aesthetic traditions; and 2) may wish to pursue a Ph.D. in Italian.

The prerequisite for official admission to the Italian major is successful completion of either ITALL 216 or ITALL 217 (Introduction to Italian Literature).

Students who wish to major in Italian are advised to consult the DUS in Italian, Marilyn Migiel (311 Morrill Hall) as early as possible. The DUS, taking into account the student's interest, preparation, and career goals, will assign the student to an advisor. Students majoring in Italian are expected to become conversant with a fair portion of the masterworks of Italian literature, to acquaint themselves with the outlines of Italian literary and cultural history, and to develop some skill in textual and cultural analysis. In conjunction with the major advisor, the student will craft an individualized plan of studies that will meet the minimum requirements for the major in Italian as listed here below:

- At least ten ITALL courses at the 200 level and higher. (The prerequisite may be counted toward this requirement. The one-credit Italian Practicum and the oneor two-credit Independent Study options do not count as full courses.) One of these courses must be at the 400 level and one must be in the pre-eighteenth century. With permission of the advisor, the student may substitute for two of these courses other courses that are deemed relevant to the student's study of Italian, e.g., a course in another national literature, a course in critical theory, a course in European history, etc.
- At least twenty credits in courses conducted entirely in Italian. The Italian Practica may be used to fulfill three of these credits. Twelve of these credits must be in courses in Italian at the 300-level or above.
- Competency in the Italian language (as demonstrated by examination or by coursework approved by the DUS).

ITALA 402, History of the Italian Language, and ITALA 403, Linguistic Structure of Italian, may be counted toward the ten courses required for the major. (N.B. An introductory linguistics course is a prerequisite for ITALA 402 and 403).

## Language

Enrollment in a language course is conditional upon the student's eligibility for the particular level and on attendance of the first scheduled class session. Further, a student who fails to attend the first three days of class will be automatically dropped from the course in order to accommodate those on the waiting lists.

## ITALA 121-122 Elementary Italian

121, fall; 122, spring. 4 credits each term. Prerequisite: for ITALA 122, ITALA 121 or equivalent. Intended for beginners or students placed by examination. At the end of ITALA 122, students who score lower than 56 on the LPI may take ITALA 123, those with 56 or higher on the LPI attain qualification and may enter the 200level sequence; otherwise ITALA 123 is required for qualification. Evening prelims. Fall: F. Cervesi-McCobb (course coordinator), M. Baraldi, K. Bättig von Wittelsbach, S. Stewart-Steinberg, and staff; spring:

F. Cervesi-McCobb (course coordinator),

M. Baraldi, T. Alkire, S. LoBello, and staff. This course provides a thorough grounding in all the language skills: listening, speaking, reading, and writing, with practice in small groups. Lectures cover grammar and cultural information.

## ITALA 123 Continuing Italian

Fall, spring. 4 credits. *Provides language qualification*. Limited to students who have previously studied Italian and have an LPI score of 45–55 or an SAT II score of 460–580. The S-U option is not available to undergraduates, and is available to graduate students only by exceptional permission from the course coordinator. Fall: T. Alkire (course coordinator) and K. Bättig von Wittelsbach; spring: K. Bättig von Wittelsbach.

ITALA 123 is an all-skills course designed to improve speaking and reading ability, to establish a groundwork for correct writing, and to provide a substantial grammar review.

#### ITALA 209 Italian Intermediate Composition and Conversation I

**Composition and Conversation 1** Fall, spring. 3 credits. *Provides language proficiency*. Prerequisite: ITALA 123 or LPI 56–64, or SAT II 590–680, or CASE Q. Students wishing to major in Italian and students who wish to study abroad in Italy are strongly encouraged to enroll concurrently in ITALL 214, 215, 216, or 217. The S-U option is not available to undergraduates, and is available to graduate students only by exceptional permission from the course coordinator. Fall: P. Swenson; spring: K. Bättig von Wittelsbach.

This course provides a guided conversation, composition, reading, pronunciation, and grammar review, emphasizing the development of accurate and idiomatic expression in the language.

## ITALA 219 Italian Intermediate Composition and Conversation II

Spring. 3 credits. Prerequisite: ITALA 209 or equivalent. Students wishing to major in Italian and students wishing to study abroad in Italy are strongly encouraged to enroll concurrently in ITALL 214, 215, 216, or 217. P. Swenson. Guided conversation, composition, reading, pronunciation, and grammar review emphasizing the development of accurate and idiomatic expression in the language.

Note: Students placed in 200-level courses also have the option of taking courses in introductory literature, cultural studies, and cinema; see separate listings under ITALL 214, 215, 216 and 217 for descriptions of these courses.

## ITALA 300 Directed Studies

Fall, spring. 1–4 credits variable. Prerequisite: permission of instructor. Times are arranged with instructor. Staff.

Taught on a specialized basis to address particular student needs.

## Literature

## ITALL 214 World News, Italian Views (IV)

Spring, 4 credits. Course limited to 18 students. Prerequisite: ITALA 209 or permission of instructor. Conducted in Italian. M. Migiel.

In this seminar, we read, discuss, and write about a variety of global and transnational issues that get debated in the Italian media. Our approach to these cultural issues is grounded in rhetorical and discourse analysis. Students are required to read articles from Italian and English (both U. S. and British) sources. Students who read other languages (e.g. French, Spanish, etc.) are encouraged to offer points of comparison. Topics include: current events; international politics; developments in science and technology; economic and business ventures; literary bestsellers; movies; sports.

### ITALL 215 The Cinematic Eye of Italy (IV)

Fall. 3 credits. Conducted in Italian. Prerequisite: ITALA 209 or permission of the instructor. T. Campbell.

In this sophomore seminar, Italian film is used to be explore the basics of film theory, as well as some of the most important issues in modern Italian cultural history. Films viewed include neorealist works, spaghetti westerns and "trash" films, and political films from the 1970s (Wertmuller, Cavani, Bertolucci). Readings are designed to introduce students to film criticism and recent debates in Italian visual and cultural studies.

## ITALL 216–217 Introduction to Italian Literature (IV) Fall: 216; spring: 217. 3 credits. Prerequi-

Fall: 216; spring: 217. 3 credits. Prerequisite: permission of instructor. ITALL 216 is not prerequisite to ITALL 217. Conducted in Italian. Fall, F. Cervesi-McCobb; spring, T. Campbell.

In this course, students develop their language skills in Italian by reading, discussing, and writing about short works of fiction (twentieth-century short stories in ITALL 216; twentieth-century prose works in ITALL 217).

## ITALL 221 The Italian Renaissance (also HIST 350) # (III or IV)

Spring. 4 credits. J. Najemy. For description see HIST 350.

#### ITALL 223 The Rise of Modernism (also ITALL 623) (IV) Fall. 4 credits. S. Stewart-Steinberg.

Fall. 4 credits. S. Stewart-Steinberg. This course will cover the period from the early nineteenth century through the rise of fascism. We will study the movement for national unification (the Risorgimento), the drive to "make Italians," the rise and fall of liberalism, and the coming to power of the cultural products, such as literature, opera, and film.

## ITALL 230 The Uses of Learning

Spring. 4 credits. Enrollment is limited to 15 students. M. Migiel.

This seminar is dedicated to exploring questions such as: What is knowledge good for? That is, if there are "uses" for it, what are they? Are some kinds of knowledge better than others? Are there certain things that one absolutely ought to know? Should the acquisition of knowledge be restricted (to an elite, to a given class, sex, race, ethnicity, nationality, etc.)? Is the alternative (democratic mass education) at all possible? If it is the case that not all people achieve their full learning potential, why does this happen (i.e., do we in fact restrict the acquisition of knowledge without making this fully explicit)? What is the role of education in a contemporary democracy in which science and technology are ever more dominant? And what is the role for the humanities in such a society? What is an "intellectual" and how do we conceive of his/ her role in society?

The seminar readings are organized around two interrelated clusters. On one hand, we read excerpts from authors who have done a great deal to shape our philosophical reflections about questions like these (e.g., Plato, Augustine, select Italian humanists, Rousseau, Wollstonecraft, Gramsci, Dewey, Montessori, Freire). On the other hand, we look to several acclaimed authors of the Italian 20th century (e.g., Italo Calvino, Primo Levi, Elsa Morante, Umberto Eco) to see how they have grappled with these questions in their fictional and other prose works. All readings for the course will be available in English translation. Students write analytic and personal essays. While not restricted to sophomores this course is intended to offer students, especially sophomores, an opportunity to work closely with faculty in a seminar environment within a strong interdisciplinary context.

## ITALL 300 Italian Practicum

Fall, spring. 1 credit. Conducted in Italian. Fall: S. Stewart-Steinberg; spring: T. Campbell and M. Migiel.

Students enrolled in an Italian literature or culture course that is conducted in English (e.g., ITALL 221, 223, 230, and 479) may opt to take this one-credit Practicum in Italian, provided that they have already attained proficiency in the language. Students in the Practicum spend one class hour per week discussing selected issues or texts in Italian; they also complete an appropriate amount of written work in Italian.

#### ITALL 360 Fin-de-Siècle Italy: The Power of the Other (also ITALL 660) (IV)

Spring. 4 credits. Taught in Italian

S. Stewart-Steinberg.

This course explores the construction of Italian subjectivity after Italian Unification and the pressures exerted on this subjectivity in the wake of the crisis of the liberal state and of the advent of fascism. The analytic lens of this investigation is the power exerted on the Italian subject by the "Other": women, children, colonial subjects, criminals, Southerners, ghosts or angels. Texts include those of Verga, Collodi, D'Annunzio, Fogazzaro, Lombroso, Suevo, DeSancis, Verdi, Pastrone.

## ITALL 385 Modern Italian Travel Writing (also ITALL 685)

Spring. 4 credits. Prerequisite: permission of instructor. Conducted in Italian. T. Campbell.

This course is an introduction to modern travel narratives in the Italian context. We read a range of texts dating from the late 19th to mid-20th centuries that urge travel as their theme, with a particular emphasis placed on North-East Africa and Latin America. The course begins with missionary accounts from Eritrea, continues with the correspondence of Italian emigrants to Argentina and Brazil, and then turns to minor classic of Italian travel literature: Flaiano's Tempo di uccidere, Tobino's Deserto di Libia, Carlo Levi's Cristo si e fermato a Eboli, and Bordonaro's La spartenza. We examine the ways in which travel writing produces a space of displacement, consider the relation between technology, travel and aesthetics, and discuss the forms by which the distinction between foreign and Italian are observed.

#### ITALL 389 Modern Italian Novel (also ITALL 689) (IV)

Fall. 4 credits. Prerequisite: permission of instructor. Students who have taken ITALL 389 previously are permitted to re-take the course for credit, provided that the readings are different. Conducted in Italian. T. Campbell.

This course is devoted to theorizing the advent of the modern novel in Italy. Works by D'Annunzio, Marinetti, Bontempelli, Pirandello, Palezzeschi and Svevo will be read in order to examine the space of memory and the time of narrative experience specific to modern narrative.

#### ITALL 419–420 Special Topics in Italian Literature

419, fall; 420, spring. 2–4 credits each term. Prerequisite: permission of instructor. Fall: T. Campbell and S. Stewart-Steinberg; spring: T. Campbell, M. Migiel and S. Stewart-Steinberg.

Guided independent study of specific topics.

#### ITALL 429–430 Honors in Italian Literature

429, fall; 430, spring. 8 credits year-long course. R, fall; letter grade, spring. Limited to seniors. Prerequisite: permission of instructor. M. Migiel and staff.

#### ITALL 479 Patronage and the Medici (also ITAL 679 and HIST 479) # (III or IV)

Spring. 4 credits. J. Najemy. For description, see HIST 479.

## ITALL 623 The Rise of Modernism (also ITALL 223)

Fall. 4 credits. S. Stewart-Steinberg. For description, see ITALL 223.

## ITALL 639-640 Special Topics in Italian Literature

639, fall; 640, spring. 4 credits each term. Fall: T. Campbell and S. Stewart-Steinberg; spring: T. Campbell, M. Migiel and S. Stewart-Steinberg.

## ITALL 660 Fin-de-Siècle Italy: The Power of the Other (also ITALL 360)

Spring. 4 credits. S. Stewart-Steinberg. For description, see ITALL 360.

#### ITALL 679 Patronage and the Medici (also ITALL 479 and HIST 479)

Spring. 4 credits. J. Najemy. For description, see HIST 479.

#### ITALL 685 Modern Italian Travel Writing (also ITALL 385)

Spring. 4 credits. Prerequisite: permission of instructor. Conducted in Italian. T. Campbell.

For description, see ITALL 385.

### ITALL 689 Modern Italian Novel (also ITALL 389)

Fall. 4 credits. Prerequisite: permission of instructor. Students who have taken ITALL 689 previously are permitted to re-take the course for credit, provided that the readings are different. Conducted in Italian. T. Campbell. For description, see ITALL 389.

## **Portuguese**

Faculty: J. Oliveira

## PORT 121–122 Elementary Brazilian Portuguese

121, fall; 122, spring. 4 credits each term. Intended for beginners, for students with little or no fluency in Spanish. Students may attain qualification upon completion of 122 by achieving a satisfactory score on a special examination. J. Oliveira.

A thorough grounding is given in all the language skills: listening, speaking, reading, and writing.

## PORT 209 Intermediate Conversation I: Portuguese for Spanish Speakers @

Fall. 3 credits. *Provides language proficiency*. Prerequisites: PORT 122 or permission of instructor The S-U option is not available to undergraduates, and is available to graduate students only by exceptional permission from the course coordinator. J. Oliveira.

Intended for students who have taken 121– 122, and for students who are either native/ near-native speakers of Spanish or another Romance Language (or CASE Q++). The course presents a fast paced review on improving grammatical accuracy and on enriching vocabulary. This is an all-skills course designed to establish a groundwork with particular emphasis on Brazilian Portuguese spoken within the context of its culture. Listening comprehension and speaking activities aim at improving oral communication within its cultural context.

#### PORT 219 Intermediate Conversation II: Portuguese for Spanish Speakers

Spring. 3 credits. Prerequisite: PORT 209. I. Oliveira.

This course further refines the development of accurate writing and oral expression. It provides a continuation of grammar review with special attention to pronunciation and the development of a more accurate conversational colloquial communication of Brazilian Portuguese. Includes readings in contemporary Portuguese and Brazilian prose and some writing practice.

#### PORT 319 Readings in Luso-Brazilian Literature of the 19th Century @ # (IV)

Fall. 4 credits. Prerequisite: permission of instructor. The S-U option is not available to undergraduates, and is available to graduate students only by exceptional permission from the course coordinator. J. Oliveira.

This course takes a broad approach to selective writings of representative Luso-Brazilian authors from the nineteenth century to the present Machado de Assis, Aluísio de Azevedo, Lima Brreto, Manoel Antonio de Almeida, Eça de Queiroz, and others. The course is divided into small sections. The students may read all works in the Portuguese or in translation. Assignments include short book reports, and students select a topic for in-depth research to the writing of a final term paper.

#### PORT 320 Readings in Luso-Brazilian Literature of the 20th Century @ (IV)

Spring. 4 credits. Prerequisite: permission of the instructor. The S-U option is not available to undergraduates, and is available to graduate students only by exceptional permission from the course coordinator. J. Oliveira.

This course explores a broad approach to selective writings of contemporary Brazilian and Portuguese authors such as Graciliano Ramos, J. L. do Rego, Jorge Amado, Clarice Lispector, Moacyr Scliar, Fernando Pessoa, João Saramago and others. The course is divided into small sections. The students may read all works in the Portuguese or in translation. Assignments include short book reports, and students select a topic for indepth research to the writing of a final term paper.

## Quechua

Faculty: L. Morato-Peña.

**QUECH 121-122 Elementary Quechua** 121, fall; 122, spring. 4 credits each term.

Prerequisite: for 122: QUECH 121. L. Morato-Peña.

A beginning conversation course in Quechua.

## QUECH 136 Quechua Writing Lab

Spring. 1 credit. Prerequisite: concurrent enrollment in QUECH 122 or instructor's approval. Letter grade only. L. Morato-Pena.

Computer-assisted drill and writing instruction in elementary Quechua.

## QUECH 209-219 Continuing Quechua

209, fall; 219, spring. 3 credits each term. Prerequisites: for QUECH 209: QUECH 122 or equivalent; for QUECH 219: QUECH 209 or equivalent. The S-U option is not available to undergraduates, and is available to graduate students only by exceptional permission from the course coordinator. L. Morato-Peña.

An intermediate conversation and reading course. Study of the Huarochiri manuscript.

## QUECH 300 Directed Studies

Fall, spring. 1–4 credits variable. Prerequisite: permission of instructor. L. Morato-Pena.

Taught on a specialized basis to address particular student needs. Times arranged with instructor.

## **Romance Studies**

## ROM S 323 Comparative Romance Syntax (also LING 323) (III)

Spring. 4 credits. Prerequisites: LING 101, or equivalent and qualification in any romance language. C. Rosen. For description, see LING 323.

## Spanish

M. A. Álvarez, S. Amigo-Silvestre, C. Morón Arroyo, L. Carrillo, D. Castillo (director of undergraduate studies), E. Dozier (associate chair for language instruction), M. A. Garces (director of graduate studies), M. García (visiting), Z. Iguina, C. Lawless, N. Maldonado-Mendez, L. Morato-Peña, J. E. Paz-Soldan, J. M. Rodríquez-García, M. K. Redmond, J. R. Resina, J. Routier-Pucci, X. Rupert de Ventos (visiting), E. Sánchez-Blake, A. Stratakos-Tió, M. Stycos. Emeritus: J. W. Kronik.

### The Major

The Spanish major is designed to give students proficiency in the oral and written language, to acquaint them with Hispanic culture, and to develop their skill in literary and linguistic analysis. Satisfactory completion of the major should enable students to meet language and literature requirements for teaching, to continue with graduate work in Spanish or other appropriate disciplines, and to satisfy standards for acceptance into the training programs of the government, social agencies, and business concerns. A Spanish major combined with another discipline may also allow a student to undertake preprofessional training for graduate study in law or medicine. Students interested in a Spanish major are encouraged to seek faculty advice as early as possible. For acceptance into the major, students should consult Professor Debra Castillo, dac9@cornell.edu, the Director of Undergraduate Studies, in Morrill Hall 323D, who will admit them to the major, and assign them an adviser from the Spanish faculty. Spanish majors will then work out a plan of study in consultation with their advisers. Spanish majors have great flexibility in devising their programs of study and areas of concentration. Previous training and interests as well as vocational goals will be taken into account when the student's program of courses is determined.

Students interested in majoring in Spanish linguistics should contact the Department of Linguistics.

SPANL 218 and SPANR 219 (or equivalent) are prerequisite to entering the major in Spanish. All majors will normally include the following core courses in their programs:

All tracks include the following core:

- 1. SPANR 311 and 312
- 2. SPANL 316, 318 and 319 (not necessarily in that order)

#### The Spanish Literature Option

The Spanish Literature Option normally includes at least 20 credits of Spanish literature beyond the core courses. Literature majors are strongly urged to include in their programs courses in all the major periods of Hispanic literature.

## Spanish Language Option

A combination of literature and linguistics.

# Area Studies Option (Spanish, Latin American, or U.S. Latino Studies):

At least 20 credits of courses at the 300 level and above in any of these focus areas beyond the core, all courses to be approved through consultation with the major advisor. Courses should reflect interdisciplinary interests in the area and may include up to three other academic fields of interest. For example, a student interested in Latin American studies may want to include courses on such topics as Latin American history, government, rural sociology, and economics. Students who want to specialize in U.S. Latino issues may want to include such topics as sociology of Latinos, Latino history, and Latino medical issues in addition to further studies in literature. Students planning on spending a year or semester in Seville (but not exclusively such students) frequently plan their coursework to emphasize Spanish history, art, political economy, and other related field courses, such as courses on Islam and Moorish Spain.

Students are encouraged to enrich the major program by including a variety of courses from related fields or by combining Spanish with related fields such as History, Philosophy, Sociology, Anthropology, Art, Music, Classics, English, Comparative Literature, and other foreign languages and literatures. The interdepartmental programs in Latin American Studies and Latino Studies sponsor relevant courses in a variety of areas.

The J. G. White Prize and Scholarships are available annually to students who achieve excellence in Spanish.

Study Abroad in Spain. Cornell, the University of Michigan, and the University of Pennsylvania cosponsor an academic year in Spain program. Students enrolled in this program spend the first month before the fall semester begins in an orientation session at the University of Seville, where they take coursework in Spanish language and culture and take advantage of special lectures and field trips in Andalucia. The College of Arts and Sciences awards three credits for orientation. Once the semester begins, students enroll in regular classes at the University of Seville and at the program's center facility. Center courses are designed for the program and include a seminar offered by the resident director, from the faculty of either Cornell, Michigan, or Pennsylvania. Other center courses typically include history of art, history of the Mediterranean region, a literature course, and Spanish composition and syntax. In Seville, students live in private homes and a rich array of cultural activities and excursions are organized every semester.

Applicants are expected to have at least completed SPANR 219 prior to departure. Students are strongly encouraged to study abroad for the entire year rather than one semester. Students interested in the study abroad program should visit Cornell Abroad in 474 Uris Hall and take a look at the Cornell Abroad web site: www.einaudi.cornell.edu/ cuabroad.

Study Abroad in Bolivia: The Summer program in Cochabamba, Bolivia is sponsored by the Latin American Studies Program and accepts both undergraduate and graduate students. Students live with Bolivian families and normally take two courses with Cornell faculty who participate in this program. In addition to course work in Bolivian culture, politics, and social movements, the program features the opportunity to do intensive study in Quechua, the native language spoken by many Bolivians, as well as Spanish, and to participate in research and internships with grass-roots communities, government offices, and businesses. Honors. Honors in Spanish may be achieved by superior students who want to undertake guided independent reading and research in an area of their choice. Students in the senior year select a member of the Spanish faculty to supervise their work and direct the writing of their honors essay (see SPANL 429-430).

## Language

Enrollment in a language course is conditional upon the student's eligibility for the particular level and on attendance of the first scheduled class session. Further, a student who fails to attend the first three days of class will be automatically dropped from the course in order to accommodate those on the waiting lists.

All Spanish language courses are offered by the Department of Romance Studies, and Spanish linguistics courses are offered by the Department of Linguistics.

## SPANR 112 Elementary Spanish: Review and Continuation

Fall. 4 credits. Prerequisite: LPS score 37-44 or SAT II 370-450. S. Amigo Silvestre (course coordinator) and M. Alvarez. This course is designed for students who have taken some Spanish and who have a placement score of 37-44 or SAT II 370-450. It provides a basic review and then moves on to cover new material for the remainder of the term. Students who have taken SPANR 121 may enroll for this course. As part of the final exam, students take the LPS and, according to their score, may place into SPANR 123 (score below 56), or receive qualification and place into the 200-level courses (score 56 or above).

## SPANR 121-122 Elementary Spanish

121, fall and summer; 122, spring. 4 credits each term. Prerequisite: for SPANR 122: SPANR 121. M. K. Redmond (course coordinator) and staff.

This course is intended for students with no experience in Spanish. (Students who have previously studied 2 or more years of Spanish are not eligible for 121 unless they have an LPS score lower than 37 or SAT II lower than 370.) The course provides a thorough grounding in all language skills.

#### SPANR 123 Continuing Spanish

Fall. spring, summer. 4 credits. Provides language qualification. Prerequisite: SPANR 112 or SPANR 122, or an LPS score 45-55 or SAT II 460-580. The S-U option is not available to undergraduates, and is available to graduate students only by exceptional permission from the course coordinator. Fall: N. Maldonado-Mendez (course coordinator), L. Morato-Pena, and staff; spring: N. Maldonado-Mendez (course coordinator), L. Morato-Pena, and staff; summer: A. Stratakos-Tio.

This is a lower-intermediate level course that provides an intensive grammar review in communicative contexts and practice in all skills. After this course, the student may take SPANR 200, 207, or 209.

## SPANR 200 Spanish for English/Spanish **Bilinguals (also LSP 202)**

Fall, spring. 3 credits. Provides language proficiency. Prerequisite: LPS score 56 or higher, SAT II 590 or higher, CASE placement, or permission of instructor. The S-U option is not available to undergraduates, and is available to graduate students only by exceptional permission from the course coordinator. N. Maldonado-Mendez.

This is a course designed to expand bilingual students' knowledge of Spanish by providing them with ample opportunities to develop and improve each of the basic language skills. Not available to students who have taken SPANR 207 or 209.

#### SPANR 207 Intermediate Spanish for the **Medical and Health Professions**

Fall, spring. 3 credits. Provides language proficiency. Prerequisite: Spanish 123, LPS score 56-64, or SAT II 590-680, or CASE Q, or permission of instructor. The S-U option is not available to undergraduates, and is available to graduate students only by exceptional permission from the course coordinator. Students who have taken SPANR 200 or 209 should speak to the instructor. A. Stratakos-Tio.

This course provides a conversational grammar review, with dialogues, debates, compositions, and readings on health-related themes. Special attention is given to relevant cultural differences.

## SPANR 209 Spanish Intermediate **Composition and Conversation I**

Fall, spring. 3 credits. Provides language proficiency. Prerequisite: SPANR 123, LPS score 56-64, or SAT II 590-680. Not available to students who have taken SPANR 207. The S-U option is not available to undergraduates, and is available to graduate students only by exceptional permission from the course coordinator. Fall: J. Routier-Pucci (course coordinator), M. Alvarez, C. Lawless and staff; spring: S. Amigo-Silvestre, C. Lawless,

J. Routier-Pucci (course coodinator), E. Sanchez-Blake and staff.

This course provides a conversational grammar review with special attention to the development of accurate and idiomatic oral and written expression. Assignments include composition-writing, the reading and discussing of Spanish and Spanish American short stories and poetry, and the viewing of several films.

## SPANR 219 Spanish Intermediate **Composition and Conversation II**

Fall, spring. 4 credits. Prerequisite: SPANR 207 or 209, or CASE Q+, or permission of instructor. This course, or its equivalent, is required for entering the major and for admission to the Cornell Abroad program. Z. Iguina (course coordinator, fall) and E. Dozier (course coordinator, spring) and staff

This is an advanced-intermediate course designed for students who want to further broaden their knowledge of the language and related cultures, as well as improve their comprehension and communication skills.

## **SPANR 300** Directed Studies

Fall, spring. 1-4 credits variable. Prerequisite: permission of instructor. Times

arranged with instructor. Staff. Taught on a specialized basis to address particular student needs.

#### SPANR 310 Advanced Spanish **Conversation and Pronunciation**

Spring. 3 credits. Prerequisite: SPANR 219 or equivalent. The S-U option is not available to undergraduates, and is available to graduate students only by exceptional permission from the course coordinator. Z. Iguina.

This is a conversation course with intensive oral practice obtained through the production of video programs. Students practice the

fundamental aspects of communication in the standard spoken and written Spanish, with some focus on dialectal variations. There are weekly pronunciation labs.

#### SPANR 311 Advanced Spanish **Composition and Conversation I**

Fall, spring. 4 credits. Prerequisite: SPANL 218 or SPANR 219 or CASE Q++ or

equivalent. M. Stycos and staff. Advanced language skills, developed through reading, grammar review, and intensive practice in speaking, writing, and translation. Analysis of present-day Spanish usage in a wide variety of oral and written texts.

## SPANR 312 Advanced Spanish **Composition and Conversation II**

Fall, spring. 4 credits. Prerequisite: SPANR 311 or permission of instructor. M. Stycos. Readings and class discussion focus on the stylistic analysis of modern texts. Increased emphasis, through weekly essays, on students' development of an effective Spanish prose style.

#### SPANR 315 Translating From Spanish-**Translating From French (also FRROM 315)**

Fall. 4 credits. Prerequisite: SPANR 312 or FRROM 312, or permission of the

instructors. J. Routier-Pucci and C. Porter. This seminar-type experiment, open to students who have successfully passed the highest 300-level language course offered in either Spanish or French, will focus on translating from the SL (source language) into the TL (target language, i.e. English). The objective of the course is to learn and practice the skill of translating from one of the SLs into English, and in so doing, investigate the various technical, stylistic, and cultural difficulties encountered in the process. To attain this objective, the students will be exposed to a series of translation tasks, conducted individually or in groups: they are asked to justify their translations, compare different translations of the same passage, work on different types of texts, and edit each other's translations.

## SPANR 630 Spanish for Reading

Spring. 3 credits. Limited to graduate

students. J. Routier-Pucci. Designed for those with little or no background in Spanish and little exposure to written Spanish, this course primarily aims to develop skill in reading Spanish. Grammar basics, extensive vocabulary, and strategies for reading in a foreign language are covered. The choice of texts depends on the interests of the students in the course.

## Literature

#### SPANL 218 Introduction to Hispanic Literature @ (IV)

Fall, spring. 3 credits. Prerequisite: SPANR 200, or 207, or 209 or CASE Q+, or permission of coordinator. The course is divided into small sections and is taught mainly in Spanish. The course that normally follows SPANL 218 is SPANR 311. C. Lawless and staff.

An intermediate course designed to improve reading, writing, speaking, and comprehension skills in Spanish through the reading and discussion of contemporary literary works of various genres (narrative prose, drama, poetry) from Spain and Spanish America. Emphasis is placed on the development of fluency in reading and of critical and

analytical abilities. The cultural, sociological, and aesthetic implications of texts by authors such as Borges, Cortăzar, Fuentes, Garcĩa Mărquez, Garcĩa Lorca, and Cela are considered.

## SPANL 245 Cinematic images of Change

 Spring. 3 credits. Prerequisite: SPANL 218
 or SPANR 219, CASE Q++ of permission of instructor. Conducted in Spanish. A maximum of 20 students. C. Lawless.
 How does film reflect special political change

in Latin America? Can cinematic images achieve changes in society? Such questions form the base of our historical and cultural investigation. The focus is on three major Latin American film producers-Cuba, Mexico, and Argentina-and will include a comparative look at selective Spanish films as well. An example of films under investigation are: "La hora de los hornos", "Lucía", "Amores Perros", and "La vida es silbar". Films and readings are in Spanish.

## SPANL 246 Contemporary Narratives by Latina Writers (also LSP 246 and WOMNS 246) (IV)

Fall. 3 credits. Conducted in English. L. Carrillo.

This course offers a survey of narratives, including novels, short fiction, essays, political/feminist manifestoes and memoirs by representative Latina writers of various Latino ethnic groups in the United States and the Americas including, Chicana, Chilean, Cuban. Dominican, and Puerto Rican, among others. We investigate the parallel development of a Latina perspective on personal, social and cultural issues alongside that of the U.S. ethnic liberation/revitalization movements of the 1960's through to contemporary feminist activism and women of color movements. We investigate these works as artistic attempts to deal with issues of culture, language and bilingualism, family, gender, sexuality, and domesticity among others. We account for regional distinctions and contributions. Readings include works by Julia Alvarez. Elena Castedo, Sandra Cisneros, Judith Ortiz Cofer, Cristina García, Ana Lydia Vega, and others

## **SPANL 301 Hispanic Theater Production** Fall. 1–2 credits. D. Castillo.

Students involved in Hispanic Theater Production develop a specific dramatic text for full-scale production. The course involves selection of an appropriate text, close analysis of the literary aspects of the play, and group evaluation of its representational value and effectiveness. All students signing up for the course are involved in some aspect of production of the play, and write a final paper as a course requirement. Credit is variable depending upon the student's role in play production: a minimum of 50 hours of work is required for one credit; a maximum of two credits will be awarded for 100 hours or more of work.

#### SPANL 313 Creative Writing Workshop (IV)

Fall. 4 credits. Prerequisite: Spanish 218 or 219, or CASE Q++, or permission of instructor. Conducted in Spanish. E. Paz-Soldān.

Focused on the practice of narrative writing in Spanish. We explore what makes a novel and a short story work, paying close attention to narrative structure, plot, beginnings/endings, character development, theme, etc. We read classic novels and short stories as points of departure for the discussion. Since the course is a workshop, students are expected to write their own fiction.

## SPANL 316 Readings In Modern Spanish Literature (IV) Fall, spring. 4 credits. Conducted in

Fall, spring. 4 credits. Conducted in Spanish. Prerequisite: SPANL 218, SPANR 219 or CASE Q++, or permission of instructor. Fall: C. Arroyo and

J. M. Rodriguez-Garcia; spring: J. Resina and C. Arroyo.

Readings and discussion of representative texts from Spain from the Romantic period to the present. Becquer, Galdos, Unamuno, García Lorca, Cela, and others.

#### SPANL 318 Readings in Modern Spanish American Literature (IV)

Fall, spring. 4 credits. Conducted in Spanish. Prerequisite: SPANL 218, SPANR 219, or CASE Q++, or permission of instructor. Fall: M. García, M. Stycos, and C. Lawless; spring: C. Lawless and M. García.

Readings and discussion of representative texts of the nineteenth and twentieth centuries from various regions of Spanish America. Among the authors considered are Darío, Borges, Cortázar, García Mårquez, and Valenzuela.

#### Note: The prerequisite for the following courses, unless otherwise indicated, is SPANL 316 and 318 or permission of instructor.

## SPANL 319 Renaissance Hispanisms # (IV)

Fall, spring. 4 credits. Conducted in Spanish. Prerequisite: SPANL 316 and SPANL 318. SPANR 312 is recommended. M. A. Garcés.

In Spain, the cultural revolution known as the Renaissance produced a glittering array of artistic works-both in literature and the arts-which gave rise to the term Golden Age. There was a "darker side" to the Renaissance, however, which juxtaposed the conquest of America with the establishment of the Inquisition and the expulsion of the Jews. The tale of these relations of exclusion and fascination with the other is recapitulated by the literature of the period. Readings may be drawn from Columbus, Cabeza de Vaca, Lazarillo de Tormes, Garcilaso de la Vega, San Juan de la Cruz, Cervantes, Maria de Zayas, Quevedo, Lope de Vega, and Calderón, among others.

## SPANL 320 Perspectives on Latin

America (also LASP 301) @ (IV) Spring. 3 credits. Conducted in English. J. M. Rodriguez-Garcia.

This interdisciplinary, co-taught course is offered every spring through the Latin American Program. It is highly recommended for Latin American Studies Concentrators. Topics vary by semester, but readings always focus on current research in various disciplines and regions of Latin America. The range of issues addressed include the economic, social, cultural, and political trends and transitions in the area. In the weekly meetings, instructors and guest lecturers facilitate student discussions. Students taking the course are required to participate in all class discussions and write one research paper in their chosen focus area.

#### SPANL 323 Readings in Latin American Civilization

Fall. 4 credits. P. Perez-del Solar.

The first half of the course will examine the historical development of Latin American society, culture, and institutions; the second half will be devoted to oral presentations and in-depth discussion of topics of contemporary interest that students will have chosen and researched (for example, the political and economic crisis in Central America, Caribbean literature, Mexican muralism, etc.). The final paper will be based on that presentation.

#### SPANL 333 The Spanish-American Short Story

Spring. 4 credits. E. Paz-Soldan. A study of the short narrative genre as it has been practiced in Spanish America during the past two centuries. In addition to representatives of the Romantic, Realist, Modernist, and criollista schools, the course focuses on contemporary writers such as Arreola, Borges, Cortazar, Fuentes, Garcia Marquez, and Rulfo.

#### SPANL 352 Race and Literature in the Hispanic Caribbean/Literatura y raza en el Caribe Hispánico

Fall. 4 credits. Conducted in Spanish. M. García.

This course serves as an introduction to the discussion of the complex inter-relationship between race, colour, and class in the Caribbean. To explore the formation of these relationships over time we examine the cultural production of the region. Through a series of readings we discuss a number of issues ranging from race and national formations, to the shaping of cultural citizenship and subjectivity. We begin by looking at the similarities and diversity of slavery throughout the Caribbean, in the framework of Old and New World slave formations, and the Americas. We assess the impact of the plantation society in cultural representations as well as race and ideology in post war politics. We then concentrate our efforts on the literary production of the twentieth century and its representation of the contemporary debates on race and racism in the region. Students are expected to actively participate in class discussions.

## SPANL 358 Modern Catalan Literature

Fall. 4 credits. Conducted in Spanish. J. R. Resina.

This course attempts to correct the usual understanding of Spanish Peninsular literature and culture exclusively from the Castilian tradition and language. Despite this established misperception, Spanish culture is made up of different languages and traditions, representing widely divergent sensibilities and points of view. In order to understand contemporary Spanish culture in its complexity, it is indispensable to be acquainted with this diversity and to gain some familiarity with the cultural traditions in which the diversity is expressed. Among these other languages and traditions, Catalan is the strongest in density and scope. With ten million speakers, or one fourth of the population of Spain, it represents a cultural community larger than that of various European countries. Centered in the city of Barcelona, this cultural community has long combined an active internationalism and interculturality with a heightened awareness of the concrete and the local as the embodiment of the universal. The purpose of the course is not only to highlight the existence of another literary tradition, but to change the uniform view of Spanish culture by supplementing an in-depth exploration of an alternative path to modernity. This course is a survey of the most important Catalan authors of the last century.

Readings include a selection of texts from the late nineteenth-century Renaixença movement and from early twentieth century movements like Modernisme, Noucentisme, and the Avant-Garde, as well as a selection of midand late twentieth century works. The authors studies include Oller. Maragall, d'Ors, Salvat-Papasseit, Riba, Pla, Villalongo, Rodoreda, Monzó, Roig, Marçal, Moncada. All readings are in Spanish translation.

#### SPANL 359 A Stranger in the Family: the Nineteenth-Century Novel of Adultery

Spring. 3 credits. J. R. Resina. In the 1960s a category of novels develops in Spain that seeks to account for history in terms of personal experience and selfunderstanding. Confronting the official "memory" of the Franco regime, authors recreate the past through subjective remembrance, stressing the unreliability of narrative assertion and the frailty and contingency of the history thus rescued. By an ideological reversal, the 1980s and 1990s are a period of political aestheticization driven by the political command to forget the past. A few authors explore the social implications of a modernization cut loose from even the most recent historical memory, recuperating the figure of the lone individual in the time bubble of consciousness. Beginning with Ana María Mature's Primera Memoria (1960), Merce Rodoreda's La plaça del Diamant (1962), and reading through significant works of 1980s and 1990s like Julian Marías's Corazon tan blanco. Manuel Vazquez Montalban's Galíndez and Juan Marse's El embrujo de Shanghai. Some of the theoretical issues explored include the relation between fiction and memory, the fantastic, and the social construction of memory.

#### SPANL 373 Poetry and History of the Americas: Transatlantic Readings (also SPANL 673)

Fall. 4 credits. Conducted in Spanish. J. M. Rodríguez-García.

The aim of this course is to survey the poetry produced on both sides of the Atlantic by modern Spanish and Spanish American poets who have reflected on what it means to be an American and to dwell in and on Americageographically, culturally, and politically. American has long been construed as a continent in which poetry can be discovered everywhere and where the (male) epic poet can imaginatively steer the course of history by projecting his voice ahead of his time, in prophetic utterances that challenge the donnees of Western European culture. In this course we treat poetry as both prophetic and historical discourse, and accordingly use, in the analysis of individual poems, some insights derived from recent work in narratology, speech-act theories, political sociology, and translation and transculturation theories, as well as from the poststructuralist critique of historiography

## SPANL 407 Grammatical Structure of Spanish I (also LING 407) (III)

Fall. 4 credits. M. Suner. For description, see LING 407.

## SPANL 409 The Generation of 1898 (also SPANL 609)

Spring. 4 credits. Conducted in Spanish. C. Arroyo.

A seminar on one of the most controversial moments in Spanish civilization. Topics covered include the Cubans' war of independence; Josē Martí; the Spanish-American War; the idea of generation in literature; the search for "the soul of Spain"; the contemporary European discourse on national identity; the origins of Catalan and Basque nationalism; the generation of 1898 and Modernism. Readings include Unamuno, Ruben Darío, Valle-Inclan, Benavente, Azorín, Baroja, R. de Maeztu, A. Machado.

### SPANL 419–420 Special Topics in Hispanic Literature

419, fall; 420, spring. 2–4 credits each term. Prerequisite: permission of instructor. Staff. Guided independent study of specific topics. For undergraduates interested in special problems not covered in courses.

## SPANL 428 Vargas Llosa

Fall. 4 credits. E. Paz-Soldān. The Peruvian Mario Vargas Llosa is one of the most important Latin American writers today, somebody whose works have already achieved classic status. One of the key figures of the Boom movement, he has managed to remain relevant and controversial. In this course, we explore the development of his literary career, beginning with his short stories and early novels such as *La ciudad y los perros*, and ending with his latest works. We analyze his contributions to the form of the novel, and also study his political ideas, from his Marxism and his support of the Cuban revolution, to his switch to the right.

### SPANL 429–430 Honors Work in Hispanic Literature

429, fall; 430, spring. 8 credits. Year-long course, R grade fall semester, letter grade spring semester. Limited to seniors with a superior academic record. Prerequisite: permission of instructor. Fall: D. Castillo; spring: E. Paz-Soldån.

#### SPANL 446 The Cross and the Crescent: Early Modern Christian Contacts with Islam (also NES 437 and HIST 429) # @ (III or IV)

Fall. 4 credits. Conducted in Spanish. Prerequisite: SPANL 316, SPANL 318, SPANL 319, or permission of the instructor. M. A. Garces.

Under the Medieval caliphate, and under the Persian and Turkish dynasties, the empire of Islam was the richest, most powerful, most creative, most enlightened region in the world. Tenth-century Cordoba in al-Andalus was in the pinnacle of its glory, giving rise to such poets and philosophers as Ibn Hazm and Ibn Rushd, better known as Averroes. Christendom was on the defensive: In the Iberian Peninsula, the Reconquista advanced, fueling an in built hostility against Islam. In 1492, the Catholic monarchs Ferdinand and Isabella conquered the Moorish kingdom of Granada and unified Spain under Christianity. But in the southeastern Europe, where the Ottoman Sultan assaulted first the Byzantine Emperor and then the Holy Roman Empire of Charles V, Muslim power continued to prevail, particularly in the early modern Mediterranean wars against Spain. This course traces the development of these encounters in medieval and early modern Spain through the study of historical and literary texts from Ibn Hazm of Cordoba to the sixteenth-century Iberian obsession with Moorish motifs, represented by the Abencerraje and the Romancero, to the depiction of the conflicts between Christianity and Islam in works by Leo Africanus, Lopez de Gopmara, Hurtado de Mendoza, Perez de Hita, Cervantes, and Antonio de Sosa, among

others. Particular attention will be paid to the construction of a Spanish national identity, created through Christian-Islamic confrontations.

#### SPANL 454 La Imaginación antropológica en el Caribe Hispánico/The Anthropological Imagination in Caribbean Literature Spring. 4 credits. Conducted in Spanish. M. García.

Can one truly know the Other without doing violence to him or her and to his or her culture? Is contamination with Western culture desirable; will it not bring about destruction? Is it possible to write about one's knowledge of the Other without distorting his or her culture beyond recognition? Is it impossible to make fiction out of any such attempt? These are some of the questions that are explored in this course. We begin with a broad consideration of anthropology that distinguishes between the various sub-genres and discourses it has spawned, such as functional anthropology, ethnography, and the fieldwork diary of cultural anthropology. This discussion not only allows for a nuanced consideration of a series of Latin American literary texts but also provides a fruitful polemic for engaging other critics such as Roberto Gonzalez Echevarría, who have also argued for the influence of anthropological discourse in modern Latin American literature. I believe that by making distinctions in the various discourses that anthropology has produced one can understand fully its presence and influence in the literature produced in the region. We follow with an examination of the various ways in which authors position themselves and their writing with respect to the Subject/Other divide that is the crux of anthropological discourse. For example, in Carpentier, one can see a deliberate use of the aestheticization of anthropological thoughtwhat James Clifford has called "ethnographic surrealism"-that marked the avant-garde in the Twenties and Thirties and allowed Carpentier to claim a superiority vis-a-vis European reality. We also engage in discussions about "testimonios" and their mediations, the uses of myth, folklore, and religion, the importance of travel stories, and the development of slave narratives.

## SPANL 469 Mystics and Moralists (also SPANL 669) # (IV)

Fall. 4 credits. C. Arroyo.

Reading of Francisco de Osuna, Spanish Erasmianism, St. Teresa of Jesus, Fr. Luis de Léon, and St. John of the Cross, preceded by an anthology of medieval mysticism in which we pursue the emergence of the mystical systems and terminology. The decline of mysticism in Spain around 1600 and the emergence of a moralist literature. The impact of Justus Lipsius's new humanism, "French Learning"; J. Barclay; their presence in Quevedo and Gracian. The baroque generations, the origin of the terms criticism and gusto.

# SPANL 483 MACONDO/McONDO: Our "Fin de Siglo" (IV)

Spring. 4 credits. Conducted in Spanish. E. Paz-Soldan.

A review of Latin American narrative of the last two decades, in the context of the modernity/postmodernity debate, and in view of the social, cultural, and political changes brought about by globalization. Topics will include the new historical novel, the emergence of new cultural actors, magical

630

realism, and the revolt against it by the new generation of Latin American writers. Works by Vargas Llosa, Allende, Tomas Eloy Martínez, Mastretta, among others.

#### SPANL 492 Latin American Women Writers (also WOMNS 481 and COM L 482) @ (IV)

Fall. 4 credits. Conducted in English. D. Castillo.

This course provides a sampler of novels and short stories by and about Latin American women. We look at the question of selfconstruction and issues such as the social and political concerns involved in a specifically Latin American feminine identity. All works are read in translation. (Romance Studies students should read originals of the works from the Spanish.) Authors may include writers like Luisa Valenzuela (Argentina) and Rigoberta Menchu (Guatemala), Helena Parente Cunha and Clarice Lispector (Brazil), Helena Maria Viramontes (U.S.A.), and Simone Schwartz-Bart (Guadalupe).

## SPANL 609 The Generation of 1898 (also SPANL 409)

Spring. 4 credits. Conducted in Spanish. C. Arroyo.

For description, see SPANL 409.

#### SPANL 639–640 Special Topics in Hispanic Literature

639, fall; 640, spring. 2–4 credits each term. Staff.

SPANL 669 Mystics and Moralists (also SPANL 469)

Fall. 4 credits. Conducted in Spanish. C. Arroyo.

For description, see SPANL 469.

## SPANL 673 Poetry and History of the Americas: Transatlantic Readings (also SPANL 373)

Fall. 4 credits. Conducted in Spanish. J. M. Rodríguez-García. For description, see SPANL 373.

SPANL 674 Contemporary Poetry and Culture (also COM L 674) Spring. 4 credits. J. Monroe.

For description, see COM L 674.

## RUSSIAN

P. Carden, acting chair, director of undergraduate studies [literature], (226B Morrill Hall); S. Paperno, director of Russian Language Program (226E Morrill Hall); W. Browne, L. Paperno, N. Pollak, S. Senderovich, G. Shapiro, V. Tsimberov, visiting: I. Medzhibovskaya.

For updated information consult our websites: (literature) http://www.arts.cornell.edu/russian (language) http://russian.cornell.edu

## The Russian Major

Russian majors study Russian language, literature, and linguistics, and emphasize their specific interests. It is desirable, although not necessary, for prospective majors to complete RUSSA 121–122, 201–202, and 203–204 as freshmen and sophomores, since these courses are prerequisites to most of the junior and senior courses that count toward the major. Students may be admitted to the major upon satisfactory completion of RUSSA 122 or the equivalent. Students who elect to major in Russian should consult Professor Carden as soon as possible. For a major in Russian, students are required to complete (1) RUSSA 303–304 or the equivalent, and (2) 18 credits from 300- and 400-level literature and linguistics courses, of which 12 credits must be in literature in the original Russian.

Certain courses may, with the permission of the instructor, be taken for one additional credit. Such courses involve a one-hour section each week with work in the Russian language. Students may count two one-hour credits towards the 12 hours of Russian literature in the original language required for the major.

## **Study Abroad**

Cornell is affiliated with the Council on International Educational Exchange program for Russian language study at St. Petersburg State University. Cornell students also frequently participate in the American Council of Teachers of Russian program in Moscow and other Russian language programs. Opportunities are available for study during the summer, a single semester, or the full year. Further information is available from W. Browne, in the Department of Linguistics.

**Honors.** Students taking honors in Russian undertake individual reading and research and write an honors essay. Students planning to take honors should consult Professor Carden in their junior year.

## **Russian Language**

For details on all Russian language courses, see: http://russian.dmll.cornell.edu. Any 3 or 4 credit Russian language course at the 200 level or above (203, 204 or 206) *provides language proficiency*.

## RUSSA 103-104 Conversation Practice

103, fall; 104, spring. 2 credits each term. Must enroll in one section of 103 and one section of 121 in the fall; and one section of 104 and one section of 122 in the spring. M W 10:10–11:00. L. Paperno.

A highly interactive conversation class. Multimedia materials on our web site must be used on computers in the language lab or on the students' own computers.

#### RUSSA 121-122 Elementary Russian through Film

121, fall or summer; 122, spring or summer. 4 credits each term. May be taken alone and qualification will be achieved with satisfactory completion of 121–122– 123; or may be taken concurrently with 103–104 and qualification will be achieved at completion of 122–104. M T W R F 11:15–12:05 or 12:20–1:10. L. Paperno, S. Paperno, V. Tsimberov.

A thorough grounding is given in all the language skills: listening, speaking, reading, and writing. Course materials include clips from original Russian films and TV programs.

## RUSSA 123 Continuing Russian

Fall. 4 credits. *Provides language qualification*. Limited to students who have previously studied Russian or been placed by department. Satisfactory completion of RUSSA 123 fulfills the qualification portion of the language requirements. M T W R F 10:10–11:00. L. Paperno, S. Paperno, V. Tsimberov.

A course designed to prepare students for study at the 200 level. Authentic Russian materials are used: TV, books, etc.

### RUSSA 203–204 Intermediate Composition and Conversation

203, fall or summer; 204, spring or summer. 3 credits each term. *Provides language proficiency*. Prerequisites: for RUSSA 203, qualification in Russian (RUSSA 123 or placement by department); for RUSSA 204, RUSSA 203 or equivalent. M T R F 1:25–2:15. L. Paperno, S. Paperno, V. Tsimberoy.

Guided conversation, translation, reading, pronunciation, and grammar review, emphasizing the development of accurate and idiomatic expression in the language. Course materials include CD-ROMS with clips from an original Russian feature film and work with Russian web sites.

#### RUSSA 205–206 Reading Russian Press

205, fall; 206, spring. 2 credits each term. *RUSSA 205 together with 206 provides language proficiency*. Prerequisite: qualification in Russian (RUSSA 122, 123 or placement by department). Both semesters must be taken in order to satisfy the proficiency level for the language requirement. This course cannot be used to satisfy the humanities requirement. Times arranged with instructor. S. Paperno.

In this course students read unabridged articles on a variety of topics from current Russian periodicals and web pages.

Note: Students placed in the 200-level courses also have the option of taking courses in introductory literature; see separate listings under RUSSL 201 and 202 for descriptions of these courses, which may be taken concurrently with the 203–204 and 205–206 language courses described above.

## **RUSSA 300 Directed Individual Studies**

Fall or spring. 1 credit. Prerequisite: permission of instructor. Times arranged with instructor. Staff.

Taught on a specialized basis to address particular student needs usually related to a project or interests not addressed in other Russian courses.

#### RUSSA 303–304 Advanced Composition and Conversation

303, fall; 304, spring. 4 credits each term. *Provides language proficiency*. Prerequisites: for RUSSA 303, RUSSA 204 or equivalent; for RUSSA 304, RUSSA 303 or equivalent. M W F 2:30–3:20. L. Paperno,

S. Paperno, V. Tsimberov. Course involves writing, reading, and conversation. Includes viewing and reading authentic language materials such as current Russian films (feature and documentary), newspapers, TV programs, and Russian web sites.

## RUSSA 305–306 Directed Study in Writing and Grammar

305, fall; 306, spring. 2 credits each term. Prerequisite: placement by the department.

Times arranged with instructor. Staff. This course is intended for students with particular needs that cannot be met by any other Russian course (e.g., children of Russian immigrants who speak Russian at home but have not learned to read or write grammatically correct Russian).

## RUSSA 309–310 Advanced Reading

309, fall; 310, spring. 4 credits each term. Prerequisites: for RUSSA 309, RUSSA 204; for RUSSA 310, RUSSA 309 or equivalent. Times arranged with instructor. L. Paperno, S. Paperno, V. Tsimberov.

## ARTS AND SCIENCES - 2002-2003

The purpose of the course is to teach advanced reading skills. The weekly reading assignment is 20–40 pages of unabridged Russian prose, fiction or non-fiction. The discussion of the reading is conducted entirely in Russian and is centered around the content of the assigned selection. When possible, a special section for native speakers of Russian is taught, with larger reading assignments—up to 130 pages per week. This course cannot be used to satisfy the Humanities requirement.

#### [RUSSA 401–402 History of the Russian Language (also LING 417–418) (III)

401, fall; 402, spring. 4 credits each term. Prerequisites: for RUSSA 401, permission of instructor; for RUSSA 402, RUSSA 401 or equivalent. Offered alternate years. Not offered 2002–2003. Times arranged with instructor. W. Browne.

Course considers phonological, morphological, and syntactic developments from old Russian to modern Russian.]

## [RUSSA 403–404 Linguistic Structure of Russian (also LING 443–444) (III)

Russian (also LING 443–444) (III) 403, fall; 404, spring. 4 credits each term. Prerequisites: for RUSSA 403, LING 101 and permission of instructor, for RUSSA 404, RUSSA 403 or equivalent. Offered alternate years. Not offered 2002–2003. Times arranged with instructor. W. Browne.

A synchronic analysis of the structure of modern Russian. RUSSA 403 deals primarily with phonology and 404 with syntax and word order.]

#### RUSSA 409 Teaching Russian as a Foreign Language

Fall, spring. 1 credit. Prerequisite: very good command of Russian language. Times arranged with instructor. S. Paperno.

Designed to equip the teacher of Russian with the ability to practice language instruction in the classroom. Geared to the courses and methodology used in the Russian language--program at Cornell. Not a theoretical course.

### RUSSA 413–414 Advanced Conversation and Stylistics

413, fall; 414, spring. 2 credits each term. Prerequisites: for RUSSA 413, RUSSA 303– 304 or the equivalent, for RUSSA 414, RUSSA 413 or equivalent. Times arranged with instructor. V. Tsimberov.

Discussion of authentic unabridged Russian texts and films (feature or documentary) in a variety of nonliterary styles and genres.

#### [RUSSA 601 Old Church Slavonic (also LING 661)

Fall. 4 credits. Prerequisite: students should know a Slavic or classical Indo-European language. This course is prerequisite to RUSSA 602 and 651. Offered alternate

years. Not offered 2002–2003; next offered 2003–2004. Times arranged with instructor. W. Browne.

Grammar and reading of basic texts.]

#### [RUSSA 602 Old Russian Texts (also LING 662)

Spring. 4 credits. Prerequisite: RUSSA 601. Offered alternate years. Not offered 2002– 2003; next offered 2003–2004. Times arranged with instructor. W. Browne.

Grammatical analysis and close reading of Old Russian texts.]

#### RUSSA 633–634 Russian for Russian Specialists

633, fall; 634, spring. 1–4 credits variable. Prerequisite: 4 years of college Russian. For graduate and advanced undergraduate students. Times arranged with instructors. L. Paperno, S. Paperno, V. Tsimberov.

The course is designed for students who specialize in an area of Russian studies requiring fine active control of the language. Fine points of syntax, usage, and style are practiced and discussed.

### [RUSSA 651–652 Comparative Slavic Linguistics (also LING 671–672)

651, fall; 652, spring. 4 credits each term. Prerequisites: for RUSSA 651, RUSSA 601 taken previously or simultaneously or permission of instructor, for RUSSA 652, RUSSA 651 or permission of instructor. Offered alternate years. Not offered 2002– 2003. Times arranged with instructor. W. Browne.

Covers sounds and forms of the Slavic languages and of prehistoric common Slavic. Also covers main historical developments leading to the modern languages.]

## [RUSSA 700 Seminar in Slavic Linguistics

Offered according to demand. Variable credit. Not offered 2002–2003. Times arranged with instructor. Staff.

Topics chosen according to the interests of staff and students.]

## **Russian Literature**

A variety of courses are offered in Russian Literature; some course readings are in English translation, others are in the original Russian, others use both. The connection between Russian history, society, and literature is particularly close, so instruction and discussion in class often include a variety of topics, such as culture and intellectual history, as well as literature. Several courses are interdisciplinary, co-sponsored with the departments of History, Economics, Government, Comparative Literature, and others.

**First-Year Writing Seminars:** consult the John S. Knight Institute brochure for times, instructors, and descriptions.

### (RUSSL 201–202 Readings in Russian Literature (IV)

201, fall; 202, spring. 3 credits each term. Prerequisite: qualification in RUSSL 201 is the prerequisite to 202. Not offered 2002– 2003. M W F 1:25–2:15. G. Shapiro.

Open to freshmen. For non-native speakers of Russian. This course serves as an introduction to Russian literature in the original language. Readings in prose and verse may include works by Pushkin, Lermontov, Tiutchev, Fet, Tolstoy, Chekhov, and others.]

#### RUSSL 207-[208] Themes from Russian Culture # (IV)

**Culture # (IV)** 207, spring; [208, not offered 2002–2003]. 3 credits each term. M W F 2:30–3:20. G. Shapiro.

These courses deal with various aspects of Russian culture, such as literature, art, music, religion, philosophy, and social thought. RUSSL 207 extends over the period from the beginning through the eighteenth century. RUSSL 208 covers the nineteenth and twentieth centuries. Russian culture is presented as part of Western civilization, with attention to its distinctive character. The basic texts are literary works of moderate length in English translation. Classes incorporate audio/ visual presentations (slides, tapes, film).

#### RUSSL 233 Soviet Social and Family Life, WW II (also HIST 233) (III)

For description, see HIST 233.

#### RUSSL 277 Growing Up the Russian Way: Childhood in Literature and Film (IV)

Fall. 4 credits. T R 8:40-9:55.

I. Medzhibovskaya. Does childhood have a nationality? It is believed to be a universal, genuinely chaste human condition. As much as this is true, every culture and every epoch has its own distinct attitudes toward childhood. This is a survey course of key readings on childhood in the Russian mode. Particular attention is paid to conditions and policies that shape childhood in modern-era Russia. Course includes literary and other readings and film screenings, all in English.

## RUSSL 279 The Russian Connection, 1830–1867 (also COM L 279) # (IV)

Fall. 4 credits. M W F 10:10-11:00. P. Carden. As Russian prose began to find its voice, it responded with enthusiasm to the European prose tradition. One line of development in the Russian novel began with Rousseau's division between the needs of individual growth, nourished by solitude and introspection, and the demands of society. Tolstoy's War and Peace can be read as a summary and a testing of the novelistic tradition that grew out of the work of Rousseau, in both European and Russian literature. We follow the line that leads to Tolstoy's multifaceted inquiry, beginning with two short novels that set the tone for the introspective novel in the two traditions, Constant's Adolphe and Lermontov's Hero of Our Time. Looking at relevant excerpts from a range of European prose writers, Rousseau, Musset, Goethe, Stendhal, Thackeray among others, we think about the possibilities and limitations of the introspective novel as a form, especially as manifested in one of the monuments of the genre, War and Peace.

## RUSSL 280 The Russian Connection,

**1870–1960 (also COM L 280) (IV)** Spring. 4 credits. M W F 10:10–11:00. P. Carden.

The European novel of introspection developed a second line of inquiry, in some respects counter to the tradition that grew out of the writings of Rousseau. Diderot's "Rameau's Nephew" may be taken as emblematic of a novel that goes beyond the search for self-understanding to focus on alientation, resentment, and rebellion. Dostoevsky was the inheritor of this line in the European prose tradition. His works, in particular *Notes from Underground* and *The Idiot*, are the focal point of our discussion. We follow up the tradition as Dostoevsky's influence returns the line to Europe in the works of writers like Camus and Sarraute.

#### RUSSL 331 Introduction to Russian Poetry # (IV)

Fall. 4 credits. Prerequisites: RUSSL 202 or equivalent and permission of instructor. This course may be counted toward the 12 credits of Russian literature in the original language for the Russian major. T R 10:10– 11:25. S. Senderovich.

A survey of Russian poetry with primary emphasis on the analysis of individual poems by major poets.

## [RUSSL 332 Russian Drama and Theatre

(also THETR 322, COM L 322) # (IV) Spring. 4 credits. Not offered 2002-2003: next offered 2003-2004. S. Senderovich. Covers selected topics. Includes discussion of a number of the most representative Russian plays of the nineteenth and twentieth centuries in chronological order. Offers introductions to the historical period, cultural atmosphere, literary trends, and crucial moments in the history of the Russian theater. Among the works studied are Gogol's Inspector General, Ostrovsky's The Storm, and Chekhov's The Cherry Orchard. All readings are in English translation. Additional assignments in critical literature are made for graduate students.]

## [RUSSL 333 Twentieth-Century Russian Poetry (IV)

Spring. 4 credits. This course may be counted toward the 12 credits of Russian literature in the original language for the Russian major. Not offered 2002-2003. N. Pollak.

Course involves close readings of lyrics by major twentieth-century poets. All readings are in Russian.]

#### [RUSSL 334 The Russian Short Story (IV)

Spring. 4 credits. Prerequisites: RUSSL 202 or equivalent and permission of instructor. This course may be counted toward the 12 credits of Russian literature in the original language for the Russian major. Not

offered 2002–2003. P. Carden. This course is a survey of two centuries of Russian story telling. Emphasis is on the analysis of individual stories by major writers, on narrative structure, and on related landmarks of Russian literary criticism.]

## RUSSL 335 Gogol # (IV)

Fall, 4 credits, M W F 2:30-3:20. G. Shapiro. Selected works of Gogol are read closely and viewed in relation to his life and to the literature of his time. Readings are in English translation.

## [RUSSL 337 Films of Russian Literary Masterpieces (also COM L 338) (IV)

Fall. 4 credits. Not offered 2002-2003; next offered 2003-2004. S. Senderøvich.

War and Peace and Dr. Zhivago are wellknown American films relating to Russian literature of the nineteenth and twentieth centuries. Russian literature has been a matter of great interest both in the West and East. A clear cut practice of cultural translation is presented by film versions of Russian literary masterpieces. We perform a comparative analysis of these films, which provides an excellent opportunity for discussing problems of translation between various media and of cultural translation.]

#### RUSSL 350 Education and the Philosophical Fantasies (also COM L 350) # (IV)

Fall. 4 credits. T R 1:25-2:40. P. Carden. A major philosophical tradition has conceived of education as encompassing the whole of our lives. What we should do or be is seen as the result of every choice we make. The whole of our human context is understood as a school in which we form ourselves. This allencompassing vision of education has been embodied in the works of the great philosopher-fantasists who use the forms of fiction to explore fundamental issues of education. In this course we examine several key philosophical fantasies, among them Plato's

Republic, Rousseau's Emile, and Tolstoy's War and Peace. Our aim is to understand how the discourse on education became a central part of our Western tradition.

## [RUSSL 367 The Russian Novel (also **COM L 367)** # (IV) Spring. 4 credits. Special discussion section

for students who read Russian. Not offered 2002-2003. N. Pollak.

This course considers the rise of the Russian novel in the nineteenth century. May include works by Pushkin, Gogol, Turgenev, Dostoevsky, Tolstoy and Chekhov.]

### [RUSSL 368 Russian Literature from 1917 to the Present (IV)

Spring. 4 credits. No prerequisites. Special discussion section for students who read Russian. Not offered 2002-2003; next offered 2003-2004. Staff.

Readings are done in English translation. A survey focusing on the most important writers. Among the themes explored are Russian Modernism, social command, socialist realism, the Thaw, dissident and emigre literature, and post-modernism. Writers include Blok, Mayakovsky, Babel, Olesha, Platonov, Pasternak, Nabokov, Solzhenitsyn, the two Erofeevs, and contemporary women poets and short story writers.]

## [RUSSL 369 Dostoevsky (also COM L 332) # (IV)

Spring. 4 credits. Limited to 30 students. Not offered 2002-2003. P. Carden. This course involves close reading of novels and short works by Fyodor Dostoevsky. Doestoevsky's fiction is in contentious dialogue with the literature and philosophy of the preceding century and opens out to the literature and philosophy of the following century. His critique of European culture, his searching examination of the interior life, and his bold experiments with narrative make his work seminal in world fiction. In this course we read Notes From Underground, Crime And Punishment, The Idiot, and Brothers Karamazov.)

## [RUSSL 373 Chekhov in the Context of **Contemporary European Literature** and Art (also COM L 375) # (IV)

Spring. 4 credits. Not offered 2002-2003. S. Senderovich.

Reading and discussion of Anton Chekhov's short stories in the context of the European art of the short story and painting of that era. The course is designed for nonspecialists as well as literature majors. All reading is in English translation.]

## [RUSSL 385 Reading Nabokov (also COM L 385 and ENGL 379) (IV) Fall. 4 credits. Not offered 2002–2003; next

offered 2003-2004. G. Shapiro. This course offers an exciting trip into the intricate world of Nabokovian fiction. After establishing himself in Europe as a distinguished Russian writer, Nabokov, at the outbreak of WWII, came to the United States, where he reestablished himself, this time as an American writer of world renown. In our analysis of the Nabokovian artistic universe, we focus on his Russian corpus of works, from Mary (1926) to The Enchanter (writ. 1939), all in English translation, and examine the two widely read novels that he wrote in Ithaca while teaching literature at Cornell, Lolita (1955) and Pnin (1957).]

## RUSSL 393 Honors Essay Tutorial

Fall and spring. 8 credits. Must be taken in two consecutive semesters in senior year. Credit for the first semester will be awarded upon completion of second semester. For information, please see Director of Undergraduate Studies. Times arranged with instructor.

## RUSSL 409 Russian Stylistics (IV)

Fall. 4 credits. Also open to graduate students. Prerequisite: 3 years of Russian. This course may be counted toward the 12 credits of Russian literature in the original language for the Russian major. T R 11:40-12:55. S. Senderovich.

This course goes a few steps beyond normative grammar. Provides an introduction to the subtleties of idiomatic Russian on the levels of morphology, syntax, vocabulary, and phraseology. Also provides an introduction to the genres of live colloquial and written language. Students develop writing skills through short assignments and their analyses. Introduces first notions of literary stylistics and their practical application.

## [RUSSL 415 Post-Symbolist Russian Poetry (IV)

Spring. 4 credits. Prerequisite: permission of instructor. This course may be counted toward the 12 credits of Russian literature in the original language for the Russian major. Not offered 2002-2003. N. Pollak.]

#### [RUSSL 425 Vladimir Nabokov vs. Jean-Paul Sartre (also COM L 445) (IV) Spring. 4 credits. Not offered 2002-2003;

next offered 2003-2004. S. Senderovich. Jean-Paul Sartre reviewed Nabokov's Despair in 1938. Ten years later Nabokov returned the favor in his review of the English translation of Sartre's La Nausee. The apparent tension between the two celebrated men of European letters of the twentieth century allows us to look at the works of each through the eyes of the other, to go into the problems of Existentialist philosophy, into Nabokov's brand of it, and into responses to Sartre in Nabokov's works. The latter gives an excellent yet unexplored approach to the poetic world of Vladimir Nabokov. Nabokov's major response to Sartre occurred in the novel Pnin, written in Ithaca and largely about Cornell.]

#### [RUSSL 427 Russian Formalism (also COM L 427) (IV)

Fall. 4 credits. Not offered 2002-2003. N Pollak I

## [RUSSL 430 Practice in Translation (IV)

Spring. 4 credits. Prerequisites: proficiency in Russian or approval of instructors. Not offered 2002-2003. W. Browne and S. Senderovich.

A practical workshop in translation: documents, scholarly papers, literary works (prose and poetry). Translation mostly from Russian to English, partly from English to Russian. Attention is paid to problems and development of skills.]

## [RUSSL 431 Contemporary Russian Prose (IV) Spring, 4 credits. Prerequisites: RUSSL 301–

302 or 303-304, and permission of instructor. This course may be counted towards the 12 credits of Russian literature in the original language for the Russian major. Graduate students may audit the course. Not offered 2002-2003. Staff.]

## RUSSL 432 Pushkin # (IV)

Spring. 4 credits. Prerequisites: RUSSL 202 or equivalent, and permission of instructor. This course may be counted towards the 12 credits of Russian literature in the original language for the Russian major. T R 11:40-12:55. S. Senderovich. Reading in the original language and discussion of selected works by Pushkin:

lyrics, narrative poems, and Eugene Onegin.

# RUSSL 437 A Moralist and a Pornographer (also COM L 437) (IV)

Spring. 4 credits. Limited to 15 students TR 10:10-11:25. S. Senderovich.

Two great novels of the 20th century, Dr. Zhivago and Lolita, appeared in October of 1958 and competed for first place on the bestseller list. Both novels concerned the tragic story of a teenage girl sexually exploited by a mature man. Pasternak's novel was hailed as a highbrow and highly moral work of art, and the author soon received the Nobel Prize for literature. Nabokov's novel initially could not even be published in the U.S., for it was perceived as a pornographic text.

## [RUSSL 441 Bakhtin as Reader (also RUSSL 641, COM L 641) (IV)

Spring. 4 credits. Open to undergraduates with permission of instructor. Not offered 2002-2003. P. Carden.]

#### RUSSL 456 Great Russian Texts on **Human Dignity and Social** Action (IV)

Spring. 4 credits. T R 8:40-9:55. I. Medzhibovskava.

Russian literature is a mirror of the terrible dichotomy between human dignity and social action. It is torn between two extremes: transgression that is seeking open freedom in action, and submission that is seeking secret freedom in privacy. The goal of this seminar is to perform close readings of texts that take a borderline position on this dichotomy. They are neither literary works nor social/philosophical manifestoes proper. We contemplate what is specifically Russian in this approach and what pertains to the Western scheme of things. All readings, discussions, and papers are in English.

## [RUSSL 460 Short Works of Tolstoy and Dostoevsky # (IV)

Spring. 4 credits. Not offered 2002-2003. Staff

Readings in Russian and in translation. Open to graduate students.]

## [RUSSL 485 The World of Anna Karenina (also HIST 485)

Spring. 4 credits. Not offered 2002-2003; next offered 2003-2004. Limited to 15 students. Prerequisite: Previous course in Russian history, or permission. Letter grade only. T 10:10-12:05. P. Holquist.

Leo Tolstoy's Anna Karenina is an epic tale of passion, intrigue, tragedy, and redemption. It is also a penetrating portrayal of Russian life and society in the period following the Great Reforms of the 1860s. This period, the third quarter of the nineteenth century, was both the time of the flowering of the Russian novel as well as the age of Russia's imperial glory. In this course we will use Anna Karenina as the starting point for the multifaceted exploration of nineteenth-century Russian history and culture. Among topics we will discuss are family life, social relations, modernization and industrialization, gender and sexuality, revolutionary movements, imperialism, and political power. We will enhance our reading of the novel with a wide range of supplementary materials including memoirs, travel accounts, historical analysis, and art. This course will be organized in a seminar format.]

#### RUSSL 491 Reading Course: Russian Literature in the Original Language

Fall or spring. 1 credit each term. Prerequisite: permission of instructor.

Times arranged with instructor. Staff. This course is to be taken in conjunction with any Russian literature course at the advanced level. Students receive one credit for reading and discussing works in Russian in addition to their normal course work.

### RUSSL 492 Supervised Reading in **Russian Literature**

Fall or spring. 1-4 credits each term. Prerequisite: permission of instructor. Independent study. Students must find an adviser and submit a plan before signing up. Times arranged with instructor. Staff

## **(RUSSL 499 The Avant-Garde in Russian** Literature and the Arts (IV)

Open to any student who has completed a second-year course in Russian, or who has equivalent reading skills in Russian. This course may be counted toward the 12 credits of Russian literature in the original language for the Russian major. Not offered 2002-2003; next offered 2003-2004. P. Carden.

The first decade of the twentieth century was perhaps the richest period ever in Russian literature and the arts. It began with the brilliant experimentation in poetry and prose of Andrei Bely, Blok, Remizov, and others. It continued with the breakthroughs in painting and sculpture of Malevich, Goncharova, Tatlin, et al. In the second decade the rambunctious Futurists take over in literature and establish a compact with theater and the visual arts in which all the art forms break down the barriers to produce a new kind of art. During this period Russian artists in every medium were on the cutting edge of the European art scene. After the Revolution Russian artists and writers of the avant-garde continued their dominance for a time, now including the developing medium of film.

In this course we read representative Russian texts by the major authors of the period and we also investigate developments in the theater and visual arts.]

## **Graduate Seminars**

#### **RUSSL 605** Russian Analytical Approaches to Literature

Fall. 4 credits. Prerequisite: a level of knowledge of Russian literature determined by

the instructor. T R. 2:55-4:10. S. Senderovich. The course is designed for graduate and well-advanced undergraduate students who have sufficient knowledge of Russian literature and a developed interest in the analytical approaches to literary texts. The course provides an opportunity to study the most sophisticated analytical approaches to literature developed by Russian critics and theorists in the nineteenth and twentieth centuries. The course will focus on critical texts which have analytical value as opposed to speculative, that is, those which aim at discovering the unforeseeable in the literary texts. Russian sources will be studied against the background of contemporary American and European critical theory. Prominently featured will be studies by Alexander Veselovsky, Yury Tynianov,

Roman Jakobson, Mikhail Bakhtin, and Savely Senderovich.

#### **RUSSL 611 Supervised Reading and** Research

Fall or spring. 2–4 credits. Prerequisite: permission of the department. Times arranged with instructor. Staff.

## **Related Languages**

## Czech

## **ICZECH 300** Directed Studies

Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. Not offered 2002-2003. Times arranged with instructor. W. Browne.

Taught on a specialized basis to address particular student needs.]

## Hungarian

## [HUNGR 300 Directed Studies

Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. Not offered 2002-2003. W. Browne. Taught on a specialized basis to address particular student needs. Times arranged with instructor.]

### [HUNGR 427 Structure of Hungarian (also LING 427) (III)

Fall. 4 credits. Prerequisite: LING 101 or equivalent. Offered alternate years. Not offered 2002-2003. W. Browne. For description, see LING 427.]

## Polish

#### POLSH 131-132 Elementary Polish

131, fall; 132, spring. 3 credits each term. Prerequisite: for POLSH 132, POLSH 131 or equivalent. This language series (131-132) is not sufficient to satisfy the language requirement. Offered alternate years. K. Golkowska.

Covers all language skills: speaking, listening comprehension, reading, and writing.

## [POLSH 133-134 Continuing Polish

133, fall; 134, spring. 3 credits each term. POLSH 134 satisifes language qualification. Prerequisites: for POLSH 133, POLSH 132 or equivalent; for POLSH 134, POLSH 133 or equivalent. Offered alternate years. Not offered 2002-2003; next offered 2003-2004. W. Browne.

An intermediate conversation and reading course.]

## POLSH 300 Directed Studies

Fall or spring. 1 credit. Prerequisite: permission of instructor. Times arranged with instructor. K. Golkowska. Taught on a specialized basis to address particular student needs.

## Serbo-Croatian

#### [SEBCR 131-132 Elementary Serbo-Croatian

131, fall; 132, spring. 3 credits each term. Prerequisite for SEBCR 132: SEBCR 131 or equivalent. This language series (131-132) is not sufficient to satisfy the language requirement. Offered alternate years. Not offered 2002-2003; next offered 2003-2004. W. Browne.

Covers all language skills: speaking, listening comprehension, reading, and writing. Includes Bosnian.]

## SEBCR 133–134 Continuing Serbo-Croatian

133, fall; 134, spring. 3 credits each term. SEBCR 134 satisfies language qualification. Prerequisites: for SEBCR 133, SEBCR 132 or equivalent; for SEBCR 134, SEBCR 133 or equivalent. Offered alternate years. Times to be arranged with instructor. K. Bättig von Wittelsbach.

An intermediate conversation and reading course.

## [SEBCR 300 Directed Studies

Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. Not

offered 2002–2003. W. Browne. Taught on a specialized basis to address particular student needs. Times arranged with instructor.

## Ukrainian

## [UKRAN 300 Directed Studies

Fall or spring. 1 credit. Prerequisite: permission of instructor. Times arranged with instructor. Not offered 2002–2003. W. Browne.

Taught on a specialized basis to address particular student needs.]

## SANSKRIT

See Asian Studies.

## SCIENCE & TECHNOLOGY STUDIES

- T. J. Pinch, chair; R. N. Boyd, P. R. Dear,
- M. A. Dennis, T. Gillespie, S. H. Hilgartner,
- R. Kline, B. V. Lewenstein, M. Lynch,
- H. Mialet, A. G. Power, J. V. Reppy,
- M. W. Rossiter, P. J. Sengers. Emeritus: W. R. Lynn, L. P. Williams. Adjunct faculty:
- R. W. Miller, H. Shue, Z. Warhaft

In today's world, issues at the intersection of the technical and the social arise continually in all aspects of life, from the role of computers in society, the history of evolutionary theory, and the challenges of environmental controversies, to the ethical dilemmas of genomics and biomedicine. The field of science and technology studies (S&TS) addresses such issues through the study of the social aspects of knowledge, especially scientific and technological knowledge. S&TS explores the practices that shape science and technology, examines their social and cultural context, and analyzes their political and ethical implications. S&TS provides a strong liberal arts background from which students can go on to careers in law, medicine, environmental policy, business, and a variety of other professions where the social aspects of science and technology loom large.

## The Science & Technology Studies Major

S&TS courses are organized into a set of core courses plus three themes. Students select the theme that best represents their interests. In consultation with a faculty member, students may devise their own theme as long as it meets the general criteria of coherence and rigor.

## Admission to the Major

Students intending to major in Science & Technology Studies should submit an application during their sophomore year. Juniors are considered on a case-by-case basis. The application includes (1) a one-page statement explaining the student's intellectual interests and why the major is consistent with the student's academic interests and goals; (2) the theme the student wishes to pursue in the major; (3) a tentative plan of courses fulfilling S&TS requirements; and (4) an up-to-date transcript of work completed at Cornell University (and elsewhere, if applicable).

Acceptance into the major requires completion of the following prerequisites:

- (a) two introductory courses in history, philosophy, sociology, government, anthropology, economics, or other courses listed in the social sciences/ history (Group III) requirement of the College of Arts & Sciences;
- (b) the physical or biological science (Group I) requirement of the College of Arts & Sciences;
- (c) mathematics or computer science courses in fulfillment of the Arts College Group II distribution requirement.

These courses cannot be used to fulfill the core or other course requirements for the major and must be taken for a letter grade. Sophomores in the process of completing these prerequisites may be admitted to the major on a *provisional* basis. Further information and application materials are available in 275 Clark Hall (255–6047).

## Requirements

S&TS majors must complete the following requirements:

Note: All courses used to fulfill major requirements must be taken for a letter grade.

- 1. Core: one course in each of the following groups (a-c).
  - (a) Foundation (S&TS 201)
  - (b) Ethics (Choose from S&TS 205, 206, 360, or 490)
  - (c) History (Choose from S&TS 233, 250, 281, 282, or 283)
- 2. Theme: Students must elect a theme and take four courses in the theme. Courses taken to satisfy the core course requirements may not be used as part of the required four courses in the theme. At least two of the courses should be at the 300-level or higher, and at least one should be at the 400-level.

Available themes are:

- (a) Minds and Machines (S&TS 250, 281-3, 286, 292, 349, 353, 355, 381, 400, 409, 438, 453, 525)
- (b) Science, Technology and Public Policy (S&TS 281-3, 350, 352, 360, 390, 391, 403, 406, 407, 411, 427, 433, 442, 444, 466, 467, 473, 483, 487, 490, 492, 493, 532
- (c) Life in its Environment (S&TS 205, 206, 233, 281-3, 285, 286, 287, 301, 311, 324, 333, 403, 406, 411, 427, 444, 447, 487, 492)

In consultation with an S&TS faculty adviser, students may also devise their own theme as long as it meets the general criteria of coherence and rigor.

- Additional Science & Technology Studies courses: additional courses to total 34 credit hours in the major.
- A. Science Requirement: in addition to the science requirement of the College of Arts and Sciences, Science and Technology Studies majors are required to take an additional two semesters of a natural science or engineering (including computer science). Mathematics sufficient to provide background for the additional science requirement should be completed before undertaking that requirement. Choice of these courses should be made in consultation with the student's major adviser and should be related to the theme selected by the student.

## The Honors Program

The honors program is designed to provide independent research opportunities for academically talented S&TS majors. Students who enroll in the honors program are expected to do independent study and research, with faculty guidance, on issues in science and technology studies. Students who participate in the program should find the experience intellectually stimulating and rewarding whether or not they intend to pursue a research career. S&TS majors are considered for entry into the honors program at the end of the second semester of their junior year. To qualify for the S&TS honors program, students must have an overall Cornell cumulative grade point average of at least 3.00 and a 3.30 cumulative grade point average in courses taken for the major. Additionally, the student must have formulated a research topic, and have found a project supervisor and a second faculty member willing to serve as the advisers. More information on the honors program is available from the S&TS undergraduate office at 275 Clark Hall (255-6047).

## The Biology & Society Major

The Department of Science & Technology Studies also offers the Biology & Society major, which includes faculty from throughout the university. The Biology & Society major is designed for students who wish to combine the study of biology with exposure to perspectives from the social sciences and humanities. In addition to providing a foundation in biology, Biology & Society students obtain background in the social dimensions of modern biology and in the biological dimensions of contemporary social issues.

The Biology & Society major is offered to students enrolled in the College of Arts and Sciences, the College of Human Ecology, and the College of Agriculture and Life Sciences. The major is coordinated for students in all colleges through the Biology & Society office. Students can get information, specific course requirements, and application procedures for the major from the office in 275 Clark Hall, 255–6047.

A full description of the Biology & Society major can be found on p. 457 of this catalog.

## The Concentration in Science & **Technology Studies**

T. J. Pinch, chair; R. N. Boyd, P. R. Dear, M. A. Dennis, T. Gillespie, S. H. Hilgartner, R. Kline, B. V. Lewenstein, M. Lynch, H. Mialet, A. G. Power, J. V. Reppy, M. W. Rossiter, P. J. Sengers. Emeritus: W. R. Lynn, J. P. Williams. Adjunct faculty: R. W. Miller, H. Shue, Z. Warhaft

The concentration (or minor) in Science & Technology Studies (S&TS) is designed for students who wish to engage in a systematic, interdisciplinary exploration of the role of science and technology in modern societies. The concentration is intended for students with varied academic interests and career goals. Majors in the natural sciences and engineering have an opportunity to explore the social, political, and ethical implications of their selected fields of specialization, while students majoring in the humanities and social sciences have a chance to study the processes, products, and impacts of science and technology from an S&TS perspective.

To satisfy the requirements for the S&TS concentration, students must complete with letter grades a minimum of four courses selected from the course offerings listed for the major. At least one course must be chosen from the list of core courses. Two courses must be chosen from one of the themes listed below:

(a) Minds and Machines

- (b) Science, Technology, and Public Policy
- (c) Life in its Environment.

The concentration is completed with one other course in S&TS. Interested students may obtain further information about courses by contacting the S&TS undergraduate office, 275 Clark Hall (255-6047).

## **Course Offerings**

Introductory Course Minds and Machines Science, Technology and Public Policy Life in its Environment Independent Study

## **Introductory Course**

## S&TS 101 Science and Technology in the Public Arena (III)

Fall. 3 credits. J. Reppy. An introduction to public policy issues involving developments in science and technology. We study such topics as secrecy and national security, the politics of expertise, public understanding of science, computers and privacy, and the management of risk. We apply concepts from the field of science and technology studies to analyze how issues are framed and public policy produced.

## **Minds and Machines**

## S&TS 250 Technology in Society (also ECE 250, ENGRG 250 and HIST 250) (111)

Fall. 3 credits. R. Kline. For description, see ENGRG 250.

#### S&TS 281 Science in Western Civilization (also HIST 281) # (III) Fall. 4 credits. P. Dear. For description, see HIST 281.

## S&TS 282 Science in Western Civilization (also HIST 282) # (III)

Spring. 4 credits. P. Dear. For description, see HIST 282.

## S&TS 283 The Sciences in the Twentieth Century (also HIST 280) (III)

Fall. 4 credits. M. Dennis. Science emerged as a powerful source of social, economic, and political power during the twentieth century. Through an examination of the development of the sciencesphysical and biomedical-during the twentieth century students learn about the reciprocal relations between science and society. Topics covered may include: the rise and development of quantum mechanics; the emergence of Big Science; the history of the sciences in totalitarian nations, especially the former Soviet Union, Nazi Germany, and Communist China; the evolutionary synthesis; the rise and fall of molecular biology; the multiple forms of eugenics; the transformation of the social sciences; the role of new technologies in scientific change, especially computer and communication technology; the growth of science as a profession; and the development of science in non-western cultures.

## S&TS 286 Science and Human Nature

(also PHIL 286) (IV) Spring. 4 credits. R. Boyd. For description, see PHIL 286.

## S&TS 292 Inventing an Information Society (also ECE 298, ENGRG 298 and HIST 292) (III)

Spring. 3 credits. R. Kline. For description, see ENGRG 298.

#### S&TS 349 Media Technologies (III) Fall. 3 credits. T. Gillespie.

From the first attempts at pressing symbols into clay, to the latest software available on the Net, our efforts to communicate have depended on the technologies we develop. Our commonplace notions of communication and of society regularly overlook the role of the material artifacts. This course will consider the technologies of media-including writing, printing, photography, film, telegraph, telephone, radio, television, computer networks-as an opportunity to think about the intersection of technology and its social context.

## S&TS 353 Knowledge and Society (also **SOC 353) (III)** Fall. 3 credits. C. Leuenberger.

This course focuses on the historical evolution of the sociology of knowledge as a theoretical paradigm and an empirical research field. We examine the phenomenological origins of the sociology of knowledge and many of its central texts. We study how it has been applied to such areas as personhood, interaction, religion, identity, and the emotions. We also consider epistemological questions that arise, and cover various theoretical and empirical approaches that have been influenced by the sociology of knowledge such as ethnomethodology, conversation analysis, and the sociology of science and technology.

## [S&TS 355 Computers: From Babbage to Gates (III)

Fall. 4 credits. Not offered 2002-2003. M. Dennis.

Computers have not always been the ubiquitous beige boxes gracing our desktops: in Victorian London, Charles Babbage attempted to build his analytical engine using

brass gears and steel rods; and during World War II the Allied governments used sophisticated electro-mechanical and electronic "brains" to break Axis codes. Machines that once occupied entire rooms now travel in knapsacks. How did this technology, once considered esoteric and useful to only technical specialists, colonize industry, academia, the military, the federal government, and the home? Using primary historical materials, including novels, films, archival documents, and other texts we follow computers from Babbage's Victorian dream of an analytical engine to the visions of contemporary moguls like Bill Gates whose goal is "information at your fingertips." We explore not only how computer technology affects society, but also how culture and politics enable and sustain the development of the machine. This is a course in the history and sociology of computers; a background in computer science is not required. (No technical knowledge of computer use is presumed or required.)]

#### S&TS 381 Philosophy of Science: **Knowledge and Objectivity (also** PHIL 381) (IV)

Fall. 4 credits. R. Boyd. For description, see PHIL 381.

## [S&TS 387 The Automatic Lifestyle: **Consumer Culture and Technology**

Spring, 4 credits. Not offered 2002-2003. P. Sengers.

Our daily lifestyle in consumer culture is intimately intertwined with technology. Industrialized technology makes consumer culture possible, yet at the same time the economic and cultural trends of consumer culture select and shape the kinds of technology that become available. How is our daily lifestyle in consumer culture shaped by technology? How are everyday technologies shaped by the demands of consumer culture? What alternatives do we have? In this class, we synthesize history, sociology, and speculative design to answer these questions.]

## S&TS 400 Components and Systems: Engineering in a Social Context (also M&AE 400) (III)

Spring. 3 credits. Z. Warhaft. For description, see M&AE 400.

## [S&TS 409 From the Phonograph to

**Techno (also SOC 409) (III)** Fall. 4 credits. Limited to 15. Not offered 2002-2003. T. Pinch.

In this seminar, we treat music and sound and the ways they are produced and consumed as socio-cultural phenomena. We specifically investigate the way that music and sounds are related to technology and how such technologies and sounds have been shaped by and have shaped the wider society and culture of which they are a part. We look at the history of sounds technologies like the phonograph, the electronic music synthesizer, samplers, and the Sony Walkman. Our perspective is drawn from social and cultural studies of science and technology. Students are encouraged to carry out a small original research project on their favorite sound technology.]

### S&TS 410 Social Studies as Science (also \$ HUM 410) (III)

Fall. 4 credits. Limited to 15. M. Lynch. Are the social sciences really scientific? Should they even try to be scientific? And, if they can be scientific, what would make them that way? These questions have been debated ever since the 19th century when social science disciplines first became established in modern universities. This seminar examines the emergence of the social sciences and their unsettled place in between the humanities and social sciences. The focus is on sociology, and a series of debates (including some very recent ones) about its prospects as a science, though other fields will also be discussed. Weekly seminar discussions cover ideas and debates in social theory, the history and philosophy of social science, and the interdisciplinary field of science and technology studies.

## S&TS 438 Minds, Machines and Intelligence (also COGST 438) (III) Spring, 4 credits. H. Mialet.

Do machines think? Do they have minds? Are they intelligent? What can humans do that machines cannot do and vice versa? How do humans use machines and how do machines use humans? In this course we focus on how philosophers such as Turing, Searle, and Dreyfus have dealt with these questions. At the same time, however, we are also concerned with trying to rework the themes raised by these thinkers. We do this with an eye toward the work of social scientists who have studied how people and machines interact in specific contexts, as for example, in a plane's cockpit or on the Internet. Topics may also include virtual surgery, speech recognition, and expert systems in medicine.

#### [S&TS 453 Reflections on Scientific Personae: Visibility and Invisibility of the Body (III)

Spring. 4 credits. Not offered 2002–2003. H. Mialer.

Who produces science? Rational, deliberative minds or brilliant, intuitive iconoclasts? Individuals or groups? Geniuses or ordinary practitioners? Human beings or assemblages of instruments? This course explores the question of where scientific intelligence resides. The mythical figure of the lone genius stands in sharp contrast to recent work in the social history and sociology of science that analyzes how scientific knowledge is produced in collectivities that weave together humans and nonhumans. We examine the process through which scientific competencies emerge from, and are incorporated into, "collective bodies" (e.g., Callon and Latour's "actor-networks," or Haraway's "cyborgs"). The tensions between the human and the nonhuman and the individual and the collective run throughout the course and inform our analysis of the place, the role, and the representation of the body-or bodies-of the scientist.]

## [S&TS 525 Seminar in the History of Technology (also HIST 525)

Spring. 4 credits. Not offered 2002–2003. R. Kline.

An exploration of the history of technology in Europe and the United States from the eighteenth century to the present. Typical topics include the industrial revolution in Britain, the emergence of engineering as a profession, military support of technological change, labor and technology, the "incorporation" of science and engineering, technological utopias, cultural myths of engineers and inventors, social aspects of urbanization in the city and on the farm, post-war consumerism, and gender and technology. The interests of students and recent literature in the field are considered in selecting the topics for the seminar.]

## Science, Technology and Public Policy

S&TS 281 Science in Western Civilization (also HIST 281) # (III) Fall. 3 credits. P. Dear.

## For description, see HIST 281.

## S&TS 282 Science in Western

## **Civilization (also HIST 282) # (III)** Spring, 4 credits. P. Dear.

For description, see HIST 282.

## S&TS 283 The Sciences in the Twentieth Century (also HIST 280) (III)

Fall. 4 credits. M. Dennis. For description, see "Minds and Machines" theme.

#### [S&TS 350 Atomic Consequences: The Incorporation of Nuclear Weapons in Postwar America (also GOVT 305, AM ST 350) (III)

Spring. 4 credits. Not offered 2002–2003. M. Dennis.

This course explicates the development of atomic weapons from early twentieth-century ruminations about super bombs in science fiction through the Manhattan Project, the postwar development of thermonuclear weapons and civil defense, and more recent plans for strategic defense. Our focus expands to cover the lives of researchers at such institutions as Los Alamos during and after World War II as well as discussions of national politics. Other topics include the Nazi effort to develop an atomic bomb, the role of technical espionage during and after World War II, and the problems posed by the classification of technical knowledge. We seek to understand how the bomb became part of American culture through the use of literature and film, as well as readings in primary historical documents and secondary analyses. In addition to class meetings, there is also a required screening session. Films generally last less than two hours, but some are longer. Viewing the movies is an essential part of the course.]

## S&TS 352 Science Writing for the Mass Media (also COMM 352) (III)

Spring. 3 credits. B. Lewenstein. For description, see COMM 352.

### S&TS 360 Ethical Issues in Engineering (also ENGRG 360) (III)

Spring. 3 credits. R. Kline.

For description, see ENGRG 360.

## [S&TS 390 Science in the American Polity, 1800–1960 (also GOVT 308, AM ST 388) (III)

Fall. 4 credits. Not offered 2002–2003. M. Dennis.

How did America become a leading nation in scientific and technical research? This course charts the development of American science from its origins in gentlemanly societies in the early nineteenth century through the development of large-scale federally funded research or Big Science. Particular attention is paid to the importance of government patronage in creating new social and intellectual spaces for research; the importance of medicine and the biomedical disciplines for the development of universitybased research; the origins and expansion of research in corporations; and the role of war in the political economy of American science.]

S&TS 391 Science in the American Polity, 1960-Now (also GOVT 309, AM ST 389) (III) Fall. 4 credits. M. Dennis. This course reviews the changing political relations between science, technology, and the state in America from 1960 to the present. It focuses on the politics of choices involving science and technology in a variety of institutional settings, from Congress to courts and regulatory agencies. The tensions and contradictions between the concepts of science as an autonomous republic and as just another special interest provide the central theme for the course. Topics addressed include research funding, technological controversies, scientific advice, citizen participation in science policy, and the use of experts in courts.

## S&TS 403 Environmental Governance (also B&SOC 403, NTRES 403, S&TS 603)

Fall. 3 credits. S. Wolf. For description, see NTRES 403.

## S&TS 406 Biotechnology and Law (also B&SOC 406) (III)

Spring. 4 credits. L. Palmer Biotechnology, with myriad applications in areas such as medicine and agriculture, is creating many challenges for basic social institutions. This course explores the use and potential abuse of biotechnology in areas such as genetic screening and counseling, reproductive technologies, intentional release of genetically engineered organisms, patents, and ownership of human tissue. Particular attention is given to evolving legal and management strategies for regulating the applications of biotechnology. Readings are from science, medicine, law, and public policy. Several short written assignments as well as a research paper are required.

#### S&TS 407 Law, Science, and Public Values (also B&SOC 407, GOVT 407) (III)

Spring. 4 credits. M. Lynch. This course examines problems that arise at the interface of law and science. These problems include the regulation of novel technology, the role of technical expertise in public decision-making, and the control over scientific research. The first part of the course covers basic perspectives in science and technology studies (S&TS) and how they relate to legal decisions and processes. The second part of the course covers a series of examples and legal cases on the role of expert judgments in legal and legislative settings, intellectual property considerations in science and medicine, and legal and political oversight of scientific research. The final part of the course examines social processes and practices in legal institutions, and relates these to specific cases of scientific and technological controversy. Lectures and assignments are designed to acquaint students with relevant ideas about the relationship between legal, political, and scientific institutions, and to encourage independent thought and research about specific problems covered in the course.

## S&TS 411 Knowledge, Technology and Property (III)

Spring, 4 credits. Prerequisite: one course in science and technology studies. S. Hilgartner.

Should the human genome be treated as private property or a public resource? How should copyright be managed in the digital environment of the Internet? Is music "sampling" high-tech theft or artistic expression? Does bioprospecting represent an

## ARTS AND SCIENCES - 2002-2003

enlightened strategy for preserving biodiversity or a post-colonial means for transferring resources from the developing world to the North? Debate about the nature and scope of intellectual property is an increasingly salient feature of contemporary politics. This course examines the ownership of knowledge and technology, exploring fundamental tensions that intellectual property systems express and incompletely reconcile. Perspectives from science and technology studies, sociology, law, and economics will inform the course. Case studies explore the construction of property in contexts ranging from the early history of copyright to the ownership of life forms, airwaves, algorithms, artistic content, electronic databases, and the personal identities of celebrities.

#### S&TS 427 Politics of Environmental Protection in America (also GOVT 427) (III)

Summer. 4 credits. S. Yearley. This course provides an introduction to the distinctive features of environmental politics and policy-making. Using comparisons between North America and Europe, the course will focus particularly on the contributions of science, citizen activism and law to framing and resolving policy problems. Readings from political science, policy analysis, sociology, and law examine the changing political roles of national and international political bodies, courts, expert agencies, and regional/state governments, as well as industry and public interest groups, in environmental politics since the late 1970's. Case studies of contemporary environmental controversies-some at the national and some at the "global" level-are used to explore competing public conceptions of nature and environment, risk and safety, regulatory costs and benefits, and the goals and instruments of environmental policy.

## [S&TS 433 International History of Science (III)

Spring. 4 credits. Not offered 2002–2003. M. Rossiter.

A survey of the major scientific events and institutions in several foreign nations, including developing countries. The course covers the period 1660 to the present and gives some attention to who in each country becomes a scientist, who rises to the top, and who emigrates. Weekly readings and a research paper.]

## S&TS 442 The Sociology of Science (also B&SOC 442, CRP 442, SOC 442) (III)

Spring. 4 credits. H. Mialet. A view of science less as an autonomous activity than as a social institution. We discuss such issues as controversies in science, analysis of scientific text, gender, and the social shaping of scientific knowledge.

#### S&TS 444 Historical Issues of Gender and Science (also WOMNS 444) (III)

Spring. 4 credits. Not open to freshmen. M. Rossiter.

One-semester survey of women's role in science and engineering from antiquity to the 1980's, with special emphasis on the United States in the twentieth century. Readings include biographies and autobiographies of prominent women scientists, educational writings and other primary sources, and recent historical and sociological studies. By the end of the semester, we shall have attained a broad view of the problems that have faced women entering science and those that still remain.

## [S&TS 466 Public Communication of Science and Technology (also COMM 466) (III)

Fall. 4 credits. Limited to 15. Not offered 2002–2003. B. Lewenstein. For description, see COMM 466.]

### [S&TS 467 Innovation: Theory and Policy (III)

Fall. 4 credits. Open to upper-level undergraduates and interested graduate students. Prerequisite: ECON 102 or permission of the instructor. Not offered 2002–2003. J. Reppy.

In this course we study the innovation process (that is, the introduction of new technology into practice) through the critical analysis of selected theories of innovation and supporting empirical evidence. Economic theories are contrasted to the insights found in science and technology studies. The focus is on the context of interests and ideology in which the various theories have been framed and their differing implications for technology policy. Authors covered include Schumpeter, Solow, Scherer, Nelson and Winter, and Bijker and Pinch.]

#### [S&TS 473 Knowledge and Politics in Seventeenth Century England (also HIST 471) # (III)

Spring. 4 credits. Limited to 15. Not offered 2002–2003. P. Dear and R. Weil. For description, see HIST 471.]

## [S&TS 483 The Military and New

**Technology (also GOVT 483) (III)** Fall. 4 credits. Not offered 2002–2003. J. Reppy.

For description, see GOVT 483.]

#### [S&TS 487 Seminar in the History of the Agricultural Sciences (III) Fall. 4 credits. Not offered 2002–2003.

Fall. 4 credits. Not offered 2002–2003. M. Rossiter.

This course is a one-semester survey of the general topic of the history of scientific agriculture, broadly defined, world-wide. It seeks to cover some of the best of the more recent literature on this topic. Depending on the interests of the students, topics may include Amish culture, Hoover Dam, the Green Revolution, farm women and technology, particular scientists or crops, innovations, and epidemics.]

## [S&TS 490 The Integrity of Scientific Practice (III)

Fall. 4 credits. Not offered 2002–2003. S. Hilgartner.

Recent scandals over scientific fraud, debates about financial conflicts of interest, disputes about the use of human and animal subjects, and tensions over ownership of data have raised concern about integrity in science. In addition, changes in the American research system-from the emergence of new university-industry relationships to the growth of electronic communication-pose new questions about who owns and controls research. This course addresses practices that present problems of integrity in research (e.g., fraud, secrecy, commercialization). It also examines how scientific practices affect the structural integrity of science as an institution. Through these complementary concepts of integrity, the course explores the connections between the conduct of science and its cultural authority.]

### S&TS 491 Disease and Culture (III) Fall. 4 credits. E. Toon.

Influenza and Ebola, syphilis and AIDS, breast cancer and heart disease—whether rare or pervasive, disease frightens and threatens us, shaping our identities and our interactions with others. In this seminar, we will look at how scholars and others have written about disease, and we will begin to explore our own ideas about illness, contagion, risk, danger, and death. Course materials include historical and social scientific studies of medical knowledge and the experience of illness.

#### [S&TS 492 Politics and the Public Health (III)

Spring. 4 credits. Not offered 2002–2003. E. Toon.

Who is responsible for the public's health? Both now and in the past, the answer to that question has been a source of bitter debate. In the past three centuries, public health has become a contested mix of aims, advocates, and practices: it is simultaneously a field of scientific activity, a vehicle for social reform, and a site of political controversy. This course will examine the history of U.S. public health.]

## S&TS 493 Economics Meets Science Studies (III)

Fall. 4 credits. J. Reppy

This course covers a variety of possible interactions between the disciplines of economics and science and technology studies. Economists (at least some economists) are interested in science and technology as important components in economic growth, while scholars in science studies often appeal to economic motives and institutions to explain behavior in the production of scientific and technological knowledge. We explore ways in which economics can provide new questions and theoretical approaches for science and technology studies. From another perspective, economics, as the most "scientific" of the social sciences, is itself a subject for study. Internal critiques by economists are compared to external analyses in the science studies literature. Readings include works on the epistemology and use of rhetoric in economics and on the "new economics of science," and examples of the use of economic analysis in the science studies literature.

## [S&TS 532 Inside Technology: The Social Construction of Technology (also SOC 532)

Spring. 4 credits. Not offered 2002–2003. T. Pinch

Rather than analyze the social impact of technology upon society, in this course we investigate how society gets inside technology. In other words, is it possible that the very design of technologies embody assumptions about the nature of society? And, if so, are alternative technologies, which embody different assumptions about society possible? Do engineers have implicit theories about society? Is technology gendered? How can we understand the interaction of society and technology? Throughout the course the arguments are illustrated by detailed examinations of particular technologies, such as the ballistic missile, the bicycle, the electric car, and the refrigerator.]

## Life in its Environment

- S&TS 205 Ethical Issues in Health and Medicine (also B&SOC 205) (IV) Fall. 4 credits. S. Hilgartner. For description, see B&SOC 205.
- S&TS 206 Ethics and the Environment (also B&SOC 206, PHIL 246) (IV) Spring. 4 credits. N. Sethi. For description, see B&SOC 206.

638

## S&TS 233 Agriculture, History, and Society: From Squanto to Biotechnology (III)

Fall. 3 credits. M. Rossiter. This course surveys the major themes in the development of agriculture and agribusiness in the United States in the nineteenth and twentieth centuries. These include particular individuals (such as Liberty Hyde Bailey, Luther Burbank, G. W. Carver, Henry A. Wallace, and Norman Borlaug), the rise of government support and institutions (including U.S.D.A. and Cornell), noteworthy events (the Dust Bowl, World War II, and the environmental movement), and the achievements of the recent Green and "Gene" Revolutions.

S&TS 281 Science in Western Civilization (also HIST 281) # (III) Fall. 3 credits. P. Dear.

For description, see HIST 281.

## S&TS 282 Science in Western Civilization (also HIST 282) # (III)

Spring. 4 credits. P. Dear. For description, see HIST 282

## S&TS 283 The Sciences in the Twentieth Century (also HIST 280) (III)

Fall. 4 credits. M. Dennis. For description, see "Minds and Machines" theme.

#### S&TS 285 Communication in the Life Sciences (also COMM 285) (III) Spring. 3 credits. B. Lewenstein.

For description, see COMM 285.

# S&TS 286 Science and Human Nature (also PHIL 286) (IV) Spring, 4 credits. R. Boyd.

For description, see PHIL 286.

## S&TS 287 Evolution (also BIOEE 207 and HIST 287) (1 or ill) Fall. 4 credits. W. Provine.

For description, see BIOEE 207

## S&TS 301 Biology and Society: The Social Construction of Life (also B&SOC 301) (III)

Fall. 4 credits. E. Toon. For description, see B&SOC 301.

## S&TS 311 Sociology of Medicine (III) Spring. 4 credits. E. Toon.

This course provides an introduction to the ways in which medical practice, biomedical technology, and the medical profession are embedded in society and shaped by social phenomena. Accountability to patients and the public, and struggles over the control of medical practice in a world where medicine is connected to gender, class, race, and personal autonomy are important overarching themes. We examine the structure of the medical profession; medical training and professional socialization; the social organization of the hospital; and doctor-patient interactions. The course also explores how biomedical knowledge and technology get produced, assessed, and introduced into clinical practice. Topics may include the intensive care unit, the training of surgeons, the regulation of pharmaceuticals, AIDS and breast cancer activism, genetic testing, and priority setting in biomedical science.

## S&TS 324 Environment and Society (also R SOC 324 and SOC 324) (III)

Spring. 3 credits. C. Caron. For description, see R SOC 324.

## [S&TS 333 Genomics and Society (also R SOC 333) (III)

Fall. 3 credits. Not offered 2002-2003. Staff. For description, see R SOC 333.]

## S&TS 403 Environmental Governance (also B&SOC 403, NTRES 403) (III)

Fall. 3 credits. S. Wolf. For description, see NTRES 403.

### S&TS 406 Biotechnology and Law (also B&SOC 406) (III)

Spring. 4 credits. L. Palmer. For description, see "Science, Technology and Public Policy" theme.

## S&TS 411 Knowledge, Technology and

**Property (III)** Spring. 4 credits. Prerequisite: one course in science and technology studies.

S. Hilgartner.

For description, see "Science, Technology and Public Policy" theme.

#### S&TS 427 Politics of Environmental **Protection in America (also GOVT** 427) (111)

Summer, 4 credits, S. Yearley, For description, see "Science, Technology and Public Policy" theme.

## S&TS 444 Historical Issues of Gender

and Science (also WOMNS 444) (III) Spring. 4 credits. Not open to freshmen. M. Rossiter.

One-semester survey of women's role in science and engineering from antiquity to the 1980's, with special emphasis on the United States in the twentieth century. Readings include biographies and autobiographies of prominent women scientists, educational writings and other primary sources, and recent historical and sociological studies. By the end of the semester, we shall have attained a broad view of the problems that have faced women entering science and those that still remain.

#### S&TS 447 Seminar in the History of Biology (also B&SOC 447, HIST 415, BIOEE 467) (I or III)

Summer. 4 credits. Limited to 18. S-U grades optional. W. Provine. For description, see BIOEE 467

## [S&TS 487 Seminar in the History of the Environment (III)

Spring. 4 credits. Not offered 2002-2003. M. Rossiter.

This course is a one-semester survey of the general topic of the history of the environmental sciences, broadly defined, but mostly in the United States. Depending on the interests of the students, its topics may include clean water, clean air, the great outdoors, environmental disasters, and wild life.]

#### [S&TS 492 Politics and the Public Health (III)

Spring. 4 credits. Not offered 2002-2003. E. Toon.

For description, see "Science, Technology and Public Policy" theme.]

## **Independent Study**

## S&TS 399 Undergraduate Independent Study

Fall, spring. 1-4 credits. No more than 8 hours total of independent study (not including honors) can count toward the S&TS major.

More information and applications are available in 275 Clark Hall.

## S&TS 498-499 Honors Project I and II

Fall and spring. 3-5 credits each term. Open only to Science & Technology Studies students in their senior year by permission of the department. Applications and information available in 275 Clark Hall.

Students who are admitted to the honors program are required to complete two semesters of honors project research, and to write an honors thesis. The project must include substantial research and the completed work should be of wider scope and greater originality than is normal for an upperlevel course. Students may take three to five credits per semester up to a maximum of eight credits in S&TS 498 and 499, Honors Projects I and II. Students should note that these courses are to be taken in addition to those courses that meet the regular major requirements. S&TS 498 includes the fall Honors Seminar. The student and the project supervisor must reach clear agreement at the outset as to what sort of work will need to be completed during the first semester. Minimally, an honors thesis outline and bibliography should be accomplished. At the end of S&TS 498, Honors Project I, a letter grade is assigned and the advisers, in consultation with the Director of Undergraduate Studies, evaluate whether or not the student should continue working on an honors project. S&TS students who do continue in the honors program for the second semester receive a letter grade at the end of their final term whether or not they complete a thesis and whether or not they are recommended for honors.

## **Graduate Seminars**

## [S&TS 525 Seminar in the History of Technology (also HIST 525)

Fall. 4 credits. Not offered 2002-2003. **R** Kline

An exploration of the history of technology in Europe and the United States from the eighteenth century to the present. Typical topics include the industrial revolution in Britain, the emergence of engineering as a profession, military support of technological change, labor and technology, the "incorporation" of science and engineering, technological utopias, cultural myths of engineers and inventors, social aspects of urbanization in the city and on the farm, post-war consumerism, and gender and technology. The interests of students and recent literature in the field are considered in selecting the topics for the seminar.]

#### [S&TS 532 Inside Technology: The **Social Construction of Technology** (also SOC 532)

Spring. 4 credits. Not offered 2002-2003. T. Pinch.

Rather than analyze the social impact of technology upon society, in this course we investigate how society gets inside technology. In other words, is it possible that the very design of technologies embody assumptions about the nature of society? And, if so, are alternative technologies, which embody different assumptions about society possible? Do engineers have implicit theories about society? Is technology gendered? How can we understand the interaction of society and technology? Throughout the course the arguments are illustrated by detailed examinations of particular technologies, such as the ballistic missile, the bicycle, the electric car, and the refrigerator.]

#### [S&TS 616 Enlightened Science (also HIST 616)

Fall. 3 credits. Limited to graduate students. Not offered 2002–2003. P. Dear, M. Dennis. For description, see HIST 616.]

## [S&TS 625 Visualization and Discourse in Science

Fall. 4 credits. Not offered 2002–2003. M. Lynch.

This seminar covers two interrelated areas of science and technology studies: visualization and discourse. Visualization refers to the practices and technologies through which scientists and designers develop images, graphs, models, and other representations. Discourse refers, broadly, to practical uses of language. In the context of this course, discourse and visualization are treated as important aspects of the production of scientific data and technological artifacts. The course focuses mainly on historical and ethnographic studies that pay close attention to the material practices and linguistic repertoires through which scientific and technological innovations are made visible, palpable, and intersubjectively accountable.]

## S&TS 631 Qualitative Research Methods for Studying Science (also SOC 631)

Spring. 4 credits. M. Lynch. Much has been learned about the nature of science by sociologists and anthropologists donning lab coats and studying scientists in action. In this course we look at the methods used in this new wave of science studies. We examine what can be learned by interviewing scientists, from videos, and from detailed examinations of scientific texts. Students gain hands-on experience by conducting a miniproject in which they investigate some aspect of scientific culture.

#### [S&TS 644 Topics in the History of Women in Science (also WOMNS 644)

Spring. 4 credits. Not offered 2002–2003. M. Rossiter.

This is a one-semester graduate seminar on selected topics in the history of women and gender in science and technology, covering mostly the United States in the twentieth century but broadly defined to include earlier periods and other countries. It seeks to acquaint advanced students with some of the best recent literature on this topic and to identify and explore possible new topics. Weekly readings and a research paper.]

#### S&TS 645 Genetics: Politics and Society in Comparative Perspective (also GOVT 634)

Fall. 4 credits. S. Hilgartner.

Contemporary genetics and biotechnology are highly controversial, creating high hopes for some and deep anxieties for others. This course traces the conflicts and power struggles over genetic engineering, using it as a case to examine some crucial issues in the relationships among science, technology, and politics. In particular, the course focuses on three themes—the politics of property, the politics of identity, and the politics of risk—as they pertain to genetics. Topics may include the social shaping of biological research; eugenics and genetics; genetics and medicine; the regulation of risks; the growth of commercial biotechnology; university-industry relationships; Green parties and social movements; North-South issues and biotechnology; the Human Genome Project; intellectual property and patenting genes; and the debate over human cloning.

### **S&TS 649 Media Technologies** Spring. 4 credits. T. Gillespie.

From the first attempts at pressing symbols into clay, to the latest software available on the Net, our efforts to communicate our culture and drive social agendas have depended on the technologies we develop for getting our ideas to others. Beliefs as to how and why we communicate have shaped the technologies we design; in turn, those technologies have shaped our efforts to communicate, and the consequences of those efforts. This course will consider the technologies of media, both historically and theoretically, in order to consider the intersection of technology and its social context. We will apply theories of technology developed inside of S&TS to a set of artifacts it has less often scrutinized. We will also draw from fields outside of S&TS, which traditionally overlook the technological mediation of social relations, for work that deals intelligently with the material dimensions of media and could surprise the field with new perspectives and theoretical tools.

#### [S&TS 664 Constructionism in Social Science

Spring. 4 credits. Not offered 2002–2003. M. Lynch.

Constructionist approaches have become commonplace in many fields of social and cultural study. The very words 'social construction' often provoke heated arguments, but exactly what these words mean or imply is seldom made clear. This course examines philosophical arguments, counterarguments, and empirical case studies associated with constructionism. The main focus is on constructionist approaches in the sociology of knowledge and science & technology studies, but other variants in sociology, psychology, and the humanities are also discussed. The aim is to develop a critical understanding of the arguments, narratives, and concepts that inform and identify these approaches.]

#### S&TS 680 Seminar in Historiographical Approaches to Sciences (also HIST 680)

Spring. 4 credits. P. Dear. For description, see HIST 680.

## [S&TS 681 Philosophy of Science (also PHIL 681)

Spring. 4 credits. Not offered 2002–2003. R. Boyd.

For description, see PHIL 681.]

## [S&TS 682 Topics in the Scientific Revolution (also HIST 682)

Fall. 4 credits. Not offered 2002–2003. P. Dear.

For description, see HIST 682.]

## **[S&TS 692 Politics and the Public Health** Spring, 4 credits. Not offered 2002–2003. E. Toon.

Who is responsible for the public's health? Both now and in the past, the answer to that question has been a source of bitter debate. In the past three centuries, public health has become a contested mix of aims, advocates, and practices: it is simultaneously a field of scientific activity, a vehicle for social reform, and a site of political controversy. This course examines the history of American public health, with an eye to understanding how public health has been defined and how responsibility for the public's health has been apportioned. Course readings and discussions focus on the evolution of this balance of science, reform, and politics in the United States, but include some material on public health in other national and cultural contexts.]

## [S&TS 700 Special Topic 1: Science

**Studies and the Politics of Science** Fall. 4 credits. Prerequisites: S&TS 711 or permission of instructor. Not offered 2002– 2003.

Theoretical developments in science and technology studies have called attention to the contingent and socially embedded character of both knowledge claims and technological systems. Drawing on literature from several disciplines, this seminar explores the consequences of these findings for social and political studies of science. Issues and problems considered include trust and skepticism, political and legal agency, reflexive institutions, relativism and social action, science and norms, and the coproduction of knowledge and social order.]

#### [S&TS 700 Special Topic 2: Technology Transfer Issues

Spring. 4 credits. Not offered 2002-2003. J. Reppy.

The goal of this course is to develop a coherent analytical framework for analyzing technology transfer, using insights from economics, sociology, history, and science and technology studies and to employ that framework to evaluate current policy issues. We study the process of technology transfer in different contexts, ranging from intra-firm and intraindustry to technology transfer between civil and military sectors, and between industrialized countries and LDC's. The readings include a mix of theoretical writings and case studies.]

#### S&TS 700 Special Topic 3: Issues in the Social and Cultural History of Technology

Fall. 4 credits. R. Kline.

This seminar focuses on different issues in the social and cultural history of technology each semester. Typical issues include Gender and Technology, Rethinking Technological Determinism, Was there an Information Revolution?, Consumerism, and the Military and Technology in the United States. The topic for fall 2002 is "Information." Students read and discuss exemplary books and articles on a topic for the first half of the course, then give presentations on their research papers.

#### S&TS 711 Introduction to Science and Technology Studies (also HIST 711) Fall. 4 credits. T. Pinch.

This introductory course provides students with a foundation in the field of science and technology studies. Using classic works as well as contemporary exemplars, seminar participants chart the terrain of this new field. Topics for discussion include, but are not limited to: historiography of science and technology and their relation to social studies of science and technology; laboratory studies; intellectual properties; science and the state; the role of instruments; fieldwork; politics and technical knowledge; philosophy of science; sociological studies of science and technology; and popularization.

#### [S&TS 777 Science, Technology, and the Cold War

Fall. 4 credits. Permission of instructor required for undergraduate students. Not offered 2002–2003. M. Dennis.
This graduate seminar examines the historical transformation wrought in the organization and practice of the physical, biomedical, and environmental sciences since 1945. How did military and federal patronage affect the development of the sciences, the organization of the postwar university, and the armed services? Students read contemporary historical materials as well as primary texts to understand the development of particular institutions, technologies, and individuals. In addition to participation in the weekly discussion, each student prepares a research paper for presentation to the seminar.]

#### **Independent Study**

**S&TS 699 Graduate Independent Study** Fall or spring. 2–4 credits.

Applications and information are available in 275 Clark Hall.

## SCIENCE OF EARTH SYSTEMS

The full faculty of the Department of Earth and Atmospheric Sciences (see page 448) plus the following: W. Brutsaert (civil and environmental engineering); P. Gierasch (astronomy); M. Kelley (electrical engineering); J.-Y. Parlange (agricultural and biological engineering); J. Yavitt (natural resources).

The Science of Earth Systems (SES) is the study of the interactions among the atmosphere, oceans, biosphere, and solid Earth; these dynamic interactions control the global environment. The interdisciplinary, basic science approach of SES incorporates major components of geology, ocean and atmospheric sciences, terrestrial hydrology, biogeochemistry, and ecology into an integrated study of Earth as a complex system. Earth system science presents one of the outstanding intelfectual challenges in modern science and is the primary foundation for the future management of our home planet.

## **The Major**

The major in Science of Earth Systems emphasizes a rigorous, objective study of the Earth and its systems with broad preparation in basic sciences and mathematics, followed by the choice of an area of concentration for study in greater depth. The Science of Earth Systems program seeks to train students in a strong set of fundamental skills that will allow them to approach with quantitative rigor a wide range of questions about the Earth and its environment, and to adapt those skills rapidly to new areas of inquiry as they arise. The major in Science of Earth Systems is by nature interdisciplinary, and involves faculty from the College of Arts and Sciences, the College of Engineering, and the College of Agriculture and Life Sciences. In the College of Arts and Sciences the program is administered by the Department of Earth and Atmospheric Sciences in collaboration with the Departments of Astronomy, and Ecology and Evolutionary Biology.

The SES curriculum begins with a series of courses designed to provide preparation in fundamental science and mathematics necessary for a rigorous study of Earth Systems. This preparation is followed by three SES core courses providing breadth and integration. An additional set of four intermediate to advanced courses is selected to provide depth and a degree of specialization.

Students in the College of Arts and Sciences choosing to pursue the Science of Earth Systems major are required to take the following courses: PHYS 207-208 (or 112-213). CHEM 207-208. BIOSCI 101/103-102/ 104 (or 109-110), and MATH 111-112 (or 121-122, or 190/191-192). Three additional 3-4 credit hour courses in mathematics, physics, chemistry, or biology are required; these additional courses must require one or more of the basic courses listed above as a prerequisite. One of the courses must be either EAS 201 or BIOES 261. Both EAS 201 and BIOES 261 can be chosen. Mathematics at the level of MATH 221 or 293 is strongly recommended for all SES students, and those choosing areas of concentration in Atmospheric Sciences, Environmental Geophysics, or Hydrology should take MATH 222 or 294.

The three required SES core courses include the following:

EAS 331/ASTRO 331 Climate Dynamics EAS 302 Evolution of the Earth System EAS 321/NTRES 321 Introduction to Biogeochemistry

Four additional 3–4 credit classes selected from 300- and 400-level courses, approved for an SES concentration, are required. These courses will ordinarily be organized around one of the SES areas of specialization. Areas of specialization include, but are not limited to, the following: Climate Dynamics, Ocean Science, Environmental Geology, Environmental Biophysics, Biogeochemistry, Soil Science, Ecological Systems, Hydrological Science.

Further information and applications contact Kerry H. Cook, khc6@cornell.edu. Also see the SES web site at **www.eas.cornell.edu** for up-to-date information. Administrative offices are located at 2122 Snee Hall.

# SOCIETY FOR THE HUMANITIES

Dominick LaCapra, Director

Fellows for 2002-2003

Leif Alsheimer (Jonkoping International Business School, Sweden)

Phillip Barrish (University of Texas, Austin)

Dominic Boyer (Cornell Univerity)

**Rebecca Bryant** (National Academy of Education, Turkey)

Christine Cuomo (University of Cincinnati) Catherine Dhavernas (University of Western Ontario)

Peter Gilgen (Cornell University) Davydd Greenwood (Cornell University) Peter Hohendahl (Cornell University) **Peggy Kamuf** (University of Southern California)

Michael Lynch (Cornell University)

Paul Rosenberg (Cornell University)

Deborah Starr (Cornell University)

Jeffrey Williams (University of Missouri)

The Society annually awards fellowships for research in the humanities. The fellows offer, in line with their research, informal seminars intended to be exploratory or interdisciplinary. These seminars are open to graduate students, suitably qualified undergraduates, and interested auditors. Students who want credit for a seminar should formally register in their own college. Persons other than those officially enrolled may attend as visitors with permission of the fellow. The theme for 2002– 2003 is "The Idea of a University."

S HUM 301 Mind and Memory (also ENGL 301, MUSIC 372, FILM 301)

Spring. 4 credits. M W 2:55–4:10. J. Morgenroth.

See FILM 301 for full course description.

S HUM 401 The Future of Universities

Fall. 4 credits. Limited to 15 students. M 2:30–4:25. L. Alsheimer.

This course studies American liberal education, and compares it with general education in Sweden, Germany, Great Britain, and the future of the universities. The course addresses questions like: What should liberal education do? What responsibilities have the universities and colleges for moral well-being, character shaping, ethical, and intellectual development? Is there an increasing demand from students for more substantial allembracing courses as a complement to vocational courses? Will liberal education survive in a time when utility and instant reward is in focus? How can the universities recapture their important task as conveyor of broad and deep general knowledge? Are there a future and a role for the universities, as we know them?

#### S HUM 403 Censorship and the Production of Knowledge (also ANTHR 433)

Spring. 4 credits. Limited to 15 students. M 2:30–4:25. D. Boyer.

This course seeks to productively expand the definition of censorship as ideological interdiction by exploring psychoanalytic and social-theoretical approaches to censorship practices and actions of self-censorship. We are especially interested in the relationship of censorship to the social formation of knowledge and we explore this relationship through case studies of media control, academic peer review processes, and the commodification of knowledge in corporate "knowledge industries."

#### S HUM 404 The University as Locus of National Culture (also ANTHR 434)

Fall. 4 credits. Limited to 15 students. M 12:20–2:15. D. Boyer.

This course focuses on the place of the university as a site for the articulation, negotiation, and dissemination of knowledges of nation. We investigate the university as a public cultural institution and how it both (1) becomes a symbol of the cultural achievement of the nation-state and (2) serves to elaborate and publicize knowledges of national belonging alongside its cultivation of a plurality of specialized fields of knowledge (including critical knowledges of nationhood).

These discussions are grounded historically in a study of the evolution of the modern German research university and its dual role as producer of scientific knowledge and as site for the production of national culture.

#### S HUM 408 Narratives of the University (also ENGL 408/608, COM L 401, HIST 428)

Fall. 4 credits. Limited to 15 students. R 2:30-4:25. J. Williams.

What is the university—this institution in which we find ourselves, and to which we've committed considerable time, money, and effort-for? The typical way to answer this is to look at the tradition of "the idea of the university." In this seminar, we examine some of those key "ideas," from Kant through Newman to Readings. But we also focus on other ideas of the university, as represented in histories of the university, "academic" novels and popular films of "college life," and statements such as media reports and university memoranda, from the eighteenth century to the present.

#### S HUM 410 Social Studies as Science (also S&TS 410)

Fall. 4 credits. Limited to 15 students. R 2:30-4:25. M. Lynch.

Are the social sciences really scientific? Should they even try to be scientific? And, if they can be scientific, what would make them that way? These questions have been debated ever since the 19th century when social science disciplines first became established in modern universities. This seminar examines the emergence of the social sciences and their unsettled place in between the humanities and social sciences. The focus is on sociology, and a series of debates (including some very recent ones) about its prospects as a science, though other fields are also discussed. Weekly seminar discussions cover ideas and debates in social theory, the history and philosophy of social science, and the interdisciplinary field of science and technology studies.

#### S HUM 411 Cosmopolitan Alexandria (also NES 493, COM L 406, JWST 493)

Fall. 4 credits. Limited to 15 students. W 2:30-4:25. D. Starr.

In the first half of the twentieth century the Mediterranean port city of Alexandria supported a multi-lingual, cosmopolitan culture. This course explores the discursive and theoretical potential offered by this unique cosmopolitan space-time, and the literary and artistic legacy it spawned. We discuss works by Aciman, Cavafy, Chahine, Durrell, al-Kharrat, and Tsalas, among others.

#### S HUM 412 Reading Practices of the University (also COM L 407)

Fall. 4 credits. Limited to 15 students. T 2:30-4:25. P. Kamuf.

This course examines ways in which different modes of inquiry in the university conceive of the practice of reading. For this, we look principally at three fields in which reading is taken as a kind of object. We ask first about scientific research on reading, which generally does not problematize the concept of its object, assumed to be self-evident. Then we take up two discourses that do question in some manner the ordinary concepts: the history of reading (a recent subdiscipline of intellectual history), which unsettles many unhistoricized assumptions about reading, and literary studies, where ordinary concepts and practices of reading are routinely shown to be

insufficient. In addition to our concern with concepts of reading that are well represented in the disciplines of the university, we interrogate the general lack of psychoanalytic reflection dealing specifically with reading, in particular with what are called reading disorders. This survey of reading disciplines thus allows us to pose some questions about interdisciplinary research in general. How does the "object" called reading challenge a prevailing model of interdisciplinarity, which tends to preserve or even reinforce the division between scientific and humanistic disciplines? Can this challenge be met, or does reading necessarily define an impossible interdisciplinary object? The readings range widely and include works by Roger Chartier, Paul de Man, Freud, Foucault, Mary Jacobus, Friedrich Kittler, and others.

#### S HUM 416 Culture, Freedom, and the University (also GERST 422, HIST 413)

Spring. 4 credits. Limited to 15 students. T 2:30-4:25. P. Hohendahl.

The seminar addresses the rise and the eventual decline of the classical German research university between 1810 and the present. The concept of the university as a semi-autonomous community based on freedom of teaching and research determined the development of German education during the 19th and the 20th century. The modernization of the German university occurred in close proximity with the emergence of idealism in German philosophy and its emphasis on Bildung. The seminar focuses on the intersection between the innovative idea of the university and the actual development of the institution. Readings are taken from the works of Kant, Fichte, Schleiermacher, Schelling, Nietzsche, Weber, Jaspers, and Habermas.

#### S HUM 418 Moving Beyond the Readymade (also COM L 408)

Spring. 4 credits. Limited to 15 students. M 10:10-12:05. C. Dhavernas.

This seminar proposes to address the work of contemporary painters, writers, and filmmakers who have sought to defy the stronghold of representation as it ordinarily functions in the cultural context of our everyday. The first part of the seminar seeks to provide an understanding of the everyday as readymade by looking at ways in which our relationship to the everyday has undergone a radical transformation in the age of mechanical reproduction (Walter Benjamin); how, for instance, with the advent of photography, specificity has progressively given way to generic ahistorical conformity, to readymade forms of representation (Theodor Adorno, Max Horkheimer, Jean Baudrillard). Our objective is to explore parallels between the mechanisms of representation within photography and historicism (Friedrich Nietzsche) by situating our discussion of representation in relation to current debates of postmodern historiography (F. R. Ankersmit, Saul Friedlander, Dominick LaCapra, Michael Roth, Hayden White). The second part of the seminar explores specific examples of literature (Marguerite Duras), painting (Gerhard Richter), and film (Lars von Trier) which have attempted to break through the recuperating trend of pre-established representational forms in order to open the way for "otherness," "objectivity" and "truth" Our objective is to consider the effectiveness of these artists in challenging current trends of

representation and to evaluate their appropriateness with regards to the cultural context of today

#### S HUM 419 Prestige in American Literary Realism (also AM ST 406, ENGL 419/ 606)

Spring. 4 credits. Limited to 15 students. F 12:20-2:15. P. Barrish.

Turn of the century American literary realism implicitly articulated for its readers new ways to earn social recognition as intelligent or sophisticated individuals. We explore changing (and contested) meanings for acuity, knowledge, wisdom, cultivation, and related terms in works by Charles Chesnutt, William Dean Howells, Henry James, Edith Wharton, Abraham Cahan, Anzia Yezierska, Amerigo Paredes, and other writers.

#### S HUM 420 Humanities and the Modern University (also HIST 487)

Spring. 4 credits. Limited to 15 students. R 2:30-4:25. P. Rosenberg.

The seminar studies conceptions of the place of the humanities in university education from the Renaissance to the present. We examine debates about the content and purpose of a liberal or humanistic education; and place these debates in the context of changing views of the social functions of the university. Readings are in both primary and secondary sources; principally in intellectual history but with occasional forays into social history. Maior topics of the course include Renaissance humanism, the Scientific Revolution, the Enlightenment, the 19th century German universities, the growth of professionalism and academic specialization in 20th century America, and recent debates about postmodernism and the academic canon. All readings are in English.

#### S HUM 421 Reading the Revolution (also GERST 421)

Spring. 4 credits. Limited to 15 students. T 10:10-12:05. P. Gilgen.

The goal of this course is to understand Kant's seemingly loosely constructed argument in The Conflict of the Faculties as a systematic attempt to establish the unity of practical reason. To this end, we examine in detail the discursive repercussions and echoes of the French Revolution in Kant's outline of the university of reason. Of special importance is the theory of the "sign of history," in which the political intentions of the Revolution and the moral orientation of the university of reason intersect. Reading the "sign of history is a foundational moment. Kant understands foundation and revolution as two sides of the same coin; in each case, one must ask: By what right? As Kant recognizes, on this basis no revolution can legitimate itself. However, in reading the "sign of history," a historicalmoral justification can be performed by the distanced spectator. Similarly, the university of utility is converted into a university of reason-precisely by the application of reason to the higher disciplines in a moment between legitimations

### S HUM 423 Anthropology of the University (also ANTHR 423)

Spring. 4 credits. Limited to 15 students. M 12:20-2:15. D. Greenwood.

Turning an anthropological gaze on the contemporary university as a social and cultural system, this seminar involves an examination of the convergences and divergences between the trajectories of the sciences and engineering, the humanities, and

the social sciences in contemporary universities and some international comparisons with the trajectories of universities around the world. The overall aim is to link an ethnographic analysis of the microstructures of departmental differentiation, professional hegemonies, and local financing with the larger-scale processes of transformation of universities' place in society under the pressures of corporativization, globalization, and competition from a host of alternative higher education institutions.

#### S HUM 424 Personhood, Schooling, Society

Spring. 4 credits. Limited to 15 students. W 2:30-4:25. R. Bryant.

This course will examine, historically and ethnographically, the university as a site for negotiating the passage from youth to adulthood. In the West, the university has become the place for the transformation of undifferentiated youth into adults categorized by profession. Hence, the university is the site for socializing adults into specific roles in the world of work. At the same time, the university itself is a liminal space, characterized by its presumed distance from that world of work for which students are preparing themselves. This course will look at the emergence of this particular form of socialization in the West, at its counterparts elsewhere, and at what this form of socialization tells us about forms of personhood in the West.

## SOCIOLOGY

- M. Berezin, M. Brinton, W. Burkard, S. Caldwell, M. Clarkberg, D. Grusky, D. Heckathorn, P. Hedstrom, E. Lawler, C. Leuenberger, M. Macy, P. Moen, S. Morgan, V. Nee, T. Pinch, D. Strang, R. Swedberg,
- S. Szelenyi, S. Tarrow, K. Weeden,
- E. Wethington

Emeritus: D. Hayes, B. C. Rosen, R. M. Williams, Jr.

Sociology is the study of human social organization, institutions, and groups. The Department of Sociology offers courses in a number of key areas, including: comparative sociology, culture, economy and society, family and the life course, gender inequality, political behavior and public policy, organizations, race and ethnicity, social inequality, social psychology and group processes, social and political movements, and social networks. A particular emphasis of the department is the linkage of sociological theory to issues of public concern such as ethnic conflict, drugs, poverty, and gender and race segregation. Interests of faculty members range from the study of interaction in small groups to the study of economic and social change in a number of different countries. The department offers the opportunity for students to develop fundamental theoretical insights and understanding as well as advanced research skills in quantitative and qualitative methods. Graduates of the department take up careers in university, government, and business settings, and enter professions such as law, management, and urban policy.

## **Sociology Courses for Nonmajors**

Sociology provides students with particularly effective ways to understand the complexities of modern life. For many students, the

undergraduate years are a last opportunity to gain the insights these fields have to offer. The Department of Sociology is continuing to design an array of beginning and advanced courses that convey a broad understanding of the methods and insights of sociological analysis-courses that will be of particular interest to undergraduates who may not major in sociology. First- and second-year students should note that the introductory courses (101, 103, 105, 108, and 115) focus on the sociological analysis of major issues of public life, and that a wide selection of general education courses is available at the 200 level. Advanced undergraduates who are majors in other fields should also see, in particular, descriptions of the 300- and 400-level courses, for which there are no prerequisites other than junior or senior status.

## **Related Courses in Other Departments**

Students interested in sociology should consult the course lists of the other social science departments in the College of Arts and Sciences (including Anthropology, Economics, Government, and Psychology) and of the following departments in other colleges: Organizational Behavior (College of Industrial and Labor Relations), Human Development (College of Human Ecology), and Rural Sociology (College of Agriculture and Life Sciences).

## The Sociology Major

The Department of Sociology is one of the social science departments at Cornell with the highest national ranking. Faculty members are internationally recognized for their scholarly work, and have received numerous awards, research fellowships, and research grants.

The sixteen or so professors who are currently in the department are dedicated to scholarly inquiry that is both methodologically rigorous and theoretically innovative. The breadth of their substantive interests and the variety of their methodological styles are well demonstrated in the different fields that are represented within the department. These include: comparative societal analysis, culture, deviance and social control, education, economic sociology, family, gender, inequality, social networks, organizations, political sociology, public policy, race and technology, social movements, and social psychology.

#### **Career Opportunities for Graduates**

An undergraduate degree in sociology is one of the most popular degrees with employers. After engineering and computer science, sociology is the most able to place graduates into jobs immediately after completing their Bachelor's degree. This is not altogether surprising, since sociology can lead to a rewarding career in any of the following fields:

- **government:** urban/regional planning, affirmative action, foreign service, human rights management, personnel management
- research: social research, consumer research, data analysis, market research, survey research, census analysis, systems analysis

- **criminal justice:** corrections, criminology assistance, police work, rehabilitation counseling, criminal investigation, parole management
- **teaching:** public health education, school admissions, college placement
- community affairs: occupational counseling, career counseling, public health administration, hospital administration, public administration, social assistance advocacy, fund-raising, community organizing, social work
- business: advertising, sales, project management, sales representation, market analysis, real estate management, journalism, public relations, insurance, human resource management, production management, labor relations, quality control management

A large number of our majors also go onto graduate school and obtain advanced (i.e., Master's and Ph.D.) degrees in such varied fields as sociology, political science, philosophy, economics, and psychology. Many also complete professional degrees in education, law, medicine, social work, and business administration.

#### **Requirements for the Major**

In addition to the academic requirements established by the College of Arts and Sciences, you must also fulfill requirements towards a specified major. There are 10 courses required in the sociology major. All courses towards the major must be taken for a letter grade and students must maintain at least a 2.0 grade point average while enrolled in the major. The 10 courses required for the major are divided into the following categories:

- Sociology 101
- one additional introductory-level course in sociology (at the 100- or 200-level)
- two research methods courses (SOC 301 and 303)
- one advanced-level sociology course (400-level or higher)
- five additional (i.e., elective) courses in sociology

#### **Declaring the Sociology Major**

If you are a student in the College of Arts and Sciences and wish to declare a major in sociology, it is in your best interest to do so as soon as possible. If you are *not* currently in the College of Arts and Sciences, you need to be admitted to A&S *before* you can declare. In order to declare the sociology major, you need to take the following steps:

- Obtain a campus copy of your transcript from Day Hall and bring it to the department office (316 Uris Hall).
- Make an appointment for advising with the Undergraduate Coordinator, Susan Meyer, or visit her during her office hours (in 316 Uris Hall). During your meeting with her, you will fill out a major declaration form.
- Leave this form and your transcript with the Undergraduate Coordinator. Your declaration will be reviewed by the Director of Undergraduate Studies, Szonja Szelěnyi, and sent on to the College of Arts and Sciences for official notification

that you have declared a major. Please allow two weeks for your declaration to be approved and entered into the campus computer.

A student file will be set up to maintain your records in the department. Once you are officially recognized as a major in sociology, the Sociology Department will receive a copy of your transcript at the end of each semester, which will be kept in your student file at 316 Uris Hall. Your records will be maintained until five years after you graduate.

#### Academic Advising in Sociology

As a student at Cornell, you are ultimately responsible for the policies, procedures, and requirements regarding your degree as stated in the current Courses of Study. After reading this document, you may find that you are still confused or unclear about some of the requirements, and you may have questions and concerns that pertain to your individual situation. Several sources of academic assistance and advice are available to you.

College Adviser: As a sociology major, you are a student in the College of Arts and Sciences. For assistance and advice, College Advisers are available to you by appointment in the Office of Undergraduate Admissions and Academic Advising (Goldwin Smith Hall). It is recommended that you consult with a College Adviser sometime before your last semester to discuss the completion of College requirements, graduation, and residency requirements.

Undergraduate Program Coordinator: The Undergraduate Program Coordinator (Susan Meyer) in the Sociology Department is located in Room 316, Uris Hall. She is available to provide assistance with the following

- the process of declaring the sociology major.
- forms relating to transferring courses from other universities and/or other departments.
- other administrative matters or concerns (e.g., forms, adding and dropping courses).

Director of Undergraduate Studies: The Director of Undergraduate Studies (Szonja Szelenyi) is located in Room 346, Uris Hall. She is there to:

- provide information about departmental curricula and the requirements for the major.
- meet with applicants to the major. .
- review applications for sociology majors and accept students into the program.
- assist students in finding an advisor in the sociology department.
- screen sociology classes taken outside Cornell for acceptance as Cornell credit.
- serve as the backup for faculty advisers who are absent during advising periods.

Faculty Advising: Once you are a declared sociology major, you will be assigned a faculty advisor within the Sociology Department. When you declare sociology as a major, you will be asked to name your preference for an adviser; however, if you are not sufficiently familiar with the program, the Director of Undergraduate Studies can assist you in selecting a faculty member to work with you.

Faculty advisers are there to:

- discuss your education, career goals, and graduate school opportunities.
- meet with you to talk about courses and plan your program of study within the department.
- go over your academic program each semester and provide you with your Personal Identification Number (PIN) so that you can register for courses via the campus computer.

Sociology Peer Advisers: There are approximately 10 advanced sociology majors who serve as peer advisers in the department. These advisers change from year to year, but a complete list of their names and email addresses is available to you from the Undergraduate Program Coordinator in the sociology office (Room 316, Uris Hall). Peer advisers do not provide you with academic counseling; they are there to help you adjust to life in the major, as well as to let you know about the department's many support services and activities.

#### **Research Opportunities**

Qualified sociology majors are invited to participate with faculty members in conducting research. Such projects are usually initiated in one of two ways: the student may offer to assist the faculty member in an ongoing project, or the student may request that the faculty member supervise the execution of a project conceived by the student. In either case, the student should enroll in SOC 491 (Independent Study). Interested students may direct inquiries to any faculty member.

## The Sociology Honors Program

Honors in sociology are awarded for excellence in the major, which includes overall grade point average and completion of an honors thesis. In addition to the regular requirements of the major, candidates for honors must maintain a cumulative grade point average of at least a B+ in all sociology classes, complete at least 2 credits of SOC 491 (in the junior year), complete SOC 495 and SOC 496 (in the senior year), and write an honors thesis.

Students are awarded either honors (cumlaude), high honors (magna cum laude), or highest honors (summa cum laude) in the program based on the honors advisers' evaluation of the level and the quality of the work completed towards the honors degree. The honors distinction will be noted on the student's official transcript and it will also be indicated on the student's diploma.

#### Admission to the Honors Program

To qualify for entrance into the honors program, students must have at least a B grade point average overall and a B+ grade point average in the major. In addition, they must secure the consent of a faculty member in the Sociology Department who will guide their honors thesis.

Students who wish to be considered for honors should apply to the Director of Undergraduate Studies no later than the second term of their junior year. Honors program application forms are available in 316 Uris Hall. The application must include a copy of the student's undergraduate transcript, a

brief description of the proposed research project, and the endorsement of a faculty member in the Sociology Department.

#### The Honors Thesis

During the senior year, each candidate for honors in sociology enrolls in a year-long tutorial (SOC 495 and SOC 496) with the faculty member who has agreed to serve as the student's thesis adviser. During the first term of their senior year, students determine the focus of their honors thesis, and submit a 10- to 15-page overview (or, alternatively, a preliminary draft) of the thesis to their adviser. During the second term, they complete their honors thesis and submit final copies to the department.

The text of the honors thesis may not exceed 60 pages except by permission of the honors adviser. Two copies of the honors thesis are due to the Undergraduate Program Coordinator (316 Uris Hall) during the third or fourth week of April. One of these copies will go to the student's thesis adviser and the other will remain on file in the department.

Any honors candidate whose research directly involves working with human subjects must receive approval for the project from the Cornell University Committee on Human Subjects.

## **Business and Organizational Studies** Concentration

Majors who wish to prepare for postgraduate study in professional schools (business, management, or law) or a career in business or nonprofit organizations may elect to acquire a concentration in Business and Organizational Studies in sociology. This program provides Cornell students with training in economic sociology, organizational studies, and comparative societal analysis, all of which are useful areas of expertise in a world increasingly shaped by economic and social forces of a truly global dimension. In order to complete a concentration in Business and Organizational Studies, students must meet the following requirements:

- complete both of the required core courses in the concentration: SOC 105 and SOC 215, and
- complete four additional courses from the following list: SOC 203, 217, 222, 311, 315, 326/526, 340, 356, 358/558, 370/570, 373, and 427.

Students completing the concentration receive a letter of recommendation from the chair based on their cumulative academic record in the concentration. Please contact Susan Meyer (Undergraduate Program Coordinator), or Szonja Szelenyi (Director of Undergraduate Studies) for additional information on the Business and Organizational Studies concentration.

## **Introductory Courses**

SOC 101 Introduction to Sociology (III) Fall, spring. 3 credits. Fall, W. Burkard; spring, S. Szelenyi.

The purpose of this course is to introduce students to the distinctive features of the sociological perspective, as opposed to psychological, historical, or economic approaches. We do so by first discussing the sociological perspective in the context of small

## groups and face-to-face interaction.

As the course unfolds, we apply the same perspective to progressively larger social groupings, such as peer groups and families, formal organizations, social classes, racial and ethnic groups, and nation states. This approach also provides new insights into such topics as deviance, gender inequality, culture, and lifestyles. Whenever possible, class lectures and discussions illustrate these themes by exploring contemporary social problems and developments, including the rise of Generation X (and Generation Y?), the sources of current racial tensions, and the gender gap in the workplace.

#### [SOC 103 Self and Society (also R SOC 103) (III)

3 credits. Not offered 2002-2003. M. Macy. The course is an introduction to microsociology, focusing on social processes within small groups, including the family. Emphasis is on leadership, conformity, social influence, cooperation and competition, distributive justice, and micro analyses of interaction.]

## SOC 105 Introduction to Economic Sociology (also R SOC 105) (III)

Fall. 3 credits, V. Nee. Modern social thought arose out of attempts to explain the relationship between economic development and the social transformations that gave rise to the contemporary world. Classical theorists from Karl Marx and Max Weber to Karl Polanyi focused their writings on emergent capitalist economies and societies. Contemporary social theorists likewise have sought to understand the interaction between capitalism and the social forces reacting against and emerging from modern economic development. From exchange and rational choice theories to network analysis and institutional theory, a central theme in contemporary social thought has been the relationship between the economy and society, economic action and social structure, and rationality and fundamental social processes. This course provides an introduction to social thought and research seeking to understand and explain the relationship between economy and society in the modern era.

#### SOC 108 Introduction to Social Inequality (III)

Fall. 3 credits. M. Brinton.

This course examines the nature and processes of social and economic inequality in industrial societies. The principal focus is on the contemporary United States, with some comparisons to other industrial societies with different educational and class structures. We examine how social and economic institutions encourage or discourage the use of ascription (i.e. inherited or unchangeable traits) vs. achievement as the basis of rewarding individuals, and we consider how individuals make choices as they face different decision points in their schooling and work. Throughout the course we focus on the varied mechanisms of stratification that sort people into schools and workplaces, and we also consider how to judge the "fairness" of these mechanisms. The readings include theoretical and empirical materials on stratification along race, class, and gender lines, and several book-length ethnographies of workplaces or urban settings.

#### SOC 115 Utopia in Theory and Practice (III)

Spring, 3 credits, D. Strang, People have always sought to imagine and realize a better society, with both inspiring and disastrous results. In this course we discuss the literary utopias of Moore, Morris, and Bellamy, and the dystopias of Huxley, Orwell, and Zamiatin. We also examine real social experiments, including nineteenthcentury intentional communities, twentiethcentury socialisms and religious cults, and modern ecological, political, and millennial movements. Throughout, the emphasis is on two sociological questions: What kinds of social relationships appear as ideal? How can we tell societies that might work from those that cannot?

## **General Education Courses**

#### ISOC 200 Social Problems (also R SOC 200) (())

3 credits. Not offered 2002-2003. T. Hirschl. For course description, see R SOC 200.]

# SOC 202 Population Dynamics (also

**R SOC 201) (III)** Spring. 3 credits. P. Eloundou-Enyeque. For course description, see R SOC 201.

#### [SOC 203 Work and Family (also WOMNS 203) (111)

4 credits. Not offered 2002-2003. Staff. Family life is often portrayed in the popular media as a haven away from the harsh realities of public life, suggesting that work and family constitute separate and distinct spheres. By contrast, many sociologists point out the links between work and family, and how these links have different consequences for men and women. This course highlights the responses of individuals, employers, and governments, both in the United States and internationally, to the dilemmas posed by the interface between work and family.]

#### SOC 206 International Development (also R SOC 205) (III)

Spring. 3 credits. Staff.

For course description, see R SOC 205.

#### SOC 207 Problems in Contemporary Society (III)

Fall. 4 credits. D. Heckathorn. This course examines contemporary social problems, with a focus on their sources in the organization of society. Modern societies are based on three fundamental types of institutions-social norms, hierarchies, and markets. Each is subject to distinctive types of failures resulting in problems that include poverty, prejudice and discrimination, intolerance and hate, alcohol and drug abuse, physical and mental illness, crime and delinquency, and urban problems. In analyzing these problems we emphasize the institutions through which they are created and perpetuated, and the form of institutional change required to address them.

#### SOC 208 Social Inequality (III) Spring. 4 credits. D. Grusky.

This course reviews contemporary approaches to understanding social inequality and the processes by which it comes to be seen as legitimate, natural, or desirable. We address questions of the following kind: What are the major forms of stratification in human history? Are inequality and poverty inevitable? How many social classes are there in advanced industrial societies? Is there a "ruling class?"

Are lifestyles, attitudes, and personalities shaped fundamentally by class membership? Can individuals born into poverty readily escape their class origins and move upward in the class structure? Are social contacts and "luck" important forces in matching individuals to jobs and class positions? What types of social processes serve to maintain and alter racial, ethnic, and gender discrimination in labor markets? Is there an "underclass?" These and other questions are addressed in light of classical and contemporary theory and research.

# [SOC 215 Organizations: An Introduction (III)

4 credits. Not offered 2002-2003. D. Strang.

Organizations provide the context for much of our everyday life, and are important not only in their own right but for their impact on our individual and collective choices. This course introduces the sociological study of organizations, from project teams to multinational corporations. Main issues include socialization and group processes within work settings; management from the perspective of the manager and the managed; the organization as a site of inequality and mobility; organizational decision-making; efforts to modify organizations by reforming bureaucracy and hierarchy; and comparisons across nations.]

## SOC 217 The Sociology of Markets (III)

Spring. 4 credits. M. Brinton. The exchange of goods and services is a central topic in economics, but it has many social dimensions as well. This course examines how economic exchange is affected by the social and cultural contexts within which it occurs. Central themes of the course include: How do patterns of market exchange emerge? What types of social institutions are necessary to make economic exchange predictable and safe? Why do some services cost money in capitalist societies and others do not? How is "market value" determined? We explore these themes through reading studies that compare markets across time as well as across contemporary societies such as the U.S., Japan, China, and Russia.

#### SOC 221 Inequality and Social Science (III)

Spring. 4 credits. Enrollment limited to 20 students. K. Weeden.

What are the promises and limitations of social science as a tool for understanding the sources and consequences of social inequality? This course introduces the underlying logic of social scientific research in the context of contemporary debates about social inequality: e.g., educational testing and tracking, racebased affirmative action, and the roles of intelligence and parental resources in affecting who gets ahead. Its goals are to encourage students to be critical consumers of social scientific data, evidence, and discourse and to develop their own rigorous, informed explanations of social phenomena.

#### SOC 222 Controversies About Inequality (also PAM 222, ECON 222, ILRLE 222, PHIL 222, R SOC 222 and GOVT 222)

Spring. 1-3 credits. D. Grusky. This course introduces students to contemporary debates and controversies about the underlying structure of inequality, the processes by which it is generated and maintained, the mechanisms through which it comes to be viewed as legitimate, natural, or

÷

inevitable, and the forces making for change and stability in inequality regimes. These topics are addressed through readings, class discussion, visiting lectures from distinguished scholars of inequality, and debates staged between faculty who take opposing positions on pressing inequality-relevant issues (e.g., welfare reform, school vouchers, immigration policy, affirmative action). Although this course is required for students in the Inequality Concentration, it is also open to other students who have completed prior coursework relevant to issues of inequality.

# **SOC 246 Drugs and Society (III)** Fall. 4 credits. D. Heckathorn.

The course focuses on drug use and abuse as a social rather than as a medical or psychopathological phenomenon. Specifically, the course deals with the history of drug use and regulatory attempts in the United States and around the world; the relationship between drug use and racism/class conflict; pharmacology and use patterns related to specific drugs; perspectives on the etiology of drug use/ abuse; AIDS prevention and harm reduction interventions; drug-using subcultures; drug policy, drug legislation, and drug enforcement; and the promotion and condemnation of drug activities in the mass media

#### SOC 248 Politics and Culture (III) Spring. 4 credits. M. Berezin.

The course focuses on currently salient themes of nationalism, multi-culturalism and democracy. It explores such questions as: who is a citizen; what is a nation; what is a political institution; and how do bonds of solidarity form in modern civil society. Readings are drawn principally from sociology and where applicable from political science and history. Journalist accounts, films, and web Site research will supplement readings.

# SOC 251 Families and the Life Course (also HD 251) (iii)

Spring. 3 credits. E. Wethington. For course description, see HD 250.

#### SOC 265 Latinos in the U.S. (also LSP 201 and R SOC 265) (III)

Spring. 3 credits (4-credit option available). H. Velez.

This course is an exploration and analysis of the Hispanic experience in the United States. It examines the sociohistorical background and economic, psychological, and political factors that converge to shape a Latino group identity in the United States. Perspectives are suggested and developed for understanding Hispanic migrations, the plight of Latinos in urban and rural areas, and the unique problems faced by the diverse Latino groups. Groups studied include Mexican Americans, Dominicans, Cubans, and Puerto Ricans.

# SOC 293 Inequality, Diversity, and Justice (also CRP 293, GOVT 293, PHIL 193, SOC 293) (III or IV)

Fall. 4 credits. No prerequisites: intended for freshmen and sophomores. R. Miller. An interdisciplinary discussion of the nature and moral significance of social inequality, diversity, and poverty and of the search for just responses to them. How unequal are economic opportunities? What are the causes of poverty? To what extent is greater equality a demand of justice? Are traditional welfare programs an appropriate response to poverty? What special significance have race and gender as sources of inequality? Do they merit special remedies such as affirmative action? How should governments deal with religious

diversity and other differences in ultimate values? For example, should abortion statutes be neutral toward rival views of the importance of potential human life? What are the causes of worldwide inequality? To what extent do people in per-capita rich countries have a duty to help the foreign poor? Moral argument, investigations of social causes, and legal reasoning interact in the search for answers to these questions. To provide these resources, the course is taught by leading faculty researchers in philosophy, political theory, the social sciences, and law

## **Methods and Statistics Courses**

#### **SOC 301 Evaluating Statistical** Evidence (II)

Fall. 4 credits. M. Clarkberg. A first course in statistical evidence in the social sciences, with emphasis on statistical inference and multiple regression models. Theory is supplemented with numerous applications.

## SOC 303 Design and Measurement (III)

Spring. 4 credits. M. Burkard. This course covers the foundations of sociological analysis; issues arising from using humans as data sources; the quality of our primary data; methods of data collection; research designs in wide use and their limitations; and pragmatic considerations in doing research on humans, organizations, communities, and nations.

#### SOC 304 Social Networks and Social Processes (III)

Fall. 4 credits. D. Strang. How do groups self-segregate? What leads fashions to rise and fall? How do rumors spread? How do communities form and police themselves on the Internet? This course examines these kinds of issues through the study of fundamental social processes such as exchange, diffusion, and group formation. We focus on models that can be explored through computer simulation and improved through observation.

## **Intermediate** Courses

# SOC 309 The Sociology of Marriage (also SOC 509) (III)

Spring. 4 credits. M. Clarkberg. Contemporary debate on the nature of the family in the United States often assumes a simplistic decay of the "traditional marriage." This course unpacks the myths and facts that undergird this model. We overview the historical patterns of marriage in the United States, examine data on contemporary union formation and dissolution and the consequences, and explore various theoretical models of marriage and its decline.

#### SOC 311 Group Solidarity (III) Spring. 4 credits. M. Macy

What is the most important group that you belong to? What makes it important? What holds the group together, and how might it fall apart? How does the group recruit new members? Select leaders? Make and enforce rules? Do some members end up doing most of the work while others get a free ride? We explore these questions from an interdisciplinary perspective, drawing on sociobiology, economics, and social psychology, as we apply alternative theories of group solidarity to a series of case studies, such as urban gangs, spiritual communes, the civil rights

movement, pro-life activists, athletic teams, work groups, and college fraternities.

#### SOC 316 Gender Inequality (III) Fall. 4 credits. S. Szelenyi.

This course offers a comprehensive overview of historical and contemporary patterns of gender stratification. The first few weeks are devoted to the examination of different ideas (biological, functionalist, feminist) about gender inequality. The remainder of the course involves both theoretical analyses and empirical investigations of four substantive areas: the historical development of gender stratification, the nature of gender inequality in contemporary societies, cross-national comparison of gender inequality, and strategies for social change. Specific topics include: division of labor between men and women; relationship between social class and gender; dynamics of occupational sex segregation; gender differences in social mobility, socialization, and educational attainment; and racial and cross-national variations in gender inequality. Each section includes examination of key theoretical debates and a survey of recent feminist research that is relevant to those debates.

# SOC 320 Globalization and Inequality (III) Fall. 4 credits. S. Szelenyi.

What is globalization and where is it taking us? The objective of the course is to explore the impact of globalization on patterns of social inequality. We begin the semester by considering what the term "globalization" means. We then explore competing accounts of this world-wide trend (e.g., modernization; world-system; post-modernity) and examine the various ways in which contemporary patterns of globalization are different from historical patterns of industrialism. The second part of the semester takes on theoretical and empirical investigations of the way in which globalization has shaped the international division of labor, the structure of class relationships, gender inequality, racial and ethnic relations, migration, poverty, social networks, and indigenous world cultures.

#### SOC 323 Service Learning (also ILROB 3221

Fall. 4 credits. M. Lounsbury For course description, see ILROB 322.

# SOC 324 Environment and Society (also S&TS 324 and R SOC 324) (III)

Spring. 3 credits. Staff. For course description, see R SOC 324.

# SOC 326 Social Policy (also SOC 526) (III)

Fall. 4 credits. S. Caldwell.

The dramatic growth of the policy research sector as an institutional and intellectual force signals the changing relationship of social science to social policy in the United States. With an eye on that relationship, this course examines the development of social policy in selected areas, among them welfare, poverty, housing, crime, and health. The policy research sector itself-people, values, and institutions-is also surveyed.

## SOC 340 Health, Behavior, and Health Policy (III) Spring. 4 credits. S. Caldwell.

This course examines the social contexts of physical and mental health, illness and medical care; its purpose is to explore the contributions of social science to health promotion and health policy. Topic areas

include: the social context of health, disease and illness; the social organization of health services; use of health services; effectiveness of health service use; health promotion and disease prevention; and national health care policies.

#### SOC 341 Modern European Society and Politics (also GOVT 341) (III)

Spring. 4 credits. S. Tarrow. For course description, see GOVT 341.

## [SOC 352 The Sociology of Contemporary Culture (III)

Spring. 4 credits. C. Leuenberger. This course introduces the rapidly expanding field at the intersection of sociology and cultural studies. It provides an introduction to theoretical debates in cultural studies and to sociological studies of popular culture. We discuss the emergence of the tourist industry, the significance of consumption in modern life, narratives in popular films, the culture of music and art, the use of rhetoric in social life, cultural analyses of science, and the social construction of self, bodies, and identities.]

#### SOC 353 Knowledge and Society (also S&TS 353) (III) Fall. 3 credits. C. Leuenberger.

Fail. 3 credits. C. Leuenberger. This course focuses on the historical evolution of the sociology of knowledge as a theoretical paradigm and an empirical research field. We examine the phenomenological origins of the sociology of knowledge and many of its central texts. We study how it has been applied to such areas as personhood, interaction, religion, identity, and the emotions. We also consider epistemological questions that arise, and cover various theoretical and empirical approaches which have been influenced by the sociology of knowledge such as ethnomethodology, conversation analysis, and the sociology of science and technology.

# SOC 356 Law and Society (also SOC 556) (III)

Fall. 4 credits. W. Burkard.

The phrase "law and society" misleadingly suggests that we are speaking of two discrete entities: 'law' and 'society'. But law is itself part of society, its basic processes are social processes, and it contains within its own internal workings social dimensions worthy of study by the sociologist.

In this course we will examine law in society. The 'classical' sociological models law-those of Marx, Weber and Durkheim are wellrepresented. The works of several significant American and European critical legal theorists-those of the American Legal Realists, the Frankfurt School, Michel Foucalt, Roberto Unger, Duncan Kennedy, and Jurgen Habermas-are also well-represented, not only to facilitate and understanding of the bases for the attacks on the liberal Rule of Law, but also to facilitate an understanding of the relationship between law and politics and the potential for revitalizing the Rule of Law through democracy. The major themes in 'classical' and contemporary legal anthropology, e.g., hegemony v. resistance, rule-centered v. processual v. interpretive paradigms, are reviewed. We also consider the extent to which the various perspectives on law in society have been appropriated internationally.

#### **SOC 357 Schooling and Soclety (III)** Spring. 4 credits. S. Morgan.

After an examination of alternative theories of the development and changing function of educational institutions in society, this course examines explanations for why individuals obtain educational training, how an individual's family background and race affect his or her trajectory through the educational system, and how and why society confers advantages on educated individuals. Following a review of recent empirical research on effective schools, the course concludes with an examination of current policy debates in the United States, focusing primarily on school choice, vouchers, and financial aid for a college education.

#### SOC 370 Careers (also SOC 570) (III) Fall, 4 credits. W. Burkard.

By examining various career paths, we will consider the implications of career as a continuous process or as a sequence of positions. We will explore the differences and similarities among different career paths and lay out the patterns and structures of career formation from a sociological point of view. We will also discuss the settings in which career development takes place, giving some comparative attention to ways of organizing careers in other societies.

## SOC 371 Comparative Social Stratification (also R SOC 370) (III)

Fall. 3 credits. T. Lyson. For course description, see R SOC 370.

#### SOC 375 Classical Theory (III)

Spring. 3 credits. R. Swedberg. The course introduces students to major macro-sociological paradigms and encourages them to participate in "cross-paradigm" debates. The three main theorists of sociology (i.e., Marx, Durkheim, and Weber) are compared with respect to their approaches to the social sciences, their views on human history, their conceptions of capitalist society, and their ideas on social change. The assigned readings focus on the original writings of these theorists, while the lectures provide the requisite socio-historical context.

## **Advanced Courses**

The following courses are intended for advanced undergraduates with substantial preparation, as well as for graduate students in sociology and related disciplines. The normal prerequisite for all 400-level courses is one introductory course plus 301 (or an equivalent statistics course). Students who are not sure whether their background is sufficient for a particular course should consult the professor.

# SOC 408 Qualitative Methods (also SOC 508) (III)

Spring. 4 credits. M. Berezin. This course aims to acquaint students with the practice of non-quantitative research methods. It does not offer a laundry list of techniques, rather it asks students to think about how particular methods are more or less suited to the answering of particular types of research questions. The course is divided into four parts: (1) a general discussion of theory, methods and evidence in social science; (2) a series of readings and exercises on particular methods; (3) an analysis of full-length works to see how they were put together; (4) discussion of student projects.

#### [SOC 427 The Professions: Organization and Control (also ILROB 427) (III)

Fall. 3 credits. Prerequisite: permision of the instructor. Not offered 2002–2003. P. Tolbert.

For course description, see ILROB 427.]

# SOC 437 Social Demography (also R SOC 438) (III)

Fall. 3 credits. D. Gurak. For course description, see R SOC 438.

#### [SOC 457 Health and Social Behavior (also HD 457) (III)

Fall. 3 credits. Prerequisites: HD 250, SOC 101, R SOC 101, or SOC 251 **and** a course in statistics. Letter grades only. Not offered 2002–2003. E. Wethington. For course description, see HD 457.]

### SOC 470 Theories of the Family and the Life Course (also SOC 570) (III)

Spring. 4 credits. M. Clarkberg. This seminar examines theoretical frameworks for understanding the family and the life course. Foci include the dynamics of role transitions and normative role trajectories, linkages across the various domains of individual lives (such as work and family), the interplay of individual and historical times, the social significance of age, and the linkages between individuals and the families and other social contexts they live in. We also briefly consider various methodological challenges associated with putting these theoretical perspectives into practice.

## SOC 491 Independent Study

Fall or spring. 1–4 credits. This is for undergraduates who wish to obtain research experience or to do extensive reading on a special topic. Permission to enroll for independent study will be granted only to students who present an acceptable prospectus and secure the agreement of a faculty member to serve as supervisor for the project throughout the term. Graduate students should enroll in 891–892.

### SOC 495 Honors Research

Fall or spring. 4 credits. Limited to sociology majors in their senior year. Prerequisite: permission of instructor.

**SOC 496 Honors Thesis: Senior Year** Fall or spring. 4 credits. Prerequisite: Sociology 495.

## **Graduate Core Courses**

These courses are primarily for graduate students in sociology but may be taken by other graduate students with permission of the instructor.

#### **SOC 501 Basic Problems in Sociology I** Fall. 4 credits. M. Brinton.

Analysis of theory shaping current sociological research. Examination of several central problems in sociological inquiry provides an occasion for understanding tensions and continuities between classical and contemporary approaches, for indicating the prospects for unifying microsociological and macrosociological orientations, and for developing a critical appreciation of efforts to integrate theory and research.

#### **SOC 502 Basic Problems in Sociology II** Spring, 4 credits. D. Heckathorn.

Continuation of SOC 501. Emphasis is on the logical analysis of theoretical perspectives,

theories, and theoretical research programs shaping current sociological research. The course includes an introduction to basic concepts used in the logical analysis of theories and examines their application to specific theories and theoretical research programs. Theoretical perspectives include functionalism, social exchange, and interactionism

#### SOC 505 Research Methods I: The Logic of Social Inference

Fall. 4 credits. Prerequisite: a first course in statistics and probability. S. Caldwell. This course is an introduction to techniques of social inference. We cover research methods, sources of evidence, model design, and questions of empirical validity.

## SOC 506 Research Methods II

Spring. 4 credits. S. Morgan. This is a course on advanced linear regression analysis in theory and practice. After a review of classical bivariate regression and elementary matrix algebra, the course progresses under the credible assumption that the most important fundamentals of data analysis techniques can be taught in the context of simple multivariate linear models. Accordingly, the course provides a relatively formal treatment of the identification and estimation of single equation OLS and GLS regression models, instrumental variable models, traditional path models, and multiple indicator models. Interspersed with this material, the course addresses complications of regression modeling for the practicing researcher including: missing data problems, measurement error, regression diagnostics, weighting, and inference for surveys. The course concludes with a brief introduction to nonlinear regression, counterfactual models of causality, Bayesian inference, and hierarchical models.

#### SOC 507 Research Methods III

Fall. 4 credits. D. Grusky, D. Strang. Introduction to the general liner model for discrete outcomes. Discussion of principles of estimation, model selection, coefficient interpretation, specification error, and fit assessment. The first half of the course covers logistic regression, probit, log-linear, and latent class models, while the second half of the course covers event history models. Although the statistical theory underlying these models is reviewed, issues of intepretation and estimation typically take precedence. Emphasis is accordingly placed on the analytic issues that arise in writing research papers with models of this kind.

## **Graduate Seminars**

These seminars are primarily for graduate students but may be taken by qualified advanced undergraduates who have permission of the instructor. The seminars offered in each term are determined in part by the interests of students, but it is unlikely that any seminar will be offered more frequently than every other year. The list below indicates seminars that are likely to be offered, but others may be added and some may be deleted. Students should check with the department before each term.

#### [SOC 504 Economy and Family (also SOC 404)

4 credits. Not offered 2002-2003. M. Clarkberg.

For course description, see SOC 404.]

#### SOC 508 Qualitative Methods (also SOC 408)

Spring. 4 credits. M. Berezin. For course description, see SOC 408,

# SOC 509 The Sociology of Marriage (also SOC 309, WOMNS 309, WOMNS 509)

Spring. 4 credits. M. Clarkberg. For course description, see SOC 309.

#### [SOC 510 Seminar on Comparative **Societal Analysis**

3 credits. Open to advanced graduate students throughout the social sciences. with permission of instructor. Not offered 2002-2003. M. Brinton.

This seminar is intended for advanced graduate students interested in comparative methods and research in the social sciences. It is offered in conjunction with the Comparative Societal Analysis program in the Einaudi Center for International Studies. Students enrolled for credit write critiques of papers presented at the seminar by faculty members and other graduate students, and work on their own project. Some weeks are devoted to collective reading and analysis of background work. Students may enroll for more than one semester.]

#### [SOC 518 Social Inequality: Contemporary Theories, Debates, and Models

4 credits. Not offered 2002-2003. D Grusky

This course serves as an introduction to contemporary theories, debates, and models regarding the structure of social classes, the determinants of social mobility, the sources and causes of racial, ethnic, and gender-based inequality, and the putative rise of postmodern forms of stratification. The twofold objective is to both review contemporary theorizing and to identify areas in which new theories, hypotheses, and research agendas might be fruitfully developed.]

### SOC 519 Workshop on Social Inequality

Spring. 4 credits. K. Weeden. This workshop provides a forum for students, faculty, and guest speakers to present and discuss their current research projects related to social inequality.

## SOC 526 Social Policy (also SOC 326)

Fall. 4 credits. S. Caldwell. For course description, see SOC 326.

#### SOC 546 Economic Sociology Spring. 4 credits. R. Swedberg.

This course introduces the field of economic sociology and covers major topics addressed by sociologists studying the intersection of economy and society. We begin with classic statements on economic sociology and then move to the invigoration of the field in recent years, reading works that have been instrumental in this invigoration. Consideration is given to the several variants of "institutionalism" that have informed the sociological study of markets, organizations, and economic exchange.

#### SOC 570 Theories of the Family and the Life Course

Spring. 4 credits. M. Clarkberg. This course provides an analysis of the theoretical approaches informing sociological understandings of the family and the human life course. Approaches include power and exchange models, interactionism, the new home economics, and life course approaches. Emphasis is on understanding the conflict and congruence between existing theoretical frameworks, and on translating theoretical issues into empirical research questions.

#### [SOC 580 Simulating Social Dilemmas (also SOC 480)

4 credits. Not offered 2002-2003. M. Macy. For course description, see SOC 480.]

#### [SOC 590 Special Topics: Research Methods

4 credits. Not offered 2002-2003. M. Macy, D. Strang.

This course covers special topics in the analysis of quantitative and qualitative data. The topics covered vary from year to year, but are typically chosen from such possibilities as: networks, social simulation, Bayesian methods, game theory, qualitative research methods, and laboratory experimentation. In fall 2002 the course will include a one-half semester module on event history analysis. and a one-half semester module on social simulation.]

#### SOC 591 Special Seminars in Sociology

Fall and spring. 2-4 credits. Staff. These graduate seminars are offered irregularly. Topics, credit, and instructors vary from semester to semester. Students should look at the sociology department bulletin board at the beginning of each semester for current offerings.

#### SOC 606–607 Sociology Colloquium

Fall and spring. No credit. Required of all sociology graduate students. Staff. A series of talks representative of current research interests in sociology, given by distinguished visitors and faculty members.

## SOC 608 Proseminar in Sociology

Fall. 1 credit. Enrollment restricted to firstsemester sociology graduate students. Staff. Discussion of the current state of sociology and of the research interests of members of the graduate field; taught by all members of the field.

#### SOC 660 States and Social Movements (also GOVT 660)

Fall. 4 credits. S. Tarrow For course description see GOVT 660.

#### SOC 680 Workshop on Transnational Contention (also GOVT 681)

Fall. 4 credits. S. Tarrow

For course description, see GOVT 681.

#### SOC 691 Independent Study

Fall or spring. 2-4 credits. Prerequisite: graduate status and permission of a faculty member willing to supervise the project. Staff.

For graduates who wish to obtain research experience or to do extensive reading on a special topic. Permission to enroll for independent study will be granted only to students who present an acceptable prospectus and secure the agreement of a faculty member to serve as supervisor for the project throughout the term.

#### [SOC 725 Analysis of Published **Research in Organizational Behavior** (also ILROB 725)

- 3 credits. Not offered 2002-2003. P. Tolbert.
- For course description, see ILR 725.]

#### SOC 891-892 Graduate Research

891, fall; 892, spring. Up to 4 credits each term. Prerequisite: graduate status and permission of a faculty member willing to supervise the project.

SOC 895-896 Thesis Research

895, fall; 896, spring. Up to 6 credits each term. Prerequisite: permission of thesis supervisor.

# SOUTH ASIA PROGRAM

- C. Minkowski, director; A. Basu, K. Basu,
- D. Bor, D. Boucher, L. Derry, M. Farooqi,
- S. Feldman, D. Gold, M. Hatch, R. Herring,
- D. Holmberg, R. Kanbur, M. Katzenstein, V. Kayastha, K. A. R. Kennedy, S. Kuruvilla,
- M. Latham, B. Lust, B. MacDougall,
- M. Majumdar, K. March, K. McGowan,
- S. Mohanty, V. Munasinghe, A. Nussbaum,
- S. Oja, P. Olpadwala, B. Perlus, T. Poleman.
- N. Sethi, D. Sisler, S. Subramanian, J. Toorawa, N. Uphoff, M. Walter, M. Weiss, A. Wilford.

The South Asia Program coordinates research, teaching, and special campus events relating to Bangladesh, India, Pakistan, Nepal, and Sri Lanka. The program faculty include members from a variety of disciplines, including agricultural economics, agricultural engineering, anthropology, architecture, art, city and regional planning, comparative religion, ecology and systematics, economics, English, geology, government, history, history of art, human ecology, industrial and labor relations.

international agriculture, linguistics, literature, and rural sociology. Undergraduates with a special interest in the region may major in Asian Studies with a South Asia concentration, or complete a South Asia concentration with any other major. Graduate students may pursue the M.A. degree in Asian Studies with a concentration in South Asia.

Languages offered are Bengali, Hindi, Nepali, Sinhala, and Sanskrit. Foreign Language and Area Studies scholarships are available to graduate students who are U.S. citizens or permanent residents. Cornell is a member of the American Institutes of Bangladesh, Indian, Pakistan, and Sri Lankan studies. For details on the major, see the Department of Asian Studies listing in this volume. For courses available in South Asian studies, or for further information on research opportunities, direct questions to the South Asia Program Office, 170 Uris Hall.

## SOUTHEAST ASIA PROGRAM

- T. Chaloemtiarana, director; I. Azis, W. Bailey,
- A. Cohn, P. Gellert, M. Hatch. S. Kuruvilla,
- T. Loos, K. McGowan, A. Riedy, L. Ryter,
- J. Siegel, E. Tagliacozzo, K. Taylor,
- L. Williams, J. Wolff, Emeritus: B. Anderson, R. Baker, R. Jones, S. O'Connor, Lecturers:
- N. Jagacinski, T. Tranviet, S. Tun

in Jagachiski, T. Hanviet, S. Tun

Southeast Asia studies at Cornell is included within the framework of the Department of Asian Studies. Seventeen core faculty members in the colleges of Arts and Sciences, Business and the Johnson Graduate School of Management, the School of Industrial and Labor Relations, and Agriculture and Life Sciences participate in an interdisciplinary program of teaching and research on the history, culture, and societies of the region stretching from Burma through the Philippines. Courses are offered in such fields as anthropology, Asian studies, economics, finance, government, history, history of art, labor relations, linguistics, music, and rural sociology. Instruction is also offered in a wide variety of Southeast Asian languages: Burmese, Cambodian (Khmer), Cebuano (Bisayan), Indonesian, Javanese, Tagalog, Thai, and Vietnamese. In addition, faculty from other disciplines also provide area instruction on Southeast Asia. The formal program of study is enriched by a diverse range of extracurricular activities, including an informal weekly brown bag seminar, art exhibits at the Johnson Museum, and concerts of the Gamelan Ensemble. The George McT. Kahin Center for Advanced Research on Southeast Asia is also the site for public lectures as well as publication and outreach activities related to this area. The John M. Echols Collection on Southeast Asia, in Kroch Library, is the most comprehensive collection on this region in America.

Undergraduates may major in Asian Studies with a focus on Southeast Asia and its languages, or they may elect to take a concentration in Southeast Asia studies with any other major by completing 18 credits of course work. Graduate students may work toward an M.A. degree in Southeast Asian studies or pursue a Master of Professional Studies in another school with a concentration in Southeast Asian studies. Ph.D. students specializing in Southeast Asia receive a doctorate in a discipline such as history, history of art, anthropology, government, music, economics, or city and regional planning. Academic Year and Summer Foreign Language and Area Studies scholarships are available to graduate students who are U.S. citizens or permanent residents.

For courses available in Southeast Asian studies and details on the major, see the Department of Asian Studies listing in this volume. Additional information is available on the Internet at: www.einaudi.cornell.edu/ southeastasia. Inquiries for further information should be directed to the program office, 180 Uris Hall, (607) 255-2378 or SEAP@cornell.edu.

## **SPANISH**

See Department of Romance Studies.

## STATISTICAL SCIENCE DEPARTMENT

The university-wide Department of Statistical Science coordinates undergraduate and graduate study in statistics and probability. A list of suitable courses can be found in the section, "Interdisciplinary Centers, Programs, and Studies." in the front of this catalog.

## THEATRE, FILM & DANCE

D. Bathrick (on leave 2002–2003); R. Archer,
S. Berstein, S. Brookhouse, J. Chu, S. Cole,
D. Feldshuh, A. Fogelsanger, (director of the undergraduate program in dance);
D. Fredericksen, (director of the undergraduate program in film); J. E. Gainor, (director of graduate studies); K. Goetz (chair), D. Hall,
E. Intemann, J. Kovar, B. Levitt, P. Lillard,
R. MacPike, B. Milles, J. Morgenroth (on leave fall 2002), M. Rivchin, R. Schneider (on leave 2002–2003), J. Self, B. Suber, A. Van Dyke, (director of undergraduate studies);

Through its courses and production laboratories, the department provides students with a wide range of opportunities in theatre, film, and dance. It also offers majors in each of those areas. These majors educate students in accordance with the general liberal arts ethic of the college. The department encourages academic and studio participation by students from all disciplines.

#### **Theatre Arts Major**

D. Bathrick (on leave 2002–2003), R. Archer, S. Bernstein, S. Brookhouse, S. Cole, D. Feldshuh, J.E. Gainor (director of graduate studies); K. Goetz, chair; D. Hall, E. Intemann, B. Levitt, P. Lillard, R. MacPike, B. Milles, R. Schneider (on leave 2002–2003), A. Van Dyke, (director of undergraduate studies)

The theatre major offers studies in the history of theatre, dramatic theory and criticism, playwriting, acting, directing, design/ technology, and stage management. Students interested in the Theatre Arts major should consult with Alison Van Dyke (Director of Undergraduate Studies, Theatre, Film & Dance).

Coodite

Theatre major requirements

1)	THETR 240 and THETR 241 (two	)
- /	semester introduction to theatre)	8
	<b>THETR 250</b> Introduction to Theat: Design and Technology	re 4
	THETR 280 Introduction to Acting	ς 3
2)	Four laboratory courses distributed as follows:	Credits
	THETR 151 Production Lab I	1-3
	<b>THETR 153, THETR 253,</b> or <b>THETR 353</b> Stage Management Lab I, II, or III	1-3
	<b>THETR 155</b> Rehearsal and Performance or <b>THETR 151</b> in a different area	1–3
	THETR 251 or THETR 351 Production Lab II or III	1-4

## G50 ARTS AND SCIENCES - 2002-2003

3) Four courses in the area of Theatre Studies (see Theatre Studies section of theatre courses) chosen in the following manner:

one course must be at 300 level

one course must be at 400 level

two additional courses at the 300 or above level

one of the four courses must be pretwentieth century.

- 4) Three courses (at least 9 credits) in other Theatre courses chosen in consultation with the faculty adviser. Course taken to qualify for admission to the Advanced Undergraduate Theatre Program (described below) may also be used to fulfill this requirement.
- Courses in which a student receives a grade below "C" cannot be used to fulfill the requirements for a Theatre major.

#### Honors

The Theatre honors program is for majors who have demonstrated exceptional ability in the major and who seek an opportunity to explore branches of their subject not represented in the regular curriculum or to gain experience in original research. To be part of the honors program the student must maintain a GPA of 3.5 in classes for the theatre major and an average of 3.0 in all courses. Students must consult with their advisers in the spring of their junior year in order to enroll in the honors programs.

# The Advanced Undergraduate Theatre Program

The department offers advanced study in directing, playwriting, design/technology, and stage management to students who qualify on the basis of outstanding achievement in course work. Admission to the AUTP is by invitation of the area faculty supervisor and the completion of a recommended "track" of courses or equivalent experience. (For recommended courses of study please see listing of courses at end of departmental listings.) Approval process will include a portfolio review and/or interview. The program provides students with intensive study in theatre as well as the opportunity to collaborate with professional faculty and guest artists.

# Independent Study, Internships and Honors

## THETR 300 Independent Study

Fall, spring, or summer. 1–4 credits. Independent study in theatre, film or dance allows students the opportunity to pursue special interests not treated in regularly scheduled courses. A faculty member, who becomes the student's instructor for the course, must approve the student's program of study and agree to provide continuing supervision of the work. Students must prepare a proposal for independent study which is available in 225 Schwartz Center.

### THETR 485 Undergraduate Internship

Fall, spring, or summer. 1–3 credits. To be eligible to enroll and receive credit for an internship, students must either be majors or be concentrators in the department. Students are responsible for arranging their own internships in consultation with the faculty in their area of choice *prior* to preregistration for the semester in which the internship is planned to take place. To receive credit within this course, the internship must be unpaid. Students must follow the rules and procedures stated in the departmental internship form.

## THETR 495 Honors Research Tutorial

Fall, spring. 4 credits. Limited to Honors students in Theatre, Film and Dance. This course is the first of a two-semester sequence (the second is THETR 496) for seniors engaged in an honors project.

## THETR 496 Honors Research Tutorial

Fall or spring. 4 credits. Limited to Honors students in Theatre, Film and Dance. This course is the second of a two-semester sequence (the first is THETR 495) for students engaged in an honors project.

## **First-Year Writing Seminars**

Consult the John S. Knight Institute brochure for times, instructors, and descriptions.

## **General Survey Courses**

#### THETR 230 Creating Theatre (IV) Spring. 3 credits. Limited to 25 students.

D. Hall and faculty.

An introduction to theatrical production for the nonmajor. Students develop a new critical perspective of the performing arts by examining the creation of theatre onstage and backstage through lectures, demonstrations, discussions with various faculty and staff at the Schwartz Center, and by attending department productions. Some writing is required.

#### THETR 301 Mind and Memory: Exploring Creativity in the Arts and Sciences (also MUSIC 372, S HUM 301, ENGL 301) (IV)

Spring. 4 credits. J. Morgenroth and staff. Creativity is the attribute of the mind than enables us to make new combinations from often-familiar information, to perceive analogies and other linkages in seemingly unlike elements, to seek for synthesis. As is true of all learning, creativity is dependent on memory-a memory that is genetic and collective as well as personal and experimental. This course explores the nature of creativity in science and art, indicating the differing requirements for discovery in the disparate disciplines while demonstrating the commonality that underlies the creative process and binds physicist or mathematician to poet, composer, or visual artist. The course presents lectures by weekly guests from as many disciplines in the arts and sciences as possible, faculty members who discuss the process underlying their research or their work as creative and performing artists. Members of the course are encouraged to enroll in another course or be engaged in an activity (research, artistic production, or performance) in which the insights gained in this class can be applied or tested. In addition, each section engages in a common creative project. To further abet the active participation so necessary to learning, students are asked to keep a journal, one that summarizes their understanding of and response to, the lectures and readings from the required texts. Students are also obliged to attend several public art exhibits or performances and write two papers.

#### [THETR 430 Introduction to Theatre Management

Fall. 4 credits. Limited to 15 students. Not offered 2002–2003. J. E. Gainor. This class is designed to introduce students to the profession of theatre management. The class will be a project-oriented study of components of the field, such as marketing, fundraising, contracts, organizational structures, personnel management, accounting, and box office.]

## **Theatre Studies**

THETR 214 The Comic Road to Wisdom (also COM L 211) (IV) Spring. 4 credits. S. Donatelli.

See COM L 211 for description.

THETR 223 The Comic Theater (also COM L 223 and CLASS 223) # (IV) Fall. 3 credits. J. Rusten.

For description, see CLASS 223.

## THETR 240 Introduction to World Theatre I @# (IV)

Fall. 4 credits. E. Winet.

A survey of practices, literatures, and themes of theatrical performance in Africa, America, Asia, and Europe from antiquity to around 1600. Case studies drawn from ancient Egypt, Greece, Rome, the Near East, and India; medieval/feudal Indonesia, China, Japan, and England up to the age of European colonialism. Issues of masking and identity, storytelling and ritual, stage and society, tradition and modernity. Lecture will be combined with frequent student projects.

#### THETR 241 Introduction to World Theatre II # (IV)

Spring. 4 credits. E Winet.

A survey of world theatrical performance from around 1600 to the present. Case studies drawn from English and French seventeenthcentury theatres; recent traditional theatres of Japan, India, China, and Africa; bourgeois, realistic and avant-garde theatres of Europe and the United States; postmodern and postcolonial theatres of the past half century. Recurring issues of realism and theatricalism, innovation and nostalgia, globalization and marginalization. Lecture will be combined with frequent student projects.

#### [THETR 320 Queer Theatre (also ENGL 352 and WOMNS 320) (IV)

Spring. 4 credits. Limited to 20 students. Not offered 2002–2003. J. E. Gainor. What is Queer Theatre and did it exist before the politicization of Queer Identity? Starting with the Renaissance in England, we examine dramatic, critical, historical, and other writing as we pose questions about spectatorship, visibility and professionalism. Evening film screenings are required.]

## THETR 321 Asian Theatre and Drama IV)

Spring. 4 credits. E. Winet. A survey of the theatres of Asia from antiquity to the present. The course will progress regionally through West, South, Southeast and East Asia with a final unit addressing the modern theatres of Asia as a whole. We will consider performance forms and training methods, dramatic canons, and other scenic elements of Asian theatres with particular attention to the integration of music, dance, enactment, and speech in many Asian genres. We will trace contexts for the development of major traditions and genealogies of influence between Asian performance cultures and between Asia and the West.

#### [THETR 322 Russian Drama and Theatre (also RUSSL 332) (IV)

Spring. 4 credits. Not offered 2002-2003. S. Senderovich.

See RUSSL 322 for description.]

## [THETR 332 Medieval and Renaissance Theatre (also COM L 332) (IV) Spring, 4 credits. Prerequisites: THETR 240

or permission of instructor. Not offered 2002-2003. J. E. Gainor.

Besides the discussion of representative plays from these periods, this class may focus on questions such as the staging of medieval drama, the relation between the church and the community, and the ways in which historians and critics have interpreted the Renaissance, especially in light of class, race, and gender on stage as well as in the audience.]

#### [THETR 333 European Drama 1660-1900: Moliere to Ibsen (also ENGL 335 and COM L 336) (IV)

Spring. 4 credits. Not offered 2002-2003. R Parker

See ENGL 335 for description.]

#### THETR 335 Modern Western Drama, Modern Western Theater: Theory and Practice (also COM L 335, VISST 335) (IV)

Fall. 4 credits. Staff.

A study of drama and the cultural contexts of its performance from the mid-nineteenth century to the mid-twentieth century in Europe and America. We move from symbolism and naturalism through to constructivism, expressionism, dadaism, futurism, surrealism and on to Brecht and Artaud and a few of their more contemporary descendants. Students engage in performance projects as well as text analysis.

#### [THETR 336 American Drama and Theatre (also ENGL 336 and AM ST 334) (IV)

Fall. 4 credits. Limited to 25 students. Prerequisite: permission of instructor. Not offered 2002-2003. J. E. Gainor.

A survey of American theatre from 1900-1960. Emphasis is placed on the relationship among theatre, culture, and history.]

#### [THETR 337 Contemporary American Theatre (also ENGL 337) (IV)

Spring. 4 credits. Limited to 20 students. Not offered 2002-2003. J. E. Gainor. A survey of American drama and theatre post-1960. Particular emphasis will be placed on plays by women and dramatists of color. We explore questions of identity and theatrical responses to contemporary American culture.]

#### [THETR 339 The Avant-Garde: Dead or Alive? (IV)

Spring. 4 credits. Prerequisite: permission of instructor. Limited to 15 students. Not offered 2002-2003. R. Schneider.

This class will explore experimental performance today, with concentration on the performative bases of the European and American Avant-Garde in art and in theater. We engage in the debate about whether the avant garde is "dead" or not, based on contemporary examples. We also explore whether or not there was/is an "avant-garde" in other parts of the world-Africa, Japan, India, and so on. We begin by studying the historical avant-garde, but move quickly to the "neo-avant-garde" and to theories and

practices of theatrical postmodernism and performative installation art. Students make performative/art work as well as engage in text analysis.]

#### THETR 345 The Tragic Theater (also CLASS 345 and COM L 344) (IV)

Spring. 4 credits. Limited to 40 students. F. Ahl.

See CLASS 345 for description.

#### THETR 372 Medieval and Renaissance Drama (also ENGL 372/677) # (IV)

Spring. 4 credits. A. Galloway. See ENGL 372 for description.

#### [THETR 373 English Drama from 1700 to the Present (also ENGL 373) # (IV)

Spring. 4 credits. Not offered 2002-2003. S. McMillin.

See ENGL 373 for description.]

#### [THETR 403 Ritual, Play, Spectacle, Act: Performing Culture (also THETR 603, VISST 403) (IV)

Spring. 4 credits. Not offered 2002-2003. R. Schneider.

Taking a broad spectrum approach to performance, this course includes anthropological texts on ritual and play, sociological texts on performances in everyday life, literary studies texts on "performatives" in speech and writing, folklore studies on parades and reenactments, psychological and philosophical studies on the role of performance in the formation of identity, as well as standard texts of the theater. We consider the distinctions between play, ritual, spectacle, festival, theater, and the "visual" arts. We explore the differences between spectating and witnessing and examine studies on audience behavior. At the base of our inquiry is the broad issue of the role of representational practices within culture and among cultures. If, as Barbara Meverhoff has written, we understand ourselves by showing ourselves to ourselves, what role does "showing" have in construction of the selves we seek to understand? Why is postmodern culture often called the "society of the spectacle" (Debord)? If, as Aristotle claimed, we are mimetic creatures at base, which comes first-representation or reality? Looking closely at the notion of "live" art, we weigh theorists who claim that performance is ephemeral and disappearing against those who claim that performance, such as oral history, is resilient and enduring. Students have the opportunity to do fieldwork, create performative works, and engage in scholarly study.]

# [THETR 405 Operatic Contacts (also S HUM 405, GERST 404, COM L 408) (IV)

Fall. 4 credits. Permission of instructor. Limited to 15 students. Not offered 2002-2003. A. Groos.

See Society for the Humanities for complete description.]

#### [THETR 420 Brecht, Artaud, Mueller, Wilson (also GERST 430 and COM L 430) (IV)

Fall, 4 credits. Not offered 2002-2003. D. Bathrick.

See GERST 430 for description.]

#### [THETR 423/623 Translation for the Theatre (also COM L 446/646) (IV) Spring. 4 credits. Prerequisites: proficiency in language other then English; coursework in dramatic literature, directing, or playwriting. Not offered 2002-2003. J. E. Gainor.

What is involved in the process of translation for the theatre and what makes a translation effective on stage? What should factor into our selection or creation process for theatrical translations? Using a case-study format for the first half of the term, we examine important dramatic texts in their English translations to consider such issues as humor, colloquial language, political and cultural allusion, poetics, and the use of "literal translation". Dramatists considered may include Aristophanes, Moliere, Chekov, and others. We begin with an overview of translation theory and then move into specifically theatrical concerns, especially from directing, playwriting, and dramaturgical perspectives. The second half of the term functions as a writing workshop; each student selects a script and, bearing in mind our theoretical and practical discussions, works towards developing a playable translation as a final project.]

## [THETR 424 Elizabethan and Jacobean

Drama (also ENGL 425) (IV) Fall. 4 credits. Limited to 15 students. Not offered 2002-2003. B. Adams. See ENGL 425 for a complete description.]

#### [THETR 425 Introduction to Dramaturgy and Dramatic Criticism (IV)

4 credits. Prerequisite: THETR 240 and 241, or their equivalents. Limited to 15 students. Not offered 2002-2003. J. E. Gainor.

What is dramaturg? What does a dramaturg do? We examine this position in the theatre in both historical and practical modes. The class is primarily a practicum, involving dramaturgical work on departmental productions, participation with student playwrights on new script development, and practice in the writing of dramatic criticism.]

# THETR 426 Adaptation: Text/

**Theatricality (IV)** Spring, 4 credits. Prerequisite: permission of instructor. B. Milles.

Mounting a script into a show is a process of adaptation from page to stage. But dramas have also been translations of other media. Sondheim's Sunday in the Park with George "adapted" a painting by Seurat. Stringberg's Ghost Sonata "translated" a symphony by Beethoven. Plays can even be adapted into other plays: Cesaire's A Tempest, Paula Vogel's Desdemona A Play about a Handkerchief, Heiner Muller's Hamletmachine. In performance art (where there is often no script) examples abound as well: Can you imagine reenacting Edward Manet's Olympia while someone builds a frame around you? And there are lots of exciting possibilities that arise in adapting across cultures-such as a Kathakali Lear or a Shakespearean Mahabharata. In this class we challenge the boundaries of text to discover the possibilities of performance. We ask: How do we translate inspiration into tangible (or intangible) theatrical imagery? Working in workshop format as actors and writers we explore the process of developing theatre pieces based on a variety of sources.

#### **THETR 429** Seminar in Theatre History: The Provincetown Players and Greenwich Village Culture, 1915-1922 (also AM ST 430.3 Honors Program, ENGL 426) (IV)

Fall. 4 credits. Not offered 2002-2003. J. E. Gainor.

This seminar explores a number of artistic, political, and social movements emanating from Greenwich Village in the 'teens and

'twenties, and explore their impact on the evolution of American drama. The Provincetown Players, the theatre company that first showcased O'Neill, Glaspell, Millay, and other important American writers, is the focus of our analysis. The seminar is designed as a case study in the critical practice of cultural studies.]

#### [THETR 431 Theory of the Theatre and Drama (also COM L 433) # (IV) Fall. 4 credits. Prerequisite: some theatre

history and dramatic literature work at the 300 level or permission of instructor. Not offered 2002–2003. D. Bathrick.

A survey of dramatic theory and theories of theatrical representation from Aristotle to the present.]

## [THETR 433 Dramaturgy: Play and Period (also ENGL 435) (IV)

Fall. 4 credits. Not offered 2002–2003. J. E. Gainor.]

#### [THETR 435 Special Topics: The Victorian and Edwardian Theatre (also ENGL 422) (IV)

(also ENGL 422) (IV) Fall. 4 credits. Limited to 15 students. Prerequisite: permission of instructor. Not offered 2002–2003. J. E. Gainor.

An in-depth exploration of theatre and drama in England from the mid-nineteenth through early twentieth centuries. Topics include melodrama, the social problem play, the popular stage, the conditions of theatrical production, and the impact of European theatre. Representative authors include Robertson, Pinero, Shaw, Wilde, Robins, Galsworthy, and St. John.]

#### THETR 436 The Female Dramatic Tradition (also WOMNS 433) (IV) Spring. 4 credits. Staff.

Is there a "female dramaturgy?" What is the female tradition in the theatre? The course explores these questions through an investigation of texts by women dramatists, including Hrotsvitha, Aphra Behn, and Caryl Churchill, as well as theory by such critics as Sue Ellen Case and Jill Dolan.

#### [THETR 438 East and West German Drama (also GERST 438 and THETR 648) (IV)

4 credits. Not offered 2002–2003. D. Bathrick.

Course covers major historical and textual developments in German theatre from the end of World War II to the present. Leading dramatists from West and East Germany, Switzerland, and Austria (Brecht, Frisch, Durrenmatt, Weiss, Hochhuth, Muller, Braun, Kroetz, Handke, and others) are treated in the light of the political events and aestheticdramaturgical traditions from which they emerge and with which they are taking issue.]

#### THETR 445 Text Analysis for Production: How to Get from the Text onto the Stage (also VISST 445) (IV) Spring, 4 credits, Prerequisite: THETR 281

Spring, 4 credits. Prerequisite: THETR 281 or THETR 250 or THETR 398, or permission of instructor. Limited to 15 students. B. Levitt.

This course examines the play as the central. essential source for production decisions made by the actor, the director, the designer, and the dramaturg. Students "present" their conclusions about the performance of studied texts through project work as either an actor, director, designer, or dramaturg, as well as through two to three papers.

#### THETR 446 Shakespeare in (Con)text (also VISST 446) # (IV)

Fall. 4 credits. Prerequisites: THETR 280 or permission of instructor. B. Levitt.

This course examines how collaboration among stage directors, designers, and actors leads to differing interpretations of the plays. The course focuses on how the texts themselves are blueprints for productions with particular emphasis on the choices available to the actor inherent in the text.

#### THETR 454 American Musical Theatre (also ENGL 454 and MUSIC 490) (IV)

Spring. 4 credits. Prerequisite: ENGL 272 or THETR 240 and 241 and ability to read music at the level of MUSIC 105. S. McMillin.

See ENGL 454 for description.

#### THETR 459 Contemporary British Drama (also ENGL 459) (IV)

Spring. 4 credits. Limited to 15 students. S. McMillin.

See ENGL 459 for a complete description.

#### THETR 472 Sondheim and Musical Theatre (also ENGL 473) (IV)

Fall. 4 credits. S. McMillin. See ENGL 473 for description.

#### [THETR 483 Seminar in Comparative Twentleth-Century Anglophone Drama (also ENGL 483) (IV)

Fall. 4 credits. Some knowledge of classical and avant-garde theories of drama and theatre would be useful, but is not a prerequisite. T. Not offered 2002–2003. B. Jeyifo.

The course explores twentieth-century Anglophone drama in diverse areas of the English-speaking world. Through works of Irish, African, Caribbean, and U.S. playwrights like Friel, Soyinka, Fugard, Walcott, and Shange, the seminar is organized around two principal issues: the use of folk, ritual, vernacular, and carnivalesque performance idioms to transform the received genre of Western literary drama and themes of empire, colony, and postcolony in the making of the modern world.]

#### THETR 580 Problems in Asian Art: Dancing the Stone: Body, Memory, and Architecture (also ART H 580 and ASIAN 580)

Spring. 4 credits. K. McGowan. See ART H 580 for description.

## THETR 600 Proseminar in Theatre

**Studies** Spring. 4 credits. Limited to graduate students.

An introduction to the theory and methods involved in the study of the theatre. Attention focuses on pedogogy and the profession in Part I. Part II explores current scholarly trends.

#### THETR 637 Seminar in Dramatic Theory (also COM L 638)

Fall. 4 credits. Prerequisite: permission of instructor. Staff.

In the past decade, critics have claimed that theatrical interculturalists from rich countries have plundered the traditions of poor countries much as the old colonizers plundered their physical resources. Apologists have countered that interculturalism builds links between parochial theatre cultures. In the first part of this seminar, we will trace the theoretical roots of the interculturalist "apology" of the Western avant-garde (readings may include Voltaire, Goethe, Yeats, Craig, Artaud, and Brecht), and of its "criticism" in postcolonial theory (readings may include Foucault, Fanon, Said, Bhabha, Trinh, Gomez-Pena, Roach, Bharucha). In the second part of this seminar, we will examine case studies of intercultural and postcolonial plays and productions from around the world (including Peter Brook's Mahabharata, and possibly works by Cesaire, Mnouchkine, Barba, Suzuki, Bharucha, Rendra, Zimmerman and Thiyam.)

#### [THETR 648 East and West German Drama: Post-1945 (also THETR 438 and GERST 438)

3 credits. Not offered 2002–2003. D. Bathrick ]

# [THETR 660 Visual Ideology (also COM L

660 and GERST 660) Spring. 4 credits. Not offered 2002–2003. G. Waite

For description, see GERST 660.]

#### [THETR 679 Bertolt Brecht in Context (also GERST 679 and COM L 679)

4 credits. Requirements: seminar paper that will form the basis for an oral presentation for class discussion. Not offered 2002– 2003. D. Bathrick.

See GERST 679 for description.]

#### [THETR 703 Theorizing Film (also ENGL 703 and FRLIT 695)

Fall. 4 credits. Not offered 2002–2003. T. Murray.

See ENGL 703 for description.]

## THETR 710 The Pedagogy of Theatre

Fall. 4 credits. The taking of this class must coincide with the offering of the relevant undergraduate class, with the permission of the instructor. Staff.

This class provides graduate students in the field of theatre an opportunity to work directly with a faculty member to explore pedagogical theory and practice for undergraduate theatre classes in all areas of the curriculum.

## Acting

**THETR 155 Rehearsal and Performance** Fall or spring. 1–2 credits. 1 credit per production experience per semester up to 2 credits per semester. Students must register for the course in the term in which credit is earned. Limited to students who are assigned roles after tryouts at the department's scheduled auditions. Students should add this course only after they have been assigned roles. S-U grades only.

The study, development, and performance of roles in departmental theatre or dance productions or the study and practice of directing as experienced in assisting faculty and guest directors.

### THETR 205 Rehearsal Workshop

Fall or spring. 2 credits. Limited to 30 students. Prerequisites: participation in a particular department production; and by permission. Staff.

This course enables students participating in a particular production to gain expertise and/or knowledge to contribute to that production. The focus of the class depends on the needs of a particular production (history, choreography, textwork, dramaturgy, etc).

## THETR 280 Introduction to Acting (IV)

Fall or spring. 3 credits. Each section is limited to 16 students. Preregistration and registration only through roster in the department office, 225 Schwartz Center. Staff. An introduction to the actor's technique and performance skills, exploring the elements

necessary to begin training as an actor, i.e., observation, concentration, and imagination. Focus is on physical and vocal exercises, improvisation, and text and character. There is required play reading, play attendance, and some scene study.

## THETR 281 Acting I (IV)

Fall or spring. 3 credits. Each section limited to 14 students. Prerequisites: THETR 280 and audition. Registration only through roster in department office, 225 Schwartz Center. 281 is restricted to sophmores and above.

Practical exploration of the actor's craft through exercises in physical and psychological action, improvisation and scene study.

#### THETR 282 Standard American Stage Speech (IV)

Spring. 3 credits. Prerequisites: THETR 280 and permission of instructor. Limited to 10 students. A. Van Dyke.

An introduction to Standard American Stage Speech. We study various regional American accents and Standard American Stage Speech using the International Phonetic Alphabet (IPA) as a way to designate the vowel, diphthong, and consonant sounds of spoken English. The goal of this course is to learn speech for use in performing Shakespeare, Shaw, Checkov, Moliere, etc.

#### [THETR 283 Voice and Speech for Performance (IV)

Fall. 3 credits. Limited to 12 students. Primarily for department majors. Prerequisite: permission of instructor. Not offered 2002–2003. Staff.

Registration only through department roster 225 Schwartz Center. Development of the speaking voice with additional emphasis on dramatic interpretation.]

#### THETR 284 Speech and Dialects for Performance (IV)

Spring. 3 credits. Limited to 10 students. Primarily for department majors. Prerequisites: THETR 281 and permission of instructor. A. Van Dyke.

Development of speech and dialects in dramatic text.

## THETR 287 Summer Acting Workshop

Summer. 3 credits. Limited to 16 students in a section. B. Levitt and staff. An introduction to the processes of acting. Practice in training techniques, rehearsal procedures, and methodology.

#### THETR 380 Acting II (IV)

Fall. 3 credits. Prerequisite: THETR 281 and audition. Limited to 12 students. S. Cole. A continuation of Acting I. Special consideration is given to a physical approach to characterization.

#### THETR 381 Acting III: Advanced Scene Study (IV)

Spring, 3 credits. Prerequisite: THETR 380 and audition. Strong preference given to those who have taken THETR 446. Limited to 10 students. B. Levitt.

This course focuses on advanced problems in for the stage. Monologues and scenes are drawn from Shakespeare and classical sources.

### THETR 385 Advanced Studies in Acting Techniques (IV)

Fall. 3 credits. Prerequisites: THETR 281, audition, and permission of instructor. Limited to 10 students. Topic varies each semester. May be repeated for credit. S. Cole.

#### THETR 387 Movement for the Actor

Fall. 3 credits. Prerequisites: THETR 281 and permission of instructor. Limited to 10 students. B. Milles.

Physical skills for the actor are developed through work with LeCoq-based Neutral Mask corporeal mime, and physical acting techniques.

#### THETR 415 The History of Acting (IV)

Spring. 3 credits. Limited to 10 students. Prerequisites: THETR 380 and permission of instructor. S. Cole.

A study of the art of acting in its historical and cultural context from the Greeks to the early twentieth century, with an emphasis on an analytical understanding of acting methodology in relation to social context. Lectures and film showings, with student papers and presentations required.

## Directing

#### THETR 177 Student Laboratory Theatre Company

Spring. 1-2 credits.

The Student Laboratory Theatre Company is a group of student-actors who earn credit by acting in three scenes directed by students taking THETR 498. Students enrolling in SLTC for credit will earn 1 credit for 2 projects and 2 credits for 3 projects. SLTC also meets with directors once a week.

#### THETR 398 Fundamentals of Directing I (also VISST 398) (IV) Fall. 3 credits. Limited to 9 students.

Fall. 3 credits. Limited to 9 students. Prerequisite: permission of instructor. Special consideration is given to students who have completed THETR 280 or are intending to continue in the area of stage or screen directing. Students should see instructor one year in advance to sign up for course. D. Feldshuh.

Focused, practical exercises teach the student fundamental staging techniques that bring written text to theatrical life. A core objective is to increase the student's awareness of why and how certain stage events communicate effectively to an audience. Each student directs a number of exercises as well as a short scene.

#### THETR 498 Fundamentals of Directing II (IV)

Spring. 4 credits. Enrollment strictly limited. Prerequisite: THETR 280 and 398, and permission of instructor. Special consideration is given to students who have completed THETR 280 or are intending to continue in the area of stage or screen directing. Recommended: THETR 250 and 281. D. Feldshuh.

This course builds on the staging techniques learned in Fundamentals of Directing I. In this course each student directs a series of projects and public presentations focusing on specific directorial challenges.

#### THETR 499 Practicum in Directing

Fall or spring. 1–4 credits. Prerequisites: THETR 240, 250, 280, 398, 498, and permission of instructor. D. Feldshuh.

This course allows the student who has completed the appropriate prerequisites the opportunity to direct a full presentation of theatre in conjunction with a faculty mentor. It may also involve an internship with a prominent director on campus or the opportunity to assistant direct a faculty or guest director.

## Playwriting

#### THETR 348 Playwriting (IV)

Fall. 4 credits. Limited to 12 students. Prerequisite: permission of instructor. B. Milles.

Various approaches and techniques are examined as the student is introduced to the art and craft of dramatic writing. The student is required to read dramatic texts, observe theatre productions and rehearsals, and write. The semester culminates in the completion of a 20- to 30-minute one-act play.

#### [THETR 349 Advanced Playwriting (IV)

Spring, 4 credits. Prerequisite: THETR 348 or permission of instructor. Not offered 2002–2003. Staff.

A continuation of THETR 348, emphasizing advanced techniques and culminating in the completion of a full-length play.]

## [THETR 497 Seminar in Playwriting

1–4 credits. Prerequisite: THETR 348 and 349 and permission of instructor. Not offered 2002–2003. Staff.

This class is an extension of THETR 348 and 349. Students formulate a process for developing a full-length play, which they develop over the course of the semester. The class meetings are made up of discussions about the students' process and creative tactics, and reading of material generated by the playwrights.]

## Design, Technology, and Stage Management

Design

#### THETR 250 Fundamentals of Theatre Design and Technology (IV)

Fall and spring. 4 credits. Not open to firstterm freshmen. Limited to 12 students. Registration only through department roster in 225 Schwartz Center. A minimum of one credit of Production Lab (THETR 151 or 251) is strongly recommended concurrently. K. Goetz, W. Cross, E. Intemann, S. Bernstein.

Lectures, discussion, and project work introduce the principles of designing scenery, costumes, lighting and sound, and the technical process of realizing designs on stage. Students are required to purchase materials, which the instructors will specify (approximate cost, \$50).

## THETR 254 Theatrical Makeup Studio

Spring. 3 credits. Students are required to purchase makeup kits which the instructor will provide (approx. cost \$50) Limited to 10 students. S. Bernstein.

Basic techniques of make-up for the stage including corrective, old age, likeness, and fantasy; use of three-dimensional make-up, wigs and hair pieces.

## THETR 263 CAD Studio for the Theatre

Spring, 3 credits. Limited to 8 students. Prerequisite: permission of instructor. K. Goetz and selected theatre production faculty and staff. Students use commercially available 3-D modeling and rendering software to explore the process of designing scenery and lighting for the live theatre. Vectorworks and Photoshop are the primary applications used. Former theatre experience is helpful but not essential.

## THETR 319 Music, Dance, and Light (also DANCE 319, VISST 319) (IV)

Fall. 3 credits. Attendance at dance concerts and music concerts is required. E. Intemann and A. Fogelsanger.

Artistic values, parameters, and concerns of music (sound design), dance, and lighting design are compared and contrasted, and the combination of design elements is analyzed in contemporary dance. Includes writing in response to readings, audio and video recordings, and performances. Some classes devoted to creating sound, movement, and lighting.

#### THETR 343 Costume History: From Fig Leaf to Vanity (IV)

Fall. 3 credits. Limited to 20 students. S. Bernstein.

Costume History offers an overview of the history of clothing from the first signs of clothing to the early twentieth century. It investigates personal, social, religious, political, and regional reasons for why and how clothing evolved.

### THETR 362 Lighting Design Studio I: Lighting in the Performing Arts (IV)

Fall. 4 credits. Prerequisite: THETR 250 or permission of instructor. Limited to 6 students. E. Intemann.

The theory and practice of lighting design as a medium for artistic expression. This course explores the aesthetic and mechanical aspects of light and their application in the theatre. Artistic style and viewpoint are also covered.

## THETR 364 Scenic Design Studio (IV)

Fall. 3 credits. Limited to 10 students. Prerequisite: THETR 250 and 340 or permission of instructor. Students are required to purchase materials which the instructor will specify (approximate cost: \$50.00). K. Goetz.

An exploration of the process of designing scenery for the live theatre. Projects employ various media to explore dramatic use of architecture, the scenic space, and elements of interior design. Experience in theatre production and graphic skills is helpful but not essential.

## THETR 366 Costume Design Studio (IV)

Spring. 3 credits. Students are required to purchase materials which the instructor will specify (approximate cost: \$50). Limited to 10 students. S. Bernstein.

Design of costumes for the theatre, concentrating on script and character analysis, period research, design elements, figure drawing and rendering skills, and an understanding of production style. May be repeated for credit.

### THETR 368 Sound Design Studio (IV)

Fall. 3 credits. Limited enrollment to 6 students. Prerequisite: THETR 250 or 252 or permission of instructor. Students are required to purchase supplies (approximate cost \$20). W. Cross.

The use of sound as a medium of design for the theatre; research and creation of the theatrical sound score, digital recording and basic audio engineering techniques with projects in post production studio engineering and live recording. Emphasis is on producing viable sound designs for live theatre events.

## THETR 369 Digital Audio Studio (IV)

Spring. 3 credits. Prerequisite: THETR 368. Limited to 6 students. By permission of instructor only. W. Cross.

A project oriented course focusing on current techniques in digital audio recording, editing and processing for theatre, and video production. Students explore Digidesign's Pro Tools multitrack environment, MOTU's Digital Performer including basic MIDI operation and methods of synching audio to video. Some experience with audio recording, music, or video production is helpful but not necessary.

#### THETR 371 Costume Design Studio II (IV)

Fall. 3 credits. Prerequisite: THETR 250 or 366, or permission of instructor. Students are required to purchase materials which the instructor will specify (approx. cost

\$50) Limited to 10 students. S. Bernstein. This course explores unconventional costume designs for theatre and dance. It deals with the special considerations found in many plays and performance pieces, such as the theatricalization of non-human subjects (animals, plants, machines, magical creatures, etc.), the visualization of music, or the support or enhancement of movement. It also covers alternative (some non-western) ways to create character through costume, make-up, masks, and wearable forms of puppetry.

#### THETR 462 Lighting Design Studio II (IV)

Spring. 4 credits. Prerequisite: THETR 362 or permission of instructor. Limited to 6 students. E. Intemann.

This course concentrates on designing lighting for different genres in various venues, developing the lighting designer as a versatile artist. Personal style and artistic commitment are stressed.

## THETR 464 Scene Design Studio II (IV)

Spring. 3 credits. Prerequisite: THETR 364 or permission of instructor. Students are required to purchase materials which the instructor will specify (approximate cost \$50). K. Goetz.

Projects and activities are tailored to the creative and developmental needs of the individual student with emphasis on developing professional standards and practices that would prepare the student for a major design assignment.

## Technology

#### **THETR 252 Technical Production Studio I** Fall. 3 credits. Limited to 6 students.

D. Hall and F. Sellers. Stage Lighting and Sound Technology: the practical aspects of lighting and sound technology including equipment setup, engineering, electrics, organization, recording techniques, and production paperwork are explored through projects, lectures, and class discussions. In addition to twice-weekly class meetings the course requires a laboratory commitment of 50 hours for the semester.

#### THETR 256 Technical Production Studio II

Spring. 3 credits. Limited to 6 students. Students are required to purchase materials, which the instructor will specify (approximate cost \$50.). Prerequisite: THETR 250 or permission of instructor. Additional hands-on time in prop and paint shops required, to be discussed. A. Mansfield. Scene Painting: introduction to the basic techniques of painting scenery, including but not limited to the layout and painting of bricks, marble, stone, and wood grain for the theatre. Individual projects in scene painting and participation on paint crew for productions are included. **Stage Properties**: introduction to the processes of propmaking, including furniture construction and upholstery techniques, use of shop tools and materials, period research, and painting and finishing.

#### THETR 340 Theatrical Drafting and Technical Drawing Studio

Fall. 3 credits. Limited to 6 students. Prerequisite: THETR 250 or permission of instructor. S. Brookhouse.

Implementation of the fundamentals of drafting and technical drawing. Introduction of the concept of an individual style in the approach to drafting for the theatre. Involves a series of projects to familiarize students with the convention and process of visualization and drafting.

#### THETR 352 Themed Entertainment: The Technical Perspective

Fall. 3 credits. Limited to 12 students.

R. Archer. Exploration into the integration of art and

science in today's theme parks and interactive entertainment attractions. Papers, projects, and discussions deal with planning and development aspects of large-scale entertainment projects including architecture, engineering, construction, and attraction installation. Focus is on the specialized entertainment technologies that make these attractions work: audio and lighting design, ride and show control systems, and special effects.

#### THETR 354 Stagecraft Studio

Fall. 3 credits. A minimum of 1 credit of production laboratory (THETR 151 or 251) is strongly recommended concurrently. Prerequisite: THETR 250 or permission of instructor. R. Archer.

An exploration of the techniques and practice of theatre operation, scenic construction, stage mechanics, rigging, painting, and model building.

#### THETR 356 Costume Construction Studio

Spring. 3 credits. A minimum of 1 credit of production laboratory (THETR 151 or 251) is strongly recommended concurrently. Lab fee of \$25 to be paid in class. R. MacPike.

A project/lecture/discussion class in costume research, patterning, cutting, construction, and fitting.

#### THETR 360 Costumes: Special Projects

Fall. 3 credits. Permission of instructor. Lab fee of \$50 to be paid in class. Course may be repeated for credit. R. MacPike.

This course is designed for students who have completed a basic construction class (in THETR or TXA, or other) and are interested in acquiring skills beyond the basic techniques. The objective is to introduce students to areas of costuming that are not taught presently, such as millinery, fabric modification, corsetry, and underpinnings-skills that make a costume student more marketable upon graduation. Areas of focus for each semester may be determined by particular production needs. Along with the pieces constructed, students are asked to research and record their findings.

...

#### **Stage Management**

#### THETR 153 Stage Management Production Laboratory I

Fall and spring. 1–2 credits. May be repeated for credit. Before registering, students must attend an orientation meeting in the Kiplinger Theatre at the Schwartz Center on the first Tuesday of classes. Prerequisite: permission of instructor. P. Lillard.

Practical experience in theatrical production as assistant stage manager for a dance theatre concert or as a stage manager for readings, Black Box lab productions, or S.L.T.C. under the supervision of the faculty production manager. THETR 370 complements this course.

#### THETR 253 Stage Management Laboratory II

Fall and spring. 1–4 credits. May be repeated for credit. Before registering, students must attend an orientation meeting in the Kiplinger Theatre at the Schwartz Center on the first Tuesday of classes. Prerequisite: permission of instructor. P. Lillard.

Practical experience in theatrical production as assistant stage manager for a season production under the supervision of the faculty production manager. THETR 370 complements this course.

#### THETR 353 Stage Management Laboratory III

Fall and spring. 1–4 credits. May be repeated for credit. Before registering, students must attend an orientation meeting in the Kiplinger Theatre at the Schwartz Center on the first Tuesday of classes. Prerequisite: permission of the instructor. P. Lillard.

Practical experience in theatrical production as stage manager for a dance theatre concert or an AUTP production under the supervision of the faculty production manager. THETR 370 complements this course.

#### THETR 370 Stage Management Studio

Fall. 2 credits. Prerequisite: THETR 250 or 280 or permission of instructor. Students are required to purchase materials which the instructor will specify (appoximate cost: \$10). P. Lillard.

Introduction to the concepts and techniques of stage management as they relate to specific areas of production. Development of relevant communication skills and an understanding of the production process as experienced by a working stage manager or assistant stage manager. THETR 153, 253, and 353 complement this course.

#### THETR 453 Stage Management Laboratory IV

Fall and spring. 1–5 credits. May be repeated for credit. Prerequisite: admission to Advanced Undergraduate Theatre Program. P. Lillard.

Practical experience in theatrical production as stage manager for a season production under the supervision of the faculty production manager.

### **Production Laboratories**

## **THETR 151** Production Laboratory I

Fall and spring, 1–3 credits. May be repeated for credit. Orientation meeting on the first Tuesday of classes each semester in the Kiplinger Theatre at the Schwartz Center. P. Lillard, S. Brookhouse, F. Sellers. This course provides practical experiences in theatrical production. Students can work on scenery, costumes, properties, lighting, or stage crew. No prerequisites or experience required.

#### THETR 251 Production Laboratory II

Fall and spring. 1–3 credits. Prerequisite: permission of instructor. May be repeated for credit. Orientation meeting on the first Tuesday of classes each semester in the Kiplinger Theatre at the Schwartz Center. P. Lillard, D. Hall, F. Sellers, R. MacPike.

Practical experience in theatrical production, as a light board operator, sound board operator, sound technician, head dresser or scenery/props special project.

## THETR 351 Production Laboratory III

Fall and spring. 1–3 credits. May be repeated for credit. Prerequisite: permission of instructor. P. Lillard, R. Archer, S. Brookhouse, K. Goetz, D. Hall, E. Intemann, F. Sellers.

Practical experience in theatrical production as a master electrician, assistant technical director, assistant costume shop manager, or assistant to a faculty or guest director or designer.

#### THETR 451 Production Laboratory IV

Fall and spring. 1–4 credits. May be repeated for credit. Prerequisite: admission to Advanced Undergraduate Theatre Program. P. Lillard, R. Archer, S. Brookhouse, K. Goetz, D. Hall,

E. Intemann.

Practical experience in theatrical production, in the position of designer, shop manager, technical director or sound engineer.

# Independent Study, Internships and Honors

#### THETR 300 Independent Study

Summer, fall, or spring. 1–4 credits. Independent Study in the theatre allows students the opportunity to pursue special interests not treated in regularly scheduled courses. A faculty member, who becomes the student's instructor for the course, must approve the student's program of study and agree to provide continuing supervision of the work. Students must prepare a proposal for independent study which is available in 225 Schwartz Center.

#### THETR 485 Undergraduate Internship

Fall, spring, or summer. 1–3 credits. To be eligible to enroll and receive credit for an internship, students must either be majors or be concentrators in the department. Students are responsible for arranging their own internships in consultation with the faculty in their area of choice *prior* to preregistration for the semester in which the internship is planned to take place. To receive credit within this course, the internship must be unpaid. Students must follow the rules and procedures stated in the departmental internship form.

#### THETR 495 Honors Research Tutorial

Fall or spring. 4 credits. Limited to Honors students in Theatre, Film and Dance. This course is the first of a two-semester sequence (the second is THETR 496) for seniors engaged in an honors project.

## THETR 496 Honors Research Tutorial

Fall or spring. 4 credits. Limited to Honors students in Theatre, Film and Dance.

This course is the second of a two-semester sequence (the first is THETR 495) for students engaged in an honors project.

## Film

D. Bathrick (on leave 2002–2003), D. Fredericksen (director of the undergraduate program in film), S. Haenni, M. Rivchin, A. Villarejo

The study of film began in this department in the 1930s and continues to be based here. In the intervening years, however, it has also spread into a significant number of other departments in the College: Africana studies, anthropology, Asian studies, comparative literature, English, German studies, history, psychology, romance studies, and women's studies. This proliferation of courses has been accompanied by a comparable proliferation of perspectives and faculty concerns, e.g., the relationship of national cinemas to national literatures and specific cultures, film's relationships to myth and ideology, the use of film as historical evidence, film's efficacy as a rhetorical medium, and film's contribution to perennial issues in aesthetics, the history of the arts, and studies in cognition. The foundational courses in film production and in the history, theory, and criticism of film as an art are centered in this department.

This richness of courses and perspectives is matched by the ways in which students may make film the focus of their undergraduate studies. The three ways currently being used are as follows: (1) majoring in film within the Department of Theatre, Film & Dance; (2) constructing an individually tailored Independent Major in film (including the possibility of placing film in tandem with another medium or discipline); and (3) focusing on film as a College Scholar. Students interested in options 2 or 3 should consult Don Fredericksen (Theatre, Film & Dance) and Ken Gabard (director of the College Scholar Program or Lynne Abel (director of the Independent Major program). Students interested in the first option should consult Don Fredericksen (director of the undergraduate program in film). In addition, students should be aware that the College has recently approved a fivecourse concentration in visual studies, which can be taken independently of, or in conjunction with, a major in film. Students interested in the visual studies concentration should contact Brett deBary, Asian Studies, its director.

#### Film Major Requirements

The department's film major requires a total of 50 credits in film and related courses. Students should note that a number of film courses including two required "core" courses: (FILM 375 and 376)-are offered in alternating years. This means that students cannot fulfill the requirements for the major in less than two years, and that they should plan accordingly, in consultation with their major adviser. In particular, students must plan to be in residence at Cornell during both their junior and senior year fall semesters in order to take FILM 375 and 376. Within the "core" required courses, FILM 274, Introduction to Film Analysis, should be taken during the sophomore year. Please note: beginning fall 2002 prospective majors must earn a grade of B- or higher in FILM 274 to be accepted into the major. Students may not

#### enter the major until they have completed FILM 274 in the fall semester of their sophomore year.

Majors wishing to use the production courses in a substantial manner must plan carefully and work within certain limits. These courses are: FILM 277, 377, 383, 477, 478, 493. Enrollment in each of these courses is limited by the nature of the work and by facilities. Enrollment in FILM 477, 478, and 493 depends on the quality of previous work in FILM 27 377, and/or 383; enrollment is not guaranteed. Majors without a strong interest in production can complete the production requirement with one course: FILM 277. Majors with a strong interest in production should begin instead with FILM 377, after they have taken FILM 274 in their sophomore year. The total credits in production courses cannot exceed 20 hours; this limit is strictly enforced.

1. A core of four film courses:

**FILM 274** Introduction to Film Analysis (offered every fall semester)

FILM 375 History and Theory of Commercial Narrative Film (offered alternate fall semesters; offered 2002–2003) (prerequisite for film majors: FILM 274)]

**[FILM 376** History and Theory of Documentary and Experimental Film (offered alternate fall semesters; not offered 2002–2003) (prerequisite for Film majors: FILM 274)]

**FILM 277** Video Production I (offered alternate spring semesters, and some summers; next offered spring 2003)

#### OR

**FILM 377** Fundamentals of 16mm Filmmaking (offered three semesters in every four; offered fall 2002 and 2003, and spring 2004)

2. One of the following theatre courses:

**THETR 250** Fundamentals of Theatre Design/Technology (offered every semester)

**THETR 280** Introduction to Acting (offered every semester)

**THETR 398** Directing I (prerequisite: permission) (offered every fall semester)

 Four courses (15–16 credits) in film offered by Theatre, Film & Dance as below, or (with consent of advisor) by other departments:

[FILM 264 Interpreting Hitchcock (Not offered 2002–2003; next offered spring 2004)]

**FILM 277** Video Production I (offered spring 2003 and spring 2005)

FILM 291 Filming Other Cultures (TBA)

[FILM 341 French Film (not offered 2002–2003; next offered 2003–2004)]

FILM 342 The Cinema and the American City

[FILM 369 Fast Talking Dames (not offered fall 2002; next offered fall 2003)] [FILM 378 Soviet Film of 20s and French Film of 60s (offered occasionally; not offered spring 2002–2003)]

**[FILM 379** Modern Documentary Film (offered alternate spring semesters; not offered spring 2003; next offered spring 2004)]

FILM 383 Screenwriting (offered every spring semester)

**FILM 386** Third Cinema (offered alternate years; offered spring 2003)

**FILM 391** Media Arts Studio I (tentatively scheduled for fall 2002 or spring 2003)

**[FILM 395** Video: Art, Theory, Politics (offered occasionally; next tentative offering 2004–2005)]

[FILM 396 German Film (offered occasionally; not offered 2002–2003)]

AS&RC 435 African Cinema offered fall 2002

[FILM 450 Rescreening the Holocaust (offered occasionally; next offered fall 2003)]

**FILM 455** History of Modern Polish Cinema (offered alternate spring semesters; offered spring semester 2003)

[**FILM 473** Film and Spiritual Questions (offered alternate spring semesters; not offered spring 2003; next offered spring 2004)]

**FILM 474** Jung, Film, and the Process of Self-Knowledge (offered alternate spring semesters; offered spring 2003)

FILM 475 Seminar in the Cinema I (offered every fall semester; topic varies; may be repeated for credit; topic for fall 2002: Cognitive Film Theory

**FILM 476** Seminar in the Cinema II (offered occasionally; offered spring 2003; topic varies; may be repeated for credit; topic for spring 2003: American Melodrama and Film

**[FILM 477** Intermediate Film and Video Projects: Documentary and Experimental Workshop (offered alternate years; Not offered 2002–2003; next offered fall 2003)]

**FILM 478** Intermediate Film and Video Projects: Narrative Workshop (offered alternate years; offered fall 2002)

**FILM 493** Advanced Film and Video Projects (offered spring 2003)

4. 15 credits of related coursework inside or outside the Department of Theatre, Film & Dance (as approved by the major adviser). The courses chosen to fulfill this requirement should reinforce the major's particular interest in film, and will not necessarily be film courses *per se*. For example, a student interested in the psychology of film, or in ethnographic film, or in film *vis-a-vis* intellectual or social history, will be encouraged to choose "related course work" in those areas.

- 5. Starting fall 2002 students must earn at least a B- in FILM 274 in order to enter the major. In all subsequent courses used for the major a grade of C (not C-) must be achieved. Courses in which these minimums are not achieved must be repeated if they are to receive credit in the major.
- 6. Course work in production cannot exceed 20 credit hours.

## Honors

- Students who have maintained a GPA of 3.5 in their film major courses, and an average of 3.0 in all courses, may elect to work for honors in film during their senior year. They must
- consult with their adviser in the spring of their junior year about the honors program in film. Honors projects are possible in filmmaking, screen writing, and film analysis (history, criticism, theory).

## The Advanced Undergraduate Filmmaking Program

- The department offers advanced study in filmmaking to students who qualify on the basis of outstanding achievement in film studies and film production courses. Acceptance to the
- AUFP and admission to the advanced film production course (FILM 493) will be determined by a committee of film faculty in December of each year, based on applications from students who have a proposal (script or treatment) for a film or video project. Up to four such students will also be selected to receive the Melville Shavelson Award to help fund their advanced film projects.

## **Film Study Abroad**

The College of Arts and Sciences, through this department and in consort with a number of other American colleges and universities, offers up to a full year of study at the Paris Center for Critical Studies. The center's film program is theoretical, critical, and historical. It is most useful to students whose major interest is in the academic study of film and serves as an intensive supplement to Cornell's film courses. Fluency in French is required. FILM 274 and 375 are prerequisites. Inquiries should be addressed to Professor Fredericksen, Cornell's liaison with the center.

Film majors may also complement their Cornell film studies with work in the Intermediate and Advanced Film and Television Programs of the British American Film in London. Direct inquires to Professor Fredericksen.

## [FILM 264 Interpreting Hitchcock (also ENGL 263) (IV)

Spring. 4 credits. Limited to 20 students. Not offered 2002–2003; next offered spring 2004. L. Bogel.

See ENGL 263 for complete description.]

#### FILM 274 Introduction to Film Analysis: Meaning and Value (also FILM 674) (IV)

Fall. 4 credits. Limited to 40 students. Graduate students should enroll in FILM 674. D. Fredericksen.

An intensive consideration of the ways films generate meaning and of the ways we attribute meaning and value to films. Discussion ranges over commercial narrative, documentary, and personal film modes. Prospective film majors should enroll in their sophomore year.

65

#### FILM 277 Video Production I

Spring. 3 credits. Offered alternate years and occasionally in summer. Limited to 12 students. Permission of instructor. Open to sophomores, juniors, and seniors. Offered spring 2003. M. Rivchin.

A hands-on, beginning video production course using Super-VHS cameras and editing equipment. Students learn camera, lighting, sound recording, editing, and digital effects through a series of technical exercises Students develop two short, original video projects to be shown publicly at the end of the semester. A \$100 equipment maintenance fee per student is collected in class. Cost for videotape approximately \$50-100.

#### FILM 291 Filming Other Cultures (also FILM 691 and ANTHR 291/691) @ (III or IV)

TBA. 4 credits. Limited to 20 students, with preference given to those who have taken either ANTHR 102 or FILM 274. Fee for screening and maintenance, \$35. TBA. For description, see ANTHR 291

#### [FILM 329 Political Theory and Cinema (also GERST 330, COM L 330 and GOVT 370) (III or IV)

Fall. 4 credits. Not offered 2002-2003. G. Waite.

For description, see GERST 330.]

#### [FILM 341 French Film (also FRLIT 336) (IV)

Spring, 4 credits. Offered occasionally; not offered 2002-2003. T. Murray. For description, see FRLIT 336.]

#### FILM 342 The Cinema and the American City (also AM ST 309) (IV)

Spring. 4 credits. S. Haenni. See AM ST 309 for description.

#### (FILM 369 Fast-Talking Dames: Hollywood Comedy (also ENGL 369) (IV)

Fall. 4 credits. Not offered 2002-2003; next offered fall 2003. L. Bogel. See ENGL 369 for complete description.]

#### FILM 375 History and Theory of the **Commercial Narrative Film (also** VISST 375) (IV)

Fall. 4 credits. Fee for screening expenses, \$10 (paid in class). Prerequisite for film majors FILM 274. Offered alternate years; offered fall 2002 and fall 2004. A. Villarejo.

Consideration of the broad patterns of narration in the history of the commercial narrative film. Emphases are placed on the early articulation of a cinematic means of narration, realism as an artistic style, the nature and functions of popular film, and the modes of modernist and post-modernist "art cinema" narration.

## [FILM 376 History and Theory of Documentary and Experimental Film (also VISST 376) (IV)

Fall. 4 credits. Fee for screening expenses, \$10 (paid in class). Prerequisite: FILM 274 is strongly recommended, but not required. Offered alternate years; next

offered fall 2003 and fall 2005. A. Villarejo. Covers first the history and theory of documentary film up to the end of World War II. Second we cover the history and theory of the experimental and personal film forms in Europe and the United States.]

# FILM 377 Fundamentals of 16mm

Filmmaking (IV) Fall and spring. 4 credits. Limited to 12 students. Intended for juniors and seniors (who may need to sign up a year or more in advance) with priority given to film majors. Prerequisite: FILM 274 (or higherlevel film studies course) and permission of instructor. Equipment fee, \$100 (paid in class). The average cost to each student for materials and processing is \$400. Offered fall 2002, fall 2003, and spring 2004. M. Rivchin.

A hands-on course in the basics of 16mm filmmaking techniques and digital editing, requiring no prior production experience, emphasizing creative development of filmic ideas through critical discussion. Students may explore narrative, experimental, documentary, animation, and abstract genres, producing short exercises and a final sound film project (8-12 minutes) to be screened publicly.

#### [FILM 378 Soviet Film of the 1920s and French Film of the 1960s (IV)

Spring. 4 credits. Fee for screening expenses, \$10 (paid in class). Prerequisite: FILM 375 is strongly recommended, but not required. Offered occasionally; Not offered 2002-2003. D. Fredericksen. An intensive treatment of two distinct periods of radical innovation in film theory and history. Emphasis is on the animated relationship between theory and filmmaking during these two decades. Major figures include Eisenstein, Pudovkin, Vertov, Kuleshov, Dovzhenko, and Room, in the

Soviet 1920s; Godard, Truffaut, Resnais, Rohmer, Tati, Rouch, Bresson, and Bazin in the French 1960s.]

#### **(FILM 379 Modern Documentary** Film (IV)

Spring. 4 credits. Prerequisite: FILM 376 is strongly recommended but not required. Fee for screening expenses. \$10 (paid in class). Offered alternate spring semesters;

next offered spring 2004. D. Fredericksen. An intensive consideration of canonical documentary films from 1945 to the present. Emphases are on the documentary film as an artistic form with a distinct history and set of theoretical questions, as a sociopolitical force, as an ethnographic medium within and without a filmmaker's culture, and as a televised medium of persuasion and expression.l

#### FILM 383 Screenwriting (IV)

Spring. 3 credits. Prerequisites: FILM 274 and 377, or permission of instructor. Limited to 12 students. Staff Exercises in various genres of screenwriting.

Note: this class is an intensive writing course that demands a great deal of outside work.

#### FILM 386 Third Cinema (also LSP 386, VISST 386) (IV)

Spring. 4 credits. Prerequisite: previous course in film history or analysis helpful, though not mandatory. Offered alternate years; offered spring 2003. A. Villarejo. This course explores postcolonial film and video through the rubric of "third cinema." We investigate the diverse historical, national, political, and generic commitments of films from Africa, South Asia, Latin America, the United States and the United Kingdom (Sembene, Ray, Brocka, etc.). Readings in film and postcolonial theory guide our critical analyses of the films.

#### FILM 391 Media Arts Studio I (also ART 391. MUSIC 391. VISST 391) (IV)

Fall or spring (tentative). 3 credits. Prerequisite: permission of instructor and junior-level standing required, minimum FILM 377 or 277, or dance studio courses. \$50 equipment fee (to be paid in class). Participating faculty include: M. Rivchin, FILM; M. Lyons, ART; D. Borden, MUSIC. A collaborative interdisciplinary studio course in a variety of digital and electronic media, including art, architecture, music, dance, film, and video. Group projects and discussions also investigate the artistic and interactive potential of a high-speed intranet connecting arts spaces on campus, by creating virtual and performative events.

# [FILM 395 Video: Art, Theory, Politics (also ENGL 395) (IV)

Fall. 4 credits. Offered occasionally; not offered 2002-2003. T. Murray. For description, see ENGL 395.]

#### [FILM 396 German Film (also COM L 396 and GERST 396) (IV)

Spring. 4 credits. Requirements: participation in class discussion, one paper, midterm, and final. Offered occasionally: not offered 2002-2003. D. Bathrick.

This course explores German film from the Weimar and Nazi periods to the present in relation to the cultural and sociopolitical context of which it was a part. Readings and lectures are devoted to formal and cultural developments historically as well as interpretive analysis of selected individual films.]

#### [FILM 450 Rescreening the Holocaust (also COM L 453 and GERST 449) (IV)

Spring. 4 credits. Offered alternate years; not offered 2002-2003; next offered fall 2003. D. Bathrick.

Rescreening the Holocaust offers a survey of the major films dealing with the Holocaust beginning with Night and Fog (1955) and including such films as Holocaust, Schindler's List, Shoah, Life is Beautiful, Sophie's Choice, Jacob the Liar, The Diary of Anne Frank, Kapo, My Mothers Courage, and others. The course focuses on major issues of debate around the possibilities and limits of representing the Holocaust cinematically as well as questions more specifically concerning commercialization, fictionalization, trivialization, documentation, visualization, and narrativization in the making and distributing of films about this event. What are the concerns that have arisen over the years concerning the dangers of aestheticizing the Holocaust in works of literature and the visual arts? Is it possible to employ a comedic narrative to deal with such a topic, and, if so, what are the benefits or potential problems of such an approach? Is the very treatment of such a topic within the framework of the Hollywood entertainment industry itself a violation of respect for those who perished? The title of the course suggests a methodological approach which emphasizes the notion that screenings of the Holocaust are at the same time often re-screenings, to the extent that they are built on, presuppose, or even explicitly cite or take issue with earlier cinematic renderings.]

#### FILM 455 History of Modern Polish Film (IV)

Spring, 4 credits. Prerequisite: some previous film analysis coursework. Offered alternate years; next offered spring 2003. D. Fredericksen.

Analysis of Polish film from 1945 to the present, within the context of Poland's postwar history. Topics include the period of socialist realism, the so-called "Polish School" (1956-1962), the cinema of moral anxiety, Solidarity cinema, and the Polish documentary tradition. Key directors to be considered include Ford, Wadja, Munk, Polanski, Skolimowski, Zanussi, Falk, Piwowski, Bugajski, Krzystek, Kijowski, Zaorski, Kieslowski, and Lozinski. Some attention is given to the development of Polish film theory. The extra-filmic context is set by such works as Norman Davies Heart of Europe, Czeslaw Milosz' The Captive Mind, and Eva Hoffman's Exit into History.

#### [FILM 473 Film and Spiritual Questions (also RELST 473) (IV)

Spring. 4 credits. Limited to 20 students. Offered alternate spring semesters; next offered spring 2004. D. Fredericksen. The use of film as a medium for the expression of spiritual questions has a long and rich history, although little attention is given to this fact in contemporary film studies. This seminar examines films and writings by filmmakers who are so inclined, including Baillie, Gardner, Bergman, Dreyer, Bresson, Godard, Scorsese, Brakhage, Belson, Whitney, Rouquier, Newby, Kubrick, and Bae Yong-Kyun. Special attention is given to the work of Andrey Tarkovsky, the Russian film director and theorist. Readings include Tarkovsky's Sculpting in Time, Grof's The Cosmic Game, Eliade's The Sacred and the Profane, Edinger's The Christian Archetype, Schrader's Transcendental Style in Film, and Warren and Locke's Women and the Sacred in Film.]

#### FILM 474 Jung, Film, and the Process of Self-Knowledge (also College Scholar Seminar) (IV)

Spring. 4 credits. Limited to 20 students. Offered alternate spring semesters; offered spring 2003. D. Fredericksen.

"Know thyself" is one of the oldest and most enduring imperatives of the human spirit, and the raison d'etre for liberal studies. This seminar traces in some detail the Jungian approach to this imperative and then tests its critical capacities with respect to films by Fellini (8 1/2), Bergman (Persona), and Roeg (Walkabout). Readings include Jung's Memories, Dreams, Reflections, Two Essays in Analytical Psychology, Archetypes and the Collective Unconscious, and Murray Stein's In Midlife.

#### FILM 475 Seminar in Cinema I (also VISST 475) (IV)

Fall. 4 credits. Limited to 20 students. Recommended: FILM 274 or 375, or work in cognitive studies. D. Fredericksen.

Topic for fall 2002: An intensive study of Danish cognitivist Torben Grodal's *Moving Pictures; A New Theory of Film Genres, Feelings and Cognition,* with additional reading from Dutch cognitivist Ed Tan. Topics include: fiction and symbolic simulation, brain processes and narration, analogue communication, cognitive identification, subjectivity and causality, cognitivist typologies of genre, metaframes as emotional filters, and melodrama and autonomic response.

#### FILM 476 Seminar In the Cinema II: American Melodrama and Film (also AM ST 476) (IV)

Spring. 4 credits. Limited to 20 students. S. Haenni.

Melodrama has been understood as a "mode of excess," of overwrought emotion, moral

polarization, and sensationalism. This course examines how and to what purposes melodrama has been used in the U.S. context. How does melodrama allow us to understand the nation? How does it address questions of social justice? How does it use tropes of paranoia, victimization, and entrapment? We look at film melodrama's generic features, its inheritance from 19th century stage melodrama, melodrama as a form in silent cinema, Depression melodrama, the social problem film, racial melodrama, and melodrama's particular relation to the women's film. Screenings include films by Griffith, Vidor, Cukor, Hitchcock, Ophuls, and Sirk.

#### [FILM 477 Intermediate Film and Video Projects: Documentary and Experimental Workshop (IV)

Fall. 4 credits. Limited to 8 students. Prerequisites: FILM 377 or 277 as minimum production; preference given to those who have taken FILM 376 (History and Theory of Documentary and Experimental Film), 379 (Modern Documentary Film), 386 (Third Cinema), or 291/691 (Filming Other Cultures); and permission of instructor based on project proposals. Equipment fee: \$100 (paid in class). Film projects costs: \$300–1,000; video \$100–200. Not offered 2002–2003; next offered fall 2003. M. Rivchin.

An intensive course in 16mm filmmaking and digital video in which each student develops a significant documentary or experimental project both critically and creatively. Readings, discussions, and exercises are designed to increase the student's knowledge and practice of: cinematography, lighting, sync-sound filming, and editing techniques; working with labs and sound houses; digital video camera; and both analog and nonlinear (AVID) digital editing.]

#### FILM 478 Intermediate Film and Video Projects: Narrative and Experimental Workshop (also VISST 478) (IV)

Fall. 4 credits. Limited to 8 students. Prerequisites: FILM 377 or 277 as minimum production; and FILM 383 (Screenwriting) or THETR 398 (Directing I), and permission of instructor based on proposals. Equipment fee: \$100 (paid in class). Film projects costs: \$500–1,500; video \$100–200. M. Rivchin.

An intensive course in 16mm filmmaking and digital video in which each student develops a significant, original narrative script project which he or she then directs, shoots in crews, and edits. Student may opt for narrative documentary or experimental work as well. Readings, discussions, and exercises are designed to increase the student's knowledge and practice of: directing; cinematography, lighting, sync-sound filming, and editing techniques; working with labs and sound houses; digital video camera; and nonlinear (AVID and final Cut Pro) editing.

## FILM 493 Advanced Film and Video

**Projects (also VISST 493) (IV)** Spring. 4 credits. Limited to 6–8 students. Prerequisite: minimum FILM 377 or 277, preference to those who have taken 477 or 478, recommended: FILM 383 (Screenwriting) and THETR 398 (Directing I). Equipment fee: \$100. Project costs: \$500–2000, unless group project is funded by the Melville Shavelson fund. M. Rivchin.

by the Melville Shavelson fund. M. Rivchin This is a third-level film production course in which the entire class produces, directs, and edits a larger sync-sound film project from a prize-winning student screenplay. After a preproduction period including script analysis and directing practice through scene work, students are either selected as or rotate as directors, cinematographers, and sound recordists. They prepare auditions, casting and production management and scheduling. Students may shoot in sync-sound 16mm film or video, working on a specific budget, and will co-edit the film, learning the Avid for digital editing, sound mixing, and so on. The final project is screened publicly at the end of the semester.

### FILM 674 Introduction to Film Analysis: Meaning and Value

Fall. 4 credits. Limited to 10 graduate students. D. Fredericksen.

An intensive consideration of the ways films generate meaning and of the ways we attribute meaning and value to films. Discussion ranges over commercial narrative, documentary, and personal film modes. Graduate students who intend to teach film at the undergraduate level are especially welcome. In addition to full participation in the work of FILM 274, graduate students will read and discuss in tutorials Dudley Andrew's *The Major Film Theories*, Francesco Casetti's *Theories of Film 1945–1995* and primary sources in film theory.

#### [FILM 699 German Film Theory (also GERST 699 and COM L 699) Fall. 4 credits. Offered occasionally; not

offered 2002–2003. D. Bathrick.]

## Dance

Faculty: J. Chu, A. Fogelsanger (director of undergraduate program in dance), J. Kovar, J. Morgenroth, J. Self, B. Suber.

The dance program offers courses in dance technique, improvisation, composition, performance, anatomical analysis of movement, dance technology, and the history, theory, and criticism of dance. Technique courses include introductory dance technique, modern dance at three levels, and ballet at three levels. (Other dance forms, such as Japanese Noh, Indian dance, and Javanese dance, are peridically offered. A variety of courses in other dance idioms, taken through the Physical Education program, supplement these offerings.) Technique courses develop strength, flexibility, coordination, and the ability to perceive and reproduce phrases of dance movement with clarity of rhythm, body design, and expression. The more advanced courses require the ability to perform complex phrases in various styles. Students may earn up to eight academic credits (one each semester) in technique courses. Students may also satisfy the physical education requirement by taking dance technique courses in the dance program. Students taking technique for academic credit must also register through their own colleges. Students who wish to enroll in nonintroductory level dance technique courses must attend a placement class. Placement classes are offered at the beginning of each semester. The schedule for all dance technique courses and placement classes is available in the main office of the Sheila W. and Richard J. Schwartz Center for the Performing Arts.

The faculty offer rehearsal and performance workshops in which they choreograph and rehearse original dances, performed in public concert. Admission to rehearsal and performance courses is by permission. Students may receive one academic credit (S-U grades only) when performing in student-faculty concerts by registering for THETR 155 (fall 2001) or DANCE 155 (spring 2002).

#### **Dance Major Requirements**

To be admitted to the major, students must have completed two technique courses in modern dance or ballet at level II or above, DANCE 210 (Beginning Dance Composition), and one semester DANCE 212 (Music Resources I), concurrently with DANCE 210. It is recommended that students take DANCE 201 (Dance Improvisation), the optional THETR 250 (Fundamentals of Theatre Design and Technology), and the optional music course before the junior year. The following requirements are expected of the major.

#### Prerequisites for the Major:

**DANCE 210** Beginning Dance Composition (offered every semester)

DANCE 212 Music Resources I (offered every semester) concurrently with DANCE 210

Two technique courses in modern dance or ballet at level II or above TOTAL

Requirements for the Major:	Credits
<b>Two</b> semesters each of ballet and modern dance (in addition to the prerequisite)	4
One academic or studio course in non-western form	0-4
DANCE 155 Rehearsal and Performance	ce 1
DANCE 201 Dance Improvisation (offered every spring semester)	1
<b>DANCE 233</b> Explorations in Movemen and Performance (offered every fall semester)	t . 1
m C 1 C 1 1	

Two courses from the following approved list selected in consultation with the student's advisor:

One of MUSIC 103 Intro to World Music I: Africa and the Americas, MUSIC 104 Intro to World Music II: Asia, MUSIC 105 Introduction to Music Theory (or substitute at the appropriate level), MUSIC 107 Hildegard to Handel, MUSIC 108 Mozart to Minimalism;

THETR 250 Fundamentals of Design and Technology;

**DANCE 258** Techno Soma Kinesics (offered every spring semester);

DANCE 319 Music, Dance & Light (offered alternate fall semesters, offered 2002)

[DANCE 413 Film and Performance (offered occasionally; not offered 2002-2003)].

DANCE 310-311 Intermediate Dance Composition (offered every semester)

[DANCE 312 The Moving Body (offered every fourth or fifth semester; not offered 2002-2003)]

[DANCE 314-315 Western Dance History (offered alternate years; not offered 2002-2003)]

DANCE 323 Music Resources II (offered every spring semester)

DANCE 418 Seminar in Dance Studies or other 400-level academic dance course (offered alternate years; offered spring 2003)]

DANCE 491 Senior Project (year-long course offered every year)

### Total

Students will be expected to perform in at least two concerts and to present at least two of their own dances, in addition to the senior project.

#### Honors

Students who have maintained a GPA of 3.5 in classes for the dance major and an average of 3.0 in all courses may elect to work for honors in dance during their senior year. They must consult with their adviser in the spring of their junior year about the honors program in dance.

## Courses

3

1

2

6

1

6-8

6

3

8

The courses DANCE 122, 125, 231, 232, 233, 303, 304, 306, 307, 308, 309, and 316 are colisted in the Department of Physical Education (PE) and the Dance major (DANCE) of the Department of Theatre, Film & Dance. Students may register for these courses either through PE in order to satisfy the university's physical education requirement or through DANCE for 0 or 1 academic credit, with a limit of 1 credit per semester and 8 credits total. Students may not get DANCE and PE credit simultaneously for the same course.

The technique course co-requisite for DANCE 210, 310, 311, 410, and 411 may be fulfilled by DANCE 122, 231, 232, 233, 303, 304, 306, 308, 309, and 316. Students who wish to enroll in a non-introductory level technique course (DANCE 231, 232, 303, 304, 306, 308, 309, and 316) must attend a placement class; preenrollment is not allowed. A placement class is held at the beginning of each semester; please contact the department registrar for more information.

#### DANCE 122 Dance Technique I (also PE 160)

Fall and spring. 0 to 1 credit. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. Fall: J. Chu and J. Kovar; spring: J. Chu and I. Morgenroth.

Entry level class. Covers the fundamentals of elementary dance training. Movement sequences focusing on rhythm, placement, and vitality of performance through an anatomically sound dance technique.

#### [DANCE 125 Introduction to Tap Dancing (also PE 170)

Fall. 0 to 1 credit. Satisfies the PE requirement if taken as PE. Not offered 2002-2003.

This introduction to tap dancing is designed for beginners who have no previous experience with the genre. We begin with basic heel, toe, and ball work before progressing logically to the shuffle, the flap, and their concomitant variations. As one of our goals in tap dancing is to realize (just a few of) the body's percussive possibilities, uninhibited ankles and a sense of rhythm are strongly recommended.]

DANCE 155	Rehearsal	and	Performance

2

4

6

42-48

Fall and/or spring. 1-2 credits. 1 credit per production experience per semester up to 2 credits per semester. Students must register for the course in the term in which the credit is earned; requests for retroactive credit will not be honored. Limited to students who are cast in faculty-choreographed dances. Students may add this course only after they have been assigned roles. S-U grades only.

Course includes the study, development, and performance of roles in departmental dance productions.

#### DANCE 231 Dance Technique II/ Ballet (also PE 161)

Spring. 0 to 1 credit. By placement only; no pre-enrollment. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. J. Chu. Beginning Ballet technique intended for students with some dance training. Includes all basic barre and centre work focusing on presence and presentation.

#### DANCE 232 Dance Technique II/Modern (also PE 162)

Fall and spring. 0 to 1 credit. By placement only; no pre-enrollment. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. Fall, B. Suber; spring, J. Self.

Beginning Modern technique intended for students with some dance training. Material covered includes specific spinal and center work with attention to rhythm, design, and movement expression.

#### DANCE 233 Explorations in Movement and Performance (also PE 168, VISST 233)

Fall. 0 or 1 credit. Limited to 16 students. Satisfies PE requirement if taken as PE. Attendance at dance concerts is required. J. Self.

A physically demanding exploration into various movement realms. Specific subjects covered are genderized movement, erotic power, spiritual power, ritual, and performance. Techniques include extensive use of breath, animal movement, improvisation, and group games. This course requires an eagemess to investigate the nature of performance and explore unfamiliar territory in movement.

## DANCE 303 Dance Technique Workshop (also PE 167, VISST 303) Fall. 0 to 1 credit. By placement only; no

pre-enrollment. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. J. Self.

This class goes beyond the conventional modern dance class and looks into the very nature of technical training for dancers by studying and investigating a variety of movement forms including yoga, improvisation, classical, and modern western dance.

#### DANCE 304 Dance Technique III/Ballet (also PE 163)

Spring. 0 to 1 credit. By placement only; no pre-enrollment. Satisfies the PE requirement if taken as PE. Attendance at

dance concerts is required. B. Suber. Intermediate Ballet technique. Work is done on strengthening the body through a movement technique emphasizing presence and musicality based on harmonic muscular control.

#### DANCE 306 Dance Technique III/Modern (also PE 164)

Fall and spring. 0 to 1 credit. By placement only; no pre-enrollment. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. Fall, J. Chu; spring, J. Kovar.

Intermediate modern technique focusing on rhythm, placement, and phrasing for students who are prepared to refine the skills of dancing. Students are challenged by complex phrases and musicality.

#### [DANCE 307 Asian Dance and Dance Drama (also PE 427)

Sec. 01. Indian Dance. 0, 1, or 3 credits. Satisfies the PE requirement if taken as PE. Not offered 2002-2003. Satisifes @ if taken for 3 credits. D. Bor.

This course is designed to give the student a practical working knowledge of Indian classical dance, specifically in the indigenous style of Orissa known as Odissi. The technique strengthens the body and develops grace, rhythmic expression, and dexterity that

can benefit all forms of dance.]

#### DANCE 308 Dance Technique IV/Modern (also PE 166, VISST 308)

Fall and spring. 0 to 1 credit. By placement only; no pre-enrollment. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. Fall, J. Self; spring, J. Chu.

Advanced and pre-professional Modern technique. A continuation of and supplement to DANCE 306.

# DANCE 309 Dance Technique IV/Ballet (also PE 165)

Fall. 0 to 1 credit. By placement only; no pre-enrollment. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. B. Suber.

Advanced and pre-professional Ballet technique. A continuation of and supplement to DANCE 304.

## [DANCE 316 Dance Technique IV/

Western Classical (also PE 172) Spring. 0 to 1 credit. By placement only; no pre-enrollment. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. Not offered 2002-2003.

This course is new in the sense that it blends contemporary modern technical forms and "borrowed" traditional ballet forms into a hybridized mix of "contemporary western classical" technique, emphasizing speed in the feet and legs, flexibility in the trunk and upper body, and the ability to quickly change and reverse directions. Includes extensive use of the barre.]

#### **Dance Composition**

#### DANCE 201 Dance Improvisation

Spring. 1 credit. Limited to 12 students. Attendance at dance concerts is required. I. Self.

When the body knows when, where, and how to move without prior direction, we call that improvisation. This course coaxes inspiration, seeking to make it reliable and to keep it surprising. It offers the possibility of "training" one's movement instincts to respond relevantly and with spontaneity. Solo and group forms are covered. Live musical accompaniment.

# DANCE 210 Beginning Dance Composition (also VISST 211) (IV)

Fall and spring. 3 credits. Concurrent enrollment in DANCE 212 and a dance technique class at the appropriate level is required. Attendance at dance concerts is required. Fall, B. Suber; spring, J. Morgenroth.

Weekly assignments in basic elements of choreography. Students compose and present short studies that are discussed and reworked. Problems are defined and explored through class improvisations. Informal showing at end of semester.

### DANCE 212 Music Resources I

Fall and spring. 1 credit. MUSIC 105 is recommended as a prerequisite but not required. Attendance at dance concerts and

music concerts is required. A. Fogelsanger. Intended to expand choreographers' music vocabulary and skills through a survey of contemporary music for dance, the study of music and dance collaborations, and rhythm studies. Includes discussing and writing about concerts, recordings, and videotapes. May include rehearsing and performing music or dance. Concentrates especially on the related ideas of counterpoint, polyphony, and simultaneity with regard to music, dance, the two considered together, and other arts singly and in combination. This is a co-requisite for DANCE 210 but other students are welcome.

# DANCE 310 Intermediate Dance

**Composition I (IV)** Fall and spring. 3 credits. Prerequisite: DANCE 210. Concurrent enrollment in a technique class at the appropriate level is required. Fall, J. Chu; spring, J. Self. Intermediate choreographic projects are critiqued in progress by faculty and peers. Consideration of design problems in costuming and lighting.

#### DANCE 311 Intermediate Dance **Composition II** (IV)

Fall and spring. 3 credits. Prerequisite: DANCE 310 and DANCE 323, though DANCE 323 may be taken concurrently. Attendance at dance concerts is required. Concurrent enrollment in a dance technique class at the appropriate level is required. Fall, J. Chu; spring, J. Self. A continuation of DANCE 310.

#### DANCE 323 Music Resources II

Spring. 2 credits. Prerequisite: DANCE 212. MUSIC 105 is strongly recommended as a prerequisite but not required. Attendance at dance concerts and music concerts is required. DANCE 212 and DANCE 323 together count as a course for purposes of graduation and satisfy Group IV distribution. A. Fogelsanger.

Intended to expand choreographers' conceptions of music and its uses for dance, including serving as a source for ideas of choreographic organization. A continuation of DANCE 212 in its survey of contemporary music for dance and the study of music and dance collaborations, but also includes examples from film and the plastic arts. Reading topics include criticism and aesthetics of dance, music, and the arts in general. Includes discussion of and writing about concerts, recordings, and videotapes. May include rehearsing and performing music or dance. Concentrates especially on minimalism and polystylism in music, dance, the two considered together, and other arts singly and in combination.

#### DANCE 410 Advanced Dance Composition I (IV)

Fall and spring. 3 credits. Prerequisite: DANCE 311. Concurrent enrollment in a technique class at the appropriate level is required. Attendance at dance concerts is required. Fall, J. Chu; spring, J. Self.

Students work on advanced choreographic problems, to be presented in performance. Work in progress is critiqued by faculty on a regular basis.

#### DANCE 411 Advanced Dance Composition II (IV)

Fall and spring. 3 credits. Prerequisite: DANCE 410. Concurrent enrollment in a technique class at the appropriate level. Attendance at dance concerts is required. Fall, J. Chu; spring, J. Self. A continuation of DANCE 410.

## DANCE 491 Senior Project in Dance

Fall and spring. 6 credits per semester. Prerequisite: DANCE 311. This course is limited to senior dance majors only. Students who take this course create a project in choreography and performance, dance, film or video, dance pedagogy, or other appropriate area agreed on with a member of the dance faculty. In addition, there is a 1-15 page paper which expands their work into a theoretical or historical context.

## History, Criticism, and Theory [DANCE 312 The Moving Body: Form and Function (IV)

Fall. 3 credits. Not offered 2002-2003. J. Morgenroth.

This course examines the bodily systems involved in human movement with particular attention to dance movement. Readings in texts on human anatomy, physiology and kinesiology. We will emphasize the relationships between bodily form and function. Includes guest lectures by experts in anatomy and health areas. Practical analyses of human movement. Demonstration of dissection.]

#### [DANCE 314 Western Dance History I: **Classical Ballet History as a** Reflection of Western Ideology 🦽 (IV)

Fall. 4 credits. Attendance at dance concerts is required. Not offered 2002-2003. B. Suber.

A critical survey of the history of classical ballet defining elements of classicism and determining why ballet is defined as classical. Through texts, videotapes, and live performance, the class explores how ballet has perpetuated or confronted social issues of race, class, gender, sexuality, the body, and abuse.]

#### [DANCE 315 Western Dance History II: History of Modern Dance (IV)

Spring. 4 credits. Attendance at dance concerts is required. Not offered 2002-2003. J. Chu.

This class studies the course of modern dance in the twentieth-century United States. We examine each generation of dancers, starting with Isadora Duncan and ending with performers emerging today. Issues of gender, cultural identity, elitism, and democracy are discussed.]

#### DANCE 418 Seminar in Dance Studies (also VISST 419) (IV)

Spring. 4 credits. Limited to 15 students. B. Suber.

Utopic Space, the Moving Body, and the Built Domain. Considering Space as defined from the source of the choreographed body, as well as through planned volumetric division and enclosure, this class compares and explores relationships between concepts of utopia existing in both the realm of dance and the realm of architecture. Through this premise, constructed utopic spaces are examined as they have been specifically used as tools for social, cultural, and political change, questioning concepts of progress, purity, harmony, proportion, universalism, primitivism, organicity, and taste.

### DANCE 490 Senior Paper in Dance

Fall and spring. 4 credits. Prerequisite: DANCE 418, senior standing. Attendance at dance concerts is required.

Under faculty direction, the students write a senior paper in dance history, criticism, or theory.

#### Interdisciplinary Courses

#### DANCE 258 Techno Soma Kinesics I: Technology and the Moving Body (also VISST 258) (IV)

Spring. 4 credits. Prerequisite: DANCE 201 or DANCE 210 (or equivalent) or permission of instructor; no freshmen. Limited to 5 students. B. Suber.

Expanding on the specific aesthetic of formal concert dance, this studio class explores new forms of performance dealing with the moving body. Computer programs such as human form animation software (Life Forms and Poser), digital sound production (Protools and Digital Performer), digital imaging (Photoshop and Premiere), as well as traditional lighting, set, and costume design and construction, and sound recording and design techniques, are all utilized to create experimental and/or conceptual multimedia performance/ installation work. Theoretical texts on the body and technology are also used.

#### DANCE 301 Mind and Memory: Explorations of Creativity in the Arts and Sciences (also ENGL 301, MUSIC 372, S HUM 301, THETR 301) (IV)

Spring. 4 credits.

Creativity is the attribute of the mind than enables us to make new combinations from often-familiar information, to perceive analogies and other linkages in seemingly unlike elements, to seek for synthesis. As is true of all learning, creativity is dependent on memory—a memory that is genetic and collective as well as personal and experimental. This course will explore the nature of creativity in science and art, indicating the differing requirements for discovery in the disparate disciplines while demonstrating the commonality that underlies the creative process and binds physicist or mathematician to poet, composer, or visual artist.

The course will present lectures by weekly guests from as many disciplines in the arts and sciences as possible, faculty members who will discuss the process underlying their research or their work as creative and performing artists. Members of the course are encouraged to enroll in another course or be engaged in an activity (research, artistic production, or performance) in which the insights gained in this class can be applied or tested. In addition, each section will engage in a common creative project. To further abet the active participation so necessary to learning, students will be asked to keep a journal, one that summarizes their understanding of, and response to, the lectures and readings from the required texts. Students will also be obliged to attend several public art exhibits or performances and write two papers.

## DANCE 319 Music, Dance, and Light (also THETR 319) (IV)

Fall. 3 credits. Attendance at dance concerts and music concerts is required. E. Intemann, A. Fogelsanger.

Artistic values, parameters, and concerns of music (sound design), dance, and lighting design are compared and contrasted, and the combination of design elements is analyzed in contemporary dance. Includes writing in response to readings, audio and video recordings, and performances. Some classes are devoted to creating sound, movement, and lighting.

#### DANCE 358 Techno Soma Kinesics II: The Moving Body and Technology (also VISST 358) (IV)

Spring. 4 credits. Prerequisite: DANCE 258 (or equivalent), or permission of instructor. Limited to 5 students. B. Suber.

Reflecting the aesthetic of formal concert dance, and expanding on the work accomplished in DANCE 258, students work with more complex elements of multimedia interactive software to create more extensive projects in the field of dance and technology. As opposed to the smaller experimental projects accomplished in DANCE 258, DANCE 358 students are expected to complete substantial projects in interactive multimedia gallery installation/performance work as well as interactive multimedia CD ROM's and web projects, all focused on the moving body.

## DANCE 391 Media Arts Studio I (also ART 391, MUSIC 391, FILM 391) (IV)

Fall or spring. 3 credits. Prerequisite: permission of instructor and junior-level standing required, minimum FILM 377 or 277, or DANCE 258. \$50 equipment fee (to be paid in class). Participating faculty include: M. Rivchin, FILM; M. Lyons, ART; D. Borden, MUSIC.

A collaborative interdisciplinary studio course in a variety of digital and electronic media, including art, architecture, music, dance, film, and video. Group projects and discussions also investigate the artistic and interactive potential of using arts spaces on campus, including virtual and performative events.

## Independent Study, Internships and Honors DANCE 300 Independent Study

Summer, fall, or spring. 1–4 credits. Independent Study in the dance allows students the opportunity to pursue special interests not treated in regularly scheduled courses. A faculty member, who becomes the student's instructor for the course, must approve the student's program of study and agree to provide continuing supervision of the work. Students must prepare a proposal for independent study which is available in 225 CT.

## DANCE 485 Undergraduate Internship

Fall, spring, or summer. 1–3 credits. To be eligible to enroll and receive credit for an internship, students must be majors in the department. Students are responsible for arranging their own internships in consultation with the faculty in their area of choice *prior* to preregistration for the semester in which the internship is planned to take place. To receive credit within this course, the internship must be unpaid. Students must follow the rules and procedures stated in the departmental internship form.

#### DANCE 495 Honors Research Tutorial

Fall or spring. 4 credits. Limited to Honors students in Dance.

This course is the first of a two-semester sequence (the second is DANCE 496) for seniors engaged in an honors project.

## DANCE 496 Honors Research Tutorial

Fall or spring, 4 credits. Limited to Honors students in Dance.

This course is the second of a two-semester sequence (the first is DANCE 495) for students engaged in an honors project.

## Tracks toward admission into the advanced undergraduate theatre program

## Design, Technology, and Stage Management

Recommended for individuals interested in a **Design**, **Technology**, or **Stage Management** track:

**THETR 250** Fundamentals of Theatre Design and Technology

**THETR 151 and 251** Production Lab I and II (at least one credit of each)

Recommended for Scenic Design emphasis: **THETR 340** Theatrical Drafting and Technical Drawing Studio

**THETR 351** Production Lab III (as Design Assistant)

THETR 354 Stagecraft Studio

THETR 364 Scene Design Studio

Upon admission to the program: **THETR 451** Production Lab IV (at least 1 credit)

Recommended for costume design or costume shop management emphasis:

THETR 351 Production Lab III (as Design Assistant)

**THETR 356** Costume Construction Studio **THETR 366** Costume Design Studio I

Upon admission to the program: **THETR 451** Production Lab IV (at least 1 credit)

Recommended for Lighting Design or costume shop management emphasis:

**THETR 252** Technical Production Studio I **THETR 351** Production Lab III (as Student Electrician)

**THETR 351** Production Lab III (as Design Assistant)

THETR 362 Lighting Design Studio I

Upon admission to the program: **THETR 451** Production Lab IV (at least 1 credit)

Recommended for Sound Design emphasis: THETR 251 Production Lab II (as Student Sound Technician)

**THETR 252** Technical Production Studio I **THETR 351** Production Lab III (as Design Assistant)

THETR 368 Sound Design Studio

Upon admission to the program: **THETR 451** Production Lab IV (at least 1 credit)

Recommended for Technical Direction emphasis:

**THETR 252** Technical Production Studio I **THETR 256** Technical Production Studio II **THETR 340** Theatrical Drafting and Technical Drawing Studio

**THETR 351** Production Lab III (as Assistant Technical Director)

THETR 354 Stagecraft Studio

Upon admission to the program: **THETR 451** Production Lab IV (at least 1 credit)

Recommended for Stage Management emphasis:

THETR 253 or 353 Stage Management Lab II or III—two assignments THETR 280 Introduction to Acting THETR 370 Stage Management Studio THETR 398 Fundamentals of Directing I

Upon admission to the program: THETR 453 Stage Management Lab IV

#### Directing

Recommended for individuals interested in a directing track: **THETR 151** and **THETR 251** Production Lab I and II (at least 2 combined credits) **THETR 240/THETR 241** Introduction to Western Theatre (1 Semester ONLY) **THETR 250** Fundamentals of Design and Technology **THETR 280** Introduction to Acting **THETR 398** Directing I **THETR 498** Directing II

#### Playwriting

Recommended for individuals interested in a playwriting track: THETR 240/THETR 241 Introduction to Western Theatre (1 Semester ONLY) THETR 250 Fundamentals of Design and Technology THETR 280 Introduction to Acting THETR 348 Playwriting THETR 349 Advanced Playwriting Students in the advanced undergraduate theatre program may also elect to take FILM 485 (Undergraduate Internship) in addition to

or in place of one production assignment.

## UKRAINIAN

See Department of Russian.

## URDU

See Department of Asian Studies.

## VIETNAMESE

See Department of Asian Studies.

## VISUAL STUDIES CONCENTRATION

Visual Studies is a concentration that provides students with an interdisciplinary approach to visual art, media (including digital works), performance, and perception. Faculty from departments throughout the college offer courses toward the concentration, drawing on such various disciplines as the history of art, film, literary studies, psychology, theatre, and others. Requirements for the concentration include selection of one from two possible core courses (the two core courses may be offered in tandem or on an alternating basis depending on the availability of staff), which introduce students to critical thinking about visual studies as well as close textual analysis in social and historical contexts. Responsibility for teaching the core course will rotate among faculty affiliated with the concentration, and the course will, as much as possible, entail interdepartmental collaboration in the form of team-teaching or visiting lectures. In addition to the core course, students must choose four Cornell courses from among the different categories of courses offered in the concentration. One of the four courses must include a significant component of practical work (such courses are listed under the category "Theory/ Practice"). No more than two courses from the concentration may be double-counted toward a student's major. All courses must be taken for a letter grade.

Students interested in pursuing the concentration should discuss it with their advisers, and then contact the director of the concentration. The director will register students in the concentration and assign each student an adviser selected from among the concentration's affiliated faculty. Advisers should forward a copy of each advisee's transcript to the director, indicating courses completed for the concentration.

## **Director and Affiliated Faculty**

Director, Brett de Bary, Asian Studies and Comparative Literature

## **Affiliated Faculty:**

David Bathrick, Theatre, Film, and Dance Robert Bertoia Art Susan Buck-Morss, Government James Cutting, Psychology David Field, Psychology Donald Fredericksen, Theatre, Film, and Dance Werner Goehner, Architecture Salah Hassan, Africana Studies Ellis Hanson, English Marcia Lyons, Art Laura Meixner, History of Art Kaja McGowan, History of Art Timothy Murray, English Marilyn Rivchin, Theatre, Film, and Dance Rebecca Schneider, Theatre, Film, and Dance Michael Steinberg, History Amy Villarejo, Theatre, Film, and Dance Geoff Waite, German Studies

## Visual Studies Concentration Course List

Core Course for 2002–2003

#### VISST 200 Introduction to Visual Studies (IV)

Spring. 4 credits. Requirements: two objective midterm exams; occasional listserve postings; two five page papers. T. Murray.

Introduction to Visual Studies will provide a broad introduction of modes of vision and the historical impact of visual images, visual structures, and visual space on culture, communication, and politics. The question of "how we see" will be discussed in terms of (1) procedures of sight (from optical machines to the psychology of vision and the philosophy of aesthetics); (2) spaces of vision (from landscapes to maps to cities); (3) objects of vision (from sacred sites to illuminated books to digital art); and (4) performances of vision (race, sexualities, ethnicities, cultures). Of importance to the course will be the practical and conceptual relation of twentieth-century visual technologies (photography, cinema, video, and computing) to their historical corollaries in the arts.

The course will draw on the visual traditions of both Western and non-Western societies and study texts that have defined the premises and analytic vocabularies of the visual. Through viewings, screenings, collaborative writing, and art projects, students will develop the critical skills necessary to appreciate how the approaches that define visual studies complicate traditional models of defining and analyzing art objects. Guest lecturers will occasionally address the class.

## **Concentration Categories**

#### 1. New Media

#### [VISST 336 French Film (also FRLIT 336 and THETR 341)

Spring. 4 credits. Offered alternate years; not offered 2002–2003. T. Murray. For description, see FRLIT 336.]

#### VISST 375 History and Theory of Commercial Narrative Film (also FILM 375)

Fall. 4 credits. Fee for screening expenses, \$10 (paid in class). A. Villarejo. For description, see FILM 375.

#### [VISST 376 History and Theory of Documentary and Experimental Film (also FILM 376)

4 credits. Fee for screening expenses, \$10 (paid in class). Not offered 2002–2003. A. Villarejo.

For description, see FILM 376.]

VISST 386 Third Cinema (also FILM 386) Spring. 4 credits. A. Villarejo. For description, see FILM 386.

### [VISST 395 Video: Art, Theory, Politics (also ENGL 395, THETR 395)

Fall. 4 credits. Offered alternate years; not offered 2002–2003. T. Murray. For description, see ENGL 395.]

VISST 433 Electronic Innovation (also ENGL 433) Fall. 4 credits. T. Murray.

For description, see ENGL 433.

VISST 435 African Cinema (also AS&RC 435 and ART H 478) Fall. 4 credits. S. Hassan. For description, see AS&RC 435.2.

## Interdisciplinary, Intermedia Studies

2. Interdisciplinary, Intermedia Stuydies

#### VISST 202 Art, Archaeology and Analysis (also ART H 200, ARCH 200, EAS 200, and PHYS 200) Spring. 4 credits. R. Kay.

For description, see EAS 200.

#### ART 272 Special Topics: Digital Multi-Media

Term to be announced. M. Lyons. For description, see ART 272.

#### ART H 400 Proseminar for Undergrads Fall. 4 credits. Prerequisite: History of Art Majors only. Enrollment is limited. K. McGowan.

For description, see ART H 400.

#### VISST 580 Dancing the Stone: Body, Memory and Architecture (also ART H 580)

Spring. 4 credits. Prerequisite: permission of instructor. K. McGowan. For description, see ART H 580.

#### VISST 651 The Sexual Child (also ENGL 651 and WOMNS 651)

Fall. 4 credits. E. Hanson. For description, see ENGL 651.

3. Perception, Cognitive Studies

#### VISST 305 Visual Perception (also PSYCH 305)

Fall. 4 credits. Prerequisite: PSYCH 205 or permission of instructor. Limited to 20 students. J. Cutting.

For description, see PSYCH 305.

#### VISST 342 Human Perception: Application to Computer Graphics, Art and Visual Display (also PSYCH 342)

Fall. 3 or 4 credits. The 4-credit option involves a term paper. Prerequisite: PSYCH 101 or permission of the instructor. PSYCH 205 strongly recommended. D. Field. For description, see PSYCH 342.

## VISST 347 Psychology of Visual

**Communications (also PSYCH 347)** Spring. 3 credits. Limited to 15 students. Prerequisites: PSYCH 101 and permission of instructor. J. Maas.

For description, see PSYCH 347.

#### MATH 451 Euclidean and Spherical Geometry

Fall. 4 credits. Prerequisite: MATH 221, 223, 231, or 294, or permission of instructor. D. Henderson.For description, see MATH 451.

#### VISST 475 Seminar in Cinema: Cognitive Film Theory (also FILM 475 and AM ST 475)

Fall. 4 credits. Limited to 20 students. D. Fredericksen. For description, see FILM 475.

#### VISST 492 Sensory Function (also BIONB 492 and PSYCH 492/692) Spring. 4 credits. Limited to 25 students.

Prerequisite: a 300-level course in biopsychology, or BIONB 222 or BIOAP 311, or equivalent. Students are expected to have a knowledge of elementary physics, chemistry, and behavior. S-U grades optional. B. Halpern. For description, see PSYCH 492.4.

## **Theory and Visuality**

4. Theory and Visuality

#### WOMNS 210 Introduction to Feminist Theory

Spring. 3 credits. A. Villarejo. For description, see WOMNS 210.

#### VISST 367 Visual Culture and Social Theory (also ART H 370, COM L 368, and GOVT 375)

Spring. 4 credits. S. Buck-Morss. For description, see COM L 368.

5. Performance and Visuality

#### VISST 233 Explorations in Movement (also DANCE 233 and PE 168)

Fall. 0 to 1 credit. Limited to 16 students. Satisfies PE requirement if taken as PE. Attendance at dance concerts is required. J. Self.

For description, see DANCE 233.

#### VISST 303 Dance Technique Workshop (also DANCE 303 and PE 167)

Fall. 0 to 1 credit. By placement only; no pre-enrollment. Satisfies PE requirement if taken as PE. Attendance at dance concerts is required. J. Self.

For description, see DANCE 303.

#### VISST 308 Modern Dance (also DANCE 308 and PE 166)

Fall. 0 to 1 credit. By placement only; no pre-enrollment. Satisfies PE requirement if taken as PE. Attendance at dance concerts is required. J. Self.

For description, see DANCE 308.

#### VISST 319 Music, Dance and Light (also DANCE 319 and THETR 319)

Fall. 3 credits. Attendance at dance and music concerts is required. A. Fogelsanger and E. Intemann.

For description, see THETR 319.

#### [VISST 403 Ritual, Play, Spectacle, Act: Performing Culture (also THETR 403/ 603)

Spring. 4 credits. Not offered in 2002–2003. R. Schneider.

For description, see THETR 403.]

#### VISST 445 Text Analysis for Production: How to Get from the Text Onto the Stage (also THETR 445)

Spring. 4 credits. Prerequisites: THETR 240 or THETR 281 or THETR 250 or THETR 398 or permission of the instructor. Limited to 15 students. B. Levitt. For description, see THETR 445.

VISST 446 Shakespeare in (Con)text (also THETR 446) Fall, 4 credits. Br. Levitt.

Fall. 4 credits. Br. Levitt. For description, see THETR 446.

#### VISUAL STUDIES CONCENTRATION 663

6. Visuality and Society

#### VISST 245 Renaissance and Baroque (also ART H 245)

Fall. 4 credits. Each student must enroll in a section. S. Benson. For description, see ART H 245.

VISST 361 European Cultural History 1750–1870 (also COM L 352 and HIST 362)

Fall. 4 credits. M. Steinberg. For description, see HIST 362.

#### VISST 362 Impressionism in Society (also ART H 362, WOMNS 361) Spring. 4 credits. L. Meixner.

For description, see ART H 362.

#### [VISST 363 European Cultural History 1870–1945 (also COM L 353 and HIST 363)

Spring. 4 credits. Not offered 2002–2003. M. Steinberg.

For description, see HIST 363.]

#### VISST 384 Introduction to Japanese Art (also ART H 384, ASIAN 381)

Fall. 4 credits. A. Pan. For description, see ART H 384.

#### VISST 394 The House and the World: Architecture of Asia (also ART H 395 and ASIAN 394) Spring. 4 credits. K. McGowan.

For description, see ART H 395.

#### VISST 407 The Museum and the Object (also ART H 407)

Fall. 4 credits. Prerequisites: permission of instructor. All classes meet in the Johnson Art Museum Study Gallery. A. Pan. For description, see ART H 407.

#### VISST 452 The Printed Image: The World on Paper (also ART H 452)

Fall. 4 credits. Not open to freshmen or sophomores without permission of instructor. S. Benson.

## For description, see ART H 452.

#### VISST 462 Topics in Early Modernism: America and the Machine Age (also ART H 462)

Spring. 4 credits. Prerequisite: permission of instructor. Auditing is not permitted. Not open to freshmen or sophomores. L. Meixner.

For description, see ART H 462.

#### 7. Theory/Practice

#### VISST 104 Introduction to World Music: Asia (also MUSIC 104)

Fall. 3 credits. 1-hour discussion to be arranged. No previous training in music required. M. Hatch.

For description, see MUSIC 104.

#### COGST 201 Cognitive Studies in Context Laboratory (also COM S 201 and PYSCH 201)

Spring. 4 credits. Prerequisite: COGST 101/ COM S 101/LING 101/PHIL 191/PSYCH 102. Knowledge of programming languages is not assumed. Limited to 24 students. D. Field.

For description, see COGST 201.

#### VISST 211 Beginning Dance Composition (also DANCE 210)

Fall and spring. 3 credits. Concurrent enrollment in DANCE 212 and a dance technique class at the appropriate level is required. Attendance at dance concerts is required. Fall, B. Suber; spring, I. Morgenroth.

For description, see DANCE 210.

#### VISST 244 Gamelan in Indonesian History and Cultures (also MUSIC 245)

Fall or spring, 3 credits. Permission of instructor. No previous knowledge of musical notation or performance experience required. M. Hatch. For description, see MUSIC 245.

#### VISST 258 Techno Soma Kinesics I: Technology and the Moving Body (also DANCE 258)

Spring, 4 credits, Prerequisite: DANCE 201 or DANCE 210 (or equivalent) or permission of instructor. No freshmen, Limited to 5 students, B. Suber.

For description, see DANCE 258.

#### VISST 335 Modern Western Drama, Modern Western Theater: Theory and Practice (also COM L 335 and THETR 335)

Fall. 4 credits. Staff. For description, see THETR 335.

#### VISST 358 Techno Soma Kinesics II: Technology and the Moving Body (also DANCE 358)

Spring, 4 credits. Prerequisite: DANCE 258 (or equivalent) or permission of instructor. Limited to 5 students. B. Suber. For description, see DANCE 358.

#### VISST 391 Media Studio I (also ART 391, FILM 391)

Fall. 3 credits. Prerequisite: permission of instructor and junior-level standing required, minimum FILM 377 or 277, or dance studio courses. \$50 equipment fee (to be paid in class). M. Rivchin, M. Lyons, D. Borden, J. Zissovic.
For description, see FILM 391.

VISST 398 Fundamentals of Directing I (also THETR 398)

Fall. 3 credits. Limited to 10 students. Prerequisite: permission of instructor. Special consideration is given to students who have completed THETR 280 or are intending to continue in the area of stage or screen directing. Students should see instructor one year in advance to sign up for the course. D. Feldshuh. For description, see THETR 398.

## COM S 417 Interactive Computer

**Graphics (also ARCH 374)** Fall. 3 credits. Prerequisite COM S 211. Staff.

For description, see COM S 417

## COM S 418 Practicum in Computer

**Graphics (also ARCH 375)** Fall. 2 credits. Enrollment limited. Prerequisites: COM S 212 and permission of instructor. Recommended: COM S 314. Corequisite: COM S 417. Staff. For description, see COM S 418.

#### VISST 419 Seminar in the History of Dance (also DANCE 418)

Spring. 4 credits. B. Suber. For description, see DANCE 418.

#### VISST 478 Intermediate Film and Video Projects, Narrative Workshop (also FILM 478)

Fall. 4 credits. Limited to 8 students.
Prerequisites: FILM 377 or 277. As minimum production: and THETR 383 (Screenwriting) or 398 (Directing I), and permission of instructor based on proposals. Equipment fee \$100 (paid in class). Film projects costs: \$500-\$1500. Video \$100-\$200. M. Rivchin.
For description, see FILM 478.

#### VISST 493 Advanced Film and Video Projects (also FILM 493)

Spring, 4 credits. Limited to 6–8 students. Prerequisite: minimum FILM 377 or 277. preference to those who have taken 477 or 478; recommended: 383 (Screenwriting) and 398 (Directing D. Equipment fee: \$100. Project costs: \$500–2000, unless group project is funded by the Melville Shavelson fund. M. Rivchin.

For description, see FILM 493.

Firebaugh, vice provost Robert L., Harris, Jr., vice provost Isaac Kramnick, vice provost Robert C. Richardson, vice provost John Silcox, vice provost

It is the policy of Cornell University actively to support equality of educational and employment opportunity. No person shall be denied admission to any educational program or activity or be denied employment on the basis of any legally prohibited discrimination involving, but not limited to, such factors as race, color, creed, religion, national or ethnic origin, sex, sexual orientation, age, or handicap. The university is committed to the maintenance of affirmative action programs that will assure the continuation of such equality of opportunity. Sexual harassment is an act of discrimination and, as such, will not be tolerated. Inquiries concerning the application of Title IX can be referred to the director of the Office of Workforce Diversity, Equity and Life Quality, Cornell University, 160 Day Hall, Ithaca, NY 14853-2801 (telephone: 607 255-3976; TDD: 607 255-7066).

Requests for information about services for Cornell faculty and staff members, applicants for employment, and visitors with disabilities who have special needs, as well as related questions or requests for special assistance, can be directed to the Office of Workforce Diversity, Equity and Life Quality, Cornell University, 160 Day Hall, Ithaca, NY 14853-2801 (telephone: 607 255-3976; TDD: 607 255-7066). Students with disabilities should contact Student Disability Services, Center for Learning and Teaching, Cornell University, 420 Computing and Communications Center, Ithaca, NY 14853-2601 (telephone: 607 254-4545; TDD: 607 255-7665).

For Cornell University directory information or general information, call 607 255-2000 or 607 254-INFO. The web page for 2002– 2003 Courses of Study has been made available at cuinfo.cornell.edu/Academic/Courses/.

## To obtain a copy of this catalog, please follow these guidelines:

If you are a prospective undergraduate student and don't have web access, please contact the Undergraduate Admissions Office, Cornell University, 410 Thurston Ave., Ithaca, NY 14850-2488, 607 255-5241.

If you are a prospective graduate student, please consult the listing of the course catalog on the web (see above for address).

If you are a currently enrolled student, please contact your college registrar.

All others please contact the Office of the University Registrar, Cornell University, B07 Day Hall, Ithaca, NY 14853-2801, 607 255-4232, e-mail: dsy1@cornell.edu
